Triple-S Management Corporation Notes to Consolidated Financial Statements (Dollar amounts in thousands, except per share data) (Unaudited)

(1)

Basis of Presentation

The accompanying consolidated interim financial statements prepared by Triple-S Management Corporation and its subsidiaries are unaudited. In this filing, the "Corporation", the "Company", "TSM", "we", "us", and "our" refer to Trip Management Corporation and its subsidiaries. The consolidated interim financial statements do not include all of the information and the footnotes required by accounting principles generally accepted in the U.S. (GAAP) for complete financial statements. These consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2011.

In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of such consolidated interim financial statements have been included. The results of operations for the three months and nine months ended September 30, 2012 are not necessarily indicative of the results for the full year ending December 31, 2012.

(2)

Recent Accounting Standards

In October 2010 the FASB issued guidance to address diversity in practice regarding the interpretation of which costs relating to the acquisition of new or renewal insurance contracts qualify for deferral. This guidance specifies that the following costs incurred in the acquisition of new and renewal contracts should be capitalized: (1) Incremental direct costs of contract acquisition. Incremental direct costs are those costs that result directly from and are essential to the contract transaction and would not have been incurred by the insurance entity had the contract transaction not occurred. (2) Certain costs related directly to the following acquisition activities performed by the insurer for the contract: a. Underwriting, b. Policy issuance and processing, c. Medical and inspection, and d. Sales force contract selling. Advertising costs should be included in deferred acquisition costs only if the capitalization criteria in the direct-response advertising guidance in Subtopic 340-20, Other Assets and Deferred Costs— Capitalized Advertising Costs, are met. This guidance is effective for fiscal years and interim periods within those fiscal years, beginning on or after December 15, 2011. The Corporation adopted this guidance in January 1, 2012; there was no significant impact on our financial position or results of operations as a result of the adoption.

In June 2011, the FASB issued guidance to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The FASB decided to eliminate the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments require that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components of other comprehensive income, and the total of comprehensive income. This guidance is effective for fiscal years and interim periods within those fiscal years, beginning on or after December 15, 2011. The FASB required reclassification adjustments from accumulated other comprehensive income to be measured and presented by income statement line item in net income and also in other comprehensive income on the face of the financial statement. However, responding to concerns from financial statement preparers, the FASB decided to indefinitely defer that requirement pending further outreach. The Corporation adopted this guidance in January 1, 2012 electing to present the components of comprehensive income in two separate but consecutive financial statements.

In May 2011, the FASB issued guidance that changes the wording used to describe many of the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements that result in common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards ("IFRS"). For many of the requirements, FASB does not intend the amendments in this guidance to result in a change in the application of the requirements in Topic 820. Some of the amendments clarify the FASB's intent about the application of existing fair value measurement requirements. Other amendments change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The Corporation adopted this guidance in January 1, 2012, with no significant impact on our financial position or results of operations as a result of the adoption. However, we have added disclosure requirements related to fair value measurements in Note 7, "Fair Value Measurements".

Table of Contents

Triple-S Management Corporation Notes to Consolidated Financial Statements (Dollar amounts in thousands, except per share data) (Unaudited)

In July 2011, the FASB issued guidance to address questions about how health insurers should recognize and classify in their income statements fees mandated by the Patient Protection and Affordable Care Act as amended by the Health Care and Education Reconciliation Act. A health insurer's portion of the annual fee becomes payable to the U.S. Treasury once the entity provides health insurance for any U.S. health risk for each applicable calendar year. The amendments specify that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. This guidance is effective for calendar years beginning after December 31, 2013, when the fee initially becomes effective. We are currently evaluating the impact, if any, the adoption of this guidance will have on the financial position or results of operations.

In July 2012, the FASB issued guidance to establish a two-step analysis for impairment testing of indefinite-lived intangibles other than goodwill, which brings the accounting treatment for determining impairment charges on other intangible assets in to conformity with the treatment of goodwill. This guidance is effective for periods beginning after September 15, 2012. The adoption of this guidance has no impact on the financial statements disclosures.

In August 27, 2012 and October 1, 2012, the FASB issued guidance to make generally non-substantive technical corrections to certain codification topics, remove inconsistencies and outdated provisions, clarify the FASB's intent and amend or delete various Securities and Exchange Commission ("SEC") paragraphs. In particular, the updates consist of:

- Technical corrections and amendments as part of the FASB's standing agenda to review and improve the Accounting Standards Codification.
 - Conforming amendments related to fair value measurements, in accordance with Topic 820, •
- •Reflect the issuance of the SEC's Staff Accounting Bulletin No. 114, Revisions and Rescissions of Portions of the Interpretative Guidance Included in the Codification of Staff Accounting Bulletins, and
- •Reflect the issuance of the SEC Final Rulemaking Release No. 33-9250, Technical Amendments to Commission Rules and Forms Related to the FASB's Accounting Standards Codification.

This guidance is effective for fiscal periods beginning after December 15, 2012. The adoption of this guidance had no impact on the Corporation's financial position or results of operations.

Other than the accounting pronouncements disclosed above, there were no other new accounting pronouncements issued during the nine months ended September 30, 2012 that could have a material impact on the Corporation's financial position, operating results or financials statement disclosures.

Segment Information (3)

The operations of the Corporation are conducted principally through three business segments: Managed Care, Life Insurance, and Property and Casualty Insurance. The Corporation evaluates performance based primarily on the operating revenues and operating income of each segment. Operating revenues include premiums earned, net,

administrative service fees and net investment income. Operating costs include claims incurred and operating expenses. The Corporation calculates operating income or loss as operating revenues less operating costs.

As discussed further in note 14, our Managed Care segment includes the results of operations and financial condition of Socios Mayores en Salud Holdings, Inc. (from now on referred to as "American Health" or "AH") since February 1, 2011.

The following tables summarize the operations by major operating segment for the three months and nine months ended September 30, 2012 and 2011:

The Corporation regularly monitors and evaluates the difference between the cost and estimated fair value of investments. For investments with a fair value below cost, the process includes evaluating: (1) the length of time and the extent to which the estimated fair value has been less than amortized cost for fixed maturity securities, or cost for equity securities, (2) the financial condition, near-term and long-term prospects for the issuer, including relevant industry conditions and trends, and implications of rating agency actions, (3) the Corporation's intent to sell or the likelihood of a required sale prior to recovery, (4) the recoverability of principal and interest for fixed maturity securities, or cost for equity securities, and (5) other factors, as applicable. This process is not exact and further requires consideration of risks such as credit and interest rate risks. Consequently, if an investment's cost exceeds its estimated fair value solely due to changes in interest rates, other-than temporary impairment may not be appropriate. Due to the subjective nature of the Corporation's analysis, along with the judgment that must be applied in the analysis, it is possible that the Corporation could reach a different conclusion whether or not to impair a security if it had access to additional information about the investee. Additionally, it is possible that the investee's ability to meet future contractual obligations may be different than what the Corporation determined during its analysis, which may lead to a different impairment conclusion in future periods. If after monitoring and analyzing impaired securities, the Corporation determines that a decline in the estimated fair value of any available-for-sale security below cost is other-than-temporary, the carrying amount of equity securities is reduced to its fair value and of fixed maturity securities is reduced by the credit component of the other-than-temporary impairment. When a decline in the estimated fair value of any held-to-maturity security below cost is deemed other-than-temporary, the carrying amount of the security is reduced by the other-than-temporary impairment. The new cost basis of an impaired security is not

adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

The Corporation's process for identifying and reviewing invested assets for other-than temporary impairments during any quarter includes the following:

Identification and evaluation of securities that have possible indications of other-than-temporary impairment, which includes an analysis of all investments with gross unrealized investment losses that represent 20% or more of their cost and all investments with an unrealized loss greater than \$50.

Review and evaluation of any other security based on the investee's current financial condition, liquidity, near-term recovery prospects, implications of rating agency actions, the outlook for the business sectors in which the investee operates and other factors. This evaluation is in addition to the evaluation of those securities with a gross unrealized investment loss representing 20% or more of their cost.

Table of Contents

Triple-S Management Corporation Notes to Consolidated Financial Statements (Dollar amounts in thousands, except per share data) (Unaudited)

Consideration of evidential matter, including an evaluation of factors or triggers that may or may not cause individual investments to qualify as having other-than-temporary impairments; and

Determination of the status of each analyzed security as other-than-temporary or not, with documentation of the rationale for the decision.

The Corporation continually reviews its investment portfolios under the Corporation's impairment review policy. Given the current market conditions and the significant judgments involved, there is a continuing risk that further declines in fair value may occur and additional material other-than-temporary impairments may be recorded in future periods.

Municipal securities: The unrealized losses of these securities were principally caused by fluctuations in interest rates and general market conditions. The Corporation does not consider these investments other-than-temporarily impaired because the decline in estimated fair value is principally attributable to changes in interest rates, the Corporation does not intend to sell the investments and its is more likely than not that the Corporation will not be required to sell the investments before recovery of their amortized cost basis, which may be maturity, and because the Corporation expects to collect all contractual cash flows.

Residential mortgage-backed securities and Collateralized mortgage obligations: The unrealized losses on investments in residential mortgage-backed securities and collateralized mortgage obligations ("CMOs") were mostly caused by fluctuations in interest rates and credit spreads. The contractual cash flows of these securities, other than private CMOs, are guaranteed by a U.S. government-sponsored enterprise. Any loss in these securities is determined according to the seniority level of each tranche, with the least senior (or most junior), typically the unrated residual tranche, taking any initial loss. The investment grade credit rating of our securities reflects the seniority of the securities that the Corporation owns. The Corporation does not consider these investments other-than-temporarily impaired because the decline in fair value is attributable to changes in interest rates and not credit quality, the Corporation does not intend to sell the investments and it is more likely than not that the Corporation will not be required to sell the investments before recovery of their amortized cost basis, which may be maturity, and because the Corporation expects to collect all contractual cash flows.

Mutual Funds: The unrealized loss of the security included in the twelve months or longer category has improved since December 31, 2011. This position is not considered other-than-temporarily impaired because the Corporation does not have the intent to sell this position, and the Corporation has the ability and intent to hold the investment until a market price recovery.

Triple-S Management Corporation Notes to Consolidated Financial Statements (Dollar amounts in thousands, except per share data) (Unaudited)

Maturities of investment securities classified as available for sale and held to maturity at September 30, 2012 were as follows:

	September 30, 2012		
	Amortized	Estimated	
	cost	fair value	
Securities available for sale:			
Due in one year or less	\$16,164	\$16,264
