Table of Contents

AGILENT TECHNOLOGIES, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. OVERVIEW, BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Overview. Agilent Technologies, Inc. ("we", "Agilent" or the "company"), incorporated in Delaware in May 1999, is a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow.

Our fiscal year-end is October 31, and our fiscal quarters end on January 31, April 30 and July 31. Unless otherwise stated, these dates refer to our fiscal year and fiscal quarters.

Basis of Presentation. We have prepared the accompanying financial data for the three months ended January 31, 2017 and 2016 pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles ("GAAP") in the U.S. have been condensed or omitted pursuant to such rules and regulations. The October 31, 2016 condensed balance sheet data was derived from audited financial statements but does not include all the disclosures required in audited financial statements by U.S. GAAP. The accompanying financial data and information should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended October 31, 2016.

In the opinion of management, the accompanying condensed consolidated financial statements contain all normal and recurring adjustments necessary for a fair statement of our condensed consolidated balance sheet as of January 31, 2017 and October 31, 2016, condensed consolidated statement of comprehensive income (loss) for the three months ended January 31, 2017 and 2016, condensed consolidated statement of operations for the three months ended January 31, 2017 and 2016, and condensed consolidated statement of cash flows for the three months ended January 31, 2017 and 2016.

Use of Estimates. The preparation of condensed consolidated financial statements in accordance with GAAP in the U.S. requires management to make estimates and assumptions that affect the amounts reported in our condensed consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, inventory valuation, share-based compensation, retirement and post-retirement benefit plan assumptions, goodwill and purchased intangible assets and accounting for income taxes.

Retirement of Treasury Shares. Upon the formal retirement of treasury shares, we deduct the par value of the retired treasury shares from common stock and allocate the excess of cost over par as a deduction between additional paid-in capital and retained earnings. All retired treasury shares revert to the status of authorized but unissued shares.

Variable Interest Entities. We make a determination upon entering into an arrangement whether an entity in which we have made an investment is considered a Variable Interest Entity ("VIE"). The company evaluates its investments in privately held companies on an ongoing basis. We have determined that as of January 31, 2017 there were no VIE's required to be consolidated in the company's consolidated financial statements because we do not have a controlling financial interest in any of the VIE's that we have invested in nor are we the primary beneficiary. We account for these investments under either the equity or cost method, depending on the circumstances. We periodically reassess whether

we are the primary beneficiary of a VIE. The reassessment process considers whether we have acquired the power to direct the most significant activities of the VIE through changes in governing documents or other circumstances. We also reconsider whether entities previously determined not to be VIEs have become VIEs, based on changes in facts and circumstances including changes in contractual arrangements and capital structure. As of January 31, 2017, the carrying value of our investment in a VIE was \$80 million with a maximum exposure of \$80 million. The investments are included on the long term investments line of the condensed consolidated balance sheet.

Fair Value of Financial Instruments. The carrying values of certain of our financial instruments including cash and cash equivalents, accounts receivable, accounts payable, accrued compensation and other accrued liabilities approximate fair value because of their short maturities. The fair value of long-term equity investments is determined using quoted market prices for those securities when available. For those long-term equity investments accounted for under the cost or equity method, their carrying value approximates their estimated fair value. Equity method investments are reported at the amount of the company's initial investment and adjusted each period for the company's share of the investee's income or loss and dividend paid. There are no equity method investments as of January 31, 2017. The fair value of our long-term debt, calculated from quoted prices which

AGILENT TECHNOLOGIES, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

are primarily Level 1 inputs under the accounting guidance fair value hierarchy, exceeds the carrying value by approximately \$154 million and \$104 million as of January 31, 2017 and October 31, 2016, respectively. The change in the excess of fair value over carrying value in the three months ended January 31, 2017 is due to fluctuations in market interest rates. The carrying value as of October 31, 2016 reflects the new accounting guidance related to the presentation of debt issuance costs which we adopted on November 1, 2016. The fair value of foreign currency contracts used for hedging purposes is estimated internally by using inputs tied to active markets. These inputs, for example, interest rate yield curves, foreign exchange rates, and forward and spot prices for currencies are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities. See also Note 8, "Fair Value Measurements" for additional information on the fair value of financial instruments.

Goodwill and Purchased Intangible Assets. Under the authoritative guidance we have the option to perform a qualitative assessment to determine whether further impairment testing is necessary. The accounting standard gives an entity the option to first assess qualitative factors to determine whether performing the two-step test is necessary. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not (i.e. greater than 50% chance) that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test will be required. Otherwise, no further testing will be required.

The guidance includes examples of events and circumstances that might indicate that a reporting unit's fair value is less than its carrying amount. These include macro-economic conditions such as deterioration in the entity's operating environment or industry or market considerations; entity-specific events such as increasing costs, declining financial performance, or loss of key personnel; or other events such as an expectation that a reporting unit will be sold or a sustained decrease in the stock price on either an absolute basis or relative to peers.

If it is determined, as a result of the qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the provisions of authoritative guidance require that we perform a two-step impairment test on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. The second step (if necessary) measures the amount of impairment by applying fair-value-based tests to the individual assets and liabilities within each reporting unit. As defined in the authoritative guidance, a reporting unit is an operating segment, or one level below an operating segment. We aggregate components of an operating segment that have similar economic characteristics into our reporting units.

In fiscal year 2016, we assessed goodwill impairment for our three reporting units which consisted of three segments: life sciences and applied markets, diagnostics and genomics and Agilent CrossLab. We performed a qualitative test for goodwill impairment of the three reporting units, as of September 30, 2016. Based on the results of our qualitative testing, we believe that it is more-likely-than-not- that the fair value of these reporting units are greater than their respective carrying values. Each quarter we review the events and circumstances to determine if goodwill impairment is indicated. There was no impairment of goodwill during the three months ended January 31, 2017 and 2016.

Purchased intangible assets consist primarily of acquired developed technologies, proprietary know-how, trademarks, and customer relationships and are amortized using the best estimate of the asset's useful life that reflect the pattern in which the economic benefits are consumed or used up or a straight-line method ranging from 6 months to 15 years. In-process research and development ("IPR&D") is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When the IPR&D project is complete, it is reclassified as an amortizable purchased intangible asset and is amortized over its estimated useful life. If an IPR&D project is abandoned, Agilent will record a charge for the value of the related intangible asset to Agilent's condensed consolidated statement of operations in the period it is abandoned.

Agilent's indefinite-lived intangible assets are IPR&D intangible assets. The accounting guidance allows a qualitative approach for testing indefinite-lived intangible assets for impairment, similar to the issued impairment testing guidance for goodwill and allows the option to first assess qualitative factors (events and circumstances) that could have affected the significant inputs used in determining the fair value of the indefinite-lived intangible asset to determine whether it is more-likely-than-not (i.e. greater than 50% chance) that the indefinite-lived intangible asset is impaired. An organization may choose to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to calculating its fair value. We performed a qualitative test for impairment of indefinite-lived intangible assets as of September 30, 2016. Based on the results of our qualitative testing, we believe that it is more-likely-than-not that the fair value of these indefinite-lived intangible assets is greater than their respective carrying values. Each quarter we review the events and circumstances to determine if impairment of indefinite-lived intangible assets is indicated. There were no indicators of impairment of indefinite-lived intangible assets during the three months ended January 31, 2017 and 2016.

AGILENT TECHNOLOGIES, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

2. NEW ACCOUNTING PRONOUNCEMENTS

There were no changes to the new accounting pronouncements not yet adopted as described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2016 except for the following:

In April 2015, the FASB issued amendments to simplify the presentation of debt issuance costs. The amendments require that debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs remain unchanged. The amendments were effective for us beginning November 1, 2016. The impact of adoption to our condensed consolidated balance sheet was a decrease of \$8 million in other assets and long-term debt. The October 31, 2016 consolidated balance sheet has been revised to reflect the new disclosure requirement.

In January 2017, the FASB issued guidance intended to clarify the definition of a business in connection with business combinations with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. This guidance is effective for us beginning November 1, 2018, and for interim periods within that year. Adjustments will be recorded in the period that they are determined rather than applied retrospectively via revision to the period of acquisition and each period thereafter. We do not expect this guidance to have a material impact on our consolidated financial statements and disclosures.

