NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The accompanying unaudited consolidated balance sheets of LifeQuest World Corporation (the Company, We) as of November 30, 2008 and the related unaudited consolidated statements of operations for the three and six months ended November 30, 2008 and 2007 and the unaudited consolidated statements of cash flows for the six-month periods then ended have been prepared by the Company in accordance with generally accepted accounting principles for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments (which include normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows at November 30, 2008 and 2007 and for the six months then ended have been made.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America have been condensed or omitted. It is suggested these condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company's May 31, 2008 audited financial statements and Form 10-KSB. The results of operations for the period ended November 30, 2008 are not necessarily indicative of the operating results for the entire year.

The presentation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and disclosure of contingent assets and liabilities at the balance sheet date, and the reported amounts of revenues and expenses during the reporting period. The estimates and assumptions used in the accompanying condensed financial statements are based upon management's evaluation of the relevant facts and circumstances as of the time of the financial statements. Actual results could differ from those estimates.

NOTE 2 COMPANY'S CONTINUED EXISTENCE:

The accompanying unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern. However, the Company has sustained substantial losses and has a significant working capital deficit. The Company intends to generate positive cash flows from operations through increased sales from its new ImmunXT product utilizing the network of distributors in place and from financing activities by issuing additional stock, and obtaining necessary capital through additional advances from the Company's principal stockholder or through private placements. There can be no assurance the Company will be able to obtain additional capital from

private placements in the future. The Company has no other committed sources or arrangements for additional financing.

The financial statements do not include any adjustment relating to recoverability and classification of recorded assets, or the amounts and classification of liabilities that might be necessary should the Company be unable to continue to exist.

NOTE 3 INVENTORIES:

Total		
\$		
<u>274,853</u>		
\$		
<u>277,879</u>		

NOTE 4 INTANGIBLE ASSET:

On December 1, 2006, the Company purchased, through an exclusive license and distribution agreement, the worldwide marketing rights to the most powerful, natural immune booster discovered to date (ImmunXT), as stated by the scientific research team that developed the product. These rights have been acquired from Nordic Immotech Trading APS, a leading life science company with a successful history of producing unique, patented products that are distributed on a global scale. The agreement has an initial term of five years. The agreement automatically renews an additional five years if minimum purchase commitments are met.

The total recorded cost of the license was \$2,390,721. The Company began marketing the product domestically in February 2008. The Company began amortizing the license at that time and is calculating the amortization over the estimated sales volume that is anticipated over the remaining term of the licensed agreement to properly match revenue and expenses. The accumulated amortization for the period ended November 30, 2008 and May 31, 2008, was \$3,256 and \$2,022, respectively.

Under this license agreement, the Company has minimum purchase commitments for the calendar years as follows: 2007-1,000 Kilograms (Kg) (\$490,000), 2008-2,000 Kg (\$980,000) (as amended), 2009-9,000 Kg (\$4,410,000), 2010-15,000 Kg (\$7,350,000), and 2011 and each year thereafter-20,000 Kg (\$9,800,000). If the Company fails to meet the minimum purchase requirements, Nordic Immotech has the right to terminate their license agreement with three months written notice from the expiration of the applicable calendar year. The Company has met the minimum purchase requirements for calendar year 2007. The 2008 purchase commitment was renegotiated (see Note 11). The value of these commitments was determined with pricing as of November 30, 2008.

As part of the license agreement noted above, Nordic Immotech shall pay the Company a royalty of ten percent (10%) of net sales of raw materials sold by Nordic and or affiliates to independent third parties in territories outside of the United States.

In a separate agreement, the Company was granted an option to purchase all the shares in Nordic Immotech. Subject to the terms and conditions of the separate agreement, the Company had the option to purchase all of the shares of Nordic Immotech (170,000 shares) at a fixed price of \$76.47 per share for a total of \$13,000,000 anytime before December 1, 2008. This was renegotiated subsequent to November 30, 2008 (see Note 11).

