SIGNATURES

Forward Looking Statements

This Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), which are subject to the safe harbor created by such sections. When used in this Form 10-Q or future filings by First BanCorp. (the “Corporation”) with the U.S. Securities and Exchange Commission (“SEC”), in the Corporation’s press releases or in other public or stockholder communications, or in oral statements made with the approval of an authorized executive officer, the word or phrases “would be,” “will allow,” “intends to,” “will likely result,” “are expected to,” “should,” “anticipate” and similar statements of a future or forward-looking nature that reflect our current views with respect to future events and financial performance are meant to identify “forward-looking statements.”

First BanCorp. wishes to caution readers not to place undue reliance on any such “forward-looking statements,” which speak only as of the date made, and to advise readers that various factors, including but not limited to the following, could cause actual results to differ materially from those expressed in, or implied by, such “forward-looking statements”:

- uncertainty about whether the Corporation will be able to continue to fully comply with the written agreement dated June 3, 2010 (the “Written Agreement”) that the Corporation entered into with the Federal Reserve Bank of New York (the “New York FED” or “Federal Reserve”) that, among other things, requires the Corporation to serve as a source of strength to FirstBank Puerto Rico (“FirstBank” or “the Bank”) and that, except with the consent generally of the New York FED and the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”), prohibits the Corporation from paying dividends to stockholders or receiving dividends from FirstBank, making payments on trust preferred securities or subordinated debt and incurring, increasing or guaranteeing debt or repurchasing any capital securities.
- the ability of the Puerto Rico government or any of its public corporations or other instrumentalities to repay its debt obligations, including the effect of the recent payment default of a government public corporation, and recent and any future downgrades of the long-term and short-term debt ratings of the Puerto Rico government, which could exacerbate Puerto Rico’s adverse economic conditions;
- a decrease in demand for the Corporation’s products and services and lower revenues and earnings because of the continued recession in Puerto Rico, the current fiscal problems of the Puerto Rico government, the payment default by a government public corporation and recent credit downgrades of the Puerto Rico government’s debt;
- uncertainty as to the availability of certain funding sources, such as retail brokered certificates of deposit (“brokered CDs”);

- the Corporation's reliance on brokered CDs to fund operations and provide liquidity;
- the risk of not being able to fulfill the Corporation's cash obligations or resume paying dividends to the Corporation's stockholders in the future due to the Corporation's need to receive approval from the New York FED and the Federal Reserve Board to receive dividends from FirstBank or FirstBank's failure to generate sufficient cash flow to make a dividend payment to the Corporation;
- the strength or weakness of the real estate markets and of the consumer and commercial sectors and their impact on the credit quality of the Corporation's loans and other assets, which has contributed and may continue to contribute to, among other things, high levels of non-performing assets, charge-offs and provisions for loan and lease losses and may subject the Corporation to further risk from loan defaults and foreclosures;

- the ability of FirstBank to realize the benefits of its deferred tax assets subject to the remaining valuation allowance;
- additional adverse changes in general economic conditions in Puerto Rico, the United States (“U.S.”), and the U.S. Virgin Islands (“USVI”), and British Virgin Islands (“BVI”), including the interest rate environment, market liquidity, housing absorption rates, real estate prices, and disruptions in the U.S. capital markets, which has reduced interest margins and affected funding sources, and has affected demand for all of the Corporation’s products and services and reduced the Corporation’s revenues and earnings, and the value of the Corporation’s assets, and may once again have these effects;
- an adverse change in the Corporation’s ability to attract new clients and retain existing ones;
- the risk that additional portions of the unrealized losses in the Corporation’s investment portfolio is determined to be other-than-temporary, including additional impairments on the Puerto Rico government’s obligations;
- uncertainty about regulatory and legislative changes for financial services companies in Puerto Rico, the U.S., the USVI and the BVI, which could affect the Corporation’s financial condition or performance and could cause the Corporation’s actual results for future periods to differ materially from prior results and anticipated or projected results;
- changes in the fiscal and monetary policies and regulations of the U.S. federal government and the Puerto Rico and other governments, including those determined by the Federal Reserve Board, the New York FED, the Federal Deposit Insurance Corporation (“FDIC”), government-sponsored housing agencies, and regulators in Puerto Rico, the USVI and the BVI;
- the risk of possible failure or circumvention of controls and procedures and the risk that the Corporation’s risk management policies may not be adequate;
- the risk that the FDIC may increase the deposit insurance premium and/or require special assessments to replenish its insurance fund, causing an additional increase in the Corporation’s non-interest expenses;

- the impact on the Corporation's results of operations and financial condition of acquisitions and dispositions, including the acquisition of loans and branches of Doral Bank as well as the assumption of deposits at the branches during the first quarter of 2015;
- a need to recognize impairments on financial instruments, goodwill or other intangible assets relating to acquisitions;
- the risk that downgrades in the credit ratings of the Corporation's long-term senior debt will adversely affect the Corporation's ability to access necessary external funds;
- the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") on the Corporation's businesses, business practices and cost of operations; and
- general competitive factors and industry consolidation.

The Corporation does not undertake, and specifically disclaims any obligation, to update any "forward-looking statements" to reflect occurrences or unanticipated events or circumstances after the date of such statements except as required by the federal securities laws.

Investors should refer to the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014, as well as "Part II, Item 1A, Risk Factors" in this quarterly report on Form 10-Q, for a discussion of such factors and certain risks and uncertainties to which the Corporation is subject.

1 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The Consolidated Financial Statements (unaudited) of First BanCorp. (“the Corporation”) have been prepared in conformity with the accounting policies stated in the Corporation’s Audited Consolidated Financial Statements included in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2014. Certain information and note disclosures normally included in the financial statements prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) have been condensed or omitted from these statements pursuant to the rules and regulations of the SEC and, accordingly, these financial statements should be read in conjunction with the Audited Consolidated Financial Statements of the Corporation for the year ended December 31, 2014, which are included in the Corporation’s 2014 Annual Report on Form 10-K. All adjustments (consisting only of normal recurring adjustments) that are, in the opinion of management, necessary for a fair presentation of the statement of financial position, results of operations and cash flows for the interim periods have been reflected. All significant intercompany accounts and transactions have been eliminated in consolidation.