In January 2017, the FASB issued an amendment to modify the concept of impairment from the condition that exists when the carrying amount of goodwill exceeds its implied fair value to the condition that exists when the carrying amount of a reporting unit exceeds its fair value. The amendment also simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. The amendments are effective for us beginning November 1, 2020. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We do not expect this guidance to have a material impact on our consolidated financial statements and disclosures.

Other amendments to GAAP in the U.S. that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

3. SHARE-BASED COMPENSATION

Agilent accounts for share-based awards in accordance with the provisions of the authoritative accounting guidance which requires the measurement and recognition of compensation expense for all share-based payment awards made to our employees and directors including employee stock option awards, restricted stock units, employee stock purchases made under our employee stock purchase plan ("ESPP") and performance share awards granted to selected members of our senior management under the long-term performance plan ("LTPP") based on estimated fair values.

Participants in the LTPP are entitled to receive unrestricted shares of the company's stock after the end of a three-year period, if specified performance targets are met. Certain LTPP awards are generally designed to meet the criteria of a performance award with the performance metrics and peer group comparison based on the Total Stockholders' Return ("TSR") set at the beginning of the performance period. Effective November 1, 2015, the Compensation Committee of the Board of Directors approved another type of performance stock award, for the company's executive officers and other key employees. Participants in this program are also entitled to receive unrestricted shares of the company's stock after the end of a three-year period, if specified performance targets over the three-year period are met. The

performance target for grants made in 2016 and 2017 were based on Operating Margin ("OM") and Earnings Per Share ("EPS"), respectively. The performance targets for the LTPP-EPS grants for year 2 and year 3 of the performance period will be set in the first quarter of year 2 and year 3, respectively. All LTPP awards granted after November 1, 2015, are subject to a one-year post-vest holding period.

Based on the performance metrics the final LTPP award may vary from zero to 200 percent of the target award. The maximum award value cannot exceed 300 percent of the grant date target value. We consider the dilutive impact of these programs in our diluted net income per share calculation only to the extent that the performance conditions are expected to be met. Restricted stock units generally vest, with some exceptions, at a rate of 25 percent per year over a period of four years from the date of grant.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

The impact on our results for share-based compensation was as follows:

Three Months Ended January 31, 2017 2016 (in millions) \$6 Cost of products and services \$ 6 Research and development 2 2 Selling, general and administrative 13 15 Total share-based compensation expense \$ 21 \$ 23

At January 31, 2017 and October 31, 2016, there was no share-based compensation capitalized within inventory.

The following assumptions were used to estimate the fair value of the LTPP grants.

	Three Months Ended January 31,	
	2017	2016
LTPP:		
Volatility of Agilent shares	23%	24%
Volatility of selected peer-company shares	15%-63%	14%-50%
Price-wise correlation with selected peers	36%	35%

Shares granted under the LTPP (TSR) were valued using a Monte Carlo simulations model. The Monte Carlo simulation fair value model requires the use of highly subjective and complex assumptions, including the price volatility of the underlying stock.

For the volatility of our 2015 and 2016 LTPP (TSR) grants, we used the 3 year average historical stock price volatility of a group of our peer companies. We believed our historical volatility prior to the separation of Keysight in 2015 was no longer relevant to use. For the volatility of our 2017 LTPP (TSR) grants, we used our own historical stock price volatility.

The ESPP allows eligible employees to purchase shares of our common stock at 85 percent of the price at purchase and uses the purchase date to establish the fair market value.

The estimated fair value of restricted stock units, LTPP (OM) and LTPP (EPS) awards is determined based on the market price of Agilent's common stock on the date of grant adjusted for expected dividend yield. The compensation cost for LTPP (OM) and LTPP (EPS) reflects the cost of awards that are probable to vest at the end of the performance period.

All awards granted in 2017 and 2016 to our senior management employees have a one-year post-vest holding restriction. The estimated discount associated with post-vest holding restrictions is calculated using the Finnerty model. The model calculates the potential lost value if the employee were able to sell the shares during the lack of marketability period, instead of being required to hold the shares. The model used the same historical stock price volatility and dividend yield assumption used for the Monte Carlo simulations model and an expected dividend yield

to compute the discount. The grants made during 2017 have a discount of 5.3 percent while computing the fair value. The grants made during 2016 have a discount of 5.5 percent while computing the fair value.

4. INCOME TAXES

The company's effective tax rate was 13.0 percent and 14.8 percent for the three months ended January 31, 2017 and 2016, respectively. The income tax expense was \$25 million and \$21 million for the three months ended January 31, 2017 and 2016, respectively.

The income tax provision for the three months ended January 31, 2017 included net discrete tax benefits of \$2 million. The net discrete tax benefit for the three months ended January 31, 2017, included \$7 million of tax benefit for the settlement of an audit in Italy, \$11 million of tax expense related to the employee pension settlement gain and \$6 million of other discrete tax benefit items.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

The income tax provision for the three months ended January 31, 2016 included net discrete tax benefit of \$6 million. The net discrete tax benefit for the three months ended January 31, 2016 included \$5 million of tax benefit for the extension, which occurred in the first quarter of 2016, of the U.S. research and development tax credit attributable to the company's 2015 fiscal year, and \$6 million of tax expense related to the curtailment gain recognized with respect to the U.S. retirement plan and Supplemental Benefits Plan. The net discrete tax benefit for the three months ended January 31, 2016 also included \$9 million of tax benefit related primarily to return to provision adjustments and \$2 million of other discrete tax expense items.

In the U.S., tax years remain open back to the year 2012 for federal income tax purposes and the year 2000 for significant states. There were no substantial changes from our 2016 Annual Report on Form 10-K to the status of these open tax years in the first three months of fiscal 2017.

In other major jurisdictions where the company conducts business, the tax years generally remain open back to the year 2001. During the first quarter of 2017, the company settled its ongoing tax audit in Italy for the years 2011-2013 resulting in a net tax expense of \$7 million. The settlement resulted in the recognition of previously unrecognized tax benefits of approximately \$14 million.

With these jurisdictions and the U.S., it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitation or a tax audit settlement which will be partially offset by an anticipated tax liability related to unremitted foreign earnings, where applicable. Given the number of years and numerous matters that remain subject to examination in various tax jurisdictions, management is unable to estimate the range of possible changes to the balance of our unrecognized tax benefits.

On July 27, 2015, the U.S. Tax Court issued an opinion in Altera Corp. v. Commissioner related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision was entered by the U.S. Tax Court on December 1, 2015. The IRS is appealing the decision and filed its arguments opposing the Tax Court decision in June 2016. Due to the uncertainty surrounding the status of the current regulations, questions related to the scope of potential benefits or obligations, and the risk of the Tax Court's decision being overturned upon appeal, we concluded that no adjustment to our condensed consolidated financial statements is appropriate at this time.

5. NET INCOME PER SHARE

The following is a reconciliation of the numerator and denominator of the basic and diluted net income per share computations for the periods presented below:

Three	:
Mont	hs
Ended	1
Janua	ry 31,
2017	2016
(in mi	illions

Numerator:

Net income \$168 \$121

Denominator:

Basic weighted-average shares 322 329

Potential common shares— stock options and other employee stock plans 3
Diluted weighted-average shares 326 332

The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense and the dilutive effect of in-the-money options and non-vested restricted stock units. Under the treasury stock method, the amount the employee must pay for exercising stock options and unamortized share-based compensation expense collectively are assumed proceeds to be used to repurchase hypothetical shares. An increase in the fair market value of the company's common stock can result in a greater dilutive effect from potentially dilutive awards.

We exclude stock options with exercise prices greater than the average market price of our common stock from the calculation of diluted earnings per share because their effect would be anti-dilutive. For the three months ended January 31, 2017 and 2016, zero and 1.2 million options to purchase shares were excluded from the calculation of diluted earnings per share, respectively. In addition, we exclude from the calculation of diluted earnings per share stock options, ESPP, LTPP and restricted stock awards

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

whose combined exercise price and unamortized fair value were greater than the average market price of our common stock because their effect would also be anti-dilutive. For the three months ended January 31, 2017 and 2016, zero and 4,300 additional shares were excluded from the calculation of diluted earnings per share, respectively.

