Protecting Your Privacy

Our Pledge to You

THE FUND IS COMMITTED TO YOUR PRIVACY. On this page, you will find the Fund's policies and practices for collecting, disclosing, and safeguarding nonpublic personal information, which may include financial or other customer information. These policies apply to individuals who purchase Fund shares for personal, family, or household purposes, or have done so in the past. This notification replaces all previous statements of the Fund's consumer privacy policy, and may be amended at any time. We'll keep you informed of changes as required by law.

YOUR ACCOUNT IS PROVIDED IN A SECURE ENVIRONMENT. The Fund maintains physical, electronic and procedural safeguards that comply with federal regulations to guard nonpublic personal information. The Fund's agents and service providers have limited access to customer information based on their role in servicing your account.

THE FUND COLLECTS INFORMATION IN ORDER TO SERVICE AND ADMINISTER YOUR ACCOUNT.

The Fund collects a variety of nonpublic personal information, which may include:

- Information we receive from you, such as your name, address, and social security number.
- Information about your transactions with us, such as the purchase or sale of Fund shares.
- Information we receive from agents and service providers, such as proxy voting information.

THE FUND DOES NOT SHARE NONPUBLIC PERSONAL INFORMATION WITH ANYONE, EXCEPT AS PERMITTED BY LAW.

Thank you for this opportunity to serve you.

The views expressed in this report reflect those of the portfolio manager only through the end of the period covered and do not necessarily represent the views of Dreyfus or any other person in the Dreyfus organization. Any such views are subject to change at any time based upon market or other conditions and Dreyfus disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Dreyfus fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Dreyfus fund.

The Fund

A LETTER FROM THE PRESIDENT

Dear Shareholder:

This semiannual report for Dreyfus High Yield Strategies Fund covers the six-month period from April 1, 2014, through September 30, 2014. For information about how the fund performed during the reporting period, as well as general market perspectives, we provide a Discussion of Fund Performance on the pages that follow.

High yield bonds continued to gain value over the past 12 months, but returns were more robust over the first half of the reporting period than over the second half. Lower rated, corporate-backed securities generally benefited from strong demand stemming from investors' search for competitive levels of current income in a persistently low interest rate environment. In addition, credit conditions were bolstered by economic recoveries in the United States and other parts of the world, which were fueled by stimulative monetary policies. However, global economic growth has been dampened to a degree by a combination of headwinds from fiscal tightening, private sector deleveraging, and more restrictive financial regulation.

We expect the U.S. economic expansion to accelerate as these drags on economic growth fade. Meanwhile, domestic inflation appears to be drifting upwards towards the Federal Reserve Board's target. Although stronger growth and higher inflation tend to hurt the more interest rate-sensitive bond market sectors, they could prove positive for high yield securities that historically have been more sensitive to changes in underlying business conditions. As always, we encourage you to discuss our observations with your financial adviser to assess their potential impact on your investments.

Thank you for your continued confidence and support.

J. Charles Cardona
President
The Dreyfus Corporation
October 15, 2014

DISCUSSION OF FUND PERFORMANCE

For the period of April 1, 2014, through September 30, 2014, as provided by Chris Barris, Portfolio Manager

Fund and Market Performance Overview

For the six-month period ended September 30, 2014, Dreyfus High Yield Strategies Fund produced a total return of -0.14% (on a net asset value basis) and provided aggregate income dividends of \$0.186 per share.¹ In comparison, the BofA Merrill Lynch U.S. High Yield Master II Constrained Index (the "Index"), the fund's benchmark, achieved a total return of 0.60% for the same period.²

Despite strong underlying fundamentals, high yield bonds encountered challenging market conditions stemming from unfavorable supply-and-demand dynamics over the summer of 2014. The fund produced a lower return than its benchmark, mainly due to a relatively short average duration during a time of falling long-term interest rates. Fund fees and expenses that are not reflected in the benchmark's results also weighed on the fund's relative performance.

The Fund's Investment Approach

The fund primarily seeks high current income. The fund also seeks capital growth as a secondary objective, to the extent consistent with its objective of seeking high current income. The fund invests primarily in fixed-income securities of below investment-grade credit quality. Issuers of below investment-grade securities may include companies in early stages of development and companies with a highly leveraged financial structure. To compensate investors for taking on greater risk, such companies typically must offer higher yields than those offered by more established or conservatively financed companies.

