SAFE-HARBOR STATEMENT

This Quarterly Report may contain “forward-looking statements” as defined under United States (U.S.) federal securities laws. These statements reflect management's current knowledge, assumptions, beliefs, estimates, and expectations and express management's current view of future performance, results, and trends. Forward looking statements may be identified by their use of terms such as anticipate, believe, could, estimate, expect, intend, may, plan, predict, project, will, and other similar terms. Forward-looking statements are subject to a number of risks and uncertainties that could cause actual results to materially differ from those described in the forward-looking statements. The reader should not place undue reliance on forward-looking statements. Such statements are made as of the date of this Quarterly Report, and we undertake no obligation to update such statements after this date. Risks and uncertainties that could cause our actual results to materially differ from those described in forward-looking statements are discussed in our filings with the Securities and Exchange Commission (including those described in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012 and this Quarterly Report on Form 10-Q for the quarter ended June 30, 2013, in each case under the heading “Risk Factors” and elsewhere in such filings). By way of example and without implied limitation, such risks and uncertainties include:

- failure to realize the anticipated financial and other benefits from the acquisition of BioMimetic Therapeutics, Inc. or a delay in realization thereof; failure to obtain, or a delay in obtaining, Food and Drug Administration (FDA) approval of Augment<sup>®</sup> Bone Graft, or a material limitation on the scope of such approval; lower than anticipated market acceptance of, or annual market demand for, Augment<sup>®</sup> Bone Graft;
- failure to obtain necessary approvals, or other intervening events, which could delay or prevent the previously announced sale of our hip/knee business from closing;
- future actions of the Securities and Exchange Commission (SEC), the United States Attorney's office, the FDA, the Department of Health and Human Services or other U.S. or foreign government authorities that could delay, limit or suspend our development, manufacturing, commercialization and sale of products, or result in seizures, injunctions, monetary sanctions or criminal or civil liabilities;
- failure or delay in obtaining FDA or other regulatory approvals for our products;
- any actual or alleged breach of the Corporate Integrity Agreement to which we are subject through September 2015, which could expose us to significant liability, including exclusion from Medicare, Medicaid and other federal healthcare programs, potential criminal prosecution, and civil and criminal fines or penalties;
- adverse outcomes in existing product liability litigation;
- new product liability claims;
- inadequate insurance coverage;
- the possibility of private securities litigation or shareholder derivative suits;
- demand for and market acceptance of our new and existing products;
- potentially burdensome tax measures;
- recently enacted healthcare laws and changes in product reimbursements which could generate downward pressure on our product pricing;
- lack of suitable business development opportunities or inability to capitalize on business development opportunities;
- product quality or patient safety issues;
- challenges to our intellectual property rights;
- geographic and product mix impact on our sales;
- our inability to retain key sales representatives, independent distributors and other personnel or to attract new talent;
- inventory reductions or fluctuations in buying patterns by wholesalers or distributors;
- inability to realize the anticipated benefits of restructuring initiatives;
- negative impact of the commercial and credit environment on us, our customers and our suppliers; and
- the potentially negative effect of our ongoing compliance enhancements on our relationships with customers and on our ability to deliver timely and effective medical education, clinical studies, and new products.

WRIGHT MEDICAL GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)

1. Summary of Significant Accounting Policies

**Basis of Presentation.** The unaudited condensed consolidated interim financial statements of Wright Medical Group, Inc. have been prepared in accordance with accounting principles generally accepted in the United States (U.S.) for interim financial information and the instructions to Quarterly Report on Form 10-Q and Rule 10-01 of Regulation S-X. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the U.S. have been condensed or omitted pursuant to these rules and regulations. Accordingly, these unaudited condensed consolidated interim financial statements should be read in conjunction with our consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2012, as filed with the U.S. Securities and Exchange Commission (SEC). In the opinion of management, these unaudited condensed consolidated interim financial statements reflect all adjustments necessary for a fair presentation of our interim financial results. All such adjustments are of a normal and recurring nature. The results of operations for any interim period are not indicative of results for the full fiscal year. Certain prior year amounts have been reclassified to conform to current year presentation, including amounts related to discontinued operations.

The accompanying unaudited condensed consolidated interim financial statements include our accounts and those of our domestic and international subsidiaries, all of which are wholly-owned subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation.

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the dates of the financial statements and the amounts of revenues and expenses during the reporting periods. Actual amounts realized or paid could differ from those estimates.

**Fair Value of Financial Instruments.** The carrying values of cash and cash equivalents, accounts receivable, and accounts payable approximate the fair values of these financial instruments as of June 30, 2013 and December 31, 2012 due to their short maturities or variable rates.

The \$3.8 million of our 2014 convertible senior notes are carried at cost. The estimated fair value of our 2014 convertible senior notes was approximately \$3.8 million at June 30, 2013, based on trades (Level 1) and does not necessarily represent the value at which the entire 2014 convertible senior note portfolio can be retired.

The \$300 million of our 2.00% cash convertible senior notes (2017 Notes) are carried at cost. The estimated fair value of our 2017 Notes was approximately \$364.9 million at June 30, 2013, which includes the conversion derivative described in Note 8 of the financial statements, based on a quoted price in an active market (Level 1).

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 820, Fair Value Measurement, requires fair value measurements be classified and disclosed in one of the following three categories: Level 1: Financial instruments with unadjusted, quoted prices listed on active market exchanges.

Level 2: Financial instruments determined using prices for recently traded financial instruments with similar underlying terms as well as directly or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3: Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

We use a third-party provider to determine fair values of our available-for-sale debt securities. The third-party provider receives market prices for each marketable security from a variety of industry standard data providers, security master files from large financial institutions and other third-party sources with reasonable levels of price transparency. The third-party provider uses these multiple prices as inputs into a pricing model to determine a

weighted average price for each security. We have controls in place to review the third party provider's qualifications and procedures used to determine fair values and to validate the prices used in their determination of fair value. We classify our investment in U.S. Treasury bills and bonds and corporate equity securities as Level 1 based upon quoted prices in active markets. All other marketable securities are classified as Level 2 based upon the other than quoted prices with observable market data. These include U.S. agency debt securities, certificates of deposit, commercial paper, and corporate debt securities.

5

---

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

During the third quarter of 2012, we issued \$300 million of our 2017 Notes. As a result, we have recorded a derivative liability for the conversion feature (2017 Notes Conversion Derivative) of our 2017 Notes. Additionally, we entered into convertible notes hedging transactions (2017 Notes Hedges) in connection with our 2017 Notes issuance. The 2017 Notes Hedges and the 2017 Notes Conversion Derivative are measured at fair value using Level 3 inputs. These instruments are not actively traded and are valued using an option pricing model that uses observable and unobservable market data for inputs, such as implied volatility of our common stock, risk-free interest rate and other factors.

As part of the acquisitions of EZ Concepts Surgical Device Corporation, d/b/a EZ Frame, and CCI® Evolution Mobile Bearing Total Ankle Replacement system (CCI acquisition), completed in 2010 and 2011, respectively, we have recorded \$0.6 million of contingent liabilities for potential future cash payments related to these transactions as of June 30, 2013. As part of the acquisition of WG Healthcare on January 7, 2013, we may be obligated to pay contingent consideration of up to approximately \$5.2 million upon the achievement of certain revenue milestones; therefore, we have recorded contingent consideration of approximately \$2.1 million as of June 30, 2013. The fair value of the contingent consideration as of June 30, 2013, was determined using a discounted cash flow model and probability adjusted estimates of the future earnings and is classified in Level 3. Changes in the fair value of contingent consideration are recorded in "Other expense, net" in our condensed consolidated statements of operations. On March 1, 2013, as part of the acquisition of BioMimetic Therapeutics, Inc. (BioMimetic), we issued Contingent Value Rights (CVR) as part of the merger consideration. Each CVR entitles its holder to receive additional cash payments of up to \$6.50 per share, which are payable upon receipt of FDA approval of Augment® Bone Graft and upon achieving certain revenue milestones. The fair value of the CVRs outstanding at June 30, 2013 of \$76.0 million was determined using the closing price of the security in the active market (Level 1).

The following table summarizes the valuation of our financial instruments measured at fair value on a recurring basis (in thousands):

	Total	Quoted Prices in Active Markets (Level 1)	Prices with Other Observable Inputs (Level 2)	Prices with Unobservable Inputs (Level 3)

## 2. Acquisition

BioMimetic Therapeutics, Inc.

On March 1, 2013, we completed the acquisition of BioMimetic, a public company specializing in the development and commercialization of innovative products to promote the healing of musculoskeletal injuries and diseases, including therapies for orthopedic, sports medicine and spine applications. The transaction combines BioMimetic's biologics platform and pipeline with our established sales force and product portfolio, to further accelerate growth opportunities in our Extremities business. The operating results from this acquisition are included in the consolidated

financial statements from the acquisition date.

Under the terms of the Agreement and Plan of Merger, each share of BioMimetic common stock was canceled and converted into the right to receive: (1) \$1.50 in cash; (2) 0.2482 of a share of our common stock; and (3) one tradable CVR. Each CVR entitles its holder to receive additional cash payments of up to \$6.50 per share, which are payable upon receipt of FDA approval of Augment<sup>®</sup> Bone Graft and upon achieving certain revenue milestones. In addition, each holder of a BioMimetic stock option, whether such stock option was vested or unvested, was permitted to elect for all or any portion of such stock option to be exercised in full or on a net basis, by agreeing (if exercised on a net basis) to exchange in the merger the shares of BioMimetic stock subject to such stock option being exercised, and, in connection with such exchange, relinquish a portion of the merger consideration otherwise payable pursuant to such shares. On the completion of the merger, any such stock option that was not exercised was assumed by us and converted into a stock option at a conversion rate of .522106 to acquire a number of shares of our common stock (rounded to the nearest whole share).

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

The fair value of consideration transferred is as follows (in thousands):

Fair value of Wright shares issued at an exchange ratio of 0.2482 shares of Wright for one share of BioMimetic <sup>(1)</sup>	\$ 165,893
Cash transferred <sup>(2)</sup>	41,336
Contingent Value Rights <sup>(3)</sup>	70,120
Value of previously vested BioMimetic stock options converted into Wright stock options (at specified exchange ratio) <sup>(4)</sup>	2,868
Withholding tax component related to BioMimetic exercised stock options (merger consideration tendered to cover remaining unpaid value of employees' portion) <sup>(5)</sup>	2,419
Fair value of Wright's investment in BioMimetic held before the merger <sup>(6)</sup>	10,676
Total value of considerations transferred	\$ 293,312

The fair value of our shares of \$165,893 was calculated by multiplying the (a) BioMimetic shares outstanding as of February 28, 2013, 28.3 million shares, less our prior investment in BioMimetic of 1.13 million shares, and (b) the BioMimetic shares issued for exercises of BioMimetic stock options immediately prior to the merger, 1.1 million shares, by (c) the exchange ratio of 0.2482 and (d) \$23.83, the closing trading price of our common stock on March (1) 1, 2013. The fair value of the Wright shares was offset by the value of the stock component of merger consideration that would have been received by option holders of 0.2 million BioMimetic stock options. These BioMimetic stock options were exercised immediately prior to the merger, but were tendered, along with the associated CVRs, to BioMimetic to cover \$1.4 million of the total employee portion of the statutory withholding tax.

The cash transferred of \$41,336 was calculated by multiplying the (a) BioMimetic shares outstanding as of February 28, 2013, 28.3 million shares, less our prior investment in BioMimetic of 1.13 million shares and (b) the BioMimetic shares issued for exercises of BioMimetic stock options immediately prior to the merger, 1.1 million shares, by (c) \$1.50 per share to be received by BioMimetic stockholders. The cash component of merger consideration was offset by the value of the cash component of merger consideration that would have been received by option holders to cover \$1.0 million of the total employee portion of the statutory withholding tax. Each CVR entitles its holder to receive an additional \$3.50 per share upon approval by the FDA of Augment<sup>®</sup> Bone Graft; an additional \$1.50 per share the first time aggregate sales of specified products exceed \$40 million during a consecutive 12-month period and an additional \$1.50 per share the first time aggregate sales of specified (3) products exceed \$70 million during a consecutive 12-month period. The CVRs are publicly traded and will terminate on the earlier of the six-year anniversary of the completion of the merger or the payment date for the second product sales milestone.

