Item 2.02. Results of Operations and Financial Condition

OGE Energy Corp. (the Company) is the parent company of Oklahoma Gas and Electric Company (OG&E), a regulated electric utility with approximately 740,000 customers in Oklahoma and western Arkansas, and Enogex Inc. and its subsidiaries (Enogex), a natural gas pipeline business with principal operations in Oklahoma and Arkansas.

On August 3, 2005, the Company issued a press release describing the Company's consolidated financial results for the quarter ended June 30, 2005, which is furnished as Exhibit 99.01 and incorporated herein by reference. As described in the press release, the Company reported earnings of \$0.42 per diluted share for the second quarter of 2005, compared with \$0.44 per diluted share for the second quarter of 2004. OG&E contributed earnings of \$0.33 per diluted share in the second quarter of 2005, compared with \$0.34 per diluted share in the second quarter of 2004. This slight decrease was attributable to higher operating costs, which more than offset the positive impact of warmer weather. Enogex contributed earnings of \$0.12 per diluted share in the second quarter of 2005, compared with \$0.13 per diluted share in the second quarter of 2004, as higher margins in the natural gas gathering and processing business were offset by lower margins in the transportation and storage and marketing businesses. The holding company posted a loss of \$0.03 per share in the second quarter of 2005 and 2004. For further information, see the press release attached as Exhibit 99.01.

OGE Energy Corp. Announces 2nd Quarter Results

OKLAHOMA CITY OGE Energy Corp. (NYSE: OGE), the parent company of Oklahoma Gas and Electric Company (OG&E) and Enogex Inc., today reported earnings of \$0.42 per diluted share for the three months ended June 30, 2005, compared with \$0.44 per diluted share for the second quarter of 2004.

OG&E, the company's regulated electric utility contributed earnings of \$0.33 per diluted share in the second quarter, compared with \$0.34 per diluted share in the year-ago quarter. This slight decrease was attributable to higher operating costs, which more than offset the positive impact of warmer weather. Enogex, the company's pipeline subsidiary, recorded earnings of \$0.12 per diluted share, compared with \$0.13 per diluted share in the second quarter last year, as higher margins in the natural gas gathering and processing business were offset by lower margins in the transportation and storage and marketing businesses.

The holding company, which primarily has interest expense but no operating revenue, posted a loss of \$0.03 per diluted share, unchanged from the second quarter of 2004. Earnings-per-share also were affected by an increase of 2.6 million diluted average common shares outstanding compared to last year.

We are pleased to report another quarter of solid results, said Steven E. Moore, OGE Energy chairman, president and CEO. But as we're seeing across our industry, the cost of doing business at our utility continues to rise. These higher costs, plus the need to recover the half-billion dollars of investments we've made to improve the reliability of our electric system during the last two years, underscore the need for rate relief.

OG&E filed May 20 for an \$89 million rate increase in Oklahoma. Resolution of the rate case is expected by year-end.

For the six months ended June 30, OGE Energy reported net income of \$44 million, or \$0.48 per diluted share, compared with \$49 million, or \$0.56 per diluted share in the first half of 2004. Operating revenues were \$2.6 billion in the first six months of 2005, compared with \$2.2 billion in the comparable period in 2004; gross margins were \$436 million, up from \$424 million in the year-ago period; and operating income was \$107 million in the first half of 2005, down from \$114 million in the same period of 2004.

Discussion of Second Quarter 2005

OGE Energy reported consolidated operating revenues of \$1.3 billion in the second quarter, compared with \$1.2 billion a year earlier. The second-quarter gross margin on revenues was \$246 million, compared with \$237 million in the year-earlier quarter. Higher gross margins were offset by increased operation and maintenance expenses in both business segments. Operating income

was \$81 million in the second quarter, compared with \$83 million in the year-earlier quarter. Net income was \$38.5 million in the second quarter, compared with \$39.0 million a year ago.

OG&E reported gross margin on revenues of \$178 million in the second quarter, compared with \$169 million in the comparable quarter last year. The higher margin was offset by higher expenses, depreciation and taxes. OG&E reported net income of \$29.7 million, compared with \$30.4 million a year ago.

Enogex reported gross margin on revenues of \$68 million in the second quarter, the same as in the comparable quarter last year. Net income was \$11.3 million, compared with \$11.5 million in the second quarter of 2004. The decrease was due to lower margins in the transportation and storage and marketing businesses, partially offset by higher margins in the natural gas gathering and processing business.

2005 Outlook

OGE Energy maintains its 2005 consolidated earnings guidance of \$1.65 - \$1.75 per share. It assumes about 91 million average diluted shares outstanding. The earnings guidance includes a utility earnings range between \$106 million and \$110 million, or \$1.17 to \$1.22 per share, assuming a 1 to 2 percent growth in gross margins from customer growth, normal weather, recovery of Enogex gas transportation and storage costs at the \$41.9 million annual rate as ordered July 14 by the Oklahoma Corporation Commission, no change in base rates, and regulatory lag in recovering costs of the McClain power plant acquisition. The earnings guidance also includes Enogex earnings in a range between \$49 million and \$56 million, or \$0.54 to \$0.62 per share, which assumes commodity spread projections of between \$2.02 and \$2.56 per MMBtu and natural gas liquids price projections of between \$0.82 and \$0.89 per gallon in 2005. The holding company earnings guidance is a loss between \$6 million and \$8 million, or \$.07 to \$.09 per share, assuming lower interest expenses.

Conference Call Webcast

OGE Energy will host a conference call for discussion of the results and the outlook for 2005 on Wednesday, Aug. 3, at 8 a.m. CDT. The conference, hosted by James R. Hatfield, senior vice president and CFO, will be available through www.oge.com.

OGE Energy is the parent company of Oklahoma Gas and Electric Company (OG&E), which serves approximately 740,000 customers in a service territory spanning 30,000 square miles in Oklahoma and western Arkansas, and of Enogex Inc., a natural gas pipeline business with principal operations in Oklahoma and Arkansas.

Some of the matters discussed on this news release may contain forward-looking statements that are subject to certain risks, uncertainties and assumptions. Such forward-looking statements are intended to be identified in this document by the words anticipate, believe, estimate, expect, intend, project, objective, plan, possible, potential, project and similar expressions. Actual results may vary materially. Factors that could cause actual results to differ

materially include, but are not limited to: general economic conditions, including the availability of credit, actions of rating agencies and their impact on capital expenditures; the Company's ability and the ability of its subsidiaries to obtain financing on favorable terms; prices of electricity, natural gas and natural gas liquids, each on a stand-alone basis and in relation to each other; business conditions in the energy industry; competitive factors including the extent and timing of the entry of additional competition in the markets served by the Company; unusual weather; federal or state legislation and regulatory decisions and initiatives that affect cost and investment recovery, have an impact on rate structures or affect the speed and degree to which competition enters the Company's markets; environmental laws and regulations that may impact the Company's operations; changes in accounting standards, rules or guidelines; creditworthiness of suppliers, customers and other contractual parties; the higher degree of risk associated with the Company's nonregulated business compared with the Company's regulated utility business; and other risk factors listed in the reports filed by the Company with the Securities and Exchange Commission.