Technical Factors Dampened Returns from High Yield Bonds

In the months before the start of the reporting period, long-term interest rates had moderated from multi-year highs due to renewed economic and geopolitical concerns in overseas markets. A U.S. economic soft patch caused by unusually harsh

The Fund 3

DISCUSSION OF FUND PERFORMANCE *(continued)*

winter weather also put downward pressure on long-term rates. These worries proved short-lived, however, and the economic recovery got back on track in the spring amid robust corporate earnings growth, healthy balance sheets, and low default rates among issuers of high yield bonds.

In spite of the market's strong underlying fundamentals, high yield bond prices were hurt at times during the reporting period by changing supply-and-demand dynamics. Concerns regarding renewed economic weakness in Europe and intensifying conflicts in Ukraine and the Middle East caused capital to flow away from the asset class and toward traditional safe havens over the summer of 2014. At the same time, the supply of newly issued high yield securities remained robust as companies continued to refinance seasoned debt at lower rates, approximately matching the record issuance levels reached over the same period in 2013. The resulting supply-and-demand imbalance caused high yield bond prices to decline, offsetting earlier gains.

Short Duration Dampened Relative Performance

In this challenging environment, the fund's performance compared to its benchmark was constrained by overweighted exposure to higher coupon bonds with relatively short maturities. While these securities helped boost the fund's ability to generate competitive levels of current income, their maturity profiles contributed to a relatively short duration posture for the fund overall. A short average duration effectively prevented the fund from participating more fully in the benefits of falling long-term interest rates.

From a security selection perspective, the fund also was hurt by underweighted exposure to bonds from the utilities sector, which did not meet our investment criteria but outperformed market averages. Among individual positions, company-specific problems affecting a drilling company in the energy sector caused its bonds to rank among the fund's greater laggards.

The fund achieved better relative performance in other areas. Our security selection strategy was especially successful in the information technology sector, where the fund held overweighted exposure. On the other hand, the fund avoided the full brunt of weakness among metals-and-mining companies through underweighted positions in the materials sector. Results from individual bonds were particularly robust for securities issued by an insurance company, a container manufacturer, and a casino operator.

Strategies for a Changing Market Environment

In light of an impressive 4.6% annualized U.S. GDP growth rate over the second quarter of 2014 and expectations of similar strength in the third quarter, we remain optimistic regarding fundamentals in the high yield bond market, and we expect default rates to remain low over the foreseeable future. In addition, yield differences between high yield bonds and U.S. Treasury securities have increased after recent bouts of market weakness, making valuations more attractive. Consequently, we have identified an ample number of high yield securities meeting our investment criteria across a broad range of industry groups. The fund ended the reporting period with relatively heavy exposure to bonds from companies in the paper-and-packaging, services, and information technology industry groups. On the other hand, the fund held underweighted exposure to high yield bonds from retailers and metals-and-mining companies. Of course, we are prepared to adjust our strategies and the fund's composition as economic and market conditions evolve.

October 15, 2014

Bond funds are subject generally to interest rate, credit, liquidity, and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. High yield bonds are subject to increased credit risk and are considered speculative in terms of the issuer's perceived ability to continue making interest payments on a timely basis and to repay principal upon maturity. The use of leverage may magnify the fund's gains or losses. For derivatives with a leveraging component, adverse changes in the value or level of the underlying asset can result in a loss that is much greater than the original investment in the derivative. Total return includes reinvestment of dividends and any capital gains paid, based upon net asset value per share.

1 Past performance is no guarantee of future results. Share price, yield, and investment return fluctuate such that upon redemption, fund shares may be worth more or less than their original cost. Return figure provided reflects the absorption of certain fund expenses by The Dreyfus Corporation during the period. Had these expenses not been absorbed, the fund's return would have been lower.

2 SOURCE: FACTSET — Reflects reinvestment of dividends and, where applicable, capital gain distributions. On September 25, 2009, the Merrill Lynch U.S. HighYield Master II Constrained Index was renamed the BofA Merrill Lynch U.S. HighYield Master II Constrained Index (the "Index"). The Index is an unmanaged performance benchmark composed of U.S. dollar-denominated domestic and Yankee bonds rated below investment grade with at least \$100 million par amount outstanding and at least one year remaining to maturity. Bonds are capitalization-weighted. Total allocations to an issuer are capped at 2%. Investors cannot invest directly in any index. On July 23, 2014, the Board of Trustees of the fund approved a revised Investment Management and Administration Agreement between the fund and The Dreyfus Corporation, the fund's investment adviser ("Dreyfus"), to reflect a reduction to the investment management and administration fee of the fund, effective August 1, 2014. The investment management and administration fee had been computed at the annual rate of .90% of the value of the fund's average weekly total assets minus the sum of accrued liabilities (other than the aggregate indebtedness constituting financial leverage) (the "Managed Assets") and, effective August 1, 2014, the investment management and administration fee is computed at the annual rate of .75% of the value of the fund's Managed Assets. Dreyfus had been waiving receipt of a portion of the fund's investment management and administration fee in the amount of .15% of the Managed Assets but, in light of the reduction of the investment management and administration fee, that waiver was terminated, effective August 1, 2014.