Customer relationships	145	93	52
Total amortizable intangible assets	1,139	745	394
In-Process R&D	17	_	17
Total	\$ 1,156	\$ 745	\$ 411

On January 20, 2017, we acquired Multiplicom NV ("Multiplicom"), a leading European diagnostics company with state-of-the-art genetic testing technology and products, for approximately \$72 million in cash. Due to the timing of the close, the valuation of the tangible and intangible assets of this acquisition is preliminary and will be finalized in the second quarter. As a result, we recorded additions to goodwill of \$46 million and additions to other intangible assets of \$34 million during the three months ended January 31, 2017. During the three months ended January 31, 2017, we also wrote-off the gross carrying amount of \$131 million and the related accumulated amortization of fully amortized intangible assets.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

Amortization expense of intangible assets was \$31 million and \$43 million for the three months ended January 31, 2017 and 2016, respectively.

Future amortization expense related to existing finite-lived purchased intangible assets for the remainder of fiscal year 2017 and for each of the five succeeding fiscal years and thereafter is estimated below:

Estimated future amortization expense:

(in millions)

Remainder of 2017	\$87
2018	\$91
2019	\$64
2020	\$53
2021	\$41
2022	\$25
Thereafter	\$33

8. FAIR VALUE MEASUREMENTS

The authoritative guidance defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, we consider the principal or most advantageous market and assumptions that market participants would use when pricing the asset or liability.

Fair Value Hierarchy

The guidance establishes a fair value hierarchy that prioritizes the use of inputs used in valuation techniques into three levels. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. There are three levels of inputs that may be used to measure fair value:

Level 1- applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2- applies to assets or liabilities for which there are inputs other than quoted prices included within level 1 that are observable, either directly or indirectly, for the asset or liability such as: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in less active markets; or other inputs that can be derived principally from, or corroborated by, observable market data.

Level 3- applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

Financial Assets and Liabilities Measured at Fair Value on a Recurring Basis

Financial assets and liabilities measured at fair value on a recurring basis as of January 31, 2017 were as follows:

	January 2017	Fair Value Measureme 31, 2017 Using Quoted Phignsificant in ActiveOther Markets Observable Identical Apparts (Level 1)(Level 2)			Significant Unobservable Inputs (Level 3)	
	(in mill	ions)				
Assets:

Long-term

C					
Deferred compensation liability	31		31		
Total liabilities measured at fair value	\$39	\$ —	\$	39	\$

Our money market funds and trading securities investments are generally valued using quoted market prices and therefore are classified within level 1 of the fair value hierarchy. Our derivative financial instruments are classified within level 2, as there is not an active market for each hedge contract, but the inputs used to calculate the value of the instruments are tied to active markets. Our deferred compensation liability is classified as level 2 because, although the values are not directly based on quoted market prices, the inputs used in the calculations are observable.

Trading securities, which is comprised of mutual funds, bonds and other similar instruments, and deferred compensation liability are reported at fair value, with gains or losses resulting from changes in fair value recognized currently in net income. Certain derivative instruments are reported at fair value, with unrealized gains and losses, net of tax, included in accumulated

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

other comprehensive loss within stockholders' equity. Realized gains and losses from the sale of these instruments are recorded in net income.

Impairment of Investments. There were no impairments of investments for the three months ended January 31, 2017 and 2016.

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

For the three months ended January 31, 2017 and 2016, there were no impairments of long-lived assets held and used. For the three months ended January 31, 2017 and 2016, there were no impairments of long-lived assets held for sale.

9. DERIVATIVES

We are exposed to foreign currency exchange rate fluctuations and interest rate changes in the normal course of our business. As part of our risk management strategy, we use derivative instruments, primarily forward contracts, purchased options to hedge economic and/or accounting exposures resulting from changes in foreign currency exchange rates.

Fair Value Hedges

We are exposed to interest rate risk due to the mismatch between the interest expense we pay on our loans at fixed rates and the variable rates of interest we receive from cash, cash equivalents and other short-term investments. We have issued long-term debt in U.S. dollars at fixed interest rates based on the market conditions at the time of financing. The fair value of our fixed rate debt changes when the underlying market rates of interest change, and, in the past, we have used interest rate swaps to change our fixed interest rate payments to U.S. dollar LIBOR-based variable interest expense to match the floating interest income from our cash, cash equivalents and other short term investments. As of January 31, 2017, all interest rate swap contracts had either been terminated or had expired.

On November 25, 2008, we terminated two interest rate swap contracts associated with our 2017 senior notes that represented the notional amount of \$400 million. On October 20, 2014 we prepaid \$500 million out of \$600 million principal of our 2017 senior notes and fully amortized the associated proportionate deferred gain to other income (expense). The remaining gain to be amortized related to the \$100 million of 2017 senior notes at January 31, 2017 was \$1 million. On August 9, 2011, we terminated five interest rate swap contracts related to our 2020 senior notes that represented the notional amount of \$500 million. The remaining gain to be amortized at January 31, 2017 was \$14 million. All deferred gains from terminated interest rate swaps are being amortized over the remaining life of the respective senior notes.

Cash Flow Hedges

We enter into foreign exchange contracts to hedge our forecasted operational cash flow exposures resulting from changes in foreign currency exchange rates. These foreign exchange contracts, carried at fair value, have maturities between one and twelve months. These derivative instruments are designated and qualify as cash flow hedges under the criteria prescribed in the authoritative guidance and are assessed for effectiveness against the underlying exposure every reporting period. Changes in the time value of the foreign exchange contract are excluded from the assessment of hedge effectiveness and are recognized in other income (expense) each period. The changes in fair value of the effective portion of the derivative instrument are recognized in accumulated other comprehensive income (loss). Amounts associated with cash flow hedges are reclassified to cost of sales in the condensed consolidated statement of

operations when the forecasted transaction occurs. If it becomes probable that the forecasted transaction will not occur, the hedge relationship will be de-designated and amounts accumulated in other comprehensive income (loss) will be reclassified to other income (expense) in the current period. Changes in the fair value of the ineffective portion of derivative instruments are recognized in other income (expense) in the condensed consolidated statement of operations in the current period. We record the premium paid (time value) of an option on the date of purchase as an asset. For options designated as cash flow hedges, changes in the time value are excluded from the assessment of hedge effectiveness and are recognized in other income (expense) over the life of the option contract. Ineffectiveness in the three months ended January 31, 2017 and 2016 was not significant. For the three months ended January 31, 2017 and 2016 gains and losses recognized in other income (expense) due to de-designation of cash flow hedge contracts were not significant.

In July 2012, Agilent executed treasury lock agreements for \$400 million in connection with future interest payments to be made on our 2022 senior notes issued on September 10, 2012. We designated the treasury lock as a cash flow hedge. The treasury lock contracts were terminated on September 10, 2012 and we recognized a deferred gain in accumulated other comprehensive income which is being amortized to interest expense over the life of the 2022 senior notes. The remaining gain to be amortized related to the treasury lock agreements at January 31, 2017 was \$2 million.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

In February 2016, Agilent executed three forward-starting pay fixed/receive variable interest rate swaps for the notional amount of \$300 million in connection with future interest payments to be made on our 2026 senior notes issued on September 15, 2016. These derivative instruments were designated and qualified as cash flow hedges under the criteria prescribed in the authoritative guidance. The swap arrangements were terminated on September 15, 2016 with a payment of \$10 million and we recognized this as a deferred loss in accumulated other comprehensive income which is being amortized to interest expense over the life of the 2026 senior notes. The remaining loss to be amortized related to the interest rate swap agreements at January 31, 2017 was \$9 million.

Other Hedges

Additionally, we enter into foreign exchange contracts to hedge monetary assets and liabilities that are denominated in currencies other than the functional currency of our subsidiaries. These foreign exchange contracts are carried at fair value and do not qualify for hedge accounting treatment and are not designated as hedging instruments. Changes in value of the derivative are recognized in other income (expense) in the condensed consolidated statement of operations, in the current period, along with the offsetting foreign currency gain or loss on the underlying assets or liabilities.

