As used in this reoffer prospectus, the terms we, us, our and Alkaline refer to The Alkaline Water Company Inc., a Nevada corporation, and its wholly-owned subsidiary, Alkaline Water Corp., and Alkaline Water Corp.'s wholly-owned subsidiary, Alkaline 88, LLC, unless otherwise specified. All dollar amounts refer to U.S. dollars unless otherwise indicated.

Prospectus Summary

Our Business

Our company offers retail consumers bottled alkaline water in three-liter and one-gallon and 700 ml volumes through our brand Alkaline88. Our product is produced through an electrolysis process that uses specialized electronic cells coated with a variety of rare earth minerals to produce our 8.8 pH drinking water without the use of any chemicals. Our product also incorporates 84 trace Himalayan salts.

The main reason consumers drink our product is for the perceived benefit that a proper pH balance helps fight disease and boosts the immune system and the perception that alkaline water helps to maintain a proper body pH and keeps cells young and hydrated.

Alkaline 88, LLC, our operating subsidiary, operates primarily as a marketing and distribution company. Alkaline 88, LLC has entered into exclusive arrangements with Water Engineering Solutions LLC, an entity that is controlled and owned by our President, Chief Executive Officer, director and major stockholder, Steven P. Nickolas, and our Vice-President, Secretary, Treasurer and director, Richard A. Wright, for the manufacture and production of our alkaline generating electrolysis system machines. Alkaline 88, LLC has entered into one-year agreement(s) with, White Water, LLC, Brookshire's Grocery Company and UNIX Packaging, Inc to act as our initial co-packers. Our branding is being coordinated through 602 Design, LLC and our component materials are readily available through multiple vendors. Our principal suppliers are Plastipack Packaging and Polyplastics Co.

Sample production and testing of our product began in late 2012. We have currently established one contract manufacturing facility in Phoenix, Arizona, one in Tyler, Texas and one in Montebello, California. We plan to establish other key manufacturing facilities throughout the United States to support the national distribution of our product.

Our product is currently at the introduction and expansion phase of its lifecycle. In March 2012 Alkaline 88, LLC did market research on the demand for a bulk alkaline product at the Natural Product Expo West in Anaheim, California. In January 2013, we began the formal launching of our product in Southern California and Arizona. Since then, we have begun to deliver product through approximately 8,500 retail outlets throughout the United States. We are presently in 49 States and the District of Columbia. Although over 40% of our current sales are concentrated in the Southwest and Texas. We have distribution agreements with large national distributors (UNFI, KeHe, Tree of Life, Natures Best and C&S Distributors representing over 100,000 retail establishments). Our current stores include convenience stores, natural food products stores, large ethnic markets and national retailers. Currently, we sell all of our products to our retailers through brokers and distributors. Our larger retail clients bring the water in through their own warehouse distribution network. Our current retail clients are made up of a variety of the following: convenience stores, including 7-11's; large national retailers, including Albertson's, Fry's and Smith's (both Kroger companies), and regional grocery chains such as Schnucks, Smart & Final and Jewel-Osco, Sprouts, Bashas, Bristol Farms, Vallarta, Superior Foods, Brookshire's and other companies throughout the United States.

In April 2014 we entered into an exclusive territorial distribution agreement with Kalil Bottling Co. on a new single serve 700ml Bottle with a sport cap. This exclusivity is in Arizona and other areas in the Southwestern United States. Kalil Bottling Co. is a direct to store distributor (DSD) and we plan to expand the use of DSD's for our single serving packaging through the remainder of 2014.

In order to continue our expansion, we anticipate that we will be required, in most cases, to continue to give promotional deals throughout 2014 and in subsequent years on a quarterly basis ranging from a 5%-15% discount similar to all other beverage company promotional programs. It has been our experience that most of the retailers have requested some type of promotional introductory program which has included either a \$0.25 -\$0.50 per unit discount on an initial order; a buy one get one free program; or a free-fill program which includes 1-2 cases of free product per store location. Slotting has only been presented and negotiated in the larger national grocery chains and, in most cases, is offset by product sales. Our slotting fees with our current national retailers do not exceed \$200,000 in the aggregate and are offset through product sales. In addition we participate in promotional activities of our distributors, these fees are not in excess of \$200,000 and are offset through product sales.

