PARTNER COMMUNICATIONS COMPANY LTD.
(Exact Name of Registrant as Specified in its Charter)

ISRAEL
(Jurisdiction of Incorporation or Organization)

8 AMAL STREET
AFEQ INDUSTRIAL PARK
ROSH-HA'AYIN 48103
ISRAEL

(Address of Principal Executive Offices)

Hadar Vismunski-Weinberg
ExecutiveOffices@partner.co.il

(Name, Telephone, E-mail and/or facsimile Number and Address of Company Contact Person)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
American Depositary Shares, each representing one ordinary share, nominal value NIS 0.01 per share	The NASDAQ Global Select Market
Ordinary Shares, nominal value NIS 0.01 per share*	The NASDAQ Global Select Market

* Not for trading, but only in connection with the registration of American Depositary Shares representing such ordinary shares, pursuant to the requirements of the Securities and Exchange Commission.

Securities Registered Pursuant to Section 12(g) of the Act:

NONE

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

NONE

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

ORDINARY SHARES OF NIS 0.01 EACH 168,243,913

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

YES NO

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act 1934.

YES NO

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days:

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board

Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the Registrant has elected to follow:

ITEM 17

ITEM 18

If this is an annual report, indicate by checkmark whether the Registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act).

YES

NO

INTRODUCTION

As used herein, references to “we,” “our,” “us,” the “Group,” “Partner” or the “Company” are references to Partner Communications Company Ltd. and its wholly-owned subsidiaries, Partner Future Communications 2000 Ltd., Partner Land-Line Communications Solutions LP, Partner Business Communications Solutions LP, Partner Communication Products 2016 LP, 012 Smile Telecom Ltd. (“012 Smile”) and 012 Smile's wholly-owned subsidiary, 012 Telecom Ltd., except as the context otherwise requires. Partner Future Communications 2000 Ltd. serves as the general partner and the Company serves as the limited partner of each of the limited partnerships.

Pursuant to a 15-year Network Sharing Agreement that the Company entered into with HOT Mobile Ltd. (“HOT Mobile”) in November 2013, the parties created a 50-50 limited partnership, P.H.I. Networks (2015) Limited Partnership (“PHI”). See “Item 4B.8 OUR NETWORK”.

In the context of cellular services, references to “our network” refer to Partner's cellular telecommunications network which includes our core network, as well as the shared radio access network with HOT Mobile which is operated by PHI and any other Company infrastructure which enables our cellular service.

In addition, references to our “financial statements” are to our consolidated financial statements, unless the context requires otherwise.

The Company currently provides telecommunications services in the following two segments: (1) cellular telecommunications services (“Cellular Services”) and (2) fixed-line communication services (“Fixed-Line Services”), which include: (a) Internet services including access to the internet through both fiber optics and wholesale broadband access; internet services provider (“ISP”) services; internet Value Added Services (“VAS”) such as cyber protection, anti-virus and anti-spam filtering; and fixed-line voice communication services provided through Voice Over Broadband (“VOB”); (b) Business solutions including SIP voice trunks and Network Termination Point Services (“NTP”) – under which the Group supplies, installs, operates and maintains endpoint network equipment and solutions, including providing and installing equipment and cabling, within a subscriber's place of business or premises, hosting services, transmission services, Primary Rate Interface (“PRI”) and other fixed-line communications solution services; (c) International Long Distance services (“ILD”): outgoing and incoming international telephony, hubbing, roaming and signaling and calling card services; and, as from 2017, (d) Television services over the Internet (“TV”). Sales of equipment include sales and leasing of telecommunications, audio visual and related devices including cellular handsets, phones, tablets, laptops, modems, data cards, domestic routers, servers, audio-visual devices and related peripherals, equipment and integration projects. Unless the context indicates otherwise, expressions such as “our business,” “Partner’s business” and “the Company’s business” or “industry” refer to both Cellular and Fixed-Line Services.

In this document, references to “\$,” “US\$,” “US dollars,” “USD” and “dollars” are to United States dollars, and references to “NIS” and “shekels” are to New Israeli Shekels. We maintain our financial books and records in shekels. This annual report contains translations of NIS amounts into US dollars at specified rates solely for the convenience of the reader. No representation is made that the amounts referred to in this annual report as convenience translations could have been or could be converted from NIS into US dollars at these rates, at any particular rate or at all. The translations of NIS amounts into US dollars appearing throughout this annual report have been made at the exchange rate on December 31, 2017, of NIS 3.467 = US\$1.00 as published by the Bank of Israel, unless otherwise specified. See “Item 3A. Key Information – Selected Financial Data – Exchange Rate Data”.

INTERNATIONAL FINANCIAL REPORTING STANDARDS

Our financial statements included in this annual report are prepared in accordance with International Financial Reporting Standards (“IFRS”) published by the International Accounting Standards Board (“IASB”). See “Item 18. Financial Statements” and “Item 5A. Operating and Financial Review and Prospects – Operating Results”.

FORWARD-LOOKING STATEMENTS

This annual report includes forward-looking statements within the meaning of Section 27A of the US Securities Act of 1933, as amended, Section 21E of the US Securities Exchange Act of 1934, as amended, and the safe harbor provisions of the US Private Securities Litigation Reform Act of 1995. Words such as “believe,” “anticipate,” “expect,” “intend,” “seek,” “will,” “plan,” “could,” “may,” “project,” “goal,” “target” and similar expressions often identify forward-looking statements but are not the only way we identify these statements. All statements other than statements of historical fact included in this annual report, including the statements in the sections of this annual report entitled “Item 3D. Key Information – Risk Factors,” “Item 4. Information on the Company” and “Item 5. Operating and Financial Review and Prospects” and elsewhere in this annual report regarding our future performance, revenues or margins, market share or reduction of expenses, regulatory developments, and any statements regarding other future events or our future prospects, are forward-looking statements.

We have based these forward-looking statements on our current knowledge and our present beliefs and expectations regarding possible future events. These forward-looking statements are subject to risks, uncertainties and assumptions about Partner, consumer habits and preferences in cellular and fixed-line telephone usage, trends in the Israeli telecommunications industry in general, the impact of current global economic conditions and possible regulatory and legal developments. For a description of some of the risks see “Item 3D Risk Factors,” “Item 4 Information On The Company,” “Item 5 Operating And Financial Review And Prospects,” “Item 8A.1 Legal And Administrative Proceedings” and “Item 11 Quantitative And Qualitative Disclosures About Market Risk”. In light of these risks, uncertainties and assumptions, the forward-looking events discussed in this annual report might not occur, and actual results may differ materially from the results anticipated. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

3A. Selected Financial Data

Our consolidated financial statements for the years ended December 31, 2013, 2014, 2015, 2016 and 2017, have been prepared in accordance with the International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The tables below at and for the years ended December 31, 2013, 2014, 2015, 2016 and 2017, set forth selected consolidated financial data under IFRS. The selected financial information is derived from our consolidated financial statements, which have been audited by Kesselman & Kesselman, our independent registered public accounting firm in Israel and a member of PricewaterhouseCoopers International Limited. The audited consolidated financial statements at December 31, 2016 and 2017 and for the years ended December 31, 2015, 2016 and 2017, appear at the end of this report.

	Year ended December 31,					2017*

Total liabilities and shareholders' equity	5,487	5,496	5,526	5,197	4,718	1,361

(*) The results at and for the year ended December 31, 2017, include the impact of the adoption of IFRS 15 with effect as of January 1, 2017. See "Item 5A.1j Early adoption of IFRS 15 Revenue from Contracts with Customers – change in accounting policy".

The NIS figures at December 31, 2017, and for the period then ended have been translated throughout this annual report into dollars using the representative exchange rate of the dollar at December 31, 2017 (USD 1 = NIS 3.467).

- (1) The translation was made solely for convenience, is supplementary information, and is distinguished from the financial statements. The translated dollar figures should not be construed as a representation that the Israeli currency amounts actually represent, or could be converted into, dollars. See also “Item 3A. Key Information – Selected Financial Data – Exchange Rate Data”.

- (2) Capital Expenditures represent additions to property and equipment (see note 10 to our consolidated financial statements) and intangible assets (see note 11 to our consolidated financial statements).

Adjusted EBITDA as reviewed by the CODM represents Earnings Before Interest (finance costs, net), Taxes, Depreciation and Amortization (including amortization of intangible assets, deferred expenses-right of use and impairment charges) and Other expenses (mainly amortization of share based compensation). Adjusted EBITDA is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other (3) companies. Adjusted EBITDA may not be indicative of the Group's historic operating results nor is it meant to be predictive of potential future results. The usage of the term "Adjusted EBITDA" is to highlight the fact that the Amortization includes amortization of deferred expenses – right of use and amortization of employee share based compensation and impairment charges; it is fully comparable to EBITDA information which has been previously provided for prior periods.

- (4) See note 15 to the consolidated financial statements for information regarding long-term liabilities and current maturities of long-term borrowings and notes payable.

The tables below at and for the years ended December 31, 2013, 2014, 2015, 2016 and 2017, set forth a reconciliation between Profit (Loss) and Adjusted EBITDA.

	Year ended December 31,					
	2013	2014	2015	2016	2017*	2017* US\$ in millions
	New Israeli Shekels in millions					(1)
Reconciliation Between Profit (Loss) and Adjusted EBITDA						
Profit (Loss)	135	162	(40)	52	114	33
Depreciation and amortization expenses	700	689	753	595	580	168
Finance costs, net	211	159	143	105	180	52
Income tax expenses	63	79	4	36	21	6
Other (**)	5	7	16	46	22	5
Adjusted EBITDA (2)	1,114	1,096	876	834	917	264

The results at and for the year ended December 31, 2017, include the impact of the adoption of IFRS 15 with effect (*) as of January 1, 2017. See "Item 5A.1j Early adoption of IFRS 15 Revenue from Contracts with Customers – change in accounting policy".

(**) Mainly amortization of employee share based compensation.

The translations of NIS amounts into US dollars appearing throughout this annual report have been made at the (1) exchange rate on December 31, 2017, of NIS 3.467 = US\$1.00 as published by the Bank of Israel, unless otherwise specified. See "Item 3A. Key Information – Selected Financial Data – Exchange Rate Data".

(2) Adjusted EBITDA as reviewed by the CODM represents Earnings Before Interest (finance costs, net), Taxes, Depreciation and Amortization (including amortization of intangible assets, deferred expenses-right of use and impairment charges) and Other expenses (mainly amortization of share based compensation). Adjusted EBITDA is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies. Adjusted EBITDA may not be indicative of the Group's historic operating results nor is it meant to be predictive of potential future results. The usage of the term "Adjusted EBITDA" is to highlight the fact that the Amortization includes amortization of deferred expenses – right of use and amortization of employee share based

compensation and impairment charges; it is fully comparable to EBITDA information which has been previously provided for prior periods.

At December 31,
2015 2016 2017

Cellular Industry Data

Estimated population of Israel (in millions) (1)	8.5	8.6	8.8
Estimated Israeli cellular telephone subscribers (in millions) (2)	10.5	10.3	10.4
Estimated Israeli cellular telephone penetration (3)	124 %	120 %	120 %

	Year ended December 31,				
	2013	2014	2015	2016	2017
Partner Data					
Cellular subscribers (000's) (at period end) (4)	2,956	2,837	2,718	2,686	2,674
Pre-paid cellular subscribers (000's) (at period end) (4)	823	705	562	445	354
Post-paid cellular subscribers (000's) (at period end) (4)	2,133	2,132	2,156	2,241	2,320
Share of total Israeli cellular subscribers (at period end) (5)	29 %	28 %	27 %	26 %	25 %
Average monthly revenue per cellular subscriber including roaming ("ARPU") (NIS) (6)	83	75	69	65	62
Churn rate for cellular subscribers (7)	39 %	47 %	46 %	40 %	38 %
Number of TV households (000's) (at period end) (8)					43
Estimated cellular coverage of Israeli population (at period end) (9)	99 %	99 %	99 %	99 %	99 %
Number of employees (full time equivalent) (at period end) (10)	4,045	3,575	2,882	2,686	2,797

(1) The population estimates are as published by the Central Bureau of Statistics in Israel as of December 31, 2017.

We have estimated the total number of Israeli cellular telephone subscribers based on Partner subscriber data as (2) well as information contained in published reports and public statements issued by operators and data regarding the number of subscribers porting between operators.

(3) Total number of estimated Israeli cellular telephone subscribers expressed as a percentage of the estimated population of Israel. The total number of estimated cellular telephone subscribers includes dormant subscribers as well as other subscribers who are not included in the Israeli population figures, such as Palestinians, visitors, and foreign workers.

(4) In accordance with general practice in the cellular telephone industry, we use the term “subscriber”, unless the context otherwise requires, to indicate a telephone or a data or video device, rather than either a bill-paying network customer, who may have a number of telephones connected to the network, or a cellular telephone user who may share a single telephone with a number of other users. “Subscriber” includes our pre-paid customers. A pre-paid subscriber is recognized as such only following the actual use of his pre-paid SIM card and only once they have generated revenues in the amount of at least one shekel (excluding VAT).

References to the number of subscribers are stated net of subscribers who leave or are disconnected from the network, or who have not generated revenue for the Company for a period of over six consecutive months ending at a reporting date.

(5) Total number of Partner subscribers expressed as a percentage of the estimated total number of Israeli cellular subscribers.

(6) We have calculated our average monthly revenue per cellular subscriber by (i) dividing, for each month in the relevant year, the total cellular segment service revenues during the month by the average number of our cellular subscribers during that month, and (ii) dividing the sum of all such results by the number of months in the relevant period.

(7) We define the “churn rate” as the total number of cellular subscribers who disconnect from our network, either involuntarily or voluntarily, in a given period expressed as a percentage of the average of the number of our subscribers at the beginning and end of such period. Our churn rate includes subscribers who have not generated revenue for us for a period of the last six consecutive months ending at a reporting date. This includes cellular subscribers who have generated minute revenues only from incoming calls directed to their voice mail. Involuntary churn includes disconnections due to non-payment of bills or suspected fraudulent use, and voluntary churn includes disconnections due to subscribers terminating their use of our services.

(8) Number of active TV households. The Company launched its TV services in 2017.

(9) We measure cellular coverage using computerized models of our network, radio propagation characteristics and topographic information to predict signal levels at two meters above ground level in areas where we operate a network site. According to these coverage results, we estimate the population serviced by our network and divide this by the estimated total population of Israel. Population estimates are published by the Central Bureau of Statistics in Israel.

(10) A full-time employee is contracted to work a standard 186 hours per month. Part-time employees are converted to full-time equivalents by dividing their contracted hours per month by the full-time standard. The result is added to the number of full-time employees to determine the number of employees on a full-time equivalent basis.

Exchange Rate Data

The following table sets forth, for the years indicated, exchange rates between the shekel and the US dollar, expressed as shekels per US dollar and based upon the daily representative rate of exchange on the last day of each year as published by the Bank of Israel.

	Year ended December 31,				
	2013	2014	2015	2016	2017
Average (1)	3.609	3.577	3.884	3.841	3.600
High	3.791	3.994	4.053	3.983	3.860
Low	3.471	3.402	3.761	3.746	3.467
End of period	3.471	3.889	3.902	3.845	3.467

(1) Calculated based on the average of the daily exchange rates during the relevant period.

	September	October	November	December	January	February	March
	2017	2017	2017	2017	2018	2018	2018
High	3.584	3.542	3.544	3.550	3.460	3.535	3.495
Low	3.504	3.491	3.499	3.467	3.388	3.427	3.431

On December 31, 2017, the exchange rate was NIS 3.467 per US\$1.00 as published by the Bank of Israel. Changes in the exchange rate between the shekel and the US dollar could materially affect our financial results.

3B. Capitalization and Indebtedness

Not applicable.

3C. Reasons for the Offer and Use of Proceeds

Not applicable.

3D. Risk Factors

You should carefully consider the risks described below and the other information in this annual report. Depending on the extent to which any of the following risks materializes, our business, financial condition, cash flow or results of operations could suffer, and the market price of our shares may be negatively affected. The risks below are not the only ones we face, and other risks currently not affecting our business or industry, or which are currently deemed insignificant, may arise.

3D.1 RISKS RELATING TO THE REGULATION OF OUR INDUSTRY

We operate in a highly regulated telecommunications market in which the regulator imposes substantial limitations on our flexibility in managing our business and continues to seek to increase industry competition. At the same time, the regulator limits our ability to compete by, among other measures, giving preference to new competitors, and limits our ability to expand our business and develop our network. Such measures may continue to increase our costs, decrease our revenues and adversely affect our business and results of operations.

3D.1a If the Ministry of Communications fails to enforce its fixed-line wholesale market reforms on Bezeq and HOT Telecom, or if it fails to prevent Bezeq or HOT Telecom from lowering their retail prices for fixed-line services and thereby narrowing our margin in these services, our business and results of operations may be materially adversely affected.

In the past, the Ministry of Communications (the "MoC") has failed to enforce its fixed-line wholesale market reforms ("Wholesale Market Reform") on Bezeq-The Israel Telecommunication Corp., Ltd. ("Bezeq") and HOT Telecom LP ("HOT Telecom"), the two largest wireline infrastructure operators in Israel. See "Item 3D.2f Competition resulting from the full service offers by telecommunications groups and additional entrants into the mobile telecommunications market, as well as other actual and potential changes in the competitive environment and communications technologies, may continue to cause a further decrease in tariffs, an increase in subscriber acquisition and retention costs, and may continue to reduce our subscriber base and increase our churn rate, each of which could adversely affect our business and results of operations." and "Item 4B.12e - iv The Ministry of Communications policy regarding the fixed-line telecommunications sector".

MoC policy and decisions regarding the Wholesale Market Reform (Bit Stream Access (BSA), fixed-line telephony and passive infrastructures, see "Item 4B.12e - iv The Ministry of Communications policy regarding the fixed-line telecommunications sector") have not been effectively enforced by the MoC since May 2015. If the MoC fails to enforce the most important components of its wholesale market reform, or if it rolls back (partially or in-whole), or fails to enforce, its decisions regarding wholesale access to HOT Telecom's network, or adopts other regulation unfavorable to companies, such as Partner, which must rely on the two wholesale suppliers, such actions may negatively affect our business and results of operations.

For further information regarding this risk, see "Item 4B.12e - iv The Ministry of Communications policy regarding the fixed-line telecommunications sector".

In addition, the infrastructure owners (Bezeq and HOT Telecom) may lower their infrastructure retail prices thereby narrowing the margin between their retail prices and the wholesale price we are required to pay them to use their fixed-line infrastructure. This may erode our margin to the point of eradicating the economic feasibility of continuing such operations. If the MoC fails to prevent such conduct by the infrastructure owners, this may adversely affect our business and results of operations.

3D.1b The MoC might require us to terminate the use of certain spectrum ranges which have been allocated to us, limit our use of such spectrum or fail to respond to our demands for the allocation of additional spectrum. Such eventualities may adversely affect our business and results of operations.

The MoC might prevent us from using some of our existing spectrum, may limit our ability to use such spectrum (whether by demanding we share such use with others or placing other limits on such use) or may fail to respond to our demands for the allocation of additional spectrum or for the refarming of our existing spectrum (the conversion of existing frequencies to a different technology). Such actions may interfere with our ability to effectively manage our licensed spectrum, reduce our ability to adequately provide services to our subscribers and place us at a competitive disadvantage. These possible eventualities may adversely affect our business and results of operations.

3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations.

The current structural separation limitations require Bezeq to equally market all ISPs (internet service providers) when selling service bundles which include its infrastructure services and ISP services. Since the launch of the Wholesale Market Reform, Bezeq has launched a bundle which includes its services and the services of certain ISPs and does not market all ISPs equally. If the MoC continues to fail to effectively enforce this requirement, it may continue to erode

our market share in the internet segment.

The MoC has also announced that it intends to cancel the regulations requiring Bezeq to maintain a “structural separation” between its fixed-line telephony, ILD, mobile telecommunications, internet infrastructure and services and TV operations. In the past, the MoC has published official announcements which indicate its satisfaction with the implementation of the Wholesale Market Reform. The MoC also provided Bezeq with a letter in which it announced it is promoting the removal of corporate separation provisions which currently apply to the Bezeq group. We strongly oppose the factual descriptions and the conclusions in these announcements. If the MoC removes the structural separation provisions based on its above-mentioned announcements before we have firmly established ourselves in the fixed-line telecommunications services market (in both fixed-line telephony, passive infrastructures and broadband) and the multi-channel TV market, Bezeq and HOT may be able to offer bundled services more effectively than we, and thereby gain a competitive advantage which could adversely affect our results of operations.

For further information regarding this risk, see “Item “4B.12e - iv The Ministry of Communications policy regarding the fixed-line telecommunications sector”.

3D.1d The Network Sharing Agreement we entered into with HOT Mobile may be terminated earlier than we expected due to regulatory intervention. In such case we will be required to split the shared network with HOT Mobile, and the resources, time and expense it may take us to have our own network on a nation-wide coverage may be substantial and could also materially harm our business and the results of operations at such time. Network sharing and similar agreements entered into by our competitors may place us at a competitive disadvantage.

In November 2013, we entered into a 15-year network sharing agreement (“Network Sharing Agreement”) with HOT Mobile pursuant to which the parties created a limited partnership, under the name P.H.I. Networks (2015) Limited Partnership (“PHI”). The purpose of PHI is to operate and develop a radio access network to be shared by both parties.

In May 2014, the Anti-Trust Commissioner resolved to approve the Network Sharing Agreement, subject to a number of conditions (“Anti-Trust Commissioner Approval”) and in April 2015, the Ministry of Communications resolved to approve the Network Sharing Agreement, subject to a number of conditions as well (“MoU Approval”).

However, the Network Sharing Agreement may terminate or expire prior to the lapse of the said 15-year period due to regulatory intervention in one of the following circumstances:

Pursuant to the Anti-Trust Commissioner Approval - as of April 22, 2021, the Anti-Trust Commissioner will be entitled to notify Partner and HOT Mobile that the network sharing is terminated, if at that time the Anti-Trust Commissioner will be of the opinion that PHI or its activities may adversely affect competition, in which case the parties will be required to cease sharing the active part of the shared network within two years and the passive parts within five years from the Anti-Trust Commissioner's notice to that effect;

In the event we are found to be in breach of any of the conditions set out in the Anti-Trust Commissioner Approval 2) or in the MoU's Approval, the Anti-Trust Commissioner Approval or the MoU Approval might be terminated, which could create significant uncertainty as to the management of the shared radio access network;

PHI is operating under a special license granted by the Ministry of Communications on August 9, 2015. The term of 3) the license is 10 years from the grant thereof. If the term of the license will not be extended we may not be able to continue sharing the network.

If and when the network sharing will end, we will need to split the shared network with HOT Mobile and the resources, time and expense it may take to have our own network on a nation-wide coverage, may be substantial and could materially harm our business and results of operations at such time. See also "Item 3D.2e If the network sharing agreement entered into with HOT Mobile is unilaterally terminated by HOT Mobile earlier than we expect, we will be required to split the shared network with HOT Mobile and the resources, time and expense it may take us to have our own network in a nationwide coverage, would be substantial and could also materially harm our business and the results of operations at such time." and “Item 4B.8a Overview - Cellular Network Sharing Agreement”.

Network sharing and similar agreements entered into by our competitors

In January 2017, Cellcom Israel Ltd. ("Cellcom") announced that it had reached an agreement with Electra Consumer Products Ltd. ("Electra") for 3G and 4G network sharing and 2G hosting services. According to Cellcom's report, Electra simultaneously entered into an agreement with Golan Telecom and its shareholders to purchase Golan Telecom's share capital. These agreements were approved by the Israeli Anti-Trust Commissioner, subject to certain conditions. In March 2017, Cellcom reported that the agreements were approved by the Ministry of Communications. Our knowledge of the content of these agreements is based on partial publications including reports filed by Cellcom, Electra and the IDB Development Company Ltd. However, if these agreements or any future network sharing agreement receive regulatory approval under conditions that are more lenient than those imposed on us, this would place us at a competitive disadvantage compared to our competitors. As a result, our business and results of operations may be negatively impacted.

3D.1e New regulatory initiatives may continue to increase the regulatory burden and intensify competition, which could negatively affect our business and results of operations.

The implementation of the Telecommunications Law, 1982, ("Telecommunications Law"), the Wireless Telegraph Ordinance [New Version], 1972 ("Wireless Telegraph Ordinance") and other laws and regulations, as well as the provisions of our licenses, are all subject to interpretation and change. New laws, regulations or government policies, changes to current regulations, or a change to the interpretation thereof, may be adopted or implemented in a manner which damages our business and operating results. Such measures may include new limits on our ability to market our services, new safety and health related requirements, new limits on the construction and operation of cell towers, new requirements, standards, consumer protection provisions, privacy provisions, coverage term and other conditions or limits applicable to the services we provide. Such measures may negatively affect our business and results of operations. Furthermore, if such measures would benefit our competitors or are applied only to us (and not to our competitors), we may be placed at a competitive disadvantage. For information regarding the principal regulations and regulatory developments affecting our business, see "Item 4B.12e Regulatory Developments".

3D.1f The State may impose regulations on TV content services provided over the Internet, which may negatively affect our business and results of operations.

The state (through the MoC and/or the Council for Cable and Satellite Broadcasting) may impose regulations on nascent TV content services which are provided over the Internet ("OTT") and which are currently unregulated. If such regulations are set (including a requirement to invest in original productions), this will increase our costs, raise the cost of operations in this segment and, if applied only to Israeli OTT providers, place us at a competitive disadvantage, in each case with potential negative effects on our business and results of operations.

3D.1g The deployment of our fiber-optic based infrastructure is dependent on effective enforcement by the Ministry of Communications of its reform enabling us to use a competitor's cable ducts.

The deployment of a fiber-optic based infrastructure is part of our overall strategy to become a comprehensive telecommunications group.

Currently, the majority of our deployment is performed based on the MoC's reform which enables us to use Bezeq's existing cable ducts in order to deploy our fiber optic cables, see "Item 4B.12e - iv- The Ministry of Communications policy regarding the fixed-line telecommunications sector".

Bezeq has not abided by some of its main obligations under the relevant MoC reform. For example, Bezeq does not allow us to use the manholes that are situated in front of buildings, thus making it difficult and more expensive to enter the buildings with our fiber optic cables. Bezeq has attempted to overcharge for actions it has performed for us (during the period in which it lay down fiber-optic cables for us) and has also attempted to charge us fees for actions

which the relevant MoC decision expressly states are to be performed at no charge. If the MoC fails to effectively enforce its reform in this matter against Bezeq, the future progress of this project and our business and results of operations may be materially and adversely affected.

3D.1h We are subject to monitoring and enforcement measures by the Ministry of Communications and other relevant authorities, which may adversely affect our business and results of operations.

Although we believe that we are currently in compliance with all material requirements of the relevant legislation and our licenses, disagreements have arisen and may arise in the future between the MoC and us regarding the interpretation and application of the requirements set out in relevant legislation and our licenses. The MoC is authorized to levy significant fines on us for breaches of the Telecommunications Law, relevant regulations and our licenses. Our operations are also subject to the regulatory and supervisory authority of other Israeli regulators which have the authority to impose criminal and administrative sanctions against us.

We may not always be successful in our defense, and should we be found in violation of these regulations, we and our management may be subject to civil or criminal penalties, including the loss of our operating license as well as administrative sanctions. All such enforcement measures may adversely affect our financial condition or results of operations. For information regarding on-going litigation and legal proceedings, see "Item 8A.1 Legal and Administrative Proceedings".

3D.1i Potential future regulation of roaming services may decrease our roaming revenues and negatively affect our income.

In August 2014, the Ministry of Communications published a hearing aimed at increasing competition in roaming services abroad and which suggested adopting various measures intended to improve transparency and limit subscriber payments for roaming services. Adoption of such measures might decrease our roaming revenues and negatively affect our income. See "4B.12e - iii Hearings and Examinations".

3D.1j We have had difficulties obtaining some of the building and environmental permits required for the erection and operation of our cellular network sites, and some building permits have not been applied for or may not be fully complied with. These difficulties could have an adverse effect on the coverage, quality and capacity of our network. Operating network sites without building or other required permits, or in a manner that deviates from the applicable permit, may result in criminal or civil liability to us or to our officers and directors.

Our ability to maintain and improve the extent, quality and capacity of our cellular network coverage depends in part on our ability to obtain appropriate sites and approvals to install our network infrastructure, including network sites. The erection and operation of most of these network sites require building permits from local or regional planning and building authorities, as well as a number of additional permits from other governmental and regulatory authorities. In addition, as part of our network build-out and expansion, we are erecting additional network sites and making modifications to our existing network sites for which we may be required to obtain new consents and approvals.

For the reasons described in further detail below, we have had difficulties obtaining some of the building permits required for the erection and operation of our network sites. As of December 31, 2017, less than 10% of our network sites were operating without local building permits or exemptions which, in our opinion, are applicable. In addition, some of our network sites are not built in full compliance with the applicable building permits.

Network site operation without required permits or that deviates from the permit has in some cases resulted in the filing of criminal charges and civil proceedings against us and our officers and directors, and monetary penalties against the Company, as well as demolition orders. See "Item 8A.1 Legal and Administrative Proceedings". In the future, we may face additional demolition orders, monetary penalties (including compensation for loss of property value) and criminal charges. The prosecutor's office has a national unit that enforces planning and building laws. The unit has stiffened the punishments regarding violations of planning and building laws, particularly against commercial companies and its directors. If we continue to experience difficulties in obtaining approvals for the erection and operation of network sites and other network infrastructure, this could have an adverse effect on the extent, coverage and capacity of our network, thus impacting the quality of our cellular voice and data services, and on our ability to

continue to market our products and services effectively. In addition, as we seek to improve the range and quality of our services, we need to further expand our network, and difficulties in obtaining required permits may delay, increase the costs or prevent us from achieving these goals in full. Our inability to resolve these issues could prevent us from maintaining the quality requirements contained in our license.

Uncertainties under National Building Plan 36. Since June 2002, following the approval of the National Building Plan 36 (the “Plan”), which regulates network site construction and operation, building permits for our network sites (where required) have been issued in reliance on the Plan. Several local planning and building authorities have questioned the ability of Israeli cellular operators to receive building permits, in reliance on the Plan, for network sites operating in frequencies not specifically detailed in the frequency charts attached to the Plan. In a number of cases, these authorities have refused to grant building permits for network sites, claiming that frequencies are not included in the Plan. There has been no judicial ruling at this stage. If a future court ruling determines that building permits cannot be issued for network sites operating in frequencies not specifically detailed in the frequency charts attached to the Plan, this could have a material adverse effect both on our ability to erect new sites as well as on our existing sites.

The Plan is in the process of being changed. See “Item 4B.12h Network Site Permits”.

Uncertainties regarding the validity of exemptions for wireless access devices. We have set up several hundred small communications devices, called wireless access devices, pursuant to a provision in the Telecommunications Law which exempts such devices from the need to obtain a building permit. A claim was raised that the exemption does not apply to cellular communications devices and the matter reached first instance courts a number of times, resulting in conflicting decisions. This claim is included in an application to certify a class action filed against the three principal Israeli cellular operators. In May 2008, a district court ruling adopted the position that the exemption does not apply to wireless access devices. We, as well as our competitors, filed a request to appeal this ruling to the Supreme Court. In May 2008, the Attorney General filed an opinion regarding this matter stating that the exemption does apply to wireless radio access devices under certain conditions. Two petitions were filed with the High Court of Justice in opposition to the Attorney General’s opinion. The matter is still pending before the Supreme Court and the High Court of Justice. See “Item 4B.12h Network Site Permits”. In December 2017, the Knesset Economics Committee discussed a new version of the regulations passed by the Minister of Finance in coordination with the other relevant government ministries. The Economics Committee has not concluded its discussion of all the regulations clauses and therefore has clarified that a follow-up discussion of the regulations would be scheduled. The proposed text was recommended for approval by the National Planning and Building Council. Insofar as the wording is approved in the format submitted to the Economics Committee, it will be very difficult to transfer existing wireless access devices from place to place and also to make changes to existing access devices.

If a definitive court judgment holds that the exemption does not apply to cellular devices at all, we may be required to remove the existing devices. As a result, our network capacity and coverage would be negatively impacted, which could have an adverse effect on our revenue and results of operations.

Uncertainties regarding requirements for repeaters and other small devices. We, like the other cellular operators in Israel, provide repeaters, also known as bi-directional amplifiers, to subscribers seeking an interim solution to weak signal reception within specific indoor locations. In light of the lack of a clear policy of the local planning and building authorities, and in light of the practice of the other cellular operators, we have not requested permits under the Planning and Building Law, 1965 (“Planning and Building Law”) for the repeaters. However, we have received an approval to connect the repeaters to our communications network from the Ministry of Communications and have received from the Ministry of Environmental Protection permit types for all our repeaters. If the local planning and building authorities determine that permits under the Planning and Building Law are also necessary for the installation of these devices, or any other receptors that we believe do not require a building permit, it could have a negative impact on our ability to obtain permits for our repeaters.

In addition, we construct and operate microwave links as part of our transmission network. The various types of microwave links receive permits from the Ministry of Environmental Protection in respect of their radiation level. Based on an exemption in the Telecommunications Law, we believe that building permits are not required for the installation of most of these microwave links on rooftops, but to the best of our knowledge, there is not yet a determinative ruling on this issue by the Israeli courts. If the courts determine that building permits are necessary for the installation of these sites, it could have a negative impact on our ability to obtain environmental permits for these

sites and to deploy additional microwave links, and could hinder the coverage, quality and capacity of our transmission network.

15

3D.1k In connection with some building permits, we may also be required to indemnify planning committees in respect of claims against them relating to the depreciation of property values that result from the granting of permits for network sites.

Under the Planning and Building Law, local planning committees may be held liable for the depreciation of the value of nearby properties as a result of approving a building plan. Under the Non-Ionizing Radiation Law, 2006 (the "Non-Ionizing Radiation Law") the National Council for Planning and Building requires indemnification undertakings from cellular companies as a precondition for obtaining a building permit for new or existing network sites. The National Council has decided that until the Plan is amended to reflect a different indemnification amount, cellular companies will be required to undertake to indemnify the committees in full against all losses resulting from claims against a committee for reductions in property values as a result of granting a permit to the network site. On June 1, 2010, the National Council for Planning and Building approved the National Building Plan No. 36/A/1 version that incorporates all of the amendments to the Plan (the "Amended Plan"). The Amended Plan sets forth the indemnification amounts as a percentage of the value of the depreciated property claims in accordance with the manner in which the licenses were granted. See "Item 4B.12h Network Site Permits". The Amended Plan is subject to governmental approval, in accordance with the Planning and Building Law. It is unknown when the government intends to approve the Amended Plan.

As of December 31, 2017, we have provided local authorities with 488 indemnification undertakings. These indemnifications expose us to risks which are difficult to quantify or mitigate and which may have a material adverse effect on our financial conditions and results of operations, if we are required to make substantial payments in connection therewith. In addition, the requirement to provide indemnification in connection with new building permits may impede our ability to obtain building permits for existing network sites or to expand our network with the erection of new network sites. The indemnification requirement may also cause us to change the location of our network sites to less suitable locations or to dismantle existing network sites, which may have an adverse effect on the quality and capacity of our network coverage.

In 2007, the Israeli Ministry of Interior Affairs extended the limitation period within which depreciation claims may be brought under the Planning and Building Law from three years from approval of the building plan to the later of one year from receiving a building permit for a network site under the Plan and six months from the construction of a network site. The Ministry retains the general authority to extend such period further. This extension of the limitation period increased our potential exposure to depreciation claims.

3D.11 Potential future regulation of the ILD market may decrease our revenues from international calls and adversely affect our income.

In October 2013, the Ministry of Communications published a hearing regarding proposed new regulations for the ILD market which would allow all general licensees to provide international call services (under certain conditions). The MoC also proposed that general licensees (such as cellular operators) would no longer be allowed to charge interconnect fees for outgoing international calls and that some international calls would be preceded with a voice message stating the tariff of such call and allowing the subscriber to disconnect without being charged. Such regulation if adopted, may decrease our revenues from international calls and adversely affect our income. See "Item 4B.12e - iii Hearings and Examinations".

3D.1m The Ministry of Communications has indicated its intent to reduce mobile interconnection charges, which would negatively affect our income.

An MoC economic opinion published in February 2013, included a recommendation for a further reduction of cellular call and SMS interconnect tariffs towards the end of 2016. Such a reduction may negatively affect our business and results of operations. In February 2017, the MoC notified the cellular companies that due to other priorities, it does not intend to pursue this task at this time.

3D.1n We can only operate our business for as long as we have licenses from the Ministry of Communications.

We conduct our operations pursuant to licenses granted to us by the Ministry of Communications, which may be extended for additional periods upon our request to the Ministry of Communications and confirmation from the Ministry that we have met certain performance requirements. We cannot be certain that our licenses will not be revoked, will be extended when necessary, or, if extended, on what terms an extension may be granted. See “Item 4B.12f Our Mobile Telephone License ”.

3D.1o Our mobile telephone license imposes certain obligations on our shareholders and restrictions on who can own our shares. Ensuring compliance with these obligations and restrictions may be outside our control, and may limit our ability to raise new equity capital. If the obligations or restrictions are not respected by our shareholders, we could lose our license.

As with other companies engaged in the telecommunications business in Israel, our license requires that a minimum economic and voting interest in, and other defined means of control of our company be held by Israeli citizens and residents or entities under their control. If this requirement is not complied with, we could be found to be in breach of our license, even though ensuring compliance with this restriction may be beyond our control. See “Item 4B.12f Our Mobile Telephone License”.

Our general mobile telephone license requires that our "founding shareholders or their approved substitutes", as defined in the license, hold at least 26% of the means of control in the Company, including 5% which must be held by Israeli founding shareholders (Israeli citizens and residents), who were approved as such by the Minister of Communications. If the Company decides to raise capital, it may face significant difficulty to do so since the current holdings of Israeli entities (as defined in the license) holdings are approximately 5% and any equity offering to the public or to the Company's employees and office holders will require an equivalent equity offering of shares to Israeli entities, in a manner in which the total Israeli entities founding shareholders' holdings will not be less than 5% of the total issued share capital. Since the transfer of these Israeli entity shares requires pre-approval of the MoC to determine that the receiving shareholder is eligible to be an Israeli entity, they are limited in their capability of transfer to another shareholder. The Company may need to grant a significant discount in an equity offering of these Israeli entity shares. If the Company were required to raise capital and this issue prevented it from doing so, our business could be adversely impacted (e.g., reduction in sales with long term credit arrangements and/or reduction in capital investments). The license also requires that these Israeli founding shareholders appoint at least 10% of our Board of Directors. In 2006, our Israeli founding shareholders sold substantially all of their shares in the Company to Israeli institutional investors, who were approved as substitutes. Since then, there were additional share sales to Israeli institutional investors that were approved as substitutes by the Minister of Communications.

In addition, according to our license, no transfer or acquisition of 10% or more of any of such means of control, or the acquisition of control of our company, may be made without the consent of the Minister of Communications. Nevertheless, under certain licenses granted, directly or indirectly, to Partner, approval of, or notice to, the Minister of Communications may be required for holding of 5% or more of Partner's means of control. Our license also restricts cross-ownership and cross-control among competing mobile telephone operators, including the ownership of 5% or more of the means of control of both our company and a competing operator, without the consent of the Minister of Communications, which may limit certain persons from acquiring our shares. Shareholdings in breach of these restrictions relating to transfers or acquisitions of means of control or control of Partner could result in the following consequences: the shares will be converted into “dormant” shares as defined in the Israeli Companies Law, 1999 (“Israeli Companies Law”), with no rights other than the right to receive dividends or other distributions to shareholders, and to participate in rights offerings until such time as the consent of the Minister of Communications has been obtained and our license may be revoked. In addition, under certain licenses of the Company's subsidiaries, approval of, or notice to, the Minister of Communications may be required for holding of less than 5% of means of control. Because of this lack of consistency, Partner may be in breach of its licenses in this regard.

3D.2 RISKS RELATING TO OUR BUSINESS OPERATIONS

3D.2a As a result of substantial and continuing changes in our regulatory and business environment, our operating results and profitability have decreased significantly in the past five years, with a loss for 2015. In 2017 we earned profits of NIS 114 million (US\$ 33 million). Profit without the impact of the early adoption of IFRS 15 in 2017 would have been NIS 61 million (US\$ 18 million), and profit in 2016 was NIS 52 million. Our operating results may again decline in 2018 and beyond, which may adversely affect our financial condition.

Our revenues in 2017 were NIS 3,268 million (US\$ 943 million), a decrease of 8% from NIS 3,544 million in 2016 and a decrease of 21% from NIS 4,111 million in 2015. The Company recorded a profit in 2017 of NIS 114 million (US\$ 33 million). Profit without the impact of the early adoption of IFRS 15 in 2017 would have been NIS 61 million (US\$ 18 million), compared with a profit in 2016 of NIS 52 million. The principal factor leading to the continued decline in operating results over the past several years has been the intense competition resulting largely from regulatory developments intended to enhance competition in the Israeli telecommunications market. These developments have caused, over the past several years, (i) significant price erosion in cellular services due to heightened competition from new entrants (since 2012) in the Israeli cellular market, (ii) a decrease in our cellular subscriber base and market share, and (iii) a significant decrease in gross profits from equipment sales. Service revenues and gross profits from equipment sales may decrease further in 2018.

Because the regulatory and business environment continues to evolve, generally with the objective of further increasing competition in the various markets in which we operate, depending on past and future regulatory and market developments, these factors may continue to negatively impact our business through 2018 and beyond, which may adversely affect our financial condition by, among other things, increasing the risk of a substantial impairment in the value of our telecommunications assets. See also “Item 5D.2 Outlook”.

3D.2b Our level of indebtedness could adversely affect our business, profits and liquidity. Furthermore, difficulties in generating sustainable cash flow may impair our ability to repay our debt and reduce the level of indebtedness.

As of December 31, 2017, total borrowings and notes payables amounted to NIS 1,923 million (US\$ 555 million), compared to NIS 2,694 million as of December 31, 2016. See also “Item 5B.4 Total net financial debt”. The terms of the Company’s borrowings require the Company to comply with financial covenants and other stipulations for existing borrowings. The existing borrowing agreements allow the lenders to demand an immediate repayment of the borrowings in certain events (events of default), including, among others, a material adverse change in the Company’s business and non-compliance with the financial covenants set in those agreements. Furthermore, although the Company has entered into agreements for deferred borrowing commitments in a total amount of NIS 376.75 million (US\$ 109 million), these agreements allow the lenders to not provide the borrowings should any of the events of default defined for our existing borrowings occur prior to the date for providing the deferred borrowings. These events of default include non-compliance with the financial covenants, as well as other customary terms. See “Item 5B.2 Long-Term Borrowings”.

In addition, our need for cash to service our substantial existing debt may in the future restrict our ability to continue offering long-term installment plans to promote sales of equipment. As a result, our ability to continue benefiting from one of the current contributors to total Company profits may be limited. (See also “ITEM 5 OPERATING AND FINANCIAL REVIEW AND PROSPECTS” and specifically “Item 5D.2 Outlook”);

Our substantial indebtedness could also adversely affect our financial condition and profitability by, among other things:

• requiring us to dedicate a substantial portion of our cash flow from operations to service our debt, thereby reducing the funds available for financing ongoing operating expenses and future business development;

- limiting our flexibility in planning for, or reacting to, changes in our industry and business as well as in the economy generally;
- increasing the likelihood of a downgrade in the rating of our Notes by the rating company;
- increasing the risk of a substantial impairment in the value of our telecommunications assets; and
- limiting our ability to obtain the additional financing we may need to serve our debt, operate, develop and expand our business on acceptable terms or at all.

If our financial condition is affected to such an extent that our future cash flows are not sufficient to allow us to pay principal and interest on our debt, we might not be able to satisfy our financial and other covenants, and may be required to refinance all or part of our existing debt, use existing cash balances or issue additional equity or other securities. We cannot be sure that we will be able to do so on commercially reasonable terms, if at all.

3D.2c Our recent entry into the television services market entails risks and costs, without expectations of profitability in the short term.

Our entry into the television services market in June 2017 necessarily entails costs, including capital and operating expenditures related to the establishment of the infrastructure of our technological content management system, which supports our TV service, and costs of wholesale access to fixed-line infrastructure, TV technicians, the content management team, service and sales, licensing and distribution rights and the purchase of other equipment (e.g. Set top boxes).

Entry into the television services market also requires access to premium content. If we fail to secure and maintain the rights to premium content, our ability to continue to expand our customer base may be limited and our results of operations may be negatively affected.

Our TV services are provided over the internet. Due to the fact that most of our TV subscribers are also subscribers to our wholesale internet infrastructure service, any growth in the volume of data such TV subscribers (as well as ISP and wholesale market subscribers) consume during peak hours translates into an increase in the payment we have to pay to the infrastructure holders for access to their infrastructure. If such growth exceeds our estimations this may increase our costs and negatively affect our results of operations.

As is typical when entering a new market, we do not expect to achieve profitability in the short term.

In addition, our recent entry into a market which is controlled by two dominant competitors, as well as the competition we face from additional existing and potential competitors, may cause us unexpected increased costs in content, sales and marketing, as part of our goal to continue to expand our customer base for TV services.

Such an increase in our costs would have a further negative impact on our EBITDA and results of operations.

3D.2d Our revenues from the pre-paid subscriber base have decreased over the last few years and may continue to decrease as a result of the increased competition in the market.

Over the last few years, our revenues from cellular pre-paid subscriber base have decreased. Service revenues from cellular pre-paid subscribers totaled NIS 146 million (US\$ 42 million) in 2017 compared with NIS 180 million in 2016, a decrease of 19%, and compared with NIS 230 million in 2015. The principal factors leading to this continued decline over the past few years have been the decline in pricing of unlimited post-paid plans and therefore the relative attractiveness of those plans compared to the pre-paid plans as well as increased competition due to the entrance of new operators into the pre-paid market. If this trend continues, revenues from pre-paid subscribers will continue to decline.

3D.2e If the network sharing agreement entered into with HOT Mobile is unilaterally terminated by HOT Mobile earlier than we expect, we will be required to split the shared network with HOT Mobile and the resources, time and expense it may take us to have our own network in a nationwide coverage, would be substantial and could also materially harm our business and the results of operations at such time.

Pursuant to the terms of the Network Sharing Agreement that we entered into with HOT Mobile as of April 2023, either party is entitled to terminate the Network Sharing Agreement for convenience by notifying the other party to that effect two years in advance. See "Item 3D.1d The Network Sharing Agreement we entered into with HOT Mobile may be terminated earlier than we expected due to regulatory intervention. In such case we will be required to split the shared network with HOT Mobile, and the resources, time and expense it may take us to have our own network on a nation-wide coverage may be substantial and could also materially harm our business and the results of operations at such time. Network sharing and similar agreements entered into by our competitors may place us at a competitive disadvantage."

If and when the network sharing will end, we will need to split the shared network with HOT Mobile and the resources, time and expense it may take to have our own network on a nation-wide coverage, would be substantial and could materially harm our business and results of operations at such time.

3D.2f Competition resulting from the full service offers by telecommunications groups and additional entrants into the mobile telecommunications market, as well as other actual and potential changes in the competitive environment and communications technologies, may continue to cause a further decrease in tariffs and an increase in subscriber acquisition and retention costs, and may continue to reduce our subscriber base and increase our churn rate, each of which could adversely affect our business and results of operations.

Competition by Golan Telecom and HOT Mobile. HOT Mobile and Golan Telecom, which entered the market in May 2012, were awarded various benefits and leniencies by the MoC. These leniencies include a waiver of HOT Mobile and Golan Telecom's obligation to build an independent network subject to their commitment to invest in a shared network with another operator the same amount that they have committed to invest in their UMTS network. Such leniencies and benefits place us at a substantial competitive disadvantage, which may negatively affect our results of operations.

Entrance of the sixth facility-based operator. Following the 4G tender results, Marathon 018 Xfone Ltd. ("Xfone") gained one band of 5 MHz in the 1800 range, allowing it to share its frequencies with other operators and share their network (as part of a network sharing agreement). Cellcom, Golan and Xfone have reached a network sharing agreement which has been approved by the Anti-Trust Commissioner and the Ministry of Communications. This agreement will enable Xfone to enter the market as the sixth facility based operator, which may further increase competition levels in the cellular market and cause further rate decreases, thus negatively affecting our results of operations.

The acquisition of Golan Telecom by Electra, which was approved by the Anti-Trust Commissioner under certain conditions and by the MoC, might increase competition in the cellular market. Electra's retail business allows it access to a wide customer base and distribution network and may enable it to offer attractive package prices to their customers. Furthermore, the terms under which the acquisition of Golan by Electra has been approved by the relevant regulators may also affect our ability to compete. See "Item 3D.1d- Network sharing and similar agreements entered into by our competitors".

Network sharing and national roaming agreements entered into by our competitors. Our knowledge of the content of the network sharing and national roaming agreements entered into by our competitors is based on partial publications, including reports filed by Cellcom, Electra and the IDB Development Company Ltd. However, if such agreements (or any such future agreements) have been approved under conditions that are more lenient than those imposed on us, or if such conditions are not effectively enforced by the relevant authorities, this would place us at a competitive

disadvantage compared to our competitors. As a result, our business and results of operations may be negatively impacted. See "Item 3D.1d The Network Sharing Agreement we entered into with HOT Mobile may be terminated earlier than we expected due to regulatory intervention. In such case we will be required to split the shared network with HOT Mobile, and the resources, time and expense it may take us to have our own network on a nation-wide coverage may be substantial and could also materially harm our business and the results of operations at such time. Network sharing and similar agreements entered into by our competitors may place us at a competitive disadvantage."

Entrance of additional MVNOs. The entrance of additional Mobile Virtual Network Operators (“MVNOs”) may further increase competition in the cellular market. Some MVNOs are retailers with a wide customer base and distribution network that allows them to offer attractive package prices to their customers. See “Item 4B.9a Competitors in the Cellular Services market”.

Competitive advantages of the two fixed-line infrastructure groups. The Bezeq Group and the HOT Group are the only Israeli telecommunications providers that have their own nationwide fixed-line telecommunications infrastructures. See "Item 3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations."

Because the Bezeq Group and the HOT Group operate their own broadband internet access and transmission infrastructures, they do not depend on any third party for broadband internet access. Partner and other telecommunications services providers who do not have their own independent broadband internet access infrastructure are unable to provide some of these services, and are dependent on Bezeq and HOT in providing some of these services, substantially limiting their ability to compete.

Entry into the fixed-line infrastructure market. In August 2017, we announced the commencement of the commercial phase and acceleration of our independent fixed-line infrastructure deployment using fiber optics. Entry into this market entails significant long-term investments associated with infrastructure deployment, for which a positive return on capital is not expected in the short term. As a result, our results of operations may be adversely affected. In addition, our entrance into this market may accelerate the entry of additional competitors, deploying their own competitive infrastructures and operating existing ones, all of which might reduce or limit our market penetration.

Furthermore, entry into new markets (e.g. television services, fixed-line infrastructure) may further intensify price competition in the cellular and fixed-line markets which may have an adverse effect on our results of operations.

Israel Broadband Company (IBC). In August 2013, the Minister of Communications granted Israel Broadband Company (2013) Ltd. (“IBC”), a general license for the provision of fixed-line telecom services (infrastructure) and for the establishment of a nationwide optic fiber network using the Israeli Electric Company’s infrastructure. IBC has launched a web portal in which it offers ISP services to end-users (through agreements with selected ISPs). The variety of suppliers, immediate choice, and ability to quickly switch suppliers may commoditize the ISP segment and negatively impact our revenues and profits. IBC was also granted a special license for the provision of domestic fixed-line data communication. According to local media reports, IBC is permitted under its special license to provide its services to large business customers. Entry of IBC into the large business segment of the ISP market may increase competition in this segment and erode our market share and may affect our results of operation. IBC has retained Rothschild Bank in its attempt to find a strategic investor. Partner is examining the feasibility of such investment, as are other entities. In November of 2017, the MoC informed Partner that IBC had requested that its universal deployment obligation be "substantially reduced". If the MoC decides to grant IBC such leniencies and not treat other competitors (such as Partner) equally by providing them with the NIS 150 million grant that was paid to IBC by the State, this may place us at a competitive disadvantage and adversely effect on our results of operations.

Sale of handsets and other equipment. Competition in the market for handsets and other equipment including tablets, laptops, audio-visual devices and other related equipment sold by the Company is high and may increase, which may affect our results of operation.

Competition in Roaming Services. Some of our competitors may be able to obtain lower roaming rates than us either since they have larger call volumes or through their affiliations with other international cellular operators. Some competing service providers use alternative technologies for roaming that bypass the existing method of providing roaming services. Further competition in roaming services (both inbound and outbound) has arisen and may arise in the future from other telecommunication operators and new technologies that allow subscribers to use global SIM cards and pure internet-based services such as Skype, Viber and WhatsApp, as well as other operators' products which use VoIP applications. In addition, some cellular operators market plans that, in addition to calls, SMS and internet, include roaming services to set lists of countries.

Reliance on other service providers for roaming. We rely on agreements to provide roaming capability to our subscribers in many areas outside Israel. However, we cannot control the quality of the service that other telecommunication companies provide or whether they will be able to provide the services at all, and it may be inferior to our quality of service. Our subscribers also may not be able to use some of the advanced features that they enjoy when making calls on our network. As a result, we may lose some of our customers' roaming traffic to other roaming solutions, which would negatively impact our results of operations from this important source of earnings.

3D.2g Significant expansion in the capacity for international connectivity between Israel and Western Europe and increased competition in the ISP market resulted in sharp price decreases in these markets in 2011 and, as a result, caused us, and may in the future cause us, to recognize substantial impairment in the value of our fixed-line telecommunications assets.

Beginning in December 2011, total capacity available in international connectivity between Israel and Western Europe increased significantly as a result of the entry into operation of new underwater cables, and international connectivity services experienced a sharp decline in prices. In addition, we face increased competition in the retail ISP market, mainly since the launch of HOT-NET in the beginning of 2012. We therefore performed, with the assistance of an independent appraisal an impairment test on assets that belong to the VOB/ISP Cash Generating Unit ("CGU") of our fixed-line segment. As a result of the testing, impairment charges in a total amount of NIS 235 million were recognized for the fixed-line business at December 31, 2011. In addition, the Company's management performed, as required, its annual impairment review of goodwill, which resulted in an impairment charge to goodwill in 2011 in an amount of NIS 87 million with respect to the VOB/ISP and ILD group of CGUs of the fixed line segment.

At December 31, 2015, we recorded further asset impairment of NIS 98 million for the fixed-line business in the ISP/VOB CGU. See "Item 5A.1f Impairment of Fixed-Line Assets and Goodwill".

Continued increases in the level of competition for international connectivity and ISP services may bring further downward pressure on prices, and as a result, we may be required to perform further impairment tests of our fixed-line telecommunications assets in the future. Such impairment tests may lead to recording additional significant impairment charges, which could have a material negative impact on our operating and net profit.

In addition, continued increases in the level of competition for cellular, fixed-line and data transmission services may bring further downward pressure on prices which may require us to perform further impairment tests of our assets. Such impairment tests may lead to recording additional significant impairment charges, which could have a material negative impact on our operating and net profit.

3D.2h The unionization of our employees has negatively affected and may continue to negatively affect our financial results.

We signed a collective employment agreement with the employees' representatives and the Histadrut, the labor union representing the Company's employees, on March 13, 2016. The agreement includes an organizational chapter that is valid for a period of three years (2016-2018) and an economic chapter that was valid until December 30, 2016, and on December 12, 2016, we signed a new economic chapter that is valid for the years 2017 and 2018. The organizational

chapter includes, among others, provisions regarding manning and changing of positions, termination of employment and tenure. The new economic chapter includes, among others, provisions regarding terms of employment, benefits and welfare. See "Item 6D Employees".

As a result, management attention that would otherwise be available for our ongoing business must be directed towards the implementation of the collective employment agreement and other matters involving the unionization. The unionization of our employees has limited management's flexibility to efficiently run our business and adjust operations to market conditions, including the ability to execute organizational and personnel changes. It has resulted in increased costs and negatively affected our financial results, and may continue to do so in the future.

The Company is expected to begin negotiations during the last quarter of 2018 to renew the collective employment agreement. If the Company reaches understandings with the employee representatives and the Histadrut, the Company may incur further expenses which could increase operating expenses and reduce profitability. Failure to reach an understanding with the employee representatives, may lead to disruptions in our operations or cause work stoppages.

3D.2i Our purchase commitments pursuant to our non-exclusive agreement with Apple for the purchase and resale of iPhone handsets in Israel may adversely affect our financial results.

Following the expiration of our previous agreement in 2016 and pursuant to a non-exclusive agreement we entered into in June 2016 with Apple Distribution International for the purchase and resale of iPhone handsets in Israel, we agreed to purchase a minimum quantity of iPhone handsets per year, for a period of three years. These purchases represent a significant portion of our expected handset purchases over that period. If we fail to meet the minimum quantities and do not reach an agreement with Apple regarding this matter, we may be in breach of the agreement which may involve payment of damages, which would increase our costs.

3D.2j We depend on a limited number of suppliers and vendors for key equipment and services. Our results of operations could be adversely affected if our suppliers and vendors fail to provide us with needed services and adequate supplies of network equipment, handsets and other devices or maintenance support on a timely basis.

Network suppliers. We purchased our network equipment, such as switching equipment, base station controllers and base transceiver stations and network software, from Ericsson. In October 2010, we entered into an agreement with Ericsson for the upgrade and modernization of our networks and the deployment of our fourth generation network in Israel. The initial term of the agreement ended on December 31, 2014. We extended, with certain modifications, the maintenance period by additional periods until the end of 2018. See "Item 4B.8g Suppliers". We are therefore, as a practical matter, materially dependent on Ericsson as our sole vendor for our UMTS and LTE networks.

Handset and other equipment suppliers. We purchase the majority of our handsets and other equipment from a limited number of suppliers.

