PART I

ITEM 1. BUSINESS

Overview

Wintrust Financial Corporation, an Illinois corporation (“we,” “Wintrust” or “the Company”), which was incorporated in 1992, is a financial holding company based in Rosemont, Illinois, with total assets of approximately \$22.9 billion as of December 31, 2015. We conduct our businesses through three segments: community banking, specialty finance and wealth management. All segment measurements discussed below are based on the reportable segments and do not reflect intersegment eliminations.

We provide community-oriented, personal and commercial banking services to customers located in the Chicago metropolitan area and in southern Wisconsin (“our market area”) through our fifteen wholly owned banking subsidiaries (collectively, the “banks”), as well as the origination and purchase of residential mortgages for sale into the secondary market through Wintrust Mortgage, a division of Barrington Bank and Trust Company, N.A. (“Barrington Bank”). For the years ended December 31, 2015, 2014 and 2013, the community banking segment had net revenues of \$714 million, \$621 million and \$599 million, respectively, and net income of \$102 million, \$99 million and \$88 million, respectively. The community banking segment had total assets of \$19.3 billion, \$16.7 billion and \$15.1 billion as of December 31, 2015, 2014 and 2013, respectively. The community banking segment accounted for approximately 77% of our consolidated net revenues for the year ended December 31, 2015.

We provide specialty finance services, including financing for the payment of commercial insurance premiums and life insurance premiums (“premium finance receivables”) on a national basis through our wholly owned subsidiary, First Insurance Funding Corporation (“FIFC”) and in Canada through our premium finance company, First Insurance Funding of Canada (“FIFC Canada”), and short-term accounts receivable financing and outsourced administrative services through our wholly owned subsidiary, Tricom, Inc. of Milwaukee (“Tricom”). For the years ended December 31, 2015, 2014 and 2013, the specialty finance segment had net revenues of \$119 million, \$115 million and \$105 million, respectively, and net income of \$42 million, \$41 million and \$38 million, respectively. The specialty finance segment had total assets of \$3.1 billion, \$2.8 billion and \$2.5 billion as of December 31, 2015, 2014 and 2013, respectively. The specialty finance segment accounted for 13% of our consolidated net revenues for the year ended December 31, 2015.

We provide a full range of wealth management services primarily to customers in our market area through three separate subsidiaries, The Chicago Trust Company, N.A. (“CTC”), Wayne Hummer Investments, LLC (“WHI”) and Great Lakes Advisors, LLC (“Great Lakes Advisors”). For the years ended December 31, 2015, 2014 and 2013, the wealth management segment had net revenues of \$93 million, \$89 million and \$80 million, respectively, and net income of \$13 million, \$12 million and \$11 million, respectively. The wealth management segment had total assets of \$549 million, \$520 million and \$494 million as of December 31, 2015, 2014 and 2013, respectively. The wealth management segment accounted for 10% of our consolidated net revenues for the year ended December 31, 2015.

Our Business

Community Banking

Through our banks, we provide community-oriented, personal and commercial banking services to customers located in our market area. Our customers include individuals, small to mid-sized businesses, local governmental units and institutional clients residing primarily in the banks' local service areas. The banks have a strategy to provide comprehensive community-focused banking services. In keeping with this strategy, the banks provide highly personalized and responsive service, a characteristic of locally-owned and managed institutions. As such, the banks compete for deposits principally by offering depositors a variety of deposit programs, convenient office locations, hours and other services, and for loan originations primarily through the interest rates and loan fees they charge, the efficiency and quality of services they provide to borrowers and the variety of their loan and cash management products. Using our decentralized corporate structure to our advantage, we offer our MaxSafe[®] deposit accounts, which provide customers with expanded Federal Deposit Insurance Corporation (“FDIC”) insurance coverage by spreading a customer's deposit across our fifteen banks. This product differentiates our banks from many of our competitors that have consolidated their bank charters into branches. We also have a downtown Chicago office that

works with each of our banks to capture commercial and industrial business. Our commercial and industrial lenders in our downtown office operate in close partnership with lenders at our community banks. By combining our expertise in the commercial and industrial sector with our high level of personal service and full suite of banking products, we believe we create another point of differentiation from both our larger and smaller competitors. Our banks also offer home equity, consumer, and real estate loans, safe deposit facilities, ATMs, internet banking and other innovative and traditional services specially tailored to meet the needs of customers in their market areas.

We developed our banking franchise through a combination of de novo organization and the purchase of existing bank franchises. The organizational efforts began in 1991, when a group of experienced bankers and local business people identified an unfilled niche in the Chicago metropolitan area retail banking market. As large banks acquired smaller ones and personal service was subjected to consolidation strategies, the opportunity increased for locally owned and operated, highly personal service-oriented banks. As a result, Lake Forest Bank and Trust Company (“Lake Forest Bank”) was founded in December 1991 to service the Lake Forest and Lake Bluff communities.

We now own fifteen banks, including nine Illinois-chartered banks: Lake Forest Bank, Hinsdale Bank and Trust Company (“Hinsdale Bank”), Wintrust Bank, Libertyville Bank and Trust Company (“Libertyville Bank”), Northbrook Bank & Trust Company (“Northbrook Bank”), Village Bank & Trust (“Village Bank”), Wheaton Bank & Trust Company (“Wheaton Bank”), State Bank of the Lakes and St. Charles Bank & Trust Company (“St. Charles Bank”). In addition, we have one Wisconsin-chartered bank, Town Bank, and five nationally chartered banks: Barrington Bank, Crystal Lake Bank & Trust Company, N.A. (“Crystal Lake Bank”), Schaumburg Bank & Trust Company, N.A. (“Schaumburg Bank”), Beverly Bank & Trust Company, N.A. (“Beverly Bank”) and Old Plank Trail Community Bank, N.A. (“Old Plank Trail Bank”). As of December 31, 2015, we had 152 banking locations.

Each bank is subject to regulation, supervision and regular examination by: (1) the Secretary of the Illinois Department of Financial and Professional Regulation (“Illinois Secretary”) and the Board of Governors of the Federal Reserve System (“Federal Reserve”) for Illinois-chartered banks; (2) the Office of the Comptroller of the Currency (“OCC”) for nationally-chartered banks; or (3) the Wisconsin Department of Financial Institutions (“Wisconsin Department”) and the Federal Reserve for Town Bank.

We also engage in the retail origination and correspondent purchase of residential mortgages through Wintrust Mortgage. Most originated and purchased loans sold into the secondary market are sold with servicing released. Certain originated loans are sold to the Company's banks with servicing remaining within Wintrust Mortgage operations. Wintrust Mortgage maintains retail mortgage offices in a number of states, with the largest concentration located in the Chicago, Minneapolis and Los Angeles metropolitan areas.

We also offer several niche lending products through several of the banks. These include Barrington Bank's Community Advantage program, which provides lending, deposit and cash management services to condominium, homeowner and community associations; Hinsdale Bank's mortgage warehouse lending program, which provides loan and deposit services to mortgage brokerage companies located predominantly in the Chicago metropolitan area; and Lake Forest Bank's franchise lending program, which provides lending to restaurant franchisees. Other niches offered throughout our banking franchise include Wintrust Commercial Finance, which offers direct leasing opportunities; Wintrust Business Credit, which specializes in asset-based lending for middle-market companies; Wintrust SBA Lending, which is dedicated to offering expertise in Small Business Administration loans; Wintrust Commercial Real Estate, which concentrates on real estate lending solutions including commercial mortgages and construction loans; and Wintrust Government, Non-Profit & Hospital, which focuses on financial solutions for mission-based organizations such as hospitals, non-profits, educational institutions and local government operations.

Specialty Finance

We conduct our specialty finance businesses through non-bank subsidiaries. Our wholly owned subsidiary, FIFC, engages in the premium finance receivables business, our most significant specialized lending niche, including commercial insurance premium finance and life insurance premium finance. We also engage in commercial insurance premium finance in Canada through our wholly owned subsidiary FIFC Canada.

In their commercial insurance premium finance operations, FIFC and FIFC Canada make loans to businesses to finance the insurance premiums they pay on their commercial insurance policies. Approved medium and large insurance agents and brokers located throughout the United States and Canada assist FIFC and FIFC Canada, respectively, in arranging each commercial premium finance loan between the borrower and FIFC or FIFC Canada, as the case may be. FIFC or FIFC Canada evaluates each loan request according to its own underwriting criteria including the amount of the down payment on the insurance policy, the term of the loan, the credit quality of the insurance company providing the financed insurance policy, the interest rate, the borrower's previous payment history, if any, and other factors deemed appropriate. Upon approval of the loan by FIFC or FIFC Canada, as the case may be,

the borrower makes a down payment on the financed insurance policy, which is generally done by providing payment to the agent or broker, who then forwards it to the insurance company. FIFC or FIFC Canada may either forward the financed amount of the remaining policy premiums directly to the insurance carrier or to the agent or broker for remittance to the insurance carrier on FIFC's or FIFC Canada's behalf. In some cases the agent or broker may hold our collateral, in the form of the proceeds of the unearned insurance premium from the insurance company, and forward it to FIFC or FIFC Canada in the event of a default by the borrower. This lending involves relatively rapid turnover of the loan portfolio and high volume of loan originations. Because the agent or broker is the primary contact to the ultimate borrowers who are located nationwide and because proceeds and our collateral may be handled by the agent or brokers during the term of the loan, FIFC and FIFC Canada may be

more susceptible to third party (i.e., agent or broker) fraud. The Company performs various controls and procedures including ongoing credit and other reviews of the agents and brokers as well as performs various internal audit steps to mitigate against the risk of any fraud.

The commercial and property premium finance business is subject to regulation in the majority of states. Regulation typically governs notices to borrowers prior to cancellation of a policy, notices to insurance companies, maximum interest rates and late fees and approval of loan documentation. FIFC is licensed or otherwise qualified to provide financing of commercial insurance policies in all 50 states, the District of Columbia and Puerto Rico, and FIFC's compliance department regularly monitors changes to regulations and updates policies and programs accordingly. FIFC also finances life insurance policy premiums generally used for estate planning purposes of high net-worth borrowers. These loans are originated directly with the borrowers with assistance from life insurance carriers, independent insurance agents, financial advisors and legal counsel. The cash surrender value of the life insurance policy is the primary form of collateral. In addition, these loans often are secured with a letter of credit, marketable securities or certificates of deposit. In some cases, FIFC may make a loan that has a partially unsecured position. The life insurance premium finance business is governed under banking regulations but is not subject to additional systemic regulation. FIFC's compliance department regularly monitors the regulatory environment and the company's compliance with existing regulations. FIFC maintains a policy prohibiting the knowing financing of stranger-originated life insurance and has established procedures to identify and prevent the company from financing such policies. While a carrier could potentially put at risk the cash surrender value of a policy, which serves as FIFC's primary collateral, by challenging the validity of the insurance contract for lack of an insurable interest, FIFC believes it has strong counterclaims against any such claims by carriers, in addition to recourse to borrowers and guarantors as well as to additional collateral in certain cases.

Premium finance loans made by FIFC and FIFC Canada are primarily secured by the insurance policies financed by the loans. These insurance policies are written by a large number of insurance companies geographically dispersed throughout the United States and Canada. Our premium finance receivables balances finance insurance policies that are spread among a large number of insurers, however one of the insurers represents approximately 14% of such balances and two additional insurers each represent approximately 5% of such balances. FIFC and FIFC Canada consistently monitor carrier ratings and financial performance of our carriers. In the event ratings fall below certain levels, most of FIFC's life insurance premium finance policies provide for an event of default and allow FIFC to have recourse to borrowers and guarantors as well as to additional collateral in certain cases. For the commercial premium finance business, the term of the loans is sufficiently short such that in the event of a decline in carrier ratings, FIFC or FIFC Canada, as the case may be, can restrict or eliminate additional loans to finance premiums to such carriers. The majority of premium finance receivables are purchased by the banks in order to more fully utilize their lending capacity as these loans generally provide the banks with higher yields than alternative investments.

Through our wholly owned subsidiary Tricom, we provide high-yielding, short-term accounts receivable financing and value-added, outsourced administrative services, such as data processing of payrolls, billing and cash management services to the temporary staffing industry. Tricom's clients, located throughout the United States, provide staffing services to businesses in diversified industries. During 2015, Tricom processed payrolls with associated client billings of approximately \$660 million and contributed approximately \$10.6 million to our revenue, net of interest expense. Net revenue is based on our reportable segments and does not reflect intersegment eliminations.

In 2015, our commercial premium finance operations, life insurance premium finance operations and accounts receivable finance operations accounted for 58%, 33% and 9%, respectively, of the total revenues of our specialty finance business.

Wealth Management Activities

We offer a full range of wealth management services through three separate subsidiaries, trust and investment services, asset management and securities brokerage services. These subsidiaries are subject to regulation by the Securities and Exchange Commission (the "SEC") and the Financial Industry Regulatory Authority ("FINRA"). Great Lakes Advisors, our registered investment adviser with locations in downtown Chicago and Safety Harbor, Florida as well as in various banking offices of our fifteen banks, provides money management services and advisory services to individuals, institutions, and municipal and tax-exempt organizations. Great Lakes Advisors also provides

portfolio management and financial supervision for a wide range of pension and profit-sharing plans as well as money management and advisory services to CTC. At December 31, 2015, the Company's wealth management subsidiaries had approximately \$21.2 billion of assets under administration, which includes \$2.6 billion of assets owned by the Company and its subsidiary banks.

CTC, our trust subsidiary, offers trust and investment management services to clients through offices located in downtown Chicago and at various banking offices of our fifteen banks. CTC is subject to regulation, supervision and regular examination by the OCC.

WHI, our registered broker/dealer subsidiary which has been operating since 1931, provides a full range of private client and securities brokerage services to clients located primarily in the Midwest. WHI is headquartered in downtown Chicago, operates an office in Appleton, Wisconsin, and has established branch locations in offices at a majority of our banks. WHI also provides a full range of investment services to clients through a network of relationships with community-based financial institutions primarily located in Illinois.

Strategy and Competition

Historically, we have executed a growth strategy through branch openings and de novo bank formations, expansion of our wealth management and premium finance business, development of specialized earning asset niches and acquisitions of other community-oriented banks or specialty finance companies. After we made a decision to slow our growth from 2006 until 2008 due to unfavorable credit spreads, loosened underwriting standards by many of our competitors, and intense price competition, we raised capital and began to increase our lending and deposits in late 2008. From 2009 through 2012, this capital as well as additional capital raised during that period allowed us to be in a position to take advantage of opportunities in a disrupted marketplace by:

- Increasing our lending as other financial institutions pulled back;

- Hiring quality lenders and other staff away from larger and smaller institutions that may have substantially deviated from a customer-focused approach or who may have substantially limited the ability of their staff to provide credit or other services to their customers;

- Investing in dislocated assets such as the purchased life insurance premium finance portfolio, the Canadian commercial premium finance portfolio, trust and investment management companies and certain collateralized mortgage obligations; and

- Purchasing banks and banking assets either directly or through the FDIC-assisted process in areas key to our geographic expansion.

The Company has employed certain strategies since 2013 to manage net income amid an environment characterized by low interest rates and increased competition. In general, the Company has taken a steady and measured approach to grow strategically and manage expenses. Specifically, the Company has:

- Leveraged its internal loan pipeline and external growth opportunities to grow earnings assets to increase net interest income;

- Continued efforts to reduce interest costs by improving our funding mix;

- Written call option contracts on certain securities as an economic hedge to enhance the securities' overall return by using fees generated from these options and mitigate overall interest rate risk;

- Entered into mirror-image swap transactions to both satisfy customer preferences and maintain variable rate exposure;

- Purchased interest rate cap derivatives to offset margin compression caused by the repricing of variable rate liabilities and lack of repricing of fixed rate loans and securities in a potential rising rate environment;

- Completed strategic acquisitions to expand presence in existing and complimentary markets;

- Focused on cost control and leveraging our current infrastructure to grow without a commensurate increase in operating expenses;

- Expanded the Wintrust Commercial Finance direct leasing niche in 2015; and

- Further strengthened our capital position in 2015 and raised net proceeds of \$120.8 million through the issuance and sale of non-cumulative perpetual preferred stock;

Our strategy and competitive position for each of our business segments is summarized in further detail, below.

Community Banking

We compete in the commercial banking industry through our banks in the communities they serve. The commercial banking industry is highly competitive and the banks face strong direct competition for deposits, loans and other financial related services. The banks compete with other commercial banks, thrifts, credit unions, stockbrokers, government-sponsored entities, mutual fund companies, insurance companies, factoring companies and other non-bank financial companies. Some of these competitors are local, while others are statewide or nationwide.

As a mid-size financial services company, we expect to benefit from greater access to financial and managerial resources than our smaller local competitors while maintaining our commitment to local decision-making and to our community banking philosophy. In particular, we are able to provide a wider product selection and larger credit facilities than many of our smaller competitors, and we believe our service offerings help us in recruiting talented staff. We continue to add lenders throughout the community banking organization, many of whom have joined us because of our ability to offer a range of products and level of services which compete effectively with both larger and smaller market participants. We have continued to expand our product delivery systems, including a wide variety of electronic banking options for our retail and commercial customers which allow us to provide a level

of service typically associated with much larger banking institutions. Consequently, management views technology as a great equalizer to offset some of the inherent advantages of its significantly larger competitors. Additionally, we have access to public capital markets whereas many of our local competitors are privately held and may have limited capital-raising capabilities.

We also believe we are positioned to compete effectively with other larger and more diversified banks, bank holding companies and other financial services companies due to the multi-chartered approach that pushes accountability for building a franchise and a high level of customer service down to each of our banking franchises. Additionally, we believe that we provide a relatively complete portfolio of products that is responsive to the majority of our customers' needs through the retail and commercial operations supplied by our banks, and through our mortgage and wealth management operations. The breadth of our product mix allows us to compete effectively with our larger competitors, while our multi-chartered approach with local and accountable management provides for what we believe is superior customer service relative to our larger and more centralized competitors.

