SEMI-ANNUAL REPORT

Dear Shareholder

Over the past 12 months, we have seen a sluggish, stimulus-driven economic recovery at long last gain real traction, accelerate, and transition into a consumption-driven expansion. For the most part, 2010 was plagued with widely fluctuating economic data, but as the year drew to a close, it became clear that cyclical stimulus had beaten out structural problems as economic data releases generally became more positive and financial markets showed signs of continuing improvement. Although the sovereign debt crises and emerging market inflation that troubled the global economy in 2010 remain a challenge, overall investor sentiment considerably improved. Near the end of the period, geopolitical tensions across the Middle East North Africa (MENA) region along with rising oil prices introduced new cause for concern about the future of the global economy. As of this writing, economic news remains fairly positive although we face additional uncertainties related to the aftermath of the devastating earthquake in Japan, with particular focus on the damage to nuclear power plants.

In the United States, strength from the corporate sector and increasing consumer spending have been key drivers of economic growth, while the housing and labor markets have been the heaviest burdens. While housing has yet to show any meaningful sign of improvement, labor statistics have delivered a mixed bag month after month, but became increasingly encouraging toward the end of the period when the unemployment rate fell to its lowest level since April 2009.

Global equity markets experienced uneven growth and high volatility over the course of 2010, but ended the year strong. Following a strong start to 2011, stocks lost their momentum on the back of geopolitical events in the MENA region and a sharp rise in oil prices. Overall, equities posted strong returns for the 12-month period. US stocks outpaced most international markets and small cap stocks outperformed large caps as investors moved into higher-risk assets.

Fixed income markets saw yields trend lower over most of 2010, until the fourth quarter brought an abrupt reversal in sentiment and risk tolerance that drove yields sharply upward (pushing bond prices down) through year end. Improving economic data continued to pressure fixed income yields in 2011; however, escalating geopolitical risks have acted as a counterweight, restoring relative stability to yield movements. Nevertheless, the yield curve remained steep and higher-risk sectors outperformed the fixed income market.

The tax-exempt municipal market enjoyed a powerful rally during the period of low interest rates in 2010; however, when the yield trend reversed, the market was dealt an additional blow as it became evident that the Build America Bond program would expire at year end. In addition, negative headlines regarding fiscal challenges faced by state and local governments damaged investor confidence and further heightened volatility in the municipal market. Tax-exempt mutual funds experienced heavy outflows, resulting in wider quality spreads and further downward pressure on municipal bond prices. These headwinds began to abate as the period came to a close and municipals finally posted gains in February, following a five-month run of negative performance.

Cash investments, as represented by the 3-month Treasury bill, returned only a fraction over 0% for the 12-month period as short-term interest rates remained low. Yields on money market securities remain near all-time lows.

Total returns as of February 28, 2011	6-month	12-month
US large cap equities (S&P 500 Index)	27.73%	22.57%
US small cap equities (Russell 2000 Index)	37.55	32.60
International equities (MSCI Europe, Australasia, Far East Index)	23.77	20.00
3-month Treasury bill (BofA Merrill Lynch 3-Month Treasury Bill Index)	0.07	0.14
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index)	(6.04)	4.76
US investment grade bonds (Barclays Capital US Aggregate Bond Index)	(0.83)	4.93
Tax-exempt municipal bonds (Barclays Capital Municipal Bond Index)	(3.51)	1.72
US high yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	10.05	17.34

While no one can peer into a crystal ball and eliminate the uncertainties presented by the economic landscape and financial markets, BlackRock can offer investors the next best thing: partnership with the world s largest asset management firm and a unique global perspective that allows us to identify trends early and capitalize on market opportunities. For additional market perspective and investment insight, visit **www.blackrock.com/shareholdermagazine**, where you ll find the most recent issue of our award-winning *Shareholder* magazine, as well as its quarterly companion newsletter, *Shareholder Perspectives*. As always, we thank you for entrusting BlackRock with your investments, and we look forward to your continued partnership in the months and years ahead.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

THIS PAGE NOT PART OF YOUR FUND REPORT

BlackRock Core Bond Trust

Investment Objective

BlackRock Core Bond Trust s (BHK) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned (8.46)% based on market price and (1.21)% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of (0.83)% based on market price and 2.73% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The largest individual factor impacting the Trust s performance relative to its Lipper category competitors, many of which carry a lower average credit quality and/or a higher allocation to spread assets (those driven by movements in credit risk), is the Trust s high-quality bias. This bias hurt performance for the period as spread sectors and lower-quality risk assets generally outperformed US Treasuries and government-related assets. In addition, the Trust carried a higher duration (sensitivity to interest rates) relative to its Lipper category average, which detracted from relative performance as interest rates rose significantly in the fourth quarter of 2010.