NOTE 5 DISTRIBUTOR STOCK BONUS PLAN:

Prior to June 1, 2007, the Company offered to its distributors a plan whereby the distributors could earn a

stock bonus based on sales and bonus points. Distributors earned certificates redeemable for one share of the Company's common stock three years after the certificate has been earned. The number of certificates outstanding at November 30, 2008 and May 31, 2008 were 88,160. The liability recorded by the Company for these bonus points was \$111,695 (included in accrued compensation and benefits) at November 30, 2008 and May 31, 2008 which was recorded by the Company at the fair value of the common stock on the date they were earned. During the six month period ended November 30, 2008 and year ended May 31, 2008; no shares were issued to any distributors under this plan. Effective June 1, 2007, this plan was discontinued and all distributors who had earned certificates under the plan became fully vested. As of January 20, 2009, all 88,160 certificates remain outstanding.

NOTE 6 PREFERRED STOCK ISSUANCE:

In September 2008, the Board of Directors has designated 10,000,000 of 50,000,000 total authorized preferred shares as Series B. The Series B preferred shares have no liquidating or other preference, cannot be converted to common stock or sold and has no dividend rights. However, each Series B preferred share has the equivalent of ten common shares for voting rights. The Company will vote with Series B preferred stock and common stock shareholders as one class. The Company issued 10,000,000 shares of the Series B preferred stock to our CEO during the period ended November 30, 2008 for his consideration in signing a 2-year employment agreement effective October 15, 2008. If for any reason the CEO terminates his contract and employment with the Company, these preferred shares will be returned to the treasury of the Company.

NOTE 7 CONTINGENCIES:

In the ordinary course of business, the Company is exposed to legal actions and threatened claims and incurs costs to defend against such legal actions and claims. Company management is not aware of any such outstanding, pending or threatened action, claim or other circumstance that would materially affect the Company's financial position or results of operations.

NOTE 8 - INCOME TAXES:

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry-forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of the enactment. The

Company has recorded a full valuation allowance for all deferred tax assets due to the significance of its continued operating losses.

NOTE 9 RELATED PARTY TRANSACTIONS:

Intellectual Property License Agreement

In January 1999, we entered into an intellectual property license agreement (the "License Agreement") with Jurak Holdings Limited ("JHL"), a corporation organized under the laws of the Province of Alberta, Canada and an affiliate of our Chief Executive Officer and one of our directors. Pursuant to the terms and

provisions of the License Agreement, we are required to pay the greater of \$500,000 for fiscal year 2003 and each calendar year thereafter, during the first ten years of the License Agreement (the "Minimum Royalty Fee"), or eight percent of the net sales price of all licensed products sold under the License

Agreement (the "Continuing Royalty Fee"). After fiscal 2013, we are required to make payments in the amount of the Continuing Royalty Fee. On any amounts past due on this agreement, interest will accrue at prime plus 1%.

For the six months ended November 30, 2008 and 2007, the minimum royalty fee for the amount of \$250,000 was expensed. The accrued payments due and owing to JHL under the License Agreement for the Minimum Royalty Fee and the Continuing Royalty Fee were \$1,345,957 and \$1,087,598 at November 30, 2008 and May 31, 2008, respectively. The amount owed as of November 30, 2008 includes interest of \$14,823 which was recorded for the six month period ended November 30, 2008 due to continued delinquent payments.

The Company has a payable due to its majority stockholder totaling \$187,107 and \$22,980 at November 30, 2008 and May 31, 2008, respectively. These liabilities are for reimbursement of business expenses due the stockholder and for working capital advances made to the Company. No interest is being charged on these balances.

The Company has included in accounts payable related party balances due to an entity owned by the majority stockholder totaling \$96,912 at November 30, 2008 and May 31, 2008. These liabilities are for consulting services and reimbursement of business expenses due the entity. No interest is being charged on these outstanding balances.