Wintrust Mortgage competes with large mortgage brokers as well as other banking organizations. Consolidation, on-going investor push-backs, enhanced regulatory guidance and the promise of equal oversight for both banks and independent lenders have created challenges for small and medium-sized independent mortgage lenders. Wintrust Mortgage's size, bank affiliation, regulatory competency, branding, technology, business development tools and reputation make the firm well positioned to compete in this environment. In 2013, we expanded our mortgage banking business through the acquisition of certain assets and liabilities of Surety Financial Services of Sherman Oaks, California. Additionally, in 2015, we have increased the amount of loans sold with servicing retained, including those loans sold to the Company's banks with servicing remaining within Wintrust Mortgage operations. While earnings will fluctuate with the rise and fall of long-term interest rates, we expect that mortgage banking revenue will be a continuous source of revenue for us and our mortgage lending relationships will continue to provide franchise value to our other financial service businesses.

In 2015, we furthered our growth strategy by purchasing, through certain of our banking subsidiaries, additional banking locations. We acquired four new banking locations in southern Wisconsin and sixteen new banking locations in the Chicago metropolitan area. In addition, the Company opened six new branch locations in the Chicago metropolitan area. However, the Company closed fourteen banking locations in 2015 as part of the integration of operations and the identification of under-performing locations. We believe that strategic acquisitions and branch expansion will allow us to grow into contiguous markets that we currently do not service and expand our footprint.

Specialty Finance

FIFC encounters intense competition from numerous other firms, including a number of national commercial premium finance companies, companies affiliated with insurance carriers, independent insurance brokers who offer premium finance services and other lending institutions. Some of its competitors are larger and have greater financial and other resources. FIFC competes with these entities by emphasizing a high level of knowledge of the insurance industry, flexibility in structuring financing transactions, and the timely funding of qualifying contracts. We believe that our commitment to service also distinguishes us from our competitors. Additionally, we believe that FIFC's acquisition of a large life insurance premium finance portfolio and related assets in 2009 enhanced our ability to market and sell life insurance premium finance products. FIFC Canada competes with one national commercial premium finance company and a few regional providers. In 2014, FIFC Canada expanded its operations through the acquisition of two affiliated Canadian insurance premium funding and payment services companies.

Tricom competes with numerous other firms, including a small number of similar niche finance companies and payroll processing firms, as well as various finance companies, banks and other lending institutions. Tricom's management believes that its commitment to service distinguishes it from competitors.

Wealth Management Activities

Our wealth management companies (CTC, WHI and Great Lakes Advisors) compete with larger wealth management subsidiaries of other larger bank holding companies as well as with other trust companies, brokerage and other financial service companies, stockbrokers and financial advisors. We believe we can successfully compete for trust, asset management and brokerage business by offering personalized attention and customer service to small to midsize businesses and affluent individuals. We continue to recruit and hire experienced professionals from the larger Chicago

area wealth management companies, which is expected to help in attracting new customer relationships.

Supervision and Regulation

General

Our business is subject to extensive regulation and supervision under federal and state laws and regulations. The Company is a bank holding company under the Bank Holding Company Act of 1956, as amended (the “BHC Act”), subject to regulation,

supervision, and examination by the Federal Reserve. Our subsidiary banks are subject to regulation, supervision, and examination by the agency that granted their banking charters: (1) the OCC for Barrington Bank, Crystal Lake Bank, Schaumburg Bank, Beverly Bank and Old Plank Trail Bank; (2) the Illinois Secretary for Lake Forest Bank, Hinsdale Bank, Wintrust Bank, Libertyville Bank, Northbrook Bank, Village Bank, Wheaton Bank, State Bank of the Lakes and St. Charles Bank; and (3) the Wisconsin Department for Town Bank. Our Illinois and Wisconsin state-chartered bank subsidiaries are also members of the Federal Reserve System, subject to supervision and regulation by the Federal Reserve as their primary federal regulator. The deposits of all of our subsidiary banks are insured by the Deposit Insurance Fund (“DIF”) and, as such, the FDIC has additional oversight authority over the banks. The supervision, regulation and examination of banks and bank holding companies by bank regulatory agencies are intended primarily for the protection of depositors, the DIF, and the banking system as a whole, rather than shareholders of banks and bank holding companies, and in some instances may be contrary to their interests. Our non-bank subsidiaries generally are subject to regulation by their functional regulators, including state finance and insurance agencies, the SEC, FINRA, the Chicago Stock Exchange, the OCC, as well as by the Federal Reserve. These federal and state laws, and the regulations of the bank regulatory agencies issued under them, affect, among other things, the scope of business, the kinds and amounts of investments banks may make, reserve requirements, capital levels relative to operations, the nature and amount of collateral for loans, the establishment of branches, the ability to merge, consolidate and acquire, dealings with insiders and affiliates and the payment of dividends. The regulatory agencies generally have broad discretion to impose restrictions and limitations on the operations of a regulated entity where the agencies determine, among other things, that such operations are unsafe or unsound, fail to comply with applicable law or are otherwise inconsistent with laws and regulations or with the supervisory policies of these agencies

The following is a description of some of the laws and regulations that currently affect our business. By necessity, the descriptions below are summaries that do not purport to be complete, and that are qualified in their entirety by reference to those statutes and regulations discussed, and all regulatory interpretations thereof. In recent years, lawmakers and regulators have increased their focus on the financial services industry. Additional changes in applicable laws, regulations, or the interpretations thereof are possible, and could have a material adverse effect on our business or the business of our subsidiaries.

Bank Holding Company Regulation

The Company is a bank holding company that has elected to be treated by the Federal Reserve as a financial holding company for purposes of the BHC Act. The activities of bank holding companies generally are limited to the business of banking, managing or controlling banks, and other activities determined by the Federal Reserve, by regulation or order prior to November 11, 1999, to be so closely related to banking as to be a proper incident thereto. Impermissible activities for bank holding companies and their subsidiaries include activities that are related to commerce, such as retail sales of nonfinancial products or manufacturing.

As a financial holding company, we may engage in an expanded range of activities, including securities and insurance activities conducted as agent or principal that are considered to be financial in nature. Moreover, financial holding companies may engage in activities incidental or complementary to financial activities, if the Federal Reserve determines that such activities pose no substantial risk to the safety or soundness of depository institutions or the financial system in general. Maintaining our financial holding company status requires that our subsidiary banks remain “well-capitalized” and “well-managed” as defined by regulation, and maintain at least a “satisfactory” rating under the Community Reinvestment Act (“CRA”). In addition, under the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”), we must also remain well-capitalized and well-managed to maintain our financial holding company status. If we or our subsidiary banks fail to continue to meet these requirements, we could be subject to restrictions on new activities and acquisitions, and/or be required to cease and possibly divest of operations that conduct existing activities that are not permissible for a bank holding company that is not a financial holding company.

The BHC Act generally requires us to obtain prior approval from the Federal Reserve before acquiring direct or indirect ownership or control of more than 5% of the voting shares of, or substantially all the assets of, a new bank, or to merge or consolidate with another bank holding company. As a result of the Dodd-Frank Act, the BHC Act also

now requires us to be well-capitalized and well-managed, as opposed to merely adequately capitalized and adequately managed as was previously required, in order to acquire a bank located outside of our home state. Additionally, subject to certain exceptions, the BHC Act generally prohibits us from acquiring direct or indirect ownership or control of voting shares of any company engaged in activities that are not permissible for us to engage in.

The Federal Deposit Insurance Act (“FDIA”), as amended by the Dodd-Frank Act, and Federal Reserve regulations and policy require us to serve as a source of financial and managerial strength for our subsidiary banks, and to commit resources to support the banks. This support may be required even if doing so may adversely affect our ability to meet other obligations.

Acquisitions of Ownership

Acquisitions of the Company's voting stock above certain thresholds may be subject to prior regulatory notice or approval under applicable federal and state banking laws. Investors are responsible for ensuring that they do not, directly or indirectly, acquire shares of our stock in excess of the amount that can be acquired without regulatory approval under the BHC Act, the Change in Bank Control Act, the Illinois Banking Act and Wisconsin banking laws.

Regulatory Reform

The Dodd-Frank Act strengthened the ability of the federal bank regulatory agencies to supervise and examine bank holding companies and their subsidiaries. The Dodd-Frank Act represents a sweeping reform of the United States supervisory and regulatory framework applicable to financial institutions and capital markets in the wake of the global financial crisis, certain aspects of which are described below in more detail. In particular, and among other things, the Dodd-Frank Act: created a Financial Stability Oversight Council as part of a regulatory structure for identifying emerging systemic risks and improving interagency cooperation; created the Consumer Financial Protection Bureau ("CFPB"), which is authorized to regulate providers of consumer credit, savings, payment and other consumer financial products and services; narrowed the scope of federal preemption of state consumer laws enjoyed by national banks and federal savings associations and expanded the authority of state attorneys general to bring actions to enforce federal consumer protection legislation; imposed more stringent capital requirements on bank holding companies and subjected certain activities, including interstate mergers and acquisitions, to heightened capital conditions; with respect to mortgage lending, (1) significantly expanded requirements applicable to loans secured by 1-4 family residential real property, (2) imposed strict rules on mortgage servicing, and (3) required the originator of a securitized loan, or the sponsor of a securitization, to retain at least 5% of the credit risk of securitized exposures unless the underlying exposures are qualified residential mortgages or meet certain underwriting standards; repealed the prohibition on the payment of interest on business checking accounts; restricted the interchange fees payable on debit card transactions for issuers with \$10 billion in assets or greater; subject to numerous exceptions, prohibited depository institutions and affiliates from certain investments in, and sponsorship of, hedge funds and private equity funds and from engaging in proprietary trading; provided for enhanced regulation of advisers to private funds and of the derivatives markets; enhanced oversight of credit rating agencies; and prohibited banking agency requirements tied to credit ratings. These statutory changes shifted the regulatory framework for financial institutions, impacted the way in which they do business and have the potential to constrain revenues.

Numerous provisions of the Dodd-Frank Act are required to be implemented through rulemaking by the appropriate federal regulatory agencies. A majority of the required regulations have been issued and others have been released for public comment or released in final form. Furthermore, while the reforms primarily target systemically important financial service providers, their influence is expected to filter down in varying degrees to smaller institutions over time. We will continue to evaluate the effect of the Dodd-Frank Act changes; however, in many respects, the ultimate impact of the Dodd-Frank Act will not be fully known for years, and no current assurance may be given that the Dodd-Frank Act, or any other new legislative changes, will not have a negative impact on the results of operations and financial condition of the Company and its subsidiaries. For further discussion of the most recent developments under the Dodd-Frank Act, see Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview and Strategy - Financial Regulatory Reform."

Volcker Rule

The Dodd-Frank Act added a new Section 13 to the BHC Act, known as the "Volcker Rule." On December 10, 2013, five United States financial regulators, including the Federal Reserve, the FDIC and the OCC, adopted final rules implementing the Volcker Rule. The final rules prohibit banking entities from (1) engaging in short-term proprietary trading for their own accounts, and (2) having certain ownership interests in and relationships with hedge funds or private equity funds. Further, the final rules are intended to provide greater clarity with respect to both the extent of those primary prohibitions and of the related exemptions and exclusions. These rules also require each regulated entity to establish an internal compliance program that is consistent with the extent to which it engages in activities covered by the Volcker Rule, which must include (for the largest entities) making regular reports about those activities to regulators. Although the final rules provide some differences in compliance and reporting obligations based on size, the fundamental prohibitions of the Volcker Rule apply to banking entities of any size, including the Company and its

bank subsidiaries. These rules were effective April 1, 2014, but the conformance period was extended from its statutory end date of July 21, 2014 until July 21, 2015 for proprietary trading and until July 2016 to divest private equity and hedge funds. We expect this date to be extended again until July 2017, which will be the final extension allowable under the Dodd-Frank Act.

We have evaluated the implications of these rules on our investments and determined that some of the securities in our investment portfolio will be subject to the Volcker Rule and, absent any further amendments to the Volcker Rule, will have to be divested or converted. In one instance, the need to divest that security at a fixed near-term date caused us to record an other-than-temporary

impairment of \$3.3 million on that security in the fourth quarter of 2013. We do not believe that any other required divestitures or reporting requirements will have any material financial implications on the Company.

Capital Requirements

We are subject to various regulatory capital requirements both at the Company and at the subsidiary bank level. Failure to meet minimum capital requirements could result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have an adverse material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action (described below), we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting policies. Our capital amounts and classification are also subject to judgments by the regulators regarding qualitative components, risk weightings, and other factors. We have consistently maintained regulatory capital ratios at or above the well-capitalized standards. These capital rules have undergone significant changes with the adoption by the federal banking agencies of final rules that implement Basel III requirements, which are discussed below.

The Basel Committee on Banking Supervision has drafted frameworks for the regulation of capital and liquidity of internationally active banking organizations, the most recent of which is generally referred to as “Basel III.” In July 2013, the federal banking agencies jointly issued final rules establishing a new comprehensive capital framework for U.S. banking organizations that would implement the Basel III capital framework and certain provisions of the Dodd-Frank Act. The final rules seek to strengthen the components of regulatory capital, increase risk-based capital requirements, and make selected changes to the calculation of risk-weighted assets. The final rules, among other things:

- revise minimum capital requirements and adjust prompt corrective action thresholds;
- revise the components of regulatory capital and create a new capital measure called “Tier 1 Common Equity,” which must constitute at least 4.5% of risk-weighted assets;
- specify that Tier 1 capital consists only of Tier 1 Common Equity and certain “Additional Tier 1 Capital” instruments meeting specified requirements;
- increase the minimum Tier 1 capital ratio requirement from 4% to 6%;
- retain the existing risk-based capital treatment for 1-4 family residential mortgage exposures;
 - permit most banking organizations, including the Company, to retain, through a one-time permanent election, the existing capital treatment for accumulated other comprehensive income;
- implement a new capital conservation buffer of common equity Tier 1 capital equal to 2.5% of risk-weighted assets, which will be in addition to the 4.5% common equity Tier 1 capital ratio and be phased in over a three-year period beginning January 1, 2016, which buffer is generally required to make capital distributions and pay executive bonuses;
- increase capital requirements for past-due loans, high volatility commercial real estate exposures, and certain short-term loan commitments;
- require the deduction of mortgage servicing assets and deferred tax assets that exceed 10% of common equity Tier 1 capital in each category and 15% of common equity Tier 1 capital in the aggregate; and
- remove references to credit ratings consistent with the Dodd-Frank Act and establish due diligence requirements for securitization exposures.

Under the final rules, compliance by the Company was required by January 1, 2015, subject to a transition period for several aspects of the final rules, including the new minimum capital ratio requirements, the capital conservation buffer, and the regulatory capital adjustments and deductions. Requirements to maintain higher levels of capital could adversely impact our return on equity. We believe that we will continue to exceed all estimated well-capitalized regulatory requirements on a fully phased-in basis.

Under capital rules in effect for the year ended December 31, 2015, as a bank holding company, we were required to maintain a minimum ratio of qualifying total capital to risk-weighted assets of 8.0%, of which at least 6.0% must be in the form of Tier 1 capital (generally common equity, retained earnings and a limited amount of qualifying preferred stock, less goodwill and certain core deposit intangibles). The remainder may consist of Tier 2 capital, which, subject to certain conditions and limitations, consists of: the allowance for credit losses; perpetual preferred stock and related surplus; hybrid capital instruments; unrealized holding gains on marketable equity securities; perpetual debt and mandatory convertible debt securities; term subordinated debt and intermediate-term preferred stock. The Federal Reserve has stated that Tier 1 voting common equity should be the predominant form of capital. In addition, the Federal Reserve requires a minimum leverage ratio of Tier 1 capital to total assets of 3.0% for the most highly-rated bank holding companies, and 4% for all other bank holding companies. Our bank regulatory agencies uniformly encourage banks and bank holding companies to be “well-capitalized,” which, for the year ended December 31, 2015, required: a leverage ratio of Tier 1 capital to total assets of 5% or greater, a ratio of Tier 1 capital to total risk-weighted assets of 8% or greater, a ratio of common equity Tier 1 capital to total risk-weighted assets of 6.5%, and a ratio of total capital to total risk-weighted assets of 10% or greater. As of December 31, 2015, the Company's total capital to risk-weighted assets ratio was 12.2%,

its Tier 1 capital to risk-weighted asset ratio was 10.0%, its common equity Tier 1 capital to risk-weighted assets ratio was 8.4%, and its Tier 1 leverage ratio was 9.1%.

Failure to meet minimum capital requirements could result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have an adverse material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action (described below), we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items, as calculated under regulatory accounting policies. Our capital amounts and classification are also subject to judgments by the regulators regarding qualitative components, risk weightings, and other factors.

For more information, see Item 7 “Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview and Strategy - Financial Regulatory Reform.”

Liquidity Requirements

Historically, regulation and monitoring of bank and bank holding company liquidity has been addressed as a supervisory matter, without required formulaic measures. However, the Basel III liquidity framework requires banks and bank holding companies to measure their liquidity against specific liquidity tests that are similar in some respects to liquidity measures historically applied by banks and regulators for management and supervisory purposes. One such test, referred to as the Liquidity Coverage Ratio (“LCR”), is designed to ensure that the banking entity has an adequate stock of unencumbered high-quality liquid assets that can be converted easily and immediately in private markets into cash to meet liquidity needs for a 30-calendar day liquidity stress scenario. Another test, known as the Net Stable Funding Ratio (“NSFR”), is designed to promote more medium- and long-term funding of the assets and activities of financial institutions over a one-year horizon. These measures provide an incentive for banks and holding companies to increase their holdings in Treasury securities and other sovereign debt as a component of assets, increase the use of long-term debt as a funding source and rely on stable funding like core deposits (in lieu of brokered deposits).

