There is no individual limit under the 2008 Consultants Plan. No options may be granted under the 2008 Option Plans after July 21, 2018.

On January 17, 2003 the Company adopted the Share Option Plan 2003 (the “2003 Share Option Plan”) pursuant to which the Compensation and Organization Committee of the Board could grant options to officers and other employees of the Company or its subsidiaries for the purchase of ordinary shares. An aggregate of 6.0 million ordinary shares were reserved under the 2003 Share Option Plan; and, in no event could the number of ordinary shares issued pursuant to options awarded under this plan exceed 10% of the outstanding shares, as defined in the 2003 Share Option Plan, at the time of the grant, unless the Board expressly determined otherwise. Further, the maximum number of ordinary shares with respect to which options could be granted under the 2003 Share Option Plan during any calendar year to any employee was 400,000 ordinary shares. The 2003 Share Option Plan expired on January 17, 2013. No new options may be granted under this plan.

Share option awards are granted with an exercise price equal to the market price of the Company’s shares at date of grant. Share options typically vest over a period of five years from date of grant and expire eight years from date of grant. The maximum contractual term of options outstanding at March 31, 2013 is eight years.

The following table summarizes option activity for the three months ended March 31, 2013:

Fair value of Stock Options Assumptions

The weighted average fair value of options granted during the periods ended March 31, 2013 and March 31, 2012 was calculated using the Black-Scholes option pricing model. The weighted average fair values and assumptions used were as follows:

	Three Months Ended	
	March 31, 2013	March 31, 2012
Weighted average fair value	\$11.76	\$8.20
Assumptions:		
Expected volatility	42 %	45 %
Dividend yield	0 %	0 %
Risk-free interest rate	0.76 %	0.86 %
Expected life	5 years	5 years

Expected volatility is based on the historical volatility of our common stock over a period equal to the expected term of the options; the expected life represents the weighted average period of time that options granted are expected to be outstanding given consideration to vesting schedules and our historical experience of past vesting and termination patterns. The risk-free rate is based on the U.S. government zero-coupon bonds yield curve in effect at time of the grant for periods corresponding with the expected life of the option.

Restricted Share Units

On July 21, 2008 the Company adopted the 2008 Employees Restricted Share Unit Plan (the “2008 RSU Plan”) pursuant to which the Compensation and Organization Committee of the Company’s Board of Directors may select any employee, or any director holding a salaried office or employment with the Company, or a Subsidiary to receive an award under the plan. An aggregate of 1.0 million ordinary shares have been reserved for issuance under the 2008 RSU Plan.

On April 23, 2013 the Company adopted the 2013 Employees Restricted Share Unit Plan (the “2013 RSU Plan”) pursuant to which the Compensation and Organization Committee of the Company’s Board of Directors may select any employee, or any director holding a salaried office or employment with the Company, or a Subsidiary to receive an award under the plan. An aggregate of 1.6 million ordinary shares have been reserved for issuance under the 2013 RSU Plan.

The Company has awarded RSU’s to certain key executives of the Group. The following table summarizes RSU activity for the three months ended March 31, 2013:

	RSU Outstanding Number of Shares	Weighted Average Fair Value	Weighted Average Remaining Contractual Life

Ordinary shares issued	-	-	
Forfeited	-	-	
Outstanding at March 31, 2013	514,450	\$20.66	1.76

The fair value of RSU’s vested for the three months ended March 31, 2013 totalled \$0.0 million (2012: \$0.0 million).

Non-cash stock compensation expense

Non-cash stock compensation expense for the three months ended March 31, 2013 has been allocated as follows:

	(In thousands)	
Direct costs	\$1,319	\$1,340
Selling, general and administrative	1,075	1,091

8. Business Segment Information

The Company determines and presents operating segments based on the information that is internally provided to the Chief Executive Officer and Chief Financial Officer, who together are considered the Company's chief operating decision maker, in accordance with FASB ASC 280-10 Disclosures about Segments of an Enterprises and Related Information.

