COMPENSATION COMMITTEE REPORT ON EXECUTIVE COMPENSATION

The compensation committee of the Board currently consists of Ms. Campbell-White and Mr. McNamara, both of whom are outside directors of the Company. The compensation committee reviews and recommends to the Board the compensation and benefits of all officers of the Company and establishes and reviews general policies relating to compensation and benefits of employees of the Company. The following is the report of the compensation committee describing compensation policies and reasons therefore applicable to the Company's executive officers with respect to the compensation paid to such executive officers for the fiscal year ended December 31, 2001. The information contained in this report shall not be deemed to be "soliciting material" or to be "filed" with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933, as amended, or the 1934 Securities Exchange Act, as amended, except to the extent that the Company specifically incorporates such information by reference in such filing.

Compensation Philosophy and Review

The Company's executive compensation program is designed to align the interests of executives with the interests of stockholders and to reward executives for achieving corporate and individual objectives. The executive compensation program is also designed to attract and retain the services of qualified executives in the highly competitive medical device industry. Executive compensation currently consists of a base salary, long-term equity incentives, annual incentive plans and other compensation and benefit programs generally available to other employees.

The compensation committee has considered the potential impact of Section 162(m) of the Internal Revenue Code on the compensation paid to the Company's executive officers. Section 162(m) disallows a tax deduction for any publicly-held corporation for individual compensation exceeding \$1.0 million in any taxable year for any of the executive officers, unless compensation is performance-based. In general, it is the compensation committee's policy to qualify, to the maximum extent possible, its executives' compensation for deductibility under applicable tax laws.

Base Salaries

Base salary levels for the Chief Executive Officer and other executive officers are intended to compensate executives competitively within the medical device industry. Base salaries are determined on an individual basis by evaluating each executive's scope of responsibility, past performance, prior experience and data on prevailing compensation levels in relevant markets for executive talent. The compensation committee reviews base salaries for executives annually.

Long-Term Equity Incentives

Edgar Filing: THERASENSE INC - Form DEF 14A

The Company provides long-term equity incentives to its executive officers and to all other employees through the grant of stock options under its stock option plans. The purpose of granting stock options is to create a direct link between compensation and the long-term performance of the Company. Stock options are generally granted at an exercise price equal to 100% of the fair market on the date of grant and have a ten-year term provided that the optionee is still employed by the Company. For the initial stock option grant to an executive officer, the stock option generally vests 25% after the first year of employment with the Company and monthly thereafter for the following 36 months. For subsequent stock option grants to an executive officer, the stock option generally vests in installments over 48 months from the date of grant. Because the receipt of value by an executive officer under a stock option is dependent upon an increase in the price of the Company's Common Stock, this portion of the executives' compensation is directly aligned with an increase in stockholder value. The primary stock options granted to executive officers are generally in conjunction with the executive officer's acceptance of employment with the Company. When determining the number of stock options to be awarded to an executive officer, the compensation committee considers the executive's current contribution to the Company's performance, the executive officer's anticipated contribution in meeting the Company's long-term

16

strategic performance goals, and comparisons to formal and informal surveys of executive stock option grants made by other medical device companies. The compensation committee also reviews stock option levels upon the promotion of officers and other employees.

Annual Incentive Plans

The Company provides for annual cash bonuses and grants of long-term equity incentives. These annual incentives are available to executive officers and all other employees, and are intended to provide a direct link between employee compensation and the achievement of corporate and individual objectives. An additional objective of the annual incentives is to make significant distinctions between the Company's top performers and others. Each individual's target bonus for cash and stock is based on a percentage of base salary and initial stock option grant, respectively. At the beginning of each year the Company sets certain corporate goals (including financial performance goals). In addition, each employee has individual goals to support the achievement of the corporate goals. At the end of the year, performance of the Company against the corporate goals is assessed and this determines the total available cash and stock option pools, if any. Individual bonuses from these two pools are determined based on the achievement of individual goals and any additional contributions toward achieving the corporate goals. Assuming the Company meets its objectives: top performers can receive amounts in excess of their target bonus; average performers may receive less than their target bonus; and some employees may not receive a bonus. Based upon achievement toward the Company's corporate goals and each individual's contribution, the compensation committee recommended (and the full Board granted) stock option grants in August 2001 and December 2001 for the Chief Executive Officer of 350,000 shares and for the other Named Executive Officers of an aggregate of 249,300 shares. These options vest monthly over 48 months from the date of grant.

Other Compensation

The Company's executive officers are also eligible to participate in compensation and benefit programs generally available to other employees, including the Company's Employee Stock Purchase Plan. In addition, from time to time, executive officers have received sign-on bonuses or other bonuses based

Edgar Filing: THERASENSE INC - Form DEF 14A

on extraordinary effort.

Compensation for Chief Executive Officer

W. Mark Lortz is President, Chief Executive Officer and Chairman of the Board. The compensation committee reviews Mr. Lortz's compensation annually using the same criteria and policies as are employed for other executive officers. Mr. Lortz's compensation was initially determined in part by the terms of an employment agreement entered into upon his acceptance of employment with the Company in December 1997. However, the compensation committee retains the discretion to increase Mr. Lortz's compensation to levels above those provided in the employment agreement. Mr. Lortz received an increase in base salary from \$250,000 during fiscal 2000 to \$265,465 for fiscal 2001. The compensation committee based its decision to increase Mr. Lortz's base salary on a variety of factors, including performance of the Company during fiscal 2000, his leadership skills, the increasing scope and responsibility of the Chief Executive Officer's office and comparisons of chief executive officer compensation levels for companies of similar size and maturity. The compensation committee also focused on the performance of the Company during the 2000 fiscal year in setting base salary for the 2001 fiscal year, noting that the Company had obtained FDA clearance for FreeStyle and successfully launched it. Mr. Lortz received bonuses under the annual incentive plan equal to 60% of his base salary for fiscal 2001, or \$159,250, in recognition of his significant contributions in leading the Company to its achievements in the 2001 fiscal year, including completion of the Company's initial public offering, a new product introduction, and a significant increase in FreeStyle sales. In addition, he received stock option grants in fiscal 2001 as described above.