Our use of derivative instruments exposes us to credit risk to the extent that the counterparties may be unable to meet the terms of the agreement. We do, however, seek to mitigate such risks by limiting our counterparties to major financial institutions which are selected based on their credit ratings and other factors. We have established policies and procedures for mitigating credit risk that include establishing counterparty credit limits, monitoring credit exposures, and continually assessing the creditworthiness of counterparties.

A number of our derivative agreements contain threshold limits to the net liability position with counterparties and are dependent on our corporate credit rating determined by the major credit rating agencies. The counterparties to the derivative instruments may request collateralization, in accordance with derivative agreements, on derivative instruments in net liability positions.

The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position as of January 31, 2017, was zero. The credit-risk-related contingent features underlying these agreements had not been triggered as of January 31, 2017.

There were 39 foreign exchange forward contracts open as of January 31, 2017 and designated as cash flow hedges. There were 138 foreign exchange forward contracts open as of January 31, 2017 not designated as hedging instruments. The aggregated notional amounts by currency and designation as of January 31, 2017 were as follows:

Derivatives	Derivatives Designated Not
as Cook Flow	Designated
Cash Flow	as Hedging

10. RETIREMENT PLANS AND POST RETIREMENT PENSION PLANS

Components of net periodic costs. For the three months ended January 31, 2017 and 2016, our net pension and post retirement benefit costs were comprised of the following:

	Pens	ions								
	U.S. Plans		3			U.S. Post Retirement			ment	
	- 1.5			Plans		Benefit Pla		ans		
	Thre	e Mo	nt	hs End	ed Jan	anuary 31,				
	2017	2016	6	2017	2016	201	7	201	6	
	(in n	nillior	ıs))						
Service cost—benefits earned during the period	8 —	\$6		\$4	\$4	\$	_	\$	_	
Interest cost on benefit obligation	3	3		3	4	1		1		
Expected return on plan assets	(6)	(6)	(10)	(11)	(2)	(2)	
Amortization:										
Actuarial losses	1	2		9	7	3		3		
Prior service cost	_	(1)		_	(2)	(2)	
Total net plan costs	\$(2)	\$4		\$6	\$4	\$		\$	_	
Curtailments and settlements gains		\$(16	5)	\$(32)						

We made no contributions to our U.S. defined benefit plans during the three months ended January 31, 2017. We contributed \$3 million to our non-U.S. defined benefit plans during the three months ended January 31, 2017.

We made no contributions to our U.S. defined benefit plans during the three months ended January 31, 2016. We contributed \$4 million to our non-U.S. defined benefit plans during the three months ended January 31, 2016.

We expect to contribute \$25 million to our U.S. defined benefit plans during the remainder of 2017 and we expect to contribute \$17 million to our non-U.S. defined benefit plans during the remainder of 2017.

In Japan, Agilent has defined benefit pension plans established under the Japanese Welfare Pension Insurance Law (JWPIL). The plans are composed of (a) a substitutional portion based on the pay-related part of the old-age pension benefits prescribed by JWPIL (similar to social security benefits in the United States) and (b) a corporate portion based on a contributory defined benefit pension arrangement established at the discretion of the company. During the three months ended January 31, 2017, Agilent received government approval and returned the substitutional portion of Japan's pension plan to the Japanese government, as allowed by the JWPIL. The transfer resulted in a net gain of \$32 million recorded within cost of sales and operating expenses in the condensed consolidated statement of operations. The net gain consisted of two parts - a gain of \$41 million, representing the difference between the fair values of the Accumulated Benefit Obligation (ABO) settled of \$65 million and the assets transferred from the pension trust to the government of Japan of \$24 million, offset by a settlement loss of \$9 million related to the recognition of previously unrecognized actuarial losses included in accumulated other comprehensive income.

Plan Amendments. During the three months ended January 31, 2016, we made changes to our U.S. Retirement Plan and Supplemental Benefits Retirement Plan ("U.S. Plans"). Effective April 30, 2016, benefit accruals under the U.S. Plans were frozen. Any pension benefit earned in the U.S. Plans through April 30, 2016 remained fully vested, and there were no additional benefit accruals after April 30, 2016. In addition, active employees who have not met the eligibility requirement for the Retiree Medical Account (RMA) under the U.S. Post Retirement Benefit Plan - 55 years

old with at least 15 years of Agilent service - as of April 30, 2016 - will only be eligible for 50 percent of the current RMA reimbursement amount upon retirement.

Due to these plan amendments, we recorded a curtailment gain of \$15 million in the U.S. Plans during the three months ended January 31, 2016. In addition, we recognized a settlement gain of \$1 million related to the U.S. Supplemental Benefits Retirement Plan during the three months ended January 31, 2016.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

11. WARRANTIES AND CONTINGENCIES

Warranties

We accrue for standard warranty costs based on historical trends in warranty charges as a percentage of net product shipments. The accrual is reviewed regularly and periodically adjusted to reflect changes in warranty cost estimates. Estimated warranty charges are recorded within cost of products at the time products are sold. The standard warranty accrual balances are held in other accrued and other long-term liabilities on our condensed consolidated balance sheet. Our standard warranty terms typically extend to one year from the date of delivery, depending on the product.

A summary of the standard warranty accrual activity is shown in the table below:

	Janua	ry 31,
	2017	2016
	(in mi	llions)
Beginning balance as of November 1	\$35	\$31
Accruals for warranties including change in estimate	13	21
Settlements made during the period	(13)	(14)
Ending balance as of January 31,	\$35	\$38
Accruals for warranties due within one year	\$34	\$36
Accruals for warranties due after one year	1	2
Ending balance as of January 31,	\$35	\$38

Contingencies

We are involved in lawsuits, claims, investigations and proceedings, including, but not limited to, intellectual property, commercial and employment matters, which arise in the ordinary course of business. There are no matters pending that we currently believe are probable and reasonably possible of having a material impact to our business, consolidated financial condition, results of operations or cash flows.

12. SHORT-TERM DEBT

Credit Facilities

On September 15, 2014, Agilent entered into a credit agreement with a group of financial institutions which provides for a \$400 million five-year unsecured credit facility that will expire on September 15, 2019. On June 9, 2015, the commitments under the existing credit facility were increased by \$300 million so that the aggregate commitments under the facility now total \$700 million. As of January 31, 2017, the company had borrowings of \$89 million outstanding under the credit facility. We were in compliance with the covenants for the credit facility during the three months ended January 31, 2017.

2017 Senior Notes

In October 2007, the company issued an aggregate principal amount of \$600 million in senior notes ("2017 senior notes"). On October 20, 2014, we settled the redemption of \$500 million of the \$600 million outstanding aggregate

principal amount of our 2017 senior notes. The remaining \$100 million in senior notes will mature on November 1, 2017. All interest rate swap contracts associated with the 2017 senior notes have been terminated and the amounts to be amortized over the remaining life of the senior notes as of January 31, 2017 was \$1 million. All outstanding notes issued are unsecured and rank equally in right of payment with all of Agilent's other senior unsecured indebtedness. There have been no changes to the principal, maturity, interest rates and interest payment terms of the 2017 senior notes in the three months ended January 31, 2017 as compared to the senior notes described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2016.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

13. LONG-TERM DEBT

Senior Notes

The following table summarizes the company's long-term senior notes and the related interest rate swaps:

	January	31, 20	17	October	31, 20)16	
	Amortiz	zęd	Total	Amortiz	zęd	Total	
	Amortized Principal Total			Amortized Principal To			
	(in millions)						
2017 Senior Notes	_		_	100	1	101	
2020 Senior Notes	498	14	512	498	15	513	
2022 Senior Notes	398		398	398		398	
2023 Senior Notes	595		595	595		595	
2026 Senior Notes	297		297	297		297	
Total	\$1,788	\$ 14	\$1,802	\$1,888	\$ 16	\$1,904	

The 2017 senior notes are repayable within one year and have been reclassified to short-term debt, see Note 12, "Short-Term Debt". On November 1, 2016, we adopted new guidance related to the presentation of debt issuance costs in the balance sheet. As a result, the amortized principal of long-term debt decreased by \$8 million. The table above for October 31, 2016 reflects the new disclosure requirement. Please refer to Note 2, "New Accounting Pronouncements" for additional information.

