

CENTERPOINT ENERGY INC
 Form 10-Q
 November 08, 2018

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
 WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED SEPTEMBER 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM _____ TO _____

Commission file number	Registrant, State or Other Jurisdiction of Incorporation or Organization Address of Principal Executive Offices, Zip Code and Telephone Number	I.R.S. Employer Identification No.
1-31447	CenterPoint Energy, Inc. (a Texas corporation) 1111 Louisiana Houston, Texas 77002 (713-207-1111)	74-0694415
1-3187	CenterPoint Energy Houston Electric, LLC (a Texas limited liability company) 1111 Louisiana Houston, Texas 77002 (713-207-1111)	22-3865106
1-13265	CenterPoint Energy Resources Corp. (a Delaware corporation) 1111 Louisiana Houston, Texas 77002 (713-207-1111)	76-0511406

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

CenterPoint Energy, Inc. Yes No
 CenterPoint Energy Houston Electric, LLC Yes No
 CenterPoint Energy Resources Corp. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

CenterPoint Energy, Inc. Yes No

CenterPoint Energy Houston Electric, LLC Yes No

CenterPoint Energy Resources Corp. Yes No

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act. (Check one):

CenterPoint Energy, Inc.	Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>	Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input type="checkbox"/>	Emerging growth company <input type="checkbox"/>
CenterPoint Energy Houston Electric, LLC	Large accelerated filer <input type="checkbox"/>	Accelerated filer <input type="checkbox"/>	Non-accelerated filer <input checked="" type="checkbox"/>	Smaller reporting company <input type="checkbox"/>	Emerging growth company <input type="checkbox"/>
CenterPoint Energy Resources Corp.	Large accelerated filer <input type="checkbox"/>	Accelerated filer <input type="checkbox"/>	Non-accelerated filer <input checked="" type="checkbox"/>	Smaller reporting company <input type="checkbox"/>	Emerging growth company <input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

CenterPoint Energy, Inc.	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
CenterPoint Energy Houston Electric, LLC	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
CenterPoint Energy Resources Corp.	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>

Indicate the number of shares outstanding of each of the issuers’ classes of common stock as of October 22, 2018:

CenterPoint Energy, Inc.	501,191,387 shares of common stock outstanding, excluding 166 shares held as treasury stock
CenterPoint Energy Houston Electric, LLC	1,000 common shares outstanding, all held by Utility Holding, LLC, a wholly-owned subsidiary of CenterPoint Energy, Inc.
CenterPoint Energy Resources Corp.	1,000 shares of common stock outstanding, all held by Utility Holding, LLC, a wholly-owned subsidiary of CenterPoint Energy, Inc.

This combined Form 10-Q is filed separately by three registrants: CenterPoint Energy, Inc., CenterPoint Energy Houston Electric, LLC and CenterPoint Energy Resources Corp. Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf. Each registrant makes no representation as to information relating exclusively to the other registrants.

Except as discussed in the last paragraph in Note 12 to the Registrants’ Condensed Consolidated Financial Statements, no registrant has an obligation in respect of any other Registrant’s debt securities, and holders of such debt securities should not consider the financial resources or results of operations of any Registrant other than the obligor in making a decision with respect to such securities.

CenterPoint Energy Houston Electric, LLC and CenterPoint Energy Resources Corp. meet the conditions set forth in General Instructions H(1)(a) and (b) of Form 10-Q and are therefore filing this form with the reduced disclosure format specified in General Instruction H(2) of Form 10-Q.

TDU	Transmission and distribution utility
Time	Time Inc.
Time Common	Time common stock
Transition Agreements	Services Agreement, Employee Transition Agreement, Transitional Seconding Agreement and other agreements entered into in connection with the formation of Enable
TW	Time Warner Inc.
TW Common	TW common stock
Utility Holding	Utility Holding, LLC, a wholly-owned subsidiary of CenterPoint Energy
Vectren	Vectren Corporation, an Indiana corporation
VIE	Variable interest entity
Vistra Energy Corp.	Texas-based energy company focused on the competitive energy and power generation markets
WACC	Weighted average cost of capital
ZENS	2.0% Zero-Premium Exchangeable Subordinated Notes due 2029
ZENS-Related Securities	As of September 30, 2018, consisted of AT&T Common and Charter Common and as of December 31, 2017, consisted of Charter Common, Time Common and TW Common
2017 Form 10-K	Annual Report on Form 10-K for the fiscal year ended December 31, 2017

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

From time to time the Registrants make statements concerning their expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements that are not historical facts. These statements are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those expressed or implied by these statements. You can generally identify forward-looking statements by the words “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “forecast,” “intend,” “may,” “objective,” “plan,” “potential,” “predict,” “projection,” “should,” “target,” “will” or other similar words.

The Registrants have based their forward-looking statements on management’s beliefs and assumptions based on information reasonably available to management at the time the statements are made. The Registrants caution you that assumptions, beliefs, expectations, intentions and projections about future events may and often do vary materially from actual results. Therefore, the Registrants cannot assure you that actual results will not differ materially from those expressed or implied by the Registrants’ forward-looking statements. In this Form 10-Q, unless context requires otherwise, the terms “our,” “we” and “us” are used as abbreviated references to CenterPoint Energy, Inc. together with its consolidated subsidiaries, including Houston Electric and CERC.

The following are some of the factors that could cause actual results to differ from those expressed or implied by the Registrants’ forward-looking statements and apply to all Registrants unless otherwise indicated:

the performance of Enable, the amount of cash distributions CenterPoint Energy receives from Enable, Enable’s ability to redeem the Enable Series A Preferred Units in certain circumstances and the value of CenterPoint Energy’s interest in Enable, and factors that may have a material impact on such performance, cash distributions and value, including factors such as:

competitive conditions in the midstream industry, and actions taken by Enable’s customers and competitors, including the extent and timing of the entry of additional competition in the markets served by Enable;

the timing and extent of changes in the supply of natural gas and associated commodity prices, particularly prices of natural gas and NGLs, the competitive effects of the available pipeline capacity in the regions served by Enable, and the effects of geographic and seasonal commodity price differentials, including the effects of these circumstances on re-contracting available capacity on Enable’s interstate pipelines;

the demand for crude oil, natural gas, NGLs and transportation and storage services;

environmental and other governmental regulations, including the availability of drilling permits and the regulation of hydraulic fracturing;

recording of non-cash goodwill, long-lived asset or other than temporary impairment charges by or related to Enable;

changes in tax status;

access to debt and equity capital; and

the availability and prices of raw materials and services for current and future construction projects;

industrial, commercial and residential growth in our service territories and changes in market demand, including the demand for our non-rate regulated products and services and effects of energy efficiency measures and demographic patterns;

timely and appropriate rate actions that allow recovery of costs and a reasonable return on investment;

future economic conditions in regional and national markets and their effect on sales, prices and costs;

weather variations and other natural phenomena, including the impact of severe weather events on operations and capital;

state and federal legislative and regulatory actions or developments affecting various aspects of our businesses (including the businesses of Enable), including, among others, energy deregulation or re-regulation, pipeline integrity and safety and changes in regulation and legislation pertaining to trade, health care, finance and actions regarding the rates charged by our regulated businesses;

CenterPoint Energy's expected timing, likelihood and benefits of completion of the Merger, including the timing, receipt and terms and conditions of any required approvals by regulatory agencies or the outcome of shareholder litigation filed against Vectren that could reduce anticipated benefits or cause the parties to delay or abandon the Merger, as well as the ability to successfully integrate the businesses and realize anticipated benefits and the risk that the credit ratings of the combined company or its subsidiaries may be different from what CenterPoint Energy expects;

v

tax legislation, including the effects of the TCJA (which includes any potential changes to interest deductibility) and uncertainties involving state commissions' and local municipalities' regulatory requirements and determinations regarding the treatment of EDIT and our rates;

CenterPoint Energy's and CERC's ability to mitigate weather impacts through normalization or rate mechanisms, and the effectiveness of such mechanisms;

the timing and extent of changes in commodity prices, particularly natural gas, and the effects of geographic and seasonal commodity price differentials on CERC and Enable;

actions by credit rating agencies, including any potential downgrades to credit ratings;

changes in interest rates and their impact on costs of borrowing and the valuation of CenterPoint Energy's pension benefit obligation;

problems with regulatory approval, construction, implementation of necessary technology or other issues with respect to major capital projects that result in delays or in cost overruns that cannot be recouped in rates;

local, state and federal legislative and regulatory actions or developments relating to the environment, including those related to global climate change;

the impact of unplanned facility outages;

any direct or indirect effects on our or Enable's facilities, operations and financial condition resulting from terrorism, cyber-attacks, data security breaches or other attempts to disrupt our businesses or the businesses of third parties, or other catastrophic events such as fires, earthquakes, explosions, leaks, floods, droughts, hurricanes, pandemic health events or other occurrences;

our ability to invest planned capital and the timely recovery of our investments;

our ability to control operation and maintenance costs;

the sufficiency of our insurance coverage, including availability, cost, coverage and terms and ability to recover claims;

the investment performance of CenterPoint Energy's pension and postretirement benefit plans;

commercial bank and financial market conditions, our access to capital, the cost of such capital, and the results of our financing and refinancing efforts, including availability of funds in the debt capital markets;

changes in rates of inflation;

inability of various counterparties to meet their obligations to us;

non-payment for our services due to financial distress of our customers;

the extent and effectiveness of our and Enable's risk management and hedging activities, including, but not limited to financial and weather hedges and commodity risk management activities;

•

timely and appropriate regulatory actions, which include actions allowing securitization, for any future hurricanes or natural disasters or other recovery of costs, including costs associated with Hurricane Harvey;

CenterPoint Energy's or Enable's potential business strategies and strategic initiatives, including restructurings, joint ventures and acquisitions or dispositions of assets or businesses (including a reduction of CenterPoint Energy's interest in Enable, if any, whether through its decision to sell all or a portion of the Enable common units it owns in the public equity markets or otherwise, subject to certain limitations), which CenterPoint Energy and Enable cannot assure will be completed or will have the anticipated benefits to CenterPoint Energy or Enable;

acquisition and merger activities involving us or our competitors, including the ability to successfully complete merger, acquisition and divestiture plans;

our or Enable's ability to recruit, effectively transition and retain management and key employees and maintain good labor relations;

the outcome of litigation;

the ability of REPs, including REP affiliates of NRG and Vistra Energy Corp., formerly known as TCEH Corp., to satisfy their obligations to CenterPoint Energy and Houston Electric;

the ability of GenOn (formerly known as RRI Energy, Inc., Reliant Energy and RRI), a wholly-owned subsidiary of NRG, and its subsidiaries, currently the subject of bankruptcy proceedings, to satisfy their obligations to us, including indemnity obligations, which may be contested by GenOn;

changes in technology, particularly with respect to efficient battery storage or the emergence or growth of new, developing or alternative sources of generation;

the timing and outcome of any audits, disputes and other proceedings related to taxes;

the effective tax rates;

the effect of changes in and application of accounting standards and pronouncements; and

other factors discussed in “Risk Factors” in Item 1A of Part I of each of the Registrants’ 2017 Form 10-K and in Item 1A of Part II of CenterPoint Energy’s First Quarter 2018 Form 10-Q, which are incorporated herein by reference, and other reports the Registrants file from time to time with the SEC.

You should not place undue reliance on forward-looking statements. Each forward-looking statement speaks only as of the date of the particular statement, and the Registrants undertake no obligation to update or revise any forward-looking statements. Investors should note that the Registrants announce material financial information in SEC filings, press releases and public conference calls. Based on guidance from the SEC, the Registrants may use the Investors section of CenterPoint Energy’s website (www.centerpointenergy.com) to communicate with investors about the Registrants. It is possible that the financial and other information posted there could be deemed to be material information. The information on CenterPoint Energy’s website is not part of this combined Form 10-Q.

COMBINED NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(1) Background and Basis of Presentation

No Registrant makes any representations as to the information related solely to CenterPoint Energy or the subsidiaries of CenterPoint Energy other than itself.

General. Included in this combined Form 10-Q are the Interim Condensed Financial Statements of CenterPoint Energy, Houston Electric and CERC, which are referred to collectively as the Registrants. The Combined Notes to the Unaudited Condensed Consolidated Financial Statements apply to all Registrants unless otherwise indicated. The Interim Condensed Financial Statements are unaudited, omit certain financial statement disclosures and should be read with each of the Registrants' 2017 Form 10-K.

Background. CenterPoint Energy, Inc. is a public utility holding company and owns interests in Enable as described below. CenterPoint Energy's operating subsidiaries, Houston Electric and CERC, own and operate electric transmission and distribution and natural gas distribution facilities and supply natural gas to commercial and industrial customers and electric and natural gas utilities.

Houston Electric engages in the electric transmission and distribution business in the Texas Gulf Coast area that includes the city of Houston; and

CERC Corp. (i) owns and operates natural gas distribution systems in six states and (ii) obtains and offers competitive variable and fixed-price physical natural gas supplies and services primarily to commercial and industrial customers and electric and natural gas utilities in 33 states through its wholly-owned subsidiary, CES.

As of September 30, 2018, CenterPoint Energy, indirectly through CNP Midstream, owned approximately 54.0% of the common units representing limited partner interests in Enable, 50% of the management rights and 40% of the incentive distribution rights in Enable GP and also directly owned an aggregate of 14,520,000 Enable Series A Preferred Units. Enable owns, operates and develops natural gas and crude oil infrastructure assets.

On September 4, 2018, CERC entered into a Contribution Agreement, by and between CERC and CNP Midstream, a new subsidiary formed by CERC in June 2018, pursuant to which CERC contributed its equity investment in Enable consisting of Enable common units and its interests in Enable GP, to CNP Midstream (collectively, the Enable Contribution). Immediately following the Enable Contribution, CERC distributed all of its interest in CNP Midstream to Utility Holding, CERC's sole stockholder and a wholly-owned subsidiary of CenterPoint Energy. Utility Holding then distributed all of its interest in CNP Midstream to CenterPoint Energy, its sole member (collectively with the Enable Contribution, the Internal Spin). CERC executed the Internal Spin to, among other things, enhance the access of CERC and CenterPoint Energy to low cost debt and equity through increased transparency and understandability of the financial statements, improve CERC's credit quality by eliminating the exposure to Enable's midstream business and provide clarity of internal reporting and performance metrics to enhance management's decision making for CERC and CNP Midstream.

As a result of the Internal Spin, CERC's equity in earnings in Enable and related income taxes have been classified as discontinued operations in CERC's Interim Condensed Financial Statements. For further information regarding the

Internal Spin and CERC's presentation of discontinued operations, see Note 9.

As of September 30, 2018, CenterPoint Energy and Houston Electric had VIEs consisting of the Bond Companies, which are consolidated. The consolidated VIEs are wholly-owned, bankruptcy-remote, special purpose entities that were formed specifically for the purpose of securitizing transition and system restoration-related property. Creditors of CenterPoint Energy and Houston Electric have no recourse to any assets or revenues of the Bond Companies. The bonds issued by these VIEs are only payable from and secured by transition and system restoration property, and the bondholders have no recourse to the general credit of CenterPoint Energy or Houston Electric.

Basis of Presentation. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents

The Interim Condensed Financial Statements reflect all normal recurring adjustments that are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the respective periods. Amounts reported in the Condensed Statements of Consolidated Income are not necessarily indicative of amounts expected for a full-year period due to the effects of, among other things, (a) seasonal fluctuations in demand for energy and energy services, (b) changes in energy commodity prices, (c) timing of maintenance and other expenditures and (d) acquisitions and dispositions of businesses, assets and other interests. Certain prior year amounts have been reclassified to conform to the current year presentation. See Notes 2 and 9 for further discussion.

For a description of the Registrants' reportable business segments, see Note 16.

(2) New Accounting Pronouncements

The following table provides an overview of recently adopted or issued accounting pronouncements applicable to all the Registrants, unless otherwise noted.

Recently Adopted Accounting Standards

ASU Number and Name	Description	Date of Adoption	Financial Statement Impact upon Adoption
ASU 2014-09- Revenue from Contracts with Customers (Topic 606) and related amendments	This standard provides a comprehensive new revenue recognition model that requires revenue to be recognized in a manner that depicts the transfer of goods or services to a customer at an amount that reflects the consideration expected to be received in exchange for those goods or services. Transition method: modified retrospective	January 1, 2018	Note 4 addresses the disclosure requirements. Adoption of the standard did not result in significant changes to revenue recognition. A substantial amount of the Registrants' revenues are tariff and/or derivative based, which were not significantly impacted by these ASUs.
ASU 2017-05- Other Income-Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets	This standard clarifies when and how to apply ASC 610-20, which was issued as part of ASU 2014-09. It amends or supersedes the guidance in ASC 350 and ASC 360 on determining a gain or loss recognized upon the derecognition of nonfinancial assets. Transition method: modified retrospective	January 1, 2018	ASU 2017-05 eliminates industry specific guidance, including ASC 360-20 Property, Plant, and Equipment - Real Estate Sales, for the recognition of gains or losses upon the sale of in-substance real estate. CenterPoint Energy and CERC elected to apply the practical expedient upon adoption to only evaluate transactions that were not determined to be complete as of the date of adoption. Subsequent to adoption, gains or losses on sales or dilution events in CenterPoint Energy's investment in Enable may result in gains or losses recognized in earnings. See Note 9 for further discussion.
ASU 2016-01-Financial Instruments-Overall	This standard requires equity investments that do not result in	January 1, 2018	The adoption of this standard did not have an impact on the

<p>(Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities</p>	<p>consolidation and are not accounted for under the equity method to be measured at fair value and to recognize any changes in fair value in net income unless the investments qualify for the new practicability exception. It does not change the guidance for classifying and measuring investments in debt securities and loans. It also changes certain disclosure requirements and other aspects related to recognition and measurement of financial assets and financial liabilities. Transition method: cumulative-effect adjustment to beginning retained earnings, and two features prospective</p>	<p>Registrants' financial position, results of operations or cash flows. The Registrants elected the practicability exception for investments without a readily determinable fair value to be measured at cost. This includes the Enable Series A Preferred Units owned by CenterPoint Energy, which were previously accounted for under the cost method. See Note 9 for further discussion.</p>
<p>ASU 2018-03-Technical Corrections and Improvements to Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities</p>	<p>This standard provides clarifying guidance on the classification of certain cash receipts and payments in the statement of cash flows and eliminates the variation in practice related to such classifications. Transition method: retrospective</p>	<p>The adoption did not have a material impact on the Registrants' financial position, results of operations or disclosures. However, CenterPoint Energy's and Houston Electric's Condensed Statements of Consolidated Cash Flows reflect an increase in investing activities and a corresponding decrease in operating activities of \$1 million and \$3 million for the nine months ended September 30, 2018 and 2017, respectively, due to the requirement that cash proceeds from COLI policies be classified as cash inflows from investing activity.</p>
<p>ASU 2016-15- Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments</p>	<p>This standard provides clarifying guidance on the classification of certain cash receipts and payments in the statement of cash flows and eliminates the variation in practice related to such classifications. Transition method: retrospective</p>	<p>January 1, 2018</p>

Table of Contents

Recently Adopted Accounting Standards

ASU Number and Name	Description	Date of Adoption	Financial Statement Impact upon Adoption
ASU 2016-18- Statement of Cash Flows (Topic 230): Restricted Cash	<p>This standard requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, restricted cash and restricted cash equivalents. As a result, the statement of cash flows will no longer present transfers between cash and cash equivalents and restricted cash and restricted cash equivalents. When cash, cash equivalents, restricted cash and restricted cash equivalents are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet.</p> <p>Transition method: retrospective</p>	January 1, 2018	<p>The adoption of this standard did not have an impact on the Registrants' financial position, results of operations or disclosures. However, CenterPoint Energy's and Houston Electric's Condensed Statements of Consolidated Cash Flows are reconciled to cash, cash equivalents and restricted cash, resulting in a decrease in investing activities of \$2 million and an increase in investing activities of \$8 million for the nine months ended September 30, 2018 and 2017, respectively. See Note 17 for further discussion.</p>
ASU 2017-01- Business Combinations (Topic 805): Clarifying the Definition of a Business	<p>This standard revises the definition of a business. If substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets, then under ASU 2017-01, the asset or group of assets is not a business. The guidance also requires a business to include at least one substantive process and narrows the definition of outputs to be more closely aligned with how outputs are described in ASC 606.</p> <p>Transition method: prospective</p>	January 1, 2018	<p>The adoption of this revised definition will reduce the number of transactions that are accounted for as a business combination, and therefore may have a potential impact on the Registrants' accounting for future acquisitions.</p>
ASU 2017-04- Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	<p>This standard eliminates Step 2 of the goodwill impairment test, which required a hypothetical purchase price allocation. A goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill.</p> <p>Transition method: prospective</p>	January 1, 2018	<p>The adoption of this standard will have an impact on CenterPoint Energy's and CERC's future calculation of goodwill impairments if an impairment is identified.</p>
ASU 2017-07- Compensation-Retirement Benefits (Topic 715):	<p>This standard requires an employer to report the service cost component of the net periodic pension cost and</p>	January 1, 2018	<p>The adoption of this standard did not have a material impact on the Registrants'</p>

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

<p>Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost</p>	<p>postretirement benefit cost in the same line item(s) as other employee compensation costs arising from services rendered during the period; all other components will be presented separately from the line item(s) that includes the service cost and outside of any subtotal of operating income. In addition, only the service cost component will be eligible for capitalization in assets. Transition method: retrospective for the presentation of the service cost component and other components; prospective for the capitalization of the service cost component This standard clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as a modification. Entities will apply the modification accounting guidance if the value, vesting conditions or classification of the award changes. Transition method: prospective</p>	<p>January 1, 2018</p>	<p>financial position, results of operations, cash flows or disclosures; however, it resulted in the increases to operating income and corresponding decreases to other income reported in the table below. Other components previously capitalized in assets will be recorded as regulatory assets in the Registrants' rate-regulated businesses, prospectively.</p> <p>The adoption of this standard will have an impact on CenterPoint Energy's accounting for future changes to share-based payment awards.</p>
<p>ASU 2017-09- Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting</p>	<p>This standard expands an entity's ability to hedge and account for risk components, reduces the complexity of applying certain aspects of hedge accounting and updates the presentation and disclosure requirements. The guidance eliminates the requirement to separately measure and report hedge ineffectiveness. Transition method: cumulative-effect adjustment for elimination of the separate measurement of ineffectiveness; prospective for presentation and disclosure</p>	<p>July 1, 2018 Applicable January 1, 2018</p>	<p>The adoption of this standard did not have a material impact on the Registrants' financial position, results of operations or cash flows. As a result of the adoption, the Registrants will no longer recognize ineffectiveness for derivatives designated as cash flow hedges; all changes in fair value will flow through other comprehensive income. As the Registrants did not have existing cash flow hedges as of the initial application date and the adoption date, no cumulative effective adjustment was recorded. Note 7 reflects disclosures modified upon adoption.</p>
<p>ASU 2017-12- Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities</p>	<p>This standard eliminates, modifies and adds certain disclosure requirements for fair value measurements. Transition method: prospective for</p>	<p>Adoption of eliminations and modifications as of September 30, 2018; Additions</p>	<p>The adoption of this standard did not impact the Registrants' financial position, results of operations or cash flows. Note 8 reflects the disclosures</p>
<p>ASU 2018-13- Fair Value Measurement (Topic 820): Disclosure Framework-Changes to the Disclosure Requirements for</p>	<p>This standard eliminates, modifies and adds certain disclosure requirements for fair value measurements. Transition method: prospective for</p>	<p>Adoption of eliminations and modifications as of September 30, 2018; Additions</p>	<p>The adoption of this standard did not impact the Registrants' financial position, results of operations or cash flows. Note 8 reflects the disclosures</p>

Fair Value Measurement	additions and one modification and retrospective for all other amendments	will be adopted January 1, 2020	modified upon adoption.