The Company is a contract research organization ("CRO"), providing outsourced development services on a global basis to the pharmaceutical, biotechnology and medical device industries. It specializes in the strategic development, management and analysis of programs that support all stages of the clinical development process - from compound selection to Phase I-IV clinical studies. The Company earns revenues by providing a number of different services to its customers. These services, which are integral elements of the clinical development process, include clinical trials management, biometric activities, consulting, imaging, contract staffing, informatics and laboratory services. The Company has the expertise and capability to conduct clinical trials in most major therapeutic areas on a global basis and has the operational flexibility to provide development services on a stand-alone basis or as part of an integrated "full service" solution. The Company has expanded predominately through organic growth, together with a number of strategic acquisitions to enhance its expertise and capabilities in certain areas of the clinical development process.

Historically, the Group organized, operated and assessed its business in two segments, the clinical research segment and the central laboratory segment. In 2013 the Group have consolidated and reclassified the results of the former central laboratory segment into the clinical research segment as the central laboratory segment does not reach the thresholds of net revenue, income from operations and total assets as a requirement for being reported as a separate segment. Management have determined that its clinical research and central laboratory businesses operate in the same clinical research market, have a similar customer profile, are subject to the same regulatory environment, support the development of new clinical therapies and are so economically similar, reporting their results on an aggregated basis would be more useful to users of the Company's financial statements.

The Company's areas of operation outside of Ireland include the United States, United Kingdom, France, Germany, Italy, Spain, The Netherlands, Sweden, Belgium, Poland, Czech Republic, Lithuania, Latvia, Russia, Ukraine, Hungary, Israel, Romania, Canada, Mexico, Brazil, Colombia, Argentina, Chile, Peru, India, China, South Korea, Japan, Thailand, Taiwan, Singapore, The Philippines, Australia, New Zealand, and South Africa.

Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and accompanying notes included elsewhere herein and the Consolidated Financial Statements and related notes thereto included in our Form 20-F for the year ended December 31, 2012. The Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States.

Overview

We are a contract research organization ("CRO"), providing outsourced development services on a global basis to the pharmaceutical, biotechnology and medical device industries. We specialize in the strategic development, management and analysis of programs that support all stages of the clinical development process - from compound selection to Phase I-IV clinical studies. Our vision is to be the Global CRO partner of choice for the Biopharma industry by delivering best in class information, solutions and performance in clinical and outcomes research.

We believe that we are one of a select group of CRO's with the expertise and capability to conduct clinical trials in most major therapeutic areas on a global basis and have the operational flexibility to provide development services on a stand-alone basis or as part of an integrated "full service" solution. At March 31, 2013, we had approximately 10,200 employees, in 79 locations in 37 countries. During the three months ended March 31, 2013 we derived approximately 42.8%, 46.1% and 11.1% of our net revenue in the United States, Europe and Rest of World, respectively.

Revenue consists primarily of fees earned under contracts with third-party clients. In most cases, a portion of the contract fee is paid at the time the study or trial is started, with the balance of the contract fee generally payable in installments over the study or trial duration, based on the achievement of certain performance targets or "milestones". Revenue from contracts is recognized on a proportional performance method based on the relationship between time incurred and the total estimated duration of the trial or on a fee-for-service basis according to the particular circumstances of the contract. As is customary in the CRO industry, we contract with third party investigators in connection with clinical trials. All investigator fees and certain other costs, where reimbursed by clients, are, in accordance with industry practice, deducted from gross revenue to arrive at net revenue. As these costs vary from contract to contract, we view net revenue as our primary measure of revenue growth.

As the nature of our business involves the management of projects having a typical duration of one to four years, the commencement or completion of projects in a fiscal year can have a material impact on revenues earned with the relevant clients in such years. In addition, as we typically work with some, but not all, divisions of a client, fluctuations in the number and status of available projects within such divisions can also have a material impact on revenues earned from such clients from year to year.

Termination or delay in the performance of an individual contract may occur for various reasons, including, but not limited to, unexpected or undesired results, production problems resulting in shortages of the drug, adverse patient reactions to the drug, the client's decision to de-emphasize a particular trial or inadequate patient enrolment or investigator recruitment. In the event of termination the Company is usually entitled to all sums owed for work performed through the notice of termination and certain costs associated with the termination of the study. In addition, contracts generally contain provisions for renegotiation in the event of changes in the scope, nature, duration, or volume of services of the contract. The Company's results of operations and cash flows are therefore not materially impacted by project cancellations or delays.