The U.S. bank regulatory agencies implemented the LCR in September 2014, which requires large financial firms to hold levels of liquid assets sufficient to protect against constraints on their funding during times of financial turmoil. While the LCR only applies to the largest banking organizations in the country, certain elements are expected to filter down to all insured depository institutions, and we are reviewing our liquidity risk management policies in light of the LCR and NSFR regulations.

Capital Planning and Stress Testing Requirements

On October 12, 2012, the Federal Reserve published two final rules implementing the company-run stress test requirements mandated by the Dodd-Frank Act: one for U.S. bank holding companies with total consolidated assets of \$10 billion to \$50 billion, and one for U.S. bank holding companies with total consolidated assets of \$50 billion or more. In 2014 and 2013, under the rule applicable to the Company, which became effective November 15, 2012, we were required to conduct annual company-run stress tests using data as of September 30th of each year and different scenarios provided by the Federal Reserve. Submissions were due to the Federal Reserve no later than March 31st of each following year. Each subsequent year, we have been required to use data as of December 31st with submissions due to the Federal Reserve no later than July 31st of each following year. For further discussion of capital planning and stress testing requirements, see Item 7 “Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview and Strategy - Financial Regulatory Reform.”

Payment of Dividends and Share Repurchases

We are a legal entity separate and distinct from our banking and non-banking subsidiaries. Since our consolidated net income consists largely of net income of our bank and non-bank subsidiaries, our ability to pay dividends depends largely upon our receipt of dividends from our subsidiaries. There are various federal and state law limitations on the extent to which our banking subsidiaries can declare and pay dividends to us, including minimum regulatory capital requirements, federal and state banking law requirements concerning the payment of dividends out of net profits or surplus, and general regulatory oversight to prevent unsafe or unsound practices. No assurances can be given that the banks will, in any circumstances, pay dividends to the Company.

In general, applicable federal and state banking laws prohibit, without prior regulatory approval, insured depository institutions, such as our bank subsidiaries, from making dividend distributions if such distributions are not paid out of available earnings, or would cause the institution to fail to meet applicable minimum capital requirements. In addition, our right, and the right of our shareholders and creditors, to participate in any distribution of the assets or earnings of our bank and non-bank subsidiaries is further subject to the prior claims of creditors of our subsidiaries.

Our ability to declare and pay dividends to our shareholders is similarly limited by federal banking law and Federal Reserve regulations and policy. Federal Reserve policy provides that a bank holding company should not pay dividends unless (1) the bank holding company's net income over the last four quarters (net of dividends paid) is sufficient to fully fund the dividends,

(2) the prospective rate of earnings retention appears consistent with the capital needs, asset quality and overall financial condition of the bank holding company and its subsidiaries and (3) the bank holding company will continue to meet minimum required capital adequacy ratios. The policy also provides that a bank holding company should inform the Federal Reserve reasonably in advance of declaring or paying a dividend that exceeds earnings for the period for which the dividend is being paid or that could result in a material adverse change to the bank holding company's capital structure. Bank holding companies also are required to consult with the Federal Reserve before increasing dividends or redeeming or repurchasing capital instruments. Additionally, the Federal Reserve could prohibit or limit the payment of dividends by a bank holding company if it determines that payment of the dividend would constitute an unsafe or unsound practice.

In addition, under the Basel III Rule, institutions that seek the freedom to pay dividends will have to maintain 2.5% of risk-weighted assets in Common Equity Tier 1 attributable to the capital conservation buffer to be phased in over three years beginning in 2016. For more information on the capital conservation buffer, see Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview and Strategy - Financial Regulatory Reform."

FDICIA and Prompt Corrective Action

The Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), among other things, requires the federal bank regulatory agencies to take "prompt corrective action" regarding FDIC-insured depository institutions that do not meet minimum capital requirements. Depository institutions are placed into one of five capital tiers:

"well-capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." An institution that fails to remain well-capitalized will be subject to a series of restrictions that increase as its capital condition worsens. For example, institutions that are less than well-capitalized are barred from soliciting, taking or rolling over brokered deposits. FDICIA generally prohibits a depository institution from making any capital distribution (including payment of a dividend) if the depository institution would be undercapitalized thereafter. Undercapitalized depository institutions are subject to growth limitations and must submit a capital restoration plan, which must be guaranteed by the institution's holding company. In addition, an undercapitalized institution is subject to increased monitoring and asset growth restrictions and is subject to greater regulatory approval requirements. The FDICIA also provides for enhanced supervisory authority over undercapitalized institutions, including authority for the appointment of a conservator or receiver for the institution. Guidance from the federal banking agencies also indicates that a holding company may be required to provide assurances that a subsidiary bank will comply with any requirements imposed on it under prompt corrective action.

As a result of the Dodd-Frank Act, bank holding companies will be subject to an "early remediation" regime that is substantially similar to the prompt corrective action regime applicable to banks. The remedial actions also increase as the condition of the holding company deteriorates, although the proposed holding company regime would use several forward-looking triggers to identify when a holding company is in troubled condition, beyond just the capital ratios used under the prompt corrective action regime.

As of December 31, 2015 and 2014, each of the Company's banks was categorized as "well-capitalized." In order to maintain the Company's designation as a financial holding company, the Company and each of the banks is required to maintain capital ratios at or above the "well-capitalized" levels. Management is committed to maintaining the Company's capital levels above the "well-capitalized" levels established by the Federal Reserve for bank holding companies.

Enforcement Authority

The federal bank regulatory agencies have broad authority to issue orders to depository institutions and their holding companies prohibiting activities that constitute violations of law, rule, regulation, or administrative order, or that represent unsafe or unsound banking practices, as determined by the federal banking agencies. The federal banking agencies also are empowered to require affirmative actions to correct any violation or practice; issue administrative orders that can be judicially enforced; direct increases in capital; limit dividends and distributions; restrict growth; assess civil money penalties against institutions or individuals who violate any laws, regulations, orders, or written agreements with the agencies; order termination of certain activities of holding companies or their non-bank subsidiaries; remove officers and directors; order divestiture of ownership or control of a non-banking subsidiary by a

holding company; or terminate deposit insurance and appoint a conservator or receiver.

FDIA and Safety and Soundness

The FDIA imposes various requirements on insured depository institutions, including our subsidiary banks. Among other things, the FDIA includes requirements applicable to the closure of branches; merger or consolidation by or with another insured bank; additional disclosures to depositors with respect to terms and interest rates applicable to deposit accounts; uniform regulations for extensions of credit secured by real estate; restrictions on activities of and investments by state-chartered banks; and increased reporting requirements on agricultural loans and loans to small businesses. Under the “cross-guarantee” provision of the FDIA, insured depository institutions such as the subsidiary banks may be liable to the FDIC for any losses incurred, or reasonably

expected to be incurred, by the FDIC resulting from the default of, or FDIC assistance to, any other commonly controlled insured depository institution. All of our subsidiary banks are commonly controlled within the meaning of the cross-guarantee provision.

The FDIA also requires the federal bank regulatory agencies to prescribe standards of safety and soundness, by regulations or guidelines, relating generally to operations and management, asset growth, asset quality, earnings, stock valuation and compensation. The federal bank regulatory agencies have adopted a set of guidelines prescribing safety and soundness standards pursuant to the FDIA. The guidelines establish general standards relating to internal controls and information systems, informational security, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, and compensation, fees and benefits. The guidelines prohibit excessive compensation as an unsafe and unsound practice, and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal shareholder.

During the past decade, properly managing risks has been identified as critical to the conduct of safe and sound banking activities and has become even more important as new technologies, product innovation, and the size and speed of financial transactions have changed the nature of banking markets. The agencies have identified a spectrum of risks facing banking institutions including, but not limited to, credit, market, liquidity, operational, legal, and reputational risk. In particular, recent regulatory pronouncements have focused on operational risk, which arises from the potential that inadequate information systems, operational problems, breaches in internal controls, fraud, or unforeseen catastrophes will result in unexpected losses. New products and services, third-party risk management and cybersecurity are critical sources of operational risk that financial institutions are expected to address in the current environment. The subsidiary banks are expected to have active board and senior management oversight; adequate policies, procedures, and limits; adequate risk measurement, monitoring, and management information systems; and comprehensive and effective internal controls.

Risk Committee Requirement

On March 27, 2014, the Federal Reserve published final rules to implement certain "enhanced prudential standards" mandated by the Dodd-Frank Act. Many of these enhanced prudential standards apply only to bank holding companies and foreign banking organizations with total consolidated assets of \$50 billion or more, and do not apply to the Company. However, the Federal Reserve's enhanced prudential standards require that, beginning in 2015, publicly traded bank holding companies with total consolidated assets of greater than \$10 billion and less than \$50 billion must establish and maintain risk committees for their boards of directors to oversee the bank holding companies' risk management frameworks. Our Board has had a separate risk committee since 1998; we believe that our risk committee and corresponding risk management framework is in compliance with all applicable requirements.

Insurance of Deposit Accounts

The deposits of each of our subsidiary banks are insured by the DIF up to the standard maximum deposit insurance amount of \$250,000 per depositor. Each of our subsidiary banks is subject to deposit insurance assessments based on the risk it poses to the DIF, as determined by the capital category and supervisory category to which it is assigned. The FDIC has authority to raise or lower assessment rates on insured deposits in order to achieve statutorily required reserve ratios in the DIF and to impose special additional assessments. In light of the significant increase in depository institution failures in 2008-2010 and the increase of deposit insurance limits, the DIF incurred substantial losses during recent years. To bolster reserves in the DIF, the Dodd-Frank Act increased the minimum reserve ratio of the DIF to 1.35% of insured deposits and deleted the statutory cap for the reserve ratio. In December 2010, the FDIC set the designated reserve ratio at 2%, 65 basis points above the statutory minimum. In April 2011, the FDIC implemented changes required by the Dodd-Frank Act to revise the definition of the assessment base for calculating deposit insurance premiums from the amount of insured deposits held by an institution to the institution's average total consolidated assets less average tangible equity. The FDIC also changed the assessment rates, providing that they will initially range from 2.5 basis points to 45 basis points. The FDIC has indicated that these changes generally will not require an increase in the level of assessments for depository institutions with less than \$10 billion in assets, such as

each of our bank subsidiaries, and may result in decreased assessments for such institutions. However, there is a risk that the banks' deposit insurance premiums will again increase if failures of insured depository institutions continue to deplete the DIF.

In addition, the Deposit Insurance Fund Act of 1996 authorizes the Financing Corporation ("FICO") to impose assessments on DIF assessable deposits in order to service the interest on FICO's bond obligations. The FICO assessment rate is adjusted quarterly and for the fourth quarter of 2015 was approximately 0.600 basis points (60 cents per \$10,000 of assessable deposits).

Limits on Loans to One Borrower and Loans to Insiders

Federal and state banking laws impose limits on the amount of credit a bank can extend to any one person (or group of related persons). The Dodd-Frank Act expanded the scope of these restrictions for national banks under federal law to include credit

exposure arising from derivative transactions, repurchase agreements, and securities lending and borrowing transactions. Provisions of the Dodd-Frank Act also amended the FDIA to prohibit state-chartered banks (including certain of our banking subsidiaries) from engaging in derivative transactions unless the state lending limit laws take into account credit exposure to such transactions.

Applicable banking laws and regulations also place restrictions on loans by FDIC-insured banks and their affiliates to their directors, executive officers and principal shareholders.

Additional Provisions Regarding Deposit Accounts

The Dodd-Frank Act eliminated prohibitions under federal law against the payment of interest on demand deposits, thus allowing businesses to have interest-bearing checking accounts. Depending upon the market response, this change could have an adverse impact on our interest expense.

Federal Reserve regulations require depository institutions to maintain reserves against their transaction accounts (primarily NOW and regular checking accounts). For 2016, the first \$15.2 million of otherwise reservable balances are exempt from the reserve requirements; for transaction accounts aggregating more than \$15.2 million to \$110.2 million, the reserve requirement is 3% of total transaction accounts; and for net transaction accounts in excess of \$110.2 million, the reserve requirement is 10% of the aggregate amount of total transaction accounts in excess of \$110.2 million. These reserve requirements are subject to annual adjustment by the Federal Reserve. Our banks are in compliance with the foregoing requirements.

De Novo Branching

The Dodd-Frank Act amended the FDIA and the National Bank Act to allow national banks and state banks, with the approval of their regulators, to establish de novo branches in states other than the bank's home state as if such state was the bank's home state.

In 2009, the FDIC adopted enhanced supervisory procedures for de novo banks, which extended the special supervisory period for such banks from three to seven years. Throughout the de novo period, newly chartered banks will be subject to higher capital requirements, more frequent examinations and other requirements.

Anti-Tying Provisions

Under the anti-tying provisions of the BHC Act, among other things, each of our subsidiary banks is prohibited from conditioning the availability of any product or service, or varying the price for any product or service, on the requirement that the customer obtain some additional product or service from the bank or any of its affiliates, other than loans, deposits and trust services.

Transactions with Affiliates

Certain "covered" transactions between a bank and its holding company or other non-bank affiliates are subject to various restrictions imposed by state and federal law and regulation. Such "covered transactions" include loans and other extensions of credit by the bank to the affiliate, investments in securities issued by the affiliate, purchases of assets from the affiliate, payments of fees or other distributions to the affiliate, certain derivative transactions that create a credit exposure to an affiliate, the acceptance of securities issued by the affiliate as collateral for a loan, and the issuance of a guarantee, acceptance or letter of credit on behalf of the affiliate. In general, these affiliate transaction rules limit the amount of covered transactions between an institution and a single affiliate, as well as the aggregate amount of covered transactions between an institution and all of its affiliates. In addition, covered transactions that are credit transactions must be secured by acceptable collateral, and all covered transactions must be on terms that are at least as favorable to the institution as then-prevailing in the market for comparable transactions with unaffiliated entities. Transactions between affiliated banks may be subject to certain exemptions under applicable federal law.

Community Reinvestment Act

Under the CRA, a financial institution has a continuing and affirmative obligation, consistent with the safe and sound operation of such institution, to help meet the credit needs of its entire community, including low and moderate-income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. However, institutions are rated on their performance in meeting the needs of their communities. The CRA requires each federal banking agency to take an institution's CRA record into account when evaluating certain applications by the institution, including applications for charters,

branches and other deposit facilities, relocations, mergers, consolidations, acquisitions of assets or assumptions of liabilities, and bank and savings association acquisitions. An unsatisfactory record of performance may be the basis for denying or conditioning approval of an application by a financial institution or its holding company. The CRA also requires that all institutions publicly disclose their CRA ratings. Each of our subsidiary banks received a “satisfactory” or better rating from the Federal Reserve or the OCC on their most recent CRA performance evaluations.

Compliance with Consumer Protection Laws

Our banks and some other operating subsidiaries are also subject to many federal consumer protection statutes and regulations, including the Truth in Lending Act, the Truth in Savings Act, the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Electronic Fund Transfer Act, the Consumer Financial Protection Act, the Federal Trade Commission Act and analogous state statutes, the Fair Housing Act, the Real Estate Settlement Procedures Act, the Servicemembers Civil Relief Act and the Home Mortgage Disclosure Act. Wintrust Mortgage must also comply with many of these consumer protection statutes and regulations. Violation of these statutes can lead to significant potential liability for damages and penalties, in litigation by consumers as well as enforcement actions by regulators. Some of the key requirements of these laws:

- require specific disclosures of the terms of credit, and regulate underwriting and other practices for mortgage loans and other types of credit;
- require specific disclosures about deposit account terms, and the electronic transfers that can be made to or from accounts at the banks;
- provide limited consumer liability for unauthorized transactions;
- prohibit discrimination against an applicant in any consumer or business credit transaction;
- require notifications about the approval or decline of credit applications, the reasons for a decline, and the credit scores used to make credit decisions;
- prohibit unfair, deceptive or abusive acts or practices;
- require mortgage lenders to collect and report applicant and borrower data regarding loans for home purchases or improvement projects;
- require lenders to provide borrowers with information regarding the nature and cost of real estate settlements;
- forbid the payment of referral fees for any settlement service as part of a real estate transaction;
- prohibit certain lending practices and limit escrow amounts with respect to real estate transactions;
- provide interest rate reductions and other protections for servicemembers called to active duty; and
- prescribe possible penalties for violations of the requirements of consumer protection statutes and regulations.

During the past several years, Congress has amended these laws and federal regulators have proposed and finalized a number of significant amendments to the regulations implementing these laws. Among other things, the Federal Reserve, the FDIC and the OCC have adopted new rules applicable to the banks (and in some cases, Wintrust Mortgage) that govern consumer credit practices and disclosures, as well as rules that govern overdraft practices and disclosures. These rules may affect the profitability of our consumer banking activities.

As described above, the Dodd-Frank Act established the CFPB. The law transferred to the CFPB existing regulatory authority with respect to many of these consumer related regulations, and gave the CFPB new authority under the Consumer Financial Protection Act. In July 2011, many of the consumer financial protection functions previously assigned to other federal agencies shifted to the CFPB. The CFPB now has broad rulemaking authority over a wide range of consumer protection laws that apply to banks and other providers of financial products and services, including the authority to prohibit “unfair, deceptive or abusive practices,” to ensure that all consumers have access to markets for consumer financial products and services, and to ensure that such markets are fair, transparent and competitive. The Dodd-Frank Act also required the CFPB to adopt a number of new specific regulatory requirements. These new rules may increase the costs of engaging in these activities for all market participants, including our subsidiaries. In addition to the CFPB, other federal and state regulators have issued, and may in the future issue, regulations and guidance affecting aspects of our business. The developments may impose additional burdens on us and our subsidiaries. The CFPB has broad supervisory, examination and enforcement authority. Although we and our subsidiary banks are not subject to CFPB examination, the actions taken by the CFPB, including from its rulemaking authority, may influence enforcement actions and positions taken by other federal and state regulators, including those with jurisdiction over us and our subsidiaries. Finally, the Dodd-Frank Act authorizes state attorneys general and other state officials to enforce consumer protection rules issued by the CFPB.