Issued, Not Yet Effective Accounting Standards

ASU Number and Name	Description	Date of Adoption	Financial Statement Impact upon Adoption
ASU 2016-02- Leases (Topic 842) and related amendments	ASU 2016-02 provides a comprehensive new lease model that requires lessees to recognize assets and liabilities for most leases and would change certain aspects of lessor accounting.	January 1, 2019 Early adoption is permitted	The Registrants will elect the practical expedient on existing easements provided by ASU 2018-01, and the transition option to not apply the new lease standards in the comparative financial statements presented in the year of adoption provided by ASU 2018-11. The Registrants are evaluating other available transitional practical expedients. The Registrants are in the process of reviewing contracts to identify leases as defined in ASU 2016-02 and expect to recognize on the statements of financial position right-of-use assets and lease liabilities for the majority of their respective leases that are currently classified as operating leases. The Registrants are continuing to assess the impact that adoption of these standards will have on their financial position, results of operations, cash flows and disclosures.
ASU 2018-01- Leases (Topic 842) Land Easement Practical Expedient for Transition to Topic 842	Transition method: modified retrospective ASU 2018-01 allows entities to elect not to assess whether existing land easements that were not previously accounted for in accordance with ASC 840 Leases under ASC 842 Leases when transitioning to the new leasing standard.		
ASU 2018-10 - Codification Improvements to Topic 842, Leases	ASU 2018-10 makes sixteen narrow-scope amendments to ASC 842 Leases.		
ASU 2018-11- Leases (Topic 842)-Targeted Improvements	ASU 2018-11 allows entities the transition option to not apply the new lease standards in the comparative financial		

statements presented in the year of adoption. It also gives lessors the practical expedient to not separate non-lease and lease components when certain criteria are met.

This standard requires a new model called CECL to estimate credit losses for (1) financial assets subject to credit losses and measured at amortized cost and (2) certain off-balance sheet credit exposures. Upon initial recognition of the exposure, the CECL model requires an entity to estimate the credit losses expected over the life of an exposure based on historical information, current information and reasonable and supportable forecasts, including estimates of prepayments.

Transition method: modified retrospective

This standard allows a reclassification from

accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the TCJA and requires entities to provide certain disclosures regarding stranded tax effects.

Transition method: either in the period of adoption or retrospective

January 1, 2020

Early adoption is permitted starting

January 1, 2019

The Registrants are currently assessing the impact that this standard will have on their financial position, results of operations, cash flows and disclosures.

ASU 2016-13- Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments

ASU 2018-02-Income Statement-Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income

January 1, 2019

Early adoption is permitted

The adoption of this standard will allow the Registrants to reclass stranded deferred tax adjustments primarily related to benefit plans from other comprehensive income to retained earnings. The Registrants are currently assessing the impact that adoption of this standard will have on their financial position and disclosures.

Table of Contents

Issued, Not Yet Effective Accounting Standards

ASU Number and Name	Description	Date of Adoption	Financial Statement Impact upon Adoption
ASU 2018-14-Compensation-Retirement Benefits-Defined Benefit Plans-General (Subtopic 715-20): Disclosure Framework-Changes to the Disclosure Requirements for Defined Benefit Plans	This standard eliminates, modifies and adds certain disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. Transition method: retrospective	January 1, 2021 Early adoption is permitted	The adoption of this standard will impact the Registrants' annual disclosures and is not expected to have an impact on their financial position, results of operations, and cash flows. The Registrants are currently assessing the standard's impact on the Stock-Based Incentive Compensation Plans and Employee Benefit Plans footnote.
ASU 2018-15- Intangibles-Goodwill and Other- Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract	This standard aligns accounting for implementation costs incurred in a cloud computing arrangement that is accounted for as a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The update also prescribes the balance sheet, income statement, and cash flow classification of the capitalized implementation costs and related amortization expense, and requires additional quantitative and qualitative disclosures. Transition method: retrospective or prospective	January 1, 2020 Early adoption is permitted	The adoption of this standard will allow the Registrants to capitalize certain implementation costs incurred in cloud computing arrangements that are accounted for as service contracts. The Registrants are currently assessing the impact that adoption of this standard will have on their financial position, results of operations, cash flows and disclosures.

Management believes that other recently adopted standards and recently issued standards that are not yet effective will not have a material impact on the Registrants' financial position, results of operations or cash flows upon adoption.

(3) Pending Merger with Vectren (CenterPoint Energy)

On April 21, 2018, CenterPoint Energy entered into the Merger Agreement. Under the terms of the Merger Agreement, CenterPoint Energy will acquire Vectren for approximately \$6 billion in cash. Upon closing, Vectren will become a wholly-owned subsidiary of CenterPoint Energy.

Pursuant to the Merger Agreement, upon the closing of the Merger, each share of Vectren common stock issued and outstanding immediately prior to the closing will be converted automatically into the right to receive \$72.00 in cash per share. During August and October 2018, CenterPoint Energy completed its permanent financing for the Merger through offerings of the Series A Preferred Stock, depositary shares, each representing a 1/20th interest in a share of

Series B Preferred Stock, Common Stock and unsecured senior notes. See Notes 12 and 19 for further details regarding the Merger financings. As of September 30, 2018, Vectren and its subsidiaries had outstanding \$325 million of short-term debt and \$2.0 billion of long-term debt, including current maturities. It is anticipated that Vectren and its subsidiaries will have approximately \$2.5 billion of outstanding short-term and long-term debt as of December 31, 2018.

Consummation of the Merger is conditioned upon approval by federal regulatory commissions, orders from state regulatory commissions, expiration or termination of the applicable HSR waiting period and approval of the Merger by Vectren shareholders. In June 2018, CenterPoint Energy and Vectren (i) submitted their filings with the FERC and the FCC, (ii) submitted their filings with the FTC pursuant to the HSR Act and (iii) initiated informational proceedings with regulators in Indiana and Ohio. On June 26, 2018, CenterPoint Energy and Vectren received notice from the FTC granting early termination of the waiting period under the HSR Act in connection with the Merger. On August 28, 2018, shareholders of Vectren, during a special shareholders' meeting, approved the Merger. The FCC granted approvals on July 20 and 24, 2018, and on October 5, 2018, the FERC authorized the Merger. A hearing before the Indiana Utility Regulatory Commission was held on October 17, 2018 with respect to the Merger. CenterPoint Energy has requested a final order for this proceeding by the end of January or early February 2019.

The Merger Agreement contains termination rights for both CenterPoint Energy and Vectren, and provides that, upon termination of the Merger Agreement under specified circumstances, CenterPoint Energy would be required to pay a termination fee of \$210 million to Vectren or Vectren would be required to pay CenterPoint Energy a termination fee of \$150 million.

Subject to receipt of required regulatory and statutory approvals and satisfaction and/or waiver of the closing conditions, CenterPoint Energy continues to anticipate closing the Merger in the first quarter of 2019.

(4) Revenue Recognition

The Registrants adopted ASC 606 and all related amendments on January 1, 2018 using the modified retrospective method for those contracts that were not completed as of the date of adoption. Application of the new revenue standard did not result in a cumulative effect adjustment to the opening balance of retained earnings. The comparative information has not been restated and

Table of Contents

continues to be reported under the accounting standards in effect for those periods. The adoption of the new standard did not have a material impact on the Registrants' financial position, results of operations or cash flows.

In accordance with ASC 606, revenue is recognized when a customer obtains control of promised goods or services. The amount of revenue recognized reflects the consideration to which the Registrants expect to be entitled to receive in exchange for these goods or services. Contract assets and liabilities are not material.

The following tables disaggregate revenues by reportable business segment and major source:

CenterPoint Energy

(1) Reflected in Utility revenues in the Condensed Statements of Consolidated Income.

(2) Reflected in Non-utility revenues in the Condensed Statements of Consolidated Income.

(3) Primarily consists of income from ARPs and leases. ARPs are contracts between the utility and its regulators, not between the utility and a customer. The Registrants recognize ARP revenue as other revenues when the regulator-specified conditions for recognition have been met. Upon recovery of ARP revenue through incorporation in rates charged for utility service to customers, ARP revenue is reversed and recorded as revenue from contracts with customers. The recognition of ARP revenues and the reversal of ARP revenues upon recovery through rates charged for utility service may not occur in the same period.

Revenues from Contracts with Customers

Electric Transmission & Distribution. Houston Electric distributes electricity to customers over time and customers consume the electricity when delivered. Revenue, consisting of both volumetric and fixed tariff rates set by the PUCT, is recognized as electricity is delivered and represents amounts both billed and unbilled. Discretionary services requested by customers are provided at a point in time with control transferring upon the completion of the service. Revenue for discretionary services is recognized upon completion of service based on the tariff rates set by the PUCT. Payments for electricity distribution and discretionary services are aggregated and received on a monthly basis. Houston Electric performs transmission services over time as a stand-ready obligation to provide a reliable network of transmission systems. Revenue is recognized upon time elapsed, and the monthly tariff rate set by the PUCT. Payments are received on a monthly basis.

Natural Gas Distribution. CERC distributes and transports natural gas to customers over time, and customers consume the natural gas when delivered. Revenue, consisting of both volumetric and fixed tariff rates set by the state governing agency for that service area, is recognized as natural gas is delivered and represents amounts both billed and unbilled. Discretionary services requested by the customer are satisfied at a point in time and revenue is recognized upon completion of service and the tariff rates set by the applicable state regulator. Payments of natural gas distribution, transportation and discretionary services are aggregated and received on a monthly basis.

Energy Services. The majority of CES natural gas sales contracts are considered a derivative, as the contracts typically have a stated minimum or contractual volume of delivery.

For contracts in which CES delivers the full requirement of the natural gas needed by the customer and a volume is not stated, a contract as defined under ASC 606 is created upon the customer's exercise of its option to take natural gas. CES supplies natural

Table of Contents

gas to retail customers over time as customers consume the natural gas when delivered. For wholesale customers, CES supplies natural gas at a point in time because the wholesale customer is presumed to have storage capabilities. Control is transferred to both types of customers upon delivery of natural gas. Revenue is recognized on a monthly basis based on the estimated volume of natural gas delivered and the price agreed upon with the customer. Payments are received on a monthly basis.

AMAs are natural gas sales contracts under which CES also assumes management of a customer's physical storage and/or transportation capacity. AMAs have two distinct performance obligations, which consist of natural gas sales and natural gas delivery because delivery could occur separate from the sale of natural gas (e.g., from storage to customer premises). Most AMAs' natural gas sales performance obligations are accounted for as embedded derivatives. The transaction price is allocated between the sale of natural gas and the delivery based on the stand-alone selling price as stated in the contract. CES performs natural gas delivery over time as customers take delivery of the natural gas and recognizes revenue on an aggregated monthly basis based on the volume of natural gas delivered and the fees stated within the contract. Payments are received on a monthly basis.

Practical Expedients and Exemption. Sales taxes and other similar taxes collected from customers are excluded from the transaction price.

(5) Employee Benefit Plans

The Registrants' net periodic cost, before considering amounts subject to overhead allocations for capital expenditure projects or for amounts subject to deferral for regulatory purposes, includes the following components relating to pension and postretirement benefits:

Pension Benefits (CenterPoint Energy)

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017

(6) Regulatory Accounting

The following is a list of regulatory assets and liabilities reflected on the Registrants' Condensed Consolidated Balance Sheets:

	September 30, 2018			December 31, 2017		
	CenterPoint Energy	Houston Electric	CERC	CenterPoint Energy	Houston Electric	CERC
Regulatory Assets:	(in millions)					
Current regulatory assets (1)	\$60	\$ —	\$60	\$130	\$ —	\$130
Non-current regulatory assets:						
Securitized regulatory assets	1,146	1,146	—	1,590	1,590	—
Unrecognized equity return (2)	(225)	(225)	—	(287)	(287)	—
Unamortized loss on reacquired debt	70	70	—	75	75	—
Pension and postretirement-related regulatory asset (3)	609	32	15	646	31	20
Hurricane Harvey restoration costs (4)	67	61	6	64	58	6
Regulatory assets related to TCJA (5)	48	34	14	48	33	15
Other long-term regulatory assets (6)	219	84	135	211	70	140
Total non-current regulatory assets	1,934	1,202	170	2,347	1,570	181
Total regulatory assets	1,994	1,202	230	2,477	1,570	311
Regulatory Liabilities:						
Current regulatory liabilities (7)	47	22	25	24	22	2
Non-current regulatory liabilities:						
Regulatory liabilities related to TCJA (5)	1,362	858	504	1,354	862	492
Estimated removal costs	887	275	612	878	285	593
Other long-term regulatory liabilities	257	132	125	232	116	116
Total non-current regulatory liabilities	2,506	1,265	1,241	2,464	1,263	1,201
Total regulatory liabilities	2,553	1,287	1,266	2,488	1,285	1,203
Total regulatory assets and liabilities, net	\$(559)	\$(85)	\$(1,036)	\$(11)	\$285	\$(892)

(1) Current regulatory assets are included in Prepaid expenses and other current assets in the Registrants' Condensed Consolidated Balance Sheets.

(2) The unrecognized equity return will be recognized as it is recovered in rates through 2024. During the three months ended September 30, 2018 and 2017, CenterPoint Energy and Houston Electric recognized approximately \$17 million and \$13 million, respectively, of the allowed equity return. During the nine months ended September 30, 2018 and 2017, CenterPoint Energy and Houston Electric recognized approximately \$62 million and \$30 million, respectively, of the allowed equity return. The timing of CenterPoint Energy's and Houston Electric's recognition of the equity return will vary each period based on amounts actually collected during the period. The actual amounts recognized are adjusted at least annually to correct any over-collections or under-collections during the preceding 12 months.

(3) Includes a portion of NGD's actuarially determined pension and other postemployment expense in excess of the amount being recovered through rates that is being deferred for rate making purposes, of which \$4 million and \$7 million as of September 30, 2018 and December 31, 2017, respectively, were not earning a return.

(4) The Registrants are not earning a return on Hurricane Harvey restoration costs.

(5) The EDIT and deferred revenues will be recovered or refunded to customers as required by tax and regulatory authorities.

- (6) Other long-term regulatory assets that are not earning a return were not material as of September 30, 2018 and December 31, 2017.
- (7) Current regulatory liabilities are included in Other current liabilities in each of the Registrants' respective Condensed Consolidated Balance Sheets.

Table of Contents

(7) Derivative Instruments

The Registrants are exposed to various market risks. These risks arise from transactions entered into in the normal course of business. The Registrants utilize derivative instruments such as physical forward contracts, swaps and options to mitigate the impact of changes in commodity prices, weather and interest rates on its operating results and cash flows. Such derivatives are recognized in the Registrants' Condensed Consolidated Balance Sheets at their fair value unless the Registrants elect the normal purchase and sales exemption for qualified physical transactions. A derivative may be designated as a normal purchase or normal sale if the intent is to physically receive or deliver the product for use or sale in the normal course of business.

CenterPoint Energy has a Risk Oversight Committee composed of corporate and business segment officers that oversees commodity price, weather and credit risk activities, including the Registrants' marketing, risk management services and hedging activities. The committee's duties are to establish the Registrants' commodity risk policies, allocate board-approved commercial risk limits, approve the use of new products and commodities, monitor positions and ensure compliance with the Registrants' commercial risk management policy and procedures and limits established by CenterPoint Energy's Board of Directors.

The Registrants' policies prohibit the use of leveraged financial instruments. A leveraged financial instrument, for this purpose, is a transaction involving a derivative whose financial impact will be based on an amount other than the notional amount or volume of the instrument.

(a) Non-Trading Activities

Commodity Derivative Instruments. CenterPoint Energy and CERC, through CES, enter into certain derivative instruments to mitigate the effects of commodity price movements. Certain financial instruments used to hedge portions of the natural gas inventory of the Energy Services business segment are designated as fair value hedges for accounting purposes. All other financial instruments do not qualify or are not designated as cash flow or fair value hedges.

Weather Hedges. CenterPoint Energy and CERC have weather normalization or other rate mechanisms that mitigate the impact of weather on NGD in Arkansas, Louisiana, Mississippi, Minnesota and Oklahoma. NGD and electric operations in Texas do not have such mechanisms, although fixed customer charges are historically higher in Texas for NGD compared to its other jurisdictions. As a result, fluctuations from normal weather may have a positive or negative effect on NGD's results in Texas and on electric operations' results in its service territory.

CenterPoint Energy and CERC, as applicable, enter into winter season weather hedges from time to time for certain NGD jurisdictions and electric operations' service territory to mitigate the effect of fluctuations from normal weather on results of operations and cash flows. These weather hedges are based on heating degree days at 10-year normal weather. Houston Electric does not enter into weather hedges.

The table below summarizes CenterPoint Energy's and CERC's current weather hedge gain (loss) activity:

		Three Months Ended September 30,	Nine Months Ended September 30,		
Jurisdiction	Winter Season	Bilateral Cap	2018	2017	2018 2017
					(in millions)

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

Certain NGD jurisdictions	2018 – 2019	\$9	\$ —	\$ —	\$ —
Certain NGD jurisdictions	2017 – 2018	8	—	—	—
Total CERC (1)		—	—	—	—
Electric operations' service territory	2018 – 2019	8	—	—	—
Electric operations' service territory	2017 – 2018	9	—	(4)	—
Electric operations' service territory	2016 – 2017	9	—	—	1
Total CenterPoint Energy (1)		\$ —	\$ —	—\$ (4)	\$ 1

(1) Weather hedge gains (losses) are recorded in Revenues in the Condensed Statements of Consolidated Income.

Cash Flow Hedging of Interest Expense. From time to time, the Registrants enter into forward interest rate agreements with certain counterparties designated as cash flow hedges. The objective of these cash flow hedges is to reduce exposure to variability in cash flows related to interest payments on anticipated future fixed rate debt offerings or other exposure to variable rate debt. In October 2018, Houston Electric entered into an additional \$100 million of notional amount on forward interest rate agreements

Table of Contents

classified as cash flow hedges. As of September 30, 2018 and December 31, 2017, the total outstanding notional amount of Houston Electric's forward interest rate agreements related to cash flow hedges was \$100 million and \$-0-, respectively. The maximum length of time over which Houston Electric is exposed to the variability in future cash flows of the forecasted debt offerings is less than 12 months.