NOTE 10 COMMITMENT

The Company has entered into an endorsement and consulting agreement with a film and television actor to promote the immune booster product line. The one year agreement was effective May 1, 2008, with a Company option to extend two years. The Company has a minimum commitment of \$42,000 during the first year. There are escalator clauses based on sales milestones, as defined in the agreement, which could cause the commitment to increase. The Company has expensed \$17,000 for the six months ended November 30, 2008, relating to this agreement.

NOTE 11 SUBSEQUENT EVENT:

Subsequent to November 30, 2008, the Company and Nordic Immotech entered into a Standstill Addendum to the purchase agreement and distribution and sublicense agreements related to their exclusive license agreement for the ImmunXT product (see Note 4). The primary intent of this Addendum was to extend the time period to acquire Nordic Immotech and to extend the required minimum purchase commitment of raw product for the calendar year 2008 to

March 31, 2009. The Company has a 1,700 kg outstanding purchase commitment of raw product remaining at November 30, 2008 which equates to approximately \$833,000.

In consideration for this agreement, the Company has issued Nordic Immotech 4,166,667 shares of common stock with a fair value of \$1,000,000 or \$0.24 per share in December 2008. The Company may use the value of these shares to offset the purchase price of Nordic Immotech, if an agreement to purchase Nordic Immotech is reached. The Company also has the option to repurchase these shares for \$0.48 per share (\$2,000,000) at February 27, 2009 or \$0.60 per share (\$2,500,000) at March 31, 2009. Nordic

Immotech may not sell these shares without the Company having the right of repurchase prior to March 31, 2009. If no agreement is reached by March 29, 2009, the shares remain with Nordic Immotech and will be fully tradeable.

NOTE 12 BASIC AND DILUTED EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is computed by dividing the net earnings (loss) by the weighted average number of common stock outstanding during the periods presented. Diluted earnings (loss) per share is computed by dividing the net earnings (loss) by the weighted average number of common stock outstanding plus all dilutive potential common shares. The Company does not have any dilutive potential common shares for the periods presented.

NOTE 13 RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In October 2008, the FASB issued FSP FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for that Asset is Not Active (FSP FAS 157-3), which clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP FAS 157-3 was effective upon issuance. Its adoption did not have a material effect on the Company's financial statements.

Item 2.

Management's Discussion and Analysis of Financial

Condition and Results of Operations

Overview

LifeQuest World Corporation, a Minnesota corporation incorporated on November 1, 1997, currently trades on the Over-the-Counter Bulletin Board under the symbol "LQWC". LifeQuest World Corporation is a Life Science company that is dedicated to significantly improving the lives of its family members, associates and distributor organization.

We strive daily through our own research and development laboratories, as well as our professional association with one of the world's leading botanical research centers, to provide human beings with solutions to many of life's unanswered health challenges. Infusing proprietary science under the scrutiny of Good Manufacturing Practices (GMP), and adhering to the efficacy of pharmaceutical protocols, LifeQuest's products are effective, safe and superior within the marketplace for nutritional supplements and consumables.

But our commitment does not end there. The world's demand for health and well-being only begins with proper nutrition. LifeQuest strives to present a whole-minded approach for our distributors to better living by putting equal emphasis on an improved life style, freedom through financial reward and the enhancement of the Human Spirit.

We provide extensive product education and personal development through sophisticated training programs for our distributors. We offer substantial earning potential available through a generous compensation plan. To promote optimum health, we have invested millions of dollars to create superior nutritional supplements and advanced personal care products. It is with great pride that LifeQuest World Corporation hopes continue to inspire thousands to change an average existence, into a life of celebration.