The results of operations for the quarter and six-month period ended June 30, 2015 are not necessarily indicative of the results to be expected for the entire year.

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

The Financial Accounting Standards Board (“FASB”) has issued the following accounting pronouncements and guidance relevant to the Corporation’s operations:

In January 2014, the FASB updated the Accounting Standards Codification (the “Codification”) to clarify when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan so that the loan should be derecognized and the real estate property recognized in the financial statements. The Update clarifies that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either: (i) the creditor obtaining legal title to the residential real estate property upon completion of a

foreclosure, or (ii) the borrower conveying all interest in the residential real estate property to the creditor to satisfy the loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. In addition, creditors are required to disclose on an annual and interim basis both (i) the amount of the foreclosed residential real estate property held and (ii) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments are effective for public business entities for annual periods beginning after December 15, 2014, and interim periods within those fiscal years. Early adoption is permitted. The guidance can be implemented using either a modified retrospective transition method or a prospective transition method. The Corporation adopted the provisions of this guidance on a prospective basis during the first quarter of 2015 without any material impact on the Corporation's financial statements. Refer to Notes 7 and 10 for required disclosures.

In May 2014, the FASB updated the Codification to create a new, principle-based revenue recognition framework. The Update is the culmination of efforts by the FASB and the International Accounting Standards Board to develop a common revenue standard for U.S. GAAP and International Financial Reporting Standards. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance describes a 5-step process entities can apply to achieve the core principle of revenue recognition and requires disclosures sufficient to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers and the significant judgments used in determining that information. The new framework is effective for public business entities for annual periods beginning after December 15, 2017, including interim periods within those reporting periods, as a result of the FASB's recent amendment to the standard to defer the effective date by one year. Early adoption is permitted for interim periods beginning after December 15, 2016. The Corporation is currently evaluating the impact that the adoption of this guidance will have on the presentation and disclosures in its financial statements.

In June 2014, the FASB updated the Codification to respond to stakeholders' concerns about current accounting and disclosures for repurchase agreements and similar transactions. This Update requires two accounting changes. First, the Update changes the accounting for repurchase-to-maturity transactions to secured borrowing accounting. Second, for repurchase financing arrangements, the Update requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. Additionally, the Update introduces new disclosures to (i) increase transparency about the types of collateral pledged in secured borrowing transactions and (ii) enable users to better understand transactions in which the transferor retains substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. For public business entities, the disclosure for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. All other accounting and disclosure amendments in the Update are effective for public business entities for the first interim or annual period beginning after December 15, 2014. The adoption of this guidance did not have a material effect on the Corporation's financial statements.

In June 2014, the FASB updated the Codification to provide guidance for determining compensation cost under specific circumstances when an employee's compensation award is eligible to vest regardless of whether the employee is rendering service on the date the performance target is achieved. This Update becomes effective for annual and interim periods beginning after December 15, 2015 with early adoption permitted. The Corporation is currently evaluating the impact that the adoption of this guidance will have on the presentation and disclosures in its financial statements, if any.

In August 2014, the FASB updated the Codification to reduce the diversity found in the classification of certain foreclosed mortgage loans held by creditors that are either fully or partially guaranteed under government programs. Consistency in classification upon foreclosure is expected in order to provide more decision-useful information. The amendments in this Update require that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if: (i) the loan has a government guarantee that is not separable from the loan before foreclosure; (ii) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under the claim, and (iii) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The Update is effective for public business entities for annual periods, and interim periods within those annual periods beginning after December 15, 2014. The guidance can be implemented using either a prospective transition method or a modified retrospective transition method. The Corporation adopted the provisions of this guidance on a prospective basis during the first quarter of 2015 without any material impact on the Corporation's financial statements.

In August 2014, the FASB updated the Codification to provide guidance in GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. Management's evaluation should be based on relevant conditions and events that are known and reasonably knowable at the date that the financial statements are issued. If conditions or events raise substantial doubt about an entity's ability to continue as a going concern, but the substantial doubt is alleviated as a

result of consideration of management's plans, the entity should disclose information that enables users of the financial statements to understand such determination. The Update is effective for all business entities for annual periods ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The Corporation expects the adoption of this guidance will have no impact on the Corporation's financial position, results of operations, comprehensive income, cash flows and disclosures.

In November 2014, the FASB updated the Codification to clarify how current GAAP should be interpreted in evaluating the economic characteristics and risk of a host contract in a hybrid financial instrument that is issued in the form of a share. In addition, the Update was issued to clarify that, in evaluating the nature of a host contract, an entity should assess the substance of the relevant terms and features (that is, the relative strength of the debt-like or equity-like terms and features given the facts and circumstances) when considering how to weight those terms and features. The effects of initially adopting this Update should be applied on a modified retrospective basis to existing hybrid financial instruments issued in the form of a share as of the beginning of the fiscal year for which the amendments are effective. Retrospective application is permitted to all relevant prior periods. This Update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption in an interim period is permitted. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements, if any.

In January 2015, the FASB updated the Codification to eliminate from GAAP the concept of extraordinary items as part of its initiative to reduce complexity in accounting standards (the Simplification Initiative). Under current GAAP, an event or transaction is presumed to be an ordinary and usual activity of the reporting entity unless evidence clearly supports its classification as an extraordinary item. In order to be classified as an extraordinary item, the event or transaction must be: (i) unusual in nature, and (ii) infrequent in occurrence. Before the update was issued, an entity was required to segregate these items from the results of ordinary operations and show the items separately in the income statement, net of tax, after income from continuing operations. This Update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption in an

interim period is permitted. The Corporation expects the adoption of this guidance will have no impact on the Corporation's consolidated financial statements.

In February 2015, the FASB updated the Codification to eliminate the deferral of FAS 167, which has allowed reporting entities with interests in certain investment funds to follow the previous consolidation guidance in FIN 46(R), and to make other changes to both the variable interest model and the voting model. While the Update is aimed at asset managers, it will affect all reporting entities involved with limited partnerships or similar entities. In some cases, consolidation conclusions will change. In other cases, reporting entities will need to provide additional disclosure about entities that currently are not considered VIEs but will be considered VIEs under the new guidance when they have a variable interest in those VIEs. Regardless of whether conclusions change or additional disclosure requirements are triggered, reporting entities will need to re-evaluate limited partnerships or similar entities for consolidation and revise their documentation. For public business entities, the Update is effective for annual and interim periods beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. A reporting entity must apply the amendments retrospectively. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements, if any.