We have not yet established an ongoing source of revenues sufficient to cover our operating costs and to allow us to continue as a going concern. As of September 30, 2014, we had an accumulated deficit of \$9,227,170. Our ability to continue as a going concern is dependent on our company obtaining adequate capital to fund operating losses until we become profitable. If we are unable to obtain adequate capital, we could be forced to significantly curtail or cease operations. In its report on our financial statements for the year ended March 31, 2014, our independent registered public accounting firm included an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern. Our financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The principal offices of our company are located at 7730 E Greenway Road, Ste. 203, Scottsdale, AZ 85260. Our telephone number is (480) 656-2423.

The Offering

The selling stockholders identified in this reoffer prospectus may offer and sell up to 13,200,000 shares of our common stock issuable upon exercise of stock options. We granted the stock options to such selling stockholders pursuant to our 2013 Equity Incentive Plan.

The selling stockholders may sell all or a portion of the shares being offered pursuant to this reoffer prospectus at fixed prices, at prevailing market prices at the time of sale, at varying prices or at negotiated prices.

Number of Shares Outstanding

As of December 10, 2014, there were 118,170,825 shares of our common stock issued and outstanding and 20,000,000 shares of Series A Preferred Stock issued and outstanding.

Use of Proceeds

We will not receive any proceeds from the sale of any shares of our common stock by the selling stockholders. We may, however, receive proceeds upon exercise of the stock options by the selling stockholders. If we receive proceeds upon exercise of these stock options, we intend to use these proceeds for working capital and general corporate purposes.

Risk Factors

An investment in our common stock involves a high degree of risk. The risks described below include material risks to our company or to investors purchasing shares of our common stock that are known to our company. If any of the following risks actually occur, our business, financial condition and results of operations could be materially harmed. As a result, the trading price of our common stock could decline and you might lose all or part of your investment. When determining whether to buy our common stock, you should also refer to the other information contained in or incorporated by reference in this reoffer prospectus.

Risks Related to Our Business

Because we have a limited operating history, our ability to fully and successfully develop our business is unknown.

We were incorporated in June 6, 2011, and we have only recently begun producing and distributing alkaline bottled water, and we have a limited operating history from which investors can evaluate our business. Our ability to successfully develop our products, and to realize consistent, meaningful revenues and profit has not been established and cannot be assured. We have not generated any significant revenues and do not expect to do so in the near future. For us to achieve success, our products must receive broad market acceptance by consumers. Without this market

acceptance, we will not be able to generate sufficient revenue to continue our business operation. If our products are not widely accepted by the market, our business may fail.

Our ability to achieve and maintain profitability and positive cash flow is dependent upon our ability to generate revenues, manage development costs and expenses, and compete successfully with our direct and indirect competitors. We anticipate operating losses in upcoming future periods. This will occur because there are expenses associated with the development, production, marketing, and sales of our product. As a result, we may not generate significant revenues in the future. Failure to generate significant revenues in the near future may cause us to suspend or cease activities.

Our independent registered public accounting firm has expressed substantial doubt about our ability to continue as a going concern.

Our financial statements are prepared using generally accepted accounting principles in the United States of America applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. We have not yet established an ongoing source of revenues sufficient to cover our operating costs and to allow us to continue as a going concern. As of September 30, 2014, we had an accumulated deficit of \$9,227,170. Our ability to continue as a going concern is dependent on our company obtaining adequate capital to fund operating losses until we become profitable. If we are unable to obtain adequate capital, we could be forced to significantly curtail or cease operations. In its report on the financial statements for the year ended March 31, 2014, our independent registered public accounting firm included an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern. Our financial statements do not include any adjustments that might result from the outcome of this uncertainty.

We will need additional funds to produce, market, and distribute our product.

We will have to spend additional funds to produce, market and distribute our product. If we cannot raise sufficient capital, we may have to cease operations and you could lose your investment. We will need additional funds to produce our product for distribution to our target market. Even after we have produced our product, we will have to spend substantial funds on distribution, marketing and sales efforts before we will know if we have commercially viable and marketable/sellable products.

There is no guarantee that sufficient sale levels will be achieved.

There is no guarantee that the expenditure of money on distribution and marketing efforts will translate into sufficient sales to cover our expenses and result in profits. Consequently, there is a risk that you may lose all of your investment.

Our development, marketing, and sales activities are limited by our size.

Because we are small and do not have much capital, we must limit our product development, marketing, and sales activities. As such we may not be able to complete our production and business development program in a manner that is as thorough as we would like. We may not ever generate sufficient revenues to cover our operating and expansion costs and you may, therefore, lose your entire investment.

Changes in the non-alcoholic beverage business environment and retail landscape could adversely impact our financial results.