In December 2006, LifeQuest World Corporation acquired the worldwide rights to a new, patented Immune-Stimulatory extract from marine sourced Spirulina developed by leading research scientists at the National Center for Natural Product Research (NCNPR) at the University of Mississippi. LifeQuest had a limited introduction through its distributors in its initial launch of ImmunXT in February 2008. The product named ImmunXT was researched and developed over a ten year period with exhaustive clinical and scientific testing with benchmark criteria that it had to be 100% natural and certified vegetarian. Per the studies done by NCNPR, ImmunXT is one of the most powerful Immune-Stimulatory extracts, specifically with respect to macrophage activation within the innate immune system. Recent research has shown that the innate immune system, primarily in the digestive tract, is the body's first line of defense and its main function is to guard the body against disease and invasion by harmful pathogens.

Along with this scientific team, LifeQuest's own group has decades of practical research, development and manufacturing experience in nutritional products and maintains a professional awareness of any new life changing products available from major product development centers. To be considered for acquisition, products must have either good reputable academic pedigree, backed with very thorough scientific data, or meet product criteria that have very long substantiated consumer use with extremely credible personal, subjective and objective results. LifeQuest has made a substantial financial investment along with years of developmental work in the acquisition of ImmunXT.

LifeQuest products also must meet the requirements of strong functionality and be results-based because we design product research on the principle that functional, beneficial nutritional products are desired by consumers today. The consumer understands that good nutritional practices may reduce the risk of disease. LifeQuest's products have been developed to enhance immune competence, detoxification,

functionality at the cellular level and promote digestive health. LifeQuest believes that an optimal immune system, positive cellular function and digestive health are vital and beneficial for overall, better physical health.

The following discussion and analysis of our results of operations and financial position should be read in conjunction with our audited financial statements and the notes thereto, included in our 10-KSB filed for the year ended May 31, 2008. Our financial statements are prepared in accordance with U.S. GAAP.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

The following discussion is intended to provide an analysis of our financial condition and should be read in conjunction with our audited financial statements and the notes thereto. The matters discussed in this section, which are not historical or current facts, deal with potential future circumstances and developments. Such forward-looking statements include, but are not limited to, the development plans for our growth, trends in the results of our development, anticipated development plans, operating expenses and our anticipated capital requirements and capital resources. Our actual results could differ materially from the results discussed in the forward-looking statements.

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern. However, the Company has sustained substantial losses and its current liabilities exceed its current assets. The Company intends to generate positive cash flows from operations through increased sales utilizing the network of distributors in place with existing products and the new natural immune booster products, issuing additional stock, and obtaining necessary capital through additional advances from the Company's principal stockholder or through private placements.

To continue operations, the Company must raise additional capital. However, there can be no assurance the Company will be able to obtain additional capital from private placements in the future. The Company has no other committed sources or arrangements for additional financing.

Three months Ended November 30, 2008 Compared to Three months Ended November 30, 2007

Total revenue for the three months ended November 30, 2008 was \$193,488 compared to \$274,989 in the same period ended in 2007. Gross profit was \$150,660 for the three months ended November 30, 2008 compared to \$218,953 for the same period ended in 2007, as further discussed below. The net loss during the three months ended November 30, 2008 was \$226,510 compared to a net loss of \$270,810 in the same period ended in 2007.

Sales and Gross Profit

All revenue for the three months ended November 30, 2008 and 2007, respectively, were for product sales. The Company recorded \$57,640 in sales for the new ImmunXT product line for the three months ended November 30, 2008 and none for the comparable period. There was no royalty income due from Nordic Immotech for their sales of our natural immune booster product in Europe during either three month period ended. Sales by Nordic Immotech were expected to be sporadic in fiscal 2009 as they continue to introduce the ImmunXT product in new markets. They also tend to sell product in bulk to large distributors which is a different marketing model than what the Company is currently employing.

Sales from our Jurak product line continues to decline because of a decline in new distributors being added compared to prior years.