TV equipment and services. We purchase our TV set top boxes and the rights to distribute sports content each from a single supplier.

We cannot be certain that we will be able to obtain contracted services, equipment or handsets from one or more alternative suppliers on a timely basis in the event that any of our suppliers is unable to satisfy our requirements for services, equipment or handsets, or that the equipment provided by such alternative supplier or suppliers will be compatible with our existing equipment. Our handset and equipment suppliers may experience inventory shortages from time to time.

Our results of operations could be adversely affected if any of our key suppliers fails to provide us with contracted services or adequate supplies of handsets, equipment, as well as ongoing maintenance and upgrade support, in a timely manner. In addition, our results of operations could be adversely affected if the price of network equipment rises significantly. In our experience, suppliers from time to time extend delivery times, limit supplies and increase the prices of supplies due to their supply limitations and other factors. If the availability of handsets and other equipment furnished by our suppliers is insufficient to meet our customers' demands, we may lose opportunities to benefit from demand for this product, and our unserved customers may purchase the equipment independently which

may adversely affect our revenues. In addition, the constant development of new handsets and other equipment can render existing handsets and other equipment obsolete resulting in high levels of slow moving inventory.

3D.2k Unanticipated growth in subscriber demand for cellular data may require us to make additional investments and to modify certain products or services.

As a diversified multi-service communications and media service provider, we have developed services and successfully encouraged subscriber demand for internet access and content and data consumption using cellular phones, smartphones, tablets, data cards and ISP Services. However, in the event subscriber demand for data increases more rapidly than expected, we may need to develop strategies to avoid data traffic overloading the capacity of the network. Such strategies may include modifying certain products or services or undertaking significant additional investments. In addition, regulatory developments seeking to ensure “fair usage” of the internet for all persons may impose changes on the terms and conditions of certain of our current or future services. In the event of substantial, rapid growth in data consumption by our subscribers and the public generally, we may be obliged to undertake significant investments and to adjust our product offerings or, both of which could have a material adverse effect on our financial condition or results of operations.

3D.2l We could be subject to legal claims due to the inability of our information systems to fully support our tariff plans.

In order to attract and retain the maximum number of subscribers in our highly competitive market, we design specific tariff plans to suit the preferences of various subscriber groups. We require sophisticated information systems to record accurately subscriber usage pursuant to the particular terms of each subscriber plan, as well as accurate database management and operation of a very large number of tariff plans. From time to time, we have detected some discrepancies between certain tariff plans and the information processed by our internal information systems, such as applying an incorrect rebate or applying an incorrect tariff to a service, resulting in a higher or lower charge. We have invested substantial resources to refine and improve our information and control systems and ensure that our tariff plans are appropriately processed by our information systems. We have also taken steps to remedy the identified discrepancies. Despite our investments, we may experience discrepancies in the future due to the multiplicity of our plans and the scope of the processing tasks. Further, while we invest substantial efforts in monitoring our employees and third-party distributors and dealers that market our services, it is possible that some of our employees, distributors or dealers may offer terms and make (or fail to make) representations to existing and prospective subscribers that do not fully conform to applicable law, our license or the terms of our tariff plans. As a result of these discrepancies, we may be subject to subscribers’ claims, including class action claims, and substantial sanctions for breach of our license that may materially adversely affect our results of operations.

3D.2m Actual and alleged health risks related to network sites and the use of mobile telecommunications devices, including handsets, could have a material adverse effect on our business, operations and financial condition.

A number of studies have been conducted to examine the health effects of wireless phone use and network sites, and some of these studies have been construed as indicating that radiation from wireless phone use causes adverse health effects. Media reports have suggested that radio frequency emissions from network sites, wireless handsets and other mobile telecommunication devices may raise various health concerns.

The Ministry of Health published in July 2008 recommendations regarding precautionary measures when using cellular handsets. The Ministry of Health indicated that although the findings of an international study on whether cellular phone usage increases the risk of developing certain tumors were not yet finalized, partial results of several of the studies were published, and a relationship between prolonged cellular phone usage and tumor development was observed in some of these studies. These studies, as well as the precautionary recommendations published by the Ministry of Health, have increased concerns of the Israeli public with regards to the connection between cellular phone exposure and illnesses.

In May 2011, the International Agency for Research on Cancer (“IARC”), which is part of the World Health Organization (“WHO”), published a press release according to which it classified radiofrequency electromagnetic fields as possibly carcinogenic to humans based on an increased risk for adverse health effects associated with wireless phone use.

In June 2011, WHO published a fact sheet (no. 193) in which it was noted that “A large number of studies have been performed over the last two decades to assess whether mobile phones pose a potential health risk. To date, no adverse health effects have been established as being caused by mobile phone use”. It was also noted by WHO that “While an increased risk of brain tumors is not established, the increasing use of mobile phones and the lack of data for mobile phone use over time periods longer than 15 years warrant further research of mobile phone use and brain cancer risk in particular, with the popularity of mobile phone use among younger people, and therefore a potentially longer lifetime of exposure”. WHO notified that in response to public and governmental concern it will conduct a formal risk assessment of all studied health outcomes from radio frequency fields exposure by 2014. We are not aware that such an assessment has been published.

We have complied and are committed to continue to comply with the rules of the authorized governmental institutions with respect to the precautionary rules regarding the use of cellular telephones. We refer our customers to the precautionary rules that have been recommended by the Ministry of Health, as may be amended from time to time.

While, to the best of our knowledge, the handsets that we market comply with the applicable laws that relate to acceptable Specific Absorption Rate (“SAR”) levels, we rely on the SAR levels published by the manufacturers of these handsets and do not perform independent inspections of the SAR levels of these handsets. As the manufacturers’ approvals refer to a prototype handset, and not for each and every handset, we have no information as to the actual level of SAR of the handsets along the lifecycle of the handsets, including in the case of repaired handsets. See also “Item 4B.12g Other Licenses”. Furthermore, our network sites comply with the International Council on Non-Ionizing Radiation Protection standard, a part of the World Health Organization, which has been adopted by the Israeli Ministry of Environmental Protection.

Several lawsuits have been filed in the past against operators and other participants in the wireless industry alleging adverse health effects and other claims relating to radio frequency transmissions from sites, handsets and other mobile telecommunications devices, including lawsuits against us.

A class action was filed against us and three other operators alleging, among other things, that health effects were caused due to a lack of cell sites, resulting in elevated levels of radiation, mainly from handsets. The plaintiffs stressed that health damages are not a part of the claim. Another class action was also filed against us and three other operators alleging, among other things, that the supply of accessories that are intended for carrying cellular handsets on the body are sold in a manner that contradicts the instructions and warnings of the cellular handset manufacturers and the recommendations of the Ministry of Health, and without disclosing the risks entailed in the use of these accessories when they are sold or marketed. In these two class actions, Partner and the plaintiff filed a settlement agreement, which the court approved. The plaintiff filed an appeal with the Supreme Court regarding the court’s decision not to appoint an expert to examine the technical test which is part of the settlement.

In February 2009, a municipal court ruled against one of our competitors, stating that there is no need for the standard burden of proof to prove damages from a cellular network site, and that under certain circumstances it would be sufficient to prove the possibility of damage in order to transfer the burden of proof to the cellular companies. To the best of our knowledge, the defendant appealed the ruling and the ruling was dismissed as part of a settlement between the parties. Although we were not a party to this proceeding, such rulings could have an adverse effect on our ability to contend with claims of health damages as a result of the erection of network sites.

The perception of increased health risks related to network sites may cause us increased difficulty in obtaining leases for new network site locations or renewing leases for existing locations or otherwise in installing mobile

telecommunication devices. If it is ever determined that health risks existed or that there was a deviation from radiation standards which would result in a health risk from sites, other telecommunication devices or handsets, this would have a material adverse effect on our business, operations and financial condition, including through exposure to potential liability, a reduction in subscribers and reduced usage per subscriber. Furthermore, we do not expect to be able to obtain insurance with respect to such liability.

25

3D.2n Equipment failures, system failures, natural disasters and hostile events such as acts of war, terror or cyber-attacks may materially adversely affect our results of operations.

Our ability to provide ongoing services to our subscribers, bill for services rendered and protect company and subscriber data are all vulnerable to various types of risks.

Such risks may include equipment failures, network failures, computer and IT system failures, transmission outages, spectral interferences, third-party systems and networks, natural disasters (such as fire, extreme weather and earthquakes), hostile events (such as acts of war, terror-attacks, see “Item 3D.2r The political and military conditions in Israel may adversely affect our financial condition and results of operations.”), cyber-attacks and data breaches whether by employees or other third parties. If any such events do occur, they could have a material adverse effect on our operations.

Like many other telecommunication companies, we have experienced an increase in cyber incidents over the past few years, some of which penetrated our cyber defenses, although no significant damage or loss of customer data resulted. We have integrated protective systems and prepared Disaster Recovery Plans (“DRP”) to mitigate such and other related risks, and we regularly consider our defensive systems and evaluate their effectiveness, including through simulated cyber penetrations; however it is not possible to determine in advance whether our defense systems and recovery plans will continue to be entirely effective, or how quickly we will be able to restore any affected service. We do not currently have insurance coverage for these types of risks.

As threats to our network, services and data continue to evolve, we may be required to expend significant efforts and resources to enhance our control environment, processes, practices and other protective measures.

If despite such efforts, we are unable to provide some or all of the telecommunications services to a substantial portion of our customers, whether temporarily or for an extended period of time, or if customer data is lost or accessed by third parties, we may be exposed to legal claims and liability, we may be found to be in breach of our legal obligations towards our customers, our brand and reputation may be damaged, we may suffer a loss of customers, our ability to attract new customers may be impaired, and we may be required to compensate our customers. Such eventualities may negatively affect our business, and our short- and long- term results of operations may be materially adversely affected.

3D.2o The telecommunications industry is subject to rapid and significant changes in technology and industry structure which could reduce demand for our services.

We face competition from existing or future technologies that have the technical capability to handle mobile, fixed-line and international long distance telephone calls, and to interconnect with local and international telephone networks and the Internet. Such new and evolving technologies include fixed-line and broadband wireless access services, Over the Top or Internet-based voice and multimedia services, Wi-Fi technologies and VoC. For example, internet-based services that provide user experience largely equivalent to our offerings, such as Voice over IP (“VoIP”), messaging services (WhatsApp, Skype, Viber), and video services (YouTube, video portals) are already available. In addition, the rapid development in recent years of technologies that allow international calls to be placed over the Internet without the need to use the services of an ILD has caused a decrease in the amount of international call minutes placed through the ILD services and also serve as an alternative for fixed-line communications. In particular, the risk posed by VoIP is that the purchase of a data package alone will be sufficient for the provision of most cellular voice, data and messaging services.

The effect of emerging and future technological changes, including the convergence of technologies, on the viability or competitiveness of our network cannot be accurately predicted. The technologies we employ or intend to employ may become obsolete or subject to competition from new disruptive technologies in the future. Competition from new technologies in the future may have a material adverse impact on our business and results of operations.

Moreover, global equipment vendors and Internet providers have expressed their interest in penetrating the cellular telephone industry and strengthening their position along the value chain. They have expressed their intention, and some have already begun, to provide direct access to the end-user to a wide variety of applications and services (e.g. Apple with iTunes and Google with the Android market). This has already changed our competitive position and may further increase the dominance of those new providers at the expense of cellular service providers. Changes in the industry value chain structure might result in an increase in our expenses as well as a decrease in our revenues.

3D.2p We are exposed to, and currently engaged in, a variety of legal proceedings, including requests to approve lawsuits as class actions related primarily to our network infrastructure and consumer claims.

In addition to a number of legal and administrative proceedings arising in the ordinary course of our business, we have been named as defendants in a number of civil and criminal proceedings related to our network infrastructure, which may result in civil liabilities or criminal penalties against us or our officers and directors, and consumer claims, including class action suits, regarding, for example, our tariff plans and billing methods or alleging, for example, unlawful charges, which are costly to defend and may result in significant monetary damages and civil penalties. The number of class actions that have been filed against us has increased over the past few years and this trend may continue in light of various amendments to the Consumer Protection Law and stricter regulatory policies that have been adopted. In class actions that require interpretation of our license provisions, the courts have in some instances requested the position of the Ministry of Communications or the Attorney General. In cases where the interpretation contradicts our interpretation and the court adopts such interpretation, it may enforce the implementation of such provisions retroactively which may adversely affect our financial results. The costs that may result from these lawsuits are only accrued when it is more likely than not that a liability, resulting from past events, will be incurred and the amount of that liability can be quantified or estimated within a reasonable range. The amount of the provisions recorded is based on a case-by-case assessment of the risk level, and events arising during the course of legal proceedings may require a reassessment of this risk. The Company's assessment of risk is based both on the advice of legal counsel and on the Company's estimate of the financial exposure if the verdict is in favor of the plaintiff. If the requests to certify lawsuits against us as class actions are approved and succeed or if we underestimate the potential exposure our financial results will be adversely affected. See "Item 8A.1 Legal and Administrative Proceedings".

We are also subject to the risk of intellectual property rights claims against us, including in relation to innovations we develop ourselves and the right to use content, including television, video and music content, which we have purchased or licensed from third parties who present themselves as the owners or official licensors (or as the representatives of owners or licensors) of the intellectual property rights included in the content, when in fact they may not be. These claims may require us to initiate or defend protracted and costly litigation, regardless of the merits of these claims. If any of these claims succeed, we may be forced to pay damages or may be required to obtain licenses for the infringing content, product or service, which may affect our financial results. If we cannot obtain all necessary licenses on commercially reasonable terms, we may be forced to cease using, distributing or selling the products and services.

3D.2q We are dependent upon our ability to interconnect with other telecommunications carriers. We also depend on Bezeq and other suppliers for transmission services and some of our Fixed-Line Services are dependent on our having access to Bezeq and the HOT Group's fixed-line network. The failure of these carriers to provide these services on a consistent basis could have a material adverse effect on us.

Our ability to provide commercially viable fixed-line and cellular telephone services depends upon our ability to interconnect with the telecommunications networks of existing and future fixed-line, cellular telephone and international operators in Israel in order to complete calls between our customers and parties on the fixed-line or other cellular telephone networks. All fixed-line, cellular telephone and international operators in Israel are legally required to provide interconnection to, and not to discriminate against, any other licensed telecommunications operator in Israel. We have interconnect relations with all the Israeli operators, including Bezeq and HOT Telecom, and we also depend on their internet broadband access infrastructure in order to provide TV, ISP services and VoB fixed telephony services. See "Item 3D.1a If the Ministry of Communications fails to enforce its fixed-line wholesale market reforms on Bezeq and HOT Telecom, or if it fails to prevent Bezeq or HOT Telecom from lowering their retail prices for fixed-line services and thereby narrowing our margin in these services, our business and results of operations" and "Item 3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations."

We are also dependent on the submarine infrastructure made available by TI Sparkle Israel (formerly Med Nautilus), which provides mutual international transmission based on fiber optics between Israel and other countries. See “10C Material Contracts”. We also depend on foreign operators that provide us with interconnection to the global internet network.

We also rely on agreements to provide ILD services to our subscribers. However, we cannot control the quality of the service that other foreign telecommunication companies provide or whether they will be able to provide the services at all, and it may be inferior to our quality of service.

We have no control over the quality and timing of the investment and maintenance activities that are necessary for these entities to provide us with interconnection to their respective telecommunications networks. Disruptions, stoppages, strikes and slowdowns experienced by them may significantly affect our ability to provide telecommunication services. The failure by our suppliers to provide reliable interconnections and transmission services to us on a consistent basis could have a material adverse effect on our business, financial condition or results of operations.

3D.2r The political and military conditions in Israel may adversely affect our financial condition and results of operations.

The political and military conditions in Israel directly influence us. Since the establishment of the State of Israel in 1948, a number of armed conflicts have taken place between Israel and its Arab neighbors. Hostilities involving Israel, the interruption or curtailment of trade between Israel and its trading partners and political instability within Israel or its neighboring countries are likely to cause our revenues to fall and harm our business. During the last decade, there has been a high level of violence between Israel and the Palestinians, including missile strikes by Hamas against Israel, which led to an armed conflict between Israel and the Hamas over the past few years and more recently in July 2014. In the last few years, Iran has threatened to attack Israel with nuclear weapons. There is evidence that Iran has a strong influence among extremist groups in areas that neighbor Israel, such as Hamas in Gaza and Hezbollah in Lebanon and Syria. This situation may potentially escalate in the future to violent events which may affect Israel and us. Ongoing violence between Israel and its Arab neighbors and Palestinians may have a material adverse effect on the Israeli economy, in general, and on our business, financial condition or results of operations. During such periods, incoming and outgoing tourism may be affected which consequently may have an adverse effect on our financial results. In particular, in recent conflicts, missile attacks have occurred on civilian areas, which could cause substantial damage to our infrastructure network, reducing our ability to continue serving our customers as well as our overall network capacity. In addition, in the event political unrest and instability in the Middle East, including changes in some of the governments in the region, causes investor concerns resulting in a reduction in the value of the shekel, our expenses in non-shekel currencies may increase, with a material adverse effect on our financial results.

Some of our directors, officers and employees are currently obligated to perform annual reserve duty. Additionally, all reservists are subject to being called to active duty at any time under emergency circumstances. In addition, some of our employees may be forced to stay at home during emergency circumstances in their area. We cannot assess the full impact of these requirements on our workforce and business if conditions should change.

During an emergency, including a major communications crisis in Israel’s national communications network, a natural disaster, or a special security situation in Israel, control of our network may be assumed by a lawfully authorized person in order to protect the security of the State of Israel or to ensure the provision of necessary services to the public. During such circumstances, the government also has the right to withdraw temporarily some of the spectrum granted to us. Under the Equipment Registration and Mobilization to the Israel Defense Forces Law, 1987, the Israel Defense Force may mobilize our engineering equipment for their use, compensating us for the use and damage. This may materially harm our ability to provide services to our subscribers in such emergency circumstances, and would thus have a negative impact on our revenues and results of operations.

Moreover, the Prime Minister of Israel may, under powers which the Telecommunications Law grants him for reasons of state security or public welfare, order us to provide services to the security forces, to perform telecommunications activities and to set up telecommunications facilities required by the security forces to carry out their duties. While the Telecommunications Law provides that we will be compensated for rendering such services to security forces, the government is seeking a change in the Telecommunications Law which would require us to bear some of the cost involved with complying with the instructions of security forces. Such costs may be significant and have a negative impact on our revenues and results of operations.

3D.2s Operating a telecommunications network involves the inherent risk of fraudulent activities and potential abuse of our services, which may cause loss of revenues and non-recoverable expenses.

There is an inherent risk of potential abuse by individuals, groups, businesses or other organizations that use our telecommunications services and avoid paying for them entirely or at all. The effects of such fraudulent activities may be, among others, a loss of revenue and out-of-pocket expenses which we will have to pay to third parties in connection with those services, such as interconnect fees, payments to international operators or to operators overseas and payments to content providers. Such payments may be non-recoverable. Although we are taking measures in order to prevent fraudulent activities, we have suffered from these activities in the past, and we may suffer from them in the future. The financial impact of fraudulent activities that have occurred in the past has not been material. However, fraudulent activities may in the future materially affect our financial condition and results of operations.

3D.2t Our business may be impacted by shekel exchange rate fluctuations and inflation.

Nearly all of our revenues and a majority of our operating expenses are denominated in shekels. However, in recent years, approximately one fifth of our operating expenses (excluding depreciation and amortization), including a substantial majority of our equipment purchases, were linked to or denominated in non-shekel currencies, mainly the US dollar. These expenses, where the price paid by us is based mainly in US dollars, included the acquisition of equipment and devices sold, payments for roaming services and payments to content suppliers. In addition, our capital expenditures include payments that are incurred in, or linked to, non-shekel currencies, mainly US dollars. A decline in the value of the shekel against the dollar (or other foreign currencies) could have an adverse impact on our results, which may be material if we are unable to pass on higher costs to our customers in the Israeli market. Material changes in exchange rates may cause the amounts that we must invest to increase materially in shekel terms.

Since May 2013, we have not entered into any derivative transactions to hedge underlying exposure to foreign currencies. As a matter of policy, we do not enter into transactions of a speculative or trading nature.

The repayments of principal and interest on our Series C Notes, due 2018, at a total principal of NIS 213 million as of December 31, 2017 (including current maturities, less offering expenses) are linked to the Israeli CPI. We also have entered into a number of operating leases whose rental payments are linked to the Israeli CPI. We may not be able to raise our tariffs in a manner that would fully compensate for significant increase in the CPI. Therefore, a significant increase in the rate of inflation may also have a material adverse impact upon us by increasing our financial expenses without an offsetting increase in revenue. See "ITEM 11 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK" for more information regarding the Company's exposure to exchange rate fluctuations and inflation.

3D.2u We may fail to maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act of 2002, which may have a material adverse effect on our operating results and our share price.

Our efforts to comply with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 relating to the evaluation of our internal control over financial reporting require substantial resources, management time and attention. We expect these efforts to require a continued commitment of resources. If we fail to maintain the adequacy of our internal controls, we may not be able to conclude on an ongoing basis that we have effective internal control

over financial reporting. Although our management has concluded that our internal control over financial reporting was effective as of December 31, 2017, we may identify material weaknesses or other disclosable conditions relating to internal control over financial reporting in the future. Failure to maintain effective internal control over financial reporting could result in investigation or sanctions by regulatory authorities and significant effort and expense, and could have a material adverse effect on our operating results and on the market price of our ordinary shares.

3D.2v Based on a decision of the Board of Directors in 2012, dividend distributions are assessed from time to time on the basis of various factors. There can be no assurance that dividends will be declared or, if they are, at what level. No dividends have been distributed since 2013.

In September 2012, the Board of Directors resolved to cancel the then existing dividend policy, which targeted a minimum payout ratio of 80% of annual net income, and to assess dividend distributions (and their scope) from time to time, by reference to, among other things, the Company's cash flow, profitability, debt level, debt coverage ratios and the business environment in general. The level of any distribution of dividends may also be affected by the Company's stated intention to use its cash flow and take other measures to reduce its financial debt, as well as by the need to comply with existing financial covenants and to fund any necessary capital expenditures.

Under Israeli law, the payment of dividends is generally made from accumulated retained earnings or retained earnings accrued over a period of the last two years (after deducting prior dividends to the extent not already deducted from retained earnings), and in either case, provided there is no reasonable concern that the dividend will prevent the company from satisfying current or foreseeable obligations as they come due. A dividend distribution that does not meet the above mentioned conditions would be allowed only after receiving court approval and after providing debtors with the opportunity to present to the court any opposition to the dividend distribution.

There is no assurance that we will declare dividend distributions in the future or regarding the level of any dividend distribution which may be declared. No dividends have been distributed since 2013. A distribution of dividends that may result in a significant reduction of our future reserves could prevent us from complying with existing or future financial covenants, or limit our ability to fund capital expenditures. We may also be required to increase our financial indebtedness to obtain needed liquidity, which may not be possible on commercially reasonable terms or at all.

If we are unable to pay dividends at levels anticipated by our shareholders, the market price of our shares may be negatively affected and the value of our investors' investment may be reduced.

3D.2w Our tax liability may be greater than expected.

We are subject to taxation in Israel, and significant judgment is required in determining our provisions for taxes on income. We are also subject to audits by the Israeli tax authorities, including in relation to VAT payments. In such audits, it is possible to present our case according to our interpretation of tax legislation, and the relevant tax authorities may disagree, and then also challenge the amount of our profits subject to tax in Israel.

While we believe that our estimates are reasonable, the final outcome of these audits and related legal litigations, in so much as they may occur, may differ from the amount of our provisions for taxes and therefore may affect our operating results. See also note 25 to our consolidated financial statements and "Item 5A.1c Settlement Agreement with Orange Brand Services Ltd."

3D.3 RISKS RELATED TO OUR PRINCIPAL SHAREHOLDER

3D.3a 29.37% of our issued and outstanding shares and voting rights were held by S.B. Israel Telecom Ltd., our largest shareholder, as of March 1, 2018.

As of March 1, 2018, our largest shareholder, S.B. Israel Telecom Ltd. ("S.B. Israel Telecom"), held approximately 29.37% of our issued and outstanding shares.

As our largest shareholder, S.B. Israel Telecom has the ability to significantly influence our business through its ability to appoint directors serving on our Board of Directors and thereby substantially control all actions that require approval of our Board of Directors. S.B. Israel Telecom is not obligated to provide us with financial support or to exercise its rights as a shareholder in our best interests or in the best interests of our other shareholders and noteholders, and it may engage in activities that conflict with such interests. If the interests of S.B. Israel Telecom conflict with the interests of our other shareholders and noteholders, those shareholders and noteholders could be disadvantaged by the actions that it may pursue. However, S.B. Israel Telecom is subject to the fairness duty of a controlling shareholder under the Israeli Companies Law, and, in the context of related party transactions, to vote for the approval of transactions which are in favor of the Company. See "Item 6C.10 Duties of a Shareholder".

ITEM 4. INFORMATION ON THE COMPANY

4A. History and Development of the Company

We were incorporated in Israel under the laws of the State of Israel on September 29, 1997, as Partner Communications Company Ltd. Our products and services were marketed under the "Orange" brand until February 16, 2016, when it was replaced with the "Partner" brand. In addition, since 2011, we have used the "012 Smile" brand for certain products and services. Our principal executive offices are located at 8 Amal Street, Afeq Industrial Park, Rosh Ha'ayin 48103, Israel (telephone: +972-54-7814-888). Our website addresses are www.partner.co.il and www.012mobile.co.il. Information contained on our websites does not constitute a part of this annual report. Our authorized U.S. representative is Puglisi and Associates, 850 Library Avenue, Suite 204, Newark, Delaware, 19711 and our agent for service in the United States is CT Corporation, 111 Eighth Avenue, New York, New York 10011.

Since our incorporation, we have achieved a number of important milestones:

- In April 1998, we received our license to establish and operate a cellular telephone network in Israel.

- In January 1999, we launched full commercial operations with approximately 88% population coverage and established a nationwide distribution.

- In October 1999, we completed our initial public offering of ordinary shares in the form of American Depositary Shares, and received net proceeds of approximately NIS 2,092 million, with the listing of our American Depositary Shares on NASDAQ and the London Stock Exchange. We used part of these net proceeds to repay approximately NIS 1,494 million in indebtedness to our principal shareholders, and the remainder to finance the continued development of our business. (In March 2008, we voluntarily delisted our ADSs from the London Stock Exchange.)

- In August 2000, we completed an offering, registered under the US Securities Act of 1933, as amended, of \$175 million (approximately \$170.5 million after deducting commissions and offering expenses) in 13% unsecured senior subordinated notes due 2010. These notes were redeemed in August 2005.

- In July 2001, we registered our ordinary shares for trading on the Tel Aviv Stock Exchange.

- In December 2001, the Ministry of Communications awarded us two bands of spectrum: one band of GSM 1800 spectrum and one band of 2100 UMTS third generation spectrum.

- In June 2002, our license was extended until February 2022.

- In December 2004, we commercially launched our 3G network.

- In March 2005, we completed a debt offering, raising NIS 2.0 billion in a public offering in Israel of notes due 2012.

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

In April 2005, we repurchased approximately 33.3 million shares from our Israeli founding shareholders, representing approximately 18.1% of our outstanding shares immediately before the repurchase.

In the third quarter of 2005, our Board of Directors and shareholders approved the distribution of our first cash dividend, in the amount of NIS 0.57 per share, totaling approximately NIS 86.4 million.

In March 2006, we launched services based on the High Speed Downlink Packet Access (“HSDPA”) technology.

In July 2006, we purchased Med-1 I.C.-1 (1999) Ltd.’s fiber-optic transmission business for approximately NIS 71 million, in order to enable us to reduce our transmission costs as well as to provide our business customers with bundled services of transmission of data and voice and fixed-line services.

In January 2007, we were granted a domestic fixed license by the Ministry of Communications, and in February 2007 we were granted a network termination point license.

In December 2008 and January 2009, we launched three additional non-cellular business lines: VoB telephony services, ISP services and Web VOD (video on demand).

In October 2009, Scailex became our principal shareholder through acquiring the entire interest in the Company of our previous controlling shareholder.

In February 2010, following the District Court’s approval, a total amount of NIS 1.4 billion or approximately NIS 9.04 per share was paid on March 18, 2010, to shareholders and ADS holders of record on March 7, 2010, as a special dividend distribution.

In March 2011, we acquired all of the outstanding shares of 012 Smile Telecom Ltd., a leading provider of broadband and traditional telecommunications services in Israel. The acquisition of 012 Smile supported our strategy of becoming a leading comprehensive communications group, expanding our range of services and products.

In January 2013, S.B. Israel Telecom, an affiliate of Saban Capital Group, a private investment firm, based in Los Angeles, California, specializing in the media, entertainment and communications industries, became our principal shareholder through acquiring 30.87% of our issued and outstanding shares, principally from our previous controlling shareholder, Scailex Corporation Ltd.

In November 2013, we entered into a 15-year Network Sharing Agreement with HOT Mobile pursuant to which the parties agreed to create a 50-50 limited partnership to operate and develop a cellular network to be shared by both parties (among others, as a result of pooling both parties’ radio access network infrastructures to create a single radio access network). The Network Sharing Agreement was approved by the Israeli anti-trust authorities, subject to conditions in May 2014, and by the Ministry of Communications in April 2015. Following approval by the Minister of Communications, the Network Sharing Agreement with HOT Mobile entered into effect. See “Item 4B.8 Our Network”.

In July 2014, we commercially launched limited 4G services in Israel over a frequency band of only 5 MHz in the 1800 spectrum.

In March 2015, the acting Minister of Communications approved the results of the tender bid process in which we won an additional 5 MHz in the 1800 spectrum (in addition to our 10 MHz frequency bands in the 1800 spectrum).

In February 2016, we rebranded our products and services that were previously under the “Orange” brand to be under the new “Partner” brand. See "Item 5A.1c Settlement Agreement with Orange Brand Services Ltd."

In June 2017, we launched Partner TV service based on Over the Internet (OTT) platform which completed our offering as a comprehensive communications company.

In August 2017, we launched the commercial phase and accelerated deployment of our fiber optic network in residential areas throughout the country.

For information on our capital expenditures for the last three financial years, and for the principal capital expenditures currently in progress, see “Item 4B.8 Our Network” and “Item 5B.4 Total Net Financial Debt- Capital Expenditures”.

4B. Business Overview

Partner Communications Company Ltd. is a leading Israeli telecommunications company, providing a wide integrated and customized range of cellular and fixed-line telecommunication services, including infrastructure, international long distance (ILD), internet services provider (ISP), television and other services. We offer our subscribers a full range of products and services to address a broad range of communications needs based on advanced technologies and competitive tariff plans.

As a comprehensive communications group, we supply our services through two business segments:

- the cellular segment, our main business, which represents the largest portion of our total revenues. The cellular business segment includes cellular communications services such as airtime calls, international roaming services, text messaging, internet browsing, value-added and content services, and services provided to other operators that use the Company's cellular network. The Company also sells and leases a range of equipment related to cellular services. See "Item 4B.5a Cellular Services and Products".

At December 31, 2017, we had approximately 2,674 thousand cellular subscribers, representing an estimated 25% of total Israeli cellular telephone subscribers at that date. As of that date, approximately 87% of our subscriber base (approximately 2,320 thousand subscribers) was represented by subscribers who subscribe to post-paid tariff plans and 13% (approximately 354 thousand subscribers) by subscribers who subscribe to pre-paid tariff plans. (For a definition of “subscriber”, see “Item 3A Selected Financial Data”).

Our GSM/UMTS network covered 99% of the Israeli population at year-end 2017. Our LTE network currently covers 99% of the Israeli population, in line with the deployment milestones in our license. We currently operate our GSM network in the 900 MHz and 1800 MHz bands, the UMTS network in the 900 MHz and 2100 MHz band and the LTE network in the 1800 MHz band. Our services provided on our network include standard and enhanced services, as well as value-added services and products. See “Item 4B.5 SERVICES AND PRODUCTS”.

In 2017, we marketed our cellular services and products mainly under the Partner brand as well as under the 012 Mobile brand;

and

- the fixed-line segment, which includes a number of services provided over fixed-line networks including (a) Internet services including access to the internet through both fiber optics and wholesale broadband access, ISP services, internet Value Added Services (“VAS”) such as cyber protection, anti-virus and anti-spam filtering, and fixed-line voice communication services provided through Voice Over Broadband (“VOB”); (b) Business solutions including SIP voice trunks, Network Termination Point Services (“NTP”) – under which the Group supplies, installs, operates and maintains endpoint network equipment and solutions, including providing and installing equipment and

cabling within a subscriber's place of business or premises, hosting services, transmission services, Primary Rate Interface ("PRI") and other fixed-line communications solution services; (c) International Long Distance services ("ILD"): outgoing and incoming international telephony, hubbing, roaming and signaling and calling card services; and (d) Television services over the Internet ("TV"). In addition, this segment includes sales and leasing of related equipment. See "Item 4B.5b Fixed-line Services and Products".

In 2017, our fixed-line services were marketed under the Partner brand and our ILD services were marketed under the 012 brand.

In 2017, we were named by the Maala organization in their highest platinum plus category for corporate social responsibility for the tenth consecutive year.

4B.1 SPECIAL CHARACTERISTICS OF THE CELLULAR TELECOMMUNICATIONS INDUSTRY IN ISRAEL

We believe that the following special characteristics differentiate the Israeli market from other developed cellular telecommunications markets. In particular, as noted below, on-going, significant changes in regulations applicable to cellular operators have created a complex environment specifically intended to substantially increase competition:

High Rate of Unlimited Packages. Israeli cellular operators provide, among other price-competitive offers, a particularly high rate of unlimited voice and text packages, and various data packages consisting of relatively high volumes of data at competitive prices.

Lack of Migration Barriers, High Churn and Recruitment Rate of Subscribers. The Israeli cellular market to date has limited migration barriers. There is full number portability. Operators are prohibited from selling SIM locked handsets and are no longer able to link the sale of handsets to services. In addition, operators are no longer allowed to charge exit fees from residential or small business customers or offer better tariff plans to new customers. As a result of this, as well as the entrance of new competitors, there is a high rate of churn and recruitment rate of subscribers in the Israeli cellular market.

Cellular Telephone Market Saturation. Since 1994, the market has sustained a rapid annual rate of growth from a 2.6% penetration rate at year-end 1994 to an estimated penetration rate in Israel at December 31, 2017, of 120%, representing approximately 10.4 million subscribers out of an estimated population of approximately 8.8 million. The total number of estimated cellular telephone subscribers includes dormant subscribers and subscribers to multiple networks as well as other subscribers who are not included in the Israeli population figures, such as Palestinians, visitors, and foreign workers.

Multiple Operators in a Small Market. The regulatory changes in the telecommunications industry, particularly with respect to additional entrants that include cellular operators and MVNOs, have created multiple operators in a relatively small market, which has led to a high level of competition in the industry.

Favorable Geography. Israel covers an area of approximately 8,000 square miles (20,700 square kilometers) and its population tends to be centered in a small number of densely populated areas. In addition, the terrain of Israel is relatively flat. These factors facilitate the roll out, maintenance and subsequent upgrades of a cellular network in a cost effective manner.

High Penetration of Smartphones. Published market data shows that the relatively young Israeli population has a propensity to accept and use high technology products. The level of penetration of smartphones in the Israeli market is also estimated to be one of the highest in the world.

4B.2 SPECIAL CHARACTERISTICS OF THE FIXED-LINE TELECOMMUNICATIONS INDUSTRY IN ISRAEL

Bezeq and HOT Telecom are the only telecommunications services providers with their own nationwide fixed-line infrastructure. IBC, which has a license to provide fixed-line services nationwide, has started a limited deployment of its fiber-based fixed-line services. Partner and Cellcom have fiber optic lines in certain areas nationwide.

Fixed-line telephony Services

Bezeq is the incumbent provider of fixed-line telephony services in Israel and holds more than 69% of the market. The remaining portion of the market is divided between HOT Telecom the next largest provider, Cellcom and Partner.

Broadband and Internet services

The fixed internet access market used to be divided into two tiers of services: infrastructure services and ISP service. Since February 2015, with the launch of the wholesale market reform, ISPs have begun to market bundled packages which include both (Bezeq's) infrastructure and ISP components.

The Ministry of Communications declared its intention to provide an incentive for Bezeq to implement the wholesale market by reducing the regulations requiring Bezeq to maintain a "structural separation" between its fixed-line and its TV services and other telecommunications operations. The MoC has also declared its intention to promote the removal of corporate separation in the Bezeq group and to publish a hearing in 2017 suggesting removal of the structural separation in the Bezeq group. See "Item 3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations."

In August 2013, the Israel Broadband Company (IBC), was granted licenses after winning the tender published by the State of Israel for the election of a minority shareholder in the Israel Electric Corporation telecommunication project. IBC introduced a new business model which enables it to reach the retail market through the services of ISPs. IBC has launched a web portal in which it offers ISP services to end users. ISPs which reach agreements with IBC are listed on the web portal. Currently only niche ISPs have reached agreements with IBC.

Internet access is currently provided by three major Internet service providers, or ISPs: Netvision from the Cellcom Group, Bezeq International and Partner, as well as some other niche players. All three major providers are also suppliers of ILD services (see below).

Until 2011, the Israeli ISPs were connected to the World Wide Web through an underwater communications cable owned and operated by TI Sparkle Israel (formerly Med Nautilus), a subsidiary of Telecom Italia SpA. Since January 2012, Bezeq International has its own underwater communications cable, and in February 2012, the Tamares Group's underwater communications cable commenced operations. These additional underwater cables have increased the effective bandwidth of international data connectivity and reduce costs for ISPs.

International long distance services

ILD services in Israel have been open for competition since 1996. There are currently eight players in this market. The three major players are: Partner, through 012 Smile, Bezeq International and Cellcom through Netvision, who are estimated to hold together approximately 80% of the market. The other players are Xfone and Telzar 019 International Telecommunications Services Ltd., which commenced operations in 2011, and Hashikma Communications Marketing Ltd., Golan Telecom and HOT Mobile, that commenced operations in 2012. Beginning in 2012, as part of the unlimited packages that the cellular companies began offering their customers, most of them, including the Company, included ILD services to certain destinations in these packages. Proposed regulations intend, among others, to allow all general telecommunications licensees (including MVNOs) to provide international call services to international destinations included in their subscribers' tariff plans and only calls to destinations not included in the subscriber's plans would be routed through ILD providers. See "Item 4B.12e - iii Hearings and Examinations". Such regulations may alter the ILD market structure in Israel and decrease the volume of international calls routed through ILD providers.

4B.3 OUR STRATEGY

Partner's strategy is to further reinforce and develop its position as a comprehensive telecommunications company that offers an entire range of telecommunication solutions to a variety of customers, and we intend to lead the market in service as well as technology. The most recent elements in pursuit of this strategy were added during 2017 with the launch of our Partner TV Service and the entry into service of our fiber optic network. The principle elements of our business strategy are as follows:

Offer our customers a variety of cellular and fixed-line services. For our core businesses we intend to continue to offer our customers a variety of services that include a wide integrated and customized range of cellular and fixed-line services. In addition, during 2018, we intend to expand the variety of value-added services such as cyber solutions and IOT (Internet of Things).

Increase penetration of Partner TV Service. In June 2017, we launched Partner TV Service, an Over the Top service ("OTT") based on Android TV platform. This was the first service of its kind in the Israeli television market. Partner TV Service allows our customers to enjoy an advanced interface and enables us to connect our customers "Any place, Any time, Any device" (AAA). As part of our strategy to offer our customers unique television services we have partnered with world-leading internet television networks, including Netflix. The attractive prices that we offer for our Partner TV Service together with the innovative interface have created for the first time competition in the Israeli television market previously dominated by only two companies.

Further extend deployment of a fiber optic network over which the Company will offer high quality internet services. In August 2017, we commercially launched our fiber optic network. Our investment in the fiber optic network is part of our strategy to maintain our technological leadership in the market. The fiber optic network enables us as a comprehensive communications group to offer increased internet speeds compared to current market offerings, manage the quality of service and customer experience, and offer additional advanced services. The combination of the fiber optic network together with Partner TV Service, which can be offered over our fiber optic network, provides us with a unique advantage and reduces our dependency on the fixed-line infrastructure operators.

Preserve and enhance customer satisfaction to strengthen customer loyalty and decrease churn. In order to increase customer satisfaction, we constantly strive to provide advanced services at a high level of technology and simplify processes and information. Towards this goal, we strive to provide our customers with a high level of accessible customer service at our service centers, call centers, and digital channels, as well as through our in-house technicians for fixed-line services.

Increase our online services for our customers. To provide our customers with advanced digital services, we are constantly developing possibilities for our customers to purchase services and self services as well as equipment through digital means and cellular apps.

Continue to be a major player in the retail sale of handsets and accessories. We continuously adapt ourselves to the changing needs of our customers, while offering new and innovative equipment and accessory developments and changes in the telecommunications market.

Lead in technology and innovation in our cellular network in order to remain at the technological edge. We have the widest 4G coverage compared to other cellular operators as a result of having the largest deployment of 4G cell sites. See "Item 4B.8 OUR NETWORK". As part of our strategy to remain a leading telecommunications operator in the cellular market and offer more advanced services, we intend to continue investing in 2018 in both the shared network with HOT Mobile as well as in our core cellular network. We intend to continue to deploy advanced technologies, for instance LTE Advanced. During 2018, the Company plans to examine the architecture and the technological aspects related to the implementation of the 5G network in preparation for its anticipated implementation in 2020.

4B.4 MARKETING AND BRAND

We continuously utilize a variety of marketing tools and channels in order to strengthen our brand presence in the market and promote sales. The year 2017 was dedicated to the consolidation of our brand architecture to one distinct and leading brand, "Partner", representing us as a full range telecommunications company. We advertise our brand and services in a variety of media channels, including press, television, radio, digital and social networks. Our advertising emphasizes leading and innovative product services and technologies and is targeted to various market segments using several languages.

Our marketing strategy for the year 2018 will be to focus on presenting Partner as a one stop shop for all customer communication needs. Our objective is to differentiate ourselves from our competitors on the basis of our added value services and competitive pricing, as well as the introduction of our new innovative products. For example in 2017, we launched Partner TV and offered our Post-Paid cellular subscribers a free six month subscription to Apple Music streaming service as a result of an exclusive collaboration with Apple Music.

4B.5 SERVICES AND PRODUCTS

Our principal business, which provided approximately 80% of our revenues in 2017 (excluding inter-segment revenues) was derived from our cellular segment. Approximately 20% of our revenues (excluding inter-segment revenues) were generated from our fixed-line segment.

4B.5a Cellular Services and Products

Cellular Services

Our main business is cellular telephony - including basic cellular telephony services, text messaging, internet browsing and data transfer, content services, roaming services and services provided to other operators that are permitted to use the Company's cellular network. Cellular content and value-added services offered include multimedia messaging, cyber protection, cloud backup, ringtones, music streaming service and a range of business services.

International Roaming

We offer our customers roaming services abroad, which allow a mobile phone subscriber to place and to receive calls while in the coverage area of foreign networks owned by operators with whom we have commercial roaming agreement. Our roaming packages allow our customers to benefit from attractive rates in nearly 190 destinations. We offer data-only packages as well as packages that combine calls, data and SMS. The Ministry of Communications may introduce new regulations that would limit our revenues from roaming services. See "Item 4B.12e - iii Hearings and Examinations".

At December 31, 2017, we had commercial roaming relationships with 490 operators in 190 countries or jurisdictions, 340 3G roaming agreements in 160 countries and 86 4G roaming agreements in 87 countries. Creating roaming relationships with multiple operators in each country increases potential incoming roaming revenue for us and gives our subscribers more choice in coverage, services and prices in that country. The 3G and 4G roaming agreements enable our 3G roamers to initiate video calls, high speed data and video and audio content while abroad.

Although GSM (2G), UMTS (3G) and LTE (4G) are standardized, the frequency allocation per each technology varies from one country to another. Currently we operate our GSM services on the 900 MHz and 1800 MHz bands, UMTS on 900 MHz and 2100 MHz bands and LTE on 1800 MHz bands. All 4G handsets which we sell, support all the above listed technologies and bands while 3G handsets support the above listed bands for GSM and UMTS. While roaming, there is a possibility that a subscriber's handset will not support all the technologies due to lack of support of

a country's specific frequency bands; however this is rare in GSM and UMTS, due to technology maturity. Standardization bodies allow for more than 27 different LTE bands and since LTE in many countries utilizes reframed GSM and UMTS bands, there may be cases where handsets do not support the frequency allocated for LTE in specific countries.

Cellular Equipment and Devices

Equipment and device sales in the cellular segment include sales and leases of cellular handsets and related cellular devices and accessories. Until 2017, some sales of digital audio visual equipment and other related equipment were also recorded under the cellular segment. However, as from 2017, in view of updates to our sales strategy and the launch of television services, sales of Wi-Fi only devices and other devices not directly related to cellular services, including televisions, were recorded under the fixed-line segment instead of the cellular segment.

4B.5b Fixed-line Services and Products

Fixed-Line Services

We offer fixed-line services that include internet services, ILD services, transmission services, telephony services (including SIP services) and TV services.

ISP services. As an internet service provider providing access to the World Wide Web, we offer our customers, in addition to access, additional ISP services including email accounts, Wi-Fi networking as well as additional value added services such as anti-virus and anti-spam filtering. We also offer a bundled package that includes infrastructure and ISP access services following the wholesale market reform, and since 2017, we also offer access services over our own optic fiber fixed-line infrastructure in certain parts of the country, with speeds up to 1 GB. As of March 2018, tens of thousands of households are able to connect to Partner's fiber services. Furthermore, we offer our business customers additional tailored value services that combine an entire array of solutions including: network and data infrastructures, advanced information security solutions, integration solutions, designated services for customers with multiple branches and commercial networks, business information storage in a secured and advanced data center and cloud services. ISP services include the leasing of related equipment including modems and routers.

ILD services. As an international long distance provider, we offer our residential and business customers international telephony services including direct international dialing services, international and domestic pre-paid and post-paid calling cards, and call-back services. Most of the pre-paid calling cards are sold to foreign workers in Israel. In addition, we offer our business customers international toll-free numbers that offer fixed rates on calls from anywhere in the world. As an international long distance provider, we also provide hubbing traffic routing between network operators for termination of long distance calls outside of Israel.

Transmission. We provide fixed-line transmission and data capacity services. Our fixed-line capacity also includes capacity which we lease from other fixed-line telecommunications service providers as well as inland fiber optic infrastructure and complimentary micro wave radio links. The services we offer include primarily connectivity services, on an SDH (Synchronous Digital Hierarchy) transmission network, by which we provide high quality, dedicated, point-to-point connection for business customers and telecommunications providers, as well as fixed-line services to business customers. We also provide international transmission services to our business customers between Israel and other countries.

VoB and PRI. The VOB service allows business and residential customers to make and receive telephone calls over the Internet through an internet connection. The PRI is a landline network service connecting organizational switchboards to Partner's network and allows business customers to make multiple calls simultaneously. We offer traditional voice services to business customers throughout Israel.

Television services. In June 2017, we launched our OTT television services that provide our customers with an enhanced user interface experience of television services based on an open platform, the Android TV. Partner TV service offers our customers dozens of live linear channels, including "catch up" capability of up to 14 days, video on demand library, direct access to YouTube and Netflix content through a dedicated button on our remote control allowing our customers to access their favorite show with a simple click. We also enable customers to subscribe and pay for Netflix through the Partner TV bill. Partner TV service includes a fully supported 4K set-top box with an Android TV operating system which enables the viewer to add content, games and music applications directly from the Google Play store. Our full TV service can also be accessed by smartphones and tablets (TV everywhere). As of the date of this report, Partner TV service, which has the highest growth rate among all TV operators in Israel, reached over 64,000 subscribed households.

High speed broadband fiber optic based network. In August 2017, we launched the commercial phase and acceleration of our fiber optic network in residential areas throughout the country, which provides for the first time a more advanced and cost-effective alternative to the existing fixed infrastructure in Israel. See "Item 4B.8d Fiber optics network".

Value-Added Services

In addition to standard fixed-line value-added services, we offer a variety of value-added services such as defense and security services for the computer and e-mail that include, among others, parental monitoring control, firewall, web hosting, anti-virus and site filtering based on the customer's restriction definition, and other value added internet services including hosting, cloud-based hosted services and virtual switchboard. We also offer an upgraded data center that provides customers with business solutions on a secure site including hosting services (storage and maintenance of physical and virtual servers, website hosting, information storage and disaster recovery site), management communication services, and integrated services.

Fixed-Line Equipment and Devices

Equipment and devices sales in the fixed-line segment include sales and rental of modems, domestic routers, servers, smartboxes and related equipment, as well as sales of audio visual equipment and devices and other related equipment. In addition, we provide our business customers with office communication Private Branch Exchanges (PBX). This service, available on the premises or cloud-based, provides all telephony services including unified communication features as well as Direct Inward Dialing (DID), which provides a block of telephone numbers for calling into the customer's PBX system. DID allows us to offer our customers individual phone numbers for each person or workstation within the company without requiring a physical line into the PBX for each possible connection.

4B.5c Tariff Plans

As of December 31, 2017, approximately 87% of our cellular subscriber base (approximately 2,320 thousand subscribers) subscribed to post-paid tariff plans, and 13% (approximately 354 thousand subscribers) subscribed to pre-paid tariff plans.

Business cellular tariff plans. Our post-paid cellular business tariff plans offer features attractive to business users such as bundles including unlimited amounts of call minutes and SMS (subject to reasonable use) as well as browsing packages; bundles with fixed amounts of call minutes and SMS and browsing packages; tariff plans with fixed tariffs for airtime usage without adding the interconnect charges imposed by other cellular and fixed-line providers for calls made by our subscribers that terminate on third party networks; and providing discounts for calls to designated numbers within a subscriber's calling circle. Some of these bundles also include a limited amount of international call minutes and other value-added services. Furthermore, some of our contracts with large business customers with over

100 subscribers include commitment terms with exit fees for early termination.

39

Private customer cellular tariff plans. Most of our post-paid cellular tariff plans for private customers are bundles including unlimited amounts of call minutes and SMS (subject to reasonable use) as well as browsing packages. Some of these bundles also include a limited amount of international call minutes and other value-added services. In addition, we offer a limited number of bundles with fixed amounts of call minutes and SMS and browsing packages. The elements of our cellular tariff plans for post-paid private customers are packaged and marketed in various ways to create tariff packages attractive to target markets, including families, military personnel, youth, students, family members of business customers and other sectors. Our private customer subscriber agreements do not have any commitment periods.

Since 2012, the Company has also marketed cellular tariff plans under an alternative brand, “012 Mobile”, based on the 012 Smile brand. Under this brand, the Company offers plans mainly under a digital self-service model through a dedicated website (including web-chat with customer representatives) at competitive prices. These tariff plans were launched in order to compete with offers of new operators launched in 2012. Under our pre-paid plans, upon purchase of a SIM card or phone card or prepayment by credit card or cash, customers can use our network, including some of our value-added services, without the need to register with us or enter into any contract. Our pre-paid plans enable us to compete in the pre-paid cellular services market.

Fixed-line tariff plans. For our Fixed-Line Services, we have a wide range of diverse plans to meet the needs of the various sub-markets-ISP, ILD, transmission, TV, VOB and PRI. We have also launched an unlimited plan for our VoB packages. In the ILD services market we have tariff plans based on call destinations and level of use. Our Internet Service prices and our wholesale infrastructure services prices are based on bandwidth speed. We offer a variety of internet solutions for home and business use according to each customer's needs. With our entrance into the TV services market, we now offer our customers bundled plans that include infrastructure, internet and TV services as well as triple offers that include infrastructure/ internet, TV and home telephony services.

4B.6 SALES AND DISTRIBUTION

4B.6a Customer Care

We apply a multi-channel approach to target various market segments and to coordinate our cellular and fixed-line sales strategy for both our business as well as private customers. Our customer support and service provides several channels for our customers: call centers, walk-in centers and self-service support, which include web-based services, mobile application, Interactive Voice Response (“IVR”), automated SMS, messaging and digital chat.

Call Centers. Guided by our aim to provide high quality service, our call-center services are divided into several sub-centers including business, private and pre-paid for cellular and fixed-line services, and specialized support and services (finance, network, international roaming and data transfer related issues). The call center services are provided in several languages and also provide chat, digital and SMS services through the Company’s websites.

Walk-in Centers. We currently operate 25 service and sales centers across Israel. These centers provide a face-to-face, uniformly designed, contact channel and offer all services that we provide to customers: sales, handset upgrade, handset maintenance, tablet sales, fixed-line services (such as VOB and ISP) and other services (such as finance, rate-plan changes and subscription to new services) as well as accessories sales. Lease agreements for our retail stores and service centers are for periods of two to ten years. We have the option to extend the lease agreements for different periods including the initial lease period. See also note 19 to the consolidated financial statements.

Self-Service. We provide our customers with various self-service channels, such as IVR, web-based services, and services via SMS, mobile and smartphone applications. The services provided through these channels include general and specific information, tariff plans, account balance, billing-related information and roaming tariffs. They also provide customers with information regarding trouble shooting and handset operation, and enable customers to activate services and to download content as well as to purchase various services and update tariff plans.

Technical support. The Company's in-house technicians provide our customers with support services and initial TV and fiber installation services.

All of our service channels are monitored and analyzed regularly in order to ensure the quality of our services and to detect areas that require improvement.

Management Systems. Our management systems are certificated and monitored by IQC (The Institute for Quality Control, an RVA accredited Certification Body authorized by Bureau Veritas Quality International) to the appropriate international standards:

ISO 9001:2015, which focuses on fulfillment of clients and legal requirements;

ISO 14001:2015, which coordinates our commitment to habitat and environment; and

OHSAS 18001:2007, which directs our efforts to provide a safe and healthy work environment at our premises.

4B.6b Sales and Distribution Channels

We distribute our services and products through direct sales channels and indirect sales channels.

4B.6b - i Direct Sales Channels

Sales and Service Centers: Our walk-in centers in stores and malls also serve as sales centers. The face-to-face contact enables customers to get the “touch and feel” of new handsets, tablets, accessories and services demonstrated by our representatives. We have stands in some of our centers in cooperation with Apple called "CEP" –channel excellence program, in which we demonstrate Apple products to customers. As of December 31, 2017, we are the only cellular operator in Israel that has this type of agreement with Apple.

Direct Sales Force: Our sales force is comprised of sales and service representatives.

A team of representatives and customer account managers that support small to medium-sized businesses;

A team of corporate representatives and customer account managers who support large corporate customers;

A Small Medium Enterprises (“SME”) sales-force team located in regional offices focuses on individual and small business customers;

A telemarketing department conducts direct sales by phone (to private and business customers), initiates contacts with prospective customers and coordinates appointments for the sales representatives.

Our sales force undergoes regular training to improve their skills in selling advanced solutions such as cellular data, intranet extension and connectivity, virtual private networks, location based services, m2m services, and other value-added services that appeal to corporate customers.

In addition, as of December 31, 2017, we have 17 Partner stands in shopping centers throughout the country.

4B.6b - ii Indirect Sales Channels

We have agreements with many traditional dealers that provide over 60 points of sale, selling a range of our products. The private dealer network is an important distribution channel because of its ability to attract existing cellular users to our network. Our dealer network focuses primarily on sales to individual customers and, to a lesser extent, small

business customers. These dealers specialize in sales for post-paid customers and handset sales.

41

In addition we have agreements with prepaid distributors that specialize in sales for pre-paid customers and distribution of pre-paid plans to sub-dealers.

We also have specific dealers that target different segments of the Israeli population with the appropriate style, language and locations. We provide regular training to employees of our dealers to update them on our products and services. Our managers visit dealers on a regular basis to provide information and training, answer questions and solve any problems that may arise. We pay our dealers commissions; however, dealers are not entitled to commissions for any customers that terminate their service within 90 days of activation.

4B.6b - iii Online Sales Channels

Our cellular and fixed-line services are also available to be purchased online. We also manage an online service for the purchase of handsets and other equipment that we sell.

4B.7 POST-PAID CUSTOMER CONTRACTS AND CREDIT POLICY

Our standard customer agreements with most of our private customers do not include commitment periods, since they are not permitted under Israeli law. Some of our business customers that have more than 100 cellular subscribers enter into an agreement with a commitment period of up to 36 months, as do some of our fixed-line customers with monthly invoices of over NIS 5,000. Customers are billed monthly for charges per services. Roaming access for direct debit cellular customers is subject to credit scoring by our credit supervisors with the assistance of outside credit agencies and may require additional guarantees or deposits.

Our customers pay for their services by credit card or by direct bank debit. All credit card accounts are subject to an initial maximum credit limit each month, which varies depending upon the type of credit card and for which we obtain prior approval from the card issuer. When a customer account reaches this limit, we may seek approval from the card issuer. If the card issuer does not grant the approval, we may require the customer to provide other means of payment or arrange an increase in the approved limit from his credit card issuer. If this does not occur, the customer's usage may be limited or suspended, after receiving our prior notice of such limitation or suspension, until we receive a cash deposit or guarantee from the customer.

Most of our customers pay for equipment devices with long term financing plans whereby the customer pays for the equipment through monthly payments (generally between 12 and 36 months), which are charged directly to their credit card or to their monthly bill. Where the customer opts to pay the monthly payments via their monthly bill, the outstanding installment payments are not secured. Customers acquiring more than a certain number of device sales are subject to a credit scoring review performed by Partner's credit supervisors with the assistance of outside credit agencies. During 2016, changes were made to the credit scoring review process whereby stricter requirements were imposed for customers to be accepted for long term financing plans. These changes significantly adversely affect the level of sales of equipment with long term financing plans. See also "Item 5A.1b Business Developments in 2017".

4B.8 OUR NETWORK

We have built an extensive, resilient and advanced network system in Israel, allowing us to offer extensive coverage and consistent high quality. During the years ended December 31, 2016 and 2017, we made capital expenditures of NIS 73 million and NIS 152 million (\$44 million), respectively, in our network infrastructure, including in our new fiber optic network. See "Item 5B.4 Total net financial debt".