FINANCIAL HIGHLIGHTS

The following table describes the performance for the fiscal periods indicated. Total return shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These figures have been derived from the fund's financial statements and market price data for the fund's shares.

e Annualized.

f The presentation of net expense ratios has been changed to include interest expense. Net expenses excluding interest expense for the periods ended March 31, 2013, 2012, 2011 and 2010 were previously presented as 1.25%, 1.29%, 1.33% and 1.36%, respectively.

See notes to financial statements.

The Fund **23**

NOTES TO FINANCIAL STATEMENTS (Unaudited)

NOTE 1—Significant Accounting Policies:

Dreyfus HighYield Strategies Fund (the “fund”) is registered under the Investment Company Act of 1940, as amended (the “Act”), as a non-diversified, closed-end management investment company. The fund’s primary investment objective is to seek high current income. Under normal market conditions, the fund invests at least 65% of its total assets in income securities of U.S. issuers rated below investment grade quality or unrated income securities that The Dreyfus Corporation (the “Manager” or “Dreyfus”), a wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY Mellon”), serving as the fund’s investment manager and administrator, determines to be of comparable quality. The fund’s Common Stock trades on the New York Stock Exchange Amex (the “NYSE”) under the ticker symbol DHF.

The Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) is the exclusive reference of authoritative U.S. generally accepted accounting principles (“GAAP”) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal laws are also sources of authoritative GAAP for SEC registrants. The fund’s financial statements are prepared in accordance with GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

(a) Portfolio valuation: The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Additionally, GAAP provides guidance on determining whether the volume and activity in a market has decreased significantly and whether such a decrease in activity results in transactions that are not orderly. GAAP requires enhanced disclosures around valuation inputs and techniques used during annual and interim periods.

Various inputs are used in determining the value of the fund's investments relating to fair value measurements. These inputs are summarized in the three broad levels listed below:

Level 1—unadjusted quoted prices in active markets for identical investments.

Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. Valuation techniques used to value the fund's investments are as follows:

Registered investment companies that are not traded on an exchange are valued at their net asset value and are generally categorized within Level 1 of the fair value hierarchy.

Investments in securities, excluding short-term investments (other than U.S. Treasury Bills) and forward foreign currency exchange contracts ("forward contracts") are valued each business day by an independent pricing service (the "Service") approved by the fund's Board of Trustees (the "Board"). Investments for which quoted bid prices are readily available and are representative of the bid side of the market in the judgment

The Fund 25

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

of the Service are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). Other investments (which constitute a majority of the portfolio securities) are valued as determined by the Service, based on methods which include consideration of the following: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. These securities are generally categorized within Level 2 of the fair value hierarchy.

The Service's procedures are reviewed by Dreyfus under the general supervision of the Board.

When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its net asset value, the fund may value these investments at fair value as determined in accordance with the procedures approved by the Board. Certain factors may be considered when fair valuing investments such as: fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold, and public trading in similar securities of the issuer or comparable issuers. These securities are either categorized within Level 2 or 3 of the fair value hierarchy depending on the relevant inputs used.

For restricted securities where observable inputs are limited, assumptions about market activity and risk are used and are generally categorized within Level 3 of the fair value hierarchy.

Investments denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange.

Forward contracts are valued at the forward rate and are generally categorized within Level 2 of the fair value hierarchy.

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

The following is a summary of the inputs used as of September 30, 2014 in valuing the fund's investments:

	Level 1— Unadjusted Quoted Prices	Level 2—Other Significant Observable Inputs	Level 3— Significant Unobservable Inputs	Total
Assets (\$)				
Investments in Securities:				
Corporate Bonds [†]	—	390,416,116	—	390,416,116
Mutual Funds	4,649,767	—	—	4,649,767
Preferred Stocks [†]	—	2,627,418	—	2,627,418
Other Financial				
Instruments:				
Forward Foreign				
Currency Exchange				
Contracts ^{††}	—	276,440	—	276,440

[†] See Statement of Investments for additional detailed categorizations.