The non-alcoholic beverage business environment is rapidly evolving as a result of, among other things, changes in consumer preferences, including changes based on health and nutrition considerations and obesity concerns; shifting consumer tastes and needs; changes in consumer lifestyles; and competitive product and pricing pressures. In addition, the non-alcoholic beverage retail landscape is very dynamic and constantly evolving, not only in emerging and developing markets, where modern trade is growing at a faster pace than traditional trade outlets, but also in developed markets, where discounters and value stores, as well as the volume of transactions through e-commerce, are growing at a rapid pace. If we are unable to successfully adapt to the rapidly changing environment and retail

landscape, our share of sales, volume growth and overall financial results could be negatively affected.

Intense competition and increasing competition in the commercial beverage market could hurt our business.

The commercial retail beverage industry, and in particular its non-alcoholic beverage segment, is highly competitive. Market participants are of various sizes, with various market shares and geographical reach, some of whom have access to substantially more sources of capital.

We compete generally with all liquid refreshments, including bottled water and numerous specialty beverages, such as: SoBe; Snapple; Arizona; Vitamin Water; Gatorade; and Powerade.

We compete indirectly with major international beverage companies including but not limited to: the Coca-Cola Company; PepsiCo, Inc.; Nestlé; Dr Pepper Snapple Group; Groupe Danone; Kraft Foods Group, Inc.; and Unilever. These companies have established market presence in the United States, and offer a variety of beverages that are substitutes to our product. We face potential direct competition from such companies, because they have the financial resources, and access to manufacturing and distribution channels to rapidly enter the alkaline water market.

We compete directly with other alkaline water producers and brands focused on the emerging alkaline beverage market including: Eternal; Essentia; Icelandic; Real Water; Aqua Hydrate; Mountain Valley; Qure; Penta; and Alka Power. These companies could bolster their position in the alkaline water market through additional expenditure and promotion.

As a result of both direct and indirect competition, our ability to successfully distribute, market and sell our product, and to gain sufficient market share in the United States to realize profits may be limited, greatly diminished, or totally diminished, which may lead to partial or total loss of your investments in our company.

Alternative non-commercial beverages or processes could hurt our business.

The availability of non-commercial beverages, such as tap water, and machines capable of producing alkaline water at the consumer's home or at store-fronts could hurt our business, market share, and profitability.

Expansion of the alkaline beverage market or sufficiency of consumer demand in that market for operations to be profitable are not guaranteed.

The alkaline water market is an emerging market and there is no guarantee that this market will expand or that consumer demand will be sufficiently high to allow our company to successfully market, distribute and sell our product, or to successfully compete with current or future competition, all of which may result in total loss of your investment.

Our growth and profitability depends on the performance of third-parties and our relationship with them.

Our distribution network and its success depend on the performance of third parties. Any non-performance or deficient performance by such parties may undermine our operations, profitability, and result in total loss to your investment. To distribute our product, we use a broker-distributor-retailer network whereby brokers represent our products to distributors and retailers who will in turn sell our product to consumers. The success of this network will depend on the performance of the brokers, distributors and retailers of this network. There is a risk that a broker, distributor, or retailer may refuse to or cease to market or carry our product. There is a risk that the mentioned entities may not adequately perform their functions within the network by, without limitation, failing to distribute to sufficient retailers or positioning our product in localities that may not be receptive to our product. Furthermore, such third-parties' financial position or market share may deteriorate, which could adversely affect our distribution, marketing and sale activities. We also need to maintain good commercial relationships with third-party brokers, distributors and retailers so that they will promote and carry our product. Any adverse consequences resulting from the performance of third-parties or our relationship with them could undermine our operations, profitability and may result in total loss of your investment.

The loss of one or more of our major customers or a decline in demand from one or more of these customers could harm our business.

We have 4 major customers that together account for 58% (17%, 16%, 13% and 12%, respectively) of accounts receivable at September 30, 2014, and 3 customers that together account for 39% (15%, 13% and 11%, respectively) of the total revenues earned for the six month period ended September 30, 2014. There can be no assurance that such customers will continue to order our products in the same level or at all. A reduction or delay in orders from such customers, including reductions or delays due to market, economic or competitive conditions, could have a material adverse effect on our business, operating results and financial condition.

Health benefits of alkaline water is not guaranteed or proven, rather it is perceived by consumers.

Health benefits of alkaline water are not guaranteed and have not been proven. There is a consumer perception that drinking alkaline water has beneficial health effects. Consequently, negative changes in consumers' perception of the benefits of alkaline water or negative publicity surrounding alkaline water may result in loss of market share or potential market share and hence loss of your investment.