4B.8a Overview

Our network is a converged fixed and mobile telecommunications network. For mobile services we built a multi generation (2G, 3G & 4G) wireless network, which offers full interactive multimedia capabilities. This technology brings wire-free networks significantly closer to the capabilities of fixed-line networks. Improvements in coding and data compression technology provide better voice quality and more reliable data transmission. UMTS is the global standard adopted for the implementation of third generation wireless telecommunications capable of data rates of up to 42 Mbps in the down-link and is the 3G technology we use. HSPA is a technological enhancement to our 3G services that offers subscribers the ability to access our 3G services at higher speeds for downloading (HSDPA) and uploading (HSUPA) data. LTE is the most advanced mobile network technology which is currently available in more than half of the macro base stations. Our LTE network has nationwide coverage and based on the existing spectrum of 20 MHz in 1800 MHz band and 10MHz in 2100 band can support up to 225Mbps in the downlink using carrier-aggregation and up to 50Mbps in the uplink.

Cellular Network Sharing Agreement. In November 2013, we entered into a 15-year Network Sharing Agreement with HOT Mobile that was approved by the Antitrust Authority Commissioner in May 2014 and by the Ministry of Communications in April 2015. Pursuant to the agreement, the parties created a 50-50 limited partnership in the form of a limited partnership under the name P.H.I. Networks (2015) Limited Partnership ("PHI"), the purpose of which is to operate and develop a radio access network to be shared by both parties starting with a pooling of both parties' radio access network infrastructures to create a single shared pooled radio access network ("Shared Network"). The parties have also established a 50-50 company limited by shares under the name Net 4 P.H.I Ltd., to be the general partner of the limited partnership. In August 2015, we were allocated a frequency bandwidth of 5MHz in the 1800MHz spectrum as a result of the 4G frequencies tender conducted by the Ministry of Communications in January 2015. PHI started to operate in August 2015, at which time each of Partner and HOT Mobile transferred to PHI certain employees who were previously engaged in their respective radio operations.

Both companies continue to compete and differentiate their services and be responsible for providing cellular telecommunication services to its own customers, including the provision of customer service, value-added services, marketing and sales. Each company continues to retain and operate its own core network.

According to the Network Sharing Agreement, HOT Mobile paid Partner a onetime amount of NIS 250 million ("Lump Sum"), and since April 1, 2016, (i) each party bears half of the expenditures relating to the Shared Network, and (ii) responsibility for the operating costs of the Shared Network is apportioned according to a pre-determined mechanism, according to which one half of the operating costs are shared equally by the parties, and one half are divided according to the relative volume of traffic of each party in the Shared Network ("Capex-Opex Mechanism"). See "Item 5A.1d Network Sharing Agreement with HOT Mobile" and notes 9 and 26(d) to the consolidated financial statements with respect to balances and transaction with PHI.

In May 2014, the Antitrust Commissioner approved the Network Sharing Agreement, subject to conditions, the most important of which are set forth below:

• Prohibition on exchange of information that is not required for the activities of PHI under the Restrictive Trade Practices Law, 1988 ("Restrictive Trade Practices Law"). See 4B.12e - v Anti-Trust Regulation.";

• Limitations with respect to serving as an officer or employee in either Partner or HOT Mobile concurrent with serving as an officer or employee of PHI and certain cooling off periods were set in case of transition of officers and employees from PHI to the companies. However, this should not prevent PHI from employing employees or officers, who are currently serving as employees or officers in the companies and does not prevent an office holder in Partner or HOT Mobile from serving as a director in PHI's general partner's board of directors;

• Rules regarding the administration and documentation of the meetings of PHI organs were set;

Either of the companies shall be allowed, at any time and at its sole discretion, to engage in an agreement with a third party for the provision of cellular telecommunications services that involves use of the core network of that company. All of the rights and obligations deriving from such service agreement shall apply solely to that company and PHI shall not be a party to such service agreement and will not be entitled to payments payable pursuant to it;

After a period of seven years from the date of the Commissioner's approval or after a period of six years from the issue date of all the approvals of the Ministry of Communications, whichever is earlier, the Commissioner shall be allowed to notify the companies of the cancellation of his resolution, if he has concluded that the establishment of PHI, its existence or operations are liable to be substantively detrimental to the competition ("Cancellation Notice"). If a Cancellation Notice is issued, a graduated layout of dismantling PHI activity was set in the Commissioner resolution, as follows:

- a. at the end of two years after the issuance of the Cancellation Notice, PHI shall cease all activity apart from the management, maintenance and operation of the passive elements of the network.
- b. at the end of five years after the issuance of the Cancellation Notice, the companies shall dismantle PHI and shall separate their assets fully and entirely.

In April 2015, the Ministry of Communications also approved the Network Sharing Agreement.

4B.8b Infrastructure

As of December 31, 2017, our network consists of the following main elements:

Our radio access network domain consist of 2,005 macro GSM base transceiver stations, 19 micro GSM base transceiver stations and 207 indoor GSM transceiver stations, all linked to 7 base station controllers (HDBSC);

- 2,279 macro UMTS base transceiver base stations (eNodesBs), 16 micro UMTS base transceiver stations and 560 indoor UMTS transceiver stations, all linked to 21 radio network controllers;

2,584 macro LTE base transceiver base stations (eNodesBs), 10 micro LTE base transceiver stations and 200 indoor LTE transceiver stations.

Our core network domain consisted of 3 mobile switching centers, 3 media gateways, 2 service GPRS support node/mobility management entity and 2 gateway GPRS support node/evolved packet gateway.

The base transceiver stations, the mobile switching centers and the radio network controllers are interconnected by 5,250 transmission links for voice services, and a dedicated IP radio access network and a mobile packet backbone network (IP-RAN, MPBN) for voice and data traffic for the 3G and 4G network.

Ericsson is our sole radio and core network equipment supplier. See "Item 4B.8g Suppliers".

Our fixed-line network domain consists of circuit-switched and Voice over Internet Protocol (VoIP) platforms. Ericsson, Dialogic Networks, Sonus, Broadsoft and ACME Packet supplies our VoIP solution, whereas the circuits-switched services utilize the mobile switching center platforms alongside Sonus's switches. The International Long Distance network domain consists of Dialogic ILD Switch, together with NSN's Signaling Transit Point.

In addition, our network is interconnected with two public switched telephone companies, Bezeq and HOT Telecom, in several locations across Israel. Our network is also connected to all of the cellular networks, all the Israeli international operators, the fixed-line telephone network of the Palestine Telecommunication Co. Ltd. ("Paltel"), and the cellular network of Wataniya Palestine Mobile Telecommunication Company ("Wataniya"), and indirectly to the cellular network of Palestine Cellular Communications Ltd. ("Jawwal"). Our transmission network is made up mainly by our own microwave links and fiber optic infrastructure, while for sites that are unreachable with our own transmission, we lease lines from Bezeq and other operators. Currently approximately 10% of our transmission network consists of leased lines. Our fiber-optic and microwave transmission network enables us to reduce our transmission costs as well as to provide our customers with bundled services of data and voice transmission and fixed-line services. Currently, our transmission network has more than 19 hundred kilometers of fiber optics and more than 12 hundred microwave links. See "Item 4B.8d Fiber optics network".

Our radio networks covered 99% of the Israeli population at year-end 2017. We are continuing to expand and improve the coverage, capacity and quality of our LTE network.

4B.8c Network Design

Our primary cellular network design objective is to further expand and improve our network to provide high voice, video and packet quality, service reliability, high capacity and high coverage quality. In formulating our network design objectives, we have been guided by our business strategy to continue to broaden the highest quality network. The quality parameters that we seek to satisfy are those that we believe are important to cellular users: voice quality, high data rate packet sessions, low “blocked call” rate, low “dropped call” rate and deep indoor penetration, especially in densely populated areas or areas of special commercial interest. The two main examined parameters used to measure network performance are the setup call success rate and the dropped calls rate.

With these quality parameters in mind, we rolled out our UMTS/HSPA network starting in 2004, which shares locations with the GSM sites. In December 2007, we signed an agreement with LM Ericsson Israel Ltd. (Ericsson”) for the replacement of third party 3G radio equipment existing in our network, and in October 2010, we signed an agreement with Ericsson for the upgrade of our existing fixed-mobile network and the deployment of our fourth generation network.

We use monitoring probes and counters to ensure network quality.

Our transmission network design confers the following benefits: (i) necessary bandwidth for GSM and UMTS/HSPA and LTE services; (ii) resilience; (iii) use of high transmission rate back-bone routes based on Synchronous Digital Hierarchy; and (iv) the ability to utilize a new generation of sophisticated technology to optimize the system and increase capacity where necessary. Our switching architecture is based on two STP switches connected to all of our systems and platforms and three MSCBCs and MGWs.

In our Fixed-Line business we offer telephony lines using VoB technology, SIP voice trunks, PRI, Internet Services, data transmission and ILD services targeting households and business customers in the Israeli market. These services are provided over third parties’ existing network infrastructure as well as our own partially country covering infrastructure. In order to provide the Fixed-line Services in the residential market, we developed a home gateway box (smartbox/all in one router), that provides the customer with a setup of a home network Wi-Fi based on the protocol 802.11n & AC, Voice FXS and DECT supported phones, and built-in firewall. We also develop home gateway for our LTE, G.FAST/fiber infrastructure. This solution enables us to provide services to our customers such as call “hijack” which allows customers to retrieve incoming mobile line calls on their fixed-line and vice-versa, improved email accounts, anti-virus and site filtering based on the customer’s restriction definition.

4B.8d Fiber optics network

In July 2006, we purchased Med-1 I.C.–1 (1999) Ltd.'s fiber-optic transmission business. Since then we continued to expand our fiber optics network.

MoC Regulations and a recent amendment to the Telecommunications Law now allow us to make use of the ducts and manholes (and other passive network elements) deployed by landline domestic operators (including Bezeq and HOT) in order to deploy our own fiber optic cables.

Following these regulatory developments, in August 2017, we commercially launched the expansion of our fiber optic network. Our investment in the expansion of our fiber optic network is part of our strategy to maintain our technological leadership in the market, compared to current market offerings. As of March 2018, tens of thousands of households are able to connect to Partner's fiber services. The fiber optic network enables us as a comprehensive communications group to offer increased internet speeds compared to current market offerings, manage the quality of service and customer experience, and offer additional advanced services. The combination of the fiber optic network together with Partner TV Service, which can be offered over our fiber optic network, provides us with a unique advantage and reduces our dependency on the fixed-line infrastructure operators.

In November 2017, the Company announced that it is holding negotiations with Cellcom regarding a potential long term cooperation agreement, for the deployment of a fiber optic infrastructure by both companies whereby each company will be entitled to purchase from time to time, as per its needs and its sole discretion, fiber optic infrastructure services (including indefeasible right of use) from the other company's present and/or future fiber optic infrastructure in order to connect residential buildings throughout Israel. The finalization of the agreement is subject to further negotiations between the companies and if concluded the execution of the agreement will be subject to the required regulatory approvals.

45

4B.8e Spectrum Allocation and Capacity

Spectrum availability is limited and is allocated by the Ministry of Communications through a licensing process. Pursuant to the terms of our license and subsequent allocations, we were allocated 2x10.4 MHz in the 900 MHz frequency band, of which 2 x 2.4 MHz are shared with Jawwal which operates in the West Bank and the Gaza Strip and an additional 2 x 2.4 MHz of Jawwal's spectrum is partially available to us.

We were also allocated two additional bands of spectrum: 2 x 10 MHz of UMTS/HSDPA third generation in the 2100 MHz frequency band. We operate GSM 900 MHz band base transceiver stations that enhance the capacity of our network's quality. In May 2012, we shifted 5MHz of our 900MHz spectrum from the 2G GSM network to the 3G HSPA+ network. In July 2014, we shifted 10MHz of our 1800MHz spectrum from the 2G GSM network to the 4G LTE network. In March 2015, the Minister of Communications approved the results of the tender bid process in which we won an additional 5 MHz in the 1800 spectrum. HOT Mobile was also awarded two bandwidths of 5 MHz of frequencies in the 1800 band, both of which are expected to be used for the limited partnership created by the companies. Now that we have been allocated these frequencies, and have successfully reformed our existing frequency bands and successfully implemented the Network Sharing Agreement with HOT Mobile, our total spectrum available for 4G is 20 MHz, which allows us to offer full 4G services. See "Item 4B.8a Overview – Cellular Network Sharing Agreement". We have amended the technical annex to our license in order to allow us to refarm some of our existing spectrum (in the 2100 MHz band) for the implementation of LTE Advanced and carrier aggregation technologies. In February 2017, the MoC approved the refarming (the conversion of existing frequencies to a different technology) of these frequencies.

For a discussion of the risks associated with regulatory developments in spectrum allocation, see "Item 3D.1b The MoC might require us to terminate the use of certain spectrum ranges which have been allocated to us, limit our use of such spectrum or fail to respond to our demands for the allocation of additional spectrum. Such eventualities may adversely affect our business and results of operations."

4B.8f Site Procurement

Once a new coverage area has been identified, professional staff determines the optimal base station location and the required coverage characteristics. The area is then surveyed to identify network sites. In urban areas, typical sites are building rooftops. In rural areas, masts are usually constructed. Professional staffs also identify the best means of connecting the base station to the network, for example, via leased or owned and operated microwave or fiber links or wired links leased from Bezeq. Once a preferred site has been identified and the exact equipment configuration for that site decided, the process of obtaining necessary approvals begins.

The erection of most of these network sites requires building permits from local or regional authorities, as well as a number of additional permits from governmental and regulatory authorities, such as:

- erection and operating permits from the Ministry of Environmental Protection;
- permits from the Civil Aviation Authority, in certain cases; and
- permits from the Israeli Defense Forces.

See "Item 4B.12h Network Site Permits" for a description of the approvals that are required for the erection and operation of network sites and the requirement to provide indemnification undertakings to local committees.

4B.8g Suppliers

Suppliers for our cellular network. For a number of years, we purchased our network equipment, such as switching equipment, base station controllers and base transceiver stations and network software, from Ericsson and Nokia. Starting in January 2008, we purchase all our UMTS network equipment from Ericsson, and in 2010 we entered into an agreement with Ericsson, for the upgrade of our existing cellular networks and the deployment of our fourth generation network. The initial term of the inclusive agreement with Ericsson ended on December 31, 2014. We extended, with certain modifications, the maintenance period by additional periods until the end of 2018. Ericsson has gradually become our sole supplier of cellular core equipment and systems. See “Item 10C Material Contracts”. See also “Item 3D.2j We depend on a limited number of suppliers and vendors for key equipment and services. Our results of operations could be adversely affected if our suppliers and vendors fail to provide us with needed services and adequate supplies of network equipment, handsets and other devices or maintenance support on a timely basis.”

We continue to purchase certain network components, for our cellular, fixed and ISP services, from various other key suppliers. For example, Juniper Networks provides the Company with solutions for all network segments.

Handset and other equipment suppliers. Following the expiration of our previous agreement in 2016, in June 2016 we entered into a non-exclusive agreement with Apple for the purchase and resale of iPhone handsets in Israel for a three-year period. See “Item 10C Material Contracts”. During 2017, Apple was a major supplier of the Company’s iPhone handsets. We also purchase handsets and other equipment, including tablets and laptops, from Samsung and other vendors.

Suppliers for TV content and equipment. In May 2017, we partnered with Netflix, the world leading internet entertainment network, to make its services directly accessible through our TV service.

In addition, we have agreements with well known suppliers in the industry for the provision of the following:

- sports and kids content channels;
- set top boxes for our TV service;
- management system;
- encoding system;
- content distribution system (live channels and VOD) for end equipment (set top boxes and applications);
- application interface installed on set top boxes and cellular devices.

Suppliers for our fixed-line network. Bezeq and HOT Groups own the majority of the fixed-line telecommunications infrastructures in Israel. As a result, we rely on interconnection with the Bezeq and HOT Groups’ infrastructure. Bezeq supplies the Company with fixed-line transmission services for connecting traffic between approximately 10% of the Company’s sites. The HOT Group supplies the Company with interconnect lines between the broadband backbone and the ISP backbone. See “Item 3D.1c3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations.” In addition, for hard-line connection to all major Western European countries and the United States, TI Sparkle Israel (formerly Med Nautilus) supplies the Company with transmission services through its submarine infrastructure. See “Item 10C Material Contracts”.

Dialogic Inc. and Broadsoft Inc. supply us with switches for the fixed-line telephony services based on Internet Protocol (“VoIP”). As part of the mentioned above with Ericsson, these services will gradually shift to equipment

supplied by Ericsson.

4B.8h Interconnection

All telecommunications providers with general licenses in Israel have provisions in their licenses requiring them to connect their networks with all other telecommunications networks in Israel. Currently, our network is connected directly with all other telecommunications networks operating in Israel.

We are currently operating without any formal interconnect agreements with Bezeq. Day-to-day arrangements with Bezeq substantially conform to a draft interconnect agreement negotiated with Bezeq. Bezeq is required by law not to discriminate against any licensed telecommunications operator in Israel with respect to the provision of interconnect services. We currently pay Bezeq an interconnection fee based on a tariff structure set forth in the Interconnection Regulations (Telecommunications and Broadcasts) (Fees for Interconnection) (2000) (“Interconnection Regulations”).

47

We have formal interconnect agreements with all Israeli cellular and with the other fixed-line and voice over cellular companies. The interconnect tariffs are set forth in the Interconnection Regulations that impose a uniform call interconnect tariff for all cellular operators.

Our network is connected directly to Paltel, the Palestinian fixed-line operator, Wataniya, a Palestinian cellular operator, and indirectly to Jawwal, the cellular operator of Paltel. The interconnect tariffs are set out in commercial agreements.

Two of our subsidiaries have a domestic fixed-line license. One of our subsidiaries- Partner Land-Line Communications Solutions LP is connected directly with other telecommunication networks operating in Israel and the other is indirectly connected to other telecommunication networks, through said entity. The interconnection fees are set by the Interconnection Regulations.

4B.9 COMPETITION

An overview of our principal competitors and of some aspects of the competitive environment for telecommunications services is set forth below. For further information regarding the impact of regulation and regulatory changes on competition, including measures to enable new service providers to enter the market, and the competitive pressures arising from the development of full-service telecommunications providers and new technologies, see "Item 3D.1 Risks Relating To The Regulation Of Our Industry." and "Item 3D.2a As a result of substantial and continuing changes in our regulatory and business environment, our operating results and profitability have decreased significantly in the past five years, with a loss for 2015. In 2017 we earned profits of NIS 114 million (US\$ 33 million). Profit without the impact of the early adoption of IFRS 15 in 2017 would have been NIS 61 million (US\$ 18 million), and profit in 2016 was NIS 52 million. Our operating results may again decline in 2018 and beyond, which may adversely affect our financial condition."

Within the Israeli telecommunications market there are 4 major communication groups: Bezeq, HOT, Cellcom and Partner, as well as a number of smaller operators. See Item "3D.2f Competition resulting from the full service offers by telecommunications groups and additional entrants into the mobile telecommunications market, as well as other actual and potential changes in the competitive environment and communications technologies, may continue to cause a further decrease in tariffs, an increase in subscriber acquisition and retention costs, and may continue to reduce our subscriber base and increase our churn rate, each of which could adversely affect our business and results of operations."

4B.9a Competitors in the Cellular Services market

There are currently six cellular telephone network operators in Israel: Partner, Cellcom, Pelephone, HOT Mobile, Golan Telecom and Xfone. Except for Golan Telecom and Xfone, these cellular operators are part of the four main telecommunications groups. In addition, there are three active MVNO operators – Hashikma Communications Marketing Ltd., ("Rami Levy"), Telzar 019 International Telecommunications Services Ltd. ("Telzar") and Cellact Communications Ltd. ("Cellact").

We compete principally on the basis of telecommunications service quality, brand identity, variety of handsets and other equipment, tariffs, value-added services and the quality of customer services.

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

The table below sets forth an estimate of each operator's share of total subscribers in the Israeli cellular market at year-end for the years 2013 to 2017.

Estimated Market Shares*	2013	2014	2015	2016	2017
Partner	29 %	28 %	27 %	26 %	25 %
Cellcom	31 %	29 %	28 %	28 %	27 %
Pelephone	26 %	25 %	26 %	23 %	23 %
HOT Mobile	8 %	10 %	11 %	14 %	15 %
Golan Telecom and others	6 %	8 %	8 %	9 %	10 %

* Based on Partner subscriber data, as well as information contained in published reports, and public statements issued by other operators.

Cellcom. Cellcom is an Israeli corporation founded in 1994 that is traded both on the Tel Aviv stock exchange as well as NYSE. Cellcom's major beneficial shareholder is Discount Investment Corporation Ltd., which is controlled by Mr. Eduardo Elzstain. In August 2011, Cellcom acquired Netvision, an Israeli fixed-line operator. Cellcom operates nationwide cellular telephone networks as well as fixed-line telephony, transmission and data services and has partially deployed LTE. In 2014, Cellcom launched OTT television services. In April 2017, Cellcom announced that following receipt of regulatory approvals, its 3G and 4G networking sharing and 2G hosting services agreement with Golan Telecom, came into effect. In addition, in March 2017, Cellcom announced that it received regulatory approval for a networking sharing and hosting services agreement with Xfone. See "Item 3D.1d The Network Sharing Agreement we entered into with HOT Mobile may be terminated earlier than we expected due to regulatory intervention. In such case we will be required to split the shared network with HOT Mobile, and the resources, time and expense it may take us to have our own network on a nation-wide coverage may be substantial and could also materially harm our business and the results of operations at such time. Network sharing and similar agreements entered into by our competitors may place us at a competitive disadvantage."

Pelephone. Pelephone is an Israeli corporation that is a wholly-owned subsidiary of Bezeq, Israel's largest telecommunications provider and the primary fixed-line operator that is controlled by B Communications Ltd. B Communications Ltd. is indirectly controlled by Shaul Elovitz, the controlling shareholder of Eurocom Communications Ltd. Bezeq and its subsidiaries offer fixed-line telephony services, cellular telephony services, PRI, internet broadband access, ISP services, transmission and data communications services, ILD services and multi-channel television services.

HOT Mobile. HOT mobile is held indirectly by the Altice Group, a French media group, controlled by Mr. Patrick Drahi, who also holds control of HOT Telecommunications Systems Ltd. ("HOT Telecommunications"). The HOT Group's main areas of activity are multi-channel television services, fixed-line telephony services, PRI, internet broadband access, transmission and data communications services as well as ISP services through its subsidiary HOT-NET.

In April 2015, the MoC approved a 15-year network sharing agreement between Partner and HOT Mobile pursuant to which the parties created a limited partnership, to operate and develop a radio access network to be shared by both parties. See "Item 4B.8 Our Network- Cellular Network Sharing Agreement".

Other Operators

Golan Telecom. Since April 2017, Golan Telecom, is held by Electra Consumer Products Ltd., ("Electra") following the acquisition from Michael Golan, Xavier Niel and the Parienti family. In April 2017, Electra announced that following receipt of regulatory approvals, it finalized the acquisition of Golan Telecom and the 3G and 4G networking sharing and 2G hosting services agreement with Cellcom which came into effect. Golan Telecom began operations in early 2012 after winning a Ministry of Communications' tender offer for frequencies in the 2100 MHz spectrum.

Xfone. Xfone is a privately owned telecommunications company that provides telecommunications services, was awarded a 5MHz frequency band in the 1800 spectrum and recently entered the market as the sixth facility-based cellular operator. Xfone offers cellular services as well as ISP and ILD services.

MVNOs. The Ministry of Communications has granted MVNO licenses to various companies, some of which have entered into hosting agreements with cellular operators. The major MVNOs are Rami Levy, which is a subsidiary of a major Israeli discount supermarket chain; Telzar, an ILD operator and Cellact which is owned by Cellact Ltd., a communications group active also in the content field.

In May 2013, we signed an MVNO agreement with Telzar with respect to their use of Partner's network as an MVNO.

Following a hearing published by the Ministry of Communications, in November 2014, the Ministry published an administrative decision, regarding the pricing of MVNO hosting by cellular operators. The MoC has decided that the reference point for whether a hosting price is considered reasonable will be the most favorable business proposals each cellular operator has offered to its commercial subscribers. An MVNO that claims that the hosting conditions prevent it from competing and does not reach an agreement with a cellular operator to change them, particularly as regards the price, may request the Minister of Communications to evaluate whether they are reasonable. As a result, the pricing we charge to host MVNOs on our network may be affected causing an adverse impact on our revenues.

In addition, Paltel operates a GSM mobile telephone network under the name "Jawwal" in the Palestinian Administered Areas. Paltel also operates a fixed-line network. Paltel's GSM network competes with our network in some border coverage overlap areas. A second Palestinian operator, Wataniya launched its GSM network during 2009.

Several service providers offer competitive roaming solutions. The service is offered, among others, by the International Long Distance vendors as well as by specialized enterprises. See also "Item 3D.1i Potential future regulation of roaming services may decrease our roaming revenues and negatively affect our income."

Market Saturation. Because the Israeli cellular market has reached a level of full saturation, except for natural market growth through the growth of population, any acquisition of new subscribers by any service provider typically results in a loss of market share for its competitors.

4B.9b Competitors in Fixed-line Services

In the fixed-line market, our main competitors are Bezeq, Israel's largest telecommunications provider and the primary fixed-line operator, HOT Telecom, and other telecommunication services providers, including Cellcom who operate in the fixed-line market. The Bezeq Group, the HOT Group and Cellcom provide cellular telephony services, ILD services, PRI, internet broadband access, ISP services, transmission and data communications services and multi-channel television services.

We compete principally on the basis of the variety of telecommunications services and offers which include bundled and triple service packages, service quality, brand identity, the variety of handsets and other equipment, tariffs and value-added services.

The Bezeq Group. The Bezeq Group is under structural separation rules which apply to management, employees, assets, marketing and finance and data systems. Starting in 2010, the Ministry of Communications has allowed the Bezeq Group to market bundled telecommunications services to the private sector, subject to certain conditions and limitations, including provisions which prevent Bezeq from discounting the price of bundled services from their unbundled prices and from including its fixed-line telephony service within bundles. See "Item 4B.2 Broadband and Internet services." Following implementation of the broadband wholesale market, the requirement for structural separation may be removed, which would allow Bezeq to take advantage of its nationwide presence and cross-subsidization to market and sell more competitive and attractive offers than we will be able to offer. Bundled offerings have become more frequent in Israel and have caused price erosion in the services included. See "Item 3D.1c3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations."

The HOT Group. The HOT Group may offer a bundle of services only including fixed-line telephony, broadband infrastructure and multi-channel television (“Triple”). The bundle of services currently offered by the HOT Group does not include cellular services (other than a bundle of cellular services with ISP services offered by its subsidiaries HOT Mobile and HOT-Net Internet Services Ltd. (“HOT-NET”).

50

The Ministry of Communications allowed HOT Telecom LLP, HOT Telecommunication and HOT Mobile to sell and market each other's services and exchange information regarding such marketing activities.

Once an effective wholesale fixed-line market is operating, the Ministry of Communications may cancel the structural separation imposed on the Bezeq and HOT Groups. This will allow the groups to offer attractive bundles that include all of the above services that may result in a loss of market share by Partner in all relevant telecom markets. See "Item 3D.1c3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations."

The Cellcom Group. Cellcom provides landline telephony, transmission, PRI, ISP and data services through inland fiber optic transmission and complementary microwave links to business customers and private sectors. Since February 2015, Cellcom began marketing an ADSL infrastructure product (wholesale Bit Stream Access service provided over Bezeq's network). During 2015, Cellcom entered the television market using hybrid OTT-DTT television services which may be bundled with additional IP TV or over the top (OTT) offerings.

In the ILD services market, we compete with Netvision from the Cellcom Group, Bezeq International, Xfone, Hashikma Communications Marketing Ltd., Telzar 019 International Telecommunication Service Ltd, Golan Telecom International Ltd. and HOT Mobile International Telecommunications Ltd.

In the ISP services market, we compete with Netvision, Bezeq International, HOT Net from the HOT Group, Xfone, Triple C Cloud Computing Company Ltd., Telzar 019 International Telecommunication Service Ltd, Qwick linq 011 International Ltd., and 099 Primo Communications Ltd.

In the TV services market, we compete with Yes, a subsidiary of Bezeq, which offers TV services provided via satellite and via OTT, HOT that offers TV services provided via cable and via OTT, Cellcom that offers hybrid OTT-DTT TV services and Triple C Cloud Computing Company Ltd. that offers TV services via OTT. In addition, there are international VOD content providers that offer complementary TV content. See also "Item 4B.2 Special characteristics of the Fixed-Line Telecommunications Industry in Israel".

Israel Broadband Company (IBC). IBC received a general license for the provision of fixed-line telecom services (infrastructure) and for the establishment of a nationwide optic fiber network using the Israeli Electric Company's infrastructure in August 2013. IBC is owned by Israel Electric Corporation (40%) and a consortium of companies elected as the winning bidder in the election process, which is comprised of the following companies: ViaEuropa Israel Ltd., RAPAC Communication & Infrastructure Ltd., BATM advanced Communication Ltd., Tamares Holdings Sweden AB and Zisapel Properties (1992) Ltd. and Cisco Systems Finance International (60%). Although IBC is in principle permitted to provide its services only to other telecommunications licensees on a wholesale basis, IBC has introduced a new business model which enables it to reach the retail market through the services of ISPs who sign agreements with them. Currently, IBC has agreements with the relatively small ISPs while the three major ISPs in Israel (Bezeq International, Netvision and Partner) have no distribution agreements with IBC. IBC has retained Rothschild Bank in its attempt to find a strategic investor. Partner is examining the feasibility of such investment, as are other entities.

4B.10 INFORMATION TECHNOLOGY

We depend upon a wide range of information technology systems to support network management, subscriber registration and billing, customer service, marketing and management functions. These systems execute critical tasks for our business, from rating and billing of calls, to monitoring our points of sale and network sites, to managing highly segmented marketing campaigns. We have devoted resources to expanding and enhancing our information technology systems, including Customer Relations Management ("CRM") systems, which have contributed to our customers' satisfaction with our service, as well as updating our financial management and accounting system. We

believe these systems are an important factor in our business success.

While many of our systems have been developed by third-party vendors, all of them have been modified and refined to suit our particular needs. In certain instances, we have developed critical information technology capabilities internally to meet our specific requirements. In connection with our transformation into a diversified multi-service communications provider, we have completed significant milestones in our CRM upgrade project. In addition, the Company invested resources to improve the quality of the IT processes and billing accuracy.

51

4B.11 INTELLECTUAL PROPERTY

We are the registered owners of the trademark “Partner” in Israel with respect to telecommunications-related devices and services, as well as additional trademarks. We have also registered several internet Web domain names, including, among others: www.partner.co.il. 012 Smile is the registered owner of several trademarks in Israel with respect to telecommunications-related services that include the numbers “012”. In addition, 012 Smile has registered several internet Web domain names, including, among others, www.012.net and www.012.net.il. Partner is the assignee in a patent application filed in March 2012 that claims a method for delivering short messages originated by roaming prepaid subscribers. A Notice of Allowance was issued for the application in September 2013 and a patent was issued on January 14, 2014.

In addition, we are a full member of the GSMA Association. In conjunction with the promotion and operation of our GSM network, we have the right to use their relevant intellectual property, such as the GSM trademark and logo, security algorithms, roaming agreement templates, and billing transfer information file formats. We are eligible to remain a member of the GSMA Association for as long as we are licensed to provide GSM service.

4B.12 REGULATION

4B.12a Overview

We operate within Israel primarily under the Telecommunications Law, the Wireless Telegraphy Ordinance (New Version), 1972 (the “Wireless Telegraphy Ordinance”), the regulations promulgated by the Ministry of Communications and our license. The Ministry of Communications issues the licenses which grant the right to establish and operate mobile telephone and other telecommunication services in Israel, and sets the terms by which such services are provided. The regulatory framework under which we operate consists also of the Companies Law, the Securities Law, the Planning and Building Law, the Consumer Protection Law, 1981, and the Non-Ionizing Radiation Law. Additional areas of Israeli law may be relevant to our operations, including antitrust law, specifically the Restrictive Trade Practices Law, the Class Actions Law, 2006, the Centralization Law, 2013 and administrative law.

4B.12b Telecommunications Law

The principal law governing telecommunications in Israel is the Telecommunications Law and related regulations. The Telecommunications Law prohibits any entity, other than the State of Israel, from providing public telecommunications services without a license issued by the Ministry of Communications.

General licenses, which relate to telecommunications activities over a public network or for the granting of nationwide services or international telecommunications services, have been awarded to the Bezeq Group, to the HOT Group, to four other cellular operators besides Partner and to the international operators. In addition, the Ministry of Communications has granted MVNO licenses to a number of companies. During 2015 and 2016, the Ministry of Communications substituted almost all of the MVNO licenses and all general licenses for ILD services and unique-general licenses for fixed line services, with a single type of general unified license which governs all the services regulated under all of such licenses.

The Ministry of Communications has the authority to amend the terms of any license. The grounds to be considered in connection with such an amendment are government telecommunications policy, public interest, the suitability of the licensee to perform the relevant services, the promotion of competition in the telecommunications market, the level of service and changes in technology. The Ministry of Communications may also make the award of certain benefits, such as new spectrum, conditional upon the licensee’s consent to a license amendment. The Ministry of Communications also has the authority to revoke, limit or suspend a license at the request of the licensee or when the licensee is in breach of a fundamental condition of the license, when the licensee is not granting services under the license or is not granting services at the appropriate grade of service or when the licensee has been declared bankrupt

or an order of liquidation has been issued with respect to the licensee. Public interest may also be grounds for the rescission or suspension of a license.

The Ministry of Communications, with the consent of the Ministry of Finance, may also promulgate regulations to determine interconnect tariffs, or formulae for calculating such tariffs. Moreover, the Ministry of Communications may, if interconnecting parties fail to agree on tariffs, or if regulations have not been promulgated, set the interconnect tariff based on cost plus a reasonable profit, a benchmark (derived from relevant retail prices in Israel or abroad), or based on each of the interconnecting networks bearing its own costs.

The Telecommunications Law also includes certain provisions which may be applied by the Ministry of Communications to general licensees, including rights of way which may be accorded to general licensees to facilitate the building of telecommunications networks or systems and a partial immunity against civil liability which may be granted to a general licensee, exempting the licensee, among others, from tort liability with the exception of direct damage caused by the suspension of a telecommunications service and damage stemming from intentional or grossly negligent acts or omissions of the licensee. The Ministry of Communications has applied the partial immunity provisions to us, including immunity in the event that we cause a mistake or change in a telecommunication message, unless resulting from our intentional act or gross negligence. The Ministry of Communications initiated a review to re-evaluate the scope of the immunity provisions.

The Ministry of Communications is authorized to impose significant monetary sanctions on a license holder that breaches a provision of the Telecommunications Law or of its license.

Frequency Fees. Under the Telegraph Regulations, the Company is committed to pay an annual fixed fee for each frequency used. For the years 2015, 2016 and 2017, the Company paid a total amount of approximately NIS 65 million, NIS 64 million and NIS 63 respectively. See also note 17(1) to the consolidated financial statements. Under the above Regulations, should the Company choose to return a frequency band, such payment is no longer due. Commencing August 2016, the total amount of frequency fees of both the Company and HOT Mobile under the regulations is split between the Company and HOT Mobile, through PHI, according to the OPEX-CAPEX mechanism (see also note 9 to the consolidated financial statements).

Royalties. Pursuant to the Communications Regulations (Telecommunications and Broadcasting) (Royalties), 2001, royalties may be payable to the State of Israel calculated as a percentage of relevant revenues. However since 2013 the royalty rate has been set at 0%.

4B.12c Fair Competition and Antitrust Law

Provisions prohibiting Partner from engaging in anti-competitive practices can be found in our license and in the licenses of the other telecommunications operators, in the various telecommunications regulations and in the Restrictive Trade Practices Law. Our license emphasizes the principle of granting users equal access to the systems of each of the operators upon equitable terms. The Telecommunications Law also provides certain protection against disruption of telecommunications services.

The Restrictive Trade Practices Law is the principal statute concerning restrictive practices, mergers and monopolies. This law prohibits a monopoly from abusing its market position in a manner that might reduce competition in the market or negatively affect the public. The law empowers the Commissioner of Restrictive Trade Practices to instruct a monopoly abusing its market power to perform certain acts or to refrain from certain acts in order to prevent the abuse. Bezeq has been declared a monopoly in certain markets. HOT has been declared a monopoly in the multi-channel television market.

4B.12d Securities Administrative Enforcement and Antitrust Enforcement

The Israeli Securities Authority, or ISA may impose various civil enforcement measures, including financial sanctions, payment to the harmed party, prohibition of the violator from serving as an executive officer for a certain period of time, annulment or suspension of licenses, approvals and permits granted under securities and

securities-related laws and adopt an agreed settlement mechanism as an alternative for a criminal or administrative proceeding. In case of a violation by a corporation, the Israeli Securities laws provide for additional responsibility of the Chief Executive Officer in some cases, unless certain conditions have been met, including the existence of procedures for the prevention of the violation, as part of an internal enforcement plan. The Company is prohibited from insuring, paying or indemnifying directors or senior officers for financial sanctions imposed on them subject to certain exemptions set forth in the law.

The Company has implemented an internal enforcement plan and has implemented an internal antitrust enforcement plan intended to ensure that all relevant parties in the Company comply with antitrust laws and regulations. The Company provides ongoing guidance and training to the Company's directors, office holders and relevant employees.

4B.12e Regulatory Developments

See also “Item 3D.1RISKS RELATING TO THE REGULATION OF OUR INDUSTRY” for a discussion of how recent regulatory developments create risks for our financial condition, business and results of operations.

4B.12e - i Privacy Protection Regulations

In May 2018, the Privacy Regulations (Data Security), 2017 will enter into force , extensively overhauling the current data security regulations dating back to 1986, and introducing modern privacy and data security requirements to Israeli law. Among other requirements, the new regulations introduce data breach notification for significant breaches, which, in some cases, may also need to be notified to data subjects and to the Privacy Protection Authority. In its 2016 Annual Report, published in November 2017, the Privacy Protection Authority pledged to review gaps between Israeli law and the EU’s General Data Protection Regulation (Regulation (EU) 2016/679, “GDPR”), also due to enter into force in May 2018, and to recommend the required adaptations. These developments would impose a heavier regulatory burden on the company requiring it to change its data processing practices in a manner which could limit some of its activities, including in the area of big data. The heavier regulatory load, and its enhanced transparency requirement, could also result in more enforcement and litigation.

4B.12e - ii Wholesale Bit Stream internet access service on HOT's infrastructure

In June 2017, the Ministry of Communications published the maximum tariffs for HOT's wholesale bit-stream internet access service. The Ministry has yet to publish its decisions regarding several critical issues which have so far delayed the actual implementation of this wholesale market. In addition, HOT has failed to implement some aspects of the service and these await enforcement by the Ministry. Therefore, there is still no clear deadline for the implementation of the service.

4B.12e - iii Hearings and Examinations

The Ministry of Communications and other regulators have also conducted hearings and examinations on various matters related to our business, such as:

Roaming fees. The Ministry of Communications is evaluating the cost of roaming and may introduce new regulations that would limit fees charged by Israeli cellular companies for calls made by the customers of foreign network operators while they are in Israel and using our network, as well as for calls made by our own customers using their handsets abroad. The Ministry of Communications has requested additional and more specific international roaming data from the cellular companies. Because we consider roaming charges to be a significant source of revenue, such regulatory limits could adversely affect our revenues.

Roaming services. In August 2014, the Ministry of Communications published a hearing aimed at increasing competition in roaming services abroad currently provided by cellular licensees. As part of the hearing, the Ministry proposed to enable every cellular subscriber to receive roaming services abroad from operators which are not his cellular provider (on top of his cellular operator) while keeping his cellular number. These alternative roaming providers include other cellular licensees, MVNOs, ISPs, ILD licensees and fixed telephony licensees. The Ministry of Communications also suggested determining various measures intended to improve transparency and to limit subscriber payments only to the exact volume of services consumed. Such measures include: all roaming calls abroad (incoming and outgoing) would be billed using time units of 1 second; all roaming data sessions would be billed using volume units of 1KB; the billable duration of all voice calls would be from the second in which the call was connected and until it ended (explicitly excluding any wait period from pushing the “call” button until the call is connected). Because we consider roaming charges to be a significant source of revenue, such regulatory limits could adversely affect our revenues.

Frequency fees. The Ministry of Communications is conducting a re-assessment of the frequency fees set forth in the law, which includes the assessment as to its economic value, in order to support effective allocation and the utmost utilization of the frequencies.

Roaming services during emergencies. In September 2012, the Ministry of Communications published a hearing with respect to roaming during a state of emergency or during a significant continuous malfunction in which the Ministry of Communications considers determining that under certain conditions, upon the Minister of Communications’ instruction, cellular operators that have their own network infrastructure, will be required to provide roaming services to the subscribers of other cellular operators that have network infrastructure, whose network has been rendered non-functioning for a significant amount of time following an event resulting from a state of emergency, a telecommunications crisis or during a significant continuous malfunction. The Company submitted its response to the hearing in October 2012. The revenues of the Company would be adversely affected if these proposed new regulations are adopted.

Intervention in international call market. In October 2013, the Ministry of Communications published a hearing regarding new regulation of the international call market. In the hearing, it was proposed by the Ministry to allow all general licensees (including MVNOs) to provide international call services to their subscribers, with respect to the international destinations which are included in their subscribers’ tariff plans and to international destinations for which the tariff is lower or equal to the tariff of a call on the licensee’s network (“Included Destinations”). The Ministry of Communications also proposed in the hearing that the general licensees (such as cellular operators) would not be allowed to collect an interconnect fee for outgoing international calls. The Company submitted its response to the hearing in January 2014. In October 2014, the Ministry published a secondary hearing on this matter, in which it proposed that all outgoing international calls which are not to Included Destinations, shall be preceded with a voice message stating the tariff of such call and allowing the subscriber to disconnect without being charged. The Company submitted its response to this secondary hearing in October 2014. The revenues of the Company may be adversely affected if the changes proposed in these hearings are adopted.

Filtering of offensive websites and content. In August 2014, the Ministry of Communications published a hearing regarding proposed amendments to telecommunications licenses granted to various operators, including the Company and its subsidiaries. According to the Telecommunications Law, ISP and cellular licensees, are required to provide a service for filtering of offensive websites and content at no additional cost to the subscriber. The Law also includes provisions which oblige said licensees to inform their subscribers of the dangers of internet use (including offensive websites and content). As part of the hearing, it is proposed to amend the ISP and cellular licenses to include additional requirements to the existing requirements described above. The proposed amendments include, among others, the following matters: (1) detailed specifications of the filtering service; (2) requirements regarding the informational leaflet to be provided to the subscriber; and (3) an obligation to offer filtering software to be installed on any type of terminal equipment. In October 2014, the Company filed its written position seeking to limit the impact of the proposed amendments. In November 2016, the Ministry of Communications sent the operators a

request for information regarding the execution of the filtering obligation of offensive websites and content, in light of the complaints received with respect to the implementation of the existing provisions regarding this matter. In this context, the Ministry sought to receive information with respect to, among others, the tools used by the Company to implement the license provisions and the rules and laws by which the filtering is executed. In addition, a number of draft bills have been submitted to the Knesset suggesting broadening the existing requirements regarding content and site filtering.

Consumer protection-call centers. In August 2014, the Ministry of Communications published a hearing regarding proposed amendments to telecommunications licenses granted to various operators, including the Company and its subsidiaries. As part of the hearing, it is proposed to amend the licenses with respect to the quality of service of the licensees' call centers. The amendments include, among others, the following matters: the maximum response times for each call and the average daily response times; recording requirement regarding a billing inquiry, termination of all services or termination of a single service calls; and requirement to issue and to publish on the licensees' websites detailed weekly reports that will include complete data in relation to their conduct regarding response times. The Company submitted its response to the hearing in October 2014. If the final decision in this hearing process will be similar to that suggested in the hearing, the Company may be negatively affected by the results of the hearing.

Transmission line connections between ISP providers' facilities and fixed-line infrastructure. In April 2015, the Ministry of Communications published a hearing, stating that Bezeq and HOT Telecom (the "infrastructure owners") would not be allowed to oblige ISP providers to purchase "Gigabit Ethernet" services (transmission services which connect ISP's facilities to Bezeq and HOT Telecom's infrastructures) from the infrastructure owners and the ISP providers would be allowed to purchase "Gigabit Ethernet" services from other licensees or perform such connections themselves. As part of the hearing, the Ministry stated that such a practice of the infrastructure owners does not presumably comply with the Telecommunications Law, which states that a licensee will be forbidden to condition the supply of a certain telecommunications service upon the supply of another telecommunications service. The Company submitted its response to this hearing. If the final decision in this hearing process will be as suggested in the hearing, the Company may be positively affected by the results of the hearing.

4B.12e - iv The Ministry of Communications policy regarding the fixed-line telecommunications sector

In May 2012, the Ministry of Communications published the final policy document with respect to increasing competition in the fixed-line telecommunications market. The document adopted the main recommendations of the Hayek Committee, a committee formed by the MoC to study and make recommendations regarding the Israeli telecommunications market. The main points were as follows:

A. Sale of wholesale services:

The two wireline infrastructure operators that provide retail telecommunication services will be required to offer i. wholesale services to the other telecommunication providers, that will offer services on the owners' infrastructure (the wholesale market), based on non-discriminatory conditions.

The wholesale services tariffs and the terms of agreement shall be determined through negotiations between the two wireline infrastructure operators and the service providers. An infrastructure owner that reaches an agreement with ii. such other provider shall be required to offer the same terms, without discrimination, to all other providers.

Affiliates of the infrastructure owner shall also be allowed to purchase wholesale services as long as these will be provided without discrimination to all other providers.

The Ministry of Communications shall intervene and set the wholesale tariffs and said terms of agreement, in case iii. an agreement has not been reached between the parties within 6 months from the date of the publication of the policy document or if the agreement between the parties includes tariffs or terms that are unreasonable, may harm the competition, may harm the public welfare or may harm the interest of the service provider.

B. Structural Separation

Within 9 months of a signed agreement between said parties, the structural separation between the fixed-line infrastructure owner and its international call provider and internet service provider (ISP) affiliates shall be abolished and replaced by an accounting separation.

The Minister of Communications shall consider providing leniencies or abolishing the structural separation (and replacing it with an accounting separation) between the fixed-line infrastructure owner and its affiliated cellular operator, in accordance with the development of the wholesale market and the pace of development of competition based on packaged services that combine fixed-line services and cellular services in the private sector.

In case a proper and appropriate wholesale market does not develop within 24 months from the date of the publication of the policy document, the Minister of Communications shall act to impose a structural separation in the fixed-line infrastructure owners, between the infrastructure and the services provided through this infrastructure to the end-customers.

C. Supervision over Bezeq Tariffs

Within 6 months from the date such an agreement is signed between the said parties, the Ministry of Communications shall act to change the manner of supervision over Bezeq tariffs so that the supervision shall be done by setting a maximum tariff.

D. Television Broadcasts

The Ministry of Communications shall examine imposing a requirement to offer unbundled television services that are included in services packages that include telecommunication services (fixed-line and mobile) or broadband access services, which means a requirement to provide them at the same tariff as part of a service package or separately.

The abolishing of the structural separation with respect to multi-channel television shall be done if there is a reasonable possibility to provide a basic package of television services through the internet by service providers that do not own fixed-line infrastructure.

In June 2013, since no agreement had been achieved according to clause a(iii) above, the Ministry of Communications published a hearing regarding a basic offering of wholesale services and their prices, that an infrastructure owner shall be required to offer on the same terms, without discrimination, to all providers. After a long process involving several hearings (regarding the texts of the relevant service portfolios and the prices of said wholesale services), in November 2014, the Ministry of Communications published the decision of the Minister of Communications regarding regulation of the wholesale market for broadband fixed-line telecommunications services - defining a format for the supply of wholesale services and setting a tariff for the supply of these services.

Within this framework, the Minister of Communications decided to amend the licenses of the infrastructure owners - Bezeq and HOT - and to prescribe the service portfolio - managed broadband access and wholesale telephony service. The regulations attached to the Minister of Communications' decision prescribe the obligation to supply the wholesale services, including ancillary services, as well as maximum tariffs (requiring the approval of the Minister of Finance) for the said wholesale services. The tariffs set at this stage, relate solely to services to be provided by Bezeq. The Ministry of Communications initiated a separate regulation process addressing the tariffs for the wholesale services to be provided by HOT, a cable infrastructure owner, as described hereinafter.

In December 2014, Bezeq submitted a petition to the High Court of Justice against the MoC and the Minister regarding said decision. In the petition Bezeq claims, among others, that the hearing procedure conducted by the MoC

did not comply with the administrative law requirements and that both the wholesale telephony service and the tariffs that were set for the wholesale market services deviate from the Minister's authority under the Law. The Company was nominated as a respondent to the petition. If changes are made to the Minister's decision that cause an increase in the wholesale tariffs or a worsening of the technical and operational standards set by the MoC, this could negatively affect our results of operations. In October 2015, the Court published a decision, in which the Court rejected Bezeq claims with respect to the feasibility of implementation of a telephony wholesale market. The MoC has since published a consultation with respect to the resale of Bezeq's telephony services during an interim period of approximately one year.

Margin Squeeze - In November 17, 2014, the Ministry of Communications published a hearing to examine the format for preventing a “margin squeeze” by the fixed-line infrastructure owners - Bezeq and HOT - which occurs when an infrastructure owner lowers its retail prices and narrows the margin between its retail prices and the wholesale price of those infrastructure inputs being purchased by service-providers to a level that erodes the service-providers’ margin to the point of eradicating the economic feasibility of continuing their operations, the objective being to push service-providers out of the market. The Company submitted its response to the hearing in December 2014. In August 29, 2017, the Ministry of Communications published a secondary hearing on this subject in which it suggested several changes to the format suggested in the first hearing on this issue. The Company submitted its response to the secondary hearing in November 2017. Should the Ministry of Communications’ decision with regard to the margin squeeze mechanism not prove effective in ensuring the effectiveness of the wholesale market, our profitability and results of operations could be materially adversely affected.

In December 2015, the MoC issued an administrative instruction regarding the use of terminal equipment, as part of the wholesale market services, in order to ensure continuity of the service for the end users. As part of its decision, the MoC established the following arrangements:

A service provider which loaned or rented terminal equipment to its subscriber, that later becomes a subscriber of another service provider in the wholesale market, will not be able to prevent or limit the continuity of the subscriber's ordinary use of the terminal equipment, for a period of 21 days;

The payment to the service provider for the terminal equipment during such interim period will be performed by the subscriber, in a similar manner to its arrangement with its previous service provider (and the subscriber would not pay any payment for such equipment to the new service provider).

In July 2015, one day before the date of entry into force of the wholesale service of access to passive infrastructure of infrastructure owners, the Ministry of Communications published new instructions regarding the compliance with security requirements in relation to the use of HOT and Bezeq's passive infrastructure, valid until November 1, 2015. According to the instructions, during such period, the performance of the work required for the grant of access to HOT and Bezeq's infrastructure will be made only by the infrastructures owners (Bezeq or HOT) and not by the service providers. In addition, the instructions set restrictions regarding the access to the infrastructure owner's information, concerning the deployment of infrastructure. As part of the Economic Program Law for the years 2017-2018, that was published at the end of December 2016 it was determined, among others, that Bezeq and HOT Telecom will be required to allow other domestic operators including Partner, access to passive infrastructures. Following the enactment of this legislation, Bezeq has begun to partially observe its duty to provide access to its passive infrastructures and deployed several fiber optic cables for licensees using its own personnel.

On October 19, 2017, the Ministry of Communications instructed Bezeq to comply with its existing policy and clarified that it must allow other domestic operators (including Partner) to deploy fiber optic cables with their own contractors (without the need for the use of Bezeq personnel). This change has the potential to substantially increase the speed of deployment of Partner's fiber infrastructure. Bezeq has filed an administrative appeal to the Supreme Court against the MoC's demand for compliance, but its appeal has been rejected on January 29, 2018.

In December 2015, the Ministry of Communications published a hearing with respect to the resale of Bezeq's telephony services in the wholesale market. In the hearing, the Ministry proposed to allow Bezeq to offer telephony services in a resale format, instead of the wholesale telephony service, for a period of 12 months; this, by amendment of Bezeq's general license and adding the said services to the list of services that Bezeq may provide. Respectively, the Ministry is considering amending Bezeq's license so that during this interim period, Bezeq will not be obliged to offer wholesale telephony services. According to the hearing, the payment offered by Bezeq for the resale of services will be derived from the retail prices of Bezeq's attractive minute bundles which are reduced at a rate of 40%, and said reduction should be derived from the average rates for the first and second year tariffs of these bundles. The Company submitted its response to this hearing in the beginning of 2016 in which it argued against the interim arrangement and

the MoC authority to set wholesale prices in a license (such regulation requires the setting of regulations to be co-signed by the Minister of Finance). Alternatively, the Company argued that the suggested price for the resale telephony service is too high and does not leave any margin for competition and market entry.

In May 2017, the Ministry of Communications published its decision on this issue and obliged Bezeq to offer its telephony services to other operators in a resale format as of July 2017. The price paid to Bezeq by the operators for the resale telephony was suggested by the Ministry to be set substantially higher than the prices set for the planned full wholesale telephony product.

According to the decision, the date of implementation of the full wholesale telephony service has been postponed at the latest by July 18, 2018. However, the Ministry will consider whether to extend the temporary resale arrangement or to make it permanent in light of the competitive situation over the coming year.

The Ministry allowed interested parties to present their positions regarding the prices set for the resale format and the Company filed its response with the Ministry. The Company argued for lower tariffs for the resale telephony product and insisted that this arrangement can only be a temporary arrangement. The Minister committed that any possible change to the price (that may result from the hearing) would be applied retroactively.

The Ministry has not yet decided on any change to the price of the resale service. At the current price level, such service remains unprofitable and has not been taken up by any service provider.

In order to provide an incentive for Bezeq to implement the wholesale market, the MoC has announced that it intends to cancel the regulations requiring Bezeq to maintain a "structural separation" between its fixed-line and mobile telecommunications operations, and to change the current retail fixed-price tariff control mechanism to a "maximum tariff" one. In 2016, the MoC has published official announcements which indicate its satisfaction with the implementation of the wholesale market reform. We have strongly opposed the factual descriptions and the conclusions in the announcement. Furthermore, in December 2016, the MoC also declared its intention to promote the cancelation of "corporate separation" in the Bezeq Group, subject to a hearing, and to publish a hearing in 2017 suggesting canceling the "structural separation" in the Bezeq Group. The Ministry of Finance, the Anti-Trust Commissioner and the State Comptroller have stated their objection to the implementation of the MoC's intent at this stage. If the MoC removes the structural separation provisions based on its above-mentioned announcements before we have firmly established ourselves in the fixed-line telecommunications services market (in both fixed-line telephony and broadband), Bezeq may be able to propose bundled services more effectively than us, and thereby gain a competitive advantage which would negatively affect our results of operations. Also see "Item 3D.1c3D.1c If the structural separation provisions (which apply to Bezeq and HOT) are not enforced or are removed before we have established ourselves in the fixed-line and TV markets, this would adversely affect our business and results of operations."

4B.12e - v Anti-Trust Regulation.

Pursuant to the Israeli Restrictive Trade Practices Law, if the Anti-Trust Commissioner decides that the Israeli cellular market is oligopolistic, the Director General will have the authority to give instructions to all or some of the participants in our market, in order to, among other objectives, maintain or increase the competition level among the participants, the Director General's authority would include the ability to issue orders to remove or to ease entry or transfer barriers, to terminate a participant's activity, or otherwise to regulate the activities of the market.

4B.12f Our Mobile Telephone License

On April 7, 1998, the Ministry of Communications granted to us a general license to establish and operate a mobile telephone network in Israel as well as offer roaming services outside the State of Israel.

Under the terms of the license, we have provided an \$80 million guarantee to the State of Israel to secure the Company's adherence to the terms of the license.

Our license allocates to us specified frequencies and telephone numbers.

Term. Our license was originally valid for a period of ten years (until April 2008), but has been extended until 2022. At the end of this period, the license may be extended for additional six-year periods upon our request to the Ministry of Communications, and a confirmation from the Ministry of Communications that we have met the following performance requirements:

- observing the provisions of the Telecommunications Law, the Wireless Telegraphy Ordinance, the regulations and the provisions of our license;

- acting to continuously improve our mobile telephone services, their scope, availability, quality and technology, and that there has been no act or omission by us harming or limiting competition in the mobile telephone sector;

- having the ability to continue to provide mobile telephone services of a high standard and to implement the required investments in the technological updating of our system in order to improve the scope of such services, as well as their availability and quality; and

- using the spectrum allocated to us efficiently, compared to alternative applications.

We believe that we will be able to receive an extension to the license upon request.

Our license may also be revoked, limited or altered by the Ministry of Communications if we have failed to uphold our obligations under the Telecommunications Law, the Wireless Telegraphy Ordinance or the regulations, or have committed a substantial breach of the license conditions. Examples of the principal undertakings identified in our license in this connection are:

- We have illegally ceased, limited or delayed any one of our services;

 - Any means of control in Partner or control of Partner has been transferred in contravention of our license;

- We fail to invest the required amounts in the establishment and operation of the mobile radio telephone system in accordance with our undertakings to the Ministry of Communications;

- We have harmed or limited competition in the area of mobile radio telephone services;

- A receiver or temporary liquidator is appointed for us, an order is issued for our winding up or we have decided to voluntarily wind up; or

Partner, an Office Holder in Partner or an Interested Party in Partner or an Office Holder in an Interested Party of Partner is an Interested Party in a competing mobile radio telephone operator or is an Office Holder in a competing mobile radio telephone operator or in an interested party in a competing mobile radio telephone operator without first obtaining a permit from the Ministry of Communications to do so or has not fulfilled one of the conditions included in such permit. See “Item 4B.12f Our Mobile Telephone License-Our Permit Regarding Cross Ownership.”

