APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except per share amounts) (Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of the financial position of Applied Industrial Technologies, Inc. (the “Company”, or “Applied”) as of December 31, 2011, and the results of its operations for the three and six month periods ended December 31, 2011 and 2010 and its cash flows for the six months ended December 31, 2011 and 2010, have been included. The condensed consolidated balance sheet as of June 30, 2011 has been derived from the audited consolidated financial statements at that date. This Quarterly Report on Form 10-Q should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended June 30, 2011.

Operating results for the three and six month periods ended December 31, 2011 are not necessarily indicative of the results that may be expected for the remainder of the fiscal year ending June 30, 2012.

Inventory

The Company uses the last-in, first-out (LIFO) method of valuing U.S. inventories. An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations are based on management’s estimates of expected year-end inventory levels and costs and are subject to the final year-end LIFO inventory determination.

During the three and six month periods ended December 31, 2010, the Company recorded overall LIFO benefits of \$1,823 and \$2,124, respectively, and the LIFO reserves were reduced by the same amounts. No comparable benefits were recorded in the three and six month periods ended December 31, 2011.

2. GOODWILL AND INTANGIBLES

The changes in the carrying amount of goodwill for the Service Center Based Distribution segment for the period ended December 31, 2011 are as follows:

Balance at July 1, 2011	\$76,981	
Goodwill acquired during the period	336	
Other, primarily currency translation	(1,800)
Balance at December 31, 2011	\$75,517	

At December 31, 2011, accumulated goodwill impairment losses, subsequent to fiscal year 2002, totaled \$36,605 and related to the Fluid Power Businesses segment.

5. BENEFIT PLANS

On December 19, 2011, the Executive Organization and Compensation Committee of the Board of Directors froze participant benefits (credited service and final average earnings) and entry into the Supplemental Executive Retirement Benefits Plan (SERP) effective December 31, 2011. This action constitutes a plan curtailment.

The plan liability was remeasured in conjunction with the curtailment using a 3.5% discount rate and participant final average earnings through the curtailment date. The plan was last remeasured at June 30, 2011, using a 4.5% discount rate. This latest remeasurement resulted in an actuarial loss (recorded in other comprehensive income) of \$302 (\$492 loss, net of income tax of \$190).

The curtailment is reflected in the Company's condensed consolidated balance sheets as: 1) a reduction to the overall SERP liability (included in postemployment benefits) of \$8,860, 2) a reduction to deferred tax assets of \$3,411 and 3) an increase in accumulated other comprehensive income of \$5,449. Prior service costs previously recorded through accumulated other comprehensive income were reclassified into the condensed statements of consolidated income (\$3,117 gross expense, net of income tax of \$1,200). The gross expense is recorded in selling, distribution and administrative expense in the second quarter of fiscal 2012.

The following table provides summary disclosures of the net periodic postemployment costs recognized for the Company's postemployment benefit plans:

Three Months Ended December 31, Components of net periodic cost:	Pension Benefits		Retiree Health Care Benefits		
	2011	2010	2011	2010	
Service cost	\$ 127	\$ 115	\$ 8	\$ 10

Applied Industrial Technologies, Inc.
Cleveland, Ohio

We have reviewed the accompanying condensed consolidated balance sheet of Applied Industrial Technologies, Inc. and subsidiaries (the "Company") as of December 31, 2011, and the related condensed statements of consolidated income for the three-month and six-month periods ended December 31, 2011 and 2010, and of consolidated cash flows for the six-month periods ended December 31, 2011 and 2010. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Company as of June 30, 2011, and the related statements of consolidated income, shareholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated August 17, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of June 30, 2011 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Applied Industrial Technologies (“Applied,” the “Company,” “We,” “Us” or “Our”) is one of North America's largest industrial distributors serving MRO, OEM and Government markets. Applied is an authorized source for a diverse range of products, including bearings, power transmission components, fluid power components and systems, industrial rubber products, linear motion components, tools, safety products, and general maintenance and mill supply products. The Company also provides customized shop services for mechanical, fabricated rubber and fluid power products, as well as services to meet storeroom management and maintenance training needs. We have a long tradition of growth dating back to 1923, the year our business was founded in Cleveland, Ohio. During the second quarter of fiscal 2012, business was conducted in the United States, Canada, Mexico and Puerto Rico from 475 facilities.

The following is Management's Discussion and Analysis of significant factors which have affected our financial condition, results of operations and cash flows during the periods included in the accompanying condensed statements of consolidated income and consolidated cash flows. When reviewing the discussion and analysis set forth below, please note that the majority of SKUs we sell in any given period were not sold in the comparable period of the prior year, resulting in the inability to quantify certain commonly used comparative metrics analyzing sales, such as changes in product mix and volume.

Overview

Consolidated net sales for the quarter ended December 31, 2011 increased \$40.9 million or 7.7% compared to the prior year quarter, with acquisitions contributing \$1.5 million or 0.3% and with unfavorable foreign currency translation of \$0.9 million or 0.2% partially offsetting the increase. Operating margin decreased to 5.8% of net sales from 6.2% for the prior year quarter largely driven by increases in SD&A expenses. Net income of \$20.9 million declined 1.2% compared to the prior year quarter. Shareholders' equity was \$646.2 million at December 31, 2011 up from the June 30, 2011 level of \$633.6 million. The current ratio was 3.1 to 1 at December 31, 2011 and 2.9 to 1 at June 30, 2011. Since November 30, 2010, we have had no borrowings outstanding under our existing credit facilities.

Applied monitors several economic indices that have been key indicators for industrial economic activity. These include the Manufacturing Capacity Utilization (MCU) index published by the Federal Reserve Board and the Purchasing Managers Index (PMI) published by the Institute for Supply Management (ISM). Historically, our performance correlates well with the MCU, which measures productivity and calculates a ratio of actual manufacturing output versus potential full capacity output. When manufacturing plants are running at a high rate of capacity, they tend to wear out machinery and require replacement parts. Our sales tend to lag the MCU on the upswing by up to six months and move closer in alignment with the declines.

These indices showed continued improvement in the industrial economy during the second quarter of fiscal 2012. The MCU for December 2011 was 75.9, compared to 75.1 in September 2011 and 74.4 in June 2011. The ISM PMI was 53.9 in December 2011 versus 51.6 in September 2011 and 55.3 in June 2011. While the index is still above 50, it is down from its year-long high of 61.4 in February 2011. We believe that the U.S. industrial economy has settled into a moderate pace of growth which will continue throughout fiscal 2012.

The number of Company associates was 4,682 at December 31, 2011, 4,640 at June 30, 2011, and 4,655 at December 31, 2010. The number of operating facilities totaled 475 at December 31, 2011 and 473 at December 31, 2010.

AND RESULTS OF OPERATIONS

Results of Operations

Three Months Ended December 31, 2011 and 2010

The following table is included to aid in review of Applied's condensed statements of consolidated income. The percent increase (decrease) column represents the change in dollars compared to the same period in the prior year.

Three Months Ended December 31,

	As a Percent of Net Sales			Percent Increase (Decrease)	
	2011		2010		
Net Sales	100.0	%	100.0	%	7.7 %
Gross Profit	27.3	%	27.2	%	7.8 %
Selling, Distribution & Administrative	21.4	%	21.0	%	9.8 %
Operating Income	5.8	%	6.2	%	0.8 %
Net Income	3.7	%	4.0	%	(1.2) %

During the quarter ended December 31, 2011, net sales increased \$40.9 million or 7.7% compared to the prior year quarter, with acquisitions accounting for \$1.5 million or 0.3%, and foreign currency translation unfavorably reducing sales by \$0.9 million or 0.2%. There were 61 selling days in both the 2011 and 2010 quarters.

Net sales from our Service Center Based Distribution segment, which is heavily focused on the MRO market, increased \$32.2 million or 7.5% during the quarter from the same period in the prior year, primarily attributed to improvement in the industrial economy. Acquisitions within this segment increased sales by \$1.5 million, or 0.4%.

Net sales from our Fluid Power Businesses segment, which is heavily focused on the OEM market, increased \$8.7 million or 8.4% during the quarter from the same period in the prior year, primarily attributed to improvements in the industrial economy.

Improvements in the industrial economy helped drive sales increases in all of the geographic areas of the Company. Sales in our U.S. operations were up \$27.3 million or 6.0%, with acquisitions accounting for \$1.0 million or 0.2% of the U.S. increase. Sales from our Canadian operations increased \$10.2 million or 16.1%. This increase includes \$0.5 million from acquisitions and \$0.4 million due to favorable foreign currency translation. Sales from our Mexican operations increased \$3.4 million or 22.6%, despite unfavorable foreign currency translation of \$1.3 million.

During the quarter ended December 31, 2011, industrial products and fluid power products accounted for 70.9% and 29.1%, respectively, of net sales as compared to 71.4% and 28.6%, respectively, for the same period in the prior year.

Our gross profit margin for the quarter increased to 27.3% compared to the prior year quarter's 27.2%. The improvement can be largely attributed to increased contribution from our U.S. service center point-of-sale margins, higher purchasing incentives, and lower scrap expense. These favorable impacts offset the non-recurrence of favorable LIFO benefits recorded in the second quarter of fiscal 2011.

Selling, distribution and administrative expense (SD&A) consists of associate compensation, benefits and other expenses associated with selling, purchasing, warehousing, supply chain management and providing marketing and

distribution of the Company's products, as well as costs associated with a variety of administrative functions such as human resources, information technology, treasury, accounting, legal, and facility related expenses. SD&A was 21.4% of net sales in the quarter ended December 31, 2011 compared to 21.0% in the prior year quarter. On an absolute basis, SD&A increased \$10.9 million or 9.8% compared to the prior year quarter. The ERP project expenses were \$4.2 million in the quarter (\$3.5 million above the prior year quarter) and acquisitions added \$0.5 million. Additionally, the Executive Organization and Compensation Committee of the Board of Directors froze participant benefits (credited service and final average earnings) and entry into the Supplemental Executive Retirement Benefits Plan (SERP) effective December 31, 2011. As a result, we incurred a curtailment loss of \$3.1 million in the second quarter of fiscal 2012. Also increasing expenses were one time costs associated with our CEO transition of \$1.3 million.

Operating income was up \$0.3 million, but as a percent of sales decreased to 5.8% from 6.2% during the prior year quarter. Operating income as a percentage of sales for the Service Center Based Distribution segment increased to 6.4% in the current

Table of ContentsAPPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES

AND RESULTS OF OPERATIONS

year quarter, from 5.9% in the prior year quarter due to improved operating leverage on sales increases. The Fluid Power Businesses operating margins decreased to 9.1% in the current year quarter from 9.6% in the prior year quarter. This reduction can be attributed to lower sales volume in one of its businesses. Higher SD&A expenses including ERP project expenses, a curtailment loss, and CEO transition related expenses contributed to the decline in total company operating income.

Interest, net, is down \$0.4 million due to repayment in the first half of fiscal 2011 of all borrowings under our credit facilities.

Other expense was \$0.8 million in the quarter driven by foreign currency transaction losses of \$1.0 million (\$0.9 million of which are unrealized). These losses were partially offset by \$0.4 million of unrealized gains on investments held by non-qualified deferred compensation trusts.

The effective income tax rate was 35.7% for the quarter ended December 31, 2011 compared to 35.8% for the quarter ended December 31, 2010. In the second quarter of fiscal 2011, we reversed a valuation allowance which reduced the effective income tax rate by 4%. This was partially offset by accrual of U.S. income taxes on Canadian subsidiaries' earnings which increased last year's second quarter effective tax rate by 2.3%. These items did not recur in fiscal 2012. The rate this quarter is impacted by a larger portion of pretax income coming from foreign jurisdictions taxed at lower rates, as well as lower effective state tax rates.

As a result of the factors addressed above, net income decreased \$0.3 million or 1.2% compared to the prior year quarter. Net income per share was \$0.49 per share for the quarter ended December 31, 2011, compared to \$0.49 in the prior year quarter.

Six Months Ended December 31, 2011 and 2010

The following table is included to aid in review of Applied's condensed statements of consolidated income. The percent increase (decrease) column represents the change in dollars compared to the same period in the prior year.

	Six Months Ended December 31,				Percent Increase (Decrease)	
	As a Percent of Net Sales					
	2011	2010				
Net Sales	100.0	100.0	%	%	8.8	%
Gross Profit	27.3	27.2	%	%	9.3	%
Selling, Distribution & Administrative	20.7	20.8	%	%	8.3	%
Operating Income	6.7	6.4	%	%	12.7	%
Net Income	4.1	4.0	%	%	12.8	%

During the six months ended December 31, 2011, net sales increased \$93.0 million or 8.8% compared to the same period in the prior year, with acquisitions accounting for \$8.3 million or 0.8%, and favorable foreign currency translation adding \$5.0 million or 0.5%. There were 125 selling days in both 2011 and 2010.

Net sales from our Service Center Based Distribution segment, which is heavily focused on the MRO market, increased \$72.1 million or 8.5% during the same period in the prior year, primarily attributed to improvement in the industrial economy. Acquisitions within this segment increased sales by \$8.3 million, or 1.0%.

Net sales from our Fluid Power Businesses segment, which is heavily focused on the OEM market, increased \$20.9 million or 10.1% during the six months ended December 31, 2011 from the same period in the prior year, primarily attributed to improvements in the industrial economy.

Improvements in the industrial economy helped drive sales increases in all of the geographic areas of the Company. Sales in our U.S. operations were up \$55.4 million or 6.1%, with acquisitions accounting for \$3.8 million or 0.4% of the U.S. increase. Sales from our Canadian operations increased \$29.7 million or 25.3%. This increase includes \$5.0 million due to favorable foreign currency translation and \$4.4 million from acquisitions. Sales from our Mexican operations increased \$7.9 million or 26.8%, with a minimal year-to-date foreign currency translation impact.

During the six months ended December 31, 2011, industrial products and fluid power products accounted for 70.7% and 29.3%, respectively, of net sales as compared to 71.4% and 28.6%, respectively, for the same period in the prior year.

AND RESULTS OF OPERATIONS

Our gross profit margin for the period increased to 27.3% compared to the prior year period's 27.2%. The improvement can be largely attributed to increased contribution from our U.S. service center point-of-sale margins, higher purchasing incentives, and lower scrap expense. These favorable impacts offset the non-recurrence of favorable LIFO benefits recorded in the prior year.

SD&A was 20.7% of net sales in the six months ended December 31, 2011 compared to 20.8% in the prior year period. On an absolute basis, SD&A increased \$18.1 million or 8.3% compared to the prior period. The ERP project expenses were \$8.0 million in the six months ended December 31, 2011 (\$7.2 million above the prior year period) and acquisitions added \$3.2 million. Additionally, the Executive Organization and Compensation Committee of the Board of Directors froze participant benefits (credited service and final average earnings) and entry into the SERP effective December 31, 2011. As a result, we incurred a curtailment loss of \$3.1 million in the second quarter of fiscal 2012. Also unfavorably increasing expenses were one time expenses associated with our CEO transition of \$1.4 million.

Operating income increased \$8.7 million to 6.7% during the period compared to 6.4% during the prior year period. Operating income as a percentage of sales for the Service Center Based Distribution segment increased to 6.4% in the current year period, from 6.0% in the prior year period. The Fluid Power Businesses operating margins increased to 9.4% in the current year period from 9.3% in the prior year period. These increases as compared to the prior year period reflect improved operating leverage on the increases in sales, although the Fluid Power Businesses segment is experiencing some sales volume declines in one of its businesses.

Interest, net, is down \$1.5 million due to repayment in the first half of fiscal 2011 of all borrowings under our credit facilities.

Other expense was \$2.7 million in the period and included \$1.6 million of foreign currency transaction losses (\$1.4 million of which are unrealized) and \$1.0 million of unrealized losses on investments held by non-qualified deferred compensation trusts.

The effective income tax rate was 35.9% for the six months ended December 31, 2011 compared to 37.5% for the same period in the prior year. In fiscal 2011, we accrued U.S. income taxes on Canadian subsidiaries' earnings which increased the effective tax rate; this was partially offset by reversal of a valuation allowance in the second quarter of fiscal 2011. These items did not recur in fiscal 2012. The rate this year is impacted by a larger portion of pretax income coming from foreign jurisdictions taxed at lower rates, as well as lower effective state tax rates.

As a result of the factors addressed above, net income increased \$5.4 million or 12.8% compared to the prior year period. Net income per share was \$1.11 per share for the six months ended December 31, 2011, compared to \$0.97 in the prior year quarter.

Liquidity and Capital Resources

Our primary source of capital is cash flow from operations, supplemented as necessary by bank borrowings or other sources of debt. At December 31, 2011, we have no outstanding borrowings. Management expects that our existing cash, cash equivalents, funds available under the revolving credit facility, cash provided from operations, and the use of operating leases will be sufficient to finance normal working capital needs in each of the countries we operate in, payment of dividends, acquisitions, investments in properties, facilities and equipment, and the purchase of additional Company common stock. Management also believes that additional long-term debt and line of credit financing could

be obtained based on the Company's credit standing and financial strength.

The Company's working capital at December 31, 2011 was \$411.0 million, compared to \$404.2 million at June 30, 2011. The current ratio was 3.1 to 1 at December 31, 2011 and 2.9 to 1 at June 30, 2011.

The Executive Organization and Compensation Committee of the Board of Directors froze participant benefits (credited service and final average earnings) and entry into the SERP effective December 31, 2011. This reduced postemployment benefits by \$8.9 million and deferred tax assets by \$3.4 million in the condensed consolidated balance sheet.

Net Cash Flows

The following table is included to aid in review of Applied's condensed statements of consolidated cash flows; all amounts are in thousands.

	Six Months Ended December 31,	
	2011	2010
Net Cash Provided by (Used in):		
Operating Activities	\$30,216	\$19,966
Investing Activities	(14,282) (41,419
Financing Activities	(34,344) (101,058
Exchange Rate Effect	(2,170) 649
Decrease in Cash and Cash Equivalents	\$(20,580) \$(121,862

Improved net income generated approximately half of the increase in net cash provided by operating activities over the prior year with quarterly variability in working capital contributing the rest.

Net cash used in investing activities during the current year was \$14.3 million; \$14.0 million was used for capital expenditures and \$1.2 million for acquisitions. These uses of cash were partially offset by \$1.0 million of proceeds from property sales. In the six months ended December 31, 2010, we used \$41.4 million; \$27.7 million was used for acquisitions and \$13.8 million for capital expenditures.

Net cash used in financing activities was \$34.3 million for the six months ended December 31, 2011. We used \$19.0 million to repurchase 664,100 shares of treasury stock and \$16.1 million to pay dividends. In the first half of fiscal 2011, financing activities used \$101.1 million of cash; we repaid \$50.0 million under our revolving credit facility, \$25.0 million under our private placement debt and \$12.8 million related to the associated cross-currency swaps. Additionally, we paid dividends of \$14.4 million. The increase in the dividend payments relates to our increased dividend rate to \$0.19 per share versus \$0.17 per share in the prior year quarter.

ERP Project

In the second quarter of fiscal 2011, Applied commenced its ERP project to transform the Company's technology platforms and enhance its business information and transaction systems for future growth. We expect the total implementation spend related to this project will be in the upper end of our previously stated range of \$70.0 million to \$75.0 million over a three to four year period. In fiscal 2011, project spend totaled \$21.1 million (\$12.5 million capital and \$8.6 million expense). During the current quarter, spending on the project totaled \$9.0 million (\$4.8 million capital and \$4.2 million expense). On a year-to-date basis, spending on the project for fiscal 2012 totaled \$18.5 million (\$10.5 million capital and \$8.0 million expense). We expect spending in fiscal year 2012 to reach \$36.0 million to \$40.5 million (\$19.0 million to \$21.5 million capital and \$17.0 million to \$19.0 million expense). We have deployed our solution in a portion of our Canadian operations and are preparing for further deployments in Canada during this fiscal year. U.S. deployments are planned for fiscal 2013 and 2014.

Share Repurchases

In October 2011, the Board of Directors authorized the repurchase of 1.5 million shares of the Company's common stock. These purchases may be made in open market and negotiated transactions, from time to time, depending upon market conditions. We acquired 24,100 shares of treasury stock on the open market in the three months ended December 31, 2011 for \$0.8 million under this new authorization. At December 31, 2011, we had authorization to repurchase an additional 1,475,900 shares. Through the six months ended December 31, 2011, we acquired 664,100

shares of treasury stock on the open market for \$19.0 million.

Borrowing Arrangements

We have a \$150.0 million revolving credit facility with a group of banks expiring in June 2012, which we intend to renew. There are no borrowings outstanding under this facility at December 31, 2011. At December 31, 2011, unused lines under this facility, net of outstanding letters of credit, total \$143.1 million and are available to fund future acquisitions or other capital and operating requirements.

We also have an uncommitted long-term financing shelf facility which expires in February 2013 and enables us to borrow up to \$100.0 million with terms of up to fifteen years. At December 31, 2011, there were no outstanding borrowings under this agreement.

Cautionary Statement Under Private Securities Litigation Reform Act

Management's Discussion and Analysis and other sections of this report, including documents incorporated by reference, contain statements that are forward-looking, based on management's current expectations about the future. Forward-looking statements are often identified by qualifiers, such as "guidance," "expect," "believe," "plan," "intend," "will," "should," "could," "would," "anticipate," "estimate," "forecast," "may," and derivative or similar words or expressions. Similarly, descriptions of objectives, strategies, plans, or goals are also forward-looking statements. These statements may discuss, among other things, expected growth, future sales, future cash flows, future capital expenditures, future performance, and the anticipation and expectations of the Company and its management as to future occurrences and trends. The Company intends that the forward-looking statements be subject to the safe harbors established in the Private Securities Litigation Reform Act of 1995 and by the Securities and Exchange Commission in its rules, regulations and releases.

Readers are cautioned not to place undue reliance on any forward-looking statements. All forward-looking statements are based on current expectations regarding important risk factors, many of which are outside the Company's control. Accordingly, actual results may differ materially from those expressed in the forward-looking statements, and the making of those statements should not be regarded as a representation by the Company or any other person that the results expressed in the statements will be achieved. In addition, the Company assumes no obligation publicly to update or revise any forward-looking statements, whether because of new information or events, or otherwise, except as may be required by law.

Important risk factors include, but are not limited to, the following: risks relating to the operations levels of our customers and the economic factors that affect them; changes in the prices for products and services relative to the cost of providing them; reduction in supplier inventory purchase incentives; loss of key supplier authorizations, lack of product availability, or changes in supplier distribution programs; the cost of products and energy and other operating costs; changes in customer preferences for products and services of the nature and brands sold by us; changes in customer procurement policies and practices; the potential for product shortages if suppliers are unable to fulfill in a timely manner increased demand in the economic recovery; competitive pressures; our reliance on information systems; our ability to implement our ERP system in a timely, cost-effective, and competent manner, and to capture its planned benefits while maintaining an adequate internal control environment; the impact of economic conditions on the collectability of trade receivables; reduced demand for our products in targeted markets due to reasons including consolidation in customer industries and the transfer of manufacturing capacity to foreign countries; our ability to retain and attract qualified sales and customer service personnel; our ability to identify and complete acquisitions, integrate them effectively, and realize their anticipated benefits; the variability and timing of new business opportunities including acquisitions, alliances, customer relationships, and supplier authorizations; the incurrence of debt and contingent liabilities in connection with acquisitions; our ability to access capital markets as needed on reasonable terms; disruption of operations at our headquarters or distribution centers; risks and uncertainties associated with our foreign operations, including volatile economic conditions, political instability, cultural and legal differences, and currency exchange fluctuations; the potential for goodwill and intangible asset impairment; changes in accounting policies and practices; organizational changes within the Company; the volatility of our stock price and the resulting impact on our consolidated financial statements; risks related to legal proceedings to which we are a party; adverse regulation and legislation, including potential changes in tax regulations (e.g., those affecting the use of the LIFO inventory accounting method and the taxation of foreign-sourced income); and the occurrence of extraordinary events (including prolonged labor disputes, natural events and acts of God, terrorist acts, fires, floods, and accidents). Other factors and unanticipated events could also adversely affect our business, financial

condition or results of operations. We discuss certain of these matters more fully in our Annual Report on Form 10-K for the year ended June 30, 2011.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company has evaluated its exposure to various market risk factors, including its primary market risk exposure through the effects of changes in exchange rates. We occasionally utilize derivative instruments as part of our overall financial risk management policy, but do not use derivative instruments for speculative or trading purposes.

For quantitative and qualitative disclosures about market risk, see Item 7A "Quantitative and Qualitative Disclosures About Market Risk" in our Annual Report on Form 10-K for the year ended June 30, 2011.

APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES
ITEM 4: CONTROLS AND PROCEDURES

The Company's management, under the supervision and with the participation of the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), evaluated the effectiveness of the Company's disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e), as of the end of the period covered by this report. Based on that evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures are effective.

During the second quarter of fiscal 2012, there were no changes in the Company's internal controls or in other factors that materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

The Company is a party to pending legal proceedings with respect to various product liability, negligence, and other matters. Although it is not possible to predict the outcome of these proceedings or the range of possible loss, the Company believes, based on circumstances currently known, that the likelihood is remote that the ultimate resolution of any of these proceedings will have, either individually or in the aggregate, a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Repurchases in the quarter ended December 31, 2011 were as follows:

Period	(a) Total Number of Shares	(b) Average Price Paid per Share (\$)	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1)
October 1, 2011 to October 31, 2011	—	—	—	1,500,000
November 1, 2011 to November 30, 2011	400	33.87	400	1,499,600
December 1, 2011 to December 31, 2011	23,700	33.62	23,700	1,475,900
Total	24,100	33.63	24,100	1,475,900

On October 25, 2011, the Board of Directors authorized the purchase of up to 1.5 million shares of the Company's (1) common stock. The Company publicly announced the authorization that day. Purchases can be made in the open market or in privately negotiated transactions.
