Notes to the Financial Statements

June 30, 2005 and 2004

(Stated in United States Dollars)

1. NATURE OF OPERATIONS

The Company was incorporated in Nevada on December 19, 1995 and is in the process of attempting to raise capital for future operations. As the Company does not have any assets, it would require new capital to fund any future ventures.

2. SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared by management in conformity with accounting principles generally accepted in the United States of America and include the following significant accounting policies:

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates. These estimates are reviewed periodically and, as adjustments become necessary, they are reported in earnings in the period in which they become known.

Income Taxes

The Company accounts for its income taxes under the liability method specified by Statement of Financial Accounting Standards (SFAS) No. 109, Accounting for Income Taxes. Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities as measured by the enacted tax rates which will be in effect when these differences reverse. Deferred tax expense is the result of changes in deferred tax assets and liabilities.

In assessing the realizability of future tax assets, management considers whether it is more likely than not that some portion or all of the future tax assets will not be realized. The ultimate realization of future tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of future tax liabilities, projected future taxable income and tax planning strategies in making this assessment. As the Company does not currently have any operations or assets, they are not anticipating the recovery of any tax assets and therefore, have not reflected any future tax asset.