Economic Hedging of Interest Rate Risk. From time to time, the Registrants may enter into forward interest rate agreements with certain counterparties designated as economic hedges. The objective of these economic hedges is to offset any interest rate risk borne by one or more of the Registrants in connection with an anticipated future fixed rate debt offering or other exposure to variable rate debt. As of September 30, 2018 and December 31, 2017, the total outstanding notional amount of CenterPoint Energy's forward interest rate agreements related to economic hedges in connection with the permanent financing for the Merger was \$200 million and \$-0-, respectively. As of September 30, 2018 and December 31, 2017, the fair value of interest rate derivatives was less than \$1 million and therefore was not included in the tabular presentation below.

(b) Derivative Fair Values and Income Statement Impacts

The following tables present information about derivative instruments and hedging activities. The first two tables provide a balance sheet overview of Derivative Assets and Liabilities, while the last table provides a breakdown of the related income statement impacts.

Fair Value of Derivative Instruments and Hedged Items

Balance Sheet Location	September 30, 2018		December 31, 2017	
	Derivative Assets Fair Value (in millions)	Derivative Liabilities Fair Value (in millions)	Derivative Assets Fair Value (in millions)	Derivative Liabilities Fair Value (in millions)
Derivatives designated as cash flow hedges:				
Interest rate derivatives	\$3	\$ —	\$ —	\$ —
Total Houston Electric	3	—	—	—
Derivatives designated as fair value hedges:				
Natural gas derivatives (1) (2) (3)	—	2	13	1
Derivatives not designated as hedging instruments:				
Natural gas derivatives (1) (2) (3)	76	3	114	4
Natural gas derivatives (1) (2) (3)	38	—	44	—
Natural gas derivatives (1) (2) (3)	31	72	38	78
Natural gas derivatives (1) (2) (3)	16	33	9	24
Total CERC	161	110	218	107
Indexed debt securities derivative	—	685	—	668
Total CenterPoint Energy	\$164	\$ 795	\$ 218	\$ 775

(1) The fair value shown for natural gas contracts is comprised of derivative gross volumes totaling 1,865 Bcf or a net 310 Bcf long position and 1,795 Bcf or a net 224 Bcf long position as of September 30, 2018 and December 31,

2017, respectively. Certain natural gas contracts hedge basis risk only and lack a fixed price exposure.

Natural gas contracts are presented on a net basis in the Condensed Consolidated Balance Sheets as they are subject to master netting arrangements. This netting applies to all undisputed amounts due or past due and causes derivative assets (liabilities) to be ultimately presented net in a liability (asset) account within the Condensed Consolidated Balance Sheets. The net of total non-trading natural gas derivative assets and liabilities was a \$72 million asset and a \$130 million asset as of September 30, 2018 and December 31, 2017, respectively, as shown on CenterPoint Energy's and CERC's Condensed Consolidated Balance Sheets (and as detailed in the Offsetting of Natural Gas Derivative Assets and Liabilities table below), and was comprised of the natural gas contracts derivative assets and liabilities separately shown above, impacted by collateral netting of \$21 million and \$19 million, respectively.

(3) Derivative Assets and Derivative Liabilities include no material amounts related to physical forward transactions with Enable.

Table of Contents

Cumulative Basis Adjustment for Fair Value Hedges (CenterPoint Energy and CERC)

Balance Sheet Location	September 30, 2018		December 31, 2017	
	Cumulative Amount of Fair Value Carrying Amount of Hedged Item	Hedging Adjustment Included in the Assets/(Liabilities)	Carrying Amount of Hedged Item	Cumulative Amount of Fair Value Hedging Adjustment Included in the Assets/(Liabilities)
Hedged items in fair value hedge relationship:	(in millions)

Offsetting of Natural Gas Derivative Assets and Liabilities (CenterPoint Energy and CERC)

	September 30, 2018			December 31, 2017		
	Gross Amounts Recognized (1)	Offset in the Consolidated Balance Sheets	Net Amount Presented in the Consolidated Balance Sheets (2)	Gross Amounts Recognized (1)	Offset in the Consolidated Balance Sheets	Net Amount Presented in the Consolidated Balance Sheets (2)
	(in millions)					
Current Assets: Non-trading derivative assets	\$ 107	\$ (34)	\$ 73	\$ 165	\$ (55)	\$ 110
Other Assets: Non-trading derivative assets	54	(16)	38	53	(9)	44
Current Liabilities: Non-trading derivative liabilities	(77)	44	(33)	(83)	63	(20)
Other Liabilities: Non-trading derivative liabilities	(33)	27	(6)	(24)	20	(4)
Total	\$ 51	\$ 21	\$ 72	\$ 111	\$ 19	\$ 130

(1) Gross amounts recognized include some derivative assets and liabilities that are not subject to master netting arrangements.

(2) The derivative assets and liabilities on the Condensed Consolidated Balance Sheets exclude accounts receivable or accounts payable that, should they exist, could be used as offsets to these balances in the event of a default.

Income Statement Impact of Hedge Accounting Activity (CenterPoint Energy and CERC)

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	2018	2017	2018	2017

	Location and Amount of Gain (Loss) recognized in Income on Hedging Relationship (2)			
	Non-utility natural gas expense (in millions)	Non-utility natural gas expense		
Total amounts presented in the statements of income in which the effects of hedges are recorded	\$864	\$832	\$2,927	\$2,843
Gain (loss) on fair value hedging relationships:				
Commodity contracts:				
Hedged items - Natural gas inventory	1	4	(13)	(10)
Derivatives designated as hedging instruments	(1)	(4)	13	10
Amounts excluded from effectiveness testing recognized in earnings immediately (1)	6	(9)	(73)	(93)

As a result of the adoption of ASU 2017-12 effective January 1, 2018 (see Note 2 for additional information), CenterPoint Energy and CERC exclude from their assessment of hedge effectiveness the natural gas market price difference between locations of the hedged inventory and the delivery location specified in the hedge instruments. (1) Prior to the adoption of this accounting guidance, the timing difference between the spot price and the futures price, as well as the difference between the timing of the settlement of the futures and the valuation of the underlying physical commodity, was excluded from the assessment of effectiveness for CenterPoint Energy's and CERC's existing fair value hedges and will continue to be excluded from the assessment of hedge effectiveness. CenterPoint Energy and CERC elected to continue to

Table of Contents

immediately recognize amounts excluded from hedge effectiveness in their respective Condensed Statements of Consolidated Income.

Income statement impact associated with cash flow hedge activity is related to gains and losses reclassified from (2) accumulated other comprehensive income into income. Amounts are immaterial for the Registrants for both the three and nine months ended September 30, 2018 and 2017, respectively.

		Three Months Ended September 30,		Nine Months Ended September 30,	
		2018	2017	2018	2017
Income Statement Location		(in millions)			
Effects of derivatives not designated as hedging instruments on the income statement:					
Commodity contracts	Gains (Losses) in Non-utility revenues	\$2	\$30	\$70	\$162
Total CERC		2	30	70	162
Indexed debt securities derivative	Gains (Losses) in Other Income (Expense)	(44)	(36)	(316)	(59)
Interest rate derivatives	Gains (Losses) in Interest and other finance charges	—	—	—	—
Total CenterPoint Energy		\$(42)	\$(6)	\$(246)	\$103

Effect of Cash Flow Hedge Accounting on Accumulated Other Comprehensive Income

		Amount of Gain (Loss) Recognized in Other Comprehensive Income, Net of Tax on Derivative	
		Three Months Ended September 30,	Nine Months Ended September 30,
		2018	2017
(in millions)			
Effects of cash flow hedging			
Interest rate derivatives (1)	\$3	\$—	\$7
Total Houston Electric	3	—	7
Interest rate derivatives (1)	—	(1)	—
Total CERC	—	(1)	—
Interest rate derivatives (1)	—	(1)	(1)
Total CenterPoint Energy	\$3	\$(2)	\$6

Gains and losses are reclassified from accumulated other comprehensive income into income when the hedged transactions affect earnings. The reclassification amounts are included in Interest and other finance charges in the (1) Condensed Statements of Consolidated Income. Amounts are less than \$1 million for each of the three and nine months ended September 30, 2018 and 2017. Over the next twelve months, estimated amortization of accumulated other comprehensive income into related income is expected to be immaterial.

(c) Credit Risk Contingent Features

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

CenterPoint Energy and CERC enter into financial derivative contracts containing material adverse change provisions. These provisions could require CenterPoint Energy or CERC to post additional collateral if the S&P or Moody's credit ratings of CenterPoint Energy, Inc. or its subsidiaries, including CERC Corp., are downgraded.

Table of Contents

(8) Fair Value Measurements

Assets and liabilities that are recorded at fair value in the Registrants' Condensed Consolidated Balance Sheets are categorized based upon the level of judgment associated with the inputs used to measure their value. Hierarchical levels, as defined below and directly related to the amount of subjectivity associated with the inputs to fair valuations of these assets and liabilities, are as follows:

Level 1: Inputs are unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date. The types of assets carried at Level 1 fair value generally are exchange-traded derivatives and equity securities, as well as natural gas inventory that has been designated as the hedged item in a fair value hedge.

Level 2: Inputs, other than quoted prices included in Level 1, are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar instruments in active markets, and inputs other than quoted prices that are observable for the asset or liability. Fair value assets and liabilities that are generally included in this category are derivatives with fair values based on inputs from actively quoted markets. A market approach is utilized to value the Registrants' Level 2 natural gas derivative assets or liabilities. CenterPoint Energy's Level 2 indexed debt securities derivative is valued using an option model and a discounted cash flow model, which uses projected dividends on the ZENS-Related Securities and a discount rate as observable inputs.

Level 3: Inputs are unobservable for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. Unobservable inputs reflect the Registrants' judgments about the assumptions market participants would use in pricing the asset or liability since limited market data exists. The Registrants develop these inputs based on the best information available, including the Registrants' own data. A market approach is utilized to value the Registrants' Level 3 assets or liabilities. As of September 30, 2018, CenterPoint Energy's and CERC's Level 3 assets and liabilities are comprised of physical natural gas forward contracts and options. Level 3 physical natural gas forward contracts and options include illiquid forward price curve locations (ranging from \$1.28 to \$6.88 per MMBtu) as an unobservable input. CenterPoint Energy's and CERC's Level 3 physical natural gas forward contracts and options derivative assets and liabilities consist of both long and short positions (forwards and options). Forward price decreases (increases) as of September 30, 2018 would have resulted in lower (higher) values, respectively, for long forwards and options and higher (lower) values, respectively, for short forwards and options.

The Registrants determine the appropriate level for each financial asset and liability on a quarterly basis. The Registrants also recognize purchases of Level 3 financial assets and liabilities at their fair market value at the end of the reporting period.

The following tables present information about the Registrants' assets and liabilities (including derivatives that are presented net) measured at fair value on a recurring basis and indicate the fair value hierarchy of the valuation techniques utilized by the Registrants to determine such fair value.

The amount of total gains (losses) for the period included in earnings attributable to the change in unrealized gains or losses relating to assets still held at the reporting date:

\$11 \$ 11 \$(36) \$ — \$9 \$ 9 \$(42) \$ 17

- (1) As of September 30, 2018, CenterPoint Energy transferred its indexed debt securities derivative from Level 3 to Level 2 to reflect changes in the significance of the unobservable inputs used in the valuation.
- (2) CenterPoint Energy and CERC did not have significant Level 3 sales or purchases during either of the three or nine months ended September 30, 2018 or 2017.

Table of Contents

Estimated Fair Value of Financial Instruments

The fair values of cash and cash equivalents, investments in debt and equity securities classified as “trading” and short-term borrowings are estimated to be approximately equivalent to carrying amounts and have been excluded from the table below. The carrying amounts of non-trading derivative assets and liabilities and CenterPoint Energy’s ZENS indexed debt securities derivative are stated at fair value and are excluded from the table below. The fair value of each debt instrument is determined by multiplying the principal amount of each debt instrument by a combination of historical trading prices and comparable issue data. These liabilities, which are not measured at fair value in the Registrants’ Condensed Consolidated Balance Sheets, but for which the fair value is disclosed, would be classified as Level 2 in the fair value hierarchy.

	September 30, 2018		December 31, 2017			
	CenterPoint Energy		CenterPoint Energy			
	Electric	CERC	Electric	CERC		
	(1)	(1)	(1)	(1)		
Long-term debt, including current maturities	(in millions)					
Carrying amount	\$7,758	\$4,782	\$2,257	\$8,679	\$4,753	\$2,457
Fair value	7,888	4,813	2,367	9,220	5,034	2,708

(1) Includes Securitization Bond debt.

(9) Unconsolidated Affiliate (CenterPoint Energy and CERC)

CenterPoint Energy has the ability to significantly influence the operating and financial policies of Enable, a publicly traded MLP, and, accordingly, account for the investment in Enable’s common units using the equity method of accounting. Upon the adoption of ASU 2014-09 and ASU 2017-05 on January 1, 2018, CenterPoint Energy evaluated transactions in the investment in Enable that occurred prior to January 1, 2018 (the effective date) and concluded a cumulative effect adjustment to the opening balance of retained earnings was not required. See Note 2 for further discussion.

CenterPoint Energy’s maximum exposure to loss related to Enable, a VIE in which CenterPoint Energy is not the primary beneficiary, is limited to the equity investment, the Series A Preferred Unit investment and outstanding current accounts receivable from Enable.

On September 4, 2018, CERC completed the Internal Spin of its equity investment in Enable and Enable GP. The Internal Spin has been accounted for under the guidance for transactions between entities under common control. As of September 4, 2018, CERC derecognized its investment in Enable at carrying value on the date of distribution of \$2.4 billion, net of deferred income taxes of \$974 million, and CNP Midstream recorded the net asset contribution from CERC at CERC’s carrying value. Neither CERC nor CNP Midstream recognized a gain or loss upon the distribution or contribution, respectively, of net assets involved in the Internal Spin. In connection with the Internal Spin, CenterPoint Energy, through Utility Holding, made a \$600 million capital contribution to CERC, which was used by CERC to repay outstanding indebtedness that historically supported CERC’s legacy midstream assets. See Note 18 for further discussion.

Limited Partner Interest and Units Held in Enable (CenterPoint Energy):

September 30, 2018		
Limited Partner Interest	Common Units	Enable Series A Preferred

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

	(1)		Units (2)
CenterPoint Energy (3)	54.0 %	233,856,623	14,520,000
OGE	25.6 %	110,982,805	—
Public unitholders	20.4 %	88,376,728	—
Total units outstanding	100.0 %	433,216,156	14,520,000

(1) Excludes the Enable Series A Preferred Units owned by CenterPoint Energy.

(2) The carrying amount of the Enable Series A Preferred Units, reflected as Preferred units - unconsolidated affiliate on CenterPoint Energy's Condensed Consolidated Balance Sheets, was \$363 million as of both September 30, 2018 and December 31, 2017. No impairment charges or adjustment due to observable price changes were made during the current or prior reporting periods. See Note 2 for further discussion.

Table of Contents

(3) Includes Enable Series A Preferred Units held directly by CenterPoint Energy and common units held indirectly through CNP Midstream.

Generally, sales to any person or entity (including a series of sales to the same person or entity) of more than 5% of the aggregate of the common units CNP Midstream owns in Enable or sales to any person or entity (including a series of sales to the same person or entity) by OGE of more than 5% of the aggregate of the common units it owns in Enable are subject to mutual rights of first offer and first refusal set forth in Enable's Agreement of Limited Partnership.

Interests Held in Enable GP (CenterPoint Energy):

	September 30, 2018		
	Management Incentive Rights Distribution		
	(1)	Rights (2)	
CenterPoint Energy (3)	50 %	40 %	
OGE	50 %	60 %	

Enable is controlled jointly by CenterPoint Energy and OGE. Sale of CenterPoint Energy's or OGE's ownership (1) interests in Enable GP to a third party is subject to mutual rights of first offer and first refusal, and CenterPoint Energy is not permitted to dispose of less than all of its interest in Enable GP.

Enable is expected to pay a minimum quarterly distribution of \$0.2875 per common unit on its outstanding common units to the extent it has sufficient cash from operations after establishment of cash reserves and payment of fees and expenses, including payments to Enable GP and its affiliates, within 60 days after the end of each quarter. If cash distributions to Enable's unitholders exceed \$0.330625 per common unit in any quarter, Enable GP (2) will receive increasing percentages or incentive distributions rights, up to 50%, of the cash Enable distributes in excess of that amount. In certain circumstances Enable GP will have the right to reset the minimum quarterly distribution and the target distribution levels at which the incentive distributions receive increasing percentages to higher levels based on Enable's cash distributions at the time of the exercise of this reset election. To date, no incentive distributions have been made.

(3) Includes interests held through CNP Midstream.

Distributions Received from Enable (CenterPoint Energy and CERC):

	Three		Nine	
	Months		Months	
	Ended		Ended	
	September		September	
	30,		30,	
	2018	2017	2018	2017

Investment in Enable common units (1)	\$74	\$74	\$223	\$223
Total CERC (2)	74	74	223	223
Investment in Enable Series A Preferred Units (3)	9	9	27	27
Total CenterPoint Energy	\$83	\$83	\$250	\$250

(1) Reflects cash distributions of \$0.318 and \$0.954 per common unit for the three and nine months ended September 30, 2018 and 2017, respectively.

- (2) On September 4, 2018, CERC completed the Internal Spin. After such date, CNP Midstream owned the Enable common units previously owned by CERC.
- (3) Reflects cash distributions of \$0.625 and \$1.875 per Enable Series A Preferred Unit for the three and nine months ended September 30, 2018 and 2017, respectively.

Table of Contents

Transactions with Enable (CenterPoint Energy and CERC):

	Three Months Ended September 30, 2018	Nine Months Ended September 30, 2017	2018	2017
	(in millions)			
Reimbursement of transition services (1) (CenterPoint Energy)	\$1	\$	-\$ 4	\$ 3
Natural gas expenses, including transportation and storage costs (CenterPoint Energy and CERC)	23	23	89	80

(1) Represents amounts billed under the Transition Agreements for certain support services provided to Enable. Actual transition services costs are recorded net of reimbursement.

	September 30, 2018	December 31, 2017
	(in millions)	
Accounts receivable for amounts billed for transition services (CenterPoint Energy)	\$ 3	\$ 1
Accounts payable for natural gas purchases from Enable (CenterPoint Energy and CERC)	8	13

Summarized unaudited consolidated income information for Enable is as follows:

	Three Months Ended September 30, 2018	2017	Nine Months Ended September 30, 2018	2017
	(in millions)			
Operating revenues	\$928	\$705	\$2,481	\$1,997

Table of Contents

Discontinued Operations (CERC):

The Internal Spin represents a significant strategic shift that has a material effect on CERC's operations and financial results and, as a result, CERC's distribution of its equity investment in Enable met the criteria for discontinued operations classification. CERC has no continuing involvement in the equity investment of Enable. Therefore, CERC's equity in earnings and related income taxes have been classified as Income from discontinued operations, net of tax, in CERC's Condensed Statements of Consolidated Income for the periods presented. CERC's equity method investment and related deferred income tax liabilities have been classified as Investment in unconsolidated affiliate - discontinued operations and Deferred income taxes, net - discontinued operations, respectively, in CERC's Condensed Consolidated Balance Sheets for the periods presented. The following table presents amounts included in Income from discontinued operations, net of tax in CERC's Condensed Statements of Consolidated Income.

	Three Months Ended September 30, 2018	Nine Months Ended September 30, 2017	2018	2017
	(in millions)			
Equity in earnings of unconsolidated affiliate, net	\$57	\$68	\$184	\$199
Income tax expense	13	26	44	75
Income from discontinued operations, net of tax	\$44	\$42	\$140	\$124

(10) Goodwill and Other Intangibles (CenterPoint Energy and CERC)

CenterPoint Energy's and CERC's goodwill by reportable business segment as of both September 30, 2018 and December 31, 2017 is as follows:

	(in millions)
Natural Gas Distribution	\$ 746
Energy Services (1)	110
Other Operations	11
Total	\$ 867

(1) Amount presented is net of the accumulated goodwill impairment charge of \$252 million recorded in 2012.

CenterPoint Energy and CERC perform goodwill impairment tests at least annually and evaluate goodwill when events or changes in circumstances indicate that its carrying value may not be recoverable. The impairment evaluation for goodwill is performed by comparing the fair value of each reporting unit with the carrying amount of the reporting unit, including goodwill. The estimated fair value of the reporting unit is primarily determined on the basis of discounted cash flows. If the carrying amount is in excess of the estimated fair value of the reporting unit, then the excess amount is the impairment charge that should be recorded, not to exceed the carrying amount of goodwill. See Note 2 for further discussion.

