STATEMENTS REGARDING FORWARD LOOKING INFORMATION

This Quarterly Report on Form 10-Q contains forward looking statements as defined in the *Private Securities Litigation Reform Act of 1995* with respect to our financial condition, results of operations, business prospects, plans,

objectives, goals, strategies, future events, capital expenditure, and exploration and development efforts.

Forward-looking statements can be identified by the use of words such as “may,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “intends,” “continue,” or the negative of such terms, or other comparable terminology. The statements include comments regarding:

- future cash flow and operational results from the Montana Tunnels mine;

- the establishment and estimates of mineral reserves and resources;
- the timing of completion of feasibility studies at Black Fox;
- production and production costs;
- daily production rates;
- throughput rates;
- cash operating costs;
- total cash costs;
- grades of ore mined and milled;
- expenditures;
- exploration;
- permits;
- expansion plans;
- plans for Black Fox and Huizopa;
- closure costs;
- cash flows;
- future financing;
- liquidity;
- estimates of environmental liabilities;
- our ability to obtain future financing to fund our estimated operating and capital requirements;
- anticipated exploration, development and corporate overhead expenditures;
- factors impacting our results of operations;
- the impact of adoption of new accounting standards.

These forward looking statements are subject to numerous risks, uncertainties and assumptions including: unexpected changes in business and economic conditions; significant increases or decreases in gold and zinc prices; changes in interest and currency exchange rates; timing and amount of production; unanticipated grade changes; unanticipated metal recovery or production problems; changes in mining and milling costs; operational problems at our mining property; availability of materials, equipment, supplies and water; determination of reserves; changes in project parameters; costs and timing of development of new reserves; results of current and future exploration activities;

results of pending and future feasibility studies; joint venture relationships; political or economic instability, either globally or in the countries in which we operate; local and community impacts and issues; timing and receipt of government approvals; accidents and labor disputes; environmental costs and risks; competitive factors, including competition for property acquisitions; availability of external financing on reasonable terms or at all; and the factors discussed in our Annual Report on Form 10-K for the year ended December 31, 2006 under the heading "Risk Factors." Many of these factors are beyond our ability to control and predict. These factors are not intended to represent a complete list of the general or specific factors that may affect us. We disclaim any obligation to update forward looking statements, whether as a result of new information, future events or otherwise.

ACCOUNTING PRINCIPLES, REPORTING CURRENCY AND OTHER INFORMATION

Apollo Gold Corporation prepares its consolidated financial statements in accordance with accounting principles generally accepted in Canada and publishes its financial statements in United States dollars. This Quarterly Report on Form 10-Q should be read in conjunction with our condensed consolidated financial statements and related notes included in this quarterly report, as well as our annual financial statements for the fiscal year ended December 31, 2006 included in our Annual Report on Form 10-K. Certain reclassifications have been made to the prior period financial statements to conform with the current period presentation.

Unless stated otherwise, all dollar amounts are expressed in United States dollars.

References to “we,” “our,” “us,” the “Company” or “Apollo” mean Apollo Gold Corporation and its consolidated subsidiaries, to any one or more of them, as the context requires.

NON-GAAP FINANCIAL INFORMATION

Cash operating, total cash and total production costs are non-GAAP financial measures and are used by management to assess performance of individual operations as well as a comparison to other gold producers. We have included cash operating costs information to provide investors with information about the cost structure of our mining operations.

The term “cash operating costs” is used on a per ounce of gold basis. Cash operating costs per ounce is equivalent to direct operating cost as found on the Consolidated Statements of Operations, less production royalty expenses and mining taxes but includes by-product credits for payable silver, lead and zinc.

The term “total cash costs” is equivalent to cash operating costs plus production royalties and mining taxes.

The term “total production costs” is equivalent to total cash costs plus non-cash costs including depreciation and amortization.

This information differs from measures of performance determined in accordance with generally accepted accounting principles (GAAP) in Canada and the United States and should not be considered in isolation or a substitute for measures of performance prepared in accordance with GAAP. These measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP and may not be comparable to similarly titled measures of other companies. See Item 2, Management’s Discussion and Analysis of Financial Condition and Results of Operations, for a reconciliation of these non-GAAP measures to our Statements of Operations.

PART I FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

These condensed consolidated financial statements should be read in conjunction with the financial statements, accompanying notes and other relevant information included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2006 filed with the Securities and Exchange Commission on April 2, 2007.

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

1. CONTINUING OPERATIONS

These condensed consolidated financial statements are prepared on the basis of a going concern which assumes that Apollo Gold Corporation (“Apollo” or the “Company”) will realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. To date the Company has funded its operations through issuance of debt and equity securities, joint venture contributions from Elkhorn Tunnels, LLC (“Elkhorn”) and cash generated by the Montana Tunnels joint venture (Note 4). The Company’s ability to continue as a going concern is dependent on its ability to generate cash flow from the Montana Tunnels joint venture and/or continue to issue debt and equity securities.

If the Company is unable to generate sufficient cash flow from the Montana Tunnels joint venture and/or secure additional financing, it may be unable to continue as a going concern and material adjustments would be required to the carrying value of assets and liabilities and balance sheet classifications used.

2. NATURE OF OPERATIONS

Apollo is engaged in gold mining including extraction, processing, refining and the production of other co-product metals, as well as related activities including exploration and development. The Company is the operator of the Montana Tunnels mine (the “Mine”), which is a 50% joint venture with Elkhorn. The Mine is an open pit mine and mill located in the State of Montana that produces gold dore and lead-gold and zinc-gold concentrates. The Company owns the Diamond Hill mine, which is also located in Montana and is currently under care and maintenance.

Apollo has a development property, the Black Fox development project (the “Black Fox Project”), which is located near the Township of Matheson in the Province of Ontario, Canada. Apollo also owns Mexican subsidiaries that own concessions at the Huizopa exploration project (the “Huizopa Project”), which is located in the Sierra Madres in Chihuahua, Mexico.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) These unaudited consolidated interim financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”) and except as described in Note 14, conform in all material respects with accounting principles generally accepted in the United States (“U.S. GAAP”). The accounting policies followed in preparing these financial statements are those used by the Company as set out in the audited financial statements for the year ended December 31, 2006, except as disclosed in (b), (c), and (d) below. Certain information and note disclosures normally included in consolidated financial statements prepared in accordance with Canadian GAAP have been omitted. These interim financial statements should be read together with the Company’s audited financial statements for the year ended December 31, 2006.

In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. Interim results are not necessarily indicative of the results expected for the fiscal year.

Certain of the comparative figures have been reclassified to conform to the presentation for the three and nine months ended September 30, 2007. In particular, for the three and nine months ended September 30, 2006, \$0.1 million and \$0.3 million of stock-based compensation, respectively, charged to operations have been reclassified to general and

administrative expenses rather than disclosed separately.

9

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Effective January 1, 2007, the Company includes ore stockpiles within Inventories. Ore stockpiles represent ore that has been mined and is available for further processing. Work-in-process inventories, including ore stockpiles, are valued at the lower of average production cost and net realizable value, after a reasonable allowance for further processing and sales costs.

(c) On March 2, 2006, the Emerging Issues Committee issued EIC-160, *Stripping Costs Incurred in the Production Phase of a Mining Operation*, which requires stripping costs that represent a betterment to the mineral property to be capitalized and amortized in a rational and systematic manner over the reserves that directly benefit from the specific stripping activity. The Company adopted EIC-160 as of January 1, 2007 on a prospective basis. During the three and nine months ended September 30, 2007, the Company capitalized \$1.9 million and \$5.7 million, respectively, in deferred stripping costs and recorded amortization thereon in the amount of \$0.6 million and \$1.3 million, respectively. Deferred stripping costs are amortized using the units-of-production method over the expected life of the operation based on the estimated recoverable gold equivalent ounces.

(d) Effective January 1, 2007, the Company adopted CICA Handbook Section 1530, *Comprehensive Income*, CICA Handbook Section 3855, *Financial Instruments - Recognition and Measurement*, CICA Handbook Section 3865, *Hedges*, and CICA Handbook Section 3251, *Equity*. These new Handbook Sections provide comprehensive requirements for the recognition and measurement of financial instruments, transaction costs incurred on financial instruments, as well as standards on when and how hedge accounting may be applied. CICA Handbook Section 1530 also introduces a new component of equity referred to as comprehensive income. The Company has adopted these standards prospectively.

In accordance with this new standard, the Company now classifies all financial instruments as either held-to-maturity, available-for-sale, held-for-trading, loans and receivables, or other financial liabilities. Financial assets held to maturity, loans and receivables and financial liabilities other than those held for trading, are measured at amortized cost. Available-for-sale instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Instruments classified as held for trading are measured at fair value with unrealized gains and losses recognized in the statement of operations. Transaction costs are expensed as incurred.