Water scarcity and poor quality could negatively impact our production costs and capacity.

Water is the main ingredient in our product. It is also a limited resource, facing unprecedented challenges from overexploitation, increasing pollution, poor management, and climate change. As demand for water continues to increase, as water becomes scarcer, and as the quality of available water deteriorates, we may incur increasing production costs or face capacity constraints that could adversely affect our profitability or net operating revenues in the long run.

Increase in the cost, disruption of supply or shortage of ingredients, other raw materials or packaging materials could harm our business.

We and our bottlers will use water, 84 trace Himalayan salts, packaging materials for bottles such as plastic and paper products. The prices for these ingredients, other raw materials and packaging materials fluctuate depending on market conditions. Substantial increases in the prices of our or our bottlers' ingredients, other raw materials and packaging materials, to the extent they cannot be recouped through increases in the prices of finished beverage products, would increase our operating costs and could reduce our profitability. Increases in the prices of our finished products resulting from a higher cost of ingredients, other raw materials and packaging materials could affect the affordability of our product and reduce sales.

An increase in the cost, a sustained interruption in the supply, or a shortage of some of these ingredients, other raw materials, or packaging materials and containers that may be caused by a deterioration of our or our bottlers' relationships with suppliers; by supplier quality and reliability issues; or by events such as natural disasters, power outages, labor strikes, political uncertainties or governmental instability, or the like, could negatively impact our net revenues and profits.

Changes in laws and regulations relating to beverage containers and packaging could increase our costs and reduce demand for our products.

We and our bottlers intend to offer our product in nonrefillable, recyclable containers in the United States. Legal requirements have been enacted in various jurisdictions in the United States requiring that deposits or certain ecotaxes or fees be charged for the sale, marketing and use of certain nonrefillable beverage containers. Other proposals relating to beverage container deposits, recycling, ecotax and/or product stewardship have been introduced in various jurisdictions in the United States and overseas, and we anticipate that similar legislation or regulations may be proposed in the future at local, state and federal levels in the United States. Consumers' increased concerns and changing attitudes about solid waste streams and environmental responsibility and the related publicity could result in the adoption of such legislation or regulations. If these types of requirements are adopted and implemented on a large scale in the geographical regions in which we operate or intend to operate, they could affect our costs or require changes in our distribution model, which could reduce our net operating revenues or profitability.

Significant additional labeling or warning requirements or limitations on the availability of our product may inhibit sales of affected products.

Various jurisdictions may seek to adopt significant additional product labeling or warning requirements or limitations on the availability of our product relating to the content or perceived adverse health consequences of our product. If

these types of requirements become applicable to our product under current or future environmental or health laws or regulations, they may inhibit sales of our product.

Unfavorable general economic conditions in the United States could negatively impact our financial performance.

Unfavorable general economic conditions, such as a recession or economic slowdown, in the United States could negatively affect the affordability of, and consumer demand for, our product in the United States. Under difficult economic conditions, consumers may seek to reduce discretionary spending by forgoing purchases of our products or by shifting away from our beverages to lower-priced products offered by other companies, including non-alkaline water. Consumers may also cease purchasing bottled water and consume tap water. Lower consumer demand for our product in the United States could reduce our profitability.

Adverse weather conditions could reduce the demand for our products.

The sales of our products are influenced to some extent by weather conditions in the markets in which we operate. Unusually cold or rainy weather during the summer months may have a temporary effect on the demand for our product and contribute to lower sales, which could have an adverse effect on our results of operations for such periods.

Changes in, or failure to comply with, the laws and regulations applicable to our products or our business operations could increase our costs or reduce our net operating revenues.

The advertising, distribution, labeling, production, safety, sale, and transportation in the United States of our product will be subject to: the Federal Food, Drug, and Cosmetic Act; the Federal Trade Commission Act; the Lanham Act; state consumer protection laws; competition laws; federal, state, and local workplace health and safety laws, such as the Occupational Safety and Health Act; various federal, state and local environmental protection laws; and various other federal, state, and local statutes and regulations. Legal requirements also apply in many jurisdictions in the United States requiring that deposits or certain ecotaxes or fees be charged for the sale, marketing, and use of certain non-refillable beverage containers. The precise requirements imposed by these measures vary. Other types of statutes and regulations relating to beverage container deposits, recycling, ecotaxes and/or product stewardship also apply in various jurisdictions in the United States. We anticipate that additional, similar legal requirements may be proposed or enacted in the future at the local, state and federal levels in the United States. Changes to such laws and regulations could increase our costs or reduce our net operating revenues.