Contributing positively to performance on an absolute basis was the Trust s exposure to non-government spread sectors, such as investment grade credit, non-agency residential mortgage-backed securities (MBS) and asset-backed securities (ABS). Also contributing positively were allocations to high yield corporate credit and commercial mortgage-backed securities (CMBS), which were among the best performing fixed income sectors during the period.

The Trust engaged in financial futures contracts and interest rate options (swaptions) for purposes of hedging and managing risks related to duration and yield curve positioning. As interest rates rose during the period, the Trust s interest rate options (swaptions) had a positive impact on performance while financial futures contracts detracted.

Describe recent portfolio activity.

During the period, the Trust gradually increased its use of leverage and added exposure to corporate credit and high-quality securitized debt, including CMBS and ABS. In addition, the Trust reduced its duration during the period.

Describe portfolio positioning at period end.

At period end, the Trust maintained a diversified exposure to non-government spread sectors, including investment grade credit, high yield corporate credit, CMBS, ABS and non-agency residential MBS. The Trust also held allocations to government-related sectors such US Treasuries, agency debt and agency MBS.

SEMI-ANNUAL REPORT

BlackRock Corporate High Yield Fund V, Inc.

Investment Objective

BlackRock Corporate High Yield Fund V, Inc. s (HYV) (the Trust) investment objective is to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (BB or lower by S&P or Ba or lower by Moody s) or in unrated securities considered by the Trust s investment adviser to be of comparable quality. The Trust also seeks to provide shareholders with capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield debt instruments, including high yield bonds (commonly referred to as junk bonds) and high yield corporate loans which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned 8.59% based on market price and 14.21% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 9.98% based on market price and 12.87% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

High yield bonds outperformed the broader fixed income market as risk assets rallied during the period. Lower-quality high yield bonds outperformed higher-quality issues. The bank loan sector also posted strong returns, but underperformed high yield. The largest contributor to the Trust s performance was individual security selection, particularly among lower-quality credits and special situations in the automotive sector, including manufacturers of automobiles, auto parts and components. Within the Trust s small allocation to common stocks, its holdings in Delphi boosted returns. The Trust s limited exposure to high-quality, non-investment grade proved beneficial, as did its large allocation to lower-quality credits later in the period.

During the period, the Trust maintained leverage at an average amount between 20% and 22% of its total managed assets, which detracted from relative performance versus competitors that maintained higher levels of leverage, as would be expected when markets are advancing. During most of the period, the Trust held a significant position in mid-tier speculative grade names, which detracted modestly as they underperformed their lower-quality counterparts. Also having a negative impact was the Trust s exposure to floating rate loan interests; however, the Trust continues to hold a number of loans issued by speculative companies where we believe the loans are the most attractive instrument in the company s capital structure.

Describe recent portfolio activity.

Over the period, the Trust shifted its overall positioning from a more conservative stance to that which is more consistent with a gradually improving economy. The Trust reduced its exposure to the automotive sector and increased exposure to lower-quality credits as well as sectors where companies are positioned to benefit from rising commodity prices.

Describe portfolio positioning at period end.

At period end, the Trust held 80% of its total portfolio in corporate bonds, 12% in floating rate loan interests, 6% in common stocks and 2% in preferred stocks. Cash positions were negligible for most of the period. The Trust ended the period with leverage at approximately

Edgar Filing: BLACKROCK INCOME TRUST INC - Form N-CSRS

24% of its total managed assets.

BlackRock High Income Shares

Investment Objective

BlackRock High Income Shares (HIS) (the Trust) primary investment objective is to provide the highest current income attainable consistent with reasonable risk as determined by the Trust s investment adviser, through investment in a professionally managed, diversified portfolio of high yield, high risk fixed income securities (commonly referred to as junk bonds). The Trust s secondary objective is to provide capital appreciation, but only when consistent with its primary objective. The Trust seeks to achieve its objectives by investing primarily in high yield, high risk debt instruments rated in the medium to lower categories by nationally recognized rating services (BBB or lower by S&P or Baa or lower by Moody s) or non-rated securities, which, in the investment adviser s opinion, are of comparable quality. Under normal market conditions, the average maturity of the Trust s portfolio is between eight and twelve years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned 9.43% based on market price and 12.65% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 9.98% based on market price and 12.87% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

High yield bonds outperformed the broader fixed income market as risk assets rallied during the period. Lower-quality high yield bonds outperformed higher-quality issues. The bank loan sector also posted strong returns, but underperformed high yield. Given the advancing market, the Trust s use of leverage had a positive impact on returns on an absolute basis. However, the Trust maintains a lower level of leverage (at an average amount between 15% and 18% of its total managed assets) than the average level maintained by its Lipper category competitors, which detracted from performance on a relative basis.

During most of the period, the Trust held a significant position in mid-tier speculative grade names, which detracted modestly as they underperformed their lower-quality counterparts. Also having a negative impact was the Trust s exposure to floating rate loan interests; however, the Trust continues to hold a number of loans issued by speculative companies where we believe the loans are the most attractive instrument in the company s capital structure.

Contributing positively to performance was individual security selection, particularly among lower-quality credits and special situations in the automotive sector, including manufacturers of automobiles, auto parts and components. Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned 9.00% based on market price and 12.85% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 9.98% based on market price and 12.87% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

High yield bonds outperformed the broader fixed income market as risk assets rallied during the period. Lower-quality high yield bonds outperformed higher-quality issues. The bank loan sector also posted strong returns, but underperformed high yield. Given the advancing market, the Trust s use of leverage had a positive impact on returns on an absolute basis. However, the Trust maintains a lower level of leverage (at an average amount between 15% and 18% of its total managed assets) than the average level maintained by its Lipper category competitors, which detracted from performance on a relative basis.

During most of the period, the Trust held a significant position in mid-tier speculative grade names, which detracted modestly as they underperformed their lower-quality counterparts. Also having a negative impact was the Trust s exposure to floating rate loan interests; however, the Trust continues to hold a number of loans issued by speculative companies where we believe the loans are the most attractive instrument in the company s capital structure.

Contributing positively to performance was individual security selection, particularly among lower-quality credits and special situations in the automotive sector, including manufacturers of automobiles, auto parts and components. Within the Trust s small allocation to common stocks, its holdings in Delphi boosted returns. The Trust s limited exposure to high-quality, non-investment grade proved beneficial, as did its large allocation to lower-quality credits later in the period.

Describe recent portfolio activity.

Over the period, the Trust shifted its overall positioning from a more conservative stance to that which is more consistent with a gradually improving economy. The Trust reduced its exposure to the automotive sector and increased exposure to lower-quality credits as well as sectors where companies are positioned to benefit from rising commodity prices.

Describe portfolio positioning at period end.

At period end, the Trust held 85% of its total portfolio in corporate bonds, 12% in floating rate loan interests and 3% in stocks. Cash positions were negligible for most of the period. The Trust ended the period with leverage at approximately 18% of its total managed assets.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

BlackRock Income Opportunity Trust, Inc.

Investment Objective

BlackRock Income Opportunity Trust, Inc. s (BNA) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned (6.69)% based on market price and (1.64)% based on NAV. For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of (0.83)% based on market price and 2.73% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The largest individual factor impacting performance relative to its Lipper category competitors, many of which carry a lower average credit quality and/or a higher allocation to spread assets (those driven by movements in credit risk), is the Trust s high-quality bias. This bias hurt performance for the period as spread sectors and lower-quality risk assets generally outperformed US Treasuries and government-related assets. In addition, the Trust carried a higher duration (sensitivity to interest rates) relative to its Lipper category average, which detracted from relative performance as interest rates rose significantly in the fourth quarter of 2010.

Contributing positively to performance on an absolute basis was the Trust s exposure to non-government spread sectors, such as investment grade credit, non-agency residential MBS and ABS. Also contributing positively were allocations to high yield corporate credit and CMBS, which were among the best performing fixed income sectors during the period.

The Trust engaged in financial futures contracts for purposes of hedging and managing risks related to duration and yield curve positioning. As interest rates rose during the period, the Trust s financial futures contracts had a negative impact on performance.

Describe recent portfolio activity.

During the period, the Trust gradually reduced its exposure to agency MBS, while it increased exposure to corporate credit and reduced the duration of its portfolio.

Describe portfolio positioning at period end.

At period end, the Trust maintained a diversified exposure to non-government spread sectors, including investment grade credit, high yield corporate credit, CMBS, ABS and non-agency residential MBS. The Trust also held allocations to government-related sectors such US Treasuries, agency debt and agency MBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

FEBRUARY 28, 2011

15

BlackRock Income Trust, Inc.

Investment Objective

BlackRock Income Trust, Inc. s (**BKT**) (the **Trust**) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the US government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. Securities issued or guaranteed by the US government or its agencies or instrumentalities are generally considered to be of the same or higher credit or quality as privately issued securities rated AAA or Aaa. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned 0.01% based on market price and 2.22% based on NAV. For the same period, the closed-end Lipper US Mortgage Funds category posted an average return of 1.37% based on market price and 6.30% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The largest individual factor impacting performance relative to its Lipper category competitors, many of which carry a lower average credit quality and/or a higher allocation to CMBS and non-agency residential MBS, is the Trust s high-quality bias. This bias hurt performance for the period as CMBS and non-agency residential MBS generally outperformed agency MBS.

Contributing positively to performance on an absolute basis was the Trust s exposure to CMBS and non-agency residential MBS. Security selection among agency MBS had a positive impact on performance, most notably with respect to positioning in agency interest-only (IO) mortgages.

The Trust engaged in financial futures contracts and interest rate swaps for purposes of hedging and managing risks related to duration and yield curve positioning. As interest rates rose during the period, the Trust s financial futures contracts and interest rate swaps had a positive impact on performance.

Describe recent portfolio activity.

During the period, the Trust gradually reduced exposure to CMBS and altered its agency IO mortgage exposure by moving from higher-coupon mortgages to lower-coupon mortgages.

Describe portfolio positioning at period end.

At period end, the Trust maintained its exposure to high-quality agency MBS with varying maturities and coupons and held allocations to non-agency residential MBS and CMBS.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

BlackRock Strategic Bond Trust

Investment Objective

BlackRock Strategic Bond Trust s (**BHD**) (the **Trust**) investment objective is to provide total return through high current income and capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in a diversified portfolio of fixed income securities including corporate bonds, US government and agency securities, mortgage-related and asset-backed securities and other types of fixed income securities. The Trust invests, under normal market conditions, a significant portion of its assets in corporate fixed income securities that are below investment grade quality, including high-risk, high yield bonds (commonly referred to as junk bonds) and other such securities, such as preferred stocks. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 28, 2011, the Trust returned 3.55% based on market price and 9.30% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 9.98% based on market price and 12.87% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

High yield bonds delivered strong performance as risk assets rallied during the period. The Trust s average allocation to high yield contributed to performance on an absolute basis, its average allocation to investment grade credit, which underperformed amid rising interest rates, hurt performance relative to its Lipper category competitors, which invest primarily in high yield bonds. The Trust also invests in floating rate loan interests (approximately 14% of the portfolio during the period), which detracted from relative performance as the bank loan sector underperformed high yield during the period.

The Trust maintained leverage at an average amount between 18% and 22% of its total managed assets, which detracted from relative performance versus competitors that maintained higher levels of leverage, as would be expected when markets are advancing.

Within the Trust s high yield segment, a large allocation to lower-quality credits benefited performance, as did security selection in that space.

Describe recent portfolio activity.

Over the period, the Trust shifted its overall positioning from a more conservative stance to that which is more consistent with a gradually improving economy. In particular, the Trust increased exposure to lower-quality credits and sectors that are more sensitive to commodity prices and economic conditions.

Describe portfolio positioning at period end.

At period end, the Trust held 83% of its total portfolio in corporate bonds and 12% in floating rate loan interests, with the remainder in US Treasury obligations and stocks. Cash positions were negligible for most of the period. The Trust ended the period with leverage at approximately 22% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011 19

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV. However, these objectives cannot be achieved in all interest rate environments.

The Trusts may utilize leverage by borrowing through a credit facility, participation in the TALF, or through entering into reverse repurchase agreements and treasury roll transactions. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Trusts had not used leverage.

To illustrate these concepts, assume a Trust s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Trust s long-term investments, and therefore the shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays interest expense on the higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts NAV positively or negatively in addition to the impact on Trust performance from leverage and borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Trusts and shareholders, but as described above, it also creates risks as short or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Trust s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust s net income will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust s ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, the Trusts are permitted to borrow through their credit facility, through participation in the TALF or entering into reverse repurchase agreements up to $33^{1}/_{3}\%$ of their total managed assets. As of February 28, 2011, the Trusts had outstanding leverage from borrowings as a percentage of their total managed assets as follows:

	Percent of Leverage
ВНК	29%
HYV HYT HIS	24%
НҮТ	23%
HIS	18%

BHY BNA	18%
BNA	30%
ВКТ	16%
BKT BHD	22%

Derivative Financial Instruments

The Trusts may invest in various derivative instruments, including financial futures contracts, swaps, options and foreign currency exchange contracts, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, foreign currency exchange rate, interest rate and/or other risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative instrument. The Trusts ability to use a derivative instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

BlackRock Core Bond Trust (BHK)

- (a) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) Non-income producing security.
- (d) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.
- (e) All or a portion of security has been pledged as collateral in connection with swaps.
- (f) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (g) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (h) Convertible security.
- (i) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (j) Security is perpetual in nature and has no stated maturity date.
- (k) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (1) All or a portion of security has been pledged as collateral in connection with open financial futures contracts.
- (m) Represents or includes a to-be-announced (TBA) transaction. Unsettled TBA transactions as of report date were as follows:

Counterparty	Value	Unrealized Appreciation (Depreciation)

(a) Pays a fixed interest rate and receives floating rate.

Pays floating rate and receives fixed rate. (b)

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

price quotations in active markets/exchanges for identical assets and liabilities Level 1

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust s investments and derivatives:

Valuation Inputs	Level 1	Level 2 Level 3			Level 3	Total

(a) Non-income producing security.

- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (d) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (e) Convertible security.
- (f) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (g) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	-	nrealized preciation
Banc of America NA	\$ 198,413	\$	2,278
Credit Suisse International	\$ 838,200	\$	11,002
Sterne Agee	\$ 81,400	\$	934

- (h) Issuer filed for bankruptcy and/or is in default of interest payments.
- (i) Variable rate security. Rate shown is as of report date.
- (j) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (k) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

41

BlackRock Corporate High Yield Fund V, Inc. (HYV)

(1) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, Net 2010 Activity				Income		
BlackRock Liquidity Funds, TempFund, Institutional Class	2,725,924	(1,017,212)	1,708,712	\$	2,318		

(m) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Financial futures contracts sold as of February 28, 2011 were as follows:

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivatives)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust s investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Common Stocks	\$ 22,010,893	\$ 692,258	\$ 1,069,675	\$ 23,772,826
Corporate Bonds		420,263,251	8,366,074	428,629,325
Floating Rate Loan Interests		48,867,310	15,445,435	64,312,745
Other Interests	157	10,484,987	21,747	10,506,891
Preferred Stocks	7,677,943	3,576,905	679,834	11,934,682
Warrants		70,991	277	71,268
Short-Term Securities	1,708,712			1,708,712
Unfunded Loan Commitments		1,563		1,563
Liabilities:				
Unfunded Loan Commitments			(38,321)	(38,321)
Total	\$ 31,397,705	\$ 483,957,265	\$ 25,544,721	\$ 540,899,691

Derivative Financial Instruments ¹

¹ Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are shown at the unrealized appreciation/ depreciation on the instrument and options are shown at value.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

43

BlackRock Corporate High Yield Fund V, Inc. (HYV)

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Stocks	Warrants	Unfunded Loan Commitments (Liabilities)	Total
Assets/Liabilities:								
Balance, as of August 31, 2010	\$ 1,056,339	\$ 7,015,576	\$ 21,875,386	\$ 16,367	\$ 679,708	\$ 49,708	\$ (70,023)	\$ 30,623,061
Accrued discounts/premiums		436,843	734,165					1,171,008
Net realized gain (loss)		15,033	49,238					64,271
Net change in unrealized								
appreciation/depreciation ²	13,336	(231,373)	6,129,124	5,380	126	21,554	31,702	5,969,849
Purchases		1,462,895	7,612,215			6		9,075,116
Sales		(166,539)	(14,590,337)					(14,756,876)
Transfers in ³			1,446,152					1,446,152
Transfers out ³		(166,361)	(7,810,508)			(70,991)		(8,047,860)
Balance as of February 28, 2011	\$ 1,069,675	\$ 8,366,074	\$ 15,445,435	\$ 21,747	\$ 679,834	\$ 277	\$ (38,321)	\$ 25,544,721

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in the unrealized appreciation/depreciation on the securities still held on February 28, 2011 was \$5,947,885.

³ The Trust s policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.

Aggregate cost	\$ 528,710,124
Gross unrealized appreciation Gross unrealized depreciation	\$ 41,588,921 (17,402,206)
Net unrealized appreciation	\$ 24,186,715

⁽a) Non-income producing security.

- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (d) Convertible security.
- (e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (f) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Ap	nrealized preciation preciation)
Banc of America NA	\$ 208,587	\$	3,587
Credit Suisse International	\$ 873,125	\$	11,460
Sterne Agee	\$ 86,488	\$	(212)

- (g) Variable rate security. Rate shown is as of report date.
- (h) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (i) Issuer filed for bankruptcy and/or is in default of interest payments.
- (j) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (k) Amount is less than \$1,000.
- (1) Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (m) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2010	Net Activity	Shares Held at February 28, 2011	I	ncome
	1,808,758	(583,675)	1,225,083	\$	2,129

BlackRock Liquidity Funds, TempFund, Institutional Class

(n) Represents the current yield as of report date.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

51

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

USD	2,734,695	EUR	1,997,000	Royal Bank of Scotland Plc	4/27/11		(19,089)			

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivatives and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2011 in determining the fair valuation of the Trust s investments and derivatives:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in				
Securities:				
Long-Term				
Investments:

Total	\$ (471,113) \$	(600,931)	\$ (1,072,044)

¹ Derivative financial instruments are swaps, financial futures contracts and foreign currency exchange contracts. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2011

53

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks] Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Stocks	Warrants	Unfunded Loan Commitments (Liabilities)	Total
Assets/Liabilities:								
Balance, as of August 31, 2010	\$ 712,707	\$ 4,851,224	\$ 20,602,850	\$ 6,747	\$ 1	\$ 271	\$ (36,123)	\$ 26,137,677
Accrued discounts/premiums		218,405	174,322					392,727
Net realized gain (loss)			215,718					215,718
Net change in unrealized								
appreciation/depreciation ²	83,133	11,795	1,066,366	(6,561)		(1)	16,419	1,171,151
Purchases		986,832	5,142,505			7		6,129,344
Sales	(89,275)		(11,187,604)					(11,276,879)
Transfers in ³		462,877	1,577,620	(163)				2,040,334
Transfers out ³	_	(179,050)	(4,384,427)					(4,563,477)
Balance as of February 28, 2011	\$ 706,565	\$ 6,352,083	\$ 13,207,350	\$ 23	\$ 1	\$ 277	\$ (19,704)	\$ 20,246,595

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in the unrealized appreciation/depreciation on the securities still held on February 28, 2011 was \$779,345.

³ The Trust s policy is to recognize transfers in and transfers out as of the end of the period of the event or the change in circumstances that caused the transfer.

See Notes to Financial Statements.