All outstanding notes listed above are unsecured and rank equally in right of payment with all of Agilent's other senior unsecured indebtedness. Other than described above, there have been no changes to the principal, maturity, interest rates and interest payment terms of the Agilent senior notes, detailed in the table above, in the three months ended January 31, 2017 as compared to the senior notes described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2016. All interest rate swap contracts have been terminated and amounts to be amortized over the remaining life of the senior notes as of January 31, 2017 and October 31, 2016 are detailed above.

14. STOCKHOLDERS' EQUITY

Stock Repurchase Program

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program effective in the first quarter of fiscal year 2014, upon the conclusion of the company's previous \$1 billion repurchase program. The program was designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. During the three months ended January 31, 2016, we repurchased approximately 2.4 million shares for \$98 million, which completed the purchases under this authorization.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the three months ended January 31, 2017, we repurchased approximately 2.5 million shares for \$111 million under this authorization. During the three months ended January 31, 2016, we repurchased approximately 2.5 million shares for \$102 million under

this authorization. As of January 31, 2017, we had remaining authorization to repurchase up to \$693 million of our common stock under this program.

In the first quarter of 2017, we retired 292.5 million treasury shares at an aggregate cost of \$10.6 billion, which represents all our previously repurchased shares over the past 11 years and our repurchases made in the first quarter of fiscal year 2017. The retirement of our treasury shares resulted in a decrease of \$6.7 billion to retained earnings and a decrease of \$3.9 billion to additional paid-in-capital.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

Cash Dividends on Shares of Common Stock

During the three months ended January 31, 2017, we paid cash dividends of \$0.132 per common share or \$42 million on the company's common stock. During the three months ended January 31, 2016, we paid cash dividends of \$0.115 per common share or \$38 million on the company's common stock.

The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

15. SEGMENT INFORMATION

Description of segments. We are a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow.

Agilent has three business segments comprised of the life sciences and applied markets business, diagnostics and genomics business and the Agilent CrossLab business each of which comprises a reportable segment. The three operating segments were determined based primarily on how the chief operating decision maker views and evaluates our operations. Operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Other factors, including market separation and customer specific applications, go-to-market channels, products and services and manufacturing are considered in determining the formation of these operating segments.

A description of our three reportable segments is as follows:

Our life sciences and applied markets business provides application-focused solutions that include instruments and software that enable customers to identify, quantify and analyze the physical and biological properties of substances and products, as well as enable customers in the clinical and life sciences research areas to interrogate samples at the molecular level. Key product categories include: liquid chromatography ("LC") systems and components; liquid chromatography mass spectrometry ("LCMS") systems; gas chromatography ("GC") systems and components; gas chromatography mass spectrometry ("GCMS") systems;

AGILENT TECHNOLOGIES, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

inductively coupled plasma mass spectrometry ("ICP-MS") instruments; atomic absorption ("AA") instruments; microwave plasma-atomic emission spectrometry ("MP-AES") instruments; inductively coupled plasma optical emission spectrometry ("ICP-OES") instruments; cell analysis plate based assays; laboratory software and informatics systems; laboratory automation and robotic systems; dissolution testing; vacuum pumps and measurement technologies.

Our diagnostics and genomics business is comprised of five areas of activity providing solutions that include reagents, instruments, software and consumables, which enable customers in the clinical and life sciences research areas to interrogate samples at the cellular and molecular level. First, our genomics business includes arrays for DNA mutation detection, genotyping, gene copy number determination, identification of gene rearrangements, DNA methylation profiling, gene expression profiling, as well as next generation sequencing ("NGS") target enrichment and genetic data management and interpretation support software. Second, our nucleic acid solutions business provides equipment and expertise focused on production of synthesized oligonucleotides under pharmaceutical good manufacturing practices ("GMP") conditions for use as active pharmaceutical ingredients ("API") in an emerging class of drugs that utilize nucleic acid molecules for disease therapy. Next, our pathology solutions business is focused on product offerings to cancer diagnostics and anatomic pathology workflows. The broad portfolio of offerings includes immunohistochemistry ("IHC"), in situ hybridization ("ISH"), hematoxylin and eosin ("H&E") staining and special staining. We also collaborate with a number of major pharmaceutical companies to develop new potential pharmacodiagnostics, also known as companion diagnostics, which may be used to identify patients most likely to benefit from a specific targeted therapy. Finally, the reagent partnership business is a provider of reagents used for turbidimetry and flow cytometry.

The Agilent CrossLab business spans the entire lab with its extensive consumables and services portfolio, which is designed to improve customer outcomes. The majority of the portfolio is vendor neutral, meaning Agilent can serve and supply customers regardless of their instrument purchase choices. Solutions range from chemistries and supplies to services and software helping to connect the entire lab. Key product categories in consumables include GC and LC columns, sample preparation products, custom chemistries, and a large selection of laboratory instrument supplies. Services include startup, operational, training and compliance support, software as a service, as well as asset management and consultative services that help increase customer productivity. Custom service and consumable bundles are tailored to meet the specific application needs of various industries and to keep instruments fully operational and compliant with the respective industry requirements.

A significant portion of the segments' expenses arise from shared services and infrastructure that we have historically provided to the segments in order to realize economies of scale and to efficiently use resources. These expenses, collectively called corporate charges, include legal, accounting, tax, real estate, insurance services, information technology services, treasury, other corporate infrastructure expenses and costs of centralized research and development. Charges are allocated to the segments, and the allocations have been determined on a basis that we consider to be a reasonable reflection of the utilization of services provided to or benefits received by the segments. In addition, we do not allocate amortization and impairment of acquisition-related intangible assets, pension curtailment or settlement gains, restructuring and transformational expenses, acquisition and integration costs and certain other charges to the operating margin for each segment because management does not include this information in its measurement of the performance of the operating segments.

The following tables reflect the results of our reportable segments under our management reporting system. The performance of each segment is measured based on several metrics, including segment income from operations. These results are used, in part, by the chief operating decision maker in evaluating the performance of, and in allocating resources to, each of the segments.

The profitability of each of the segments is measured after excluding restructuring and asset impairment charges, investment gains and losses, interest income, interest expense, acquisition and integration costs, non-cash amortization and other items as noted in the reconciliations below.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (UNAUDITED)

The following discussion should be read in conjunction with the condensed consolidated financial statements and notes thereto included elsewhere in this Form 10-O and our Annual Report on Form 10-K. This report contains forward-looking statements including, without limitation, statements regarding trends, seasonality and growth in, and drivers of, the markets we sell into, our strategic direction, our future effective tax rate and tax valuation allowance, earnings from our foreign subsidiaries, lease and site services income from Keysight, the impact of foreign currency movements on our performance, our hedging programs, indemnification, new product and service introductions, the ability of our products to meet market needs, adoption of our products, changes to our manufacturing processes, the use of contract manufacturers, out sourcing and third-party package delivery services, source and supply of materials used in our products, the impact of local government regulations on our ability to pay vendors or conduct operations, our liquidity position, our ability to generate cash from operations, growth in our businesses, our investments, including in research and development, the potential impact of adopting new accounting pronouncements, our financial results, our operating margin, our sales, our purchase commitments, our capital expenditures, our contributions to our pension and other defined benefit plans, our strategic initiatives, our cost-control activities and other cost saving initiatives, uncertainties relating to Food and Drug Administration ("FDA") and other regulatory approvals, the integration of our acquisitions and other transactions, impairment of goodwill and other intangible assets, write down of investment values or loans and convertible notes, our stock repurchase program, our declared dividends, and the existence of economic instability, that involve risks and uncertainties. Our actual results could differ materially from the results contemplated by these forward-looking statements due to various factors, including those discussed in Part II Item 1A and elsewhere in this Form 10-Q.

Basis of Presentation

The financial information presented in this Form 10-Q is not audited and is not necessarily indicative of our future consolidated financial position, results of operations, comprehensive income (loss) or cash flows. Our fiscal year-end is October 31, and our fiscal quarters end on January 31, April 30 and July 31. Unless otherwise stated, these dates refer to our fiscal year and fiscal periods.

