Item 8.01. Other Events

LAMPERD LESS LETHAL ANNOUNCES IT HAS RESEARCHED, ENGINEERED, AND DESIGNED A STREAMING VIDEO AND AUDIO SURVEILLANCE CAMERA THAT IS READY NOW FOR PRODUCTION.

Lamperd Less Lethal Inc. is pleased to introduce the MSS100 Mobile Surveillance System, our newest production version of our streaming video camera surveillance system that can send live feed to any location for Police, Military, Security, and Ambulance services. This small, unique and durable device can continuously record for up to 8 hours; it also has an automated night vision sensor, laser positioning and can also snap single photos. Our device is housed in a special customized material for high impact, vibration, fire resistant, and waterproof protection and has a built-in 32GB of memory that houses the secure chain of evidence that is almost impossible to be tampered with. GPS will provide a time stamping capability to ensure the accuracy of date and time respectively to every second the device is recording or taking a photo.

Lamperd real time remote cameras allow for real time information to flow to decision makers for on the spot information and intelligence. The Lamperd camera system can be mounted on the front and the back of the vest as well as mounted on weapon systems.

The encrypted signal is wireless and records directly to the device the watcher is using. This feed stream can link to any mobile device allowing the viewer instant access to make command decisions. Each camera viewed (worn) shows as its own screen which allows for a full team deployment, 360 degree view of the situation.

Lamperd systems will allow decision makers to determine what resources are needed to deal effectively with any given situation, including low light and no light situations. Any allegations of Officer misconduct can be addressed immediately from the command post.

The Lamperd system is perfect for developing training and testing scenarios, enabling training Officers to adjust training protocols on the spot creating a more effective and safe training program. This training footage will also allow for liability mitigation by proving how Officers are trained.
