NICE Certified for Avaya Aura(TM), Delivering

Maximized Performance and Reduced Costs for SIP-based Contact Center Environments

Extends long-standing NICE-Avaya partnership by delivering SIP-based contact center call recording

RA`ANANA, ISRAEL February 02, 2010 - NICE Systems Ltd. (NASDAQ: NICE), a leading global provider of advanced solutions that enable enterprises and security organizations to extract Insight from Interactions, transactions and surveillance to drive business performance, reduce risk and ensure safety, today announced that Avaya Inc., a leading global provider of business communications applications, systems and services, has presented NICE with the Avaya Certification Award for successful testing of NICE Perform 3.2, part of NICE SmartCenter, with Avaya Aura™ Communication Manager R5.2.1 and Avaya Aura™ Application Enablement Services 5.2.

NICE Perform 3.2 offers a robust solution with full support for recording in SIP-based environments. Companies standardizing on SIP across the organization can achieve cost savings by eliminating redundant network infrastructure and reducing resources through data center consolidation, enabling organizations to reduce call recording costs while increasing call capacity.

NICE Perform 3.2 with its ground-breaking SIP-based recording capabilities has been tested by Avaya's Certification Technical Team and has been officially accepted as certified in the following configurations: Trunk Side Total, DMCC (Dual Registration, Single Step Conference and Service Observe), and Passive Station Side VoIP.

The Avaya certification process, conducted by NICE and the Avaya Certification Technical Team, is a comprehensive test program which includes testing and analysis in the following areas: installation, functionality (including complex call scenario tests including multi-party conferencing and transfers), performance, interoperability (with Avaya applications and appliances as well as common desktop applications), and serviceability (including "rainy day" scenarios).

"We are extremely pleased to advance our support for Avaya`s IP-based contact center solutions with this certification of NICE applications for Avaya Aura," said Udi Ziv, President of NICE`s Enterprise Product Group. "The integration of our technologies constitutes the most innovative solution available today to enable our valued base of joint customers with a high-quality, cost-efficient IP-based contact center environment. This is an important evolution of our partnership and demonstrates another example of NICE`s collaboration with Avaya."

NICE solutions are sold worldwide through Avaya and Avaya channels. NICE is also a Platinum member of the Avaya DevConnect program - an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company's investment in its network.

About NICE SmartCenter

NICE SmartCenter is a suite of pre-packaged business solutions that address specific business issues, powered by best-in-class functional components spanning call recording, quality management, multi-channel interaction analytics, workforce management and performance management. The business solutions capture, analyze and impact customer interactions across a variety of channels, from audio, email and chat to social media and text messaging. The solutions include nine packaged offerings: Customer Churn Reduction, Sales Effectiveness, Customer Experience, Marketing Effectiveness, Collections Optimization, Quality Optimization, First Call Resolution Optimization, Average Handle Time Optimization, and Compliance Management. These solutions can be deployed on premise, in a hosted model, or via a managed service, and can be implemented stand-alone or fully integrated with customer relationship management and business intelligence solutions.

About NICE Systems

NICE Systems (NASDAQ: NICE) is the leading provider of Insight from Interactions solutions and value-added services, powered by advanced analytics of unstructured multimedia content - from telephony, web, radio and video communications. NICE's solutions address the needs of the enterprise and security markets, enabling organizations to operate in an insightful and proactive manner, and take immediate action to improve business and operational performance and ensure safety and security. NICE has over 24,000 customers in more than 150 countries, including more than 85 of the Fortune 100 companies. More information is available at <http://www.nice.com>.

Actimize, a NICE Company Positioned in Leaders Quadrant of Magic Quadrant for Web Fraud Detection

Evaluation Based on Completeness of Vision and Ability to Execute

NEW YORK - February 24, 2010 - Actimize, a NICE Systems (NASDAQ:NICE) company and the largest and broadest provider of a single financial crime, risk and compliance software platform for the financial services industry, today announced it has been positioned by Gartner, Inc. in the leaders quadrant in Gartner's Magic Quadrant for Web Fraud Detection [i] report.

"Fraudsters continued to step up their attacks against institutions with lucrative customer accounts," says author and Distinguished Gartner Analyst Avivah Litan. "Organizations with high-risk applications and sensitive customer data must look for vendors and technology that can fend off increasingly sophisticated and unpredictable attacks, such as the current round of man-in-the-browser attacks."

The Leaders quadrant contains vendors with well-established records in fraud detection. They have earned high scores from many of their customers for their ability to effectively stop fraud while minimizing inconvenience to end users. These vendors are financially able to expand through acquisitions as well as global marketing and business development efforts. They have a commitment to staying in and winning in this market and to developing their products and services to meet evolving customer needs. They have also demonstrated that they can support markets in different parts of the world, other than their home country. Still, even these market leaders have much work to do in improving their products, services and customer support.

"We have spent a lot of time with our clients in the past 12 months following recent attack waves on commercial banks and their payment infrastructure and it is clear that the velocity and sophistication of targeted online attacks against organizations continues to accelerate," said Amir Orad, president of Actimize Americas. "Actimize invests heavily to stay one step ahead of the bad guys. Our real-time, cross-channel anti-fraud solutions help our customers fight financial crime in the most effective manner. We are proud to be placed in the leader's quadrant, and are confident that we are very well positioned to remain at the forefront of the financial crimes and compliance markets by continually delivering innovative and effective solutions to our clients."

The full Gartner report is available, compliments of Actimize at www.actimize.com/gartnerwebfraudmq.

About the Magic Quadrant

The Magic Quadrant is copyrighted January 26, 2010 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

About Actimize