^{††} Amount shown represents unrealized appreciation at period end.

At September 30, 2014, there were no transfers between Level 1 and Level 2 of the fair value hierarchy.

(b) Foreign currency transactions: The fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized on securities transactions between trade and settlement date, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments resulting from changes in exchange rates. Foreign currency gains and losses on foreign currency transactions are also included with net realized and unrealized gain or loss on investments.

The Fund 27

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

(c) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Dividend income is recognized on the ex-dividend date and interest income, including, where applicable, accretion of discount and amortization of premium on investments, is recognized on the accrual basis.

(d) Affiliated issuers: Investments in other investment companies advised by Dreyfus are defined as “affiliated” under the Act. Investments in affiliated investment companies during the period ended September 30, 2014 were as follows:

Affiliated Investment Company	Value 3/31/2014 (\$)	Purchases (\$)	Sales (\$)	Value 9/30/2014 (\$)	Net Assets (%)
Dreyfus Institutional Preferred Plus Money Market Fund	2,111,520	66,946,981	64,408,734	4,649,767	1.6

(e) Risk: The fund invests primarily in debt securities. Failure of an issuer of the debt securities to make timely interest or principal payments, or a decline or the perception of a decline in the credit quality of a debt security, can cause the debt security’s price to fall, potentially lowering the fund’s share price. High yield (“junk”) bonds involve greater credit risk, including the risk of default, than investment grade bonds, and are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments.

The fund is permitted to invest up to 5% of its assets directly in the common stock of junk bond issuers. This percentage will be in addition to any other common stock holdings acquired as part of warrants or “units”, so that the fund’s total common stock holdings could exceed 5% at a particular time. However, the fund currently intends to invest directly in common stocks (including those offered in an initial public offering) to gain sector exposure and when suitable junk bonds are not available for sale. The fund expects to sell the common stock promptly when suitable junk bonds are subsequently acquired.

(f) Dividends to shareholders: Dividends are recorded on the ex-dividend date. Dividends from investment income-net are declared and paid monthly. Dividends from net realized capital gains, if any, are normally declared and paid annually, but the fund may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code"). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the fund not to distribute such gains. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

For shareholders who elect to receive their distributions in additional shares of the fund, in lieu of cash, such distributions will be reinvested at the lower of the market price or net asset value per share (but not less than 95% of the market price) based on the record date's respective prices. If the net asset value per share on the record date is lower than the market price per share, shares will be issued by the fund at the record date's net asset value on the payable date of the distribution. If the net asset value per share is less than 95% of the market value, shares will be issued by the fund at 95% of the market value. If the market price is lower than the net asset value per share on the record date, Computershare Inc., will purchase fund shares in the open market commencing on the payable date and reinvest those shares accordingly. As a result of purchasing fund shares in the open market, fund shares outstanding will not be affected by this form of reinvestment.

On September 26, 2014, the Board declared a cash dividend of \$0.029 per share from undistributed investment income-net, payable on October 28, 2014 to shareholders of record as of the close of business on October 10, 2014. The ex-dividend date was October 8, 2014.

(g) Federal income taxes: It is the policy of the fund to continue to qualify as a regulated investment company, if such qualification is in the best interests of its shareholders, by complying with the applicable provisions of the Code, and to make distributions of taxable income sufficient to relieve it from substantially all federal income and excise taxes.

The Fund 29

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

As of and during the period ended September 30, 2014, the fund did not have any liabilities for any uncertain tax positions. The fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of Operations. During the period ended September 30, 2014, the fund did not incur any interest or penalties.

Each tax year in the three-year period ended March 31, 2014 remains subject to examination by the Internal Revenue Service and state taxing authorities.

Under the Regulated Investment Company Modernization Act of 2010 (the "2010 Act"), the fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 ("post-enactment losses") for an unlimited period. Furthermore, post-enactment capital loss carryovers retain their character as either short-term or long-term capital losses rather than short-term as they were under previous statute. The 2010 Act requires post-enactment losses to be utilized before the utilization of losses incurred in taxable years prior to the effective date of the 2010 Act ("pre-enactment losses"). As a result of this ordering rule, pre-enactment losses may be more likely to expire unused.