Our license authorizes us on a non-exclusive basis to establish and operate a mobile telephone network in Israel. The Ministry of Communications amended our license in August 2015 to include the provision of 4G services in the 1800 MHZ spectrum and to allow us access network sharing with HOT Mobile, another cellular operator at a bandwidth of up to 25 MHZ in the 1880 MHZ spectrum.

License Conditions. Our license imposes many conditions on our conduct.

- We must at all times be a company registered in Israel.

Our founding shareholders and their approved substitutes must hold, in the aggregate, at least 26% of each of our means of control. Furthermore, the maintenance of at least 26% of our means of control by our founding shareholders and their approved substitutes allows Partner to be protected from a license breach that would result from a transfer of shares for which the authorization of the Ministry of Communications was required, but not obtained.

Israeli entities from among our founding shareholders and their approved substitutes must hold at least 5% of our issued and outstanding share capital and of each of our means of control. "Israeli entities" are defined as individuals who are citizens and residents of Israel and entities formed in Israel and controlled, directly or indirectly, by individuals who are citizens and residents of Israel, provided that indirect control is only through entities formed in Israel, unless otherwise approved by the Israeli Prime Minister or Minister of Communications.

At least 10% of our Board of Directors must be appointed by Israeli entities, as defined above, provided that if the Board of Directors is comprised of up to 14 members, only one such director must be so appointed, and if the Board of Directors is comprised of between 15 and 24 members, only two such directors must be so appointed.

Matters relating to national security shall be dealt with only by a Board of Directors' committee that has been formed for that purpose. The committee includes at least 4 members, of which at least one is an external director. Only directors with the required clearance and those deemed appropriate by Israel's General Security Service may be members of this committee. Resolutions approved by this committee shall be deemed adopted by the Board of Directors.

The Ministry of Communications shall be entitled to appoint an observer to the Board of Directors and its committees, subject to certain qualifications and confidentiality undertakings.

Contracting with Customers. Pursuant to our license, we have submitted our standard agreement with customers to the Ministry of Communications for their examination. To date, we have not received any comments from the Ministry of Communications regarding this agreement.

Tariffs. Our license requires us to submit to the Ministry of Communications our tariffs (and any changes in our tariffs) before they enter into effect. Our license allows us to set and change our tariffs for outgoing calls and any other service without approval of the Ministry of Communications. However, the Ministry of Communications may intervene in our tariffs if it finds that our tariffs unreasonably harm consumers or competition.

Payments. Our license specifies the payments we may charge our subscribers. These include one-time installation fees, one-time SIM card payments, fixed monthly payments, airtime fees, payments for the use of other telecommunication systems, payments for handset maintenance and payments for additional services. In some of our tariff plans we have chosen to charge only for airtime and use of services. See "Item 4B.5c Tariff Plans."

Interconnection. Like the licenses of Pelephone, Cellcom and HOT Mobile, our license requires that we interconnect our mobile telephone network to other telecommunications networks operating in Israel, including that of Bezeq and other domestic fixed-line operators, the other mobile telephone operators and the international operators.

Conversely, we must allow other network operators to interconnect to our network. See "Item 4B.8h Interconnection".

Service Approval. The Ministry of Communications has the authority to require us to submit for approval details of any of our services (including details concerning tariffs). In addition, we are required to inform the Ministry of Communications prior to the activation of any service on a specified list of services.

Access to Infrastructure. The Ministry of Communications has the power to require us, like the other telephone operators in Israel, to offer access to our network infrastructure to other operators. We may also be required to permit other operators to provide value-added services using our network.

Universal Service. We are required to provide any service with the same coverage as our existing network. According to our license, we are required to meet certain coverage requirements for our 3G and 4G services.

Territory of License. In May 2000, we were also granted a license from the Israeli Civil Administration, to provide mobile services to the Israeli populated areas in the West Bank. The license is effective until February 1, 2022. The provisions of the general license described above, including as to its extension, generally apply to this license, subject to certain modifications. We believe that that we will be able to receive an extension to this license upon request.

Transfer of license, assets and means of control. Our license may not be transferred, mortgaged or attached without the prior approval of the Ministry of Communications.

We may not sell, lease or mortgage any of the assets which serve for the implementation of our license without the prior approval of the Ministry of Communications, other than in favor of a banking corporation which is legally active in Israel, and in accordance with the conditions of our license.

Our license provides that no direct or indirect control of Partner may be acquired, at one time or through a series of transactions, and no means of control may be transferred in a manner which results in a transfer of control, without the consent of the Ministry of Communications. Furthermore, no direct or indirect holding of 10% or more of any means of control may be transferred or acquired at one time or through a series of transactions, without the consent of the Ministry of Communications. In addition, no shareholder of Partner may permit a lien to be placed on shares of Partner if the foreclosure on such lien would cause a change in the ownership of 10% or more of any of Partner's means of control unless such foreclosure is made subject to the consent of the Ministry of Communications. For purposes of our license, "means of control" means any of:

- voting rights in Partner;
- the right to appoint a director or managing director of Partner;
- the right to participate in Partner's profits; or
- the right to share in Partner's remaining assets after payment of debts when Partner is wound up.

Each of our ordinary shares and ADSs is considered a means of control in Partner.

In addition, Partner, any entity in which Partner is an Interested Party, as defined below, an Office Holder, as defined below, in Partner or an Interested Party in Partner or an Office Holder in an Interested Party in Partner may not be a party to any agreement, arrangement or understanding which may reduce or harm competition in the area of mobile telephone services or any other telecommunications services.

In connection with our initial public offering, our license was amended to provide that our entering into an underwriting agreement for the offering and sale of shares to the public, listing the shares for trading, and depositing shares with the depositary or custodian will not be considered a transfer of any means of control, as defined below. Pursuant to the amendment, if the ADSs (or other "traded means of control," that is, means of control which have been listed for trade or offered through a prospectus and are held by the public) are transferred or acquired in breach of the restrictions imposed by the license with respect to transfer or acquisition of 10% or more of any means of control, we must notify the Ministry of Communications and request the Ministry's consent within 21 days of learning of the breach. In addition, should a shareholder, other than a founding shareholder, breach these ownership restrictions, or provisions regarding acquisition of control or cross-ownership or cross-control with other mobile telephone operators or shareholdings or agreements which may reduce or harm competition, its shareholdings will be marked as exceptional shares and will be converted into dormant shares, as long as the Ministry's consent is required but not obtained, with no rights other than the right to receive dividends and other distributions to shareholders, and to participate in rights offerings.

The dormant shares must be registered as dormant shares in our share registry. Any shareholder seeking to vote at a general meeting of our shareholders must notify us prior to the vote, or, if the vote is by deed of vote, must so indicate on the deed of vote, whether or not the shareholder's holdings in Partner or the shareholder's vote requires the consent of the Ministry of Communications due to the restrictions on transfer or acquisition of means of control, or provisions regarding cross-ownership or cross-control with other mobile telephone operators or shareholders. If the shareholder does not provide such certification, his instructions shall be invalid and his vote not counted.

The existence of shareholdings which breach the restrictions of our license in a manner which could cause them to be converted into dormant shares and may otherwise provide grounds for the revocation of our license will not serve in and of themselves as the basis for the revocation of our license so long as:

the founding shareholders or their approved substitutes of Partner continue to hold in the aggregate at least 26% of the means of control of Partner;

our Articles of Association include the provisions described in this paragraph;

62

- we act in accordance with such provisions;

Our Articles of Association provide that an ordinary majority of the voting power at the general meeting of Partner is entitled to appoint all the directors of Partner other than external directors.

The dormant share mechanism does not apply to our founding shareholders.

The provisions contained in our license are also contained in our Articles of Association. In addition, our Articles of Association contain similar provisions in the event the holdings of shares by a shareholder breaches ownership limits contained in our license.

Revoking, limiting or altering our license. Our license contains several qualifications that we are required to meet. These conditions are designed primarily to ensure that we maintain at least a specified minimum connection to Israel. Other eligibility requirements address potential conflicts of interest and cross-ownership with other Israeli telecommunications operators. The major eligibility requirements are set forth below. A failure to meet these eligibility requirements may lead the Ministry of Communications to revoke, limit or alter our license, after we have been given an opportunity and have failed to remedy it.

Founding shareholders or their approved substitutes must hold at least 26% of the means of control of Partner.

Israeli entities from among our founding shareholders and their approved substitutes must hold at least 5% of our issued share capital and of each of our means of control.

The majority of our directors, and our general manager, must be citizens and residents of Israel.

Neither the general manager of Partner nor a director of Partner may continue to serve in office if he has been convicted of certain legal offenses.

No trust fund, insurance company, investment company or pension fund that is an Interested Party in Partner may: (a) hold, either directly or indirectly, more than 5% of any means of control in a competing mobile radio telephone operator without having obtained a permit to do so from the Ministry of Communications, or (b) hold, either directly or indirectly, more than 5% of any means of control in a competing mobile radio telephone operator in accordance with a permit from the MoC, and in addition have a representative or appointee who is an Office Holder in a competing mobile radio telephone operator, unless it has been legally required to do so, or (c) hold, either directly or indirectly, more than 10% of any means of control in a competing mobile radio telephone operator, even if it received a permit to hold up to 10% of such means of control.

No trust fund, insurance company, investment company or a pension fund that is an Interested Party in a competing mobile radio telephone operator may: (a) hold, either directly or indirectly, more than 5% of any means of control in Partner, without having obtained a permit to do so from the Ministry of Communications; or (b) hold, directly or indirectly, more than 5% of any means of control in Partner in accordance with a permit from the Ministry of Communications, and in addition have a representative or appointee who is an Office Holder in Partner, unless it has been legally required to do so; or (c) hold, either directly or indirectly, more than 10% of any means of control in Partner, even if it received a permit to hold up to 10% of such means of control.

Partner, an Office Holder or Interested Party in Partner, or an Office Holder in an Interested Party in Partner does not control a competing mobile radio telephone operator, is not controlled by a competing mobile radio telephone operator, by an Office Holder or an Interested Party in a competing mobile radio telephone operator, by an Office Holder in an Interested Party in a competing mobile radio telephone operator, or by a person or corporation that controls a competing mobile radio telephone operator.

Change in license conditions. Under our license, the Ministry of Communications may change, add to, or remove conditions of our license if certain conditions exist, including:

• A change has occurred in the suitability of Partner to implement the actions and services that are the subject of our license.

63

▲ A change in our license is required in order to ensure effective and fair competition in the telecommunications sector.

● A change in our license is required in order to ensure the standards of availability and grade of service required of Partner.

▲ A change in telecommunications technology justifies a modification of our license.

● A change in the electromagnetic spectrum needs justifies, in the opinion of the Ministry of Communications, changes in our license.

○ Considerations of public interest justify modifying our license.

▲ A change in government policy in the telecommunications sector justifies a modification of our license.

▲ A change in our license is required due to its breach by Partner.

During an emergency period, control of Partner's mobile radio telephone system may be assumed by any lawfully authorized person for the security of the State of Israel to ensure the provisions of necessary service to the public, and some of the spectrum granted to us may be withdrawn. In addition, our license requires us to supply certain services to the Israeli defense and security forces. Furthermore, certain of our senior officers are required to obtain security clearance from Israeli authorities.

For the purposes of this discussion, the following definitions apply:

● "Office Holder" means a director, manager, company secretary or any other senior officer that is directly subordinate to the general manager.

"Control" means the ability to, directly or indirectly, direct the activity of a corporation, either alone or jointly with others, whether derived from the governing documents of the corporation, from an agreement, oral or written, from holding any of the means of control in the corporation or in another corporation, or which derives from any other source, and excluding the ability derived solely from holding the office of director or any other office in the corporation. Any person controlling a subsidiary or a corporation held directly by him will be deemed to control any corporation controlled by such subsidiary or by such controlled corporation. It is presumed that a person or corporation controls a corporation if one of the following conditions exist: (1) such person holds, either directly or indirectly, fifty percent (50%) or more of any means of control in the corporation; (2) such person holds, either directly or indirectly, a percentage of any means of control in the corporation which is the largest part in relation to the holdings of the other Interested Parties in the corporation; or (3) such person has the ability to prevent the taking of business decisions in the corporation, with the exception of decisions in the matter of issuance of means of control in a corporation or decisions in the matters of sale or liquidation of most businesses of the corporation, or fundamental changes of these businesses.

● "Controlling Corporation" means a company that has control, as defined above, of a foreign mobile radio telephone operator.

● "Interested Party" means a person who either directly or indirectly holds 5% or more of any type of means of control, including holding as an agent.

Our Permit Regarding Cross Ownership

Our license generally prohibits cross-control or cross-ownership among competing mobile telephone operators without a permit from the Ministry of Communications. In particular, Partner, an Office Holder or an Interested Party

in Partner, as well as an Office Holder in an Interested Party in Partner may not control or hold, directly or indirectly, 5% or more of any means of control of a competing mobile radio telephone operator. Our license also prohibits any competing mobile radio telephone operator or an Office Holder or an Interested Party in a competing mobile radio telephone operator, or an Office Holder in an Interested Party in a competing mobile radio telephone operator or a person or corporation that controls a competing mobile radio telephone operator from either controlling, or being an Interested Party in us.

However, our license, also provides that the Ministry of Communications may permit an Interested Party in Partner to hold, either directly or indirectly, 5% or more in any of the means of control of a competing mobile radio telephone operator if the Ministry of Communications is satisfied that competition will not be harmed, and on the condition that the Interested Party is an Interested Party in Partner only by virtue of a special calculation described in the license and relating to attributed holdings of shareholders deemed to be in control of a corporation.

4B.12g Other Licenses

Domestic Fixed-line License. In January, 2007, the Ministry of Communications granted Partner Land-Line Communication Solutions Limited Partnership, which is fully owned by the Company, a license for the provision of domestic fixed-line telecommunications services, including VoB services using the infrastructure of Bezeq and HOT Telecom to access customers. In February 2016, this license was replaced by the MoC with a general-unified license. In June and December 2016, this license was amended by the MoC to allow, in addition to domestic fixed-line telecommunications services, the provision of ILD services, ISP services and end-point services. See Exhibit 4.(a).2.1, which is incorporated herein by reference. The term of the new license is similar to the term of the previous fixed-line license which expires in twenty years from the original grant date in January 2007 but may be extended by the Ministry of Communications for successive periods of ten years provided that the licensee has complied with the terms of the license and has acted consistently for the enhancement of telecom services and their enhancement. The general conditions of the mobile telephone license described above, generally apply to this license, subject to certain modifications.

In March 2009, we were also granted a domestic fixed-line license to provide fixed-line services to the Israeli populated areas in the West Bank. In July 2016, this license was replaced by a general-unified license. The general conditions of the general-unified license granted to Partner Land-Line Communication Solutions Limited Partnership by the MoC, generally apply to this license, subject to certain modifications.

012 Telecom was also granted a similar domestic fixed-line license by the Ministry of Communications in December 2005 for 20 years. In February 2016, this license was replaced by the MoC with a general-unified license. The term of the new license is similar to the term of the previous fixed-line license. As part of the unification of the Company's licenses, in January 2018, the Company filed a request with the Ministry of Communications to terminate this license.

012 Telecom was also granted a license to provide domestic fixed-line services to the Israeli populated areas in the West Bank which was valid until February 2018. This license was replaced in July 2016 with a general-unified license. The general conditions of the general-unified license granted to 012 Telecom by the MoC, generally apply to this license, subject to certain modifications. In January 2018, the Company filed a request with the Ministry of Communications to terminate this license.

ISP License. In March 2001, we received a special license granted by the Ministry of Communications, allowing us through our own facilities to provide internet access to fixed-line network customers. The license is valid until March 31, 2023. We began supplying commercial ISP services beginning in January 2009. We were also granted a special license to provide ISP services to the Israeli populated areas in the West Bank which is valid until March 30, 2023.

012 Smile was also granted a similar ISP license by the Ministry of Communications in December 2009 that is valid until June 2020 and a special license to provide ISP services to the Israeli populated areas in the West Bank which is valid until June 2020. In January 2018, the Company filed a request with the Ministry of Communications to terminate this license.

ILD License. In December 2009, the Ministry of Communications granted 012 Smile, a license for the provision of ILD services. The license expires in twenty years but may be extended by the Ministry of Communications for successive periods of ten years provided that the licensee has complied with the terms of the license and has acted consistently for the enhancement of telecom services and their enhancement. In February 2016, this license was replaced by the MoC with a general-unified license. The term of the new license is similar to the term of the previous ILD License. In January 2018, the Company filed a request with the Ministry of Communications to terminate this license.

012 Smile was also granted a license for the provision of International Long Distance services to the Israeli populated areas in the West Bank which is valid until February 2018. This license was replaced in July 2016 with a general-unified license. The general conditions of the general-unified license granted to 012 Smile by the MoC, generally apply to this license, subject to certain modifications. In January 2018, the Company filed a request with the Ministry of Communications to terminate this license.

012 Smile was also granted a similar NTP license by the Ministry of Communications in December 2009 that is valid until December 2020. In January 2018, the Company filed a request with the Ministry of Communications to terminate this license.

Other Licenses. The Ministry of Communications has granted us a trade license pursuant to the Wireless Telegraphy Ordinance. This license regulates issues of servicing and trading in equipment, infrastructure and auxiliary equipment for our network. We have also been granted a number of encryption licenses that permit us to deal with means of encryption, as provided in the aforementioned licenses, within the framework of providing mobile radio telephone services to the public.

4B.12h Network Site Permits

Permits of the Ministry of Environmental Protection

On January 1, 2006, the Non-Ionizing Radiation Law (5766-2006), which replaced the Pharmacists (Radioactive Elements and Products) Regulations, 1980 regarding matters that pertain to radiation from cellular sites, was enacted. This law defines the various powers of the Ministry of Environmental Protection as they relate, among others, to the grant of permits for network sites and sets standards for permitted levels of non-ionizing radiation emissions and reporting procedures. Pursuant to this law, most of which entered into effect on January 1, 2007, a request for an operating permit from the Ministry of Environmental Protection with respect to either new sites or existing sites would require a building permit for such site(s). The Ministry of Environmental Protection has adopted the International Radiation Protection Agency's standard as a basis for the consents it gives for the erection and operation of our antennas. This standard is an international standard based upon a number of years of scientific study.

If we continue to face difficulties in obtaining building permits from the local planning and building committee, we may fail to obtain also operation permits from the Ministry of Environmental Protection. Operation of a network site without a permit from the Ministry of Environmental Protection may result in criminal and civil liability to us or to our officers and directors.

Local Building Permits

The Planning and Building Law requires that we receive a building permit for the construction of most of our antennas. The local committee or local licensing authority in each local authority is authorized to grant building permits, provided such permits are in accordance with National Building Plan No. 36 which came into effect on June 15, 2002. The local committee is made up of members of the local municipal council. The local committee is authorized to delegate certain of its powers to subcommittees on which senior members of the local authority may sit.

The local committee examines the manner in which an application for a building permit conforms to the plans applying to the parcel of land that is the subject of the application, and the extent to which the applicant meets the requirements set forth in the Planning and Building Law. The local committee is authorized to employ technical, vista, and aesthetic considerations in its decision-making process. The local committee may grant building permits that are conditioned upon the quality of the construction of the structure, the safety of flight over the structure, and the external appearance of the structure. Every structure located on a certain parcel of land must satisfy the requirements and definitions set forth in the building plan applicable to such parcel.

On January 3, 2006, the National Council for Planning and Building added a new requirement for obtaining a building permit for network sites: the submission of an undertaking to indemnify the local committee for claims relating to the depreciation of the surrounding property value as a result of the construction or existence of the antenna.

A decision by a local committee not to grant a building permit may be appealed to the District Appeals Committee. A person harmed by the ruling of the District Appeals Committee may have such ruling examined judicially by means of an administrative petition to the District Court sitting as an Administrative Affairs Tribunal.

National Building Plan No. 36

National Building Plan No. 36 which came into effect on June 15, 2002 regulates the growth of telecommunications infrastructure in Israel. Chapter A of National Building Plan No. 36 sets forth the licensing requirements for the construction of mobile radio telephone infrastructure. National Building Plan No. 36 also adopts the radiation emission standards set by the International Radiation Protection Agency which were also previously adopted by the Ministry of Environmental Protection. We believe that we currently comply with these standards regarding our sites. National Building Plan No. 36 is in the process of being changed. On June 1, 2010, the National Council for Planning and Building approved the National Building Plan No. 36/A/1 version that incorporates all of the amendments to National Building Plan No. 36 (“the Amended Plan”).

Current proposed changes impose additional restrictions and/or requirements on the construction and operation of network sites and could, if adopted, harm our ability to construct new network sites, make the process of obtaining building permits for the construction and operation of network sites more cumbersome and costly, and may delay the future deployment of our network.

Under the Non-Ionizing Radiation Law, the National Council for Planning and Building was granted the power to determine the level of indemnification for reduction of property value to be undertaken as a precondition for a cellular company to obtain a building permit for a new or existing network site. As a result, the National Council for Planning and Building has decided that until National Building Plan 36 is amended to reflect a different indemnification amount, cellular companies will be required to undertake to indemnify the building and planning committee for 100% of all losses resulting from claims against the committee. Thus, at present, in order to obtain a building permit for a new or existing network site, we must provide full indemnification for the reduction of property value.

The Amended Plan sets forth the indemnification amounts as a percentage of the value of the depreciated property claims in accordance with the manner in which the licenses were granted as follows: If the license was granted in an expedited licensing route, which is intended for installations that are relatively small in accordance with the Amended Plan criteria, then the cellular companies will be required to compensate the local planning committees in an amount of 100% of the value of the depreciated property claim. If the license was granted in a regular licensing route, which is intended for larger installations in accordance with the Amended Plan criteria, then the cellular companies will be required to compensate the local planning committees in an amount of 80% of the value of the depreciated property claim. The Amended Plan is subject to governmental approval, in accordance with the Planning and Building Law. It is unknown when the government intends to approve the Amended Plan.

These recent developments may have a material adverse effect on our financial condition and results of operations, as well as plans to expand and enhance network coverage. For more information, see “Item 3D.1k In connection with some building permits, we may also be required to indemnify planning committees in respect of claims against them relating to the depreciation of property values that result from the granting of permits for network sites.”

Wireless access devices

We have set up several hundred small communications devices, called wireless access devices, pursuant to a provision in the Telecommunications Law which we and other participants in cellular telecommunications, believe exempts such devices from the need to obtain a building permit. Beginning in 2008, following the filing of a claim that the exemption does not apply to cellular communications devices, the Attorney General filed an opinion regarding this matter stating that the exemption does apply to wireless radio access devices under certain conditions and instructed the Ministry of Interior to prepare regulations setting conditions that would limit the exemption to extraordinary

circumstances. Recently, the relevant government ministries have agreed upon the wording of the regulations. The proposed text was submitted for approval to the Economics Committee of the Knesset and during December 2017 a discussion was held before the Committee. The Committee did not have time to review all the provisions of the regulations, and therefore clarified that it would hold another hearing to approve the text, which was also recommended for approval by the National Planning and Building Council. Insofar as the wording is approved in the format submitted to the Economics Committee, it will be very difficult to transfer existing wireless access devices from place to place and also to make changes to existing access devices. Following two petitions that were filed with the High Court of Justice opposing the Attorney General's recommendation that the exemption apply under certain conditions, in September 2010, the Supreme Court issued an interim order prohibiting further construction of wireless access devices in cellular networks in reliance on the exemption from the requirement to obtain a building permit. In February 2011, and in July 2012, the Supreme Court narrowed the scope of the interim injunction so that repair or replacement of existing wireless access devices is permitted under certain conditions that will be determined in a judgment. In March 2016, the Supreme Court further narrowed the scope of the interim injunction that allowed us to make modifications to the existing wireless access devices, including a change to their transmission power and allowed us to change the location of 10% of PHI's wireless access devices to alternative locations without the need for a building permit. If a definitive court judgment holds that the exemption does not apply to cellular devices at all or if the regulations finally approved do not apply the exemption to wireless access devices, this could adversely affect the Company's existing network. As a result, we may be required to remove existing devices and would not be able to install new devices on the basis of the exemption. Our network capacity and coverage would then be negatively impacted, which could have an adverse effect on our revenue and results of operations.

Other Approvals

The construction of our antennas may be subject to the approval of the Civil Aviation Administration which is authorized to ensure that the construction of our antennas does not interfere with air traffic, depending on the height and location of such antennas. The approval of the Israeli Defense Forces is required in order to coordinate site frequencies so that our transmissions do not interfere with the communications of the Israel Defense Forces.

We, like other cellular operators in Israel, provide repeaters, also known as bi-directional amplifiers, to subscribers seeking an interim solution to weak signal reception within specific indoor locations. In light of the lack of a clear policy of the local planning and building authorities, and in light of the practice of the other cellular operators, we have not requested permits under the Planning and Building Law for the repeaters. However, we have received from the Ministry of Communications an approval to connect the repeaters to our communications network. We have also received from the Ministry of Environmental Protection, the permits that are necessary for the repeaters.

In addition, we construct and operate microwave links as part of our transmission network. The various types of microwave links receive permits from the Ministry of Environmental Protection in respect of their radiation level. Based on an exemption in the Telecommunications Law, we believe that building permits are not required for the installation of most of these microwave links on rooftops, but if in the future the courts or the relevant regulator determine that building permits are necessary for the installation of these sites, it could have a negative impact on our ability to deploy additional microwave links, and could hinder the coverage, quality and capacity of our transmission network and our ability to continue to market our Fixed-Line Services effectively.

We have received approval from the Ministry of Communications for selling and distributing all of the handsets and other terminal equipment we sell. The Ministry of Environmental Protection also has authority to regulate the sale of handsets in Israel, and under the Non-Ionizing Radiation Law, certain types of devices, which are radiation sources, including cellular handsets, have been exempted from requiring an approval from the Ministry of Environmental Protection so long as the radiation level emitted during the use of such handsets does not exceed the radiation level permitted under the Non-Ionizing Radiation Law. Since June 2002, we have been required to provide information to purchasers of handsets on the Specific Absorption Rate (“SAR”) levels of the handsets as well as its compliance with certain standards pursuant to a regulation under the Consumer Protection Law. We attach a brochure to each handset that is sold that includes the SAR level of the specific handset. Such brochures are also available at our service centers and the information is also available on the Company’s website. SAR levels are a measurement of non-ionizing radiation that is emitted by a hand-held cellular telephone at its specific rate of absorption by living tissue. While, to the best of our knowledge, the handsets that we market comply with the applicable laws that relate to acceptable SAR levels, we rely on the SAR published by the manufacturer of these handsets and do not perform independent inspections of the SAR levels of these handsets. As the manufacturers’ approvals refer to a prototype handset and not for each and every handset, we have no information as to the actual SAR level of each specific handset and throughout its lifecycle, including in the case of equipment repair.

Under a December 2005 amendment to this procedure, in the event that the SAR level is not measured after the repair of a handset, the repairing entity is required to notify the customer by means of a label affixed to the handset that the SAR may have been altered following the repair, in accordance with the provisions relating to the form of such label set forth in the procedure. A consultant had been retained by the Ministry of Communications to formulate a recommendation regarding the appropriate manner to implement the procedure for repairing handsets but to date the Ministry of Communications has not yet issued any guidelines and given the continued delay we are informing our customers that there may be changes in the SAR levels.

In November 2005, a new procedure was adopted by the Ministry of Communications with regard to the importation, marketing, and approval for 2G and 2.5G handsets. Prior to the implementation of the new procedure, suppliers of 2G and 2.5G handsets in Israel were required to obtain an interim, non-binding approval of the handset type from the relevant cellular operators before receiving final approval from the Ministry of Communications to supply such handsets in Israel to such operators. Under the new procedure, handsets that have already received the internationally recognized Global Certification Forum approval prior to their importation into Israel are now exempt from the requirement of receiving an interim, non-binding approval from the relevant cellular operators in Israel. This could expose us to the risk that handsets not reviewed and approved by us may interfere with the operation of our network. The new procedures described above do not apply to 3G handsets, which still require cellular operators to grant an interim, non-binding approval to the Ministry of Communications before the MoC grants its final approval in all circumstances.

In addition, this procedure also called for repaired handsets to comply with all applicable standards required for obtaining handset type approval, including standards relating to the safety, electromagnetic levels, and SAR levels.

4C. Organizational Structure

We currently have five wholly-owned subsidiaries, Partner Future Communications 2000 Ltd., an Israeli corporation; Partner Land-Line Communications Solutions LP, an Israeli limited partnership; Partner Business Communications Solutions, LP, an Israeli limited partnership; Partner Communication Products 2016 LP and 012 Smile. 012 Smile has a wholly-owned subsidiary, 012 Telecom Ltd., an Israeli corporation. Partner Future Communications 2000 Ltd. serves as the general partner and the Company serves as the limited partner of each of the limited partnerships.

In November 2013, the Company entered into a 15-year Network Sharing Agreement with HOT Mobile. Pursuant to the Network Sharing Agreement, the parties created a 50-50 limited partnership - P.H.I. Networks (2015) Limited Partnership, which will operate and develop a cellular network to be shared by both parties, starting with a pooling of both parties' radio access network infrastructures to create a single shared radio access network. The parties have also established a 50-50 company under the name Net 4 P.H.I Ltd. to be the general partner of the limited partnership. See "Item 4B.8 Our Network".

4D. Property, Plant and Equipment

Headquarters

We lease our headquarter facilities in Rosh Ha-ayin, Israel, with a total of approximately 51,177 gross square meters (including parking lots). In the beginning of 2014, an amendment to the lease agreements for its headquarters facility in Rosh Ha'ayin was signed, according to which the lease term is extended until the end of 2024. The rental payments are linked to the Israeli CPI. We also lease call centers in several cities. The leases for each site have different lengths and specific terms. We believe that our current call center facilities are adequate for the foreseeable future, and that we will be able to extend the leases or obtain alternate or additional facilities, if needed, on acceptable commercial terms.

Network

For a description of our telecommunications network, see “Item 4B.8 Our Network” above.

69

We lease most of the sites where our mobile telecommunications network equipment is installed throughout Israel. At December 31, 2017, we had 3,109 network sites (including micro-sites). The lease agreements relating to our network sites are generally for periods of two to ten years. We have the option to extend the lease periods up to ten years (including the original lease period).

The erection and operation of most of these network sites requires building permits from local or regional zoning authorities, as well as a number of additional permits from governmental and regulatory authorities, and we have had difficulties in obtaining some of these permits.

Difficulties obtaining required permits could continue and therefore affect our ability to maintain cell network sites. In addition, as we grow our subscriber base and seek to improve the range and quality of our services, we need to further expand our network, and difficulties in obtaining required permits may delay, increase the costs or prevent us from achieving these goals in full. See “Item 3D.1j We have had difficulties obtaining some of the building and environmental permits required for the erection and operation of our network sites, and some building permits have not been applied for or may not be fully complied with. These difficulties could have an adverse effect on the coverage, quality and capacity of our network. Operating network sites without building or other required permits, or in a manner that deviates from the applicable permit, may result in criminal or civil liability to us or to our officers and directors.” and “Item 4B.12 Regulation”.

In November 2013, the Company entered into a 15-year Network Sharing Agreement with HOT Mobile. Pursuant to the Network Sharing Agreement, the parties created a 50-50 limited partnership, which is intended to operate and develop a cellular network to be shared by both companies, starting with a pooling of both companies’ radio access network infrastructures to create a single shared pooled radio access network. See “Item 4B.8 Our Network”.

Service Centers and Points of Sale

Lease agreements for our retail stores and service centers are for periods of two to ten years. We have the option to extend the lease agreements for different periods of up to ten additional years (including the original lease period). The average size of our retail stores and service center is approximately 250 square meters. See also note 19 to the consolidated financial statements.

4A. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following operating and financial review and prospects are based upon and should be read in conjunction with our financial statements and selected financial data, which appear elsewhere in this report. You should also read the risk factors appearing in Item 3D of this annual report for a discussion of a number of factors that affect and could affect our financial condition and results of operations.

5A. Operating Results

5A.1 OVERVIEW

5A.1a Key Financial and Operating Data

The table below sets forth a summary of selected financial and operating data for the years ended December 31, 2015, 2016 and 2017.

	Year ended December 31,			
	2015	2016	2017*	2017**
Revenues (NIS million)	4,111	3,544	3,270	3,268
Operating profit (NIS million)	107	193	246	315
Income (loss) before taxes (NIS million)	(36)	88	66	135
Profit (loss) for the Year (NIS million)	(40)	52	61	114
Capital expenditures (additions) (NIS million)	271	202	333	417
Cash flows from operating activities (NIS million)	922	945	897	973
Cash flows from investing activities (NIS million)	(356)	(639)	4	(72)
Cellular Subscribers (end of period, thousands)	2,718	2,686	2,674	2,674
Annual cellular churn rate (%)	46 %	40 %	38 %	38 %
Average monthly revenue per cellular subscriber (ARPU) (NIS)	69	65	62	62
TV service households (end of period, thousands)	-	-	43	43

Without the impact of the early adoption of IFRS 15, Revenue from Contracts with Customers in 2017. See “Item 5A.1j Early adoption of IFRS 15 Revenue from Contracts with Customers – change in accounting policy” and also note 2(n) to the consolidated financial statements regarding the early adoption of IFRS 15, Revenue from Contracts with Customers.

**Includes the impact of the early adoption of IFRS 15, Revenue from Contracts with Customers.

NON-GAAP MEASURES

The following non-GAAP measures are used in this report. These measures are not financial measures under IFRS and may not be comparable to other similarly titled measures for other companies. Further, the measures may not be indicative of the Company's historic operating results nor are they meant to be predictive of potential future results.

Non-GAAP Measure	Calculation	Most Comparable IFRS Financial Measure
Adjusted EBITDA	Adjusted EBITDA: Profit (Loss) add Income tax expenses, Finance costs, net, Depreciation and amortization expenses (including amortization of intangible assets, deferred expenses-right of use and impairment charges), Other expenses (mainly amortization of share based compensation).	Profit (Loss)
Adjusted EBITDA margin (%)	Adjusted EBITDA margin (%): Adjusted EBITDA divided by Total revenues	
Adjusted Free Cash Flow*	Adjusted Free Cash Flow: Cash flows from operating activities deduct Cash flows from investing activities add Short-term investment in deposits	Cash flows from operating activities less Cash flows from investing activities
Total Operating Expenses (OPEX)	Total Operating Expenses: Cost of service revenues add Selling and marketing expenses add General and administrative expenses deduct Depreciation and amortization expenses, Other expenses (mainly amortization of employee share based compensation)	Sum of: Cost of service revenues, Selling and marketing expenses, General and administrative expenses
Net Debt	Net Debt: Current maturities of notes payable and borrowings add Notes payable add Borrowings from banks and others deduct Cash and cash equivalents deduct Short-term deposits	Sum of: Current maturities of notes payable and borrowings, Notes payable, Borrowings from banks and others
Various line items "without the impact of the early adoption of IFRS"	Line item less the amount of the impact of IFRS 15	The corresponding line item as reported in the Company's financial statements

15”

* Adjusted Free Cash Flow measure is fully equivalent to Free Cash Flow measure which was provided in reports for prior periods.

71

5A.1b Business Developments in 2017

In 2017, competition in the Israeli telecommunications market remained intense, across both cellular segment services and fixed-line segment services, as well as in the market for equipment and device sales. As a result, the continued substantial price erosion in our principal markets has had a further significant negative impact on the Company's business results, with total revenues for 2017 decreasing by 8% compared with 2016 and by 21% compared with 2015.

Cellular market. As an illustration of the level of competition in the cellular market, approximately 2.5 million cellular subscribers are estimated to have switched operators within the Israeli market (with number porting) during 2017, compared with approximately 2.3 million in 2016 and 2.5 million in 2015. The annual churn rate for cellular subscribers in 2017 was 38%, compared with 40% in 2016 and 46% in 2015, mainly reflecting the continued intense competition in the cellular subscriber market. Significant price erosion continued to be caused by the amount of cellular subscribers who moved between different rateplans or airtime packages (generally with a lower monthly fee) within the Company.

Over 2017, the Company's cellular subscriber base declined net by approximately 12,000. The pre-paid subscriber base decreased by approximately 91,000, while the post-paid subscriber base increased by approximately 79,000. The decrease in the pre-paid subscriber base was largely attributed to the pre-paid subscribers moving to post-paid subscriber packages as a result of the significant price erosion (and hence increasing attractiveness) in these products, as well to increased competition for pre-paid subscribers. At the end of December 2017, the Company's active cellular subscriber base (including cellular data and 012 Mobile subscribers) was approximately 2.68 million, including approximately 2.3 million post-paid subscribers or 87% of the base, and approximately 354,000 pre-paid subscribers, or 13% of the subscriber base. Total cellular market share in Israel (based on the number of subscribers) at the end of 2017 was estimated to be approximately 25%, compared with 26% in 2016 and 27% in 2015.

The monthly Average Revenue Per User (ARPU) for cellular subscribers for the year 2017 was NIS 62 (US\$ 18), a decrease of approximately 5% from NIS 65 in 2016. The decrease mainly reflected the continued price erosion in the key cellular services including airtime, content, data and browsing, due to the persistent fierce competition in the cellular market, as well as a decrease in wholesale service revenues as a result of termination of the Right of Use Agreement with HOT Mobile from the second quarter of 2016. See "Item 5A.1e Right of Use Agreement with HOT Mobile". Overall, cellular service revenues decreased by 6% in 2017 compared with 2016.

Fixed line market. Total fixed line segment service revenues decreased by 10% in 2017, as a result of a decrease in revenues from international calling services (including the market for wholesale international traffic) which were adversely affected both by the increased penetration of internet-based solutions and increased competition from other service providers, and a decrease in inter-segment revenues. In 2017, the Company launched two services under the fixed line segment – Partner TV service (in June 2017) and the commercial phase and accelerated deployment of our fiber optic network in residential areas throughout the country (in August 2017). The launches of Partner TV service and the commercial phase and accelerated deployment of our fiber optic network did not have a significant impact on fixed-line segment revenues in 2017.

Equipment sales. In addition to a decrease in service revenues, revenues from equipment sales decreased in 2017 by 13%, reflecting principally a decline in sales volumes of both cellular devices and other non-core equipment including tablets, televisions and other audio visual devices.

See also “Item 5D.2 Outlook” and “Item 3D.2b Our level of indebtedness could adversely affect our business, profits and liquidity. Furthermore, difficulties in generating sustainable cash flow may impair our ability to repay our debt and reduce the level of indebtedness.”

Cost reductions and efficiency measures. In order to mitigate the impact of competition on price erosion and decreases in revenues and in profits from services and equipment sales, the Company continued to adjust its cost structure and to implement operational efficiency measures through 2017. This was reflected in a decrease in total operating expenses in 2017 of NIS 377 million (including cost of service revenues (NIS 2,083 million in 2017) and selling, marketing and administrative expenses (NIS 466 million in 2017), and excluding depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation) (NIS 602 million in 2017); this measure is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies). This decrease followed a decrease in total operating expenses in 2016 of NIS 139 million compared with 2015. The decrease in total operating expenses in 2017 mainly reflected decreases (i) in cellular network and cable maintenance and operating lease expenses, (in cost of service revenues) principally as a result of the network sharing agreement with HOT Mobile, (ii) in selling commissions, net (in selling, marketing, general and administrative expenses), principally as a result of the early adoption of IFRS 15 from the beginning of 2017, (iii) in international call expenses (in cost of service revenues), (iv) in bad debts and allowance for doubtful accounts expenses (in selling, marketing, general and administrative expenses), (v) in advertising and marketing expenses (in selling, marketing, general and administrative expenses) and (vi) in other expense items as a result of various efficiency measures. These decreases were partially offset by increases in expenses related to Partner TV service (in cost of service revenues) that was launched during 2017, and in expenses related to internet services (in cost of service revenues).

Profitability. Reported profit in 2017 was NIS 114 million (US\$ 33 million). Without the impact of the early adoption of IFRS 15 in 2017, profit would have been NIS 61 million, an increase of 17% compared with NIS 52 million in 2016. Adjusted EBITDA in 2017 totaled NIS 917 million (US\$ 264 million). Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA would have been NIS 835 million, an increase of 0.1% from NIS 834 million in 2016.

5A.1c Settlement Agreement with Orange Brand Services Ltd.

In June 2015, the Company announced that it had entered into a settlement agreement with Orange Brand Services Ltd ("Orange") which created a new framework for their relationship and provided both Partner and Orange the right to terminate the brand license agreement which had been in force since 1998. In accordance with the terms of the settlement agreement, the Company received advance payments in a total of €90 million during 2015: €40 million of which was received between the signing of the agreement and the completion of a market study to assess the Company's position within the dynamics of the Israeli telecommunications services market; and €50 million of which was received in the fourth quarter of 2015, following the Company's notice to Orange of its decision to terminate the brand license agreement.

As set forth in the settlement agreement, the advance payments were recognized and reconciled evenly on a quarterly basis over a period until the second quarter of 2017, against contingent marketing, sales, customer services and other expenses to be incurred over this period. The income was recorded in the Company's income statement under "Income with respect to settlement agreement with Orange". For the years ended December 31, 2015, 2016 and 2017, the Company recognized income with respect to the settlement agreement in an amount, respectively, of NIS 61 million, NIS 217 million and NIS 108 million (US\$ 31 million). Based on a legal opinion provided to the Company, the advance payments are considered compensation payments and are therefore not subject to VAT charges.

5A.1d Network Sharing Agreement with HOT Mobile

In November 2013, the Company entered into a 15-year Network Sharing Agreement with HOT Mobile. Pursuant to the Network Sharing Agreement, the parties created a 50-50 limited partnership - P.H.I. Networks (2015) Limited Partnership, which operates and develops a radio access network shared by both parties, starting with a pooling of both parties' radio access network infrastructures creating a single shared pooled radio access network. See "Item 4B.9 Our Network."

In February 2016, HOT Mobile exercised its option under the Network Sharing Agreement ("NSA") to advance the payment date of a onetime amount of NIS 250 million ("Lump Sum"), which was received in 2016. Therefore according to the NSA from April 2016 onward (i) each party bears half of the expenditures relating to the Shared Network, and (ii) the operating costs of the Shared Network are borne according to a pre-determined apportionment mechanism, according to which one half of the operating costs is shared equally by the parties, and one half is divided between the parties according to the relative volume of their respective traffic consumption in the Shared Network ("Capex-Opex Mechanism").

The Lump Sum is recognized as deferred revenue for the cellular segment amortized quarterly in the income statement over a period of eight years, starting with the second quarter of 2016. Eight years has been determined to be the shorter of the expected period of the arrangement or the expected life of the related assets. Accordingly, approximately NIS 23 million and NIS 31 million (US\$ 9 million) was amortized to revenues in the income statement during 2016 and 2017, respectively. Until the termination of the eight-year amortization period, approximately NIS 31 million of the Lump Sum will be amortized to our revenues each year.

The Network Sharing Agreement provides material financial benefits to Partner in terms of both recognition of the amortized Lump Sum payments and savings in operational expenses and capital investments; however, such financial benefits are dependent on factors set forth in the related risk factor. See "Item 3D.2e If the network sharing agreement entered into with HOT Mobile is unilaterally terminated by HOT Mobile earlier than we expect, we will be required to split the shared network with HOT Mobile and the resources, time and expense it may take us to have our own network in a nationwide coverage, would be substantial and could also materially harm our business and the results of operations at such time."

5A.1e Right of Use Agreement with HOT Mobile

Partner and HOT Mobile entered into a separate Right of Use agreement which took effect in November 2013 and remained operational until March 2016. Under the Right of Use agreement, Partner provided services to HOT Mobile in the form of a right of use of Partner's cellular network. According to the Right of Use agreement, HOT Mobile paid Partner fixed base payments with additional variable payments, based, among other things, on traffic volume exceeding a defined threshold. HOT Mobile ceased making payments under the ROU from April 2016 when the Capex-Opex Mechanism became effective under the Network Sharing Agreement.

Cellular segment revenues recorded relating to the Right of Use agreement totaled approximately NIS 120 million and NIS 51 million for the years 2015 and 2016 respectively.

5A.1f Impairment of Fixed-Line Assets and Goodwill

Impairment of Fixed-Line Assets as of December 31, 2015.

In 2015, the Group decided to cease using the "012 Smile" trade name in 2017. This change in business induced the Group to determine that an indicator of impairment exists for the fixed-line segment. See also information with respect to change in estimate of useful life of the intangible asset trade name in note 4(a)(2) and 4(a)(1) to our consolidated financial statements.

For the purpose of the impairment test, the assets were grouped to the lowest level for which there are separately identifiable cash flows (CGU).

(i) The Group reviewed the recoverability of the VOB/ISP assets. As a result, an impairment charge in a total amount of NIS 98 million was recognized. The impairment charge was allocated to the assets of the CGU pro rata, on the basis of the carrying amount of each asset, provided that the impairment did not reduce the carrying amount of an asset below the highest of its fair value less costs to sell and its value-in-use, and zero. Accordingly, the following impairment charges were recorded in the assets of the above CGU (see note 13 to our consolidated financial statements):

- (a) Right of use of international fiber optic cables by NIS 76 million, recorded in cost of revenues;
- (b) Customer relationships by NIS 8 million, recorded in selling and marketing expenses;
- (c) Computers and information systems by NIS 7 million, recorded in cost of revenues;
- (d) Communication network by NIS 5 million, recorded in cost of revenues; and
- (e) Trade name by NIS 2 million, recorded in selling and marketing expenses.

The recoverable amount of the VOB/ISP CGU as of December 31, 2015 was assessed by management with the assistance of an external independent expert ("Giza Singer Even. Ltd") based on value-in-use calculations, which was NIS 250 million. The value in use calculations use pre-tax cash flow projections covering a five-year period and using extrapolation with specific adjustments expected until 2027, which is the economic life of the main asset of the CGU: the deferred expenses – Right of Use, and a pre-tax discount rate of 12.9%. The value-in-use calculations included all factors in real terms.

The impairment test was based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts in future periods. See also note 2(i) and note 4(a)(2).

(ii) The Group reviewed the recoverability of the ILD CGU in the fixed line segment and determined that no impairment exists as of December 31, 2015.

Impairment test of Fixed-Line Goodwill as of December 31, 2015, 2016 and 2017.

Goodwill is allocated to a single group of CGUs which constitute all the operations of the fixed-line segment, in an amount of NIS 407 million.

For the purpose of the goodwill impairment tests as of December 31, 2015, 2016 and 2017 the recoverable amount was assessed by management with the assistance of an external independent experts (2015: "Giza Singer Even. Ltd", 2016, 2017: "BDO Ziv Haft Consulting & Management Ltd.") based on value-in-use calculations. The value-in-use calculations use pre-tax cash flow projections covering a five-year period. Cash flows beyond the five-year period to be generated from continuing use are extrapolated using estimated growth rates. The growth rate represents the long-term average growth rate of the fixed-line communications services business. The key assumptions used are as follows:

	As of December 31,		
	2015	2016	2017
	(negative		
Terminal growth rate	0.09%)	0.5 %	0.9 %
After-tax discount rate	10.3 %	9.8 %	9.3 %
Pre-tax discount rate	13.4 %	11.9 %	11.2 %

The impairment tests as of December 31, 2015, 2016 and 2017 were based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts.

As a result of the impairment tests, the Group determined that no goodwill impairment existed as of December 31, 2015, 2016 and 2017. See also note 4(a)(3) and note 2(h) to our consolidated financial statements.

Sensitivity Analysis:

The headroom of the fixed line segment recoverable amount over the carrying amount as of December 31, 2015, 2016 and 2017 was approximately 9%, 23% and 23% respectively. Sensitivity analysis was performed for the recoverable amount as of December 31, 2017 for a change of the after-tax discount rate within the range of $\pm 10\%$ multiplied by the variable 9.3% (8.4% to 10.2%), assuming all other variables constant. Sensitivity analysis was also performed for a change of the terminal permanent growth rate within the range of $\pm 1\%$ of the variable 0.9% (minus 0.9% to 1.9%), assuming all other variables constant. Results showed that no impairment charge is required for both analyses.

5A.1g Agreement for the Upgrade of Our Existing Networks and the Deployment of Fourth Generation Network in Israel

On October 25, 2010, the Company signed an agreement with LM Ericsson Israel Ltd. ("Ericsson") for the upgrade of its then existing networks and the deployment of a fourth generation network in Israel (the "Agreement") for approximately US \$100 million. The Agreement includes the upgrade, replacement and the expansion of certain parts of the Company's existing cellular and fixed-line networks and the maintenance of its networks, including enhancement of the Company's abilities with respect to the cellular and fixed-line ISP services it provides. The initial term of the all-inclusive agreement with Ericsson ended on December 31, 2014. We extended, with certain modifications, the maintenance period by additional periods until the end of 2018.

5A.1h Significant regulatory developments

For information regarding developments which have had and may have a significant impact on our operating results, see "Item 3D.1 RISKS RELATING TO THE REGULATION OF OUR INDUSTRY" and "Item 4B.13 Regulation".

5A.1i Revenues

We derive revenues from both providing services and selling equipment.

Our principal source of revenues is the cellular segment, deriving from the sale of cellular network services to subscribers, including basic cellular telephony services, text messaging, internet browsing and data transfer, content services, roaming services and services provided to other operators that use the Company's cellular network.

76

The fixed-line business segment derives revenues from a variety of fixed-line services that include internet services, ILD services, transmission services, telephony services (including SIP services) and, starting in 2017, TV services.

Equipment revenues are derived from the sale and leasing of a variety of communications, digital audio visual equipment and other related equipment, including cellular handsets and related cellular devices and accessories, landline phones, business communications equipment, modems, domestic routers, servers, smartboxes and related equipment. See also "Item 4B.5 SERVICES AND PRODUCTS".

5A.1j Early adoption of IFRS 15 Revenue from Contracts with Customers – change in accounting policy

In the third quarter of 2017 the Group early adopted IFRS 15, Revenue from Contracts with Customers and its clarifications ("IFRS 15", "The Standard") (the standard is effective from January 1, 2018, earlier application is permitted) with a retrospective date of application to January 1, 2017 (the "transition date") using the cumulative effect approach, which effect was immaterial as of the transition date. IFRS 15 outlines a single comprehensive model of accounting for revenue arising from contracts with customers and supersedes IAS 18, Revenue, and IAS 11, Construction contracts (the "previous standards"). The model includes five steps for analyzing transactions so as to determine when to recognize revenue and at what amount:

1. Identifying the contract with the customer.
2. Identifying separate performance obligations in the contract.
3. Determining the transaction price.
4. Allocating the transaction price to separate performance obligations.
5. Recognizing revenue when the performance obligations are satisfied.

In accordance with the model, the Group recognizes revenue when it satisfies performance obligations by transferring control over the goods or services to the customers. Revenue is measured based on the consideration that the Group expects to receive for the transfer of the goods or services specified in a contract with the customer, taking into account rebates and discounts, excluding amounts collected on behalf of third parties, such as value added taxes. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component (such as sales of equipment with non-current credit arrangements, mainly in 36 monthly installments) and for any consideration payable to the customer. See also note 2(n) to our consolidated statements. With respect to sales that constitute a revenue arrangement with multiple performance obligations, the transaction price is allocated to separate performance obligations based on their relative stand-alone selling prices, see also note 4(b)(2) to our consolidated statements.

The performance obligations are separately identifiable where the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from other promises in the contract. The performance obligations are mainly services, equipment, and options to purchase additional goods or services that provide a material right to the customer. Revenues from services and from providing rights to use the Group's assets (see note 1(b) in our consolidated financial statements) (either month-by-month or long term arrangements) are recognized over time, as the services are rendered to the customers, and all other revenue recognition criteria are met. Revenue from sale of equipment (see note 1(b) in our consolidated financial statements) is recognized at a point of time when the control over the equipment is transferred to the customer (mainly upon delivery) and all other revenue recognition criteria are met.

The Group determines whether it is acting as a principal or as an agent. The Group is acting as a principal if it controls a promised good or service before they are transferred to a customer. Indicators for acting as a principal include: (1) the Group is primarily responsible for fulfilling the promise to provide the specified good or service, (2) the Group has inventory risk in the specified good or service and (3) the Group has discretion in establishing the price for the specified good or service. On the other hand, the Group is acting as an agent or an intermediary, if these criteria are not met. When the Group is acting as an agent, revenue is recognized in the amount of any fee or commission to which the Group expects to be entitled in exchange for arranging for the other party to provide its goods or services. A Group's fee or commission might be the net amount of consideration that the Group retains after paying the other party the consideration received in exchange for the goods or services to be provided by that party. The Group determined that it is acting as an agent in respect of certain content services provided by third parties to customers; therefore the revenues recognized from these services are presented on a net basis in the statement of income.

The application of IFRS 15 did not have a material effect on the measurement and timing of the Group's revenue in the reporting period, compared to the provisions of the previous standards. Capitalization of contract costs resulted in a significant impact from the adoption, see below.

Transition to the new revenue recognition model:

The Group applied IFRS 15 using the cumulative effect approach as from the transition date, without a restatement of comparative figures. As part of the initial implementation of IFRS 15, the Group has chosen to apply the expedients in the transitional provisions, according to which the cumulative effect approach is applied only for contracts not yet complete at the transition date, and therefore there is no change in the accounting treatment for contracts completed at the transition date. The Group also applied the practical expedient of examining the aggregate effect of contracts changes that occurred before the transition date, instead of examining each change separately. Contracts that are renewed on a monthly basis and may be cancelled by the customer at any time, without penalty, were considered completed contracts at the transition date. The transition resulted in an immaterial amount on the statement of financial position as of the transition date, as the cumulative effect as of the transition date was immaterial.

Other practical expedients implemented:

The Group applies IFRS 15 practical expedient to the revenue model to a portfolio of contracts with similar characteristics if the Group reasonably expects that the financial statement effects of applying the model to the individual contracts within the portfolio would not differ materially.

The Group applies a practical expedient in the standard and measures progress toward completing satisfaction of a performance obligation and recognizes revenue based on billed amounts if the Group has a right to invoice a customer at an amount that corresponds directly with its performance to date; for which, or where the original expected duration of the contract is one year or less, the group also applies the practical expedient in the standard and does not disclose the transaction price allocated to unsatisfied, or partially unsatisfied, performance obligations, such as constrained variable consideration.

The Group applies a practical expedient in the standard and does not adjust the transaction price for the effects of a significant financing component if, at contract inception, the Group expects the period between customer payment and the transfer of goods or services to be one year or less (see note 23 to our consolidated statements - unwinding of trade receivables and note 7(a) to our consolidated statements). See also disaggregation of revenues in note 22 to our consolidated statements.

The Group applies in certain circumstances where the customer has a material right to acquire future goods or services and those goods or services are similar to the original goods or services in the contract and are provided in accordance with the same terms of the original contract, a practical alternative to estimating the stand-alone selling price of the customer option, and instead allocates the transaction price to the optional goods or services by reference to the goods or services expected to be provided and the corresponding expected consideration.

Recognition of receivables:

A receivable is recognized when the control over the goods or services is transferred to the customer, and the consideration is unconditional because only the passage of time is required before the payment is due. See note 7 to our consolidated statements and also note 6(a)(3) to our consolidated statements regarding trade receivables credit risk.

78

Recognition of contract assets and contract liabilities:

A contract asset is a Group's right to consideration in exchange for goods or services that the entity has transferred to a customer when that right is conditioned on something other than the passage of time (for example, the Group's future performance).

A contract liability is a Group's obligation to transfer goods or services to a customer for which the entity has received consideration (or the amount is due) from the customer; therefore the Group records contract liabilities for payments received in advance for services, such as transmission services and pre-paid calling cards, as deferred revenues until such related services are provided.

Capitalization of contract costs:

The main effect of the Group's application of IFRS 15 is the accounting treatment for the incremental costs of obtaining contracts with customers, which in accordance with IFRS 15, are recognized as assets when the costs are incremental to obtaining the contracts, and it is probable that the Group will recover these costs, instead of recognizing these costs in the statement of income as incurred (mainly direct commissions paid to resellers and sales employees for sales and upgrades). The assets are amortized in accordance with the expected service period (mainly over 2-3 years), using the portfolio approach, see note 4(a)(2) to our consolidated statements. IFRS 15 also determines that direct costs of fulfilling a contract which the Group can specifically identify and which produce or improve the Group's resources that are used for its future performance obligation (and it is probable that the Group will recover these costs) are recognized as assets (together: "contract costs"), see note 11 to our consolidated statements. Contract costs that were recognized as assets are presented in the statements of cash flows as part of cash flows used in investing activities. Other costs incurred that would arise regardless of whether a contract with a customer was obtained are recognized as an expense when incurred. Under the previous accounting policy, contract costs were not capitalized, and instead, subsidies, in some cases, of sales of handsets to end subscribers at a price below its cost, securing a fixed-term service contract, were capitalized as subscriber acquisition and retention costs (SARC costs). SARC costs were eliminated upon the transition to IFRS 15, see notes 2(f)(5) and 11 to our consolidated financial statements.

Use of judgments and estimates:

Implementation of the accounting policy described above requires management to exercise discretion to estimate the expected service period and the anticipated subscriber churn rate. Changes in such estimates may result in a change in depreciation and amortization expenses and changes in the contract costs asset, see note 4(a)(1) to our consolidated statements.

Management estimates the stand-alone selling prices of performance obligations, see note 4(b)(2) to our consolidated statements.

The tables below summarize the effects of IFRS 15 on the consolidated statement of financial position as at December 31, 2017 and on the consolidated statements of income and cash flows for the year then ended. See also disaggregation of revenues and additional information in note 22 to our consolidated financial statements.