CenterPoint Energy and CERC performed the annual goodwill impairment test in the third quarter of 2018 and determined that no goodwill impairment charge was required for any reporting unit, which approximate the reportable segments.

The tables below present information on CenterPoint Energy's and CERC's other intangible assets recorded in Other non-current assets on the Condensed Consolidated Balance Sheets.

(11) Indexed Debt Securities (ZENS) and Securities Related to ZENS (CenterPoint Energy)

(a) Investment in Securities Related to ZENS

In 1995, CenterPoint Energy sold a cable television subsidiary to TW and received certain TW securities as partial consideration. A subsidiary of CenterPoint Energy holds shares of certain securities detailed in the table below, which are classified as trading securities and are expected to be held to facilitate CenterPoint Energy's ability to meet its obligation under the ZENS. Unrealized gains and losses resulting from changes in the market value of the ZENS-Related Securities are recorded in CenterPoint Energy's Condensed Statements of Consolidated Income.

	Shares Held	
	September 30, 2018	December 31, 2017
AT&T Common	10,212,945	—
Charter Common	872,503	872,503
Time Common	—	888,392
TW Common	—	7,107,130

(b) ZENS

In September 1999, CenterPoint Energy issued ZENS having an original principal amount of \$1 billion of which \$828 million remain outstanding as of September 30, 2018. Each ZENS was originally exchangeable at the holder's option at any time for an amount of cash equal to 95% of the market value of the reference shares of TW Common attributable to such note. The number and identity of the reference shares attributable to each ZENS are adjusted for certain corporate events.

On October 22, 2016, AT&T announced that it had entered into a definitive agreement to acquire TW in a stock and cash transaction. On February 15, 2017, TW shareholders approved the announced transaction with AT&T. The merger closed on June 14, 2018. CenterPoint Energy received \$53.75 and 1.437 shares of AT&T Common for each share of TW Common held, resulting in cash proceeds of \$382 million and 10,212,945 shares of AT&T Common. In accordance with the terms of the ZENS, CenterPoint Energy remitted \$382 million to ZENS note holders in July 2018, which reduced the contingent principal amount.

On November 26, 2017, Meredith announced that it had entered into a definitive merger agreement with Time. Pursuant to the merger agreement, upon closing of the merger, a subsidiary of Meredith would purchase for cash all outstanding Time Common shares for \$18.50 per share. The transaction was consummated on January 31, 2018. CenterPoint Energy elected to make a reference share offer adjustment and distribute additional interest, if any, in accordance with the terms of its ZENS rather than electing to increase the early exchange ratio to 100%. CenterPoint Energy's distribution of additional interest in connection with the reference share offer was proportionate to the percentage of eligible shares that were validly tendered by Time stockholders in Meredith's tender offer. CenterPoint Energy received \$18.50 for each share of Time Common held, resulting in cash proceeds of approximately \$16

million. In accordance with the terms of the ZENS, CenterPoint Energy distributed additional interest of approximately \$16 million to ZENS holders on March 6, 2018, which reduced the contingent principal amount.

As a result, CenterPoint Energy recorded the following during the nine months ended September 30, 2018:

	Meredit	AT&T	AT&T
			W
	(in millions)		
Cash payment to ZENS note holders	\$ 16	\$ 382	
Indexed debt – reduction	(4)	(95)	
Indexed debt securities derivative – reduction	(1)	(45)	
Loss on indexed debt securities	\$ 11	\$ 242	

Table of Contents

CenterPoint Energy's reference shares for each ZENS consisted of the following:

	September 30, 2018	December 31, 2017
	(in shares)	
AT&T Common	0.7185	—
Charter Common	0.061382	0.061382
Time Common	—	0.0625
TW Common	—	0.5

As of September 30, 2018, the contingent principal amount of the ZENS was \$98 million.

(12) Short-term Borrowings and Long-term Debt

(a) Short-term Borrowings (CenterPoint Energy and CERC)

Inventory Financing. NGD has AMAs associated with its utility distribution service in Arkansas, Louisiana, Mississippi, Oklahoma and Texas. In March 2018, NGD's third party AMAs in Arkansas, Louisiana and Oklahoma expired, and NGD entered into new AMAs with CES effective April 1, 2018 in these states. The AMAs have varying terms, the longest of which expires in 2021. Pursuant to the provisions of the agreements, NGD sells natural gas and agrees to repurchase an equivalent amount of natural gas during the winter heating seasons at the same cost. These transactions are accounted for as an inventory financing and had an associated principal obligation of \$ -0- and \$39 million as of September 30, 2018 and December 31, 2017, respectively.

(b) Long-term Debt

Debt Issuances. During the nine months ended September 30, 2018, the following debt instruments were issued:

Issuance Date	Debt Instrument	Aggregate Principal Amount (in millions)	Interest Rate	Maturity Date
February 2018	General mortgage bonds	\$ 400	3.95%	2048
March 2018	Unsecured senior notes	300	3.55%	2023
March 2018	Unsecured senior notes	300	4.00%	2028

The proceeds from these issuances were used for general limited liability company and corporate purposes, as applicable, including to repay portions of outstanding commercial paper and borrowings under CenterPoint Energy's money pool.

Merger Financings. On October 5, 2018, the following debt instruments were issued:

Debt Instrument	Aggregate Principal Amount (in millions)	Interest Rate	Maturity Date
CenterPoint Energy Unsecured senior notes	\$ 500	3.60%	2021
CenterPoint Energy Unsecured senior notes	500	3.85%	2024
CenterPoint Energy Unsecured senior notes	500	4.25%	2028

CenterPoint Energy intends to use the net proceeds from these debt issuances to fund a portion of the pending Merger and to pay related fees and expenses.

If CenterPoint Energy does not consummate the Merger on or prior to October 31, 2019, or if, on or prior to such date, the Merger Agreement is terminated, CenterPoint Energy will be required to redeem all of the outstanding notes at a redemption price equal to 101% of the principal amount of the notes plus accrued and unpaid interest, if any, to, but excluding, the date of such special mandatory redemption. The notes may also be redeemed at CenterPoint Energy's option, in whole but not in part, at any time before October 31, 2019, at a redemption price equal to 101% of the aggregate principal amount thereof plus accrued and unpaid interest thereon to, but excluding, the date of such redemption, if CenterPoint Energy determines, in its reasonable judgment, that the Merger will not be consummated on or before close of business on October 31, 2019.

Table of Contents

Credit Facility. In May 2018, CenterPoint Energy entered into an amendment to its revolving credit facility to increase the aggregate commitments from \$1.7 billion to \$3.3 billion effective the earlier of (i) the termination of all commitments by certain lenders to provide the Bridge Facility and (ii) the payment in full of all obligations (other than contingent obligations) under the Bridge Facility and termination of all commitments to advance additional credit thereunder, and in each case, so long as the Merger Agreement has not been terminated pursuant to the terms thereof without consummation of the Merger. This increase to CenterPoint Energy's revolving credit facility will automatically expire on the earlier of the (a) termination date of the revolving credit facility and (b) if the Merger Agreement is terminated without consummation of the Merger, the date that is 90 days after such termination. In addition, the amendment provides for a temporary increase on the maximum ratio of debt for borrowed money to capital from 65% to 75% until the earlier of (i) June 30, 2019 and (ii) the termination of all commitments in respect of the Bridge Facility without any borrowing thereunder. On October 5, 2018, CenterPoint Energy terminated all remaining commitments by lenders to provide the Bridge Facility. As a result, the aggregate commitments under the revolving credit facility automatically increased from \$1.7 billion to \$3.3 billion and the maximum ratio of debt for borrowed money to capital reverted to 65%.

The Registrants had the following revolving credit facilities and utilization of such facilities:

	September 30, 2018			December 31, 2017			
	Size of Facility	Letters Loans of Credit	Commercial Paper	Weighted Average Interest Rate	Letters Loans of Credit	Commercial Paper	Weighted Average Interest Rate
	(in millions, except weighted average interest rate)						
CenterPoint Energy	\$1,700	(1)\$—	\$ 6	2.42 %	\$—	\$ 6	1.88 %
Houston Electric	300	—	4	—	—	4	—
CERC Corp.	900	—	1	2.43 %	—	1	1.72 %
Total	\$2,900	\$—	\$ 11		\$—	\$ 11	\$ 1,753

Pursuant to the amendment entered into in May 2018, the aggregate commitments under the CenterPoint Energy (1) revolving credit facility increased to \$3.3 billion on October 5, 2018 as a result of the satisfaction of certain conditions described above.

Execution Date	Company	Size of Facility	Draw Rate of LIBOR plus (1)	Financial Covenant Limit on Debt for Borrowed Money to Capital Ratio	Debt for Borrowed Money to Capital Ratio as of September 30, 2018 (2)	Termination Date
March 3, 2016	CenterPoint Energy	(in millions) \$ 1,700	(3) 1.250%	75%	(4) (5) 47.5%	March 3, 2022
March 3, 2016	Houston Electric	300	1.125%	65%	(5) 50.7%	March 3, 2022
March 3, 2016	CERC Corp.	900	1.125%	65%	48.6%	March 3, 2022

(1) Based on current credit ratings.

(2) As defined in the revolving credit facility agreement, excluding Securitization Bonds.

Pursuant to the amendment entered into in May 2018, the aggregate commitments under the CenterPoint Energy revolving credit facility increased to \$3.3 billion on October 5, 2018 as a result of the satisfaction of certain conditions described above.

(4) On October 5, 2018, CenterPoint Energy's financial covenant limit returned to 65% due to the termination of all commitments in respect of the Bridge Facility without any borrowing thereunder.

For CenterPoint Energy (whenever its financial covenant limit is 65%) and Houston Electric, the financial covenant limit will temporarily increase from 65% to 70% if Houston Electric experiences damage from a natural disaster in its service territory and CenterPoint Energy certifies to the administrative agent that Houston Electric has incurred system restoration costs reasonably likely to exceed \$100 million in a consecutive 12-month period, all or part of which Houston Electric intends to seek to recover through securitization financing. Such temporary increase in the financial covenant would be in effect from the date CenterPoint Energy delivers its certification until the earliest to occur of (i) the completion of the

Table of Contents

securitization financing, (ii) the first anniversary of CenterPoint Energy's certification or (iii) the revocation of such certification.

The Registrants were in compliance with all financial debt covenants as of September 30, 2018.

Other. As of both September 30, 2018 and December 31, 2017, Houston Electric had issued \$118 million of general mortgage bonds as collateral for long-term debt of CenterPoint Energy. These bonds are not reflected in Houston Electric's consolidated financial statements because of the contingent nature of the obligations.

(13) Income Taxes

The Registrants reported the following effective tax rates:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
CenterPoint Energy (1)	24 %	37 %	26 %	36 %
Houston Electric (2)	20 %	35 %	21 %	36 %
CERC - Continuing operations (3) (4)	5 %	20 %	29 %	38 %
CERC - Discontinued operations (5)	23 %	38 %	24 %	38 %

CenterPoint Energy's lower effective tax rate for the three and nine months ended September 30, 2018 compared to the same periods for 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate decreased by 5% and 4%, respectively, for the three and nine months ended September 30, 2018 due to the amortization of EDIT. These (1) decreases were partially offset by an increase to the effective tax rate of 5% for the three-month period ended September 30, 2018 as a result of the establishment of a state valuation allowance on certain net operating loss deferred tax assets that are no longer expected to be utilized prior to expiration after the Internal Spin. The effective tax rate increased by 7% for the nine-month period ended September 30, 2018 due to state law changes and the state valuation allowance. See Note 9 for further discussion on the Internal Spin.

Houston Electric's lower effective tax rate for the three and nine months ended September 30, 2018 compared to the (2) same periods for 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate was further reduced by 2% for both periods due to the amortization of EDIT.

CERC's lower effective tax rate on the loss from continuing operations for the three months ended (3) September 30, 2018 compared to the same period in 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate decreased by 18% due to state taxes as a result of the establishment of a state valuation allowance on certain net operating loss deferred tax assets that are no longer expected to be utilized prior to expiration after the Internal Spin. These decreases were partially offset by an increase to the effective tax rate of 15% due to the amortization of EDIT. See Note 9 for further discussion on the Internal Spin.

(4) CERC's lower effective tax rate on income from continuing operations for the nine months ended September 30, 2018 compared to the same period in 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate decreased by

20% due to the amortization of EDIT. These decreases were partially offset by an increase to the effective tax rate of 22% as a result of an increase in state tax rates and the establishment of a state valuation allowance on certain net operating loss deferred tax assets that are no longer expected to be utilized prior to expiration after the Internal Spin. See Note 9 for further discussion on the Internal Spin.

(5) CERC's lower effective tax rate on income from discontinued operations for the three and nine months ended September 30, 2018 compared to the same periods in 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. See Note 9 for further discussion on the Internal Spin and the associated discontinued operations presentation.

The Registrants reported no uncertain tax liability as of September 30, 2018 and expect no significant changes to the uncertain tax liability over the next twelve months. Tax years through 2016 have been audited and settled with the IRS, however, during the

Table of Contents

three months ended September 30, 2018, CenterPoint Energy filed an amended 2014 tax return to claim additional tax credits that is currently under review by the IRS. For the 2017 and 2018 tax years, CenterPoint Energy is a participant in the IRS's Compliance Assurance Process.

(14) Commitments and Contingencies

(a) Natural Gas Supply Commitments (CenterPoint Energy and CERC)

Natural gas supply commitments include natural gas contracts related to CenterPoint Energy's and CERC's Natural Gas Distribution and Energy Services business segments, which have various quantity requirements and durations, that are not classified as non-trading derivative assets and liabilities in CenterPoint Energy's and CERC's Condensed Consolidated Balance Sheets as of September 30, 2018 and December 31, 2017 as these contracts meet an exception as "normal purchases contracts" or do not meet the definition of a derivative. Natural gas supply commitments also include natural gas transportation contracts that do not meet the definition of a derivative.

As of September 30, 2018, minimum payment obligations for natural gas supply commitments are approximately:

	(in millions)
Remaining three months of 2018	\$ 88
2019	325
2020	303
2021	219
2022	183
2023 and beyond	1,644

(b) Legal, Environmental and Other Matters

Legal Matters

Gas Market Manipulation Cases (CenterPoint Energy and CERC). CenterPoint Energy, its predecessor, Reliant Energy, and certain of their former subsidiaries were named as defendants in a large number of lawsuits filed against numerous gas market participants in a number of federal and western state courts in connection with the operation of the natural gas markets in 2000-2002. CenterPoint Energy and its affiliates were released or dismissed from all such cases, except for one case pending in federal court in Nevada in which CES, a subsidiary of CERC Corp., is a defendant. Plaintiffs in that case allege a conspiracy to inflate Wisconsin natural gas prices in 2000-2002. In May 2016, the district court granted CES's motion for summary judgment, dismissing CES from the case. In August 2018, the Ninth Circuit Court of Appeals reversed that ruling, and CES requested further appellate review of that decision.

Under a master separation agreement between CenterPoint Energy and a former subsidiary, RRI, CenterPoint Energy and its subsidiaries are entitled to be indemnified by RRI and its successors for any losses, including certain attorneys' fees and other costs, arising out of these lawsuits. Through a series of transactions, RRI became known as GenOn and a wholly-owned subsidiary of NRG. None of those transactions alters GenOn's contractual obligations to indemnify CenterPoint Energy and its subsidiaries for certain liabilities, including their indemnification obligations regarding the gas market manipulation litigation. In June 2017, however, GenOn and various affiliates filed for protection under Chapter 11 of the U.S. Bankruptcy Code and are expected to emerge from Chapter 11 in 2018. CenterPoint Energy, CERC, and CES submitted proofs of claim in the bankruptcy proceedings to protect their indemnity rights.

In October 2018, CES, GenOn, and the plaintiffs reached an agreement to settle all claims against CES and CES's indemnity claims against GenOn, subject to approvals by the bankruptcy court and the federal district court. If the

settlement agreement is not approved and if GenOn's bankruptcy proceedings result in it not being required to fulfill its indemnity obligations, CES could incur liability and be responsible for satisfying it. CenterPoint Energy does not expect the ultimate outcome of this matter to have a material adverse effect on its financial condition, results of operations or cash flows.

Minnehaha Academy (CenterPoint Energy and CERC). On August 2, 2017, a natural gas explosion occurred at the Minnehaha Academy in Minneapolis, Minnesota, resulting in the deaths of two school employees, serious injuries to others and significant property damage to the school. CenterPoint Energy, certain of its subsidiaries, including CERC, and the contractor company working in the school have been named in litigation arising out of this incident. CenterPoint Energy has reached confidential settlement agreements with some claimants. Additionally, CenterPoint Energy is cooperating with the ongoing investigation conducted by the National Transportation Safety Board. Further, CenterPoint Energy is contesting approximately \$200,000 in

Table of Contents

finances imposed by the Minnesota Office of Pipeline Safety. In early 2018, the Minnesota Occupational Safety and Health Administration concluded its investigation without any adverse findings against CenterPoint Energy. CenterPoint Energy's general and excess liability insurance policies provide coverage for third party bodily injury and property damage claims.

Environmental Matters

MGP Sites (CenterPoint Energy and CERC). CERC and its predecessors operated MGPs in the past. With respect to certain Minnesota MGP sites, CERC has completed state-ordered remediation and continues state-ordered monitoring and water treatment. As of September 30, 2018, CERC had a recorded liability of \$7 million for continued monitoring and any future remediation required by regulators in Minnesota. The estimated range of possible remediation costs for the sites for which CERC believes it may have responsibility was \$4 million to \$30 million based on remediation continuing for 30 to 50 years. The cost estimates are based on studies of a site or industry average costs for remediation of sites of similar size. The actual remediation costs will depend on the number of sites to be remediated, the participation of other PRPs, if any, and the remediation methods used.

In addition to the Minnesota sites, the EPA and other regulators have investigated MGP sites that were owned or operated by CERC or may have been owned by one of its former affiliates. CenterPoint Energy and CERC do not expect the ultimate outcome of these matters to have a material adverse effect on the financial condition, results of operations or cash flows of either CenterPoint Energy or CERC.

Asbestos. Some facilities owned by the Registrants or their predecessors in interest contain or have contained asbestos insulation and other asbestos-containing materials. The Registrants are from time to time named, along with numerous others, as defendants in lawsuits filed by a number of individuals who claim injury due to exposure to asbestos, and the Registrants anticipate that additional claims may be asserted in the future. Although their ultimate outcome cannot be predicted at this time, the Registrants do not expect these matters, either individually or in the aggregate, to have a material adverse effect on their financial condition, results of operations or cash flows.

Other Environmental. From time to time, the Registrants identify the presence of environmental contaminants during operations or on property where predecessor companies have conducted operations. Other such sites involving contaminants may be identified in the future. The Registrants have and expect to continue to remediate any identified sites consistent with state and federal legal obligations. From time to time, the Registrants have received notices, and may receive notices in the future, from regulatory authorities or others regarding status as a PRP in connection with sites found to require remediation due to the presence of environmental contaminants. In addition, the Registrants have been, or may be, named from time to time as defendants in litigation related to such sites. Although the ultimate outcome of such matters cannot be predicted at this time, the Registrants do not expect these matters, either individually or in the aggregate, to have a material adverse effect on their financial condition, results of operations or cash flows.

Other Proceedings

The Registrants are involved in other legal, environmental, tax and regulatory proceedings before various courts, regulatory commissions and governmental agencies regarding matters arising in the ordinary course of business. From time to time, the Registrants are also defendants in legal proceedings with respect to claims brought by various plaintiffs against broad groups of participants in the energy industry. Some of these proceedings involve substantial amounts. The Registrants regularly analyze current information and, as necessary, provide accruals for probable and reasonably estimable liabilities on the eventual disposition of these matters. The Registrants do not expect the disposition of these matters to have a material adverse effect on the Registrants' financial condition, results of operations or cash flows.

Table of Contents

(15) Earnings Per Share (CenterPoint Energy)

The following table reconciles numerators and denominators of CenterPoint Energy's basic and diluted earnings per share calculations:

	Three Months Ended September 30, 2018 2017		Nine Months Ended September 30, 2018 2017	
	(in millions, except share and per share amounts)			
Income available to common shareholders	\$153	\$ 169	\$243	\$ 496
Basic weighted average common shares outstanding	431,554,300	430,026,000	431,437,300	430,939,000
Plus: Incremental shares from assumed conversions:				
Restricted stock	3,337,000	3,060,000	3,337,000	3,060,000

(16) Reportable Business Segments

The Registrants' determination of reportable business segments considers the strategic operating units under which the Registrants manage sales, allocate resources and assess performance of various products and services to wholesale or retail customers in differing regulatory environments. The Registrants use operating income as the measure of profit or loss for the business segments other than Midstream Investments, where equity in earnings is used.