In April 2015, the FASB updated the Codification to clarify that customers should determine whether a cloud computing arrangement includes the license of software by applying the same guidance cloud service providers use to make this determination. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service and other hosting arrangements. If a hosting arrangement includes a software license for internal use software, the software license should be accounted for by the customer under ASC 350-40. A license of software other than internal use software would be accounted for by the customer under other U.S. GAAP (e.g., a research and development cost and software to be sold, leased or otherwise marketed). If a hosting arrangement includes a software licenses, then that would be in addition to any service contract in the arrangement. Hosting arrangements that do not include software licenses should be accounted for as service contracts. The Update also eliminates the existing requirement for customers to account for software licenses they acquire by analogizing to the guidance on leases. Instead, customers will account for software licenses that are in the scope of ASC 350-40 in the same manner as licenses of other intangible assets. Entities have the option of applying the guidance (1) prospectively to all arrangements entered into or materially modified after the effective date or (2) retrospectively. Entities that elect prospective application are required to disclose the reason for the change in accounting principle, the transition method, and a description of the financial statement line items affected by the change. Entities that elect retrospective application must disclose the information required by ASC 250. For public business entities, the guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements, if any.

In May 2015, the FASB updated the Codification to provide guidance in disclosures for investments in certain entities that calculate net asset value (NAV) per share (or its equivalent). This Update removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient and modifies certain disclosure requirements. This guidance is effective for interim and annual reporting periods in fiscal years beginning after December 31, 2015, and requires retrospective adoption. Early adoption is permitted. The adoption of this pronouncement is not expected to have an impact on the Corporation's

Adoption of new accounting requirements and recently issued but not yet effective accounting requiremer22

consolidated financial statements.

NOTE 2 – BUSINESS COMBINATION

On February 27, 2015, FirstBank acquired 10 Puerto Rico branches of Doral Bank, assumed \$522.7 million in deposits related to such branches, acquired approximately \$324.8 million in principal balance of loans, primarily residential mortgage loans, acquired \$5.5 million of property, plant and equipment and received \$217.7 million of cash, through an alliance with Banco Popular of Puerto Rico (“Popular”), who was the successful lead bidder with the FDIC on the failed Doral Bank, as well as other co-bidders (the “Doral Bank Transaction”). This transaction solidified FirstBank as the second largest bank in Puerto Rico, enhanced FirstBank’s presence in geographical areas in Puerto Rico with growth potential for deposits and mortgage originations, two of the main business strategies of FirstBank, and provides a stable source of low-cost deposits that are expected to support and enhance future growth activities.

Under the FDIC’s bidding format, Popular was the lead bidder and party to the purchase and assumption agreement with the FDIC covering all assets and deposits to be acquired by Popular and its alliance co-bidders. Popular entered into back to back purchase assumption agreements with the alliance co-bidders, including FirstBank, for the transferred assets and deposits. There is no loss-share arrangement with the FDIC related to the acquired assets.

The Corporation accounted for this transaction as a business combination. The following table identifies the fair value of assets acquired and liabilities assumed from Doral Bank on February 27, 2015:		
	Asset/Liabilities	
	(at Fair Value)	
	(In thousands)	
ASSETS		
Cash	\$	217,659
Loans		311,410
Premises and equipment, net		5,450
Core Deposit Intangible		5,820
Total assets acquired		540,339
LIABILITIES		
Deposits		523,517
Other liabilities		3,379
Net assets - Bargain purchase gain	\$	13,443

The application of the acquisition-method of accounting resulted in a bargain purchase gain of \$13.4 million, which is included in non-interest income in the Corporation’s consolidated statement of (loss) income for the six-month period ended June 30, 2015, and a core deposit intangible of \$5.8 million. The net after-tax gain of \$8.2 million represents

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

the excess of the estimated fair value of the assets acquired (including cash payments received from the FDIC) over the estimated fair value of the liabilities assumed and is influenced significantly by the FDIC-assisted transaction process.

The following is a description of the methods used to determine the fair values of significant assets and liabilities presented above:

Cash and due from banks – The carrying amount of these assets is a reasonable estimate of fair value based on the short-term nature of these assets. This balance primarily represents the cash settlement received from Popular for the net equity received, assets discount bid and other customary closing adjustments.

Loans – Fair values for loans were based on a discounted cash flow methodology that uses market-driven assumptions such as prepayment rate, default rate, and loss severity on a loan level basis. The forecasted cash flows are then discounted by yields observed in sales of similar portfolios in Puerto Rico and the continental U.S.

The Corporation evaluated the residential mortgage loans acquired and determined that \$227.9 million are non-credit impaired purchased loans, which have been accounted for in accordance with the provisions of FASB ASC Topic 310-20, *Nonrefundable Fees and Other Costs*, and were recorded with a premium of \$1.3 million. The remaining approximately \$93.3 million of residential mortgage loans were considered purchased credit impaired loans within the provisions of FASB ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, and were recorded with a \$13.4 million discount. These purchased credit impaired loans will recognize interest income through accretion of the difference between the fair value of the loans and the expected cash flows.

Core deposit intangible – This intangible asset represents the value of the relationships that Doral Bank had with its deposit customers. The fair value of this intangible asset was estimated based on a discounted cash flow methodology that gave appropriate consideration to expected customer attrition rates, cost of the deposit base, and the net maintenance cost attributable to customer deposits. The Corporation recorded at acquisition \$5.8 million of core deposit intangible.

Deposits – The fair values used for the demand and savings deposits that comprise the transaction accounts acquired, by definition, equal the amounts payable on demand at the acquisition date. The fair value adjustment of \$0.8 million was applied for time deposits because the estimated weighted average interest rate of the assumed certificates of deposits was estimated to be above the current market rates.