Effect of change on consolidated statement of financial position:

		New Israeli Shekels in millions	
		As of December 31, 2017	
	note	Previous accounting policy	Effect to IFRS 15 as reported
Current assets - other receivables and prepaid expenses - Contract assets		-	2

5A.1k Cost of Revenues

The principal components of our cost of revenues are:

- Transmission, communication and content providers
- Cost of equipment and accessories
- Depreciation and amortization (including impairment)
- Wages, employee benefits expenses and car maintenance

- Operating lease, rent and overhead expenses
- Network and cable maintenance
- Internet infrastructure and service providers (“ISPs”)
- Costs of handling, replacing or repairing equipment
- Car kit installation, IT support, and general operating expenses
- Amortization of rights of use (including impairment)

5A.1l Selling and Marketing Expenses

The principal components of our selling and marketing expenses are:

- Wages, employee benefits expenses and car maintenance
- Depreciation and amortization (including impairment)
- Advertising and marketing
- Selling commissions, net
- Operating lease, rent and overhead expenses

5A.1m General and Administrative Expenses

The principal components of our general and administrative expenses are:

- Wages, employee benefits expenses and car maintenance
- Bad debts and allowance for doubtful accounts
- Professional fees
- Credit card and other commissions
- Depreciation

5A.1n Income with Respect to the Settlement Agreement with Orange

Income with respect to the Settlement Agreement with Orange consists of recognized payments received by Partner thereunder (see Item "5A.1c Settlement Agreement with Orange Brand Services Ltd."). The recognition of such payments terminated after the second quarter of 2017.

5A.1o Other Income, Net

The principal components of our other income, net, are:

- Unwinding of trade receivables

Capital gain from sale of property and equipment

81

5A.1p Finance Costs, Net

The principal component of our finance expenses is:

Interest expenses

CPI linkage expenses

The principal components of our finance income are:

Net foreign exchange rate gains

Interest income from cash equivalents

Fair value gain from derivative financials instruments, net

5A.1q Key Cellular Business Indicators (Operating Data)

Our primary key cellular business indicators are described below. These indicators are widely used in the cellular telephone service industry to evaluate performance.

Number of subscribers

Average monthly revenue per subscriber (ARPU)

Churn rate

5A.1r Critical Accounting Estimates and Judgments

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below. See also note 4 to the consolidated financial statements.

5A.1r - i Critical accounting estimates and assumptions

(1) Assessing the useful lives of assets

The useful economic lives of the Company's assets are an estimate determined by management. The Group defines useful economic life of its assets in terms of the assets' expected utility to the Group. This estimation is based on assumptions of future changes in technology or changes in the Group's intended use of these assets, and experience of the Group with similar assets, and legal or contract periods where relevant. The assets estimated economic useful lives are reviewed, and adjusted if appropriate, at least annually. See also note 2(e) and note 2(f) to the consolidated financial statements. See also information with respect to the change in estimate of the useful life of the "012 Smile" trade name in (2) below.

The useful economic lives of contract costs (see notes 2(n) and 2(f)(5) to our consolidated financial statements) are an estimate determined by management. Contract costs are amortized in accordance with the expected service period (mainly over 2-3 years), using the portfolio approach. The assets estimated economic useful lives are reviewed, and

adjusted if appropriate, at least annually. See also note 11 to our consolidated financial statements.

82

(2) Assessing the recoverable amount for impairment tests of assets with finite useful lives

The Group is required to determine at the end of each reporting period whether there is any indication that an asset may be impaired. If indicators for impairment are identified the Group estimates the assets' recoverable amount, which is the higher of an asset's fair value less costs to sell and value in use. The value-in-use calculations require management to make estimates of the projected future cash flows. Determining the estimates of the future cash flows is based on management past experience and best estimate for the economic conditions that will exist over the remaining useful economic life of the Cash Generating Unit ("CGU"). See also note 2(i) to our consolidated financial statements.

No indicators for an impairment or reversal of impairment of assets with finite useful lives were identified in 2017.

In the fourth quarter of 2015, the Group decided to cease using the "012 Smile" trade name in 2017. This change in business induced the Group to determine that an indicator of impairment exists for the fixed-line segment. See note 13(2) to the consolidated financial statements.

An Impairment test in the fourth quarter of 2015 for the VOB/ISP CGU of the fixed line segment resulted in an impairment charge to certain assets in a total amount of NIS 98 million, based on the key assumptions described in note 13(2) to the consolidated financial statements. The recoverable amount of the VOB/ISP CGU assets as of December 31, 2015 was assessed by management with the assistance of an external independent expert ("Giza Singer Even. Ltd") based on value-in-use calculations, which was NIS 250 million. The value in use calculations use pre-tax cash flow projections covering a five-year period and using extrapolation with specific adjustments expected until 2027, which is the economic life of the main asset of the CGU: the deferred expenses – Right of Use, and a pre-tax discount rate of 12.9%. The value-in-use calculations included all factors in real terms. The value-in-use of the assets of the CGU was estimated to exceed the fair value less costs to sale.

The impairment test in the fourth quarter of 2015 was based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts in future periods. See also note 2(i) to our consolidated financial statements.

As a result of the decision in 2015 to cease the usage of the "012 Smile" trade name the Group revised its expected useful life to end in 2017 as a change in accounting estimate. As a result the amortization expenses of the trade name increased in 2015, 2016 and 2017 by NIS 1 million, NIS 16 million and NIS 6 million, respectively. See note 11 to our consolidated financial statements.

Further increase in the level of competition that will continue to push downward prices may require the Group to perform further impairment tests of assets. Such impairment tests may lead to recording significant impairment charges, which could have a material negative impact on the Group's operating and net profit.

(3) Assessing the recoverable amount of goodwill for impairment tests

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The recoverable amount of the fixed line segment to which goodwill has been allocated to have been determined based on value-in-use calculations. For the purpose of the goodwill impairment tests as of December 31, 2015, 2016 and 2017 the recoverable amount was assessed by management with the assistance of an external independent experts (2015: "Giza Singer Even. Ltd", 2016, 2017: "BDO Ziv Haft Consulting & Management Ltd.") based on value-in-use calculations. The value-in-use calculations use pre-tax cash flow projections covering a five-year period. Cash flows beyond the five-year period to be generated from continuing use

are extrapolated using estimated growth rates. The growth rate represents the long-term average growth rate of the fixed-line communications services business.

The key assumptions used in the December, 31, 2017 test were as follows:

Terminal growth rate	0.9%
After-tax discount rate	9.3%
Pre-tax discount rate	11.2%

The impairment test as of December 31, 2017 was based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts. See also note 13(1) and note 2(h) to the consolidated financial statements. No impairment charges were recognized in with respect to goodwill in 2015, 2016 and 2017.

Sensitivity Analysis:

The headroom of the fixed line segment recoverable amount over the carrying amount as of December 31, 2015, 2016 and 2017 was approximately 9%, 23% and 23% respectively. Sensitivity analysis was performed for the recoverable amount as of December 31, 2017 for a change of the after-tax discount rate within the range of $\pm 10\%$ multiplied by the variable 9.3% (8.4% to 10.2%), assuming all other variables constant. Sensitivity analysis was also performed for a change of the terminal permanent growth rate within the range of $\pm 1\%$ of the variable 0.9% (minus 0.9% to 1.9%), assuming all other variables constant. Results showed that no impairment charge is required for both analyses.

(4) Assessing allowance for doubtful accounts

The allowance is established when there is objective evidence that the Group will not be able to collect amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, or delinquency or default in debtor payments are considered indicators that a trade receivable is impaired. Individual receivables which are known to be uncollectable are written off by reducing the carrying amount directly. The other receivables are assessed collectively. For these receivables the allowance is determined based on percentage of doubtful debts in collection, considering the likelihood of recoverability based on the age of the balances, the historical write-off experience net of recoveries, changes in the credit worthiness, and collection trends. The trade receivables are periodically reviewed for impairment. See note 7 to the consolidated financial statements.

(5) Considering uncertain tax positions

The assessment of amounts of current and deferred taxes requires the Group's management to take into consideration uncertainties that its tax position will be accepted and of incurring any additional tax expenses. This assessment is based on estimates and assumptions based on interpretation of tax laws and regulations, and the Group's past experience. It is possible that new information will become known in future periods that will cause the final tax outcome to be different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. See also notes 2(p) and note 25 to the consolidated financial statements.

5A.1r - ii Critical judgments in applying the Company's accounting policies

(1) Considering the likelihood of contingent losses and quantifying possible settlements:

Provisions are recorded when a loss is considered probable and can be reasonably estimated. Judgment is necessary in assessing the likelihood that a pending claim or litigation against the Group will succeed, or a liability will arise,

quantifying the possible range of final settlement. These judgments are made by management with the support of internal specialists, or with the support of outside consultants such as legal counsel. Because of the inherent uncertainties in this evaluation process, actual results may be different from these estimates. See notes 2(m), 14, and 20 to our consolidated financial statements.

(2) Considering contracts with customers with multiple performance obligations

Some contracts with customers include several performance obligations, and consideration (including any discounts) is allocated to them based on their relative stand-alone selling prices. Management estimates the stand-alone selling price at contract inception based on observable prices of the type of goods and services in similar circumstances to similar customers. Where these are not directly observable, they are estimated based on cost-plus expected margin or adjusted market approach. See also note 2(n) to the consolidated financial statements.

(3) Accounting treatment for the investment in PHI

The Board of Directors of Net 4 P.H.I Ltd., consists of three directors nominated by the Company, three directors nominated by HOT Mobile and one independent director who acts as a chairman. Net 4 P.H.I Ltd. controls PHI. This governance provides that the Company does not control PHI nor does it have joint control over it, and the Company accounts for its investment in PHI according to the equity method, see also note 2(c)(2) and note 9 to the consolidated financial statements.

5A.2 RESULTS OF CONSOLIDATED OPERATIONS FOR THE YEAR ENDED DECEMBER 31, 2017 COMPARED TO THE YEAR ENDED DECEMBER 31, 2016

REPORTED RESULTS OF CONSOLIDATED OPERATIONS*

	New Israeli Shekels		Year ended December 31, 2017*

* See “Item 5A.1j Early adoption of IFRS 15 Revenue from Contracts with Customers – change in accounting policy ” and also note 2(n) and 2(f)(5) to the consolidated financial statements regarding the early adoption of IFRS 15, Revenue from Contracts with Customers. In 2017 costs of obtaining contracts with customers were capitalized in amounts of NIS 64 million and NIS 20 million for the cellular segment and the fixed-line segment, respectively. The adoption of IFRS 15 resulted in an increase in amortization expenses in 2017 for the cellular segment and the fixed-line segment in amounts of NIS 11 million and NIS 2 million, respectively.

Adjusted EBITDA (3)				834

(1) Operating expenses include selling and marketing expenses and general and administrative expenses.

(2) Mainly amortization of employee share based compensation.

(3) Adjusted EBITDA as reviewed by the CODM represents Earnings Before Interest (finance costs, net), Taxes, Depreciation and Amortization (including amortization of intangible assets, deferred expenses-right of use and impairment charges) and Other expenses (mainly amortization of share based compensation). Adjusted EBITDA is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies. Adjusted EBITDA may not be indicative of the Group's historic operating results nor is it meant to be predictive of potential future results. See "Item 5A.1a - NON-GAAP MEASURES" above. The usage of the term "Adjusted EBITDA" is to highlight the fact that the Amortization includes amortization of deferred expenses – right of use and amortization of employee share based compensation and impairment charges; it is fully comparable to EBITDA information which has been previously provided for prior periods.

Impact of early adoption of IFRS 15 on statement of income, and reconciliation between Non GAAP measures without impact of early adoption of IFRS 15 and most comparable IFRS financial measures:

Total revenues. In 2017, total revenues were NIS 3,268 million (US\$ 943 million), a decrease of 8% from NIS 3,544 million in 2016.

Revenues from services. Service revenues in 2017 totaled NIS 2,582 million (US\$ 745 million), a decrease of 6% from NIS 2,752 million in 2016.

Revenues from equipment. Equipment revenues in 2017 totaled NIS 686 million (US\$ 198 million), a decrease of 13% from NIS 792 million in 2016, largely reflecting a significant decrease in sales volumes of both cellular devices and other non-core equipment such as tablets, televisions and other audio visual devices. The decrease mainly reflected the impact of the tightening of the Company's customer credit policy, whereby the Company imposed stricter requirements for customers to be accepted for long term financing plans under which the customer pays for the equipment through monthly payments (generally between 12 and 36 months).

Gross profit from service revenues. The gross profit from service revenues in 2017 was NIS 499 million (US\$ 144 million), compared with NIS 476 million in 2016, an increase of 5%. This increase reflected the decrease in the cost of service revenues, which was partially offset by the smaller decrease in service revenues. See also note 22 to our consolidated financial statements.

Gross profit from equipment sales. Gross profit from equipment sales in 2017 was NIS 142 million (US\$ 41 million), compared with NIS 144 million in 2016, a decrease of 1%. This decrease reflected the decrease in gross profit from equipment sales for the cellular segment which was partially offset by the increase in gross profit from equipment sales for the fixed-line segment. See also "Item 5D.2 Outlook".

Selling, marketing, general and administrative expenses. Reported selling, marketing, general and administrative expenses totaled NIS 465 million (US\$ 134 million) in 2017 following the adoption of IFRS 15, compared with NIS 689 million in 2016 (before the adoption of IFRS 15), a decrease of 33%. This decrease mainly reflected decreases in sales commissions as a result of the adoption of IFRS 15, as well as in payroll and related expenses, in bad debts and allowance for doubtful accounts expenses and in advertising and marketing expenses related, in part, to the marketing activities for the rebranding of the Company in 2016. Without the impact of the early adoption of IFRS 15 in 2017, selling, marketing, general and administrative expenses would have been NIS 536 million, a decrease of 22% from NIS 689 million in 2016.

Total operating expenses ("OPEX"). Total operating expenses amounted to NIS 1,946 million (US\$ 561 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, total operating expenses would have been NIS 2,030 million, a decrease of 13% or NIS 294 million from 2016. Total operating expenses ("Opex") (not a financial measure under IFRS and not necessarily comparable to similarly titled measures for other companies) includes cost of service revenues (NIS 2,083 million in 2017) and selling, marketing, general and administrative expenses (NIS 465 million in 2017), and excludes depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation) (NIS 602 million in 2017). The decrease in total operating expenses in 2017 without the impact of the early adoption of IFRS 15 mainly reflected decreases (i) in cellular network and cable maintenance and operating lease expenses (in cost of service revenues) principally as a result of the network sharing agreement with HOT Mobile, (ii) in international call expenses (in cost of service revenues), (iii) in bad debts and allowance for doubtful accounts expenses (in selling, marketing and administrative expenses), (iv) in advertising and marketing expenses (in selling, marketing and administrative expenses) and (v) in other expense items as a result of various efficiency measures. These decreases were partially offset by increases in expenses related to Partner TV service (in cost of service revenues) that was launched during 2017, and in expenses related to internet services (in cost of service revenues).

Including depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation), total operating expenses in 2017 amounted to NIS 2,548 million (US\$ 735 million). Without the impact of the early adoption of IFRS 15 in 2017, total operating expenses including depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation) would have been NIS 2,619 million, a decrease of 12% compared with 2016. See also note 22 to our consolidated financial statements.

Income with respect to settlement with Orange. In 2017, the Company recorded income with respect to the settlement agreement of the Orange brand agreement in an amount of NIS 108 million (US\$ 31 million) compared with NIS 217 million recorded in 2016. As set forth in the settlement agreement, the advance payments received from Orange were recognized and reconciled evenly on a quarterly basis over a period until the second quarter of 2017, against contingent marketing, sales, customer services and other expenses that were incurred over this period. See also "Item 5A.1c Settlement Agreement with Orange Brand Services Ltd.," "5D.2 Outlook" and note 18 to our consolidated financial statements.

Other income, net. Other income, net, totaled NIS 31 million (US\$ 9 million) in 2017, compared to NIS 45 million in 2016, a decrease of 31%, reflecting a decrease in income from the unwinding of trade receivables. See also note 23 to our consolidated financial statements.

Operating profit. Reported operating profit for 2017 was NIS 315 million (US\$ 91 million). Without the impact of the early adoption of IFRS 15 in 2017, operating profit would have been NIS 246 million, an increase of 27% compared

with reported operating profit of NIS 193 million in 2016.

Finance costs, net. Finance costs, net in 2017 were NIS 180 million (US\$ 52 million), an increase of 71% compared with NIS 105 million in 2016. The increase largely reflected the impact of the increase in early debt repayment expenses in 2017 of NIS 82 million which were mainly related to the early repayment of borrowings during 2017 in a total amount of NIS 1,283 million (US\$ 370 million). See also “Item 5B Liquidity and Capital Resources.”

88

Profit (loss) before income tax. Profit before income taxes for 2017 was NIS 135 million (US\$ 39 million). Without the impact of the early adoption of IFRS 15 in 2017, profit before income taxes would have been NIS 66 million, a decrease of 25% compared with NIS 88 million in 2016, reflecting the increase in finance costs, net, which more than offset the increase in operating profit.

Income taxes on profit. Income taxes on profit for 2017 were NIS 21 million (US\$ 6 million). Without the impact of the early adoption of IFRS 15 in 2017, income taxes on profit would have been NIS 5 million, compared with NIS 36 million in 2016.

An income tax audit of the Company, concluded in 2017, resulted in a one-time income of NIS 10 million in income tax expenses and in an additional one-time deferred tax income of NIS 9 million, which was recognized in income tax expenses.

The effective tax rate of the Company in 2017 was 16% compared with 41% in 2016, largely reflecting the one-time factors in 2017 described above. The regular corporate tax rate in Israel for 2016 was 25% and for 2017 was 24%. The regular corporate tax rate for 2018 and thereafter will be reduced further to 23%.

The Company's effective tax rate is expected to continue to be higher than the corporate tax rate mainly due to nondeductible expenses. See also note 25 to our consolidated financial statements.

Profit. Reported profit in 2017 was NIS 114 million (US\$ 33 million). Without the impact of the early adoption of IFRS 15 in 2017, profit would have been NIS 61 million, an increase of 17% compared with NIS 52 million in 2016. Based on the weighted average number of shares outstanding during 2017, basic earnings per share or ADS was NIS 0.70 (US\$ 0.20). Without the impact of the early adoption of IFRS 15 in 2017, basic earnings per share or ADS would have been NIS 0.38 compared with NIS 0.33 in 2016.

For information regarding potential downward impacts on profits in 2018, see "Item 5D.2 Outlook."

Adjusted EBITDA. Adjusted EBITDA in 2017 totaled NIS 917 million (US\$ 264 million). Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA would have been NIS 835 million, an increase of 0.1% from NIS 834 million in 2016. As a percentage of total revenues, Adjusted EBITDA in 2017 was 28%. Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA as a percentage of total revenues would have been 26% compared with 24% in 2016.

5A.2a Cellular Services Segment

Total revenues. Total revenues for the cellular segment in 2017 were NIS 2,588 million (US\$ 746 million), a decrease of 8% from NIS 2,828 million in 2016.

Revenues from services. Service revenues for the cellular segment in 2017 totaled NIS 1,978 million (US\$ 571 million), a decrease of 6% from NIS 2,099 million in 2016. The decrease was mainly a result of the continued downward pressures on the prices of post-paid and pre-paid cellular services as a result of the continued competition in the cellular market. As an illustration of the level of competition in the cellular market, approximately 2.5 million cellular subscribers are estimated to have switched operators within the Israeli market (with number porting) in 2017, compared with approximately 2.3 million in 2016 and 2.5 million in 2015.

Significant price erosion continued to be caused by the amount of cellular subscribers who moved between different rateplans or airtime packages (generally with a lower monthly fee) within the Company.

In addition, cellular segment service revenues for 2017 were negatively affected by a decrease in revenues as a result of the termination of the Right of Use Agreement with HOT Mobile from the second quarter of 2016, for which the

Company recorded revenues in an amount of approximately NIS 51 million in 2016. See "Item 5A.1e Right of Use Agreement with HOT Mobile".

Pre-paid cellular subscribers contributed service revenues in a total amount of approximately NIS 146 million (US\$ 42 million) in 2017, a decrease of 19% from approximately NIS 180 million in 2016, as a result of the price erosion in pre-paid services and the decrease in the number of pre-paid subscribers, which was largely attributed to pre-paid subscribers moving to post-paid subscriber packages due to the significant price declines (and hence increased attractiveness) for these products.

Revenues from equipment. Revenues from equipment sales for the cellular segment in 2017 totaled NIS 610 million (US\$ 176 million), a decrease of 16% from NIS 729 million in 2016, reflecting a decrease in the volume of sales, mainly due to the impact of the tightening of the Company's customer credit policy, whereby stricter requirements were imposed for customers to be accepted for long term financing plans under which the customer pays for the equipment through monthly payments (generally between 12 and 36 months). The decrease in volume of sales was partially offset by an increase in revenues from the leasing of cellular handsets to both residential and business customers.

Gross profit from equipment sales. The gross profit from equipment sales for the cellular segment in 2017 was NIS 120 million (US\$ 35 million), compared with NIS 133 million in 2016, a decrease of 10%. This decrease mainly reflected both the decrease in the volume of equipment sales, as described above, partially offset by a small increase in profit margins from sales. See also "Item 5D.2 Outlook".

Cost of service revenues. The cost of service revenues for the cellular segment (excluding inter-segment costs) decreased by 11% from NIS 1,659 million in 2016 to NIS 1,470 million (US\$ 424 million) in 2017. This decrease mainly reflected decreases in operating lease, rent and overhead expenses and in cellular network and cable maintenance expenses, largely reflecting the impact of the network sharing agreement with HOT Mobile, as well as a decrease in expenses related to lower payments to transmission, communication and content providers. The early adoption of IFRS 15 in 2017 did not have any impact on the cost of service revenues for the cellular segment. See also note 22 to our consolidated financial statements.

Selling, marketing, general and administrative expenses. Selling, marketing, general and administrative expenses for the cellular segment in 2017 amounted to NIS 367 million (US\$ 106 million). Without the impact of the early adoption of IFRS 15 in 2017, selling, marketing, general and administrative expenses for the cellular segment would have been NIS 420 million, a decrease of 26% from NIS 571 million in 2016. The decrease mainly reflected decreases in payroll and related expenses, in bad debts and allowance for doubtful accounts expenses, which was principally due to the impact of the tightening of the Company's customer credit policy for handset sales, and in advertising and marketing expenses related, in part, to the marketing activities related to the rebranding of the Company in 2016. See also note 2(n) and note 22 to our consolidated financial statements.

Total operating expenses ("OPEX"). Total operating expenses for the cellular segment totaled NIS 1,525 million (US\$ 440 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, total operating expenses for the cellular segment would have been NIS 1,589 million, a decrease of 18% or NIS 339 million from 2016. See also note 22 to our consolidated financial statements. Including depreciation and amortization expenses and other expenses (mainly amortization of employee share based compensation), total operating expenses totaled NIS 1,991 million. Without the impact of the early adoption of IFRS 15 in 2017, total operating expenses for the cellular segment including depreciation and amortization expenses and other expenses (mainly amortization of employee share based compensation) would have been NIS 2,044 million, a decrease of 16% compared with 2016.

Income with respect to settlement with Orange. In 2017, the Company recorded income with respect to the settlement agreement of the Orange brand agreement in an amount of NIS 108 million (US\$ 31 million) compared with NIS 217 million recorded in 2016. As set forth in the settlement agreement, the advance payments received from Orange were recognized and reconciled evenly on a quarterly basis over a period until the second quarter of 2017, against contingent marketing, sales, customer services and other expenses that were incurred over this period. See also "Item 5A.1c Settlement Agreement with Orange Brand Services Ltd." above and note 18 to our consolidated financial statements.

Operating profit. Overall, operating profit for the cellular segment in 2017 was NIS 244 million (US\$ 70 million). Without the impact of the early adoption of IFRS 15 in 2017, operating profit for the cellular segment would have been NIS 192 million, an increase of 182% compared with NIS 68 million in 2016, reflecting the impact of the reduction in total operating expenses which was partially offset by the decreases in service revenues, in income with

respect to settlement with Orange and in gross profits from cellular segment equipment sales.

Adjusted EBITDA. Adjusted EBITDA for the cellular segment was NIS 710 million (US\$ 205 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA for the cellular segment would have been NIS 647 million, an increase of 15% from NIS 562 million in 2016, for the same reasons as the increase in operating profit. As a percentage of total cellular revenues, Adjusted EBITDA for the cellular segment in 2017 was 27%. Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA for the cellular segment as a percentage of total cellular revenues would have been 25% compared with 20% in 2016.

5A.2b Fixed-Line Services Segment

Total revenues. Total revenues in 2017 for the fixed-line segment were NIS 853 million (US\$ 246 million), a decrease of 8% compared with NIS 929 million in 2016.

Revenues from services. Service revenues for the fixed-line segment totaled NIS 777 million (US\$ 224 million) in 2017, a decrease of 10% compared with NIS 866 million in 2016. This decrease mainly reflected a decrease in revenues from international calling services (including the market for wholesale international traffic) which were adversely affected both by the increased penetration of internet-based solutions and increased competition from other service providers, and a decrease in inter-segment revenues. See also "Item 3D.2o The telecommunications industry is subject to rapid and significant changes in technology and industry structure which could reduce demand for our services." It is estimated that the Company's subscriber market share in the ISP segment continues to be eroded as a result of the strong competition in the market. The launches of Partner TV service and the commercial phase and accelerated deployment of our fiber optic network did not have a significant impact on fixed-line segment revenues in 2017.

Revenues from equipment. Revenues from equipment sales for the fixed-line segment in 2017 totaled NIS 76 million (US\$ 22 million), an increase of 21% compared with NIS 63 million in 2016, mainly reflecting an increase in revenues recorded from sales of audio visual and related equipment and devices.

Gross profit from equipment sales. The gross profit from equipment sales for the fixed-line segment in 2017 was NIS 22 million (US\$ 6 million), compared with NIS 11 million in 2016, an increase of 100%, again largely a reflection of the impact of an increase in gross profit recorded from sales of audio visual and related equipment and devices.

Cost of service revenues. The cost of service revenues (excluding inter-segment costs) for the fixed-line segment decreased by 1% from NIS 617 million in 2016 to NIS 613 million (US\$ 177 million) in 2017. This decrease reflected decreases in international call expenses, and in operating lease, rent and overhead expenses, partially offset by increases in expenses related to Partner TV service that was launched during 2017, and in expenses related to internet services. See also note 22 to our consolidated financial statements.

Selling, marketing, general and administrative expenses. Selling, marketing, general and administrative expenses for the fixed-line segment in 2017 amounted to NIS 98 million (US\$ 28 million). Without the impact of the early adoption of IFRS 15 in 2017, selling, marketing, general and administrative expenses for the fixed-line segment would have been NIS 116 million, a decrease of 2% from NIS 118 million in 2016. The decrease largely reflected decreases in payroll and related expenses, partially offset by an increase in advertising and marketing expenses related in part, to the marketing activities related to the launch of the Company's television services during 2017. See also note 22 to our consolidated financial statements.

Total operating expenses ("OPEX"). Total operating expenses for the fixed-line segment totaled NIS 594 million (US\$ 171 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, total operating expenses for the fixed-line segment would have been NIS 614 million, an increase of 1% or NIS 5 million from 2016. See also note 22 to our consolidated financial statements. Including depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation), total operating expenses totaled NIS 730 million. Without the impact of the early adoption of IFRS 15 in 2017, total operating expenses for the fixed-line segment including depreciation and amortization expenses and other expenses (mainly amortization of employee share based compensation) would have been NIS 748 million, a decrease of 1% compared with 2016.

Operating profit. Operating profit for the fixed-line segment was NIS 71 million (US\$ 20 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, operating profit for the fixed-line segment would have been NIS 54 million, a decrease of 57% compared to NIS 125 million in 2016, mainly reflecting the impact of the decrease in service revenues and the increase in total operating expenses, partially offset by the increase in gross profit from

equipment sales, as explained above. The launches of Partner TV service and the commercial phase and accelerated deployment of our fiber optic network did not have a significant impact on fixed-line segment operating profit in 2017.

Adjusted EBITDA. Adjusted EBITDA for the fixed-line segment was NIS 207 million (US\$ 60 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA for the fixed-line segment would have been NIS 188 million, a decrease of 31% from NIS 272 million in 2016, for the same reasons as the decrease in operating profit. As a percentage of total fixed-line revenues, Adjusted EBITDA for the fixed-line segment in 2017 was 24%. Without the impact of the early adoption of IFRS 15 in 2017, Adjusted EBITDA for the fixed-line segment as a percentage of total fixed-line revenues would have been 22% compared with 29% in 2016.

5A.3 RESULTS OF CONSOLIDATED OPERATIONS FOR THE YEAR ENDED DECEMBER 31, 2016, COMPARED TO THE YEAR ENDED DECEMBER 31, 2015

	New Israeli Shekels		Year ended December 31, 2015		
	In millions				
	Cellular segment	Fixed-line segment	Elimination		Consolidated
Segment revenue – Services	2,275	717			2,992

(*) Includes impairment charges in the fixed-line segment, see note 13 to our consolidated financial statements.

(1) Operating expenses include selling and marketing expenses and general and administrative expenses.

(2) Mainly amortization of employee share based compensation.

(3) Adjusted EBITDA as reviewed by the CODM represents Earnings Before Interest (finance costs, net), Taxes, Depreciation and Amortization (including amortization of intangible assets, deferred expenses-right of use and impairment charges) and Other expenses (mainly amortization of share based compensation). Adjusted EBITDA is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies. Adjusted EBITDA may not be indicative of the Group's historic operating results nor is it meant to be predictive of potential future results. See "Item 5A.1a - NON-GAAP MEASURES" above. The usage of the term "Adjusted EBITDA" is to highlight the fact that the Amortization includes amortization of deferred expenses – right of use and amortization of employee share based compensation and impairment charges.

Total revenues. In 2016, total revenues were NIS 3,544 million, a decrease of 14% from NIS 4,111 million in 2015.

Revenues from services. Service revenues in 2016 totaled NIS 2,752 million, a decrease of 8% from NIS 2,992 million in 2015.

Revenues from equipment. Equipment revenues in 2016 totaled NIS 792 million, a decrease of 29% from NIS 1,119 million in 2015, largely reflecting a decrease in the volume of equipment sales. This decrease was mainly related to the tightening of the Company's customer credit policy, whereby stricter requirements were imposed for customers to be accepted for long term financing plans under which the customer pays for the equipment through monthly payments (generally between 12 and 36 months).

Gross profit from service revenues. The gross profit from service revenues in 2016 was NIS 476 million, compared with NIS 400 million in 2015, an increase of 19%. The trend in gross profit from service revenues was positively affected by expenses of NIS 88 million recorded in 2015 due to the impairment charge on the right of use on international fiber optic cables (NIS 76 million), on computers and information systems (NIS 7 million) and on the communication network (NIS 5 million). Compared with gross profit from service revenues excluding the impact of these impairment charges in 2015, gross profit from service revenues in 2016 decreased by 2%, largely reflecting the decrease in service revenues, partially offset by the decrease in the cost of service revenues. See also note 22 to our consolidated financial statements.

Gross profit from equipment sales. Gross profit from equipment sales in 2016 was NIS 144 million, compared with NIS 239 million in 2015, a decrease of 40%, mainly reflecting both the decrease in the volume of equipment sales, as described above, and lower profit margins from sales which resulted largely from the tightening of the Company's customer credit policy (since profit margins are higher for sales with long term financing plans), as well as a change in product mix towards products with lower profit margins.

Selling, marketing, general and administrative expenses. Selling, marketing, general and administrative expenses totaled NIS 689 million in 2016, an increase of 8% from 2015. Selling, marketing, general and administrative expenses for 2015 included expenses in the amount of NIS 10 million that were recorded following the impairment charge on customer relationships (NIS 8 million) and on the trade name (NIS 2 million). Compared with selling, marketing, general and administrative expenses excluding the impact of these impairment charges in 2015, selling, marketing, general and administrative expenses increased by 9%. This increase mainly reflected an increase in advertising and marketing expenses related, in part, to the marketing activities for the rebranding of the Company, and an increase in bad debts and allowance for doubtful accounts expenses which was mainly related to historical transactions. See also note 22 to our consolidated financial statements.

Total operating expenses ("OPEX"). Total operating expenses amounted to NIS 2,324 million in 2016, a decrease of 6% or NIS 139 million from 2015. Total operating expenses ("Opex") (not a financial measure under IFRS and not necessarily comparable to similarly titled measures for other companies) includes cost of service revenues (NIS 2,276 million in 2016) and selling, marketing, general and administrative expenses (NIS 689 million in 2016), and excludes depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share

based compensation) (NIS 641 million in 2016).

93

Including depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation), total operating expenses in 2016 decreased by 8% compared with 2015. See also note 22 to our consolidated financial statements.

Income with respect to settlement with Orange. In 2016, the Company recorded income with respect to the settlement agreement of the Orange brand agreement in an amount of NIS 217 million compared with NIS 61 million recorded in 2015. As set forth in the settlement agreement, the advance payments received from Orange were recognized and reconciled evenly on a quarterly basis over a period until the second quarter of 2017, against contingent marketing, sales, customer services and other expenses that were incurred over this period. See also Item 5A.1c Settlement Agreement with Orange Brand Services Ltd.”, 5D.2 Outlook and note 18 to our consolidated financial statements.

Other income, net. Other income, net, totaled NIS 45 million in 2016, compared to NIS 47 million in 2015, a decrease of 4%, mainly reflecting a decrease in income from the unwinding of trade receivables. See also note 23 to our consolidated financial statements.

Operating profit. Reported operating profit for 2016 was NIS 193 million, an increase of 80% compared with reported operating profit of NIS 107 million in 2015. Compared with operating profit for 2015 before the impairment charges described above (NIS 98 million), operating profit decreased by 6%.

Finance costs, net. Finance costs, net in 2016 were NIS 105 million, a decrease of 27% compared with NIS 143 million in 2015. The decrease reflected lower interest payment expenses due to the lower average level of debt, as well as gains from foreign exchange movements in 2016 compared with losses from foreign exchange in 2015 and lower early debt repayment expenses. This decrease in finance costs was partially offset by higher linkage expenses due to the higher CPI level. See also “Item 5B Liquidity and Capital Resources.”

Profit (loss) before income tax. Profit before income taxes for 2016 was NIS 88 million, compared with loss before income tax of NIS 36 million in 2015. Compared with profit before income tax in 2015 excluding the impact of the impairment charges described above (NIS 98 million), profit before income tax in 2016 increased by 42%, reflecting principally the decrease in finance costs, net which more than offset the decrease in operating profit excluding impairment charges.

Income taxes on profit. Income taxes on profit for 2016 were NIS 36 million, compared to income taxes on loss of NIS 4 million in 2015. In January 2016, the Law for the Amendment of the Income Tax Ordinance (No. 216) was published, enacting a reduction of corporate tax rate, from 26.5% to 25%, for the year 2016 and thereafter. In addition, in December 2016, the Economic Efficiency Law (Legislative Amendments for Implementing the Economic Policy for the 2017 and 2018 Budget Year), 2016 was published, enacting that the corporate tax rate will be 24% in 2017 and 23% in 2018 and thereafter. These reductions of the corporate tax rate resulted in a reduction of NIS 7 million in the Group's deferred tax assets in 2016, which was recognized as an income tax expense.

Profit (Loss). Reported profit in 2016 was NIS 52 million, compared with loss of NIS 40 million in 2015. Compared with profit in 2015 before impairment charges (NIS 72 million after income tax), profit in 2016 increased by 62%. Based on the weighted average number of shares outstanding during 2016, basic earnings per share or ADS, was NIS 0.33, compared to basic loss per share of NIS 0.26 in 2015.

Adjusted EBITDA. Adjusted EBITDA in 2016 totaled NIS 834 million, a decrease of 5% from NIS 876 million in 2015. As a percentage of total revenues, Adjusted EBITDA in 2016 was 24%, compared with 21% in 2015.

5A.3a Cellular Services Segment

The impairment charge on fixed-line assets in 2015 did not have any impact on the results for the cellular services segment.

Total revenues. Total revenues for the cellular segment in 2016 were NIS 2,828 million, a decrease of 16% from NIS 3,348 million in 2015.

Revenues from services. Service revenues for the cellular segment in 2016 totaled NIS 2,099 million, a decrease of 9% from NIS 2,297 million in 2015. The decrease was mainly a result of the continued downward pressures on the prices of post-paid and pre-paid cellular services as a result of the continued competition in the cellular market. As an illustration of the level of competition in the cellular market, approximately 2.3 million cellular subscribers are estimated to have switched operators within the Israeli market (with number porting) in 2016, only slightly fewer than the estimated 2.5 million switchers in 2014 and 2015.

Significant price erosion continued to be caused by the amount of cellular subscribers who moved between different rateplans or airtime packages (generally to obtain a lower monthly fee) within the Company.

In addition, cellular segment service revenues were negatively affected by a decrease in revenues from wholesale services provided to other operators hosted on the Company's network, and in particular as a result of the termination of the Right of Use Agreement with HOT Mobile starting from the second quarter of 2016. As a result, revenues arising from the Right of Use Agreement decreased from approximately NIS 120 million in 2015 to approximately NIS 51 million in 2016. See "Item 5A.1e Right of Use Agreement with HOT Mobile." This decrease was partially offset by the amortization to revenues of the Lump Sum payment from HOT Mobile under the Network Sharing Agreement in an amount of approximately NIS 23 million in 2016.

Pre-paid cellular subscribers contributed service revenues in a total amount of approximately NIS 180 million in 2016, a decrease of 22% from approximately NIS 230 million in 2015. This decrease was a result of the price erosion in pre-paid services and the decrease in the number of pre-paid subscribers, which was largely attributed to pre-paid subscribers moving to post-paid subscriber packages due to the significant price declines (and hence increased attractiveness) for these products.

Revenues from equipment. Revenues from equipment sales for the cellular segment in 2016 totaled NIS 729 million, a decrease of 31% from NIS 1,051 million in 2015, reflecting a decrease in the volume of sales, mainly related to the tightening of the Company's customer credit policy, whereby stricter requirements were imposed for customers to be accepted for long term financing plans, whereby the customer pays for the equipment through monthly payments (generally between 12 and 36 months).

Gross profit from equipment sales. The gross profit from equipment sales for the cellular segment in 2016 was NIS 133 million, compared with NIS 219 million in 2015, a decrease of 39%. This decrease reflected both the decrease in the volume of equipment sales, as described above, and lower profit margins from sales which was also a result of the tightening of the Company's customer credit policy (since profit margins are higher for sales with long term financing plans), as well as a change in product mix towards products with lower profit margins.

Cost of service revenues. The cost of service revenues for the cellular segment (excluding inter-segment costs) decreased by 11% from NIS 1,856 million in 2015 to NIS 1,659 million in 2016. This decrease reflected principally decreases in cellular network and cable maintenance expenses, in part related to the implementation of the cost sharing mechanism under the Network Sharing Agreement with HOT Mobile, and decreases in expenses related to payments to transmission, communication and content providers.

Selling, marketing, general and administrative expenses. Selling, marketing, general and administrative expenses for the cellular segment in 2016 amounted to NIS 571 million, an increase of 13% from NIS 506 million in 2015. The increase mainly reflected an increase in advertising and marketing expenses related, in part, to the marketing activities for the rebranding of the Company, and an increase in bad debts and allowances for doubtful accounts expenses which was mainly related to historical transactions. See also note 22 to our consolidated financial statements.

Total operating expenses ("OPEX"). Total operating expenses for the cellular segment totaled NIS 1,928 million in 2016, a decrease of 5% or NIS 96 million from 2015. See also note 22 to our consolidated financial statements. Including depreciation and amortization expenses and other expenses (mainly amortization of employee share based compensation), total operating expenses decreased by 5%.

Income with respect to settlement with Orange. In 2016, the Company recorded income with respect to the settlement agreement of the Orange brand agreement in an amount of NIS 217 million compared with NIS 61 million recorded in 2015. As set forth in the settlement agreement, the advance payments received from Orange were recognized and reconciled evenly on a quarterly basis over a period until the second quarter of 2017, against contingent marketing, sales, customer services and other expenses that were incurred over this period. See also Item 5A.1c Settlement Agreement with Orange Brand Services Ltd.” above and note 18 to our consolidated financial statements.

Operating profit. Overall, operating profit for the cellular segment in 2016 was NIS 68 million, a decrease of 6% or NIS 4 million compared with NIS 72 million in 2015, reflecting the impact of the decreases in service revenues and gross profits from cellular segment equipment sales, which were partially offset by the reduction in total operating expenses and the increase in income with respect to the settlement with Orange.

Adjusted EBITDA. Adjusted EBITDA for the cellular segment was NIS 562 million in 2016, decreasing by 6% from NIS 597 million in 2015, for the same reasons as the decrease in operating profit. As a percentage of total cellular revenues, Adjusted EBITDA for the cellular segment in 2016 was 20%, compared with 18% in 2015.

5A.3b Fixed-Line Services Segment

Total revenues. Total revenues in 2016 for the fixed-line segment were NIS 929 million, a decrease of 5% compared with NIS 974 million in 2015.

Revenues from services. Service revenues for the fixed-line segment totaled NIS 866 million in 2016, a decrease of 4% compared with NIS 906 million in 2015. The decrease mainly reflected a decrease in revenues from international calls (including in the market for wholesale international traffic) as well as decreases in revenues from other fixed line services including local lines and ISP services. Our subscriber market share in the ISP segment continues to be eroded as a result of the strong competition in the market from both existing and new service providers.

Revenues from equipment. Revenues from equipment sales for the fixed-line segment in 2016 totaled NIS 63 million, a decrease of 7% compared with NIS 68 million in 2015. The decrease mainly reflected a decrease in the sale of non-core fixed line equipment, including tablets, televisions, streamers and other audio visual devices, which was partially offset by an increase in fixed line equipment for business customers including sales of advanced business solutions.

Gross profit from equipment sales. The gross profit from equipment sales for the fixed-line segment in 2016 was NIS 11 million, compared with NIS 20 million in 2015, a decrease of 45%, mainly reflecting the decrease in the sale of non-core fixed line equipment, as described above.

Cost of service revenues. The cost of service revenues (excluding inter-segment costs) for the fixed-line segment decreased by 16% from NIS 736 million in 2015 to NIS 617 million in 2016. The cost of service revenues in 2015 was negatively affected by expenses in the amount of NIS 88 million that were recorded following the impairment charge on the right of use on international fiber optic cables (NIS 76 million), on computers and information systems (NIS 7 million) and on the communication network (NIS 5 million). Compared with the cost of service revenues in 2015, excluding the impact of the impairment charges taken for that year, the cost of service revenues in 2016 decreased by 5%, reflecting decreases in transmission and communication provider expenses, salaries and related expenses and in depreciation expenses, partially offset by increases in expenses related to payments to internet infrastructure and service providers. See also note 22 to our consolidated financial statements.

Selling, marketing, general and administrative expenses. Selling, marketing, general and administrative expenses for the fixed-line segment in 2016 amounted to NIS 118 million, a decrease of 12% from NIS 134 million in 2015. Selling, marketing, general and administrative expenses for 2015 included expenses in the amount of NIS 10 million that were recorded following the impairment charge on customer relationships (NIS 8 million) and on the trade name

(NIS 2 million). Compared with selling, marketing, general and administrative expenses excluding the impact of these impairment charges in 2015, the decrease in selling, marketing, general and administrative expenses in 2016 was 5%. See also note 22 to our consolidated financial statements.

Total operating expenses ("OPEX"). Total operating expenses for the fixed-line segment totaled NIS 609 million in 2016, a decrease of 6% or NIS 41 million from 2015. See also note 22 to our consolidated financial statements. Including depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation), total operating expenses decreased by 15%.

Operating profit. Operating profit for the fixed-line segment was NIS 125 million in 2016, an increase of 257% compared to NIS 35 million in 2015. Operating profit for 2015 included impairment charges, as described above, in the amount of NIS 98 million. Compared with operating profit excluding the impairment charges in 2015, operating profit in 2016 decreased by 6%, mainly reflecting the impact of the decreases in service revenues and in gross profit from equipment sales, partially offset by the reduction in total operating expenses, as explained above.

Adjusted EBITDA. Adjusted EBITDA for the fixed-line segment decreased by 3% from NIS 279 million in 2015 to NIS 272 million in 2016, for the same reasons as the decrease in operating profit. As a percentage of total fixed-line revenues, Adjusted EBITDA for the fixed-line segment in 2016 was 29%, unchanged from 2015.

5A.4 SEASONALITY

Our service revenues and profitability show some seasonal trends over the year, resulting mainly from revenues from roaming services which tend to increase during Jewish holiday periods and during the summer months.

Whilst most of our post-paid cellular tariff plans for private customers are bundles including unlimited amounts of call minutes and SMS, for other cellular subscribers in plans which charge according to usage, airtime minutes and consequently airtime revenues are affected by the number of monthly work days and daylight hours in the day, which varies throughout the year. In addition, airtime revenues for such subscribers are lower in February, which is a shorter than average month. However, due to the increased penetration of bundled plans which offer unlimited or fixed amounts of airtime and SMS usage, the impact of such effects has significantly decreased over the last few years. There is no assurance that these trends will continue in the future.

NIS in millions	Three months ended			
	March	June	Sept.	Dec.
	31	30	30	31
	(Unaudited)			
Service Revenues				
2015	759	757	760	716
2016	710	692	698	652
2017	640	646	666	630

5A.5 IMPACT OF EXCHANGE RATE FLUCTUATIONS AND INFLATION

Substantially all of our revenues and a majority of our operating expenses are denominated in shekels. However, in recent years, approximately one fifth of our operating expenses (excluding depreciation), including a substantial majority of our handset purchases, were linked to non-NIS currencies, mainly the US dollar. These expenses related principally to the acquisition of handsets, where the price paid by us is based mainly on US dollars. In addition, a substantial amount of our capital expenditures are incurred in, or linked to, non-NIS currencies, mainly the US dollar. See "ITEM 11 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK".

Our Notes payable series C in a total principal amount of NIS 213 million as of December 31, 2017, are currently in NIS and are linked to the CPI. If the CPI increases, we may not be permitted to raise our tariffs in a manner that would fully compensate for any increase in our finance expenses. In 2017, the CPI increased 0.3 %, which raised our finance costs, net, by NIS 4 million, compared to a CPI decrease of 0.3% in 2016, which reduced our finance costs, net, by

NIS 2 million. The CPI for each month is published on the 15th day of the following month; references above to the annual change in CPI for a given year is the change from the CPI published on the 15th day of December of the preceding year to the CPI published on the 15th day of December of the relevant year, which for the purposes of this annual report, covers the twelve months beginning January 1 through December 31 of the relevant year.

97

5B. Liquidity and Capital Resources

The discussion below first describes our financial indebtedness (Notes payable, long-term borrowings and total financial debt) and capital expenditures, then our dividend payments, and finally our main sources of liquidity.

5B.1 NOTES PAYABLE

As further described below, we have over the years issued a number of series of Notes payable, which we occasionally repurchased.

In July 2017, the Company issued Series F Notes in a principal amount of NIS 255 million, payable in 5 equal annual installments on June 25 of each of the years 2020 through 2024. The principal bears fixed annual interest of 2.16%, payable on a semiannual basis on June 25 and December 25.

In December 2017, the Company expanded Series F Notes in a principal amount of NIS 389 million under the same conditions.

The Company has engaged to expand Series F Notes in the future (see "Notes payable issuance commitments" below).

All Series Notes payable are unsecured non-convertible and listed for trading on the TASE.

All Series Notes payable have been rated ilA+, on a local scale, by Standard & Poor's Maalot.

Members of our Board of Directors and senior management may have purchased a portion of the various Series Notes through stock exchange transactions.

The table below sets forth the composition and terms of the Notes payable issued by the Company and outstanding at December 31, 2017:

	Linkage terms (principal and interest)	Annual interest rate	Interest payment terms	Original issuance date
Notes payable series C	CPI	3.35%	Semi-annual	April 2010
Notes payable series D		'Makam' (*) plus 1.2%	Quarterly	April 2010
Notes payable series F		2.16%	Semi-annual	July 2017

(*) 'Makam' is a variable interest that is based on the yield of 12 month government bonds issued by the Government of Israel. The interest is updated on a quarterly basis. The interest rates paid (in annual terms, and including the additional interest of 1.2%) during 2017 are set forth in the table below:

Period	Interest rate
October 1, 2017 to December 30, 2017	1.29 %
July 1, 2017 to September 30, 2017	1.33 %
March 31, 2017 to June 30, 2017	1.34 %

December 31, 2016 to March 30, 2017 1.34 %

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

The table below sets forth the payments of principal to be made on our Notes payable at December 31, 2017 (for payments including interest payments, see "Item 5F Aggregate Contractual Obligations"):

	2018	2019	2020	2021 to 2022	2023 to 2024	Total
New Israeli Shekels in millions						
Principal payments of long term indebtedness:						
Notes payable series C ⁽¹⁾	213					213
Notes payable series D	109	109	109	110		437
Notes payable series F			129	258	257	644
Total	322	109	238	368	257	1,294
Add offering expenses and discounts and premiums						4
						1,298

(1) Linked to the CPI as of December 31, 2017.

Notes payable buy back

The Company did not buy back any Notes in 2017.

The Company's series B, C and E Notes, which are traded on the Tel Aviv Stock Exchange, were partially repurchased (repurchased Notes are considered legally extinguished) in 2016 as follows:

In March 2016, the Company repurchased approximately NIS 43 million par value of Notes payable series B, at an average transaction price of approximately 1.104 NIS par value. The total amount paid was approximately NIS 48 million.

In March 2016, the Company repurchased approximately NIS 131 million par value of Notes payable series E, at an average transaction price of approximately 1.073 NIS par value. The total amount paid was approximately NIS 141 million.

In April 2016, the Company repurchased approximately NIS 54 million par value of Notes payable series C, at an average transaction price of approximately 1.136 NIS par value. The total amount paid was approximately NIS 61.5 million.

The buy-back costs of the aforementioned repurchases were recorded as "finance expenses" for 2016 in an aggregate amount of NIS 12 million.

Notes payable issuance commitments

In September 2017, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, an aggregate principal amount of NIS 150 million of additional Series F debentures in December 2018.

In December 2017, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, an aggregate principal amount of NIS 126.75 million of additional Series F debentures in December 2019.

In January 2018, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, an aggregate principal amount of NIS 100 million of additional Series F debentures in December 2019.

All the loan commitments include provisions which allow the lenders to not provide the loans should any of the events of default defined for the Company's existing loans occur prior to the date for providing the deferred loans. These events of default include non-compliance with the financial covenants set forth below in Item 5B.3, as well as other customary terms.

5B.2 Long-Term Borrowings

The Company has received borrowings from leading Israeli commercial banks and other institutions. The Company may, at its discretion, prepay the borrowings, subject to certain conditions, including that the Company shall reimburse the lenders for losses sustained by the lenders as a result of the prepayment. The reimbursement is mainly based on the difference between the interest rate that the Company would otherwise pay and the current market interest rate on the prepayment date.

Borrowings as of December 31, 2017 are set forth below:

	Annual interest rate	Interest payment terms	Original reception date
Borrowing K(*)	3.71% fixed	Quarterly	March 2015
Borrowing L(**)	4.25% fixed	Semi-annual	March 2015
Borrowing O(**)	4.34% fixed	Quarterly	December 2017
Borrowing P	2.38% fixed	Quarterly	December 2017
Borrowing Q	2.5% fixed	Quarterly	December 2017

(*) The Company intends to early repay borrowing K in 2018.

(**) The Company early repaid the borrowings in March 2018.

The table below sets forth the payments of principal to be made on our borrowings, as of December 31, 2017 (for payments including interest payments see "Item 5F Aggregate Contractual Obligations"):

	2018	2019	2020	2021	2022	2023	2024	Total
	New Israeli Shekels in millions							
Borrowing K(*)	75							75
Borrowing L(**)	200							200
Borrowing O(**)	100							100
Borrowing P	7	29	29	60				125
Borrowing Q		23	23	45	34			125
	382	52	52	105	34			625

(*) The Company intends to early repay borrowing K in 2018.

(**) The Company early repaid the borrowings in March 2018.

New borrowings received

In 2017, the Company received long-term loans in an aggregate amount of NIS 350 million, as detailed further below.

Borrowing O: In December 2017, the Company received a long-term loan from a group of institutional corporations in a principal amount of NIS 100 million. The loan was received according to a loan agreement that was signed in November 2014. The loan will bear unlinked interest at the rate of 4.34% per annum. The Company early repaid the loan in March 2018.

Borrowing P: In December 2017, the Company received a long-term loan from a commercial bank in the principal amount of NIS 125 million. The loan will bear unlinked interest at the rate of 2.38% per annum and will be paid in quarterly payments over 5 years. The principal will be paid in quarterly equal payments commencing in December 2018.

Borrowing Q: In December 2017, the Company received a long-term loan from a commercial bank in the principal amount of NIS 125 million. The loan will bear unlinked interest at the rate of 2.5% per annum and will be paid in quarterly payments over 6.5 years. The principal will be paid in quarterly equal payments commencing in March 2019.

Long-term borrowings early repayments

In total, the Company made early repayments of borrowings in 2017 in an aggregate amount of NIS 1,283 million, incurring early repayment expenses in an aggregate amount of NIS 76 million, as further detailed below.

In June 2017, the Company made an early repayment of principal outstanding of borrowings C, D, E, F, G and H in a total amount of NIS 700 million, thus completing full and final repayment of these borrowings.

In July 2017, the Company made an early repayment of principal outstanding of borrowings I and J in a total amount of NIS 175 million, thus completing full and final repayment of these borrowings.

In December 2017, the Company made an early repayment of principal outstanding of borrowings M and N in a total amount of NIS 408 million, thus completing full and final repayment of these borrowings.

In December 2017, the Company did not take a borrowing that was contracted in November 2014 (a deferred loan) with a group of institutional corporations in a principal amount of NIS 100 million.

The early repayment fees of the aforementioned repayments totaled to an amount of NIS 76 million that were recorded in finance expenses in 2017.

In March 2018, the Company early repaid borrowings L and O in a total principal amount of NIS 300 million. In addition, the Company intends to early repay borrowings K during 2018, in a total principal amount of NIS 75 million. The early repayments resulted in a change in expected cash flows and the Company recorded in December 2017 additional finance costs of NIS 18 million, mainly due to early repayment fees.

5B.3 FINANCIAL COVENANTS

Regarding Series F Notes and borrowings P and Q, the Company is required to comply with a financial covenant that the ratio of Net Debt to Adjusted EBITDA shall not exceed 5. Compliance will be examined and reported on a quarterly basis. For the purpose of the covenant, Adjusted EBITDA is calculated as the sum total for the last 12 month period, excluding adjustable one-time items. As of December 31, 2017, the ratio of Net Debt to Adjusted EBITDA was 1.0. Additional stipulations regarding Series F Notes and borrowings P and Q mainly include: shareholders'

equity shall not decrease below NIS 400 million; the Company shall not create floating liens subject to certain terms; the Company has the right for early redemption under certain conditions; the Company shall pay additional annual interest of 0.5% in the case of a two-notch downgrade in the Series F Notes rating and an additional annual interest of 0.25% for each further single-notch downgrade, up to a maximum additional interest of 1%; the Company shall pay additional annual interest of 0.25% during a period in which there is a breach of the financial covenant. The Group was in compliance with the financial covenant and the additional stipulations for the year 2017.

101

Regarding borrowings K, L and O, as of December 31, 2017 (see information about early repayments above) the Company is required to comply with financial covenants on a consolidated basis. Their main provisions are two ratios:

(1) The ratio of (a) the amount of all financial obligations of the Company including bank guarantees that the Company has undertaken ("Total Debt") to (b) EBITDA less Capital Expenditures shall not exceed 6.5 (the ratio as of December 31, 2016 and 2017 was 4.5 and 4.1, respectively); and

(2) The ratio of (a) Total Debt to (b) the EBITDA of the Company shall not exceed 4 (the ratio as of December 31, 2016 and 2017 was 3.4 and 2.2, respectively).

EBITDA is defined as the sum of (a) the net income before extraordinary items, (b) the amount of tax expenses set against the net profits including, without double counting, any provisions for tax expenses, (c) and depreciation and amortization expenses, and (d) any finance costs, net.

Capital Expenditures are defined as any expenditure classified as fixed and intangible asset in the financial statements.

The Group was in compliance with all covenants stipulated for the years 2016 and 2017. The covenants are measured every six months (on June 30, and December 31) on an annualized basis of twelve months and are based on the financial results for the preceding period of twelve months.

The existing loans agreements allow the lenders to demand an immediate repayment of the loans in certain events (events of default), including, among others, a material adverse change in the Company's business and non-compliance with the financial covenants set in those agreements.

The Company provided the lenders with a negative pledge undertaking (i.e., not to pledge any of its assets to a third party), except for a number of exceptions that were agreed upon, including pledge (other than by way of floating charge) in favor of a third party over specific assets or rights of the Company, securing obligations no greater than NIS 100 million in aggregate.

5B.4 TOTAL NET FINANCIAL DEBT

At December 31, 2017, total net financial debt (the sum total of current notes payable and borrowings (NIS 705 million) and non-current borrowings and notes payable (NIS 1,218 million) less cash and cash equivalents (NIS 867 million) and less short-term deposits (NIS 150 million)) amounted to NIS 906 million, compared to NIS 1,526 million (the sum total of current notes payable (NIS 498 million) and non-current borrowings and notes payable (NIS 2,196 million) less cash and cash equivalents (NIS 716 million) and less short-term deposits (NIS 452 million)) at December 31, 2016. The decrease in net financial debt compared with 2016 principally reflected the positive adjusted free cash flow generated in 2017 (cash flows from operating activities, net of cash flows used for investment activities less short-term proceeds from deposits, see reconciliation to cash flows below; Adjusted Free Cash Flow is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies) net of interest payments and the cash received following the share issuance in June 2017 (see note 21 to the consolidated financial statements). See note 15 to the consolidated financial statements (see also "Item 5B.2 Long-term Borrowings" above).