As of September 30, 2018, reportable business segments by Registrant are as follows:

	Electric Transmission & Distribution	Natural Gas Distribution	Energy Services	Midstream Investments	Other Operations
CenterPoint Energy	X	X	X	X	X
Houston Electric	X				
CERC		X	X	(1)	X

In the three months ended September 30, 2018, CERC completed the Internal Spin. Previously, CERC's equity method investment in Enable was included in the Midstream Investments segment. CERC's equity in earnings in (1)Enable, net of basis difference amortization and income tax, has been classified as discontinued operations for all periods presented. See Note 9 for further discussion on the Internal Spin and the associated discontinued operations presentation.

Electric Transmission & Distribution consists of the electric transmission and distribution function. Natural Gas Distribution consists of intrastate natural gas sales to, and natural gas transportation and distribution for, residential, commercial, industrial and institutional customers. Energy Services consists of non-rate regulated natural gas sales and services operations. Midstream Investments consists of the equity investment in Enable (excluding the Enable Series A Preferred Units). Other Operations consists primarily of other corporate operations which support all of the business operations.

Houston Electric consists of a single reportable business segment and therefore is not included in the tabular business segment presentation below. Operating income (loss) amounts for 2017 have been recast to reflect the adoption of ASU 2017-07 (see Note 2 for further information).

Total cash, cash equivalents and restricted cash shown in Condensed Statements of Consolidated Cash Flows	\$331	\$ 317	\$ 296	\$ 274

CERC does not have restricted cash and therefore was not included in the table above.

(18) Related Party Transactions (Houston Electric and CERC)

Houston Electric and CERC participate in a money pool through which they can borrow or invest on a short-term basis. Funding needs are aggregated and external borrowing or investing is based on the net cash position. The net funding requirements of the money pool are expected to be met with borrowings under CenterPoint Energy's revolving credit facility or the sale of CenterPoint Energy's commercial paper.

The table below summarizes money pool activity:

	September 30, 2018		December 31, 2017	
	Houston Electric	CERC	Houston Electric	CERC
(in millions)				
Money pool investments (borrowings) (1)	\$(75)	\$ —	\$(60)	\$(570)

(1) Interest income is included in Other, net and interest expense is included in Interest and other finance charges on the Condensed Statements of Consolidated Income.

CenterPoint Energy provides some corporate services to Houston Electric and CERC. The costs of services have been charged directly to Houston Electric and CERC using methods that management believes are reasonable. These methods include negotiated usage rates, dedicated asset assignment and proportionate corporate formulas based on operating expenses, assets, gross margin, employees and a composite of assets, gross margin and employees. Houston Electric provides certain services to CERC. These services are billed at actual cost, either directly or as an allocation and include fleet services, shop services, geographic services, surveying and right-of-way services, radio communications, data circuit management and field operations. Additionally, CERC provides certain services to Houston Electric. These services are billed at actual cost, either directly or as an allocation and include line locating and other miscellaneous services. These charges are not necessarily indicative of what would have been incurred had Houston Electric and CERC not been affiliates.

Amounts charged for these services were as follows and are included primarily in operation and maintenance expenses:

	Three Months Ended		Nine Months Ended

(19) Equity (CenterPoint Energy)

Dividends Declared

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

CenterPoint Energy declared dividends for the periods presented in the table below:

	Three Months		Nine Months	
	Ended September		Ended September	
	30,		30,	
Equity Instrument	2018	2017	2018 (1)	2017
Common Stock	\$0.2775	\$0.2675	\$0.5550	\$0.8025

On December 13, 2017, CenterPoint Energy's Board of Directors declared a regular quarterly cash dividend of (1) \$0.2775 per share of Common Stock, payable on March 8, 2018 to shareholders of record as of the close of business on February 15, 2018.

Table of Contents

Series A Preferred Stock

On August 22, 2018, CenterPoint Energy completed the issuance of 800,000 shares of its Series A Preferred Stock, at a price of \$1,000 per share, resulting in net proceeds of \$790 million after issuance costs. The aggregate liquidation value of the Series A Preferred Stock is \$800 million with a per share liquidation value of \$1,000.

CenterPoint Energy intends to use the net proceeds from the Series A Preferred Stock offering to fund a portion of the pending Merger and to pay related fees and expenses.

Dividends. The Series A Preferred Stock accrue cumulative dividends, calculated as a percentage of the stated amount per share, at a fixed annual rate of 6.125% per annum to, but excluding, September 1, 2023, and at an annual rate of three-month LIBOR plus a spread of 3.270% thereafter to be paid in cash if, when and as declared. If declared, prior to September 1, 2023, dividends are payable semi-annually in arrears on each March 1 and September 1, beginning on March 1, 2019, and, for the period commencing on September 1, 2023, dividends are payable quarterly in arrears each March 1, June 1, September 1 and December 1, beginning on December 1, 2023. Cumulative dividends accrued during the applicable periods are presented on CenterPoint Energy's Condensed Statements of Consolidated Income as Series A Preferred Stock dividend requirement.

Optional Redemption. On or after September 1, 2023, CenterPoint Energy may, at its option, redeem the Series A Preferred Stock, in whole or in part, at any time or from time to time, for cash at a redemption price of \$1,000 per share, plus any accumulated and unpaid dividends thereon to, but excluding, the redemption date.

At any time within 120 days after the conclusion of any review or appeal process instituted by CenterPoint Energy, if any, following the occurrence of a ratings event, CenterPoint Energy may, at its option, redeem the Series A Preferred Stock in whole, but not in part, at a redemption price in cash per share equal to \$1,020 (102% of the liquidation value of \$1,000) plus an amount equal to all accumulated and unpaid dividends thereon to, but excluding, the redemption date, whether or not declared.

Ranking. The Series A Preferred Stock, with respect to anticipated dividends and distributions upon CenterPoint Energy's liquidation or dissolution, or winding-up of CenterPoint Energy's affairs, ranks or will rank:

senior to Common Stock and to each other class or series of capital stock established after the initial issue date of the Series A Preferred Stock that is expressly made subordinated to the Series A Preferred Stock;

on a parity with any class or series of capital stock established after the initial issue date of the Series A Preferred Stock that is not expressly made senior or subordinated to the Series A Preferred Stock, including the Series B Preferred Stock;

junior to any class or series of capital stock established after the initial issue date of the Series A Preferred Stock that is expressly made senior to the Series A Preferred Stock;

junior to all existing and future indebtedness (including indebtedness outstanding under CenterPoint Energy's credit facilities, senior notes and commercial paper) and other liabilities with respect to assets available to satisfy claims against CenterPoint Energy; and

structurally subordinated to any existing and future indebtedness and other liabilities of CenterPoint Energy's subsidiaries and capital stock of CenterPoint Energy's subsidiaries held by third parties.

Voting Rights. Holders of the Series A Preferred Stock generally will not have voting rights. Whenever dividends on shares of Series A Preferred Stock have not been declared and paid for the equivalent of three or more semi-annual or six or more quarterly dividend periods (including, for the avoidance of doubt, the dividend period beginning on, and including, the original issue date and ending on, but excluding, March 1, 2019), whether or not consecutive, the holders of such shares of Series A Preferred Stock, voting together as a single class with holders of any and all other series of voting preferred stock (as defined in the Statement of Resolution for the Series A Preferred Stock) then outstanding, will be entitled at CenterPoint Energy's next annual or special meeting of shareholders to vote for the election of a total of two additional members of CenterPoint Energy's Board of Directors, subject to certain limitations. This right will terminate if and when all accumulated dividends have been paid in full and, upon such termination, the term of office of each director so elected will terminate at such time and the number of directors on CenterPoint Energy's Board of Directors will automatically decrease by two, subject to the re-vesting of such rights in the event of each subsequent nonpayment.

Table of Contents

Series B Preferred Stock

On October 1, 2018, CenterPoint Energy completed the issuance of 19,550,000 depositary shares, each representing a 1/20th interest in a share of its Series B Preferred Stock, at a price of \$50 per depositary share, resulting in net proceeds of \$950 million after issuance costs. The aggregate liquidation value of Series B Preferred Stock is \$978 million with a per share liquidation value of \$1,000. The amount issued included 2,550,000 depositary shares issued pursuant to the exercise in full of the option granted to the underwriters to purchase additional depositary shares.

CenterPoint Energy intends to use the net proceeds from the offering of depositary shares, each representing a 1/20th interest in a share of Series B Preferred Stock, to fund a portion of the pending Merger and to pay related fees and expenses.

Dividends. Dividends on the Series B Preferred Stock will be payable on a cumulative basis when, as and if declared at an annual rate of 7.00% on the liquidation value of \$1,000 per share. CenterPoint Energy may pay declared dividends in cash or, subject to certain limitations, in shares of Common Stock, or in any combination of cash and shares of Common Stock on March 1, June 1, September 1 and December 1 of each year, commencing on December 1, 2018 and ending on, and including, September 1, 2021.

Acquisition Termination Redemption. If the pending Merger has not closed at or prior to close of business on April 21, 2019 or if an acquisition termination event occurs, CenterPoint Energy may, at its option, give notice of an acquisition termination redemption to the holders of the Series B Preferred Stock. If CenterPoint Energy provides such notice, then, on the acquisition termination redemption date, CenterPoint Energy will be required to redeem the Series B Preferred Stock, in whole but not in part, at a redemption amount per share of the Series B Preferred Stock equal to the acquisition termination redemption amount. CenterPoint Energy will pay the acquisition termination redemption amount in cash unless the acquisition termination share price is greater than the initial price, in which case CenterPoint Energy will instead pay the acquisition termination redemption amount by delivering shares of Common Stock and cash; provided, that CenterPoint Energy may elect, subject to certain limitations, to pay cash or deliver shares of Common Stock in lieu of these amounts. If CenterPoint Energy redeems shares of the Series B Preferred Stock held by the depositary, the depositary will redeem, on the same acquisition termination redemption date, the number of the depositary shares representing the shares of the Series B Preferred Stock so redeemed.

Mandatory Conversion. Unless earlier converted or redeemed, each share of the Series B Preferred Stock will automatically convert on the mandatory conversion date, which is expected to be September 1, 2021, into not less than 30.5820 and not more than 36.6980 shares of Common Stock, subject to certain anti-dilution adjustments. Correspondingly, the conversion rate per depositary share will be not less than 1.5291 and not more than 1.8349 shares of Common Stock, subject to certain anti-dilution adjustments. The conversion rate will be determined based on a preceding 20-day volume-weighted-average-price of Common Stock.

The following table illustrates the conversion rate per share of the Series B Preferred Stock, subject to certain anti-dilution adjustments:

Applicable Market Value of the Common Stock	Conversion Rate per Share of Series B Preferred Stock
Greater than \$32.6990 (threshold appreciation price)	30.5820 shares of Common Stock
Equal to or less than \$32.6990 but greater than or equal to \$27.2494	Between 30.5820 and 36.6980 shares of Common Stock, determined by dividing \$1,000 by the applicable market value
Less than \$27.2494 (initial price)	36.6980 shares of Common Stock

The following table illustrates the conversion rate per depositary share, subject to certain anti-dilution adjustments:

Applicable Market Value of the Common Stock	Conversion Rate per Depository Share
Greater than \$32.6990 (threshold appreciation price)	1.5291 shares of Common Stock
Equal to or less than \$32.6990 but greater than or equal to \$27.2494	Between 1.5291 and 1.8349 shares of Common Stock, determined by dividing \$50 by the applicable market value
Less than \$27.2494 (initial price)	1.8349 shares of Common Stock

Optional Conversion of the Holder. Other than during a fundamental change conversion period, and unless CenterPoint Energy has redeemed the Series B Preferred Stock, a holder of the Series B Preferred Stock may, at any time prior to September 1, 2021, elect to convert such holder's shares of the Series B Preferred Stock, in whole or in part, at the minimum conversion rate of 30.5820 shares of Common Stock per share of the Series B Preferred Stock (equivalent to 1.5291 shares of Common Stock per depository share), subject to certain anti-dilution and other adjustments. Because each depository share represents a 1/20th fractional interest

Table of Contents

in a share of the Series B Preferred Stock, a holder of depositary shares may convert its depositary shares only in lots of 20 depositary shares.

Fundamental Change Conversion. If a fundamental change occurs on or prior to September 1, 2021, holders of the Series B Preferred Stock will have the right to convert their shares of the Series B Preferred Stock, in whole or in part, into shares of Common Stock at the fundamental change conversion rate during the period beginning on, and including, the effective date of such fundamental change and ending on, and including, the date that is 20 calendar days after such effective date (or, if later, the date that is 20 calendar days after holders receive notice of such fundamental change, but in no event later than September 1, 2021). Holders who convert shares of the Series B Preferred Stock during that period will also receive a make-whole dividend amount comprised of a fundamental change dividend make-whole amount, and to the extent there is any, the accumulated dividend amount. Because each depositary share represents a 1/20th fractional interest in a share of the Series B Preferred Stock, a holder of depositary shares may convert its depositary shares upon a fundamental change only in lots of 20 depositary shares.

Ranking. The Series B Preferred Stock, with respect to anticipated dividends and distributions upon CenterPoint Energy's liquidation or dissolution, or winding-up of CenterPoint Energy's affairs, ranks or will rank:

- senior to Common Stock and to each other class or series of capital stock established after the initial issue date of the Series B Preferred Stock that is expressly made subordinated to the Series B Preferred Stock;
- on a parity with the Series A Preferred Stock and any class or series of capital stock established after the initial issue date that is not expressly made senior or subordinated to the Series B Preferred Stock;

junior to any class or series of capital stock established after the initial issue date that is expressly made senior to the Series B Preferred Stock;

junior to all existing and future indebtedness (including indebtedness outstanding under CenterPoint Energy's credit facilities, senior notes and commercial paper) and other liabilities with respect to assets available to satisfy claims against CenterPoint Energy; and

structurally subordinated to any existing and future indebtedness and other liabilities of CenterPoint Energy's subsidiaries and capital stock of CenterPoint Energy's subsidiaries held by third parties.

Voting Rights. Holders of the Series B Preferred Stock generally will not have voting rights. Whenever dividends on shares of the Series B Preferred Stock have not been declared and paid for six or more dividend periods (including, for the avoidance of doubt, the dividend period beginning on, and including, the initial issue date and ending on, but excluding, December 1, 2018), whether or not consecutive, the holders of such shares of Series B Preferred Stock, voting together as a single class with holders of any and all other series of voting preferred stock then outstanding (as defined in the Statement of Resolution for the Series B Preferred Stock), will be entitled at CenterPoint Energy's next annual or special meeting of shareholders to vote for the election of a total of two additional members of CenterPoint Energy's Board of Directors, subject to certain limitations. This right will terminate if and when all accumulated and unpaid dividends have been paid in full and, upon such termination, the term of office of each director so elected will terminate at such time and the number of directors on CenterPoint Energy's Board of Directors will automatically decrease by two, subject to the revesting of such rights in the event of each subsequent nonpayment.

Common Stock

On October 1, 2018, CenterPoint Energy completed the issuance of approximately 69,633,027 shares of Common Stock at a price of \$27.25 per share, for net proceeds of \$1,844 million after issuance costs. The amount issued

included 9,082,568 shares of Common Stock issued pursuant to the exercise in full of the option granted to the underwriters to purchase additional shares of Common Stock.

CenterPoint Energy intends to use the net proceeds from the Common Stock offering to fund a portion of the pending Merger and to pay related fees and expenses.

(20) Subsequent Events (CenterPoint Energy)

CenterPoint Energy Dividend Declarations

On October 23, 2018, CenterPoint Energy's Board of Directors declared a regular quarterly cash dividend of \$0.2775 per share of Common Stock payable on December 13, 2018 to shareholders of record as of the close of business on November 15, 2018.

Table of Contents

On October 23, 2018, CenterPoint Energy's Board of Directors declared a regular quarterly cash dividend of \$11.6667 per share of the newly issued Series B Preferred Stock (\$0.5833 per depository share) payable on December 1, 2018 to shareholders of record as of the close of business on November 15, 2018. For more information about the Series B Preferred Stock, see Note 19.

Enable Distributions Declarations

On November 6, 2018, Enable declared a quarterly cash distribution of \$0.318 per unit on all of its outstanding common units for the quarter ended September 30, 2018. Accordingly, CNP Midstream expects to receive a cash distribution of approximately \$74 million from Enable in the fourth quarter of 2018 to be made with respect to CNP Midstream's investment in common units of Enable.

On November 6, 2018, Enable declared a quarterly cash distribution of \$0.625 per Series A Preferred Unit for the quarter ended September 30, 2018. Accordingly, CenterPoint Energy expects to receive a cash distribution of approximately \$9 million from Enable in the fourth quarter of 2018 to be made with respect to CenterPoint Energy's investment in Enable Series A Preferred Units.

Merger Financing Transactions

On October 1, 2018, CenterPoint Energy completed concurrent equity offerings of depository shares, each representing a 1/20th interest in a share of Series B Preferred Stock, and Common Stock. For more information about the concurrent equity offerings, see Note 19.

On October 5, 2018, CenterPoint Energy issued \$1.5 billion aggregate principal amount of senior notes. For more information about the senior notes offering, see Note 12.

Item MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF 2. OPERATIONS OF CENTERPOINT ENERGY, INC. AND SUBSIDIARIES

No Registrant makes any representations as to the information related solely to CenterPoint Energy or the subsidiaries of CenterPoint Energy other than itself.

The following combined discussion and analysis should be read in combination with the Interim Condensed Financial Statements contained in this Form 10-Q and each Registrants' 2017 Form 10-K. When discussing CenterPoint Energy's consolidated financial information, it includes the results of Houston Electric and CERC, which, along with CenterPoint Energy, are collectively referred to as the Registrants. Where appropriate, information relating to a specific Registrant has been segregated and labeled as such. In this Form 10-Q, the terms "our," "we" and "us" are used as abbreviated references to CenterPoint Energy, Inc. together with its consolidated subsidiaries.

RECENT EVENTS

Pending Merger with Vectren. On April 21, 2018, CenterPoint Energy entered into the Merger Agreement. Under the terms of the Merger Agreement, CenterPoint Energy will acquire Vectren for approximately \$6 billion in cash. For more information about the pending Merger, see Note 3 to the Interim Condensed Financial Statements.

Series A Preferred Stock Offering. On August 22, 2018, we completed an offering of our Series A Preferred Stock. For more information about the offering, see Note 19 to the Interim Condensed Financial Statements.

Enable Midstream Spin. On September 4, 2018, CERC completed the Internal Spin of its equity investment in Enable and Enable GP. For further information regarding the Internal Spin, see Note 9 to the Interim Condensed Financial Statements.

Concurrent Equity Offerings. On October 1, 2018, we completed concurrent equity offerings of depositary shares, each representing a 1/20th interest in a share of Series B Preferred Stock, and Common Stock. For more information about the concurrent equity offerings, see Note 19 to the Interim Condensed Financial Statements.

Senior Notes Offering. On October 5, 2018, we issued \$1.5 billion aggregate principal amount of senior notes. For more information about the senior notes offering, see Note 12 to the Interim Condensed Financial Statements.

Table of Contents

Credit Facility. On October 5, 2018, we terminated all remaining commitments by lenders to provide the Bridge Facility, which resulted in increased aggregate commitments under our revolving credit facility. For further information, see Note 12 to the Interim Condensed Financial Statements.

Regulatory Proceedings. For details related to our pending and completed regulatory proceedings and orders related to the TCJA to date in 2018, see “—Liquidity and Capital Resources —Regulatory Matters” below.

CENTERPOINT ENERGY CONSOLIDATED RESULTS OF OPERATIONS

For information regarding factors that may affect the future results of our consolidated operations, please read “Risk Factors” in Item 1A of Part I of CenterPoint Energy’s 2017 Form 10-K and “Risk Factors” in Item 1A of Part II of CenterPoint Energy’s First Quarter 2018 Form 10-Q and this Form 10-Q.

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
	(in millions, except per share amounts)			
Revenues	\$2,212	\$2,098	\$7,553	\$6,976
Expenses	1,986	1,801	6,889	6,148
Operating Income	226	297	664	828
Interest and Other Finance Charges	(90)	(80)	(259)	(235)
Interest on Securitization Bonds	(16)	(18)	(46)	(58)
Equity in Earnings of Unconsolidated Affiliate, net	81	68	208	199
Other Income (Expense), net	8	—	(234)	43
Income Before Income Taxes	209	267	333	777
Income Tax Expense	51	98	85	281
Net Income	158	169	248	496

Income Available to Common Shareholders	\$153	\$169	\$243	\$496
Basic Earnings Per Share	\$0.35	\$0.39	\$0.56	\$1.15
Diluted Earnings Per Share	\$0.35	\$0.39	\$0.56	\$1.14

Three months ended September 30, 2018 compared to three months ended September 30, 2017

We reported income available to common shareholders of \$153 million (\$0.35 per diluted share) for the three months ended September 30, 2018 compared to \$169 million (\$0.39 per diluted share) for the same period in 2017.

The decrease of \$16 million in income available to common shareholders was primarily due to the following key factors:

• a \$71 million decrease in operating income discussed below by segment in Results of Operations by Business Segment;

• a \$10 million increase in interest expense primarily due to the amortization of Bridge Facility fees;

• an \$8 million increase in losses on the underlying value of the indexed debt securities related to the ZENS included in Other Income (Expense), net shown above; and

▪ \$5 million increase in preferred dividend requirements on our Series A Preferred Stock.

These decreases in income available to common shareholders were partially offset by the following:

• a \$47 million decrease in income tax expense due to lower net income and a reduction in the corporate income tax rate resulting from the TCJA;

• a \$13 million increase in equity earnings from our investment in Enable, discussed further in Note 9 to the Interim Condensed Financial Statements;

• a \$9 million decrease in non-service cost components of net periodic pension and post-retirement costs included in Other Income (Expense), net shown above;

Table of Contents

- a \$6 million increase in gains on marketable securities included in Other Income (Expense), net shown above;
- a \$2 million decrease in interest expense related to lower outstanding balances of our Securitization Bonds; and
- a \$1 million increase in miscellaneous other non-operating income included in Other Income (Expense), net shown above.

Nine months ended September 30, 2018 compared to nine months ended September 30, 2017

We reported income available to common shareholders of \$243 million (\$0.56 per diluted share) for the nine months ended September 30, 2018 compared to \$496 million (\$1.14 per diluted share) for the nine months ended September 30, 2017.

The decrease of \$253 million in income available to common shareholders was primarily due to the following key factors:

- a \$257 million increase in losses on indexed debt securities related to the ZENS included in Other Income (Expense), net shown above, resulting from a loss of \$11 million from Meredith's acquisition of Time in March 2018, a loss of \$242 million from AT&T's acquisition of TW in June 2018 and increased losses of \$4 million in the underlying value of the indexed debt securities;
- a \$164 million decrease in operating income discussed below by segment in Results of Operations by Business Segment;
- a \$38 million decrease in gains on marketable securities included in Other Income (Expense), net shown above;
- a \$24 million increase in interest expense due to higher outstanding other long-term debt and the amortization of Bridge Facility fees of \$17 million; and
- a \$5 million increase in preferred dividend requirements on our Series A Preferred Stock.

These decreases in income available to common shareholders were partially offset by the following:

- a \$196 million decrease in income tax expense due to lower net income and a reduction in the corporate income tax rate resulting from the TCJA;
- a \$14 million decrease in non-service cost components of net periodic pension and post-retirement costs included in Other Income (Expense), net shown above;
- a \$12 million decrease in interest expense related to lower outstanding balances of our Securitization Bonds;
- a \$9 million increase in equity earnings from our investment in Enable, discussed further in Note 9 to the Interim Condensed Financial Statements; and
- a \$4 million increase in miscellaneous other non-operating income included in Other Income (Expense), net shown above.

Income Tax Expense

Our effective tax rate reported for the three months ended September 30, 2018 was 24% compared to 37% for the same period in 2017. The effective tax rate reported for the nine months ended September 30, 2018 was 26% compared to 36% for the same period in 2017. The lower effective tax rates for the three and nine months ended September 30, 2018 were primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate also decreased by 5% and 4%, respectively, for the three and nine months ended September 30, 2018 due to the amortization of EDIT. These decreases were partially offset by an increase to the effective tax rate of 5% for the three-month period ended September 30, 2018 as a result of the establishment of a state valuation allowance on certain net operating loss deferred tax assets that are no longer expected to be utilized prior to expiration after the Internal Spin. The effective tax rate was increased by 7% for the nine-month period ended September 30, 2018 due to state law changes and the state valuation allowance. See Note 9 to the Interim Condensed Financial Statements for further discussion on the Internal Spin. We expect our annual effective tax rate for the fiscal year ending December 31, 2018 to be approximately 24%.

Table of ContentsHOUSTON ELECTRIC'S MANAGEMENT'S NARRATIVE ANALYSIS
OF CONSOLIDATED RESULTS OF OPERATIONS

Houston Electric's results of operations are affected by seasonal fluctuations in the demand for electricity. Houston Electric's results of operations are also affected by, among other things, the actions of various governmental authorities having jurisdiction over rates Houston Electric charges, debt service costs, income tax expense, Houston Electric's ability to collect receivables from REPs and Houston Electric's ability to recover its regulatory assets. For more information regarding factors that may affect the future results of operations of Houston Electric's business, please read "Risk Factors" in Item 1A of Part I of Houston Electric's 2017 Form 10-K.

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
	(in millions, except throughput and customer data)			
Revenues	\$897	\$843	\$2,506	\$2,233
Expenses	670	589	1,979	1,723
Operating income	227	254	527	510
Interest and other finance charges	(32)	(32)	(101)	(97)
Interest on Securitization Bonds	(16)	(18)	(46)	(58)
Other expense, net	—	(3)	(6)	(9)
Income before income taxes	179	201	374	346
Income tax expense	36	71	78	123
Net income	\$143	\$130	\$296	\$223

Three months ended September 30, 2018 compared to three months ended September 30, 2017

Houston Electric reported net income of \$143 million for the three months ended September 30, 2018 compared to net income of \$130 million for the same period in 2017.

The increase of \$13 million in net income was primarily due to a \$35 million decrease in income tax expense due to lower net income and a reduction in the corporate income tax rate resulting from the TCJA.

This increase in net income was partially offset by a \$22 million decrease in TDU operating income as discussed below in Results of Operations by Business Segment.

Nine months ended September 30, 2018 compared to nine months ended September 30, 2017

Houston Electric reported net income of \$296 million for the nine months ended September 30, 2018 compared to net income of \$223 million for the nine months ended September 30, 2017.

The increase of \$73 million in net income was primarily due to the following key factors:

- a \$45 million decrease in income tax expense due to lower net income and a reduction in the corporate income tax rate resulting from the TCJA; and

-

a \$32 million increase in TDU operating income resulting from a \$27 million increase discussed below in Results of Operations by Business Segment and increased usage of \$5 million, primarily due to a return to more normal weather, which was not offset by the weather hedge loss recorded on CenterPoint Energy.

These increases in net income were partially offset by a \$4 million increase in interest expense due to higher outstanding other long-term debt.

Income Tax Expense

Houston Electric's effective tax rate reported for the three months ended September 30, 2018 was 20% compared to 35% for the same period in 2017. The effective tax rate reported for the nine months ended September 30, 2018 was 21% compared to 36% for the same period in 2017. The lower effective tax rate for the three and nine months ended September 30, 2018 was primarily

Table of Contents

due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate also decreased by 2% for both periods due to the amortization of EDIT.

CERC'S MANAGEMENT'S NARRATIVE ANALYSIS OF CONSOLIDATED RESULTS OF OPERATIONS

CERC's results of operations are affected by seasonal fluctuations in the demand for natural gas and price movements of energy commodities as well as natural gas basis differentials. CERC's results of operations are also affected by, among other things, the actions of various federal, state and local governmental authorities having jurisdiction over rates CERC charges, competition in CERC's various business operations, the effectiveness of CERC's risk management activities, debt service costs and income tax expense. For more information regarding factors that may affect the future results of operations for CERC's business, please read "Risk Factors" in Item 1A of Part I of CERC's 2017 Form 10-K.

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
	(in millions)			
Revenues	\$1,312	\$1,251	\$5,040	\$4,731
Expenses	1,319	1,220	4,894	4,442

Income tax expense (benefit)	(2)	(1)	14	69
Income (loss) from continuing operations	(35)	(4)	35	115
Income from discontinued operations, net of tax	44	42	140	124
Net Income	\$9	\$38	\$175	\$239

Three months ended September 30, 2018 compared to three months ended September 30, 2017

CERC reported net income of \$9 million for the three months ended September 30, 2018 compared to net income of \$38 million for the same period in 2017.

The decrease of \$29 million in net income was primarily due to a \$38 million decrease in operating income discussed below by segment in Results of Operations by Business Segment.

The decrease to net income was partially offset by the following:

- a \$4 million increase in miscellaneous other non-operating income included in Other expense, net shown above, primarily due to lower non-service cost components of net periodic postretirement costs;
- a \$2 million decrease in interest expense due to lower outstanding long-term debt;
- a \$2 million increase in income from discontinued operations, net of tax, discussed further in Notes 9 and 13 to the Interim Condensed Financial Statements; and
- a \$1 million decrease in income tax expense due to lower income from continuing operations and a reduction in the corporate income tax rate resulting from the TCJA, partially offset by an increase in the state tax valuation allowance.

Nine months ended September 30, 2018 compared to nine months ended September 30, 2017

CERC reported net income of \$175 million for the nine months ended September 30, 2018 compared to net income of \$239 million for the nine months ended September 30, 2017.

The decrease of \$64 million in net income was primarily due to a \$143 million decrease in operating income discussed below by segment in Results of Operations by Business Segment.

Table of Contents

The decrease to net income was partially offset by the following:

a \$55 million decrease in income tax expense due to lower income from continuing operations and a reduction in the corporate income tax rate resulting from the TCJA, partially offset by an increase in the state tax valuation allowance;

a \$16 million increase in income from discontinued operations, net of tax, discussed further in Notes 9 and 13 to the Interim Condensed Financial Statements; and

an \$8 million increase in miscellaneous other non-operating income included in Other expense, net shown above, primarily due to lower non-service cost components of net periodic postretirement costs.

Income Tax Expense - Continuing Operations

CERC's effective tax rate on the loss from continuing operations for the three months ended September 30, 2018 was 5% compared to 20% for the same period in 2017. The lower effective tax rate on the loss from continuing operations for the three months ended September 30, 2018 compared to the same period in 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate decreased by 18% due to state taxes as a result of the establishment of a state valuation allowance on certain net operating loss deferred tax assets that are no longer expected to be utilized prior to expiration after the Internal Spin. These decreases were partially offset by an increase to the effective tax rate of 15% due to the amortization of EDIT. See Note 9 to the Interim Condensed Financial Statements for further discussion on the Internal Spin.

CERC's effective tax rate reported on income from continuing operations for the nine months ended September 30, 2018 was 29% compared to 38% for the same period in 2017. The lower effective tax rate on income from continuing operations for the nine months ended September 30, 2018 compared to the same period in 2017 was primarily due to the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 as prescribed by the TCJA. The effective tax rate also decreased by 20% due to the amortization of EDIT. These decreases were partially offset by an increase to the effective tax rate of 22% as a result of an increase in state tax rates and the establishment of a state valuation allowance on certain net operating loss deferred tax assets that are no longer expected to be utilized prior to expiration after the Internal Spin. See Note 9 to the Interim Condensed Financial Statements for further discussion on the Internal Spin.

RESULTS OF OPERATIONS BY BUSINESS SEGMENT

The following table presents operating income (loss) for each business segment. Included in revenues are intersegment sales, which are accounted for as if the sales were to third parties at current market prices. See Note 16 to the Interim Condensed Financial Statements for details of business segments by Registrant.

Total	2,475,043	2,435,558	2,475,043	2,435,558

(1) Together with \$3 million of interest income for each of the three and nine months ended September 30, 2018, represents the amount necessary to pay interest on the Securitization Bonds.

Three months ended September 30, 2018 compared to three months ended September 30, 2017

Our Electric Transmission & Distribution business segment reported operating income of \$227 million for the three months ended September 30, 2018, consisting of \$214 million from the TDU and \$13 million related to the Bond Companies. For the three months ended September 30, 2017, operating income totaled \$254 million, consisting of \$236 million from the TDU and \$18 million related to the Bond Companies.

TDU operating income decreased \$22 million, primarily due to the following key factors:

increased operation and maintenance expenses, excluding transmission costs billed by transmission providers, of \$38 million primarily due to the following:

contract services of \$10 million, largely due to increased vegetation management and preventative maintenance resiliency spend;

support services of \$9 million, primarily related to technology projects;

56

Table of Contents

other miscellaneous operation and maintenance expenses of \$9 million;

labor and benefits costs of \$6 million; and

damage claims from third parties of \$4 million;

lower revenues of \$22 million due to the recording of a regulatory liability and a corresponding decrease to revenue of \$6 million reflecting the difference in revenues collected under existing customer rates and the revenues that would have been collected had existing rates been set using the lower corporate tax rate from the TCJA and lower revenues of \$16 million due to lower transmission and distribution rate filings as a result of the TCJA; and

higher depreciation and amortization expense, primarily because of ongoing additions to plant in service, and other taxes of \$5 million.

These decreases to operating income were partially offset by the following:

higher transmission-related revenues of \$14 million, exclusive of the TCJA impact discussed above, and lower transmission costs billed by transmission providers of \$8 million;

customer growth of \$9 million from the addition of over 39,000 customers;

rate increases of \$8 million related to distribution capital investments, exclusive of the TCJA impact discussed above; and

higher equity return of \$4 million, primarily related to the annual true-up of transition charges correcting for under-collections that occurred during the preceding 12 months.

Lower depreciation and amortization expenses related to AMS of \$7 million were offset by a corresponding decrease in related revenues.

Nine months ended September 30, 2018 compared to nine months ended September 30, 2017

Our Electric Transmission & Distribution business segment reported operating income of \$523 million for the nine months ended September 30, 2018, consisting of \$480 million from the TDU and \$43 million related to the Bond Companies. For the nine months ended September 30, 2017, operating income totaled \$511 million, consisting of \$453 million from the TDU and \$58 million related to the Bond Companies.

TDU operating income increased \$27 million, primarily due to the following key factors:

higher equity return of \$33 million, primarily related to the annual true-up of transition charges correcting for under-collections that occurred during the preceding 12 months;

rate increases of \$29 million related to distribution capital investments, exclusive of the TCJA impact discussed below;

higher transmission-related revenues of \$28 million, exclusive of the TCJA impact discussed below, and lower transmission costs billed by transmission providers of \$22 million;

customer growth of \$23 million from the addition of over 39,000 customers;

- higher usage of \$12 million, primarily due to a return to more normal weather;
and

increased miscellaneous revenues, including right-of-way, of \$5 million.

These increases to operating income were partially offset by the following:

increased operation and maintenance expenses, excluding transmission costs billed by transmission providers, of \$60 million primarily due to the following:

support services of \$17 million, primarily related to technology projects;

Table of Contents

other miscellaneous operation and maintenance expenses of \$14 million;

contract services of \$15 million, largely due to increase in vegetation management and preventative maintenance resiliency spend;

labor and benefits costs of \$10 million; and

damage claims from third parties of \$4 million;

lower revenues of \$53 million due to the recording of a regulatory liability and a corresponding decrease to revenue of \$30 million reflecting the difference in revenues collected under existing customer rates and the revenues that would have been collected had existing rates been set using the lower corporate tax rate from the TCJA and lower revenues of \$23 million due to lower transmission and distribution rate filings as a result of the TCJA; and

higher depreciation and amortization expense, primarily because of ongoing additions to plant in service, and other taxes of \$11 million.

Lower depreciation and amortization expenses related to AMS of \$11 million were offset by a corresponding decrease in related revenues.

Natural Gas Distribution

For information regarding factors that may affect the future results of operations of the Natural Gas Distribution business segment, please read “Risk Factors — Risk Factors Associated with Our Consolidated Financial Condition,” “— Risk Factors Affecting Our Natural Gas Distribution and Energy Services Businesses” and “— Other Risk Factors Affecting Our Businesses or Our Interests in Enable Midstream Partners, LP” in Item 1A of Part I of CenterPoint Energy’s 2017 Form 10-K.

The following table provides summary data of our Natural Gas Distribution business segment:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2018	
	2017	2018	2017	2018

Commercial and industrial	255,244	253,041	255,244	253,041
Total	3,461,160	3,432,325	3,461,160	3,432,325

Three months ended September 30, 2018 compared to three months ended September 30, 2017

Our Natural Gas Distribution business segment reported operating income of \$3 million for the three months ended September 30, 2018 compared to \$25 million for the three months ended September 30, 2017.

Table of Contents

Operating income decreased \$22 million primarily as a result of the following key factors:

• higher operation and maintenance expenses of \$25 million, primarily consisting of:

support services expense of \$7 million, primarily related to technology projects;

contracts and services, materials and supplies and damage claims from third parties of \$6 million;

labor and benefits costs of \$6 million; and

other miscellaneous operation and maintenance expenses of \$6 million;

• increased depreciation and amortization expenses of \$7 million, due to ongoing additions to plant-in-service; and

• lower revenue of \$6 million related to the lower corporate tax rate from the TCJA.

These decreases were partially offset by the following:

• a \$6 million increase from weather and usage, driven by the timing of the decoupling mechanism in Minnesota;

• a \$5 million increase in rate relief, primarily in the Texas, Arkansas, Mississippi and Minnesota jurisdictions, exclusive of the TCJA impact discussed above; and

• a \$2 million increase associated with customer growth from the addition of almost 29,000 customers.

Increased operation and maintenance expenses related to energy efficiency programs of \$1 million and increased gross receipts taxes of \$1 million were offset by corresponding increases in the related revenues.

Nine months ended September 30, 2018 compared to nine months ended September 30, 2017

Our Natural Gas Distribution business segment reported operating income of \$166 million for the nine months ended September 30, 2018 compared to \$235 million for the nine months ended September 30, 2017.

Operating income decreased \$69 million as a result of the following key factors:

• higher operation and maintenance expenses of \$35 million, primarily consisting of:

contracts and services, materials and supplies, bad debt and damage claims from third parties of \$19 million;

support services expenses of \$12 million, primarily related to technology projects; and

other miscellaneous operation and maintenance expenses of \$10 million;

which decreases were partially offset by a timing-related adjustment associated with the Texas Gulf rate order of \$6 million;

higher labor and benefits costs of \$28 million, resulting primarily from the recording of regulatory assets (and a corresponding reduction in expense) to recover \$16 million of prior post-retirement expenses in future rates established in the Texas Gulf rate order in 2017;

lower revenue of \$26 million, associated with the recording of a regulatory liability and a corresponding decrease to revenue in certain jurisdictions of \$15 million reflecting the difference in revenues collected under existing customer rates and the revenues that would have been collected had existing rates been set using the lower corporate tax rate from the TCJA and lower filing amounts in Minnesota and south Texas of \$11 million associated with the lower corporate tax rate as a result of the TCJA;

• increased depreciation and amortization expense of \$16 million, primarily due to ongoing additions to plant-in-service; and

- higher other taxes of \$9 million, primarily due to the 2017 Minnesota property tax refund.

Table of Contents

These decreases were partially offset by the following:

rate increases of \$35 million, primarily in the Texas, Minnesota and Arkansas jurisdictions, exclusive of the TCJA impact discussed above;

an increase in non-volumetric revenues of \$8 million; and

a \$6 million increase associated with customer growth from the addition of almost 29,000 customers.

Increased operation and maintenance expenses related to energy efficiency programs of \$13 million and increased gross receipts taxes of \$6 million were offset by corresponding increases in the related revenues.

Energy Services

For information regarding factors that may affect the future results of operations of the Energy Services business segment, please read “Risk Factors — Risk Factors Associated with Our Consolidated Financial Condition,” “— Risk Factors Affecting Our Natural Gas Distribution and Energy Services Businesses” and “— Other Risk Factors Affecting Our Businesses or Our Interests in Enable Midstream Partners, LP” in Item 1A of Part I of CenterPoint Energy’s 2017 Form 10-K.

The following table provides summary data of our Energy Services business segment:

	Three Months Ended		Nine Months Ended	
	September 30, 2018	September 30, 2017	September 30, 2018	September 30, 2017
	(in millions, except throughput and customer data)

Depreciation and amortization	4	3	12	9
Taxes other than income taxes	—	—	1	1
Total expenses	929	864	3,085	2,940
Operating Income (Loss)	\$(9)	\$ 7	\$(20)	\$58
Timing impacts related to mark-to-market gain (loss) (1)	\$1	\$ 2	\$(71)	\$23
Throughput (in Bcf)	307	272	993	864
Approximate number of customers at end of period (2)	30,000	31,000	30,000	31,000

(1) Includes the change in unrealized mark-to-market value and the impact from derivative assets and liabilities acquired through the purchase of Continuum and AEM.

(2) Does not include approximately 67,000 and 66,000 natural gas customers as of September 30, 2018 and 2017, respectively, that are under residential and small commercial choice programs invoiced by their host utility.

Three months ended September 30, 2018 compared to three months ended September 30, 2017

Our Energy Services business segment reported an operating loss of \$9 million for the three months ended September 30, 2018 compared to operating income of \$7 million for the three months ended September 30, 2017.

Operating income decreased \$16 million as a result of the following key factors:

a \$9 million decrease in margin due to reduced opportunities to optimize natural gas supply costs and timing impacts related to natural gas storage activity, which offset favorable margins from incremental sales volumes. Lower storage balances resulting from first quarter storage activity reduced opportunities to optimize natural gas supply costs in the third quarter;

Table of Contents

a \$6 million increase in operation and maintenance expenses, primarily due to higher legal, technology and support services expenses; and

a \$1 million decrease from mark-to-market accounting for derivatives associated with certain natural gas purchases and sales used to lock in economic margins.

Nine months ended September 30, 2018 compared to nine months ended September 30, 2017

Our Energy Services business segment reported an operating loss of \$20 million for the nine months ended September 30, 2018 compared to operating income of \$58 million for the nine months ended September 30, 2017.

Operating income decreased \$78 million as a result of the following key factors:

a \$94 million decrease from mark-to-market accounting for derivatives associated with certain natural gas purchases and sales used to lock in economic margins; and

a \$9 million increase in operation and maintenance expenses, attributable to increased technology expenses, higher contract and services expense related to pipeline integrity testing, higher support services and legal expenses.

These decreases were partially offset by a \$25 million increase in margin due to increased opportunities to optimize natural gas supply costs through storage and transportation capacity, primarily in the first quarter of 2018, and incremental volumes from customers. Realized commercial opportunities attributable to the Continuum and AEM acquisitions and colder than normal weather in several regions of the United States, primarily in the first quarter of 2018, drove incremental sales volumes.

Midstream Investments (CenterPoint Energy)

For information regarding factors that may affect the future results of operations of the Midstream Investments business segment, please read “Risk Factors — Risk Factors Affecting Our Interests in Enable Midstream Partners, LP” and “— Other Risk Factors Affecting Our Businesses or Our Interests in Enable Midstream Partners, LP” in Item 1A of Part I of CenterPoint Energy’s 2017 Form 10-K.

The following table provides pre-tax equity income of the Midstream Investments business segment:

	Three Months Ended September 30, 2018	Nine Months Ended September 30, 2017	Three Months Ended September 30, 2018	Nine Months Ended September 30, 2017
Equity earnings from Enable, net	\$81	\$68	\$208	\$199
Other Operations				

The following table shows the operating income (loss) of CenterPoint Energy’s Other Operations business segment:

Three Months Ended September 30,	Nine Months Ended September 30,

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

Future Sources and Uses of Cash

The liquidity and capital requirements of the Registrants, other than in connection with the pending Merger with Vectren (see Note 3 to the Interim Condensed Financial Statements), are affected primarily by results of operations, capital expenditures, debt service requirements, tax payments, working capital needs and various regulatory actions. Capital expenditures are expected to be used for investment in infrastructure for electric transmission and distribution operations and natural gas distribution operations. These capital expenditures are anticipated to maintain reliability and safety, increase resiliency and expand our systems through value-added projects. In addition to dividend payments on CenterPoint Energy's Series A Preferred Stock, Series B Preferred Stock and Common Stock, and in addition to interest payments on debt, the Registrants' principal anticipated cash requirements for the remaining three months of 2018 include the following:

	CenterPoint Energy	Houston Electric	CERC
	(in millions)		
Estimated capital expenditures (1)	\$538	\$ 280	\$ 232
Maturing collateralized pollution control bonds	50	—	—
Scheduled principal payments on Securitization Bonds	66	66	—

(1) Represents remaining capital expenditures based on anticipated 2018 capital expenditures as previously disclosed in CenterPoint Energy's 2017 Form 10-K.

63

Table of Contents

The Registrants expect that anticipated cash needs for the remaining three months of 2018 will be met with borrowings under their credit facilities, proceeds from the issuance of long-term debt, anticipated cash flows from operations, with respect to CenterPoint Energy and CERC, proceeds from commercial paper and with respect to CenterPoint Energy, distributions from Enable. In addition, if CenterPoint Energy decides to sell all or a portion of the Enable common units that it owns in the public equity markets or otherwise in 2018 (reducing the amount of future distributions CenterPoint Energy receives from Enable to the extent of any such sales), any net proceeds received from such sales could provide a source for CenterPoint Energy's remaining 2018 cash needs. Discretionary financing or refinancing may result in the issuance of equity securities of CenterPoint Energy or debt securities of the Registrants in the capital markets or the arrangement of additional credit facilities or term bank loans. Issuances of equity or debt in the capital markets, funds raised in the commercial paper markets, additional credit facilities and any sales of CenterPoint Energy's Enable common units may not, however, be available on acceptable terms.

For more information on CenterPoint Energy's completed financing transactions for the pending Merger, see Notes 12 and 19 to the Interim Condensed Financial Statements.

Off-Balance Sheet Arrangements

Other than Houston Electric's first mortgage bonds and general mortgage bonds issued as collateral for tax-exempt long-term debt of CenterPoint Energy as discussed below and operating leases, we have no off-balance sheet arrangements.

Regulatory Matters

Brazos Valley Connection Project (CenterPoint Energy and Houston Electric)

Houston Electric completed construction on and energized the Brazos Valley Connection in March 2018, ahead of the original June 1, 2018 energization date. The final capital costs of the project were approximately \$285 million, which was within the estimated range of approximately \$270-\$310 million in the PUCT's original order. Houston Electric applied for interim recovery of project costs through July 31, 2018 not already included in rates in a filing with the PUCT in September 2018 and is expected to receive approval for interim recovery in November 2018. Final approval by the PUCT of the project costs will occur in Houston Electric's next base rate case.

Freeport Master Plan Project (CenterPoint Energy and Houston Electric)

In April 2017, Houston Electric submitted a proposal to ERCOT requesting its endorsement of a transmission project in the greater Freeport, Texas area, which includes enhancements to two existing substations and the construction of a new 345 kV double-circuit line to be located in the counties of Brazoria, Matagorda and Wharton. On December 12, 2017, Houston Electric received approval from ERCOT. In September 2018, Houston Electric filed a certificate of convenience and necessity application with the PUCT that included capital cost estimates for the project that ranged from approximately \$482-\$695 million, which were higher than the initial cost estimates. The revised project cost estimates include additional costs associated with the routing of the line to mitigate environmental and other land use impacts and structure design to address soil and coastal wind conditions. The actual capital costs of the project will depend on those factors as well as other factors, including land acquisition costs, construction costs and the ultimate route approved by the PUCT. On the request of the PUCT, ERCOT has intervened in the proceeding and is in the process of reviewing the cost-effectiveness of the proposed project. Houston Electric anticipates that the PUCT will issue a final decision on the certificate of convenience and necessity application as early as the third quarter of 2019.

Rate Change Applications

Houston Electric and CERC are routinely involved in rate change applications before state regulatory authorities. Those applications include general rate cases, where the entire cost of service of the utility is assessed and reset. In addition, Houston Electric is periodically involved in proceedings to adjust its capital tracking mechanisms (TCOS and DCRF) and annually files to adjust its EECRF. CERC is periodically involved in proceedings to adjust its capital tracking mechanisms in Texas (GRIP), its cost of service adjustments in Arkansas, Louisiana, Mississippi and Oklahoma (FRP, RSP, RRA and PBRC, respectively), its decoupling mechanism in Minnesota, and its energy efficiency cost trackers in Arkansas, Minnesota, Mississippi and Oklahoma (EECR, CIP, EECR and EECR, respectively). The table below reflects significant applications pending or completed since our 2017 Form 10-K was filed with the SEC.

Table of Contents

Mechanism	Annual Increase (Decrease) (1) (in millions)	Filing Date	Effective Date	Approval Date	Additional Information
Houston Electric (PUCT)					
TCOS	N/A	February 2018	April 2018	April 2018	Revised TCOS annual revenue application approved in November 2017 by a reduction of \$41.6 million to recognize decrease in the federal income tax rate, amortize certain EDIT balances and adjust rate base by EDIT attributable to new plant since the last rate case, all of which are related to the TCJA.
TCOS	\$40.8	May 2018	July 2018	July 2018	Requested an increase of \$285 million to rate base and reflects a \$40.8 million annual increase in current revenues. Also reflects a one-time refund of \$6.6 million in excess federal income tax collected from January to April 2018.
TCOS	2.4	September 2018	TBD	TBD	Requested an increase of \$15.4 million to rate base and reflects a \$2.4 million annual increase in current revenues.
EECRF	8.4	June 2018	TBD	TBD	Revised application requests recovery of 2019 EECRF of \$41.7 million, including a \$8.4 million performance bonus.
DCRF	30.9	April 2018	September 2018	August 2018	Unanimous settlement agreement approved by the PUCT in August 2018 results in incremental annual revenue of \$30.9 million. It results in a \$120.6 million annual revenue requirement effective September 1, 2018. The settlement agreement also reflects an approximately \$39 million decrease in the federal income tax rate, a \$20 million decrease to return to customers the reserve recorded recognizing this decrease in the federal income tax rate from January 25, 2018 through August 31, 2018 and a \$19.2 million decrease related to the unprotected EDIT. Effective September 1, 2019, the reserve amount returned to customers ends. In December 2018, Houston Electric will file an updated DCRF tariff to adjust the interim DCRF rates to reflect any difference between the \$20 million estimated tax-expense regulatory liability and the actual tax-expense regulatory liability recorded by Houston Electric.
CERC - South Texas (Railroad Commission)					
Rate Case	(1.0)	November 2017	May 2018	May 2018	Unanimous settlement agreement approved by the Railroad Commission in May 2018 that provides for a \$1 million annual decrease in current revenues. The settlement agreement also reflects an approximately \$2 million decrease in the federal income tax rate and amortization of certain EDIT balances and

establishes a 9.8% ROE for future GRIP filings for the South Texas jurisdiction.

CERC - Beaumont/East Texas, Houston and Texas Coast (Railroad Commission)

GRIP	14.7	March 2018	July 2018	June 2018	Based on net change in invested capital of \$70.0 million and reflects a \$14.7 million annual increase in current revenues. Also reflects an approximately \$1.0 million decrease in the federal income tax rate. Beaumont/East Texas, Houston and Texas Coast proposed to decrease base rates by \$12.9 million to reflect the change in the federal income tax rate. In addition, Beaumont/East Texas proposed to decrease the GRIP charge to reflect the change in the federal income tax rate. The impact of deferred taxes is expected to be reflected in the next rate case.
Administrative 104.111	N/A	July 2018	September 2018	August 2018	

CERC - Arkansas (APSC)

FRP	13.2	August 2018	October 2018	September 2018	Based on ROE of 9.5% as approved in the last rate case and reflects a \$13.2 million annual increase in current revenues, excluding the effects of the recently enacted TCJA. With TCJA impacts considered, the annual increase is reduced by approximately \$8.1 million, which include the effects of a lower federal income tax rate and amortization of EDIT balances.
-----	------	----------------	-----------------	-------------------	--

CERC - Louisiana (LPSC)

RSP	6.6	September 2018	December 2018	TBD	Based on ROE of 9.95% and the 21% federal income tax rate and reflects a \$6.6 million annual increase in current revenues. Other impacts of the TCJA, which were calculated outside the band, reduce the annual increase by approximately \$4.3 million.
-----	-----	-------------------	------------------	-----	---

Table of Contents

Mechanism	Annual Increase (Decrease) (1) (in millions)	Filing Date	Effective Date	Approval Date	Additional Information
CERC - Minnesota (MPUC)					
Rate Case	3.9	August 2017	November 2018	July 2018	Includes a proposal to extend decoupling beyond current expiration date of June 2018. Interim rates reflecting an annual increase of \$47.8 million were effective October 1, 2017. A unanimous settlement agreement was filed in March 2018, subject to MPUC approval. The settlement agreement increases base rates by \$3.9 million, makes decoupling a permanent part of the tariff, incorporates the impact of the decrease in the federal income tax rate and amortization of EDIT balances (approximately \$20 million) and establishes or continues tracker recovery mechanisms that account for approximately \$13.3 million in the initial filing. The MPUC voted to approve the settlement and a formal order was issued on July 20, 2018. Final rates (and the refund of interim rates that exceed final rates) will be implemented beginning November 1, 2018.
Decoupling (13.8)		September 2018	September 2018	TBD	Represents revenue over-recovery of \$21.9 million recorded for and during the period July 1, 2017 through June 30, 2018 offset by the rate and prior period adjustments totaling \$8.1 million recorded in third quarter 2018.
CIP	12.5	May 2018	September 2018	September 2018	Annual reconciliation filing for program year 2017 and includes performance bonus of \$12.5 million which was recorded in September 2018.
CERC - Mississippi (MPSC)					
RRA	3.2	May 2018	November 2018	November 2018	Based on authorized ROE of 9.144% and a capital structure of 50% debt and 50% equity and reflects a \$3.2 million annual increase in revenues.
CERC - Oklahoma (OCC)					
PBRC	5.4	March 2018	October 2018	October 2018	Based on ROE of 10% and reflects a \$5.4 million annual increase in revenues. As a result of the final order, all EDIT was removed from the PBRC calculation. Protected EDIT amortization will begin to be refunded in April 2019 via one-time annual bill credits. Unprotected EDIT will be refunded over a five-year period via annual bill credits beginning in October 2018.

(1) Represents proposed increases (decreases) when effective date and/or approval date is not yet determined.
 (1) Approved rates could differ materially from proposed rates.

Tax Reform

For Houston Electric and CERC's NGD, federal income tax expense is included in the rates approved by state commissions and local municipalities and charged by those utilities to consumers. As Houston Electric and NGD file general rate cases and other periodic rate adjustments, the impacts of the TCJA (including the lower tax rate and the calculation and amortization of EDIT), along with other increases and decreases in our revenue requirements, will be incorporated into Houston Electric's and NGD's future rates as allowed by IRS rules. The effect of any potential return of tax savings resulting from the TCJA to consumers may differ depending on how each regulatory body requires us to return such savings. Regulatory commissions across most of Houston Electric's and NGD's jurisdictions have issued accounting orders to track or record a regulatory liability for (1) the difference between revenues collected under existing rates and revenues that would have been collected had the existing rates been set using the recently approved federal income tax rates and (2) the balance of EDIT that now exists because of the reduction in federal income tax rates.

On January 25, 2018, the PUCT issued an accounting order in Project No. 47945 directing electric utilities, including Houston Electric, to record as a regulatory liability (1) the difference between revenues collected under existing rates and revenues that would have been collected had the existing rates been set using the recently approved federal income tax rates and (2) the balance of EDIT that now exists because of the reduction in federal income tax rates. On February 13, 2018, Houston Electric and other likely parties to a future rate case announced a settlement that requires Houston Electric to make (i) a TCOS filing by February 20, 2018 to reflect the change in the federal income tax rate for Houston Electric's transmission rate base through July 31, 2017 and account for certain EDIT (and such filing was timely submitted), (ii) a DCRF filing in April 2018 to reflect the change in the federal income tax rate for Houston Electric's distribution rate base through December 31, 2017 (and such filing was timely submitted) and (iii) a full rate case filing by April 30, 2019. The settlement was presented to the PUCT during its open meeting on February 15, 2018. In response to the settlement, the PUCT did not proceed with a prior proposal to require Houston Electric to file a rate case in the summer of 2018. The PUCT also amended its prior accounting order to remove the requirement that utilities include carrying costs in the new regulatory liability. Additional information related to tax reform for Houston Electric is described in the table above.

On January 12, 2018, the APSC issued an order in Docket No. 18-006-U opening an investigatory docket into the TCJA and directing utilities, including CERC, to record as a regulatory liability the current and deferred impacts of the TCJA. On July 26, 2018, the APSC issued an order in the investigatory docket requiring CERC to (1) include the reduction in tax expense due to the

Table of Contents

January 1, 2018 change in the tax rate from 35% to 21% in the utility's FRP as a reduction to the revenue requirement; this reduction will be reflected in the utility's historical year netting process in the 2019 FRP filing; (2) file and include all unprotected EDIT, including plant-related unprotected EDIT, in a separate rider within 30 days and refund the entire balance before December 31, 2019; (3) include protected EDIT in the FRP and amortize such amount using the ARAM method; and (4) adjust all other riders impacted by the TCJA changes and apply carrying charges calculated using the pre-tax cost of capital of 6.44% for the amounts related to the TCJA within 30 days of the July 26, 2018 order. On August 24, 2018 CERC filed Rider TCJA in Docket No. 18-050-TF. This rider returns the entire unprotected excess ADIT of approximately \$19 million over five months from October 2018 through February 2019. The GMES Rider, which is not currently in effect, was revised to reflect the effects of the TCJA. No other riders were impacted. On September 21, 2018, the APSC approved Rider TCJA as filed, with an effective date of October 1, 2018.

On October 5, 2018, the LPSC Staff filed its Final Report and Recommended Proposed Rule in Docket No. R-34754, which addresses the TCJA. The proposed rule recommends that CERC (1) adjust rates prospectively to reflect the new 21% federal corporate income tax rate; (2) refund to ratepayers 100% of federal corporate income taxes collected that are in excess of the new lower applicable tax rate plus carrying cost at the utility's WACC over a 12-month period or other period approved by the LPSC; (3) accrue carrying charges on EDIT balances at the utility's WACC until fully amortized, except to the extent ratepayers are receiving benefits of EDIT as a reduction to rate base; (4) amortize protected EDIT over ARAM and implement through an outside-the-band reduction in rates attributable to the annual amortization; and (5) amortize unprotected EDIT over 24 months or other period approved by the LPSC and implement through an outside-the-band reduction in rates or special tax rider. The LPSC Staff presented this proposed rule to the LPSC for vote at the October 26, 2018 Business & Executive Session. The anticipated implementation date for these TCJA related changes begins December 26, 2018, concurrent with the RSP implementation, with the time frame of the return of unprotected EDIT still to be determined.

On November 6, 2018, within the order approving the 2018 Mississippi RRA, the MPSC ruled that protected EDIT will be amortized over ARAM beginning with the 2019 RRA, unprotected EDIT will be amortized over a three-year period beginning December 1, 2018, and the refund due to the change in tax rate for 2018 billings prior to the 2018 RRA implementation will be a component of the 2019 RRA filing for the 2018 calendar year.

FERC Revised Policy Statement and NOPR (CenterPoint Energy and CERC)

On March 15, 2018, the FERC addressed treatment of federal income tax allowances in FERC-regulated pipeline rates. The FERC issued a Revised Policy Statement stating that it will no longer permit pipelines organized as MLPs to recover an income tax allowance in their cost-of-service rates. The FERC issued the Revised Policy Statement in response to a remand from the U.S. Court of Appeals for the D.C. Circuit in *United Airlines v. FERC*. On July 18, 2018, the FERC issued an order denying requests for rehearing of its Revised Policy Statement because it is a non-binding policy and parties will have the opportunity to address the policy as applied in future cases. Accordingly, the impacts that such changes may have on the rates Enable can charge for transportation services are unknown at this time.

On March 15, 2018, the FERC also proposed, in a NOPR, the method by which it would apply the Revised Policy Statement to FERC-jurisdictional natural gas pipeline rates, as well as account for the corporate income tax rate reduction in the TCJA. On July 18, 2018, the FERC issued a final rule requiring FERC-regulated natural gas pipelines that have cost-based rates to make a filing providing certain cost and revenue information and then either propose to reduce or support current cost-based rates, or take no further action. The final rule is currently subject to requests for rehearing. Enable Gas Transmission, LLC, an Enable subsidiary and owner of a FERC-regulated interstate natural gas pipeline, made its required filing on October 11, 2018, in which it asserted that no rate reduction is warranted. That filing remains subject to FERC review. Enable's other interstate pipeline subsidiary, Enable Mississippi River

Transmission, LLC, is not required to make such a filing as it is engaged in an ongoing rate case. At this time, we cannot predict the outcome of the final rule on Enable, but it could adversely impact the rates Enable is permitted to charge its customers.

Other Matters

Credit Facilities

The Registrants may draw on their respective revolving credit facilities from time to time to provide funds used for general corporate and limited liability company purposes, including to backstop CenterPoint Energy's and CERC's commercial paper programs. The facilities may also be utilized to obtain letters of credit. For further details related to the Registrants' revolving credit facilities, please see Note 12 to the Interim Condensed Financial Statements.

Table of Contents

As of October 22, 2018, the Registrants had the following facilities:

Registrant	Size of Facility	Amount Utilized (1)	Termination Date
(in millions)			
CenterPoint Energy	\$ 3,300 (2)	\$ 6 (3)	March 3, 2022
Houston Electric	300	4 (3)	March 3, 2022
CERC Corp.	900	26 (4)	March 3, 2022

Based on the consolidated debt to capitalization covenant in our revolving credit facility and the revolving credit (1) facility of each of Houston Electric and CERC Corp., we would have been permitted to utilize the full capacity of such revolving credit facilities, which currently aggregate \$4.5 billion.

Pursuant to the amendment entered into in May 2018, the aggregate commitments under the CenterPoint Energy revolving credit facility increased to \$3.3 billion on October 5, 2018 due to the satisfaction of certain conditions, (2) including the termination of the Bridge Facility. For further information, see Note 12 to the Interim Condensed Financial Statements.

(3) Represents outstanding letters of credit.

(4) Represents outstanding commercial paper of \$25 million and outstanding letters of credit of \$1 million.