Executive Summary

Agilent Technologies Inc. ("we", "Agilent" or the "company"), incorporated in Delaware in May 1999, is a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow.

On January 20, 2017, we completed the acquisition of 100 percent of the stock of Multiplicom NV ("Multiplicom"), a leading European diagnostics company with state-of-the-art genetic testing technology and products, for approximately \$72 million in cash. Multiplicom, headquartered in Belgium, develops, manufactures and commercializes molecular diagnostic assays, provided as kits, which enable personalized medicine. The financial results of Multiplicom have been included within Agilent's from the date of the transaction.

Net revenue of \$1,067 million for the three months ended January 31, 2017 increased 4 percent when compared to the same period last year. Foreign currency movements for the three months ended January 31, 2017 had an unfavorable impact on revenue of approximately 1 percentage points when compared to the same period last year.

Revenue in the life sciences and applied markets business for the three months ended January 31, 2017, increased 3 percent when compared to the same period last year. Overall, foreign currency movements had no significant impact on revenue for this business in the three months ended January 31, 2017. Excluding the impact of foreign currency

movements and acquisitions, our performance within the life sciences market continued to show strength with consistent revenue growth from the pharmaceutical and biotechnology market partially offset by declines in the life science research market. Within the applied markets, and excluding the impact of foreign currency movements and acquisitions, there was strong revenue growth in the food market in addition to modest revenue growth in the chemical and energy market in the three months ended January 31, 2017, when compared to the same period last year.

Revenue in the diagnostics and genomics business for the three months ended January 31, 2017, increased 4 percent when compared to the same period last year. Foreign currency movements had an unfavorable impact of 1 percentage point on revenue in the three months ended January 31, 2017. Excluding the impact of foreign currency movements and acquisitions, our performance within the diagnostics and clinical market continued to improve, led by strong revenue growth from our companion diagnostics and nucleic acid solutions businesses. There was modest growth in the pharmaceutical market offset by declines in the life science research market in the three months ended January 31, 2017 when compared to the same period last year.

Table of Contents

Revenue generated by Agilent CrossLab in the three months ended January 31, 2017, increased 6 percent when compared to the same period last year. Foreign currency movements had an unfavorable impact of 1 percentage point on revenue in the three months ended January 31, 2017. Excluding the impact of foreign currency movements and acquisitions, revenue grew across nearly all key markets led by strong growth in the pharmaceutical and biotechnology market as well as revenue growth in the food and diagnostic and clinical market in the three months ended January 31, 2017 when compared to the same period last year.

Net income for the three months ended January 31, 2017 was \$168 million compared to \$121 million for the corresponding period last year. In the three months ended January 31, 2017, cash generated from operations was \$116 million.

For the three months ended January 31, 2017 and 2016, cash dividends of \$42 million and \$38 million, respectively, were paid on the company's outstanding common stock. The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program effective in the first quarter of fiscal year 2014, upon the conclusion of the company's previous \$1 billion repurchase program. The program was designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. During the three months ended January 31, 2016, we repurchased approximately 2.4 million shares for \$98 million, which completed the purchases under this authorization.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the three months ended January 31, 2017, we repurchased approximately 2.5 million shares for \$111 million under this authorization. During the three months ended January 31, 2016, we repurchased approximately 2.5 million shares for \$102 million under this authorization. As of January 31, 2017, we had remaining authorization to repurchase up to \$693 million of our common stock under this program.

In the first quarter of 2017, we retired 292.5 million treasury shares at an aggregate cost of \$10.6 billion, which represents all our previously repurchased shares over the past 11 years and our repurchases made in the first quarter of fiscal year 2017. The retirement of our treasury shares resulted in a decrease of \$6.7 billion to retained earnings and a decrease of \$3.9 billion to additional paid-in-capital.

Looking forward, we expect to continue to focus on the growth of operating margin in our businesses by continuing to explore new ways to simplify our operations, differentiate product solutions and improve our customers' experience. In addition, we remain focused on returning a significant proportion of our cash flow to shareholders through our dividend and share repurchase programs. While we are still uncertain about today's political and economic environment, we are optimistic about our growth opportunities in our key end markets and geographies such as China and emerging markets. We expect continued strength in the pharmaceutical market and solid growth in the food and the diagnostics and clinical markets. Although we are encouraged by the growth we saw in the chemical and energy market this quarter, we remain uncertain about whether the growth is sustainable at this time. The unfavorable effects of changes in foreign currency exchange rates decreased revenue by approximately 1 percentage point in the three months ended January 31, 2017. Costs and expenses, incurred in local currency, were subject to the favorable effects due to changes in foreign currency exchange rates in the three months ended January 31, 2017, reducing our overall net exposure. The impact of foreign currency exchange rates movements can be positive or negative in any period and

is calculated by applying the prior period foreign currency exchange rates to the current year period.

Table of Contents

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles ("GAAP") in the U.S. The preparation of condensed consolidated financial statements in conformity with GAAP in the U.S. requires management to make estimates, judgments and assumptions that affect the amounts reported in our condensed consolidated financial statements and accompanying notes. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, inventory valuation, share-based compensation, retirement and post-retirement benefit plan assumptions, goodwill and purchased intangible assets and accounting for income taxes. There have been no significant changes to our critical accounting policies as described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2016. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates.

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used or changes in the accounting estimate that are reasonably likely to occur could materially change the financial statements.

Adoption of New Pronouncements

See Note 2, "New Accounting Pronouncements," to the condensed consolidated financial statements for a description of new accounting pronouncements.

Foreign Currency

Our revenues, costs and expenses, and monetary assets and liabilities are exposed to changes in foreign currency exchange rates as a result of our global operating and financing activities. The unfavorable effects of changes in foreign currency exchange rates has decreased revenue by approximately 1 percentage point in the three months ended January 31, 2017. Costs and expenses, incurred in local currency, were subject to the favorable effects due to changes in foreign currency exchange rates in the three months ended January 31, 2017, reducing our overall net exposure. The impact of foreign currency exchange rates movements can be positive or negative in any period and is calculated by applying the prior period foreign currency exchange rates to the current year period. We hedge revenues, expenses and balance sheet exposures that are not denominated in the functional currencies of our subsidiaries on a short term and anticipated basis. We do experience some fluctuations within individual lines of the condensed consolidated statement of operations and balance sheet because our hedging program is not designed to offset the currency movements in each category of revenues, expenses, monetary assets and liabilities. Our hedging program is designed to hedge currency movements on a relatively short-term basis (up to a rolling twelve-month period). Therefore, we are exposed to currency fluctuations over the longer term. To the extent that we are required to pay for all, or portions, of an acquisition price in foreign currencies, Agilent may enter into foreign exchange contracts to reduce the risk that currency movements will impact the U.S. dollar cost of the transaction.

Results from Operations

Net Revenue

Three Months

Ended

January 31, Three 2017 2016 Months

(in millions)

Net revenue:

Products \$818 \$795 3% Services and other 249 233 7% Total net revenue \$1,067 \$1,028 4%

Net revenue of \$1,067 million for the three months ended January 31, 2017 increased 4 percent when compared to the same period last year. Foreign currency movements for the three months ended January 31, 2017 had an unfavorable impact on revenue of approximately 1 percentage point when compared to the same period last year.

Table of Contents

Services and other revenue include revenue generated from servicing our installed base of products, warranty extensions and consulting including companion diagnostics. Services and other revenue increased 7 percent in the three months ended January 31, 2017 compared to the same period last year. The service and other revenue growth was impacted by a portion of the revenue being driven by both the current and the previously installed product base. Service and other revenue increased due to strong companion diagnostics revenue, increased service contract repairs and compliance services and preventative maintenance.