Mortgage Related Rule Changes Generally

The Dodd-Frank Act amended the Truth in Lending Act and the Real Estate Settlement Procedures Act to impose a number of new requirements regarding the origination and servicing of residential mortgage loans. These amendments created a variety of new consumer protections. First, it significantly expands underwriting requirements applicable to loans secured by 1-4 family residential real property and augments federal law combating predatory lending practices. In addition to numerous new disclosure requirements, the Dodd-Frank Act imposes new standards for mortgage loan originations on all lenders, including banks and savings associations, in an effort to strongly encourage lenders to verify a borrower's ability to repay, while also establishing a presumption of compliance for certain "qualified mortgages." In addition, the Dodd-Frank Act generally requires lenders or securitizers to retain an economic interest in the credit risk relating to loans that the lender sells, and other asset-backed securities

that the securitizer issues, if the loans have not complied with the ability-to-repay standards. The risk retention requirement generally will be 5%, but could be increased or decreased by regulation.

Ability to Repay Rule

On January 10, 2013, the CFPB issued a final rule implementing the Dodd-Frank Act's ability-to-repay requirements. Under the final rule, lenders, in assessing a borrower's ability to repay a mortgage-related obligation, must consider eight underwriting factors: (1) current or reasonably expected income or assets; (2) current employment status; (3) monthly payment on the subject transaction; (4) monthly payment on any simultaneous loan; (5) monthly payment for all mortgage-related obligations; (6) current debt obligations, alimony, and child support; (7) monthly debt-to-income ratio or residual income; and (8) credit history. The final rule also includes guidance regarding the application of, and methodology for evaluating, these factors.

Further, the final rule clarified that qualified mortgages do not include "no-doc" loans and loans with negative amortization, interest-only payments, balloon payments, terms in excess of 30 years, or points and fees paid by the borrower that exceed 3% of the loan amount, subject to certain exceptions. In addition, for qualified mortgages, the rule mandated that the monthly payment be calculated on the highest payment that will occur in the first five years of the loan, and required that the borrower's total debt-to-income ratio generally may not be more than 43%. The final rule also provided that certain mortgages that satisfy the general product feature requirements for qualified mortgages and that also satisfy the underwriting requirements of Fannie Mae and Freddie Mac (while they operate under federal conservatorship or receivership), or the U.S. Department of Housing and Urban Development, Department of Veterans Affairs, or Department of Agriculture or Rural Housing Service, are also considered to be qualified mortgages. This second category of qualified mortgages will phase out as the aforementioned federal agencies issue their own rules regarding qualified mortgages, the conservatorship of Fannie Mae and Freddie Mac ends, and, in any event, after seven years.

As set forth in the Dodd-Frank Act, subprime (or higher-priced) mortgage loans are subject to the ability-to-repay requirement, and the final rule provided for a rebuttable presumption of lender compliance for those loans. The final rule also applied the ability-to-repay requirement to prime loans, while also providing a conclusive presumption of compliance (i.e., a safe harbor) for prime loans that are also qualified mortgages. Additionally, the final rule generally prohibited prepayment penalties (subject to certain exceptions) and set forth a 3-year record retention period with respect to documenting and demonstrating the ability-to-repay requirement and other provisions.

Changes to Mortgage Loan Originator Compensation

Previously existing regulations concerning the compensation of mortgage loan originators have been amended. As a result of these amendments, mortgage loan originators may not receive compensation based on a mortgage transaction's terms or conditions other than the amount of credit extended under the mortgage loan. Further, the new standards limit the total points and fees that a bank and/or a broker may charge on conforming and jumbo loans to 3% of the total loan amount. Mortgage loan originators may receive compensation from a consumer or from a lender, but not both. These rules contain requirements designed to prohibit mortgage loan originators from "steering" consumers to loans that provide mortgage loan originators with greater compensation. In addition, the rules contain other requirements concerning recordkeeping.

Mortgage Loan Servicing

On January 17, 2013, the CFPB announced rules to implement certain provisions of the Dodd-Frank Act relating to mortgage servicing. The new servicing rules require servicers to meet certain benchmarks for loan servicing and customer service in general. Servicers must provide periodic billing statements and certain required notices and acknowledgments, promptly credit borrowers' accounts for payments received and promptly investigate complaints by borrowers and are required to take additional steps before purchasing insurance to protect the lender's interest in the property. The new servicing rules also call for additional notice, review and timing requirements with respect to delinquent borrowers. The new servicing rules took effect on January 10, 2014.

In order to ensure compliance with the Dodd-Frank Act mortgage-related rules the Company consolidated its consumer mortgage loan origination and loan servicing operations within Wintrust Mortgage. All consumer mortgage applications are taken through Wintrust Mortgage which has extensively trained loan originators located at each of our branches. While in certain limited cases our banks may offer specialized consumer mortgages to our customers, we

expect that on a going forward basis, consumer mortgages for all of our banks will be originated and closed by Wintrust Mortgage. Wintrust Mortgage then sells loans to third parties or to our banks. To the extent that we retain consumer mortgage loans in our bank portfolios, our banks have engaged Wintrust Mortgage to provide loan servicing. We believe that by centralizing loan origination and servicing operations we will not only meet the new compliance requirements, but reduce costs associated with such compliance.

TILA-RESPA Integrated Disclosure

On December 31, 2013, the CFPB published final rules and forms that combine certain disclosures that consumers receive in connection with applying for and closing on a mortgage loan under the Truth in Lending Act and the Real Estate Settlement Procedures Act. The two new forms developed by the CFPB are the Loan Estimate and the Closing Disclosure. The Loan Estimate replaces the Good Faith Estimate ("GFE") and the Early Truth in Lending Disclosure ("TIL") and adds additional disclosure language as required by the Dodd-Frank Act. The creditor must give the form to the consumer no later than three business days after the consumer applies for a mortgage loan. Consistent with current law, the creditor generally cannot charge the consumer any fees until after the consumer has been given the Loan Estimate form and the consumer has communicated intent to proceed with the transaction. Creditors may provide consumers with written estimates prior to application so long as there is a disclaimer to prevent confusion with the Loan Estimate form. The second disclosure, the Closing Disclosure form, replaces the HUD-1 and the Final TIL and adds additional disclosure language as required by Dodd Frank. The creditor must give the form to the consumer at least three business days before the consumer closes the loan. The rule became effective October 3, 2015. Wintrust Mortgage and the charter banks are both impacted by the rule, and have implemented procedures to comply with this regulation.

Expansion of the Home Mortgage Disclosure Act

The CFPB has published a lengthy amendment related to the reporting requirements under the Home Mortgage Disclosure Act. The CFPB claims the proposed rule aims to: 1) improve market information, data access, and the electronic reporting process; 2) monitor access to credit; 3) standardize the reporting threshold; 4) ease reporting requirements for some small banks; and 5) align reporting requirements with industry data standards. The proposed rule requires several new items of data be collected and reported to the FFIEC during annual reporting. A majority of the provisions of the rule become effective January 1, 2018. We expect to be fully compliant at that time.

Federal Preemption

The Dodd-Frank Act also amended the laws governing federal preemption of state laws as applied to national banks, and eliminated federal preemption for subsidiaries of national banks. These changes may subject the Company's national banks and their divisions, including Wintrust Mortgage, to additional state regulation and enforcement.

Debit Interchange

The Dodd-Frank Act added a new statutory requirement that interchange fees for electronic debit transactions that are paid to or charged by payment card issuers (including our bank subsidiaries) be reasonable and proportional to the cost incurred by the issuer. The Dodd-Frank Act also gave the Federal Reserve the authority to establish rules regarding these interchange fees. The Federal Reserve issued final regulations that were effective in October 2011, and that limit interchange fees for electronic debit transactions to 21 cents plus .05% of the transaction, plus an additional one cent per transaction fraud adjustment. The rule also imposes requirements regarding routing and exclusivity of electronic debit transactions, and generally requires that debit cards be usable in at least two unaffiliated networks.

Anti-Money Laundering Programs

The Bank Secrecy Act ("BSA") and USA PATRIOT Act of 2001 contain anti-money laundering ("AML") and financial transparency provisions intended to detect, and prevent the use of the U.S. financial system for, money laundering and terrorist financing activities. The BSA, as amended by the USA PATRIOT Act, requires depository institutions and their holding companies to undertake activities including maintaining an AML program, verifying the identity of clients, monitoring for and reporting suspicious transactions, reporting on cash transactions exceeding specified thresholds, and responding to requests for information by regulatory authorities and law enforcement agencies. Each of our subsidiary banks is subject to the BSA and, therefore, is required to provide its employees with AML training, designate an AML compliance officer and undergo an annual, independent audit to assess the effectiveness of its AML program. We have implemented policies, procedures and internal controls that are designed to comply with these AML requirements. In 2014, the Financial Crimes Enforcement Network ("FinCEN"), which is a unit of the

Treasury Department that drafts regulations implementing the USA PATRIOT Act and other AML and BSA legislation, proposed a rule that would contain explicit customer due diligence requirements and impose a new regulatory requirement on financial institutions to obtain beneficial ownership information with respect to all legal entity customers with which such institutions conduct business. The scope and compliance requirements of such a rule have yet to be finalized. Bank regulators are focusing their examinations on anti-money laundering compliance, and we will continue to monitor and augment, where necessary, our AML compliance programs.

Office of Foreign Assets Control Regulation

The U.S. Department of the Treasury's Office of Foreign Assets Control, or "OFAC," is responsible for administering economic sanctions that affect transactions with designated foreign countries, nationals and others, as defined by various Executive Orders and Acts of Congress. OFAC-administered sanctions take many different forms. For example, sanctions may include: (1) restrictions on trade with or investment in a sanctioned country, including prohibitions against direct or indirect imports from and exports to a sanctioned country and prohibitions on U.S. persons engaging in financial transactions relating to, making investments in, or providing investment-related advice or assistance to, a sanctioned country; and (2) a blocking of assets in which the government or "specially designated nationals" of the sanctioned country have an interest, by prohibiting transfers of property subject to U.S. jurisdiction (including property in the possession or control of U.S. persons). OFAC also publishes lists of persons, organizations, and countries suspected of aiding, harboring or engaging in terrorist acts, known as Specially Designated Nationals and Blocked Persons. Blocked assets (e.g., property and bank deposits) cannot be paid out, withdrawn, set off or transferred in any manner without a license from OFAC. Failure to comply with these sanctions could have serious legal and reputational consequences.

Protection of Client Information

Legal requirements concerning the use and protection of client information affect many aspects of the Company's business, and are continuing to evolve. Current legal requirements include the privacy and information safeguarding provisions of the GLB Act, the Fair Credit Reporting Act ("FCRA") and the amendments adopted by the Fair and Accurate Credit Transactions Act of 2003 (the "FACT Act"), as well as state law requirements. The GLB Act requires a financial institution to disclose its privacy policy to certain customers, and requires the financial institution to allow those customers to opt-out of some sharing of the customers' nonpublic personal information with nonaffiliated third persons. In accordance with these requirements, we and each of our banks and operating subsidiaries provide a written privacy to each affected customer when the customer relationship begins and an annual basis. As described in the privacy notice, we protect the security of information about our customers, educate our employees about the importance of protecting customer privacy, and allow affected customers to opt out of certain types of information sharing. We and our subsidiaries also require business partners with which we share information to have adequate security safeguards and to follow the requirements of the GLB Act. The GLB Act, as interpreted by the federal banking regulators, and state laws require us to take certain actions, including possible notice to affected customers, in the event that sensitive customer information is comprised. We and/or each of the banks and operating subsidiaries may need to amend our privacy policies and adapt our internal procedures in the event that these legal requirements, or the regulators' interpretation of them, change, or if new requirements are added.

Like other lenders, the banks and several of our operating subsidiaries utilize credit bureau data in their underwriting activities. Use of such data is regulated under the FCRA, and the FCRA also regulates reporting information to credit bureaus, prescreening individuals for credit offers, sharing of information between affiliates, and using affiliate data for marketing purposes. Similar state laws may impose additional requirements on us, the banks and our operating subsidiaries.

Violation of these legal requirements may expose us to regulatory action and private litigation, including claims for damages and penalties. In addition, a security incident can cause substantial reputational harm.

Broker-Dealer and Investment Adviser Regulation

WHI and Great Lakes Advisors are subject to extensive regulation under federal and state securities laws. WHI is registered as a broker-dealer with the SEC and in all 50 states, the District of Columbia and the U.S. Virgin Islands. Both WHI and Great Lakes Advisors are registered as investment advisers with the SEC. In addition, WHI is a member of several self-regulatory organizations ("SROs"), including FINRA and the Chicago Stock Exchange. Although WHI is required to be registered with the SEC, much of its regulation has been delegated to SROs that the SEC oversees, including FINRA and the national securities exchanges. In addition to SEC rules and regulations, the SROs adopt rules, subject to approval of the SEC, that govern all aspects of business in the securities industry and conduct periodic examinations of member firms. WHI is also subject to regulation by state securities commissions in

states in which it conducts business. WHI and Great Lakes Advisors are registered only with the SEC as investment advisers, but certain of their advisory personnel are subject to regulation by state securities regulatory agencies. As a result of federal and state registrations and SRO memberships, WHI is subject to overlapping schemes of regulation that cover all aspects of its securities businesses. Such regulations cover, among other things, uses and safekeeping of clients' funds; record-keeping and reporting requirements; supervisory and organizational procedures intended to assure compliance with securities laws and to prevent improper trading on material nonpublic information; personnel-related matters, including qualification and licensing of supervisory and sales personnel; limitations on extensions of credit in securities transactions; clearance and settlement procedures; "suitability" determinations as to certain customer transactions; limitations on the amounts and types of fees and commissions that may be charged to customers; and regulation of proprietary trading activities and affiliate transactions.

Violations of the laws and regulations governing a broker-dealer's actions can result in censures, fines, the issuance of cease-and-desist orders, revocation of licenses or registrations, the suspension or expulsion from the securities industry of a broker-dealer or its officers or employees, or other similar actions by both federal and state securities administrators, as well as the SROs.

As a registered broker-dealer, WHI is subject to the SEC's net capital rule as well as the net capital requirements of the SROs of which it is a member. Net capital rules, which specify minimum capital requirements, are generally designed to measure general financial integrity and liquidity and require that at least a minimum amount of net assets be kept in relatively liquid form. Rules of FINRA and other SROs also impose limitations and requirements on the transfer of member organizations' assets. Compliance with net capital requirements may limit the Company's operations requiring the intensive use of capital. These requirements restrict the Company's ability to withdraw capital from WHI, which in turn may limit the Company's ability to pay dividends, repay debt or redeem or purchase shares of the Company's own outstanding stock. WHI is a member of the Securities Investor Protection Corporation ("SIPC"), which subject to certain limitations, serves to oversee the liquidation of a member brokerage firm, and to return missing cash, stock and other securities owed to the firm's brokerage customers, in the event a member broker-dealer fails. The general SIPC protection for customers' securities accounts held by a member broker-dealer is up to \$500,000 for each eligible customer, including a maximum of \$250,000 for cash claims. SIPC does not protect brokerage customers against investment losses.

WHI in its capacity as an investment adviser is subject to regulations covering matters such as transactions between clients, transactions between the adviser and clients, custody of client assets and management of mutual funds and other client accounts. The principal purpose of regulation and discipline of investment firms is the protection of customers, clients and the securities markets rather than the protection of creditors and shareholders of investment firms. Sanctions that may be imposed for failure to comply with laws or regulations governing investment advisers include the suspension of individual employees, limitations on an adviser's engaging in various asset management activities for specified periods of time, the revocation of registrations, other censures and fines.

Employees

At December 31, 2015, the Company and its subsidiaries employed a total of 3,770 full-time-equivalent employees. The Company provides its employees with comprehensive medical and dental benefit plans, life insurance plans, 401(k) plans and an employee stock purchase plan. The Company considers its relationship with its employees to be good.

Available Information

The Company's Internet address is www.wintrust.com. The Company makes available at this address, under the "Investor Relations" tab, free of charge, its Annual Report on Form 10-K, its annual reports to shareholders, Quarterly Reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC.

Supplemental Statistical Data

The following statistical information is provided in accordance with the requirements of The Securities Act Industry Guide 3, Statistical Disclosure by Bank Holding Companies, which is part of Regulation S-K as promulgated by the SEC. This data should be read in conjunction with the Company's Consolidated Financial Statements and notes thereto, and Management's Discussion and Analysis which are contained in Item 7 of this Annual Report on Form 10-K.

Investment Securities Portfolio

The following table presents the amortized cost and fair value of the Company's investment securities portfolios, by investment category, as of December 31, 2015, 2014 and 2013:

(Dollars in thousands)	2015		2014		2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value

ITEM 1A.

RISK FACTORS

An investment in our securities is subject to risks inherent to our business. Certain material risks and uncertainties that management believes affect Wintrust are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included or incorporated by reference in this Annual Report on Form 10-K and in our other filings with the SEC. Additional risks and uncertainties that management is not aware of or that management currently deems immaterial may also impair Wintrust's business operations. This Annual Report on Form 10-K is qualified in its entirety by these risk factors. If any of the following risks actually occur, our business, financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of our securities could decline significantly, and you could lose all or part of your investment.

Risks Related to Our Business and Operating Environment

Difficult economic conditions have adversely affected our company and the financial services industry in general and further deterioration in economic conditions may materially adversely affect our business, financial condition, results of operations and cash flows.