Our backlog consists of potential net revenue yet to be earned from projects awarded by clients. At March 31, 2013 we had a backlog of approximately \$2.8 billion, compared with approximately \$2.8 billion at December 31, 2012. We believe that our backlog as of any date is not necessarily a meaningful predictor of future results, due to the potential for cancellation or delay of the projects underlying the backlog, and no assurances can be given on the extent to which we will be able to realize this backlog as net revenue.

Although we are domiciled in Ireland, we report our results in U.S. dollars. As a consequence the results of our non-U.S. based operations, when translated into U.S. dollars, could be materially affected by fluctuations in exchange rates between the U.S. dollar and the currencies of those operations.

In addition to translation exposures, we are also subject to transaction exposures because the currency in which contracts are priced can be different from the currencies in which costs relating to those contracts are incurred. Our operations in the United States are not materially exposed to such currency differences as the majority of our revenues and costs are in U.S. dollars. However, outside the United States the multinational nature of our activities means that contracts are usually priced in a single currency, most often U.S. dollars or Euros, while costs arise in a number of currencies, depending, among other things, on which of our offices provide staff for the contract and the location of investigator sites. Although many such contracts benefit from some degree of natural hedging, due to the matching of contract revenues and costs in the same currency, where costs are incurred in currencies other than those in which contracts are priced, fluctuations in the relative value of those currencies could have a material effect on our results of operations. We regularly review our currency exposures and usually negotiate currency fluctuation clauses in our contracts which allow for price negotiation if changes in the relative value of those currencies exceed predetermined tolerances.

As we conduct operations on a global basis, our effective tax rate has depended and will depend on the geographic distribution of our revenue and earnings among locations with varying tax rates. Our results therefore may be affected by changes in the tax rates of the various jurisdictions. In particular, as the geographic mix of our results of operations among various tax jurisdictions changes, our effective tax rate may vary significantly from period to period.

Results of Operations

Three Months Ended March 31, 2013 compared with Three Months Ended March 31, 2012

The following table sets forth for the periods indicated certain financial data as a percentage of net revenue and the percentage change in these items compared to the prior comparable period. The trends illustrated in the following table may not be indicative of future results.

	Three Months Ended				2013	
	March 31, 2013	March 31, 2012	Percentage of Net Revenue		to 2012 Percentage Increase	
Net revenue	100.0	% 100.0	%	25.5	%	
Costs and expenses:						
Direct costs	63.9	% 64.3	%	24.7	%	
Selling, general and administrative	23.8	% 26.8	%	11.9	%	
Depreciation and amortization	3.6	% 4.3	%	6.1	%	
Income from operations (excluding restructuring and other items)	8.7	% 4.6	%	133.6	%	
Restructuring and other items	1.4	% -		100	%	
Income from operations (including restructuring and other items)	7.3	% 4.6	%	96.0	%	

Net revenue for the period increased by \$64.5 million, or 25.5%, from \$252.3 million for the three months ended March 31, 2012 to \$316.8 million for the three months ended March 31, 2013. Net revenue derived from the acquisitions of Cross Country Healthcare Inc. amounted to \$6.7 million for the three months ended March 31, 2013. For the three months ended March 31, 2013 we derived approximately 42.8%, 46.1% and 11.1% of our net revenue in the United States, Europe and Rest of World, respectively.

Net revenue in Ireland increased from \$29.0 million for the three months ended March 31, 2012 to \$61.0 million for the three months ended March 31, 2013. Net revenue in Ireland is principally a function of the Company's global transfer pricing model. Significant investment in personnel and related infrastructure in the prior period, to support new strategic partnerships and the expansion into new territories, resulted in an increased proportion of the Company's net revenue being used to support other Group entities and a corresponding reduction in net revenue in Ireland. Increased revenue flows in the current period, driven by this upfront investment, has led to an increase in net revenue in Ireland in the current period.