	Year ended	
	December	
Reconciliation of cash flows to Adjusted Free Cash Flow	31,	
	2016	2017
	NIS in	
	millions	
Cash flows from operating activities	945	973
Cash flows from investing activities	(639)	(72)

Short-term investment in deposits	452	(302)
Adjusted Free Cash Flow	758	599

102

At December 31, 2017, the current portion of our total financial debt (including future interest payments during 2018) amounted to NIS 772 million, as compared to NIS 587 million at December 31, 2016, and was composed of the amounts set forth in the table below. We intend to fund the repayment of the current portion of our Notes payable, borrowings and interest in 2018, through available cash or operational cash flow, issuance of deferred notes payable, new borrowings, issuance or sale of corporate notes, or a combination of one or more of these resources.

	NIS in millions
Current Portion Payable in 2018 as of December 31, 2017	
Principal on notes payable	322
Principal on borrowings	382
Accrued interest on notes payables	27
Accrued interest on borrowings	41
Total	772

Capital Expenditures. The telecommunications business is highly capital intensive, requiring significant capital to acquire licenses and to construct and maintain a telecommunications network. The capital requirements of our network are determined by the coverage desired, the expected call and data traffic and the desired quality and variety of services. Capital expenditures also included, in 2017, expenditures on computer and information systems, optic fibers and related assets, subscribers equipment and installation, property, leasehold improvements, furniture and equipment, costs of obtaining contracts with customers (under IFRS 15), and computer software.

In the years ended December 31, 2015, 2016 and 2017, our capital expenditures as represented by additions to property and equipment and intangible assets, amounted to NIS 271 million, NIS 202 million and NIS 333 million (without the impact of the early adoption of IFRS 15), respectively. The increase in capital expenditures from 2016 to 2017 mainly reflected the increased investments in optic fiber network, and the costs of equipment leased to customers (mainly related to TV services). Including the impact of the early adoption of IFRS 15 in 2017, capital expenditures totaled NIS 417 million (US\$ 120 million), including capital expenditures in a total of NIS 84 million from the capitalization of the costs of obtaining contracts under IFRS 15.

At December 31, 2017, our capital expenditure commitments totaled NIS 5 million. For further information regarding our capital expenditure commitments at December 31, 2017, see “Item 5F Aggregate Contractual Obligations”.

Dividend payments. For the year ending December 31, 2017, the Company did not distribute any dividends.

5B.5 MAIN SOURCES OF LIQUIDITY

• Cash on hand;

• Short-term deposits;

• Operating cash flows, net of cash flow used for investing activities;

• Off balance sheet deferred issuance of Notes payable;

• Regular Notes payable and long-term borrowings.

Cash on hand. At December 31, 2017, we had NIS 867 million in cash on hand, compared to NIS 716 million at December 31, 2016.

Short-term deposits. At December 31, 2017, we had NIS 150 million in short-term deposits, compared to NIS 452 million at December 31, 2016.

103

Cash generated from operations. Cash generated from operations totaled NIS 973 million (US\$ 280 million) in 2017. Without the impact of the early adoption of IFRS 15 in 2017, cash generated from operations would have been NIS 897 million, a decrease of 5% compared with 2016. The decrease mainly reflected the payment by HOT Mobile in 2016 of the lump sum of NIS 250 million under the Network Sharing Agreement, which was partially offset by an increase in trade payable balances, and by a larger decrease in trade receivables of NIS 283 million in 2017 compared with NIS 226 million in 2016 which was mainly explained by the decrease in the volume of equipment sales under long-term payment plans in 2017 compared with 2016. Adjusted Free Cash Flow for 2017 was NIS 599 million (US\$ 173 million), a decrease of 21% compared to NIS 758 million for 2016 (as shown in "Item 5B.4", Adjusted Free Cash Flow is calculated as cash flows from operating activities, net of cash flows from investment activities less short-term investment in deposits; Adjusted Free Cash Flow is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies).

Existing credit facilities. During 2017 and at December 31, 2017, we did not have any active credit facilities with banks.

Notes payable issuance commitments. During 2017 and 2018 the Company entered into agreements with Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, additional Series F notes payable. An amount of NIS 150 million will be issued in December 2018 and an amount of NIS 227 million will be issued in December 2019.

We believe that cash flows from our operations, together with our cash on hand and our short-term deposits, and the issuance of additional Series F notes payable, will provide us with enough liquidity and resources to fund our on-going operations, expected capital expenditure needs, payment of amounts due on our notes and borrowings, as well as other material commitments, at least for the next 12 months (see also "Item 5F Aggregate Contractual Obligations"). However, the actual amount and timing of our future requirements may differ materially from our estimates. See also "Item 5D.2 Outlook".

As noted in "Item 3D.1o Our mobile telephone license imposes certain obligations on our shareholders and restrictions on who can own our shares. Ensuring compliance with these obligations and restrictions may be outside our control, and may limit our ability to raise new equity capital. If the obligations or restrictions are not respected by our shareholders, we could lose our license.", if the Company decides to raise capital, it may face significant difficulties, since the current holdings of Israeli entities (as defined in the license) are approximately 5% and any equity offering to the public or to the Company's employees and office holders will require an equivalent equity offering of shares to Israeli entities, in a manner in which the total Israeli entities founding shareholders' holdings will not be less than 5% of the total issued share capital. Since these Israeli entity shares require pre-approval of the MoC to determine that the receiving shareholder is eligible to be an Israeli entity, they are limited in their capability of transfer to another shareholder. The Company may need to grant a significant discount in an equity offering of these Israeli entity shares. If the Company would be required to raise capital and this issue would prevent it, there could be an adverse impact on our business (e.g. reduction in sales with long term credit arrangements and/or reduction in capital investments).

5C. Research and Development, Patents and Licenses

We are primarily a user rather than a developer of technology. Accordingly, we did not engage in any significant research and development activities during the past three years.

5D. Trend Information

5D.1 RECENT DEVELOPMENTS

See “Item 5D.2 Outlook”. See also recent regulatory developments in “Item 4B.12e Regulatory Developments” and “Item 3D.1 RISKS RELATING TO THE REGULATION OF OUR INDUSTRY”.

5D.2 OUTLOOK

In 2017, competition in the Israeli telecommunications market remained intense, both across cellular segment services and fixed-line segment services, as well as in the market for equipment and device sales. As a result, the continued substantial price erosion in the market had a further significant negative impact on the Company's business results, with total revenues for 2017 decreasing by 8% compared with 2016.

In addition to a decrease in service revenues, revenues from equipment sales decreased in 2017 by 13%, largely reflecting a decline in sales volumes of both cellular devices and other non-core equipment including tablets, televisions, streamers and other audio visual devices.

Whilst in 2017 we earned profits of NIS 114 million (US\$ 33 million), profit without the impact of the early adoption of IFRS 15 in 2017 would have been NIS 61 million (US\$ 18 million); profit in 2016 was NIS 52 million. Because the regulatory and business environment continues to evolve, generally with the objective of further increasing competition in the various markets in which we operate, depending on past and future regulatory and market developments, these factors may continue to negatively impact our business through 2018 and beyond. See also "Item 3D.2a."

In order to mitigate the impact of the competition on the price erosion and decreases in service revenues and in revenues from equipment sales, the Company continued to adjust its cost structure and to implement operational efficiency measures through 2017, which resulted in a decrease in 2017 in total operating expenses, without the impact of the early adoption of IFRS 15, of NIS 294 million (including cost of service revenues (NIS 2,083 million in 2017) and selling, marketing and administrative expenses (NIS 536 million in 2017), and excluding depreciation, amortization and impairment expenses and other expenses (mainly amortization of employee share based compensation) (NIS 589 million in 2017); this measure is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other companies). This decrease followed a decrease in total operating expenses in 2016 of NIS 139 million compared with 2015.

The scope for the Company to adjust its cost structure and to implement operational efficiency measures diminishes year by year. In addition, in view of the fact that Partner entered into the television market in mid-2017, the operating expenses for 2017 do not include the full-year impact of the incremental operating expenses related to the television service, including content rights and distribution expenses, wholesale internet infrastructure access expenses and television service-related workforce expenses. Therefore total operating expenses may not decrease to the same extent as was achieved in 2017, or at all, in 2018 and beyond.

Regarding finance costs, net, in 2018, finance costs, net, are expected to be significantly lower in 2018 than in 2017, both reflecting the early debt repayment expenses recorded in 2017 in an amount of NIS 94 million as well as anticipated lower interest expenses as a result of the lower average level of financial debt, as discussed above in "Item 5B.4 Total net financial debt", and the lower average debt interest rate.

As explained in "5A.2a Cellular Services Segment" above, 2017 was the final year for which the Company recorded income with respect to the settlement agreement of the Orange brand agreement, in an amount of NIS 108 million (US\$ 31 million).

In November 2017, the Company announced that it is holding negotiations with Cellcom Israel Ltd., another Israeli telecommunications operator, regarding a potential long term cooperation agreement for the deployment of a fiber optics infrastructure by both companies. If concluded, the agreement would provide that each party will be entitled to purchase from time to time, as per its needs and at its sole discretion, fiber optic infrastructure services (including Indefeasible Right of Use - IRU) from the other party's present and/or future fiber optics infrastructure in order to connect residential buildings throughout Israel. The agreement, if concluded and executed, will allow the companies to avoid duplicated future deployment, as well as allow the Company to accelerate the deployment rollout of the fiber

optics infrastructure while reducing costs and improving its ability to provide quality services, for the benefit of consumers in Israel. At the same time, the Company continues to explore other alternatives to accelerate its deployment of fiber infrastructure. The finalization of the agreement is subject to further negotiations between the parties and if concluded, the execution of the agreement will be subject to the required regulatory approvals.

105

Regarding liquidity, capital expenditures in 2018 are expected to include increased investments in our fiber optic network and in expenditures related to our television service.

In addition, cash generated from operations in 2018 is not expected to be supported by a change in trade receivables to the same extent as it was in 2017 depending upon the volume of equipment sales under long-term payment plans (as explained Item "4B.7 POST-PAID CUSTOMER CONTRACTS AND CREDIT POLICY", most of our customers pay for equipment devices with long term financing plans whereby the customer pays for the equipment through monthly payments over a period of between 12 and 36 months). Depending on regulatory and other developments in the market as well as the factors discussed here, adjusted free cash flow may decline significantly in 2018 compared with 2017.

The statements above under this section regarding trends are "forward-looking" statements. We have based these forward-looking statements on our current knowledge and our present beliefs and expectations regarding possible future events. These forward-looking statements are subject to risks, uncertainties and assumptions about Partner, consumer habits and preferences in mobile telephone usage, trends in the Israeli telecommunications industry in general, possible regulatory and legal developments and trends in general economic conditions. In particular, there is no certainty that an agreement will be reached with Cellcom. For a description of some of the risks we face, see "Item 3D. Key Information – Risk Factors", "Item 4. Information on the Company", "Item 5. Operating and Financial Review and Prospects" and "Item 8A. Consolidated Financial Statements and Other Financial Information – Legal and Administrative Proceedings". In light of these risks, uncertainties and assumptions, the forward-looking events discussed above might not occur, and actual results may differ materially from the results anticipated.

5E. Off-Balance Sheet Arrangements

As of December 31, 2017, the Company provided bank guarantees in a total amount of NIS 126 million. In addition, the Company provided a guarantee to PHI's debt in an amount of NIS 50 million. For further details see note 17(5) to the consolidated financial statements.

During 2017 and January 2018, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, an aggregate principal amount of NIS 150 million of additional Series F debentures in December 2018 and NIS 227 million in December 2019. See "5B.2 Long-term Borrowings".

Other than the aforementioned guarantees and deferred notes payable, there are no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors. See also "Item 5F Aggregate Contractual Obligations".

5F. Aggregate Contractual Obligations

Set forth below are our contractual obligations and other commercial commitments as of December 31, 2017:

Contractual Obligations	Payments due by period (NIS in millions)				2023 and thereafter
	Total	2018	2019-2020	2021-2022	
Notes Series C*	220	220			
Notes Series D*	451	115	225	111	
Notes Series F*	707	14	155	275	263

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

Long term borrowings*	681	423	***	113	110	35
Operating Leases	578	158		177	112	131
Trade payables	787	787				
Payables in respect of employees	70	70				
Other payables	11	11				
Contribution to defined benefit plan	10	10				
Commitments to pay for inventory purchases**	818	679		139		
Commitments to pay for property, equipment purchases and software elements purchases (capital expenditures)**	5	5				
Commitments to pay for rights of use of capacities**	207	43		82	82	
Commitment to pay for capacities maintenance **	52	9		17	17	9
Total Contractual Cash Obligations	4,597	2,544		908	707	438

*The figures include expected payments of interest on our long-term debt (borrowings and notes payable).

**See note 17 to the consolidated financial statements.

Long-term borrowings include L and O in a total principal amount of NIS 300 million as well as the accumulated ***interest thereon and early repayment fees, that were due during 2018 and were early repaid in March 2018. See also "Item 5B.2 LONG-TERM BORROWINGS".

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

6A. Directors and Senior Management

6A.1 DIRECTORS

Below is a list of the directors of the Company as of the date of this annual report.

Name of Director	Age	Position
Adam Chesnoff*	52	Chairman of the Board of Directors
Elon Shalev*	66	Vice-Chairman of the Board of Directors
Dr. Michael J. Anghel ⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾	79	Director
Barry Ben Zeev ⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾	66	Director
Fred Gluckman*	47	Director
Barak Pridor*	52	Director
Osnat Ronen ^{(5) (6)}	55	Director
Yoav Rubinstein*	44	Director
Arieh Saban*	71	Director
Yehuda Saban	38	Director
Arik Steinberg ⁽¹⁾⁽²⁾⁽⁴⁾	53	Director
Ori Yaron*	52	Director
Tomer Bar Zeev*	42	Director

(1) Member of the Audit Committee

(2) Member of the Compensation Committee

(3) External Director under the Israeli Companies Law (See “Item 6C Board Practices”)

(4) Independent Director under NASDAQ rules and under the Israeli Companies Law

(5) Independent Director under NASDAQ rules

(6) Appointed by the Israeli founding shareholders

* Nominated by S.B. Israel Telecom

Adam Chesnoff was appointed to the Board of Directors of Partner effective as of January 29, 2013 and was appointed to serve as Chairman of the Board of Directors on November 20, 2013. Mr. Chesnoff serves as the President and Chief Operating Officer of Saban Capital Group, Inc., responsible for overseeing its investment and business activities, including private equity and public market investments. Mr. Chesnoff is a member of the Board of Directors of Univision Communications Inc., the largest Spanish-language media company in the United States; a member of the Board of Directors of Celestial Tiger Entertainment Ltd., an owner and operator of pay television channels across Asia. Mr. Chesnoff is also a member of the Board of Commissioners of PT Media Nusantara Citra Tbk Ltd., an Indonesian media company. In addition, Mr. Chesnoff served on the Board of Directors of Univision Communications Inc. from 2007 until January 2018 and as Vice-Chairman of the Board of Directors of ProSiebenSat.1 Media AG from 2003 until 2007. From 2005 to 2010, Mr. Chesnoff served on the Board of Directors of Bezeq Israel Telecommunication Company Ltd. Mr. Chesnoff holds a B.A. in economics and management from Tel-Aviv University and an M.B.A from UCLA's Anderson School of Business.

Elon Shalev was appointed to the Board of Directors of Partner effective as of January 29, 2013 and was appointed to serve as Vice Chairman of the Board of Directors on November 20, 2013. Mr. Shalev serves as a senior advisor to Saban Capital Group, Inc. Mr. Shalev was the founder of Channel 2 news and from 1993 to 1995 served as its Chief Executive Officer. From 1996-1999, he served as Editor in Chief of "Yediot Aharonot", and from 2000 to 2001 he served as Executive Vice President of Discount Investment Corporation Ltd. of the IDB Group. Mr. Shalev was the co-founder of SHL Telemedicine Ltd. and still serves as a director in the company. Mr. Shalev served in the past on the Board of Directors of Bezeq Israel Telecommunication Company Ltd., DBS Satellite Services (1998) Ltd. (Yes) and Bezeq International Company Ltd. Mr. Shalev holds a B.A. in political science from Tel Aviv University.

Dr. Michael J. Anghel was appointed to the Board of Directors of Partner in March 2006. From 1977 to 1999, he led the Discount Investment Corporation Ltd. (of the IDB Group) activities in the fields of technology and communications. Dr. Anghel was instrumental in founding Tevel, one of the first Israeli cable television operators and later in founding Cellcom. In 1999 he founded CAP Ventures, an advanced technology investment company. From 2004 to 2005, Dr. Anghel served as CEO of DCM, the investment banking arm of the Israel Discount Bank. He has been involved in various technology enterprises and has served on the Board of Directors of various major Israeli corporations and financial institutions including Elron, Elbit, Nice, Gilat, American Israeli Paper Mills, Maalot (the Israeli affiliate of Standard and Poor's), Hapoalim Capital Markets, Syneron Medical Ltd., Dan Hotels Ltd., the Strauss Group and served as the Chairman of the Center for Educational Technology. He currently serves on the Board of Directors of Orbotech Ltd., Lumus Ltd. and BiolineRx Ltd. Prior to launching his business career, Dr. Anghel served as a full-time member of the Recanati Graduate School of Business Administration of the Tel Aviv University, where he taught finance and corporate strategy. He currently serves as Chairman of the Tel Aviv University's Executive Program. Dr. Anghel holds a B.A. in economics from the Hebrew University in Jerusalem and an M.B.A. and Ph.D. in finance both from Columbia University in New York.

Tomer Bar Zeev was appointed to the Board of Directors of Partner effective as of November 21, 2017. Mr. Bar Zeev is the founder of ironSource, a leading digital content company that offers monetization and distribution solutions for app developers, software developers, mobile carriers, and device manufacturers and has served since 2010 as the CEO. Mr. Bar Zeev holds a B.A. in computer science from the Interdisciplinary Center Herzliya.

Barry Ben Zeev (Woolfson) was appointed to the Board of Directors of Partner in October 2009. He has been providing strategic business consulting services since 2009. Mr. Ben Zeev served as the Deputy-Chief Executive Officer & Chief Financial Officer of Bank Hapoalim in 2008. He joined the bank in 1976 and served in a variety of senior positions in the branch system and the international division including New York. Mr. Ben Zeev served in the following executive positions prior to becoming Deputy-Chief Executive Officer & Chief Financial Officer of Bank Hapoalim: Executive Vice President & Head of International Operations during the years 2001-2002, Deputy-Chief Executive Officer & Head of International Private Banking during the years 2002-2006, Chairman of Poalim Asset Management during the years 2001-2006, Chairman of Bank Hapoalim Switzerland during the years 2002-2006,

Deputy Chairman of the Board of Directors of Signature Bank in New York during the years 2001-2002 and Deputy-Chief Executive Officer and Head of Client Asset Management during the years 2006-2007. Mr. Ben Zeev serves on the Board of Directors of the following companies: Ellomay Capital Ltd., Poalim Asset Management UK Ltd., Ben Zeev (Woolfson) Consultants Ltd., Hiron-Commerce Investments & Mivnei Ta'asiya Ltd., Kali Pension Administration Management Ltd. and Altshuler Shaham Provident and Pension Ltd., as an independent director and head of the investment committee. In addition, he serves on the Board of Trustees of the College for Management (Michlala Le-Minhal). He also served as a member of the Board of Directors of the Tel Aviv Stock Exchange during the years 2006-2007. Mr. Ben Zeev holds a B.A. in economics and an M.B.A both from Tel-Aviv University.

Fred Gluckman was appointed to the Board of Directors of Partner effective January 29, 2013. Mr. Gluckman has been employed by Saban Capital Group Inc. ("SCG") since 2003 and served as Senior Vice President and Chief Financial Officer from 2010 to 2016, Executive Vice President and Chief Financial Officer since 2016 and serves on the Board of Directors of several SCG affiliated non-public companies. In addition, Mr. Gluckman serves as the Chief Financial Officer and Executive Vice President of Saban Capital Acquisition Corp. Mr. Gluckman also currently serves as a member of the Board of Directors of Univision Communications Inc., serving on its audit, finance and compensation committees, and as an alternate member of the Board of Directors of Celestial Tiger Entertainment Ltd. serving on its Audit Committee. Mr. Gluckman also serves on the national and west region board of Friends of the Israel Defense Forces, serving on the executive, audit and finance committees of the national board. Prior to joining SCG, Mr. Gluckman performed international and domestic tax advisory work in the London and Southern California practices of Deloitte. Mr. Gluckman is an officer and a member of Board of Directors of the Saban Family Foundation and the Cheryl Saban Self-Worth Foundation for Women and Children. Mr. Gluckman holds a BS in Economics from Wharton Business School of the University of Pennsylvania and is a CPA.

Barak Pridor was appointed to the Board of Directors of Partner in February 2016. Mr. Pridor served from 2000 until 2011 as CEO of ClearForest, a software startup that was acquired by Thomson Reuters in 2007. Following the acquisition, Mr. Pridor continued to serve as CEO of ClearForest as well as an Executive Vice President at Thomson Reuters until 2011. Mr. Pridor serves as Chairman of the Board of Directors of Applicaster Ltd., as a director on the Board of Directors of: Playbuzz Ltd, Beachbum Ltd., Origami Logic Inc. and Sosa Tlv Ltd. He is also an observer on the Board of Directors of SimilarWeb Ltd. Mr. Pridor holds a B.Sc. in Mathematics and Computer Science from Tel Aviv University and a M.B.A. from INSEAD Business School.

Ms. Osnat Ronen was appointed to the Board of Directors of Partner in December 2009. Ms. Ronen founded FireWind 01 GP in 2015 and has since served as its general partner. Ms. Ronen has also served as an advisor to Liquidnet, Inc. from 2013 to 2015. She previously served as a General Partner of Viola Private Equity from 2008 until 2013. From 1994 to 2007, Ms. Ronen served in various positions at Bank Leumi Le Israel BM, including as the Deputy Chief Executive Officer of Leumi Partners Ltd. from 2001 to 2007 and as Deputy Head of the Subsidiaries Division of the Leumi Group from 1999 to 2001. Between 2004 and 2007, Ms. Ronen also led the strategic planning, deployment and execution of the Bachar Reform, one of Israel's largest financial reforms, at Leumi Group. As part of the implementation, Ms. Ronen managed the sale of Leumi's holdings in mutual, provident and training funds. Ms. Ronen currently serves on the Board of Directors of Mizrahi-Tefahot Bank Ltd., Fox-Wizel Ltd. and Perion Network Ltd. She also volunteers as a director of the College for Management (Michlala Le-Minhal) and Yissum Research Development Company of the Hebrew University of Jerusalem. Ms. Ronen served on the Board of Directors of several portfolio companies of Viola including: Amiad Water Systems Ltd., Orad Hi-tech Ltd., Aeronautics Ltd., Degania Medical Ltd. and Matomy Media Group Ltd and until December 2017 as a director of Perion Networks Ltd. Ms. Ronen holds a B.Sc. in mathematics and computer science from Tel Aviv University and an M.B.A. from the Recanati School of Business Administration at Tel Aviv University.

Yoav Rubinstein was appointed to the Board of Directors of Partner effective as of January 29, 2013. Mr. Rubinstein joined SHL Telemedicine Ltd. as Senior Vice President, Head of Global Business Development in March 2012. Previously, Mr. Rubinstein served as an investment professional at Apax Partners for nine years and as Senior Advisor to Saban Capital Group, Inc. Mr. Rubinstein holds a B.A. in business administration from the Interdisciplinary Center in Herzliya.

Arieh Saban was appointed to the Board of Directors of Partner effective as of January 29, 2013. Mr. Saban has served since 2010 as Chairman of the Board of Directors of Saban Brands Israel Ltd. From 1983 until 2002 Mr. Saban served as the CEO of Israel Audio-Visual Corporation, a media distribution, licensing and merchandising agency that he founded. From 2000 until 2002 he served as Chairman of the Board of Directors of Fox Kids Israel, a joint venture with Fox Kids Europe. Within the scope of his positions, Mr. Bartov took part in leading significant business and technological courses of action in the Company. Prior to joining the Company, Mr. Bartov was employed by Amdocs. Mr. Bartov holds a B.Sc. in computer science from Tel-Aviv University, and an M.B.A. from Ben-Gurion University.

Noach Hacker was appointed as Vice President, Regulation effective September 2016 and in January 2018, was appointed as Vice President, Regulation and Fiber Division. Prior to joining the Company, Mr. Hacker served for over nine years in various capacities with the budget department of the Ministry of Finance as Senior Deputy to the Head of Budgets-Security Affairs, Security Budget Coordinator, Coordinator on the Infrastructure Team and as the Liaison of the Water Sector. Mr. Hacker holds a combined B.A in political science, economics and interdisciplinary studies from Bar Ilan University and an M.A. in political science from Haifa University.

Yakov Truzman was appointed as Vice President Business Division effective March 2018, after serving as Vice President Business Division at Bynet Data Communications from 2016 until joining the Company. Prior to that, Mr. Truzman served from 2011 until 2015 as the Vice President of Sales of the HOT Group. During the years 2001 until 2011, Mr. Truzman served in several managerial positions in the Cellcom Group, including department manager of business customers. Mr. Truzman holds a B.A. in behavioral sciences, management and economics from Ben Gurion University.

Appointments and Resignations

None of the above directors, except for Mr. Arieh Saban, who is the brother of Mr. Haim Saban, the owner and CEO of Saban Capital Group, has any family relationship with any other director or senior manager of the Company. None of the above members of senior management has any family relationship with any other director or senior manager of the Company.

6B. Compensation

The terms of employment of the CEO are approved by the compensation committee, the Board of Directors and the general meeting of shareholders (by a special majority) and must comply with the Company's Compensation Policy for Office Holders (as this term is defined in Item 6C.8 below) (except for certain exceptions, as set by the Israeli Companies Law). The "special majority" requires the approval of a majority of the Company's shareholders participating at the general meeting and voting on the matter and at least one of the following conditions: (i) such majority includes a majority of the votes cast by shareholders who are not controlling parties (as defined in the Israeli Companies Law) in the Company and who do not have a personal interest in the resolution, and who are present and voting (abstentions are disregarded), or (ii) the votes cast against the resolution by shareholders who are not controlling parties and who do not have a personal interest in the resolution, who are present and voting, constitute two percent or less of the outstanding voting power in the Company. The terms of employment of other senior management (Office Holders) are approved by the compensation committee and the Board of Directors, and must comply with the Company's Compensation Policy (except for certain exceptions, as set by the Israeli Companies Law). See "Item 6C.6b COMPENSATION COMMITTEE". Senior management is generally appointed by the CEO with the approval of the Board of Directors for an indefinite term of office and may be removed by the CEO with the approval of the Board of Directors at any time.

Pursuant to the provisions of the Israeli Companies Law, the compensation policy of a company shall be submitted for the approval of the general meeting of shareholders, at least once every three years. We first adopted a compensation policy that sets forth the guidelines and framework for the mode of compensation of the Company's Office Holders following the approval of the Company's shareholders, at the extraordinary general meeting of shareholders, held on October 17, 2013 (the "Former Compensation Policy"). A new Compensation Policy was approved by the Company's

shareholders at the annual general meeting of shareholders held on September 28, 2016 (the “Compensation Policy”). The Compensation Policy sets forth the principles and procedures for determining Office Holders’ compensation, including ongoing remuneration, bonuses (including annual bonuses, severance bonuses and special bonuses), equity compensation, indemnification, insurance and release. The Compensation Policy revises the Former Compensation Policy with respect to various matters and issues that needed to be updated and amended since the adoption of the Former Compensation Policy, due to changes in market practices since then, as well as adaption to legislative changes. See Exhibit 15.(b).1.

According to the Compensation Policy, annual bonus payments for our senior management are determined with respect to a given year based on targets set for the Company as a whole, targets set for each of the Company divisions as well as on personal evaluations. The targets for the CEO and the senior management are set by the compensation committee and the Board of Directors generally in accordance with the overall Company objectives. Upon the approval of the Company's annual results, bonus payments are determined based on the extent to which the Company and division targets have been met, as well as on the personal evaluation of each Office Holder at the discretion of the compensation committee and the Board of Directors, in light of the recommendations made by the Chairman of the Board of Directors with respect to the CEO, and, in light of recommendations made by the CEO, with respect to senior management reporting to the CEO.

Compensation for senior management may also be provided in the form of equity-based compensation which includes stock options to purchase our ordinary shares and restricted shares. In 2017 options were granted to our senior management under the 2004 Amended and Restated Equity Incentive Plan to purchase up to 467,780 of our ordinary shares at a weighted average exercise price of NIS 19.74 per option with some of the options vesting at the earliest in February 2018. These options will expire at the latest by September 2023. In addition, in 2017, 200,888 restricted shares were granted to our senior management under the 2004 Amended and Restated Equity Incentive Plan, with some of the restricted shares vesting at the earliest in February 2018. For more information, see "Item 6E.2 Equity Incentive Plan".

The aggregate compensation paid, and benefits in kind granted to or accrued on behalf of all our directors and senior management for their services in all capacities to the Company and its subsidiaries during the year ended December 31, 2017, was approximately NIS 35 million (US\$ 10 million). This amount included approximately NIS 3 million (US\$ 0.9 million) set aside or accrued to provide pension and retirement benefits on behalf of all our senior management during the year ended December 31, 2017.

CEO Compensation

Mr. Isaac Benbenisti has served as the CEO of the Company since July 1, 2015. The terms of his employment were approved by the Compensation Committee, the Board of Directors and the general meeting of shareholders of the Company. Until December 1, 2015, the CEO was employed through an agreement with a private company, fully owned by him, for the provision of management services to the Company. Following a resolution of the compensation committee to make an immaterial change to the CEO's terms of employment, the CEO's employment format was changed to that of a company employee ("Employment Agreement"). The engagement in the Employment Agreement is for an unlimited time period with the right of each party to terminate upon 6 months prior written notice. In addition to the advance notice period, upon termination, the CEO will be entitled to a 6 month period during which he will receive a salary without being required to provide services.

The CEO's monthly salary (gross) will be an amount of NIS 150 thousand, linked to the CPI as of the index June 2015 (at the end of 2017 the monthly salary (gross) was NIS 150.3 thousand). In addition, the CEO will be entitled to reimbursement for the cost of vehicle use and maintenance as well as accepted related terms that are usually granted to the other office holders in the Company including telephone, food, cellular phone and other benefits in accordance with the Company's compensation policy and procedures (including indemnification, release and insurance arrangements as customary in the Company) and social benefits including sick days, vacation and allocations to plans and funds.

The annual bonus of the CEO is based on two elements: (a) 90% - Company targets (see below) while using the main performance indices determined by the Compensation Committee and Board of Directors after approval of the Company's annual budget, and (b) 10% - CEO performance evaluation for that year by the Compensation Committee and Board of Directors, based on qualitative and quantitative criteria.

The minimum criterion for receiving the annual financial bonus with respect to the CEO, as of the beginning of his said tenure as CEO, is that the Company achieved as least 80% of the Company's targets for the relevant year and in addition, that the total EBITDA shall not have decreased by more than 40% of the EBITDA for the year preceding the year in respect of which the bonus is payable.

113

With respect to the amount of the annual financial bonus, tiers were set to calculate the amount of the bonus according to the CEO's global achievement rate with respect to all of the elements of the annual bonus (a weighted score of the company targets and an evaluation of the CEO's performances), as follows: achievement at a rate lower than 80% will not entitle the CEO to an annual bonus; achievement at a rate between 80%-120% will entitle the CEO to 80%-120% of the annual bonus budget; achievement at a rate that exceed 120% will entitle the CEO to 120% of the annual bonus budget. For the year ending December 31, 2017, the annual bonus budget (100%) for the period during Mr. Benbenisti's tenure as CEO was approximately NIS 1,503 thousand. These sums are linked to the CPI.

The CEO's Company targets for the year 2017 were determined by the Board of Directors of the Company in January 2017 based on the annual work plan of the Company for the year. They include seven individual targets: (1) Company EBITDA target with a weight of 30% of the Company's targets (2017 achievement rate: 123%, the target and the achievement rate were calculated according to the previous accounting policy without the impact of IFRS 15 adoption); (2) Cash flow target from the ongoing business with a weight of 20% of the Company's targets (2017 achievement rate: 186%); (3) Net post-paid subscriber target with a weight of 10% of the Company's targets (2017 achievement rate: 37%); (4) Cellular ARPU Base target with a weight of 10% of the Company's targets (2017 achievement rate: 101%); (5) TV target (including budget, quality of service and other operational index targets) with a weight of 10% of the Company's targets (2017 achievement rate: 101%); (6) Quality of sales and service with a weight of 10% of the Company's targets (2017 achievement rate: 59%) and (7) Fixed-line service target (meet quality of service targets and other operational index targets that were determined) with a weight of 10% of the Company's targets (2017 achievement rate: 101%).

With respect to the above Company targets, a threshold and upper limit for achieving the target were determined as follows: achievement at a rate lower than 20% of the target will not allow eligibility for a bonus for that criteria; achievement at a rate between 20% - 200% of the target will allow eligibility at a rate of 20% - 200% for that criteria; achievement at a rate above 200% will allow eligibility of 200% for that criteria. With regard to the Company EBITDA target, an achievement at a rate lower than 80% of the target will not allow eligibility for a bonus for that criteria.

The global achievement rate of the CEO of all of the elements of the annual bonus for 2017 was 114%.

On March 28, 2018, the Board of Directors examined the CEO's achievement of targets and in accordance with the achievement of the said targets, the bonus that will be granted to the CEO for 2017, is in the amount of NIS 1,804 thousand.

CEO Equity Incentive Grant

In accordance with the resolutions of the Compensation Committee, Board of Directors and annual meeting of shareholders, Mr. Benbenisti was granted in 2015, in accordance with the Company's equity incentive plan, 1,471,971 options (non-tradeable) of the Company, at an exercise price of NIS 18.08, that constitutes a premium of 5% on the average share price of the Company, during the 30 days preceding the grant date. Mr. Benbenisti's granted options vest in three tranches: 33% of the entire amount of the options as of October 28, 2016, 33% of the entire amount of options as of October 28, 2017 and the balance of the options as of October 28, 2018. Mr. Benbenisti's eligibility to exercise each of the above detailed tranches will be available to him until October 27, 2021. The fair value of the options as of the grant date according to Black-Scholes model was NIS 8 million.

Immaterial amendments to the terms of employment of the CEO

During 2017, the Compensation Committee approved within its powers, in accordance with the Company's Compensation Policy for Office Holders, and the Companies Law, two immaterial amendments to the terms of employment of the CEO. These amendments included an amendment to the cost of the vehicle maintenance component and effective from the year 2018 thereafter, also an amendment to the annual bonus budget (100%), from NIS 1,503 thousand (10 monthly salaries) to NIS 1,653 thousand (11 monthly salaries). The cumulative annual cost of the change with respect to these amendments is 3.6% (in real terms) relative to the cost of all the terms of employment of the CEO for that reporting year.

Highest Office Holder Compensation

The table below sets forth information regarding compensation on an individual basis for the five Office Holders with the highest compensation for the year 2017.

Details of the Compensation Recipient		Compensation for services (the compensation amounts are displayed in terms of cost for the Company) (NIS thousands)		Share based payments	Other compensation & vehicle (the compensation amounts are displayed in terms of cost for the Company) (NIS thousands)	Total (NIS thousands)
Name	Position	Payroll & Related expenses	Annual Bonus	Other		
Isaac Benbenisti	Chief Executive Officer	2,368	1,804	2,223 ⁽¹⁾ (11)	141 ⁽²⁾	6,536 ⁽³⁾
Yuval Keinan	Deputy Chief Executive Officer	1,758	1,268	980 ⁽⁴⁾ (11)	832 ⁽⁵⁾	4,838
Noach Hacker	Vice President Regulations and Fiber Division	1,022	425	1,173 ⁽⁶⁾ (11)	513 ⁽⁵⁾	3,133
Hadar Vismunski-Weinberg	Vice President, Chief Legal Counsel & Corporate Secretary	920	377	1,231 ⁽⁷⁾ (11)	349 ⁽⁸⁾	2,877
Einat Rom	Vice President, Human Resources & Administration	1,142	462	893 ⁽⁹⁾ (11)	103 ⁽¹⁰⁾	2,600

(1) In 2014, 137,200 share options were granted to Mr. Isaac Benbenisti in his capacity as Deputy CEO at the time, with a vesting period of up to four years. The theoretical fair value of the share options (according to Black-Scholes model) as measured on the day of the grant was approximately NIS 0.8 million. Mr. Isaac Benbenisti waived these options and they were cancelled when the terms of service and employment of Mr. Benbenisti as the Company's CEO were approved.

In 2015, 1,471,971 share options were granted to Mr. Isaac Benbenisti, in his capacity as the Company's CEO with a vesting period of up to three years at an exercise price of NIS 18.08 that constitutes a premium of 5% on the average share price of the Company, during the 30 days preceding the grant date. The theoretical fair value of the share options (according to Black-Scholes model) as measured on the day of the grant was approximately NIS 8

million. Mr. Benbenisti's granted options vest in three tranches: 33% of the entire amount of the options as of October 28, 2016, 33% of the entire amount of options as of October 28, 2017 and the balance of the options as of October 28, 2018. Mr. Benbenisti's eligibility to exercise each of the above detailed tranches will be available to him until October 27, 2021.

(2) Represents vehicle expenses only.

(3) For further information regarding the CEO's compensation see above under CEO Compensation.

115

(4) In 2016, 269,000 share options and 114,000 restricted shares were granted to Mr. Yuval Keinan with a vesting period of up to three years. The theoretical fair value of the share options (according to Black-Scholes model) as measured on the day of the grant was approximately NIS 1.3 million and the fair value of the restricted shares was approximately NIS 2 million.

(5) "Other compensation" includes: expenses for retirement that were accumulated during the reporting period of this annual report and will be paid only upon retirement, vehicle expenses and a special grant according to article 5.5.3 of the Company's Compensation Policy for Office Holders.

(6) In 2016, 198,891 share options and 78,462 restricted shares were granted to Mr. Noach Hacker with a vesting period of up to three years. The theoretical fair value of the share options (according to Black-Scholes model) as measured on the day of the grant was approximately NIS 0.9 million and the fair value of the restricted shares was approximately NIS 1.4 million.

(7) In 2017, 147,352 share options and 64,183 restricted shares were granted to Ms. Hadar Vismunski-Weinberg with a vesting period of up to three years. The theoretical fair value of the share options (according to Black-Scholes model) as measured on the day of the grant was approximately NIS 0.9 million and the fair value of the restricted shares was approximately NIS 1.4 million.

(8) "Other compensation" includes: expenses for retirement that were accumulated during the reporting period of this annual report and will be paid only upon retirement and vehicle expenses.

(9) In 2014, 68,600 share options and 29,130 restricted shares were granted to Ms. Einat Rom with a vesting period of up to four years. The theoretical fair value of the share options (according to Black-Scholes model) as measured on the day of the grant was approximately NIS 0.4 million and the fair value of the restricted shares was approximately NIS 0.7 million. As of March 21, 2018, the share price was NIS 17.47 whereas the option exercise price (dividend adjusted) is NIS 25.95. As long as the option exercise price is higher than the market share price, the grant of the options has no actual value for Ms. Rom; however a restricted share has the value of the share price.

In 2015, additional 161,369 share options and 76,378 restricted shares were granted to Ms. Rom with a vesting period of up to three years. The theoretical fair value of the share options (according to Black-Scholes model) as measured of the grant was approximately NIS 0.9 million and the fair value of the restricted shares was approximately NIS 1.4 million.

(10) Represents vehicle expenses only.

(11) These sums represent the relative portion of the expenses of all option and restricted share allocations recorded during the reported period and include expenses for the 2017 vesting period of options and restricted shares (including those which have not fully vested yet).

All options and restricted shares noted above were granted pursuant to the terms of the 2004 Equity Incentive Plan, among others, with respect to the exercise or earning periods and the expiration date of the options. See "Item 6E.2 EQUITY INCENTIVE PLAN".

6C. Board Practices

References in this annual report to “external directors” are to those directors who meet the definition of external directors under the Israeli Companies Law (“dahatz”), and references in this annual report to “US independent directors” are to those directors who meet the definition of independence under applicable listing requirements of NASDAQ. References in this annual report to “Israeli independent directors” are to any director who meets the definition of independence under the Israeli Companies Law (“bilty taluy”).

6C.1 TERMS OF DIRECTORS

Directors are generally elected by the annual general meeting of shareholders to serve (i) for three years, in the case of external directors under the Israeli Companies Law, or (ii) until the next annual general meeting of the shareholders (unless their office becomes vacant earlier, in accordance with the provisions of our Articles of Association). An extraordinary general meeting of shareholders may elect any person as a director, to fill an office which became vacant, or to serve as an additional member to the then existing Board of Directors, or to serve as an external director, or in any event in which the number of the members of the Board of Directors is less than the minimum set in the Articles of Association (seven directors), provided that the maximum number of seventeen directors is not exceeded. Any director elected in such manner (excluding an external director) shall serve in office until the coming annual general meeting of shareholders. The Articles of Association also provide that the Board of Directors, with the approval of a simple majority of the directors, may appoint an additional director to fill a vacancy or to serve as an additional member to the then existing Board of Directors, provided that the maximum number of seventeen directors is not exceeded. Any director elected in such manner shall serve in office until the coming annual general meeting of shareholders and may be re-elected.

Israeli directors are appointed by the Israeli founding shareholders, generally upon a written notice signed by at least two of the Israeli founding shareholders who are the record holders of (i) at least 50% of minimum Israeli holding shares or (ii), who hold in the aggregate the highest number of minimum Israeli holding shares among the Israeli founding shareholders. Any Israeli founding shareholders who have specified connections to a competing mobile radio telephone operator (as defined in the license) of the Company are prohibited from participation in any such appointment. The notice is addressed to our company secretary indicating the appointment until the appointee’s successor is elected by a similar notice. See “10B.3 Rights Attached to Shares”. In 2009, Ms. Osnat Ronen was appointed as a director on behalf of the Israeli founding shareholders.

No director has a service contract with the company or its wholly-owned subsidiaries providing for benefits upon termination of employment.

Our Office Holders (generally senior managers) serve at the discretion of the Board of Directors or until their successors are appointed. See “Item 4B.12f Our Mobile Telephone License” for a description of additional requirements of the composition of our Board of Directors and the appointment of its members.

6C.2 ALTERNATE DIRECTORS

Our Articles of Association provide that a director may appoint an individual to serve as an alternate director. An alternate director may not serve as such unless such person is qualified to serve as a director. In addition, no person who already serves as a director or an alternate director on the Company’s Board of Directors may serve as an alternate director of another director on the Company’s Board of Directors. Under the Israeli Companies Law, an alternate director is generally treated as a director. Under our Articles of Association, an alternate director shall have all the authorities of the director appointing him. The alternate director may not vote at any meeting at which the director appointing him is present. Unless the time period or scope of any such appointment is limited by the appointing director, such appointment shall be effective for all purposes and for an indefinite time, but will expire upon the expiration of the appointing director’s term.

6C.3 EXTERNAL DIRECTORS UNDER THE ISRAELI COMPANIES LAW

The Israeli Companies Law generally requires that Partner shall have at least two external directors on its Board of Directors who meet the independence criteria set by the Israeli Companies Law. The appointment of an external director (for the initial term of three years) under the Israeli Companies Law must be approved by the general meeting of shareholders provided that either: (a) the majority of votes in favor of the appointment shall include at least a majority of the votes of shareholders not constituting controlling parties (as stated in the Israeli Companies Law) in the Company, or those having a personal interest (as defined in the Israeli Companies Law) (other than a personal interest not resulting from their relations with the controlling parties) in the approval of the appointment participating in the vote, which votes shall not include abstaining votes; or (b) the total number of objecting votes of the shareholders mentioned in clause (a) does not exceed 2% of the total voting rights in the company.

Dr. Michael Anghel and Mr. Barry Ben-Zeev serve as our external directors under the Israeli Companies Law.

In general, external directors may be re-appointed for two additional three-year terms by one of the following mechanisms:

- (i) the Board of Directors proposed the nominee and his appointment is approved by the shareholders in the manner required to appoint external directors for their initial term (described above);
- (ii) one or more shareholders that hold at least 1% or more of the company's voting rights proposed the external director for re-appointment, and the nominee is approved by a majority of the votes cast at the shareholders meeting, provided that: (A) the total number of shareholders' votes at the shareholders meeting shall not include the votes of shareholders who are controlling parties and those having a personal interest in the appointment approval (other than a personal interest not resulting from their relations with the controlling parties) and abstaining votes; (B) the aggregate votes cast by shareholders who are not excluded under clause (A) above in favor of the appointment exceed 2% of the voting rights in the company; and (B) the external director (a) is not a related or competing shareholder, or the relative of such a shareholder, at the time of the appointment and (b) is not affiliated with a related or competing shareholder at the time of the appointment or the two years preceding the appointment (the term "related or competing shareholder" is defined as a shareholder who nominated the external director for reappointment or a material shareholder (a shareholder that holds more than 5% of the shares or voting rights in the company), if at the date of such appointment, any of either such shareholder, the controlling shareholder of such shareholder, or a company controlled by either of them, has business with the company or is a competitor of the company); and
- (iii) the external director proposed himself or herself and is approved by the process under clause (ii) above.

Under regulations promulgated under the Israeli Companies Law, certain companies, including dual listed companies, like Partner, may re-appoint external directors for additional three-year terms (beyond the three terms of three years each), provided that all of the following conditions are fulfilled: (1) the Audit Committee and, subsequently, the Board of Directors, approves that, considering the external director's expertise and special contribution to the work of the Board of Directors and its committees, his re-appointment for an additional term of office is in the best interest of the Company; (2) the re-appointment for the additional term of office is done in conformity with one of the mechanisms described above; (3) prior to approving the re-appointment, the general meeting of shareholders is informed of the duration of the external director's service as an external director and is presented with the rationale of the Audit Committee and the Board of Directors for extending the external director's term of office.

The Israeli Companies Law requires that at least one external director has accounting and financial expertise, and that the other external director(s) have professional competence, as determined by the company's Board of Directors. Under promulgated regulations, a director having accounting and financial expertise is a person who, due to his education, experience and talents, is highly skilled in respect of, and understands, business-accounting matters and financial reports in a manner that enables him to understand in depth the company's financial statements and to stimulate discussion regarding the manner in which the financial data is presented. Under the regulations, a director having professional competence is a person who has an academic degree in either economics, business administration, accounting, law or public administration or has another academic degree or has other higher education, all in the main business sector of the company or in a relevant area for the Board of Directors position, or has at least five years' experience in one or more of the following (or a combined five years' experience in at least two or more of the following): a senior position in the business management of a corporation with a substantial scope of business, a senior public officer or a senior position in the public service or a senior position in the field of the company's business.

6C.4 FINANCIAL EXPERTS UNDER THE ISRAELI COMPANIES LAW

In accordance with the Israeli Companies Law, Partner's Board of Directors has determined that the minimum number of directors with "accounting and financial expertise" that Partner believes is appropriate, in light of the particulars of Partner and its activities, is three. Under the Israeli Companies Law, only one of such "experts" is required to be an external director. The Board of Directors has determined that eight of our current directors have "accounting and financial expertise": Mr. Adam Chesnoff, Mr. Fred Gluckman, Mr. Yoav Rubinstein, Dr. Michael Anghel, Mr. Barry Ben-Zeev (Woolfson), Ms. Osnat Ronen, Mr. Arie Steinberg and Mr. Yehuda Saban.

6C.5 NASDAQ CORPORATE GOVERNANCE RULES AND OUR PRACTICES

Under NASDAQ Rule 5615(a)(3), a foreign private issuer such as the Company may follow its home country practice in lieu of the requirements of the NASDAQ Rule 5600 Series ("Corporate Governance Requirements"), with certain exceptions, provided that it discloses each requirement that it does not follow and describes the home country practice followed in lieu of such requirement. We describe below the areas where we follow our home country practice rather than the NASDAQ Corporate Governance Requirements:

In order to comply with the conditions and restrictions imposed on us by the Ministry of Communications, including in our mobile license, in relation to ownership or control over us, under certain events specified in our Articles of Association, the Board of Directors may determine that certain ordinary shares are dormant shares. Consequently, we received an exemption from NASDAQ with respect to its requirement (now under NASDAQ Rule 5640) that voting rights of existing shareholders of publicly traded common stock registered under Section 12 of the US Securities Exchange Act cannot be disparately reduced or restricted through any corporate action or issuance.

As permitted under Israeli Companies Law, the Company's Board of Directors generally proposes director nominees for shareholder approval. The conditions of NASDAQ Rule 5605(e), that director nominees must either be selected or recommended to the Board by the independent directors or a nomination committee comprised solely of independent directors, are thus not satisfied.

According to applicable Israeli legal requirements, the establishment or amendment of certain stock option or purchase plans require the approval of the company's Board of Directors and approval of the shareholders' meeting only for the grant of equity compensation to the Chief Executive Officer, directors or controlling partners. We received an exemption from the requirement set out in NASDAQ Rule 5635(c) that listed companies receive shareholder approval when certain stock option or purchase plans are to be established or materially amended, or certain other equity compensation arrangement made or materially amended, based on the fact that the NASDAQ requirement is inconsistent with the applicable Israeli legal requirements described above.

The Israeli Companies Law, requires that at least two members of the Board of Directors satisfy the conditions of "external directors", which also satisfies the conditions of an Israeli independent director ("bilti taluy"). Two of our thirteen directors are external directors and satisfy the conditions of both Israeli independent directors and independent directors according to NASDAQ criteria. Two additional directors, (who are not external directors) satisfy the conditions of independent directors according to NASDAQ criteria, one of whom satisfies the conditions of an Israeli independent director. However, the requirement of NASDAQ Rule 5605(b), that a majority of the Board of Directors be comprised of independent directors, is thus not satisfied.

6C.6 BOARD COMMITTEES

The Company's Articles of Association provide that the Board of Directors may delegate its authorities or any part of them to committees of the Board of Directors as it deems appropriate, subject to the provisions of the Israeli Companies Law. Our Board of Directors has established an audit committee, a compensation committee and a security committee.

6C.6a AUDIT COMMITTEE

Pursuant to the rules of the Securities and Exchange Commission (the “SEC”) and the listing requirements of the NASDAQ Global Select Market, as a foreign private issuer, we are required to establish an audit committee consisting only of members who are U.S. “independent” directors as defined by SEC rules. In accordance with the Company’s Audit Committee Charter, our audit committee is responsible among other things, for overseeing the Company’s financial reporting process and the audits of the Company’s financial statements, including monitoring the integrity of the Company’s financial statements and the independence and performance of the Company’s internal and external auditors. Our audit committee is also directly responsible for the appointment, remuneration and oversight of our independent auditor and for establishing procedures for receiving and handling complaints received by the Company regarding accounting, internal controls and audit matters. The Audit Committee also assists the Board in conducting periodic reviews of the Company’s management of cyber risk.

The Israeli Companies Law requires public companies, including Partner, to appoint an audit committee comprised of at least three Board of Directors members, including all the company’s external directors, the majority of whom must be Israeli independent directors and the chairman of the audit committee is required to be an external director. Under the Israeli Companies Law neither the controlling party or his relative, the chairman of the Board of Directors, any director employed by the company or by its controlling party or by an entity controlled by the controlling party, any director who regularly provides services to the company, to its controlling party or to an entity controlled by the controlling party, nor any director who derives most of its income from the controlling party, may be eligible to serve as a member of the audit committee.

The responsibilities of our audit committee under the Israeli Companies Law include, among others, identifying irregularities in the management of the company’s business and approving related party transactions as required by law, determining whether certain related party actions and transactions are “material” or “extraordinary” in connection with their approval procedures (See 6C.9 APPROVAL OF RELATED PARTY TRANSACTIONS AND COMPENSATION), assessing the scope of work and remuneration of the company’s independent auditor, assessing the company’s internal audit system and the performance of its internal auditor and making arrangements regarding the handling of complaints by employees about company’s business management deficiencies and regarding the protection given to employees who have made complaints.

The Company’s audit committee was appointed by our Board of Directors to review our financial statements, in compliance with U.S. legal requirements (as described above) and in compliance with Israeli regulations (from which we are exempt).

Our audit committee is comprised of three Board of Directors members: Dr. Michael Anghel (external director), Mr. Barry Ben Zeev (committee chairman; external director), and Mr. Arik Steinberg (Israeli independent director). All of the audit committee members meet the SEC’s definition of independent directors for the purpose of serving as audit committee members as well as the Israeli Companies Law’s definition of Israeli independent directors. In accordance with the SEC definition of “independent” director, none of them is an affiliated person of Partner or any subsidiary of Partner.

The Board of Directors has determined that all three audit committee members are “audit committee financial experts” as defined by applicable SEC regulations. See “Item 16A Audit Committee Financial Expert” below.

6C.6b COMPENSATION COMMITTEE

The Israeli Companies Law requires public companies, including Partner, to appoint a compensation committee comprised of at least three Board of Directors members, including all the company’s external directors who must constitute the majority of its members. Other members of the committee should be directors whose terms of compensation are the same as external directors and the chairman of the compensation committee is required to be an

external director.

Under the Israeli Companies Law, the compensation committee's responsibilities include, among others, recommending to the Board of Directors, a compensation policy for office-holders to be approved by the shareholders of the Company, see "6B Compensation". The compensation committee also makes recommendations to the Board of Directors once every three years regarding the continuing effectiveness of the compensation policy, reviews modifications to the compensation policy from time to time and its implementation and approves the actual compensation terms of Office Holders which require the compensation committee's approval according to the relevant provisions of the Israeli Companies Law.

120

Our compensation committee is comprised of three Board of Directors members: Dr. Michael Anghel (external director), Mr. Barry Ben Zeev (committee chairman; external director) and Mr. Arik Steinberg (Israeli independent director). All of the compensation committee members meet the SEC's definition of independent directors for the purpose of serving as the compensation committee members as well as the Israeli Companies Law's definition of Israeli independent directors. In accordance with the SEC definition of "independent" director, none of them is an affiliated person of Partner or any subsidiary of Partner.

6C.6c SECURITY COMMITTEE

Pursuant to an amendment to our license from April 2005, a Board of Directors committee has been formed to deal with security matters. Only directors with the required clearance and those deemed appropriate by Israel's General Security Service may be members of this committee. The committee must consist of at least four members, who are subject to the clearance required from the Israeli General Security Service and at least one external director. Where any matter requires a Board of Directors' resolution and it is a security matter, then the committee should be authorized to discuss and to resolve such security matter and the resolution should bind the Company. However, in cases where the security matter concerned requires review by the Board of Directors or the audit committee according to the Israeli Companies Law or other applicable law, such as a transaction with a related party, it should be submitted for approval in accordance with the requirements of the applicable U.S. law, the Israeli Companies Law and any other applicable laws, provided that, in any case, only directors with security clearance can participate in any forum which will deal with security matters. In April 2005, our Board of Directors approved the formation of the security committee to consist of four Israeli directors, who are subject to Israeli security clearance and security compatibility to be determined by the General Security Service. Currently, Mr. Elon Shalev, Dr. Michael Anghel, Ms. Osnat Ronen and Mr. Arie Saban are members of the security committee.

6C.7 INTERNAL AUDITOR

The Israeli Companies Law requires the Board of Directors of a public company to appoint an internal auditor nominated by the audit committee. A person who does not satisfy certain independence requirements may not be appointed as an internal auditor. The role of the internal auditor is to examine, among other things, the compliance of the company's conduct with applicable law and orderly business procedures. Our internal auditor is Mr. Yehuda Motro, formerly the internal auditor of the Tel Aviv Stock Exchange.

6C.8 FIDUCIARY DUTIES OF AN OFFICE HOLDER

The Israeli Companies Law governs the duty of care and duty of loyalty which an Office Holder owes to the company. An "Office Holder" is defined in the Israeli Companies Law as a director, general manager, chief executive officer, executive vice president, vice president, or any other person assuming the responsibilities of any of the foregoing positions without regard to such person's title and other managers directly subordinated to the general manager.

The duty of loyalty requires the Office Holder to act in good faith and in the company's favor and to avoid any conflict of interest between the Office Holder's position in the company and personal affairs, and proscribes any competition with the company or the exploitation of any business opportunity of the company in order to receive personal advantages for him or others. This duty also requires him to reveal to the company any information or documents relating to the company's affairs that the Office Holder has received due to his position as an Office Holder. The duty of care requires an Office Holder to act in a way that a reasonable Office Holder would have acted in the same position and under the same circumstances. This includes the duty to utilize reasonable means to obtain information regarding the advisability of a given action submitted for his approval or performed by virtue of his position and all other relevant information.

6C.9 APPROVAL OF RELATED PARTY TRANSACTIONS AND COMPENSATION

6C.9a Approval of Related Party Transactions

The Israeli Companies Law requires that a transaction between the company and its Office Holder, and also a transaction between the company and another person in which an Office Holder has a personal interest, requires the approval of the Board of Directors if such a transaction is not an “extraordinary transaction”, although, as permitted by law and subject to any relevant stock exchange rule, our Articles of Association allow our audit committee to approve such a transaction, without the need for approval from the Board of Directors. If such a transaction is an extraordinary transaction (that is, a transaction not in the ordinary course of business, not on market terms, or that is likely to have a material impact on the company’s profitability, assets or liabilities), generally in addition to audit committee approval, the transaction also must be approved by our Board of Directors, and, in certain circumstances, also by the general meeting of shareholders. Under the Israeli Companies Law, an extraordinary transaction between a public company and a controlling party of the company or an extraordinary transaction between a public company and another person, in which the controlling party has a personal interest (including a private placement), and a transaction between a public company and a controlling party or his relative, directly or indirectly, including, without limitation, via an entity controlled by the controlling party, for receiving services by the company (and if the controlling party is also an Office Holder in the company for his terms of service, and if he is an employee of the company (but not an Office Holder in it) his employment in the company) must be approved by the audit committee or the compensation committee if relates to terms of employment (as the case may be), the Board of Directors and the general meeting of shareholders, provided that either: (a) the majority of votes in favor of the transaction shall include at least a majority of the votes of shareholders who do not have a personal interest in approval of the transaction, who participate in the voting, or (b) the total number of objecting votes of the shareholders mentioned in clause (a) does not exceed 2% of the total voting rights in the company.