Gross profit in the three months ended November 30, 2008 decreased to \$150,660 compared to \$218,953 in the same period ended in 2007. Gross profit as a percentage of revenue decreased slightly to 78% in the three months ended November 30, 2008 compared to 80% in the same period ended in 2007. The decrease in gross profit as a percentage of sales is due to product mix.

Royalty Expense-Related Party

The minimum royalty expense-related party accrued to Jurak Holdings Limited (related party) remained consistent for both periods at \$125,000.

Distribution, Selling and Administrative Expenses

Total distribution, selling and administrative expenses for the three months ended November 30, 2008 were \$248,111 compared with \$345,198 for the same period ended in 2007. The selling and administrative expenses decreased compared to 2007. Management continues to monitor and control expenses including eliminating personnel and other costs as necessary during 2008. We anticipate increasing personnel and related distribution, selling and administrative expenses as the new ImmunXT product line grows in sales.

Interest expense for the three months ended November 30, 2008 was \$4,059 compared with \$19,565 for the same period in the prior year. Current year interest costs decreased compared to prior year due to imputed interest expense on the purchase of the Nordic License agreement during 2007. This agreement was paid in full prior to the three months ended November 30, 2008.

Six months Ended November 30, 2008 Compared to Six months Ended November 30, 2007

Total revenue for the six months ended November 30, 2008 was \$355,645 compared to \$557,493 in the same period ended in 2007. Gross profit was \$280,628 for the six months ended November 30, 2008 compared to \$425,101 for the same period ended in 2007, as further discussed below. The net loss during the six months ended November 30, 2008

was \$573,462 compared to a net loss of \$620,234 in the same period ended in 2007.

Sales and Gross Profit

All revenue for the six months ended November 30, 2008 and 2007, respectively, were for product sales. The Company recorded \$82,150 in sales for the new ImmunXT product line for the six months ended November 30, 2008 and none for the comparable period. There was no royalty income due from Nordic Immotech for their sales of our natural immune booster product in Europe during either six month period ended. Sales by Nordic Immotech were expected to be sporadic in fiscal 2009 as they continue to introduce the ImmunXT product in new markets. They also tend to sell product in bulk to large distributors which is a different marketing model than what the Company is currently employing. Sales from our Jurak product line continues to decline because of a decline in new distributors being added compared to prior years.

Gross profit in the six months ended November 30, 2008 decreased to \$280,628 compared to \$425,101 in the same period ended in 2007. Gross profit as a percentage of revenue increased slightly to 79% in the

six months ended November 30, 2008 compared to 76% in the same period ended in 2007. The increase in gross profit as a percentage of sales is due to product mix and continued effort by management to control costs.

Royalty Expense-Related Party

The minimum royalty expense-related party accrued to Jurak Holdings Limited (related party) remained consistent for both periods at \$250,000.

Distribution, Selling and Administrative Expenses

Total distribution, selling and administrative expenses for the six months ended November 30, 2008 were \$589,267 compared with \$745,112 for the same period ended in 2007. The selling and administrative expenses decreased compared to 2007. Management continues to monitor and control expenses including eliminating personnel and other costs as necessary during 2008. We anticipate increasing personnel and related distribution, selling and administrative expenses as the new ImmunXT product line grows in sales.

Interest expense for the six months ended November 30, 2008 was \$14,823 compared with \$50,223 for the same period in the prior year. Current year interest costs decreased compared to prior year due to imputed interest expense on the purchase of the Nordic License agreement during 2007. This agreement was paid in full prior to the six months ended November 30, 2008.

Liquidity and Capital Resources

Six Month Period Ended November 30, 2008

We have historically had more expenses and cost of sales than revenue in each year of our operations. The accumulated deficit as of November 30, 2008 was \$8,041,764. Generally, we have financed operations to date

through the proceeds of the private placement of equity and debt securities and sales revenue. In connection with our business plan, management anticipates that there may be additional increases in operating expenses and capital expenditures relating to the new immune booster products. We intend to finance these expenses with further issuances of our securities and revenues from operations. Therefore, we expect we may need to raise additional capital and increase our revenues to meet long-term operating requirements.

