The date of this prospectus supplement no. 1 is December 4, 2009

---

This prospectus supplement no. 1 supplements our prospectus dated November 16, 2009, and reflects the extension of the expiration date of this offering from December 14, 2009 to December 21, 2009 and the reduction of the conversion price of the Series B Preferred to \$1.43.

References in the original prospectus to the expiration date of the offering are hereby amended to reference and/ or read "December 21, 2009".

References in the original prospectus to the conversion ratio of "five (5) shares of common stock for each share of Series B Preferred" are amended to read "seven (7) shares of common stock for each share of Series B Preferred", and references to the "initial conversion price of \$2.00" are amended to read "initial conversion price of \$1.43". The conversion price no longer "approximates a slight premium to the current trading value of our common stock", and all such statements are hereby deleted.

The Capitalization and Dilution tables on page 34 of the prospectus are deleted and the following are substituted in their places:

### CAPITALIZATION

### DILUTION

Purchasers of our Series B Preferred in the rights offering will experience an immediate and substantial dilution of the net tangible book value per share of our common stock. Our net tangible book value as of September 30, 2009 was approximately \$2,798,000, or \$0.30 per share of our common stock (based upon 9,233,688 shares of our common stock outstanding). Net tangible book value per share is equal to our total net tangible book value, which is our total tangible assets less our total liabilities, divided by the number of shares of our outstanding common stock. Dilution

per share equals the difference between the amount per share of common stock underlying the Series B Preferred paid by purchasers in this rights offering and the net tangible book value per share of our common stock immediately after the rights offering.

---

After giving effect to our sale of 225,000 shares of Series B Preferred, at a public offering price of \$10.00 per share of Series B Preferred, or 1,575,000 shares of common stock issuable upon conversion of the Series B Preferred at a conversion ratio of seven (7) shares of common stock for each share of Series B Preferred held at the time of conversion, representing an initial conversion price of \$1.43 per share, and after deduction of estimated offering expenses of \$379,145 payable by us, our net tangible book value as of September 30, 2009 would have been approximately \$4,668,855, or \$0.43 per share of common stock. This represents an immediate increase of \$0.13 in net tangible book value per share of common stock to our existing stockholders and an immediate dilution in net tangible book value of \$1.00 per share of common stock to purchasers of units in this offering. The following table illustrates this per share dilution (assuming a fully subscribed for rights offering of 225,000 shares of Series B Preferred at the subscription price of \$10.00 per share):

|   |    |      |
|---|----|------|
| Subscription price per share of common stock upon conversion of Series B Preferred    | \$ | 1.43 |
| Net tangible book value per share of common stock prior to the rights offering        | \$ | 0.30 |
| Increase per share of common stock attributable to the rights offering                | \$ | 0.13 |
| Pro forma net tangible book value per share of common stock after the rights offering | \$ | 0.43 |
| Dilution in net tangible book value per share of common stock to purchasers           | \$ | 1.00 |