In addition, failure to comply with environmental, health or safety requirements and other applicable laws or regulations could result in the assessment of damages, the imposition of penalties, suspension of production, changes to equipment or processes, or a cessation of operations at our or our bottlers' facilities, as well as damage to our image and reputation, all of which could harm our profitability.

Our products are considered premium and healthy beverages and are being sold at premium prices compared to our competitors; we cannot provide any assurances as to consumers' continued market acceptance of our current and future products.

We will compete directly with other alkaline water producers and brands focused on the emerging alkaline beverage market including Eternal, Essentia, Icelandic, Real Water, Aqua Hydrate, Mountain Valley, Qure, Penta, and Alka Power. Products offered by our direct competitors are sold in various volumes and prices with prices ranging from approximately \$1.39 for a half-liter bottle to approximately \$2.99 for a one-liter bottle, and volumes ranging from half-liter bottles to one-and-a-half liter bottles. We currently offer our product in a three-liter bottle for a suggested retail price (SRP) of \$3.99 and one-gallon bottle for an SRP of \$4.99. Our competitors may introduce larger sizes and offer them at an SRP that is lower than our product. We can provide no assurances that consumers will continue to purchase our product or that they will not prefer to purchase a competitive product.

We rely on key executive officers, and their knowledge of our business would be difficult to replace.

We are highly dependent on our two executive officers, Steven P. Nickolas and Richard A. Wright. We do not have key person life insurance policies for any of our officers. The loss of management and industry expertise of any of our key executive officers could result in delays in product development, loss of any future customers and sales and diversion of management resources, which could adversely affect our operating results.

Our executive officers are not subject to supervision or review by an independent board or audit committee.

Our board of directors consists of Steven P. Nickolas and Richard A. Wright, our executive officers. Accordingly, we do not have any independent directors. Also we do not have an independent audit committee. As a result, the activities of our executive officers are not subject to the review and scrutiny of an independent board of directors or audit

committee.

Risk Related to Our Stock

Because Steven P. Nickolas controls a large percentage of our voting stock, he has the ability to influence matters affecting our stockholders.

Steven P. Nickolas, our President, Chief Executive Officer and director, exercises voting and dispositive power with respect to 43,000,000 shares of our common stock, which are beneficially owned by WiN Investments, LLC and Lifewater Industries, LLC, and owns 10,000,000 shares of Series A Preferred Stock, which has 10 votes per share upon any matter submitted to our stockholders for a vote. Accordingly, he controls a large percentage of the votes attached to our outstanding voting securities. As a result, he has the ability to influence matters affecting our stockholders, including the election of our directors, the acquisition or disposition of our assets, and the future issuance of our securities. Because he controls such large percentage of votes, investors may find it difficult to replace our management if they disagree with the way our business is being operated. Because the influence by Mr. Nickolas could result in management making decisions that are in the best interest of Mr. Nickolas and not in the best interest of the investors, you may lose some or all of the value of your investment in our common stock.

Because we can issue additional shares of common stock, our stockholders may experience dilution in the future.

We are authorized to issue up to 1,125,000,000 shares of common stock and 100,000,000 shares of preferred stock, of which 118,170,825 shares of common stock are issued and outstanding and 20,000,000 shares of Series A Preferred Stock are issued and outstanding as of December 10, 2014. Our board of directors has the authority to cause us to issue additional shares of common stock and preferred stock, and to determine the rights, preferences and privileges of shares of our preferred stock, without consent of our stockholders. Consequently, the stockholders may experience more dilution in their ownership of our stock in the future.

Trading on the OTCQB may be volatile and sporadic, which could depress the market price of our common stock and make it difficult for our stockholders to resell their shares.

Our common stock is quoted on the OTC Markets Group's OTCQB. Trading in stock quoted on the OTCQB is often thin and characterized by wide fluctuations in trading prices, due to many factors that may have little to do with our operations or business prospects. This volatility could depress the market price of our common stock for reasons unrelated to operating performance. Moreover, the OTCQB is not a stock exchange, and trading of securities on the OTCQB is often more sporadic than the trading of securities listed on a national securities exchange like the NASDAQ or the NYSE. Accordingly, stockholders may have difficulty reselling any of our shares.

A decline in the price of our common stock could affect our ability to raise further working capital, it may adversely impact our ability to continue operations and we may go out of business.