Direct costs for the period increased by \$40.1 million, or 24.7%, from \$162.3 million for the three months ended March 31, 2012 to \$202.4 million for the three months ended March 31, 2013. Direct costs consist primarily of compensation, associated fringe benefits and share based compensation expense for project-related employees and other direct project driven costs. The increase in direct costs during the period arose from an increase in personnel related expenditure of \$37.5 million and an increase in other direct project related costs of \$2.6 million. As a percentage of net revenue, direct costs have decreased from 64.3% for the three months ended March 31, 2012 to 63.9% for the three months ended March 31, 2013.

Selling, general and administrative expenses for the period increased by \$8.1 million, or 11.9%, from \$67.5 million for the three months ended March 31, 2012 to \$75.6 million for the three months ended March 31, 2013. Selling, general and administrative expenses comprise primarily of compensation, related fringe benefits and share based compensation expense for non-project-related employees, recruitment expenditure, professional service costs, advertising costs and all costs related to facilities and information systems. The increase in selling, general and administration expenses for the period arose primarily from an increase in personnel related expenditure of \$6.6 million, an increase in facilities and related costs expenditure of \$0.9 million and an increase in selling, general and administrative expenses of \$0.6 million. As a percentage of net revenue, selling, general and administrative expenses, decreased from 26.8% for the three months ended March 31, 2012 to 23.8% for the three months ended March 31, 2013.

Depreciation expense for the period increased by \$0.9 million, or 10.2%, from \$8.8 million for the three months ended March 31, 2012 to \$9.7 million for the three months ended March 31, 2013 and principally arises from an investment in facilities, information systems and equipment to support the Company's growth. As a percentage of net revenue, depreciation expense decreased from 3.5% of net revenues for the three months ended March 31, 2012 to 3.1% for the three months ended March 31, 2013. Amortization expense for the period decreased by \$0.2 million, or 10.0%, from \$2.0 million for the three months ended March 31, 2012 to \$1.8 million for the three months ended March 31, 2013. Amortization expense represents the amortization of intangible assets acquired on business combinations. The increase in the amortization expense in the current period is primarily a result of intangible assets acquired from the acquisitions of BeijingWits Medical and PriceSpective during the year ended December 31, 2012 and the acquisition of the clinical trial services division of Cross Country Healthcare Inc. during the three months ended March 31, 2013. As a percentage of net revenue, amortization expense decreased from 0.8% of net revenues for the three months ended March 31, 2012 to 0.6% of net revenues for the three months ended March 31, 2013.

Restructuring charges of \$4.4 million were recognized during three months ended March 31, 2013 under a restructuring plan adopted following a review by the Company of its operations. Under this restructuring plan the Company announced the closure of its Phase I facility in Omaha, Nebraska. This followed the expansion of the Company's Phase I facility in San Antonio, Texas and the consolidation of the Company's US Phase I capabilities in this location. The restructuring plan also included resource rationalizations in certain areas of the business to improve resource utilization. The restructuring charge recognized included \$0.5 million in respect of lease termination costs associated with the Omaha facility and \$3.9 million in respect of resource rationalizations. (see note 4 Restructuring and other items for further information).

As a result of the above, income from operations for the three months increased by \$11.3 million, or 96.0%, from \$11.7 million for the three months ended March 31, 2012 to \$23.0 million for the three months ended March 31, 2013 (\$27.4 million, or 133.6% excluding restructuring charges). As a percentage of net revenue, income from operations increased from 4.6% of net revenues for the three months ended March 31, 2012 to 7.3% of net revenues for the three months ended March 31, 2013 (8.7% excluding restructuring charges).

Income from operations in Ireland increased from a loss of \$6.3 million for the three months ended March 31, 2012, to a profit of \$12.0 million (\$12.3 million excluding restructuring charges) for the three months ended March 31, 2013. Income/ (losses) from operations in Ireland are impacted by the Group's global transfer pricing model. A significant upfront investment in personnel and related infrastructure in the prior period led to a greater proportion of the Group's revenue being used to support other Group entities and a corresponding increase in losses from operations in Ireland. Increased revenue flows in the current period, arising from this upfront investment in personnel and related infrastructure, has resulted in profits from operations in the current quarter.

Interest expense for the period was 0.4 million for the three months ended March 31, 2012 and the three months ended March 31, 2013. Interest expense for the three months ended March 31, 2013 includes \$0.1 million in respect of non-cash finance charges relating to acquisition contingent consideration. Interest income for the three months ended March 31, 2013 decreased from \$0.4 million for the three months ended March 31, 2012 to \$0.2 million for the three months ended March 31, 2013.