At November 30, 2008, the Company had \$0 of cash compared to \$16,336 at May 31, 2008. The Company had current assets of \$284,299 and current liabilities of \$2,152,079 at November 30, 2008 compared to current assets of \$316,781 and current liabilities of \$1,586,187 at May 31, 2008.

Net cash used in operating activities was \$187,394 during the six months ended November 30, 2008 compared to net cash used in operating activities of \$488,817 in the same period ended in 2007. The decrease in cash used by operations was primarily due to the increase in current liabilities and better management of inventory levels as the Company continues to monitor and conserve its cash during the six months ended November 30, 2008.

Net cash used in investing activities was \$24,131 in the first six months ended November 30, 2008 compared to \$0 in the same period ended in 2007. The increase in 2008 was due to the investment in equipment needed for the new ImmunXT product line.

Net cash provided by financing activities was \$195,189 during the six months ended November 30, 2008 compared to net cash provided by financing activities in the same period in 2007 of \$291,479. During the six months ended November 30, 2008, our primary source of funding came from advances from our officer / stockholder totaling \$164,127. Issuance of common stock from a private placement in excess of cash due on the installment note payments for the immune booster license resulted in the six months ended November 30, 2007 having more cash provided by financing activities than 2008. No common stock sales occurred during the six months ended November 30, 2008.

Critical Accounting Policies

Our critical accounting policies, including the assumptions and judgements underlying them, are disclosed in our fiscal 2008 Form 10-KSB in Note 1- Summary of Significant Accounting Policies included in our Consolidated Financial Statements. There were no significant changes to our critical accounting policies during the period ended November 30, 2008. On an ongoing basis, we evaluate our estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The result of which form the basis for making judgements about the carrying value of assets and liabilities that are not readily apparent from other sources. Results may differ from these estimates due to actual outcomes being different from those on which we based our assumptions.

We consider the following accounting policies to be those most important to the portrayal of our results of operations and financial conditions:

Inventory Valuation: The Company's inventories are valued at the lower of cost or market using the first-in, first-out method (FIFO). Reserves for overstock and obsolescence are estimated and recorded to reduce the carrying value to estimated net realizable value. The amount of the reserve is determined based on projected sales information, plans for discontinued products and other factors. Though management considers these reserves adequate and proper, changes in sales volumes due to unexpected economic or competitive conditions are among the factors that could materially affect the adequacy of this reserve.

Intangible Asset: Intangible asset, entirely comprised of the ImmunXT license, is recorded at cost and is presented net of amortization. Amortization is computed over the estimated sales volume that is anticipated over the remaining term of the licensed agreement to properly match revenue and expenses.

Income Taxes: We account for income taxes in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 109, Accounting for Income Taxes as clarified by FIN 48. In the preparation of the Company's consolidated financial statements, management calculates income taxes. This includes estimating the Company's current tax liability as well as assessing temporary differences resulting from different treatment of items for tax and book accounting purposes. These differences result in deferred tax assets and liabilities, which are recorded on the balance sheet. These assets and liabilities are analyzed regularly and management assesses the likelihood that deferred tax assets will be realized from future taxable income. The valuation allowance for deferred income tax benefits is determined based upon the expectation of whether the benefits are more likely than not to be realized. The Company has

recorded a full valuation allowance for all deferred tax assets due to the significance of its continued operating losses.

FIN No. 48 requires the recognition of a financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

Revenue Recognition: The Company recognizes revenue when the earnings process is complete, evidenced by persuasive evidence of an agreement, delivery has occurred or services have been rendered, the price is fixed or determinable, and collectability is reasonably assured. The earning process completion is evidenced through the shipment of goods, as the sales terms of our products are FOB shipping point, the risk of loss is transferred upon shipment and there are no significant obligations subsequent to that point. There are no significant estimates related to revenue recognition.

