Notes to Condensed Consolidated Financial Statements
June 30, 2009 and 2008
(Unaudited)

(1) Organization and Basis of Presentation

The unaudited condensed consolidated financial statements of the Company are prepared in accordance with U.S. generally accepted accounting principles for interim financial information and in accordance with the instructions to Form 10-Q. In the opinion of management, all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented have been included and are normal and recurring in nature, except as otherwise noted. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2008.

All significant intercompany balances and transactions have been eliminated in the condensed consolidated financial statements.

The unaudited condensed consolidated financial statements for the three and six months ended June 30, 2009 and 2008 include the accounts of the Company and Essex Portfolio, L.P. (the "Operating Partnership", which holds the operating assets of the Company). See below for a description of entities consolidated by the Operating Partnership. The Company is the sole general partner in the Operating Partnership, with a 91.7% general partnership interest as of June 30, 2009. Total Operating Partnership units outstanding were 2,450,002 and 2,413,078 as of June 30, 2009 and December 31, 2008, respectively, and the redemption value of the units, based on the closing price of the Company's common stock totaled \$152.5 million and \$185.2 million, as of June 30, 2009 and December 31, 2008, respectively.

As of June 30, 2009, the Company owned or had ownership interests in 133 apartment communities, (aggregating 27,143 units) (collectively, the "Communities", and individually, a "Community"), five office and commercial buildings and four active development projects (collectively, the "Portfolio"). The Communities are located in Southern California (Los Angeles, Orange, Riverside, Santa Barbara, San Diego, and Ventura counties), Northern California (the San Francisco Bay Area) and the Seattle metropolitan area.

Fund Activities

Essex Apartment Value Fund II, L.P. ("Fund II") is an investment fund formed by the Company to add value through rental growth and asset appreciation, utilizing the Company's development, redevelopment and asset management capabilities.

Fund II has eight institutional investors, and the Company, with combined partner equity contributions of \$265.9 million. The Company contributed \$75.0 million to Fund II, which represents a 28.2% interest as general partner and limited partner. Fund II utilized leverage equal to approximately 55% upon the initial acquisition of the underlying real estate. Fund II invested in apartment communities in the Company's targeted West Coast markets and, as of June 30, 2009, owned 13 apartment communities and one development project. The Company records revenue for its asset management, property management, development and redevelopment services when earned, and promote income when realized if Fund II exceeds certain financial return benchmarks.

Marketable Securities

As of June 30, 2009 marketable securities consisted primarily of investment-grade unsecured bonds and investment funds that invest in U.S. treasury or agency securities. As of June 30, 2009 the Company had classified the marketable securities as available for sale and the Company reports these securities at fair value, based on quoted market prices (Level 1 as defined by FAS 157 as discussed later in Note 1), and any unrealized gain or loss is recorded as other comprehensive income (loss). Realized gains and losses and interest income are included in interest and other income on the condensed consolidated statement of operations. Amortization of unearned discounts is included in interest income.

Variable Interest Entities

In accordance with Financial Accounting Standards Board (“FASB”) Interpretation No. 46 Revised (“FIN 46R”), “Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51”, the Company consolidates 19 DownREIT limited partnerships (comprising twelve communities), a development project, an office building that is subject to loans made by the Company, and 55 low income housing units. Total DownREIT units outstanding were 1,137,623 and 1,148,510 as of June 30, 2009 and December 31, 2008 respectively, and the redemption value of the units, based on the closing price of the Company’s common stock totaled \$70.8 million and \$88.1 million, as of June 30, 2009 and December 31, 2008, respectively. The Company consolidates these entities because it is deemed the primary beneficiary under FIN 46R. The consolidated total assets and liabilities related to these variable interest entities (“VIEs”), net of intercompany eliminations, were approximately \$281.8 million and \$170.0 million, respectively, as of June 30, 2009 and \$256.0 million and \$169.1 million, respectively, as of December 31, 2008. Interest holders in VIEs consolidated by the Company are allocated net income equal to the cash payments made to those interest holders or distributions from cash flow. The remaining results of operations are generally allocated to the Company. As of June 30, 2009 and December 31, 2008, the Company did not have any VIE’s of which it was not deemed to be the primary beneficiary.

Stock-Based Compensation

The Company accounts for share based compensation using the fair value method of accounting. The estimated fair value of stock options granted by the Company is being amortized over the vesting period of the stock options. The estimated grant date fair values of the long term incentive plan units (discussed in Note 13, "Stock Based Compensation Plans," in the Company's Form 10-K for the year ended December 31, 2008) are being amortized over the expected service periods.

Stock-based compensation expense for options and restricted stock totaled \$0.2 million for the three months ended June 30, 2009 and 2008, and \$0.5 million and \$0.4 million for the six months ended June 30, 2009 and 2008, respectively. The intrinsic value of the stock options exercised during the three months ended June 30, 2008 totaled \$2.1 million and none for 2009, and \$0.4 million and \$2.7 million for the six months ended June 30, 2009 and 2008 respectively. As of June 30, 2009, the intrinsic value of the stock options outstanding and fully vested totaled \$1.1 million. As of June 30, 2009, total unrecognized compensation cost related to unvested share-based compensation granted under the stock option and restricted stock plans totaled \$3.0 million. The cost is expected to be recognized over a weighted-average period of 2 to 5 years for the stock option plans and is expected to be recognized straight-line over 7 years for the restricted stock awards.

The Company has adopted an incentive program involving the issuance of Series Z and Series Z-1 Incentive Units (collectively referred to as "Z Units") of limited partnership interest in the Operating Partnership. Stock-based compensation expense for Z Units totaled \$0.4 million for the three months ended June 30, 2009 and 2008, respectively, and \$0.8 million for the six months ended June 20, 2009 and 2008.

Stock-based compensation capitalized for stock options, restricted stock awards, and the Z Units totaled \$0.1 million and \$0.2 million for the three months ended June 30, 2009 and 2008, respectively, and \$0.2 million and \$0.4 million for the six months ended June 30, 2009 and 2008, respectively. As of June 30, 2009, the intrinsic value of the Z Units subject to future vesting totaled \$7.3 million. As of June 30, 2009, total unrecognized compensation cost related to Z Units subject to future vesting granted under the Z Units totaled \$5.4 million. The unamortized cost is expected to be recognized over the next 2 to 10 years subject to the achievement of the stated performance criteria.

Stock-based compensation expense for the Outperformance Plan, (the "OPP") adopted in December 2007 totaled approximately \$0.3 million for three months ended June 30, 2009 and 2008, respectively and \$0.6 million for the six months ended June 30, 2009 and 2008. Total unrecognized compensation cost less an estimate for forfeitures related to the OPP totaled \$3.5 million and \$4.1 million as of June 30, 2009 and December 31, 2008, respectively. The unamortized cost is recognized over the expected service period of five years for senior officers and three years for non-employee directors.

Fair Value of Financial Instruments

The Company adopted SFAS 157, "Fair Value Measurements" as of January 1, 2008, which provides guidance on using fair value to measure assets and liabilities. The Company values its financial instruments based on the fair value hierarchy of valuation techniques described in SFAS 157. Level 1 inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date. Level 2 inputs include quoted prices for similar assets and liabilities in active markets and inputs other than quoted prices observable for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability.