The U.S. economy was in a recession from the third quarter of 2008 to the second quarter of 2009, and economic activity continues to be restrained. The housing and real estate markets have also been experiencing extraordinary volatility since 2007. Additionally, unemployment rates remained historically high during these periods. These factors have had a significant negative effect on us and other companies in the financial services industry. As a lending institution, our business is directly affected by the ability of our borrowers to repay their loans, as well as by the value of collateral, such as real estate, that secures many of our loans. Market turmoil led to an increase in charge-offs and has negatively impacted consumer confidence and the level of business activity. However, net charge-offs, excluding covered loans, decreased to \$19.2 million in 2015 from \$27.2 million in 2014. Our balance of non-performing loans, excluding covered loans, and other real estate owned ("OREO"), excluding covered other real estate owned, was \$84.1 million and \$43.9 million, respectively, at December 31, 2015 compared to \$78.7 million and \$45.6 million, respectively, at December 31, 2014. Continued weakness or resumed deterioration in the economy, real estate markets or unemployment rates, particularly in the markets in which we operate, will likely diminish the ability of our borrowers to repay loans that we have given them, the value of any collateral securing such loans and may cause increases in delinquencies, problem assets, charge-offs and provision for credit losses, all of which could materially adversely affect our financial condition and results of operations. Further, the underwriting and credit monitoring policies and procedures that we have adopted may not prevent losses that could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Since our business is concentrated in the Chicago metropolitan and southern Wisconsin market areas, further declines in the economy of this region could adversely affect our business.

Except for our premium finance business and certain other niche businesses, our success depends primarily on the general economic conditions of the specific local markets in which we operate. Unlike larger national or other regional banks that are more geographically diversified, we provide banking and financial services to customers primarily in the Chicago metropolitan and southern Wisconsin market areas. The local economic conditions in these areas significantly impact the demand for our products and services as well as the ability of our customers to repay loans, the value of the collateral securing loans and the stability of our deposit funding sources. Specifically, many of the loans in our portfolio are secured by real estate located in the Chicago metropolitan area. Like many areas, our local market area has experienced significant volatility in real estate values in recent years. Further declines in economic conditions, including inflation, recession, unemployment, changes in securities markets or other factors impacting these local markets could, in turn, have a material adverse effect on our financial condition and results of operations. Deterioration in the real estate markets where collateral for our mortgage loans is located could adversely affect the borrower's ability to repay the loan and the value of the collateral securing the loan, and in turn the value of our assets. In addition, the State of Illinois has experienced significant financial difficulty and is facing pension funding shortfalls. To the extent that these issues impact the economic vitality of the state and the businesses operating in Illinois, it encourages businesses to leave the state or discourages new employers to start or move businesses to Illinois, it

could have a material adverse effect on our financial condition and results of operations.

If our allowance for loan losses is not sufficient to absorb losses that may occur in our loan portfolio, our financial condition and liquidity could suffer.

We maintain an allowance for loan losses that is intended to absorb credit losses that we expect to incur in our loan portfolio. At each balance sheet date, our management determines the amount of the allowance for loan losses based on our estimate of probable and reasonably estimable losses in our loan portfolio, taking into account probable losses that have been identified relating to

specific borrowing relationships, as well as probable losses inherent in the loan portfolio and credit undertakings that are not specifically identified.

Because our allowance for loan losses represents an estimate of probable losses, there is no certainty that it will be adequate over time to cover credit losses in the portfolio, particularly if there is deterioration in general economic or market conditions or events that adversely affect specific customers. In 2015, we charged off \$19.2 million in loans, excluding covered loans, (net of recoveries) and increased our allowance for loan losses, excluding the allowance for covered loans, from \$91.7 million at December 31, 2014 to \$105.4 million at December 31, 2015. The increase in allowance in 2015 was primarily the result of significant loan growth during the period. Our allowance for loan losses, excluding the allowance for covered loans, represents 0.62% of total loans, excluding covered loans outstanding at December 31, 2015, compared to 0.64% at December 31, 2014.

Although we believe our loan loss allowance is adequate to absorb probable and reasonably estimable losses in our loan portfolio, if our estimates are inaccurate and our actual loan losses exceed the amount that is anticipated, or if the loss assumptions we used in calculating our reserves are significantly different from those we actually experience, our financial condition and liquidity could be materially adversely affected.

For more information regarding our allowance for loan losses, see “Loan Portfolio and Asset Quality” under Management’s Discussion and Analysis of Financial Condition and Results of Operations in Item 7.

A significant portion of our loan portfolio is comprised of commercial loans, the repayment of which is largely dependent upon the financial success and economic viability of the borrower.

The repayment of our commercial loans is dependent upon the financial success and viability of the borrower. If the economy remains weak for a prolonged period or experiences further deterioration or if the industry or market in which the borrower operates weakens, our borrowers may experience depressed or dramatic and sudden decreases in revenues that could hinder their ability to repay their loans. Our commercial loan portfolio totaled \$4.7 billion or 27% of our total loan portfolio, at December 31, 2015, compared to \$3.9 billion, or 26% of our total loan portfolio, at December 31, 2014.

Commercial loans are secured by different types of collateral related to the underlying business, such as accounts receivable, inventory and equipment. Should a commercial loan require us to foreclose on the underlying collateral, the unique nature of the collateral may make it more difficult and costly to liquidate, thereby increasing the risk to us of not recovering the principal amount of the loan. Accordingly, our business, results of operations and financial condition may be materially adversely affected by defaults in this portfolio.

A substantial portion of our loan portfolio is secured by real estate, in particular commercial real estate. Deterioration in the real estate markets could lead to additional losses, which could have a material adverse effect on our financial condition and results of operations.

As of both December 31, 2015 and 2014, approximately 43% of our total loan portfolio was secured by real estate, the majority of which is commercial real estate. The commercial and residential real estate market continues to experience a variety of difficulties, including the Chicago metropolitan area and southern Wisconsin, in which a majority of our real estate loans are concentrated. Increases in commercial and consumer delinquency levels or declines in real estate market values would require increased net charge-offs and increases in the allowance for loan and lease losses, which could have a material adverse effect on our business, financial condition and results of operations.

Any inaccurate assumptions in our analytical and forecasting models could cause us to miscalculate our projected revenue or losses, which could adversely affect our financial condition.

We use analytical and forecasting models to estimate the effects of economic conditions on our loan portfolio and probable loan performance. Those models reflect certain assumptions about market forces, including interest rates and consumer behavior that may be incorrect. If our analytical and forecasting models’ underlying assumptions are incorrect, improperly applied, or otherwise inadequate, we may suffer deleterious effects such as higher than expected loan losses, lower than expected net interest income, or unanticipated charge-offs, any of which could have a material adverse effect on our business, financial condition and results of operations.

Unanticipated changes in prevailing interest rates and the effects of changing regulation could adversely affect our net interest income, which is our largest source of income.

Wintrust is exposed to interest rate risk in its core banking activities of lending and deposit taking, since changes in prevailing interest rates affect the value of our assets and liabilities. Such changes may adversely affect our net interest income, which is the difference between interest income and interest expense. Our net interest income is affected by the fact that assets and liabilities reprice at different times and by different amounts as interest rates change. Net interest income represents our largest component of net income, and was \$641.5 million and \$598.6 million for the years ended December 31, 2015 and 2014, respectively.

Each of our businesses may be affected differently by a given change in interest rates. For example, we expect that the results of our mortgage banking business in selling loans into the secondary market would be negatively impacted during periods of rising interest rates, whereas falling interest rates could have a negative impact on the net interest spread earned on deposits as we would be unable to lower the rates on many interest bearing deposit accounts of our customers to the same extent as many of our higher yielding asset classes.

Additionally, increases in interest rates may adversely influence the growth rate of loans and deposits, the quality of our loan portfolio, loan and deposit pricing, the volume of loan originations in our mortgage banking business and the value that we can recognize on the sale of mortgage loans in the secondary market.

We seek to mitigate our interest rate risk through several strategies, which may not be successful. With the relatively low interest rates that prevailed in recent years, we were able to augment the total return of our investment securities portfolio by selling call options on fixed-income securities that we own. We recorded fee income of approximately \$15.4 million, \$7.9 million and \$4.8 million for the years ended December 31, 2015, 2014 and 2013, respectively. We also mitigate our interest rate risk by entering into interest rate swaps and other interest rate derivative contracts from time to time with counterparties. To the extent that the market value of any derivative contract moves to a negative market value, we are subject to loss if the counterparty defaults. In the future, there can be no assurance that such mitigation strategies will be available or successful.

Our liquidity position may be negatively impacted if economic conditions continue to suffer.

Liquidity is a measure of whether our cash flows and liquid assets are sufficient to satisfy current and future financial obligations, such as demand for loans, deposit withdrawals and operating costs. Our liquidity position is affected by a number of factors, including the amount of cash and other liquid assets on hand, payment of interest and dividends on debt and equity instruments that we have issued, capital we inject into our bank subsidiaries, proceeds we raise through the issuance of securities, our ability to draw upon our revolving credit facility and dividends received from our banking subsidiaries. Our future liquidity position may be adversely affected by multiple factors, including:

- if our banking subsidiaries report net losses or their earnings are weak relative to our cash flow needs;
- if it is necessary for us to make capital injections to our banking subsidiaries;
- if changes in regulations require us to maintain a greater level of capital, as more fully described below;
- if we are unable to access our revolving credit facility due to a failure to satisfy financial and other covenants; or
- if we are unable to raise additional capital on terms that are satisfactory to us.

Weakness or worsening of the economy, real estate markets or unemployment levels may increase the likelihood that one or more of these events will occur. If our liquidity is adversely affected, it may have a material adverse effect on our business, results of operations and financial condition.

The financial services industry is very competitive, and if we are not able to compete effectively, we may lose market share and our business could suffer.

We face competition in attracting and retaining deposits, making loans, and providing other financial services (including wealth management services) throughout our market area. Our competitors include national, regional and other community banks, and a wide range of other financial institutions such as credit unions, government-sponsored enterprises, mutual fund companies, insurance companies, factoring companies and other non-bank financial companies. Many of these competitors have substantially greater resources and market presence than Wintrust and, as a result of their size, may be able to offer a broader range of products and services, better pricing for those products and services, or newer technologies to deliver those products and services than we can. Several of our local competitors have experienced improvements in their financial condition over the few years and are better positioned to compete for loans, acquisitions and personnel. The financial services industry could become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation. Also, technology has lowered barriers to entry and made it possible for non-banks to offer products and services traditionally provided by banks, such as automatic transfer and payment systems, and for banks that do not have a physical presence in our markets to compete for deposits.

Our ability to compete successfully depends on a number of factors, including, among other things:

- the ability to develop, maintain and build upon long-term customer relationships based on top quality service and high ethical standards;
- the scope, relevance and pricing of products and services offered to meet customer needs and demands;
- the ability to expand our market position;

- the ability to uphold our reputation in the marketplace;
- the rate at which we introduce new products and services relative to our competitors;
- customer satisfaction with our level of service; and
- industry and general economic trends.

If we are unable to compete effectively, we will lose market share and income from deposits, loans and other products may be reduced. This could adversely affect our profitability and have a material adverse effect on our business, financial condition and results of operations.

If we are unable to continue to identify favorable acquisitions or successfully integrate our acquisitions, our growth may be limited and our results of operations could suffer.

In the past several years, we have completed numerous acquisitions of banks, other financial service related companies and financial service related assets, including acquisitions of troubled financial institutions, as more fully described below. We expect to continue to make such acquisitions in the future. Wintrust seeks merger or acquisition partners that are culturally similar, have experienced management, possess either significant market presence or have potential for improved profitability through financial management, economies of scale or expanded services. Failure to successfully identify and complete acquisitions likely will result in Wintrust achieving slower growth. Acquiring other banks, businesses or branches involves various risks commonly associated with acquisitions, including, among other things:

- potential exposure to unknown or contingent liabilities or asset quality issues of the target company;

- failure to adequately estimate the level of loan losses at the target company;

- difficulty and expense of integrating the operations and personnel of the target company;

- potential disruption to our business, including diversion of our management's time and attention;

- the possible loss of key employees and customers of the target company;

- difficulty in estimating the value of the target company; and

- potential changes in banking or tax laws or regulations that may affect the target company.

Acquisitions typically involve the payment of a premium over book and market values, and, therefore, some dilution of Wintrust's tangible book value and net income per common share may occur as a result of any future transaction. In addition, certain acquisitions may expose us to additional regulatory risks, including from foreign governments. Our ability to comply with any such regulations will impact the success of any such acquisitions. Furthermore, failure to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits from an acquisition could have a material adverse effect on our financial condition and results of operations.

Our participation in FDIC-assisted acquisitions may present additional risks to our financial condition and results of operations.

As part of our growth strategy, we have made opportunistic partial acquisitions of troubled financial institutions in transactions facilitated by the FDIC through our bank subsidiaries. These acquisitions, and any future FDIC-assisted transactions we may undertake, involve greater risk than traditional acquisitions because they are typically conducted on an accelerated basis, allowing less time for us to prepare for and evaluate possible transactions, or to prepare for integration of an acquired institution. These transactions also present risks of customer loss, strain on management resources related to collection and management of problem loans and problems related to the integration of operations and personnel of the acquired financial institutions. As a result, there can be no assurance that we will be able to successfully integrate the financial institutions we acquire, or that we will realize the anticipated benefits of the acquisitions. Additionally, while the FDIC may agree to assume certain losses in transactions that it facilitates, there can be no assurances that we would not be required to raise additional capital as a condition to, or as a result of, participation in an FDIC-assisted transaction. Any such transactions and related issuances of stock may have dilutive effect on earnings per share. Furthermore, we may face competition from other financial institutions with respect to proposed FDIC-assisted transactions.

We are also subject to certain risks relating to our loss sharing agreements with the FDIC. Under a loss sharing agreement, the FDIC generally agrees to reimburse the acquiring bank for a portion of any losses relating to covered

assets of the acquired financial institution. This is an important financial term of any FDIC-assisted transaction, as troubled financial institutions often have poorer asset quality. As a condition to reimbursement, however, the FDIC requires the acquiring bank to follow certain servicing procedures. A failure to follow servicing procedures or any other breach of a loss sharing agreement by us could result in the loss of FDIC reimbursement. While we have established a group dedicated to servicing the loans covered by the FDIC loss sharing agreements, there can be no assurance that we will be able to comply with the FDIC servicing procedures. In addition, reimbursable losses and recoveries under loss sharing agreements are based on the book value of the relevant loans and other assets as determined

by the FDIC as of the effective dates of the acquisitions. The amount that the acquiring banks realize on these assets could differ materially from the carrying value that will be reflected in our financial statements, based upon the timing and amount of collections on the covered loans in future periods. Any failure to receive reimbursement, or any material differences between the amount of reimbursements that we do receive and the carrying value reflected in our financial statements, could have a material negative effect on our financial condition and results of operations.

An actual or perceived reduction in our financial strength may cause others to reduce or cease doing business with us, which could result in a decrease in our net interest income and fee revenues.

Our customers rely upon our financial strength and stability and evaluate the risks of doing business with us. If we experience diminished financial strength or stability, actual or perceived, including due to market or regulatory developments, announced or rumored business developments or results of operations, or a decline in stock price, customers may withdraw their deposits or otherwise seek services from other banking institutions and prospective customers may select other service providers. The risk that we may be perceived as less creditworthy relative to other market participants is increased in the current market environment, where the consolidation of financial institutions, including major global financial institutions, is resulting in a smaller number of much larger counterparties and competitors. As our community banks become more closely identified with the Wintrust name, the impact of any perceived weakness or creditworthiness at either the holding company or our community banks may be greater than in prior periods. If customers reduce their deposits with us or select other service providers for all or a portion of the services that we provide them, net interest income and fee revenues will decrease accordingly, and could have a material adverse effect on our results of operations.

If our growth requires us to raise additional capital, that capital may not be available when it is needed or the cost of that capital may be very high.

We are required by regulatory authorities to maintain adequate levels of capital to support our operations (see “-Risks Related to Our Regulatory Environment-If we fail to meet our regulatory capital ratios, we may be forced to raise capital or sell assets”) and as we grow, internally and through acquisitions, the amount of capital required to support our operations grows as well. We may need to raise additional capital to support continued growth both internally and through acquisitions. Any capital we obtain may result in the dilution of the interests of existing holders of our common stock.

Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time which are outside our control and on our financial condition and performance. If we cannot raise additional capital when needed, or on terms acceptable to us, our ability to further expand our operations through internal growth and acquisitions could be materially impaired and our financial condition and liquidity could be materially and negatively affected.

Disruption in the financial markets could result in lower fair values for our investment securities portfolio.

The Company's available-for-sale and trading securities are carried at fair value. Major disruptions in the capital markets experienced in recent years have impacted investor demand for all classes of securities and resulted in volatility in the fair values of the Company's investment securities.

Accounting standards require the Company to categorize these securities according to a fair value hierarchy. As of December 31, 2015, approximately 95% of the Company's available-for-sale securities were categorized in level 2 of the fair value hierarchy (meaning that their fair values were determined by quoted prices for similar assets or other observable inputs). Significant prolonged reduced investor demand could manifest itself in lower fair values for these securities and may result in recognition of an other-than-temporary or permanent impairment of these assets, which could lead to accounting charges and have a material adverse effect on the Company's financial condition and results of operations.

The remaining securities in our available-for-sale securities portfolio were categorized as level 3 (meaning that their fair values were determined by inputs that are unobservable in the market and therefore require a greater degree of management judgment). The determination of fair value for securities categorized in level 3 involves significant judgment due to the complexity of factors contributing to the valuation, many of which are not readily observable in the market. Recent market disruptions make valuation of such securities even more difficult and subjective. In addition, the nature of the business of the third party source that is valuing the securities at any given time could impact the valuation of the securities. Consequently, the ultimate sales price for any of these securities could vary

significantly from the recorded fair value at December 31, 2015, especially if the security is sold during a period of illiquidity or market disruption or as part of a large block of securities under a forced transaction. There can be no assurance that decline in market value associated with these disruptions will not result in other-than-temporary or permanent impairments of these assets, which would lead to accounting charges which could have a material negative effect on our business, financial condition and results of operations.

Our controls and procedures may fail or be circumvented.