Upon adoption of this new standard, the Company has designated its cash and cash equivalents as held-for-trading, which are measured at fair value. Accounts receivable and other are classified as loans and receivables, which are measured at amortized cost. Restricted certificates of deposit are classified as held-to-maturity, and are measured at amortized cost. Accounts payable and accrued liabilities, property and mining taxes payable, convertible debentures, notes payable, and accrued site closure costs are classified as other liabilities, which are measured at amortized cost.

Under CICA Handbook Section 3855, the Company adopted a policy to expense debt financing costs when they are incurred and as a result the Company recorded a non-cash adjustment to increase opening deficit by \$0.3 million to eliminate the opening balance of deferred financing costs that were capitalized and amortized under the Company's previous accounting policy.

Comprehensive income is the change in shareholders' equity during a period from transactions and other events and circumstances from non-owner sources. The adoption of CICA Handbook Section 1530 had no impact on the

Company.

10

APOLLO GOLD CORPORATION**Notes to the Condensed Consolidated Financial Statements****Nine month period ended September 30, 2007**

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

4. MONTANA TUNNELS JOINT VENTURE

On July 28, 2006, Apollo entered into a joint venture (“JV Agreement”) with Elkhorn in respect of the Mine. Elkhorn contributed \$13 million in return for a 50% interest in the Mine.

Elkhorn receives 55% and Apollo receives 45% of the positive free cash flow, as defined in the JV agreement, from the Mine until such time as Elkhorn has received cash flow of \$13 million (at which time Apollo will have received \$10.6 million). At that time, Apollo would become entitled to 60% and Elkhorn 40% of the positive free cash flow from the Mine, until both parties have received an equal amount (at which time Apollo and Elkhorn will have each received \$17.7 million). Thereafter, the sharing would be 50/50. Additionally, Elkhorn is entitled to a 10% interest distribution (reduced from 12% effective April 1, 2007) charged to the joint venture as interest expense (Note 8) on its initial contribution of \$13 million until it has received cash flow of \$13 million. The interest distribution is based on the declining balance of this cash flow of \$13 million and, as of September 30, 2007, Elkhorn had received cash flow of \$2.8 million.

Apollo accounts for its 50% interest in the Montana Tunnels joint venture using the proportionate consolidation method. As of December 31, 2006, the Company recorded a deferred gain on the transfer of assets and liabilities to the joint venture of \$3.8 million. The deferred gain is amortized using the units-of-production method over the expected life of the operation based on the estimated recoverable gold equivalent ounces. Amortization of the deferred gain was \$0.3 million and \$0.8 million for the three and nine months ended September 30, 2007, respectively.

Apollo’s 50% share of the assets and liabilities of the Montana Tunnels joint venture is as follows:

	September 30, 2007	December 31, 2006
Cash and cash equivalents	\$ 759	\$ (64)
Other non-cash current assets	3,336	2,570
	4,095	2,506

4. MONTANA TUNNELS JOINT VENTURE (continued)

Apollo's 50% share of the Montana Tunnels joint venture for the three and nine month periods ended September 30, 2007 are as follows:

	Three months ended September 30, 2007	Nine months ended September 30, 2007
Revenue from sale of minerals	\$ 11,863	\$ 27,594
Direct operating costs	7,283	18,278
Depreciation and amortization	351	929
Accretion expense – accrued site closure costs	114	345
	7,748	19,552
Operating income	4,115	8,042
Interest income	60	157
Interest expense	(199)	(786)
Income from continuing operations	\$ 3,976	\$ 7,413
Net cash used in investing activities	\$ (3,183)	\$ (8,090)
Net cash (used in) provided by financing activities	\$ (324)	\$ 1,459

5. INVENTORIES

Inventories consist of:

	September 30, 2007	December 31, 2006
Concentrate inventory	\$ 123	\$ –
Stockpiled ore inventory (Note 3(b))	320	–
Materials and supplies	1,033	660
	\$ 1,476	\$ 660

6. CONVERTIBLE DEBENTURES

On February 23, 2007, the Company completed a private placement of \$8.6 million aggregate principal amount of Series 2007-A convertible debentures (“2007 Debentures”). Each \$1,000 of principal amount of 2007 Debentures included 2,000 common share purchase warrants (“2007 Debenture Warrants”) (Note 7(b)(i)). The 2007 Debentures mature on February 23, 2009 and bear interest at a rate of 12% per annum during the first year and 18% per annum during the second year, payable annually beginning on February 23, 2008.

The 2007 Debentures are convertible, at the option of the holder, at any time prior to maturity into common shares of the Company at a price of \$0.50 per common share. The Company has the option to force conversion of the 2007 Debentures under certain circumstances. The Debentures are classified as a compound financial instrument for

accounting purposes. The 2007 Debenture Warrants have an exercise price of \$0.50 per common share and have a term of two years from the date of grant.

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

6. CONVERTIBLE DEBENTURES (continued)

On the date of issuance of the 2007 Debentures, the gross proceeds of \$8.6 million was allocated to the relative fair values of the Debentures (\$3.2 million), the holder's option to convert the principal balance into common shares (\$2.7 million) (the "Conversion Option"), and the 2007 Debenture Warrants (\$2.7 million). The \$3.2 million fair value of the 2007 Debentures is classified as a liability, while the \$5.4 million allocated to the Conversion Option and the 2007 Debenture Warrants is classified as separate components within shareholders' equity.

Over the two-year term, the 2007 Debentures are accreted to their face value through a periodic charge to accretion expense with a corresponding credit to the liability component. The accretion expense is based on the effective interest method. For the three and nine months ended September 30, 2007, the Company recorded accretion expense of \$0.7 and \$1.4 million, respectively, related to the 2007 Debentures, which is included in interest expense.

In addition to the 2007 Debenture Warrants, the agents were granted 1,201,200 compensation warrants with substantially the same terms and conditions as the 2007 Debenture Warrants.

The Company incurred transaction costs of \$1.3 million (including the fair value of the agents' compensation warrants of \$0.5 million). These costs were allocated to 2007 Debenture issuance costs of \$0.5 million and to equity issuance costs of \$0.8 million, based on their relative fair values of the debt and equity components. Financing costs associated with the issuance of the 2007 Debentures are expensed as incurred.

The fair values of the Conversion Option, the 2007 Debenture Warrants, and the compensation warrants were determined using the Black-Scholes option pricing model assuming no expected dividends, a volatility of the Company's share price of 70%, an interest rate of 4.1%, and an expected life of two years.

Under the terms of the Registration Rights Agreements entered into by the Company in connection with the 2007 Debentures, the common shares underlying the 2007 Debentures and the 2007 Debenture Warrants are required to be registered for resale with the U.S. Securities and Exchange Commission ("SEC"). If the registration statement with respect to 50% of such shares was not declared effective by the SEC by May 25, 2007, the Company would be required to pay additional interest to the holders of the 2007 Debentures equal to 6% per annum. The Company did not meet the May 25, 2007 effectiveness deadline and as a result accrued additional interest of \$55,000 for the period commencing May 25, 2007 through August 10, 2007, the date the effectiveness was approved by the SEC. Additionally, if the registration statement with respect to the remaining 50% of such shares was not declared effective by the SEC by August 22, 2007, the Company would be required to pay additional interest to the holders of the 2007 Debentures equal to 6% per annum until February 23, 2008 or until this condition is met. The Company did not meet the August 22, 2007 effectiveness deadline and as a result accrued additional interest of \$28,000 for the period commencing August 22, 2007 through September 30, 2007.

	3,111,111	3,111,111		
	36,835,688	36,835,688		

(1) 3,735,100 of these warrants were exercised prior to expiration for proceeds of \$1.5 million and the remaining 480,000 of these warrants expired unexercised on November 4, 2007.

(2) These warrants expired unexercised on November 4, 2007.

(3) The exercise price of these warrants increased to Cdn\$1.15 on October 31, 2007.

In addition, in connection with the Company's private placement to Canadian purchasers of 2,222,221 flow-through units on October 30, 2006, the Company issued 166,666 broker compensation warrants. Each broker compensation warrant is immediately exercisable at Cdn\$0.45 for two years into one common share of the Company and one-half of one share purchase warrant, with each whole share purchase warrant exercisable into one common share of the Company at Cdn\$1.00 per common share through October 30, 2007 and at Cdn\$1.15 through October 30, 2008. The broker compensation warrants expire on October 30, 2008.

(c) Options

A summary of information concerning outstanding stock options at September 30, 2007 is as follows:

(i) Fixed stock option plan

The Company has a stock option plan that provides for the granting of options to directors, officers, employees and service providers of the Company. Typically, options vest over two years and have a 10-year contractual term, unless otherwise determined by the Company's Board of Directors. The Company is authorized to issue a maximum of 12,139,686 fixed stock options. As at September 30, 2007, an aggregate of 5,826,597 fixed stock options were available for future grants of awards under the plan.

The following table summarizes information concerning outstanding and exercisable fixed stock options at September 30, 2007:

Options Outstanding			Options Exercisable			
Number Outstanding	Expiry Date	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life (in years)	Number Exercisable	Weighted Average Exercise Price per Share

7. SHARE CAPITAL (continued)*(ii)* Performance-based stock option plan

The 1,230,852 performance-based stock options that were exercisable at \$0.80 expired June 25, 2007.

(d) Stock-based compensation

The fair value of each option granted is estimated at the time of grant using the Black-Scholes option pricing model with weighted average assumptions for grants as follows:

	Nine months ended September 30,	
	2007	2006
Risk free interest rate	4.1%	4.2%
Dividend yield	0%	0%
Volatility	71%	89%
Expected life in years	6	6
Weighted average grant-date fair value of stock options	\$ 0.37	\$ 0.41

(e) Shareholder Rights Plan

On January 17, 2007, the Company adopted a Shareholder Rights Plan (the "Rights Plan"). The Rights Plan was adopted to ensure the fair treatment of shareholders in connection with any take-over bid for common shares of Apollo. The Rights Plan seeks to provide shareholders with adequate time to properly assess a take-over bid without undue pressure. It also is intended to provide the Board with more time to fully consider an unsolicited take-over bid and, if appropriate, to explore other alternatives to maximize shareholder value. The Rights Plan is not intended to prevent take-over bids that treat shareholders fairly.

The Rights Plan, adopted and effective in January 2007, was ratified by the shareholders at Apollo's Annual Meeting of Shareholders held on May 16, 2007. The Rights Plan expires in January 2012.

8. INTEREST EXPENSE

Interest expense consists of:

	Three months ended September 30,		Nine months ended September 30,	
	2007	2006	2007	2006
Accretion on convertible debentures	\$ 1,063	\$ 271	\$ 2,534	\$ 775

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

9. EARNINGS PER SHARE

Basic earnings per share is calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated to reflect the dilutive effect of exercising outstanding warrants and stock options by applying the treasury stock method.

Earnings used in determining earnings per share from continuing operations are presented below for the three months ended September 30, 2007.

(\$ thousands, except per share amounts)	Net income	Shares	Per Share
Basic earnings per share			
Net income from continuing operations	\$ 2,117	143,922,308	\$ 0.01
Effect of dilutive securities: warrants	–	1,048,244	–
Effect of dilutive securities: stock options	–	231,453	–
Diluted earnings per share			
Net income from continuing operations	\$ 2,117	145,202,005	\$ 0.01

10. INCOME TAXES

The Company recorded a \$0.3 million recovery for income taxes for the period ended September 30, 2007 in connection with the flow-through units issued in October 2006. In addition, income tax expense for the period has been offset by a recovery of prior tax losses.

11. LITIGATION AND CLAIMS

In May 2006, a purported class action lawsuit was filed in U.S. Federal Court Missoula Division of Montana by 14 former employees at the Montana Tunnels mine alleging (i) violations of the Worker Adjustment and Retraining Notification Act of 1988 (the “WARN Act”) and the Montana Wage Act and (ii) breach of contract. The allegations relate to the termination of the employees following the cessation of mining in October 2005. Specifically, the plaintiffs allege that the Company gave deficient WARN Act notice and are seeking damages for back pay and benefits. The Company believes that the resolution of this matter will not have a material impact on its financial statements.

12. SUPPLEMENTAL CASH FLOW INFORMATION

(a) Net changes in non-cash operating working capital items for the three and nine months ended September 30 are:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2007	2006	2007	2006
Increase (decrease) in:

	\$ 797	\$ 470	\$ 433	\$ (1,243)

(b) Components of cash and cash equivalents as of September 30, 2007 and 2006 are:

	September 30, 2007	September 30, 2006
Cash	\$ 227	\$ 648
Short-term investments	6,410	1,330
Cash and cash equivalents	\$ 6,637	\$ 1,978

(c) Non-cash transactions

During the three and nine months ended September 30, 2007, (i) Series 2007-A convertible debentures with a face value of \$200,000 were converted and the Company recorded a reduction of \$94,000 in convertible debentures and a corresponding increase in equity; (ii) property, plant and equipment totaling \$527,000 was acquired via issuance of shares (Note 7(a)(ii)); and (iii) the Company financed a portion of its insurance program included in Prepaids by issuing a note payable of \$653,000.

During the nine months ended September 30, 2007, property, plant and equipment totaling \$325,000 was acquired via issuance of notes payable. Also, during the nine months ended September 30, 2007, the Company issued agent's compensation warrants with a value of \$294,000 for services rendered in connection with the issuance of the Series 2007-A convertible debentures (Note 6).

13. SEGMENTED INFORMATION

Apollo operates the Montana Tunnels mine (a 50% joint venture effective December 31, 2006) in the United States and the Black Fox development project in Canada. The reportable segments have been determined at the level where decisions are made on the allocation of resources and capital and where performance is measured. The assets and liabilities of Montana Tunnels as at September 30, 2007 and December 31, 2006 below differ from the amounts for the Montana Tunnels joint venture in Note 4 due to the inclusion of assets and liabilities of Montana Tunnels Mining, Inc. not pertaining to the Montana Tunnels joint venture, which primarily relate to the Diamond Hill mine. The accounting policies for these segments are the same as those followed by the Company as a whole.

Amounts as at September 30, 2007 are as follows:

14. DIFFERENCES BETWEEN CANADIAN AND U.S. GAAP

The Company prepares its consolidated financial statements in accordance with Canadian GAAP. The following adjustments and/or additional disclosures would be required in order to present the financial statements in accordance with U.S. GAAP and with practices prescribed by the SEC for the three and nine months ended September 30, 2007 and 2006.

21

APOLLO GOLD CORPORATION**Notes to the Condensed Consolidated Financial Statements****Nine month period ended September 30, 2007**

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

14. DIFFERENCES BETWEEN CANADIAN AND U.S. GAAP (continued)

Material variances between financial statement items under Canadian GAAP and the amounts determined under U.S. GAAP are as follows:

	September 30, 2007	December 31, 2006
Total assets in accordance with Canadian GAAP	\$ 66,138	\$ 51,804
Impairment of property, plant and equipment, and change in depreciation and amortization(a)(ii)	(1,879)	(2,038)
Deferred stripping costs (a)(iii)	(4,427)	—
Black Fox development costs(b)	(24,810)	(22,354)
Convertible debentures(c)	657	103
Equity accounting for investment in Montana Tunnels joint venture(a)(i)	(10,594)	(8,473)
Total assets in accordance with U.S. GAAP	\$ 25,085	\$ 19,042

Total liabilities in accordance with Canadian GAAP	\$ 31,654	\$ 23,561
Convertible debentures (c)	2,399	764
Equity accounting for investment in Montana Tunnels joint venture(a)(i)	(10,594)	(8,473)
Deferred gain(a)(i)	(2,976)	(3,750)
Total liabilities in accordance with U.S. GAAP	\$ 20,483	\$ 12,102

	September 30, 2007	December 31, 2006
Total shareholders' equity in accordance with Canadian GAAP	\$ 34,484	\$ 28,243
Impairment of property, plant and equipment, and change in depreciation and amortization(a)(ii)	(1,879)	(2,038)
Deferred stripping costs (a)(iii)	(4,427)	—
Black Fox development costs(b)	(24,810)	(22,354)
Convertible debentures(c)	(1,742)	(661)
Deferred gain(a)(i)	2,976	3,750
Total shareholders' equity in accordance with U.S. GAAP	\$ 4,602	\$ 6,940
Total shareholders' equity and liabilities in accordance with U.S. GAAP	\$ 25,085	\$ 19,042

Under U.S. GAAP, the components of shareholders' equity would be as follows:

	September 30, 2007	December 31, 2006
Share capital	\$ 160,183	\$ 158,790
Note warrants	3,204	1,062
Contributed surplus	38,908	31,964
Deficit	(197,693)	(184,876)

Total shareholders' equity in accordance with U.S. GAAP	\$	4,602	\$	6,940

14. DIFFERENCES BETWEEN CANADIAN AND U.S. GAAP (continued)

Under U.S. GAAP, the net loss and net loss per share would be adjusted as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2007	2006	2007	2006
Income (loss) from continuing operations for the period based on Canadian GAAP	\$ 2,117	\$ (5,370)	\$ (94)	\$ (11,890)
Change in depreciation of property, plant and equipment (a)(ii)	66	–	160	183
Capitalized deferred stripping costs and amortization (a)(iii)	(1,340)	–	(4,427)	–
Black Fox development costs (b)	(1,135)	(587)	(2,456)	(2,682)
Convertible debentures (c)	231	161	(4,996)	454
Amortization of deferred gain (a)(i)	(345)	–	(774)	–
Income taxes (e)	(230)	–	(230)	–
Loss from continuing operations for the period based on U.S. GAAP	(636)	(5,796)	(12,817)	(13,935)
Loss from discontinued operations for the period based on Canadian and U.S. GAAP	–	–	–	(250)
Net loss and comprehensive loss for the period based on U.S. GAAP	\$ (636)	\$ (5,796)	\$ (12,817)	\$ (14,185)
Basic and diluted income (loss) per share in accordance with U.S. GAAP:				
Continuing operations	\$ 0.00	\$ (0.05)	\$ (0.09)	\$ (0.12)
Discontinued operations	–	–	–	–
Net income (loss) per share – U.S. GAAP basic and diluted	\$ 0.00	\$ (0.05)	\$ (0.09)	\$ (0.12)

(a) Montana Tunnels mine

(i) Under Canadian GAAP, the Company has accounted for its joint venture interest in the Montana Tunnels mine ("MTM") using the proportionate consolidation method whereby the Company's proportionate share of each line item of MTM's assets, liabilities, revenues and expenses is included in the corresponding line item of the Company's financial statements. Under U.S. GAAP, the Company would account for MTM using the equity method whereby the Company's share of the investees' earnings and losses is included in operations and its investments therein are adjusted by a similar amount. The carrying value of MTM was lower under U.S. GAAP than under Canadian GAAP following an impairment of the property, plant and equipment in prior years and as a result the gain on transfer of the Company's interest in MTM into the joint venture under U.S. GAAP is higher. Under U.S. GAAP, the gain on transfer of the Company's interest MTM into the joint venture was included in the net loss for the year ended December 31, 2006; whereas under Canadian GAAP it was deferred and is recognized as an adjustment to net loss using the units of production method over the expected life of the operation based on the estimated recoverable gold equivalent ounces.

(ii) Impairment of property, plant and equipment

Under Canadian GAAP, write-downs for impairment of property, plant and equipment are determined using current proven and probable reserves and mineral resources expected to be converted into mineral reserves. Under U.S. GAAP, write-downs recorded in 2002 were determined using current proven and probable reserves. Accordingly, for U.S. GAAP purposes, an impairment of property, plant and equipment and an adjustment to the related depreciation has been recorded.

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

14. DIFFERENCES BETWEEN CANADIAN AND U.S. GAAP (continued)

(iii) Deferred stripping costs

Under Canadian GAAP, stripping costs that represent a betterment to the mineral property are capitalized and amortized using the units-of-production method over the expected life of the operation based on the estimated recoverable gold equivalent ounces. Under U.S. GAAP, these expenditures are expensed as incurred.

(b) Black Fox Project

Under Canadian GAAP, mining development costs at the Black Fox Project have been capitalized. Under U.S. GAAP, these expenditures are expensed as incurred. Accordingly, for U.S. GAAP purposes, a reduction in property, plant and equipment of \$24.8 million has been recorded as at September 30, 2007.

(c) Convertible debentures

(i) Under Canadian GAAP, the Series 2007-A Convertible Debentures (the “2007 Debentures”) were recorded as a compound financial instrument including detachable note warrants. On issuance in February 2007, under U.S. GAAP, the detachable note warrants are similarly treated as an equity instrument with the remainder of the 2007 Debentures treated as a liability. Further, under U.S. GAAP, the beneficial conversion feature determined using the effective conversion price based on the proceeds allocated to the 2007 Debentures in accordance with EITF 00-27, “Application of Issue No. 98-5 to Certain Convertible Instruments” (“EITF 00-27”), is allocated to contributed surplus. This discount on the 2007 Debentures, in the amount of \$5.9 million, is recognized as additional interest expense immediately as the debt is convertible at the date of issuance. Canadian GAAP does not require the recognition of any beneficial conversion feature.

(ii) Under Canadian GAAP, the 12% Series 2004-B Convertible Debentures (the “2004 Debentures”) were recorded as a compound financial instrument including detachable note warrants. On issuance in November 2004, under U.S. GAAP, the detachable note warrant is similarly treated as an equity instrument with the remainder of the 2004 Debentures treated as a liability. Further, under U.S. GAAP, the beneficial conversion feature determined using the effective conversion price based on the proceeds allocated to the 2004 Debentures in accordance with EITF 00-27, is allocated to contributed surplus. This discount on the 2004 Debentures, in the amount of \$0.1 million, is recognized as additional interest expense immediately as the debt is convertible at the date of issuance. Canadian GAAP does not require the recognition of any beneficial conversion feature.

(iii) As of January 1, 2007, under Canadian GAAP, the Company expenses debt financing costs when they are incurred (Note 3(d)). Prior to January 1, 2007, under Canadian GAAP, debt financing costs were capitalized and amortized. Under U.S. GAAP, debt financing costs are capitalized.

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

14. DIFFERENCES BETWEEN CANADIAN AND U.S. GAAP (continued)

(d) Statements of cash flows

(i) Under Canadian GAAP, mining development costs at the Black Fox Project are included in cash flows from investing activities in the consolidated statements of cash flows. Under U.S. GAAP, these expenditures are included in cash flows from operating activities. Accordingly, under U.S. GAAP, the consolidated statements of cash flows for the three and nine months ended September 30, 2007 would reflect a decrease in cash used in investing activities of \$1.1 million and \$2.5 million, respectively, and a corresponding decrease in cash provided by operating activities for each period. Additionally, for the three and nine months ended September 30, 2006 the consolidated statements of cash flow under U.S. GAAP would reflect a decrease of \$0.6 million and \$2.7 million, respectively, used in investing activities, respectively, and a corresponding increase in cash used in operating activities for each period.

(ii) Under Canadian GAAP, deferred stripping costs are included in cash flows from investing activities in the consolidated statements of cash flows. Under U.S. GAAP, these stripping costs are included in cash flows from operating activities. Accordingly, under U.S. GAAP, the consolidated statements of cash flows for the three and nine months ended September 30, 2007 would reflect a decrease in cash used in investing activities of \$1.9 million and \$5.7 million, respectively, and a corresponding decrease in cash provided by operating activities.

(iii) Under Canadian GAAP, debt financing costs are included in cash flows from operating activities. Under U.S. GAAP, these costs are capitalized and are included in cash flows from financing activities. Accordingly, under U.S. GAAP, the consolidated statement of cash flows for the nine months ended September 30, 2007 would reflect a decrease in cash flows provided by financing activities of \$0.3 million, and a corresponding decrease in cash used in operating activities.

(e) Flow-through common shares

Under Canadian income tax legislation, a company is permitted to issue shares whereby the Company agrees to incur qualifying expenditures and renounce the related income tax deductions to the investors. The Company has accounted for the issue of flow-through shares using the deferral method in accordance with Canadian GAAP. At the time of issue, the funds received are recorded as share capital.

The Financial Accounting Standards Board ("FASB") staff has taken the view that under SFAS No. 109, *Accounting for Income Taxes*, the proceeds from issuance should be allocated between the offering of shares and the sale of tax benefits. The allocation is made based on the difference between the quoted price of the existing shares and the amount the investor pays for the shares. A liability is recognized for this difference. The liability is reversed when tax benefits are renounced and a deferred tax liability is recognized at that time. Income tax expense is the difference between the amount of a deferred tax liability and the liability recognized on issuance.

(f) Income taxes

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, on January 1, 2007. There was no effect on the Company's cumulative retained earnings as of January 1, 2007, as a result of the adoption of Interpretation 48. As of the date of adoption, there were no unrecognized U.S. tax benefits. Under current conditions and expectations, management does not foresee any significant changes in unrecognized tax

benefits that would have a material impact on the Company's financial statements. The Company and/or one or more of its subsidiaries file income tax returns in the United States and Canada. The Company is generally not subject to U.S. and Canada income tax examinations that could create a tax liability for tax years before 2001. The Company recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses.

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

15. SUBSEQUENT EVENTS

(a) Jipangu settlement agreement

On October 4, 2007, the Company entered into a settlement agreement (the "Agreement") with Jipangu, Inc., and Jipangu International, Inc. (collectively, "Jipangu") and certain of its subsidiaries. The Agreement was entered into to settle indemnification claims made by Jipangu under the Stock Purchase Agreement dated October 17, 2005, pursuant to which the Company sold to Jipangu the stock of certain subsidiaries owning, among other things, the Florida Canyon and Standard mines, in Nevada.

The indemnification claims related to certain costs associated with a leach pad issue, a liability for certain taxes and a liability for certain employee disability claims. Under the terms of the Agreement, the Company agreed (i) to pay Jipangu \$650,000 in full satisfaction of the claims related to the leach pad and the tax claims and (ii) to reimburse Jipangu in full in respect of certain employee disability claims when and if damages related to those claims exceed \$200,000.

The Company had accrued \$600,000 for the estimated liability as of December 31, 2006, and accrued an additional \$183,000 as of September 30, 2007, \$133,000 of which is recorded as an accrued long-term liability for the employee disability claims that are described in the above paragraph.

(b) Credit facility and hedging terms

On October 12, 2007, the Company entered into a credit facility agreement for \$8.0 million. The credit facility, which was drawn on October 18, 2007 for the full amount of the facility, matures September 30, 2008 and bears interest at LIBOR plus 1.25%, repayable in four quarterly payments beginning December 31, 2007. The loan is secured by all of the assets of Montana Tunnels Mining, Inc. Upon repayment or conversion of the Series 2004-B convertible debentures (the "2004 Debentures") by December 2007, all of Apollo's assets at its Black Fox project will also be pledged as security for the loan. The quarterly payments are according to the following schedule: (i) 15% of the aggregate principal amount outstanding ("Principal Outstanding") on December 31, 2007; (ii) 33% of the Principal Outstanding on March 31, 2008; (iii) 50% of the Principal Outstanding on June 30, 2008 and; (iv) 100% of the Principal Outstanding on September 30, 2008.

The credit facility agreement requires the Company to use proceeds from the loan as follows: (i) first, for repayment of the 2004 Debentures, and (ii) second, once the 2004 Debentures have been repaid in full or converted in full to common shares of the Company, for general working capital purposes.

APOLLO GOLD CORPORATION

Notes to the Condensed Consolidated Financial Statements

Nine month period ended September 30, 2007

(Stated in U.S. dollars; tabular amounts in thousands)

(Unaudited)

15. SUBSEQUENT EVENTS (continued)

In order to meet certain loan criteria, Apollo on October 15, 2007 hedged 2,267 tonnes (approximately 5,000,000 lbs) of lead and 3,418 tonnes (approximately 7,500,000 lbs) of zinc which equates to approximately 65% and 40% respectively of Apollo's share of lead and zinc production from the Montana Tunnels Mine during the 12-month term of the facility. No gold or silver production was hedged. The lead and zinc hedge is in the form of a no premium collar (buy a put, sell a call) at the following prices: Lead - put \$1.40 per lb, call \$1.90 per lb.; Zinc - put \$1.20 per lb, call \$1.54 per lb.

The Company will not apply hedge accounting to this transaction. As a result, the Company will account for these contracts as investments and will record the changes in unrealized gains and losses in the statement of income each period. The fair value of these derivatives will be recorded as a current asset or current liability at each balance sheet date.

(c) Flow-through financing

On October 31, 2007, the Company completed an offering of 7,454,545 flow-through shares at Cdn\$0.55 per share for net proceeds of Cdn\$3.8 million. The underwriter received a 5.5% fee of Cdn\$0.2 million and 372,727 compensation warrants. Each compensation warrant is immediately exercisable at Cdn\$0.55 per common share of the Company and expires on April 30, 2009.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

All Dollar amounts are expressed in United States Dollars

The following discussion and analysis should be read in conjunction with the accompanying condensed consolidated financial statements and related notes. The financial statements have been prepared in accordance with generally accepted accounting principles in Canada (Canadian GAAP). For a reconciliation to GAAP in the United States (U.S. GAAP), see Note 14 to the attached condensed consolidated financial statements.

In this Form 10-Q, the terms "cash operating cost," "total cash cost" and "total production cost" are non-GAAP financial measures and are used on a per ounce of gold sold basis. Cash operating costs per ounce is equivalent to direct operating cost as found on the Condensed Consolidated Statements of Operations, less production royalty expenses and mining taxes but includes by-product credits for payable silver, lead, and zinc production. Total cash costs is equivalent to cash operating costs plus production royalties and mining taxes. The term "total production costs" is equivalent to total cash costs plus non-cash costs including depreciation and amortization. See "Reconciliation of Cash Operating and Total Operating Costs per Ounce" below.

Certain of the comparative figures have been reclassified to conform with the current period presentation.

BACKGROUND AND RECENT DEVELOPMENTS

We are principally engaged in gold mining including extraction, processing, refining and the production of other co-product metals, as well as related activities including exploration and development of mineral deposits principally in North America. We are the operator of the Montana Tunnels mine (the "Mine"), which is a 50% joint venture with Elkhorn Tunnels, LLC ("Elkhorn"). The Mine is an open pit mine and mill located near Helena, Montana, which produces gold doré and lead-gold and zinc-gold concentrates.

We own a development property, the Black Fox Project, which is located near the township of Matheson in the Province of Ontario, Canada. We also own Mexican subsidiaries which own concessions at the Huizopa exploration property located in the Sierra Madres in Chihuahua, Mexico.

On February 23, 2007, the Company completed a private placement of \$8.6 million aggregate principal amount of Series 2007-A convertible debentures with each \$1,000 principal amount of the convertible debentures including 2,000 common share purchase warrants. The convertible debentures are convertible at the holder's option at \$0.50 per common share at any time until they mature. The Company has the option to force conversion of the convertible debentures under certain circumstances. The convertible debentures mature on February 23, 2009 and bear interest at a rate of 12% per annum during the first year and 18% per annum during the second year, payable annually beginning on February 23, 2008. The accompanying warrants, each of which is exercisable for one common share of the Company, have an exercise price of \$0.50 per share and a term of two years.

On October 12, 2007, the Company entered into a credit facility agreement for \$8.0 million. The credit facility, which was drawn on October 18, 2007 for the full amount of the facility, matures September 30, 2008 and bears interest at LIBOR plus 1.25%, repayable in four quarterly payments beginning December 31, 2007. The loan is secured by all of the assets of Montana Tunnels Mining, Inc. Upon repayment or conversion of the Series 2004-B convertible debentures by December 2007, all of Apollo's assets at its Black Fox project will also be pledged as security for the loan. The quarterly payments are according to the following schedule: (i) 15% of the aggregate principal amount outstanding ("Principal Outstanding") on December 31, 2007; (ii) 33% of the Principal Outstanding on March 31, 2008; (iii) 50% of the Principal Outstanding on June 30, 2008 and; (iv) 100% of the Principal Outstanding on September 30, 2008. The credit facility agreement requires the Company to use proceeds from the loan as follows: (i)

first, for repayment of the 2004 Debentures, and (ii) second, once the 2004 Debentures have been repaid in full or converted in full to common shares of the Company, for general working capital purposes.

In order to meet certain loan criteria, Apollo on October 15, 2007 hedged 2,267 tonnes (approximately 5,000,000 lbs) of lead and 3,418 tonnes (approximately 7,500,000 lbs) of zinc which equates to approximately 65% and 40% respectively of Apollo's share of lead and zinc production from the Mine during the 12-month term of the facility. No gold or silver production was hedged. The lead and zinc hedge is in the form of a no premium collar (buy a put, sell a call) at the following prices: Lead - put \$1.40 per lb, call \$1.90 per lb.; Zinc - put \$1.20 per lb, call \$1.54 per lb.

On October 31, 2007, the Company completed an offering of 7,454,545 flow-through shares at Cdn\$0.55 per share for net proceeds of Cdn\$3.8 million. The underwriter received a 5.5% fee of Cdn\$0.2 million and 372,727 compensation warrants. Each compensation warrant is immediately exercisable at Cdn\$0.55 per common share of the Company and expires on April 30, 2009.

Montana Tunnels

At the Montana Tunnels mine the open pit remediation program was completed in February 2007 and the mill resumed operations on March 1, 2007.

The remediation, which lasted from September 2006 to February 2007, required the removal of 8.4 million tons of waste material, at a total cost of \$15.5 million. These costs, plus working capital of \$2.5 million, were funded \$14.25 million by Elkhorn, our joint venture partner, \$1.25 million by us and \$2.5 million from a working capital loan to the joint venture from Teck Cominco Metals Ltd. ("Teck Cominco"), our smelter contractor. Montana Tunnels repaid the loan in full to Teck Cominco on July 19, 2007.

During the third quarter 2007, approximately 3,700,000 tons were mined, of which 1,087,000 tons were ore. The mill processed 1,154,000 tons of ore at an average throughput of 12,500 tons per day for the quarter and payable production was 9,500 ounces of gold, 158,000 ounces of silver, 3,371,000 lbs of lead and 6,611,000 lbs of zinc. Apollo's share of this production is 50%. The project to increase mill throughput by over 1,000 tons per day, by re-commissioning a larger primary crusher (last utilized in 2005), which was scheduled for completion at the end of August 2007, was only completed in the first half of October 2007.

Ore mined	1,087,000 tons
Waste mined	2,616,000 tons
Total mined	3,703,000 tons
Ore milled	1,154,000 tons

Grade:		Recoveries:	
Au ounces per ton	0.0116	Au	77.6%
Ag ounces per ton	0.2374	Ag	75.1%
Pb %	0.2066	Pb	77.3%
Zn %	0.4453	Zn	77.2%

Total cash costs for the third quarter 2007 on a by-product basis were minus \$215 per ounce of gold and on a co-product basis they were \$459 per ounce of gold, \$8.15 per ounce of silver, \$1.12 per lb of lead and \$0.78 per lb of zinc.

During the third quarter 2007, the joint venture spent \$1.5 million on capital projects, which included \$1.0 million for the expansion of the tailings dam and \$0.3 million for the upgrade of the primary crushing circuit. Apollo's share of these capital expenditures is 50%.

4th Quarter Forecast – With the completion of the primary crusher project in October 2007, we anticipate that improvement in ore throughput will be achieved and there will be a respective increase in metal production. As a result, we believe that in the fourth quarter 2007, the Mine should achieve its best operational results of 2007.