ASC Topic 805 requires the measurement of all recognized assets acquired and liabilities assumed in a business combination at their acquisition-date fair values. Accordingly, the Corporation initially recorded amounts for the fair values of the assets acquired and liabilities assumed based on the best information available at the acquisition date. The Corporation may retrospectively adjust these amounts to reflect new information obtained during the measurement period (not to exceed 12 months) about facts and circumstances that existed as of the acquisition date that, if known, would have affected the acquisition-date fair value measurements. Any retrospective adjustments to acquisition date fair values will affect the bargain purchase gain recognized. During the first half of 2015, the Corporation incurred \$11.2 million of expenses related to loan and deposit accounts acquired from Doral, of which \$4.6 million represents acquisition and conversion costs that are considered non-recurring in nature and \$3.6 million represents interim servicing costs until the completion in May 2015 of the conversion to the FirstBank systems. These expenses are primarily included as part of professional fees in the consolidated statement of income (loss).

The Corporation's operating results for the six-month period ended June 30, 2015 include the operating results of the acquired assets and assumed liabilities subsequent to the acquisition date. The Corporation also considered the pro forma requirements of ASC 805 and deemed it not necessary to provide pro forma financial information pursuant to that standard for the Doral Bank transaction as it was not material to the Corporation.

NOTE 3 – EARNINGS PER COMMON SHARE

The calculations of earnings (losses) per common share for the quarters and six-month periods ended June 30, 2015 and 2014 are as follows:									
	Quarter Ended				Six-Month Period Ended				
	June 30,				June 30,				
	2015		2014		2015		2014		
(In thousands, except per share information)									
Net (loss) income	\$	(34,074)	\$	21,225	\$	(8,428)	\$	38,308	
Favorable impact from issuing common stock in exchange for Series A through E preferred stock (1)		-		1,280		-		1,659	
Net (loss) income attributable to common stockholders	\$	(34,074)	\$	22,505	\$	(8,428)	\$	39,967	
Weighted-Average Shares:									
Average common shares outstanding		211,247		208,202		210,968		206,974	
Average potential dilutive common shares		-		1,942		-		1,543	
Average common shares outstanding- assuming dilution		211,247		210,144		210,968		208,517	
(Loss) earnings per common share:									
Basic	\$	(0.16)	\$	0.11	\$	(0.04)	\$	0.19	
Diluted	\$	(0.16)	\$	0.11	\$	(0.04)	\$	0.19	
(1)	Excess of carrying amount of the Series A through E preferred stock exchanged over the fair value of new common shares issued in the second quarter and first half of 2014.								

Earnings (loss) per common share is computed by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares issued and outstanding. Net income (loss) attributable to common stockholders represents net income (loss) adjusted for any preferred stock dividends, including any dividends declared, and any cumulative dividends related to the current dividend period that have not been declared as of the end of the period. For the quarter and six-month period ended June 30, 2014, net income attributable to common stockholders includes the one-time effect on retained earnings of the issuance of common stock in exchange for Series A through E preferred stock. These transactions are discussed in Note 19 to the unaudited consolidated financial statements. Basic weighted average common shares outstanding excludes unvested shares of restricted stock.

Potential common shares consist of common stock issuable under the assumed exercise of stock options, unvested shares of restricted stock, and outstanding warrants using the treasury stock method. This method assumes that the potential common shares are issued and the proceeds from the exercise, in addition to the amount of compensation cost attributable to future services, are used to purchase common stock at the exercise date. The difference between the number of potential shares issued and the shares purchased is added as incremental shares to the actual number of shares outstanding to compute diluted earnings per share. Stock options, unvested shares of restricted stock, and outstanding warrants that result in lower potential shares issued than shares purchased under the treasury stock method are not included in the computation of dilutive earnings per share since their inclusion would have an antidilutive effect on earnings per share. Stock options not included in the computation of outstanding shares because they were antidilutive amounted to 69,848 and 82,575 for the quarters and six-month periods ended June 30, 2015 and 2014, respectively. Warrants outstanding to purchase 1,285,899 shares of common stock and 2,939,794 unvested shares of restricted stock were excluded from the computation of diluted earnings per share for the quarter and six-month period ended June 30, 2015 because the Corporation reported a net loss attributable to common stockholders for the periods and their inclusion would have an antidilutive effect.

NOTE 4 – STOCK-BASED COMPENSATION

As of January 21, 2007, the Corporation’s 1997 stock option plan expired and no additional awards could be granted under that plan. All outstanding awards granted under this plan have continued in full force and effect since then, subject to their original terms.

The activity of stock options granted under the 1997 stock option plan for the six-month period ended June 30, 2015 is set forth below:								
						Weighted-Average		
						Remaining		Aggregate
	Number of		Weighted-Average		Contractual Term			Intrinsic
	Options		Exercise Price		(Years)			Value
								(In thousands)
Beginning of period outstanding and exercisable	82,575	\$	187.75					
Options expired	(11,395)		358.80					
Options cancelled	(1,332)		164.10					
End of period outstanding and exercisable	69,848	\$	160.30		1.1		\$	-

On April 29, 2008, the Corporation’s stockholders approved the First BanCorp. 2008 Omnibus Incentive Plan (the “Omnibus Plan”). The Omnibus Plan provides for equity-based compensation incentives (the “awards”) through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, and other stock-based awards. The Omnibus Plan authorizes the issuance of up to 8,169,807 shares of common stock, subject to adjustments for stock splits, reorganizations and other similar events. The Corporation’s Board of Directors, upon receiving the relevant recommendation of the Compensation Committee, has the power and authority to determine those eligible to receive awards and to establish the terms and conditions of any awards, subject to various limits and vesting restrictions that apply to individual and aggregate awards.

Under the Omnibus Plan, during the first half of 2015, 30,068 shares of restricted stock were awarded to one of the Corporation’s independent directors subject to vesting periods that range from 1 to 5 years. In addition, during the first half of 2015, the Corporation issued 793,964 shares of restricted stock that will vest based on the employees’ continued service with the Corporation. For 40,000 of the 793,964 shares awarded to employees, the requisite service period was three months and already vested in 2015. For the remaining 753,964 shares granted to employees, fifty percent (50%) of those shares vest in two years from the grant date and the remaining 50% vest in three years from the grant date.