Management regularly reviews and updates our internal controls over financial reporting, disclosure controls and procedures and corporate governance policies and procedures. Any system of controls, however well-designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, results of operations and financial condition.

New lines of business and new products and services are essential to our ability to compete but may subject us to additional risks.

We continually implement new lines of business and offer new products and services within existing lines of business to offer our customers a competitive array of products and services. The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology can increase efficiency and enable financial institutions to better serve customers and to reduce costs. However, some new technologies needed to compete effectively result in incremental operating costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in operations. Many of our competitors, because of their larger size and available capital, have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could cause a loss of customers and have a material adverse effect on our business.

At the same time, there can be substantial risks and uncertainties associated with these efforts, particularly in instances where the markets for such services are still developing. In developing and marketing new lines of business and/or new products or services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved, and price and profitability targets may not prove feasible. External factors, such as compliance with regulations, competitive alternatives, and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of our system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on our business, financial condition, and results of operations.

Failures of our information technology systems may adversely affect our operations.

We are increasingly dependent upon computer and other information technology systems to manage our business. We rely upon information technology systems to process, record, monitor and disseminate information about our operations. In some cases, we depend on third parties to provide or maintain these systems. While we perform a review of controls instituted by our critical vendors in accordance with industry standards, we must rely on the continued maintenance of these controls by the outside party, including safeguards over the security of customer data. Additionally, we must rely on our employees to safeguard access to our information technology systems and avoid inadvertent complicity with external security threats. Although we take protective measures and endeavor to modify them as circumstances warrant, the security of our computer systems, software and networks may be vulnerable to breaches, unauthorized access, misuse, computer viruses or other malicious code and cyber attacks that could have a security impact. If one or more of these events occur, or if any of our financial, accounting or other data processing systems fail or have other significant shortcomings, this could jeopardize our or our customers' confidential and other information processed and stored in, and transmitted through, our computer systems and networks or otherwise cause interruptions or malfunctions in our operations or the operations of our customers or counterparties. We may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by us. Security breaches in our online banking systems

could also have an adverse effect on our reputation. Our systems may also be affected by events that are beyond our control, which may include, for example, electrical or telecommunications outages or other damage to our property or assets. Although we take precautions against malfunctions and security breaches, our efforts may not be adequate to prevent problems that could materially adversely affect our business, financial condition and results of operations. Failures by or of our vendors may adversely affect our operations.

We use and rely upon many external vendors to provide us with day-to-day products and services essential to our operations. We are thus exposed to risk that such vendors will not perform as contracted or at agreed-upon service levels. The failure of our vendors to perform as contracted or at necessary service levels for any reason could disrupt our operations, which could adversely affect our business. In addition, if any of our vendors experience insolvency or other business failure, such failure could affect our ability to obtain necessary products or services from a substitute vendor in a timely and cost-effective manner or prevent us from effectively

pursuing certain business objectives entirely. Our failure to implement business objectives due to vendor nonperformance could adversely affect our financial condition and results of operations.

We issue debit cards, and debit card transactions pose a particular cybersecurity risk that is outside of our control. Debit card numbers are susceptible to theft at the point of sale via the physical terminal through which transactions are processed and by other means of hacking. The security and integrity of these transactions are dependent upon retailers' vigilance and willingness to invest in technology and upgrades. Despite third-party security risks that are beyond our control, we offer our customers protection against fraud and attendant losses for unauthorized use of debit cards in order to stay competitive in the marketplace. Offering such protection to our customers exposes us to potential losses which, in the event of a data breach at one or more retailers of considerable magnitude, may adversely affect our business, financial condition, and results of operations.

We depend on the accuracy and completeness of information we receive about our customers and counterparties to make credit decisions.

We rely on information furnished by or on behalf of customers and counterparties in deciding whether to extend credit or enter into other transactions. This information could include financial statements, credit reports, and other financial information. We also rely on representations of those customers, counterparties, or other third parties, such as independent auditors, as to the accuracy and completeness of that information. Reliance on inaccurate or misleading financial statements, credit reports, or other financial information could have a material adverse impact on our business, financial condition and results of operations.

If we are unable to attract and retain experienced and qualified personnel, our ability to provide high quality service will be diminished, we may lose key customer relationships, and our results of operations may suffer.

We believe that our future success depends, in part, on our ability to attract and retain experienced personnel, including our senior management and other key personnel. Our business model is dependent upon our ability to provide high quality and personal service. In addition, as a holding company that conducts its operations through our subsidiaries, we are focused on providing entrepreneurial-based compensation to the chief executives of each our business units. As a Company with start-up and growth oriented operations, we are cognizant that to attract and retain the managerial talent necessary to operate and grow our businesses we often have to compensate our executives with a view to the business we expect them to manage, rather than the size of the business they currently manage.

Accordingly, any executive compensation restrictions may negatively impact our ability to retain and attract senior management. The departure of a senior manager or other key personnel may damage relationships with certain customers, or certain customers may choose to follow such personnel to a competitor. The loss of any of our senior managers or other key personnel, or our inability to identify, recruit and retain such personnel, could materially and adversely affect our business, results of operations and financial condition.

We are subject to environmental liability risk associated with lending activities.

A significant portion of the Company's loan portfolio is secured by real property. In the ordinary course of business, the Company may foreclose on and take title to properties securing certain loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, the Company may be liable for remediation costs, as well as for personal injury and property damage. In addition, we own and operate a number of properties that may be subject to similar environmental liability risks.

Environmental laws may require the Company to incur substantial expenses and could materially reduce the affected property's value or limit the Company's ability to use or sell the affected property. The costs associated with investigation and remediation activities could be substantial. In addition, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. Although the Company has policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on the Company's business, financial condition and results of operations.

We are subject to claims and legal actions which could negatively affect our results of operations or financial condition.

Periodically, as a result of our normal course of business, we are involved in claims and related litigation from our customers or employees. These claims and legal actions, whether meritorious or not, as well as reviews, investigations and proceedings by governmental and self-regulatory agencies could involve large monetary claims and significant legal expense. In addition, such actions may negatively impact our reputation in the marketplace and lessen customer demand. If such claims and legal actions are not decided in Wintrust's favor, our results of operations and financial condition could be adversely impacted.

Losses incurred in connection with actual or projected repurchases and indemnification payments related to mortgages that we have sold into the secondary market may exceed our financial statement reserves and we may be required to increase such reserves in the future. Increases to our reserves and losses incurred in connection with actual loan repurchases and indemnification payments could have a material adverse effect on our business, financial condition, results of operations or cash flows.

We engage in the origination and purchase of residential mortgages for sale into the secondary market. In connection with such sales, we make certain representations and warranties, which, if breached, may require us to repurchase such loans, substitute other loans or indemnify the purchasers of such loans for actual losses incurred in respect of such loans. Due, in part, to increased mortgage payment delinquency rates and declining housing prices during the post 2007 period, we have been receiving such requests for loan repurchases and indemnification payments relating to the representations and warranties with respect to such loans. We have been able to reach settlements with a number of purchasers, and believe that we have established appropriate reserves with respect to indemnification requests. It is possible that the number of such requests will increase or that we will not be able to reach settlements with respect to such requests in the future. Accordingly, it is possible that losses incurred in connection with loan repurchases and indemnification payments may be in excess of our financial statement reserves, and we may be required to increase such reserves and may sustain additional losses associated with such loan repurchases and indemnification payments in the future. Increases to our reserves and losses incurred by us in connection with actual loan repurchases and indemnification payments in excess of our reserves could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Consumers may decide not to use banks to complete their financial transactions, which could adversely affect our business and results of operations.

Technology and other changes are allowing parties to complete financial transactions that historically have involved banks through alternative methods. For example, consumers can now maintain funds that would have historically been held as bank deposits in brokerage accounts or mutual funds. Consumers can also complete transactions such as paying bills and transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. The loss of these revenue streams and the lower cost deposits as a source of funds could have a material adverse effect on our business, financial condition and results of operations.

We may be adversely impacted by the soundness of other financial institutions.

Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to many different industries and counterparties and routinely execute transactions with counterparties in the financial services industry, including the Federal Home Loan Bank ("FHLB"), commercial banks, brokers and dealers, investment banks and other institutional clients. Many of these transactions expose us to credit risk in the event of a default by a counterparty or client. In addition, our credit risk may be exacerbated when collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount due to us. Any such losses could have material adverse effect on our business, financial condition and results of operations.

De novo operations often involve significant expenses and delayed returns and may negatively impact Wintrust's profitability.

Our financial results have been and will continue to be impacted by our strategy of branch openings and de novo bank formations. We expect to increase the opening of additional branches as market conditions improve and, if the interest rate environment and economic climate and regulatory conditions become favorable, may resume de novo bank formations. Based on our experience, we believe that it generally takes over 13 months for de novo banks to first achieve operational profitability, depending on the number of banking facilities opened, the impact of organizational and overhead expenses, the start-up phase of generating deposits and the time lag typically involved in redeploying deposits into attractively priced loans and other higher yielding earning assets. However, it may take longer than expected or more than the amount of time Wintrust has historically experienced for new banks and/or banking facilities to reach profitability, and there can be no guarantee that these branches or banks will ever be profitable. Moreover, the FDIC's extension of the enhanced supervisory period for de novo banks from three to seven years, including higher capital requirements during this period, could also delay a new bank's ability to contribute to the

Company's earnings and impact the Company's willingness to expand through de novo bank formation. To the extent we undertake additional de novo bank, branch and business formations, our level of reported net income, return on average equity and return on average assets will be impacted by startup costs associated with such operations, and it is likely to continue to experience the effects of higher expenses relative to operating income from the new operations. These expenses may be higher than we expected or than our experience has shown, which could have a material adverse effect on our business, financial condition and results of operations.

We are subject to examinations and challenges by tax authorities, and changes in federal and state tax laws and changes in interpretation of existing laws can impact our financial results.

In the normal course of business, we, as well as our subsidiaries, are routinely subject to examinations from federal and state tax authorities regarding the amount of taxes due in connection with investments we have made and the businesses in which we have engaged. Recently, federal and state tax authorities have become increasingly aggressive in challenging tax positions taken by financial institutions. These tax positions may relate to among other things tax compliance, sales and use, franchise, gross receipts, payroll, property and income tax issues, including tax base, apportionment and tax credit planning. The challenges made by tax authorities may result in adjustments to the timing or amount of taxable income or deductions or the allocation of income among tax jurisdictions. If any such challenges are made and are not resolved in our favor, they could have a material adverse effect on our financial condition and results of operations. Given the current economic and political environment and ongoing budgetary pressures, the enactment of new federal or state tax legislation may occur. The enactment of such legislation, or changes in the interpretation of existing law, including provisions impacting tax rates, apportionment, consolidation or combination, income, expenses and credits may have a material adverse effect on our business, financial condition and results of operations.

Changes in accounting policies or accounting standards could materially adversely affect how we report our financial results and financial condition.

Our accounting policies are fundamental to understanding our financial results and financial condition. Some of these policies require use of estimates and assumptions that affect the value of our assets or liabilities and financial results. Some of our accounting policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. If such estimates or assumptions underlying our financial statements are incorrect, we may experience material losses. From time to time, the Financial Accounting Standards Board ("FASB") and the SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be hard to predict and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in the restatement of prior period financial statements.

We are a bank holding company, and our sources of funds, including to pay dividends, are limited.

We are a bank holding company and our operations are primarily conducted by and through our 15 operating banks, which are subject to significant federal and state regulation. Cash available to pay dividends to our shareholders, repurchase our shares or repay our indebtedness is derived primarily from dividends received from our banks and our ability to receive dividends from our subsidiaries is restricted. Various statutory provisions restrict the amount of dividends our banks can pay to us without regulatory approval. The banks may not pay cash dividends if that payment could reduce the amount of their capital below that necessary to meet the "adequately capitalized" level in accordance with regulatory capital requirements. It is also possible that, depending upon the financial condition of the banks and other factors, regulatory authorities could conclude that payment of dividends or other payments, including payments to us, is an unsafe or unsound practice and impose restrictions or prohibit such payments. Our inability to receive dividends from our banks could adversely affect our business, financial condition and results of operations.

Anti-takeover provisions could negatively impact our shareholders.

Certain provisions of our articles of incorporation, by-laws and Illinois law may have the effect of impeding the acquisition of control of Wintrust by means of a tender offer, a proxy fight, open-market purchases or otherwise in a transaction not approved by our board of directors. For example, our board of directors may issue additional authorized shares of our capital stock to deter future attempts to gain control of Wintrust, including the authority to determine the terms of any one or more series of preferred stock, such as voting rights, conversion rates and liquidation preferences. As a result of the ability to fix voting rights for a series of preferred stock, the board has the power, to the extent consistent with its fiduciary duty, to issue a series of preferred stock to persons friendly to management in order to attempt to block a merger or other transaction by which a third party seeks control, and thereby assist the incumbent board of directors and management to retain their respective positions. In addition, our articles of incorporation expressly elect to be governed by the provisions of Section 7.85 of the Illinois Business

Corporation Act, which would make it more difficult for another party to acquire us without the approval of our board of directors.

The ability of a third party to acquire us is also limited under applicable banking regulations. The BHC Act requires any "bank holding company" (as defined in the BHC Act) to obtain the approval of the Federal Reserve prior to acquiring more than 5% of our outstanding common stock. Any person other than a bank holding company is required to obtain prior approval of the Federal Reserve to acquire 10% or more of our outstanding common stock under the Change in Bank Control Act of 1978. Any holder of 25% or more of our outstanding common stock, other than an individual, is subject to regulation as a "bank holding company" under the BHC Act. For purposes of calculating ownership thresholds under these banking regulations, bank regulators would likely at least take the position that the minimum number of shares, and could take the position that the maximum number of shares, of Wintrust common stock that a holder is entitled to receive pursuant to securities convertible into or settled in Wintrust

common stock, including pursuant to Wintrust's warrants to purchase Wintrust common stock held by such holder, must be taken into account in calculating a shareholder's aggregate holdings of Wintrust common stock.

These provisions may have the effect of discouraging a future takeover attempt that is not approved by our board of directors but which our individual shareholders may deem to be in their best interests or in which our shareholders may receive a substantial premium for their shares over then-current market prices. As a result, shareholders who might desire to participate in such a transaction may not have an opportunity to do so. Such provisions will also render the removal of our current board of directors or management more difficult.

Risks Related to Our Regulatory Environment

If we fail to meet our regulatory capital ratios, we may be forced to raise capital or sell assets.

As a banking institution, we are subject to regulations that require us to maintain certain capital ratios, such as the ratio of our Tier 1 capital to our risk-based assets. If our regulatory capital ratios decline, as a result of decreases in the value of our loan portfolio or otherwise, we will be required to improve such ratios by either raising additional capital or by disposing of assets. If we choose to dispose of assets, we cannot be certain that we will be able to do so at prices that we believe to be appropriate, and our future operating results could be negatively affected. If we choose to raise additional capital, we may accomplish this by selling additional shares of common stock, or securities convertible into or exchangeable for common stock, which could significantly dilute the ownership percentage of holders of our common stock and cause the market price of our common stock to decline. Additionally, events or circumstances in the capital markets generally may increase our capital costs and impair our ability to raise capital at any given time. If our credit rating is lowered, our financing costs could increase.

We have been rated by Fitch Ratings as BBB.

Our creditworthiness is not fixed and should be expected to change over time as a result of company performance and industry conditions. We cannot give any assurances that our credit ratings will remain at current levels, and it is possible that our ratings could be lowered or withdrawn by Fitch Ratings. Any actual or threatened downgrade or withdrawal of our credit rating could affect our perception in the marketplace and ability to raise capital, and could increase our debt financing costs.

Changes in the United States' monetary policy may restrict our ability to conduct our business in a profitable manner. Our ability to profitably operate is dependent, in part, upon federal fiscal policies that cannot be predicted. We are particularly affected by the monetary policies of the Federal Reserve Board, which influence money supply in the United States. Any change in the United States' monetary policy, or worsening federal budgetary pressures, could affect our access to capital. Additionally, any trend toward inflation, economic decline, destabilizing of financial markets, or other factors beyond our control may significantly affect consumer demand for our products and consumers' ability to repay loans, reducing our results of operations.

Legislative and regulatory actions taken now or in the future regarding the financial services industry may significantly increase our costs or limit our ability to conduct our business in a profitable manner.

We are already subject to extensive federal and state regulation and supervision. The cost of compliance with such laws and regulations can be substantial and adversely affect our ability to operate profitably. While we are unable to predict the scope or impact of any potential legislation or regulatory action until it becomes final, it is possible that changes in applicable laws, regulations or interpretations hereof could significantly increase our regulatory compliance costs, impede the efficiency of our internal business processes, negatively impact the recoverability of certain of our recorded assets, require us to increase our regulatory capital, interfere with our executive compensation plans, or limit our ability to pursue business opportunities in an efficient manner including our plan for de novo growth and growth through acquisitions.

The Dodd-Frank Act significantly changed the bank regulatory structure and affects the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new rules and regulations, including heightened capital requirements, and to prepare numerous studies and reports for Congress. The Dodd-Frank Act amended the laws governing federal preemption of state laws as applied to national banks, and eliminated federal preemption for subsidiaries of national banks. These changes may subject our national banks and their subsidiaries and divisions, including Wintrust Mortgage, to additional state regulation. With regard to mortgage lending, the Dodd-Frank Act

imposed new requirements regarding the origination and servicing of residential mortgage loans. The law created a variety of new consumer protections, including limitations on the manner by which loan originators may be compensated and an obligation of the part of lenders to assess and verify a borrower's "ability to repay" a residential mortgage loan.

The Dodd-Frank Act also enhanced provisions relating to affiliate and insider lending restrictions and loans-to-one-borrower limitations. Federal and state banking laws impose limits on the amount of credit a bank can extend to any one person (or group of related persons). The Dodd-Frank Act expanded the scope of these restrictions for national banks under federal law to include credit exposure arising from derivative transactions, repurchase agreements, and securities lending and borrowing transactions.