Recently Issued Accounting Pronouncements

In October 2008, the FASB issued FSP FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for that Asset is Not Active (FSP FAS 157-3), which clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP FAS 157-3 was effective upon issuance. Its adoption did not have a material effect on the Company's financial statements.

Off Balance Sheet Arrangements

None.

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURE ABOUT MARKET RISK

Our financial instruments consist mostly of cash. Our only risk is interest rates which is not considered significant.

The Company does not hold foreign currency since we do not transact business in foreign currencies, and therefore have no currency exposure. We do not enter into futures or forward commodity contracts since we have no market risk exposure with respect to commodity prices.

Item 4T. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13(a)-15(e) of the Securities Exchange Act of 1934) was carried out by the Company under the supervision and with the participation of our Chief Executive Officer/Chief Accounting Officer and other management personnel.

Based on that evaluation, our Chief Executive Officer/Chief Accounting Officer has concluded that these disclosure controls and procedures were not effective due to a lack of segregation of duties in our accounting and financial functions, including our lack of financial expertise relating to our financial reporting and our quarterly close process. See our Form 10-KSB for additional information on this matter. Due to our lack of sufficient capital, management has concluded that with certain oversight controls that are in place, the risks associated with the lack of segregation of duties and lack of internal financial expertise are not sufficient to justify the costs of potential benefits to be gained by adding additional employees at this time. Management intends to periodically reevaluate this situation. If the Company secures sufficient capital, we expect to examine the possibility of increasing staffing to mitigate the current lack of segregation of duties within the accounting and financial functions.

Notwithstanding the material weaknesses referred to above that continued to exist as of November 30, 2008, our Chief Executive Officer/Chief Accounting Officer has concluded that the financial statements included in this Form 10-Q present fairly, in all material respects, the financial position, results of operations and cash flows of the Company as required for interim financial statements.

Changes in Internal Controls Over Financial Reporting

There were no changes in the Company's internal control over financial reporting, during the quarter ended November 30, 2008, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On December 13, 2006, a civil suit was filed in the District Court of Clark County in and for the State of Nevada by Jurak Corporation World Wide, Inc. (plaintiffs) and one former employee and her spouse (defendants). The suit entails that the former employee processed credit refunds to a debit/credit card held at their banking institution. In addition, the former employee embezzled funds by setting up a merchant processing system and diverting the charging of our distributors' credit cards from our merchant processor to their processor. All is evidenced by information located on the computer used by the former employee at the Company as well as through other reporting mechanisms and processing systems. The Company is seeking relief for damages in excess of \$60,000; special damages according to proof; for attorneys' fees and costs of suit; and for other and further relief as the Court may deem just and proper as compensation

for monies embezzled by the former employee and her spouse. No answer has been received from the defendant and the Company is seeking a default judgment granting all of the relief sought.

Item 1A. Risk Factors

An investment in our common stock involves a number of very significant risks. See our Form 10-KSB for additional information on this matter.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company issued 10,000,000 preferred shares to our CEO during the period ended November 30, 2008 for his consideration in signing a 2-year employment agreement effective October 15, 2008. If for any reason the CEO terminates his contract and employment with the Company, these preferred shares will be returned to the treasury of the Company.

ITEM 3. Defaults on Senior Securities

None.

ITEM 4. Submission of matters to a Vote of Security Holders

None.

Item 5. Other Information

No items occurred during the period of this report which would have been required to be reported in a Form 8-K which have not been reported.

Item 6. Exhibits

The following exhibits are included herein:

31.1

Certification of Chief Executive Officer and Chief Accounting Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (Rules 13a-14 and 15d-14 of the Exchange Act).

32.

Certification pursuant Section 906 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. §1350).

Signatures

In accordance with the requirements of the Exchange Act of 1934, the registrant caused this report to be signed on its behalf by the undersigned thereto, duly authorized.

Lifequest World Corporation.