The fund has an unused capital loss carryover of \$69,291,047 available for federal income tax purposes to be applied against future net realized capital gains, if any, realized subsequent to March 31, 2014. If not applied, \$8,379,964 of the carryover expires in fiscal year 2016, \$24,707,290 expires in fiscal year 2017 and \$33,464,139 expires in fiscal year 2018. The fund has \$2,739,654 of post-enactment short-term capital losses which can be carried forward for an unlimited period. It is uncertain that the fund will be able to utilize most of its pre-enactment capital loss carryovers prior to its expiration date.

The tax character of distributions paid to shareholders during the fiscal year ended March 31, 2014 was as follows: ordinary income \$28,715,087. The tax character of current year distributions will be determined at the end of the current fiscal year.

NOTE 2—Borrowings:

The fund has a \$125,000,000 Revolving Credit and Security Agreement (the “Agreement”), which was renewed until November 24, 2015, subject to certain amendments. Under the terms of the Agreement, the fund may borrow “Advances” (including Eurodollar Advances), on a collateralized basis with certain fund assets used as collateral, which amounted to \$353,267,572 as of September 30, 2014. The interest to be paid by the fund on such Advances is determined with reference to the principal amount of each Advance (and/or Eurodollar Advance) outstanding from time to time. The fund also pays additional fees pursuant to the Agreement. During the period ended September 30, 2014, total expenses pursuant to the Agreement amounted to \$742,003.

The average amount of borrowings outstanding under the Agreement during the period ended September 30, 2014 was \$120,000,000, with a related weighted average annualized interest rate of 1.24% and is inclusive of all expenses related to the Agreement.

NOTE 3—Management Fee and Other Transactions with Affiliates:

(a) Prior to August 1, 2014, pursuant to a management and administration agreement with the Manager, the management and administration fee was computed at the annual rate of .90% of the value of the fund’s average weekly total assets minus the sum of accrued liabilities (other than the aggregate indebtedness constituting financial leverage) (the “Managed Assets”) and was payable monthly. Effective August 1, 2014, the board approved the reduction in management and administration fee to an annual rate of .75% of the value of the fund’s Managed Assets. The Manager had been waiving receipt of a portion of the fund’s management and administration fee in the amount of .15% of the Managed Assets but, in light of the reduction of the management and administration fee, that waiver was terminated, effective August 1, 2014. The

NOTES TO FINANCIAL STATEMENTS (Unaudited) *(continued)*

reduction in expenses, pursuant to the undertaking, amounted to \$209,259 during the period ended September 30, 2014.

(b) The fund compensates The Bank of New York Mellon, a subsidiary of BNY Mellon and an affiliate of Dreyfus, under a custody agreement for providing custodial services for the fund. These fees are determined based on net assets, geographic region and transaction activity. During the period ended September 30, 2014, the fund was charged \$22,814 pursuant to the custody agreement.

During the period ended September 30, 2014, the fund was charged \$2,076 for services performed by the Chief Compliance Officer and his staff.

The components of "Due to The Dreyfus Corporation and affiliates" in the Statement of Assets and Liabilities consist of: management fees \$252,574, custodian fees \$17,800 and Chief Compliance Officer fees \$1,038.

(c) Each Board member also serves as a Board member of other funds within the Dreyfus complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

NOTE 4—Securities Transactions:

The aggregate amount of purchases and sales of investment securities, excluding short-term securities and forward contracts, during the period ended September 30, 2014, amounted to \$110,990,446 and \$118,525,257, respectively.

Derivatives: A derivative is a financial instrument whose performance is derived from the performance of another asset. Each type of derivative instrument that was held by the fund during the period ended September 30, 2014 is discussed below.

Master Netting Arrangements: The fund enters into International Swaps and Derivatives Association, Inc. Master Agreements or similar agreements (collectively, "Master Agreements") with its over-the counter ("OTC") derivative contract counterparties in order to, among other

things, reduce its credit risk to counterparties. Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under a Master Agreement, the fund may offset with the counterparty certain derivative financial instrument's payables and/or receivables with collateral held and/or posted and create one single net payment in the event of default or termination.