Provisions of the Dodd-Frank Act also amended the FDIA to prohibit state-chartered banks (including certain of our banking subsidiaries) from engaging in derivative transactions unless the state lending limit laws take into account credit exposure to such transactions.

Additional discussion of the Dodd-Frank Act may be found in this Annual Report on Form 10-K under "Business - Supervision and Regulation" and "Management's Discussion and Analysis of Financial Condition and Results of Operations-Overview and Strategy-Financial Regulatory Reform" in Item 7.

Given the uncertainty associated with the manner in which many provisions of the Dodd-Frank Act will be implemented by the various regulatory agencies, the full extent of the impact that its requirements will have on our operations is unclear. However, its requirements may, individually or in the aggregate, have a material adverse effect upon the Company's business, results of operations, cash flows and financial position.

Financial reform legislation and increased regulatory rigor around mortgage-related issues may reduce our ability to market our products to consumers and may limit our ability to profitably operate our mortgage business.

The Dodd-Frank Act also established the CFPB within the Federal Reserve, which now regulates consumer financial products and services. On July 21, 2011, many of the consumer financial protection functions previously assigned to other federal agencies shifted to the CFPB. The CFPB now has broad rulemaking authority over a wide range of consumer protection laws that apply to banks and other providers of consumer financial services, including the authority to prohibit "unfair, deceptive or abusive acts or practices," and to enact regulations to ensure that all consumers have access to markets for consumer financial products and services, and that such markets are fair, transparent and competitive. The Dodd-Frank Act also required the CFPB to adopt a number of new specific regulatory requirements. These new rules may increase the costs of engaging in these activities for all market participants, including our subsidiaries. Additionally, the CFPB has broad supervisory, examination and enforcement authority. Although we and our subsidiary banks are not subject to CFPB examination, the actions taken by the CFPB may influence enforcement actions and positions taken by other federal and state regulators, including those with jurisdiction over us and our subsidiaries. In addition, in the wake of the mortgage crisis of the last few years, federal and state banking regulators are closely examining the mortgage and mortgage servicing activities of depository financial institutions. Should the regulatory agencies have serious concerns with respect to our operations in this regard, the effect of such concerns could have a material adverse effect on our profits. Finally, the Dodd-Frank Act authorizes state attorneys general and other state officials to enforce certain consumer protection rules issued by the CFPB.

Federal, state and local consumer lending laws may restrict our ability to originate certain mortgage loans or increase our risk of liability with respect to such loans and could increase our cost of doing business.

Federal, state and local laws have been adopted that are intended to eliminate certain lending practices considered "predatory." These laws prohibit practices such as steering borrowers away from more affordable products, selling unnecessary insurance to borrowers, repeatedly refinancing loans and making loans without a reasonable expectation that the borrowers will be able to repay the loans irrespective of the value of the underlying property. Over the course of 2013 and 2014, the CFPB issued several rules on mortgage lending, notably a rule requiring all home mortgage lenders to determine a borrower's ability to repay the loan. Loans with certain terms and conditions and that otherwise meet the definition of a "qualified mortgage" may be protected from liability to a borrower for failing to make the necessary determinations. In either case, we may find it necessary to tighten our mortgage loan underwriting standards in response to the CFPB rules, which may constrain our ability to make loans consistent with our business strategies. It is our policy not to make predatory loans and to determine borrowers' ability to repay, but the law and related rules create the potential for increased liability with respect to our lending and loan investment activities. They increase our cost of doing business and, ultimately, may prevent us from making certain loans and cause us to reduce the average percentage rate or the points and fees on loans that we do make. In addition, regulation related to redlining, fair lending, Community Re-Investment Act compliance and Bank Secrecy Act compliance create significant burdens which necessitate increased costs. Any failure to comply with any of these regulations could have a significant impact on our ability to operate, our ability to acquire or open new banks and/or result in meaningful fines.

Regulatory initiatives regarding bank capital requirements may require heightened capital.

Both the Dodd-Frank Act, which reformed the regulation of financial institutions in a comprehensive manner, and the Basel III regulatory capital reforms, which increase both the amount and quality of capital that financial institutions must hold will impact our capital requirements. Specifically, in July 2013, the U.S. federal banking authorities approved the implementation of the Basel III Rule. The Basel III Rule is applicable to all U.S. banks that are subject to minimum capital requirements as well as to bank and saving and loan holding companies, other than “small bank holding companies” (generally bank holding companies with consolidated assets of less than \$500 million). The Basel III Rule not only increases most of the required minimum regulatory capital ratios, it introduces a new Common Equity Tier 1 capital ratio and the concept of a capital conservation buffer. The Basel III Rule also expands the current definition of capital by establishing additional criteria that capital instruments must meet to be considered Additional Tier 1 capital (i.e., Tier 1 capital in addition to Common Equity) and Tier 2 capital. A number of instruments that now generally qualify as Tier 1 capital will not qualify or their qualifications will change when the Basel III Rule is fully

implemented. The Basel III Rule has maintained the general structure of the current prompt corrective action thresholds while incorporating the increased requirements, including the Common Equity Tier 1 capital ratio. In order to be a “well-capitalized” depository institution under the new regime, an institution must maintain a Common Equity Tier 1 capital ratio of 6.5% or more, a Tier 1 capital ratio of 8% or more, a total capital ratio of 10% or more, and a leverage ratio of 5% or more. Institutions must also maintain a capital conservation buffer consisting of Common Equity Tier 1 capital. Financial institutions became subject to the Basel III Rule on January 1, 2015 with a phase-in period through 2019 for many of the changes.

The implementation of these provisions, as well as any other aspects of current or proposed regulatory or legislative changes to laws applicable to the financial industry, will impact the profitability of our business activities and may change certain of our business practices, including the ability to offer new products, obtain financing, attract deposits, make loans, and achieve satisfactory interest spreads, and could expose us to additional costs, including increased compliance costs. These changes also may require us to invest significant management attention and resources to make any necessary changes to operations in order to comply, and could therefore also materially and adversely affect our business, financial condition and results of operations. Our management is actively reviewing the provisions of the Dodd-Frank Act and the Basel III Rule, many of which are to be phased-in over the next several months and years, and assessing the probable impact on our operations. However, the ultimate effect of these changes on the financial services industry in general, and us in particular, is uncertain at this time.

In October 2012, the Federal Reserve published a final rule implementing the stress test requirements under the Dodd-Frank Act, which are designed to evaluate the sufficiency of a banking organization's capital to support its operations during periods of stress. As a bank holding company with between \$10 billion and \$50 billion in total consolidated assets, we were required to conduct annual stress tests based on scenarios provided by the Federal Reserve, beginning in the fall of 2013, and will be required to publicly disclose the results of our stress tests going forward. This stress test requirement has increased our compliance costs. We anticipate that our pro forma capital ratios, as reflected in the stress test calculations under the required stress test scenarios, will be an important factor considered by the Federal Reserve Board in evaluating whether proposed payments of dividends or stock repurchases are consistent with its prudential expectations. Requirements to maintain higher levels of capital or liquidity to address potential adverse stress scenarios could adversely impact our net income and our return on equity.

Our FDIC insurance premiums may increase, which could negatively impact our results of operations.

Recent insured institution failures, as well as deterioration in banking and economic conditions, have significantly increased FDIC loss provisions, resulting in a decline of its deposit insurance fund to historical lows. In addition, the Dodd-Frank Act made permanent a temporary increase in the limit on FDIC coverage to \$250,000 per depositor.

These developments have caused our FDIC insurance premiums to increase, and may cause additional increases. Certain provisions of the Dodd-Frank Act may further affect our FDIC insurance premiums. The Dodd-Frank Act includes provisions that change the assessment base for federal deposit insurance from the amount of insured deposits to average total consolidated assets less average tangible capital, eliminate the maximum size of the DIF, eliminate the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds, and increase the minimum reserve ratio of the DIF from 1.15% to 1.35%. Beginning in late 2010, the FDIC issued regulations implementing some of these changes. There is a risk that the banks' deposit insurance premiums will continue to increase if failures of insured depository institutions continue to deplete the DIF. Any such increase may negatively impact our financial condition and results of operations.

Non-compliance with the USA PATRIOT Act, Bank Secrecy Act or other laws and regulations could result in fines or sanctions.

The USA PATRIOT Act and the Bank Secrecy Act require financial institutions to develop programs to prevent financial institutions from being used for money laundering or the funding of terrorist activities. If such activities are detected, financial institutions are obligated to file suspicious activity reports with FinCEN. These rules require certain financial institutions to establish procedures for identifying and verifying the identity of customers seeking to open new accounts. Failure to comply with these regulations could result in fines or sanctions. Several banking institutions have received large fines for non-compliance with these laws and regulations. Although we have developed policies

and procedures designed to assist in compliance with these laws and regulations, no assurance can be given that these policies and procedures will be effective in preventing violations of these laws and regulations.

Risks Related to Our Niche Businesses

Our premium finance business may involve a higher risk of delinquency or collection than our other lending operations, and could expose us to losses.

We provide financing for the payment of commercial insurance premiums and life insurance premiums on a national basis through our wholly owned subsidiary, FIFC, and financing for the payment of commercial insurance premiums in Canada through our wholly owned subsidiary, FIFC Canada. Commercial insurance premium finance loans involve a different, and possibly higher, risk of delinquency or collection than life insurance premium finance loans and the loan portfolios of our bank subsidiaries because these loans are issued primarily through relationships with a large number of unaffiliated insurance agents and because the borrowers are located nationwide. As a result, risk management and general supervisory oversight may be difficult. As of December 31, 2015, we had \$2.4 billion of commercial insurance premium finance loans outstanding, of which \$2.1 billion were originated in the U.S. by FIFC and \$278.3 million were originated in Canada by FIFC Canada. Together, these loans represented 14% of our total loan portfolio as of such date.

FIFC and FIFC Canada may also be more susceptible to third party fraud with respect to commercial insurance premium finance loans because these loans are originated and many times funded through relationships with unaffiliated insurance agents and brokers. In the second quarter of 2010, fraud perpetrated against a number of premium finance companies in the industry, including the property and casualty division of FIFC, increased both the Company's net charge-offs and provision for credit losses by \$15.7 million. Acts of fraud are difficult to detect and deter, and we cannot assure investors that our risk management procedures and controls will prevent losses from fraudulent activity.

FIFC may be exposed to the risk of loss in our life insurance premium finance business because of fraud. While FIFC maintains a policy prohibiting the knowing financing of stranger-originated life insurance and has established procedures to identify and prevent the company from financing such policies, FIFC cannot be certain that it will never provide loans with respect to such a policy. In the event such policies were financed, a carrier could potentially put at risk the cash surrender value of a policy, which serves as FIFC's primary collateral, by challenging the validity of the insurance contract for lack of an insurable interest.

See the below risk factor "Widespread financial difficulties or credit downgrades among commercial and life insurance providers could lessen the value of the collateral securing our premium finance loans and impair the financial condition and liquidity of FIFC and FIFC Canada" for a discussion of further risks associated with our insurance premium finance activities.

While FIFC is licensed as required and carefully monitors compliance with regulation of each of its businesses, there can be no assurance that FIFC will not be negatively impacted by material changes in the regulatory environment. FIFC Canada is not required to be licensed in most provinces of Canada, but there can be no assurance that future regulations which impact the business of FIFC Canada will not be enacted.

Additionally, to the extent that affiliates of insurance carriers, banks, and other lending institutions add greater service and flexibility to their financing practices in the future, our competitive position and results of operations could be adversely affected. FIFC's life insurance premium finance business could be materially negatively impacted by changes in the federal or state estate tax provisions. There can be no assurance that FIFC will be able to continue to compete successfully in its markets.

Widespread financial difficulties or credit downgrades among commercial and life insurance providers could lessen the value of the collateral securing our premium finance loans and impair the financial condition and liquidity of FIFC and FIFC Canada.

FIFC and FIFC Canada's premium finance loans are primarily secured by the insurance policies financed by the loans. These insurance policies are written by a large number of insurance companies geographically dispersed throughout the country. Our premium finance receivables balances finance insurance policies which are spread among a large number of insurers; however, one of the insurers represents approximately 14% of such balances and two additional insurers each of which represents approximately 5% of such balances. FIFC and FIFC Canada consistently monitor carrier ratings and financial performance of our carriers. While FIFC and FIFC Canada can mitigate its risks as a result of this monitoring to the extent that commercial or life insurance providers experience widespread difficulties or

credit downgrades, the value of our collateral will be reduced. FIFC and FIFC Canada are also subject to the possibility of insolvency of insurance carriers in the commercial and life insurance businesses that are in possession of our collateral. If one or more large nationwide insurers were to fail, the value of our portfolio could be significantly negatively impacted. A significant downgrade in the value of the collateral supporting our premium finance business could impair our ability to create liquidity for this business, which, in turn could negatively impact our ability to expand.

Proposed regulatory changes could significantly reduce loan volume and impair the financial condition of FIFC.

FinCEN has proposed additional AML rules that would require banks to gather and verify additional customer information, including beneficial ownership of borrowers. These requirements, if imposed on FIFC, would likely impose delays in processing premium finance loan applications and may result in transition of loan transaction volume to premium finance companies that are not subject to these AML rules, i.e., premium finance companies that are not affiliated with banks. A material reduction in loan

transaction volume would likely impair the financial condition of FIFC. There can be no assurance that the proposed additional AML rules will be issued by FinCEN in final form, when they might become effective, or whether they will apply to FIFC.

Our wealth management business in general, and WHI's brokerage operation, in particular, exposes us to certain risks associated with the securities industry.

Our wealth management business in general, and WHI's brokerage operations in particular, present special risks not borne by community banks that focus exclusively on community banking. For example, the brokerage industry is subject to fluctuations in the stock market that may have a significant adverse impact on transaction fees, customer activity and investment portfolio gains and losses. Likewise, additional or modified regulations may adversely affect our wealth management operations. Each of our wealth management operations is dependent on a small number of professionals whose departure could result in the loss of a significant number of customer accounts. A significant decline in fees and commissions or trading losses suffered in the investment portfolio could adversely affect our results of operations. In addition, we are subject to claim arbitration risk arising from customers who claim their investments were not suitable or that their portfolios were inappropriately traded. These risks increase when the market, as a whole, declines. The risks associated with retail brokerage may not be supported by the income generated by our wealth management operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company's executive offices are located at 9700 W. Higgins Road, Rosemont, Illinois. The Company also leases office locations and retail space at 231 S. LaSalle Street in downtown Chicago. The Company's banks operate through 152 banking facilities, the majority of which are owned. The Company owns 224 automatic teller machines, the majority of which are housed at banking locations. The banking facilities are located in communities throughout the Chicago metropolitan area and southern Wisconsin. Excess space in certain properties is leased to third parties. The Company's wealth management subsidiaries have one location in downtown Chicago, one in Appleton, Wisconsin, and one in Safety Harbor, Florida, all of which are leased, as well as office locations at several of our banks. Wintrust Mortgage is headquartered in our corporate headquarters in Rosemont, Illinois and has 55 locations in 12 states, all of which are leased, as well as office locations at several of our banks. FIFC has one location in Northbrook, Illinois which is owned and locations in Jersey City, New Jersey and Long Island, New York which are leased. FIFC Canada has three locations in Canada that are leased, located in Toronto, Ontario, Mississauga, Ontario and Vancouver, British Columbia. Tricom has one location in Menomonee Falls, Wisconsin which is owned. In addition, the Company owns other real estate acquired for further expansion that, when considered in the aggregate, is not material to the Company's financial position.

ITEM 3. LEGAL PROCEEDINGS

The Company and its subsidiaries, from time to time, are subject to pending and threatened legal action and proceedings arising in the ordinary course of business.

In accordance with applicable accounting principles, the Company establishes an accrued liability for litigation and threatened litigation actions and proceedings when those actions present loss contingencies which are both probable and estimable. In actions for which a loss is reasonably possible in future periods, the Company determines whether it can estimate a loss or range of possible loss. To determine whether a possible loss is estimable, the Company reviews and evaluates its material litigation on an ongoing basis, in conjunction with any outside counsel handling the matter, in light of potentially relevant factual and legal developments. This review may include information learned through the discovery process, rulings on substantive or dispositive motions, and settlement discussions.

On March 15, 2012, a former mortgage loan originator employed by Wintrust Mortgage Company, named Wintrust, Barrington Bank and its subsidiary, Wintrust Mortgage Company, as defendants in a Fair Labor Standards Act class action lawsuit filed in the U.S. District Court for the Northern District of Illinois. The suit asserts that Wintrust Mortgage Company violated the federal Fair Labor Standards Act and challenges the manner in which Wintrust Mortgage Company classified its loan originators and compensated them for their work. The suit also seeks to assert these claims as a class. On September 30, 2013, the Court entered an order conditionally certifying an "opt-in" class in this case. Notice to the potential class members was sent on or about October 22, 2013, primarily informing the putative class of the right to opt-into the class and setting a deadline for same. Approximately 15% of the notice recipients joined the class. On September 26, 2014, the Court stayed actions by opt-in plaintiffs with arbitration agreements, which reduced the class size by more than 40%. The Court also denied the opt-in plaintiffs' motion for equitable tolling, which the Company anticipates will reduce the class size by an additional 15%. On April 30, 2015, the parties settled the dispute for an immaterial amount and the Court approved the settlement on June 17, 2015. On January 15, 2015, Lehman Brothers Holdings, Inc. ("Lehman Holdings") sent a demand letter asserting that Wintrust Mortgage must indemnify it for losses arising from loans sold by Wintrust Mortgage to Lehman Brothers Bank, FSB under a Loan Purchase Agreement between Wintrust Mortgage, as successor to SGB Corporation, and Lehman Brothers Bank. The demand was the precursor for triggering the alternative dispute resolution process mandated by the U.S. Bankruptcy Court for the Southern District of New York. Lehman Holdings triggered the mandatory alternative dispute resolution process on October 16, 2015. On February 3, 2016, following a ruling by the federal Court of Appeals for the Tenth Circuit that was adverse to Lehman Holdings on the statute of limitations that is applicable to similar loan purchase claims, Lehman Holdings filed a complaint against Wintrust Mortgage and 150 other entities from which it had purchased loans in the U.S. Bankruptcy Court for the Southern District of New York.