The fair value assigned to the CVRs and the associated liability related to payments under the contingent value rights agreement of \$70.5 million is based upon the CVRs' market opening price of \$2.50 per CVR as of March 4, 2013, the first day of trading of the CVRs, and quantity of CVRs issued. The fair value of the CVRs was offset by the value of the CVR component of merger consideration that would have been received by option holders of 0.2 million BioMimetic stock options. This value was tendered along with the stock options to cover \$1.4 million of the total employee portion of the statutory withholding tax.

The fair value of the CVRs at June 30, 2013 of \$76.0 million is recorded in the "Accrued expenses and other current liabilities" line of the condensed consolidated balance sheet. The fair value of the CVRs and the associated liability related to payments under the CVR agreement are remeasured at the end of each reporting period based on the closing trading price on the last business day of the period and the number of CVRs outstanding as of that date. Changes in fair value are recognized in results of operations.

(4)

In accordance with FASB ASC Section 805, Business Combinations, the consideration transferred by us for BioMimetic includes \$2.9 million for the fair value of certain BioMimetic stock options attributable to precombination service.

For purposes of calculating the consideration transferred, the fair value based measure of the BioMimetic vested options was determined on a grant-by-grant basis using the Black-Scholes option pricing model with the following assumptions: (i) the closing market price of BioMimetic common stock of \$9.49 on February 28, 2013; (ii) an expected remaining life considering the original expected life for the options, the remaining service period and the contractual life of the option as of March 1, 2013; (iii) volatility based on a blend of the historical stock price volatility of common stock over the most recent period equivalent to the expected life of the options; and (iv) the risk-free interest rate based on published

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

U.S. Treasury yields for notes with comparable terms as the expected life of the options. The fair value measurement of our replacement options was completed using the same assumptions except the closing market price of our common stock of \$23.83 on March 1, 2013 was used instead of the BioMimetic common stock closing price.

The withholding tax component of \$2.4 million represents the merger consideration tendered to BioMimetic in connection with the exercise of 0.2 million BioMimetic stock options, immediately prior to the merger, to cover the employee portion of the statutory withholding tax, consisting of the sum of (1) the value of the stock component of (5) merger consideration, along with the associated CVRs, to cover \$1.4 million of the statutory withholding tax and (2) the cash component of merger consideration that would have been received by option holders to cover \$1.0 million of the withholding tax.

As of February 28, 2013, we held 1.13 million shares of BioMimetic as an available-for-sale (AFS) marketable security carried at an aggregate fair value of \$10.7 million based on the closing market price of BioMimetic (6) common stock of \$9.49. The cumulative unrealized gain on this investment based on the fair value determined at closing was recognized as a gain of \$7.8 million. This gain was recorded in "Other expense (income), net" in the condensed consolidated statement of operations for the six months ended June 30, 2013.

The following is a summary of the preliminary estimated fair values of the net assets acquired (in thousands):

Cash and cash equivalents	\$ 10,578	
Marketable securities	16,882	
Accounts receivables	1,595	
Inventories	4,418	
Prepaid and other current assets	4,234	
Property, plant and equipment	2,976	
Intangible assets	162,400	
Deferred tax asset - current	305	
Other long-term assets	1,133	
Accounts payable and accrued liabilities	(5,478	)
Capital leases	(118	)
Deferred tax liability - noncurrent	(424	)
Other liabilities	(2	)
Net assets acquired	\$ 198,499	

Goodwill \$96,870

The above purchase price allocation is considered preliminary and is subject to revision when the valuation of in-process research and development (IPRD) is finalized upon receipt of the final valuation report for those assets from a third party valuation expert.

The goodwill is attributable to the workforce of the acquired business and strategic opportunities that arose from the acquisition of BioMimetic. The goodwill is not expected to be deductible for tax purposes.

Of the \$162.4 million of acquired intangible assets, \$1.6 million was assigned to acquired technology (14 year useful life), \$3.9 million was assigned to trademarks (indefinite useful life), \$1.3 million was assigned to a non-compete agreement (2 year useful life), and \$155.6 million was assigned to IPR&D (indefinite useful life). The weighted average amortization period of the finite-lived intangibles acquired is approximately 9 years.

The contractual value of accounts receivable approximates fair value. Prepaid and other current assets includes \$3.5 million, which represents the fair value of a contingent gain associated with disputed provisions of a license agreement with Luitpold Pharmaceuticals, Inc. During the second quarter of 2013, this dispute was settled for \$3.5 million, and payment was received.

We incurred \$4.5 million of transaction costs related to this acquisition, which are recorded in selling, general and administrative expenses for the six months ended June 30, 2013.

The acquired business contributed revenues of \$1.3 million and operating loss of \$7.6 million to our consolidated results from the date of acquisition through June 30, 2013. Our consolidated results include \$8.9 million of transaction and transition expenses recognized in the six months ended June 30, 2013.

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

The following unaudited pro forma summary presents our continuing operations financial results if the business combination had occurred on January 1, 2012:

	Pro Forma Six Months Ended June 30, 2013	Pro Forma Six Months Ended June 30, 2012	Pro Forma Three Months Ended June 30, 2013	Pro Forma Three Months Ended June 30, 2012
Revenue from Continuing Operations	\$117,480	\$105,740	\$60,572	\$52,401
Net Loss from Continuing Operations	(29,562)	(21,717)	(14,486)	(8,384)
Net loss from continuing operations per share, basic	(0.64)	(0.48)	(0.31)	(0.18)
Net loss from continuing operations per share, diluted	(0.64)	(0.48)	(0.31)	(0.18)

The pro forma net loss for the six months ended June 30, 2012 includes non-recurring items for the (a) \$7.8 million gain on remeasurement of our previously held investment in BioMimetic, (b) \$2.2 million of stock-based compensation expense related to the incremental fair value of replacement awards attributed to precombination service, (c) \$6.6 million of stock-based compensation expense related to the acceleration of vesting of previously unvested BioMimetic awards exercised in connection with the acquisition, (d) \$0.2 million of compensation expense related to retention agreements for which employees have no further service commitments to obtain the payments, (e) \$0.6 million of severance expense directly attributable to the acquisition, and (f) \$10.8 million of transaction costs incurred by BioMimetic and Wright.

## WG Healthcare Limited

On January 7, 2013, we completed the acquisition of WG Healthcare Limited, a UK company (WG Healthcare), for approximately \$7.6 million, plus additional contingent consideration with an estimated fair value of \$2.2 million to be paid over the next five years subject to the achievement of certain revenue milestones. We acquired the facility, inventory, infrastructure and all other assets and liabilities associated with WG Healthcare's foot and ankle business. The operating results from this acquisition are included in the consolidated financial statements from the acquisition date. The two former owners of WG Healthcare have joined Wright Medical as full-time employees.

The acquisition was recorded by allocating the costs of the assets acquired based on their estimated fair values at the acquisition date. The excess of the cost of the acquisition over the fair value of the assets acquired is recorded as goodwill. The following is a summary of the estimated fair values of the assets acquired (in thousands):

Cash	\$458
Accounts receivable	1,052
Inventory	1,640
Property, plant and equipment	330
Intangible assets	4,748
Accounts payable	(1,550)
Deferred tax liability - current	(43)
Deferred tax liability - noncurrent	(1,139)
Total net assets acquired	\$5,496

Goodwill \$4,341

Of the \$4.7 million of acquired intangible assets, \$1.9 million was assigned to trademarks (indefinite life), \$0.8 million was assigned to completed technology (7 year life), \$0.3 million was assigned to non-compete agreements (3 year life), and \$1.7 million was assigned to customer relationships (15 year life). The weighted average amortization period of the finite-lived intangibles acquired is approximately 11 years.

The acquired business contributed revenues of \$2.2 million and operating loss of \$482,000 to our consolidated results from the date of acquisition through June 30, 2013. Our condensed consolidated results of operations would not have been materially different than reported results had the WG Healthcare acquisition occurred at the beginning of 2012.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

## 3. Discontinued Operations

On June 19, 2013, we entered into a definitive agreement under which MicroPort Medical B.V., a subsidiary of MicroPort Scientific Corporation (MicroPort), will acquire our OrthoRecon business. Our OrthoRecon business consists of hip and knee implant products. The purchase price is \$290 million, subject to a net working capital adjustment, and is payable in cash at closing, which is expected to occur by the end of the third quarter or early in the fourth quarter of 2013. The transaction is subject to customary closing conditions, including MicroPort shareholder approval and receipt of regulatory clearances.

We determined that this agreement meets the criteria for classification as discontinued operations. As a result, all historical operating results for the OrthoRecon segment are reflected within discontinued operations in the condensed consolidated financial statements. In addition, costs associated with corporate employees and infrastructure being transferred as a part of the sale have been included in discontinued operations. The following table summarizes the results of discontinued operations (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Revenue	\$60,204	\$71,316	\$124,266	\$145,099
(Loss) income before tax	(2,878	) 3,533	18,483	10,298
Income tax (benefit) provision	(1,086	) 1,456	6,922	4,084
(Loss) income from discontinued operations, net of tax	(1,792	) 2,077	11,561	6,214

Certain liabilities of the OrthoRecon business, including product liability claims associated with hip/knee products we sold prior to the closing, will not be assumed by MicroPort. Estimated liabilities, if any, for such claims, and accrued legal defense costs, are excluded from liabilities held for sale. Concomitant receivables associated with liability insurance recoveries are excluded from assets held for sale. MicroPort will be responsible for product liability claims associated with products it sells after the closing. Subject to the provisions of the asset purchase agreement, we will continue to be responsible for defense of existing patent infringement cases and associated legal defense costs, and for resulting liabilities, if any, related to pre-closing periods. The following table summarizes the assets and liabilities held for sale (in thousands):

	June 30,	December 31,
	2013	2012
Assets		
Accounts receivable	\$65,820	\$67,434
Inventories, net	80,796	86,792
Property, plant & equipment, net	85,269	95,143
Goodwill	25,602	25,652
Intangible assets, net	1,692	2,610
Deferred income taxes	1,921	2,200
Other current and long-term assets	23,046	14,765
Assets held for sale	\$284,146	\$294,596

Liabilities

Accounts payable	\$9,486	\$5,666
Other current liabilities	27,105	26,541

## 4. Inventories

Inventories consist of the following (in thousands):

	June 30, 2013	December 31, 2012
Raw materials	\$2,275	\$1,000
Work-in-process	6,950	3,377
Finished goods	52,298	53,081
	\$61,523	\$57,458

## 5. Marketable Securities

Our investments in marketable securities are classified as available-for-sale securities in accordance with FASB ASC Topic 320, Investments — Debt and Equity Securities. These securities are carried at their fair value, and all unrealized gains and losses are recorded within other comprehensive income. Marketable securities are classified as current for those expected to mature or be sold within 12 months and the remaining portion is classified as non-current. The cost of investment securities sold is determined by the specific identification method.

As of June 30, 2013 and December 31, 2012, we had current marketable securities totaling \$5.8 million and \$12.6 million, respectively, consisting of investments in corporate and agency bonds and certificates of deposits, commercial paper, and corporate equity securities, all of which are valued at fair value using a market approach. In addition, we had non-current marketable securities totaling \$17.4 million as of June 30, 2013, consisting of investments in corporate, government, and agency bonds, all of which are valued at fair value using a market approach.

The following tables present a summary of our marketable securities (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Estimated Fair Value
At June 30, 2013				
Available-for-sale marketable securities				
U. S. agency debt securities	\$9,988	\$—	\$(23)	\$9,965
Certificate of deposit	245	—	—	245
Corporate debt securities	6,751	—	(6)	6,745
U.S. government debt securities	4,176	—	(3)	4,173
Commercial paper	1,999	1	—	2,000
Total available-for-sale marketable securities	\$23,159	\$1	\$(32)	\$23,128
At December 31, 2012

	262,843	258,485
Less: current portion	(68)	—
	\$262,775	\$ 258,485

## 2017 Notes

On August 31, 2012, we issued \$300 million aggregate principal amount of the 2017 Notes pursuant to an indenture, dated as of August 31, 2012 between us and The Bank of New York Mellon Trust Company, N.A., as Trustee. The 2017 Notes will mature on August 15, 2017, and we pay interest on the 2017 Notes semi-annually on each February 15 and August 15 at an annual rate of 2.00%. We may not redeem the 2017 Notes prior to the maturity date, and no “sinking fund” is available for the 2017 Notes, which means that we are not required to redeem or retire the 2017 Notes periodically. The 2017 Notes are convertible at the option of the holder, during certain periods and subject to certain conditions as described below, solely into cash at an initial conversion rate of 39.3140 shares per \$1,000 principal amount of the 2017 Notes, subject to adjustment upon the occurrence of specified events, which represents an initial conversion price of \$25.44 per share. The holder of the 2017 Notes may convert their notes at any time prior to February 15, 2017 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending December 31, 2012 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period after any five consecutive trading day period in which the trading price per \$1,000 principal amount of notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after February 15, 2017 until the close of business on the second scheduled trading day immediately preceding the maturity

date, holders may convert their 2017 Notes solely into cash, regardless of the foregoing circumstances. Upon conversion, a holder will receive an amount in cash, per \$1,000 principal amount of the 2017 Notes, equal to the settlement amount as calculated under the indenture relating to the 2017 Notes. If we undergo a fundamental change, as defined in the indenture relating to the 2017 Notes, subject to certain conditions, holders of the 2017 Notes will have the option to require us to repurchase for cash all or a portion of their notes at a purchase price equal to 100% of the principal amount of the 2017 Notes to be repurchased, plus any accrued and unpaid interest to, but excluding, the fundamental change repurchase date, as defined in the indenture relating to the 2017 Notes. In addition, following certain corporate transactions, we, under certain circumstances, will pay a cash make-whole premium by increasing the applicable conversion rate for a holder that elects to convert its 2017 Notes in connection with such corporate transaction. The 2017 Notes are senior unsecured obligations that rank: (i) senior in right of payment

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

to any of our indebtedness that is expressly subordinated in right of payment to the 2017 Notes; (ii) equal in right of payment to any of our unsecured indebtedness that is not so subordinated; (iii) effectively junior in right of payment to any secured indebtedness to the extent of the value of the assets securing such indebtedness; and (iv) structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries. As a result of this transaction, we recognized deferred financing charges of approximately \$8.8 million, which are being amortized over the term of the 2017 Notes using the effective interest method.

The 2017 Notes Conversion Derivative requires bifurcation from the 2017 Notes in accordance with ASC Topic 815, Derivatives and Hedging, and is accounted for as a derivative liability. The fair value of the 2017 Notes Conversion Derivative at the time of issuance of the 2017 Notes was \$48.1 million and was recorded as original debt discount for purposes of accounting for the debt component of the 2017 Notes. This discount is amortized as interest expense using the effective interest method over the term of the 2017 Notes. For the three and six months ended June 30, 2013, the Company recorded \$2.2 million and \$4.3 million of interest expense related to the amortization of the debt discount based upon an effective rate of 6.47%.

The components of the 2017 Notes were as follows (in thousands):

	June 30, 2013	December 31, 2012
Principal amount of 2017 Notes	\$300,000	\$ 300,000
Unamortized debt discount	(41,014	)(45,283 )
Net carrying amount of 2017 Notes	\$258,986	\$ 254,717

We entered into 2017 Notes Hedges in connection with the issuance of the 2017 Notes with three counterparties (the Option Counterparties). The 2017 Notes Hedges, which are cash-settled, are intended to reduce our exposure to potential cash payments that we would be required to make if holders elect to convert the 2017 Notes at a time when our stock price exceeds the conversion price. The aggregate cost of the 2017 Notes Hedges was \$56.2 million and is accounted for as a derivative asset in accordance with ASC Topic 815. See [Note 8](#) for additional information regarding the 2017 Notes Hedges and the 2017 Notes Conversion Derivative.

We also entered into warrant transactions in which we sold warrants for an aggregate of 11.8 million shares of our common stock to the Option Counterparties, subject to adjustment. The strike price of the warrants was initially \$29.925 per share, which was 50% above the last reported sale price of our common stock on August 22, 2012. The warrants are net-share settled and are exercisable over the 100 trading day period beginning on November 15, 2017. The warrant transactions will have a dilutive effect to the extent that the market value per share of our common stock during such period exceeds the applicable strike price of the warrants.

Aside from the initial payment of the \$56.2 million premium to the Option Counterparties, we will not be required to make any cash payments to the Option Counterparties under the 2017 Notes Hedges and will be entitled to receive from the Option Counterparties cash, generally equal to the amount by which the market price per share of common stock exceeds the strike price of the convertible note hedging transactions during the relevant valuation period. The strike price under the 2017 Notes Hedges is equal to the conversion price of the 2017 Notes. Additionally, if the market value per share of our common stock exceeds the strike price on any day during the 100 trading day measurement period under the warrant transaction, we will be obligated to issue to the Option Counterparties a number of shares equal in value to one percent of the amount by which the then-current market value of one share of our common stock exceeds the then-effective strike price of each warrant, multiplied by the number of shares of common stock into which the 2017 Notes are then convertible at or following maturity. We will not receive any additional proceeds if warrants are exercised.

#### 2014 Convertible Senior Notes

In November 2007, we issued \$200 million of 2.625% Convertible Senior Notes maturing on December 1, 2014 (2014 Notes). The 2014 Notes pay interest semi-annually at an annual rate of 2.625% and are convertible into shares of our common stock at an initial conversion rate of 30.6279 shares per \$1,000 principal amount of the notes subject to adjustment upon the occurrence of specified events, which represents an initial conversion price of \$32.65 per share. The holder of the 2014 Notes may convert at any time on or prior to the close of business on the business day immediately preceding the maturity date. Beginning on December 6, 2011, we may redeem the 2014 Notes, in whole or in part, at a redemption price equal to 100% of the principal amount of the 2014 Notes, plus accrued and unpaid interest, if the closing price of our common stock has exceeded 140% of the conversion price for at least 20 days during any consecutive 30-day trading period. Additionally, if we experience a fundamental change event, as defined in the indenture governing the 2014 Notes (Indenture), the holders may require us to purchase for cash all or a portion of the 2014 Notes, for 100% of the principal amount of the notes, plus accrued and unpaid interest. If upon a fundamental change

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

event, a holder elects to convert its 2014 Notes, we may, under certain circumstances, increase the conversion rate for the 2014 Notes surrendered. The 2014 Notes are unsecured obligations and are effectively subordinated to (i) all of our existing and future secured debt, including our obligations under our credit agreement, to the extent of the value of the assets securing such debt, and (ii) because the 2014 Notes are not guaranteed by any of our subsidiaries, to all liabilities of our subsidiaries.

On February 10, 2011, we announced the commencement of a tender offer to purchase for cash any and all of our outstanding 2014 Notes. Upon expiration on March 11, 2011, we purchased \$170.9 million aggregate principal amount of the 2014 Notes.

On August 22, 2012, we purchased \$25.3 million aggregate principal amount of the 2014 Notes. As a result of this transaction, we recognized approximately \$0.2 million for the write off of related pro-rata unamortized deferred financing fees. As of June 30, 2013, \$3.8 million aggregate principal amount of the 2014 Notes remain outstanding.

## 8. Derivative Instruments and Hedging Activities

We account for derivatives in accordance with FASB ASC Topic 815, Derivative and Hedging, which establishes accounting and reporting standards requiring that derivative instruments be recorded on the balance sheet as either an asset or liability measured at fair value. Additionally, changes in the derivative's fair value shall be recognized currently in earnings unless specific hedge accounting criteria are met.

## Conversion Derivative and Notes Hedging

On August 31, 2012, we issued the 2017 Notes. The 2017 Notes Conversion Derivative requires bifurcation from the 2017 Notes in accordance with ASC Topic 815, and is accounted for as a derivative liability. The fair value of the 2017 Notes Conversion Derivative at the time of issuance of the 2017 Notes was \$48.1 million. See [Note 7](#) for additional information regarding the 2017 Notes.

We also entered into the 2017 Notes Hedges in connection with the issuance of the 2017 Notes with the Option Counterparties. The 2017 Notes Hedges, which are cash-settled, are intended to reduce our exposure to potential cash payments that we are required to make upon conversion of the 2017 Notes in excess of the principal amount of converted notes if our common stock price exceeds the conversion price. The aggregate cost of the 2017 Notes Hedges was \$56.2 million and is accounted for as a derivative asset in accordance with ASC Topic 815.

The following table summarizes the fair value and the presentation in the condensed consolidated balance sheet (in thousands):

	Location on condensed consolidated balance sheet	June 30, 2013	December 31, 2012
2017 Notes Hedges	Other assets	\$91,000	\$62,000
2017 Notes Conversion Derivative	Other liabilities	\$85,000	\$55,000

Neither the 2017 Notes Conversion Derivative nor the 2017 Notes Hedges qualify for hedge accounting, thus any change in the fair value of the derivatives is recognized immediately in the consolidated statements of operations. The following table summarizes the gain (loss) on changes in fair value (in thousands):

	Three Months Ended June 30, 2013	Six Months Ended June 30, 2013
2017 Notes Hedges	\$18,000	\$29,000
2017 Notes Conversion Derivative	(17,000)	(30,000)

Net gain (loss) on changes in fair value	\$1,000	\$(1,000 )
--	---------	------------

Derivatives not Designated as Hedging Instruments

We employ a derivative program using 30-day foreign currency forward contracts to mitigate the risk of currency fluctuations on our intercompany receivable and payable balances that are denominated in foreign currencies. These forward contracts are expected to offset the transactional gains and losses on the related intercompany balances. These forward contracts are not designated as hedging instruments under FASB ASC Topic 815. Accordingly, the changes in the fair value and the settlement of the contracts

15

---

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

are recognized in the period incurred in the accompanying condensed consolidated statements of operations. At June 30, 2013, we had no foreign currency contracts outstanding.

## 9. Goodwill and Intangible Assets

Changes in the carrying amount of goodwill occurring during the six months ended June 30, 2013, are as follows (in thousands):

Goodwill at December 31, 2012	\$32,414
Goodwill associated with acquisitions (see <u>Note 2</u> )	101,211
Foreign currency translation	(280 )
Goodwill at June 30, 2013	\$133,345

The components of our identifiable intangible assets are as follows (in thousands):

	June 30, 2013		December 31, 2012	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Indefinite life intangibles				
IPR&D Technology	\$155,600		\$278	
Tradename	7,378		1,658	
Total indefinite life intangibles	162,978		1,936	
Finite life intangibles				
Distribution channels	841	604	1,250	436
Completed technology	11,820	4,857	9,781	4,243
Licenses	3,681	1,204	3,668	1,056
Customer relationships	5,379	2,037	3,788	1,799
Trademarks	1,316	965	1,316	922
Non-compete agreements	8,564	4,171	7,314	2,729
Other	770	58	2,171	1,355
Total finite life intangibles	32,371	\$13,896	29,288	\$12,540
Total intangibles	195,349		31,224	
Less: Accumulated amortization	(13,896 )		(12,540 )	
Intangible assets, net	\$181,453		\$18,684	

During three months ended June 30, 2013, we terminated a distribution agreement and therefore recorded a \$400,000 asset impairment charge. Additionally, as a result of lower-than-projected cash flows related to completed technology acquired in our 2011 CCI acquisition, we recognized an impairment charge of approximately \$600,000. These charges were calculated by comparing the fair value to the carrying value of the intangible. The impairment loss was recorded for the amount by which the carrying value exceeded the fair value, and is included in Amortization of intangible assets in the consolidated statement of operations.

Based on total finite life intangible assets held at June 30, 2013, we expect to amortize approximately \$6.3 million for the full year of 2013, \$4.5 million in 2014, \$2.8 million in 2015, \$2.0 million in 2016, and \$1.8 million in 2017. These amounts do not include the potential amortization of the portion of the IPR&D Technology asset that will begin being amortized, if and when, Augment® Bone Graft is approved by the FDA, which we estimate will have approximately

\$4 million to \$5 million of amortization expense annually. Our amortization expense will also be impacted when other IPR&D projects reach technological feasibility.

#### 10. Earnings Per Share

FASB ASC Topic 260, Earnings Per Share, requires the presentation of basic and diluted earnings per share. Basic earnings per share is calculated based on the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share is calculated to include any dilutive effect of our common stock equivalents. Our common stock equivalents consist of stock options, non-vested shares of common stock, stock-settled phantom stock units, restricted stock units, 2014 Notes, and warrants. The dilutive effect of the stock options, non-vested shares of common stock, stock-settled phantom stock units, restricted stock units, and warrants is calculated using the treasury-stock method. The dilutive effect of 2014 Notes is calculated

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

by applying the “if-converted” method. This assumes an add-back of interest, net of income taxes, to net income as if the securities were converted at the beginning of the period. During the three- and six- month periods ended June 30, 2013 and 2012, the 2014 Notes had an anti-dilutive effect on earnings per share and we therefore excluded it from the dilutive shares calculation. In addition, approximately 728,000 and 621,000 common stock equivalents have been excluded from the computation of diluted net loss per share for the three-month and six-month periods ended June 30, 2013, respectively, because their effect is anti-dilutive as a result of our net loss in those periods. Approximately 282,000 and 294,000 common stock equivalents have been excluded from the computation of diluted net loss per share for the three-month and six-month periods ended June 30, 2012, respectively, because their effect is anti-dilutive as a result of our net loss from continuing operations in those periods. During the three- and six- month period ended June 30, 2013, the warrants were excluded from diluted shares outstanding because the exercise price exceeded the average market price of our common stock.

The weighted-average number of shares outstanding for basic and diluted earnings per share is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Weighted-average number of shares outstanding, basic	46,234	38,715	43,849	38,604
Common stock equivalents	—	—	—	—
Weighted-average number of shares outstanding, diluted	46,234	38,715	43,849	38,604

The following potential common shares were excluded from common stock equivalents as their effect would have been anti-dilutive (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Stock options	3,237	3,304	3,643	3,825
Non-vested shares, restricted stock units, and stock-settled phantom stock units	307	293	307	293
2014 Notes	115	891	115	891
Warrants	11,794	—	11,794	—

## 11. Commitments and Contingencies

## Governmental Inquiries

In December 2007, we received a subpoena from the United States Department of Justice (DOJ) through the United States Attorney's Office for the District of New Jersey (USAO) requesting documents for the period January 1998 through the present related to any consulting and professional service agreements with orthopaedic surgeons in connection with hip or knee joint replacement procedures or products. This subpoena was served shortly after several of our knee and hip competitors agreed with the DOJ to resolutions of similar investigations.

On September 29, 2010, our wholly owned subsidiary, Wright Medical Technology, Inc. (WMT) entered into a 12-month Deferred Prosecution Agreement (DPA) with the USAO and a Civil Settlement Agreement (CSA) with the United States. Under the DPA, the USAO filed a criminal complaint in the United States District Court for the District of New Jersey (Court) charging WMT with conspiracy to commit violations of the Anti-Kickback Statute (42 U.S.C. § 1320a-7b) during the years 2002 through 2007. The Court deferred prosecution of the criminal complaint during the term of the DPA and the USAO agreed that if WMT complied with the DPA's provisions, the USAO would seek dismissal of the criminal complaint.

Pursuant to the CSA, WMT settled civil and administrative claims relating to the matter for a payment of \$7.9 million without any admission by WMT. In conjunction with the CSA, WMT also entered into a five year Corporate Integrity Agreement (CIA) with the Office of the Inspector General of the United States Department of Health and Human Services (OIG-HHS). Pursuant to the DPA, an independent monitor reviewed and evaluated WMT's compliance with its obligations under the DPA. The DPA and the CIA were filed as Exhibits 10.3 and 10.2, respectively, to our Current Report on Form 8-K filed on September 30, 2010. The DPA was also posted to our website. Each of the DPA and the CIA could be modified by mutual consent of the parties thereto.

On September 15, 2011, WMT reached an agreement with the USAO and the OIG-HHS under which WMT voluntarily agreed to extend the term of its DPA for 12 months, to September 29, 2012. On September 15, 2011, WMT also agreed with the OIG-HHS to an amendment to the CIA under which certain of WMT's substantive obligations under the CIA would begin on September

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

29, 2012, when the amended DPA monitoring period expired. The term of the CIA has not changed, and will expire as previously provided on September 29, 2015.

On October 4, 2012, the USAO issued a press release announcing that the amended DPA had expired on September 29, 2012, that it had moved to dismiss the criminal complaint against WMT because WMT had fully complied with the terms of the DPA, and that the Court had ordered dismissal of the complaint on October 4, 2012.

The DPA imposed, and the CIA continues to impose, certain obligations on WMT to maintain compliance with U.S. healthcare laws, regulations and other requirements. Our failure to do so could expose us to significant liability including, but not limited to, exclusion from federal healthcare program participation, including Medicaid and Medicare, which would have a material adverse effect on our financial condition, results of operations and cash flows, potential prosecution, civil and criminal fines or penalties, and additional litigation cost and expense.

Upon closing of the pending sale of our hip and knee business, both our business and MicroPort's OrthoRecon business will continue to be subject to the CIA.

In addition to the USAO and OIG-HHS, other governmental agencies, including state authorities, could conduct investigations or institute proceedings that are not precluded by the terms of the settlements reflected in the DPA and the CIA. In addition, the settlement with the USAO and OIG-HHS could increase our exposure to lawsuits by potential whistleblowers, including under the federal false claims acts, based on new theories or allegations arising from the allegations made by the USAO. The costs of defending or resolving any such investigations or proceedings could have a material adverse effect on our financial condition, results of operations and cash flows.

On August 3, 2012, we received a subpoena from the U.S. Attorney's Office for the Western District of Tennessee requesting records and documentation relating to our PROFEMUR<sup>®</sup> series of hip replacement devices. The subpoena covers the period from January 1, 2000 to August 2, 2012. We are in the process of collecting the responsive documents and responding to the subpoena. We are unable to estimate the impact of the ultimate outcome of these matters on our consolidated financial position or results of operations.

Patent Litigation.

In 2011, Howmedica Osteonics Corp. (Howmedica) and Stryker Ireland, Ltd. (Stryker), each a subsidiary of Stryker Corporation, filed a lawsuit against WMT in the United States District Court for the District of New Jersey (District Court) alleging that we infringed Howmedica and Stryker's U.S. Patent No. 6,475,243 related to our LINEAGE<sup>®</sup> Acetabular Cup System and DYNASTY<sup>®</sup> Acetabular Cup System. The lawsuit seeks an order of infringement, injunctive relief, unspecified damages, and various other costs and relief and could impact a substantial portion of our hip product line. On July 9, 2013, the district court issued a claim construction ruling. Under the court's claim construction ruling, we do not believe our product infringes the asserted patents. We believe that we have strong defenses against these claims and plan to vigorously defend this lawsuit. Management does not believe that the outcome of this lawsuit will have a material adverse effect on our consolidated financial position or results of operations.

In 2012, Bonutti Skeletal Innovations, LLC (Bonutti) filed a patent infringement lawsuit against us in the United States Court for the District of Delaware. Bonutti originally alleged that our Link Sled Prosthesis infringes U.S. Patent 6,702,821. We distribute the Link Sled Prosthesis under a June 1, 2008 distribution agreement with LinkBio Corp. In January 2013, Bonutti amended its complaint, alleging that our ADVANCE<sup>®</sup> knee system, including ODYSSEY<sup>®</sup> instrumentation, infringes U.S. Patent 8,133,229, and that our ADVANCE<sup>®</sup> knee system, including ODYSSEY<sup>®</sup> instrumentation and PROPHECY<sup>®</sup> guides, infringes U.S. Patent 7,806,896, which was issued on October 5, 2010. We have responded to the amended complaint and are vigorously defending these allegations. All of the claims of the asserted patents are directed to surgical methods for minimally invasive surgery. We do not believe the complaint will have a material adverse impact to our consolidated financial position or results of operations.

In June 2013, Orthophoenix filed a patent lawsuit against us in the United States District Court for the District of Delaware alleging that surgical methods using our X-REAM<sup>®</sup> product infringe two patents. We believe we have

strong defenses against these claims and plan to vigorously defend this lawsuit. Management does not believe that the outcome of this lawsuit will have a material adverse effect on our consolidated financial position or results of operations.

In June 2013, Anglefix filed suit in the United States District Court for the Western District of Tennessee, alleging that our ORTHOLOC<sup>®</sup> products infringe Anglefix's asserted patent. We believe we have strong defenses against these claims and plan to vigorously defend this lawsuit. Management does not believe that the outcome of this lawsuit will have a material adverse effect on our consolidated financial position or results of operations.

Subject to the provisions of the asset purchase agreement, we will continue to be responsible for defense of existing patent infringement cases and associated legal defense costs, and for resulting liabilities, if any, related to pre-closing periods.

Product Liability

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

We have received claims for personal injury against us associated with fractures of our PROFEMUR® long titanium modular neck product (PROFEMUR® Claims). The overall fracture rate for the product is low and the fractures appear, at least in part, to relate to patient demographics. Beginning in 2009, we began offering a cobalt-chrome version of our PROFEMUR® modular neck, which has greater strength characteristics than the alternative titanium version. Historically, we had reflected our liability for these claims as part of our standard product liability accruals on a case-by-case basis. However, during the quarter ended September 30, 2011, as a result of an increase in the number and monetary amount of these claims, management estimated our liability to patients in North America who have previously required a revision following a fracture of a PROFEMUR® long titanium modular neck, or who may require a revision in the future. Management has estimated that this aggregate liability ranges from approximately \$20 million to \$32 million. Any claims associated with this product outside of North America, or for any other products, will be managed as part of our standard product liability accruals.

Due to the uncertainty within our aggregate range of loss resulting from the estimation of the number of claims and related monetary payments, we have recorded a liability of \$20.0 million to be incurred over the next four years, which represents the low-end of our estimated aggregate range of loss. We have classified \$5.0 million of this liability as current in "Accrued expenses and other current liabilities" and \$15.0 million as non-current in "Other liabilities" on our condensed consolidated balance sheet. We expect to pay the majority of these claims within the next 4 years.

We have maintained product liability insurance coverage on a claims-made basis. During the quarter ended March 31, 2013, we received a customary reservation of rights from our primary product liability insurance carrier asserting that present and future claims related to fractures of our PROFEMUR® titanium modular neck hip products and which allege certain types of injury (Modular Neck Claims) would be covered as a single occurrence under the policy year the first such claim was asserted. The effect of this coverage position would be to place Modular Neck Claims into a single prior policy year in which applicable claims-made coverage was available, subject to the overall policy limits then in effect. Management agrees with the assertion that the Modular Neck Claims should be treated as a single occurrence, but notified the carrier that it disputed the carrier's selection of available policy years. During the second quarter of 2013, we received confirmation from the primary carrier confirming their agreement with our policy year determination. Based on our insurer's treatment of Modular Neck Claims as a single occurrence, we increased our estimate of the total probable insurance recovery related to Modular Neck Claims by \$19.4 million, and recognized such additional recovery as a reduction to our selling, general and administrative expenses for the three-months ended March 31, 2013. In the quarter ended June 30, 2013, we received payment from the primary insurance carrier of \$5.0 million. As of June 30, 2013, our insurance receivable related to Modular Neck Claims totals \$33.0 million, which consists of \$20.0 million associated with our recorded liability for current and future Modular Neck Claims outstanding, and \$13.0 million for previously recorded defense and settlement costs. We have classified \$18.0 million within current receivables, and the remaining \$15.0 million within long-term receivables.

Our insurance coverage for the Modular Neck Claims is limited to \$40.0 million. As we continue to incur defense costs associated with Modular Neck Claims, we will recognize additional insurance recovery, up to our \$40 million limitation. Further, it is possible that settlements in excess of the low-end of our estimated range of loss on current and future claims result in liability in excess of our insurance limitation.

Claims for personal injury have also been made against us associated with our metal-on-metal hip products. The pre-trial management of certain of these claims has been consolidated in the federal court system under multi-district litigation, and certain other claims in state courts in California, as further discussed in Part II Item 1 of this Quarterly Report. The number of claims continues to increase, we believe due to the increasing negative publicity in the industry regarding metal-on-metal hip products. We believe we have data that supports the efficacy and safety of our metal-on-metal hip products, and we intend to vigorously defend ourselves in these matters.

We have maintained product liability insurance coverage on a claims-made basis. During the quarter ended September 30, 2012, we received a customary reservation of rights from our primary product liability insurance carrier asserting

that certain present and future claims related to our CONSERVE<sup>®</sup> metal-on-metal hip products and which allege certain types of injury (CONSERVE<sup>®</sup> Claims) would be covered as a single occurrence under the policy year the first such claim was asserted. The effect of this coverage position would be to place CONSERVE<sup>®</sup> Claims into a single prior policy year in which applicable claims-made coverage was available, subject to the overall policy limits then in effect. Management agrees that there is insurance coverage for the CONSERVE<sup>®</sup> Claims, but has notified the carrier that at this time it disputes the carrier's selection of available policy years and its characterization of the CONSERVE<sup>®</sup> Claims as a single occurrence.

Management has recorded an insurance receivable for the probable recovery of spending in excess of our retention for a single occurrence. As of June 30, 2013, this receivable totaled \$5.2 million, and is solely related to defense costs incurred through June 30, 2013. However, the amount we ultimately receive may differ depending on the final conclusion of the insurance policy year and the number of occurrences.

Table of Contents

WRIGHT MEDICAL GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(UNAUDITED)

We are currently accounting for metal-on-metal claims in accordance with our standard product liability accrual methodology on a case by case basis. Management is unable to estimate the ultimate impact of current claims and future potential claims. Future revisions in our estimates of these provisions could materially impact our results of operations and financial position. We use the best information available to us in determining the level of accrued product liabilities, and we believe our accruals are adequate.

Product liability claims associated with hip/knee products we sold prior to the closing will not be assumed by MicroPort. Estimated liabilities, if any, for such claims, and accrued legal defense costs, are excluded from liabilities held for sale. Concomitant receivables associated with liability insurance recoveries are excluded from assets held for sale. MicroPort will be responsible for product liability claims associated with products it sells after the closing.

**Employment Matters**

In 2012, two former employees, Frank Bono and Alicia Napoli, each filed separate lawsuits against WMT in the Chancery Court of Shelby County, Tennessee, which asserted claims for retaliatory discharge and breach of contract based upon his or her respective separation pay agreement. In addition, Mr. Bono and Ms. Napoli each asserted a claim for defamation related to the press release issued at the time of their terminations and a wrongful discharge claim alleging violation of the Tennessee Public Protection Act. Mr. Bono and Ms. Napoli each claimed that he or she was entitled to attorney fees in addition to other unspecified damages.

We are vigorously defending these lawsuits. Management does not believe that the outcome of these claims will have a material adverse effect on our consolidated financial position or results of operations.

**Other**

We have received claims from health care professionals following the termination of certain contractual arrangements and believe additional claims are possible. Management is unable to estimate the cost, if any, of ultimately resolving these claims. Accordingly, no provisions have been recorded in our financial statements related to these claims as of June 30, 2013.

In addition to those noted above, we are subject to various other legal proceedings, product liability claims, corporate governance, and other matters which arise in the ordinary course of business. In the opinion of management, the amount of liability, if any, with respect to these matters, will not materially affect our consolidated results of operations or financial position.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

**General**

The following management's discussion and analysis of financial condition and results of operations describes the principal factors affecting the results of our operations, financial condition, and changes in financial condition for the three and six month periods ended June 30, 2013. This discussion should be read in conjunction with the accompanying unaudited financial statements, our Annual Report on Form 10-K for the year ended December 31, 2012, which includes additional information about our critical accounting policies and practices and risk factors, and Note 1 of Part I of this Quarterly Report and Part II, Item 1A of this Quarterly Report.

On June 19, 2013, we entered into a definitive agreement with MicroPort Scientific Corporation (MicroPort) under which we will sell our OrthoRecon business. The OrthoRecon business consists of hip and knee implant products. We determined that this agreement meets the criteria for classification as discontinued operations. As such, the financial results of our OrthoRecon business have been reflected within discontinued operations for all periods presented and the discussion below is on a continuing operations basis.

**Executive Overview**

Company Description. We are a global orthopaedic company that provides solutions that enable clinicians to alleviate pain and restore their patients' lifestyles. We are a recognized leader of surgical solutions for the foot and ankle market and market our products in over 60 countries worldwide.

Our products are used primarily in foot and ankle repair, upper extremity products, and biologics products, which are used to replace damaged or diseased bone, to stimulate bone growth and to provide other biological solutions for surgeons and their patients. Extremity hardware includes implants and other devices to replace or reconstruct injured or diseased joints and bones of the foot, ankle, hand, wrist, elbow and shoulder, which we generally refer to as either foot and ankle or upper extremity products. Our extensive foot and ankle product portfolio, our approximately 200 specialized foot and ankle sales representatives, and our increasing level of training of foot and ankle surgeons has resulted in us being a recognized leader in the foot and ankle market.

Table of Contents

Biologics are used to repair or replace damaged or diseased bone, to stimulate bone growth and to provide other biological solutions for surgeons and their patients.

Our corporate headquarters and U.S. operations are located in Arlington, Tennessee, where we conduct research and development, sales and marketing administration, manufacturing, warehousing and administrative activities. Outside the U.S., we have distribution and administrative facilities in Amsterdam, the Netherlands, and sales and distribution offices in Canada, Japan and throughout Europe.

**Principal Products.** We specialize in extremity and biologic products used by extremity focused surgeon specialists for the reconstruction, trauma, and arthroscopy markets. Our biologics sales encompass a broad portfolio of products designed to stimulate and augment the natural regenerative capabilities of the human body.

**Significant Quarterly Business Developments.** On June 19, 2013, we entered into a definitive agreement with MicroPort under which MicroPort Medical B.V., a subsidiary of MicroPort, will acquire our OrthoRecon business. The purchase price is \$290 million, subject to a net working capital adjustment, and is payable in cash at closing, which is expected to occur by the end of the third quarter or early in the fourth quarter of 2013. The transaction is subject to customary closing conditions, including MicroPort shareholder approval and receipt of regulatory clearances.

Our OrthoRecon business consists of hip and knee implant products and generated global revenue of approximately \$269 million in 2012. The OrthoRecon business has established hip and knee franchise brands including DYNASTY<sup>®</sup> and CONSERVE<sup>®</sup> hips, PROFEMUR<sup>®</sup> modular stems, SUPERPATH<sup>™</sup> minimally invasive hip surgical instrumentation, and ADVANCE<sup>®</sup> and EVOLUTION<sup>®</sup> medial-pivot knee implants. We have accounted for the OrthoRecon business as a discontinued operation in our financial statements.

Net sales from our continuing operations increased 17% in the quarter ended June 30, 2013 (second quarter) to \$60.6 million, compared to net sales of \$52.0 million in the quarter ended June 30, 2012, driven primarily by a 29% increase in global foot and ankle sales. In the second quarter of 2013, we recorded a net loss from continuing operations of \$15.5 million, compared to a net loss of \$1.4 million for the second quarter of 2012.

Items favorably impacting net loss in the second quarter of 2013 as compared to the second quarter of 2012 included: an unrealized gain of \$1.0 million (\$0.6 million net of taxes) associated with the mark-to-market adjustment on our derivative assets and liabilities; and

a \$0.3 million (\$0.2 million net of taxes) decrease in restructuring charges.

Items unfavorably impacting net loss in the second quarter of 2013 included:

an unrealized loss of \$5.8 million (\$5.8 million net of taxes) associated with the mark-to-market adjustment on the contingent value rights (CVRs) issued in connection with the acquisition of BioMimetic;

\$2.6 million (\$1.6 million net of taxes) of transition costs associated with the sale of our OrthoRecon business;

non-cash interest expense of \$2.2 million (\$1.3 million net of taxes) associated with our 2017 Convertible Notes; charges of \$1.4 million (\$0.9 million net of taxes) for transition costs associated with our acquisition of BioMimetic that closed during the first quarter of 2013;

a \$0.5 million (\$0.3 million net of taxes) increase in charges associated with transitioning a major portion of our U.S. independent distributor foot and ankle territories to direct employee sales representation; and

decreased profitability primarily driven by investments in our direct U.S. foot and ankle sales force and operating losses associated with the acquired BioMimetic business.

Geographically, our second quarter of 2013 domestic sales increased 5%, as a 15% increase in foot and ankle sales and a 1% increase in upper extremity sales was partially offset by a 16% decline in biologics sales.

Our international sales increased 59% to \$17.9 million in the second quarter of 2013, compared to \$11.2 million in the second quarter of 2012, primarily due to a 29% increase in Europe and the impact of certain stocking orders in Asia.

In addition, we incurred a \$0.3 million unfavorable impact from currency exchange rates.

**Opportunities and Challenges.** Following the closing of the transaction with MicroPort, we expect to be well positioned and committed to accelerating growth in our foot and ankle business and increasing U.S. foot and ankle sales productivity. We have made changes to attempt to realize these opportunities, including aggressively converting a portion of our U.S. independent distributor foot and ankle territories to direct employee sales representation, and substantially increasing our investment in foot and ankle medical education to drive market adoption of new products

and technologies. With the acquisition of BioMimetic, we have an opportunity to transform our biologics business and further accelerate our growth. These transformational changes for our business have required significant investment; however, we believe these investments will improve the performance of our business in the longer term.

Table of Contents

Significant Industry Factors. Our industry is affected by numerous competitive, regulatory, and other significant factors. The growth of our business relies on our ability to continue to develop new products and innovative technologies, obtain regulatory clearance and compliance for our products, protect the proprietary technology of our products and our manufacturing processes, manufacture our products cost-effectively, respond to competitive pressures specific to each of our geographic markets, including our ability to enforce non-compete agreements, and successfully market and distribute our products in a profitable manner. We, and the entire industry, are subject to extensive governmental regulation, primarily by the FDA. Failure to comply with regulatory requirements could have a material adverse effect on our business.

## Results of Operations

On June 19, 2013, we entered into a definitive agreement with MicroPort under which we will sell our OrthoRecon business. The OrthoRecon business consists of hip and knee implant products. We determined that this agreement meets the criteria for classification as discontinued operations. As such, the financial results of our OrthoRecon business have been reflected within discontinued operations for all periods presented and the discussion below is on a continuing operations basis.

Comparison of three months ended June 30, 2013 to three months ended June 30, 2012

The following table sets forth, for the periods indicated, our results of operations expressed as dollar amounts (in thousands) and as percentages of net sales:

	Three Months Ended June 30,			
	2013		2012	
	Amount	% of Sales	Amount	% of Sales
Net sales	\$60,572	100.0 %	\$51,964	100.0 %
Cost of sales <sup>1</sup>	14,564	24.0 %	11,779	22.7 %
Gross profit	46,008	76.0 %	40,185	77.3 %

Research and development	247	0.4 %	124	0.2 %
(Loss) income from discontinued operations, net of tax	1,011	n/a	990	n/a

Table of Contents

The following table sets forth our net sales by product line for the periods indicated (in thousands) and the percentage of year-over-year change:

	Three Months Ended June 30,			
	2013	2012	% Change	
Foot and Ankle	\$37,316	\$28,880	29.2	%
Upper Extremity	6,087	6,349	(4.1)	%
Biologics	15,091	15,454	(2.3)	%
Other	2,078	1,281	62.2	%
Total Sales	\$60,572	\$51,964	16.6	%

The following table presents net sales by geographic area (in thousands):

Geographic	Three Months Ended June 30,			
	2013	2012	% Change	
Domestic	\$42,640	\$40,721	4.7	%
International	17,932	11,243	59.5	%
Total net sales	\$60,572	\$51,964	16.6	%

**Net Sales**

Net sales totaled \$60.6 million in the second quarter of 2013, as compared to \$52.0 million in the second quarter of 2012. The 17% increase was driven by 29% growth in our foot and ankle business, offset by a 2% decline in our biologics business and a 4% decline in upper extremities.