Forward Foreign Currency Exchange Contracts: The fund enters into forward contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to settle foreign currency transactions or as a part of its investment strategy. When executing forward contracts, the fund is obligated to buy or sell a foreign currency at a specified rate on a certain date in the future. With respect to sales of forward contracts, the fund incurs a loss if the value of the contract increases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract decreases between those dates. With respect to purchases of forward contracts, the fund incurs a loss if the value of the contract decreases between the date the forward contract is opened and the date the forward contract is closed. The fund realizes a gain if the value of the contract increases between those dates. Any realized or unrealized gains or losses which occurred during the period are reflected in the Statement of Operations. The fund is exposed to foreign currency risk as a result of changes in value of underlying financial instruments. The fund is also exposed to credit risk associated with counterparty nonperformance on these forward contracts, which is generally limited to the unrealized gain on each open contract. This risk is mitigated by Master Agreements between the fund and the counterparty. The following summarizes open forward contracts at September 30, 2014:

Forward Foreign Currency Exchange Contracts	Foreign Currency		Value (\$)	Unrealized Appreciation (\$)
	Amounts	Proceeds (\$)		
Sales:				
British Pound, Expiring:				
10/31/2014 ^a	670,000	1,095,000	1,085,872	9,128
10/31/2014 ^b	3,345,000	5,462,957	5,421,259	41,698

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

NOTES TO FINANCIAL STATEMENTS (Unaudited) (continued)

Forward Foreign Currency Exchange Contracts	Foreign Currency		Value (\$)	Unrealized Appreciation (\$)
	Amounts	Proceeds (\$)

10/31/2014 ^d	3,860,000	4,960,554	4,876,420	84,134
Gross Unrealized Appreciation				276,440

Counterparties:

- a Barclays Bank
- b Goldman Sachs International
- c Commonwealth Bank of Australia
- d Morgan Stanley Capital Services

The provisions of ASC Topic 210 "Disclosures about Offsetting Assets and Liabilities" require disclosure on the offsetting of financial assets and liabilities. These disclosures are required for certain investments, including derivative financial instruments subject to Master Agreements which are eligible for offsetting in the Statement of Assets and Liabilities and require the fund to disclose both gross and net information with respect to such investments. For financial reporting purposes, the fund does not offset derivative assets and derivative liabilities that are subject to Master Agreements in the Statement of Assets and Liabilities.

At September 30, 2014, derivative assets and liabilities (by type) on a gross basis are as follows:

Derivative Financial Instruments:	Assets (\$)
Forward contracts	276,440
Total gross amount of derivative assets and liabilities in the Statement of Assets and Liabilities	276,440
Derivatives not subject to Master Agreements	—
Total gross amount of assets and liabilities subject to Master Agreements	276,440

Edgar Filing: DREYFUS HIGH YIELD STRATEGIES FUND - Form N-CSRS

The following table presents derivative assets net of amounts available for offsetting under Master Agreements and net of related collateral received, if any, as of September 30, 2014:

Counterparties	Gross Amount of Assets (\$) ¹	Financial Instruments and Derivatives Available for Offset (\$)	Collateral Received (\$) ²	Net Amount of Assets (\$)
Barclays Bank	9,128	—	—	9,128
Commonwealth Bank of Australia	62,952	—	—	62,952
Goldman Sachs International	120,226	—	—	120,226
Morgan Stanley Capital Services	84,134	—	—	84,134
Total	276,440	—	—	276,440

1 Absent a default event or early termination, OTC derivative assets and liabilities are presented at gross amounts and are not offset in the Statement of Assets and Liabilities.

2 In some instances, the actual collateral received may be more than the amount shown due to overcollateralization.

The following summarizes the average market value of derivatives outstanding during the period ended September 30, 2014:

	Average Market Value (\$)
Forward contracts	25,150,765

At September 30, 2014, accumulated net unrealized appreciation on investments was \$11,153,674, consisting of \$11,945,715 gross unrealized appreciation and \$792,041 gross unrealized depreciation.

At September 30, 2014, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes (see the Statement of Investments).

PROXY RESULTS (Unaudited)

Holders of Beneficial Interest voted on the following proposal presented at the annual shareholders' meeting held on August 7, 2014 as follows:

	Shares	
	For	Authority Withheld
To elect one Class II Trustees:†		
Benaree Pratt Wiley	57,654,784	4,912,212
To elect two Class III Trustees:†		
Joseph S. DiMartino	57,662,303	4,184,693
Kenneth A. Himmel	56,303,787	5,543,209

† The terms of these Class II and Class III Trustees expire in 2017.