The audit committee is also authorized to determine, with respect to related party transactions with a controlling shareholder or in which the controlling shareholder has a personal interest, even if they are not extraordinary transactions, an obligation to conduct a competitive process (to be supervised by the audit committee, or any person authorized on its behalf or via any other method approved by the audit committee) or to determine that other processes will be conducted prior to the engagement in such transactions and all in accordance with the type of transaction. The specific criteria for such a process may be determined by the audit committee annually in advance. In addition, the audit committee is authorized to determine the approval process for transactions that are not negligible, as well as determine which types of said transactions would require the approval of the audit committee. “Non-negligible transactions” are defined as related party transactions with a controlling shareholder or in which the controlling shareholder has a personal interest, that the audit committee has deemed not to be an extraordinary transaction, but which have also been classified by the audit committee as a non-negligible transaction. Additionally, the audit committee may decide on such classifications for these types of transactions, based on criteria set annually in advance.

The Israeli Companies Law requires that an Office Holder or a controlling party promptly disclose any personal interest that he has and all related material information known to him, in connection with any existing or proposed transaction by the company. The company may then approve the transaction in accordance with the provisions of its Articles of Association and the Israeli Companies Law. Under the Israeli Companies Law, if the Office Holder or a controlling party has a personal interest in the transaction, an approval that the transaction is in the best interest of the company is required.

In most circumstances, the Israeli Companies Law restricts Office Holders who have a personal interest in a matter which is considered at a meeting of the Board of Directors or the audit committee from being present at such meeting, participating in the discussions or voting on any such matter. An exemption exists in the event that a majority of the directors in the meeting have a personal interest in the matter provided, that in case a majority of the Board of Directors has a personal interest in the matter, the transaction will require the approval of the general meeting of shareholders.

For information concerning the direct and indirect personal interests of certain of our Office Holders and principal shareholders in certain transactions, see “ITEM 7 MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS”.

122

6C.9b Compensation

The terms of employment of Office Holders including compensation, equity awards, severance and other benefits, exemption from liability and indemnification require the approval of the compensation committee and the Board of Directors. The terms of employment of directors and the Chief Executive Officer must also be approved at the general meeting of shareholders by a majority of the Company's shareholders, provided that (i) such majority includes at least a majority of the shareholders who are not controlling shareholders and who do not have a personal interest in the matter, who participate in the voting (abstentions are disregarded), or (ii) the total number of objecting votes of the shareholders mentioned in clause (i) does not exceed 2% of the total voting rights in the company. Notwithstanding the foregoing, a company may be exempted from receiving shareholder approval with respect to the terms of employment of a candidate for a Chief Executive Officer position, if such candidate meets certain independence criteria, the terms are in line with the Compensation Policy and the compensation committee has determined for specified reasons that shareholder approval would prevent the engagement. See "6C.6b COMPENSATION COMMITTEE".

Changes to existing terms of employment of Office Holders (other than directors) can be made with the approval of the compensation committee only (following adoption of the Compensation Policy), if the committee determines that the change is not substantially different from the existing terms.

Under the Israeli Companies Law and related regulations, the compensation payable to external directors and Israeli independent directors is subject to certain further limitations.

6C.10 DUTIES OF A SHAREHOLDER

Under the Israeli Companies Law, a shareholder has a general duty to act in good faith and in a customary manner towards the company and the other shareholders and to refrain from improperly exploiting his power in the company, particularly when voting in the general meeting of shareholders on (a) any amendment to the articles of association, (b) an increase of the company's authorized share capital, (c) a merger, or (d) approval of related party transactions which require shareholder approval. A shareholder should also avoid deprivation of other shareholders. In addition, any controlling party, any shareholder who knows that it possesses power to determine the outcome of a shareholder vote and any shareholder that, pursuant to the provisions of the articles of association, has the power to appoint or prevent an appointment of an Office Holder in the company or any other power towards the company, is under a duty to act in fairness towards the company under the Israeli Companies Law.

6C.11 INDEMNIFICATION AND RELEASE

6C.11a Indemnification

As permitted by the Israeli Companies Law, our Articles of Association provide that Partner may indemnify an Office Holder of Partner to the fullest extent permitted by law.

Without derogating from the foregoing, and subject to limitations set forth in the Israeli Securities Law, our Articles of Association specifically provide that Partner may indemnify an Office Holder of Partner for liability or expense he incurs or that is imposed upon him as a result of an action or inaction by him (or together with other Office Holders of Partner) in his capacity as an Office Holder of Partner including (subject to specified conditions) also in advance, as follows:

Financial liability incurred by, or imposed upon the Office Holder in favor of another person in accordance with a judgment, including a judgment given in a settlement or a judgment of an arbitrator, approved by an authorized court;

2. Reasonable legal expenses, including attorney fees, incurred by the Office Holder or which he was ordered to pay by an authorized court in the context of a proceeding filed against him by Partner or on Partner's behalf or by a third party, in a criminal proceeding in which he was acquitted or in a criminal proceeding in which he was convicted of an offense which does not require criminal intent;

123

Reasonable legal expenses, including attorney fees, incurred by the Office Holder due to an investigation or proceeding conducted against him by an authority authorized to conduct such investigation or proceeding and which ended without filing of an indictment against him and without the imposition of a financial liability as a substitute for a criminal proceeding or that was ended without filing of an indictment against him but for which he was subject to a financial liability as a substitute for a criminal proceeding relating to an offense which does not require criminal intent, within the meaning of the relevant terms under the law or in connection with a financial sanction (“itzum kaspi”);

Payment to an injured party as a result of a violation set forth in Section 52.54(a)(1)(a) of the Israeli Securities Law, including by indemnification in advance or expenses incurred in connection with a proceeding (“halich”) under Chapters H3, H4 or I1 of the Israeli Securities Law, or under Chapter 4 of Part 9 of the Israeli Companies Law, in connection with any affairs, including reasonable legal expenses, which term includes attorney fees, including by indemnification in advance; and

Expenses, including reasonable legal fees, including attorney fees, incurred by an Office Holder with respect to a proceeding in accordance with the Restrictive Trade Practices Law- 1988 (“Restrictive Trade Practices Law”).

Our Articles of Association also permit us to indemnify any Office Holders of Partner for any other liability or expense in respect of which it is permitted or will be permitted under applicable law to indemnify an Office Holder of Partner.

The Israeli Companies Law and our Articles of Association also permit us to undertake in advance to indemnify an Office Holder with respect for items (2), (3) and (4) above, or any other matter permitted by law. The Israeli Companies Law and our Articles of Association also permit us to undertake in advance to indemnify an Office Holder with respect to item (1) above, provided however, that the undertaking to indemnify is restricted to events which in the opinion of the Board of Directors are anticipated in light of Partner’s activities at the time of granting the undertaking to indemnify, and is limited to a sum or measurement determined by the Board of Directors to be reasonable under the circumstances. The undertaking to indemnify shall specify the events that, in the opinion of the Board of Directors are expected in light of the Company’s actual activity at the time of grant of the undertaking and the sum or measurement which the Board of Directors determined to be reasonable under the circumstances.

The Israeli Companies Law combined with our Articles of Association also permits us to indemnify an Office Holder retroactively for all kinds of events, subject to any applicable law.

In no event may we indemnify an Office Holder for any of the following:

1. a breach of the duty of loyalty toward us, unless the Office Holder acted in good faith and had reasonable grounds to assume that the action would not harm Partner’s interest;
2. a breach of the duty of care done intentionally or recklessly (“pzizut”) other than if made only by negligence;
3. an act intended to unlawfully yield a personal profit;
4. a fine, a civil fine (“knas ezrahi”), a financial sanction (“itzum kaspi”) or a penalty (“kofer”) imposed on him; and
5. a proceeding (“halich”).

We have undertaken to indemnify our Office Holders, subject to certain conditions as aforesaid. We consider from time to time the indemnification of our Office Holders, which indemnification will be subject to approval of our compensation committee, Board of Directors and in certain cases, such as indemnification of directors and the CEO, also of our shareholders.

Under the indemnification letters granted to Office Holders prior to the extraordinary general meeting of shareholders held on October 17, 2013 (“October 2013 EGM”), the aggregate indemnification amount payable by us to Office Holders and other indemnified persons pursuant to all letters of indemnification issued to them by us will not exceed the higher of (i) 25% of shareholders equity and (ii) 25% of market capitalization, each measured at the time of indemnification (the “Combined Maximum Indemnity Amount”, and “the Original Indemnification Letter”).

Under the indemnification letters granted to Office Holders after the October 2013 EGM, the aggregate indemnification amount payable by us to Office Holders (including, among others, Office Holders nominated on behalf of Partner in subsidiaries) pursuant to all letters of indemnification issued or that may be issued to them by Partner on or after the October 2013 EGM, for any occurrence of an event set out in such a letter (including an attachment thereto) will not exceed 25% of shareholders equity (according to the latest reviewed or audited financial statements approved by Partner’s Board of Directors prior to approval of the indemnification payment) (“the Revised Indemnification Letter”). However, under the circumstances where indemnification for the same event is to be made in parallel under the Revised Indemnification Letter and to one or more indemnified persons under the Original Indemnification Letter, the maximum indemnity amount for the indemnified persons that received the Revised Indemnification Letter shall be adjusted so it does not exceed the Combined Maximum Indemnity Amount to which any other indemnified person is entitled under the Original Indemnification Letter.

6C.11b RELEASE

The Companies Law and our Articles of Association authorize the Company, subject to obtaining the required approvals (of our compensation committee, Board of Directors and in certain cases, such as release of directors and the CEO, also of our shareholders), to release our Office Holders, in advance, from such persons’ liability, entirely or partially, for damage in consequence of the breach of the duty of care toward us as set forth in accordance with any law, including the liabilities and expenses for which the Company may indemnify Office Holders as set forth above, see Item 6C.11a Indemnification. Furthermore, the Company may release Office Holders that are controlling shareholders or their relatives, subject to the receipt of the approvals in accordance with any law. Said release will not apply to a resolution or transaction in which the controlling shareholder or any Office Holder in the Company (including other Office Holders than the Office Holder being granted the release) has a personal interest.

Notwithstanding the foregoing, we may not release such person from such person’s liability, resulting from any of the following events: (i) the breach of duty of loyalty towards us; (ii) the breach of duty of care made intentionally or recklessly (“pzizut”), other than if made only by negligence; (iii) an act intended to unlawfully yield a personal profit; (iv) a fine (“knass”), a civil fine (“knass ezrahi”), a financial sanction (“itzum caspi”) or a penalty (“kofer”) imposed upon such person; and (v) the breach of duty of care in a distribution (“haluka”).

In addition to the Original Indemnification Letter and the Revised Indemnification Letter, the Company granted new indemnification and release letters to our Office Holders at the annual general meeting of shareholders held on September 28, 2016.

6C.12 INSURANCE

The Israeli Companies Law and the Company’s Articles of Association authorize the Company (subject to certain exceptions) to enter into an insurance contract, and to arrange and pay all premiums in respect of an insurance contract, for the insurance of the liability of our Office Holders for liabilities the Office Holder incurs as a result of a direct or indirect action or inaction undertaken by such person (or together with other Office Holders of the Company)

in his capacity as an Office Holder of the Company for any of the following:

(1) The breach of the duty of care towards the Company or towards any other person;

125

(2) The breach of the duty of loyalty towards the Company provided that the Office Holder has acted in good faith and had reasonable grounds to assume that the action would not harm the Company;

(3) A financial liability imposed on him in favor of another person;

(4) A payment which the office holder is obligated to pay to an injured party as set forth in section 52.54(a)(1)(a) of the Securities Law and expenses that the Office Holder incurred in connection with a proceeding under Chapters H3, H4 or I1 of the Securities Law, or under Chapter 4 of Part 9 of the Israeli Companies Law, in connection with any affairs, including reasonable legal expenses, which term includes attorney fees.

(5) Expenses, including reasonable legal expenses fees, including attorney fees, incurred by the Office Holder with respect to a proceeding in accordance with the Restrictive Trade Practices Law.

(6) Any other matter in respect of which it is permitted or will be permitted under any law to insure the liability of an Office Holder in the Company.

6D. Employees

At December 31, 2017, we had 2,797 employees on a full time equivalent basis, compared with 2,686 employees at December 31, 2016, and 2,882 at December 31, 2015. The number of full-time equivalent employees at year-end 2014, 2015 and 2016, according to their activity, was as follows:

	At December 31,		
	2015**	2016**	2017
Customer service*	1,656	1,462	1,567
Sales and sales support*	434	457	488
Information technology (including Engineering)	369	341	349
Marketing and Content	49	47	44
Finance	83	85	80
Human Resources, Administration & Security	96	94	86
Operations & Logistics	134	133	127
Remaining operations	61	67	56
TOTAL	2,882	2,686	2,797

*Many positions in Customer service and Sales and sales support are filled by more than one part-time employee so that the employee headcount for those activities is about 12% greater than the number of full-time equivalents set forth above.

** Due to organizational structure changes during 2017, that included consolidation of certain divisions and the shifting of manpower between divisions, we have revised the 2015 and 2016 numbers to provide comparable information between the years 2015-2017.

In 2017, the Company added significant fiber and television activities, including in-house technicians, service and sales representatives, which caused an increase in the overall number.

On March 13, 2016, we signed a collective employment agreement with the employees' representatives and the Histadrut, the employees' union. The agreement includes an organizational chapter that is for a period of three years (2016-2018) and includes, among others, provisions regarding manning and changing of positions, termination of employment tenure and a dispute resolution mechanism. The agreement includes an economic chapter that was valid until December 31, 2016 and on December 12, 2016 we signed a new economic chapter that is valid for the years

2017-2018. The economic chapter includes, among others, provisions regarding terms of employment, benefits and welfare. In addition, the economic chapter provides for annual bonuses to employees and a profit sharing mechanism provision under certain conditions. The agreement applies to the Company's employees, excluding certain managerial and specific positions. The collective employment agreement also refers to the participation of employees in the Company's profits and regulates the eligibility conditions for receipt of these awards for the years 2017-2018. See also "Item 3D.2h The unionization of our employees has negatively affected and may continue to negatively affect our financial results. "

In addition, we are subject to various Israeli labor laws and practices, as well as orders extending certain provisions of collective bargaining agreements between the Histadrut and the Coordinating Bureau of Economic Organizations, the federation of employers' organizations. Such laws, agreements and orders cover a wide range of areas and impose minimum employment standards including, working hours, minimum wages, vacation and severance pay, and special issues, such as equal pay for equal work, equal opportunity in employment, and employment of women, youth, disabled persons and army veterans.

Our employees are entitled to a pension insurance, in the amounts as follows (amounts vary according to choice of a pension fund or a manager's insurance fund): employer provision for pension and compensation: 12.5% - 17.33% of the employee's salary and employee provision for pension: 6% -7% of the employee's salary.

We also offer some of our employees the opportunity to participate in a "Continuing Education Fund," which also functions as a savings plan. Each of the participating employees contributes an amount equal to 2.5% of their salary and we contribute between 5% - 7.5% of such employee's salary. In addition, in accordance with the collective employment agreement, employees that have been employed for 36 months or more by the Company are entitled to participate in a "Continuing Education Fund," by contributing an amount equal to 2.5% of their salary and we contribute 7.5% of such employee's salary.

According to the National Insurance Law, Israeli employers and employees are required to pay predetermined sums to the National Insurance Institute. These contributions entitle the employees to health insurance and benefits in periods of unemployment, work injury, maternity leave, disability, reserve military service, and bankruptcy or winding-up of the employer. We believe that our relations with our employees are good.

Most of our employees participate in a Health Insurance Program which provides additional benefits and coverage which the public health system does not provide. Eligibility to participate in the policy does not depend on seniority or position.

Israeli labor law subjects employers to increased liability, including monetary sanctions and criminal liability, in cases of violations of certain labor laws and certain violations by contractors providing maintenance, security and cleaning services.

In January 2015, the Minimum Wage Law was amended to increase the minimum wage paid to employees in Israel in four installments, from April 2015 to December 2017.

6E. Share Ownership

6E.1 SHARE OWNERSHIP OF DIRECTORS AND SENIOR MANAGEMENT

As of March 1, 2018, to the best of the Company's knowledge, none of our directors or senior management held more than 1% of our issued and outstanding ordinary shares. Directors and senior management do not have different voting rights than other shareholders of the Company.

As of March 1, 2018, our senior management held, in the aggregate, outstanding options to purchase up to 2,646,745 of our ordinary shares, of which 1,115,807 options were vested and exercisable as of that date, in addition to 480,661 "restricted shares" of which 59,394 restricted shares were vested as of that date (as described in "Item 6E.2 Equity Incentive Plan" below). No individual senior manager holds options to purchase 1% or more of our outstanding ordinary shares. No options or restricted shares have been granted to our directors.

The table below sets forth the number of outstanding options held by our senior management of the Company according to exercise price and expiration date as of March 1, 2018:

Weighted average exercise price (NIS)	Number of outstanding options held	Option expiration Year
47.97	305,370	2020
17.90	1,550,877	2021
18.71	224,183	2022
19.28	320,428	2023
19.11	245,887	2024
21.71	2,646,745	TOTAL

6E.2 EQUITY INCENTIVE PLAN

The Amended and Restated 2004 Equity Incentive Plan (formerly known as the 2004 Equity Incentive Plan) (the “Plan”) is intended to promote the interests of the Company and its shareholders by providing employees, directors, officers and advisors of the Company with appropriate incentives and rewards to encourage them to enter into and continue in the employ of, or service to, the Company and to acquire a proprietary interest in the long-term success of the Company.

The Plan’s principal terms include:

Exercise price determination. The compensation committee shall determine the option and restricted share unit (“RSU”) (as further explained below) exercise price per ordinary share, subject to applicable law, regulations and guidelines. Unless otherwise provided in the grant instrument, the option exercise price shall be paid in NIS and the RSU exercise price shall be zero.

Exercise price adjustment. The exercise price of options shall be reduced in the following events: (1) dividend distribution other than in the ordinary course: by the gross dividend amount so distributed per share, and (2) dividend distribution in the ordinary course: With respect to certain options (depending on the date of the granting of the options), the exercise price shall be reduced by the amount of a dividend in excess of 40% of the Company’s net income for the relevant period per share, or else by the gross dividend amount so distributed per share.

Cashless exercise. Most of the options may be exercised only through a cashless exercise procedure; while holders of other options may choose between cashless exercise and the regular option exercise procedure. In accordance with such cashless exercise, the option holder would receive from the Company, without payment of the exercise price, only the number of shares whose aggregate market value equals the economic gain which the option holder would have realized by selling all the shares purchased at their market price, net of the option exercise. Unless otherwise determined by the committee in the grant instrument, the Company at its sole and absolute discretion may obligate the grantee to pay the nominal value of the ordinary shares issued and in such event the ordinary shares will not be issued (and the options and RSUs will not be exercised) prior to the payment of such nominal value.

Exercise Period. The option holder may exercise all or part of his options at any time after the date of vesting but no later than the expiration of the exercise period, which will not exceed ten years from the date of option grant (considering, if applicable, among others, the provisions of the Compensation Policy) unless shortened pursuant to the terms of the Plan.

Vesting. The vesting schedule of granted securities will be determined by the compensation committee and Board of Directors at their sole discretion and will be detailed in the grant instrument. The committee may set performance targets as a vesting criterion (independently or in combination with other criteria).

Acceleration of vesting and adjustment. In the event of termination of employment following a change of control, vesting of granted securities and exercisability of outstanding granted securities shall be accelerated. Upon the occurrence of any merger, consolidation, reorganization or similar event or transaction (e.g., subdivision or consolidation), equitable changes or adjustments to the number of shares subject to each outstanding option and RSU will be made in order to prevent dilution or enlargement of the option and RSU holders' rights and appropriate adjustments shall be made in the number and other pertinent elements of any outstanding restricted shares, with respect to which restrictions have not yet lapsed prior to any such change.

Restricted Shares. The Company may grant "restricted shares" to beneficiaries of the Plan. Restricted shares awarded to a grantee are held by the Plan's trustee in custody for the benefit of the grantee generally until the restrictions thereon have lapsed (e.g., earning period and the other applicable conditions and restrictions under the Plan and the grant instrument under which these restricted shares were awarded). In accordance with the Plan, as long as the restricted shares are held by the trustee, the trustee shall not exercise the voting rights of the underlying ordinary shares at the general meetings of shareholders unless requested to do so by the Company. In such event, the trustee shall vote the underlying ordinary shares proportionally to the shareholders vote and if the vote of public shareholders is counted separately, proportionally to the public shareholders vote. Notwithstanding the foregoing, the Company has reserved the right, upon recommendation of legal counsel, to request the grantee to exercise individually his or her voting rights. In addition, any dividend distributed during the period in which the restricted shares are held by the trustee, is accumulated and transferred to the grantee when the shares have been earned (i.e. when the restrictions lapse).

Except as provided in the immediately preceding paragraph and in the Plan and subject to the terms of the grantee's relevant grant instrument, the grantee shall have, with respect to his or her restricted shares, all of the rights of a shareholder of the Company, including the right to vote the ordinary shares (endorsed to the trustee as long as the restricted shares are held by the trustee), and the right to receive any dividend thereon (accumulated together with the underlying restricted shares).

Restricted Share Units. The Company may grant "restricted share units" to beneficiaries of the Plan. Restricted share units are options, bearing an exercise price of no more than the underlying share's nominal value. Upon the lapse of the vesting period of a RSU, such RSU shall automatically become an issued and outstanding share of the Company, subject to certain applicable conditions and restrictions under the Plan and the grant instrument and unless otherwise determined by the Board of Directors, the grantee shall pay to the Company its nominal value as a precondition to the issuance of such share.

Change in Control and other certain events. Upon a Change in Control (as defined in the Plan) transaction of the Company as well as other certain events including a merger, reorganization and consolidation, granted securities shall, at the sole and absolute discretion of the Board of Directors, either solely or in any combination: be substituted for similar granted securities to purchase shares of a successor entity, be assumed by a successor entity, be substituted for similar "phantom" granted securities of the Company or the successor entity, or each non-vested granted securities shall become fully exercisable. In the event that the ordinary shares will no longer be traded on any stock exchange, at the sole and absolute discretion of the Board of Directors, either solely or in any combination: each granted securities shall be substituted for a similar phantom granted securities, or each non-vested granted securities shall become fully exercisable.

Amendment and termination of the Plan. The Plan may generally be altered or amended in any respect by a resolution of the Board of Directors of the Company, subject to the Plan, applicable law and the rules and regulations of any stock exchange applicable from time to time to the Company, by reason of their applicability to its shareholders or otherwise. The Board of Directors may, at any time and from time to time, terminate the Plan in any respect, subject to

any applicable approvals or consents that may be otherwise required by law, regulation or agreement, including by reason of their applicability to the shareholders or otherwise, and provided that no termination of the Plan shall adversely affect the terms of any granted security which has already been granted.

Administration of the Plan. The Plan is administered by the compensation committee of the Board of Directors. Subject to the restrictions of the Companies Law, the compensation committee is authorized, among other things, to exercise all the powers and authorities, either specifically granted to it under the Plan or necessary or advisable for the administration of the Plan.

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

The description of the Plan above is only a summary and is qualified by reference to the full text thereof which has been included as an annex to this annual report. See Exhibit 15.(a).1 incorporated by reference in this annual report.

On November 10, 2015, the Company's Board of Directors approved the increase in the number of shares which may be granted under the Plan by three million shares, which represented approximately 1.87% of the Company's issued share capital as of November 10, 2015, up to a total of 22,917,000 ordinary shares.

On March 13, 2016, the Board of Directors approved certain amendments to the Plan. The main amendments to the Plan include: (a) amendment to the cashless exercise formula; (b) the ability to allocate restricted share units to the Company's employees and office holders; (c) automatic extension of the exercise period due to black-out periods; (d) adjustments to the grantee's rights under any granted securities due to the occurrence of certain events, including a rights offering; (e) a provision allowing the Company's management bodies to decide to pay a grantee the financial benefit embedded in his equity compensation in cash compensation instead of equity compensation, in certain events in which the Company is unable to issue shares resulting from exercise of options or RSUs or to release any restricted share to a grantee; (f) extension of the exercise period as a result of a change of control event; (g) a provision that allows the Company to limit a grantee from making transactions in the granted securities in connection with any underwritten public offering of the Company and (h) certain exercise restrictions in accordance with the Tel Aviv stock exchange rules. Share options and restricted shares (collectively, "granted securities") have been granted to employees in accordance with the Plan. The total number of Company shares reserved for issuance upon exercise of all options granted and for earning of all restricted shares granted under the Plan was 22,917,000 shares. Upon exercise each option provides the right to acquire one ordinary share that confers the same rights as the other ordinary shares of the Company. As of December 31, 2017, options to acquire a total of 8,708,483 ordinary shares and 1,344,297 restricted shares are outstanding.

In June 2017, the Company issued 10,178,211 shares of the Company, of which 508,911 shares were issued as Israeli founding shareholder shares. The total net consideration received was approximately NIS 190 million.

On December 26, 2017, the Company's Board of Directors approved the increase in the number of shares which may be granted under the Plan by three million shares, which represented approximately 1.75% of the Company's issued share capital as of December 26, 2017, up to a total of 25,917,000 ordinary shares.

In 2017, following the approval of the Company's Board of Directors, 1,201,358 share options and 507,146 restricted shares were granted to senior officers, managers and other employees of the Company and its subsidiary, compared to 998,433 share options and 417,176 restricted shares granted during 2016. The vesting of the options and the earning of the restricted shares granted after June 2014 are subject to vesting or restriction periods and are also subject to performance conditions set by the Company's organs.

During 2018 and until March 1, 2018, the Company approved the allocation of 245,887 options and 79,118 restricted shares for one of the Company's office holders, all in accordance with the Company's Equity Incentive Plan, as amended. The vesting of these options and the earning of these restricted shares are subject to vesting / restriction period of three years from the grant date (one third will vest or be earned in each year), as well as performance conditions set by the Company's organs.

Information in respect of options and restricted shares granted under the Plan is set forth below:

	Through December 31, 2017	
	Number of options	Number of RSAs ¹
Granted	31,304,207	4,298,768
Shares issued upon exercises and vesting	(6,430,589)	(1,617,518)

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

Cancelled upon net exercises, expiration and forfeitures	(16,165,135)	(1,336,953)
Outstanding	8,708,483	1,344,297
Of which:		
Exercisable	5,190,586	26,556
Vest in 2018	2,502,089	891,309
Vest in 2019	667,254	280,115
Vest in 2020	348,554	146,317

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

7A. Major Shareholders

The following table sets forth certain information as of March 1, 2018, with respect to each person whom we believe to be the beneficial owner of 5% or more of our ordinary shares. Except where otherwise indicated, we believe, based on information publicly filed with the Securities and Exchange Commission or furnished to us by the principal shareholders, that the beneficial owners of the ordinary shares listed below have sole investment and voting power with respect to such ordinary shares. None of our major shareholders has any different voting rights than any other shareholder. See “Item 10B.3 Rights Attached to Shares”.

Name	Shares beneficially owned	Issued Shares (1)%	Issued and Outstanding Shares (1)%
S.B. Israel Telecom Ltd.(2)	49,862,800	29.14	29.37
Phoenix-Excellence Group (3)	11,692,098	6.83	6.89
Meitav Dash Group (4)	9,125,745	5.33	5.38
Psagot Investment House Ltd. (5)	16,259,246	9.50	9.58
Treasury shares (6)	1,335,003	0.78	-
Public (7)	82,820,847	48.41	48.79
Total	171,095,739	100.00	100.00

(1) As shown above and used throughout this annual report, the term “Issued and Outstanding Shares” does not include any treasury shares held by the Company. Treasury shares, which are included in “Issued Shares”, have no voting, dividend or other rights under the Israeli Companies Law, as long as they are held by the Company (“dormant shares”).

(2) S.B. Israel Telecom, an affiliate of Saban Capital Group, a private investment firm, based in Los Angeles, California, specializing in the media, entertainment and communications industries held on March 1, 2018, approximately 29.37% of our Issued and Outstanding shares and voting rights. S.B. Israel Telecom also purchased from Scailex Corporation Ltd. (“Scailex”) (which in 2016 changed its name to “Suny Cellular Communication Ltd.”) 2,983,333 ordinary shares representing another, approximately 1.76% of our Issued and Outstanding shares and voting rights, which shares are to be transferred by Scailex to S.B. Israel Telecom free and clear of any lien on one or more future deferred closing dates, subject to the conditions set forth in the share purchase agreement entered into between Scailex and S.B. Israel Telecom.

(3) Phoenix Holdings Ltd., an Israeli corporation listed on the Tel Aviv Stock Exchange (“Phoenix”), and Excellence Investments Ltd., an Israeli corporation listed on the Tel Aviv Stock Exchange (“Excellence”), which is controlled by Phoenix, hold shares in the Company directly and through its wholly owned subsidiaries. (Phoenix, Excellence and their subsidiaries collectively, the “Phoenix-Excellence Group”). These holdings are held according to the following segmentation: 1,309,248 ordinary shares are held by Provident funds and Management Companies of Provident funds; 467,618 ordinary shares are held by Excellence Trust Funds; 784,501 ordinary shares are held by Excellence ETFs; 554,050 ordinary shares are held by Phoenix "Nostro" accounts; 21,000 ordinary shares are held by Phoenix Pension funds; 98,666 ordinary shares are held by Linked insurance policies of Phoenix; 6,957,483 ordinary shares are held by Partnership for Israeli shares; 499,532 ordinary shares are held by Partnership for investing in the TA 100. 1,935,000 shares of the 11,692,098 shares held by the Phoenix-Excellence Group, representing approximately 1.14% of our Issued and Outstanding shares and total voting rights, are registered in the Company’s Shareholders Register as part of the shares held by Israeli founding shareholders from among our founding shareholders and their approved substitutes.

(4)

Meitav Dash Investments Ltd., an Israeli corporation listed on the Tel Aviv Stock Exchange, holds shares in the Company directly and through its wholly owned subsidiaries (Meitav Dash and their subsidiaries collectively, the “Meitav Dash Group”). These holdings are held according to the following segmentation: 5,403,195 ordinary shares are held by Meitav Dash Provident funds; 1,749,613 ordinary shares are held by Meitav DS Mutual Funds; 1,972,937 ordinary shares are held by Meitav Dash ETFs. 805,000 shares of the 9,125,745 shares held by the Meitav Dash Group, representing approximately 0.47% of our Issued and Outstanding shares and total voting rights, are registered in the Company’s Shareholders Register as part of the shares held by Israeli founding shareholders from among our founding shareholders and their approved substitutes.

(5) Psagot Investment House Ltd., an Israeli corporation listed on the Tel Aviv Stock Exchange, holds shares in the Company directly and through its wholly owned subsidiaries (Psagot Investment House and their subsidiaries collectively, the “Psagot Investment House”). In accordance with Schedule 13G filed by Psagot Investment House on February 12, 2018, and in accordance with an update received by the Company from Psagot Investment House on March 7, 2018, these holdings are held according to the following segmentation: 5,444,188 ordinary shares are held by portfolio accounts managed by Psagot Securities Ltd.; 7,470,372 ordinary shares are held by Psagot Provident and Pension funds; 1,550,515 ordinary shares are held by Psagot Mutual Funds; 1,738,012 ordinary shares are held by Psagot ETFs ; 56,160 ordinary shares are held by Psagot Insurance.

(6) Treasury shares do not have a right to dividends or to vote. During 2008, the Company purchased 4,467,990 shares a part of a buy-back plan. As of March 1, 2018, the Company has allocated under the Company's 2004 Amended and Restated Equity Incentive Plan, 1,507,251 restricted shares from the treasury shares to a trustee on behalf of the Company's employees. See "Item 6E.2 EQUITY INCENTIVE PLAN".

(7) The shares under "Public" include 5,826,623 shares held by Israeli founding shareholders from among our founding shareholders and their approved substitutes. These shares, together with 1,935,000 shares held by the Phoenix-Excellence Group and 805,000 shares held by the Meitav Dash Group, represent approximately 5.01% of our issued shares (approximately 5.05% of the Issued and Outstanding Shares). Under the terms of our mobile telephone license, the Israeli founding shareholders from among our founding shareholders and their approved substitutes must hold at least 5% of our issued and outstanding share capital and of each of our means of control. The Israeli founding shareholders must meet the requirements of "Israeli entities" which are defined as individuals who are citizens and residents of Israel and entities formed in Israel and controlled, directly or indirectly, by individuals who are citizens and residents of Israel, provided that indirect control is only through entities formed in Israel, unless otherwise approved by the Minister of Communications.

As of March 1, 2018, to the best of the Company's knowledge, none of our directors and senior management held more than 1% of our outstanding ordinary shares; their holdings have been included under "Public" in the table above. For information regarding options held by our senior management to purchase ordinary shares, see "6E- Share Ownership".

We are not aware of any arrangements that might result in a change in control of our Company.

7A.1 OTHER

On March 1, 2018, 5,418,022 ADSs (equivalent to 5,418,022 ordinary shares) or approximately 3.19% of our total Issued and Outstanding ordinary shares, were held of record by 34 registered holders in the United States. There were 4 registered holder accounts of the 34 with registered addresses outside of the United States. Certain accounts of record with registered addresses other than in the United States may hold our ordinary shares, in whole or in part, beneficially for United States persons. We are aware that many ADSs and ordinary shares are held of record by brokers and other nominees and accordingly the above numbers are not necessarily representative of the actual number of persons who are beneficial holders of ADSs and ordinary shares, or the number of ADSs and ordinary shares beneficially held by such persons.

7B. Related Party Transactions

7B.1 RELATIONSHIP AGREEMENT

Our Israeli founding shareholders are parties to a Relationship Agreement with S.B. Israel Telecom in relation to its direct holdings of our shares and the rights associated with such holdings. See Exhibit 4.(a).1.2 incorporated by reference in this annual report.

License Conditions: Required Minimum Israeli and Founding Shareholder Percentages

The parties to the Relationship Agreement have agreed that they shall at all times comply with the terms of our license requiring that our founding shareholders or their approved substitutes hold in aggregate at least 26% of our means of control, and that our Israeli founding shareholders or their approved substitutes (from among the founding shareholders and their approved substitutes) hold at least 5% of our means of control. See "Item 4B.12f Our Mobile Telephone License."

Compulsory Transfer in the Event of Default

If a party to the Relationship Agreement commits certain events of default described in the agreement, it may be required to offer its shares to the other parties on a pre-emptive basis. Events of default for this purpose include a breach of the Relationship Agreement which has a material adverse effect on Partner, and in the case of such breach, the purchase price at which the shares are to be sold will be market value less a 17.5% discount.

Term and Termination

The Relationship Agreement continues in full force and effect until we are wound up or cease to exist unless terminated earlier by the parties. The Relationship Agreement will terminate in relation to any individual party after it ceases to hold any share beneficially if it is required to comply with the minimum holding requirements for founding shareholders or Israeli founding shareholders, as applicable, and the transfer of the shares was not made in breach of the Relationship Agreement.

Related agreement among Israeli founding shareholders

A shareholders agreement among the Israeli founding shareholders, or their approved substitutes, purports to establish the procedures, rights and obligations with respect to the appointment of the Israeli director. The Company's position, which is based among others upon a legal opinion from outside counsel, is that the arrangement set in this agreement with respect to the procedures, rights and obligations pertaining to the appointment of the Israeli director is not valid and the Company does not give effect to that arrangement and it acts according to the provision of its license and Articles of Association in connection with the appointment of the Israeli director. In November 2014, the agreement was amended and among other things, Israeli founding shareholders were removed from the Shareholders Agreement, leaving only Scailex (whose shares in the Company that constitute the holdings of Israeli founding shareholders are controlled by a court appointed receiver in light of Scailex's failure to comply with its obligations to its noteholders for the benefit of Scailex's noteholders) and Suny Electronics Ltd. (whose shares in the Company are mortgaged to a trustee on behalf of Suny's noteholders and constitute part of the holdings of Israeli founding shareholders) as parties to the Shareholders Agreement.

7B.2 REGISTRATION RIGHTS

On October 17, 2013, following approval of our general meeting of shareholders, we have entered into a registration rights agreement with S.B. Israel Telecom, our principal shareholder, in which we granted S.B. Israel Telecom:

(1) the right to require us to register ordinary shares held by them under the US Securities Act and to freely dispose of their shares in the U.S. public market. We have agreed that, upon request from S.B. Israel Telecom, we will file a registration statement under the US Securities Act to register ordinary shares held by them, subject to a maximum of one request in any 6-month period and to certain other limitations. There is no limit to the number of registrations that can be requested under the registration rights agreement. The minimum amount of shares that must be included in any registration requested under the registration rights agreement is 2.65% of our outstanding shares.

(2) the right to include their ordinary shares in any registration statement covering offerings of ordinary shares by us.

The registration rights agreement will terminate upon the earlier of October 16, 2018, and such time as the holder can sell its ordinary shares into the United States public market pursuant to an exemption from the registration requirements of the Securities Act without regard to holding period, volume or manner-of-sale limitations.

7B.3 TRANSACTIONS WITH PHI

Pursuant to the Network Sharing Agreement between the Company and the limited partnership PHI, the Company has transactions during the normal course of business with PHI. See "Item 4B.8a Overview- cellular network sharing", "Item 5B.4 Total net financial debt " and also note 26(d) to the consolidated financial statements.

133

7C. Interests of Experts and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

8A. Consolidated Financial Statements and Other Financial Information

Audited financial statements for the three fiscal years ended December 31, 2017, are included under “Item 18. Financial Statements.”

8A.1 LEGAL AND ADMINISTRATIVE PROCEEDINGS

In addition to the legal proceedings discussed below, we are party to a number of legal and administrative proceedings arising in the ordinary course of our business. We do not currently expect the outcome of such matters individually or in the aggregate to have a material adverse effect upon our business and financial condition, results of operations and cash flows.

We have been named as defendants in a number of civil and criminal proceedings related to our network infrastructure and consumer claims regarding, for example, our tariff plans and billing methods, which may result in civil liabilities or criminal penalties against us or our officers and directors. Plaintiffs in some of these proceedings have successfully sought or are seeking certification as class actions. The costs that may result from these lawsuits are only accrued for when it is more likely than not that a liability, resulting from past events, will be incurred and the amount of that liability can be quantified or estimated within a reasonable range. The amount of the provisions recorded is based on a case-by-case assessment of the risk level, and events arising during the course of legal proceedings may require a reassessment of this risk. The Company’s assessment of risk is based both on the advice of counsel and on the Company’s estimate of the probable settlement amounts that are expected to be incurred, if such settlements are agreed by both parties. See note 20 to the consolidated financial statements for further information regarding litigation and proceedings of which we are currently aware. See also “Item 3D.2p We are exposed to, and currently engaged in, a variety of legal proceedings, including requests to approve lawsuits as class actions related primarily to our network infrastructure and consumer claims.”

The litigations described below involve claims for which requests for certification as class actions were filed and which specify an amount of damages, and which we consider may have a potentially material effect on the Company. The total amount of pending claims (claims which have not been dismissed by the Court or settled) made by plaintiffs in the litigations described below is NIS 2.18 billion.

On September 7, 2010, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that the Company unlawfully charges its customers for services of various content providers, which are sent through text messages (SMS). The total amount claimed from the Company was estimated by the plaintiffs to be approximately NIS 405 million. The claim was certified as a class action in 1. December 2016. In February 2017, the plaintiffs filed an appeal to the Supreme Court, regarding the definition of the group of customers. Partner estimates that even if the claim will be decided in favor of the approved group of customers (as defined by the District Court), the damages that Partner will be required to pay for, will be immaterial.

2. On July 15, 2014, a claim and a motion to certify the claim as a class action were filed against the Company and against additional cellular operators and content providers. The claim alleges that the cellular operators, including the Company, breached legal provisions and provisions of their licenses and thereby created a platform that led to the customers’ damages alleged in the claim. The total amount claimed against all of the defendants is estimated by the plaintiff to be approximately NIS 300 million. The claim is still in its

preliminary stage of the motion to be certified as a class action.

134

3. On November 12, 2015, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner required their customers to purchase a router and/or a call adaptor and/or terminal equipment as a condition for using its fixed-line telephony services, an action which would not be in accordance with the provisions of its licenses. The total amount claimed against Partner is estimated by the plaintiff to be approximately NIS 116 million. The claim is still in its preliminary stage of the motion to be certified as a class action.

4. On November 12, 2015, a claim and a motion to certify the claim as a class action were filed against 012 Smile. The claim alleges that 012 Smile required their customers to purchase a router and/or a call adaptor and/or terminal equipment as a condition for using its fixed-line telephony services, an action which would not be in accordance with the provisions of its licenses. The total amount claimed against 012 Smile is estimated by the plaintiff to be approximately NIS 64 million. The claim is still in its preliminary stage of the motion to be certified as a class action.

5. On January 4, 2016, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner charges its customers the full price of telecommunication packages that are intended for use abroad despite the fact that the packages are not fully utilized and does not allow customers to transfer the balance to the next trip abroad or to receive a credit for the balance. The total amount claimed against Partner is estimated by the plaintiff to be approximately NIS 234 million. The claim is still in its preliminary stage of the motion to be certified as a class action.

6. On April 2, 2017, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges among others, that Partner overcharges its customers without their consent for services that they did not order and does not respond to customers that apply in writing regarding the overcharge contrary to its license. The total amount claimed against Partner is estimated by the plaintiff to be approximately NIS 60 million. The claim is still in its preliminary stage of the motion to be certified as a class action.

7. On October 24, 2017, a claim and a motion to certify the claim as a class action were filed against the Company and another cellular operator. The claim alleges that Partner harms the privacy of its customers by unlawfully using their location data. The total amount claimed against Partner is estimated by the plaintiff to be approximately NIS 1 billion. The claim is still in its preliminary stage of the motion to be certified as a class action.

With respect to the following claims which totaled an amount of NIS 843 million, claims totaling NIS 250 million have been dismissed. With regards to the remaining claims, the Company has reached settlement agreements (as noted below, some settlement agreements are still subject to Court approval) and the Company does not believe that they will have a material adverse effect on the Company individually or in the aggregate.

1. On April 12, 2010, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleged that the Company charged its customers for certain content services without their consent. The total amount claimed from the Company was estimated by the plaintiffs to be approximately NIS 343 million. In March 2016, the parties filed a request to approve a settlement agreement and are waiting for the Court's decision.

2. On November 13, 2013, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleged that the Company increased tariffs for its customers not in accordance with their agreements. The total amount claimed from Partner was estimated by the plaintiff to be NIS 150 million. The parties filed a settlement agreement in October 2015 which was approved by the Court in November 2017.

3. On March 24, 2014, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleged that the Company did not include in the severance pay calculation for its employees various components that constitute an addition to the salary for the severance pay calculation and thereby acted

unlawfully. The total amount claimed from Partner was estimated by the plaintiff to be approximately NIS 100 million. In November 2015, the plaintiff filed an amended claim and a motion to certify the claim as a class action. In November 2017, the parties filed a revised settlement agreement and waiting for the Court's decision.

On September 7, 2015, a claim and a motion to certify the claim as a class action were filed against the Company and 012 Smile. The claim alleges that Partner and 012 Smile overcharge its customers according to a special tariff for overseas call destinations that are defined by the Company as special tariff destinations despite the fact

4. that they are fixed-line destinations. The total amount claimed against Partner and 012 Smile if the lawsuit is certified as a class action was not stated by the plaintiff. In April 2017, the parties filed an agreed upon withdrawal request which was approved by the Court.

On September 11, 2016, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner automatically charges its customers that use the maximum volume of

5. their data packages, for additional data volume, without their consent. The total amount claimed against Partner is estimated by the plaintiff to be approximately NIS 250 million. In August 2017, the Court dismissed the claim.

The litigations described below involve claims for which requests for certification as class actions were filed and which do not claim any specific amount of damages. Based on its best judgment of the merits or lack thereof of the class actions described below, the likely range of damages which may be involved, and any provisions made in respect thereof in the Company's balance sheet, the Company does not currently believe that the outcome of these class actions, individually or in the aggregate, will have a material negative effect on its financial situation.

On July 14, 2010, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner is breaching its contractual and/or legal obligation and/or is acting negligently by charging V.A.T for roaming services that are consumed abroad. The plaintiff demands to return the total amount of V.A.T that was charged by Partner for roaming services that were consumed abroad. The plaintiff also pursued

1. an injunction that will order Partner to stop charging V.A.T for roaming services that are consumed abroad. In August 2014, the claim was dismissed and in October 2014, the plaintiff filed an appeal with the Supreme Court. The hearing was held in May 2016 before an expanded panel of seven judges and the parties are waiting for the Court's decision.

On August 8, 2012, a claim and a motion to certify the claim as a class action were filed against 012 Smile and another Internet Service Provider. The claim alleges that the defendants breached certain provisions of their licenses by not offering their services at a unified tariff to all customers. The total amount claimed against 012

2. Smile, if the lawsuit is certified as a class action, was not stated by the plaintiff. The claim is still in its preliminary stage of the motion to be certified as a class action.

On May 6, 2015, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges, that Partner discriminated between its cellular customers, including between new customers and existing customers, by offering the same type of customers, different terms, an action which would not be in

3. accordance with the provisions of its license. The plaintiff noted that it cannot estimate the total amount claimed in the lawsuit, if the lawsuit is certified as a class action. The claim is still in its preliminary stage of the motion to be certified as a class action.

On February 24, 2016, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that the Company harasses recipients by sending advertising messages without receiving their prior approval for this. In addition, the content of the advertisements does not comply with the legal provisions, among others, with respect to the fact that most of the advertising messages do not easily include an option to

4. remove or send a refusal notice. The total amount claimed against the Company if the lawsuit is certified as a class action was not stated by the plaintiff. The claim is still in its preliminary stage of the motion to be certified as a class action.

5. On April 21, 2016, a claim and a motion to certify the claim as a class action were filed against 012 Smile. The claim alleges that 012 Smile's infrastructure does not support data speeds that the Company publishes to its customers. The total amount claimed against the Company if the lawsuit is certified as a class action was not stated by the plaintiff. The claim is still in its preliminary stage of the motion to be certified as a class action.

6. On November 1, 2016, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that the Company sends text messages regarding the volume rate of data packages, which unlawfully include advertisement content, intended to encourage purchasing another data package. The total amount claimed against the Company if the lawsuit is certified as a class action was not stated by the plaintiff. The claim is still in its preliminary stage of the motion to be certified as a class action.

7. On September 11, 2016, a claim and a motion to certify the claim as a class action were filed against 012 Smile and two other international long distance operators. The claim alleges that the defendants charged excessive tariffs from occasional customers for each long distance call minute, contrary to the Telecommunications Law (Telecommunications and Broadcasting), that allows a licensee to charge reasonable payment for a telecommunication service that it provides. The total amount claimed against 012 Smile if the lawsuit is certified as a class action was not stated by the plaintiff. The claim is still in its preliminary stage of the motion to be certified as a class action.

8. On September 29, 2016, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner refunded its customers, in cases where it was apparent that they were overcharged, not in accordance with legal provisions. In addition, the claim alleges that Partner charges some of its customers that subscribe to the "One" service for the provision of this special service even though it was terminated. The plaintiff noted that it cannot estimate the total amount claimed in the lawsuit, should the lawsuit be certified as a class action. The claim is still in its preliminary stage of the motion to be certified as a class action.

9. On September 19, 2017, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner breaches its license with respect to coordination of technician visits for internet malfunction repairs. The plaintiff noted that it cannot estimate the total amount claimed in the lawsuit, should the lawsuit be certified as a class action. The claim is still in its preliminary stage of the motion to be certified as a class action.

With respect to the following claims, we have begun to assess the risk involved for the Company but at this stage in our analysis we are unable to evaluate, with any degree of certainty, the probability of success of the lawsuit or the range of potential exposure, if any.

1. On April 25, 2017, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner misled its customers with respect to certain cellular plans that were represented as including international call minutes while in fact Partner charged its customers that joined these plans for international calls. The plaintiff noted that it cannot estimate the total amount claimed in the lawsuit, should the lawsuit be certified as a class action. The claim is still in its preliminary stage of the motion to be certified as a class action.

2. On September 24, 2017, a claim and a motion to certify the claim as a class action were filed against the Company. The claim alleges that Partner's infrastructure does not support data speeds that the Company publishes to its customers. The plaintiff noted that it cannot estimate the total amount claimed in the lawsuit, should the lawsuit be certified as a class action. The claim is still in its preliminary stage of the motion to be certified as a class action.

During 2017, no new criminal proceedings were brought against us concerning the erection of network sites without building permits. As of December 31, 2017, two criminal proceedings were pending against us concerning the erection of network sites without building permits, none of which was pending against our officers and directors. We are currently negotiating with the relevant local authorities to reach a settlement regarding the relocation of affected sites or obtaining building permits for those sites. Settlements of previous criminal proceedings brought against us resulted in Partner, but not its officers or directors, admitting guilt and paying a fine, and also resulted in the imposition of demolition orders for the relevant sites, the execution of which have been stayed for a period of time to allow us to obtain the necessary permits or to relocate the relevant network site.

8A.2 DIVIDEND DISTRIBUTION POLICY

Our Articles of Association allow for our Board of Directors to approve all future dividend distributions, without the need for shareholder approval, subject to the provisions governing dividends under the Israeli Companies Law.

The Board of Directors resolved on September 19, 2012, to assess dividend distributions (and their scope) from time to time, by reference to, among other factors, the Company's cash flow, profitability, debt level, debt coverage ratios and the business environment in general. For the years ended December 31, 2015, 2016 and 2017, no dividend was declared by the Company. For risks relating to future payments of dividends see "Item 3D.2v Based on a decision of the Board of Directors in 2012, dividend distributions are assessed from time to time on the basis of various factors. There can be no assurance that dividends will be declared or, if they are, at what level. No dividends have been distributed since 2013.

We intend to pay any dividends which may be declared in shekels. Under current Israeli regulations, any dividends or other distributions paid in respect of ordinary shares may be freely repatriated in non-Israeli currencies at the rate of exchange prevailing at the time of conversion, provided that Israeli income tax has been paid on or withheld from such dividends. Because exchange rates between the shekel and the US dollar fluctuate continuously, a holder of ADSs will be subject to currency fluctuation generally and, particularly, between the date when dividends are declared and the date dividends are paid.

8B. Changes

No significant change has occurred since December 31, 2017, except as otherwise disclosed in this annual report. See also "Item 5D.2 Outlook".

ITEM 9. THE OFFER AND LISTING

9A. Offer and Listing Details

Our capital consists of ordinary shares, which are traded on the Tel Aviv Stock Exchange under the symbol "PTNR". American Depositary Shares ("ADSs"), each representing one of the Company's ordinary shares, are quoted on the NASDAQ Global Select Market under the symbol "PTNR". The ADSs are evidenced by American Depositary Receipts ("ADRs"). Citibank serves as our depository for ADSs.

Edgar Filing: PARTNER COMMUNICATIONS CO LTD - Form 20-F

The tables below set forth, for the periods indicated, the reported high and low closing quotations, not adjusted for dividends, based on information supplied by the National Association of Securities Dealers, Inc., and information supplied by the Tel Aviv Stock Exchange.

	NASDAQ		Tel Aviv Stock Exchange	
	(\$ per ADS)		(NIS per ordinary share)	
	High	Low	High	Low
2013	9.75	5.46	35.00	20.30
2014	9.57	5.05	33.10	20.14
2015	5.00	2.18	19.65	8.50
2016				
First Quarter	4.84	4.07	19.16	16.20
Second Quarter	5.48	4.03	20.80	15.90
Third Quarter	5.02	4.44	19.66	17.14
Fourth Quarter	5.08	4.33	19.50	16.94
2017				
First Quarter	6.28	5.09	23.67	18.44
Second Quarter	5.74	4.72	20.35	17.48
Third Quarter	5.49	4.71	19.57	17.10
Fourth Quarter	6.24	5.02	22.15	17.96
September 2017	5.49	4.87	19.57	17.90

ITEM 10. ADDITIONAL INFORMATION

10A. Share Capital

Not applicable.

10B. Memorandum and Articles of Association

10B.1 PURPOSES AND OBJECTS OF THE COMPANY

We are a public company registered under the Israeli Companies Law as Partner Communications Company Ltd., registration number 52-004431-4.

Pursuant to our Articles of Association, we were formed for the purpose of participating in the auction for the granting of a license to operate cellular radio telephone services in Israel, to provide such services, and without derogating from the above, we are also empowered to hold any right, obligation or legal action and to operate in any business or matter approved by the Company.

Pursuant to section three of our Articles of Association, our purpose is to operate in accordance with business considerations to generate profits; provided, however, that the Board of Directors is entitled to donate reasonable amounts to worthy causes, even if such donation is not within the frame of these business considerations.

Pursuant to section four of our Articles of Association, our objective is to engage in any legal business.

10B.2 THE POWERS OF THE DIRECTORS

The power of our directors to vote on a proposal, arrangement or contract in which the director is personally interested is limited by the relevant provisions of the Israeli Companies Law and our Articles of Association. In addition, the power of our directors to vote compensation to themselves or any members of their body, requires the approval of the compensation committee, the Board of Directors and the general meeting of shareholders. Generally, the Annual Meeting of the Shareholders must be convened to elect directors and a shareholders meeting could terminate the term of office of directors. In addition, our Articles of Association provide that, in certain circumstances relating to our compliance with the license, our Board of Directors may remove any director from the Board of Directors by a resolution passed by 75% or more of the directors present and voting at the relevant meeting. See also "Item 6C Board Practices".

10B.3 RIGHTS ATTACHED TO SHARES

Our registered share capital consists of a single class of 235 million ordinary shares, par value NIS 0.01 per share, of which 171,095,739 ordinary shares were issued and 171,095,739 were issued and outstanding as of March 1, 2018. All outstanding ordinary shares are validly issued and registered. The rights attached to our ordinary shares are described below.

Dividend Rights

Holders of ordinary shares are entitled to the full amount of any cash or share dividend subsequently declared. The Board of Directors may propose and approve distribution of a dividend with respect to any fiscal year or quarter only out of profits, subject to the provisions of the Israeli Companies Law. See "Item 10E Taxation."

Shares which are treated as dormant under section 44.6 of our Articles of Association (under circumstances relating to compliance with our license) retain the rights to receive dividends or other distributions to shareholders, and to

participate in rights offerings, but no other rights. See “Item 4B.12f Our Mobile Telephone License”.

140

One year after a dividend has been declared and is still unclaimed, the Board of Directors is entitled to invest or utilize the unclaimed amount of the dividend in any manner to the benefit of the Company until it is claimed. We are not obligated to pay interest or linkage on an unclaimed dividend.

Voting Rights

Holders of issued and outstanding ordinary shares have one vote for each ordinary share held on all matters submitted to a vote of shareholders either in person or by proxy. Such voting rights may be affected by the grant of any special voting rights to the holders of a class of shares with preferential rights that may be authorized in the future. The quorum required for a general meeting of shareholders consists of at least two shareholders present in person or by proxy who hold or represent, in the aggregate, at least one third of the voting rights of the issued share capital. In the event that a quorum is not present within thirty minutes of the scheduled time, the shareholders' meeting will be adjourned to the same day of the following week, or the next business day thereafter, at the same time and place, or such time and place as the Board of Directors may determine. If at such reconvened meeting a quorum is not present after the lapsing of 30 minutes from the time appointed for holding the meeting, one or more shareholders present in person or by proxy holding or representing in the aggregate at least 10% of the voting rights in the Company will generally constitute a quorum. Any shareholder seeking to vote at a general meeting of our shareholders must first notify us if any of the shareholder's holdings in the Company requires the consent of the Ministry of Communications. The instructions of a shareholder will not be valid unless accompanied by a declaration by the shareholder as to whether or not the shareholder's holdings in the Company or the shareholder's vote requires the consent of the Ministry of Communications due to a breach by the shareholder of the restrictions on transfer or acquisition of means of control, or provisions regarding cross-ownership with other mobile telephone operators or shareholdings or agreements which may reduce or harm competition. If the shareholder does not provide such certification declaration, his instructions will be invalid and his vote not counted.

An ordinary resolution, such as a resolution for the election of directors (excluding external directors), or the appointment of auditors, requires approval by the holders of a majority of the voting rights represented at the meeting, in person or by proxy, and voting thereon. Under our Articles of Association, resolutions such as a resolution amending our Articles of Association or approving any change in the share capital, liquidation, changes in the objectives of the company, or the name of the company, or other changes as specified in our Articles of Association, requires approval of a special majority, representing the holders of no less than 75% of the voting rights represented at the meeting, in person or by proxy, and voting thereon.

Under our Articles of Association our directors are generally elected by an ordinary majority of the shareholders at each duly convened annual meeting, and serve until the next annual meeting, and our external directors are elected in accordance with applicable law and/or relevant stock exchange rules applicable to us; or until their respective successors are elected and qualified, whichever occurs first, or in the case of Israeli directors who are appointed by the founding Israeli shareholders, generally upon a written notice signed by at least two of the founding Israeli shareholders who are the record holders of (i) at least 50% of minimum Israeli holding shares or (ii), who hold in the aggregate the highest number of minimum Israeli holding shares among the Israeli founding shareholders. Any Israeli founding shareholders who have specified connections to a competing mobile radio telephone operator (as defined in the license) of the Company are prohibited from participation in any such appointment. The notice is addressed to the Company's company secretary indicating his appointment, until their respective successors are elected upon such notice. In each annual meeting the directors that were elected at the previous annual meeting are deemed to have resigned from their office, excluding the external directors, who according to the Israeli Companies Law, are elected for a period of three years and the Israeli director whose appointment is terminated generally by a written notice by himself or by the founding Israeli shareholders. A resigning director may be reelected. Each ordinary share represents one vote. No director may be elected or removed on the basis of a vote by dormant shares. The ordinary shares do not have cumulative voting rights in the election of directors.