A prolonged decline in the price of our common stock could result in a reduction in the liquidity of our common stock and a reduction in our ability to raise capital. Because we plan to acquire a significant portion of the funds we need in order to conduct our planned operations through the sale of equity securities, a decline in the price of our common stock could be detrimental to our liquidity and our operations because the decline may cause investors not to choose to invest in our stock. If we are unable to raise the funds we require for all our planned operations, we may be forced to reallocate funds from other planned uses and may suffer a significant negative effect on our business plan and operations, including our ability to develop new products and continue our current operations. As a result, our business may suffer, and not be successful and we may go out of business. We also might not be able to meet our financial obligations if we cannot raise enough funds through the sale of our equity securities and we may be forced to go out of business.

Because we do not intend to pay any cash dividends on our shares of common stock in the near future, our stockholders will not be able to receive a return on their shares unless they sell them.

We intend to retain any future earnings to finance the development and expansion of our business. We do not anticipate paying any cash dividends on our common stock in the near future. The declaration, payment and amount of any future dividends will be made at the discretion of the board of directors, and will depend upon, among other things, the results of operations, cash flows and financial condition, operating and capital requirements, and other factors as the board of directors considers relevant. There is no assurance that future dividends will be paid, and if dividends are paid, there is no assurance with respect to the amount of any such dividend. Unless we pay dividends, our stockholders will not be able to receive a return on their shares unless they sell them.

Our stock is a penny stock. Trading of our stock may be restricted by the SEC's penny stock regulations, which may limit a stockholder's ability to buy and sell our stock.

Our stock is a penny stock. The Securities and Exchange Commission (**SEC**) has adopted Rule 15c-9 which generally defines "penny stock" to be any equity security that has a market price (as defined in Rule 15c-9) less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exceptions. Our securities are covered by the penny stock rules, which impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and "accredited investors". The term "accredited investor" refers generally to institutions with assets in excess of \$5,000,000 or individuals with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC, which provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability of broker-dealers to trade our securities. We believe that the penny stock rules discourage investor interest in and limit the marketability of our common stock.

FINRA sales practice requirements may also limit a stockholder's ability to buy and sell our stock.

In addition to the "penny stock" rules promulgated by the SEC, the Financial Industry Regulatory Authority (**FINRA**) has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, the FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock.

Forward-Looking Statements

This reoffer prospectus contains forward-looking statements. Forward-looking statements are projections in respect of future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may", "should", "intend", "expect", "plan", "anticipate", "believe", "estimate", "predict", "potential", or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, including the risks in the section entitled "Risk Factors", uncertainties and other factors, which may cause our company's or our industry's actual results, levels of activity or performance to be materially different from any future results, levels of activity or performance expressed or implied by these forward-looking statements. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity or performance. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

The Offering

The selling stockholders identified in this reoffer prospectus may offer and sell up to 13,200,000 shares of our common stock issuable upon exercise of stock options. We granted the stock options to such selling stockholders pursuant to our 2013 Equity Incentive Plan.

Use of Proceeds

We will not receive any proceeds from the sale of the shares of our common stock by the selling stockholders. We may, however, receive proceeds upon exercise of the stock options granted to the selling stockholders. If we receive proceeds upon exercise of stock options, we intend to use these proceeds for working capital and general corporate purposes.

Determination of Offering Price

The selling stockholders may sell all or a portion of the shares being offered pursuant to this reoffer prospectus at fixed prices, at prevailing market prices at the time of sale, at varying prices or at negotiated prices.

Selling Stockholders

The selling stockholders may offer and sell, from time to time, any or all of shares of our common stock issuable upon exercise of the stock options granted pursuant to our 2013 Equity Incentive Plan.

The following table identifies the selling stockholders and indicates (i) the nature of any material relationship that such selling stockholder has had with us for the past three years, (ii) the number of shares of our common stock held by the selling stockholders, (iii) the amount to be offered for each of the selling stockholder's account, and (iv) the number of shares of our common stock and percentage of outstanding shares of our common stock to be owned by each selling stockholder after the sale of the shares of our common stock offered by them pursuant to this offering. The selling stockholders are not obligated to sell the shares offered in this reoffer prospectus and may choose not to sell any of the shares or only a part of the shares that they receive.