Borrowings under each of the three revolving credit facilities are subject to customary terms and conditions. However, there is no requirement that the borrower makes representations prior to borrowing as to the absence of material adverse changes or litigation that could be expected to have a material adverse effect. Borrowings under each of the revolving credit facilities are subject to acceleration upon the occurrence of events of default that we consider customary. The revolving credit facilities also provide for customary fees, including commitment fees, administrative agent fees, fees in respect of letters of credit and other fees. In each of the three revolving credit facilities, the spread to LIBOR and the commitment fees fluctuate based on the borrower's credit rating. The borrowers are currently in compliance with the various business and financial covenants in the three revolving credit facilities.

Long-term Debt

In February 2018, Houston Electric issued \$400 million aggregate principal amount of general mortgage bonds. In March 2018, CERC Corp. issued \$600 million aggregate principal amount of unsecured senior notes. In October 2018, CenterPoint Energy issued \$1.5 billion aggregate principal amount of unsecured senior notes. For further information about our 2018 debt issuances, see Note 12 to the Interim Condensed Financial Statements.

As of September 30, 2018, Houston Electric's outstanding first mortgage bonds and general mortgage bonds aggregated approximately \$3.4 billion, of which \$118 million is not reflected in its consolidated financial statements because of the contingent nature of the obligation.

The lien of the general mortgage indenture is junior to that of the mortgage pursuant to which the first mortgage bonds are issued. Houston Electric may issue additional general mortgage bonds on the basis of retired bonds, 70% of property additions or cash deposited with the trustee. Approximately \$4.2 billion of additional first mortgage bonds and general mortgage bonds could be issued on the basis of retired bonds and 70% of property additions as of September 30, 2018. Houston Electric has contractually agreed that it will not issue additional first mortgage bonds, subject to certain exceptions.

Table of Contents

Houston Electric's long-term debt consists of its obligations and the obligations of its subsidiaries, including Securitization Bonds issued by its wholly-owned subsidiaries. As of September 30, 2018, the Bond Companies had the following aggregate principal amount, exclusive of debt issuance costs, of Securitization Bonds outstanding.

Company	Aggregate Principal Amount Outstanding (in millions)
Bond Company II	\$ 208
Bond Company III	85
Bond Company IV	955
Restoration Bond Company	256
Total	\$ 1,504

The Securitization Bonds are paid through the imposition of "transition" or "system restoration" charges, as defined in the Texas Public Utility Regulatory Act, which are irrevocable, non-bypassable charges to provide recovery of authorized qualified costs. The Securitization Bonds are reported as our long-term debt, although the holders of these bonds have no recourse to any of our assets or revenues, and our creditors have no recourse to any assets or revenues (including, without limitation, the transition or system restoration charges) of the Bond Companies. Houston Electric has no payment obligations with respect to the Securitization Bonds except to remit collections of transition and system restoration charges as set forth in servicing agreements between Houston Electric and the Bond Companies and in an intercreditor agreement among Houston Electric, the Bond Companies and other parties.

Securities Registered with the SEC

On January 31, 2017, the Registrants filed a joint shelf registration statement with the SEC, as amended on September 24, 2018, registering indeterminate principal amounts of Houston Electric's general mortgage bonds, CERC Corp.'s senior debt securities and CenterPoint Energy's senior debt securities and junior subordinated debt securities and an indeterminate number of CenterPoint Energy's shares of Common Stock, shares of preferred stock, depositary shares, as well as stock purchase contracts and equity units. The joint shelf registration statement will expire on January 31, 2020. For information related to debt and equity security issuances in 2018, see Notes 12 and 19 to the Interim Condensed Financial Statements.

Temporary Investments

As of October 22, 2018, the Registrants had \$4.2 billion temporary external investments.

Money Pool (Houston Electric and CERC)

We have a money pool through which the holding company and participating subsidiaries can borrow or invest on a short-term basis. CNP Midstream cannot borrow from the money pool but can invest in it. Funding needs are aggregated and external borrowing or investing is based on the net cash position. The net funding requirements of the money pool are expected to be met with borrowings under our revolving credit facility or the sale of our commercial paper. The money pool may not provide sufficient funds to meet our subsidiaries' cash needs. As of October 22, 2018, Houston Electric had borrowings from the money pool of \$79 million, and CERC had investments in the money pool of \$38 million.

Impact on Liquidity of a Downgrade in Credit Ratings

Edgar Filing: CENTERPOINT ENERGY INC - Form 10-Q

The interest on borrowings under the Registrants' credit facilities is based on their credit ratings. On September 4, 2018, Moody's revised its rating outlook on CERC senior debt to positive from stable and upgraded its rating to Baa1 from Baa2. On September 6, 2018, Fitch revised its rating outlook on CERC senior debt to stable from positive and upgraded its rating to BBB+ from BBB. As of October 22, 2018, Moody's, S&P and Fitch had assigned the following credit ratings to senior debt of the Registrants:

Company/Instrument	Moody's		S&P		Fitch	
	Rating	Outlook (1)	Rating	CreditWatch (2)	Rating	Outlook (3)
CenterPoint Energy Senior Unsecured Debt	Baa1	Negative	BBB+	Negative	BBB	Stable
Houston Electric Senior Secured Debt	A1	Stable	A	Negative	A+	Stable
CERC Corp. Senior Unsecured Debt	Baa1	Positive	A-	Negative	BBB+	Stable

Table of Contents

(1) A Moody's rating outlook is an opinion regarding the likely direction of an issuer's rating over the medium term.

(2) An S&P CreditWatch assesses the potential direction of a short-term or long-term credit rating.

(3) A Fitch rating outlook indicates the direction a rating is likely to move over a one- to two-year period.

We cannot assure that the ratings set forth above will remain in effect for any given period of time or that one or more of these ratings will not be lowered or withdrawn entirely by a rating agency. We note that these credit ratings are included for informational purposes and are not recommendations to buy, sell or hold our securities and may be revised or withdrawn at any time by the rating agency. Each rating should be evaluated independently of any other rating. Any future reduction or withdrawal of one or more of our credit ratings could have a material adverse impact on our ability to obtain short- and long-term financing, the cost of such financings and the execution of our commercial strategies.

A decline in credit ratings could increase borrowing costs under the Registrants' revolving credit facilities. If the Registrants' credit ratings had been downgraded one notch by each of the three principal credit rating agencies from the ratings that existed as of September 30, 2018, the impact on the borrowing costs under the three revolving credit facilities would have been immaterial. A decline in credit ratings would also increase the interest rate on long-term debt to be issued in the capital markets and could negatively impact the Registrants' ability to complete capital market transactions and to access the commercial paper market. Additionally, a decline in credit ratings could increase cash collateral requirements and reduce earnings of CenterPoint Energy's and CERC's Natural Gas Distribution and Energy Services business segments.

CES, a wholly-owned subsidiary of CERC Corp. operating in our Energy Services business segment, provides natural gas sales and services primarily to commercial and industrial customers and electric and natural gas utilities throughout the United States. To economically hedge its exposure to natural gas prices, CES uses derivatives with provisions standard for the industry, including those pertaining to credit thresholds. Typically, the credit threshold negotiated with each counterparty defines the amount of unsecured credit that such counterparty will extend to CES. To the extent that the credit exposure that a counterparty has to CES at a particular time does not exceed that credit threshold, CES is not obligated to provide collateral. Mark-to-market exposure in excess of the credit threshold is routinely collateralized by CES. Similarly, mark-to-market exposure offsetting and exceeding the credit threshold may cause the counterparty to provide collateral to CES. As of September 30, 2018, the amount posted by CES as collateral aggregated approximately \$41 million. Should the credit ratings of CERC Corp. (as the credit support provider for CES) fall below certain levels, CES would be required to provide additional collateral up to the amount of its previously unsecured credit limit. We estimate that as of September 30, 2018, unsecured credit limits extended to CES by counterparties aggregated \$268 million, and none of such amount was utilized.

Pipeline tariffs and contracts typically provide that if the credit ratings of a shipper or the shipper's guarantor drop below a threshold level, which is generally investment grade ratings from both Moody's and S&P, cash or other collateral may be demanded from the shipper in an amount equal to the sum of three months' charges for pipeline services plus the unrecouped cost of any lateral built for such shipper. If the credit ratings of CERC Corp. decline below the applicable threshold levels, CERC Corp. might need to provide cash or other collateral of as much as \$185 million as of September 30, 2018. The amount of collateral will depend on seasonal variations in transportation levels.

ZENS and Securities Related to ZENS (CenterPoint Energy)

If our creditworthiness were to drop such that ZENS holders thought our liquidity was adversely affected or the market for the ZENS were to become illiquid, some ZENS holders might decide to exchange their ZENS for cash. Funds for the payment of cash upon exchange could be obtained from the sale of the shares of ZENS-Related

Securities that we own or from other sources. We own shares of ZENS-Related Securities equal to approximately 100% of the reference shares used to calculate our obligation to the holders of the ZENS. ZENS exchanges result in a cash outflow because tax deferrals related to the ZENS and ZENS-Related Securities shares would typically cease when ZENS are exchanged or otherwise retired and ZENS-Related Securities shares are sold. The ultimate tax liability related to the ZENS continues to increase by the amount of the tax benefit realized each year, and there could be a significant cash outflow when the taxes are paid as a result of the retirement of the ZENS. If all ZENS had been exchanged for cash on September 30, 2018, deferred taxes of approximately \$410 million would have been payable in 2018. If all the ZENS-Related Securities had been sold on September 30, 2018, capital gains taxes of approximately \$109 million would have been payable in 2018. For additional information about ZENS, see Note 11 to the Interim Condensed Financial Statements.

Cross Defaults

Under CenterPoint Energy's revolving credit facility, a payment default on, or a non-payment default that permits acceleration of, any indebtedness for borrowed money and certain other specified types of obligations (including guarantees) exceeding

70

Table of Contents

\$125 million by it or any of its significant subsidiaries will cause a default. A default by CenterPoint Energy would not trigger a default under its subsidiaries' debt instruments or revolving credit facilities.

Possible Acquisitions, Divestitures and Joint Ventures

From time to time, we consider the acquisition or the disposition of assets or businesses or possible joint ventures, strategic initiatives or other joint ownership arrangements with respect to assets or businesses. Any determination to take action in this regard will be based on market conditions and opportunities existing at the time, and accordingly, the timing, size or success of any efforts and the associated potential capital commitments are unpredictable. We may seek to fund all or part of any such efforts with proceeds from debt and/or equity issuances. Debt or equity financing may not, however, be available to us at that time due to a variety of events, including, among others, maintenance of our credit ratings, industry conditions, general economic conditions, market conditions and market perceptions.

Enable Midstream Partners (CenterPoint Energy and CERC)

In September 2018, CERC completed the Internal Spin, after which CERC's equity investment in Enable met the criteria for discontinued operations classification. As a result, the operations have been classified as Income from discontinued operations, net of tax, in CERC's Condensed Statements of Consolidated Income for the periods presented. For further information, see Note 9 to the Interim Condensed Financial Statements.

CenterPoint Energy receives quarterly cash distributions from Enable on its common units and Enable Series A Preferred Units. A reduction in the cash distributions CenterPoint Energy receives from Enable could significantly impact CenterPoint Energy's liquidity. For additional information about cash distributions from Enable, see Notes 9 and 20 to the Interim Condensed Financial Statements.

Hedging of Interest Expense for Future Debt Issuances

From time to time, we may enter into forward interest rate agreements to hedge, in part, volatility in the U.S. treasury rates by reducing variability in cash flows related to interest payments. For further information, see Note 7(a) to the Interim Condensed Financial Statements.

Weather Hedge (CenterPoint Energy and CERC)

We have historically entered into partial weather hedges for certain NGD jurisdictions and electric operations' service territory to mitigate the impact of fluctuations from normal weather. We remain exposed to some weather risk as a result of the partial hedges. For more information about our weather hedges, see Note 7(a) to the Interim Condensed Financial Statements.

Collection of Receivables from REPs (CenterPoint Energy and Houston Electric)

Houston Electric's receivables from the distribution of electricity are collected from REPs that supply the electricity Houston Electric distributes to their customers. Before conducting business, a REP must register with the PUCT and must meet certain financial qualifications. Nevertheless, adverse economic conditions, structural problems in the market served by ERCOT or financial difficulties of one or more REPs could impair the ability of these REPs to pay for Houston Electric's services or could cause them to delay such payments. Houston Electric depends on these REPs to remit payments on a timely basis, and any delay or default in payment by REPs could adversely affect Houston Electric's cash flows. In the event of a REP's default, Houston Electric's tariff provides a number of remedies, including the option for Houston Electric to request that the PUCT suspend or revoke the certification of the REP. Applicable regulatory provisions require that customers be shifted to another REP or a provider of last resort if a REP cannot

make timely payments. However, Houston Electric remains at risk for payments related to services provided prior to the shift to the replacement REP or the provider of last resort. If a REP were unable to meet its obligations, it could consider, among various options, restructuring under the bankruptcy laws, in which event such REP might seek to avoid honoring its obligations and claims might be made against Houston Electric involving payments it had received from such REP. If a REP were to file for bankruptcy, Houston Electric may not be successful in recovering accrued receivables owed by such REP that are unpaid as of the date the REP filed for bankruptcy. However, PUCT regulations authorize utilities, such as Houston Electric, to defer bad debts resulting from defaults by REPs for recovery in future rate cases, subject to a review of reasonableness and necessity.

Table of Contents

Other Factors that Could Affect Cash Requirements

In addition to the above factors, our liquidity and capital resources could be affected by:

cash collateral requirements that could exist in connection with certain contracts, including weather hedging arrangements, and natural gas purchases, natural gas price and natural gas storage activities of the Natural Gas Distribution and Energy Services business segments;

acceleration of payment dates on certain gas supply contracts, under certain circumstances, as a result of increased natural gas prices and concentration of natural gas suppliers;

increased costs related to the acquisition of natural gas;

increases in interest expense in connection with debt refinancings and borrowings under credit facilities;

various legislative or regulatory actions;

incremental collateral, if any, that may be required due to regulation of derivatives;

the ability of GenOn and its subsidiaries, currently the subject of bankruptcy proceedings, to satisfy their obligations to us, including indemnity obligations, which may be contested by GenOn;

the ability of REPs, including REP affiliates of NRG and Vistra Energy Corp., formerly known as TCEH Corp., to satisfy their obligations to CenterPoint Energy and Houston Electric;

slower customer payments and increased write-offs of receivables due to higher natural gas prices or changing economic conditions;

the outcome of litigation;

contributions to pension and postretirement benefit plans;

restoration costs and revenue losses resulting from future natural disasters such as hurricanes and the timing of recovery of such restoration costs; and

various other risks identified in "Risk Factors" in Item 1A of Part I of each of the Registrants' 2017 Form 10-K and Item 1A of Part II of CenterPoint Energy's First Quarter 2018 Form 10-Q.

Certain Contractual Limits on Our Ability to Issue Securities and Borrow Money

Houston Electric has contractually agreed that it will not issue additional first mortgage bonds, subject to certain exceptions. For information about the total debt to capitalization financial covenants in our revolving credit facilities, see Note 12 to the Interim Condensed Financial Statements.

NEW ACCOUNTING PRONOUNCEMENTS

See Note 2 to the Interim Condensed Financial Statements, incorporated herein by reference, for a discussion of new accounting pronouncements that affect us.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk (CenterPoint Energy)

As of September 30, 2018, we had outstanding long-term debt, lease obligations and obligations under our ZENS that subject us to the risk of loss associated with movements in market interest rates.

Our floating rate obligations aggregated \$202 million and \$1.8 billion as of September 30, 2018 and December 31, 2017, respectively. If the floating interest rates were to increase by 10% from September 30, 2018 rates, our combined interest expense would increase by less than \$1 million annually.

Table of Contents

As of September 30, 2018 and December 31, 2017, we had outstanding fixed-rate debt (excluding indexed debt securities) aggregating \$7.6 billion and \$7.0 billion, respectively, in principal amount and having a fair value of \$7.8 billion and \$7.5 billion, respectively. Because these instruments are fixed-rate, they do not expose us to the risk of loss in earnings due to changes in market interest rates. However, the fair value of these instruments would increase by approximately \$263 million if interest rates were to decline by 10% from levels at September 30, 2018. In general, such an increase in fair value would impact earnings and cash flows only if we were to reacquire all or a portion of these instruments prior to their maturity.

The ZENS obligation is bifurcated into a debt component and a derivative component. The debt component of \$25 million as of September 30, 2018 was a fixed-rate obligation and, therefore, did not expose us to the risk of loss in earnings due to changes in market interest rates. However, the fair value of the debt component would increase by approximately \$8 million if interest rates were to decline by 10% from levels at September 30, 2018. Changes in the fair value of the derivative component, a \$685 million recorded liability at September 30, 2018, are recorded in our Condensed Statements of Consolidated Income and, therefore, we are exposed to changes in the fair value of the derivative component as a result of changes in the underlying risk-free interest rate. If the risk-free interest rate were to increase by 10% from September 30, 2018 levels, the fair value of the derivative component liability would decrease by approximately \$2 million, which would be recorded as an unrealized gain in our Condensed Statements of Consolidated Income.

Equity Market Value Risk (CenterPoint Energy)

We are exposed to equity market value risk through our ownership of 10.2 million shares of AT&T Common and 0.9 million shares of Charter Common, which we hold to facilitate our ability to meet our obligations under the ZENS. Changes in the fair value of the ZENS-Related Securities held by CenterPoint Energy are expected to substantially offset changes in the fair value of the derivative component of the ZENS. A decrease of 10% from the September 30, 2018 aggregate market value of these shares would result in a net loss of approximately less than \$1 million, which would be recorded as an unrealized loss in our Condensed Statements of Consolidated Income.

Commodity Price Risk From Non-Trading Activities (CenterPoint Energy and CERC)

We use derivative instruments as economic hedges to offset the commodity price exposure inherent in our businesses. The commodity risk created by these instruments, including the offsetting impact on the market value of natural gas inventory, is described below. We measure this commodity risk using a sensitivity analysis. For purposes of this analysis, we estimate commodity price risk by applying a \$0.50 change in the forward NYMEX price to our net open fixed price position (including forward fixed price physical contracts, natural gas inventory and fixed price financial contracts) at the end of each period. As of September 30, 2018, the recorded fair value of our non-trading energy derivatives was a net asset of \$51 million (before collateral), all of which is related to our Energy Services business segment. A \$0.50 change in the forward NYMEX price would have had a combined impact of \$7 million on our non-trading energy derivatives net asset and the market value of natural gas inventory.

Commodity price risk is not limited to changes in forward NYMEX prices. Variation of commodity pricing between the different indices used to mark to market portions of our natural gas inventory (Gas Daily) and the related fair value hedge (NYMEX) can result in volatility to our net income. Over time, any gains or losses on the sale of storage gas inventory would be offset by gains or losses on the fair value hedges.

Item 4. CONTROLS AND PROCEDURES

In accordance with Exchange Act Rules 13a-15 and 15d-15, the Registrants carried out separate evaluations, under the supervision and with the participation of each company's management, including the principal executive officer and

principal financial officer, of the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report. Based on those evaluations, the principal executive officer and principal financial officer, in each case, concluded that the disclosure controls and procedures were effective as of September 30, 2018 to provide assurance that information required to be disclosed in the reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and such information is accumulated and communicated to management, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding disclosure.

There has been no change in the Registrants' internal controls over financial reporting that occurred during the three months ended September 30, 2018 that has materially affected, or is reasonably likely to materially affect, the Registrants' internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

For a description of certain legal and regulatory proceedings, please read Note 14(b) to the Interim Condensed Financial Statements and “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Future Sources and Uses of Cash” and “— Regulatory Matters,” each of which is incorporated herein by reference. See also “Business — Regulation” and “— Environmental Matters” in Item 1 and “Legal Proceedings” in Item 3 of each of the Registrants’ 2017 Form 10-K.

Item 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in each of the Registrants’ 2017 Form 10-K and CenterPoint Energy’s First Quarter 2018 Form 10-Q.

Item 6. EXHIBITS

Exhibits filed herewith are designated by a cross (+); all exhibits not so designated are incorporated by reference to a prior filing as indicated. Agreements included as exhibits are included only to provide information to investors regarding their terms. Agreements listed below may contain representations, warranties and other provisions that were made, among other things, to provide the parties thereto with specified rights and obligations and to allocate risk among them, and no such agreement should be relied upon as constituting or providing any factual disclosures about the Registrants, any other persons, any state of affairs or other matters.

Pursuant to Item 601(b)(4)(iii)(A) of Regulation S-K, the Registrants have not filed as exhibits to this Form 10-Q certain long-term debt instruments, including indentures, under which the total amount of securities authorized does not exceed 10% of the total assets of the Registrants and its subsidiaries on a consolidated basis. The Registrants hereby agree to furnish a copy of any such instrument to the SEC upon request.