INFORMATION ABOUT THE RENEWAL OF THE
FUND'S MANAGEMENT AGREEMENT (Unaudited)

At a meeting of the fund's Board of Trustees held on July 23-24, 2014, the Board considered the approval of amendment of the fund's Investment Management and Administration Agreement, pursuant to which Dreyfus provides the fund with investment advisory and administrative services (the "Agreement"). Dreyfus proposed to amend the Agreement to lower the management fee payable by the fund from an annual rate of .90% to .75% of the value of the fund's average weekly total assets (minus the sum of accrued liabilities, other than the aggregate indebtedness constituting financial leverage) ("Managed Assets"), effective August 1, 2014. The Board members, none of whom are "interested persons" (as defined in the Investment Company Act of 1940, as amended) of the fund, were assisted in their review of the Agreement by independent legal counsel and met with counsel in executive session separate from representatives of Dreyfus. Since the Board had renewed the Agreement at a meeting held on February 19-20, 2014 (the "February Meeting"), and, other than as discussed below, there had been no material changes in the information presented, the Board addressed certain of the relevant considerations by reference to their considerations and determinations at the February Meeting.

Analysis of Nature, Extent, and Quality of Services Provided to the Fund. Dreyfus represented that there would be no diminution in the nature, extent or quality of the services provided to the fund by Dreyfus or its affiliates. The nature, extent and quality of services provided had been considered at the February Meeting, and there had been no material changes in this information. Dreyfus representatives stated, and the Board considered, that Dreyfus would continue to provide research and portfolio management and that Dreyfus would continue to provide oversight of day-to-day fund operations, including fund accounting and administration and assistance in meeting legal and regulatory requirements. The Board considered Dreyfus' extensive administrative, accounting, and compliance infrastructures.

The Fund 37

INFORMATION ABOUT THE RENEWAL OF THE FUND'S
MANAGEMENT AGREEMENT (Unaudited) *(continued)*

Comparative Analysis of the Fund's Performance and Management Fee and Expense Ratio. Dreyfus did not provide the Board with information comparing the fund's performance with the performance of a group of comparable funds because that information had been reviewed at the February Meeting. The Board reviewed reports prepared by Lipper, Inc. ("Lipper"), an independent provider of investment company data, which included information comparing the fund's actual and contractual management fees and total expenses with those of a group of comparable funds (the "Expense Group"), the information for which was derived in part from fund financial statements available to Lipper as of the date of its analysis. Dreyfus previously had furnished the Board with a description of the methodology Lipper used to select the Expense Group.

The Board reviewed the range of actual and contractual management fees and total expenses of the Expense Group funds and discussed the results of the comparisons. The Board noted that the fund's contractual management fee was below the Expense Group average and median (based on both net assets and Managed Assets). The Board also noted that the fund's actual management fee was above the Expense Group average and median (based on net assets) and between the Expense Group average and median (based on Managed Assets). They also noted that the fund's total expense ratio, which was provided by Lipper and included investment-related expenses such as costs associated with the fund's leverage, was above the Expense Group average and median (based on net assets) and slightly above the Expense Group average and median (based on Managed Assets). The Board noted that Dreyfus had previously agreed to waive receipt of a portion of the fund's management fee, until September 30, 2014, in the amount of 0.15% of the value of the fund's Managed Assets, which had reduced the fund's effective management to the proposed lower contractual fee. The Board noted that the waiver would be removed if it approved the

Agreement. The Board considered that though the amendment would not reduce the effective management fee payable by the fund to Dreyfus or the fund's expense ratio, the amendment would provide more certainty to investors as to what fees the fund may incur in the future as opposed to simply continuing with the waiver.

Dreyfus did not provide the Board with the management or investment advisory fees (1) paid by funds advised or administered by Dreyfus that are in the same Lipper category as the fund and (2) paid to Dreyfus or its affiliates for advising any separate accounts and/or other types of client portfolios that are considered to have similar investment strategies and policies as the fund because this information had been reviewed at the February Meeting.

Analysis of Profitability and Economies of Scale. The Board had considered profitability, economies of scale and the potential benefits to Dreyfus at the February Meeting. Dreyfus representatives noted that the amendment would result in a reduction in Dreyfus' contractual fee equal to the waiver that had previously been in place (and therefore not impact profitability and economies of scale) and that potential benefits would not change materially as a result of the amendment from those considered at the February Meeting.

At the conclusion of these discussions, the Board agreed that it had been furnished with sufficient information to make an informed business decision with respect to amendment of the Agreement. Based on the discussions and considerations as described above, the Board concluded and determined as follows.

- The Board concluded that the nature, extent and quality of the services to be provided by Dreyfus continue to be adequate and appropriate.
- The Board concluded that the fee to be paid to Dreyfus continues to be reasonable in light of the considerations described above.