The information provided in the following table with respect to the selling stockholders has been obtained from each of the selling stockholders. Because the selling stockholders may offer and sell all or only some portion of the shares of our common stock being offered pursuant to this reoffer prospectus, the numbers in the table below representing the amount and percentage of these shares of our common stock that will be held by the selling stockholders upon termination of the offering are only estimates based on the assumption that each selling stockholder will sell all of his or her shares of our common stock being offered in the offering. In addition, the selling stockholders may have sold, transferred or otherwise disposed of, or may sell, transfer or otherwise dispose of, at any time or from time to time since the date on which he or she provided the information regarding the shares of common stock beneficially owned by them, all or some portion of the shares of common stock beneficially owned by them in transactions exempt from the registration requirements of the Securities Act of 1933.

None of the selling stockholders is a broker-dealer or an affiliate of a broker-dealer. We may require the selling stockholders to suspend the sales of the shares of our common stock being offered pursuant to this reoffer prospectus upon the occurrence of any event that makes any statement in this reoffer prospectus or the related registration statement untrue in any material respect or that requires the changing of statements in those documents in order to make statements in those documents not misleading.

Plan of Distribution

The selling stockholders may, from time to time, sell all or a portion of the shares of our common stock on any market upon which our common stock may be listed or quoted (currently the OTC Markets Group's OTCQB), in privately negotiated transactions or otherwise. Such sales may be at fixed prices prevailing at the time of sale, at prices related to the market prices or at negotiated prices. The shares of our common stock being offered for resale pursuant to this reoffer prospectus may be sold by the selling stockholders by one or more of the following methods, without limitation:

- 1. block trades in which the broker or dealer so engaged will attempt to sell the shares of our common stock as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- 2. purchases by broker or dealer as principal and resale by the broker or dealer for its account pursuant to this reoffer prospectus;
- 3. an exchange distribution in accordance with the rules of the applicable exchange or quotation system;
- 4. ordinary brokerage transactions and transactions in which the broker solicits purchasers;
- 5. privately negotiated transactions;
- 6. market sales (both long and short to the extent permitted under the federal securities laws);
- 7. at the market to or through market makers or into an existing market for the shares;
- 8. through transactions in options, swaps or other derivatives (whether exchange listed or otherwise);
- 9. a combination of any aforementioned methods of sale; and
- 10. Any other method permitted pursuant to applicable law.

In effecting sales, brokers and dealers engaged by the selling stockholders may arrange for other brokers or dealers to participate. Brokers or dealers may receive commissions or discounts from a selling stockholder or, if any of the broker-dealers act as an agent for the purchaser of such shares, from a purchaser in amounts to be negotiated which are not expected to exceed those customary in the types of transactions involved. Broker-dealers may agree with a selling stockholder to sell a specified number of the shares of our common stock at a stipulated price per share. Such an agreement may also require the broker-dealer to purchase as principal any unsold shares of our common stock at the price required to fulfill the broker-dealer commitment to the selling stockholder if such broker-dealer is unable to sell the shares on behalf of the selling stockholder. Broker-dealers who acquire shares of our common stock as principal may thereafter resell the shares of our common stock from time to time in transactions which may involve block transactions and sales to and through other broker-dealers, including transactions of the nature described above. Such sales by a broker-dealer could be at prices and on terms then prevailing at the time of sale, at prices related to the then-current market price or in negotiated transactions. In connection with such resale, the broker-dealer may pay to or receive from the purchasers of the shares commissions as described above.

The selling stockholders and any broker-dealers or agents that participate with the selling stockholders in the sale of the shares of our common stock may be deemed to be underwriters within the meaning of the Securities Act of 1933 in connection with these sales. In that event, any commissions received by the broker-dealers or agents and any profit on the resale of the shares of common stock purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act of 1933.

From time to time, any of the selling stockholders may pledge shares of our common stock pursuant to the margin provisions of customer agreements with brokers. Upon a default by a selling stockholder, his or her broker may offer and sell the pledged shares of our common stock from time to time. Upon a sale of the shares of our common stock, we believe that the selling stockholders will satisfy the prospectus delivery requirements under the Securities Act of 1933. We intend to file any amendments or other necessary documents in compliance with the Securities Act of 1933 which may be required in the event any of the selling stockholders defaults under any customer agreement with brokers.

To the extent required under the Securities Act of 1933, a post-effective amendment to the registration statement of which this reoffer prospectus forms a part will be filed disclosing the name of any broker-dealers, the number of shares of our common stock involved, the price at which our common stock is to be sold, the commissions paid or discounts or concessions allowed to such broker-dealers, where applicable, that such broker-dealers did not conduct any investigation to verify the information set out or incorporated by reference in this reoffer prospectus and other facts material to the transaction.