Net Revenue By Segment

	Three M Ended January 2017 (in mill	31, 2016	Year over Year Change Three Months

Operating margin 19.3 %15.1 %4 ppts

(in millions)

Research and development \$79 \$78 1% Selling, general and administrative \$289 \$304 (5)%

Total gross margin for the three months ended January 31, 2017 increased 2 percentage points when compared to the same period last year. In the three months ended January 31, 2017 gross margin increased 1 percentage point in our life sciences and

Table of Contents

applied markets business, increased 2 percentage points in our diagnostics and genomics business and declined 2 percentage points in our Agilent CrossLab business, respectively, when compared to the same period last year. Increases in total gross margin for the three months ended January 31, 2017, reflects higher volume and improved business mix along with lower costs related to warranty and the impact of an employee pension settlement gain offset by increased inventory charges and wage increases.

Total operating margin increased 4 percentage points in the three months ended January 31, 2017, when compared to the same period last year. In the three months ended January 31, 2017, operating margin increased 2 percentage points in our life sciences and applied markets business, increased 5 percentage points in our diagnostics and genomics business and decreased 2 percentage points in our Agilent CrossLab business, respectively, when compared to the same period last year. In the three months ended January 31, 2017, total operating margin increased due to improved gross margin, the impact of an employee pension settlement gain and lower amortization expense and transformational initiatives costs when compared to the same period last year.

Research and development expenses in the three months ended January 31, 2017 increased 1 percent due to an increase in headcount from acquisitions in the past year increasing costs such as wages in addition to increased program spending on new products when compared to the lower spending in the same period last year. We remain committed to invest significantly in research and development and have focused our development efforts on key strategic opportunities in order to align our business with available markets and position ourselves to capture market share.

Selling, general and administrative expenses decreased 5 percent for the three months ended January 31, 2017 when compared to the same period last year. Selling, general and administrative expenses decreased due to the impact of an employee pension settlement gain recognized in the first quarter, decreases in amortization expense of intangible assets and transformational initiatives costs partially offset by increases in acquisition and integration costs, and wages.

At January 31, 2017, our headcount was approximately 12,600 as compared to approximately 12,100 at January 31, 2016.

Other income (expense), net

In the three months ended January 31, 2017 and 2016 other income (expense), net includes \$3 million in both periods of income in respect of the provision of site service costs to, and lease income from, Keysight. The costs associated with these services are reported within income from operations. Agilent expects to receive lease and site service income from Keysight over the next 3-4 years of approximately \$12 million per year.

Income Taxes

The company's effective tax rate was 13.0 percent and 14.8 percent for the three months ended January 31, 2017 and 2016, respectively. The income tax expense was \$25 million and \$21 million for the three months ended January 31, 2017 and 2016, respectively.

The income tax provision for the three months ended January 31, 2017 included net discrete tax benefits of \$2 million. The net discrete tax benefit for the three months ended January 31, 2017, included \$7 million of tax benefit for the settlement of an audit in Italy, \$11 million of tax expense related to the employee pension settlement gain recognized and \$6 million of other discrete tax benefit items.

The income tax provision for the three months ended January 31, 2016 included net discrete tax benefit of \$6 million. The net discrete tax benefit for the three months ended January 31, 2016 included \$5 million of tax benefit for the extension, which occurred in the first quarter of 2016, of the U.S. research and development tax credit attributable to the company's 2015 fiscal year, and \$6 million of tax expense related to the curtailment gain recognized with respect to the US retirement plan and Supplemental Benefits Plan. The net discrete tax benefit for the three months ended January 31, 2016 also included \$9 million of tax benefit related primarily to return to provision adjustments and \$2 million of other discrete tax expense items.

In the U.S., tax years remain open back to the year 2012 for federal income tax purposes and the year 2000 for significant states. There were no substantial changes from our 2016 Annual Report on Form 10-K to the status of these open tax years in the first three months of fiscal 2017.

In other major jurisdictions where the company conducts business, the tax years generally remain open back to the year 2001. During the first quarter of 2017, the company settled its ongoing tax audit in Italy for the years 2011-2013 resulting in a net tax expense of \$7 million. The settlement resulted in the recognition of previously unrecognized tax benefits of approximately \$14 million.

Table of Contents

With these jurisdictions and the U.S., it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitation or a tax audit settlement which will be partially offset by an anticipated tax liability related to unremitted foreign earnings, where applicable. Given the number of years and numerous matters that remain subject to examination in various tax jurisdictions, management is unable to estimate the range of possible changes to the balance of our unrecognized tax benefits.

On July 27, 2015, the U.S. Tax Court issued an opinion in Altera Corp. v. Commissioner related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision was entered by the U.S. Tax Court on December 1, 2015. The IRS is appealing the decision and filed its arguments opposing the Tax Court decision in June 2016. Due to the uncertainty surrounding the status of the current regulations, questions related to the scope of potential benefits or obligations, and the risk of the Tax Court's decision being overturned upon appeal, we concluded that no adjustment to our condensed consolidated financial statements is appropriate at this time.

Life Sciences and Applied Markets

Our life sciences and applied markets business provides application-focused solutions that include instruments and software that enable customers to identify, quantify and analyze the physical and biological properties of substances and products, as well as enable customers in the clinical and life sciences research areas to interrogate samples at the molecular level. Key product categories include: liquid chromatography ("LC") systems and components; liquid chromatography mass spectrometry ("LCMS") systems; gas chromatography ("GC") systems and components; gas chromatography mass spectrometry ("GCMS") systems; inductively coupled plasma mass spectrometry ("ICP-MS") instruments; atomic absorption ("AA") instruments; microwave plasma-atomic emission spectrometry ("MP-AES") instruments; inductively coupled plasma optical emission spectrometry ("ICP-OES") instruments; cell analysis plate based assays; laboratory software and informatics systems; laboratory automation and robotic systems; dissolution testing; vacuum pumps and measurement technologies.

Net Revenue

Three
Months Year over Year Change
Ended
January 31, Three
2017 2016 Months
(in millions)

Net revenue \$540 \$526 3%

Life sciences and applied markets business revenue for the three months ended January 31, 2017 increased 3 percent when compared to the same period last year. Overall, foreign currency movements for the three months ended January 31, 2017 had no significant impact on revenue. Geographically, revenue increased 3 percent in the Americas, increased 10 percent in Asia Pacific excluding Japan with a 1 percentage point unfavorable currency impact, declined 8 percent in Europe with a 2 percentage point unfavorable currency impact and increased 14 percent in Japan with a 9 percentage point favorable currency impact for the three months ended January 31, 2017 compared to the same period last year. Strong growth in China again led the geographic revenue increase during the three months ended January

31, 2017 helping offset revenue decreases in Europe. Liquid chromatography products had solid growth helped by continued strength in the pharmaceutical market. Gas chromatography mass spectrometry saw strong demand on the strength of both single and triple quad products. Sales of software and informatics grew substantially with sales in China leading the way.

End market performance was led by revenue increase in the food market, with growth in China a major contributor as the country continues to expand regulations and standards to insure the quality of its food supply. The pharmaceutical market was again strong across most product lines driven by the replacement business. The chemical and energy market rebounded modestly this quarter compared to the same period last year, but consistent growth needs to be seen before we would conclude there is a recovery. The diagnostic and clinical market growth was mixed with weakness in the Americas.

Looking forward, we are optimistic about our growth opportunities in the life sciences and applied markets as our broad portfolio of products and solutions are well suited to address customer needs. We expect strong sales funnels given a number of significant new product introductions as we continue to invest in expanding and improving our applications and solutions portfolio.

Table of Contents

We are watching the chemical and energy market for signs of sustained recovery, and believe our product portfolio, including our well-received recent gas chromatography product introduction, Intuvo, is well positioned to address customer needs when that market does fully recover.

Operating Results				
-	Three Months Ended		Year over Year Change	
	January	31,	Three	
	2017	2016	Months	
Gross margin	59.6 %	58.7 %	1 ppt	
Operating margin	23.4 %	21.7 %	2 ppts	
(in millions)				
Research and development	\$50	\$48	5%	
Selling, general and administrative	\$146	\$147	(1)%	

Gross margins for products and services for the three months ended January 31, 2017, increased 1 percentage point when compared to the same period last year. The increase in gross margins was due to higher volumes of business and reduced warranty costs related to programs aimed at product repair efficiencies.

Research and development expenses for the three months ended January 31, 2017, increased 5 percent when compared to the same period last year. The increase in research and development was due to program spending on new products across the portfolio.