Our foot and ankle net sales increased to \$37.3 million in the second quarter of 2013, representing growth of 29% over the second quarter of 2012. Domestically, foot and ankle product sales increased 15% over the second quarter of 2012, due to the continued success of our ORTHOLOC® 3Di Reconstruction Plating System launched in the second quarter of 2012, as well as continued growth of our INBONE® Total Ankle Arthroplasty products. Our international foot and ankle sales grew 92% to \$10.4 million as a result of \$0.8 million of increased sales in Europe due to the acquisition of a foot and ankle business in the quarter ended March 31, 2013 and \$2.1 million of certain stocking orders in Asia as the result of the addition of a new distribution partner in China. The remaining growth is a result of increased focus on our foot and ankle business across all international geographies.

Upper extremity net sales decreased to \$6.1 million in the second quarter of 2013, representing a decline of 4% over the second quarter of 2012, driven primarily by unfavorable currency exchange rates.

Net sales of our biologics products totaled \$15.1 million in the second quarter of 2013, representing a 2% decrease from the second quarter of 2012. In the U.S., our biologics sales decreased 16% in 2013, due to lower sales volume.

**Cost of Sales**

Our cost of sales as a percentage of net sales increased to 24.0% in the second quarter of 2013, as compared to 22.7% in the second quarter of 2012, primarily due to unfavorable geographic mix, partially offset by favorable provisions for excess and obsolete inventory. Our cost of sales and corresponding gross profit percentages can be expected to fluctuate in future periods depending upon changes in our product sales mix and prices, distribution channels and geographies, manufacturing yields, period expenses, levels of production volume, cost of raw materials, and currency exchange rates.

**Selling, General and Administrative**

Our selling, general and administrative expenses as a percentage of net sales totaled 83.4% in the second quarter of 2013, compared to 69.1% in the second quarter of 2012. Selling, general and administrative expense for the second quarter of 2013 included \$2.6 million of transition costs associated with the sale of our OrthoRecon business (4.3% of net sales), \$1.4 million of transition costs related to our acquisition of BioMimetic (2.4% of net sales), and \$0.3 million of cost related to distributor transition agreements (0.6% of net sales). Selling, general and administrative expense for the second quarter of 2012 included \$0.2 million of cost related to distributor transition agreements (0.4% of net sales). The remaining increase is the result of \$2.7 million of expenses associated with the acquired BioMimetic

business (4.5% of net sales), \$0.8 million of taxes related to the enacted 2.3% excise tax on U.S. sales of medical devices (1.3% of net sales), and increased sales and marketing costs as a result of our initiative to convert a substantial portion of our U.S. foot and ankle sales force to direct employees.

23

---

Table of Contents

Our selling, general and administrative expenses in continuing operations will increase after the sale of our OrthoRecon business is complete, due to anticipated dis-synergies in certain corporate and international expenses that have been recorded in discontinued operations in our condensed consolidated financial statements. These dis-synergies include expenses associated with our information technology support, a new corporate headquarters, and international employees and facilities.

**Research and Development**

Our investment in research and development activities represented approximately 9.7% of net sales in the second quarter of 2013, as compared to 6.7% of net sales in the second quarter of 2012. Our research and development expenses include \$0.2 million (0.4% of net sales) of non-cash, stock-based compensation expense in the second quarter of 2013 and \$0.1 million (0.2% of net sales) of non-cash, stock-based compensation expense in the second quarter of 2012. The increase in research and development costs as a percentage of net sales is attributable to spending associated with the acquired BioMimetic business.

Our research and development expenses in continuing operations will increase after the sale of our OrthoRecon business is complete, due to anticipated dis-synergies in certain employee-related expenses that have been recorded in discontinued operations in our condensed consolidated financial statements.

**Amortization of Intangible Assets**

Charges associated with the amortization of intangible assets totaled \$2.8 million (4.6% of net sales) in the second quarter of 2013, as compared to \$1.0 million (1.9% of net sales) in the second quarter of 2012. This increase is primarily attributable to approximately \$1.0 million of impairment charges associated with certain intangible assets acquired in prior periods and a \$0.3 million increase in amortization expense associated with distributor non-compete agreements entered into during the second and third quarters of 2012. The remaining increase is due to amortization of intangible assets of the acquired BioMimetic and WG Healthcare businesses. Based on the intangible assets held as of June 30, 2013, excluding amortization associated with Augment<sup>®</sup> Bone Graft, which remains subject to FDA approval, we expect to recognize amortization expense of approximately \$6.3 million for the full year of 2013, \$4.5 million in 2014, \$2.8 million in 2015, \$2.0 million in 2016, and \$1.8 million in 2017. Based upon our preliminary value of IPR&D, we anticipate an increase in amortization expense of approximately \$4 million to \$5 million per year, if and when, Augment<sup>®</sup> Bone Graft is approved by the FDA. Our amortization expense will also be impacted when other IPR&D projects reach technological feasibility.

**Interest Expense, Net**

Interest expense, net, consists of interest expense of \$4.1 million during the second quarter of 2013 and \$2.0 million during the second quarter of 2012, offset by interest income of \$0.1 million during the second quarter of 2013 and 2012. Our interest expense during the second quarter of 2013 relates primarily to \$1.5 million of interest expense on our 2017 Notes and \$2.2 million of non-cash interest expense associated with the amortization of the discount on our 2017 Notes. Our interest income is generated by our invested cash balances and investments in marketable securities. The amounts of interest income we expect to realize in 2013 and beyond are subject to variability, dependent upon both the rate of invested returns we realize and the amount of excess cash balances on hand.

**Other (Income) Expense, Net**

Other (income) expense, net was \$4.6 million in the second quarter of 2013, compared to (\$0.3 million) in the second quarter of 2012. For the second quarter of 2013, other (income) expense, net includes an unrealized loss of \$5.8 million on CVRs issued in connection with the acquisition of BioMimetic, partially offset by an unrealized gain of \$1.0 million for mark-to-market adjustments on our derivative asset and liability.

**Provision for Income Taxes**

We recorded an income tax benefit of \$6.2 million in the second quarter of 2013, compared to \$0.6 million in the second quarter of 2012. During the second quarter of 2013, our effective tax rate was approximately 28.5% as compared to 31.4% in the second quarter of 2012. The decrease in the effective tax rate is primarily related to the impact of the non-deductible mark-to-market adjustment on CVRs issued in connection with the acquisition of BioMimetic on our taxable income.

**Discontinued Operations, net of Tax**

Discontinued operations, net of tax, consists of our OrthoRecon business for which we have entered into a definitive agreement to sell to MicroPort. In addition, costs associated with corporate employees and infrastructure being transferred as a part of the sale have been included in discontinued operations.

Net sales of our OrthoRecon business totaled \$60.2 million in the second quarter of 2013, as compared to \$71.3 million in the second quarter of 2012, a 16% decline, driven by an 18% decrease in hip sales and a 12% decrease in knee sales.

Our hip product net sales totaled \$32.7 million during the second quarter of 2013, down from \$40.1 million in the second quarter of 2012. Our domestic hip sales decreased 12% over prior year, primarily due to a 9% decrease in volume as the result of customer

Table of Contents

losses during 2012. International hip sales declined 22% from the prior year primarily due to the conversion of our Belgium subsidiary to a stocking distributor late in the second quarter of 2012, as well as the negative impact of \$1.8 million of unfavorable currency exchange rates.

Our knee product net sales totaled \$26.6 million during the second quarter of 2013, down from \$30.2 million in the second quarter of 2012. Our domestic knee sales decreased 16% over prior year, primarily due to a 16% decrease in volume as the result of customer losses during 2012. International knee sales declined 8% from the prior year primarily due to the negative impact of \$0.5 million of unfavorable currency exchange rates.

Loss from discontinued operations, net of tax, was \$1.8 million in the second quarter of 2013, as compared to income from discontinued operations, net of tax of \$2.1 million in the second quarter of 2012. The decrease in net income was primarily driven by the decrease in sales year over year, the after tax impact of \$2.8 million of legal and professional fees associated with the MicroPort transaction, and \$0.5 million of taxes related to the enacted 2.3% excise tax on U.S. sales of medical devices, partially offset by the after tax impact of a \$1.4 million decrease in expenses associated with the deferred prosecution agreement and U.S. governmental inquiries.

Comparison of six months ended June 30, 2013 to six months ended June 30, 2012

The following table sets forth, for the periods indicated, our results of operations expressed as dollar amounts (in thousands) and as percentages of net sales:

	Six Months Ended June 30,		2012		
	2013		Amount	% of Sales	
Net sales	\$116,865	100.0	% \$104,837	100.0	%

Income from discontinued operations, net of tax	1,716	n/a	1,754	n/a	

Table of Contents

The following table sets forth our net sales by product line for the periods indicated (in thousands) and the percentage of year-over-year change:

	Six Months Ended June 30,			
	2013	2012	% Change	
Foot and Ankle	\$72,393	\$58,507	23.7	%
Upper Extremity	12,149	12,894	(5.8	%)
Biologics	28,748	30,641	(6.2	%)
Other	3,575	2,795	27.9	%
Total Sales	\$116,865	\$104,837	11.5	%

The following table presents net sales by geographic area (in thousands):

Geographic	Three Months Ended June 30,			
	2013	2012	% Change	
Domestic	\$85,401	\$81,642	4.6	%
International	31,464	23,195	35.6	%
Total net sales	\$116,865	\$104,837	11.5	%

**Net Sales**

Net sales totaled \$116.9 million during the first six months of 2013, as compared to \$104.8 million in the first six months of 2012. The 11% increase was driven by 24% growth in our foot and ankle business, offset by a 6% decline in our biologics business and a 6% decline in upper extremities.

Our foot and ankle net sales increased to \$72.4 million in the first six months of 2013, representing growth of 24% over the first six months of 2012. Domestically, foot and ankle product sales increased 16% over the first six months of 2012, due to the continued success of our ORTHOLOC® 3Di Reconstruction Plating System launched in the second quarter of 2012, as well as continued growth of our INBONE® Total Ankle Arthroplasty products. Our international foot and ankle sales grew 58% to \$17.7 million, as a result of \$1.8 million of increased sales in Europe due to the acquisition of a foot and ankle business in the quarter ended March 31, 2013, and the impact of \$2.1 million of certain stocking orders in Asia as the result of the addition of a new distribution partner in China. The remaining growth is a result of increased focus on our foot and ankle business across all international geographies.

Upper extremity net sales decreased to \$12.1 million in the first six months of 2013, representing a decline of 6% over the first six months of 2012, driven primarily by a 3% decline in domestic sales, and unfavorable currency exchange rates.

Net sales of our biologics products totaled \$28.7 million in the first six months of 2013, representing a 6% decrease from the first six months of 2012. In the U.S., our biologics sales decreased 15% in 2013, due to lower sales volume, partially offset by a 28% increase in international sales, driven by the acquired BioMimetic business.

**Cost of Sales**

Our cost of sales as a percentage of net sales increased to 24.2% in the first six months of 2013, as compared to 22.1% in the first six months of 2012, primarily due to unfavorable geographic mix and increased provisions for excess and obsolete inventory. Our cost of sales and corresponding gross profit percentages can be expected to fluctuate in future periods depending upon changes in our product sales mix and prices, distribution channels and geographies, manufacturing yields, period expenses, levels of production volume, cost of raw materials, and currency exchange rates.

**Selling, General and Administrative**

Our selling, general and administrative expenses as a percentage of net sales totaled 86.6% in the first six months of 2013, compared to 67.2% in the first six months of 2012. Selling, general and administrative expense for the first six months of 2013 included \$8.9 million of transaction and transition costs related to our acquisition of BioMimetic (7.6% of net sales), \$2.6 million of transition costs associated with the sale of our OrthoRecon business (2.2% of net sales), and \$0.7 million of costs related to distributor transition agreements (0.6% of net sales). Selling, general and

administrative expense for the first six months of 2012 included \$0.2 million of cost related to distributor transition agreements (0.2% of net sales). The remaining increase is the result of \$3.6 million of expenses associated with the acquired BioMimetic business (3.1% of net sales), \$1.4 million of taxes related to the enacted 2.3% excise tax on U.S. sales of medical devices (1.2% of net sales), and increased sales and marketing costs as a result of our initiative to convert a substantial portion of our U.S. foot and ankle sales force to direct employees.

Table of Contents

## Research and Development

Our investment in research and development activities represented approximately 8.0% of net sales in the first six months of 2013, as compared to 6.5% of net sales in the first six months of 2012. Our research and development expenses include \$0.4 million (0.3% of net sales) of non-cash, stock-based compensation expense in the first six months of 2013 and \$0.2 million (0.2% of net sales) of non-cash, stock-based compensation expense in the first six months of 2012. The increase in research and development costs as a percentage of net sales is attributable to spending associated with the acquired BioMimetic business.

## Amortization of Intangible Assets

Charges associated with the amortization of intangible assets totaled \$4.4 million (3.8% of net sales) in the first six months of 2013, as compared to \$1.6 million (1.6% of net sales) in the first six months of 2012. This increase is primarily attributable to a \$1.2 million increase in amortization expense associated with distributor non-compete agreements entered into during the second and third quarters of 2012 and approximately \$1.0 million of impairment charges associated with certain intangible assets acquired in prior periods. The remaining increase is due to amortization of the intangible assets of the acquired BioMimetic and WG Healthcare businesses.

## Interest Expense, Net

Interest expense, net, consists of interest expense of \$8.2 million during the first six months of 2013 and \$3.9 million during the first six months of 2012, offset by interest income of \$0.2 million during the first six months of 2013 and 2012. The increase in our interest expense relates primarily to \$3.0 million of interest expense on our 2017 Notes and \$4.3 million of non-cash interest expense associated with the amortization of the discount on our 2017 Notes.

## Other Income, Net

Other income, net was \$1.3 million in the first six months of 2013, compared to \$0.3 million in the first six months of 2012. For the first six months of 2013, other income, net includes a \$7.8 million realized gain on our previously held investment in BioMimetic, partially offset by an unrealized loss of \$5.8 million on CVRs issued in connection with the acquisition of BioMimetic, and an unrealized loss of \$1.0 million for mark-to-market adjustments on our derivative asset and liability.

## Provision for Income Taxes

We recorded an income tax benefit of \$12.6 million in the first six months of 2013, compared to \$0.1 million in the first six months of 2012. During the first six months of 2013, our effective tax rate was approximately 38.1% as compared to 11.4% in the first six months of 2012. During 2013, we recorded a tax benefit of approximately \$0.5 million related to the 2012 Research & Development tax credit that was signed into law in 2013, but retroactive to the beginning of 2012. The increase in the effective tax rate compared to 2012 is primarily related to the absence of a research and development tax credit during 2012 and its impact on our near break-even income.

## Discontinued Operations, Net of Tax

Discontinued operations, net of tax, consists of our OrthoRecon business for which we have entered into a definitive agreement to sell to MicroPort. In addition, costs associated with corporate employees and infrastructure being transferred as a part of the sale have been included in discontinued operations.

Net sales of our OrthoRecon business totaled \$124.3 million in the first six months of 2013, as compared to \$145.1 million in the first six months of 2012, a 14% decline, driven by a 16% decrease in hip sales and an 11% decrease in knee sales.

Income from discontinued operations, net of tax was \$11.6 million in the first six months of 2013 compared to \$6.2 million in the first six months of 2012. During the first six months of 2013, income from discontinued operations included the after tax impact of a benefit of \$19.4 million related to a change in management's estimate of our probable insurance recovery for previously recognized costs associated with product liability claims. This increase was partially offset by decreased profitability as a result of the sales decline, and \$0.9 million of taxes related to the enacted 2.3% excise tax on U.S. sales of medical devices.

Table of Contents

## Liquidity and Capital Resources

The following table sets forth, for the periods indicated, certain liquidity measures (in thousands):

	As of June 30, 2013	As of December 31, 2012
Cash and cash equivalents	\$281,498	\$320,360
Short-term marketable securities	5,768	12,646
Long-term marketable securities	17,360	—
Working capital	452,236	575,713

We invest in long-term marketable securities with maturity dates ranging from 17 to 36 months, consisting of investments in government, agency, and corporate bonds. As of June 30, 2013, the weighted average maturity for these investments was 21 months.

Operating Activities. Cash provided by operating activities was \$5.8 million for the first six months of 2013 as compared to cash provided by operating activities of \$41.1 million for the first six months of 2012. The decrease is primarily driven by decreased cash profitability.

Investing Activities. Our capital expenditures totaled approximately \$9.7 million and \$8.6 million in the first six months of 2013 and 2012, respectively. Our industry is capital intensive, particularly as it relates to surgical instrumentation. Historically, our capital expenditures have consisted of purchased surgical instruments, manufacturing equipment, research and testing equipment, computer systems, and office furniture and equipment. We expect to incur capital expenditures of approximately \$30 million in 2013.

In connection with our acquisitions of BioMimetic and WG Healthcare, we paid \$40.4 million cash, net of cash acquired, for these businesses. Refer to Note 2 of our condensed consolidated financial statements for additional information regarding these acquisitions.

Financing Activities. During the first six months of 2013, cash provided by financing activities totaled \$2.4 million compared to the first six months of 2012 when cash used in financing activities totaled \$13.3 million. The change is primarily attributable to scheduled payments of approximately \$13.8 million for long-term borrowings on our delayed draw term loan available under our senior credit facility during the first six months of 2012, prior to its termination. On August 22, 2012, we issued \$300 million of the 2017 Notes, which generated net proceeds of \$290.8 million. In connection with the offering of the 2017 Notes, we entered into convertible note hedging transactions with three counterparties (the Option Counterparties). We also entered into warrant transactions in which we sold warrants for an aggregate of 11,794,200 shares of our common stock to the Option Counterparties. As of June 30, 2013, \$259.0 million aggregate principal amount of the 2017 Notes remain outstanding.

In November 2007, we issued \$200 million of the 2014 Notes. On February 10, 2011, we announced the commencement of a tender offer to purchase for cash any and all of our outstanding 2014 Notes. Upon expiration on March 11, 2011, we purchased \$170.9 million aggregate principal amount of the 2014 Notes. On August 22, 2012, we purchased \$25.3 million aggregate principal amount of the 2014 Notes. As of June 30, 2013, \$3.8 million aggregate principal amount of the 2014 Notes remain outstanding.

As of June 30, 2013, we had an immaterial amount of cash and cash equivalents held in jurisdictions outside of the U.S., which are expected to be indefinitely reinvested for continued use in foreign operations. Repatriation of these assets to the U.S. would have negative tax consequences. We do not intend to repatriate these funds.

Discontinued Operations. Cash flows from discontinued operations are combined with cash flows from continuing operations in the Condensed Consolidated Statement of Cash Flows. During the first six months of 2013, cash flows from discontinued operations was approximately \$25 million, compared to approximately \$32 million in the first six months of 2012. We do not expect that the absence of cash flows from discontinued operations will have an impact on our ability to meet contractual cash obligations, fund our working capital requirements, operations, and anticipated capital expenditures.

Contractual Cash Obligations. During the six months ended June 30, 2013, we acquired certain non-cancelable contractual cash obligations associated with minimum supply obligations upon our acquisition of BioMimetic, including the supply agreement with Novartis Vaccines and Diagnostics, Inc. amended in the second quarter of 2013,

as follows (in thousands):

	Total	2013	2014-2015	2016-2017	Thereafter
Minimum Supply Obligations	\$9,800	\$3,700	\$2,600	\$3,500	\$—

## Table of Contents

### Other Liquidity Information

We have funded our cash needs since 2000 through various equity and debt issuances and through cash flow from operations. Although it is difficult for us to predict our future liquidity requirements, we believe that our current cash balance of approximately \$281.5 million and our marketable securities balances totaling \$23.1 million will be sufficient for the foreseeable future to fund our working capital requirements, operations, and anticipated capital expenditures in 2013 of approximately \$30 million, and to meet our contractual cash obligations in 2013.

Upon the closing of the sale of our OrthoRecon business to MicroPort, we estimate the net after-tax proceeds, including transaction costs, will be approximately \$260 million. We intend to use these net proceeds to fund transition costs of \$25 million to \$35 million and the remainder to fund growth opportunities for our Extremities and Biologics business and pay certain retained liabilities of the OrthoRecon business.

### Critical Accounting Policies and Estimates

Information on judgments related to our most critical accounting policies and estimates is discussed in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2012. Certain of our more critical accounting estimates require the application of significant judgment by management in selecting the appropriate assumptions in determining the estimate. By their nature, these judgments are subject to an inherent degree of uncertainty. We develop these judgments based on our historical experience, terms of existing contracts, our observance of trends in the industry, information provided by our customers, and information available from other outside sources, as appropriate. Actual results may differ from these judgments under different assumptions or conditions. Different, reasonable estimates could have been used for the current period. Additionally, changes in accounting estimates are reasonably likely to occur from period to period. Both of these factors could have a material impact on the presentation of our financial condition, changes in financial condition or results of operations. All of our significant accounting policies are more fully described in Note 2 to our consolidated financial statements set forth in our Annual Report on Form 10-K for the year ended December 31, 2012.

**Valuation of In-Process Research and Development.** The estimated preliminary fair value attributed to IPR&D represents an estimate of the fair value of purchased in-process technology for research programs that have not reached technological feasibility and have no alternative future use. Only those research programs that had advanced to a stage of development where management believed reasonable net future cash flow forecasts could be prepared and a reasonable possibility of technical success existed were included in the estimated preliminary fair value. IPR&D is recorded as an indefinite-lived intangible asset until completion or abandonment of the associated research and development projects. Accordingly, no amortization expense is reflected in the results of operations. If a project is completed, the carrying value of the related intangible asset will be amortized over the remaining estimated life of the asset beginning with the period in which the project is completed. If a project becomes impaired or is abandoned, the carrying value of the related intangible asset will be written down to its fair value and an impairment charge will be taken in the period the impairment occurs. These intangible assets will be tested for impairment on an annual basis, or earlier if impairment indicators are present.

Due to the uncertainty associated with research and development projects, there is risk that actual results will differ materially from the original cash flow projections and that the research and development project will result in a successful commercial product. The risks associated with achieving commercialization include, but are not limited to, delay or failure to obtain regulatory approvals to conduct clinical trials, delay or failure to obtain required market clearances, delays or issues with patent issuance, or validity and litigation.

**Discontinued Operations.** On June 19, 2013, we entered into a definitive agreement with MicroPort under which we will sell our OrthoRecon business. The OrthoRecon business consists of hip and knee implant products. We determined that this agreement meets the criteria for classification as discontinued operations. As such, the financial results of our OrthoRecon business have been reflected within discontinued operations in the condensed consolidated financial statements. In addition, costs associated with corporate employees being transferred as a part of the sale have been included in discontinued operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

There have been no material changes from the information reported under Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2012.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

We have established disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934. Our disclosure controls and procedures are designed to ensure that material information relating to us, including our consolidated subsidiaries, is made known to our principal executive officer and principal financial officer by others within our organization. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures as of June 30, 2013 to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive officer and principal financial officer as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2013.

Changes in Internal Control Over Financial Reporting

During the three month period ended June 30, 2013, there were no changes in our internal control over financial reporting that materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

From time to time, we are subject to lawsuits and claims that arise out of our operations in the normal course of business. We are the plaintiff or defendant in various litigation matters in the ordinary course of business, some of which involve claims for damages that are substantial in amount.

Governmental Inquiries

In December 2007, we received a subpoena from the United States Department of Justice (DOJ) through the United States Attorney's Office for the District of New Jersey (USAO) requesting documents for the period January 1998 through the present related to any consulting and professional service agreements with orthopaedic surgeons in connection with hip or knee joint replacement procedures or products. This subpoena was served shortly after several of our knee and hip competitors agreed with the DOJ to resolutions of similar investigations.

On September 29, 2010, our wholly owned subsidiary, Wright Medical Technology, Inc. (WMT) entered into a 12-month Deferred Prosecution Agreement (DPA) with the USAO and a Civil Settlement Agreement (CSA) with the United States. Under the DPA, the USAO filed a criminal complaint in the United States District Court for the District of New Jersey (Court) charging WMT with conspiracy to commit violations of the Anti-Kickback Statute (42 U.S.C. § 1320a-7b) during the years 2002 through 2007. The Court deferred prosecution of the criminal complaint during the term of the DPA and the USAO agreed that if WMT complied with the DPA's provisions, the USAO would seek dismissal of the criminal complaint.

Pursuant to the CSA, WMT settled civil and administrative claims relating to the matter for a payment of \$7.9 million without any admission by WMT. In conjunction with the CSA, WMT also entered into a five year Corporate Integrity Agreement (CIA) with the Office of the Inspector General of the United States Department of Health and Human Services (OIG-HHS). Pursuant to the DPA, an independent monitor reviewed and evaluated WMT's compliance with its obligations under the DPA. The DPA and the CIA were filed as Exhibits 10.3 and 10.2, respectively, to our Current Report on Form 8-K filed on September 30, 2010. The DPA was also posted to our website. Each of the DPA and the CIA could be modified by mutual consent of the parties thereto.

On September 15, 2011, WMT reached an agreement with the USAO and the OIG-HHS under which WMT voluntarily agreed to extend the term of its DPA for 12 months, to September 29, 2012. On September 15, 2011, WMT also agreed with the OIG-HHS to an amendment to the CIA under which certain of WMT's substantive obligations under the CIA would begin on September 29, 2012, when the amended DPA monitoring period expired. The term of the CIA has not changed, and will expire as previously provided on September 29, 2015.

On October 4, 2012, the USAO issued a press release announcing that the amended DPA had expired on September 29, 2012, that it had moved to dismiss the criminal complaint against WMT because WMT had fully complied with the terms of the DPA, and that the Court had ordered dismissal of the complaint on October 4, 2012.

The DPA imposed, and the CIA continues to impose, certain obligations on WMT to maintain compliance with U.S. healthcare laws, regulations and other requirements. Our failure to do so could expose us to significant liability including, but not limited to, exclusion from federal healthcare program participation, including Medicaid and Medicare, which would have a material adverse effect on our financial condition, results of operations and cash flows, potential prosecution, civil and criminal fines or penalties, and additional litigation cost and expense.

In addition to the USAO and OIG-HHS, other governmental agencies, including state authorities, could conduct investigations or institute proceedings that are not precluded by the terms of the settlements reflected in the DPA and the CIA. In addition, the settlement with the USAO and OIG-HHS could increase our exposure to lawsuits by potential whistleblowers, including under the federal false claims acts, based on new theories or allegations arising from the allegations made by the USAO. The costs of defending or resolving any such investigations or proceedings could have a material adverse effect on our financial condition, results of operations and cash flows.

On August 3, 2012, we received a subpoena from the U.S. Attorney's Office for the Western District of Tennessee requesting records and documentation relating to our PROFEMUR® series of hip replacement devices. The subpoena covers the period from January 1, 2000 to August 2, 2012. We are in the process of collecting the responsive documents and responding to the subpoena. We are unable to estimate the impact of the ultimate outcome of these

matters on our consolidated financial position or results of operations.

**Patent Litigation.**

In 2011, Howmedica Osteonics Corp. (Howmedica) and Stryker Ireland, Ltd. (Stryker), each a subsidiary of Stryker Corporation, filed a lawsuit against WMT in the United States District Court for the District of New Jersey (District Court) alleging that we infringed Howmedica and Stryker's U.S. Patent No. 6,475,243 related to our LINEAGE® Acetabular Cup System and DYNASTY® Acetabular Cup System. The lawsuit seeks an order of infringement, injunctive relief, unspecified damages, and various other costs and relief and could impact a substantial portion of our hip product line. On July 9, 2013, the District Court issued a claim

## Table of Contents

construction ruling. Under the court's claim construction ruling, we do not believe our product infringes the asserted patents. We believe that we have strong defenses against these claims and plan to vigorously defend this lawsuit. Management does not believe that the outcome of this lawsuit will have a material adverse effect on our consolidated financial position or results of operations.

In 2012, Bonutti Skeletal Innovations, LLC (Bonutti) filed a patent infringement lawsuit against us in the United States Court for the District of Delaware. Bonutti originally alleged that Wright's Link Sled Prosthesis infringes U.S. Patent 6,702,821. We distribute the Link Sled Prosthesis under a June 1, 2008 distribution agreement with LinkBio Corp. In January 2013, Bonutti amended its complaint, alleging that our ADVANCE® knee system, including ODYSSEY® instrumentation, infringes U.S. Patent 8,133,229, and that our ADVANCE® knee system, including ODYSSEY® instrumentation and PROPHECY® guides, infringes U.S. Patent 7,806,896, which issued October 5, 2010. We have responded to the amended complaint and are vigorously defending these allegations. All of the claims of the asserted patents are directed to surgical methods for minimally invasive surgery. We do not believe the complaint will have a material adverse impact to our consolidated financial position or results of operations.

In June 2013, Orthophoenix filed a patent lawsuit against us in the United States District Court for the District of Delaware alleging that surgical methods using our X-REAM® product infringe two patents. We believe we have strong defenses against these claims and plan to vigorously defend this lawsuit. Management does not believe that the outcome of this lawsuit will have a material adverse effect on our consolidated financial position or results of operations.

In June 2013, Anglefix filed suit in the United States District Court for the Western District of Tennessee, alleging that our ORTHOLOC® products infringe Anglefix's asserted patent. We believe we have strong defenses against these claims and plan to vigorously defend this lawsuit. Management does not believe that the outcome of this lawsuit will have a material adverse effect on our consolidated financial position or results of operations.

### Product Liability

Wright Medical Technology, Inc. has been named as a defendant, in some cases with multiple other defendants, in lawsuits in which it is alleged that as yet unspecified defects in the design, manufacture or labeling of certain metal-on-metal hip replacement products rendered the products defective. The lawsuits generally employ similar allegations that use of the products resulted in excessive metal ions and particulate in the patients into whom the devices were implanted, in most cases resulting in revision surgery. We anticipate that additional lawsuits relating to metal on metal hip replacement products may be brought.

Because of the similar nature of the allegations made by several plaintiffs whose cases were pending in federal courts, upon motion of one plaintiff, Danny L. James, Sr., the United States Judicial Panel on Multidistrict Litigation in February 2012 transferred certain actions pending in the federal court system related to metal on metal hip replacement products to the United States District Court for the Northern District of Georgia, for consolidated pre-trial management of the cases before a single United States District Court Judge (the MDL). The consolidated matter is known as In re: Wright Medical Technology, Inc. Conserve Hip Implant Products Liability Litigation.

Certain plaintiffs have elected to file their lawsuits in state courts in California. In doing so, most of those plaintiffs have named a surgeon involved in the design of the allegedly defective products as a defendant in the actions, along with his personal corporation. Pursuant to contractual obligations, Wright Medical has agreed to indemnify and defend the surgeon in those actions. Similar to the MDL proceeding in federal court, because the lawsuits generally employ similar allegations, certain of those pending lawsuits in California have been consolidated for pretrial handling pursuant to procedures of California state Judicial Counsel Coordinated Proceedings (JCCP). There are other individual lawsuits related to metal on metal hip products pending in various state courts.

We are vigorously defending these lawsuits. Although we do not believe that the outcome of any individual claim will have a material unfavorable outcome, we are unable to estimate the impact of the ultimate outcome of these matters.

### Employment Matters

In 2012, two former employees, Frank Bono and Alicia Napoli, each filed separate lawsuits against WMT in the Chancery Court of Shelby County, Tennessee, which asserted claims for retaliatory discharge and breach of contract based upon his or her respective separation pay agreement. In addition, Mr. Bono and Ms. Napoli each asserted a claim for defamation related to the press release issued at the time of their terminations and a wrongful discharge

claim alleging violation of the Tennessee Public Protection Act. Mr. Bono and Ms. Napoli each claimed that he or she was entitled to attorney fees in addition to other unspecified damages.

We are vigorously defending these lawsuits. Management does not believe that the outcome of these claims will have a material adverse effect on our consolidated financial position or results of operations.

#### Securities Litigation

In January 2013, the United States District Court, Middle District of Tennessee, granted BioMimetic's, and the other named defendants', motion to dismiss a federal securities purported class action lawsuit without leave to amend the complaint. The plaintiffs filed a Motion to Alter Judgment or Amend Order and Judgment of Dismissal with Prejudice, seeking reconsideration of the Court's decision and BioMimetic filed a response opposing that motion. The Court has not yet ruled on the plaintiffs' motion.

#### Other

Table of Contents

We have received claims from health care professionals following the termination of certain contractual arrangements and believe additional claims are possible. Management is unable to estimate the cost, if any, of ultimately resolving these claims. Accordingly, no provisions have been recorded in our financial statements related to these claims as of June 30, 2013.

ITEM 1A. RISK FACTORS.

A Competitor's Recall of Modular Hip Stems Could Negatively Impact Sales of our PROFEMUR® Modular Hip System.

On July 6, 2012, Stryker announced the voluntary recall of its Rejuvenate Modular and ABG II modular neck hip stems citing risks including the potential for fretting and/or corrosion at or about the modular neck junction. Although Stryker's recalled modular neck hip stems differ in design and material from our PROFEMUR® modular neck hip stems, we have previously noted the risk that Stryker's recall and the resultant publicity could negatively impact sales of modular neck systems of other manufacturers, including of our PROFEMUR® system, even if the issues cited by Stryker are unique to Stryker products. While to date we have not observed a material impact from Stryker's action on sales of our PROFEMUR® modular neck hip stems, we believe Stryker's action has increased industry focus on the safety of cobalt chrome modular neck products. We carefully monitor the clinical performance of our PROFEMUR® modular neck hip systems, which combine a cobalt chrome modular neck and a titanium stem. With over 33,000 units sold since this version was introduced in 2009, and an extremely low complaint rate, we remain confident in the safety and efficacy of this product. Nevertheless, in light of Stryker's recall, and the general negative publicity surrounding "metal on metal" articulating surfaces (which do not involve modular hip stems), there remains a risk that, even in the absence of clinical evidence, demand for our PROFEMUR® modular neck hip stems could be negatively impacted.

The closing of our previously announced agreement with MicroPort to divest our OrthoRecon business could be delayed or cancelled and may cause interruption to our business that could have an adverse effect on our results of operations.

On June 19, 2013, we announced we had entered into a definitive agreement under which MicroPort Medical B.V., a subsidiary of MicroPort Scientific Corporation, will acquire Wright's OrthoRecon business. The transaction is expected to close by the end of the third quarter or early in the fourth quarter of 2013. Given that the transaction is subject to customary closing conditions, including MicroPort shareholder approval and receipt of regulatory clearances, the closing of the transaction could be delayed or cancelled.

This transaction may also present financial and operational risks, including diversion of management attention from the existing core business, integrating or separating personnel and financial and other systems, and adverse effects on existing business relationships with suppliers and customers. Additionally, our net after-tax proceeds, including transaction costs, are estimated to be approximately \$260 million. We may incur more transaction costs than initially anticipated, which would reduce our net proceeds from the transaction.

In addition to the other information set forth in this Quarterly Report, you should carefully consider our risk factors as described in Item 1A "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2012. The risks disclosed therein could materially affect our business, financial condition and operating results. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.