Included in those 753,964 shares of restricted stock are 615,464 shares granted to certain senior officers consistent with the requirements of the Troubled Asset Relief Program (“TARP”) Interim Final Rule, which permit TARP recipients to grant “long-term restricted stock” without violating the prohibition on paying or accruing a bonus payment provided that: (i) the value of the grant may not exceed one-third of the amount of the employee’s annual compensation, (ii) no portion of the grant may vest before two years after the grant date, and (iii) the grant must be subject to a further restriction on transfer or payment as described below. Specifically, the stock that has otherwise vested may not become transferable at any time earlier than as permitted under the schedule set forth by TARP, which is based on the repayment in 25% increments of the aggregate financial assistance received, from the U.S. Department of Treasury (the “U. S. Treasury”). Hence, notwithstanding the vesting period mentioned above, the employees covered by TARP restrictions are restricted from transferring the shares. The U.S. Treasury confirmed that, effective March 2014, it has recovered more than a 25% of its investment in First BanCorp. Therefore, the restriction on transfer relating to 25% of the shares granted under TARP requirements was released.

The fair value of the shares of restricted stock granted in 2015 was based on the market price of the Corporation’s outstanding common stock on the date of the grant. For the 615,464 shares of restricted stock granted under the TARP requirements, the market price was discounted to account for TARP transferability restrictions. For purposes of determining the awards’ fair value, the Corporation estimated an appreciation of 14% in the value of the common stock using the Capital Asset Pricing Model as a basis of what would be a market participant’s expected return on the Corporation’s stock and assumed that the Treasury would hold the common stock of the Corporation that it currently owns for a period not to exceed one year, resulting in a fair value of \$3.18 for restricted shares granted under the TARP requirements. Also, the Corporation uses empirical data to estimate employee termination; separate groups of employees that have similar historical exercise behavior were considered separately for valuation purposes.

The following table summarizes the restricted stock activity in 2015 under the Omnibus Plan for both executive officers covered by the TARP requirements and other employees as well as for independent directors:				
Six-Month Period Ended				
June 30, 2015				
	Number of shares of restricted stock			Weighted-Average Grant Date Fair Value
Non-vested shares at beginning of year	2,327,156		\$	3.39
Granted	824,032			3.93
Forfeited	(17,500)			5.48
Vested	(193,894)			5.07
Non-vested shares at June 30, 2015	2,939,794		\$	3.42

For the quarter and six-month period ended June 30, 2015, the Corporation recognized \$1.0 million and \$2.0 million, respectively, of stock-based compensation expense related to restricted stock awards, compared to \$0.8 million and \$1.2 million for the same periods in 2014. As of June 30, 2015, there was \$5.1 million of total unrecognized compensation cost related to nonvested shares of restricted stock. The weighted average period over which the Corporation expects to recognize such cost is 2.2 years.

During the second quarter of 2014, the Corporation awarded to its independent directors 210,840 shares of restricted stock that vest ratably over a 5-year period. In addition, during the first half of 2014, the Corporation issued 810,138 shares of restricted stock that will vest based on the employees' continued service with the Corporation. Fifty percent (50%) of those shares vest in two years from the grant date and the remaining 50% vest in three years from the grant date. Included in those 810,138 shares of restricted stock are 653,138 shares granted to certain senior officers consistent with the requirements of TARP. The employees covered by TARP are restricted from transferring the shares, subject to certain conditions as explained above.

The fair value of the shares of restricted stock granted in the first six months of 2014 was based on the market price of the Corporation's outstanding common stock on the date of the grant. For the 653,138 shares of restricted stock granted under the TARP requirements, the market price was discounted due to postvesting restrictions. For purposes of computing the discount, the Corporation estimated an appreciation of 16% in the value of the common stock using the Capital Asset Pricing Model as a basis of what would be a market participant's expected return on the Corporation's stock and assumed that the U.S. Treasury would hold the common stock of the Corporation that it owned as of the date of the grants for an additional two years, resulting in a fair value of \$2.63 for restricted shares granted under the TARP requirements.

Stock-based compensation accounting guidance requires the Corporation to develop an estimate of the number of share-based awards that will be forfeited due to employee or director turnover. Quarterly changes in the estimated forfeiture rate may have a significant effect on share-based compensation, as the effect of adjusting the rate for all expense amortization is recognized in the period in which the forfeiture estimate is changed. If the actual forfeiture rate is higher than the estimated forfeiture rate, then an adjustment is made to increase the estimated forfeiture rate, which will result in a decrease in the expense recognized in the financial statements. If the actual forfeiture rate is lower than the estimated forfeiture rate, then an adjustment is made to decrease the estimated forfeiture rate, which will result in an increase in the expense recognized in the financial statements. When unvested options or shares of restricted stock are forfeited, any compensation expense previously recognized on the forfeited awards is reversed in the period of the forfeiture. Approximately \$36 thousand and \$5 thousand of compensation expense was reversed during the first half of 2015 and 2014, respectively, related to forfeited awards.

Also, under the Omnibus Plan, effective April 1, 2013, the Corporation's Board of Directors determined to increase the salary amounts paid to certain executive officers primarily by paying the increased salary amounts in the form of shares of the Corporation's common stock, instead of cash. During the first half of 2015, the Corporation issued 168,265 shares of common stock with a weighted average market value of \$6.20 as salary stock compensation. This resulted in a compensation expense of \$1.0 million recorded in the first half of 2015.

For the first half of 2015, the Corporation withheld 56,486 shares from the common stock paid to certain senior officers as additional compensation and 61,372 shares of restricted stock that vested during the first quarter of 2015, to cover employees' payroll and income tax withholding liabilities; these shares are held as treasury shares. The Corporation paid any fractional share of salary stock that the officer was entitled to in cash. In the consolidated financial statements, the Corporation treats shares withheld for tax purposes as common stock repurchases.