The Company uses Level 1 inputs for the fair values of its cash equivalents and its marketable securities except for unsecured bonds. The Company uses Level 2 inputs for its investments in unsecured bonds, notes receivable, notes payable, and cash flow hedges. These inputs include interest rates for similar financial instruments. The Company's

valuation methodology under SFAS 157 for cash flow hedges is described in more detail in note 8. The Company does not use Level 3 inputs to estimate fair values of any of its financial instruments. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

Management believes that the carrying amounts of its variable rate mortgage notes payable, amounts outstanding under lines of credit, notes receivable and other receivables from related parties, and notes and other receivables approximate fair value as of June 30, 2009 and December 31, 2008, because interest rates, yields and other terms for these instruments are consistent with yields and other terms currently available for similar instruments. Management has estimated that the fair value of the Company's \$1.42 billion of fixed debt at June 30, 2009 is approximately \$1.42 billion and the fair value of the Company's \$239.9 million of variable rate debt at June 30, 2009 is \$263.1 million based on the terms of existing mortgage notes payable and variable rate demand notes compared to those available in the marketplace. Management believes that the carrying amounts of cash and cash equivalents, restricted cash, accounts payable and accrued liabilities, other liabilities and dividends payable approximate fair value as of June 30, 2009 due to the short-term maturity of these instruments. Marketable securities and cash flow hedge liabilities are carried at fair value as of June 30, 2009, as discussed further above and in Note 8.

Accounting Estimates and Reclassifications

The preparation of condensed consolidated financial statements, in accordance with U.S. generally accepted accounting principles, requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to acquiring, developing and assessing the carrying values of its real estate properties, its investments in and advances to joint ventures and affiliates, its notes receivables and its qualification as a Real Estate Investment Trust (“REIT”). The Company bases its estimates on historical experience, current market conditions, and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may vary from those estimates and those estimates could be different under different assumptions or conditions. Reclassifications for discontinued operations and noncontrolling interest have been made to prior year statements of operations balances in order to conform to current year presentation. Such reclassifications have no impact on reported earnings, cash flows, total assets or total liabilities.

New Accounting Pronouncements and the Resulting Restatements of Previously Reported Amounts

In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements” (“FAS 160”). FAS 160 establishes accounting and reporting standards that require the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated balance sheet within equity, but separate from the parent’s equity; the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of operations; changes in a parent’s ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently; when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary be initially measured at fair value; and entities provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. FAS 160 is effective for fiscal years beginning on or after December 15, 2008. As summarized in the table below, the accompanying 2008 condensed consolidated financial statements have been restated to record the impact of adoption of FAS 160.

In May 2008, the FASB issued FASB staff position APB 14-1, “Accounting for Convertible Debt Instruments That May be Settled in cash upon Conversion (Including Partial Cash Settlement)” (“APB 14-1”). APB 14-1 requires the issuer of certain convertible debt instruments that may be settled in cash (or other assets) upon conversion separately account for the liability (debt) and equity (conversion option) components of the instruments in a manner that reflects the issuer’s nonconvertible debt borrowing rate. APB 14-1 requires the initial debt proceeds from the sale of a company’s convertible debt instrument to be allocated between the liability component and the equity component. The resulting debt discount will be amortized over the period during which the debt is expected to be outstanding (i.e., through the first optional redemption dates) as additional non-cash interest expense. APB 14-1 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Accounting for the Company’s \$225.0 million exchangeable bonds (the “Bonds”) with a coupon rate of 3.625% due November 2025, which were issued in the fourth quarter of 2005, was impacted by APB 14-1. During the fourth quarter of 2008, the Company repurchased \$53.3 million of the Bonds, and during the first quarter of 2009 the Company repurchased an additional \$71.3 million of the Bonds.

On January 1, 2009, the Company retrospectively adopted APB 14-1 for the Bonds. The Company estimated that the market interest rate for the debt only portion of the Bonds as of the date of issuance was 5.75%, compared to the coupon rate of 3.625%. The Company computed the estimated fair value of the debt portion of the Bonds as the present value of the expected cash flows discounted at 5.75%. The difference between the fair value of the debt portion of the Bonds and the carrying value as previously reported was added to additional paid in capital as of the date of issuance. The discount on the debt is amortized over the period from issuance to the date of the first call

option by the holders of the Bonds which occurs in November 2010 resulting in non-cash interest expense in addition to the interest expense calculated based on the coupon rate. This resulted in non-cash interest charges of \$0.5 million and \$1.0 million for the three months ended June 30, 2009 and 2008, respectively, and \$1.1 million and \$2.0 million for the six months ended June 30, 2009 and 2008, respectively. APB 14-1 requires that the fair value of the debt portion of any bonds that are retired early be estimated to calculate the gain on retirement. The difference between the estimated fair value of the debt portion of the Bonds and the APB 14-1 carrying value of the debt portion of the Bonds is recorded as gain on early retirement of debt and additional paid in capital is reduced to reflect the remaining portion of the total amount paid to retire the Bonds.

(1) As reported balances are adjusted for discontinued operations

In December 2007, the FASB issued revised SFAS No. 141, "Business Combinations" ("FAS 141(R)"). FAS141(R) establishes principles and requirements for how the acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree; recognizes and measures the goodwill acquired in a business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. FAS 141(R) is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of this standard on January 1, 2009 did not have any impact on the Company's consolidated financial position, results of operations or cash flows as it relates only to business combinations for the Company that take place on or after January 1, 2009.

In June 2009, the FASB issued SFAS No. 167, "Amendments to FASB Interpretation No. 46(R), which amends Interpretation 46(R) to replace the quantitative-based risks and rewards calculation for determining which enterprise, if any, has a controlling financial interest in a variable interest entity with an approach focused on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and (1) the obligation to absorb losses of the entity or (2) the right to receive benefits from the entity. An approach that is expected to be primarily qualitative will be more effective for identifying which enterprise has a controlling financial interest in a variable interest entity. This Statement shall be effective as of the beginning of

each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. Management is currently evaluating the impact FAS 167 will have on the Company's condensed consolidated financial statements.

In September 2007, the Company originated a loan to the owners of an apartment community under development in Vancouver, Washington, with a maturity date of February 2009. The proceeds from the loan refinanced the property and provided funding for the completion of the 146-unit apartment community. In July 2008, the Company ceased recording interest income and issued a notice of monetary default to the borrower, and the borrower filed for bankruptcy. During the fourth quarter of 2008, the Company recorded a loan loss reserve in the amount of \$0.7 million on this non-performing note receivable. During the second quarter 2009, the property was under contract to be sold to a third-party and as a result the expected net proceeds to be generated from sale caused the Company to record an additional loan loss reserve in the amount of \$0.4 million.

In the second quarter of 2009, the borrower on the loan secured by Emeryville Marketplace, a mixed use commercial property located in Emeryville, California made a principal payment of \$0.5 million to pay down the loan to \$6.8 million and the Company extended the maturity of the loan until June 2010. In the first quarter of 2009, the borrower on the bridge loan secured by 301 Ocean Avenue a 47-unit apartment community located in Santa Monica, California made a principal payment of \$1.6 million to pay down the loan to \$12.5 million and the Company extended the maturity of the loan until December 2010.

(5) Related Party Transactions

Management and other fees from affiliates includes management, development and redevelopment fees from Fund II of \$1.2 million and \$1.4 million for the three months ended June 30, 2009 and 2008 respectively, and \$2.4 million and \$2.7 million for the six months ended June 30, 2009 and 2008 respectively. As discussed in Note 3, in January 2008, the Company received \$7.5 million from an investment held in an affiliate of TMMC and recognized \$6.3 million of preferred income which is included in equity income from co-investments.

(6) Segment Information

The Company defines its reportable operating segments as the three geographical regions in which its apartment communities are located: Southern California, Northern California and Seattle Metro. Excluded from segment revenues are properties classified in discontinued operations, management and other fees from affiliates, and interest and other income. Non-segment revenues and net operating income included in the following schedule also consist of revenue generated from commercial properties which are primarily office buildings. Other non-segment assets include co-investments, real estate under development, cash and cash equivalents, marketable securities, notes receivable, other assets and deferred charges. The revenues, net operating income, and assets for each of the reportable operating segments are summarized as follows for the three months ended June 30, 2009 and 2008 (dollars in thousands):