Selling, general and administrative expenses for the three months ended January 31, 2017, decreased 1 percent when compared to the same period last year. The decrease in selling general and administrative expenses was due both to decreased discretionary spending and a lower reallocation of shared Agilent expenses among business segments.

Operating margins for product and services increased 2 percentage points for the three months ended January 31, 2017 when compared to the same period last year. The increase in operating margin was due to revenue growth, improved gross margins, and the reduction of selling, general and administrative expenses.

Income from Operations

Income from operations for the three months ended January 31, 2017, increased \$12 million, on a corresponding revenue increases of \$14 million.

Diagnostics and Genomics

Our diagnostics and genomics business includes genomics, nucleic acid contract manufacturing and the pathology, companion diagnostics and reagent partnership businesses.

Our diagnostics and genomics business is comprised of five areas of activity providing solutions that include reagents, instruments, software and consumables, which enable customers in the clinical and life sciences research areas to interrogate samples at the cellular and molecular level. First, our genomics business includes arrays for DNA mutation detection, genotyping, gene copy number determination, identification of gene rearrangements, DNA methylation profiling, gene expression profiling, as well as next generation sequencing ("NGS") target enrichment and genetic data management and interpretation support software. Second, our nucleic acid solutions business provides equipment and

expertise focused on production of synthesized oligonucleotides under pharmaceutical good manufacturing practices ("GMP") conditions for use as active pharmaceutical ingredients ("API") in an emerging class of drugs that utilize nucleic acid molecules for disease therapy. Next, our pathology solutions business is focused on product offerings to cancer diagnostics and anatomic pathology workflows. The broad portfolio of offerings includes immunohistochemistry ("IHC"), in situ hybridization ("ISH"), hematoxylin and eosin ("H&E") staining and special staining. We also collaborate with a number of major pharmaceutical companies to develop new potential pharmacodiagnostics, also known as companion diagnostics, which may be used to identify patients most likely to benefit from a specific targeted therapy. Finally, the reagent partnership business is a provider of reagents used for turbidimetry and flow cytometry.

Table of Contents

Net Revenue

Three
Months Year over Year Change
Ended
January 31, Three
2017 2016 Months
(in millions)

Net revenue \$164 \$158 4%

Diagnostics and genomics business revenue for the three months ended January 31, 2017 increased 4 percent when compared to the same period last year. Foreign currency movements for the three months ended January 31, 2017 had an unfavorable impact of 1 percentage point on revenue. Positive growth performance was led by strength in companion diagnostics and nucleic acid solutions. Geographically, revenue increased 7 percent in the Americas, declined 14 percent in Asia Pacific excluding Japan with a 1 percentage point unfavorable currency impact, increased 5 percent in Europe with 3 percentage point unfavorable currency impact and declined 2 percent in Japan with a 7 percentage point favorable currency impact for the three months ended January 31, 2017 compared to the same period last year. Regionally, Americas and Europe led the gains. The performance in the Americas was assisted by positive growth in sales in our pathology business, continued market demand in the nucleic acid solutions and good momentum in the companion diagnostic business. Europe results were supported by our pathology, and the companion diagnostic business. Asia Pacific, our relatively smaller region, declined due to lower shipments in China and Japan. China was impacted by shipments delays due to Lunar New Year at the end of the quarter.

On January 20, 2017, Agilent completed its previously announced acquisition of Multiplicom, a leading European diagnostics company with state-of-the-art genetic testing technology and products. Multiplicom's solutions enable clinical labs to identify DNA variants associated with genetic disease and help direct cancer therapy.

The positive growth in the three months ended January 31, 2017 was led by demand for oligos in our nucleic acid solutions business, a strong ramp in our PD-L1 assays and continued revenue growth driven by Omnis reagents. We also had good momentum in our companion diagnostic business and strength in the target enrichment portfolio in our genomics business due to increasing adoption of next-generation sequencing (NGS) in clinical applications. The end markets in diagnostics and clinical research continue to be strong and growing.

Looking forward, we are optimistic about our growth opportunities in the diagnostics markets and continue to invest in expanding and improving our applications and solutions portfolio. We remain positive about our growth in these markets, as adoption of our SureSelect and HaloPlex sequencing target enrichment solutions continue, and Omnis instruments and reagents, PD-L1 assays and SureFISH gain traction with our customers in clinical oncology applications. Market demand in the nucleic acid solutions business related to therapeutic oligo programs continues to be strong. Our nucleic acid business is expanding into a new site to accommodate future production needs. We will continue to invest in research and development, and seek to expand our position in developing countries and emerging markets.

Operating Results

Three Months Ended

Year over Year Change

January 31, Three 2017 2016 Months

Gross margin 54.8% 52.7% 2 ppts Operating margin 14.3% 9.6 % 5 ppts

(in millions)

Research and development \$20 \$21 (5)% Selling, general and administrative \$47 \$47 —

Gross margins for products and services for the three months ended January 31, 2017, increased 2 percentage points when compared to the same period last year. The increase in gross margins was due to higher volumes and better business mix partially offset by wage increases.

Table of Contents

Research and development expenses for the three months ended January 31, 2017, decreased 5 percent when compared to the same period last year. This was one percentage point lower as a percentage of revenue. The marginal decrease in research and development was due to favorable currency and lower R&D project spending.

Selling, general and administrative expenses for the three months ended January 31, 2017, was flat when compared to the same period last year. Selling general and administrative expense was flat as the wage increases were offset by favorable currency movements and savings initiatives.

Operating margin for products and services increased 5 percentage points for the three months ended January 31, 2017 when compared to the same period last year. The increase in operating margin was due to higher volumes, better gross margins and favorable currency impact on expenses.

Income from Operations

Income from operations for the three months ended January 31, 2017, increased \$8 million, on a corresponding revenue increase of \$6 million. The increase was due to higher volumes and reduced research and development expenses.

Agilent CrossLab

The Agilent CrossLab business spans the entire lab with its extensive consumables and services portfolio, which is designed to improve customer outcomes. The majority of the portfolio is vendor neutral, meaning Agilent can serve and supply customers regardless of their instrument purchase choices. Solutions range from chemistries and supplies to services and software helping to connect the entire lab. Key product categories in consumables include GC and LC columns, sample preparation products, custom chemistries, and a large selection of laboratory instrument supplies. Services include startup, operational, training and compliance support, software as a service, as well as asset management and consultative services that help increase customer productivity. Custom service and consumable bundles are tailored to meet the specific application needs of various industries and to keep instruments fully operational and compliant with the respective industry requirements.

Net Revenue

Three
Months Year over Year Change
Ended
January 31, Three
2017 2016 Months
(in millions)

Net revenue \$363 \$344 6%

Agilent CrossLab business revenue for the three months ended January 31, 2017 increased 6 percent when compared to the same period last year. Foreign currency movements for the three months ended January 31, 2017 had an unfavorable impact of 1 percentage point on revenue. Geographically, revenue increased 7 percent in the Americas, increased 11 percent in Asia Pacific excluding Japan with a 3 percentage point unfavorable currency impact, declined 1 percent in Europe with 4 percentage point unfavorable currency impact and increased 9 percent in Japan with a 9 percentage point favorable currency impact for the three months ended January 31, 2017 compared to the same period last year. Although the revenue growth was observed across a broad range of the CrossLab product and service

portfolio, the growth was especially noticeable in service contracts, chemistries, remarketed instruments and education.

Agilent CrossLab business saw positive revenue growth in nearly all the key end markets. Revenue growth was led by the pharmaceutical and biotechnology market, primarily from the generics and small molecule pharmaceutical market in China, the Americas and India. From a percentage stand point, revenue growth in the diagnostic market and the food market were the highest. Revenue growth was weakest in the chemical and energy market and the forensics market.

Looking forward, we expect continued strength in the pharmaceutical and biotechnology markets to drive growth in the near term. From a geographical stand point, we remain optimistic on the market growth and market penetration opportunities in China and the emerging markets. Other factors for near term revenue growth will rely on upcoming product launches from our consumables pipeline, as well as on our investment in our laboratory enterprise offerings.