NOTE 5 – INVESTMENT SECURITIES*Investment Securities Available for Sale*

The amortized cost, non-credit loss component of other-than-temporary impairment (“OTTI”) recorded in other comprehensive income (“OCI”), gross unrealized gains and losses recorded in OCI, approximate fair value, and weighted average yield of investment securities available for sale by contractual maturities as of June 30, 2015 and December 31, 2014 were as follows:

		June 30, 2015									
		Amortized cost	Noncredit Loss Component of OTTI Recorded in OCI	Gross Unrealized				Fair value	Weighted average yield %		
				gains	losses

Maturities of mortgage-backed securities are based on contractual terms assuming no prepayments. Expected maturities of investments might differ from contractual maturities because they may be subject to prepayments and/or call options. The weighted average yield on investment securities available for sale is based on amortized cost and, therefore, does not give effect to changes in fair value. The net unrealized gain or loss on securities available for sale and the non credit loss component of OTTI are presented as part of OCI.

The following tables show the Corporation's available-for-sale investments' fair value and gross unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, as of June 30, 2015 and December 31, 2014. The tables also include debt securities for which an OTTI was recognized and only the amount related to a credit loss was recognized in earnings. Unrealized losses for which OTTI had been recognized have been reduced by any subsequent recoveries in fair value.

Assessment for OTTI

On a quarterly basis, the Corporation performs an assessment to determine whether there have been any events or economic circumstances indicating that a security with an unrealized loss has suffered an OTTI. A debt security is considered impaired if the fair value is less than its amortized cost basis at the reporting date. The accounting literature requires the Corporation to assess whether the unrealized loss is other than temporary.

OTTI losses must be recognized in earnings if an investor has the intent to sell the debt security or it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, even if an investor does not expect to sell a debt security, it must evaluate expected cash flows to be received and determine if a credit loss has occurred.

An unrealized loss is generally deemed to be other-than-temporary and a credit loss is deemed to exist if the present value of the expected future cash flows is less than the amortized cost basis of the debt security. The credit loss component of an OTTI, if any, is recorded as a component of net impairment losses on investment securities in the accompanying consolidated statements of income (loss), while the remaining portion of the impairment loss is recognized in OCI, provided the Corporation does not intend to sell the underlying debt security and it is “more likely than not” that the Corporation will not have to sell the debt security prior to recovery.

Debt securities issued by U.S. government agencies, government-sponsored entities and the Treasury accounted for approximately 97% of the total available-for-sale portfolio as of June 30, 2015 and no credit losses are expected, given the explicit and implicit guarantees provided by the U.S. federal government. The Corporation’s assessment for OTTI was concentrated mainly on Puerto Rico Government debt securities, with an amortized cost of \$52.7 million, and on private label mortgage-backed securities (“MBS”) with an amortized cost of \$39.8 million for which credit losses are evaluated on a quarterly basis. The Corporation considered the following factors in determining whether a credit loss exists and the period over which the debt security is expected to recover:

- The length of time and the extent to which the fair value has been less than the amortized cost basis;
- Any adverse change to the credit conditions and liquidity of the issuer, taking into consideration the latest information available about the overall financial condition of the issuer, credit ratings, recent legislation and government actions affecting the issuer’s industry and actions taken by the issuer to deal with the present economic climate;
- Changes in the near term prospects of the underlying collateral of a security, if any, such as changes in default rates, loss severity given default, and significant changes in prepayment assumptions; and

- The level of cash flows generated from the underlying collateral, if any, supporting the principal and interest payments of the debt securities.

The Corporation recorded OTTI losses on available-for-sale debt securities as follows:

	Quarter ended				Six-Month Period Ended			
	June 30,				June 30,			
	2015		2014		2015		2014	
(In thousands)								
Total other-than-temporary impairment losses	\$	(29,521)	\$	-	\$	(29,521)	\$	-
Noncredit-related impairment portion recognized in OCI		16,665				16,665		
Portion of other-than-temporary impairment losses previously recognized in OCI		(241)		-		(397)		-
Net impairment losses recognized in earnings (1)	\$	(13,097)	\$	-	\$	(13,253)	\$	-
(1)	Approximately \$12.9 million of the credit impairment recognized in earnings consisted of credit losses on Puerto Rico Government debt securities and \$0.2 million was associated with credit losses on private label MBS.							

The following tables summarize the roll-forward of credit losses on debt securities held by the Corporation for which a portion of an OTTI is recognized in OCI:

As of June 30, 2015, the Corporation owns Puerto Rico Government debt securities in the aggregate amount of \$52.7 million (net of a \$12.9 million OTTI), carried on its books at a fair value of \$34.6 million. During the six-month period ended June 30, 2015, the fair value of these obligations decreased by \$13.0 million. In February and March 2014, Standard & Poor's ("S&P"), Moody's Investor Service ("Moody's") and Fitch Ratings ("Fitch") downgraded the Commonwealth of Puerto Rico general obligations bonds and other obligations of Puerto Rico instrumentalities to non-investment grade categories. In June and July 2015, the three major credit rating agencies downgraded Puerto Rico's general obligation debt further into non-investment grade after the government's recent announcements about concerns on its ability to pay its financial obligations. The issuers of Puerto Rico government and agencies bonds held by the Corporation have not defaulted, and the contractual payments on these securities have been made as scheduled. However, in August 2015 there was a payment default to creditors of the Public Finance Corporation, a government public corporation.

As of June 30, 2015, in consideration of the latest available information about the Puerto Rico Government's financial condition, including the Government's June 2015 statements as to its intentions to restructure its outstanding bond obligations, the Corporation applied a discounted cash flow analysis to its Puerto Rico Government debt securities in order to calculate the cash flows expected to be collected and to determine if any portion of the decline in market value of these securities was considered a credit-related other-than-temporary impairment. The analysis derives an estimate of value based on the present value of risk-adjusted cash flows of the underlying securities and included the following components:

- The contractual future cash flows of the bonds are projected based on the key terms as set forth in the official statements for each security. Such key terms include, among others, the interest rate, amortization schedule, if any, and maturity date.
- The risk-adjusted cash flows are calculated based on a probability of default analysis and recovery rate assumptions, including the weighting of different scenarios of ultimate recovery, considering the credit rating of each security. Constant monthly default rates are assumed throughout the life of the bonds, which are based on the respective security's credit rating as of the date of the analysis.
- The adjusted future cash flows are then discounted at the original effective yield of each investment based on the purchase price and expected risk-adjusted future cash flows as of the purchase date of each investment.