Wintrust Mortgage has not been served with the new complaint. The mandatory mediation is scheduled for March 16, 2016.

The Company has reserved an amount for the Lehman Holdings demand that is immaterial to its results of operations or financial condition. Such litigation and threatened litigation actions necessarily involve substantial uncertainty and it is not possible at this time to predict the ultimate resolution or to determine whether, or to what extent, any loss with respect to these legal proceedings may exceed the amounts reserved by the Company.

On August 28, 2015, Wintrust Mortgage received a demand from RFC Liquidating Trust asserting that that Wintrust Mortgage is liable to it for losses arising from loans sold by Wintrust Mortgage or its predecessors to Residential Funding Company LLC and/or related entities. No litigation has been initiated and the range of liability is not reasonably estimable at this time and it is not foreseeable when sufficient information will become available to provide a basis for recording a reserve, should a reserve ultimately be required.

On August 13, 2015, BMO Harris Financial Advisors (“BHFA”) filed an arbitration demand with the FINRA seeking damages and a permanent injunction and a complaint with the Circuit Court for Cook County, Illinois seeking a temporary restraining order against one of its former financial advisors and a current financial advisor with WHI. A narrow and limited temporary injunction was entered and the matter was referred to FINRA for arbitration. In November 2015, BHFA added WHI as a co-defendant in the arbitration action, alleging that WHI tortiously interfered with BHFA’s contract with its former financial advisor. As discovery is still in the preliminary stages, the range of liability is not reasonably estimable at this time and it is not foreseeable when sufficient information will become available to provide a basis for recording a reserve, should a reserve ultimately be required. A hearing on the merits has been set for September 12 - 15, 2016.

Based on information currently available and upon consultation with counsel, management believes that the eventual outcome of any pending or threatened legal actions and proceedings will not have a material adverse effect on the operations or financial condition of the Company. However, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the results of operations or financial condition for a particular period.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is traded on The NASDAQ Global Select Stock Market under the symbol WTFC. The following table sets forth the high and low sales prices reported on NASDAQ for the common stock by fiscal quarter during 2015 and 2014.

	2015		2014	
	High	Low	High	Low
Fourth Quarter	\$55.00	\$47.32	\$47.78	\$41.99
Third Quarter	55.79	48.83	48.53	44.34
Second Quarter	54.00	46.77	49.46	42.53
First Quarter	48.81	41.04	49.99	42.14

Performance Graph

The following performance graph compares the five-year percentage change in the Company's cumulative shareholder return on common stock compared with the cumulative total return on composites of (1) all NASDAQ Global Select Market stocks for United States companies (broad market index) and (2) all NASDAQ Global Select Market bank stocks (peer group index). Cumulative total return is computed by dividing the sum of the cumulative amount of dividends for the measurement period and the difference between the Company's share price at the end and the beginning of the measurement period by the share price at the beginning of the measurement period. The NASDAQ Global Select Market for United States companies' index comprises all domestic common shares traded on the NASDAQ Global Select Market and the NASDAQ Small-Cap Market. The NASDAQ Global Select Market bank stocks index comprises all banks traded on the NASDAQ Global Select Market and the NASDAQ Small-Cap Market. This graph and other information furnished in the section titled "Performance Graph" under this Part II, Item 5 of this Annual Report on Form 10-K shall not be deemed to be "soliciting" materials or to be "filed" with the SEC or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act, as amended.

	2010	2011	2012	2013	2014	2015
Wintrust Financial Corporation	100.00	84.92	111.11	139.63	141.57	146.90
NASDAQ — Total US	100.00	100.31	116.79	155.90	175.33	176.17
NASDAQ — Bank Index	100.00	74.57	100.48	137.27	153.50	156.89

Approximate Number of Equity Security Holders

As of February 24, 2016 there were approximately 1,702 shareholders of record of the Company's common stock.

Dividends on Common Stock

The Company's Board of Directors approved the first semi-annual dividend on the Company's common stock in January 2000 and continued to approve a semi-annual dividend until quarterly dividends were approved in 2014 and 2015. The payment of dividends is subject to statutory restrictions and restrictions arising under the terms of the Company's 5.00% Non-Cumulative Perpetual Convertible Preferred Stock, Series C (the "Series C Preferred Stock"), the terms of the Company's Fixed-to-Floating Non-Cumulative Perpetual Preferred Stock, Series D (the "Series D Preferred Stock"), the terms of the Company's Trust Preferred Securities offerings and under certain financial covenants in the Company's revolving and term facilities. Under the terms of these separate facilities entered into on December 15, 2014 and subsequently amended in December 2015, the Company is prohibited from paying dividends on any equity interests, including its common stock and preferred stock, if such payments would cause the Company to be in default under its facilities or exceed a certain threshold.

The following is a summary of the cash dividends paid in 2015 and 2014:

Record Date	Payable Date	Dividend per Share
November 12, 2015	November 27, 2015	\$0.11
August 6, 2015	August 20, 2015	\$0.11
May 7, 2015	May 21, 2015	\$0.11
February 5, 2015	February 19, 2015	\$0.11
November 6, 2014	November 20, 2014	\$0.10
August 7, 2014	August 21, 2014	\$0.10
May 8, 2014	May 22, 2014	\$0.10
February 6, 2014	February 20, 2014	\$0.10

On January 28, 2016, Wintrust Financial Corporation announced that the Company's Board of Directors approved a quarterly cash dividend of \$0.12 per share of outstanding common stock. The dividend was paid on February 25, 2016 to shareholders of record as of February 11, 2016.

Because the Company's consolidated net income consists largely of net income of the banks and certain wealth management subsidiaries, the Company's ability to pay dividends generally depends upon its receipt of dividends from these entities. The banks' ability to pay dividends is regulated by banking statutes. See "Supervision and Regulation - Payment of Dividends and Share Repurchases" in Item 1 of this Annual Report on Form 10-K. During 2015, 2014 and 2013, the banks and certain wealth management subsidiaries paid \$22.2 million, \$77.0 million and \$112.8 million, respectively, in dividends to the Company.

Reference is also made to Note 18 to the Consolidated Financial Statements and "Liquidity and Capital Resources" contained in Item 8 of this Annual Report on Form 10-K for a description of the restrictions on the ability of certain subsidiaries to transfer funds to the Company in the form of dividends.

Issuer Purchases of Equity Securities

No purchases of the Company's common shares were made by or on behalf of the Company or any "affiliated purchaser" as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended, during the year ended December 31, 2015. There is currently no authorization to repurchase shares of outstanding common stock.

(1) Net revenue includes net interest income and non-interest income

(2) See Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations—Non-GAAP Financial Measures/Ratios," for a reconciliation of this performance measure/ratio to GAAP.

(3) The net overhead ratio is calculated by netting total non-interest expense and total non-interest income, annualizing this amount, and dividing by that period's total average assets. A lower ratio indicates a higher degree of efficiency.

(4) The efficiency ratio is calculated by dividing total non-interest expense by tax-equivalent net revenue (less securities gains or losses). A lower ratio indicates more efficient revenue generation.

(5) The allowance for credit losses includes both the allowance for loan losses and the allowance for unfunded lending-related commitments, but excludes the allowance for covered loan losses.

(6) Total shareholders' equity minus preferred stock and total intangible assets divided by total assets minus total intangible assets.

(7) Asset quality ratios exclude covered loans.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward Looking Statements

This document contains forward-looking statements within the meaning of federal securities laws. Forward-looking information can be identified through the use of words such as "intend," "plan," "project," "expect," "anticipate," "believe," "estimate," "contemplate," "possible," "will," "may," "should," "would" and "could." Forward-looking statements and information are not historical facts, are premised on many factors and assumptions, and represent only management's expectations, estimates and projections regarding future events. Similarly, these statements are not guarantees of future performance and involve certain risks and uncertainties that are difficult to predict, which may include, but are not limited to, those listed below and the Risk Factors discussed under Item 1A on page 22 of this Annual Report on Form 10-K, as well as other risks and uncertainties set forth from time to time in the Company's other filings with the SEC. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of invoking these safe harbor provisions. Such forward-looking statements may be deemed to include, among other things, statements relating to the Company's future financial performance, the performance of its loan portfolio, the expected amount of future credit reserves and charge-offs, delinquency trends, growth plans, regulatory developments, securities that the Company may offer from time to time, and management's long-term performance goals, as well as statements relating to the anticipated effects on financial condition and results of operations from expected developments or events, the Company's business and growth strategies, including future acquisitions of banks, specialty finance or wealth management businesses, internal growth and plans to form additional de novo banks or branch offices. Actual results could differ materially from those addressed in the forward-looking statements as a result of numerous factors, including the following:

- negative economic conditions that adversely affect the economy, housing prices, the job market and other factors that may affect the Company's liquidity and the performance of its loan portfolios, particularly in the markets in which it operates;
- the extent of defaults and losses on the Company's loan portfolio, which may require further increases in its allowance for credit losses;
- estimates of fair value of certain of the Company's assets and liabilities, which could change in value significantly from period to period;
- the financial success and economic viability of the borrowers of our commercial loans;
- commercial real estate market conditions in the Chicago metropolitan area and southern Wisconsin;
- the extent of commercial and consumer delinquencies and declines in real estate values, which may require further increases in the Company's allowance for loan and lease losses;
- inaccurate assumptions in our analytical and forecasting models used to manage our loan portfolio;
- changes in the level and volatility of interest rates, the capital markets and other market indices that may affect, among other things, the Company's liquidity and the value of its assets and liabilities;
- competitive pressures in the financial services business which may affect the pricing of the Company's loan and deposit products as well as its services (including wealth management services), which may result in loss of market share and reduced income from deposits, loans, advisory fees and income from other products;
- failure to identify and complete favorable acquisitions in the future or unexpected difficulties or developments related to the integration of the Company's recent or future acquisitions;
- unexpected difficulties and losses related to FDIC-assisted acquisitions, including those resulting from our loss-sharing arrangements with the FDIC;
- any negative perception of the Company's reputation or financial strength;
- ability of the Company to raise additional capital on acceptable terms when needed;
- disruption in capital markets, which may lower fair values for the Company's investment portfolio;
- ability of the Company to use technology to provide products and services that will satisfy customer demands and create efficiencies in operations and to manage risks associated therewith;

- adverse effects on our information technology systems resulting from failures, human error or tampering;
- adverse effects of failures by our vendors to provide agreed upon services in the manner and at the cost agreed, particularly our information technology vendors;
- increased costs as a result of protecting our customers from the impact of stolen debit card information;
- accuracy and completeness of information the Company receives about customers and counterparties to make credit decisions;
- ability of the Company to attract and retain senior management experienced in the banking and financial services industries;
- environmental liability risk associated with lending activities;
- the impact of any claims or legal actions to which the Company is subject, including any effect on our reputation;
- losses incurred in connection with repurchases and indemnification payments related to mortgages and increases in reserves associated therewith;

the loss of customers as a result of technological changes allowing consumers to complete their financial transactions without the use of a bank;

the soundness of other financial institutions;

the expenses and delayed returns inherent in opening new branches and de novo banks;

examinations and challenges by tax authorities;

changes in accounting standards, rules and interpretations and the impact on the Company's financial statements;

the ability of the Company to receive dividends from its subsidiaries;

a decrease in the Company's regulatory capital ratios, including as a result of further declines in the value of its loan portfolios, or otherwise;

legislative or regulatory changes, particularly changes in regulation of financial services companies and/or the products and services offered by financial services companies, including those resulting from the Dodd-Frank Act;

a lowering of our credit rating;

changes in U.S. monetary policy;

restrictions upon our ability to market our products to consumers and limitations on our ability to profitably operate our mortgage business resulting from the Dodd-Frank Act;

increased costs of compliance, heightened regulatory capital requirements and other risks associated with changes in regulation and the current regulatory environment, including the Dodd-Frank Act;

the impact of heightened capital requirements;

increases in the Company's FDIC insurance premiums, or the collection of special assessments by the FDIC;

delinquencies or fraud with respect to the Company's premium finance business;

credit downgrades among commercial and life insurance providers that could negatively affect the value of collateral securing the Company's premium finance loans;

the Company's ability to comply with covenants under its credit facility; and

fluctuations in the stock market, which may have an adverse impact on the Company's wealth management business and brokerage operation.

Therefore, there can be no assurances that future actual results will correspond to these forward-looking statements. The reader is cautioned not to place undue reliance on any forward-looking statement made by the Company. Any such statement speaks only as of the date the statement was made or as of such date that may be referenced within the statement. The Company undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances after the date of this Annual Report on Form 10-K. Persons are advised, however, to consult further disclosures management makes on related subjects in its reports filed with the Securities and Exchange Commission and in its press releases.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion highlights the significant factors affecting the operations and financial condition of Wintrust for the three years ended December 31, 2015. This discussion and analysis should be read in conjunction with the Company's Consolidated Financial Statements and Notes thereto, and Selected Financial Highlights appearing elsewhere within this Annual Report on Form 10-K.

OPERATING SUMMARY

Wintrust's key measures of profitability and balance sheet changes are shown in the following table:

	Years Ended December 31,			% or Basis Point (bp)change	% or Basis Point (bp)change
(Dollars in thousands, except per share data)	2015	2014	2013	2014 to 2015	2013 to 2014
Net income	\$156,749	\$151,398	\$137,210	4%	10%
Net income per common share — Diluted	2.93	2.98	2.75	(2)	8

Book value per common share ⁽²⁾	\$43.42	\$41.52	\$38.47	5%	8%
Tangible common book value per common share ⁽²⁾	33.17	32.45	29.93	2	8
Market price per common share Excluding covered loans:	48.52	46.76	46.12	4	1
Allowance for credit losses to total loans ⁽⁵⁾	0.62	% 0.64	% 0.76	% (2) bp	(12) bp
Non-performing loans to total loans	0.49	0.55	0.80	(6) bp	(25) bp

- (1) Net revenue is net interest income plus non-interest income.
- (2) See “Non-GAAP Financial Measures/Ratios” for additional information on this performance measure/ratio.
- (3) The net overhead ratio is calculated by netting total non-interest expense and total non-interest income, annualizing this amount, and dividing by that period’s total average assets. A lower ratio indicates a higher degree of efficiency.
- (4) The efficiency ratio is calculated by dividing total non-interest expense by tax-equivalent net revenues (less securities gains or losses). A lower ratio indicates more efficient revenue generation.
- (5) The allowance for credit losses includes both the allowance for loan losses and the allowance for lending-related commitments, but excludes the allowance for covered loan losses.
- (6) Total shareholders' equity minus preferred stock and total intangible assets divided by total assets minus total intangible assets.

Please refer to the Consolidated Results of Operations section later in this discussion for an analysis of the Company’s operations for the past three years.

NON-GAAP FINANCIAL MEASURES/RATIOS

The accounting and reporting policies of Wintrust conform to generally accepted accounting principles (“GAAP”) in the United States and prevailing practices in the banking industry. However, certain non-GAAP performance measures and ratios are used by management to evaluate and measure the Company’s performance. These include taxable-equivalent net interest income (including its individual components), net interest margin (including its individual components), the efficiency ratio, tangible common equity ratio, tangible common book value per share and return on average tangible common equity. In addition, certain operating measures and ratios are adjusted for acquisition and non-operating compensation charges. These operating measures and ratios include operating net income, the efficiency ratio, the net overhead ratio, return on average assets, return on average common equity, return on average tangible common equity and net income per diluted common share. Management believes that these measures and ratios provide users of the Company’s financial information a more meaningful view of the performance of the interest-earning assets and interest-bearing liabilities and of the Company’s operating efficiency. Other financial holding companies may define or calculate these measures and ratios differently.

Management reviews yields on certain asset categories and the net interest margin of the Company and its banking subsidiaries on a fully taxable-equivalent (“FTE”) basis. In this non-GAAP presentation, net interest income is adjusted to reflect tax-exempt interest income on an equivalent before-tax basis. This measure ensures comparability of net interest income arising from both taxable and tax-exempt sources. Net interest income on a FTE basis is also used in the calculation of the Company’s efficiency ratio. The efficiency ratio, which is calculated by dividing non-interest expense by total taxable-equivalent net revenue (less securities gains or losses), measures how much it costs to produce one dollar of revenue. Securities gains or losses are excluded from this calculation to better match revenue from daily operations to operational expenses. Management considers the tangible common equity ratio and tangible book value per common share as useful measurements of the Company’s equity. The Company references the return on average tangible common equity as a measurement of profitability. Management considers operating net income, which is reported net income excluding acquisition and non-operating compensation charges, as a useful measure of operating performance. Acquisition related charges are specific costs incurred by the Company as a result of an acquisition that are not expected to continue in subsequent periods. Non-operating compensation charges are certain salary and employee benefit costs incurred that are not related to current operating services provided by employees of the Company. The Company excludes acquisition and non-operating compensation charges from reported net income as well as certain operating measures and ratios noted above to provide better comparability between periods.

The following table presents a reconciliation of certain non-GAAP performance measures and ratios used by the Company to evaluate and measure the Company's performance to the most directly comparable GAAP financial measures for the last five years.

(Dollars and shares in thousands, except per share data)	Years Ended December 31,				
	2015	2014 ⁽¹⁾	2013 ⁽¹⁾	2012 ⁽¹⁾	2011 ⁽¹⁾
Calculation of Net Interest Margin and Efficiency Ratio					
(A) Interest Income (GAAP)	\$718,464	\$671,267	\$630,709	\$627,021	\$605,793
Taxable-equivalent adjustment:
