UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the Quarterly Period Ended June 30, 2012

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

Commission File Number 001-33963

Iridium Communications Inc.

(Exact name of registrant as specified in its charter)

DELAWARE (State of incorporation)	26-1344998 (I.R.S. Employer Identification No.)
1750 Tysons Boulevard, Suite 1400, McLean, Virginia (Address of principal executive offices)	22102 (Zip code)

703-287-7400

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Edgar Filing: Iridium Communications Inc. - Form 10-Q

The number of shares of the registrant's common stock, par value \$0.001 per share, outstanding as of July 25, 2012 was 74,010,232.

Iridium Communications Inc.

Notes to Condensed Consolidated Financial Statements

1. Organization and Basis of Presentation

Iridium Communications Inc. (the “Company”) was initially formed in 2007 as GHL Acquisition Corp., a special purpose acquisition company. The Company acquired, directly and indirectly, all the outstanding equity of Iridium Holdings LLC in a transaction accounted for as a business combination on September 29, 2009 (the “Acquisition”). In accounting for the Acquisition, the Company was deemed the legal and accounting acquirer. On September 29, 2009, as a result of the Acquisition, the Company changed its name to Iridium Communications Inc.

The Company is a provider of mobile voice and data communications services on a global basis using a constellation of low-earth orbiting satellites. The Company holds various licenses and authorizations from the U.S. Federal Communications Commission (the “FCC”) and from foreign regulatory bodies that permit the Company to conduct its business, including the operation of its satellite constellation.

2. Significant Accounting Policies

Principles of Consolidation

The Company has prepared its condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”). The accompanying condensed consolidated financial statements include the accounts of (i) the Company, (ii) its wholly owned subsidiaries, and (iii) all less than wholly owned subsidiaries that the Company controls. All material intercompany transactions and balances have been eliminated.

In the opinion of management, the condensed consolidated financial statements reflect all normal recurring adjustments that the Company considers necessary for the fair presentation of its results of operations and cash flows for the interim periods covered, and of the financial position of the Company at the date of the interim condensed consolidated balance sheet. The operating results for interim periods are not necessarily indicative of the operating results for the entire year. Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to instructions, rules and regulations prescribed by the U.S. Securities and Exchange Commission (“SEC”). While the Company believes that the disclosures are adequate to make the information not misleading, these interim condensed consolidated financial

statements should be read in conjunction with the 2011 annual consolidated financial statements and notes included in its Form 10-K filed with the SEC on March 6, 2012.

Cash, Cash Equivalents and Restricted Cash

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. The cash and cash equivalents balances at June 30, 2012 and December 31, 2011 consisted of cash deposited in institutional money market funds, regular interest bearing and non-interest bearing depository accounts and certificates of deposit with commercial banks. The Company is required to maintain a minimum cash reserve for debt service related to the \$1.8 billion loan facility (the "Credit Facility"). As of June 30, 2012 and December 31, 2011, the Company's restricted cash balance, which represents a minimum cash reserve for debt service related to the Credit Facility and any interest earned on these amounts, was \$40.7 million and \$27.2 million, respectively.

Depreciation Expense

The Company calculates depreciation expense using the straight line method and evaluates the appropriateness of the useful life used in this calculation on a quarterly basis. During the second quarter of 2012, the Company updated its analysis of the current satellite constellation's health and remaining useful life. Based on the results of this analysis, the Company estimates that its current constellation of satellites will be operational for longer than previously expected. As a result, the estimated useful life of the current constellation has been extended and is consistent with the expected deployment of the Company's next-generation satellite constellation ("Iridium NEXT"). This change in estimated useful life resulted in a decrease in depreciation expense compared to the prior-year periods. The change in accounting estimate reduced the depreciation expense by \$6.6 million for the three and six months ended June 30, 2012 and increased basic and diluted net income per share by \$0.05 for the three and six months ended June 30, 2012. The Company will continue to evaluate the useful life of its current constellation of satellites on an ongoing basis through full deployment and activation of Iridium NEXT.

Fair Value Measurements

Fair value is the price that would be received from the sale of an asset or paid to transfer a liability assuming an orderly transaction in the most advantageous market at the measurement date. U.S. GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of observability of inputs used in measuring fair value.

The fair values of short-term financial instruments (primarily cash and cash equivalents, accounts receivable, prepaid expenses and other current assets, accounts payable, accrued expenses and other liabilities, and deferred revenue) approximated their carrying values as of the dates of the accompanying condensed consolidated balance sheets because of their short-term nature.

Stock-Based Compensation

The Company accounts for stock-based compensation at fair value. The fair value of stock options is determined at the grant date using the Black-Scholes option pricing model. The fair value of restricted stock units ("RSUs") is equal to the closing price of the underlying common stock on the grant date. The fair value of an award that is ultimately expected to vest is recognized on a straight-line basis over the requisite service or performance period and is classified in the statement of operations in a manner consistent with the classification of the employee's or non-employee director's compensation. Stock-based awards to non-employee consultants are expensed at their fair value as services are provided according to the terms of their agreements and are classified in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations and comprehensive income.

Warranty Expense

The Company provides the first end-user purchaser of its subscriber equipment a warranty for one to five years from the date of purchase by such first end-user, depending on the product. The Company maintains a warranty reserve based on historical experience of warranty costs and expected occurrences of warranty claims on equipment. Costs associated with warranties, including equipment replacements, repairs, freight, and program administration, are recorded as cost of subscriber equipment in the accompanying condensed consolidated statements of operations and comprehensive income. During the six months ended June 30, 2012, certain production issues were identified related to the Iridium Extreme® satellite handset. A reserve for the remediation of these issues contributed \$1.2 million to the warranty provision during the six months ended June 30, 2012. Changes in the warranty reserve during the six months ended June 30, 2012 were as follows:

	Six Months Ended June 30, 2012 (in thousands)
Balance at beginning of the period	\$ 4,101
Provision	2,570
Utilization	(1,718)
Balance at end of the period	\$ 4,953

3. Commitments and Contingencies

Commitments

Thales

In June 2010, the Company executed a primarily fixed-price full-scale development contract (the “FSD”) with Thales Alenia Space France (“Thales”) for the design and build of satellites for Iridium NEXT. The total price under the FSD is \$2.2 billion, and the Company expects payment obligations under the FSD to extend into the third quarter of 2017. As of June 30, 2012, the Company had made aggregate payments of \$611.4 million to Thales, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet.

SpaceX

In March 2010, the Company entered into an agreement with Space Exploration Technologies Corp. (“SpaceX”) to secure SpaceX as the primary launch services provider for Iridium NEXT (the “SpaceX Agreement”). As of June 30, 2012, the Company had made aggregate payments of \$43.9 million to SpaceX, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet.

In August 2012, the Company entered into an amendment to the SpaceX Agreement (the “SpaceX Amendment”). The SpaceX Amendment reduced the number of contracted launches and increased the number of satellites to be carried on each launch vehicle. The SpaceX Amendment also reduced the maximum price under the SpaceX Agreement from \$492.0 million to \$453.1 million. The Company's obligations to SpaceX under the SpaceX Amendment for the six months ending December 31, 2012 and the years ending December 31, 2013, 2014, 2015, 2016 and 2017 are \$21.2 million, \$4.6 million, \$83.5 million, \$169.1 million, \$109.0 million and \$21.8 million, respectively.

Kosmotras

In June 2011, the Company entered into an agreement with International Space Company Kosmotras (“Kosmotras”) as a supplemental launch service provider for Iridium NEXT (the “Kosmotras Agreement”). The Kosmotras Agreement provides for the purchase of up to six launches with options to purchase additional launches. Each launch can carry two satellites. If all six launches are purchased, the Company will pay Kosmotras a total of \$184.3 million. As of June 30, 2012, the Company had made aggregate payments of \$11.2 million to Kosmotras, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. If the Company elects to purchase all six launches, the remaining amounts owed under the contract will be paid through 2015 or 2016, depending on the launch schedule.

Based on the terms of the Kosmotras Agreement, if the Company does not purchase any launches by March 31, 2013, the Kosmotras Agreement will terminate and any amounts paid by the Company to Kosmotras in excess of \$15.1 million will be refunded.

Harris

In June 2012, Aireon LLC (“Aireon”), an indirect wholly owned subsidiary of the Company, entered into an agreement with Harris Corporation for the design, development and production of the payload for each of the planned Iridium NEXT satellites (the “Harris Agreement”). The Harris Agreement does not provide for any guarantee of payment by

Iridium Communications Inc. or Iridium Satellite LLC, but the Company intends to make available an equity injection into Aireon in the form of up to \$10 million worth of airtime credits to be used to satisfy a portion of the payments to be made by Aireon under the Harris Agreement in the event that Aireon cannot make such payments. Aireon's obligations to Harris Corporation under the Harris Agreement for the six months ending December 31, 2012 and the years ending December 31, 2013, 2014, 2015, 2016 and 2017 are \$9.5 million, \$27.5 million, \$49.0 million, \$20.9 million, \$6.2 million and \$1.6 million, respectively.

Credit Facility

In October 2010, the Company entered into a \$1.8 billion loan facility (the "Credit Facility") with a syndicate of bank lenders (the "Lenders"). The Company had borrowed an aggregate total of \$568.0 million as of June 30, 2012. The unused portion of the Credit Facility as of June 30, 2012 was \$1.2 billion. Pursuant to the Credit Facility, the Company maintains a minimum cash reserve for repayment. As of June 30, 2012, the minimum required cash reserve balance was \$40.5 million. This amount is included in restricted cash in the accompanying condensed consolidated balance sheet. This minimum cash reserve requirement will increase over the term of the Credit Facility and will be \$189.0 million at the beginning of the repayment period, which is expected to begin in 2017.

Interest costs incurred under the Credit Facility were \$6.1 million and \$11.1 million for the three and six months ended June 30, 2012, respectively. All interest costs incurred related to the Credit Facility have been capitalized during the construction period of the Iridium NEXT assets. The Company pays interest on each semi-annual due date through a combination of a cash payment and a deemed additional loan. The \$11.1 million in interest incurred during the six months ended June 30, 2012 consisted of \$3.4 million payable in cash, of which \$2.1 million was paid during the period and \$1.3 million was accrued at period-end, and \$7.7 million payable by deemed loans, of which \$4.6 million was paid during the period and \$3.1 million was accrued at period-end. The \$6.1 million in interest incurred during the three months ended June 30, 2012 consisted of \$1.9 million payable in cash and \$4.2 million payable by deemed loans; no payments were made during the quarter. Total interest payable associated with the Credit Facility was \$4.4 million and is included in interest payable in the accompanying condensed consolidated balance sheet as of June 30, 2012.

The Company also pays a commitment fee of 0.80% per year, in semi-annual installments, on any undrawn portion of the Credit Facility. The total commitment fee payable on the undrawn portion of the Credit Facility was \$2.5 million and is included in accrued expenses and other current liabilities in the accompanying condensed consolidated balance sheet as of June 30, 2012.

In August 2012, the Company entered into a supplemental agreement (the “Supplemental Agreement”) with the Lenders under the Credit Facility, to amend and restate the Credit Facility. The Credit Facility, as amended by the Supplemental Agreement, authorizes the Company to fund and operate Aireon for the purpose of establishing a space-based Automatic Dependent Surveillance-Broadcast business. Specifically, the amended Credit Facility excludes Aireon from the group of companies (Iridium Communications Inc. and its material subsidiaries) that are obligors under the Credit Facility and from the Company’s consolidated financial results for purposes of calculating compliance with the financial covenants. The amended Credit Facility allows the Company to make a \$12.5 million investment in Aireon, the equity injection of up to \$10 million worth of airtime credits in connection with the Harris Agreement described above, if needed, and an additional investment of up to \$15 million raised from issuances of the Company’s common equity. The amended Credit Facility requires the Company to use any net distributions received from Aireon to repay its debt obligations under the Credit Facility and to grant the Lenders a security interest in the Company’s ownership interest in Aireon. The Supplemental Agreement does not modify the principal amount, interest rates, repayment dates, or maturity of the Credit Facility. The amended Credit Facility includes revised financial covenant levels to reflect changes in timing of expected receipts of cashflows from secondary payloads and other changing business conditions and revised launch and backup launch requirements to permit the amendment to the Company’s launch services agreement with SpaceX. Also, the Supplemental Agreement requires the Company to raise convertible preferred or common equity by April 30, 2013 in an amount approximately equal to any unexercised portion of the warrants to purchase the Company’s common stock at a price of \$7.00 per share, which expire in February 2013.

Contingencies

From time to time, in the normal course of business, the Company is party to various pending claims and lawsuits. The Company is not aware of any such actions that it would expect to have a material adverse impact on its business, financial results or financial condition.

4. Stock-Based Compensation

During 2009, the Company’s stockholders approved a stock incentive plan (the “2009 Stock Incentive Plan”) to provide stock-based awards, including nonqualified stock options, incentive stock options, restricted stock and other equity securities, as incentives and rewards for employees, consultants and non-employee directors. As of December 31, 2011, 8.0 million shares of common stock were authorized for issuance as awards under the 2009 Stock Incentive Plan. In May 2012, the Company’s stockholders approved a new stock incentive plan (the “2012 Stock Incentive Plan”).

The 2012 Stock Incentive Plan is intended as the successor to and continuation of the 2009 Stock Incentive Plan. Following the adoption of the 2012 Stock Incentive Plan, no additional stock awards may be granted under the 2009 Stock Incentive Plan. The aggregate number of shares of common stock initially authorized for issuance under the 2012 Stock Incentive Plan is 13,416,019 shares, which represents the sum of (A) 5,423,206 newly authorized shares, plus (B) the number of shares available for issuance under the 2009 Stock Incentive Plan prior to adoption of the 2012 Stock Incentive Plan, in an amount not to exceed 1,576,794 shares, plus (C) up to 6,416,019 shares subject to grants made for issuance under the 2009 Stock Incentive Plan that may become available for issuance under the 2012 Stock Incentive Plan from time to time as a result of expiration or termination of outstanding awards under the 2009 Stock Incentive Plan prior to exercise or vesting.

Non-employee directors elected to receive a portion of their 2012 annual compensation in the form of equity awards, in an aggregate of approximately 106,000 stock options and 106,000 RSUs. These stock options and RSUs were granted in January 2012 and vest over the remainder of 2012 with 25% vesting on the last day of each calendar quarter. The estimated aggregate grant-date fair value of the stock options was \$0.3 million. The estimated aggregate grant-date fair value of the RSUs was \$0.8 million.

During the three months ended June 30, 2012, the Company granted approximately 147,000 stock options to its employees. During the six months ended June 30, 2012, the Company granted approximately 745,000 stock options, 570,000 service-based RSUs, and 234,000 performance-based RSUs to its employees. Employee stock options and service-based RSUs generally vest over a four-year service period with 25% vesting on the first anniversary of the grant date and the remainder vesting ratably on a quarterly basis thereafter. The performance-based RSUs were awarded to the Company's executives. Vesting of the performance-based RSUs is dependent upon the Company's achievement of certain performance goals over a two-year measurement period. The number of performance-based RSUs that will ultimately vest may range from 0% to 150% of the original grant based on the level of achievement of the performance goals. Provided that the Company achieves the performance goals, 50% of the RSU awards will vest after two years and the remaining 50% after the third year. The Company records stock-based compensation expense related to performance-based RSUs when it is considered probable that the performance conditions will be met. The estimated aggregate grant-date fair values of the stock options granted to employees during the three months ended June 30, 2012 was \$0.5 million. The estimated aggregate grant-date fair values of the stock options, service-based RSUs, and performance-based RSUs granted to employees during the six months ended June 30, 2012 were \$2.5 million, \$4.3 million, and \$1.8 million, respectively.

During the three months ended June 30, 2012, the Company granted approximately 75,000 stock options to consultants. The consultant options vest over a two-year period with ratable quarterly vesting. The aggregate estimated grant-date fair value of the consultant stock options was approximately \$0.3 million.

5. Equity Transactions

Private Warrant Exchanges

During 2011, the Company entered into several private transactions (the “Private Warrant Exchanges”) to exchange shares of its common stock for outstanding stock purchase warrants to purchase its common stock at an exercise price of \$11.50 per share (the “\$11.50 Warrants”). As a result of these transactions, the Company issued an aggregate of 1,643,453 shares of its common stock in exchange for an aggregate of 8,167,541 of the \$11.50 Warrants.

Tender Offer Warrant Exchange

During 2011, the Company initiated and completed a tender offer to exchange outstanding \$11.50 Warrants for shares of its common stock (the “Tender Offer Warrant Exchange”). As a result of the Tender Offer Warrant Exchange, the Company issued an aggregate of 1,303,267 shares of its common stock in exchange for an aggregate of 5,923,963 of the \$11.50 Warrants.

As a result of the Private Warrant Exchanges and the Tender Offer Warrant Exchange, approximately 277,000 of the \$11.50 Warrants remained outstanding as of June 30, 2012.

6. Net Income Per Share

The computations of basic and diluted net income per share are set forth below:

For the three and six months ended June 30, 2012, warrants to purchase 0.3 million shares of common stock and stock options to purchase 2.1 million shares of common stock were not included in the computation of diluted net income per share as the effect would be anti-dilutive.

For the three and six months ended June 30, 2011, warrants to purchase 0.3 million shares of common stock and stock options to purchase 4.5 million shares of common stock were not included in the computation of diluted net income per share as the effect would be anti-dilutive.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion along with our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed on March 6, 2012 with the Securities and Exchange Commission, or the SEC, as well as our condensed consolidated financial statements included in this Form 10-Q.

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Such forward-looking statements include those that express plans, anticipation, intent, contingencies, goals, targets or future development or otherwise are not statements of historical fact. Without limiting the foregoing, the words "believe," "anticipate," "plan," "expect," "intend" and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based on our current expectations and projections about future events, and they are subject to risks and uncertainties, known and unknown, that could cause actual results and developments to differ materially from those expressed or implied in such statements. The important factors discussed under the caption "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011 filed on March 6, 2012, and in this Form 10-Q, could cause actual results to differ materially from those indicated by forward-looking statements made herein. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Background

We were initially formed in 2007 as GH Acquisition Corp., a special purpose acquisition company. We acquired, directly and indirectly, all the outstanding equity of Iridium Holdings LLC, or Iridium Holdings, in a transaction accounted for as a business combination on September 29, 2009. We refer to this transaction as the Acquisition. We refer to Iridium Holdings, together with its direct and indirect subsidiaries, as Iridium. In accounting for the Acquisition, we were deemed the legal and accounting acquirer and Iridium the legal and accounting acquiree. On September 29, 2009, as a result of the Acquisition, we changed our name to Iridium Communications Inc.

Overview of Our Business

We are engaged primarily in providing mobile voice and data communications services using a constellation of orbiting satellites. We are the second largest provider of satellite-based mobile voice and data communications services based on revenue, and the only commercial provider of communications services offering 100% global coverage. Our satellite network provides communications services to regions of the world where existing wireless or

wireline networks do not exist or are impaired, including extremely remote or rural land areas, airways, open oceans, the polar regions and regions where the telecommunications infrastructure has been affected by political conflicts or natural disasters.

We provide voice and data communications services to businesses, the U.S. and foreign governments, non-governmental organizations and consumers. We provide these services using our constellation of in-orbit satellites and related ground infrastructure, including a primary commercial gateway. We utilize an interlinked, mesh architecture to route traffic across the satellite constellation using radio frequency crosslinks. This unique architecture minimizes the need for ground facilities to support the constellation, which facilitates the global reach of our services and allows us to offer services in countries and regions where we have no physical presence.

We sell our products and services to commercial end-users through a wholesale distribution network, encompassing over 71 service providers, 177 value-added resellers, or VARs, and 54 value-added manufacturers, who either sell directly to the end-user or indirectly through other service providers, VARs or dealers. These distributors often integrate our products and services with other complementary hardware and software and have developed a broad suite of applications for our products and services targeting specific vertical markets.

At June 30, 2012, we had approximately 576,000 billable subscribers worldwide, an increase of 21% from approximately 478,000 billable subscribers at June 30, 2011. We have a diverse customer base, with end-users in the following key business areas: land-based handset; maritime; aviation; machine-to-machine, or M2M; and government.

We expect a higher proportion of our future revenue will be derived from service revenue than in the past. Revenues from providing voice and M2M data service historically have generated higher gross margins than sales of subscriber equipment.

We are currently devoting a substantial part of our resources to develop Iridium NEXT, our next-generation satellite constellation, and on hardware and software upgrades to our ground infrastructure in preparation for Iridium NEXT, the development of new product and service offerings, upgrades to our current services, and upgrades to our information technology systems. We estimate the aggregate costs associated with the design, build and launch of Iridium NEXT and related infrastructure upgrades through 2017 to be approximately \$3 billion. We believe our \$1.8 billion loan facility, or the Credit Facility, together with internally generated cash flows, including cash flows from hosted payloads and potential proceeds from our outstanding stock purchase warrants or convertible preferred or common equity issuances in lieu thereof, as required by our Credit Facility, will be sufficient to fully fund the aggregate costs associated with the design, build and launch of Iridium NEXT and related infrastructure upgrades through early 2017. As of July 27, 2012, we had borrowed a total of \$588.9 million under the Credit Facility. For more information about our sources of funding, refer to “Liquidity and Capital Resources.”

Recent Developments

In June 2012, we announced our plans to host a payload to be developed by our subsidiary, Aireon LLC, as our primary hosted payload. Aireon’s payload will be an Automatic Dependent Surveillance-Broadcast, or ADS-B, system to provide global air traffic monitoring data for sale to air navigation service providers such as the U.S. Federal Aviation Administration and NAV CANADA. Aireon’s success depends on its ability to raise funds to operate while the ADS-B system payloads are being constructed and on the development of the market for a space-based ADS-B service. If successful, we expect Aireon to generate approximately \$200 million in one-time hosting fees for the integration and launch of the payloads between 2014 and 2017. We also expect to receive annual data fee revenue and have a significant retained interest in Aireon.

In August 2012, we entered into a supplemental agreement with the syndicate of bank lenders, or the Lenders, under the Credit Facility. The supplemental agreement, or Supplemental Agreement, amended and restated the Credit Facility. The Supplemental Agreement authorizes us to fund and operate Aireon for the purpose of establishing a space-based ADS-B business. Specifically, the Supplemental Agreement excludes Aireon from the group of companies (we and our material subsidiaries) that are obligors under the Credit Facility and from our consolidated financial results for purposes of calculating compliance with the financial covenants. The Supplemental Agreement allows us to make a \$12.5 million investment in Aireon, the equity injection of up to \$10 million worth of airtime credits into Aireon as provided for in Aireon’s agreement with Harris Corporation to build the ADS-B system payloads, if needed, and an additional investment of up to \$15 million raised from issuances of our common equity. The Supplemental Agreement requires us to use any net distributions that we receive from Aireon to repay the debt under the Credit Facility and to issue the Lenders a security interest in our ownership interest in Aireon.

The Supplemental Agreement also includes revised financial covenant levels to reflect changes in timing of expected receipts of cash flows from secondary payloads and other changing business conditions and revised launch and backup launch requirements consistent with the amendment to our launch services agreement with Space Exploration Technologies Corp., or SpaceX, described below. Also, the Supplemental Agreement requires us to raise convertible preferred or common equity by April 30, 2013 in an amount approximately equal to any unexercised portion of the

warrants to purchase the Company's common stock at a price of \$7.00 per share, which expire in February 2013, or the \$7.00 Warrants. The amendment to the Credit Facility does not modify the principal amount, interest rates, repayment dates, or maturity of the Credit Facility.

In August 2012, we entered into an amendment to our launch services agreement with SpaceX. The amendment reduced the number of contracted launches and increased the number of satellites to be carried on each launch vehicle. The amendment also reduced the maximum price under the original SpaceX agreement from \$492.0 million to \$453.1 million.

Material Trends and Uncertainties

Our industry and customer base has historically grown as a result of:

- demand for remote and reliable mobile communications services;
- increased demand for communications services by the U.S. Department of Defense, or DoD, disaster and relief agencies and emergency first responders;
- a broad and expanding wholesale distribution network with access to diverse and geographically dispersed niche markets;
- a growing number of new products and services and related applications;
- improved data transmission speeds for mobile satellite service offerings;

- regulatory mandates requiring the use of mobile satellite services;
- a general reduction in prices of mobile satellite services and subscriber equipment; and
- geographic market expansion through the receipt of licenses to sell our services in additional countries.

Nonetheless, we face a number of challenges and uncertainties in operating our business, including:

our ability to develop Iridium NEXT and related ground infrastructure, and to develop products and services for Iridium NEXT, including our ability to continue to access the Credit Facility to meet our future capital requirements for the design, build and launch of the Iridium NEXT satellites;

our ability to obtain sufficient internally generated cash flows, including cash flows from hosted payloads and proceeds from our outstanding stock purchase warrants or equity issuances in lieu thereof, to fund a portion of the costs associated with Iridium NEXT and support ongoing business;

our ability to raise convertible preferred or common equity in an amount approximately equal to any unexercised portion of the \$7.00 Warrants, as required by the recent amendment to our Credit Facility;

our ability to successfully fund, develop and market the space-based ADS-B global aviation monitoring service to be developed and deployed by Aireon and carried as a hosted payload on the Iridium NEXT system;

our ability to maintain the health, capacity, control and level of service of our existing satellite network until and during the transition to Iridium NEXT;

- changes in general economic, business and industry conditions;
- our reliance on a single primary commercial gateway and a primary satellite network operations center;
- competition from other mobile satellite service providers and, to a lesser extent, from the expansion of terrestrial-based cellular phone systems and related pricing pressures;
- changes in demand from U.S. government customers, particularly the DoD;

our ability to successfully negotiate a new contract with the DoD when it expires in 2013;

market acceptance of our products;

regulatory requirements, in existing and new geographic markets;

rapid and significant technological changes in the telecommunications industry;

reliance on our wholesale distribution network to market and sell our products, services and applications effectively;

reliance on single source suppliers for some of the components required in the manufacture of our end-user subscriber equipment and our ability to purchase parts that are periodically subject to shortages resulting from surges in demand, natural disasters or other events; and

reliance on a few significant customers for a substantial portion of our revenue, where the loss or decline in business with any of these customers may negatively impact our revenue and increase in our bad debt expense.

Comparison of Our Results of Operations for the Three Months Ended June 30, 2012 and 2011

(\$ in thousands)	Three Months Ended June 30,		Three Months Ended June 30,		Change			
	2012	% of Total Revenue	2011	% of Total Revenue	Dollars	Percent

Operating income	\$28,274	29 %	\$20,743	22 %	\$7,531	36 %		

Revenue

Total revenue increased by 1% to \$97.3 million for the three months ended June 30, 2012 compared to the three months ended June 30, 2011. This increase in revenue was primarily due to a 21% year-over-year increase in billable subscribers and an increase in sales volume of subscriber equipment. These increases were partially offset by a decrease in average monthly revenue per unit, or ARPU, for voice services and a decrease in revenue from government-sponsored research and development contracts.

Service Revenue

	Three Months Ended June 30, 2012			Three Months Ended June 30, 2011			Change		
	Revenue	Billable Subscribers	ARPU ⁽²⁾	Revenue	Billable Subscribers	ARPU ⁽²⁾	Revenue	Subscribers	ARPU
Commercial voice	\$42.7	326	\$ 45	\$ 41.9	295	\$ 49	\$0.8	31	\$ (4)
Commercial M2M data	10.2	202	18	7.1	136	18	3.1	66	-
Total	52.9	528		49.0	431		3.9	97	
Government voice	14.9	36	138	15.5	37	140	(0.6)	(1)	(2)

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Government M2M data	0.7	12	19	0.6	10	22	0.1	2	(3)
Total	15.6	48		16.1	47		(0.5)	1	
Total	\$68.5	576		\$ 65.1	478		\$3.4	98	

(1) Billable subscriber numbers shown are at the end of the respective period.

ARPU is calculated by dividing revenue in the respective period by the average of the number of billable (2) subscribers at the beginning of the period and the number of billable subscribers at the end of the period and then dividing the result by the number of months in the period.

Service revenue increased by 5% for the three months ended June 30, 2012, compared to the prior year period, primarily due to growth in billable subscribers partially offset by decreases in ARPU for voice services.

Commercial voice revenue increased principally due to an increase in revenue from prepaid services and subscriber growth in higher ARPU Iridium OpenPort[®], our broadband data maritime service. The decrease in commercial voice ARPU was due to a decline in average minutes of use per post-paid subscriber. Future growth in commercial voice revenue may be negatively affected by reductions in non-U.S. defense spending and deployed non-U.S. troop levels. Commercial M2M data revenue growth was driven principally by an increase in the billable subscriber base.

Government voice revenue decreased, principally due to a slight reduction in billable subscribers and ARPU. Government voice ARPU decreased due to a higher proportion of billable subscribers on lower priced plans for Netted IridiumSM, a service that provides beyond-line-of-sight, push-to-talk tactical radio service for user-defined groups. The increase in government M2M data revenue was driven primarily by billable subscriber growth. Government M2M data ARPU decreased compared to the prior year period, primarily due to growth in subscribers using plans that generate lower revenue per unit. We expect government voice ARPU to be lower for 2012 compared to 2011 as usage of lower priced Netted Iridium continues to grow as a percentage of overall government voice subscribers. Future government voice and M2M data billable subscribers and revenue may be negatively affected by reductions in U.S. defense spending and deployed troop levels, and a corresponding decrease in subscribers under our agreements with the U.S. government. These agreements account for a majority of our government services revenue. In addition, our agreement with the U.S. government expires in 2013. Future government voice and M2M data revenues will be dependent upon our ability to negotiate a favorable new agreement with the U.S. government.

Subscriber Equipment Revenue

Subscriber equipment revenue increased 9% for the three months ended June 30, 2012 from the prior year period. The increase in subscriber equipment revenue was primarily due to increased volume in unit sales of the Iridium Extreme[®] satellite handset and increased volume in unit sales of Iridium 9602 short-burst data transceivers. These increases were partially offset by lower unit sales of both the Iridium 9555 and 9505A satellite handsets. Future subscriber equipment sales to the U.S. government through non-government distributors may be negatively affected by reductions in U.S. defense spending and deployed troop levels.

Engineering and Support Service Revenue

Engineering and support service revenue decreased 44% for the three months ended June 30, 2012 compared to the prior year period, primarily due to a decrease in revenue from government-sponsored research and development contracts.

Operating Expenses

Cost of Services (exclusive of depreciation and amortization)

Cost of services (exclusive of depreciation and amortization) includes the cost of network engineering and operations staff, including contractors, software maintenance, product support services and cost of services for government and commercial engineering and support service revenue.

Cost of services (exclusive of depreciation and amortization) decreased 19% for three months ended June 30, 2012 from the prior year period due to a decrease in government-sponsored research and development contracts with corresponding impacts to revenue and cost of services. Additionally, a decline in costs related to the operations and maintenance agreement with the Boeing Company for our current satellite constellation contributed to this decrease.

Cost of Subscriber Equipment

Cost of subscriber equipment includes the direct costs of equipment sold, which consists of manufacturing costs, allocation of overhead, and warranty costs.

Cost of subscriber equipment increased 10% for the three months ended June 30, 2012 compared to the prior year period. This increase was proportionate with the increase in subscriber equipment revenue and driven by increased unit sales of our Iridium Extreme satellite handset and Iridium 9602 short-burst data transceivers, partially offset by a decline in unit sales of both our Iridium 9555 and 9505A satellite handsets.

Selling, General and Administrative

Selling, general and administrative expenses increased by 10% for the three months ended June 30, 2012 from the prior year period. This increase was driven by a \$0.7 million increase in bad debt expense related to a potentially uncollectible portion of an outstanding receivable balance. Future selling, general and administrative expenses may be negatively affected by our ability to collect amounts on accounts receivable with specific customers; we will continue to evaluate all receivables for collectability. Also, contributing to this increase was a \$0.4 million increases in Aireon-related professional fees and a \$0.5 million increase in Aireon-related sales and marketing costs.

Depreciation and Amortization

Depreciation and amortization expense decreased 22% for the three months ended June 30, 2012 from the prior year period. During the second quarter of 2012, we updated our analysis of the current satellite constellation's health and the remaining useful life. Based on the results of this analysis, we estimate that our current constellation of satellites will be operational for longer than previously expected. As a result, the estimated useful life of the current constellation has been extended and is consistent with the expected deployment of Iridium NEXT. The extension of the estimated useful life resulted in a decline in depreciation expense between the comparative periods. We will continue to evaluate the useful life of our current constellation of satellites on an ongoing basis through full deployment and activation of Iridium NEXT.

Undrawn Credit Facility Fees

Commitment fees on the undrawn portion of the Credit Facility were \$2.6 million for the three months ended June 30, 2012 compared to \$3.2 million for the prior year period. The decrease of the commitment fee on the undrawn portion is directly proportionate to the increase in the amounts borrowed under the Credit Facility as we finance the development of Iridium NEXT.

Provision for Income Taxes

For the three months ended June 30, 2012, our income tax provision was \$8.1 million compared to \$6.2 million for the prior year period. This increase principally resulted from the increase in income before taxes. Our effective tax rate was 31.5% for the three months ended June 30, 2012 compared to 34.5% for the three months ended June 30, 2011. The decrease in the rate is primarily due to the state tax impact of the change in the estimated of the useful life of our current constellation of satellites. As the current constellation of satellites will be depreciated over a longer period, the

realization of the related deferred tax liability will extend into years in which the Arizona income tax rate will be lower. This resulted in an estimated \$0.9 million benefit during the three months ended June 30, 2012. As our current estimates change in future periods, the impact on the deferred tax assets and liabilities may change correspondingly.

Comparison of Our Results of Operations for the Six Months Ended June 30, 2012 and 2011

(\$ in thousands)	Six Months Ended June 30,			% of Total		Change Dollars	Percent		
	2012	% of Total Revenue	2011	% of Total Revenue	Percent				
Revenue:									
Services	\$135,333	71	%	\$126,326	67	%	\$9,007	7	%
Subscriber equipment	45,454	24	%	46,323	25	%	(869)	(2))%
Engineering and support services	10,008	5	%	14,557	8	%	(4,549)	(31))%
Total revenue	190,795	100	%	187,206	100	%	3,589	2	%
Operating expenses:									
Cost of services (exclusive of depreciation and amortization)	33,991	18	%	36,697	20	%	(2,706)	(7))%
Cost of subscriber equipment	26,634	14	%	25,107	13	%	1,527	6	%
Research and development	9,118	5	%	7,647	4	%	1,471	19	%
Selling, general and administrative	36,118	19	%	33,716	18	%	2,402	7	%
Depreciation and amortization	42,572	22	%	46,995	25	%	(4,423)	(9))%
Total operating expenses	148,433	78	%	150,162	80	%	(1,729)	(1))%
Operating income	\$42,362	22	%	\$37,044	20	%	\$5,318	14	%

Revenue

Total revenue increased by 2% to \$190.8 million for the six months ended June 30, 2012 compared to the six months ended June 30, 2011. This increase in revenue was principally due to a 21% year-over-year increase in billable subscribers. This increase was partially offset by a decrease in ARPU for voice and data services and a decrease in revenue from government-sponsored research and development contracts.

Service Revenue

	Six Months Ended June 30, 2012			Six Months Ended June 30, 2011			Change		
	(Revenue in millions and subscribers in thousands)			(Revenue in millions and subscribers in thousands)					
	Revenue	Billable Subscribers	ARPU ⁽²⁾	Revenue	Billable Subscribers	ARPU ⁽²⁾	Revenue	Billable Subscribers	ARPU
Commercial voice	\$84.6	326	\$ 45	\$ 80.8	295	\$ 47	\$3.8	31	\$ (2)
Commercial M2M data	19.4	202	17	13.5	136	18	5.9	66	(1)
Total	104.0	528		94.3	431		9.7	97	
Government voice	30.0	36	137	30.9	37	140	(0.9)	(1)	(3)
Government M2M data	1.3	12	19	1.1	10	22	0.2	2	(3)
Total	31.3	48		32.0	47		(0.7)	1	
Total	\$ 135.3	576		\$ 126.3	478		\$9.0	98	

(1) Billable subscriber numbers shown are at the end of the respective period.

ARPU is calculated by dividing revenue in the respective period by the average of the number of billable subscribers at the beginning of the period and the number of billable subscribers at the end of the period and then dividing the result by the number of months in the period.

Service revenue increased by 7% for the six months ended June 30, 2012, compared to the prior year period, primarily due to growth in billable subscribers partially offset by decreases in ARPU for voice and data services.

Commercial voice revenue increased principally due to billable subscriber growth, including subscriber growth related to Iridium OpenPort and increased revenue from prepaid services. The increase in revenue driven from subscriber growth was partially offset by a decrease in ARPU for commercial voice. The decrease in commercial voice ARPU was due to a decline in average minutes of use per post-paid subscriber, partially offset by growth in the higher-ARPU Iridium OpenPort service.

Commercial M2M data revenue growth was driven principally by an increase in the billable subscriber base. Commercial M2M data ARPU decreased slightly compared to the prior year period due to an increase in lower-ARPU data plans for new subscribers.

Government voice revenue decreased, principally due to a small decline in billable subscribers combined with a decrease in ARPU. Government voice ARPU decreased due to a higher proportion of billable subscribers on the lower priced plans for Netted Iridium. The increase in government M2M data revenue was driven primarily by billable subscriber growth. Government M2M data ARPU decreased compared to the prior year period, primarily due to growth in subscribers using plans that generate lower revenue per unit.

Subscriber Equipment Revenue

Subscriber equipment revenue decreased 2% for the six months ended June 30, 2012 from the prior year period. The decrease in subscriber equipment revenue was primarily due to lower unit sales of the Iridium 9555 satellite handsets. During the first quarter of 2011, certain incentive pricing was available for bulk customer orders. Similar incentive pricing was not available in the first quarter of 2012. Also contributing to the decline in subscriber equipment revenue was the lower unit sales of the Iridium 9505A satellite handsets. These declines were partially offset by increased volume in unit sales of the new Iridium Extreme satellite handset, which was introduced in September 2011, and an increased volume in unit sales of the Iridium 9602 short-burst data transceiver.

Engineering and Support Service Revenue

Engineering and support service revenue decreased 31% for the six months ended June 30, 2012 compared to the prior year period, primarily due to a decrease in revenue from government-sponsored research and development contracts.

Operating Expenses

Cost of Services (exclusive of depreciation and amortization)

Cost of services (exclusive of depreciation and amortization) decreased 7% for the six months ended June 30, 2012 from the prior year period due to a decrease in government-sponsored research and development contracts with corresponding impacts to revenue and cost of services.

Cost of Subscriber Equipment

Cost of subscriber equipment increased 6% for the six months ended June 30, 2012 compared to the prior year period. This increase was driven by a \$1.2 million increase in our warranty reserve during the first half of 2012 due to certain production issues related to the Iridium Extreme satellite handset. Excluding this warranty provision, the cost of subscriber equipment declined by 1% from the prior year period due to a decline in satellite handset unit sales and a shift in product mix to the higher cost Iridium Extreme satellite handset.

Research and Development

Research and development expense increased 19% for the six months ended June 30, 2012 from the prior year period. The increase was primarily driven by an increase in research and development associated with Iridium NEXT projects.

Selling, General and Administrative

Selling, general and administrative expenses increased by 7% for the six months ended June 30, 2012 from the prior year period. This increase was driven by a \$0.7 million increase in bad debt expense related to a potentially uncollectible portion of an outstanding receivable balance. Future selling, general and administrative expenses may be negatively affected by our ability to collect amounts on accounts receivable with specific customers; we will continue evaluate all receivables for collectability. The increase was also driven by a \$1.4 million increase in sales and marketing costs.

Depreciation and Amortization

Depreciation and amortization expense decreased 9% for the six months ended June 30, 2012 from the prior year period. The decrease was driven by the increase in the estimated useful life of our satellites.

Undrawn Credit Facility Fees

Commitment fees on the undrawn portion of the Credit Facility were \$5.4 million for the six months ended June 30, 2012 compared to \$7.5 million for the prior year period. The decrease of the commitment fee on the undrawn portion is directly proportionate to the increase in the amounts borrowed under the Credit Facility as we finance the development of Iridium NEXT.

Provision for Income Taxes

For the six months ended June 30, 2012, our income tax provision was \$7.2 million compared to \$10.1 million for the prior year period. Our effective tax rate was approximately 19.2% for the six months ended June 30, 2012 compared to 33.5% for the prior year period. The decrease in both our income tax provision and our effective tax rate primarily resulted from a benefit in our 2012 year-to-date income tax expense of \$5.2 million related to the impact on our historical deferred tax assets and liabilities of a change in the Arizona tax law enacted in the first quarter of 2012. For the income tax provision, this decrease was partially offset by an increase in income. As our current estimates change in future periods, the impact on the deferred tax assets and liabilities may change correspondingly.

Our 2012 effective tax rate differs from the statutory U.S. Federal tax rate of 35% due primarily to the changes in the Arizona tax laws enacted in 2012. Our 2011 effective tax rate differs from the statutory U.S. Federal tax rate of 35% due primarily to the second quarter 2011 reduction in the Arizona corporate income tax rate offset by non-deductible permanent differences and foreign withholding taxes.

Liquidity and Capital Resources

As of June 30, 2012, our total cash and cash equivalents balance was \$166.7 million. Our principal sources of liquidity are existing cash, internally generated cash flows, and the Credit Facility. Our principal liquidity requirements are to meet capital expenditure needs, including the design, build and launch of Iridium NEXT, working capital and research and development expenses.

We expect to fund \$1.8 billion of the costs of Iridium NEXT with the Credit Facility, with the remainder to be funded from internally generated cash flows, including potential cash flows from hosted payloads on our Iridium NEXT satellites and proceeds from our outstanding \$7.00 Warrants or convertible preferred or common equity issuances in lieu thereof. As of June 30, 2012, the full exercise of our outstanding \$7.00 Warrants would have provided us with \$95.6 million of proceeds.

The Credit Facility contains borrowing restrictions, including financial performance covenants and covenants relating to hosted payloads, and there can be no assurance that we will be able to continue to borrow funds under the Credit Facility. There can also be no assurance that our internally generated cash flows, including those from hosted payloads on our Iridium NEXT satellites, will meet our current expectations, that our outstanding stock purchase warrants will be exercised for cash or that we will be able to raise cash through the issuance of convertible preferred or common equity in lieu of warrant exercises, as required by the recent amendment to the Credit Facility. If we do not have access to those expected sources of liquidity, or if the cost of implementing Iridium NEXT or the other elements of our business plan is higher than anticipated, we will require even more external funding than planned. Our ability to obtain additional funding may be adversely affected by a number of factors, including the global economic downturn and related tightening of the credit markets, and we cannot assure you that we will be able to obtain such funding on reasonable terms, or at all. If we are not able to secure such funding in a timely manner, our ability to maintain our network, to design, build and launch Iridium NEXT and related ground infrastructure, products and services, and to pursue additional growth opportunities will be impaired, and we would likely need to delay some elements of our Iridium NEXT development. Our liquidity and our ability to fund our liquidity requirements are also dependent on our future financial performance, which is subject to general economic, financial, regulatory and other factors that are beyond our control.

The recent amendment to the Credit Facility allow us to make a \$12.5 million investment in Aireon, the equity injection of up to \$10 million worth of airtime credits into Aireon as provided for in Aireon's agreement with Harris Corporation to build the ADS-B system payloads, if needed, and an additional investment of up to an additional \$15 million raised from the issuance of our equity. The amended Credit Facility requires us to use any net distributions that we receive from Aireon to repay the debt under the Credit Facility and to grant the Lenders a security interest in our ownership interest in Aireon. The amendment does not modify the principal amount, interest rates, repayment dates, or maturity of the Credit Facility. The amended Credit Facility includes revised financial covenant levels to reflect changes in timing of expected receipts of cash flows from secondary payloads and other changing business conditions and revised launch and backup launch requirements to permit the amendment to our launch services agreement with SpaceX. Also, the Supplemental Agreement requires us to raise convertible preferred or common equity by April 30, 2013 in an amount approximately equal to any unexercised portion of the \$7.00 Warrants, which expire in February 2013.

As of June 30, 2012, we had borrowed a total of \$568.0 million under the Credit Facility. The unused portion of the Credit Facility as of June 30, 2012 was \$1.2 billion. Under the terms of the Credit Facility, we were required to maintain a minimum cash reserve for debt service of \$40.5 million as of June 30, 2012, which is classified as restricted cash on the accompanying condensed consolidated balance sheet. This minimum cash reserve requirement will increase over the term of the Credit Facility to \$189.0 million at the beginning of the repayment period, which is expected to begin in 2017. We believe that our liquidity sources will provide sufficient funds for us to meet our

liquidity requirements for at least the next 12 months.

Cash Flows

The following section highlights our cash flows for the six months ended June 30, 2012 and 2011:

	2012	2011	Change
	(in thousands)		
Cash provided by operating activities	\$89,389	\$84,082	\$5,307
Cash used in investing activities	\$(186,704)	\$(170,871)	\$(15,833)
Cash provided by financing activities	\$127,611	\$70,624	\$56,987

Cash Flows from Operating Activities

The increase in cash provided by operating activities for the six months ended June 30, 2012 compared to the year ago period was primarily driven by a \$10.1 million increase in net income partially offset by a \$5.6 million decrease in non-cash items included in net income.

Cash Flows from Investing Activities

Net cash used in investing activities for the six months ended June 30, 2012 increased compared to the same period in the prior year due to increased capital expenditures related to Iridium NEXT, including payments related to the purchase of equipment and software for our satellite, network and gateway operations.

Cash Flows from Financing Activities

Net cash provided by financing activities for the six months ended June 30, 2012 increased by \$57.0 million compared to the same period in the prior year primarily due to a \$22.2 million payment in 2011 which represented satisfaction in full of our promissory note to Motorola Solutions, Inc. and which did not recur in 2012, a \$14.0 million decrease in payments of financing fees incurred in conjunction with obtaining the Credit Facility, and a \$20.7 million increase in borrowings under the Credit Facility compared to the prior year period.

Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements, as such term is defined in Item 303(a)(4)(ii) of the SEC's Regulation S-K, that have or are reasonably likely to have a material current or future effect on our financial condition, results of operations, liquidity or capital resources.

Seasonality

Our results of operations have been subject to seasonal usage changes for commercial customers, and we expect that our results will be affected by similar seasonality effects in the future. March through October are typically the peak months for commercial voice services revenue and related subscriber equipment sales. U.S. government revenue and commercial M2M revenue have been less subject to seasonal usage changes.

Accounting Developments

None.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest income earned on our cash and cash equivalents balance is subject to interest rate fluctuations. For the three and six months ended June 30, 2012, a one-half percentage point increase or decrease in interest rates would not have had a material effect on our interest income.

We entered into the Credit Facility in October 2010 and had borrowed \$568.0 million under the Credit Facility as of June 30, 2012. A portion of the draws we make under the Credit Facility bear interest at a floating rate equal to the London Interbank Offered Rate, or LIBOR, plus 1.95% and will, accordingly, subject us to interest rate fluctuations in future periods. However, had the currently outstanding borrowings under the Credit Facility been outstanding throughout the six months ended June 30, 2012, a one-half percentage point increase or decrease in the LIBOR would not have had a material effect on our interest cost.

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, accounts receivable and accounts payable. We maintain our cash and cash equivalents with financial institutions with high credit ratings and at times maintain the balance of our deposits in excess of federally insured (FDIC) limits. The majority of our cash is swept nightly into a money market fund invested in U.S. treasuries. Accounts receivable are due from both domestic and international customers. We perform credit evaluations of our customers' financial condition and record reserves to provide for estimated credit losses. Accounts payable are owed to both domestic and international vendors.

ITEM 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our chief executive officer, who is our principal executive officer, and our chief financial officer, who is our principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, as of the end of the period covered by this report. In evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. In addition, the design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent

limitations in a control system, misstatements due to error or fraud may occur and not be detected.

Based on this evaluation, our chief executive officer and our chief financial officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

During the quarter ended June 30, 2012, there were no changes in our internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II.

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Neither we nor any of our subsidiaries are currently subject to any material legal proceeding, nor, to our knowledge, is any material legal proceeding threatened against us or any of our subsidiaries.

ITEM 1A. RISK FACTORS.

Our business is subject to risks and events that, if they occur, could adversely affect our financial condition and results of operations and the trading price of our securities. In addition to the other information set forth in this quarterly report on Form 10-Q, you should carefully consider the factors discussed in "Part I, Item 1A. Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the Securities and Exchange Commission on March 6, 2012, as updated by the following risk factors.

Our business plan depends on increased demand for mobile satellite services and the success of our subsidiary, Aireon LLC, which is our primary hosted payload customer, among other factors.

Our business plan is predicated on growth in demand for mobile satellite services and the ability of our primary hosted payload customer to pay us to accommodate its hosted payloads on our next-generation satellite constellation, Iridium NEXT. Demand for mobile satellite services may not grow, or may even contract, either generally or in particular geographic markets, for particular types of services or during particular time periods. A lack of demand could impair our ability to sell products and services, develop and successfully market new products and services and could exert downward pressure on prices. Any decline in prices would decrease our revenue and profitability and negatively affect our ability to generate cash for investments and other working capital needs. Further, in June 2012 we announced our plans to host a payload to be developed by our subsidiary, Aireon LLC, as our primary hosted payload. Aireon's payload will be an automatic dependent surveillance-broadcast, or ADS-B, system for global air traffic monitoring. Aireon's success depends on its ability to raise funds to operate while the ADS-B system payloads are being constructed and on the development of the market for a space-based ADS-B service. If Aireon cannot successfully develop the payload or sell its services to air navigation service providers, it will not be able to pay us for the hosting costs.

Our ability to successfully implement our business plan will also depend on a number of other factors, including:

- our ability to maintain the health, capacity and control of our existing satellite constellation;
- our ability to complete the design, build and launch of Iridium NEXT and related ground infrastructure, products and services, and, once launched, our ability to maintain the health, capacity and control of such satellite constellation;
- the level of market acceptance and demand for our products and services;
- our ability to introduce innovative new products and services that satisfy market demand, including new service offerings on Iridium NEXT;
- our ability to obtain additional business using our existing spectrum resources both in the United States and internationally;

- our ability to sell our products and services in additional countries;
- our ability to maintain our relationship with U.S. government customers, particularly the Department of Defense;
- the ability of our distributors to market and distribute our products, services and applications effectively and their continued development of innovative and improved solutions and applications for our products and services;
- the effectiveness of our competitors in developing and offering similar services and products; and
- our ability to maintain competitive prices for our products and services and control costs.

We may need additional capital to design, build and launch Iridium NEXT and related ground infrastructure, products and services, and pursue additional growth opportunities. If we fail to maintain access to sufficient capital, we will not be able to successfully implement our business plan.

Our business plan calls for the development of Iridium NEXT, the development of new product and service offerings, upgrades to our current services, hardware and software upgrades to maintain our ground infrastructure and upgrades to our business systems. We estimate the costs associated with the design, build and launch of Iridium NEXT and related ground infrastructure upgrades through 2017 will be approximately \$3 billion. While we expect to fund these costs with borrowings under our \$1.8 billion loan facility, or the Credit Facility, together with internally generated cash flows, including potential revenues from hosted payloads and the proceeds from our outstanding stock purchase warrants or equity issuances in lieu thereof, it is possible that these sources will not be sufficient to fully fund Iridium NEXT. For example, our primary hosted payload customer is our subsidiary, Aireon. If Aireon is not successful and fails to pay its hosting costs, or if we fail to generate our expected cash flows from warrants or other sources, we might need to finance the remaining cost by raising additional debt or equity financing. In addition, we may need additional capital to design and launch new products and services on Iridium NEXT. Such additional financing may not be available on favorable terms, or at all.

Our ability to make ongoing draws under the Credit Facility will depend upon our satisfaction of various borrowing conditions from time to time, some of which will be outside of our control. In addition, there can be no assurance that our internally generated cash flows will meet our current expectations, that our in-the-money warrants will remain in the money, or, even if they do remain in the money, that they will be exercised, or that we will not encounter increased costs. Among other factors leading to the uncertainty over our internally generated cash flows, Aireon may be unable to pay its hosting costs. If available funds from the Credit Facility, internally generated cash flows and the proceeds from our warrants are less than we expect, our ability to maintain our network, design, build and launch Iridium NEXT and related ground infrastructure, develop new products and services, and pursue additional growth opportunities will be impaired, which would significantly limit the development of our business and impair our ability to provide a commercially acceptable level of service. We expect to experience overall liquidity levels lower than our recent liquidity levels. Inadequate liquidity could compromise our ability to pursue our business plans and growth opportunities and make borrowings under the Credit Facility, delay the ultimate deployment of Iridium NEXT, and otherwise impair our business and financial position.

If we fail to satisfy the ongoing borrowing conditions of the Credit Facility, we may be unable to fund Iridium NEXT.

We plan to use borrowings under the Credit Facility to partially fund the construction of our Iridium NEXT satellites, including borrowing to capitalize interest otherwise due under the Credit Facility. Our ability to continue to draw funds under the Credit Facility over time will depend on the satisfaction of borrowing conditions, including:

- compliance with the covenants under the Credit Facility, including financial covenants and covenants relating to hosted payloads;

- accuracy of the representations we make under the Credit Facility;

- compliance with the other terms of the Credit Facility, including the absence of events of default; and

- maintenance of the insurance policy with Compagnie Française d' Assurance pour le Commerce Extérieur, or COFACE, the French export credit agency.

In addition, the August 2012 amendment to the Credit Facility added a requirement to raise convertible preferred or common equity in an amount approximately equal to any unexercised portion of our outstanding \$7.00 stock purchase warrants. As of June 30, 2012, there were approximately 13.7 million unexercised \$7.00 warrants outstanding.

Some of these borrowing conditions may be outside of our control or otherwise difficult to satisfy. If we do not continue to satisfy the borrowing conditions under the Credit Facility and cannot obtain a waiver from the Lenders, we would need to find other sources of financing. We would have to seek the permission of the Lenders under the Credit Facility in order to obtain many alternative sources of financing, and there can be no assurance that we would have access to other sources of financing on acceptable terms, or at all.

Iridium NEXT may not be completed on time, and the costs associated with it may be greater than expected.

We estimate the costs associated with the design, build and launch of Iridium NEXT and related ground infrastructure upgrades through 2017 will be approximately \$3 billion, although our actual costs could substantially exceed this estimate. We may not complete Iridium NEXT and related ground infrastructure on time, on budget or at all. The design, manufacture and launch of satellite systems are highly complex and historically have been subject to delays and cost overruns. Development of Iridium NEXT may suffer from additional delays, interruptions or increased costs due to many factors, some of which may be beyond our control, including:

- lower than anticipated internally generated cash flows, including from Aireon;
- the failure to maintain our ability to make draws under the Credit Facility, including by reason of our failure to satisfy any ongoing financial or other condition to making draws;
- the failure of the holders of our stock purchase warrants to exercise the warrants;
- operating and other requirements imposed by the Lenders under the Credit Facility;
- engineering or manufacturing performance falling below expected levels of output or efficiency;
- interference between any hosted payload and our network;
- complex integration of our ground segment with the Iridium NEXT satellites and the transition from our current constellation;
- denial or delays in receipt of regulatory approvals or non-compliance with conditions imposed by regulatory authorities;
- the breakdown or failure of equipment or systems;
- non-performance by third-party contractors, including the prime system contractor;
- the inability to license necessary technology on commercially reasonable terms or at all;

- use of a new or unproven launch vehicle or the failure of the launch services provider to sustain its business;
- launch delays or failures or in-orbit satellite failures once launched or the decision to manufacture additional replacement satellites for future launches;
- labor disputes or disruptions in labor productivity or the unavailability of skilled labor;
- increases in the costs of materials;
- changes in project scope;
- additional requirements imposed by changes in laws; or
- severe weather or catastrophic events such as fires, earthquakes, storms or explosions.

In addition, there can be no assurance the ground infrastructure needed to complete Iridium NEXT will be completed on-time, on budget or at all. If the design, manufacture and deployment of Iridium NEXT costs more or takes longer than we anticipate, our ability to continue to develop Iridium NEXT and related ground infrastructure could be compromised.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.