The discounted risk-adjusted cash flow analysis for three of the bonds held by the Corporation as part of its available-for-sale securities portfolio resulted in a cumulative default probability in the range of 68% to 70% (weighted-average of 70%), thus reflecting that it is more likely than not that these three bonds will default during their remaining terms. Based on this analysis, the Corporation determined that it is unlikely to receive all the remaining contractual interest and principal amounts when due on these bonds and recorded a \$12.9 million other-than-temporary credit-related impairment assuming recovery rates ranging from 50% to 82% (weighted-average of 64%).

The Corporation does not have the intention to sell the securities and has sufficient capital and liquidity to hold these securities until a recovery of the fair value occurs; as such, only the credit loss component was reflected in earnings. Given the significant uncertainty of a debt restructuring process, the Corporation cannot be certain that future impairment charges will not be required against these securities.

In addition, during the first half of 2015, the Corporation recorded a \$0.4 million credit-related impairment loss associated with private label MBS, which are collateralized by fixed-rate mortgages on single-family residential properties in the United States. The interest rate on these private-label MBS is variable, tied to 3-month LIBOR and limited to the weighted-average coupon of the underlying collateral. The underlying mortgages are fixed-rate single-family loans with original high FICO scores (over 700) and moderate original loan-to-value ratios (under 80%), as well as moderate delinquency levels.

Based on the expected cash flows derived from the model, and since the Corporation does not have the intention to sell the securities and has sufficient capital and liquidity to hold these securities until a recovery of the fair value occurs, only the credit loss component was reflected in earnings. Significant assumptions in the valuation of the private label MBS were as follows:

	June 30, 2015			December 31, 2014		
	Weighted			Weighted		
	Average		Range	Average		Range
Discount rate	14.5%		14.5%	14.5%		14.5%
Prepayment rate	29%		17.37%-100.00%	32%		19.89%-100.00%
Projected Cumulative Loss Rate	6.9%		0.16%-80.00%	7.9%		0.64%-80.00%

NOTE 6 – OTHER EQUITY SECURITIES

Institutions that are members of the FHLB system are required to maintain a minimum investment in FHLB stock. Such minimum investment is calculated as a percentage of aggregate outstanding mortgages, and an additional investment is required that is calculated as a percentage of total FHLB advances, letters of credit, and the collateralized portion of interest-rate swaps outstanding. The stock is capital stock issued at \$100 par value. Both stock and cash dividends may be received on FHLB stock.

As of June 30, 2015 and December 31, 2014, the Corporation had investments in FHLB stock with a book value of \$25.4 million and \$25.5 million, respectively. The net realizable value is a reasonable proxy for the fair value of these instruments. Dividend income from FHLB stock for each of the quarters ended June 30, 2015 and 2014, was \$0.3 million and for each of the six-month periods ended June 30, 2015 and 2014 was \$0.6 million.

The shares of FHLB stock owned by the Corporation were issued by the FHLB of New York. The FHLB of New York is part of the Federal Home Loan Bank System, a national wholesale banking network of 12 regional, stockholder-owned congressionally chartered banks. The Federal Home Loan Banks are all privately capitalized and operated by their member stockholders. The system is supervised by the Federal Housing Finance Agency, which ensures that the Federal Home Loan Banks operate in a financially safe and sound manner, remain adequately capitalized and able to raise funds in the capital markets, and carry out their housing finance mission.

The Corporation has other equity securities that do not have a readily available fair value. The carrying value of such securities as of June 30, 2015 and December 31, 2014 was \$0.7 million and \$0.3 million, respectively.

NOTE 7 – LOANS HELD FOR INVESTMENT

The following table provides information about the loan portfolio held for investment:

		June 30,		December 31,	
		2015		2014	
(In thousands)					
Residential mortgage loans, mainly secured by first mortgages	\$	3,327,350		\$	3,011,187
Commercial loans:					
Construction loans		120,848			123,480
Commercial mortgage loans		1,518,151			1,665,787
Commercial and Industrial loans (1)		2,352,111			2,479,437
Total commercial loans		3,991,110			4,268,704
Finance leases		228,280			232,126
Consumer loans		1,670,935			1,750,419
Loans held for investment		9,217,675			9,262,436
Allowance for loan and lease losses		(221,518)			(222,395)
Loans held for investment, net	\$	8,996,157		\$	9,040,041
	(1)	As of June 30, 2015 and December 31, 2014, includes \$1.0 billion and \$1.1 billion, respectively, of commercial loans that are secured by real estate but are not dependent upon the real estate for repayment.			

Loans held for investment on which accrual of interest income had been discontinued as of the indicated dates were as follows:					
		June 30,		December 31,	
		2015		2014	
(In thousands)					
Non-performing loans:					
Residential mortgage	\$	175,035		\$	180,707
Commercial mortgage		95,088			148,473
Commercial and Industrial		143,935			122,547
Construction:					
Land		12,877			15,030
Construction-residential		3,241			14,324
Consumer:					
Auto loans		17,689			22,276

Finance leases		3,257			5,245
Other consumer loans		12,451			15,294
Total non-performing loans held for investment (1) (2) (3)	\$	463,573		\$	523,896
(1)	As of June 30, 2015 and December 31, 2014, excludes \$48.0 million and \$54.6 million, respectively, of non-performing loans held for sale.				
(2)	Amount excludes purchased-credit impaired ("PCI") loans with a carrying value of approximately \$178.5 million and \$102.6 million as of June 30, 2015 and December 31, 2014, respectively, primarily mortgage loans acquired from Doral Bank in the first quarter of 2015 and second quarter of 2014, as further discussed below. These loans are not considered non-performing due to the application of the accretion method, under which these loans will accrete interest income over the remaining life of the loans using an estimated cash flow analysis.				
(3)	Non-performing loans exclude \$400.8 million and \$494.6 million of Trouble Debt Restructuring ("TDR") loans that are in compliance with modified terms and in accrual status as of June 30, 2015 and December 31, 2014, respectively.				