We and the selling stockholders will be subject to applicable provisions of the Securities Exchange Act of 1934 and the rules and regulations under it, including, without limitation, Rule 10b-5 and, insofar as a selling stockholder is a distribution participant and we, under certain circumstances, may be a distribution participant, under Regulation M. All of the foregoing may affect the marketability of our common stock.

All expenses for this reoffer prospectus and related registration statement including legal, accounting, printing and mailing fees are and will be borne by us. Any commissions, discounts or other fees payable to brokers or dealers in connection with any sale of the shares of common stock will be borne by the selling stockholders, the purchasers participating in such transaction, or both.

Any shares of our common stock being offered pursuant to this reoffer prospectus which qualify for sale pursuant to Rule 144 under the Securities Act of 1933, may be sold under Rule 144 rather than pursuant to this reoffer prospectus.

Under the Securities Exchange Act of 1934, any person engaged in a distribution of the shares offered by this reoffer prospectus may not simultaneously engage in market making activities with respect to our common shares during the applicable cooling off periods prior to the commencement of such distribution. In addition, and without limiting the foregoing, the selling stockholders will be subject to applicable provisions of the Securities Exchange Act of 1934 and the rules and regulations thereunder, which provisions may limit the timing of purchases and sales of the shares by the selling stockholders.

Item 6. Indemnification of Directors and Officers.

The Nevada Revised Statutes provide that:

a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, except an action by or in the right of the corporation, by reason of the fact that he is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and

reasonably incurred by him in connection with the action, suit or proceeding if he or she acted in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful;

a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor by reason of the fact that he or she is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses, including amounts paid in settlement and attorneys' fees actually and reasonably incurred by him or her in connection with the defense or settlement of the action or suit if he or she acted in good faith and in a manner which he or she reasonably believed to be in or not opposed to the best interests of the corporation. Indemnification may not be made for any claim, issue or matter as to which such a person has been adjudged by a court of competent jurisdiction, after exhaustion of all appeals therefrom, to be liable to the corporation or for amounts paid in settlement to the corporation, unless and only to the extent that the court in which the action or suit was brought or other court of competent jurisdiction determines upon application that in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnity for such expenses as the court deems proper; and

to the extent that a director, officer, employee or agent of a corporation has been successful on the merits or otherwise in defense of any action, suit or proceeding, or in defense of any claim, issue or matter therein, the corporation must indemnify him or her against expenses, including attorneys' fees, actually and reasonably incurred by him or her in connection with the defense.

The Nevada Revised Statutes provide that we may make any discretionary indemnification only as authorized in the specific case upon a determination that indemnification of the director, officer, employee or agent is proper in the circumstances. The determination must be made:

by our stockholders;

by our board of directors by majority vote of a quorum consisting of directors who were not parties to the action, suit or proceeding;

if a majority vote of a quorum consisting of directors who were not parties to the action, suit or proceeding so orders, by independent legal counsel in a written opinion;

if a quorum consisting of directors who were not parties to the action, suit or proceeding cannot be obtained, by independent legal counsel in a written opinion; or

by court order.

Our bylaws provide for the mandatory indemnification of our directors and officers to the fullest extent legally permissible under the Nevada Revised Statutes from time to time against all expenses, liability and loss reasonably incurred or suffered by such person in connection with he or she having been or being a party to, threatening to be made a party to, or involved in any action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he or she is or was a director or an officer of the company. Advance payment of expenses by the company to such director or officer, as these expenses are incurred in defending a civil or criminal action, suit or proceeding, are subject to an undertaking by or on behalf of the director or officer to repay the amount of such payment if it is ultimately determined by a court of competent jurisdiction that he or she is not entitled to be indemnified by our company. The right of indemnification under our bylaws is not exclusive of any other right to indemnification a director or an officer may have.

Our bylaws allow us to purchase and maintain insurance on behalf of any person who is or was a director or officer of our company against any liability asserted against such person and incurred in any such capacity or arising out of such status, whether or not we would have the power to indemnify such person. We have not purchased such insurance.

Item 9. Undertakings.

The undersigned registrant hereby undertakes:

1. to file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

i. to include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

ii. to reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the Calculation of Registration Fee table in the effective registration statement; and

iii. to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

provided, however, that paragraphs (1)(i) and (1)(ii) do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the Securities and Exchange Commission by the registrant pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in the registration statement;

2. that, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof; and

3. to remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

The undersigned registrant hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the registrant's annual report pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the registrant certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form S-8 and has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Scottsdale, State of Arizona on December 10, 2014.