Black Fox

On August 13, 2007, we filed a new NI 43-101 which demonstrates the continued expansion of Black Fox since the last published NI 43-101 dated August 14, 2006. The new mineral reserve and resource estimate was prepared by SRK Consulting (“SRK”), Denver, Colorado.

29

During the preparation of the NI 43-101, SRK and Apollo identified a potential infill drilling program of approximately 60 holes. If the drilling results of this program are positive, it could increase the amount of inferred resources that may be converted to indicated resources as part of the bankable feasibility study scheduled for completion in the first quarter of 2008. As at November 7, 2007, we had completed 39 surface holes and 7 underground holes. The table below summarizes the Black Fox Total Mineral Reserve as published in the NI 43-101:

Black Fox – Probable Reserves

Mining Method	Cutoff Grade Au g/t	Tonnes (000)	Grade Au g/t	Contained Au Ounces
Open Pit	1.0	3,362	5.8	625,000
Underground	3.0	1,108	10.6	377,000
Total Reserves		4,470	7.0	1,002,000

The minable reserve was calculated based on a gold price of US\$525/oz which is approximately the three-year trailing average. The average total cash cost per ounce of gold was calculated at \$236 per ounce.

In addition to the reserves above, the NI 43-101 contains the indicated and inferred resources shown in the tables below:

Black Fox – Indicated Resources(1)

Mining Method	Cutoff Grade Au g/t	Tonnes (000)	Grade Au g/t
Open Pit	1.0	997	4.5
Underground	3.0	667	10.1

Black Fox – Inferred Resources(2)

Mining Method	Cutoff Grade Au g/t	Tonnes (000)	Grade Au g/t
Open Pit	1.0	3,256	4.7
Underground	3.0	929	12.3

- (1) **Cautionary Note to U.S. Investors concerning estimates of Indicated Mineral Resources.** We advise U.S. investors that while the term “indicated mineral resources” is recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission (“SEC”) does not recognize it. U.S. investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into mineral reserves.
- (2) **Cautionary Note to U.S. Investors concerning estimates of Inferred Mineral Resources.** We advise U.S. investors that while the term “inferred mineral resources” is recognized and required by Canadian regulations, the SEC does not recognize it. “Inferred mineral resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. In accordance with Canadian rules, estimates of inferred mineral resources cannot form the basis of feasibility or other economic studies. U.S. investors are cautioned not to assume that part or all of the inferred mineral resource exists, or is economically or legally minable.

Our third party consultant, SRK Consulting, Inc., has commenced work on a bankable feasibility study which we expect to be completed in the first quarter of 2008.

Since we report our mineral reserves to both NI 43-101 and SEC Industry Guide 7 standards, it is possible for our reserve figure to vary between the two. Where such a variance occurs it will arise from the differing requirements for reporting mineral reserves. For example, the NI 43-101 has a minimum requirement that reserves be supported by a pre-feasibility study, whereas SEC Industry Guide 7 requires support from a full feasibility study done to bankable standards. The Black Fox project thus reports reserves under NI 43-101, but reports no reserves under SEC Industry Guide 7 as a final bankable feasibility study has not been completed.

30

Huizopa Project

During the first quarter 2007, the Company made payments ahead of schedule in settlement of certain claims and the outstanding land payments on its Huizopa properties. These payments resulted in Apollo's 100%-owned Mexican subsidiaries owning 100% of the 128 square kilometer mining concessions known as Huizopa.

METAL SALES & METAL PRICE AVERAGES

The table below summarizes our share of metal sales of gold, silver, lead and zinc of the Montana Tunnels mine, as well as average metal prices and other key statistics, for each period indicated:

	Three months ended September 30,		Nine months ended September 30,	
	2007 (1)	2006 (2)	2007 (1)(3)	2006 (2)
Metal sales:				
Gold (ounces)	4,755	n/a	11,399	4,959
Silver (ounces)	79,048		189,504	116,004
Lead (pounds)	1,685,385		4,081,191	1,196,317
Zinc (pounds)	3,305,620		7,718,926	3,084,152
Total revenue (\$millions)	\$ 11.9		\$ 27.6	\$ 10.2
Total cash and production costs on a by-product basis:				
Total cash costs per ounce of gold	\$ (215)		\$ (231)	\$ 1,422
Total production costs per ounce of gold	\$ (141)		\$ (160)	\$ 1,664
Total cash costs on a co-product basis:				
Total cash costs per ounce of gold	\$ 459		\$ 429	\$ 904
Total cash costs per ounce of silver	\$ 8.15		\$ 8.15	\$ 17.07
Total cash costs per pound of lead	\$ 1.12		\$ 0.86	\$ 0.77
Total cash costs per pound of zinc	\$ 0.78		\$ 0.92	\$ 2.16
Average metal prices:				
Gold - London bullion mkt. (\$/ounce)	\$ 681	\$ 627	\$ 666	\$ 603
Silver - London bullion mkt. (\$/ounce)	\$ 12.70	\$ 11.67	\$ 13.12	\$ 11.21
Lead - London Metal Exchange (\$/pound)	\$ 1.43	\$ 0.59	\$ 1.07	\$ 0.53
Zinc - London Metal Exchange (\$/pound)	\$ 1.46	\$ 1.54	\$ 1.56	\$ 1.36

RECONCILIATION OF CASH OPERATING AND TOTAL PRODUCTION COSTS PER OUNCE

	Three months ended September 30,		Nine months ended September 30,	
(\$ in thousands, except per ounce of gold data)	2007 (1)	2006 (2)	2007 (1)(3)	2006 (2)
Gold ounces sold	4,755	-	11,399	4,959
Direct operating costs	\$ 7,283	n/a	\$ 17,031	\$ 13,957
Less: Mining taxes, royalty expenses	327		763	282
By-product credits	8,305		19,668	6,906
Cash operating cost	(1,349)		(3,400)	6,769
Cash operating cost per ounce of gold	\$ (284)		\$ (298)	\$ 1,365

Edgar Filing: APOLLO GOLD CORP - Form 10-Q

Cash operating costs	(1,349)	(3,400)	6,769
Add: Mining taxes, royalty expenses	327	763	282
Total cash costs	(1,022)	(2,637)	7,051
Total cash cost per ounce of gold	\$ (215)	\$ (231)	\$ 1,422
Total cash costs	(1,022)	(2,637)	7,051
Add: Depreciation & amortization	351	817	1,199
Total production costs	(671)	(1,820)	8,250
Total production cost per ounce of gold	\$ (141)	\$ (160)	\$ 1,664

(1) Effective December 31, 2006, the Mine is a 50/50 joint venture; therefore, metal sales, revenue and costs shown in the tables above represent Apollo's 50% share of the joint venture.

- (2) The results shown for the three and nine months ended September 30, 2006 reflect Apollo's 100% ownership of the Mine during that period. Additionally, the mill at the Mine was shut down on May 12, 2006. Up until that point the Mine was milling low grade stockpiled ore.
- (3) Metal sales, revenue and costs for the first nine months of 2007 only includes the seven months of March through September as milling was restarted on March 1, 2007 after being shut down since May 12, 2006.

MATERIAL CHANGES IN RESULTS OF OPERATIONS

Three Months Ended September 30, 2007 Compared to the Three Months Ended September 30, 2006

Revenue from the Sale of Minerals.

Revenue for the three months ended September 30, 2007 increased to \$11.9 million as compared to \$0.4 million for the same period in 2006. The increase in revenue is due to the fact that the Montana Tunnels mill was shut down from May 12, 2006 to March 1, 2007.

Operating Expenses.

Direct Operating Costs. Direct operating costs, which include mining costs, processing costs and smelting and refining charges, for the three months ended September 30, 2007 increased 127% to \$7.3 million from \$3.2 million for the three months ended September 30, 2006. The increase in costs is a result of the resumption of production at Montana Tunnels on March 1, 2007 after being shut down since May 2006. Also, effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the direct operating costs is 50%.

Depreciation and Amortization. Depreciation and amortization expenses were \$0.4 million and \$0.3 million for the three months ended September 30, 2007 and 2006, respectively. Effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the Mine's depreciation is 50%. This reduction in Apollo's share of the Mine's depreciation in 2007 is offset by the decrease in depreciation in 2006 which resulted from the mill being shut down on May 12, 2006.

General and Administrative Expenses. General and administrative expenses were \$0.9 million and \$1.1 million for the three months ended September 30, 2007 and 2006, respectively. The decrease is a result of receiving a management fee in 2007 of \$0.2 million for being the operator of the Montana Tunnels joint venture and lower corporate overhead costs.

Accretion Expense – Accrued Site Closure Costs. Accrued accretion expense was \$0.1 million for the three months ended September 30, 2007 compared to \$0.2 million for the same period in 2006. Effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the Mine's accretion expense is 50%.

Amortization of Deferred Gain. Amortization of the deferred gain, relating to the transfer of assets and liabilities to the Montana Tunnels joint venture, was \$0.3 million for the three months ended September 30, 2007 and nil for the three months ended September 30, 2006. Amortization began upon resumption of production in March 2007.

Exploration and Business Development Expense. Expenses for exploration and development, consisting of exploration related expenses at our Huizopa Project, totaled \$0.3 million and \$0.2 million for the three months ended September 30, 2007 and 2006, respectively.

Total Operating Expenses. As a result of these expense components, our total operating expenses increased 70% to \$8.6 million for the three months ended September 30, 2007, from \$5.1 million for the three months ended September 30, 2006.

Other Income (Expenses).

Interest Income and Interest Expense. We realized interest income of \$0.1 million and incurred interest expense of \$1.6 million during the three months ended September 30, 2007 compared to \$0.1 million in interest income and \$0.7 million in interest expense during the three months ended September 30, 2006. The increase in interest expense is due to an increase in accretion expense of \$0.8 million, mostly related to the Series 2007-A convertible debentures issued in February 2007, and interest of \$0.1 million related to the Montana Tunnels joint venture agreement.

Income Taxes.

We recorded a \$0.3 million recovery for income taxes for the three months ended September 30, 2007 in connection with the flow-through units issued in October 2006. Additionally, we recorded no income tax expense for the period since any taxable income will be offset by a recovery of prior tax losses.

Income (Loss) from Continuing Operations.

As a result of the foregoing, we recorded income from continuing operations of \$2.1 million, or \$0.01 per share, for the three months ended September 30, 2007, as compared to a loss of \$5.4 million, or \$0.04 per share, for the three months ended September 30, 2006.

Net Income (Loss).

For the three months ended September 30, 2007, we recorded net income of \$2.1 million, or \$0.01 per share, as compared to a net loss of \$5.4 million, or \$0.04 per share, for the three months ended September 30, 2006.

Nine Months Ended September 30, 2007 Compared to the Nine Months Ended September 30, 2006

Revenue from the Sale of Minerals.

Revenue for the nine months ended September 30, 2007 increased 171% to \$27.6 million from \$10.2 million for the same period in 2006. The increase in revenue is due to milling higher grade ores, higher metal prices in 2007 and the fact that the mill was shut down from May 12, 2006 to March 1, 2007. These factors were partially offset because effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the revenue is 50%.

Operating Expenses.

Direct Operating Costs. Direct operating costs, which includes mining costs, processing costs and smelting and refining charges, for the nine months ended September 30, 2007 increased 31% to \$18.3 million from \$14.0 million for the nine months ended September 30, 2006. The increase in costs is a result of the resumption of production on March 1, 2007 after being shut down since May 2006. Also, effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the direct operating costs is 50%.

Depreciation and Amortization. Depreciation and amortization expenses were \$1.0 million and \$1.3 million for the nine months ended September 30, 2007 and 2006, respectively. Effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the Mine's depreciation is 50%.

General and Administrative Expenses. General and administrative expenses were \$2.9 million and \$3.6 million for the nine months ended September 30, 2007 and 2006, respectively. The decrease is a result of receiving a management fee in 2007 of \$0.5 million for being the operator of the Montana Tunnels joint venture and lower corporate overhead costs.

Accretion Expense – Accrued Site Closure Costs. Accrued accretion expense was \$0.4 million for the nine months ended September 30, 2007 compared to \$0.7 million for the same period in 2006. Effective December 31, 2006, the Mine is a 50/50 joint venture, and therefore Apollo's share of the Mine's accretion expense is 50%.

Amortization of Deferred Gain. Amortization of the deferred gain, relating to the transfer of assets and liabilities to the Montana Tunnels joint venture, was \$0.8 million for the nine months ended September 30, 2007 and nil for the nine months ended September 30, 2006. Amortization began upon resumption of production in March 2007.

Exploration and Business Development Expense. Expenses for exploration and development, consisting of exploration related expenses at our exploration properties, totaled \$2.0 million and \$0.8 million for the nine months ended September 30, 2007 and 2006, respectively. The increase in exploration expenses is due to increased activity at the Huizopa property and the settlement of certain claims in relation to the Huizopa property.

33

Total Operating Expenses. As a result of these expense components, our total operating expenses increased to \$23.8 million for the nine months ended September 30, 2007, from \$20.3 million for the nine months ended September 30, 2006.

Other Income (Expenses).

Interest Income and Interest Expense. We realized interest income of \$0.5 million and incurred interest expense of \$4.2 million during the nine months ended September 30, 2007 compared to \$0.3 million in interest income and \$1.9 million in interest expense during the nine months ended September 30, 2006. The increase in interest expense is due to an increase in accretion expense of \$1.8 million, mostly related to the Series 2007-A convertible debentures issued in February 2007, and interest of \$0.6 million related to the Montana Tunnels joint venture agreement.

Financing Costs. Financing costs of \$0.5 million for the nine months ended September 30, 2007 were in connection with the Series 2007-A convertible debentures issued in February 2007.

Income Taxes.

We recorded a \$0.3 million recovery for income taxes for the nine months ended September 30, 2007 in connection with the flow-through units issued in October 2006, but recorded no other recovery for income taxes as the net loss carry forwards are fully offset by a valuation allowance.

Loss from Continuing Operations.

As a result of the foregoing, we incurred a loss from continuing operations of \$0.1 million, or \$0.00 per share, for the nine months ended September 30, 2007, as compared to a loss of \$11.9 million, or \$0.10 per share, for the nine months ended September 30, 2006.

Loss from Discontinued Operations.

For the nine months ended September 30, 2007, loss from discontinued operations was nil, compared to a loss of \$0.3 million for the nine months ended September 30, 2006.

Net Loss.

For the nine months ended September 30, 2007, we incurred a net loss of \$0.1 million, or \$0.00 per share, as compared to a net loss of \$12.1 million, or \$0.10 per share, for the nine months ended September 30, 2006.

MATERIAL CHANGES IN LIQUIDITY

To date, we have funded our operations primarily through issuances of debt and equity securities, joint venture contributions from our Montana Tunnels joint venture partner and, during the second and third quarters of 2007, from our share of the cash flow from the Montana Tunnels joint venture. At September 30, 2007, we had cash of \$6.6 million, compared to cash of \$4.5 million at December 31, 2006. The increase in cash since December 31, 2006 is the result of operating cash inflows of \$5.8 million and financing cash inflows of \$9.3 million, offset by investing cash outflows of \$12.9 million.

During the nine months ended September 30, 2007, cash provided by operating activities of \$5.8 million resulted from improved performance at the Montana Tunnels mine, which includes the resumption of production on March 1, 2007 when milling was resumed, and higher metal prices.

During the nine months ended September 30, 2007, investing activities used \$12.9 million. Capitalized deferred stripping costs at the Montana Tunnels mine were \$5.7 million. Capital expenditures for property, plant and equipment of \$5.7 million include \$2.8 million for the further development of the Black Fox Project, \$1.9 million for land payments at our Huizopa Project and \$1.0 million for property, plant and equipment at the Montana Tunnels mine. Investing activities include \$1.4 million for the funding of the trust account for the future reclamation of the Montana Tunnels mine.

During the nine months ended September 30, 2007, financing activities provided \$9.3 million in cash. On February 23, 2007, we completed a private placement of \$8.6 million unsecured convertible debentures ("2007 Debentures") which had 17.2 million share purchase warrants attached. The 2007 Debentures are convertible into common shares at \$0.50 per common share until maturity on February 23, 2009 and bear interest at 12% in the first year and 18% in the second year. The share purchase warrants are exercisable for two years at an exercise price of \$0.50 per common share. Additionally, in March 2007, we borrowed \$1.3 million from Teck Cominco (our 50% share) through an interest free, short-term note. Payments of notes payable accounted for a cash outflow of \$2.0 million, of which \$1.3 million was repayment to Teck Cominco.

We estimate that with our September 30, 2007 cash balance of \$6.6 million, our share of the projected cash flows from the joint ventured Montana Tunnels mine combined with the \$8.0 million drawn on the credit facility entered into on October 12, 2007 and the Cdn\$3.8 million raised from the flow-through equity issued October 31, 2007, we will have sufficient funds to finance the 2007 and 2008 work programs of \$5.0 million at Black Fox and \$2.0 million for exploration at Huizopa, as well as corporate overhead. However, we will continue to explore financing opportunities to further develop the Black Fox Project and expand our exploration program at the Huizopa Project, which may include Canadian flow-through financing for use at the Black Fox Project. The availability, amount, terms and timing of this financing are not certain at this time.

Our ability to raise capital is highly dependent upon the commercial viability of our projects and the associated prices of metals. Because of the significant impact that changes in the prices of gold and zinc have on our financial condition, declines in these metals prices may negatively impact short-term liquidity and our ability to raise additional funding for long-term projects. In the event that cash balances decline to a level that cannot support our operations, our management will defer certain planned capital expenditures and exploration activities as needed to conserve cash for operations. There can be no assurance that we will be successful in generating adequate funding for planned capital expenditures, environmental remediation and reclamation expenditures and for exploration expenditures.

MATERIAL CHANGES IN CONTRACTUAL OBLIGATIONS

During the three months ended September 30, 2007, we financed a portion of our insurance program included in Prepaids by issuing a note payable of \$0.7 million, which is payable in monthly installments over nine months. The note bears an annual percentage rate of interest of 6.25%.

MATERIAL CHANGES IN OFF BALANCE SHEET ARRANGEMENTS

None.

ENVIRONMENTAL

The Company's current environmental liabilities are at Montana Tunnels and Black Fox. As of September 30, 2007, we have accrued \$7.5 million related to reclamation, an increase of \$0.4 million from December 31, 2006. These liabilities are covered by a combination of surety bonds, restricted cash and property totaling \$18.7 million at September 30, 2007. We have accrued the present value of management's estimate of the liability as of September 30, 2007.

DIFFERENCES BETWEEN CANADIAN AND U.S. GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (GAAP)

The Company reports under Canadian GAAP and reconciles to U.S. GAAP. The application of U.S. GAAP has a significant effect on the net income or loss and net income or loss per share. For a detailed explanation see Note 14 of our interim financial statements.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make a variety of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting periods covered by the financial statements.

35

For a discussion of critical accounting policies, please refer to those disclosed in our 10-K filing for the year ended December 31, 2006 and to the changes in accounting policies described below.

CHANGES IN ACCOUNTING POLICIES

a) Effective January 1, 2007, the Company includes ore stockpiles within Inventories. Ore stockpiles represent ore that has been mined and is available for further processing. Work-in-process inventories, including ore stockpiles, are valued at the lower of average production cost and net realizable value, after a reasonable allowance for further processing and sales costs.

b) On March 2, 2006, the Emerging Issues Committee issued EIC-160, *Stripping Costs Incurred in the Production Phase of a Mining Operation*, which requires stripping costs that represent a betterment to the mineral property to be capitalized and amortized in a rational and systematic manner over the reserves that directly benefit from the specific stripping activity. The Company adopted EIC-160 as of January 1, 2007 on a prospective basis. During the three and nine months ended September 30, 2007, the Company capitalized \$1.5 million and \$3.7 million, respectively, in deferred stripping costs and recorded amortization thereon in the amount of \$0.6 million and \$0.7 million, respectively. Deferred stripping costs are amortized using the units-of-production method over the expected life of the operation based on the estimated recoverable gold equivalent ounces.

c) Effective January 1, 2007, the Company adopted CICA Handbook Section 1530, *Comprehensive Income*, CICA Handbook Section 3855, *Financial Instruments - Recognition and Measurement*, CICA Handbook Section 3865, *Hedges*, and CICA Handbook Section 3251, *Equity*. These new Handbook Sections provide comprehensive requirements for the recognition and measurement of financial instruments, transaction costs incurred on financial instruments, as well as standards on when and how hedge accounting may be applied. CICA Handbook Section 1530 also introduces a new component of equity referred to as comprehensive income. The Company has adopted these standards prospectively.

In accordance with this new standard, the Company now classifies all financial instruments as either held-to-maturity, available-for-sale, held-for-trading, loans and receivables, or other financial liabilities. Financial assets held to maturity, loans and receivables and financial liabilities other than those held for trading, are measured at amortized cost. Available-for-sale instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Instruments classified as held for trading are measured at fair value with unrealized gains and losses recognized in the statement of operations. Transaction costs are expensed as incurred.

Upon adoption of this new standard, the Company has designated its cash and cash equivalents as held-for-trading, which are measured at fair value. Accounts receivable and other are classified as loans and receivables, which are measured at amortized cost. Restricted certificates of deposit are classified as held-to-maturity, and are measured at amortized cost. Accounts payable and accrued liabilities, property and mining taxes payable, convertible debentures, notes payable, and accrued site closure costs are classified as other liabilities, which are measured at amortized cost.

Under CICA Handbook Section 3855, the Company adopted a policy to expense debt financing costs when they are incurred and as a result the Company recorded a non-cash adjustment to increase opening deficit by \$0.3 million to eliminate the opening balance of deferred financing costs that were capitalized and amortized under the Company's previous accounting policy.

Comprehensive income is the change in shareholders' equity during a period from transactions and other events and circumstances from non-owner sources. The adoption of CICA Handbook Section 1530 had no impact on the Company.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk includes, but is not limited to, the following risks: changes in interest rates on our investment portfolio, changes in foreign currency exchange rates, commodity price fluctuations and equity price risk.

Interest Rate Risk

When appropriate we invest excess cash in short-term debt instruments of the United States and Canadian governments and their agencies on both a fixed and variable interest rate basis. Our restricted certificates of deposit are invested in long-term debt instruments of the United States and Canadian governments and their agencies on a fixed interest rate basis. Over time the rates received on such investments may fluctuate with changes in economic conditions. As a result our investment income may fall short of expectations during periods of lower interest rates. We estimate that given the cash balances expected during 2007, a one percent change in interest rates would not materially impact our annual income. We may in the future actively manage our exposure to interest rate risk.

Foreign Currency Exchange Rate Risk

Most of the Company's activities at its Black Fox Project are transacted in Canadian dollars and some of the Company's cash balances are therefore maintained in Canadian dollars. Since the Company's reporting currency is the U.S. dollar, foreign currency gains and losses on its Canadian dollar cash balances can result in volatile net losses and earnings, and adversely affect the Company's financial position and results of operations.

Commodity Price Risk

The profitability of the Company's operations will be dependent upon the market prices of gold and zinc. Gold and zinc prices fluctuate widely and are affected by numerous factors beyond the control of the Company. The level of interest rates, the rate of inflation, the world supply of gold and zinc and the stability of exchange rates can all cause significant fluctuations in prices. Such external economic factors are in turn influenced by changes in international investment patterns, monetary systems and political developments. The prices of gold and zinc have fluctuated widely in recent years, and future price declines could cause some projects to become uneconomic, thereby having a material adverse effect on the Company's business and financial condition.

Furthermore, reserve calculations and life-of-mine plans using significantly lower gold and zinc prices could result in material write-downs of the Company's investment in mining properties and increased amortization.

In addition to adversely affecting the Company's reserve estimates and its financial condition, declining gold and zinc prices could require a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause delays in the implementation of the project.

Equity Price Risk

We have in the past and may in the future seek to acquire additional funding by sale of common shares or other securities convertible into, or exercisable for, common shares. Movements in the price of our common shares have been volatile in the past and may be volatile in the future. As a result, there is a risk that we may not be able to sell common shares or such equity-related securities at an acceptable price should the need for funding arise.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are our controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Securities Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required financial disclosure.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b) under the Exchange Act. Based upon, and as of the date of, this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective, because of the material weaknesses discussed below. In light of the material weaknesses described below, we performed additional analysis and other post-closing procedures to ensure our consolidated financial statements were prepared in accordance with generally accepted accounting principles. Accordingly, management believes that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

We identified a material weakness for the year ended December 31, 2006. A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. In January 2006, a major restructuring and streamlining at the corporate office significantly changed the design and structure of the internal controls and procedures at the corporate level. We lacked appropriate review of non-routine or complex accounting matters, related accounting entries, and appropriate documentation, disclosure and application of Canadian and U.S. GAAP, primarily due to a lack of sufficient personnel with a level of technical accounting expertise commensurate with our reporting requirements.

Also, related to the reduction in staffing at the Montana Tunnels mine in mid October 2005 and an additional reduction in staffing in early May 2006, at which time the mine ceased production operations, our controls at that location were not operating as previously designed related to segregation of duties over procurement, inventory control and accounting duties. Corporate management has increased its involvement with day-to-day oversight and management of the Montana Tunnels mine and as of December 31, 2006 our management believed the change in controls was significant enough to be reported as a material weakness.

In an effort to address these material weaknesses, staffing additions and other changes in control were made during the first two quarters of 2007 which continue to be evaluated. We intend to continue to monitor our internal controls and we will continue to take steps to implement improvements or enhancements.

Changes in Internal Control

During the quarter ended September 30, 2007, we made no changes to our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In May 2006, a purported class action lawsuit was filed in U.S. Federal Court Missoula Division of Montana by 14 former employees at our Montana Tunnels mine alleging (i) violations of the Worker Adjustment and Retraining Notification Act of 1988 (the "WARN Act") and the Montana Wage Act and (ii) breach of contract. The allegations relate to the termination of the employees following the cessation of mining in October 2005. Specifically, the plaintiffs allege that we gave deficient WARN Act notice and are seeking damages for back pay and benefits. We believe that the resolution of this matter will not have a material impact on our financial statements.

ITEM 1A. RISK FACTORS

Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2006 sets forth information relating to important risks and uncertainties that could materially adversely affect our business, financial condition or results of operations. Those risk factors continue to be relevant to understanding our business, financial condition and operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On September 4, 2007, the Company issued 1,057,692 common shares in connection with acquiring rights to certain mineral claims at the Company's Black Fox Project. The Company relied on the exemption afforded by Section 4(2) of the Securities Act in issuing these shares.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.