INFORMATION ABOUT THE RENEWAL OF THE FUND'S
MANAGEMENT AGREEMENT (Unaudited) *(continued)*

In evaluating the Agreement, the Board considered these conclusions and determinations and also relied on its previous knowledge, gained through meetings and other interactions with Dreyfus and its affiliates, of the fund and the services provided to the fund by Dreyfus. The Board also relied on information received on a routine and regular basis throughout the year relating to the operations of the fund and the investment management and other services provided under the Agreement, including information on the investment performance of the fund in comparison to similar funds and benchmark performance indices; general market outlook as applicable to the fund; and compliance reports. In addition, the Board's consideration of the contractual fee arrangements for this fund had the benefit of a number of years of reviews of prior or similar agreements during which lengthy discussions took place between the Board and Dreyfus representatives. The Board determined to approve amendment of the Agreement.

ADDITIONAL INFORMATION (Unaudited)

Other Matters

Shareholders should also take note of the following information about certain risks of investing in the fund.

Fixed-income market risk. The market value of a fixed-income security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The fixed-income securities market can be susceptible to increases in volatility and decreases in liquidity. Liquidity can decline unpredictably in response to overall economic conditions or credit tightening. Increases in volatility and decreases in liquidity may be caused by a rise in interest rates (or the expectation of a rise in interest rates), which are at or near historic lows in the United States and in other countries. During periods of reduced market liquidity, the fund may not be able to readily sell fixed-income securities at prices at or near their perceived value. Economic and other market developments can adversely affect fixed-income securities markets. Regulations and business practices, for example, have led some financial intermediaries to curtail their capacity to engage in trading (i.e., “market making”) activities for certain fixed-income securities, which could have the potential to decrease liquidity and increase volatility in the fixed-income securities markets. Policy and legislative changes worldwide are affecting many aspects of financial regulation. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.

Issuer risk. A security’s market value may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer’s products or services, or factors that affect the issuer’s industry, such as labor shortages or increased production costs and competitive conditions within an industry.

ADDITIONAL INFORMATION (Unaudited) *(continued)*

Interest rate risk. Prices of bonds and other fixed-income securities tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect fixed-income securities and, accordingly, will cause the value of the fund's investments in these securities to decline. During periods of very low interest rates, which occur from time to time due to market forces or actions of governments and/or their central banks, including the Board of Governors of the Federal Reserve System in the U.S., the fund may be subject to a greater risk of principal decline from rising interest rates. When interest rates fall, the values of already-issued fixed-income securities generally rise. However, when interest rates fall, the fund's investments in new securities may be at lower yields and may reduce the fund's income. The magnitude of these fluctuations in the market price of fixed-income securities is generally greater for securities with longer effective maturities and durations because such instruments do not mature, reset interest rates or become callable for longer periods of time. The change in the value of a fixed-income security or portfolio can be approximated by multiplying its duration by a change in interest rates. For example, the market price of a fixed-income security with a duration of three years would be expected to decline 3% if interest rates rose 1%. Conversely, the market price of the same security would be expected to increase 3% if interest rates fell 1%. Risks associated with rising interest rates are heightened given that interest rates in the United States and other countries are at or near historic lows. Unlike investment grade bonds, however, the prices of high yield bonds may fluctuate unpredictably and not necessarily inversely with changes in interest rates. Interest rate changes may have different effects on the values of mortgage-related securities because of prepayment and extension risks.

Liquidity risk. When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities in a timely manner at or near their perceived value. In such a market, the value of such securities and the fund's net asset value per share of Common Stock may fall dramatically, even during periods of declining interest rates. Investments that are illiquid or that trade in lower volumes may be more difficult to value. The market for below investment grade securities may be less liquid and therefore these securities may be harder to value or sell at an acceptable price, especially during times of market volatility or decline. Investments in foreign securities, particularly those of issuers located in emerging markets, tend to have greater exposure to liquidity risk than domestic securities.

SUPPLEMENTAL INFORMATION (Unaudited)

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Products and Performance. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

OFFICERS AND TRUSTEES

Dreyfus High Yield Strategies Fund

200 Park Avenue

New York, NY 10166

The fund's net asset value per share appears in the following publications: Barron's, Closed-End Bond Funds section under the heading "Bond Funds" every Monday; Wall Street Journal, Mutual Funds section under the heading "Closed-End Bond Funds" every Monday.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that the fund may purchase shares of its common stock in the open market when it can do so at prices below the then current net asset value per share.