Provision for income taxes for the period increased from \$2.7 million for the three months ended March 31, 2012 to \$3.8 million (\$5.0 million excluding the impact of restructuring charges) for the three months ended March 31, 2013. The Company's effective tax rate for the three months ended March 31, 2013 was 16.5% (18.4% excluding the impact of restructuring charges) compared with 23.3% for the three months ended March 31, 2012. The Company's effective tax rate is principally a function of the distribution of pre-tax profits amongst the territories in which it operates.

Liquidity and Capital Resources

The CRO industry is generally not capital intensive. The Group's principal operating cash needs are payment of salaries, office rents, travel expenditures and payments to investigators. Investing activities primarily reflect capital expenditures for facilities and information systems enhancements, the purchase and sale of short term investments and acquisitions.

Our clinical research and development contracts are generally fixed price with some variable components and range in duration from a few weeks to several years. Revenue from contracts is generally recognized as income on the basis of the relationship between time incurred and the total estimated contract duration or on a fee-for-service basis. The cash flow from contracts typically consists of a small down payment at the time the contract is entered into, with the balance paid in installments over the contract's duration, in some cases on the achievement of certain milestones. Accordingly, cash receipts do not correspond to costs incurred and revenue recognized on contracts.

The Company's cash and short term investment balances at March 31, 2013 amounted to \$200.5 million compared with cash and short term investment balances of \$190.2 million at December 31, 2012. The Company's cash and short term investment balances at March 31, 2013 comprised cash and cash equivalents \$137.4 million, restricted cash \$3.75 million and short-term investments \$59.4 million. During the three months ended March 31, 2013 the Company completed the acquisition of the clinical trial services division of Cross Country Healthcare Inc. At March 31, 2013 the Company held \$3.75 million in restricted cash in relation to additional amounts potentially payable for the acquisition. The Company's cash and short-term investment balances at December 31, 2012 comprised cash and cash equivalents \$114.0 million and short-term investments \$76.2 million.

On July 20, 2011 the Company entered into a three year committed multi currency revolving credit facility for \$150.0 million with Citibank, JP Morgan, Ulster Bank, Deutsche Bank and Barclays Bank. Each bank subject to the agreement has committed \$30 million to the facility, with equal terms and conditions in place with all institutions. The facility bears interest at LIBOR plus a margin and includes certain composite guarantees, indemnities and pledges in favor of the banks. Amounts available to the Group under the facility amounted to \$150.0 million at March 31, 2013 compared with \$150.0 million at December 31, 2012.

Net cash provided by operating activities was \$69.4 million for the three months ended March 31, 2013 compared with cash provided by operating activities of \$60.6 million for the three months ended March 31, 2012. The most significant influence on our operating cash flow is revenue outstanding, which comprises accounts receivable and unbilled revenue, less payments on account. The dollar value of these balances and the related number of days revenue outstanding (i.e. revenue outstanding as a percentage of revenue for the period, multiplied by the number of days in the period) can vary over a study or trial duration. Contract fees are generally payable in installments based on

the achievement of certain performance targets or “milestones” (e.g. target patient enrollment rates, clinical testing sites initiated or case report forms completed), such milestones being specific to the terms of each individual contract, while revenues on contracts are recognized as contractual obligations are performed. Days revenue outstanding can vary therefore due to, amongst others, the scheduling of contractual milestones over a study or trial duration, the achievement of a particular milestone during the period or the timing of cash receipts from customers. A decrease in the number of days revenue outstanding during a period will result in cash inflows to the Company while an increase in days revenue outstanding will lead to cash outflows. The number of days revenue outstanding at March 31, 2013 was 33 days compared to 40 days at December 31, 2012. The number of days revenue outstanding at March 31, 2012 was 37 days compared to 47 days at December 31, 2011.

Net cash used in investing activities was \$47.2 million for the three months ended March 31, 2013 compared to net cash used in investing activities of \$73.9 million for the three months ended March 31, 2012. Net cash used in the three months ended March 31, 2013 arose principally from cash paid for acquisitions, capital expenditures and the purchase of short-term investments.