Loans in Process of Foreclosure

As of June 30, 2015, the recorded investment of residential mortgage loans collateralized by residential real estate property that are in the process of foreclosure amounted to \$157.0 million. The Corporation commences the foreclosure process on residential real estate loans when a borrower becomes 120 days delinquent in accordance with the guidelines of the Consumer Financial Protection Bureau (CFPB). Foreclosure procedures and timelines vary depending on whether the property is located in a judicial or non-judicial state. Judicial states (Puerto Rico) require the foreclosure to be processed through the state's court while foreclosure in non-judicial states is processed without court intervention. Foreclosure timelines vary according to state law and Investor Guidelines. Occasionally foreclosures may be delayed due to mandatory mediations, bankruptcy, court delays and title issues, among other reasons.

The Corporation's aging of the loans held for investment portfolio is as follows:									
As of June 30, 2015 (In thousands)	30-59 Days Past Due	60-89 Days Past Due	90 days or more Past Due (1)	Total Past Due	Purchased Credit-Impaired Loans	Current	Total loans held for investment	90 days past due and still accruing (2)

- (1) Includes non-performing loans and accruing loans which are contractually delinquent 90 days or more (i.e. FHA/VA guaranteed loans and credit cards). Credit card loans continue to accrue finance charges and fees until charged-off at 180 days.
- (2) It is the Corporation's policy to report delinquent residential mortgage loans insured by the FHA or guaranteed by the VA as past-due loans 90 days and still accruing as opposed to non-performing loans since the principal repayment is insured. These balances include \$40.4 million of residential mortgage loans insured by the FHA or guaranteed by the VA, which are over 18 months delinquent, and are no longer accruing interest as of December 31, 2014.
- (3) As of December 31, 2014, includes \$9.3 million of defaulted loans collateralizing GNMA securities for which the Corporation has an unconditional option (but not an obligation) to repurchase the defaulted loans.
- (4) According to the Corporation's delinquency policy and consistent with the instructions for the preparation of the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C) required by the Federal Reserve Board, residential mortgage, commercial mortgage, and construction loans are considered past due when the borrower is in arrears two or more monthly payments. FHA/VA government guaranteed loans, other residential mortgage loans, commercial mortgage loans, land loans and construction-residential loans past due 30-59 days as of December 31, 2014 amounted to \$14.0 million, \$189.1 million, \$20.8 million, \$0.8 million and \$1.0 million, respectively.

The Corporation's credit quality indicators by loan type as of June 30, 2015 and December 31, 2014 are summarized below:

Commercial Credit Exposure-Credit Risk Profile Based on Creditworthiness category:											
June 30, 2015	Substandard		Doubtful		Loss		Total Adversely Classified (1)		Total Portfolio		
(In thousands)											
Commercial mortgage	\$ 161,579		\$ 117		\$ -		\$ 161,696		\$		\$ 1,518,151
Construction:											
Land	14,500		1		-		14,501				51,614
Construction-commercial	11,490		-		-		11,490				39,142
Construction-residential	3,241		-		-		3,241				30,092
Commercial and Industrial	218,604		896		523		220,023				2,352,111
Commercial Credit Exposure-Credit Risk Profile Based on Creditworthiness category:											
December 31, 2014	Substandard		Doubtful		Loss		Total Adversely Classified (1)		Total Portfolio		
(In thousands)											
Commercial mortgage	\$ 273,027		\$ 897		\$ -		\$ 273,924		\$		\$ 1,665,787
Construction:											
Land	16,915		-		-		16,915				55,921
Construction-commercial	11,790		-		-		11,790				24,562
Construction-residential	13,548		776		-		14,324				42,997
Commercial and Industrial	234,926		4,884		801		240,611				2,479,437
(1)	Excludes \$48.0 million (\$7.8 million land, \$39.1 million construction-commercial, \$0.9 million construction-residential and \$0.2 million commercial mortgage) and \$54.6 million (\$7.8 million land, \$39.1 million construction-commercial, \$0.9 million construction-residential and \$6.8 million commercial mortgage) as of June 30, 2015 and December 31, 2014, respectively, of non-performing loans held for sale.										

The Corporation considers a loan as adversely classified if its risk rating is Substandard, Doubtful or Loss. These categories are defined as follows:

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

Substandard- A Substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful- Doubtful classifications have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable. A Doubtful classification may be appropriate in cases where significant risk exposures are perceived, but Loss cannot be determined because of specific reasonable pending factors which may strengthen the credit in the near term.

Loss- Assets classified Loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future. There is little or no prospect for near term improvement and no realistic strengthening action of significance pending.

June 30, 2015		Consumer Credit Exposure-Credit Risk Profile based on Payment activity									
		Residential Real-Estate					Consumer				
		FHA/VA/ Guaranteed (1)		Other residential loans			Auto		Finance Leases		Other Consumer
(In thousands)											
Performing		\$	148,840	\$	2,828,241	\$	978,459	\$	225,023	\$	662,336

Purchased Credit Impaired (“PCI”) Loans

As described in Note 2, Business Combination, the Corporation acquired PCI loans as part of the Doral Bank transaction and in previously completed asset acquisitions, which are accounted under ASC 310-30. These previous transactions include the acquisition from Doral Financial in the second quarter of 2014 of all its rights, title and interest in first and second residential mortgages loans in full satisfaction of secured borrowings owed by such entity to FirstBank, and the acquisition in 2012 of a FirstBank-branded credit card loans portfolio from FIA Card Services (“FIA”).

Under ASC 310-30, the acquired PCI loans were aggregated into pools based on similar characteristics (i.e. delinquency status, loan terms). Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. Since the loans are accounted for by the Corporation under ASC 310-30, they are not considered non-performing and will continue to have an accretable yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. The Corporation recognizes additional losses on this portfolio when it is probable that the Corporation will be unable to collect all cash flows expected as of the acquisition date plus additional cash flows expected to be collected arising from changes in estimates after the acquisition date.

The carrying amount of PCI loans follows:				
	June 30,		December 31,	
	2015		2014	
(In thousands)				
Residential mortgage loans	\$	175,234	\$	98,494
Commercial mortgage loans		3,260		3,393
Credit Cards		-		717
Total PCI loans	\$	178,494	\$	102,604
Allowance for loan losses		(3,164)		-
Total PCI loans, net of allowance for loan losses	\$	175,330	\$	102,604

The following tables present PCI loans by past due status as of June 30, 2015 and December 31, 2014:
