Amounts less than \$500,000

Nature and purpose of reserves

(1) Asset revaluation reserve

Prior to 1 October 2000, the asset revaluation reserve was used to record certain increments and decrements on the revaluation of non-current assets. As the Group has elected to adopt deemed cost in accordance with AASB 1041, the balance of the reserve is not available for future non-current asset write downs while the Group remains on the deemed cost basis

(2) Foreign currency translation reserve

Exchange differences arising on translation of foreign self-sustaining operations are taken to the foreign currency translation reserve, as described in accounting policy note 1

(3) General reserve and Capital reserve

The balance of these reserves have resulted from prior period allocations of retained profits and maybe released to retained profits

Notes to the Financial Statements

Our critical accounting policies are described on page 79.

1: Accounting Policies

(i) Basis of preparation

This general purpose financial report complies with the accounts provisions of the Banking Act, applicable Australian Accounting Standards, the accounts provisions of the Corporations Act 2001, Urgent Issues Group Consensus Views and other authoritative pronouncements of the Australian Accounting Standards Board. The accounting policies are consistent with those of the previous year.

Certain disclosures required by the United States Securities and Exchange Commission in respect of foreign registrants have also been included in this report.

The financial report has been prepared in accordance with the historical cost convention as modified by the revaluation of trading instruments, life insurance assets and liabilities and the deemed cost of properties. The preparation of the financial report requires the use of management estimates. Such estimates may require review in future periods.

The Company is a company of the kind referred to in Australian Securities and Investments Commission class order 98/100, dated 10 July 1998. Consequently, amounts in the financial report have been rounded to the nearest million dollars except where otherwise indicated.

All amounts are expressed in Australian dollars, unless otherwise stated. Where necessary, amounts shown for the previous year have been reclassified to facilitate comparison.

(ii) Consolidation

The financial statements consolidate the financial statements of Australia and New Zealand Banking Group Limited (the Company) and its controlled entities.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Shares in controlled entities are stated at deemed cost in the statement of financial position.

Where controlled entities and associates have been sold or acquired during the year, their operating results have been included to the date of disposal or from the date of acquisition.

The Group adopts the equity method of accounting for associates and the Group's interest in joint venture entities. Shares in associates and joint venture entities are stated in the consolidated statement of financial position at cost plus the Group's share of post acquisition net assets. The Group's share of results of associates and joint venture entities is included in the consolidated statement of financial performance.

The Group may invest in or establish special purpose companies, or vehicles, to enable it to undertake specific types of transactions. Where the Group controls such vehicles, they are consolidated into the Group financial results.

(iii) Goodwill

Goodwill, representing the excess of the purchase consideration over the fair value of the identifiable net assets of a controlled entity at the date of gaining control, is recognised as an asset and amortised on a straight line basis over the period during which the benefits are expected to arise, not exceeding 20 years.

The unamortised balance of goodwill and the period of amortisation are reviewed annually. Where the balance exceeds the value of expected future benefits, the difference is charged to the statement of financial performance.

(iv) Foreign currency

Assets and liabilities denominated in foreign currencies are translated into Australian dollars at the rates of exchange ruling at balance date.

Revenues and expenses of overseas branches and controlled entities are translated at average exchange rates for the year.

Net translation differences arising from the translation of overseas branches and controlled entities considered to be self-sustaining operations are included in the foreign currency translation reserve, after allowing for those positions hedged by foreign exchange contracts and related currency borrowings.

(v) Fee income

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Fee and commission income are brought to account on an accruals basis. Yield-related front-end application fees received are deferred and accrued to income as an adjustment of yield over the period of the loan. Non yield-related application and activation lending fees received are recognised as income no later than when the loan is disbursed or the commitment to lend expires. Fees received on an ongoing basis that represent the recoupment of the costs of providing service (for example, maintaining and administering existing facilities) are taken to income when the fees are receivable.

(vi) Net loans and advances

Net loans and advances include direct finance provided to customers such as bank overdrafts, credit cards, term loans, lease finance, hire purchase finance and commercial bills.

Overdrafts, credit cards and term loans are carried at principal balances outstanding. Interest on amounts outstanding is accounted for on an accruals basis.

Finance leases and hire purchase contracts are accounted for using the finance method whereby income is taken to account progressively over the life of the lease or the contract in proportion to the outstanding investment balance.

Customer financing through redeemable preference shares is included within net loans and advances. Dividends received on redeemable preference shares are taken to the statement of financial performance as part of interest income.

All loans are subject to regular scrutiny and graded according to the level of credit risk. Loans are classified as either productive or non-accrual. The Group has adopted the Australian Prudential Regulation Authority Impaired Assets Guidelines in assessing non-accrual loans. Non-accrual loans include loans where the accrual of interest and fees has ceased due to doubt as to full recovery, and loans that have been restructured with an effective yield below the Group's average cost of funds at the date of restructuring. A specific provision is raised to cover the expected loss, where full recovery of principal is doubtful.

Restructured loans are loans with an effective yield above the Group's cost of funds and below the yield applicable to a customer of equal credit standing.

Cash receipts on non-accrual loans are, in the absence of a contrary agreement with the customer, applied as income or fees in priority to being applied as a reduction in principal, except where the cash receipt relates to proceeds from the sale of security.

(vii) Bad and doubtful debts

Each month the Group recognises an expense for credit losses based on the expected long term loss ratio for each part of the loan portfolio. The monthly charge is transferred to the General Provision which is maintained to cover losses inherent within the Group's existing loan portfolio.

The method used by the Group for determining this monthly expense charge is referred to as economic loss provisioning (ELP). The Group uses ELP models to calculate the expected loss by considering:

the history of credit loss for each type and risk grade of lending; and

the size, composition and risk profile of the current loan portfolio.

The Group regularly reviews the assumptions used in the ELP models. These reviews are conducted in recognition of the subjective nature of ELP methodology. Methodologies are updated as improved analysis becomes available. In addition, the robustness of outcomes is reviewed considering the Group's actual loss experience, and losses sustained by other banks operating in similar markets.

To the extent that credit losses are not consistent with previous loss patterns used to develop the assumptions within the ELP methodology, the existing General Provision may be determined to be either in excess of or insufficient to cover credit losses not yet specifically identified. As a result of the reassessments, ELP charge levels may be periodically increased or decreased.

Specific provisions are maintained to cover identified doubtful debts. All known bad debts are written off in the year in which they are identified. The specific provision requirement (representing new and increased specific provisions less specific provision releases) is transferred from the general provision to the specific provision. Recoveries, representing excess transfers to the specific provision, are credited to the general provision.

Provisions for doubtful debts are deducted from loans and advances in the statement of financial position.

(viii) **Acceptances**

Commercial bills accepted but not held in portfolio are accounted for and disclosed as a liability with a corresponding contra asset.

The Group's own acceptances discounted are held as part of either the trading securities portfolio or the loan portfolio, depending on whether, at the time of such discount, the intention was to hold the acceptances for resale or until maturity.

(ix) **Trading securities**

Securities held for trading purposes are recorded at market value. Unrealised gains and net losses on revaluation are taken to the statement of financial performance.

(x) Investment securities

Investment securities are those which the Group intends and has the ability to hold until maturity. Such securities are recorded at cost or at cost adjusted for amortisation of premiums or discounts.

Premiums and discounts are capitalised and amortised from the date of purchase to maturity. Interest and dividend income is accrued. Changes in market values of securities are not taken into account unless there is considered to be a permanent diminution in value.

(xi) Repurchase agreements

Securities sold under repurchase agreements are retained in the financial statements and a counterparty liability is disclosed under the classifications of Due to other financial institutions or Deposits and other borrowings. The difference between the sale price and the repurchase price is amortised over the life of the repurchase agreement and charged to interest expense in the statement of financial performance.

Securities purchased under agreements to resell are recorded as Liquid assets, Net loans and advances, or Due from other financial institutions, depending on the term of the agreement and the counterparty.

(xii) Derivative financial instruments

Derivative financial instruments (derivatives) are contracts whose value is derived from one or more underlying financial instruments or indices. They include swaps, forward rate agreements, futures, options and combinations of these instruments.

Trading derivatives, comprising derivatives entered into for customer-related or proprietary reasons or for hedging the trading portfolio, are measured at fair value and all gains and losses are taken to the statement of financial performance. Fair value losses arising from trading derivatives are not offset against fair value gains unless a legal right of set-off exists.

Derivatives designated, and effective, as hedges of underlying non-trading exposures are accounted for on the same basis as the underlying exposures. To be designated as a hedge, the fair value of the hedge must move inversely with changes in the fair value of the underlying exposure.

Gains and losses resulting from the termination of a derivative that was designated as a hedge of non-trading exposures are deferred and amortised over the remaining period of the original term covered by the terminated instrument where the underlying exposure still exists. Where the underlying exposure no longer exists, the gains and losses are recognised in the statement of financial performance.

Gains and losses on derivatives related to hedging exposures arising from anticipated transactions are deferred and recognised in the financial statements when the anticipated transaction occurs.

These gains and losses are deferred only to the extent that there is an offsetting unrecognised (unrealised) gain or loss on the exposures being hedged. Deferred gains and losses are amortised over the expected term of the hedged exposure.

Gains and losses that arise prior to and upon the maturity of transactions entered into under hedge rollover strategies are deferred and included in the measurement of the hedged anticipated transaction if the transaction is still expected to occur. If the forecasted transaction is no longer expected to occur, the gains and losses are recognised immediately in the statement of financial performance.

(xiii) Premises and equipment

Premises and equipment (including computer equipment) are carried at cost less depreciation or amortisation.

Profit or loss on the disposal of premises and equipment is determined as the difference between the carrying amount of the assets at the time of disposal and the proceeds of disposal, and is included in the results of the Group in the year of disposal.

Assets other than freehold land are depreciated at rates based upon their expected useful lives to the Group, using the straight line method. The depreciation rates used for each class of asset are:

| | |
|-----------------------------|--------------|
| Buildings | 1% |
| Building integrals | 10% |
| Furniture & equipment | 10% |
| Computer & office equipment | 12.5% to 33% |
| Software | 14% to 33% |

Leasehold improvements are amortised on a straight line basis over the remaining period of each lease.

Costs incurred in acquiring and building software and computer systems are capitalised as fixed assets and expensed as depreciation over periods of between 3 and 5 years except for the branch front end applications where 7 years is used. Costs incurred in planning or evaluating software proposals, or in maintaining systems after implementation, are not capitalised.

The carrying values of all non-current assets have been assessed and are not in excess of their recoverable amounts. The expected net cash flows included in determining recoverable amounts of non-current assets are discounted to their present values using a market determined, risk adjusted discount rate. The discount rate used ranged from 9% to 15% depending on the nature of the assets.

(xiv) **Income tax**

The Group adopts the liability method of tax effect accounting whereby income tax expense is calculated based on accounting profit adjusted for permanent differences. Permanent differences are items of revenue and expense which are recognised in the statement of financial performance but are not part of taxable income or vice versa.

Future tax benefits and deferred tax liabilities relating to timing differences and tax losses are carried forward at tax rates applicable to future periods. These future tax benefits are not brought to account unless realisation of the asset is assured beyond reasonable doubt. Future tax benefits relating to tax losses are only carried forward where realisation of the benefit is considered virtually certain.

Provision for Australian income tax is made where the earnings of overseas controlled entities are subjected to Australian tax under the attribution rules for the taxation of foreign sourced income.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Otherwise, no provision is made for overseas withholding tax or Australian income tax which may arise on repatriation of earnings from overseas controlled entities, where it is expected these earnings will be retained by those entities to finance their ongoing business.

(xv) Employee entitlements

The amounts expected to be paid in respect of employees entitlements to annual leave are accrued at current salary rates including on-costs. Liability for long service leave is accrued in respect of all applicable employees at the present value of future amounts expected to be paid.

(xvi) Superannuation commitments

Contributions, which are determined on an actuarial basis, to superannuation schemes are charged to personnel expenses in the statement of financial performance.

Any aggregate deficiencies arising from the actuarial valuations of the Group's defined benefit schemes have been provided for in the financial statements.

The assets and liabilities of the schemes have not been consolidated as the Company does not have direct or indirect control of the schemes.

(xvii) Leasing

Leases entered into by the Group as lessee are predominantly operating leases, and the operating lease payments are included in the statement of financial performance in equal instalments over the lease term.

(xviii) Goods and services tax

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the Australian Tax Office (ATO). In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the ATO is included as an other asset or liability in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis. The GST components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the ATO are classified as operating cash flows.

(xix) Life insurance

The Group's life insurance business was conducted through ANZ Life Assurance Company Limited until 30 April 2002 and its results consolidated until that date.

Components of life insurance margin on services operating income disclosed are premium revenue and related revenue, investment revenue, claims expense and insurance policy liabilities expense (refer note 41).

Premiums with no due date are recognised as revenue on a cash received basis. Premiums with a regular due date are recognised as revenue on an accruals basis. Unpaid premiums are only recognised as revenue during the days of grace or where secured by the surrender value of the policy and are included as Other Assets in the balance sheet.

Claims under investment-linked business are recognised when the policy ceases to participate in the earnings of the fund. Claims on non investment-linked business are recognised when the liability to the policyowner under the policy contract has been established or upon notification of the insured event depending on the type of claim.

Policy liabilities and other liabilities are measured at net present value of estimated future cash flows. Changes in net present values are recognised in the statement of financial performance as revenue or expenses in the financial year in which they occur.

All assets are measured at net market values as at the reporting date. Changes in the net market are recognised in the statement of financial performance as revenue or expenses in the financial year in which they occur.

On 1 May 2002 the Group's life insurance business was transferred to a joint venture entity, (see note 46) which is accounted for in accordance with the equity method of accounting. The joint venture adopts similar accounting policies to those described here.

(xx) Capitalised expenses

Expenses related to the acquisition of interest earning assets are initially recognised as part of the cost of acquiring the asset and written-off as an adjustment to its yield over its expected life. For assets subject to prepayment, expected life is determined on the basis of the historical behaviour of the asset portfolio, taking into account prepayments.

Notes to the Financial Statements

2: Income

| | 2002 \$m | Consolidated 2001 \$m | 2000 \$m | The Company 2002 \$m | | 2001 \$m |

| Total expenses | 7,924 | 9,510 | 10,740 | 6,201 | 7,469 |

(1) In addition, for 2000, restructuring costs of \$361 million (Company \$276 million) have been treated as abnormal

(2) In addition, there is a notional goodwill amortisation charge (2002: \$18 million; 2001: nil) included in the calculation of the share of associates income from the ING Australia joint venture

4: Equity Instruments Issued to Employees

Under existing Australian Accounting Standards, equity instruments issued to employees are not required to be expensed. The impact of expensing options(1), and shares issued under the \$1,000 employee share plan, have been calculated and are disclosed below.

| | Consolidated 2002 \$m |
|--|--------------------------------------|
| Net profit attributable to shareholders of the Company | 2,322 |
| Expenses attributable to: | |
| Options issued to Management Board(1) | (7) |
| Options issued to general management(1) | (19) |
| Shares issued under \$1,000 employee share plan | (18) |
| Revised net profit attributable to shareholders of the Company | 2,278 |
| Revised earnings per share basic (cents) | 144.4 |

(1) Based on fair values estimated at grant date using a modified Black Scholes model. Value of options amortised over vesting period

5: Remuneration of Auditors

| | 2002 \$ 000 | Consolidated 2001 \$ 000 | 2000 \$ 000 | The Company 2002 \$ 000 | 2001 \$ 000 |

By virtue of an Australian Securities and Investments Commission class order dated 30 September 1998, the auditors of Australia and New Zealand Banking Group Limited and its related bodies corporate, KPMG, have been exempted from compliance with the requirements of Section 324 of the Corporations Act 2001. The class order exemption applies in that partners and associates of KPMG not engaged on the audit of Australia and New Zealand Banking Group Limited and its related bodies corporate maybe indebted to the Company, provided that such indebtedness arose upon ordinary commercial terms and conditions.

It is Group policy that KPMG Australia or any of its related practices may provide assurance and other audit-related services that, while outside the scope of the statutory audit, are consistent with the role of auditor. These include regulatory and prudential reviews requested by the Company's regulators such as the Australian Prudential Regulation Authority. KPMG Australia or any of its related practices may not provide services that are perceived to be materially in conflict with the role of auditor. These include consulting advice and subcontracting of operational activities normally undertaken by management, and engagements where the auditor may ultimately be required to express an opinion on its own work. However, non-audit services that are not perceived to be materially in conflict with the role of auditor maybe provided by KPMG Australia or any of its related practices subject to the approval of the ANZ Audit Committee.

-
- (1) Includes completion accounts review
 - (2) Includes services for the auditor review of financial information other than financial reports including prudential supervision reviews for central banks, prospectus reviews, trust audits and other audits required for local statutory purposes
 - (3) Includes due diligence services principally related to ING joint venture. Under the policy adopted by ANZ in April 2002, due diligence services are no longer provided by the external auditor, unless specifically approved by the Board
 - (4) KPMG sold its consulting business effective 1 September 2001

8: Dividends

| | 2002 | Consolidated | 2000 | 2002 | The Company | 2001 |
|-------------------------------------|--------------|--------------|------------|--------------|-------------|--------------|
| | \$m | 2001 | \$m | \$m | \$m | \$m |
| | | \$m | | | | |
| Ordinary dividends | | | | | | |
| Interim dividend | 583 | 491 | 445 | 583 | | 491 |
| Proposed final dividend | 692 | 595 | 528 | 692 | | 595 |
| Bonus option plan adjustment | (23) | (24) | (32) | (23) | | (24) |
| Dividends on ordinary shares | 1,252 | 1,062 | 941 | 1,252 | | 1,062 |

A final dividend of 46 cents, fully franked, is proposed to be paid on each fully paid ordinary share on 13 December 2002 (2001: final dividend of 40 cents, paid 14 December 2001, fully franked; 2000: final dividend of 35 cents, paid 15 December 2000, fully franked). The 2002 interim dividend of 39 cents, paid 1 July 2002, was fully franked, (2001: interim dividend of 33 cents, paid 2 July 2001, fully franked; 2000: interim dividend of 29 cents, paid 3 July 2000, fully franked).

The tax rate applicable to the franking credits attached to the interim dividend and to be attached to the proposed final dividend is 30% (2001: 30%, 2000: 34%).

| | 2002 | Consolidated | 2000 | 2002 | The Company | 2001 |
|--------------------------------|------|--------------|------|------|-------------|------|
| | \$m | 2001 | \$m | \$m | \$m | \$m |
| | | \$m | | | | |
| Dividends on preference shares | 117 | 119 | 102 | | | |

The Company has issued 124,032,000 preference shares, raising USD 775 million via Trust Securities issues. The Trust Securities carry an entitlement to a distribution of 8% (USD 400 million) or 8.08% (USD 375 million). The amounts are payable quarterly in arrears. Payment dates are the fifteenth days of January, April, July and October in each year.

Dividend Franking Account

The amount of franking credits available to the Company for the subsequent financial year is nil (2001 and 2000: nil), after adjusting for franking credits that will arise from the payment of tax on Australian profits for the 2002 financial year, less franking credits which will be utilised in franking the proposed final dividend and franking credits that may not be accessible by the Company at present.

From 1 July 2002 the franking credits available have been measured in accordance with the New Business Tax System (Imputation) Act 2002 as the amount of income tax paid rather than being based on after-tax profits as in previous periods.

This change in the basis of measurement does not change the value of franking credits to shareholders who may be entitled to franking credit balances.

Restrictions which Limit the Payment of Dividends

There are presently no significant restrictions on the payment of dividends from controlled entities to the Company. Various capital adequacy, liquidity, statutory reserve and other prudential requirements must be observed by certain controlled entities and the impact on these requirements caused by the payment of cash dividends is monitored. In practice however, there are significant tax considerations associated with the receipt of dividends from controlled entities by a company. Payment of dividends from domestic controlled entities constitutes assessable income to a recipient Australian company. Where the dividend is received from a company within the wholly-owned group or, if the payer company is not wholly-owned, (up to 30 June 2002) to the extent that the dividend is franked, the recipient company is generally entitled to a rebate of tax otherwise payable on the assessable dividend. With effect from 1 July 2002, for franked dividends received from non wholly-owned companies a gross up and offset mechanism applies. Should the recipient company's total assessable income be less than the rebateable/grossed up dividend income, or it be in a tax loss position, the rebate/offset will reduce or be eliminated. The Group therefore acts to preserve the availability of rebates/offsets by avoiding the payment of rebateable/grossed up dividends by domestic controlled entities in this situation.

Payments of dividends from overseas controlled entities may attract withholding taxes which have not been provided for in these financial statements.

There are presently no restrictions on payment of dividends by the Company. Reductions of shareholders' equity through payment of cash dividends is monitored having regard to the regulatory requirements to maintain a specified capital adequacy ratio. In particular, the Australian Prudential Regulation Authority has advised Australian banks that a bank under its supervision must consult with it before declaring a dividend if the bank has incurred a loss, or proposes to pay dividends which exceed the level of profits earned.

Dividend Reinvestment Plan

During the year, 2,533,819 ordinary shares were issued at \$18.33 per share, and 2,484,694 ordinary shares at \$19.24 per share, under the Dividend Reinvestment Plan.

Bonus Option Plan

Dividends paid during the year have been reduced by way of certain shareholders participating in the Bonus Option Plan and forgoing all or part of their right to dividends in return for the receipt of bonus shares.

During the year, 679,408 ordinary shares were issued at \$18.33 per share, and 672,437 ordinary shares at \$19.24 per share, under the Bonus Option Plan.

| Declared dividend \$m | Bonus options exercised \$m | Amount paid \$m |

(1) Overdraft includes credit cards and unsecured lending

(2) Personal includes non-business loans to individuals through overdrafts, personal loans, credit cards and fully drawn advances

(3) Real estate mortgage includes residential and commercial property exposure. Loans within this category are for the purchase of such properties and must be secured by property

(4) Housing loans and other loans that are capped for an initial period are fixed interest rate loans and their maturities based on the principal repayments due over the term of the loan

| Total | 1,258 | 585 | 29 | 1,059 | 509 | 22 |

(1) A loan's performance is assessed against its contractual repayment schedule

Interest and other income forgone on impaired assets

The following table shows the estimated amount of interest and other income that would have been recorded had interest and other income on non-accrual loans and unproductive facilities been accrued to income (or, in the case of restructured loans, had interest and other income been accrued at the original contract rate), and the amount of interest and other income received with respect to such loans.

| | Consolidated | | The Company | |

| Overseas central banks | 178 | 133 | 138 | 98 |

19: Shares in Controlled Entities, Associates and Joint Venture Entities

Refer notes 44 to 46 for details.

| | Consolidated | | The Company | |
|--|--------------|------|-------------|-------|
| | 2002 | 2001 | 2002 | 2001 |
| | \$m | \$m | \$m | \$m |
| Total shares in controlled entities | | | 6,238 | 6,088 |
| Total shares in associates | 99 | 64 | 18 | 13 |
| Total shares in joint venture entity | 1,593 | | | |
| Total shares in controlled entities, associates and joint venture entities | 1,692 | 64 | 6,256 | 6,101 |

Acquisitions of controlled entities

There were no material controlled entities acquired during the year ended 30 September 2002 and 2001.

Disposals of controlled entities

On 30 April 2002, ANZ formed a joint venture with ING Australia Pty Ltd. ANZ have a 49% equity interest in the joint venture and 49% of the voting rights. ANZ sold a controlling interest in ANZ Life Assurance Company Limited, ANZ Managed Investments Limited, ANZ General Insurance Limited and Investment and Administration Services Limited to the joint venture representing net assets of \$392 million (fair value of business \$879 million) as well as paying \$960 million in cash. ING also contributed net assets of \$1,091 million into the joint venture.

ANZ's businesses were sold at fair value to the joint venture and a profit on sale of \$170 million (after tax and transaction costs) was recognised.

Subsequent to 30 April 2002 ANZ accounts for its interest in the joint venture using the equity method of accounting. The results of the joint venture have been included in the consolidated financial statements since the date of acquisition.

There were no material controlled entities disposed of during the year ended 30 September 2001.

20: Deferred Tax Assets

| | Consolidated | | The Company | |
|--------------------------------------|--------------|--------------|-------------|-------------|
| | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m |
| Future income tax assets comprises | | | | |
| General provision for doubtful debts | 489 | 436 | 413 | 383 |
| Other | 729 | 764 | 422 | 483 |
| Total income tax assets | 1,218 | 1,200 | 835 | 866 |
| Future income tax assets | | | | |
| Australia | 883 | 920 | 644 | 714 |
| Overseas | 335 | 280 | 191 | 152 |
| | 1,218 | 1,200 | 835 | 866 |

Certain potential future income tax assets within the Group have not been recognised as assets because recovery cannot be regarded as virtually certain. These potential benefits arise from tax losses and timing differences (benefits could amount to \$6 million, 2001: \$7 million), and from realised capital losses (benefits could amount to \$2 million, 2001: nil).

These benefits will only be obtained if

- (i) the relevant entities derive future assessable income of a nature and amount sufficient to enable the benefit of the taxation deductions to be realised;
- (ii) the relevant entities continue to comply with the conditions for deductibility imposed by law; and
- (iii) there are no changes in taxation legislation adversely affecting the benefit of the taxation deductions.

21: Goodwill

| | Consolidated | | The Company | |
|--------------------------|--------------|-------------|-------------|-------------|

| At cost | 515 | 349 | 474 | 314 |
| Provision for amortisation | (96) | (46) | (85) | (42) |
| | 419 | 303 | 389 | 272 |
| Capital works in progress | | | | |
| At cost | 32 | 29 | 24 | 18 |
| Total premises and equipment | 1,464 | 1,361 | 866 | 731 |

(1) In accordance with AASB 1041 this represents deemed cost

From 1 October 2000 as allowed by AASB 1041 Revaluation of Non Current Assets the Group elected to revert to the cost basis for measuring the class of assets land and building.

All premises over a specific value are subject to external valuation at least once every three years by independent valuers. Valuations are based on the estimated open market value and assume that the premises concerned continue to be used in their existing manner by the Group.

The independent valuation of the Group's freehold land and buildings carried out as at 30 June 2002 by Jones Lang La Salle Advisory resulted in a valuation of \$464 million (The Company: \$32 million). As land and buildings are recorded at cost, the valuation has not been brought to account.

24: Due to Other Financial Institutions

| | Consolidated | | The Company | |
|--|---------------|---------------|---------------|---------------|
| | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m |

| Total deposits and other borrowings | 113,297 | 104,874 | 85,258 | 76,552 |

(1) Included in this balance is debenture stock of controlled entities. The debenture stock is secured by a trust deed and collateral debentures, giving floating charges upon the undertaking and all the assets of the entities involved other than land and buildings. All subsidiaries of the controlled entities (except for some subsidiaries which have been placed or are expected to be placed in voluntary deregistration and have minimal book value) have guaranteed the payment of principal, interest and other monies in relation to all debenture stock and unsecured notes issued by the controlled entity. No subsidiaries have given any charge over their respective assets in support of the above mentioned guarantees

26: Income Tax Liabilities

(1) LIBOR is an average of rates offered on loans to leading banks in the London inter-bank market

(2) As at 30 September 1998 principal of note outstanding was US\$200 million. Note is repayable over 5 years (\$40 million (20%) per annum), commencing in October 1998

- (3) Prior to January 2002, the interest rate was LIBOR+ 1.03
- (4) After March 2007 rate changes to BBSW+ 1.07

Loan capital is subordinated in right of payment to the claims of depositors and all other creditors of the Company and its controlled entities which have issued the notes, and constitutes tier 2 capital as defined by the Australian Prudential Regulation Authority for capital adequacy purposes

31: Share Capital

| Number of issued shares | The Company | | |
|--|----------------------|----------------------|----------------------|
| | 2002 | 2001 | 2000 |
| Ordinary shares each fully paid | 1,503,886,082 | 1,488,267,146 | 1,506,210,690 |
| Ordinary shares each paid to 10 cents per share(1) | | | 73,000 |
| Preference shares each fully paid | 124,032,000 | 124,032,000 | 124,032,000 |
| Total number of issued shares | 1,627,918,082 | 1,612,299,146 | 1,630,315,690 |

(1) 90 cents outstanding per share.

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

| Number of issued shares | The Company | | |

Preference shares

The preference shares are fully paid non-converting non-cumulative preference shares issued for USD 6.25 per share via Trust Securities Issues in 1998.

The Trust Securities are mandatorily exchangeable for the preference shares issued by the Company, and carry an entitlement to a non-cumulative trust distribution of 8.00% or 8.08% per annum payable quarterly in arrears. The Trust Securities were issued by a non diversified closed end management investment company registered under the US Investment Company Act of 1940. The preference shares themselves carry no present entitlement to dividends. Distribution to investors in the Trust Securities are funded by income distributions made by the Group.

Upon maturity of the Trust Securities in 2048, investors will mandatorily exchange the Trust Securities for the preference shares and thereupon the preference shares will carry an entitlement to non-cumulative dividends of 8.00% or 8.08% per annum payable quarterly in arrears. The mandatory exchange of the Trust Securities for the preference shares may occur earlier at the Company's option or in specified circumstances.

With the prior consent of the Australian Prudential Regulation Authority, the preference shares are redeemable at the Company's option after 5 years, or within 5 years in limited circumstances. The entitlement of investors to distributions on the Trust Securities will cease on redemption of the preference shares.

The transaction costs arising on the issue of these instruments were recognised directly in equity as a reduction of the proceeds of the equity instruments to which the costs relate.

| Total outside equity interests | 17 | | 13 |

33: Capital Adequacy

The Australian Prudential Regulation Authority (APRA) adopts a risk-based capital assessment framework for Australian banks based on internationally accepted capital measurement standards. This risk-based approach requires eligible capital to be divided by total risk weighted assets, with the resultant ratio being used as a measure of a bank's capital adequacy.

Capital is divided into tier 1, or core capital, and tier 2, or supplementary capital. For capital adequacy purposes, eligible tier 2 capital cannot exceed the level of tier 1 capital. Banks are required to deduct from total capital any strategic holdings of other banks' capital instruments and investments in entities engaged in life insurance, funds management and securitisation activities. Under APRA guidelines, banks must maintain a ratio of qualifying capital to risk weighted assets of at least 8 per cent.

The measurement of risk weighted assets is based on: a) A credit risk-based approach wherein risk weightings are applied to statement of financial position assets and to credit converted off balance sheet exposures. Categories of risk weights are assigned based upon the nature of the counterparty and the relative liquidity of the assets concerned and: b) The recognition of risk weighted assets attributable to market risk arising from trading and commodity positions. Trading and commodity balance sheet positions do not attract a risk weighting under the credit risk-based approach.

34: Average Balance Sheet and Related Interest

Averages used in the following table are predominantly daily averages. Interest income figures are presented on a tax-equivalent basis. Non-accrual loans are included under the interest earning asset category Loans, advances and bills discounted. Intragroup interest earning assets and interest bearing liabilities are treated as external assets and liabilities for the geographic segments.

36: Market Risk

Market risk is the risk to earnings arising from changes in interest rates, currency exchange rates, or from fluctuations in bond, commodity or equity prices.

The Board of Directors through the Risk Management Committee, a Committee of the Board, has responsibility for oversight of market risk within the Group. Routine management of market risk is delegated to two senior management committees chaired by the Chief Financial Officer. The Credit and Trading Risk Committee is responsible for traded market risk, while the Group Asset and Liability Committee is responsible for non-traded market risk (or balance sheet risk).

The Credit and Trading Risk Committee monitors traded market risk exposures (including Value at Risk and Stress Testing) and is responsible for authorising the trading risk limit framework. The Group Asset and Liability Committee reviews balance sheet based risk measures and strategies on a monthly basis.

The Value at Risk (VaR) Measure

A key measure of market risk is Value at Risk (VaR). VaR is a statistical estimate of the likely daily loss and is based on historical market movements. The confidence level is such that there is 97.5% probability that the loss will not exceed the VaR estimate on any given day.

The Group's standard VaR approach for both traded and non-traded risk is historical simulation. The Group calculates VaR using historical changes in market rates and prices over the previous 500 business days.

It should be noted that because VaR is driven by actual historical observations, it is therefore not an estimate of the maximum loss that the Group could experience from an extreme market event. As a result of this limitation, the Group utilises a number of other risk measures (eg stress testing) and associated supplementary limits to measure and manage traded market risk.

Traded and non-traded market risks have been considered separately below.

Traded Market Risks

Trading activities are focused on customer trading, distribution and underwriting of a range of securities and derivative instruments. The principal activities include foreign exchange, interest rate and debt markets. These activities are managed on a global product basis.

Below are aggregate VaR exposures covering both derivative and non-derivative trading positions for the Group's principal trading centres.

| | As at Sep 02 \$m | High for period Sep 02 \$m | Low for period Sep 02 \$m | Ave for period Sep 02 \$m | As at Sep 01 \$m | High for period Sep 01 \$m | Low for period Sep 01 \$m | Avg for period Sep 01 \$m |
|--------------------------------------|------------------------|-------------------------------------|------------------------------------|------------------------------------|------------------------|-------------------------------------|------------------------------------|------------------------------------|
| Value at risk at 97.5% confidence | | | | | | | | |
| Foreign exchange | 1.1 | 2.3 | 0.5 | 1.1 | 1.6 | 2.8 | 0.8 | 1.3 |
| Interest rate | 1.0 | 3.4 | 0.7 | 1.5 | 1.6 | 4.8 | 1.5 | 2.8 |
| Diversification benefit | (0.6) | (1.8) | (0.2) | (0.5) | (0.3) | (2.5) | (0.4) | (0.9) |
| Total | 1.5 | 3.9 | 1.0 | 2.1 | 2.9 | 5.1 | 1.9 | 3.2 |

VaR is calculated separately for Foreign Exchange/Commodities and for Interest Rate/Debt Markets businesses as well as Total Group. The diversification benefit reflects the correlation implied by historical rates between Foreign Exchange/Commodities and Interest Rate/Debt Markets.

Non-Traded Market Risks (Balance Sheet Risk)

The principal objectives of balance sheet management are to manage interest income sensitivity while maintaining acceptable levels of interest rate and liquidity risk and to hedge the market value of the Group's capital.

Interest Rate Risk

The objective of balance sheet interest rate risk management is to secure stable and optimal net interest income over both the short (next 12 months) and long term. Non-traded interest rate risk relates to the potential adverse impact of changes in market interest rates on the Group's future net interest income. This risk arises from two principal sources: mismatches between the repricing dates of interest bearing assets and liabilities; and the investment of capital and other non-interest bearing liabilities in interest bearing assets. Interest rate risk is reported as follows using three measures: VaR, scenario analysis (to a 1% shock) and disclosure of the interest rate sensitivity gap (Note 37).

a) VaR Interest Rate Risk

Below are aggregate VaR figures covering non-traded interest rate risk.

| | As at Sep 02 \$m | High for period Sep 02 \$m | Low for period Sep 02 \$m | Ave for period Sep 02 \$m | As at Sep 01 \$m | High for period Sep 01 \$m |
|-----------------------------------|------------------------|-------------------------------------|------------------------------------|------------------------------------|------------------------|-------------------------------------|
| Value at risk at 97.5% confidence | | | | | | |
| ANZ | 56.9 | 56.9 | 45.0 | 49.7 | 44.7 | 48.0 |
| Diversification impact | | | | | | |
| Total | 56.9 | 56.9 | 45.0 | 49.7 | 44.7 | 48.0 |

b) Scenario Analysis - A 1% Shock on the Next 12 Months Net Interest Income

A 1% overnight parallel positive shift in the yield curve is modelled to determine the potential impact on net interest income over the immediate forward period of 12 months. This is a standard risk quantification tool.

The figures in the table below indicate the outcome of this risk measure for the current and previous financial years expressed as a percentage of reported net interest income. The sign indicates the nature of the rate sensitivity with a positive number signifying that a rate increase is positive for net interest income over the next 12 months. Conversely, a negative number signifies that a rate increase is negative for the next 12 months net interest income.

| | Impact of 1% Rate Shock Consolidated Group Position | |
|--------------------------------------|--|---------|
| | 2002 | 2001 |
| As at 30 September | 0.43% | (0.01%) |
| Maximum exposure (in absolute terms) | 0.63% | 1.47% |
| Minimum exposure (in absolute terms) | 0.04% | 0.01% |
| Average exposure (in absolute terms) | 0.25% | 0.50% |

The extent of mismatching between the repricing characteristics and timing of interest bearing assets and liabilities at any point has implications for future net interest income. On a global basis, the Group quantifies the potential variation in future net interest income as a result of these repricing mismatches each month using a static gap model.

The repricing gaps themselves are constructed based on contractual repricing information. However, for those assets and liabilities where the contractual term to repricing is not considered to be reflective of the actual interest rate sensitivity (for example, products priced at the Group's discretion), a profile based on historically observed and/or anticipated rate sensitivity is used. This treatment excludes the effect of basis risk

between customer pricing and wholesale market pricing. For example, when wholesale market rates are anticipating an official rate increase the Group does not reprice certain customer business until the first repricing date after the official rate rise.

The majority of the Group's non-traded interest exposure exists in Australia and New Zealand. In these centres, a sophisticated balance sheet simulation process supplements this static gap information. This allows the net interest income outcomes of a number of different scenarios with different market interest rate environments and future balance sheet structures to be identified. This better enables the Group to accurately quantify the interest rate risks associated with the balance sheet, and to formulate strategies to manage current and future risk profiles.

Foreign Currency Related Risks

The Group's investment of capital in non-Australian operations generates an exposure to changes in the relative value of individual currencies against the Australian Dollar. Variations in the value of these foreign currency investments are reflected in the Foreign Currency Translation Reserve.

The Group incurs some non-traded foreign currency risk related to the potential repatriation of profits from non-Australian business units. This risk is routinely monitored and hedging is conducted where it is likely to add shareholder value.

The risk relating to mismatching of non-traded foreign currency assets and liabilities has not been presented, as this type of risk is minimal for the Group.

37: Interest Sensitivity Gap

The following table represents the interest rate sensitivity as at 30 September 2002 of the Group's assets, liabilities and off balance sheet instruments repricing (that is, when interest rates applicable to each asset or liability can be changed) in the periods shown.

Repricing gaps are based upon contractual repricing information except where the contractual terms are not considered to be reflective of actual interest rate sensitivity, for example, those assets and liabilities priced at the Group's discretion. In such cases, the rate sensitivity is based upon historically observed and/or anticipated rate sensitivity.

Sensitivity to interest rates arises from mismatches in the period to repricing of assets and that of the corresponding liability funding. These mismatches are managed within policy guidelines for mismatch positions.

| At 30 September 2002 | Less than 3 months \$m | Between 3 months and 6 months \$m | Between 6 months and 12 months \$m | Between 1 year and 5 years \$m | After 5 years \$m | Not bearing interest \$m | Total \$m |

| Total liabilities | 101,568 | 9,786 | 7,697 | 15,625 | 534 | 36,430 | 171,640 |
| Shareholders' equity and outside equity interests | | | | | | 11,465 | 11,465 |
| Off balance sheet items affecting interest rate sensitivity | (7,873) | (1,859) | (2,189) | 12,289 | (368) | | |
| Interest sensitivity gap | | | | | | | |
| net | 4,514 | (3,061) | (2,026) | 17,228 | 144 | (16,799) | |
| cumulative | 4,514 | 1,453 | (573) | 16,655 | 16,799 | | |

The bulk of the Group's loan/deposit business is conducted in the domestic balance sheets of Australia and New Zealand and is priced on a floating rate basis. The mix of repricing maturities in these books is influenced by the underlying financial needs of customers.

Offshore operations, which are generally wholesale in nature, are able to minimise interest rate sensitivity through closely matching the maturity of loans and deposits. Given both the size and nature of their business, the interest rate sensitivities of these balance sheets contribute little to the aggregate risk exposure, which is primarily a reflection of the positions in Australia and New Zealand.

In Australia and New Zealand, a combination of pricing initiatives and off-balance sheet instruments are used in the management of interest rate risk. For example, where a strong medium to long term rate view is held, hedging and pricing strategies are used to modify the profile's rate sensitivity so that it is positioned to take advantage of the expected movement in interest rates. However, such positions are taken within the overall risk limits specified by policy.

The following table represents the interest rate sensitivity as at 30 September 2001 of the Group's assets, liabilities and off balance sheet instruments repricing (that is, when interest rates applicable to each asset or liability can be changed) in the periods shown.

| | Less than 3 months \$m | Between 3 months and 6 months \$m | Between 6 months and 12 months \$m | Between 1 year and 5 years \$m | After 5 years \$m | Not bearing interest \$m | Total \$m |

38: Net Fair Value of Financial Instruments

Australian Accounting Standard AASB 1033: Presentation and Disclosure of Financial Instruments (AASB 1033) requires disclosure of the net fair value of on and off balance sheet financial instruments. The disclosures exclude all non-financial instruments, such as income taxes and regulatory deposits, and specified financial instruments, such as interests in controlled entities. The aggregate net fair value amounts do not represent the underlying value of the Group.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Net fair value is the fair value adjusted for transaction costs.

Quoted market prices, where available, are adjusted for material transaction costs and used as the measure of net fair value. In cases where quoted market values are not available, net fair values are based on present value estimates or other valuation techniques. For the majority of short-term financial instruments, defined as those which reprice or mature in 90 days or less, with no significant change in credit risk, the net fair value was assumed to equate to the carrying amount in the Group's statement of financial position.

The fair values are based on relevant information available as at 30 September 2002. While judgement is used in obtaining the net fair value of financial instruments, there are inherent weaknesses in any estimation technique. Many of the estimates involve uncertainties and matters of significant judgement, and changes in underlying assumptions could significantly affect these estimates. Furthermore, market prices or rates of discount are not available for many of the financial instruments valued and surrogates have been used which may not reflect the price that would apply in an actual sale.

The net fair value amounts have not been updated for the purposes of these financial statements since 30 September 2002, and therefore the net fair value of the financial instruments subsequent to 30 September 2002 may be different from the amounts reported.

| Financial Assets | Net fair value | | Carrying value | |
|--|----------------|-------------|----------------|-------------|
| | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m |
| Liquid assets | 7,410 | 7,794 | 7,410 | 7,794 |
| Due from other financial institutions | 3,815 | 4,829 | 3,815 | 4,829 |
| Trading securities | 5,873 | 4,827 | 5,873 | 4,827 |
| Investment securities, shares in associates and joint venture entities | 5,389 | 3,595 | 5,301 | 3,551 |
| Loans and advances | 133,793 | 125,687 | 132,060 | 123,657 |
| Customers' liabilities for acceptances | 13,796 | 14,324 | 13,796 | 14,324 |
| Other financial assets | 12,114 | 24,061 | 11,413 | 23,305 |

Liquid assets and Due from other financial institutions

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

The carrying values of these financial instruments are considered to approximate their net fair values as they are short-term in nature or are receivable on demand.

Trading securities

Trading securities are carried at market value. Market value is generally based on quoted market prices, broker or dealer price quotations, or prices for securities with similar credit risk, maturity and yield characteristics.

Shares in associates and Joint venture entities

Net fair value is based on quoted market prices or broker or dealer price quotations. If this information is not available net fair value has been estimated using quoted market prices for securities with similar credit, maturity and yield characteristics, or by reference to the net tangible asset backing of the investee.

Investment securities

Net fair value is based on quoted market prices or broker or dealer price quotations. If this information is not available, net fair value has been estimated using quoted market prices for securities with similar credit, maturity and yield characteristics.

Loans, advances and Customers liabilities for acceptances

The carrying value of loans, advances and acceptances is net of specific and general provisions for doubtful debts and income yet to mature. The estimated net fair value of loans, advances and acceptances is based on the discounted amount of estimated future cash flows and accordingly has not been adjusted for either specific or general provisions for doubtful debts.

Estimated contractual cash flows for performing loans are discounted at estimated current bank credit spreads to determine fair value. For loans with doubt as to collection, expected cash flows (inclusive of the value of security) are discounted using a rate which includes a premium for the uncertainty of the flows.

The difference between estimated net fair values of loans, advances and acceptances and carrying value reflects changes in interest rates and the credit worthiness of borrowers since loan origination.

Net lease receivables, with a carrying value of \$3,151 million (2001: \$3,249 million) and a net fair value of \$3,155 million (2001: \$3,259 million), are included in loans and advances.

Other financial assets

Included in this category are accrued interest, fees receivable and derivative financial instruments. The carrying values of accrued interest and fees receivable are considered to approximate their net fair values as they are short term in nature or are receivable on demand.

The fair values of derivative financial instruments such as interest rate swaps and currency swaps were calculated using discounted cash flow models based on current market yields for similar types of instruments and the maturity of each instrument. Foreign exchange contracts and interest rate option contracts were valued using market prices and option valuation models as appropriate.

Properties held for resale, deferred tax assets and prepaid expenses are not considered financial assets.

| | Net fair value | | Carrying value | |
|-------------------------------------|----------------|-------------|----------------|-------------|
| Financial Liabilities | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m |
| Due to other financial institutions | 10,860 | 12,690 | 10,860 | 12,690 |
| Deposits and other borrowings | 113,380 | 105,041 | 113,297 | 104,874 |
| Liability for acceptances | 13,796 | 14,324 | 13,796 | 14,324 |
| Bonds and notes | 14,999 | 15,525 | 14,708 | 15,340 |
| Loan capital | 3,505 | 3,888 | 3,445 | 3,831 |
| Other financial liabilities | 12,194 | 15,755 | 11,975 | 15,513 |

Due to other financial institutions

The carrying value of amounts due to other financial institutions is considered to approximate the net fair value.

Deposits and other borrowings

The net fair value of a deposit liability without a specified maturity or at call is deemed by AASB 1033 to be the amount payable on demand at the reporting date. The fair value is not adjusted for any value expected to be derived from retaining the deposit for a future period of time.

For interest bearing fixed maturity deposits and other borrowings and acceptances without quoted market prices, market borrowing rates of interest for debt with a similar maturity are used to discount contractual cash flows.

Bonds and notes and Loan capital

The aggregate net fair value of bonds and notes and loan capital at 30 September 2002 was calculated based on quoted market prices. For those debt issues where quoted market prices were not available, a discounted cash flow model using a yield curve appropriate for the remaining term to maturity of the instrument was used.

Other financial liabilities

This category includes accrued interest and fees payable for which the carrying amount is considered to approximate the fair value. Also included are derivative financial instruments, where fair value is determined on the basis described under "Other financial assets".

Income tax liabilities, other provisions and accrued charges are not considered financial instruments.

Commitments and contingencies

As outlined in note 48, the Group has various credit related commitments. Based upon the level of fees currently charged for granting such commitments, taking into account maturity and interest rates, together with any changes in the creditworthiness of counterparties since origination of the commitments, their estimated replacement or net fair value is not material.

Transaction costs

The fair value of financial instruments required to be disclosed under US accounting standard, Statement of Financial Accounting Standards No. 107 "Disclosures about Fair Value of Financial Instruments" (SFAS 107) is calculated without regard to estimated transaction costs. Such transaction costs are not material, and accordingly the fair values shown above would not differ materially from fair values calculated in accordance with SFAS 107.

39: Derivative Financial Instruments

Derivatives

Derivative instruments are contracts whose value is derived from one or more underlying financial instruments or indices. They include swaps, forward rate agreements, futures, options and combinations of these instruments. The use of derivatives and their sale to customers as risk management products is an integral part of the Group's trading activities. Derivatives are also used to manage the Group's own exposure to fluctuations in exchange and interest rates as part of its asset and liability management activities and are classified as other than trading. Derivatives are subject to the same types of credit and market risk as other financial instruments, and the Group manages these risks in a consistent manner.

The principal exchange rate contracts used by the Group are forward foreign exchange contracts, currency swaps and currency options. Forward foreign exchange contracts are agreements to buy or sell a specified quantity of foreign currency on a specified future date at an agreed rate. A currency swap generally involves the exchange, or notional exchange, of equivalent amounts of two currencies and a commitment to exchange interest periodically until the principal amounts are re-exchanged on a future date. Currency options provide the buyer with the right, but not the obligation, either to purchase or sell a fixed amount of a currency at a specified rate on or before a future date. As compensation for assuming the option risk, the option writer generally receives a premium at the start of the option period.

The principal interest rate contracts used by the Group are forward rate agreements, interest rate futures, interest rate swaps and options. Forward rate agreements are contracts for the payment of the difference between a specified interest rate and a reference rate on a notional deposit at a future settlement date. There is no exchange of principal. An interest rate future is an exchange traded contract for the delivery of a standardised amount of a fixed income security or time deposit at a future date. Interest rate swap transactions generally involve the exchange of fixed and floating interest payment obligations without the exchange of the underlying principal amounts.

Derivative transactions generate income for the Group from buy sell spreads and from trading positions taken by the Group. Income from these transactions is taken to net interest income, foreign exchange earnings or profit on trading instruments. Income or expense on derivatives entered into for balance sheet and revenue hedging purposes is accrued and recorded as an adjustment to the interest income or expense of the related hedged item.

Credit risk

The credit risk of derivative financial instruments arises from the potential for a counterparty to default on its contractual obligation. Credit risk arises when market movements are such that the derivative has a positive value to the Group. It is the cost of replacing the contract in the event of counterparty default. The Group limits its credit risk within a conservative framework by dealing with creditworthy counterparties, setting credit limits on exposures to counterparties, and obtaining collateral where appropriate.

The following table provides an overview of the Group's exchange rate, credit, commodity and interest rate derivatives. It includes all trading and other than trading contracts. Notional principal amounts measure the amount of the underlying physical or financial commodity and represent the volume of outstanding transactions. They are not a measure of the risk associated with a derivative.

The credit equivalent amount is calculated in accordance with the Australian Prudential Regulation Authority's Capital Adequacy guidelines. It combines the aggregate gross replacement cost with an allowance for the potential increase in value over the remaining term of the transaction should market conditions change.

The fair value of a derivative represents the aggregate net present value of the cash inflows and outflows required to extinguish the rights and obligations arising from the derivative in an orderly market as at the reporting date. Fair value does not indicate future gains or losses, but rather the unrealised gains and losses from marking to market all derivatives at a particular point in time.

| | Notional principal amount 2002 \$m | Credit equivalent amount 2002 \$m | Fair value 2002 \$m | Notional principal amount 2001 \$m | Credit equivalent amount 2001 \$m | Fair value 2001 \$m |
|-----------------------------------|--|---|---------------------------|--|---|---------------------------|
| Consolidated | | | | | | |
| Foreign exchange contracts | | | | | | |
| Spot and forward contracts | 140,867 | 3,390 | 815 | 274,880 | 7,312 | 2,171 |
| Swap agreements | 23,834 | 1,807 | (13) | 34,507 | 3,519 | 959 |
| Futures contracts(1) | 337 | n/a | | | n/a | |
| Options purchased | 8,779 | 435 | 272 | 13,586 | 1,068 | 834 |
| Options sold(2) | 11,741 | n/a | (216) | 13,481 | n/a | (614) |
| Other contracts | 3,046 | 623 | 456 | 3,776 | 580 | 363 |
| | 188,604 | 6,255 | 1,314 | 340,230 | 12,479 | 3,713 |
| Interest rate contracts | | | | | | |
| Forward rate agreements | 35,890 | 18 | 5 | 68,997 | 84 | 13 |
| Swap agreements | 212,765 | 3,491 | 634 | 278,152 | 3,814 | 519 |
| Futures contracts(1) | 26,934 | n/a | (4) | 97,825 | n/a | (9) |
| Options purchased | 16,118 | 127 | 88 | 8,067 | 65 | 76 |
| Options sold(2) | 9,244 | n/a | (65) | 11,766 | n/a | (89) |
| | 300,951 | 3,636 | 658 | 464,807 | 3,963 | 510 |
| Credit contracts | | | | | | |
| Credit default swaps(3) | 5,722 | 3,277 | (13) | 507 | 4 | |

| | | | | | |
|---------|--------|-------|---------|--------|-------|
| 495,277 | 13,168 | 1,959 | 805,544 | 16,446 | 4,223 |
|---------|--------|-------|---------|--------|-------|

(1) Credit equivalent amounts have not been included as there is minimal credit risk associated with exchange traded futures where the clearing house is the counterparty

(2) Options sold have no credit exposure, as they represent obligations rather than assets

(3) The Group has entered structured financing transactions that expose it to the performance of certain assets under credit default swaps. The total investment of the Group in these transactions is USD 750 million

The maturity structure of derivative activity is a primary component of potential credit exposure. The table below shows the remaining maturity profile by class of derivatives, based on notional principal amounts. The table also shows the notional principal amounts of the derivatives held for trading and other than trading purposes.

| Consolidated At 30 September 2002 | Remaining life | | | Total \$m | Trading \$m | Other than Trading \$m |
|--------------------------------------|----------------------------|---------------------|--------------------------------|--------------|----------------|------------------------------|

Concentrations of credit risk exist for groups of counterparties when they have similar economic characteristics. Major concentrations of credit risk arise by location and type of customer.

The following table shows the concentrations of credit risk, by class of counterparty and by geographic location, measured by credit equivalent amount. In excess of 40% (2001: 55%) of the Group's exposures are with counterparties which are either Australian banks or banks based in other OECD countries.

| Consolidated At 30 September 2002 | OECD governments \$m | Australian and OECD banks \$m | Corporations, non-OECD banks and others \$m | Total \$m |
|--|-------------------------------------|--|--|----------------------|
| Australia | 402 | 3,113 | 6,351 | 9,866 |

| | 585 | 9,687 | 6,174 | 16,446 |

The next table shows the fair values of the Group's derivatives by product type, disaggregated into gross unrealised gains and gross unrealised losses. The fair value of a derivative represents the aggregate net present value of the cash inflows and outflows required to extinguish the rights and obligations arising from the derivative in an orderly market as at the reporting date. Fair value does not indicate future gains or losses, but rather the unrealised gains and losses from marking to market all derivatives at a particular point in time.

| | Other than Trading | | Trading | | Trading | |

The fair values of derivatives vary over time depending on movements in interest and exchange rates and the trading or hedging strategies used.

In addition to customer and trading activities, the Group uses, inter alia, derivatives to manage the risk associated with its balance sheet and future revenue streams. The principal objectives of asset and liability management are to hedge the market value of the Group's capital and to manage and control the sensitivity of the Group's income while maintaining acceptable levels of interest rate and liquidity risk. The Group also uses a variety of foreign exchange derivatives to hedge against adverse movements in the value of foreign currency denominated assets and liabilities and future revenue streams.

The table below shows the notional principal amount, credit equivalent amount and fair value of derivatives held by the Group, split between those entered into for customer-related and trading purposes, and those entered into for other than trading purposes.

| | Notional principal amount 2002 \$m | Credit equivalent amount 2002 \$m | Fair value 2002 \$m | Notional principal amount 2001 \$m | Credit equivalent amount 2001 \$m | Fair value 2001 \$m |
|---|--|---|------------------------------|--|---|------------------------------|
| Consolidated | | | | | | |
| Foreign exchange and commodity contracts | | | | | | |
| Customer-related and trading purposes | 161,290 | 3,689 | (26) | 309,298 | 8,366 | 452 |
| Other than trading purposes | 27,314 | 2,566 | 1,340 | 30,932 | 4,113 | 3,261 |
| | 188,604 | 6,255 | 1,314 | 340,230 | 12,479 | 3,713 |
| Interest rate contracts | | | | | | |
| Customer-related and trading purposes | 257,947 | 2,992 | 320 | 426,706 | 3,391 | 270 |
| Other than trading purposes | 43,004 | 644 | 338 | 38,101 | 572 | 240 |
| | 300,951 | 3,636 | 658 | 464,807 | 3,963 | 510 |
| Credit contracts | | | | | | |
| Customer - related and trading purposes | 1,718 | 189 | 2 | 40 | 4 | |
| Other than trading purposes | 4,004 | 3,088 | (15) | 467 | | |
| | 5,722 | 3,277 | (13) | 507 | 4 | |
| Total | 495,277 | 13,168 | 1,959 | 805,544 | 16,446 | 4,223 |

Detailed below are the net deferred realised and unrealised gains and losses arising from other than trading contracts used to hedge interest rate exposure or to hedge anticipated transactions. These gains and losses are deferred only to the extent that there is an offsetting unrecognised gain or loss on the exposure being hedged. Deferred gains or losses are generally amortised over the expected term of the hedged exposure.

| | Foreign Exchange Contracts | | Interest Rate and Credit Contracts | | Total | |
|---------------------------------------|-------------------------------|-------------|---------------------------------------|-------------|-------------|-------------|
| Consolidated | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m |
| Expected recognition in income | | | | | | |
| Within one year | (10) | (22) | 165 | 183 | 155 | 161 |
| One to two years | (7) | (36) | 130 | 143 | 123 | 107 |
| Two to five years | (3) | (46) | 105 | 190 | 102 | 144 |
| Greater than five years | | | 102 | 101 | 102 | 101 |
| | (20) | (104) | 502 | 617 | 482 | 513 |

40: Securitisation

During the year ended 30 September 2002, the Group securitised residential mortgage loans amounting to \$nil (2001:\$2,470 million) and commercial loans amounting to \$66 million (2001:\$190 million).

These loans have been removed from the Group's balance sheet and transferred to third party special purpose entities (SPEs).

The Group retains servicing and (for some loans) custodian responsibilities for the loans sold. Following a securitisation, the Group receives fees for servicing the loans, custodian fees, fees for facilities provided and any excess income derived by the SPE after interest has been paid to investors and net credit losses and expenses absorbed.

The Group does not hold any material retained interest in the loans that have been sold. There is no recourse against the Group if cash flows from the securitised loans are inadequate to service the obligations of the SPE except to the limited extent provided in the transaction documents through the provision of arms length services and facilities.

The securities issued by the SPEs do not represent deposits or other liabilities of the Company or the Group. Neither the Company nor the Group in any way stands behind the capital value and/or performance of the securities or the assets of the SPEs except to the limited extent provided in the transaction documents through the provision of arms length services and facilities.

The Group may also provide liquidity facilities and other forms of credit enhancement to ensure adequate funds are available to the SPEs. The facilities are undrawn and are classified as contingent liabilities. The Group also provides hedging facilities to the SPEs to mitigate interest rate and currency risks. All these transactions are completed on an arms length basis.

The following table summarises the cash flows between the Group and the SPEs in respect of securitisation activities.

| | 2002 \$m | 2001 \$m |
|----------------------------------|-------------|-------------|
| Proceeds from securitising loans | 66 | 2,660 |
| Servicing fees received | 6 | 2 |
| Other cash inflows | 17 | 6 |

41: Life Insurance

| | 2002(1) \$m | Consolidated 2001 \$m | 2000 \$m |

| Operating expenses | (54) | (105) | (73) |
| Profit before income tax | 45 | 85 | 102 |
| Income tax expense | (20) | (47) | (53) |
| Profit after income tax | 25 | 38 | 49 |
| Profit after income tax arose from: | | | |
| Movements in policy liabilities separated between: | | | |
| Planned margin of revenues over expenses released | 18 | 36 | 36 |
| Difference between actual and assumed experience | (1) | (11) | (4) |
| Investment earnings on assets in excess of policy liabilities | 8 | 13 | 17 |
| Profit after income tax | 25 | 38 | 49 |

(1) ANZ Life Assurance Company Limited was sold into a joint venture with ING Australia in April 2002. Accordingly the results shown only include profits to 30 April 2002

42: Segment Analysis

For management purposes the Group is organised into seven major business segments including Personal Banking and Wealth, Corporate Banking, Investment Banking, Consumer Finance, Mortgages, Asset Finance and Small to Medium Business.

A description of each segment is shown below:

| | |
|-----------------------------|--|
| Personal Banking and Wealth | Provides a full range of banking and wealth management services for consumers. |
| Corporate Businesses | Comprises corporate banking, global institutional banking and global transaction services. |
| Investment Banking | Comprises global foreign exchange, global capital markets, global structured finance and corporate financing and advisory. |
| Consumer Finance | Provides consumer and commercial credit cards, ePayment products, personal loans and merchant payment facilities. |
| Mortgages | Provides mortgage finance secured by residential real estate. |
| Asset Finance | Provides secured financing for motor vehicles and other assets, fleet management and vendor financing facilities, and fixed interest securities through the issue of debentures. |
| Small to Medium Business | Provides a full range of banking services for metropolitan-based small to medium businesses. |

As the composition of segments has changed over time, September 2001 comparatives have been adjusted to be consistent with the 2002 segment definitions. Comparatives for the year ended 30 September 2000 have not been provided because data could not reasonably be disaggregated into the changed segments.

The following analysis details financial information by business segment.

| Total lease rental commitments | 1,062 | | 989 | 920 | | 868 |
| Total commitments | 1,137 | | 1,022 | 958 | | 877 |

The Group leases land and buildings under operating leases expiring from one to five years. Leases generally provide the Group with a right of renewal at which time all terms are renegotiated. Lease payments comprise a base amount plus an incremental contingent rental. Contingent rentals are based on either movements in the Consumer Price Index or operating criteria.

48: Contingent Liabilities and Credit Related Commitments**Credit related commitments**

The credit risk of the following facilities may be less than the contract amount, but as it cannot be accurately determined, the credit risk has been taken to be the contract amount.

| | Consolidated | | The Company | | Controlled Entities | |
|-------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|
| | 2002 Contract amount \$m | 2001 Contract amount \$m | 2002 Contract amount \$m | 2001 Contract amount \$m | 2002 Contract amount \$m | 2001 Contract amount \$m |
| Undrawn facilities | 60,373 | 56,766 | 54,271 | 49,751 | 6,102 | 7,014 |
| Underwriting facilities | 36 | 210 | 36 | 54 | | 156 |
| | 60,409 | 56,976 | 54,307 | 49,805 | 6,102 | 7,170 |

Contingent liabilities

The Group guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties. The risk involved is essentially the same as the credit risk involved in extending loan facilities to customers, therefore these transactions are subjected to the same credit origination, portfolio management and collateral requirements for customers applying for loans. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

The credit risk of these facilities may be less than the contract amount, but as it cannot be accurately determined, the credit risk has been taken to be the contract amount.

| | Consolidated | | The Company | | Controlled Entities | |
|-------------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|

| Total contingent liabilities | 22,634 | 18,838 | 21,808 | 18,373 | 826 | 465 |

(1) In addition the Group had no equity underwriting commitments at 30 September 2002 (2001: nil) which are classified as market risk exposures

The details and estimated maximum amount of contingent liabilities that may become payable are set out below.

(i) Clearing and Settlement Obligations

In accordance with the clearing and settlement arrangements set out in the Australian Payments Clearing Association Limited (APCA) Regulations for the Australian Paper Clearing System, the Bulk Electronic Clearing System and the High Value Clearing System (HVCS) and in the Austraclear System Regulations, the Company has a commitment to participate in loss-sharing arrangements in the event of a failure to settle by a member institution. For both the APCA HVCS and Austraclear, the obligation arises only in limited circumstances.

(ii) The Group will indemnify each customer of controlled entities engaged in nominee activities against loss suffered by reason of such entities failing to perform any obligation undertaken by them to a customer.

(iii) Interbank Deposit Agreement

ANZ has entered into an Interbank Deposit Agreement with the major banks in the payments system. This agreement is a payment system support facility certified by the Australian Prudential Regulatory Authority, where the terms are such that if any bank is experiencing liquidity problems, the other participants are required to deposit equal amounts of up to \$2 billion for a period of 30 days. At the end of 30 days the deposit holder has the option to repay the deposit in cash or by way of assignment of mortgages to the value of the deposit.

(iv) Tax Audit

ANZ in Australia is being audited by the Australian Taxation Office (ATO). There are several major issues that the ATO is considering, including:

Lease assignments in 1991 and 1992. Tax assessments have been received and are being contested in the Federal Court. Profit after tax of approximately \$50 million was earned from these transactions.

During the years 1996 - 2002 ANZ was involved in securities lending, equity swaps, and other similar kinds of transactions in the normal course of its business of banking. Total profit after tax from these transactions was less than \$200 million. The ATO is reviewing these transactions. ANZ received external advice in support of the taxation treatment of these transactions prior to commencing them. This advice was based on the taxation law as understood at

the time these transactions were undertaken, and strongly supports ANZ's position.

Sale of Grindlays in 2000. At ANZ's request the ATO is reviewing the taxation treatment of this transaction. ANZ's profit after tax from this transaction was \$404 million.

Based on external advice, ANZ has assessed the likely progress of these issues, and believes that it holds appropriate provisions.

(v) Sale of Grindlays businesses

As part of the sale on 31 July 2000 of ANZ Grindlays Bank Limited and the private banking business of ANZ in the United Kingdom and Jersey, together with ANZ Grindlays (Jersey) Holdings Limited and its subsidiaries (the Grindlays businesses), to Standard Chartered Bank (SCB), ANZ provided warranties relating to those businesses. Where it is anticipated that payments are likely under these warranties, provisions have been made to cover the anticipated liability.

In addition, ANZ provided SCB and/or Grindlays with certain indemnities. Those indemnities under which ANZ remains exposed as at 30 September 2002 are:

an indemnity relating to liabilities Grindlays may incur as a result of certain claims made against Grindlays and its officers in India (the Indian Indemnity). Details of this indemnity are set out below;

an indemnity in relation to certain customer accounts written by Grindlays prior to 31 July 2000. This indemnity covers 80% of losses emerging on accounts totalling up to USD 64 million at 30 September 2002; and

an indemnity relating to tax liabilities of Grindlays (and its subsidiaries) and the Jersey Sub-Group to the extent to which such liabilities have not been provided for in the Grindlays accounts as at 31 July 2000.

Claims have been made under the above indemnities and also in relation to certain warranties made by ANZ at the time of sale. Discussions are continuing on the outstanding claims; at present the Group is confident that they will have no material impact on the Group.

The Indian Indemnity requires ANZ to pay SCB for losses that Grindlays incurs as a result of certain claims that have been or may be made against Grindlays and its officers in India. Under the terms of the Indian Indemnity, ANZ will have control of matters for which it is potentially liable. No settlement offer can be made or paid by Grindlays without the prior agreement of ANZ. ANZ will continue to manage these matters in the best interests of the shareholders taking into account its legal obligations.

On 19 January 2002 Grindlays completed the settlement of its long running dispute with India's National Housing Bank (NHB). The dispute originated in 1992. Since January 2001 the amount in dispute had been deposited with the Supreme Court of India. Of this amount (including interest) of Rupees 16.45 billion (AUD 661 million at 19 January 2002 rates), Grindlays recovered under the terms of the settlement Indian Rupees 6.20 billion (AUD 248 million), with NHB receiving the balance. ANZ in turn received a payment of USD 124 million from SCB under the terms of the Indian Indemnity.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

ANZ remains liable for other claims under the Indian Indemnity, including in relation to the following two matters that are the subject of current proceedings involving Grindlays or its officers:

In 1991, certain amounts were transferred from non-convertible Indian Rupee accounts maintained with Grindlays in India. In making these transactions it would appear that the provisions of the Foreign Exchange Regulation Act 1973 were inadvertently not complied with. Grindlays on its own initiative, brought these transactions to the attention of the Reserve Bank of India. The Indian authorities have served notices on Grindlays and certain of its officers in India that could lead to possible penalties. Grindlays has commenced proceedings in the courts contesting the validity of these notices.

In July 2002, Grindlays was ordered to repay, with interest, two payments it received from a stockbroker in 1991 in connection with securities transactions. Grindlays has commenced proceedings challenging the validity of these orders, which direct repayment of Indian Rupees 24 million (AUD \$0.9 million at 30 September 2002 rates, plus interest accruing at 24% since 1991). Since July Grindlays has been given notice of hearings in relation to a further six payments received by it in 1991 in similar circumstances totalling Indian Rupees 31 million (AUD 1.2 million at 30 September 2002 rates).

(vi) Pursuant to class order 98/1418 dated 13 August 1998, relief was granted to a number of wholly owned controlled entities from the Corporations Act 2001 requirements for preparation, audit, and publication of financial statements. The entities to which relief was granted are

| | |
|---------------------------------------|----------------------------------|
| ANZ Properties (Australia) Pty Ltd(1) | Binnstone Traders Pty Limited(1) |
| Alliance Holdings Pty Ltd(1) | Deori Pty Ltd(1) |
| ANZ Capital Hedging Pty Ltd(1) | E S & A Holdings Pty Ltd(1) |

| ANZ Nominees Limited(1) | Jikk Pty Ltd(1) |
| Orchard Investments Pty Ltd(2) | LFD Limited(1) |
| | Votrant No. 1103 Pty Limited(2) |

(1) Relief granted on 21 August 2001

(2) Relief granted on 13 August 2002

It is the condition of the class order that the Company and each of the above controlled entities enter into a Deed of Cross Guarantee. A Deed of Cross Guarantee under the class order was lodged and approved by the Australian Securities and Investments Commission. The effect of the Deed is that the Company guarantees to each creditor payment in full of any debt in the event of winding up any of the controlled entities under certain provisions of the Corporations Act 2001. The Company will only be liable in the event that after six months any creditor has not been paid in full. The controlled entities have also given similar guarantees in the event that the Company is wound up. The consolidated statement of financial performance and consolidated statement of financial position of the Company and its wholly owned controlled entities which have entered into the Deed of Cross Guarantee are:

| Net assets | 10,161 | | 9,966 |
| Shareholders equity | 10,161 | | 9,966 |

(1) The Companies included in the class order have changed, accordingly retained profits have not carried forward

(vii) The Company has guaranteed payment on maturity of the principal and accrued interest of commercial paper notes issued by ANZ (Delaware) Inc. of \$1,654 million (2001: \$4,059 million).

(viii) The Company is party to an underpinning agreement with ANZ Banking Group (New Zealand) Limited whereby the Company undertakes to assume risk in relation to credit facilities extended by ANZ Banking Group (New Zealand) Limited to individual customers which exceed 35% of ANZ Banking Group (New Zealand) Limited's capital base.

(ix) The Company is party to an underpinning agreement with Australia and New Zealand Banking Group (PNG) Limited whereby the Company undertakes to assume risk in relation to credit facilities extended by Australia and New Zealand Banking Group (PNG) Limited to individual customers which exceed 50% of Australia and New Zealand Banking Group (PNG) Limited's capital base.

General

There are outstanding court proceedings, claims and possible claims against the Group, the aggregate amount of which cannot readily be quantified. Appropriate legal advice has been obtained and, in the light of such advice, provisions have been made as deemed necessary.

49: Superannuation Commitments

A number of pension and superannuation schemes have been established by the Group worldwide. The Group is obliged to contribute to the schemes as a consequence of legislation and provisions of trust deeds. Legal enforceability is dependent on the terms of the legislation and trust deeds. The major schemes with assets in excess of \$25 million are:

| Country | Scheme | Scheme type | Employee | Contribution levels | |
|-------------|---|--|----------|---------------------|--------------------|
| | | | | Employee | Employer |
| Australia | ANZ Australian Staff Superannuation Scheme(1),(2) | Defined Contribution Scheme Section C | optional | | Balance of cost(3) |
| | | Defined Contribution Scheme Section A | optional | | 9% of salary(4) |
| | | Defined Benefit Scheme Pension Section Account | nil | | Balance of cost |
| New Zealand | ANZGROUP (New Zealand) Staff Superannuation Scheme(1),(2) | Defined Benefit Scheme(5) | nil | | Balance of cost |
| | | Defined Contribution Scheme | 2.5 min% | | 7.5% of salaries |
| England | ANZ UK Staff Pension Scheme(1) | Defined Benefit Scheme | nil | | Balance of cost |

Balance of cost: the Group's contribution is assessed by the actuary after taking account of members' contributions and the value of the schemes' assets

- (1) These schemes provide for pension benefits
- (2) These schemes provide for lump sum benefits
- (3) As recommended by the actuary, currently 9% of members' superannuation salaries
- (4) From 1 October 2001 to 30 June 2002 the contribution rate was 8% of salary
- (5) Closed to new members on 31 March 1990. Operates to make pension payments to retirees who were members of that section of the scheme

The details of major defined benefit schemes with assets in excess of \$25 million are as follows:

| 2002 Schemes | Employer's contribution | Accrued benefits | Net market value of assets held by scheme | Excess of net market value | Vested benefits |
|--------------|-------------------------|------------------|---|----------------------------|-----------------|
|--------------|-------------------------|------------------|---|----------------------------|-----------------|

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

| | \$m | \$m | \$m | of assets over accrued benefits \$m | \$m |
|--|-----|-----|-------|---|-----|
| ANZ Australian Staff Superannuation Scheme Pension Section Account(1) | | 46 | 47 | 1 | 46 |
| ANZ UK Staff Pension Scheme(1) | | 998 | 1,053 | 55 | 963 |

| 2001 Schemes | Employer s contribution \$m | Accrued benefits \$m | Net market value of assets held by scheme \$m | Excess of net market value of assets over accrued benefits \$m | Vested benefits \$m |
|--|-----------------------------------|----------------------------|---|--|---------------------------|
| ANZ Australian Staff Superannuation Scheme Pension Section Account(2) | | 48 | 50 | 2 | 48 |
| ANZ UK Staff Pension Scheme(2) | | 943 | 1,228 | 285 | 904 |

(1) Amounts were measured at 31 December 2001

(2) Amounts were measured at 31 December 2000

50: Fiduciary Activities

The Group conducts investment fiduciary activities for trusts, including deceased estates. These trusts have not been consolidated as the Company does not have direct or indirect control.

Where the Company or its controlled entities incur liabilities in respect of these operations as trustee, a right of indemnity exists against the assets of the applicable funds or trusts. As these assets are sufficient to cover the liabilities and it is therefore not probable that the Company or its controlled entities will be required to settle the liabilities, the liabilities are not included in the financial statements.

The aggregate amounts of funds concerned are as follows:

| | 2002 \$m | 2001 \$m |
|------------------|-------------|-------------|
| Funds managed(1) | | 15,810 |
| Trusteeships | 1,849 | 3,240 |
| | 1,849 | 19,050 |

(1) As at 30 September 2002, the ANZ/INGA joint venture had funds under management of \$26,642 million

51: Employee Share and Option Plans

The Company has five share purchase and option incentive plans available for employees and directors of the Group: the ANZ Employee Share Acquisition Plan; the ANZ Share Purchase Scheme; the ANZ Employee Share Save Scheme(1); the ANZ Share Option Plan and the ANZ Directors Share Plan. Shareholders of the Company have approved the implementation of each of the current plans. Fully paid ordinary shares issued under these plans rank equally with other existing fully paid ordinary shares.

Each option granted under the ANZ Share Option Plan entitles a holder to purchase one ordinary share subject to any terms and conditions imposed on issue.

An offer to employees and directors cannot be made under any of the schemes if an issue pursuant to that offer will result in the aggregate of shares issued and options granted over unissued shares held for employees under various employee share and option incentive schemes exceeding 7% of the issued capital (and unexercised options) of the Company.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Amounts received from the ANZ Employee Share Acquisition Plan and the ANZ Share Purchase Scheme, on fully paid and partly paid shares, are recognised as share capital.

The closing market price of one ordinary share at 30 September 2002 was \$17.65.

Amounts received from exercising options under the ANZ Share Option Plan during the financial year, excluding calls on partly paid shares issued in prior financial years, were recognised as follows:

| | 2002 | The Company | 2001 |
|-----------------|-------------|--------------------|-------------|
| | \$ | | \$ |
| Share capital | 57,131,915 | | 21,426,988 |
| General reserve | | (26) | (12,113) |

ANZ Employee Share Acquisition Plan

All permanent employees who have had continuous service for one year with the Company or any of its controlled entities may be eligible to participate in a scheme enabling the issue of up to \$1,000 of shares to an employee in each financial year. During the financial year, 1,070,986 shares with an average issue price of \$17.21 were issued under the \$1,000 scheme.

Selected employees may also be issued deferred shares which vest in the employee after a qualifying period. Ordinary shares acquired under this plan are held in trust and have restrictions on their disposal. During the financial year, 3,074,002 (2001: 4,756,024, 2000: 2,565,559) deferred shares were issued under this Plan.

(1) The ANZ Employee Share Save Scheme is a scheme which operates under the ANZ Employee Share Acquisition Plan

ANZ Share Purchase Scheme

Officers eligible to participate in this scheme may be offered fully paid ordinary shares. During the financial year, no fully paid ordinary shares were issued under the scheme.

At 30 September 2002, 1,272,500 fully paid ordinary shares remained subject to the rules of this scheme.

ANZ Employee Share Save Scheme

Employees have the opportunity to request that a proportion of their income be directed to the purchase of ANZ shares. The amount they elect to contribute is deducted fortnightly and shares are purchased on market quarterly in arrears. The Company contributes 5% of the purchase price and pays for brokers fees and (prior to 1 July 2001) stamp duty. During the financial year 1,831 employees participated in the scheme and 288,324 shares were purchased. The number of shares acquired since the commencement of the scheme is 472,442. Senior executives are not eligible to receive the 5% discount.

ANZ Share Option Plan

Selected employees may be granted options which entitle them to purchase ordinary fully paid shares in the Company at a price fixed at the time when the options are issued.

11,119,785 options with a weighted average grant date fair value of \$3.21 were issued during the financial year and 760,506 options lapsed during the financial year.

At 30 September 2002, 32,435,347 options were outstanding under this scheme.

| No. of options outstanding at 30 September 2002 | Exercise price | Earliest exercise date | Expiry date |
|---|----------------|------------------------|--------------------|
| 2,565 | \$ 11.45 | 23 Mar 2001 | 22 Jan 2003(2) |

(1) subject to performance condition

(2) options exercisable as at 30 September 2002

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

These options will expire immediately on termination of employment, except in the event of retirement, retrenchment, death or disablement or where agreed by the Directors of the Company, in which case the exercise of the options may be allowed.

The following options were exercised by employees and former employees during the financial year:

| | | | |
|---------|--|---------|--|
| 171,550 | options exercised at \$ 8.76 per share | 36,959 | options exercised at \$11.45 per share |
| 100,000 | options exercised at \$ 8.93 per share | 60,000 | options exercised at \$11.64 per share |
| 625,000 | options exercised at \$ 8.97 per share | 195,000 | options exercised at \$11.81 per share |
| 600,000 | options exercised at \$ 9.51 per share | 500,000 | options exercised at \$12.11 per share |
| 120,000 | options exercised at \$10.11 per share | 160,450 | options exercised at \$13.70 per share |
| 310,000 | options exercised at \$10.34 per share | 121,000 | options exercised at \$14.34 per share |
| 150,000 | options exercised at \$10.44 per share | 172,500 | options exercised at \$14.63 per share |
| 50,000 | options exercised at \$10.64 per share | 213,750 | options exercised at \$14.92 per share |
| 812,500 | options exercised at \$11.20 per share | 16,500 | options exercised at \$15.33 per share |
| 25,000 | options exercised at \$11.29 per share | 6,750 | options exercised at \$16.81 per share |
| 500,000 | options exercised at \$11.39 per share | 81,375 | options exercised at \$17.05 per share |
| 63,000 | options exercised at \$11.44 per share | 12,256 | options exercised at \$18.75 per share |

In the event of a takeover offer or takeover announcement, the directors of the Company may allow the options to be exercised.

If there is a bonus issue prior to the expiry or exercise of the options, then upon exercise of the options, option holders are entitled to those shares as if the options had been exercised prior to that issue. Those shares will be allotted to the option holder when the options are exercised.

As at the date of the Directors Report, unexercised options over ordinary shares are as per the table above, adjusted for the exercise of the following options which were exercised by employees and former employees since the end of the financial year:

| | | | |
|---------|--|--------|--|
| 11,727 | options exercised at \$ 0.00 per share | 38,725 | options exercised at \$13.70 per share |
| 100,000 | options exercised at \$ 8.97 per share | 38,000 | options exercised at \$14.34 per share |
| 150,000 | options exercised at \$ 9.94 per share | 28,400 | options exercised at \$14.63 per share |
| 40,000 | options exercised at \$10.11 per share | 46,700 | options exercised at \$14.92 per share |
| 25,000 | options exercised at \$10.34 per share | 13,000 | options exercised at \$15.33 per share |
| 785,000 | options exercised at \$11.20 per share | 2,250 | options exercised at \$16.81 per share |
| 20,000 | options exercised at \$11.44 per share | 37,850 | options exercised at \$17.05 per share |
| 2,500 | options exercised at \$11.81 per share | 202 | options exercised at \$18.75 per share |

For options granted in the current year the valuation is based on a numerical pricing method which takes into account the probability of achieving the performance hurdle required for these options to vest. The following significant assumptions were adopted to determine the fair value of options:

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

| Weighted Average | 2002 | 2001 | 2000 |
|---------------------------|-----------|-----------|-----------|
| Risk free interest rate | 6.14% | 6.33% | 5.98% |
| Life of options | 6.8 years | 6.9 years | 6.2 years |
| Volatility of share price | 22.00% | 24.96% | 24.88% |
| Dividend rate | 4.45% | 4.66% | 6.03% |

The following table provides information in respect of movements in the number of options and the weighted average exercise price:

| | 2002 Number | Weighted Average Exercise Price \$ | 2001 Number | Weighted Average Exercise Price \$ | 2000 Number | Weighted Average Exercise Price \$ |
|--|----------------|---|----------------|---|----------------|---|
| Options outstanding at the start of the year | 27,179,658 | 12.91 | 13,443,974 | 10.53 | 10,018,633 | 10.35 |
| Options granted during the year | 11,119,785 | 17.73 | 16,365,860 | 14.49 | 4,671,000 | 10.73 |
| Options expired during the year | 760,506 | 13.99 | 505,056 | 12.54 | 230,563 | 10.76 |
| Options exercised during the year | 5,103,590 | 11.19 | 2,125,120 | 10.08 | 1,015,096 | 9.54 |
| Options outstanding at the end of the year | 32,435,347 | 14.81 | 27,179,658 | 12.91 | 13,443,974 | 10.53 |

ANZ Directors Share Plan

Directors may elect to forgo remuneration to which they may have otherwise become entitled and receive shares to the value of the remuneration forgone. Participation in the Plan is voluntary.

The shares are purchased on market and are held upon trust for periods ranging from 1 to 10 years. The director selects the period. The shares may also be subject to forfeiture for serious misconduct. All costs associated with the Plan are met by the Company.

At 30 September 2002 344,843 shares were held under this Plan. During the year, 128,044 shares were issued under this Plan.

52: Related Party Disclosures

The directors during the year were:

| | |
|--|--------------------------------------|
| C B Goode (Chairman) | M A Jackson |
| J C Dahlsen | J McFarlane |
| R S Deane | B W Scott |
| J K Ellis | G K Toomey (resigned 8 October 2001) |
| D M Gonski (appointed 7 February 2002) | |

Australian banks, parent entities of Australian banks and controlled entities of Australian banks have been exempted, subject to certain conditions, by an Australian Securities and Investments Commission (ASIC) class order, 98/110 dated 10 July 1998, from making disclosures of loans made, guaranteed or secured by a bank to related parties (other than specified categories of directors) and financial instrument transactions (other than shares and share options) of a bank where a director of the relevant entity is not a party to the transaction and where the loan or financial instrument transaction is lawfully made and occurs in the course of ordinary banking business either at arm's length or with the approval of a general meeting of the relevant entity and its ultimate chief entity (if any).

The class order does not apply to a loan or financial instrument transaction of which any director of the relevant entity should reasonably be aware that, if not disclosed, would have the potential to adversely affect the decisions made by users of the financial statements about the allocation of scarce resources.

A condition of the class order is that for each financial year to which it applies, the Company must provide evidence to ASIC that the Company has systems of internal controls and procedures which:

- (i) in the case of any material financial instrument transaction, ensure that; and
- (ii) in any other case, are designed to provide a reasonable degree of assurance that, any financial instrument transaction of a bank which may be required to be disclosed in the Company's financial statements and which is not entered into regularly, is drawn to the attention of the directors.

(a) **Transactions with directors and director-related entities**

Shares and Share Options

The aggregate number of shares issued to, acquired for, disposed or no longer held by directors, and share options granted to directors of the Company and their director-related entities by the Company during the financial year were as follows:

| | 2002 No. | The Company | 2001 No. |
|--|---------------------|--------------------|---------------------|
| Fully paid ordinary shares in the Company acquired | 1,127,098 | | 258,333 |
| Fully paid ordinary shares in the Company disposed of or no longer held by directors | 605,864 | | |
| Options granted under the ANZ Share Option Plan | 1,000,000 | | 750,000 |

Aggregate number of shares and share options held directly, indirectly or beneficially by directors of the Company and their director-related entities, as at balance date, were as follows:

| | 2002 No. | 2001 No. |
|---|---------------------|---------------------|
| Fully paid ordinary shares in the Company | 1,561,350 | 1,040,116 |
| Fully paid deferred shares in the Company issued under previous employee Plan | 87,190 | 87,190 |
| Share options over ordinary shares in the Company | 2,500,000 | 2,500,000 |

Directors of the Company and their director-related entities receive normal dividends on these shares.

Loans made to Directors

Loans made to non-executive directors of the Company and controlled entities are made in the course of ordinary business on normal commercial terms and conditions. Loans to executive directors of the Company and controlled entities are made pursuant to the Executive Directors Loan Scheme authorised by shareholders on 18 January 1982, on the same terms and conditions applicable to other employees within the Group in accordance with established policy.

Under the Australian Securities and Investments Commission class order referred to above, disclosure is limited to the aggregate amount of loans made, guaranteed or secured by:

- (i) the Company to its directors;
- (ii) any controlled entity to the directors of the Company;
- (iii) banking corporation controlled entities to their directors; and
- (iv) non-banking corporation controlled entities to directors of controlled entities and to parties related to any one of them or the directors of the Company.

The directors involved were:

| | |
|--------------------------------|--------------------------|
| S Armstrong(2) | P Cromby(1),(2),(3),(4) |
| D Gonski(2) | C B Goode(2) |
| D Hannam(1),(2) | D Hornery(1),(2) |
| M A Jackson(1),(2) | M Kalangis(1),(2) |
| J McFarlane(1),(2),(3),(4) | N Merrick(1),(2),(3),(4) |
| B Poedijirahard(1),(2),(3),(4) | M Rostian(1),(2),(3),(4) |
| M Tilbrook(1),(2) | J Todd(1),(2) |
| G Tunstall(1),(2),(3),(4) | |

-
- (1) Repayments made during the year
 - (2) Loans made or outstanding during the year
 - (3) Repayments made during the prior year
 - (4) Loans made during the prior year

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

The aggregate amount of such loans outstanding at 30 September 2002 were:

| | Consolidated | | The Company | |
|---|----------------|----------------|----------------|----------------|
| | 2002 \$ 000 | 2001 \$ 000 | 2002 \$ 000 | 2001 \$ 000 |
| Balance outstanding at 30 September | 12,663 | 4,790 | 11,984 | 4,379 |
| Total interest received | 843 | 300 | 775 | 292 |
| The aggregate amount of repayments received from directors and their director-related entities during the financial year was: | | | | |
| Normal terms and conditions | 6,518 | 516 | 6,518 | 516 |
| Employee terms and conditions | 106 | 27 | | |
| The aggregate amount of loans made during the financial year was: | | | | |
| Normal terms and conditions | 11,518 | 879 | 11,518 | 879 |
| Employee terms and conditions | 36 | 68 | | |

Other transactions of Directors and Director-Related Entities

(i) Financial instrument transactions

Under the Australian Securities and Investments Commission class order referred to above, disclosure of financial instrument transactions regularly made by a bank is limited to disclosure of such transactions with a director of the entity concerned. Financial instrument transactions which have occurred on arm's length terms and conditions, and are deemed trivial or domestic in nature are required to be disclosed by general description.

Financial instrument transactions between the directors and the banks during the financial year were in the nature of normal personal banking, investment and deposit transactions. These transactions occurred on an arm's length basis and on normal commercial terms and conditions no more favourable than those given to other employees or customers.

(ii) Transactions other than financial instrument transactions of banks

All transactions with directors and their director-related entities are conducted on arm's length terms and conditions, and are deemed trivial or domestic in nature. These transactions are in the nature of deposits, debentures, or investment transactions conducted with non-bank controlled entities.

All other transactions with director-related entities occur within a normal customer or supplier relationship and are on arms length terms.

(b) Transactions with associates and joint venture entities

During the course of the financial year the Company and the Group conducted transactions with associated and joint venture entities on normal commercial terms and conditions as shown below:

| | Consolidated | | The Company | |
|---|----------------|----------------|----------------|----------------|
| | 2002 \$ 000 | 2001 \$ 000 | 2002 \$ 000 | 2001 \$ 000 |
| Aggregate | | | | |
| Amounts receivable from associates and joint venture entities | 26,097 | 12,412 | | |
| Interest revenue | | 896 | | |
| Dividend revenue | 760 | 12,400 | 760 | |
| Commissions received from joint venture | 32,019 | | 32,019 | |
| Costs recovered from joint venture | 12,213 | | 12,213 | |

53: Remuneration of Directors

Remuneration includes income from salaries, bonuses, other benefits (including non-cash benefits), retirement benefits and superannuation contributions. The maximum total remuneration for non-executive directors of the Company was set at the Annual General Meeting held on 21 January 1998 at \$1.5 million. Total fees paid to non-executive directors by the Company for the year were \$1.1 million (2000: \$1.0 million). Retirement benefits paid to directors of the Company are detailed in the Directors Report.

The number of directors of the Company with total income in each of the following bands was:

| | The Company | |
|----------------------------|-------------|------|
| | 2002 | 2001 |
| \$90,001 to \$100,000 | 2 | 1 |
| \$110,001 to \$120,000 | | 4 |
| \$120,001 to \$130,000 | 1 | |
| \$130,001 to \$140,000 | 3 | |
| \$190,001 to \$200,000 | | 1 |
| \$210,001 to \$220,000 | 1 | |
| \$320,001 to \$330,000 | | 1 |
| \$350,001 to \$360,000 | 1 | |
| \$2,890,001 to \$2,900,000 | 1 | |
| \$3,090,001 to \$3,100,000 | | 1 |
| Total number of directors | 9 | 8 |

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

| | Consolidated | | The Company | |
|--|--------------|--------|-------------|--------|
| | 2002 | 2001 | 2002 | 2001 |
| | \$ 000 | \$ 000 | \$ 000 | \$ 000 |
| Total income paid or payable to directors of the Company and controlled entities from the Company or related entity(1) | 42,606 | 42,503 | 4,194 | 4,163 |

(1) Including the total income of executive directors, excluding directors of controlled entities who are executives of the Company

54: Remuneration of Executives

Executives are defined as members of the Chief Executive's Group. The membership of this Group was expanded in 2002. Remuneration includes salaries, bonuses, other benefits (including non-cash benefits), and superannuation contributions. The remuneration of executives who work wholly or mainly outside Australia are excluded from this disclosure. Executive emoluments disclosed in the Directors' Report include the emoluments of the five highest paid executives, calculated to include the fair value of options issued in 2002. For the purposes of this note, options are valued at intrinsic value (nil).

The number of executives with total remuneration exceeding \$100,000 in each of the following bands was:

| | Consolidated | | The Company | |
|------------------------|--------------|------|-------------|------|
| | 2002 | 2001 | 2002 | 2001 |
| \$130,001 to \$140,000 | | 1 | | 1 |
| \$190,001 to \$200,000 | 1 | 1 | 1 | 1 |
| \$250,001 to \$260,000 | 1 | | 1 | |
| \$260,001 to \$270,000 | 1 | | 1 | |
| \$280,001 to \$290,000 | 1 | | 1 | |
| \$290,001 to \$300,000 | | 1 | | 1 |
| \$330,001 to \$340,000 | | 1 | | 1 |
| \$340,001 to \$350,000 | 1 | | 1 | |
| \$350,001 to \$360,000 | 1 | | 1 | |
| \$360,001 to \$370,000 | 1 | 1 | 1 | 1 |
| \$370,001 to \$380,000 | 1 | | 1 | |
| \$390,001 to \$400,000 | 2 | | 2 | |
| \$400,001 to \$410,000 | 1 | | 1 | |
| \$420,001 to \$430,000 | 1 | | 1 | |
| \$430,001 to \$440,000 | 1 | | 1 | |
| \$440,001 to \$450,000 | 1 | | 1 | |
| \$460,001 to \$470,000 | 3 | | 3 | |
| \$470,001 to \$480,000 | 1 | | 1 | |
| \$530,001 to \$540,000 | 1 | | 1 | |
| \$550,001 to \$560,000 | | 1 | | 1 |
| \$560,001 to \$570,000 | 2 | | 2 | |
| \$570,001 to \$580,000 | 4 | | 4 | |

55: US GAAP Reconciliation

The consolidated financial statements of the Group are prepared in accordance with Generally Accepted Accounting Principles applicable in Australia (Australian GAAP) which differ in some respects from Generally Accepted Accounting Principles in the United States (US GAAP).

The following are reconciliations of the net profit, shareholders' equity and total assets, applying US GAAP instead of Australian GAAP.

| | Note | 2002 \$m | 2001 \$m | 2000 \$m |
|---|---------|-------------|-------------|-------------|
| Net profit reported under Australian GAAP(1) | | 2,322 | 1,870 | 1,747 |
| Items having the effect of increasing (decreasing) reported income (total tax impact of adjustments shown separately): | | | | |
| Employee share issue and options | (xviii) | (40) | (49) | (54) |
| Depreciation charged on the difference between revaluation amount and historical cost of buildings | (i) | 2 | 2 | 3 |
| Difference in gain or loss on disposal of properties revalued under historical cost | (i) | 5 | 17 | 168 |
| Revaluation of properties | (i) | | | (72) |
| Deferred profit on sale and leaseback transactions over the lease term | (iii) | (9) | | (80) |
| Amortisation of goodwill not recognised for Australian GAAP | (ii) | (6) | (28) | (48) |
| Amortisation of deferred profit on sale and leaseback transactions over the lease term | (iii) | 25 | 23 | 19 |
| Pension expense adjustment | (vi) | 18 | 20 | 8 |
| Provisions | (xvi) | | (361) | 361 |
| Transition adjustment related to the initial application of SFAS 133 | (xv) | | 11 | |
| Derivatives and hedging activities | (xv) | (17) | 284 | |
| Adjustment on entering joint venture | (xvii) | (205) | | |
| Total tax impact of adjustments | | 2 | 7 | (112) |
| Net income according to US GAAP | | 2,097 | 1,796 | 1,940 |
| Earnings per share (cents) according to US GAAP | (xiv) | | | |
| Basic | | 132.3 | 112.4 | 119.3 |
| Diluted | | 131.6 | 110.8 | 118.4 |
| Adjustments to determine other comprehensive income for US GAAP | | | | |
| Net income according to US GAAP | | 2,097 | 1,796 | 1,940 |
| Currency translation adjustments (net of tax) | | (98) | 197 | 170 |
| Unrealised profit (loss) on available for sale securities (net of tax) | (ix) | 3 | 15 | (23) |
| Transition adjustment related to the initial application of SFAS 133 (net of tax) | (xv) | | (52) | |
| Derivatives and hedging activities (net of tax) | (xv) | 60 | (66) | |
| Total comprehensive income according to US GAAP | | 2,062 | 1,890 | 2,087 |

(1) 2000 after abnormal items

| | Note | 2002 \$m | 2001 \$m | 2000 \$m |

| Total assets according to US GAAP | | 183,035 | 185,573 | 171,858 |

(1) Excluding outside equity interests

(i) Premises and equipment

In accordance with Australian GAAP, the Group holds its properties at a deemed cost value (refer note 1). However in the past the Group at various times, has revalued properties, increasing the book value of these assets. Any increments on revaluation were credited directly to the Asset Revaluation Reserve (ARR), and decrements were debited to the ARR to the extent of any previous revaluation increments.

Decrement in excess of any previous revaluation increments were charged to the statement of financial performance. The ARR forms part of Shareholders' equity and is not available for future property writedowns while properties are measured at deemed cost.

Under US GAAP, upward revaluation of properties is not permitted except for decrements which are regarded as other than temporary. Any such decrements are recorded in the statement of financial performance. Subsequent recoveries to the statement of financial performance are not allowed.

The impact of previous revaluations under Australian GAAP is that depreciation charges are generally higher and profits on disposal are lower than those recorded under US GAAP. The depreciation charges, together with the profits and losses on revalued assets sold have been adjusted to historical cost in the US GAAP reconciliation.

(ii) Goodwill

The Group changed its accounting policy in respect of goodwill in the financial year ended 30 September 1993. Previously, goodwill on acquisition was charged in full to the Group's statement of financial performance in the year of acquisition.

Historically, under US GAAP, goodwill has been capitalised and amortised over the period of time during which the benefits are expected to arise, such period not exceeding 20 years. For goodwill acquired during the year ended 30 September 2002 and for all goodwill balances after 30 September 2002 a recoverable amount test will apply rather than systematic goodwill amortisation.

Adjustments have been made in the US GAAP reconciliation statement to restore goodwill written-off in full under Australian GAAP and to amortise such goodwill over the period of the expected benefits. Additionally, to the extent that periodic reviews of the carrying amount of goodwill lead to a write-down of goodwill previously capitalised for US purposes, this is adjusted in the US GAAP reconciliation.

In accordance with the revision of US GAAP rules dealing with goodwill, goodwill acquired during the year has not been amortised in the calculation of these adjustments as it is considered recoverable.

(iii) Sale-leaseback transactions

Under Australian GAAP for operating leases, gains on disposal under sale-leaseback transactions can be recognised in the period of sale. Under US GAAP, the gain is amortised over the remaining lease term. This difference in treatment has been adjusted in the US GAAP reconciliation.

(iv) Dividends

Under Australian GAAP, dividends are shown in the statement of financial performance in the period to which they relate rather than in the period when they are declared as required by US GAAP. This difference in treatment has been adjusted in the US GAAP shareholders' equity reconciliation.

(v) Income taxes

Under Australian GAAP, tax benefits relating to carry forward tax losses must be *virtually certain* of being realised before being booked. Realisations of benefits relating to other timing differences must be *beyond reasonable doubt* before they may be booked. These tests are more stringent than those applied under US GAAP. However no material adjustment to future tax benefits for US GAAP is required.

Australian GAAP allows offsetting of future income tax benefits and liabilities to the extent they will reverse in the same period.

Under US GAAP, deferred tax liabilities and deferred tax assets are offset and presented for each tax paying component of an enterprise and within each particular tax jurisdiction. The impact of the difference in this approach to Australian GAAP has been adjusted for in the US GAAP reconciliation for total assets.

(vi) Pension commitments

Under Australian GAAP, contributions in respect of defined benefit schemes are recorded in the income statement and are made at levels necessary to ensure that these schemes are maintained with sufficient assets to meet their actuarially assessed liabilities. Any net deficiency arising from the aggregation of assets and liabilities of the Group's defined benefit schemes is provided for in the Group's financial statements (refer note 49 in the Financial Statements).

Under US SFAS 87 *Employers' Accounting for Pensions* and the disclosure requirements of SFAS 132 *Employers' Disclosures about Pensions and Other Post Retirement Benefits*, pension expense is a function of an employee's service period, interest costs, expected actuarial return on the schemes' assets, amortisation of net transition asset and recognised prior service cost. In addition, reconciliation between the accrued pension liability/prepaid asset and the funded status (difference between projected benefit obligation and fair value of pension plan assets) of the pension schemes is required.

(vii) **Post retirement and post employment benefits**

Post retirement and post employment benefits other than pension payments are not material and no adjustment is required in the US GAAP reconciliation.

(viii) **Trading securities**

US GAAP requires that in instances where trading securities are not bought and held principally for the purpose of selling them in the near term, they should be classified as available for sale and recorded at market value with unrealised profits and losses in respect of market value adjustments recognised as other comprehensive income in Shareholders' equity.

The residual emerging markets portfolio had been classified as available for sale with the market value write down taken through the statement of financial performance for both Australian GAAP and US GAAP purposes.

Except for the above no adjustment is required to be made in the US GAAP reconciliation as the effect of reclassifying certain trading securities as available for sale is not material.

(ix) **Investment Securities**

US GAAP requires that investments not classified as trading securities or as held to maturity securities shall be classified as available for sale securities and be recorded at market value in accordance with SFAS 115 Accounting for Certain Investments in Debt and Equity Securities . An adjustment is made in the US GAAP reconciliation to reflect available for sale securities which are carried at market value with unrealised profits and losses in respect of market value adjustments being reported as other comprehensive income in shareholders' equity.

(x) **Accounting for the impairment of loans**

SFAS 114 Accounting by Creditors for Impairment of a Loan , as amended by SFAS 118 Accounting by Creditors for Impairment of a Loan Income Recognition and Disclosures , requires the value of an impaired loan to be measured as the present value of future cash flows discounted at the loan's initial effective interest rate, the loan's observable market price or the fair value of the collateral, if the loan is collateral dependent.

There is no requirement under Australian GAAP to discount the expected future cash flows attributable to impaired loans in assessing the level of specific provision for doubtful debts.

No adjustment is required in the US GAAP reconciliation as the estimated fair value of impaired loans is not materially different from the carrying value.

(xi) **Accounting for the impairment of long lived assets and for long-lived assets to be disposed of**

SFAS 121 Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of , requires that where an event or a change in circumstance indicates that the carrying value of an asset that is expected to be held and used may not be recoverable, an impairment loss should be recognised. The standard also requires that where there is a committed plan to dispose of an asset, the asset should be reported at the lower of the carrying value or fair value less selling costs.

The Group has assessed the carrying values of all non-current assets and determined that they are not in excess of their recoverable amounts.

(xii) **Accounting for transfers and servicing of financial assets and extinguishments of liabilities**

SFAS 140 Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities prescribes the accounting and disclosure requirements for transfers of financial assets and extinguishments of liabilities. Under certain circumstances, the statement also requires a transferor of financial assets that are pledged as collateral to reclassify those assets, and the transferee to recognise those assets and their obligation to return them.

No adjustment is required in the US GAAP reconciliation as the effect of adopting the provisions of SFAS 140 on total assets is not material. Refer to Note 40 in the Financial Statements for the required disclosures.

(xiii) **Comprehensive Income**

SFAS 130 Reporting Comprehensive Income establishes standards for reporting and display of comprehensive income and its components. Comprehensive income is defined as all changes in shareholders' equity during a period excluding those resulting from investments by shareholders and distributions to shareholders.

Accordingly, the Group has shown currency translation adjustments, unrealised profit on available for sale securities and certain SFAS 133 adjustments as components of other comprehensive income with net income according to US GAAP forming the remaining component of comprehensive income.

(xiv) **Earnings per share (EPS)**

Under US GAAP, EPS is computed in accordance with SFAS 128 Earnings Per Share . This standard is similar to Australian GAAP. One area of difference relates to the calculation of diluted EPS. Under US GAAP, assumed proceeds from potentially dilutive stock options are assumed to be used to repurchase outstanding shares at the average market price during the period.

(xv) **Accounting for derivative instruments and hedging activities**

The Group has adopted SFAS 133 Accounting for Derivative Instruments and Hedging Activities as amended by SFAS 138 Accounting for Certain Derivative Instruments and Certain Hedging Activities in its US GAAP reconciliation from 1 October 2000. SFAS 133 requires all derivatives to be recognised on balance sheet at fair value. Movements in the fair value of derivatives are taken to the statement of financial performance, unless the derivatives meet the criteria prescribed in SFAS 133 for fair value, cash flow, or foreign currency hedges. If certain criteria are met derivatives can be designated as hedges. Under SFAS 133 normal banking hedging practices may not qualify for hedge accounting, notwithstanding their ability to hedge existing balance sheet positions from an economic perspective.

As a result future fair value movements recognised in US GAAP reconciliation may not be indicative of the Group's risk profile. The Group uses instruments and hedging techniques that are effective in managing interest rate risk and foreign exchange risk.

Further information on the results of the Group's hedging activities, and the effectiveness of the risk management policies, can be assessed better by considering the information provided on interest rate risk in note 36, and the information on hedging derivatives provided in note 39: Derivative Financial Instruments, of the Financial Report.

Under SFAS 133, movements in the value of derivatives designated as fair value hedges are taken to the statement of financial performance, along with the movement in the fair value of the underlying exposure that is being hedged to the extent the hedge is effective. These amounts largely offset each other with any ineffectiveness recognised in the US GAAP statement of financial performance. Movements in the effective portion of the fair value of derivatives designated as cash flow hedges are taken to other comprehensive income. Any ineffectiveness is recognised in US GAAP statement of financial performance immediately. Amounts are subsequently reclassified out of other comprehensive income into earnings as the hedged transaction impacts earnings.

The impact on adoption of SFAS 133 and SFAS 138 at 1 October 2000 was a transitional adjustment to increase US GAAP profit by \$11 million, and a transitional adjustment to decrease other comprehensive income by \$52 million. Changes in market conditions and the Group's hedging policies may result in volatility in these US GAAP adjustments going forward.

(xvi) **Provisions**

At 30 September 2000, the Group recorded a provision for restructuring in accordance with Australian GAAP amounting to \$361 million before tax with an associated taxation credit of \$116 million. US GAAP requires certain criteria to be met before a restructuring provision is recognised. These criteria, which are more detailed than the Australian recognition criteria, include public announcement of many details of the programs prior to balance date. Accordingly, the provision and associated taxation effect were recognised for US GAAP during the year ended 30 September 2001.

(xvii) **Gain and non-capitalisable costs recognised on entering joint venture**

In accordance with Australian GAAP the Group recognised a profit (net of transaction costs) based on the difference between fair value and carrying value of the share of businesses transferred to an external party on entering into a joint venture.

Under US GAAP the gain may not be recognised as it occurred as a result of a non-monetary transaction, which involved transferring ownership of controlled entities in exchange for a non-controlling ownership interest in the joint venture.

(xviii) **Accounting for stock - compensation plans**

Under Australian GAAP an expense is not recognised for share options issued to employees or for shares issued at a discount.

SFAS 123 Accounting for Stock-Based Compensation requires shares and options issued to employees to be recognised using either the fair value method or the intrinsic value method as prescribed by APB No. 25 and its related interpretations.

For US GAAP disclosure the Group measures share-based employee compensation cost using the intrinsic value based method. US GAAP compensation cost relating to share options is attributable to the impact of the increase in the market price of the Group's shares on those share option plans defined as variable under APB 25.

Variable share option plans include all plans with performance conditions. The Group's policy is to generally grant share options at the average market price of the underlying shares at the date of grant.

Share issues to employees under the ANZ Employee Share Acquisition Plan are recognised at intrinsic value under US GAAP.

If the fair value basis of accounting had been applied to account for compensation costs as stipulated in SFAS 123, the following profit after income tax and earnings per share would have appeared.

| | 2002 | | 2001 | | 2000 | |
|---------------------------------------|----------------|--------------|----------------|--------------|----------------|--------------|
| | As Reported | Pro Forma | As Reported | Pro Forma | As Reported | Pro Forma |
| Net income according to US GAAP (\$m) | 2,097 | 2,093 | 1,796 | 1,813 | 1,940 | 1,970 |
| - Basic earnings per share (cents) | 132.3 | 132.0 | 112.4 | 113.5 | 119.3 | 121.3 |
| - Diluted earnings per share (cents) | 131.6 | 131.3 | 110.8 | 111.9 | 118.4 | 120.3 |

Details of the share-based compensation plans are included in Note 51 to the Financial Statements.

(xix) Details of Pension Schemes and Pension Expense

Reconciliations of the funded status of major defined benefit schemes as at 30 June 2002 are summarised below.

Details of the funding of the schemes are set out in note 49.

| | 2002 \$m | Australian Scheme 2001 \$m | 2000 \$m |
|--|-------------|----------------------------------|-------------|
| Change in benefit obligation | | | |

57: Events Since the End of the Financial Year

There have been no significant events since 30 September 2002 to the date of this report.

Directors Declaration

The directors of Australia and New Zealand Banking Group Limited declare that the financial statements and notes of the Company and the consolidated entity:

(a) are in accordance with the Corporations Act 2001, including:

(i) complying with applicable Australian Accounting Standards and other mandatory professional reporting requirements; and

(ii) giving a true and fair view of the financial position of the Company and of the consolidated entity as at 30 September 2002 and of their performance as represented by the results of their operations and their cash flows, for the year ended on that date; and

(b) in the directors opinion at the date of this declaration there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

The Company and some of its wholly owned controlled entities listed in note 48 executed a Deed of Cross Guarantee enabling them to take advantage of the accounting and audit relief offered by class order 98/1418, dated 13 August 1998 issued by the Australian Securities and Investments Commission.

The nature of the Deed of Cross Guarantee is to guarantee each creditor payment in full of any debt in accordance with the terms of the Deed of Cross Guarantee.

At the date of this declaration, there are reasonable grounds to believe that the Company and its controlled entities to which the class order applies, are able, as an economic entity, to meet any obligations or liabilities to which they are, or may become, subject by virtue of the Deed of Cross Guarantee.

Signed in accordance with a resolution of the directors

Auditors Report

Independent audit report to the members of Australia and New Zealand Banking Group Limited

Scope

We have audited the financial report of Australia and New Zealand Banking Group Limited for the financial year ended 30 September 2002, consisting of the statements of financial performance, statements of financial position, statements of changes in shareholders' equity, statements of cash flows, accompanying notes 1 to 57 and the directors' declaration set out on pages 2 to 77. The financial report includes the consolidated financial statements of the consolidated entity, comprising the Company and the entities it controlled at the end of the year or from time to time during the financial year. The Company's directors are responsible for the financial report. We have conducted an independent audit of this financial report in order to express an opinion on it to the members of the Company.

Our audit has been conducted in accordance with Auditing Standards of Australia and the United States of America to provide reasonable assurance whether the financial report is free of material misstatement. Our procedures included examination, on a test basis, of evidence supporting the amounts and other disclosures in the financial report, and the evaluation of accounting policies and significant accounting estimates. These procedures have been undertaken to form an opinion whether, in all material respects, the financial report is presented fairly in accordance with Accounting Standards and other mandatory professional reporting requirements in Australia and statutory requirements so as to present a view which is consistent with our understanding of the Company's and the consolidated entity's financial position, and performance as represented by the results of their operations and their cash flows.

The audit opinion expressed in this report has been formed on the above basis.

Audit Opinion

In our opinion, the financial report of Australia and New Zealand Banking Group Limited is in accordance with:

- (a) the Corporations Act 2001, including:
 - (i) giving a true and fair view of the Company's and consolidated entity's financial position as at 30 September 2002 and of their performance for the financial year ended on that date; and

- (ii) complying with Accounting Standards in Australia and the Corporations Regulations 2001; and

- (b) other mandatory professional reporting requirements in Australia.

Accounting principles generally accepted in Australia vary in certain respects from accounting principles generally accepted in the United States of America. An explanation of the major differences between the two sets of principles is presented in note 55 to the financial statements.

The application of the United States principles would have affected the determination of consolidated net profit for each of the three years in the period ended 30 September 2002 and the determination of the consolidated financial position as of 30 September 2002, 2001 and 2000 to the extent summarised in note 55 to the financial statements.

Critical Accounting Policies

The Group prepares its consolidated financial statements in accordance with Australian Accounting Standards and other authoritative accounting pronouncements. However, notwithstanding the existence of relevant accounting standards, there are a number of critical accounting treatments, which include complex or subjective decisions or assessments. The Group requires all such applications of judgement to be reviewed and agreed by Group Finance, and where the impact is material, the accounting treatment be reviewed during the audit process by the Group's external auditors. All material changes to accounting policy are approved by the Audit Committee of the Board.

Historical changes

No change has been made to any of the critical accounting policies or their related methodologies over the last 3 years. A brief discussion of critical accounting policies, and their impact on the Group, follows:

(a) Economic Loss Provisioning

Description and Significance

Each month the Group recognises an expense for credit losses based on the expected long term loss ratio for each part of the loan portfolio. The monthly charge is transferred to the General Provision which is maintained to cover losses inherent within the Group's existing loan portfolio.

The method used by the Group for determining this monthly expense charge is referred to as economic loss provisioning (ELP). The Group uses ELP models to calculate the expected loss by considering:

the history of credit loss for each type and risk grade of lending; and

the size, composition and risk profile of the current loan portfolio.

Ongoing reviews

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

The Group regularly reviews the assumptions used in the ELP models. These reviews are conducted in recognition of the subjective nature of ELP methodology. Methodologies are updated as improved analysis becomes available. In addition, the robustness of outcomes is reviewed considering the Group's actual loss experience, and losses sustained by other banks operating in similar markets.

To the extent that credit losses are not consistent with previous loss patterns used to develop the assumptions within the ELP methodology, the existing General Provision may be determined to be either in excess of or insufficient to cover credit losses not yet specifically identified. As a result of the reassessments, ELP charge levels may be periodically increased or decreased with a direct impact on profitability.

As part of its review of the ELP model outputs, the Group also regularly evaluates the overall level of the General Provision. The Group is required, by APRA prudential standards, to have policies which cover the level of General Provisions that are needed to absorb estimated losses inherent in the credit portfolio. In some limited circumstances, the assessment of the inherent losses in the portfolio may require an additional charge to profits to ensure the adequacy of the General Provision. The Group considers it appropriate to maintain its General Provision in excess of the APRA guidelines.

Quantification of Sensitivity

For 2002, the balance of the General Provision of \$1,496 million (Sep 2001: \$1,386 million) represents 1.1% (Sep 2001: 1.0%) of risk weighted assets.

Specifically identified credit losses net of recoveries during the year were \$728 million (Sep 2001: \$520 million). During the same period, the average charge to profit for ELP was 0.43% of average net lending assets (Sep 2001: 0.38%).

During the year an additional provision for bad debts of \$250 million, identified as part of the regular review process, was added to the general provision to restore its balance to an appropriate level. Also, recognising the unexpected default experience on international exposures, an additional ELP charge of \$72 million has been recognised at the Group level.

(b) Specific Provisioning

Description and Significance

The Group maintains a specific provision for doubtful debts arising from its exposure to organisations and credit counterparties.

The Group's ELP provisioning methodology is used to estimate the extent of losses inherent within the loan book. Once a specific doubtful debt loss is identified as being probable, its value is transferred from the General Provision to the Specific Provision. Specific provisioning methodology applies when the full recovery of one of the Group's exposures is identified as being doubtful resulting in the creation of a specific provision equal to the full amount of the expected loss plus any enforcement/recovery expenses.

Recoveries resulting from excess specific provisions arising when actual losses are determined to be less than the amount provided for within the specific provision are transferred back to the General Provision.

Quantification of Sensitivity

The recognition of losses has an impact on the size of the General Provision rather than directly impacting profit. However, to the extent that the General Provision is drawn down beyond a prudent amount it will be restored through a transfer from the current year's earnings. Recoveries of amounts previously specifically provided against are applied to the restoration of the General Provision balance. The amount of draw down from the General Provision to the Specific Provision, net of recoveries, during the year was \$728 million (Sep 2001: \$520 million).

(c) **Deferred acquisition costs, software assets and deferred income**

Description and Significance

The Group recognises assets and liabilities that represent:

Capitalised expenses - direct costs from the acquisition of interest earning assets;

Software assets - direct costs incurred in developing software systems; and

Deferred income - liabilities representing income received in advance of services performed.

Capitalised expenses - Initially, expenses related to the acquisition of interest earning assets are recognised as part of the cost of acquiring the asset and written-off as an adjustment to its yield over its expected life. For assets subject to prepayment, expected life is determined on the basis of the historical behaviour of the asset portfolio, taking into account prepayments. Commissions paid to third party mortgage brokers are an example of expenditure that is deferred and amortised over the expected average life of a mortgage of 4 years.

Software assets - Costs incurred in acquiring and building software and computer systems are capitalised as fixed assets and expensed as depreciation over periods of between 3 and 5 years except for the branch front end applications where 7 years is used. The carrying value of these assets is subject to a recoverable amount test to determine their value to the Group. If it is determined that the value of the asset is less than its book value, the asset is written down to the recoverable amount. Costs incurred in planning or evaluating software proposals, or in maintaining systems after implementation, are not capitalised.

Deferred income - Income received in advance of the Group's performance of services or in advance of having been earned, is initially recorded as a liability. Once the recognition criteria are met, it is then recognised as income.

Quantification of Sensitivity

Deferred acquisition costs - At 30 September, the Group's assets included \$289 million (Sep 2001: \$258 million) in relation to costs incurred in acquiring interest earning assets. During the year, amortisation of \$132 million (Sep 2001: \$121 million) was recognised as an adjustment to the yield earned on interest earning assets.

Software assets - At 30 September, the Group's fixed assets included \$419 million (Sep 2001: \$303 million) in relation to costs incurred in acquiring and developing software. During the year, depreciation expense of \$50 million (Sep 2001: \$22 million) was recognised and \$24 million (Sep 2001: \$14 million) was written off in relation to software assets. The software depreciation expense will increase going forward, as projects are completed following a period of above average project activity which has replaced significant parts of the Group's core infrastructure. The Group anticipates that software depreciation will exceed \$90 million in 2003. Consistent with US accounting rules on software capitalisation only costs incurred during configuration, coding and installation stages are capitalised. Administrative, preliminary project and post implementation costs including determining performance requirements, vendor selection and training costs are expensed as incurred.

Deferred income - At 30 September, the Group's liabilities included \$128 million (Sep 2001: \$131 million) in relation to income received in advance. This income is comprised of 2 components: (1) fees received for services not yet completed; and (2) profit made on an interest rate swap that was hedging future payments (years 2004 and forward) on the Group's preference shares. Under Australian Accounting Standards, this profit is deferred and recognised when the hedged transaction occurs, or immediately if the hedged transaction is no longer expected to occur. As the Group presently plans to retain the preference shares, recognition of the income from the hedging transaction is deferred.

The balances of deferred assets at 30 September were:

| | Deferred acquisition costs | | Software Assets | | Deferred Income | |
|---------------------------|----------------------------|-------------|-----------------|-------------|-----------------|-------------|
| | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m | 2002 \$m | 2001 \$m |

| Consumer Finance | | | 45 | 30 | | |
| Mortgages | 73 | 57 | 27 | 17 | | |
| Asset Finance | 189 | 162 | 29 | 31 | | 1 |
| Small to Medium Business | | | 6 | 3 | | |
| Other | | | 118 | 64 | 113 | 113 |
| Total | 289 | 258 | 419 | 303 | 128 | 131 |

(d) Derivatives and Hedging

Description and Significance

The Group buys and sells derivatives as part of its trading operations and to hedge its interest rate risk, foreign exchange risk and equity risks (in the ING Australia joint venture). The derivative instruments used to hedge the Group's exposures include:

swaps;

forward rate agreements;

futures;

options; and

combinations of the above instruments.

Accounting treatment - In accordance with the requirements of Australian Accounting Standards, derivative instruments entered into for the purpose of hedging are accounted for on the same basis as the underlying exposures or risks.

Derivative instruments entered into to hedge exposures that are not recorded at fair value do not have their fair values recorded in the Group's Statement of Financial Position (in accordance with Australian Accounting Standards).

Exposures hedged by derivatives not recorded at their fair value include risks related to:

revenues from foreign operations;

structured lending transactions;

lending assets; and

funding liabilities.

Hedge accounting is only applied when the hedging relationship is identified at the time the Group enters into the hedging derivative transaction. If a hedge ceases to be effective, the hedging derivative transaction will be recognised at fair value. Gains and losses on derivative instruments not carried at their fair value amounts are recognised at the same time as the gain or loss on the hedged exposure is booked.

Movements in the value of foreign exchange contracts that are hedging overseas operations are not recognised as income or expenses. Instead these movements are recognised in the Foreign Currency Translation Reserve together with the net difference arising from the translation of the overseas operation.

Fair value determination - Derivatives entered into as part of the Group's trading operations are carried at their fair values with any change in fair value being immediately recognised as part of trading income. Where liquid markets exist, fair value is based on quoted market prices. For certain complex or illiquid derivative instruments, it may be necessary to use projections, estimates and models to determine fair value. In addition, judgemental factors such as the need for credit adjustments, liquidity and other valuation adjustments affect the reported fair value amounts of derivatives.

(e) Special purpose and off balance sheet vehicles

The Group may invest in or establish special purpose companies, or vehicles (SPVs), to enable it to undertake specific types of transactions. Where the Group controls such vehicles, they are consolidated into the Group financial results.

Certain SPVs may be set up by the Group to facilitate Group strategic aims, or to assist with structured transactions for clients. The accounting treatment of each SPV is assessed using existing Australian guidance, with reference also to International and US accounting standards where specific issues are yet to be addressed in Australia. The table below summarises the main types of SPVs that are not consolidated into the Group, the reason for their establishment, and the key risks associated with them.

| Type of Special Purpose Vehicle (SPV) | Reason for establishment | Key Risks | SPV Assets \$m |
|---------------------------------------|--|--|-------------------|
| Securitisation vehicles | Assets are transferred to a SPV, which funds the purchase by issuing securities. | ANZ may manage securitisation vehicles, service assets in a vehicle and provide liquidity support, and retains the risks associated with the | 6,992 |

| | | | |
|-----------------------------|---|--|--------|
| | Enables ANZ or customers to increase diversity of funding sources. | provision of these services. Credit and market risks associated with the underlying assets are not retained by ANZ. ANZ may also provide other services (eg. swaps, credit guarantees), for which ANZ earns a fee at commercial rates. | |
| Structured finance entities | These entities are set up to assist with the structuring of client financing. | ANZ may retain liquidity risk, if it provides liquidity support to the vehicle. ANZ may also manage these vehicles. | 1,968 |
| Managed funds | These funds invest in specified investments on behalf of clients. | The ANZ/ING Australia joint venture, as manager of the funds, exposes ANZ to operational risk and reputational risk. | 26,642 |

Financial Information**1: Cross Border Outstandings**

Cross border outstandings of the Group to countries which individually represented in excess of 0.75% of the Group's total assets are shown below. There were no cross border outstandings to any other country exceeding 0.75% of total assets.

Cross border foreign outstandings are based on the country of domicile of the borrower or guarantor of the ultimate risk and comprise loans (including accrued interest), placements with banks, acceptances and other monetary assets denominated in currencies other than the borrower's local currency. For certain countries, local currency obligations are also included. Cross border foreign outstandings are before specific and general provisions.

| Term deposits | 11,886 | 1,275 | 792 | 379 | 14,332 |
| | 15,536 | 1,803 | 1,142 | 1,191 | 19,672 |
| Overseas | | | | | |
| Certificates of deposit | 4,098 | 709 | 1,218 | 284 | 6,309 |
| Term deposits | 15,065 | 961 | 689 | 346 | 17,061 |
| | 19,163 | 1,670 | 1,907 | 630 | 23,370 |
| Total | 34,699 | 3,473 | 3,049 | 1,821 | 43,042 |

3: Volume and Rate Analysis

The following table allocates changes in interest income and interest expense between changes in volume and changes in rate for the past two years. Volume and rate variances have been calculated on the movement in average balances and the change in the interest rates on average interest earning assets and average interest bearing liabilities. The variance caused by the change of both volume and rate has been allocated in proportion to the relationship of the absolute dollar amounts of each change to the total.

| | Volume \$m | 2002 over 2001 Change due to Rate \$m | Total \$m | Volume \$m | 2001 over 2000 Change due to Rate \$m | Total \$m |

4: Concentrations of Credit Risk

Concentrations of credit risk exist if a number of counterparties are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. Off balance sheet transactions of the Group are substantially with other banks.

Glossary

Asset Finance operating under the Esanda and UDC brands, ANZ Asset Finance provides secured financing for motor vehicles and other assets, fleet management and vendor financing facilities, and fixed interest securities through the issue of debentures.

Consumer Finance provides consumer and commercial credit cards, ePayment products, personal loans, and merchant payment facilities in Australia, New Zealand and selected overseas markets.

Corporate Banking provides financial products and develops product strategies for medium sized businesses (turnover \$10 million to \$100 million) in Australasia.

Economic loss provisioning (ELP) charge is determined based on the expected average annual loss of principal over the economic cycle for the current risk profile of the lending portfolio.

Equity standardisation Economic Value Added (EVA™) principles are in use throughout the Group, whereby risk adjusted capital is allocated and charged against business units. Equity standardised profit is determined by eliminating the impact of earnings on each business unit's book capital and attributing earnings on the business unit's risk adjusted capital. This enhances comparability of business unit performance. Geographic results are not equity standardised.

Impaired assets are loans or other credit facilities where there is reasonable doubt about the collectability of interest, fees (past and future) or principal outstanding, or where concessional terms have been provided because of the financial difficulties of the customer.

Investment Banking comprises Global Foreign Exchange, Global Capital Markets, Global Structured Finance and Corporate Financing & Advisory.

Mortgages provision of mortgage finance secured by residential real estate in Australia and New Zealand.

Net advances include gross loans and advances, acceptances and ANZ accepted bills held as part of trading securities less income yet to mature and specific provisions (for both as at and average volumes).

Net interest average margin is net interest income as a percentage of average interest earning assets. Non-assessable interest income is grossed up to the equivalent before tax amount for the purpose of these calculations.

Net interest spread is the average interest rate received on interest earning assets less the average interest rate paid on interest bearing liabilities. Non-assessable interest income is grossed up to the equivalent before tax amount for the purpose of these calculations.

Net non-interest bearing items, referred to in the analysis of interest spread and net interest average margin, includes shareholders' equity, provisions for doubtful debts, and deposits not bearing interest and other liabilities not bearing interest, offset by premises and equipment and other non-interest earning assets. Non-accrual loans are included within interest bearing loans, advances and bills discounted.

Net specific provision is the transfer from the general provision to the specific provision (representing new and increased specific provisions less specific provision releases) less recoveries.

Operating expenses exclude charge for doubtful debts.

Operations, Technology & Shared Services comprises technology and payments operations, central support units and costs relating to hedging overseas revenue and capital positions. Also includes the residual results of discontinued businesses.

Overseas geographic segment includes the results of all operations outside Australia and New Zealand.

Overseas markets includes the results of operations in the UK and Europe, Asia, Pacific and Americas. The Group's geographic segments are Australia, New Zealand and Overseas markets.

Personal Banking and Wealth comprises Personal Banking Australia, New Zealand and Pacific Asia and Wealth Management and the INGA joint venture. Personal Banking Australia provides a full range of banking services for personal and rural small business customers in Australia through branches, call centres and on line banking. Personal Banking New Zealand provides a full range of banking and wealth management services for consumers across New Zealand. Personal Banking Pacific Asia provides retail banking services in the Pacific Region and Asia, including

ANZ's share of PT Panin Bank in Indonesia. Wealth Management delivers comprehensive financial advisory and distribution services to high net worth customers in Australia covering investment, risk, lending and banking. ING Australia, the joint venture between ANZ and the ING Group, provides integrated manufacture and distribution of wealth creation, management and protection products and services aligned to ANZ distribution and the open market.

Service transfer pricing is in use throughout the Group, whereby business and support units recover the cost of services provided to other units. The basis of pricing for internal services varies from cost recovery, to market equivalent. There are some head office costs which are not recharged.

Small to Medium Business provides a full range of banking services for metropolitan based small to medium business in Australia and New Zealand with turnover up to \$10 million.

Total advances include gross loans and advances, acceptances and ANZ accepted bills held as part of trading securities less income yet to mature (for both as at and average volumes).

Group Treasury is the banker to all ANZ businesses. Charged with providing cash flow support, ensuring liquidity, managing interest rate risk and providing capital to the businesses.

Unproductive facilities comprises standby letters of credit, bill endorsements, documentary letters of credit and guarantees to third parties, undrawn facilities to which the Group is irrevocably committed and market related exposures.

ANZ reports on Customer Charter progress

ANZ today released its first Customer Charter Annual Report providing a detailed review of its performance against the ten service promises it made to customers.

Key points in the 2002 Customer Charter Annual Report include:

A strong performance in fast account opening. Refunds of \$31,000 in fees to customers were made where ANZ exceeded promised times.

The average branch waiting time was three minutes against the five-minute target. In some instances however waiting times as high as 21 minutes were identified.

The target to answer calls to our 131314 customer service number within one minute was achieved for 89% of calls.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

A strong performance in 24-hour, 7-day accessibility of electronic channels including telephone, ATM, ETPOS and internet banking with availability consistently above 99%. Internet banking availability was marginally below the 99% target in two months.

100% of customer complaints were responded to within 48 hours and 70% of them resolved within 10 working days.

ANZ Chief Executive Officer Mr John McFarlane said: We know we still have a lot to do to restore our customers' faith in us and we are serious about making a difference.

It is great to be getting things right for our customers most of the time and this report indicates we have made a good start, but need to do better.

It is not acceptable for any customer to wait 21 minutes for branch service. In the year ahead, we need to ensure our internal processes deliver consistent service to customers and where necessary, commit additional resources.

It is only when we achieve consistently high levels of customer service that we will be able to stand up and be truly proud of our achievements, Mr McFarlane said.

ANZ launched its Customer Charter in October 2001 and expanded it in May 2002. It is one of a series of customer and community initiatives launched during the past 18 months, including the introduction of new, lower cost transaction accounts, a basic banking account for Centrelink recipients and fee-free transaction banking for customers aged over 60.

A full copy of the ANZ Customer Charter Annual Report can be found at www.anz.com. The report has been independently reviewed by accounting firm KPMG.

ANZ is a leading banking and financial services group. **With total assets of \$183 billion**, ANZ takes its place among the top 100 banks in the world.

2002 Results*

| Profit | Earnings Per Share | Dividend | Return on Equity | Cost to Income Ratio |
|--|--|---|---------------------------------------|--|
| 15.9% | 16.7% | 16.4% | 21.6% | 46% |
| Net Profit has increased by 15.9% to \$2168m | EPS has increased by 16.7% to \$1.37 per share | Dividend per share increased by 16.4% to \$0.85 (fully franked) | ROE has increased from 20.2% to 21.6% | Cost to income ratio has decreased from 48% to 46% |

ANZ is headquartered in Melbourne, where it first opened an office as the Bank of Australasia in 1835. ANZ's primary markets are Australia and New Zealand as well as Asia, the Pacific, UK/Europe and the United States. ANZ operates a series of specialist businesses. Its key businesses are: Personal Banking & Wealth Management, Consumer Finance, Small to Medium Business, Mortgages, Asset Finance, Corporate Businesses and ANZ Investment Banking.

*excluding significant transactions during year ended 30 September 2002: the sale of businesses to ING joint venture (profit after tax of \$170m), National Housing Bank recovery (\$159m profit after tax) and special general provision for doubtful debts (\$175m charge after tax). Including significant transactions, the net profit was \$2322m, up 24% on 2001, and EPS was \$1.47.

different

We set ourselves the challenge to create **a very different bank at ANZ.**

Different by performing for shareholders, different by serving our customers well, different by being a good corporate citizen in the community, and different in the way we lead and inspire our people.

We have made progress in the past five years, but we still have a good way to go as we move to build further on our performance and develop future growth.

John McFarlane, Chief Executive Officer

Chairman's Report

Our **2002 performance** sets us apart.

2002 was a strong year for ANZ.

The result was achieved in an environment where the Australian and New Zealand economies performed well notwithstanding subdued world economic activity and several major corporate collapses internationally.

Performance

In the year ended 30 September 2002, the net operating profit after tax increased by 24% to a record \$2322 million. The result was impacted by three significant transactions as follows:

The sale of businesses to ING joint venture (profit after tax of \$170m)

National Housing Bank recovery (\$159m profit after tax)

Special general provision for doubtful debts (\$175m charge after tax)

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Excluding these significant transactions, profit after tax increased 15.9% to \$2168 million. Earnings per share grew by 16.7% to \$1.37 and the dividend per share was increased by 12 cents to 85 cents per share fully franked.

Our return on ordinary shareholders' equity at 21.6% is above our 20% target while our cost to income ratio of 46% achieved our mid 40s target and was the lowest cost to income ratio among major Australian banks. Our Tier One capital ratio was solid at 7.9%.

Market Recognition

Our consistent performance is being recognised in our share price, which has performed well despite considerable weakness in equity markets. Our achievements were also recognized by Fortune magazine in September 2002 when it selected ANZ as one of 40 stocks to invest in for retirement, one of only five non-US companies and the only Australian stock.

Clear Focus

During the year, the strategy of organising the bank into 17 businesses achieved strong overall results and enhanced our focus on risk management. Customers benefited from a range of initiatives including new lower cost transaction accounts and improvements to services.

In May, a new wealth management joint venture was established with the ING Group. ING is one of the world's leading Bancassurance Groups with \$800 billion of assets under management. The joint venture created a top-tier company in funds management and life insurance in Australia and New Zealand and filled a strategic gap for ANZ in the high growth wealth management sector. ANZ made a capital contribution of \$960 million to the new organisation.

In January, ANZ settled the long-standing litigation with the National Housing Bank in India. The settlement enabled us to recover \$248 million of the provision we made when ANZ sold Grindlays Bank to Standard Chartered PLC in 2000.

Leadership Culture

Most importantly, we continued to give high priority to our program to create a distinctive ANZ culture. This program reinforces a strong performance culture among our staff, creating a sense of entrepreneurial freedom balanced with responsibility, shared values and an increasing focus on customers and the community.

Governance

During the year, the Board undertook a review of governance procedures to strengthen further ANZ's standards of corporate governance, disclosure and transparency. These included a new policy covering ANZ's relationship with its auditor.

Signatures

Executive Options

We have also taken note of the community debate on the use of options as part of executive remuneration. Options are not a dominant form of compensation at ANZ. The Board believes options can provide valuable incentives if the size of option packages is appropriate, and if hurdles set are challenging and aligned with shareholders' interests. We have taken an in-principle decision to expense options in the year they are granted and we will implement this change as soon as the tax and Australian Accounting Standards implications are clarified.

The Board

On 7 February 2002, Mr David Gonski joined the ANZ Board. Mr Gonski is Chairman of Coca-Cola Amatil and a Director of Westfield Holdings Limited and John Fairfax Holdings Limited. Mr Gonski brings valuable financial skills and a broad range of business experience and community service.

Growth and Potential

Management and staff are to be congratulated for consistently delivering a high level of financial performance to shareholders, improving our service to customers and deepening our relationship with the community, while at the same time providing an increased focus on growth.

In the year ahead, we expect the Australian and New Zealand economies to continue to perform relatively well and for overseas markets to begin to strengthen from their low base. Loan losses tend to lag the economic cycle and these are expected to remain moderate to high, although at levels which are manageable. We also see opportunities to build on our consistent performance and distinctive strategy and move closer towards realising ANZ's full potential.

Charles Goode

Chairman

Chief Executive Officer's Report

Five years ago we decided to create a very **different bank**.

For our shareholders, 2002 was a good year, but one with challenges. We have met those challenges head on and still kept our promises to our shareholders, our customers, our staff and the community.

Our performance has been built on ANZ's distinctive strengths: the quality of our people, a strong culture, a diverse portfolio of specialised businesses and a constant focus on creating a low risk, sustainable business.

Shareholders who have watched our performance going back to the early 1990s will know it hasn't always been that way.

Key Decisions

Five years ago we took the decision to change ANZ. We needed to. While we had stabilised and recovered from the depths of the recession of five years before, we had lost the confidence of many investors and it showed in our share price. So we took three fundamental decisions:

We shifted away from a dependence on higher risk businesses including those in international emerging markets, toward lower risk, more sustainable consumer businesses. In 1997, personal businesses accounted for just 36% of ANZ's earnings. Today they account for approximately 55%

We transformed our cost structure through developing the right technology and enabling our processes to become leaner and more competitive. In 1997, we had the lowest productivity among the major Australian banks with a cost to income ratio of 63%. Today we are the industry leader with a cost to income ratio of 46%

We recognised that our long-term competitive strength rests with our people. We began the work to revitalise our culture, releasing the energy and passion of our people, enabling them to deliver more consistently and productively for shareholders, customers and the rest of the community. In 1999, 52% of our people were satisfied working at ANZ. Today that figure is 78%

Leading Change

While improving financial performance is critical to our ability to attract capital, changing the culture is critical to creating our future. In 1997, most customers, investors, members of the community and our staff thought the major Australian banks were the same. We saw a real opportunity, an attractive opportunity, for ANZ if we could breakout from the pack. Firstly, we reconceived ANZ as a collection of specialised businesses. This strategy has eliminated much of the bureaucracy that got in the way of our staff serving our customers. It has given them more of a feeling that they own the business. It has given them more freedom and the opportunity to be more creative. At the same time, it has made the risks and results of their business very transparent to us and to you the owners.

You can now see that the financial results show a consistent level of delivery. Secondly, from the customer satisfaction survey results published in this report, you can also see emerging improvements on this dimension, even though there is still much to do.

Challenges Past and Present

Of course, we have had to face some difficult issues. Losses in emerging market bond trading in 1998 and managing an exposure to Asian markets of almost US\$11.5 billion at the height of the Asian crisis in the years following 1997 are examples.

We contained the impact of these issues, exiting businesses and dramatically reducing our higher risk exposures.

During that time, our focus was on improving ANZ's financial performance and restoring the confidence of our investors. But we did not focus enough attention on service to our personal customers and on our reputation in the community. We have learned our lesson. Restoring the faith of our customers is now at the top of our agenda but the journey has only just begun. We have standards to assess how we serve customers, and we have a clear view on how we should serve them in the future. We are very serious about making a difference here.

Looking Ahead

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Over the next five years, our challenge is to maintain our high levels of performance and, at the same time, to take ANZ to the next level for shareholders, staff, customers and the community by reinventing the way we do business.

It is only when we achieve such a balance that we will be able to stand up and be truly proud of our achievements.

The next stage of our growth will be based to a far greater extent on growing our revenue and customer base sustainably.

To do that we will invest in higher growth opportunities mainly in consumer banking, wealth management, small business, corporate banking and related services including asset finance, and non-asset based corporate activities. Internationally, we will consider lower risk moderately sized growth options in the Pacific and possibly in Asia as a foundation for longer-term growth.

We believe we now have the foundation to meet these challenges as we seek to create the bank of tomorrow, today.

John McFarlane

Chief Executive Officer

Our aim is to deliver distinctive customer service. Making a difference each day with individual customers and local communities.

Noah and Lilly don't know it, but their mother, Gabrielle is discussing investment options with ANZ's Wendy Shaw, that will protect their future financial security.

We know service to our personal customers has to improve. Something has to change. It's us.

It is hard for a bank or any other large organisation to change its approach to customer service. Becoming customer-focused involves thinking very differently. In our case, we have to change the way we deal with customers so they actually feel they have had a different experience. Customers need to believe we are really part of their community. Easy to write in an annual report; hard to make happen. What it means for us is a total rethink and refresh. But we have started in earnest and are seeing some early results.

To start the change, we introduced simplified accounts, reduced day-to-day banking fees and focused on delivering the promises we made in our Customer Charter. We have also appointed a Customer Advocate to ensure satisfactory resolution of customer issues and complaints. This is just the beginning.

During the year, we began a program called Restoring Customer Faith in Victoria and New Zealand. In 2003, we will introduce it throughout the rest of Australia making special efforts in rural Australia to rebuild our presence.

Restoring Customer Faith changes our consumer banking business into small, community-based businesses, each with a Local CEO. We want staff in each branch to think of it as their own business, to treat customers as if our future depends on it and to become a real part of the community.

We are investing to make this work. We are upgrading branch premises, delivering additional training programs to our people and allowing them the flexibility to make business judgements regarding staffing numbers and deployment, and ways to improve service.

So far the results are encouraging. Both customer and staff satisfaction are improving. We are retaining more of our existing customers and attracting new ones. This is underpinning improved business performance. We are now seeing branches as places where we can grow revenue, increase customer numbers and create real value for our shareholders. It's early days but we are committed to getting it right.

Personal

We have won industry accolades this year for the quality of our banking services to businesses and corporates. And we are seeking to raise the bar higher.

Market research among medium-sized corporations and large business institutions indicate that, of the major Australian banks, ANZ has again rated number one in overall customer satisfaction and market share in 2002.

ANZ is the lead banker to 37% of Australia's large corporations. In the middle market, we are the primary banker to 26% of businesses.

This isn't something we take for granted. Businesses are demanding in the service they expect. Maintaining our leadership position requires continual focus on understanding our clients' businesses, providing them with creative ideas and solutions, and delivering specialist products and services to meet their needs.

During the year, we have extended our range of investment banking solutions available to medium-sized corporate clients. We have continued the development of new electronic platforms to better support client enquiries and product delivery. The Corporate Portal launch during 2002 provides clients with a range of on-line services including foreign exchange, capital markets and trade finance together with financial decision-making tools.

Satisfying clients also requires a great team of dedicated people. Strengthening the capabilities of our people has been a priority this year. Staff satisfaction is among the highest in the Group, reflecting a long-term focus on developing our culture and the expertise of our people. This has been supported by our relationship management systems which allow us to anticipate needs, proactively identify opportunities and develop creative solutions for clients.

The strength of our franchise among medium-sized and large corporations, together with high levels of client satisfaction, create a powerful combination to reshape the business around client needs and to create growth.

Corporate

We lead in the business market. It's about listening, anticipating needs and innovating to stay ahead.

Maureen and Tony have been banking with ANZ since their first trek in Nepal in 1982. The journey continues, as Lonely Planet is now the largest selling travel guide in Australia.

We are determined to recapture something banks have lost. The trust of the community.

Sharyne's future looks a whole lot brighter. Shane Teitz from the ANZ Mortgages Group discusses the progress of her new Habitat for Humanity home.

Incremental change is not enough to recapture community confidence in banks. ANZ is taking steps to begin to make a real difference.

We are taking seriously the job of reconnecting with the community and regaining trust. Over the past 10 years, people have increasingly felt that banks have become detached from the community. In recent years, we've tried to reconnect. In 1999, we decided not to leave any more rural communities. In 2001, we put in place new low-cost banking options for senior citizens and welfare recipients. We are giving our people the freedom to contribute more to their local community through paid volunteering leave and financial support from the ANZ Community Fund.

Reconnecting with the community is not only about giving money. It's about creating genuine business-community partnerships. The ANZ Community Fund was established in 2002 to create a new way of involving ourselves in the community. It achieves its aim by placing the responsibility for a large part of ANZ's community giving at a local level. It enables the people in our branches to create meaningful partnerships, to strengthen and enhance life in the communities where they live and work.

During the year under review, we supported a wide range of community programs including:

Australia and New Zealand Intensive Care Appeal

Royal Life Saving Society's Wet'n Wise Program

Foodbank Australia

Habitat for Humanity

Victorian Credit Helpline

Foundation for Rural and Regional Renewal

ANZ DOXA Youth Foundation Cadetship

Hollingworth Cadetship Program

We are creating new types of programs that have a direct link to our business in financial services. During the year, we started a major research program on financial literacy. The aim is to establish a strong basis for new financial education programs to provide more opportunities for individuals to learn about managing their finances.

We also entered into a partnership with the Brotherhood of St Lawrence to run a matched savings program. This will see ANZ match 2 for 1 each dollar saved by low income families for education costs.

We expect this increased level of connection with the community to gain further momentum with a wide range of new initiatives planned for 2003.

Community

The future is about Leadership, freedom and responsibility. We're releasing the energy & passion of our people.

Joe Farrugia, Local CEO, for the Moonee Ponds area, draws new talents out of Jim Hudaverdi and Monica Rashoo, part of his local team.

Our people now have greater flexibility to deal with their customers, bringing to bear closer knowledge and understanding of their needs.

When we created the specialisation strategy two years ago, we knew it would only work if we could create a different culture. A culture where people had a sense of ownership. A culture where people talked about we rather than they . We wanted people to be employed to make more decisions and to take responsibility for them. We wanted them to bring a human face to the demanding decisions that need to be made in banking.

If we could achieve this successfully, we could turn our culture into a unique and competitive asset.

One of the starting points was to encourage our staff to own shares in ANZ. This helps them to think and act like owners so they care more about their customers and about creating value for shareholders.

We have also taken steps to assist our people outside work. These include extending our PCs@home offer to staff, providing them with heavily subsidised PCs for use at home; the introduction of paternity leave to assist staff with new families; and providing paid leave for volunteer work in the community.

We knew the only way a large company like ANZ could change quickly and successfully was to involve all our people in a new way of thinking about the business. A unique thread of shared values would allow us to function collectively as one company and individually as specialist businesses at the same time.

Over the last two years, more than 6,000 of our people have participated in a cultural transformation program called Breakout. In 2003, an additional 6,000 people will take part. Breakout emphasizes leadership, diversity, coaching and development. It provides a framework for creating more challenging and rewarding jobs for our people.

The creation of many individual businesses within ANZ, and the removal of bureaucracy and layers of management, gives more responsibility to people to recognise customers needs and develop these businesses. In 1997, we had as many as nine layers of management between the Chief Executive Officer and front-line staff who serve customers, today there are just four.

We are committed to developing and sustaining the new ANZ culture. It is showing in the commitment and engagement of our people. This year in our annual staff survey 78% of staff indicated they are satisfied working with ANZ and 71% would recommend ANZ as a place to work. Three years ago only 52% of our staff said they were satisfied working with ANZ.

We want ANZ to be a place where people can achieve more than they thought they could and in the process, help turn ANZ into the bank of tomorrow, today.

Culture

Our challenge is to build on the foundation of strong, consistent financial performance and take ANZ to a new level. One based on growing our revenue and customer base at low risk.

Central to our growth strategy is a renewed focus on specialisation and transformation.

While our specialisation strategy has been a critical part of our success, we are also different in the way we implement this strategy. There is often a big gap between strategy and execution and we need to make sure all our core businesses are out-performing competitors. We are reshaping our portfolio of businesses by investing in higher growth areas, extending and developing our specialist capabilities and moving out of weak and non-core positions.

We will build on our financial performance by investing in our domestic consumer, small business and corporate franchise and by pursuing opportunities in the Asia-Pacific region.

We have taken some early steps:

Our investment in the Restoring Customer Faith Program in personal banking has helped us retain more of our existing customers and attract substantial numbers of new customers

Openings of transaction accounts are up 100% on an annualised basis since we introduced simpler, lower cost options in February 2002. Customer satisfaction is steadily improving

We established a new wealth management joint venture with the ING Group in May 2002, creating a new force in funds management and life insurance in Australia and New Zealand. This is an exciting development that fills a strategic gap for ANZ in wealth management

Wealth management is one of the fastest growing areas of financial services. Australians and New Zealanders are increasingly focused on wealth generation and protection and the need to fund their retirement

The joint venture is one of the leaders in wealth management in Australia and New Zealand. ING Australia provides customers with a wider range of products, services and advice through either ANZ or a network of 6,000 professional financial advisers

We have a goal to triple annual investment inflows by 2005 through aligning distribution with customer needs, expanding our sales force of qualified financial planners and using the improved range of products and investment funds offered by ING Australia

We are continuing to reinvigorate and invest in our small business franchise. Significant improvements to customer services, further investment in training and increased geographical coverage and industry specialisation are providing a good platform for growth in our market position

ANZ has a leading position as a banker to both medium-sized and large corporations in Australia. We were rated #1 in overall satisfaction by corporate customers. The strength of our franchise and capability of our people creates a strong foundation for further growth through continuing to meet the evolving needs of our clients

We are exploring options for longer-term growth in our region, primarily in personal financial services. We have expanded our presence in the Pacific with the acquisition of the Bank of Hawaii operations in Papua New Guinea, Vanuatu and Fiji. We have an 11% stake (with an option to increase to 29%) in Indonesia's tenth largest bank, Panin Bank, and contribute technical assistance on strategic, technology and credit issues. We are also exploring opportunities for modest, low risk expansion elsewhere in Asia and the Pacific to develop options for longer term growth

Growth

Our challenge is to take ANZ to a new level by investing in growth and attracting more customers.

At 7.46am the journey ahead for ANZ is clear.

There is an opportunity to serve more personal customers.

People are increasingly seeing that ANZ is different. We are more actively focused on attracting and retaining talented people than ever before. And we want to deepen our relationship with customers and the community.

2002 was a challenging but successful year for ANZ. Earnings grew after tax by 15.9% to \$2168 million*. Earnings per share increased by 16.7%*.

This continues the more consistent level of performance for shareholders established in recent years. Since 1999, profit has grown at 13.6%* per annum. Return on equity has increased by four percentage points to 21.6%* and the cost to income ratio has been reduced to 46%*.

We have built our performance momentum around three main themes:

Strengthened accountability and focus with stretch targets and rewards

Divesting activities with poor returns while reducing overall risk

Keeping costs tight while growing revenue

We know performance means more than our financial results. ANZ is committed to making a difference, not just for the benefit of shareholders but also for our customers, staff and the wider community.

* excluding significant transactions during year ended 30 September 2002: the sale of businesses to ING joint venture (profit after tax of \$170m), National Housing Bank recovery (\$159m profit after tax) and special general provision for doubtful debts (\$175m charge after tax). Including significant transactions, the net profit was \$2322m.

Overview

Vision - The Bank with the Human Face

Customers

Put our customers first

Performance

During 2002, we undertook the following major customer initiatives:

Restoring Customer Faith program

Appointment of Customer Advocate

Simplified fee structure

New Access accounts

Shareholders

Perform and grow to create value for our shareholders

We continued to deliver real growth to our shareholders:

Achieved record share price

Outperformed Australian market as a whole

Record dividend per share

Staff

Lead and inspire each other

Overall staff satisfaction has increased from 52% in 1999 to 78%

More staff are recommending ANZ as a place to work

Staff Satisfaction(%)

Employment Brand

Strong employment brand as evidenced by dramatic increase in graduate applications

Culture

During 2002, 4,200 staff attended ANZ's Breakout cultural development program

Breakout, be bold and have the courage to be different

Appointed 100 staff as champions and facilitators for the Breakout program

Commenced Breakout Inspiring Leaders program to build on our leadership capabilities

Community

Provided each staff member with 8 hours volunteering leave per year

Earn the trust of the community

Launched ANZ Community Fund (provides financial and physical support to local organisations identified by local branches)

Long term partnerships with Victorian Credit Helpline, Foodbank Australia, Foundation for Rural and Regional Renewal and the ANZ Hollingworth Cadetship Program

8,238 hours of volunteering by ANZ staff

Chief Financial Officer's Review

Track Record: 1992-2002*

Group Profit

ANZ's profit in 2002 of \$2322m reflects the strong progress the Group has made over the past 10 years. The period from 1992 to 1995 was one of recovery, as ANZ returned to a stable financial footing following the substantial losses on commercial lending in the early 90s. The period from 1996 to 1998 was one of consolidation, as ANZ began to focus on its core businesses, mainly in Australia and New Zealand. Since 1999, ANZ has focused on improving performance, building new momentum and delivering strong returns to shareholders with a clear focus on productivity.

Group NPAT - \$2322m

Financial Targets**

We have achieved or are well on track to achieving our 2003 targets

Denotes target achieved

EPS Growth > 10%

Return on Equity > 20%

Cost to Income Ratio mid 40 s range

Adjusted Common Equity target range 5.25% 5.75%

Credit Rating Maintained AA- credit rating

* including significant transactions

** excluding significant transactions

*Notes to change in profit excluding significant transactions**

Net Interest Income \$4,018m +4.8%

Growth in net interest income was driven by an increase in net loans and advances (6.8%). Margins were stable over the year, with a decline in mortgage margins offset by improved risk pricing in other business units.

Non Interest Income \$2,796m +8.7%

Other income growth was driven by lending volume growth in Institutional Banking and Personal Banking Australia, and non lending fees in Consumer Finance due to increases in cards issued and merchant turnover.

Expenses \$3,153m +2.0%

Expense growth was contained despite Group wide pay increases for staff and investment in a range of growth initiatives focused mainly on personal businesses. The increase in expenses that these activities generated was partly offset by the shift of ANZ's investment business into a joint venture with ING. These activities are now accounted for as an associate with only ANZ's share of its net result recognized.

Debt Provisioning Charge \$610m +14.9%

Economic Loss Provisioning (ELP) increased by \$79m, due to both portfolio growth and a central ELP adjustment, reflecting ongoing global uncertainty. This adjustment was calculated on the basis of a one notch rating downgrade of the Global Structured Finance Portfolio. Note: A special ELP top up of \$250m was made during the year, and is included in significant transactions*.

Tax and Outside Equity Interest

Increased in line with improved profitability, offset by the change in Australian corporate tax rate from 34% to 30%, which reduced tax expense by \$79m.

* *Significant Transactions*

The sale of businesses to ING joint venture (profit after tax of \$170m);

National Housing Bank recovery (\$159m profit after tax); and

Special general provision for doubtful debts (\$175m charge after tax).

In a challenging and highly competitive environment, ANZ has continued to deliver strong shareholder returns with net profit for the year increasing by 15.9% excluding significant transactions*. Our improved performance was achieved through maintaining a focus on operational efficiency and growing our income.

These positive factors were partly offset by a deterioration in the international credit environment resulting in higher (but manageable) specific provisions. The overall result for the year benefited from the one-off impacts of the settlement of the NHB litigation and profit on sale of the funds management operations into the joint venture vehicle, partially offset by a special general provision for doubtful debts charge, resulting in headline NPAT (including significant transactions*) increasing by 24.1% for the year.

Change in profit 2001-2002 (\$m)

2001 to 2002 NPAT Growth (\$m)

Improved profitability across most Business Units

Asset Quality

Non accrual loans decreased over the year reflecting the health of the domestic market, assisted by write-offs of several large exposures. The level of the decrease was partly offset by the downgrade of a small number of international customers who were previously investment-grade.

Total Group Non Accrual Loans (\$m)

**Non Accrual Loans
4.5% decrease**

**Net specific Provisions
40% Increase**

Net Specific Provisions increased to \$728m in 2002 (\$520m in 2001). This increase, however, does not reflect a systemic deterioration of ANZ's credit profile, but rather a small number of large high profile corporate collapses during the year. Four customers represent approximately 50% of the Specific Provision charge for the year, of which \$170m was taken against Enron and a further \$143m against Marconi.

Despite these large single name losses, our Economic Loss Provisioning (ELP) methodology has ensured that all losses are adequately covered, with our General Provision balance above APRA requirements. As part of the regular assessment of the adequacy of the General Provision, a special top up to of \$250m was made during the year to increase the General Provision balance to a more prudent level, in light of the prevailing global economic uncertainty and an unusual level of investment grade defaults.

General Provision (\$m) - Total Group

*Balance Sheet
Management*

Net loans and advances (NLA) increased by 6.8% driven primarily by our mortgages business on the back of a robust Australian property market. Lending in our Consumer Finance and Small to Medium Business segments also increased reflecting our strategies in each segment to increase market share.

Lending & Deposit Growth

**Net Lending Asset
Growth 6.8%**

Deposit Growth

8.0%

Deposits grew by 8% during the year as part of the Bank's continued effort to grow deposits.

(\$b)

Capital Management

Our capital levels remain strong across all major measures. Adjusted Common Equity as a % of Risk Weighted Assets (RWA) is 5.7% (Target Range 5.25% - 5.75%).

Regulatory Capital

RWA

Tier 1 Capital 7.9%

A level of capital at the high end of our target range is considered prudent given the current world economic climate. However, capital levels are continually being reviewed to ensure that an appropriate balance between risk and return is maintained.

Adjusted Common Equity (ACE) 5.7%

Dividends increased to 85 cents (fully franked) from 73 cents in 2001, representing a payout ratio of 58%.

Adjusted Common Equity/Risk Weighted Assets

- o Delivered major new projects including credit card processing and customer transaction processing

2003

Goals

- ý Replace Group Payroll systems
- ý Complete upgrade of corporate banking and customer transaction processing capabilities
- ý Commence customer access via web for self service enquiries on payments, statements and transactions

Business Reports

Personal Banking and Wealth Management

Growing our personal banking business is all about the little things we do every day. It's about providing better products and service to individual customers and having the commitment to make good service a reality at the local level.

Elmer Funke Kupper

Managing Director, Personal Banking and Wealth Management

Personal Banking and Wealth Management includes our Personal Banking businesses in Australia, New Zealand and Asia Pacific, Wealth Management and our joint venture with ING.

During 2002, earnings rose 8.9% as we continued repositioning these businesses for future growth. This has involved a commitment to transforming our customers' banking experience. We have made some real progress in these areas this year.

Signatures

We launched our new access accounts which now set a new standard in the industry. We have received an award for our product, Access Advantage

In May 2002, we made a strategic leap in wealth management through our joint venture with the ING Group, establishing ING Australia as a leader in funds management and life insurance in Australia and New Zealand

We implemented the Restoring Customer Faith program in Victoria and New Zealand. This new model for our retail business is being rolled out across Australia and New Zealand during the next two years. It involves giving local staff a greater sense of ownership and freedom by allowing them to put customers first, and supporting our people by investing in modern branch premises, training programs and improved technology

Our new Customer Service Charter established clear benchmarks for service to personal and small business customers

We extended our leadership position in the Pacific through acquisitions in Kiribati, Papua New Guinea, Vanuatu and Fiji, and through investment in electronic banking and new products

Our challenge is to build on this new momentum to take our Personal Banking and Wealth Management businesses to the next level by continuing to focus on growing our revenue and customer base. We will make key investments in our product suite, technology and training programs.

Consumer Finance

We are repositioning Consumer Finance to build a growth business for the future through investment in state-of the-art technology and by creating a great team of people. Our aim is to continue to deliver innovative products and a distinctive service experience for our customers.

Brian Hartzler

Managing Director, Consumer Finance

Consumer Finance, which includes credit cards, merchant payment solutions, ePayment products and personal loans, has performed well in 2002.

Earnings were up 50.5%, based on growth in the credit card portfolio following the collapse of competitor airline loyalty programs, increases in card spending volumes, higher merchant acquiring share, and improved credit performance particularly in personal loans.

Our specialist approach has allowed us to focus on the quality of our people and technology to deliver products efficiently with high levels of customer satisfaction. This focus is showing results, including the highest credit card satisfaction among our major competitors and a 7% increase in staff satisfaction.

Our 2002 results reflect a number of significant technology investments designed to support future growth. During the year, we were the first bank in Australia and New Zealand to commence converting our credit card technology to chip. The \$50 million investment in new chip-based cards and chip-capable MultiPOS terminals provides an early mover advantage with cardholders and merchants. This included launching Sphere, a new chip based reward program, for ANZ First customers.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

In March, we replaced our main processing platform with a new system called VisionPlus. This system will allow us to provide more flexible, customised, and responsive service to customers and reduce costs through greater processing efficiencies.

We have also improved our share of merchant acquiring; introduced new on line tools for our customers and staff; reduced fraud losses through the application of neural network technology; and taken early steps to extend our credit card business into Asia by launching credit cards in Hong Kong.

Source: Roberts Research*

Small to Medium Business

We are revitalising our small to medium business presence. Our people have more authority to make pricing and credit decisions and meet customer needs. By improving service and delivering a full range of financial solutions for customers we are creating growth for the future.

Graham Hodges

Managing Director, Small to Medium Business

The small to medium business sector is an important growth opportunity for ANZ. During 2002, we continued to develop our specialist focus by implementing a distinctive new service proposition – one focused on developing the quality of our people and empowering them to address customer needs more effectively.

The new service proposition directly addresses some of the key drivers of customer satisfaction – being flexible and responsive around customer needs, providing expert advice and innovative products and a long-term focus to customer relationships. We have expanded our geographic footprint and developed specialist industry segments such as franchising.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Our efforts have begun to pay dividends. Customer satisfaction has risen from 66% in 2001 to 69% in 2002. Staff satisfaction increased from 59% in 2001 to 75% in 2002. We also received recognition in Personal Investor magazine's financial services awards for the Best Business Transaction Account, Best Small Business Web Site and the Lifestyle Package Banking Award for Small Business.

During the year, Small to Medium Business earnings grew 20.8% driven by growth in new customers, increased share of business from our existing customers, and higher deposit and lending volumes.

While we have a long way to go to build a market-leading position, we have made good progress in 2002. We will continue to invest in the business, by growing our geographic presence, serving our customers better, developing new products and extending our specialist capabilities.

Mortgages

The difference our specialist focus creates is a team of people who live and breathe mortgages – a team which is growing our business by helping around 1000 families into home ownership every day.

Greg Camm

Managing Director, Mortgages

Growing our Mortgage business starts with good products. In 2002, for the fourth year in a row, we received Personal Investor magazine's award for Home Lender of the Year, reflecting the first rate features and competitiveness of our mortgage products.

Good products don't add value without high levels of customer service, and this year we invested heavily in technology and resources to develop faster, more responsive ways of serving our customers.

This has included implementation of new online systems to allow mortgage applications in Australia and New Zealand (including broker channels) to be lodged electronically, speeding up processing and approvals. We have also developed new businesses in the wholesale funding and servicing of third party mortgages.

We are already seeing some early results. While we have taken a conservative position on risk, we have approved mortgages in record numbers in the second half of 2002.

Loans outstanding have grown by 16% over the year. Brokers have voted us the best bank to do business with. These results have, however, been impacted by pressure on margins through increased funding costs in the rising

interest rate environment, resulting in 4.2% earnings growth to \$246 million.

Asset Finance

We are a leading provider of vehicle and equipment finance and rental services. That requires a consistent focus on fast, convenient finance and rental experience for our customers, providing value for our business partners and creating an environment for our people to excel.

Elizabeth Proust

Managing Director, Asset Finance

Esanda and UDC are our asset finance and rental businesses in Australia and New Zealand. We specialise in supporting our customers and business partners, such as dealers and brokers, through vehicle and equipment finance, vehicle fleet and equipment management and servicing, and debenture investments.

The asset finance and rental market is highly competitive and has experienced consolidation and increased margin pressures in recent years. Our response has been a series of initiatives to develop a more sustainable market leadership position. This includes a program of efficiency improvements involving investments in technology and process re-engineering and redesign, and a focus on improving credit quality.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Our efforts are already starting to show results. Earnings in 2002 are up 10.9%. Customer satisfaction remains strong at 80% and staff satisfaction has also risen to 77%. These results reflect the specialised culture and identity we have developed around serving our business and personal customers.

There is still much to do. We need to create an operationally excellent platform for our customers and business partners and continue to attract and retain talented people. This focus will provide a platform to capture future growth opportunities and continue to improve profitability within our asset finance business.

Corporate Businesses

It's been a tough year but we have continued to deliver through our unique competitive position. Our client franchise, high levels of customer satisfaction and the expertise of our people continue to allow us to reshape the business and create growth.

Bob Edgar

Managing Director, Corporate Businesses

Corporate Businesses includes our relationships with middle-market corporate clients, major Australian and international institutions and corporations, and Global Transaction Services which provides products to support working capital management, liquidity management and transaction processing.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

It has been a subdued year in the domestic business market. Although consumer sentiment has helped drive growth in the domestic economy, the business market has been relatively quiet. It has been even more difficult internationally.

However, ANZ has an enviable franchise in the business market. Among the major Australian banks, customers again rated us #1 in satisfaction for both the corporate and institutional markets.

Earnings in Corporate Banking were up 6.3% despite restrained balance sheet growth reflecting the contribution of lending, leasing and deposit products

Institutional Banking faced a more challenging international environment in 2002. Earnings were up 18.5%, mainly from lending fee income

Global Transaction Services earnings were up 11.1% with growth in structured trade partly off-set by downturns in foreign cash and travellers cheques following September 11 and a repositioning of the trade finance portfolio to reduce risk

Our performance is also a reflection of the quality and commitment of our people, with high levels of satisfaction reflected in our staff survey results.

Our client franchise and high levels of customer satisfaction together provide a strong combination that continues to allow us to explore opportunities to reshape the business and create growth.

Sources: Roberts Research*
Russ Knight Research**

ANZ Investment Bank

We are developing a strong, distinctive business focusing on the depth of our specialist product range combined with our traditional strengths, the quality of our people, our customer franchise and concentration on key geographies.

Grahame Miller

Managing Director, ANZ Investment Bank

ANZ Investment Bank, which includes our structured and corporate finance, capital markets and foreign exchange businesses, has produced a solid performance in a challenging international environment.

We remained the premier Australian foreign exchange (FX) bank globally. Although earnings were down 3.4%, reflecting lower FX volatility internationally and tightened credit conditions, growth in FX amongst funds management clients and e-commerce are positioning us for the future

Global Capital Markets was ranked #1 by Asia Money magazine in Interest Rate and Credit Derivatives, and #1 in Australian and New Zealand Loans by Basis Point magazine. Earnings were up 20.8% supported by debt, derivative

and securitisation deal flow

Corporate Financing and Advisory earnings grew 9.7% reflecting a range of leading roles in major project financings and the development of growth businesses in private equity capital and leveraged finance

Global Structured Finance produced earnings growth of 10.5%, achieving a strong performance in project and structured finance and industrial transportation and growth in non-lending fees, despite subdued markets

We incurred significant specific provision losses from loans made to two major international companies that collapsed during the year, namely Enron and Marconi. Following this, further steps have and are being taken to address credit issues and improve risk mitigation internationally. The net profit after tax results reflect economic loss provisioning, not the specific losses incurred during each year. Our strong business foundation is enabling us to continue to reshape our business and focus on new growth opportunities in private equity products and securitisation and increased fee-based structuring and advisory activities.

Operations, Technology and Shared Services and Corporate Centre

Our teams are focused on supporting ANZ's specialist businesses by providing strategic direction, technology, financial governance and shared services at best practice cost, in a way which creates freedom and avoids unnecessary bureaucracy within the Group.

Operations, Technology and Support Services (OTSS) is responsible for ANZ's global technology platforms, development and maintenance of business applications, the Group's payments business and shared services.

Providing these services is about a working partnership between our technology, payments and other specialists and each of our businesses. The objective is to provide our customers with superior personalised services at lower cost.

In 2002, OTSS worked on a number of projects including the replacement of front-to-back systems for our Asset Finance business, installation of a common administrative system for the Group, rollout of a new branch sales platform and implementation of a new platform for our cards business called VisionPlus.

ANZ's Corporate Centre provides a diverse range of services to the Group. It comprises Group Strategic Development, Group Risk Management, People Capital and Chief Financial Officer's (CFO) Units including Group Treasury.

Group Strategic Development works closely with the businesses to strengthen and maximise their performance. In 2002, ANZ launched a new funds management joint venture with ING as well as acquired the Bank of Hawaii's Pacific businesses.

Group Risk Management is responsible for the organisation's risk strategies, policies and processes. 2002 achievements are detailed on pages 38 and 39.

People Capital is involved in leading a range of initiatives to help build organisational capability, and deliver the best opportunities to our people. 2002 achievements are detailed on pages 15 and 22.

CFO Units are responsible for the Group's financial governance. In 2002, the Company won several awards in recognition of the quality of its disclosure with CFO Units being major contributors to this transparency.

Group Treasury, part of CFO Units, provides cash flow support, ensures liquidity, manages interest rate risk and provides capital to our businesses. In 2002, Treasury's earnings increased 65% to \$124 million, reflecting strong interest income from interest rate risk management activities.

integrity

Integrity is at the core of every relationship we have with our customers, staff and shareholders. It's about earning their trust.

Our customers have to have absolute confidence in the safety of funds they invest with us. We must be honest and transparent in the way we deal with them. We also expect our customers to be honest and accurate in what they tell us about their financial position.

Working in financial services means our staff deal with issues of ethics and integrity every day. We have a Code of Conduct to underpin ethical behaviour. However, we have to continue to create a culture where legal, ethical and honest behaviour is just the way we are and the way we work.

Investors are demanding higher standards of corporate governance. For our shareholders, integrity means confidence in the investment they have made in us. It means consistent, no-surprises performance and a commitment to transparent reporting, timely and accurate disclosures and management accountability.

In 2002, the ANZ Board undertook a review of governance procedures focused on further strengthening ANZ's standards of corporate governance, disclosure and transparency.

The changes relating to Board committees, their membership and their charters are outlined on pages 43 and 44.

A range of other governance measures were introduced including:

A new policy covering ANZ's relationship with its auditor. The policy limits and controls the provision of services by ANZ's auditor by restricting engagements undertaken by the external auditor to audit or audit-related services. Certain other services can only be provided where they cannot be perceived as potentially conflicting with the independent role of the auditor and where they have been approved by ANZ's Audit Committee

Enhancing our Serious Complaints Process which protects staff who raise issues regarding internal procedures

New reporting arrangements for the Company's internal audit function which now reports directly to the Board's Audit Committee

Providing enhanced disclosure and discussion of critical accounting policies, and disclosure of off-balance sheet vehicles (refer to Financial Report)

Index-linked options provided to executives to raise the performance hurdle and more closely link options to our performance relative to our competitors

An in-principle decision to expense options in the year they are granted. We will implement this change as soon as the tax and Australian Accounting Standards implications are clarified

Our business is based on Integrity It's about trust - being what you say you are, doing what you say you will do.

There is an inherent trust between Rhiannon and her dad Anthony as they move toward their future.

Risk Management

We are building a medium growth, low risk bank.

ANZ's Risk Management Vision and Strategy

ANZ is underpinned by an ongoing focus on risk issues and strategy at the highest levels and a comprehensive risk management framework comprising:

The Board, providing overall leadership and monitoring progress

A strong basis for Group-wide risk management policies, procedures and systems, overseen by an independent central team of risk professionals headed by the Chief Risk Officer reporting to the Chief Executive Officer

The use of sophisticated risk tools, applications and processes to execute our global risk management strategy across the Group

Primary Business Unit-level accountability for management of risks in alignment with the Group's strategy

Risk Management and the Board

The Board of Directors, through the Risk Management Committee, approves the Group's risk appetite and is responsible for overseeing and approving ANZ's risk management strategy and policies. The Risk Management Committee meets regularly to monitor that the requisite culture, practices and systems are in place across the Group, to discuss the Group's response to emerging risk issues and trends, and to review the effectiveness of the risk management systems.

A Strong Framework for Risk Strategy

Signatures

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Management has the primary responsibility for identifying and evaluating significant risks to the business and for implementing suitable controls.

Responsibility for the implementation of risk policy and for ensuring that there is an effective top-level control framework is delegated to the Chief Risk Officer.

The Chief Risk Officer implements the risk strategies and policies approved by the Board by leveraging specialist expertise within Group Risk Management in three key types of risk: Credit Risk, Market Risk and Operational Risk. Group Risk Management is also responsible for setting risk policy, determining risk measurement methodology, overseeing the Business Units' compliance with policies, regulations and laws, and undertaking regular risk evaluation and reporting. All of these functions are undertaken by risk professionals with extensive experience.

Business Unit Level Accountability for Risk Management

Within each Business Unit, the Managing Director has primary responsibility for risk management. Each Business Unit has a risk management team and receives further assistance from a senior risk professional who provides strategic guidance and advice. This partnership approach ensures timely communication about risk issues as they arise and also provides the means for effective governance and oversight by the Chief Risk Officer.

The various risks inherent in the operations of the Group may be broadly grouped together under the following three categories:

1. Credit Risk

Credit Risk policy and management are principally executed through two dedicated departments – Wholesale Risk and Retail Risk.

Wholesale Risk services the Group's Corporate, Institutional and Global Investment Banking activities, while Retail Risk services the Group's consumer-based businesses.

All major credit decisions (or automated decision processes) for the Group's corporate and consumer businesses require dual approval by both Group Risk Management and Business Unit-based personnel.

Review of 2002

2002 was a very difficult year in the international credit markets highlighted by large corporate failures and accounting frauds, continued difficulties in the energy and telecommunications industries, increased share market volatility and an overall trend towards increased risk aversion. In recognition of these events, and consistent with ANZ's objective to improve continually our core risk management processes to

industry leading levels, we have implemented a number of substantial enhancements to our framework for managing credit risk in 2002.

Specific improvements include:

Continuing the trend of previous years, ANZ's largest corporate exposures were further materially reduced in 2002. The aggregate of our top 10 committed exposures as a percentage of Adjusted Common Equity declined over the last year from greater than 130% in September 2001 to approximately 100% in September 2002

Further substantial reductions were made to the limits applying to our single customer exposures. These limits vary with the credit rating and geographical location of the customer; the limits applicable to offshore customers are 40% lower than those applicable in Australia and New Zealand. In addition, inner sub-limits on funded exposures were introduced in October 2002

Cross-border limits were further materially reduced (post September 11) in South Asia, Middle East and Asia

Top 10 Exposures as percentage of Adjusted Common Equity

Continued Portfolio Re Weighting as a percentage of Group Assets

ANZ's internal credit ratings are now regularly and systematically reviewed against movements in external ratings, market indices, credit spreads and other industry indicators for early warning purposes

ANZ's internal risk grading scale was expanded from 10 to 27 customer credit ratings

A new credit cost calculator, C Risk, was implemented, which calculates economic credit costs for individual facilities

A wider application of sophisticated risk measurement tools in the retail sector, resulting in more efficient and effective credit assessment processes. Credit policies were tightened in certain specific areas

Despite a difficult economic environment in 2002, the overall quality of ANZ's corporate and consumer credit portfolios remains sound. Australian and New Zealand risk profiles remain stable with the international profile being affected by a small number of larger corporate downgrades. The assessment of counterparty credit worthiness has been enhanced through providing greater weighting to the quality and integrity of counterparties' financial disclosure. Concentration limits on certain industries, sectors and customers have been reviewed and further aligned to the Group's risk appetite.

2. Market Risk

Market Risk is the risk that the Group will incur losses from changes in interest rates, foreign exchange rates or the prices of equity shares and indices, commodities, debt securities and other financial contracts, including derivatives. It is managed by a variety of different techniques with Group Risk Management setting limits to control trading positions and interest rate risk up to Board authorised totals.

Review of 2002

During the year, rollout of a new Market Risk Engine was completed. This major initiative enables better aggregation and measurement of market risks across asset classes (eg, equities, foreign exchange and interest rate products), and positions ANZ at the forefront of market risk management capability.

Other key undertakings over the year, which focus particularly on the crossover dynamics between Credit Risk and Market Risk, include:

Establishment of a new framework to enable trading in credit derivatives. This capability introduces another tool to support best practice management of the Group's credit portfolio, the creation of structured investment products for clients, and enhanced trading capability

Evaluation of market risk management capabilities at clients exposed to significant market risks in their core business, thereby improving the Group's overall management of credit risk associated with these clients

3. Operating Risk

Operating Risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

Group Risk Management is responsible for establishing Group policy and for the measurement, monitoring and reporting of operating risk across the Group.

Review of 2002

ANZ's operating risk framework, policy and procedures continue to be strengthened in line with new and emerging risk trends. Key activities in 2002 included:

Further development of ANZ's methodology for operational risk measurement and economic capital allocation

Strong focus on fraud risk management, including implementation of an updated Group fraud policy, enhanced technology tools and development of industry solutions in conjunction with Government and industry groups

Refinement of the Group's business continuity capability in line with new and emerging threats, reinforced by crisis management exercises

Significant enhancement to ANZ's regulatory compliance framework, including policies to address money laundering, criminal and terrorist financing, privacy and customer disability, and procedures for electronic funds transfer

Looking Forward

ANZ's risk management capabilities are considered to be a strategic asset and a source of competitive advantage. Through effective use of technology and strong management focus, we seek to strengthen further the Group's risk capabilities and culture to ensure that ANZ remains at the forefront of risk management capability within the banking and financial services industry.

Environmental Report

This year we have commenced an important review to extend our approach to corporate sustainability. The aim is to develop an approach which will assist us in achieving long-term shareholder value by focussing on the market's potential for sustainability products and services while at the same time successfully reducing and avoiding sustainability costs and risks. This aim is to develop a framework for greater self-awareness and action.

Although there is still much to do, we have made some early progress.

In June 2002, ANZ's infrastructure investment business established Wind Power Investment Trust. The Trust is considering investments to enable the development of wind farms in New South Wales, South Australia and Victoria, which would deliver in excess of 300MW of green energy into the national energy market.

ANZ has also focused on minimising the direct impact of its operations on the environment. To support this we have expanded our Environmental Management Program through the ANZ Green Office initiative including joining the Federal Government's Greenhouse Challenge.

The Green Office initiative addresses the impact ANZ has on the environment through its consumption of energy, the waste materials we produce and the water we consume.

Energy

We have joined the Property Council of Australia/Sustainable Energy Authority of Victoria's Energy Smart Leaders Program, an initiative aimed at reducing our energy consumption and reducing Greenhouse emissions.

So far we have conducted a number of energy audits four major buildings in Melbourne. These audits have identified potential savings of Greenhouse gases between 1,700 and 2,500 tonnes. Green Teams have been established to act on the audit findings and ensure we achieve these energy savings. For example, during 2002 the initial energy saving at our 55 Collins Street, Melbourne building resulted in an immediate 10% drop in Greenhouse emissions and a \$30,000 saving in energy costs.

ANZ received the 2002 Outstanding Achievement Award for successful involvement in the Energy Smart Leaders Program.

Waste

Signatures

During 2002, we participated in a Best Practice Waste Management Trial to ensure we recover and recycle all used office paper. Although ANZ already has a comprehensive paper recycling system, the trial resulted in an increase of 65 tonnes in the quantity of paper recycled over a three-month period. This is being supported by a company-wide Work Practices Review to identify ways ANZ can reduce paper in the first instance.

We know, however, that waste is a wider issue than just paper. Recently, a waste audit of one of our major buildings was conducted by Visy to identify the potential to reduce our current waste to landfill. We have started to act on the audit's recommendations that have the potential to reduce waste to landfill by almost 75%.

We are supporting these initiatives by engaging our people on environmental issues. An environmental site on ANZ's intranet has been established to advise staff of ways they can actively participate in initiatives across the Bank and in the community. This includes staff using their Volunteer Leave to work on environmental projects with a community organisation.

Purchasing

ANZ has begun to review all purchasing contracts with a focus on environmental sustainability. The initial focus is on recycled paper purchasing, use of cleaning chemicals and the development of sustainability criteria for tenders as evidenced in a recent office furniture request for tender.

Our progress has been recognised with ANZ continuing to be included in two leading indices of Corporate Sustainability in 2002 - the Dow Jones Sustainability World Index and Financial Times FTSE4Good Global Index.

We know, however, there is much more for us to achieve. The journey ahead is about building on our progress so far to develop a comprehensive sustainability agenda that can demonstrate a high level of commitment and action in addressing global and industry social and environmental challenges.

Incorporating sustainability in the workplace needs to become an **integral part of our business**.

Customer Service Charter

In October 2001, we launched our first Australian Customer Service Charter in a further step towards improving ANZ's value and service to its customers.

We also promised to have our performance against the promises in the Customer Charter independently reviewed by ANZ's auditors, KPMG, and to publicly report the results. The KPMG review is underway and the results will be made available in our Customer Charter Annual Report.

Our internal review of our performance against the promises in the 2001 Customer Charter has been encouraging but in some areas we still have work to do to consistently meet customer expectations.

Our Promise: *Simple, fast account opening*

Personal Banking - open accounts within 24 hours

Standard Loan Applications

Personal Loans - answered within one working day

Home Loans - answered within two working days

Car Loans - answered within one working day

If we do not meet these standards, we will refund one month's standard fee or equivalent.

Our Performance:

We have improved our processes so we can open personal bank accounts on the spot. This makes it difficult to accurately determine delays. However, we have refunded over \$800 in fees in nearly 150 cases where delays have been identified

Nearly 100% of personal loan applications were answered within one day

Identified fewer than 2% of home loan applications which were answered beyond 2 days and refunded over \$26,000 of fees. We are also working towards developing enhanced systems and processes to ensure completeness of reporting for home loans

Over 99% of car loan applications were answered within one day; refunded over \$4,300 of fees

In total, over \$31,000 of fees were refunded for accounts opened or loan applications answered beyond our promised times. We are continually improving our systems and processes to ensure that we consistently meet our promises

Our Promise: *Access*

Internet banking and Website - available more than 99% of the time

Phone banking service - available more than 98%

Network of ATMs - available more than 98%

Lost & stolen cards hotline - available 24 hours, 7 days a week

Esanda phone service - available 8am to 7.30pm AEST weekdays and 9am to 5pm on Saturdays

Our Performance:

We exceeded Internet banking and website target of 99% except for two months when the availability was 98.9% and 98.6%

We exceeded Phone Banking and ATM Banking target of 98%

Internally, our Cards hotline and Esanda phone service were staffed for availability 100% of the times promised. We are also seeking details from our telecom provider to monitor the extent to which our telephone lines were accessible by our customers

Our Promise: *We will respect your personal information*

We will keep private the information you have provided to us

Our Performance:

We have guidelines in place to ensure that we comply with this promise. We measure our compliance based on the privacy-related enquiries received from our customers by our National Customer Liaison unit. We have received 25 valid enquiries which we have addressed with our customers. We are further improving our internal monitoring systems and processes for keeping our customers' information private

Our Promise: *Information we provide to you will be written in plain language*

Our Performance:

We have implemented processes to ensure that we provide our customers information written in plain language by using:

Simple language easily understood by the intended reader

Short, clear and concise statements that avoid use of jargon

Consistent written expression and punctuation

Structured sentences/paragraphs and headings that guide the reader through the communication

Our customer satisfaction score with our communication improved from 6.9 to 7.2 out of 10

Our Promise: *Resolving complaints if we make a mistake, we will put it right*

Respond to complaints addressed to our National Customer Liaison Unit within 48 hours

Resolve complaints within 10 working days

Advise how much longer it will take to resolve these complaints if it takes more than 10 working days

Our Performance:

We responded to 100% of complaints received by our National Customer Liaison unit within 48 hours

We resolved 70% of complaints within 10 days

We are developing a comprehensive complaint resolution system which will help us ensure completeness of reporting and further improve our performance

We expanded the Customer Charter in April 2002, extending the Charter to cover small business as well as our personal customers and adding new promises on fees and quick, convenient banking services.

Our New Promise: *Quick, convenient branch banking*

Teller service within 5 minutes and extended banking hours

Our Performance:

The average waiting time was under 3 minutes at 40 branches where ANZ has a queue measurement system. The maximum wait time, however, was nearly 21 minutes at these branches. We are working to improve this performance by looking at staffing levels and resourcing for peak periods. We are also extending banking hours and offering Saturday banking at several of our branches

Our New Promise: *Fast, efficient phone service*

Calls answered within 1 minute and notification of expected waiting time on our 13 13 14 and 13 22 73 numbers

Our Performance:

13 13 14 - 89% calls answered within 1 minute

13 22 73 - 94% calls answered within 1 minute

Our New Promise: *Simple accounts, fees and charges*

Our Performance:

Introduced two new lower cost Access accounts with simpler fees. For example, Access Advantage offers unlimited ANZ transactions for \$5 per month. We have also reviewed our fees and charges and helped our customers understand them by directly communicating those which are frequently applicable to their accounts

Our New Promise: *Building relationships with the community*

Our Performance:

Maintained our rural branches and opened a new branch in Koroit

Continued to offer fee-free branch banking for seniors

Continued to offer 15 fee-free transactions and no monthly fee for Centrelink payment recipients and healthcare cardholders

We've made promises to our customers that **we intend to keep**.

Corporate Governance Statement

Board Responsibility

The Board is responsible to shareholders for the operations of the Company. It sets the strategic direction and financial objectives for the Company and delegates responsibility for the management of the Company to the Chief Executive Officer and senior management. The Board is responsible for ensuring that the Company has appropriate governance arrangements in place for the benefit of all shareholders.

The Board aims to carry out its responsibilities so as to create and build sustainable value for the benefit of shareholders and other stakeholders. The Board has adopted a Charter which sets out, among other things, roles and responsibilities of the Board. The Board's responsibilities include:

Appointing the Chief Executive Officer, and reviewing his/her performance and remuneration

Setting objectives, strategies and budgets, and monitoring and assessing management's performance in achieving each

Monitoring compliance with regulatory requirements and ethical standards

Approving policies and overseeing governance and compliance practices relating to management of risk, conduct of internal audit and human resources management

The Board is also responsible for reviewing the operations of all Business Units together with the major functional areas of the Company at least once per year to satisfy itself that each Unit's strategy, policy and direction are consistent with those of the Company.

The Board recognises its overriding responsibility to act honestly, fairly, diligently and in accordance with the law in serving the interests of ANZ's shareholders, as well as its employees, customers, and the community. The Board works to promote and maintain an environment within ANZ that establishes these principles as basic guidelines for all its employees and representatives at all times.

Directors meet regularly in private sessions without management being present. Non-executive directors also meet regularly, at least twice a year, without the Chief Executive Officer or management being present.

Board Composition

Board Size & Membership

Directors, as a Board and through the Nominations & Corporate Governance Committee of the Board, regularly review the size and composition of the Board. It is policy that, at a minimum, the Board be comprised of five directors. The Board's policy also states that the Chairman be a non-executive director and that the majority of the Board be comprised of non-executive directors.

At the time of this report, the Board comprises eight directors; a non-executive chairman, six other non-executive directors, and the Chief Executive Officer.

Director Appointments

The Board aims to bring a balance of skills, experience and views to its deliberations. The Board, through the Nominations & Corporate Governance Committee, engages external consultants to assist it in identifying appropriate candidates for consideration as Board members.

On their appointment, directors are provided with information setting out their entitlements, duties and responsibilities including Board policies.

Current Directors

At the time of this Annual Report, the Board comprises:

Mr. Charles Goode AC, Chairman

Mr. John Dahlsen

Dr. Roderick Deane

Mr. Jerry Ellis

Mr. David Gonski AO (appointed February 2002)

Ms. Margaret Jackson

Mr. John McFarlane OBE, CEO

Dr. Brian Scott AO

Further details on directors are available on pages 46 and 47 of this Annual Report.

Independence & Directors Dealings

All non-executive directors have been determined by the Board to be independent and, other than in their capacity as a director of the Company, not to have a material relationship with the Company. Details on the definition of independent and material relationship as determined by the Board can be found on www.anz.com.

The Board has adopted a policy on Disclosure of Interests which provides processes for:

The disclosure by directors of certain interests

How actual or potential conflicts of interest are to be addressed

A copy of this policy is available on www.anz.com.

Performance of Chairman and Directors

The full Board is responsible for reviewing the performance of the Chairman. It is the responsibility of the Chairman, with input from the Nominations & Corporate Governance Committee, to assess the performance of each director.

Retirement

Directors are required to retire at the age of 70 years. Directors appointed since 1993 have agreed to retire after fifteen years service.

Work of the Board

Access to Directors

Signatures

Employees and shareholders have access to the directors either directly or through the Company Secretary.

Operational Familiarisation

Directors take part in site visits to branches and various areas of the Company's operations in order to familiarise themselves with the Company's business. To facilitate interaction between management, customers and directors, information briefings with management and customers as well as social and working events are scheduled regularly. In addition, directors participate in shareholder briefings held in Australia and overseas at regular intervals.

Briefings & Updates

As appropriate and when required, directors take part in various Company briefings and updates on key business issues, emerging trends, matters relevant to their role as directors and changes in technology or support systems.

Independent Advice

In order to assist directors to fulfil their responsibilities, each director has the right, with the prior approval of the Chairman, to seek independent professional advice regarding their responsibilities at Company expense. In addition, the Board and each Committee may obtain professional advice at Company expense if required to assist in their work.

Board Committee Structure

Main Committees

In February 2002, the Board commenced a review of its corporate governance practices. The outcomes of the review, now largely implemented, resulted in the formation of new Committees, new membership structure of Committees, updated Committee Charters and the dissolution of the Human Resources Committee (as of March 2002).

There are now four main Board Committees:

Audit Committee

Risk Management Committee

Nominations & Corporate Governance Committee (with effect from 1 July 2002)

Compensation Committee (with effect from 1 July 2002)

Each of the four main Committees is comprised solely of independent directors (as previously defined), has its own Charter and has the power to direct any special investigations it deems necessary. A copy of each Committee Charter can be found on www.anz.com.

The Chief Executive Officer, John McFarlane, attends all Committee meetings by invitation of each Committee. He is not present, however, if this could compromise proceedings. He also does not attend any meeting where his remuneration or performance is considered or discussed. Directors may attend any meeting of a committee when it is discussing a subject in which they have a special interest.

Audit Committee

Mr. John Dahlsen, Chairman

Mr. Charles Goode

Ms. Margaret Jackson

Dr. Brian Scott

The Audit Committee is responsible for the appointment, evaluation, compensation and oversight of the external auditor. It also oversees and monitors the Company's financial reporting principles, controls, policies and procedures, the work of the internal audit group, the integrity of the Company's financial statements and prudential supervision procedures as required by regulators.

All members of the Audit Committee must be financially literate and at least one member of the Committee be determined to be a financial expert as defined by the Board. Further details on the definition of financial expert can be found on www.anz.com.

The Audit Committee meets at least four times per year. The external auditor and the head of internal audit attend every meeting of the Audit Committee by invitation. It is the policy of the Audit Committee to meet with the external auditor in the absence of management at each of its regularly Scheduled meetings. The Chairman of the Audit Committee also meets separately and regularly with the head of internal audit and the external auditor.

The Audit Committee and the Board have approved a policy on the provision of audit and non-audit services by the external auditor, which effectively limits the non-audit services that may be provided by the external auditor. A copy of this policy can be found on www.anz.com.

Risk Management Committee

Mr. Jerry Ellis, Chairman

Mr. John Dahlsen

Dr. Roderick Deane

Mr. David Gonski

Mr. Charles Goode

Ms. Margaret Jackson

Dr. Brian Scott

The Risk Management Committee's function is to review risk in the business. It is responsible for overseeing and monitoring the Group's risk management principles and policies, strategies, processes and controls including credit, market, balance sheet and operating risk. It may approve credit transactions and other matters beyond the approval discretion of executive management. The Risk Management Committee met nine times during the year. Further details on ANZ's management of risk issues can be found on pages 38 and 39 of this Annual Report.

Nominations & Corporate Governance Committee

Dr. Brian Scott, Chairman

Mr. David Gonski

Mr. Charles Goode

Ms. Margaret Jackson

The purpose of the Nominations & Corporate Governance Committee is to identify individuals qualified to become Board members and recommend them to the Board for nomination as members of the Board and its Committees; to review the performance of the Board and the members of the Board; to review and recommend corporate governance principles, practices and procedures for ANZ; and to review the Board and Committee structure to ensure that the Board can properly perform its oversight and monitoring function. The Committee meets at least twice a year.

Compensation Committee

Dr. Brian Scott, Chairman

Mr. John Dahlsen

Dr. Roderick Deane

Mr. Jerry Ellis

Mr. David Gonski

Mr. Charles Goode

Ms. Margaret Jackson

The Compensation Committee makes recommendations to the Board in respect of the Company's compensation program including any equity-based programs and evaluates the performance of and recommends the compensation for senior executive officers and Board appointees including the Chief Executive Officer. The Compensation Committee meets at least three times during the year. Details on ANZ's remuneration policy, including equity-based remuneration, can be found on page 52 of this Annual Report.

Additional Committees

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

In addition to the four main Board Committees, the Board has constituted the Shares Committee and the Executive Committee which convene when necessary. The Shares Committee, comprising a minimum of two directors, has the power to administer the Company's Employee Share Plan and Employee Share Option Plan. The Executive Committee, comprising three directors, has the full power of the Board and is convened as necessary in between regularly scheduled Board meetings. The Board also forms and delegates authority to ad hoc Committees of the Board as and when needed to carry out its functions.

On page 45 is a table setting out details of directors' attendance at Board and Committee meetings during the course of the last financial year.

ANZ has been recognised in a major shareholder survey as being **one of the best governed** companies in Australia.

Remuneration of Non-Executive Directors

Non-executive directors' fees are determined by the Board of Directors based on advice from external advisors including reference to fees paid to non-executive directors of comparable companies.

Non-executive directors' fees are within the limit approved by shareholders at the 21 January 1998 Annual General Meeting. Directors' fees are set at levels that fairly represent the responsibilities of and time spent by the non-executive directors on ANZ-related matters.

Directors may elect to take all or part of their fees in shares under the Directors' Share Plan which was approved by shareholders at the 1999 Annual General Meeting. Under this plan, shares are bought on market to an equivalent value to the fee that would otherwise have been paid to the director and are held in trust for the director for at least one year.

Non-executive directors also participate in the directors retirement plan, which provides that, after eight years of service, a director may receive a retirement benefit equivalent to the last thirty six months of fees (pro-rated for a lesser period of service).

On page 45 is a table detailing the remuneration of each non-executive director for the last financial year.

Equity Participation by Non-Executive Directors

It is Board policy that all directors have a share qualification of at least 2000 ANZ shares. In addition, as set out above, directors may participate in the Directors' Share Plan. Details of directors' shareholdings are set out on page 45 of this Annual Report.

Executive Remuneration including Employee Share and Option Plans

The objective of ANZ's remuneration policy is to ensure that remuneration packages properly reflect the duties and responsibilities of the senior executives and are sufficient to attract, retain and motivate personnel of the requisite quality. The policy focuses on creating value for shareholders by rewarding senior employees based on enhancement of shareholder value through improvements in Economic Value Added (EVA).

There are three components to executive remuneration packages, a fixed component and two variable or at risk components; short-term incentive (STI) and long-term incentive (LTI). The fixed reward is generally targeted to the market median levels being paid in the finance industry in the relevant markets in which ANZ operates. The STI and LTI components are based on performance and reflect achievements against agreed key result areas and competencies.

A detailed discussion on executive remuneration and a table setting out the remuneration of senior officers of the Company can be found on page 53 of this Annual Report.

Company Policies

The Board has approved and adopted policies to apply to employees within the Group. Summaries of the policies can be found on www.anz.com.

Code of Conduct for Directors and Code of Conduct for Employees

These policies set out the ethical standards expected of directors and employees. The codes require that directors and employees adhere to the law, that they disclose their own relevant interests, that they act in the best interest of the Group and that they act honestly and ethically in all their dealings. The policies also cover such matters as the confidentiality of information, acceptance of gifts or entertainment and use of ANZ goods, services and facilities.

Market (Information) Disclosure Policy (reviewed and updated in 2002)

ANZ is committed to achieving best practice in the area of market disclosure. The policy is designed to ensure that there is full and timely disclosure of ANZ's activities to shareholders and the market. It is important that all shareholders have an equal opportunity to receive or obtain information issued by ANZ. This policy covers announcements that must be lodged with stock exchanges as well as announcements and presentations made to analysts, investors and the media. It requires that once material information is disclosed to the relevant stock exchanges, it will be placed on www.anz.com.

Share Trading Policy (reviewed and updated in 2002)

The policy covers trading in ANZ securities by directors and all employees as well as contractors and consultants engaged by ANZ. The Share Trading Policy prohibits trading for all persons aware of unpublished ANZ price sensitive information. In addition, it specifically prohibits trading by directors, certain employees, contractors and consultants working in specific areas of the Company during blackout periods. There are two blackout periods each year, covering approximately six weeks leading up to the day after the announcement of the half year and full year results.

Employee Indemnity Policy

This policy provides that the Company will indemnify employees against any liability incurred in carrying out their roles subject to certain requirements being met. Further details on this policy and on indemnities given to certain employees can be found on page 54 of this Annual

Report.

Serious Complaints Process (approved in 2002)

ANZ has a history of implementing policies and procedures consistent with responsible and well-managed business practices. The Serious Complaints Process is an additional mechanism by which ANZ staff, contractors and consultants may voice concerns they have regarding any potential malpractice or impropriety that they find within ANZ. It is intended to operate as a last resort and requires that protection be given to employees against dismissal or penalty as a result of disclosing concerns in good faith.

Relationship with the External Auditor

As highlighted on page 43, the Audit Committee policy on non-audit services states the audit-related and some non-audit services that may be conducted by ANZ's external auditor. It sets in place a formal approval process regarding the provision of non-audit services, which are only considered where they are not perceived to be in conflict with the role of auditor. This approval process is the responsibility of the Audit Committee.

Significant Accounting Policies

Details of the significant accounting policies and any changes in accounting policies made since the date of the last Annual Report are set out in the Financial Report and on www.anz.com.

Group (Internal) Audit

Group Audit provides independent assurance that the design and operation of the risk and control framework across the Company is effective. The internal audit function operates under a Charter from the Audit Committee that gives it unrestricted access to review all activities of the Company. The Group General Manager Audit reports to the Chairman of the Audit Committee.

A risk-based audit approach is used to ensure that the higher risk activities in each business are audited each year. All audits are conducted in a manner that conforms to international auditing standards. Group Audit plays an active role in ensuring compliance with the requirements of supervisory regulatory authorities, including APRA. Group Audit also works collaboratively with the external auditor to ensure a comprehensive audit scope.

Political Donations

In Australia in the year to September 2002, ANZ donated \$150,000 to the Liberal Party and \$75,000 to the Labor Party.

Signatures

We ve made real progress in reinforcing a strong framework of good governance.

Mr Gonski is Chairman of the National Institute of Dramatic Art (NIDA) and the Art Gallery of New South Wales.

Lives in Sydney. Age 49

Dr. R S Deane

PhD, B Com (Hons), FCA, FCIS, FNZIM

Company Director

Director since September 1994. Dr Deane is a member of the Risk Management Committee, Compensation Committee and Chairman of ANZ Banking Group (New Zealand) Ltd. He is Chairman of Telecom New Zealand Ltd, Fletcher Building Ltd and Te Papa Tongarewa (Museum of New Zealand). He has a number of directorships including TransAlta Corporation (Canada) and Woolworths Ltd. Formerly Chief Executive and Managing Director, Telecom New Zealand Ltd, Chief Executive, Electricity Corporation of New Zealand Ltd, Chairman of Fletcher Challenge Ltd, State Services Commission, Alternate Executive Director, International Monetary Fund and Deputy Governor, Reserve Bank of New Zealand.

Lives in Wellington, New Zealand. Age 61

Guide to the Financial Report

Introduction

The Annual Report of ANZ is a key communication to our stakeholders. ANZ presents two reports, the ANZ Annual Report (this document) and the ANZ Financial Report. Both reports show how ANZ performed during the year ended 30 September 2002 and the overall financial position of the Group at the end of the year. ANZ also publishes a results announcement to the market each half year. All these documents can be accessed on www.anz.com.

ANZ prepares its financial reports in accordance with Australian Accounting Standards. Particular terms required by the Standards may not be familiar to some readers and this guide is designed to assist readers to better understand the report.

Annual Report Contents

The ANZ Annual Report has two main sections. The front section contains information about significant matters that impacted the management and performance of ANZ during the year, including discussion and analysis of the financial results, updates on the 17 business units and Group-wide programs and information on the directors and senior management.

The back section, the Concise Financial Report, contains financial information required by Australian Accounting Standards including the Consolidated Statements of Financial Performance, Financial Position and Cash Flows. These statements have been prepared by ANZ's staff, reviewed by ANZ's Audit Committee and Board, and audited by our external auditor, KPMG. The assets, liabilities and results of controlled companies are included within the consolidated results of the Group.

Consolidated Statement of Financial Performance

Financial performance refers to ANZ's profit for the year including:

The sources of ANZ's income split between interest income and other income

The expenses incurred by ANZ during the year, which include interest expense and other expenses

The provision for doubtful debts which represents the economic loss provisioning (ELP) charge

ANZ's tax expense for the year

The key figure to look at is Net profit attributable to shareholders of the Company, which is the profit for the year.

Consolidated Statement of Financial Position

This Statement is a summary of the assets, liabilities and shareholders' equity as at 30 September 2002. It shows what ANZ as a Group owns as assets, what it owes as liabilities and the ANZ Group's net assets. Net assets are equal to total shareholders' equity.

The assets and liabilities are listed in order of liquidity, with those assets representing cash shown first and those hardest to convert to cash i.e. fixed assets, last.

Assets

ANZ's assets include:

Liquid assets - the cash or cash equivalents held by ANZ

Due from other financial institutions - the monies owed to ANZ by other banks and financial institutions

Trading securities - the securities held by ANZ that are regularly bought and sold as part of its normal trading activities

Investment securities - the investments in securities that ANZ intends to hold to maturity

Net loans and advances - ANZ's largest asset by value, this consists of the loans ANZ has advanced to individuals and organisations, less an allowance for doubtful loan recoveries

Customers' liabilities for acceptances - the amounts owed to the Group from customers for acceptances, a form of lending

Life insurance investment assets - the assets held in life insurance investment funds. For the year ended 30 September 2002, this figure is nil as ANZ sold its life business into a joint venture company

Regulatory deposits - the cash ANZ has deposited at central banks to meet regulatory requirements

Shares in associates - ANZ's investment in companies where the interest is large enough to provide influence rather than control over the company

Deferred tax assets - the future tax savings to the Group as a result of timing differences that arise due to different treatment of transactions under accounting and tax rules

Goodwill - the remaining amount, after amortisation, of the historic excess over net asset value paid by ANZ for the acquisition of other companies

Other assets - includes the assets that do not fit into the above categories including the increase in market value of amounts receivable from derivatives (refer also to Payables and other liabilities) and interest accrued and not yet received

Premises and equipment - the value of all the land, buildings, furniture, equipment, etc. which is owned by the Group

Liabilities

ANZ's liabilities include:

Due to other financial institutions - the monies owed to other Banks and financial institutions by ANZ

Deposits and other borrowings - ANZ's largest liability, this represents ANZ's obligation to its depositors

Liability for acceptances - the amount owed to customers who have purchased customer acceptances from the Group

Income tax liabilities - the amounts payable in respect of income tax

Payables and other liabilities - includes various operating creditors, accrued interest payable and market value of amounts payable on derivatives held by the Group

Provisions - the Group's accrued obligation for long service, annual leave, dividend payments and other obligations which although known, are not yet payable

Life insurance policy liabilities - the amounts owed to investors in the Group's life insurance investment funds. For the year ended 30 September 2002, this figure is nil as ANZ sold its life business into a joint venture company

Bonds and notes - the Group's liability for long-term financing bond and note facilities issued in wholesale markets to provide long-term financing

Loan capital - the long-term funding that would rank behind other creditors, and ahead of only shareholders in the event of a winding up

Net Assets

This term is used to describe the difference between the value of total assets and the value of total liabilities. The net asset value of the Group is equal to total shareholders' equity.

Total Shareholders' Equity

Components that make up shareholders' equity are:

Ordinary and preference share capital - the amounts received when shares were originally subscribed for

Reserves - retained profits plus surpluses or deficits arising from (for example) revaluations of properties, foreign exchange gains or losses on capital in offshore operations

Retained Profits - the amount of profits retained by the Group

Consolidated Statement of Cash Flows

The Consolidated Statement of Cash Flows summarises the Group's cash payments and cash receipts for the financial year. The values may differ from those shown in the Consolidated Statement of Financial Performance because the Consolidated Statement of Financial Performance is prepared on an accrual accounting basis. Notably, the cash flow statement does not include doubtful debt losses.

Cash in this statement refers to cash on hand, bank deposits and other forms of highly liquid investments that can readily be converted to cash.

Directors' Declaration

This declaration contains the directors' sign-off that the Annual Report complies with Accounting Standards and provides a true and fair view of the performance and financial position of the Company.

Audit Report

The independent audit report is the external independent opinion on the Financial Report.

Concise Financial Report

This Concise Financial Report cannot be expected to provide as full an understanding of the Group's financial performance, financial position and financing and investing activities as the Group's 2002 Financial Report.

The Chief Financial Officer's Review on pages 23 to 25 provides a discussion and analysis of the concise financial statements.

2002 Financial Report

A copy of the Group's 2002 Financial Report, including the independent Auditors' Report, is available to all shareholders, and will be sent to shareholders without charge upon request. The Financial Report can be requested by telephone (Australia: 1800 11 33 99, Overseas: (613) 9615 5989) or by email to investor.relations@anz.com.

- (1) From 1997, the annual debt provision charge has been calculated based on economic loss provisioning; prior year data has not been restated for this change in measurement approach
- (2) Data for 1998, 1999, 2000 and 2001 includes the consolidation of assets in the statutory funds of ANZ Life as required by an accounting standard applicable from 1 October 1999
- (3) After abnormals and significant transactions
- (4) From 2001, the return on average ordinary equity calculation accrues the dividend over the year; prior year data from 1997 has been restated for this change in calculation
- (5) Before goodwill amortisation, abnormals and significant transactions
- (6) Prior to 1997 excludes temporary staff
- (7) For 2000, 2001 and 2002 the number of shareholders does not include the number of employees whose shares are held by ANZEST Pty Ltd as the trustee for shares issued under the terms of any ANZ employee incentive plan.

Directors Report

The directors present their report together with the concise financial report of the consolidated entity (the Group), being Australia and New Zealand Banking Group Limited (the Company) and its controlled entities, for the year ended 30 September 2002 and the auditors' report thereon. The information is provided in conformity with the Corporations Act 2001.

Principal Activities

The principal activities of the Group during the year were general banking, mortgage lending, life insurance, leasing, hire purchase and general finance, international and investment banking, investment and portfolio management and advisory services, nominee and custodian services and executor and trustee services.

There has been no significant change in the nature of the principal activities of the Group during the financial year.

At 30 September 2002, the Group had 1,018 points of representation.

Result

Consolidated net profit after income tax attributable to shareholders of the Company was \$2,322 million. Further details are contained in the Chief Executive Officer's Report and the Chief Financial Officer's Review on pages 7 and 23 respectively of this Annual Report.

Dividends

The directors propose that a final fully franked dividend of 46 cents per fully paid ordinary share be declared on 7 November 2002 and be paid on 13 December 2002. The proposed payment amounts to \$692 million.

During the financial year, the following fully franked dividends were paid on fully paid ordinary shares:

| type | cents per share | amount before bonus options \$m | date of payment |
|------|-----------------|------------------------------------|-----------------|
|------|-----------------|------------------------------------|-----------------|

| | | | |
|---------|----|-----|------------------|
| Final | 40 | 595 | 14 December 2001 |
| Interim | 39 | 583 | 1 July 2002 |

The final dividend for the year ended 30 September 2001 was paid on 14 December 2001 and is detailed in the Directors' Report dated 5 November 2001.

Review of Operations

A review of the operations of the Group during the financial year and the results of those operations are contained in the Chairman's Report, the Chief Executive Officer's Report and the Chief Financial Officer's Review on pages 6, 7 and 23 respectively of this Annual Report.

State of Affairs

In the directors' opinion, there have been no significant changes in the state of affairs of the Group during the financial year, other than:

Net loans and advances increased by 7% from \$123,657 million to \$132,060 million, primarily from growth in mortgage lending and commercial lending in Australia and New Zealand.

Deposits and other borrowings increased by 8% from \$104,874 million to \$113,297 million.

The charge for doubtful debts has been determined using economic loss provisioning and is based on the Group's risk management models.

The economic loss provision charge increased from \$531 million to \$860 million reflecting a down grade in the overall risk profile due to the slowing world economy, and a special provision for doubtful debts of \$250 million. Our economic loss provisioning models recognise that the general provision balance must be regularly reviewed, and in rare situations, increased to cover unusual events. The balance has been restored to an appropriate level.

Net specific provisions were \$728 million, up from \$520 million.

Gross non-accrual loans decreased to \$1,203 million, or 0.9% of net loans and advances.

The Group settled its long standing litigation with National Housing Bank in India (NHB). This resulted in the recovery of \$248 million (\$159 million after tax) from the net amount of \$575 million, which had been provided when the Group sold Grindlays to Standard Chartered Bank.

Certain life and general insurance and funds management businesses were sold to a joint venture with ING Group, and a 49% interest in the joint venture was acquired. A profit after tax of \$170 million arose on sale of the businesses.

While the above matters are those considered to be significant changes, reviews of matters affecting the Group's state of affairs are also contained in the Chairman's Report, the Chief Executive Officer's Report and the Chief Financial Officer's Review.

Events since the End of the Financial Year

No matter or circumstance has arisen between 30 September 2002 and the date of this report that has significantly affected or may significantly affect the operations of the Group in future financial years, the results of those operations or the state of affairs of the Group in future years.

Future Developments

Details of likely developments in the operations of the Group in future financial years are contained in the Chairman's Report and the Chief Executive Officer's Report. In the opinion of the directors, disclosure of any further information would be likely to result in unreasonable prejudice to the Group.

Environmental Regulation

The operations of the Group are not subject to any particular and significant environmental regulation under the law of the Commonwealth or of a State or Territory.

Rounding of Amounts

The Company is a company of the kind referred to in Australian Securities and Investments Commission class order 98/100 dated 10 July 1998 pursuant to section 341(1) of the Corporations Act 2001. As a result, amounts in this report and the accompanying financial statements have been rounded to the nearest million dollars except where otherwise indicated.

Shareholdings

Signatures

The directors' shareholdings, both beneficial and non-beneficial, as at the date of this report in the shares of the Company are detailed in the Corporate Governance Statement on page 42 of this Annual Report.

Share Options

Details of share options issued over un-issued shares granted to directors, senior executives and officers, and on issue as at the date of this report are shown under Directors' and Executive Officers' Emoluments in this report, and in note 51 of the Financial Report.

No person entitled to exercise any option has or had, by virtue of an option, a right to participate in any share issue of any other body corporate.

The names of all persons who currently hold options are entered in the register kept by the Company pursuant to section 170 of the Corporations Act 2001. This register may be inspected free of charge.

Directors' Qualifications and Experience

The Board comprises seven non-executive directors who have a diversity of business and community experience and one executive director who has extensive banking experience. The names, qualifications and experience of the directors who are in office at the date of this report are contained on pages 46 and 47 of the 2002 Annual Report and those pages are incorporated in and form part of this report.

Special responsibilities and attendance at meetings by directors, are shown in the Corporate Governance Statement on page 42 of this Annual Report.

Directors and Executive Officers Emoluments

The Human Resources (HR) Committee assisted the Board in its oversight of major policies and guidelines relating to the management of the Group s human resources. Its responsibilities included the review of proposed remuneration and profit sharing programs, and recommended these programs to the Board for approval and monitored their ongoing operation. The HR Committee also reviewed and approved all remuneration entitlements for senior executives, including for the Chief Executive Officer (CEO).

As a result of the Board review conducted in February 2002, the HR Committee was dissolved and replaced by the Compensation Committee of the Board.

The Compensation Committee, chaired by Dr Brian Scott and comprising all non-executive Directors, is responsible for (amongst other things):

ANZ s general compensation program - in consultation with senior management, to review and recommend to the Board ANZ s general approach to compensation, and oversee the development and implementation of compensation programs;

Senior executive compensation program - to review and recommend to the Board for approval compensation programs applicable to ANZ s senior executives;

CEO compensation - to review and recommend to the Board for approval corporate goals and objectives relevant to the compensation of the CEO, evaluate the performance of the CEO in light of those goals and objectives, and recommend to the Board the CEO s compensation level based on this evaluation and other relevant factors;

Executive compensation governance - to review and approve any statement on ANZ s remuneration policy and executive compensation disclosures that may be required by any listing rule, legislation, regulatory body, or other regulatory or legislative requirement, or any statement proposed for inclusion in ANZ s annual report.

Advising on directors fees - to review the compensation of non-executive directors annually. The CEO does not participate in discussion or decisions relating to his own remuneration.

The Compensation Committee recommends to the Board fees for the Chairman or other non-executive directors, after receiving independent external advice. Non-executive directors fees are within the limit agreed to by shareholders at the Annual General Meeting held on 21 January 1998, and are set at levels that fairly represent the responsibilities of, and the time spent by, the non-executive directors on Group matters.

Regard is also given to the levels of fees paid to non-executive directors in comparable companies.

ANZ's Compensation Policy

ANZ's compensation framework has been designed to support a policy of rewarding Senior Executives for the delivery of specific performance targets and the execution of appropriate business and growth strategies. This framework aims to differentiate compensation on the basis of achievement against both individual and business unit performance aligned to sustained growth in shareholder value.

ANZ's Senior Executive compensation policy is structured to provide a fixed salary component, a short-term incentive (STI) and a long-term incentive (LTI). The STI and LTI are variable or at risk components of a Senior Executive's compensation. The compensation framework is administered by ANZ's Board of Directors.

The compensation policy is managed around the following guiding principles:

to focus on creating and enhancing value for ANZ's shareholders;

to differentiate individual compensation commensurate with contribution to overall results and according to individual responsibility;

to provide a greater emphasis on at risk components of total compensation; and

to provide a compensation proposition to successfully motivate, attract and retain the high quality workforce required to deliver on ANZ's business and growth strategies.

The fixed compensation component comprises salary and superannuation contributions. The variable or at risk component of compensation comprises a semi-annual STI consisting of cash and deferred shares, and a semi-annual LTI consisting of performance-hurdled deferred shares and performance hurdled options.

ANZ's compensation policy limits increases in fixed remuneration (salary and superannuation) and emphasises at risk compensation as a method of ensuring payment is contingent upon and commensurate with the delivery of measurable performance and the successful execution of other key strategic business objectives.

The STI is administered under the ANZ Executive Remuneration Scheme. The STI is determined based firstly, on individual Senior Executive performance against financial and non-financial measures and, secondly, on overall business unit performance results. The composition of the

incentive includes both cash and deferred shares, with better relative performance receiving a greater portion of the incentive pool .

The LTI is administered under the ANZ Group Share Option Plan. The LTI is determined based on individual performance and the potential to deliver on ANZ's long-term growth and business strategies. The composition of LTI consists of individual performance-hurdled deferred shares and/or performance options. The individual performance hurdle is aligned to ensure senior executives clearly demonstrate sustained performance on both long-term financial and non-financial measures in the interests of shareholders and employees.

Both deferred shares and options are used as a mechanism to link a significant portion of senior executives' remuneration to the attainment of sustained growth in shareholder value.

Recently, ANZ introduced a new form of indexed-linked option for executives. The new option has a dynamic exercise price, i.e. the exercise price will be adjusted in line with the movement in the S&P/ASX 200 Banks (Industry Group) Accumulation Index (excluding ANZ). This has replaced the traditional option where executives could benefit from a general rise in the market. As an additional constraint, the option can only be exercised if the adjusted exercise price is equal to or below the original issue price. This new form of option will ensure that executives will only be rewarded for the true outperformance of ANZ's share price over and above the movement in the above Index.

The provision of shares and options is in line with market practice in Australia.

Director and Executive Emoluments

Details of emoluments paid or payable to non-executive directors are contained in the Corporate Governance Statement of this Annual Report on page 45. Details of the emoluments of the executive director and of the five executives of the Group or Company receiving the highest emolument for the year ended 30 September 2002, are set out below.

Executive Emoluments**Cash and benefits**

| Amounts in \$ | Salary or fees | Benefits(1) | Annual Compensation and Short Term Incentive | | | Total |
|--|------------------|---------------|--|--|------------------------------|------------------|
| | | | Cash component | Performance Related Bonus Deferred shares(2) | Superannuation contributions | |

| P R Marriott | 658,446 | 3,970 | 256,671 | 359,329 | 37,584 | 1,316,000 |

(1) Benefits include the provision of housing, cars and parking, private health insurance, subsidised loans and certain other expenses

(2) Deferred Shares are held in trust for up to 10 years and are restricted for one and three years. Subject to the Board determining otherwise the shares are forfeited if the recipient leaves the Group within the restricted period for reasons other than retirement, retrenchment, death or disablement. These shares are issued at the 5 day weighted average price up to and including the date of issue.

(3) Conversion rate of GBP @ 0.3621

(4) All options expire seven years from the date of grant except for J McFarlane's which expire four years and six years respectively from the date of grant. These options are exercisable between three and seven years of the date of grant if certain performance conditions are met. Each option entitles the holder to purchase one ordinary fully paid share in the company. Estimated values calculated using a modified Black Scholes model, per option, at the dates of issue, were: \$2.68 (31 December 2001), \$2.95 (24 April 2002), \$1.10 (24 October 2002, index linked).

(5) Subject to the Board determining otherwise the options are forfeited if the recipient leaves the Group prior to them becoming exercisable for reasons other than retirement, retrenchment, death or disablement. The number of options issued under long term incentive arrangements is predicated on a market competitive assessment of long term compensation benchmarks. In the event of retirement, retrenchment, death or disablement the release of options will be pro-rated for those issued on or after 24 April 2002.

(6) All Type I options issued except for the first series issued to J McFarlane may be exercised only if the ANZ Accumulation Index over the period from the date of grant to the last trading day of any month occurring during the relevant measurement period equals or exceeds (for 50% of the options issued) the S&P/ASX 100 Accumulation Index and (for the remaining 50% of the options issued) the S&P/ASX 200 Banks (Industry Group) Accumulation Index, both calculated over the same period.

(7) J McFarlane's first series of options may be exercised only if the ANZ Accumulation Index over the period from the date on which the options are granted to the last trading day of any month occurring during the relevant exercise period equals or exceeds the S&P/ASX 100 Accumulation Index calculated over the same period.

(8) Type II options have a dynamic exercise price. The final exercise price will be the initial strike price indexed by the change in the S&P/ASX 200 Banks (Industry Group) Accumulation Index excluding ANZ. These options cannot be exercised if the exercise price falls below the original issue price.

(9) Exercisable from 31 December 2004, subject to the performance conditions being met.

(10) Exercisable from 31 December 2003, subject to the performance conditions being met.

Deferred Shares(11)

| Number | Value \$ |
|--------|----------|
|--------|----------|

| |
|---------------------------------|
| J McFarlane (Managing Director) |
|---------------------------------|

| | | |
|----------------|--------|---------|
| D L Boyles | 14,000 | 256,635 |
| G Branston | 2,700 | 49,452 |
| E Funke Kupper | 12,500 | 228,855 |
| P J O Hawkins | 9,500 | 174,468 |
| P R Marriott | 14,800 | 271,083 |

(11) Deferred shares are held in trust for up to 10 years and are restricted for three years. Subject to the Board determining otherwise the shares are forfeited if the recipient leaves the Group within the restricted period for reasons other than retirement, retrenchment, death or disablement. The number of shares issued under long term incentive arrangements is predicated on a market competitive assessment of long term compensation benchmarks. These shares have an additional restriction, ie. the entitlement will only vest in the event of individual performance conditions being met. In the event of retirement, retrenchment, death or disablement the release of long term incentive shares will be pro-rated.

Directors and Officers Indemnity

The Company's Constitution (Rule 11.1) permits the Company to indemnify each officer or employee of the Company against liabilities (so far as may be permitted under the Corporations Act 2001) incurred in the execution and discharge of the officer's or employee's duties.

It is the Company's policy that its employees should not incur any liability for acting in the course of their employment legally, within the policies of the Company and provided they act in good faith.

Under the policy, the Company will indemnify employees against any liability they incur in carrying out their role. The indemnity protects employees and former employees who incur a liability when acting as an employee, trustee or officer of the Company, or a subsidiary of the Company at the request of the Company.

The indemnity is subject to the Corporations Act 2001 and will not apply in respect of any liability arising from:

a claim by the Company;

a claim by a related body corporate;

a lack of good faith;

illegal or dishonest conduct; or

non compliance with the Company's policies or discretions.

The Company has entered into Deeds of Access, Insurance and Indemnity with each of its directors and secretaries and with certain employees and certain other individuals who act as directors of related body corporates or of another company. To the extent permitted by law, the Company indemnifies the individual for all liabilities, including costs, damages and expenses incurred in their capacity as an officer of the company to which they have been appointed.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

The Company has indemnified the trustees and former trustees of certain of the Company's superannuation funds and directors, former directors, officers and former officers of trustees of various Company sponsored superannuation schemes in Australia. Under the relevant Deeds of Indemnity, the Company must indemnify each indemnified person if the assets of the relevant fund are insufficient to cover any loss, damage, liability or cost incurred by the indemnified person in connection with the fund, being loss, damage, liability or costs for which the indemnified person would have been entitled to be indemnified out of the assets of the fund in accordance with the trust deed and the Superannuation Industry (Supervision) Act 1993. This indemnity survives the termination of the fund. Some of the indemnified persons are or were directors or executive officers of the Company.

The Company has also indemnified certain employees of the Company, being trustees and administrators of a trust which is a subsidiary entity, from and against any loss, damage, liability, tax, penalty, expense or claim of any kind or nature arising out of or in connection with the creation, operation or dissolution of the trust, where they are acting in good faith and in a manner that they reasonably believed to be within the scope of the authority conferred by the trust.

Except for the above, no person has been indemnified nor has the Company or a related body corporate of the Company made an agreement to indemnify any person who is or has been an officer or auditor of the Company or of a related body corporate.

During the financial year, and again since the end of the financial year, the Company has paid a premium for an insurance policy for the benefit of the directors, secretaries, and executive officers of the Company, and directors, secretaries and executive officers of related bodies corporate of the Company. In accordance with common commercial practice, the insurance policy prohibits disclosure of the nature of the liability insured against and the amount of the premium.

Signed in accordance with a resolution of the directors.

John Dahlsen
Director

John McFarlane
Chief Executive Officer

Notes to the Concise Financial Statements

1: Basis of preparation of concise financial report

This concise financial report has been derived from the Group's 2002 Financial Report which complies with the Corporations Act 2001, Accounting Standards, Urgent Issues Group Consensus Views and other authoritative pronouncements of the Australian Accounting Standards Board. A full description of the accounting policies adopted by the Group is provided in the 2002 Financial Report. The accounting policies are consistent with those of the previous financial year.

2: Critical accounting policies

The Group has identified the following critical accounting policies:

Economic loss provisioning;

Specific provisioning;

Deferred acquisition costs, software assets and deferred income;

Derivatives and hedging; and

Special purpose and off-balance sheet vehicles.

The ANZ results announcement released on 24 October 2002 contains details of the critical accounting policies. The results announcement can be obtained from www.anz.com.

3: Significant events this financial year

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

On 19 January 2002, former ANZ subsidiary Grindlays Bank Limited completed the settlement of its long running dispute with India's National Housing Bank (NHB). The dispute originated in 1992. Since January 2001 the amount in dispute had been deposited with the Supreme Court of India. Of this amount (including interest) of Rupees 16.45 billion (AUD 661 million at 19 January 2002 rates), Grindlays recovered under the terms of the settlement Indian Rupees 6.20 billion (AUD 248 million), with NHB receiving the balance. ANZ in turn received a payment of USD 124 million from Standard Chartered Bank (SCB) under the terms of an indemnity between ANZ and SCB.

Following an assessment of the general provision balance, a special provision for doubtful debts of \$250 million was charged during the year. Our economic loss provisioning models recognise that the general provision balance must be regularly reviewed, and in rare situations, increased to cover unusual events. The balance has been restored to an appropriate level.

On 10 April 2002, ANZ and ING Group announced the formation of a joint venture which combines the funds management and life insurance business of ANZ and ING Group in Australia and New Zealand. The joint venture commenced on 1 May 2002 under the name of ING Australia Limited. ING Australia is owned 49% by ANZ and 51% by ING Group. ANZ contributed businesses and capital valued at \$1,839 million, recognising a profit after tax on disposal of \$170 million.

4: Dividends

Ordinary Dividends

| | 2002 \$m | 2001 \$m | 2000 \$m |
|-------------------------------------|--------------|--------------|-------------|
| Interim dividend | 583 | 491 | 445 |
| Final dividend | 692 | 595 | 528 |
| Bonus option plan adjustment | (23) | (24) | (32) |
| Dividends on ordinary shares | 1,252 | 1,062 | 941 |

A fully franked final dividend of 46 cents, is proposed to be paid on each fully paid ordinary share on 13 December 2002 (2001: final dividend of 40 cents, paid 14 December 2001, fully franked; 2000: final dividend of 35 cents, paid 15 December 2000, fully franked). The 2002 interim dividend of 39 cents, paid 1 July 2002, was fully franked (2001: interim dividend of 33 cents, paid 2 July 2001, fully franked; 2000: interim dividend of 29 cents, paid 3 July 2000, fully franked).

The tax rate applicable to the franking credits attached to the interim dividend and to be attached to the proposed final dividend is 30% (2001: 30%, 2000: 34%).

Preference Dividends

| | 2002 \$m | 2001 \$m | 2000 \$m |
|---------------------------------------|-------------|-------------|-------------|
| Dividends on preference shares | 117 | 119 | 102 |

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

In 1998 the Company issued 124,032,000 preference shares, raising USD 775 million via Trust Securities issues. The Trust Securities carry an entitlement to a distribution of 8% (on USD 400 million) and 8.08% (on USD 375 million). The amounts are payable quarterly in arrears. Payment dates are the fifteenth days of January, April, July and October in each year.

Dividend Franking Account

The amount of franking credits available in the Company for the subsequent financial year is nil (2001 and 2000: nil), after adjusting for franking credits that will arise from the payment of tax on Australian profits for the 2002 financial year less franking credits which will be utilised in franking the proposed final dividend and franking credits that may not be accessible by the Company at present.

5: Contingent Liabilities

There are outstanding court proceedings, claims and possible claims against the Group, the aggregate amount of which cannot readily be quantified.

ANZ in Australia is being audited by the Australian Taxation Office (ATO) as part of normal ATO procedures. The Group has received various assessments that are being disputed and is likely to receive further assessments.

Based on external advice, ANZ has assessed the likely progress of these issues, and believes it holds appropriate provisions.

Further details regarding Group contingent liabilities are contained in the 2002 Financial Report.

6: Segment Analysis

During the year ended 30 September 2002, the Group managed its activities along the following lines of business:

Personal Banking and Wealth Management, Corporate Businesses, Investment Banking, Consumer Finance, Mortgages, Asset Finance, Small to Medium Business and other. A description of each of the operating business segments, including the types of products and services the segments provide to customers, is detailed in the 2002 Financial Report.

(1) Results are equity standardised

- (2) Intersegment transfers are accounted for and determined on an arm's length or cost recovery basis

7: Capital Management

The Group's Tier 1 ratio increased to 7.9% (2001: 7.5%). The total capital adequacy ratio remains strong at 9.5% (2001: 10.3%), with a small reduction in the Tier 2 ratio.

In light of the joint venture with ING Group, we have refined our capital management policy to incorporate certain non-consolidated vehicles. Our principal focus going forward is Adjusted Common Equity, defined as Tier 1 capital, less preference shares and deductions from total capital, (including investment in funds management subsidiaries and the ING joint venture). Adjusted Common Equity decreased from 5.9% to 5.7% of risk weighted assets to be comfortably near the top of our target range of 5.25% to 5.75%, even after funding the joint venture from internal resources.

8. Equity Instruments Issued to Employees

Under existing Australian Accounting Standards, equity instruments issued to employees are not required to be expensed. The impact of expensing options(1), and shares issued under the \$1,000 employee share plan, have been calculated and are disclosed below.

| | Consolidated 2002 \$m |
|--|-----------------------------|
| Net profit attributable to shareholders of the Company | 2,322 |
| Expenses attributable to: | |
| Options issued to Management Board(1) | (7) |
| Options issued to general management(1) | (19) |
| Shares issued under \$1,000 employee share plan | (18) |
| Revised net profit attributable to shareholders of the Company | 2,278 |
| Revised earnings per share basic (cents) | 144.4 |

(1) Based on fair values estimated at grant date using a modified Black Scholes model. Value of options amortised over vesting period.

9: Events Since the End of the Financial Year

There have been no significant events since 30 September 2002 to the date of this report.

Directors Declaration

The directors of Australia and New Zealand Banking Group Limited declare that in their opinion the accompanying concise financial report of the Consolidated Group for the year ended 30 September 2002 complies with Accounting Standard AASB 1039 Concise Financial Reports .

In our report on the Group s 2002 Financial Report we declared that:

(a) the financial statements and notes comply with the Corporations Act 2001, including:

(i) complying with applicable Australian Accounting Standards and other mandatory professional reporting requirements; and

(ii) giving a true and fair view of the financial position of the Company and of the consolidated Group and of their performance as represented by results of their operations and their cash flows; and

(b) in the directors opinion at the date of this declaration there are reasonable grounds to believe that the Company and consolidated Group will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the directors

John Dahlsen
Director

John McFarlane
Chief Executive Officer

Independent audit report on concise financial report to the members of Australia and New Zealand Banking Group Limited

Scope

We have audited the concise financial report of Australia and New Zealand Banking Group Limited and its controlled entities for the financial year ended 30 September 2002, consisting of the statement of financial performance, statement of financial position, statement of cash flows, accompanying notes as set out on pages 55 to 60, and the accompanying discussion and analysis set out on pages 23 to 25 in order to express an opinion on it to the members of the Company. The Company's directors are responsible for the concise financial report.

Our audit has been conducted in accordance with Australian Auditing Standards to provide reasonable assurance whether the concise financial report is free of material misstatement.

We have also performed an independent audit of the full financial report of Australia and New Zealand Banking Group Limited and its controlled entities for the year ended 30 September 2002. Our audit report on the full financial report was signed on 4 November 2002, and was not subject to any qualification.

Our procedures in respect of the audit of the concise financial report included testing that the information in the concise financial report is consistent with the full financial report and examination, on a test basis, of evidence supporting the amounts, discussion and analysis, and other disclosures which were not directly derived from the full financial report. These procedures have been undertaken to form an opinion whether, in all material respects, the concise financial report is presented fairly in accordance with Accounting Standard AASB 1039 Concise Financial Reports issued in Australia.

The audit opinion expressed in this report has been formed on the above basis.

Audit Opinion

In our opinion the concise financial report of Australia and New Zealand Banking Group Limited and its controlled entities for the year ended 30 September 2002 complies with AASB 1039 Concise Financial Reports issued in Australia.

Distribution of shareholdings

At 7 October 2002
Range

| | Number of holders | % of holders | Number of shares | % of shares |
|--------------------------|--------------------------|---------------------|-------------------------|--------------------|
| 1 to 1,000 shares | 108,221 | 54.2 | 49,761,533 | 3.3 |
| 1,001 to 5,000 shares | 71,697 | 36.0 | 161,958,794 | 10.8 |
| 5,001 to 10,000 shares | 11,831 | 5.9 | 84,093,962 | 5.6 |
| 10,001 to 100,000 shares | 7,421 | 3.7 | 158,655,510 | 10.5 |
| Over 100,001 shares | 386 | 0.2 | 1,049,529,283 | 69.8 |
| Total | 199,556 | 100 | 1,503,999,082 | 100 |

At 7 October 2002:

there were no entries in the Register of Substantial Shareholdings; and

the average size of holdings of ordinary shares was 7,536 (2001: 8,221) shares; and

there were 2,863 holdings of less than a marketable parcel (less than \$500 in value (or 28 shares based on a market price of \$17.63), (2001: 1,772 holdings), which is less than 1% of the total holdings of ordinary shares.

Voting rights of ordinary shares

The Constitution provides for votes to be cast:

- (i) on show of hands, 1 vote for each shareholder; and
- (ii) on a poll, 1 vote for each fully paid ordinary share.

Preference shares

At 7 October 2002 Hare and Co was the only holder of preference shares and held 124,032,000 preference shares, being 100 percent of the total issued preference capital.

Voting rights of preference shares

A preference shareholder may not vote in normal circumstances, but may vote:

- (i) when a preference share dividend (or equivalent) is not paid by the prescribed quarterly payment date. This entitlement to vote ceases after full payment of four consecutive quarterly preference share dividends; and
- (ii) on proposals or resolutions that affect the rights attached to the preference shares including proposals to restructure or wind up ANZ.

Employee shareholder information

At the Annual General Meeting in January 1994, shareholders approved an aggregate limit of 7% of all classes of shares and options, which remain subject to the rules of a relevant incentive plan, being held by employees and directors.

At 30 September 2002 participants held 2.62% of the issued shares and options of ANZ under the following incentive plans:

ANZ Employee Share Acquisition Plan;

ANZ Employee Share Save Scheme;

ANZ Share Option Plan; and

ANZ Share Purchase Scheme.

Dear Shareholder,

As a shareholder and reader of the 2002 ANZ Annual Report, your opinions are important to us. Please take a minute to fill in this survey form and help us continue to improve the way we report to you next year.

1. Which of the following applies to your reading of the 2002 ANZ Annual Report? (Please tick)

- Browsed through it
- Read some of it
- Read all of it

2. Using a seven point scale, please indicate the extent to which you agree with the following statements: (Please circle)

| | Strongly disagree | | | | | | | Strongly agree |

Shareholder Information

Dividends

The final dividend of 46 cents per share will be paid on 13 December 2002, 100% franked. Dividends may be paid directly to a bank account in Australia, New Zealand or the United Kingdom. Shareholders who want their dividends paid this way should advise ANZ Share Registry in writing. Dividend Reinvestment and Bonus Option plans are available to shareholders. The plans are detailed in a booklet called "Shareholder Alternatives", copies of which are available from ANZ Share Registry at the addresses shown below.

Stock Exchange Listings

The Group's ordinary shares are listed on the Australian Stock Exchange and the New Zealand Stock Exchange. The Capital Securities offered in 1993 and the Preference Shares issued in 1998 are listed on the New York Stock Exchange. The subordinated bonds issued by Australia and New Zealand Banking Group (New Zealand) Limited in 2002 are listed on the New Zealand Stock Exchange.

American Depositary Receipts

The Bank of New York sponsors an American Depositary Receipt (ADR) program in the United States of America and ADRs are listed on the New York Stock Exchange. ADR holders should deal directly with the Bank of New York, New York, telephone (212) 815 2276, fax (212) 571 3050 on all matters relating to their ADR holdings.

2002 Financial Report

A copy of the Group's 2002 Financial Report, including the independent Auditors' Report, is available to all shareholders, and will be sent to shareholders without charge upon request. The Financial Report can be requested by telephone (Australia 1800 11 33 99, Overseas +613 9615 5989), by email at investor.relations@anz.com or viewed directly on the internet at www.anz.com.

Removal from Mailing List

Shareholders who do not wish to receive a copy of the Annual Report must advise the Share Registry in writing.

Change of Address

Shareholders who have changed their address will need to advise the Share Registry in writing, quoting their shareholder number, name and company if applicable.

I/We appoint _____ or failing the person named, or if no person is named, the **Chairman of the Meeting**, as my/our proxy and to act generally and to vote in accordance with the following directions (or if no directions have been given, as the proxy sees fit) at the Annual General Meeting of the Company to be held on Friday, 13 December 2002, and at any adjournment of the meeting.

IMPORTANT: For Item 3 Below

If the Chairman of the Meeting is to be your proxy and you have not directed your proxy how to vote on Item 3 below, please place a mark in this box. By marking this box you acknowledge that the Chairman of the Meeting may exercise your proxy even if he has an interest in the outcome of that item and that votes cast by him, other than as proxy holder, would be disregarded because of that interest. If you do not mark this box, and you have not directed your proxy how to vote, the Chairman of the Meeting will not cast your votes on Item 3 and your votes will not be counted in computing the required majority if a poll is called on this item. The Chairman of the Meeting intends to vote undirected proxies in favour of Item 3.

Appointing a second proxy: If you wish to appoint two proxies, state here the proportion or number of securities applicable to this form.

Voting by Proxy

A member entitled to attend and vote has a right to appoint a proxy.

A proxy need not be a member.

A member who is entitled to cast 2 or more votes may appoint 2 proxies and may specify the proportion or number of votes each proxy is appointed to exercise.

The appointment of the proxy may specify the proportion or the number of votes that the proxy may exercise. Where more than one proxy is appointed and the appointment does not specify the proportion or number of the member's votes each proxy may exercise, each proxy may exercise half of the votes (disregarding fractions).

If a proxy is not directed how to vote on an item of business, the proxy may vote, or abstain from voting, as that person thinks fit.

If a proxy is instructed to abstain from voting on an item of business, that person is directed not to vote on the member's behalf on a poll and the shares which are the subject of the proxy appointment will not be counted in computing the required majority.

Members who return their proxy forms with a direction on how to vote but do not nominate the identity of their proxy will be taken to have appointed the Chairman of the Meeting as their proxy to vote on their behalf. If a proxy form is returned but the nominated proxy does not attend the meeting, the Chairman of the Meeting will act in place of the nominated proxy and vote in accordance with any instructions or, if none, as the Chairman of the Meeting decides.

Completed proxy forms should be sent to the ANZ Share Registry using the pre-addressed envelope provided with this proxy.

To be effective, proxy forms must be received at one of the following addresses:

Australia

| | |
|--------------------|----------------------|
| ANZ Share Registry | ANZ Share Registry |
| GPO Box 242 | 12/565 Bourke Street |
| Melbourne | Melbourne |

or at the company's registered office by **1.00pm (Melbourne time) on Wednesday, 11 December 2002**. proxy forms received after this time will be invalid.

Alternatively, proxy forms may be lodged by facsimile if received by the same time. The facsimile number is (61 3) 9473 2456.

Members may record their proxy voting instructions on ANZ's website at www.anz.com. You will need your Holder Identification Number (HIN) or Security holder Reference Number (SRN). Your HIN or SRN is shown on the top right hand corner of the proxy form.

The member or the member's attorney must sign the proxy form. Proxies given by corporations must be executed in accordance with the Corporations Act. Where the appointment of a proxy is signed by the appointer's attorney, a certified copy of the power of attorney, or the power itself, must be received by the ANZ Share Registry at one of the above addresses or by facsimile and by 1.00pm (Melbourne time) on Wednesday, 11 December 2002. If facsimile transmission is used, the power of attorney must be certified. The facsimile number is (61 3) 9473 2456.

A reply paid envelope is enclosed for the return of the completed proxy form. (You will need to affix a stamp if you are sending it from outside Australia.)

If you require further information on how to complete the proxy form, please telephone:

*Notice of
Annual General*

Meeting 2002

Notice of Meeting and
Information for Shareholders

Notice is given that the thirty fourth Annual General Meeting of Australia and New Zealand Banking Group Limited will be held at the Hyatt Regency Hotel, 99 Adelaide Terrace, Perth, WA, on Friday 13 December 2002 at 10:00 am Perth Time.

Australia and New Zealand Banking Group Limited

ABN 11005 397 522

AUSTRALIA AND NEW ZEALAND BANKING GROUP LIMITED

Notice of Meeting

Ordinary Business

1. Annual Reports

To consider the Annual Report, Financial Statements and the Reports of the Directors and of the Auditors for the year ended 30 September 2002.

2. Election of Directors

(a) To re-elect a director: Dr B W Scott

Dr Scott retires in accordance with the Company's Constitution, and being eligible, offers himself for re-election.

(b) To re-elect a director: Dr R S Deane

Dr Deane retires in accordance with the Company's Constitution, and being eligible, offers himself for re-election.

(c) To elect a director: Mr D M Gonski

Mr Gonski, having been appointed by the Board since the last Annual General Meeting to fill a casual vacancy, retires in accordance with the Company's Constitution, and being eligible, offers himself for election.

Special Business

Signatures

3. Non-Executive Directors Fee Cap

To consider and if thought fit, pass the following resolution as an ordinary resolution:

That the maximum annual aggregate amount of remuneration (within the meaning of the Constitution) that the non-executive directors are entitled to be paid for their services as directors out of the funds of the Company, under rule 10.2(a) of the Company's Constitution be fixed at \$2,500,000.

Voting by Proxy

A member who is entitled to attend and cast a vote at the Meeting may appoint a proxy.

A proxy need not be a member.

A member who is entitled to cast 2 or more votes may appoint 2 proxies and may specify the proportion or number of votes each proxy is appointed to exercise.

The following addresses are specified for the purposes of receipt of proxy appointments:

Australia

ANZ Share Registry
GPO Box 242
Melbourne Victoria
3001 Australia

ANZ Share Registry
12/565 Bourke Street
Melbourne Victoria
3000 Australia

United Kingdom

ANZ Share Registry
PO Box 82
The Pavilions
Bridgewater Road
Bristol BS99 7NH
United Kingdom

New Zealand

ANZ Share Registry
Private Bag 92119
Auckland 1020
New Zealand

Proxies may be sent by fax to facsimile number (61 3) 9473 2456.

To be effective, the instrument by which a proxy is appointed by a member and, if the instrument is signed by the member's attorney, the authority under which the instrument is signed or a certified copy of the authority must be received by the Company at least 48 hours before the meeting.

Members may also submit their proxy instructions electronically with the ANZ Share Registry by visiting www.anz.com and following the prompts and instructions.

For more information concerning the appointment of proxies and the addresses to which proxy forms may be sent, please refer to the reverse side of the proxy form.

Voting by Attorney

A member may appoint an attorney to vote on his/her behalf. For an appointment to be effective for the meeting, the instrument effecting the appointment (or a certified copy of it) must be received by the Company at its registered address or one of the addresses listed above for the receipt of proxy appointments at least 48 hours before the meeting.

Corporate Representatives

A corporation, which is a member, may appoint an individual to act as its representative at the meeting. The appointment must comply with the requirements of section 250D of the Corporations Act. The representative should bring to the meeting evidence of his or her appointment, including any authority under which it is signed, unless it has previously been given to the Company.

By Order of the Board: **Tim Paine**
Secretary
Melbourne

Lives in Wellington, New Zealand. Age 61.

AGM Location Hyatt Regency Hotel, 99 Adelaide Terrace, Perth

Explanatory Notes

Item 3 Non-Executive Directors Fee Cap

Item 3 is a proposal to increase the maximum annual aggregate amount of remuneration (within the meaning of the Company's Constitution) that the non-executive directors of the Company are entitled to be paid for their services as directors, out of the funds of the Company, under rule 10.2(a) of the Company's Constitution, to \$2,500,000.

Rule 10.2(a) of the Company's Constitution provides that the non-executive directors of the Company are entitled to be paid for their services, out of the funds of the Company, an amount of remuneration which does not in any year exceed in aggregate the amount last fixed by ordinary resolution, and that such remuneration is to be allocated among the directors on an equal basis (having regard to the proportion of the year for which each director held office) or as otherwise decided by the Board.

In addition, Australian Stock Exchange Listing Rule 10.17 provides that a listed company must not, without shareholder approval, increase the total amount of nonexecutive directors' fees.

The current limit on the non-executive directors' remuneration is \$1,500,000. This limit was fixed by shareholders at the Annual General Meeting of the Company for the year ended 30 September 1997 held in January 1998. The limit covers fees paid to all non-executive directors for their services as directors of the Company and its subsidiaries (including the minimum statutory superannuation contribution made by the Company).

In seeking shareholder approval of the resolution, the Bank is following its practice of bringing forward a recommendation on this matter at the Annual General Meeting once every four or five years. It is five financial years since the last increase was noted.

There are a number of reasons for bringing forward the resolution at this time:

It is important that ANZ is able to attract and retain directors of the highest calibre. This means that it needs to offer appropriate remuneration, comparable with that offered by ANZ's peers and competitors, including multinational financial institutions.

The Board needs the financial capacity to be able to increase the number of directors, when considered desirable. The Board has operated with eight directors (including the CEO) for some time(1). This number is less than for most major public company boards, and the Board believes that the size has been appropriate for effective, efficient and productive operation. However, there is today a heightened need to meet a much larger array of

governance and compliance standards and this may soon lead to the need to increase Board numbers.

It is appropriate to remunerate further any Board member who assumes major additional Board responsibilities (e.g. relating to a subsidiary or joint venture) where direct parent board representation is considered important. In the period since the last limit was set, for example, Dr. Deane has become Chairman of the subsidiary company, ANZ Banking Group (New Zealand) Ltd, while Mr. Gonski has this year become a director of the ANZ/ING joint venture in funds management and life insurance. Both these payments are made from the aggregate amount of remuneration available for non-executive directors' payments.

Overall, the Bank will be strengthened by having this additional capacity to pay directors' fees for the coming years. It provides flexibility for ensuring that a top calibre Board of appropriate size continues to serve the Bank and its shareholders effectively.

Voting Exclusion Statement

The Company will disregard any votes cast on Item 3 of Special Business by any director and any of their associates, unless the vote is cast as proxy for a person entitled to vote in accordance with a direction on the proxy form or unless the vote is cast by a person chairing the meeting as proxy for a person who is entitled to vote in accordance with a direction on the proxy form to vote as the proxy decides.

(1) The Chief Executive Officer, who is one of the eight members of the Board, is separately remunerated and is not entitled to any Board fees.