Under our Articles of Association our shareholders discuss our annual consolidated financial statements, at the annual general meeting of shareholders.

Directors may be appointed also in certain circumstances by an extraordinary general meeting and by the Board of Directors upon approval of a simple majority of the directors. Such director, excluding the external directors, shall serve for a term ending at the next annual general meeting.

141

Rights in the Company's Profits

Our shareholders have the rights to share in our profits distributed as a dividend and any other permitted distribution. See "Item 10B.3 Rights Attached to Shares--Dividend Rights."

Rights in the Event of Liquidation

All of our ordinary shares confer equal rights among them with respect to amounts distributed to shareholders in case of liquidation.

Rights in the Event of Reorganization

Upon the sale of the property of the Company, the Board of Directors or the liquidators (in case of a liquidation) may receive and, if the Company's profits so permit, distribute among the shareholders fully or partially paid up shares, bonds or securities of another company or any other property of the Company without selling them or depositing them with trustees on behalf of the shareholders, provided, however, that they have received the prior authorization adopted by a special majority of the shareholders of the Company (representing at least 75% of the votes of shareholders participating and voting in the relevant general meeting). Such special majority may also decide on the valuation of such securities or property, unless the Company is in or beginning a liquidation process.

Limitations on Ownership and Control

Ownership and control of our ordinary shares are limited by the terms of our licenses and our Articles of Association. See "Item 4B.12f Our Mobile Telephone License-License Conditions" and "Revoking, limiting or altering our license."

In order to comply with the conditions and restrictions imposed on us by the Ministry of Communications or under our licenses in relation to ownership or control over us, under certain events specified in our Articles of Association, the Board of Directors may determine that certain ordinary shares are dormant shares. According to our Articles of Association, dormant shares bear no rights as long as they are dormant shares, except for the right to receive dividends and other distributions to shareholders. Consequently, we have received an exemption from the requirement set out in NASDAQ's Marketplace Rule 4351 that voting rights of existing shareholders of publicly traded common stock registered under Section 12 of the US Securities Exchange Act cannot be disparately reduced or restricted through any corporate action or issuance. In addition, the Board of Directors shall not register a person as a holder of a share before receipt of their declaration that they are not a "relevant person" as defined in our Articles of Association.

Our Compensation Policy allows us to allocate in addition to shares, restricted shares. For rights attached to restricted shares see "Item 6E.2 EQUITY INCENTIVE PLAN".

10B.4 CHANGING RIGHTS ATTACHED TO SHARES

According to our Articles of Association, in order to change the rights attached to any class of shares, the general meeting of the shareholders must adopt a resolution to change such rights by a special majority, representing at least 75% of the votes of shareholders participating and voting in the general meeting, and in case of changing the rights attached to certain class of shares, the approval by special majority of each class meeting, is required.

10B.5 ANNUAL AND EXTRAORDINARY GENERAL MEETINGS

The Board of Directors must convene an annual general meeting of shareholders at least once every calendar year, within fifteen months of the last annual general meeting. In accordance with our Articles of Association, notice of a general meeting must be sent to each registered shareholder no later than five days after the record date set by the Board of Directors for that meeting, unless a different notice time is required under applicable law. An extraordinary

meeting may be convened by the Board of Directors, as it decides or upon a demand of any two directors or 25% of the directors, whichever is lower, or of one or more shareholders holding in the aggregate at least 5% of our issued capital and at least 1% of the voting rights of the Company; or (ii) at least 5% of the voting right of the Company, can seek to convene a shareholders meeting or as otherwise permitted by the Israeli Companies Law. See “Item 10B.3 RIGHTS ATTACHED TO SHARES—Voting Rights.”

142

One or more shareholders holding (alone or in the aggregate), 1% or more of the share capital of the Company may request that the Board of Directors include an issue on the agenda of a general meeting of shareholders (including the nomination of a candidate to the board of directors), provided that such issue is suitable to be discussed in the general meeting of shareholders. Pursuant to an amendment to regulations promulgated under the Israeli Companies Law, effective from July 2014, said shareholder request should be submitted to the company within three or seven days (depending on the type of resolution dealt with in the convened meeting) following publication of the Company's notice with respect to its general meeting of shareholders, or, if the Company publishes a preliminary notice stating its intention to convene such meeting and the agenda thereof, within fourteen days of such preliminary notice. Any such proposal must further comply with the information requirements and time frames under Israeli law.

10B.6 LIMITATIONS ON THE RIGHTS TO OWN OUR SECURITIES

For limitations on the rights to own our securities see "Item 4B.12f Our Mobile Telephone License– License Conditions," "– Our Permit Regarding Cross Ownership" and "Item 10B.3 Rights Attached to Shares – Limitations on Ownership and Control."

10B.7 LIMITATIONS ON CHANGE IN CONTROL AND DISCLOSURE DUTIES

For limitations on change in control see "Item 4B.12f Our Mobile Telephone License– License Conditions" and "– Our Permit Regarding Cross Ownership".

10B.8 CHANGES IN OUR SHARE CAPITAL

Changes in our share capital are subject to the approval of the shareholders at a general meeting of shareholders by a special majority of 75% of the votes of shareholders participating and voting in the general meeting of shareholders.

10B.9 OUR LICENSE PREVAILS IN CASE OF AN INCONSISTENCY

If any article of our Articles of Association is found to be inconsistent with the terms of our mobile telephone license granted by the Ministry of Communications (see "Item 4B.12f Our Mobile Telephone License") or of any other telecommunications license we hold, the provisions of such Article shall be deemed null and void.

10C. Material Contracts

Network sharing agreement. In April 2015, the Ministry of Communications approved the 15- year Network Sharing Agreement that we entered into with HOT Mobile. Pursuant to the Network Sharing Agreement, the parties created a 50-50 limited partnership, the purpose of which is to operate and develop a cellular network to be shared by both parties, starting with a pooling of both parties' radio access network infrastructures to create a single shared radio access network. The limited partnership began operations in August 2015. See "Item 4B.8 OUR NETWORK".

Right of Use Agreement with HOT Mobile. Partner and HOT Mobile entered into a Right of Use agreement, which took effect on November 8, 2013, and was valid until April 1, 2016. Under the Right of Use agreement, Partner provided services to HOT Mobile in the form of a right of use of Partner's radio cellular network. According to the Right of Use agreement, HOT Mobile paid Partner fixed base payments with additional variable payments based, among other things, on traffic volume exceeding a defined threshold. See "Item 4B.8 OUR NETWORK".

i-Phone Agreement. Following the expiration of a previous agreement, in June 2016, we entered into a non-exclusive agreement with Apple Distribution International for the purchase and resale of iPhone handsets in Israel. Pursuant to the agreement, we agreed to purchase a minimum quantity of iPhone handsets per year, for a period of three years. These purchases will represent a significant portion of our expected handset purchases and sales over that period.

Registration Rights Agreement. We have entered into registration rights agreements with S.B. Israel Telecom, our principal shareholder, in which we granted our principal shareholders the right to require us to register ordinary shares held by them under the US Securities Act. See "Item 7B.2 REGISTRATION RIGHTS".

Network upgrade and deployment of fourth generation network. On October 25, 2010, we entered into an agreement with Ericsson for the upgrade of our existing networks and the deployment of our fourth generation network in Israel for an initial term that ended at the end of 2014. We extended the initial period by an additional period of one year for the provision of support and maintenance services until the end of 2015 and again until the end of 2016 and we have ordered maintenance services for the years 2017 and 2018. See "Item 4B.8g Suppliers" and "Item 5A.1g Agreement for the Upgrade of Our Existing Networks and the Deployment of Fourth Generation Network in Israel".

TI Sparkle Israel (formerly Med Nautilus) Agreement. We have an agreement with TI Sparkle for the provision of international capacity services through submarine infrastructure, which connects countries bordering the Mediterranean Sea to all major Western European countries and from there to the rest of the world until 2023 with an option to extend the agreement until 2030.

10D. Exchange Controls

There are no Israeli government laws, decrees or regulations that restrict or that affect our export or import of capital or the remittance of dividends, interest or other payments to non-resident holders of our securities, including the availability of cash and cash equivalents for use by us and our wholly-owned subsidiaries, except or otherwise as set forth under "Item 10E Taxation."

Under Israeli law (and our Memorandum and Articles of Association), persons who are neither residents nor nationals of Israel may freely hold, vote and transfer ordinary shares in the same manner as Israeli residents or nationals.

10E. Taxation

Israeli Tax Considerations

The following discussion is not intended, and should not be construed, as legal or professional tax advice and should not be relied on any specific case since it does not exhaust all possible tax considerations.

The following is a summary of the current tax laws of the State of Israel as they relate to us and to our shareholders and also includes a discussion of the material Israeli tax consequences for persons purchasing our ordinary shares or ADSs, both referred to below as the "Shares". To the extent that the discussion is based on legislation yet to be subject to judicial or administrative interpretation, there can be no assurance that the views expressed herein will accord with any such interpretation in the future. This discussion is not intended and should not be construed as legal or professional tax advice and does not cover all possible tax considerations.

Potential investors are urged to consult their own tax advisors as to the Israeli or other tax consequences of the purchase, ownership and disposition of our Shares, including, in particular, the effect of any foreign, state or local taxes.

Israeli Tax Reforms

The “Tax Burden Distribution Law” legislation amendments (2011) that were published in December 2011, which became effective on January 1, 2012, abolished the reduction of income tax rates for corporations and individuals and increased, amongst other things, the corporate tax rate and the tax rates on individual’s dividend income. On July 27, 2013 following the Tax Burden Distribution Law, the Israeli Parliament approved The Law For the Change in National Priorities (Legislation Amendment to Achieving Budget Goals for years 2013 and 2014), 2013 (the “2013 Amendment”). On January 4, 2016, the Israeli Parliament approved an amendment for the Israeli tax Ordinance (Number 216), according to which corporate tax rate will be updated for 2016 (the “2016 Amendment”). On December 29, 2016, the Israeli Parliament passed the Israeli Economic Recuperation Law (legislated amendments to achieve implementation of the Economic Policy for the budget years 2017-2018), which, amongst other things, reduced the regular corporate tax rate, and changed the requirement regarding surplus tax.

General Corporate Tax Structure

Israeli companies are generally subject to corporate tax on their taxable income (including capital gains). In general, the regular corporate tax rate in Israel for 2014 and 2015 was 26.5%, for 2016 was 25% and for 2017 was 24%. The regular corporate tax rate for 2018 and thereafter will be reduced further to 23%.

Tax on Capital Gains of Shareholders

General. Israeli law generally imposes a capital gains tax on the sale of capital assets by residents of Israel as defined for Israeli tax purposes, and on the sale of capital assets located in Israel or the sale of direct or indirect rights to assets located in Israel, including on the sale of our Shares by some of our shareholders (see discussion below). The Israeli Income Tax Ordinance distinguishes between “Real Capital Gain” and “Inflationary Surplus”. Real Capital Gain is the excess of the total capital gain over Inflationary Surplus computed on the basis of the increase in the CPI between the date of purchase and the date of sale. In 2017, the real capital gain accrued on the sale of our Shares was generally taxed at a rate of 24% for corporations (26.5% for 2014 and 2015, 25% for 2016, 24% for 2017 and 23% for 2018 and thereafter) and a rate of up to 25% for individuals. Additionally, if such individual shareholder is considered a “Significant Shareholder” at any time during the 12-month period preceding such sale (i.e., if such individual shareholder holds directly or indirectly, along with others, at least 10% of any means of control in the company, including, among other things, the right to receive profits of the company, voting rights, the right to receive the company’s liquidation proceeds and the right to appoint a director), the tax rate will be up to 30%.

However, the foregoing tax rates will not apply to (i) dealers in securities; and (ii) shareholders who have acquired their shares prior to an initial public offering (that may be subject to a different tax arrangement). Inflationary surplus that accrued after December 31, 1993, is exempt from tax.

Generally, a semi-annual detailed return, including a computation of the tax due should be submitted to the Israeli Tax Authorities and a tax advance amounting to the tax liability arising from the capital gain is payable. At the sale of traded securities, the aforementioned detailed return may not be submitted and the tax advance should not be paid, if all tax due was withheld at source according to applicable provisions of the Israeli Tax Ordinance and regulations promulgated thereunder.

Capital gains are also reportable on annual income tax returns.

•Taxation of Israeli Residents

The following is a summary of the most significant Israeli capital gains tax implications arising with respect to the sale of our Shares by shareholders who are not engaged in the business of trading in securities.

Individuals

As of January 1, 2012, a shareholder will generally be subject to tax at up to 25% rate on realized real capital gain (if the shareholder is a Significant Shareholder, as defined above, the tax rate will be up to 30%). To the extent that the shareholder claims a deduction of financing expenses, the gain will be subject to tax at a rate of 30% (until otherwise stipulated in bylaws that may be published in the future).

Please note that an individual Israeli tax resident may be required to pay up to 47% (from 2017 and thereafter) on his yearly taxable income, subject to certain exceptions. In addition, as of January 1, 2013, an individual Israeli tax resident is required to pay an additional tax at the rate of 2% on his yearly taxable combined income from any source exceeding NIS 810,720 for 2015 and 2016. From 2017 the additional tax rate is 3% from an amount exceeding NIS 639,996.

Corporations

Shareholders who are corporations will be generally subject to tax at the corporate tax rate on the realized capital gain as described in “General Corporate Tax Structure” in Item 10E above.

Different taxation rules may apply to shareholders who purchased the Shares prior to January 1, 2009, or prior to the listing on the Tel Aviv Stock Exchange or the Nasdaq Global Market. Such Shareholders should consult with their own tax advisors for the tax consequences upon sale.

In general, a partnership will be a transparent entity for Israeli tax purposes and its partners will be subject to tax with respect to their share in accordance with each of their applicable tax status and rates.

In general, under the Israel Tax Ordinance, public institutions are exempt from tax.

- Taxation of Non-Israeli Residents

As mentioned above, Israeli law generally imposes a capital gains tax on sales of capital assets, including securities and any other direct or indirect rights to capital assets located in Israel. This tax is also applicable to non-Israeli residents of Israel as follows:

Under Israeli law, the capital gain from the sale of shares by non-Israeli residents is tax exempt in Israel as long as our Shares are listed on the NASDAQ Global Select Market or any other stock exchange recognized by the Israeli Ministry of Finance (this condition shall not apply to shares purchased on or after January 1, 2009) and provided that certain other conditions are met, the most relevant of which are: (A) the capital gain is not attributed to the foreign resident’s permanent establishment in Israel, (B) the shares were acquired by the foreign resident after the company’s shares had been listed for trading on the foreign exchange, and (C) if the seller is a corporation, less than 25% of its means of control are held by Israeli residents. It should be noted that with respect to shares which are listed on the Israeli stock exchange market, a tax exemption may apply under certain different conditions.

In addition, the sale of shares may be exempt from Israeli capital gains tax under the provisions of an applicable tax treaty (for example, please refer to the discussion below with respect to the Convention Between the Government of the United States of America and the Government of the State of Israel with Respect to Taxes on Income).

Different taxation rules may apply to shareholders who purchased their shares prior to the listing on the Tel Aviv Stock Exchange. Such shareholders should consult with their tax advisors for the precise treatment upon sale.

- Taxation of Investors Engaged in a Business of Trading Securities

Individual and corporate dealers in securities in Israel are taxed at tax rates applicable to business income.

- Withholding at Source from Capital Gains from Traded Securities

The purchaser, the Israeli stockbrokers and any financial institution through which the sold securities are held, are obliged, subject to certain exemptions, to withhold tax on the amount of consideration paid with respect to such sale (or on the capital gain realized on the sale, if known) at the Israeli corporate tax rate as described in “General Corporate Tax Structure” in Item 10E above.

Where the seller is an individual, the applicable withholding tax rate would be 25%, or 30% where the seller is a significant shareholder.

Dividends

The following Israeli tax consequences shall apply in the event of actual payment of any dividends on the Shares.

146

As of January 1, 2012, dividends, other than bonus shares (stock dividends), paid to Israeli resident individuals who purchased our Shares will generally be subject to income tax at a rate of 25% for individuals, or 30% if the dividend recipient is a Significant Shareholder (as defined above) at any time during the 12-month period preceding such distribution. Dividends paid to Israeli resident companies will not be included in their tax liability computation.

Non-residents of Israel (both individuals and corporations) are subject to income tax on income accrued or derived from sources in Israel, including dividends from Israeli corporations. The distribution of dividend income, other than bonus shares (stock dividends), to non-residents of Israel will generally be subject to income tax at a rate of 25% (or 30% for a shareholder that is considered a Significant Shareholder (as defined above) at any time during the 12-month period preceding such distribution), unless a lower rate is stipulated by a double tax treaty between the State of Israel and the shareholder's country of residence. In addition, an additional tax at a rate of 3% may be imposed upon individual shareholders whose annual income from all sources that are taxable in Israel exceed a certain amount.

In the event of actual payment of any dividends on our Shares the following withholding rates will be applied: (i) Israeli resident corporations – 0%, (ii) Israeli resident individuals – 25% (iii) non-Israeli residents – 25%, subject to a reduced tax rate under an applicable double tax treaty; (iv) Israeli resident individual who is a Significant Shareholder – 30%; and (v) non -Israeli resident who is a Significant Shareholder – 30%, subject to a reduced tax rate under an applicable double tax treaty. Nevertheless, if the Shares are held through a Nominee Company, as defined in the Israel Securities Act, the withholding tax rate for shareholders under (iv) and (v) above shall be 25% (subject to a reduced tax rate under an applicable double tax treaty for non-Israeli residents).

A non-resident of Israel that has received a dividend income derived from an Israeli corporation, from which tax was withheld at the source, is generally exempt from the duty to file tax returns in Israel in respect of such income, provided that such income was not connected to or derived from a trade or business conducted in Israel by such person.

Repatriation

Non-residents of Israel who acquire any of the Shares of the Company will be able to repatriate dividends, liquidation distributions and the proceeds from the sale of such shares in non-Israeli currencies at the rate of exchange prevailing at the time of repatriation provided that any applicable Israel income tax has been paid, or withheld, on such amounts. US holders should refer to the "United States Federal Income Considerations" section below with respect to the US federal income tax treatment of foreign currency gain or loss.

The foregoing discussion is intended only as a summary and does not purport to be a complete analysis or listing of all potential Israeli tax effects of holding of our shares. We recommend that shareholders consult their tax advisors concerning the Israeli and non-Israeli tax consequences to them of holding our shares.

Taxation of Residents of the United States under the US Treaty

Residents of the United States generally will be subject to withholding tax in Israel on dividends paid, if any, on Shares (including ADSs). Generally, under the Convention Between the Government of the United States of America and the Government of the State of Israel with Respect to Taxes on Income (the "US Treaty"), the maximum rate of withholding tax on dividends paid to a holder of Shares (including ADSs) who is a resident of the United States (as defined in the US Treaty) will be 25%. Under the US Treaty, the withholding tax rate on dividends will be reduced to 12.5% if (i) the shareholder is a U.S. resident corporation which holds during the portion of the taxable year which precedes the date of payment of the dividend, and during the whole of its prior taxable year, at least 10% of the outstanding shares of the voting stock of the Israeli resident paying corporation and (ii) not more than 25% of the gross income of the Israeli resident paying corporation for such prior taxable year consists of certain types of interest or dividends.

The US Treaty exempts from taxation in Israel any capital gains realized on the sale, exchange or other disposition of Shares (including ADSs) provided that the following cumulative conditions are met: (a) the seller is a resident of the United States for purposes of the US Treaty; (b) the seller owns, directly or indirectly, less than 10% of our voting stock at all times during the 12-month period preceding such sale, exchange or other disposition; (c) the seller, being an individual, is present in Israel for a period or periods of less than 183 days during the taxable year; and (d) the capital gain from the sale was not generated through a permanent establishment of the seller in Israel.

147

Subject to the exemptions from capital gains prescribed in the Israeli Income Tax Ordinance (as described above), purchasers of Shares (including ADSs) who are residents of the United States and who hold 10% or more of the outstanding Shares at any time during such 12-month period will be subject to Israeli capital gains tax. However, under the US Treaty, residents of the United States (as defined in the US Treaty) generally would be permitted to claim a credit for this tax against US federal income tax imposed on the sale, exchange or other disposition, subject to the limitations in US laws applicable to the utilization of foreign tax credits generally.

The application of the US Treaty provisions to dividends and capital gains described above is conditioned upon the fact that such income is not effectively connected with a permanent establishment (as defined in the US Treaty) maintained by the non-Israeli resident in Israel.

United States Federal Income Tax Considerations

The following discussion is a summary of certain material US federal income tax considerations applicable to a US holder (as defined below) regarding the acquisition, ownership and disposition of Shares or ADSs. This summary is based on provisions of the Internal Revenue Code of 1986, as amended (the “Code”), existing and proposed US Treasury regulations, administrative pronouncements, rulings and judicial decisions as of the date of this annual report. All of these authorities are subject to change, possibly with retroactive effect, and to change or changes in interpretation. In addition, this summary does not discuss all aspects of US federal income taxation that may be applicable to investors in light of their particular circumstances or to investors who are subject to special treatment under US federal income tax law, including US expatriates, insurance companies, banks, regulated investment companies, securities broker-dealers, financial institutions, tax-exempt organizations, persons holding Shares or ADSs as part of a straddle, hedging or conversion transaction, persons subject to the foreign tax credit splitting events rules, persons subject to the alternative minimum tax, persons who acquired their Shares or ADSs pursuant to the exercise of employee stock options or otherwise as compensation, US holders having a functional currency other than the US dollar, persons owning (directly, indirectly or by attribution) 10% or more of our outstanding share capital or voting stock and persons not holding the Shares or ADSs as capital assets. This discussion also does not address the consequences of the Medicare tax on net investment income or any aspect of state, local or non-US tax law or any other aspect of US federal taxation other than income taxation.

As used herein, the term “US holder” means a beneficial owner of an ordinary share or an ADS who is eligible for benefits as a US resident under the limitation on benefits article of the US Treaty (as defined above in “–Taxation of Residents of the United States under the US Treaty”), and is:

- citizen or individual resident of the United States for US federal income tax purposes;
- a corporation (or an entity taxable as a corporation for US federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate whose income is subject to US federal income taxation regardless of its source; or
- a trust if (A) a US court is able to exercise primary supervision over the trust’s administration and (B) one or more US persons have the authority to control all of the trust’s substantial decisions.

If a partnership, or other entity or arrangement treated as a partnership for US federal income tax purposes, holds Shares or ADSs, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. A partnership or a partner in a partnership that holds Shares or ADSs is urged to consult its own tax advisor regarding the specific tax consequences of owning and disposing of Shares or ADSs.

For US federal income tax purposes, US holders of ADRs will be treated as owners of the ADSs evidenced by the ADRs and the Shares represented by the ADSs. Furthermore, deposits or withdrawals by a US holder of Shares for

ADSs, or of ADSs for Shares, will not be subject to US federal income tax. The statement of US federal income tax law set forth below assumes that each obligation in the Deposit Agreement and any related agreement will be performed in accordance with its terms. US holders should review the summary above under “Israeli Tax Considerations” and “Taxation of Residents of the United States under the US Treaty” for a discussion of the Israeli taxes which may be applicable to them.

148

Holders of Shares or ADSs should consult their own tax advisors concerning the specific Israeli, US federal, state and local tax consequences of the ownership and disposition of the Shares or ADSs in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction. In particular, US holders are urged to consult their own tax advisors concerning whether they will be eligible for benefits under the US Treaty.

Dividends

A US holder generally will be required to include in gross income as ordinary dividend income the amount of any distributions paid on the Shares and ADSs, including the amount of any Israeli taxes withheld in respect of such dividend. Dividends paid by us will not qualify for the dividends-received deduction applicable in certain cases to US corporations.

The amount of any distribution paid in NIS, including the amount of any Israeli withholding tax thereon, will be included in the gross income of a US holder of Shares in an amount equal to the US dollar value of the NIS calculated by reference to the spot rate of exchange in effect on the date the distribution is received by the US holder or, in the case of ADSs, by the Depository. If a US holder converts dividends paid in NIS into US dollars on the day such dividends are received, the US holder generally should not be required to recognize foreign currency gain or loss with respect to such conversion. If the NIS received in the distribution are not converted into US dollars on the date of receipt, any foreign currency gain or loss recognized upon a subsequent conversion or other disposition of the NIS will be treated as US source ordinary income or loss. Special rules govern and special elections are available to accrual method taxpayers to determine the US dollar amount includible in income in the case of taxes withheld in a foreign currency. Accrual basis taxpayers are urged to consult their own tax advisors regarding the requirements and the elections applicable in this regard. Dividends paid with respect to Shares may be subject to rules applicable where US persons own or are treated as owning 50% or more (by vote or value) of a foreign corporation, and such rules could adversely affect the US shareholders' ability to use US foreign tax credits.

Any dividends paid by us to a US holder on the Shares or ADSs will be treated as foreign source income and generally will be categorized as "passive income" for US foreign tax credit purposes. Subject to the limitations in the Code, as modified by the US Treaty, a US holder may elect to claim a foreign tax credit against its US federal income tax liability for Israeli income tax withheld from dividends received in respect of Shares or ADSs. US holders who do not elect to claim the foreign tax credit may instead claim a deduction for Israeli income tax withheld, but only for a year in which the US holder elects to do so with respect to all foreign income taxes. A deduction does not reduce US tax on a dollar-for-dollar basis like a tax credit. The deduction, however, is not subject to the limitations applicable to foreign tax credits. The rules relating to the determination of the foreign tax credit are complex. Accordingly, if you are a US holder of Shares or ADSs, you should consult your own tax advisor to determine whether and to what extent you would be entitled to the credit.

Certain US holders (including individuals) are eligible for reduced rates of US federal income tax in respect of "qualified dividend income". For this purpose, qualified dividend income generally includes dividends paid by a non-US corporation if, among other things, the US holders meet certain minimum holding period requirements and the non-US corporation satisfies certain requirements, including that either (i) the shares (or ADSs) with respect to which the dividend has been paid are readily tradable on an established securities market in the United States, or (ii) the non-US corporation is eligible for the benefits of a comprehensive US income tax treaty (such as the US Treaty) which provides for the exchange of information. We currently believe that dividends paid with respect to our Shares and ADSs should constitute qualified dividend income for US federal income tax purposes. We anticipate that our dividends will be reported as qualified dividends on Forms 1099-DIV delivered to US holders. In computing foreign tax credit limitations, non-corporate US Holders may take into account only a portion of a qualified dividend to reflect the reduced US tax rate applicable to such dividend. Individual US holders of Shares or ADSs are urged to consult their own tax advisors regarding the availability of the reduced dividend tax rate in light of their own particular situation and regarding the computations of their foreign tax credit limitation with respect to any qualified dividend income paid by us, as applicable.

Sale, Exchange or Other Taxable Disposition

Upon the sale, exchange or other taxable disposition of Shares or ADSs, a US holder generally will recognize capital gain or loss equal to the difference between the US dollar value of the amount realized on the sale, exchange or other taxable disposition and the US holder's adjusted tax basis, determined in US dollars, in the Shares or ADSs. Any gain or loss recognized upon the sale, exchange or other taxable disposition of the Shares or ADSs will be treated as long-term capital gain or loss if, at the time of the sale, exchange or other taxable disposition, the holding period of the Shares or ADSs exceeds one year. In the case of individual US holders, capital gains generally are subject to US federal income tax at preferential rates if specified minimum holding periods are met. The deductibility of capital losses by a US holder is subject to significant limitations. US holders should consult their own tax advisors in this regard.

In general, gain or loss recognized by a US holder on the sale, exchange or other taxable disposition of Shares or ADSs will be US source income or loss for US foreign tax credit purposes. Pursuant to the US Treaty, however, gain from the sale or other taxable disposition of Shares or ADSs by a holder who is a US resident, for US Treaty purposes, and who sells the Shares or ADSs within Israel may be treated as foreign source income for US foreign tax credit purposes.

US holders who hold Shares or ADSs through an Israeli stockbroker or other Israeli intermediary may be subject to an Israeli withholding tax on any capital gains recognized if the US holder does not obtain approval of an exemption from the Israeli Tax Authorities. See “Israeli Tax Considerations” above. US holders are advised that any Israeli tax paid under circumstances in which an exemption from such tax was available will not give rise to a deduction or credit for foreign taxes paid for US federal income tax purposes. US holders are advised to consult their Israeli stockbroker or intermediary regarding the procedures for obtaining an exemption.

If a US holder receives NIS upon the sale of Shares, that US holder may recognize ordinary income or loss as a result of currency fluctuations between the date of the sale of the Shares and the date the sales proceeds are converted into US dollars.

Passive Foreign Investment Company Rules

A non-US corporation will be classified as a Passive Foreign Investment Company (a “PFIC”) for any taxable year if (i) at least 75% of its gross income consists of passive income, (such as dividends, interest, rents, royalties (other than rents or royalties derived in the active conduct of a trade or business and received from an unrelated person) and gains on the disposition of certain minority interests or (ii) at least 50% of the average value of its assets consist of assets that produce or are held for the production of, passive income. We currently believe that we were not a PFIC for the year ended December 31, 2017. However, this conclusion is a factual determination that must be made at the close of each year and is based on, among other things, a valuation of our Shares, ADSs and assets, which will likely change from time to time. If we were characterized as a PFIC for any taxable year, a US holder would suffer adverse tax consequences. These consequences may include having the gains that are realized on the disposition of Shares or ADSs treated as ordinary income rather than capital gains and being subject to punitive interest charges with respect to certain dividends and gains and on the sale or other disposition of the Shares or ADSs. Furthermore, dividends paid by a PFIC are not eligible to be treated as “qualified dividend income” (as discussed above). In addition, if a US holder holds Shares or ADSs in any year in which we are treated as a PFIC, such US holder will be subject to additional tax form filing and reporting requirements.

Application of the PFIC rules is complex. US holders should consult their own tax advisors regarding the potential application of the PFIC rules to the ownership of our Shares or ADSs.

Information Reporting and Backup Withholding

Dividend payments with respect to Shares or ADSs and proceeds from the sale, exchange or other disposition of Shares or ADSs may be subject to information reporting to the Internal Revenue Service (the “IRS”) and possible US backup withholding at a current rate of 24%. Backup withholding will not apply, however, to a holder who furnishes a correct taxpayer identification number or certificate of foreign status and makes any other required certification or who is otherwise exempt from backup withholding. US persons who are required to establish their exempt status generally must provide IRS Form W-9 (Request for Taxpayer Identification Number and Certification). Non-US holders generally will not be subject to US information reporting or backup withholding. However, such holders may be required to provide certification of non-US status (generally on IRS Form W-8BEN or IRS W-8BEN-E) in connection with payments received in the United States or through certain US-related financial intermediaries.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a holder's US federal income tax liability, and a holder may obtain a refund of any excess amounts withheld by filing the appropriate claim for refund with the IRS and furnishing any required information in a timely fashion.

In addition, certain US holders who are individuals that hold certain foreign financial assets as defined in the Code (which may include Shares or ADSs) are required to report information relating to such assets, subject to certain exceptions.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

11A. General

We are exposed to market risk, including movements in foreign currency exchange and inflation-indexed interest rates. We do not enter into any derivative transactions to hedge underlying exposure to foreign currencies. As a matter of policy, we do not enter into transactions of a speculative or trading nature. Interest rate and foreign exchange exposures are monitored by tracking actual and projected commitments and through the use of sensitivity analysis.

We have liabilities in NIS linked to the CPI and in foreign currencies. The following table provides information derived from the financial statements about these liabilities as of December 31, 2016 and 2017.

Non-Derivative Instruments

	As of December 31, (NIS equivalent in millions, except percentages)			
	2016		2017	
	Fair Value	Book Value	Fair Value	Book Value
NIS-denominated debt linked to the CPI (1)

(1) Amounts due for payment of principal and interest are adjusted according to the CPI. See “Item 5B Liquidity and Capital Resources”.

(2) Book value approximates fair value.

152

11B. Foreign Exchange and Inflation

Substantially all of our revenues and a majority of our operating expenses are denominated in NIS. However, in 2017, approximately one fifth of our operating expenses were linked or denominated to non-NIS currencies, mainly the US dollar. These expenses related mainly to the acquisition of handsets and other equipment where the price paid by us is based on various foreign currencies, mainly the US dollar. We do not enter into derivative transactions and thus we are exposed to the aforementioned foreign currency fluctuations. We do not hold or issue derivative financial instruments for trading purposes. In addition, a substantial amount of our capital expenditures are incurred in, or linked to, non-NIS currencies, mainly the US dollar. See note 6 to the consolidated financial statements for description of the market risks.

Our Note payable series C in a total principal amount of NIS 213 million as of December 31, 2017, are currently in NIS and are linked to the CPI. In addition, some of our operating leases are linked to the CPI. We may not be able to raise our tariffs pursuant to our license in a manner that would fully compensate for a significant increase in the CPI. Therefore, a significant increase in the rate of inflation may also have a material adverse impact upon us by increasing our finance expenses without an offsetting increase in revenue. In 2017, the CPI effective as of December 31, 2017, increased 0.3%, compared to the CPI effective as of December 31, 2016, causing expenses of NIS 4 million in our finance costs, net, compared to a decrease of 0.3% in 2016, which caused income of NIS 2 million in finance costs, net. See note 24 to the consolidated financial statements.

Sensitivity analysis

A change of the CPI as at December 31, 2017, would increase (decrease) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables remain constant.

	Change		Equity	Profit
			New	Israeli
			Shekels	Shekels
			in millions	
December 31, 2017				
Increase in the CPI of	2	%	(3)	(3)
Decrease in the CPI of	(2))%	3	3

A change of the USD exchange rate as at December 31, 2017, would increase (decrease) equity and profit in 2017 by the amounts shown below as regards assets and liabilities as of December 31, 2017, and expected capital expenditure purchases in 2018. The analysis below does not take into account the effect of any change in USD with respect to possible future commitments and other future expected purchases in US dollars, since the Company believes that it will be able to adjust NIS prices for goods and services it sells in the Israeli market to reflect any significant increases in cost resulting from changes in the NIS-USD exchange rate. This analysis assumes that all other variables remain constant.

	Change		Equity	Profit
			New	Israeli
			Shekels	Shekels
			in millions	
December 31, 2017				
Increase in the USD of	10	%	(8)	(8)
Decrease in the USD of	(10))%	8	8

11C. Interest rates

Since one of our notes payable bear variable interest rate, changes in interest rates cause cash flow risks. As of December 31, 2017, our Notes payable series D in a principal amount of NIS 435 million bear variable rates of interest.

153

Sensitivity analysis

An increase (decrease) of 1% interest rates during 2017 in respect of our notes payable and non-current borrowing bearing variable interest would have resulted in an annual increase (decrease) in interest expenses (income) of NIS 5 million. This analysis assumes that all other variables remain constant.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Fees and charges payable by ADR holders

Citibank serves as the depository (the “Depository”) for our American Depositary Receipt (“ADR”) program. Pursuant to the deposit agreement between the Company, the Depository and owners and holders of ADRs (the “Deposit Agreement”), ADR holders may be required to pay various fees to the Depository. In particular, the Depository, under the terms of the Deposit Agreement, may charge the following fees: (i) Issuance Fee: to any person depositing shares or to whom ADSs are issued upon the deposit of shares, a fee not in excess of \$5.00 per 100 ADSs (or fraction thereof) (excluding issuances as a result of distributions described in paragraph (iv) below); (ii) Cancellation Fee: to any person surrendering ADSs for cancellation and withdrawal of deposited securities or to any person to whom deposited securities are delivered, a fee not in excess of \$5.00 per 100 ADSs (or fraction thereof) surrendered; (iii) Cash Distribution Fee: to any holder of ADS(s), a fee not in excess of \$5.00 per 100 ADSs (or fraction thereof) held for the distribution of cash dividends or other cash distributions (i.e., sale of rights and other entitlements); (iv) Stock Distribution/Rights Exercise Fee: to any holder of ADS(s), a fee not in excess of \$5.00 per 100 ADSs (or fraction thereof) held for (a) stock dividends or other free stock distributions or (b) exercise of rights to purchase additional ADSs; (v) Other Distribution Fee: to any holder of ADS(s), a fee not in excess of \$5.00 per 100 ADSs (or fraction thereof) held for the distribution of securities other than ADSs or rights to purchase additional ADSs (i.e., spin-off shares); and (vi) Depository Services Fee: to any holder of ADS(s), a fee not in excess of \$5.00 per 100 ADSs (or fraction thereof) held on the applicable record date(s) established by the Depository. The parties agreed to allow Citibank to charge an additional \$1.00 per 100 ADSs (a fee not in excess of \$6.00 in aggregate) in the event that the Company does not pay cash or stock dividends.

Owners, beneficial owners, persons depositing shares and persons surrendering ADSs for cancellation and for the purpose of withdrawing deposited securities shall be responsible for the following charges: (a) taxes (including applicable interest and penalties) and other governmental charges; (b) such registration fees as may from time to time be in effect for the registration of shares or other deposited securities on the share register and applicable to transfers of shares or other deposited securities to or from the name of the custodian, the Depository or any nominees upon the making of deposits and withdrawals, respectively; (c) such cable, telex and facsimile transmission and delivery expenses as are expressly provided in the Deposit Agreement to be at the expense of the person depositing or withdrawing shares or owners and beneficial owners of ADSs; (d) the expenses and charges incurred by the Depository in the conversion of foreign currency; (e) such fees and expenses as are incurred by the Depository in connection with compliance with exchange control regulations and other regulatory requirements applicable to Shares, deposited securities, ADSs and receipts; and (f) the fees and expenses incurred by the Depository, the Custodian, or any nominee in connection with the delivery or servicing of deposited securities.

Amounts received from the Depository

During 2017, the Company received from Citibank payments in the amount of approximately \$391,397.

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

154

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures. Our management, including our Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2017. Disclosure controls and procedures means controls and other procedures designed to ensure that information required to be disclosed in the reports that we file under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Nevertheless, our disclosure controls and procedures are designed to provide reasonable assurance of achieving the desired control objectives. Based upon our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures in place as of December 31, 2017, were effective.

(b) Management's Report on Internal Control over Financial Reporting. Our management, under the supervision of our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over our financial reporting, as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934, as amended. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes policies and procedures that:

pertain to the maintenance of our records that in reasonable detail accurately and fairly reflect our transactions during the year;

provide reasonable assurance that our transactions are recorded as necessary to permit the preparation of our financial statements in accordance with generally accepted accounting principles;

provide reasonable assurance that our receipts and expenditures are made only in accordance with authorizations of our management and Board of Directors (as appropriate); and

provide reasonable assurance regarding the prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2017, based on the framework for Internal Control-Integrated Framework (2013) set forth by The Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2017.

Our internal control over financial reporting as of December 31, 2017, has been audited by Kesselman & Kesselman, an independent registered public accounting firm in Israel and a member of PricewaterhouseCoopers International Limited, as stated in their report which is included under Item 18.

155

(c) Attestation report of the registered public accounting firm. The attestation report of Kesselman & Kesselman, an independent registered public accounting firm in Israel and a member of PricewaterhouseCoopers International Limited, regarding the Company’s internal control over financial reporting is included under Item 18.

(d) Changes in Internal Control Over Financial Reporting. During the year ended December 31, 2017, we changed our internal control over financial reporting to include internal controls related to the adoption of IFRS 15, for which we added controls for the calculations of contract costs capitalization and amortization, as well as the allocation of transaction price of contracts with customers to performance obligations based on their relative stand-alone selling prices and revenue recognition. There were no other changes in our internal control over financial reporting that occurred during the year ended December 31, 2017, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16.

16A. AUDIT COMMITTEE FINANCIAL EXPERT

The Board of Directors has determined that Dr. Michael Anghel, Mr. Barry Ben-Zeev and Mr. Arik Steinberg are “audit committee financial experts” as defined in Item 16A of Form 20-F. All the members of the audit committee are “independent directors” as defined in the SEC requirements applicable to us.

16B. CODE OF ETHICS

In 2016, we reviewed and updated our Code of Ethics. As previously, the revised Code of Ethics applies to our directors, officers and employees. The principal modifications to our Code of Ethics adopted in 2016 include: an updated statement setting forth the values underlying the Code of Ethics following the rebranding of our products and services and an updated detailed guide to appropriate behavior toward interested parties, including customers, suppliers, employees, directors, shareholders, franchisers and the community in which the Company operates.

A copy of our Code of Ethics is posted on our website at www.partner.co.il under “Investor Relations-Corporate Governance-Code of Ethics”.

16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Kesselman & Kesselman, our independent registered public accounting firm in Israel and a member of PricewaterhouseCoopers International Limited (“PwC”), have served as our independent public accountants for each of the fiscal years in the three-year period ended December 31, 2017, for which audited financial statements appear in this annual report on Form 20-F.

The following table presents the aggregate fees for professional services rendered by PwC to Partner in 2016 and 2017.

	2016 (NIS thousands)	2017 (NIS thousands)
Audit Fees (1)	2,251	2,483
Audit-related Fees (2)	349	402
Tax Fees (3)	551	585
TOTAL	3,151	3,470

(1)

Audit Fees consist of fees billed for the annual audit services engagement and other audit services, which are those services that only the external auditor can reasonably provide, and include the group audit; statutory audits; comfort letters and consents; and assistance with and review of documents filed with the SEC.

Audit-related Fees consist of fees billed for assurance and related services that are reasonably related to the (2) performance of the audit or review of our financial statements and include consultations concerning financial accounting and reporting standards, as well as the purchase of an accounting data base.

Tax Fees include fees billed for tax compliance services, including the preparation of tax returns and claims for tax (3) refund; tax consultations, such as assistance and representation in connection with tax audits and appeals, and requests for rulings or technical advice from taxing authority.

Audit Committee Pre-approval Policies and Procedures

Our audit committee's specific responsibilities in carrying out its oversight of the quality and integrity of the accounting, auditing and reporting practices of the Company include the approval of audit and non-audit services to be provided by the external auditor. The audit committee approves in advance the particular services or categories of services to be provided to the Company during the following yearly period and also sets forth a specific budget for such audit and non-audit services. Additional non-audit services may be pre-approved by the audit committee.

16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASES

Not applicable.

16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

16G. CORPORATE GOVERNANCE

See "Item 6C.5 NASDAQ Corporate Governance Rules and Our Practices", and also "Item 10B Memorandum and Articles of Association".

ITEM 17. FINANCIAL STATEMENTS

The company has responded to "Item 18. Financial Statements" in lieu of responding to this item.

ITEM 19. EXHIBITS

Pursuant to the rules and regulations of the Securities and Exchange Commission, we have filed certain agreements as exhibits to this annual report on Form 20-F. These agreements may contain representations and warranties by the parties. These representations and warranties have been made solely for the benefit of the other party or parties to such agreements and (i) may have been qualified by disclosures made to such other party or parties, (ii) were made only as of the date of such agreements or such other date(s) as may be specified in such agreements and are subject to more recent developments, which may not be fully reflected in our public disclosure, (iii) may reflect the allocation of risk among the parties to such agreements and (iv) may apply materiality standards different from what may be viewed as material to investors. Accordingly, these representations and warranties may not describe our actual state of affairs at the date hereof and should not be relied upon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders of
PARTNER COMMUNICATIONS COMPANY LTD.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statements of financial position of Partner Communications Company Ltd. and its subsidiaries as of December 31, 2017 and 2016, and the related consolidated statements of income, comprehensive income, changes in equity and of cash flows for each of the three years in the period ended December 31, 2017, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017 in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 2(n) to the consolidated financial statements, the Company changed the manner in which it accounts for revenues from contracts with customers in 2017.

Basis for Opinions

The Company's management and board of directors are responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in "Management's Report on Internal Control over Financial Reporting" appearing under Item 15(b). Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Supplementary information

At December 31, 2015, 2016 and 2017, trade and other payables include NIS 126 million, NIS 134 million and NIS 165 million (\$48 million) (including NIS 8 million with respect to costs of obtaining contracts with customers), respectively, in respect of acquisition of intangible assets and property and equipment; payments in respect thereof are presented in cash flows from investing activities.

These balances are recognized in the cash flow statements upon payment.

The accompanying notes are an integral part of the financial statements.

F - 11

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - GENERAL

a. Reporting entity

Partner Communications Company Ltd. ("the Company", "Partner") is a leading Israeli provider of telecommunications services (cellular, fixed-line telephony, internet and television services) under the orange™ brand until February 15, 2016, and under the Partner brand thereafter, and cellular services also under the 012 Mobile brand. The Company is incorporated and domiciled in Israel and its principal executive office's address is 8 Amal Street, Afeq Industrial Park, Rosh-Ha'ayin 48103, Israel.

The Company's share capital consists of ordinary shares, which are traded on the Tel Aviv Stock Exchange Ltd. ("TASE") under the symbol "PTNR". American Depositary Shares ("ADSs"), each representing one of the Company's ordinary shares, are quoted on the NASDAQ Global Select Market™, under the symbol "PTNR". See also note 21(a).

On January 29, 2013, S.B. Israel Telecom Ltd., an affiliate of Saban Capital Group Inc., became the Company's principal shareholder.

These consolidated financial statements of the Company as of December 31, 2017, are comprised of the Company and its subsidiaries and consolidated partnerships (the "Group"). See the list of subsidiaries and consolidated partnerships and principles of consolidation in note 2(c)(1), see also 2(c)(2) with respect to investment in PHI.

The Group has early adopted IFRS 15, Revenues from contracts with customers, as from January 1, 2017. See note 2(n).

b. Operating segments

The operating segments were determined based on the reports reviewed by the Chief Executive Officer (CEO) who is responsible for allocating resources and assessing performance of the operating segments, and therefore is the Chief Operating Decision Maker ("CODM"), and supported by budget and business plans structure, different regulations and licenses (see (d) below). The CEO considers the business from two operating segments, as follows (see also note 5):

(1) Cellular segment:

The cellular segment includes basic cellular telephony services, text messaging, internet browsing and data transfer, content services, roaming services, and services provided to other operators that use the Company's cellular network. The two payment methods offered to our customers are pre-paid and post-paid. Pre-paid services are offered to customers that purchase credit in advance of service use. Post-paid services are offered to customers with bank and credit arrangements. Most of the post-paid cellular tariff plans are bundles which include unlimited volumes of calls time and text messaging (with fair use limits), as well as limited data packages. Cellular content and value-added services offered include multimedia messaging, cyber protection, cloud backup, ringtones, the Apple Music streaming service, and a range of advanced business services.

International roaming services abroad for the Company's customers include airtime calls, text messaging and data services on networks with which the Company has a commercial roaming relationship. Partner also provides inbound roaming services to the customers of foreign operators with which the Company has a commercial roaming relationship.

Optional services such as equipment extended warranty plans and international calling plans are also provided for an additional monthly charge or included in specific tariff plans. We also provide cellular phone repair services for independent merchants.

In addition, the cellular segment includes wholesale cellular services provided to virtual operators who use the Partner cellular network to provide services to their customers.

F - 12

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - GENERAL (continued)

b. Operating segments (continued)

(2) Fixed-line segment

The fixed-line segment includes: (a) Internet services that provide access to the internet through both fiber optics and wholesale broadband access, ISP services and internet Value Added Services (“VAS”) such as cyber protection, anti-virus and anti-spam filtering; and fixed-line voice communication services provided through Voice Over Broadband (“VOB”); (b) For business customers, SIP voice trunks, Network Termination Point Services (“NTP”) – under which the Group supplies, installs, operates and maintains endpoint network equipment and solutions, including providing and installing equipment and cabling within a subscriber's place of business or premises, hosting services, transmission services, Primary Rate Interface (“PRI”) and other fixed-line communications solution services; (c) International Long Distance services (“ILD”): outgoing and incoming international telephony, hubbing, roaming and signaling and calling card services; (d) Commencing in third quarter of 2017: Television services over the Internet (“TV”).

The cellular segment and the fixed-line segment also include sales and leasing of telecommunications, audio visual and related devices: mainly cellular handsets, tablets (handheld computers), laptops, landline phones, modems, datacards, domestic routers, servers, smartboxes and related equipment, and a variety of digital audio visual equipment including televisions, digital cameras, games consoles, audio accessories and related equipment, and integration projects.

Each segment is divided into services and equipment revenues, and the related cost of revenues. The operating segments include the following measures: revenues, cost of revenues, operating profit (loss), and segment Adjusted EBITDA (see note 5(2)). The CODM does not examine assets or liabilities for the segments separately for the purposes of allocating resources and assessing performance of the operating segments and they are not therefore presented in note 5 segment information.

c. Main recent regulatory developments

As part of the Economic Program Law for the years 2017-2018, that was published at the end of December 2016 it was determined, among others, that Bezeq and HOT Telecom will be required to allow other domestic operators (1) including Partner, access to passive infrastructures. Following the enactment of this legislation, Bezeq has begun to partially observe its duty to provide access to its passive infrastructures and deployed several fiber optic cables for licensees using its own personnel.

In October 2017, the Ministry of Communications instructed Bezeq to comply with its existing policy and clarified that it must allow other domestic operators (including Partner) to deploy fiber optic cables with their own contractors (without the need for the use of Bezeq personnel).

(2) See information in respect of frequency fees in note 17(1).

(3) See information in respect of corporate tax rates in note 25.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - GENERAL (continued)

d. Group licenses

The Group operates under the following licenses that were received from the Israeli Ministry of Communications ("MOC") and from the Israeli Civil Administration ("CA"):

	Type of services	Area of service	License owner	Granted by	Valid through	Guarantees made (NIS millions)
(1)	Cellular	Israel	Partner Communications Company Ltd.	MOC	Feb, 2022	80
(2)	Cellular	West Bank	Partner Communications Company Ltd.	CA	Feb, 2022	4
(3)	ISP	Israel	Partner Communications Company Ltd.	MOC	Mar, 2023	
(4)	ISP	West Bank	Partner Communications Company Ltd.	CA	Mar, 2023	
(5)	ISP	Israel	012 Smile Telecom Ltd.	MOC	Jun, 2020	
(6)	ISP	West Bank	012 Smile Telecom Ltd.	CA	Jun, 2020	
(7)	ILD(*)	Israel	012 Smile Telecom Ltd.	MOC	Dec, 2029	5
(8)	ILD(**)	West Bank	012 Smile Telecom Ltd.	CA	Dec, 2029	0.25
(9)	Fixed(*)	Israel	012 Telecom Ltd.	MOC	Dec, 2025	5
(10)	Fixed(**)	West Bank	012 Telecom Ltd.	CA	Dec, 2025	0.25
(11)	Fixed(*) (incl. ISP, ILD, NTP)	Israel	Partner Land-line Communication Solutions - Limited Partnership	MOC	Jan, 2027	5
(12)	Fixed(**) (incl. ISP, ILD, NTP)	West Bank	Partner Land-line Communication Solutions - Limited Partnership	CA	Jan, 2027	0.25
(13)	NTP	Israel	012 Smile Telecom Ltd.	MOC	Dec, 2020	

The Group also has a trade license that regulates issues of servicing and trading of equipment, and a number of encryption licenses that permits dealing with means of encryption within the framework of providing radio telephone services to the public.

With respect to license (1), the Company is entitled to request an extension of the license for additional periods of six years, at the discretion of the MOC. Should the license not be renewed, the new license-holder is obliged to purchase the communications network and all the rights and obligations of the subscribers for a fair price, as agreed between the parties or as determined by an arbitrator.

(*) In February 2016, these licenses were replaced by the MoC with a general-unified license. The term of the new license is similar to the term of the previous license.

(**)

In July 2016, these licenses were replaced with a general-unified license. The general conditions of the general-unified license granted by the MoC, generally apply to these licenses, subject to certain modifications.

As part of the unification of the Group's licenses, in January 2018, the Group filed requests to terminate licenses (5),(6),(7),(8),(9),(10),(13).

Other licenses may be extended for various periods, at the discretion of the MOC or CA, respectively.

See also note 17(5) as to additional guarantees made to third parties.

F - 14

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

a. Basis of preparation of the financial statements

(1) Basis of preparation

The consolidated financial statements of the Company ("the financial statements") have been prepared in accordance with International Financial Reporting Standards (IFRSs), as issued by the International Accounting Standards Board (IASB).

The principal accounting policies set out below have been consistently applied to all periods presented unless otherwise stated.

(2) Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates, and requires management to exercise its judgment in the process of applying the Group's accounting policies. Areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

b. Foreign currency translations

(1) Functional and presentation currency

The consolidated financial statements are measured and presented in New Israeli Shekels ("NIS"), which is the Group's functional and presentation currency as it is the currency of the primary economic environment in which the Group operates. The amounts presented in NIS millions are rounded to the nearest NIS million.

(2) Transactions and balances

Foreign currency transactions are translated into NIS using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement in finance costs, net.

(3) Convenience translation into U.S. Dollars (USD or \$ or dollar)

The NIS figures at December 31, 2017 and for the period then ended have been translated into dollars using the representative exchange rate of the dollar at December 31, 2017 (USD 1 = NIS 3.467). The translation was made solely for convenience, is supplementary information, and is distinguished from the financial statements. The translated dollar figures should not be construed as a representation that the Israeli currency amounts actually represent, or could be converted into, dollars.

c. Interests in other entities

(1) Subsidiaries

The consolidated financial statements include the accounts of the Company and entities controlled by the Company. Control exists when the Company has the power over the investee; has exposure, or rights, to variable returns from involvement in the investee; and has the ability to use its power over the investee to affect its returns. Subsidiaries and partnerships are fully consolidated from the date on which control is transferred to the Company.

Inter-company transactions, balances, income and expenses on transactions between Group companies are eliminated in preparing the consolidated financial statements.

List of wholly owned Subsidiaries and partnerships:

012 Smile Telecom Ltd.

012 Telecom Ltd.

Partner Land-Line Communication Solutions - Limited Partnership

Partner Future Communications 2000 Ltd. ("PFC")

Partner Communication Products 2016 - Limited Partnership

Partner Business Communications Solution - Limited Partnership – not active

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

c. Interests in other entities (continued)

(2) Investment in PHI

In November 2013, the Company and Hot Mobile Ltd entered into a network sharing agreement ("NSA") and a right of use agreement. Pursuant to the NSA, the parties created a 50-50 limited partnership - P.H.I. Networks (2015) Limited Partnership ("PHI"), which operates and develops a radio access network shared by both parties, starting with a pooling of both parties' radio access network infrastructures creating a single shared pooled radio access network. PHI began its operations in July 2015, managing the networks. See also note 9.

As described in note 4(b)(3) the Company does not control PHI nor does it have joint control over it, and the Company accounts for its investment in PHI according to the equity method as PHI is considered an associate. An associate is an entity over which the group has significant influence but not control. Investment in associate is accounted for using the equity method of accounting. Under the equity method, the investment is initially recognized at cost, and adjusted thereafter to recognize the investor's share of the post-establishment profits or losses of the investee in profit or loss, and the group's share of movements in other comprehensive income of the investee in other comprehensive income.

Unrealized gains on transactions between the Group and the associate are eliminated to the extent of the Group's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

See also note 26(d) for information about transactions and balances with respect to the investment in PHI – as a related party.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

d. Inventories

Inventories of equipment: cellular handsets and fixed telephones, tablets, laptops, datacards, servers, spare parts, ISP modems, related equipment, accessories and other inventories are stated at the lower of cost or net realizable value. Cost is determined on the "first-in, first-out" basis. The Group determines its allowance for inventory obsolescence and slow moving inventory based upon past experience, expected inventory turnover, inventory ageing and current and future expectations with respect to product offerings.

e. Property and equipment

Property and equipment are initially stated at cost.

Costs are included in the assets' carrying amounts or recognized as separate assets, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance that do not meet the above criteria are charged to the statement of income during the financial period in which they are incurred.

Costs include expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labor, any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located.

Changes in the obligation to dismantle and remove assets on sites and to restore the sites, on which they are located, other than changes deriving from the passing of time, are added or deducted from the cost of the assets in the period in which they occur. The amount deducted from the cost of the asset shall not exceed the balance of the carrying amount on the date of change, and any balance is recognized immediately in profit or loss, See (m)(2).

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

Property and equipment is presented less accumulated depreciation, and accumulated impairment losses. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see (i)).

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

e. Property and equipment (continued)

Depreciation is calculated using the straight-line method over the estimated useful lives of the assets, as follows:

	years
Communications network:	
Physical layer and infrastructure	10 - 25 (mainly 15, 10)
Other Communication network	3 - 15 (mainly 5, 10, 15)
Computers, software and hardware for information systems	3-10 (mainly 3-5)
Office furniture and equipment	7-15
Optic fibers and related assets	7-25 (mainly 20)
Subscribers equipment and installations	2 - 4
Property	25

Leasehold improvements are depreciated by the straight-line method over the term of the lease (including reasonably assured option periods), or the estimated useful life (5 - 10 years) of the improvements, whichever is shorter.

See note 13(2) with respect of impairment charges in 2015.

f. Licenses and other intangible assets

(1) Licenses costs and amortization (see also note 1(d)):

The licenses to operate cellular communication services were recognized at cost. Borrowing costs which served to
 (a) finance the license fee - incurred until the commencement of utilization of the license - were capitalized to cost of the license.

(b) Partner Land-line Communication solutions – limited partnership's license for providing fixed-line communication services is stated at cost.

(c) 012 Smile and its subsidiaries' licenses were recognized at fair value in a business combination as of the acquisition date of 012 Smile March 3, 2011.

The other licenses of the Group were received with no significant costs.

The licenses are amortized by the straight-line method over their useful lives (see note 1(d)) excluding any ungranted possible future extensions that are not under the Group's control. The amortization expenses are included in the cost of revenues.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

f. Licenses and other intangible assets (continued)

(2) Computer software:

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and to bring to use the specified software.

Development costs, including employee costs, that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group are recognized as intangible assets when the capitalization criteria under IAS 38 are met. Other development expenditures that do not meet the capitalization criteria, such as software maintenance, are recognized as an expenses as incurred.

Computer software costs are amortized over their estimated useful lives (3 to 10 years) using the straight-line method, see also note 11.

(3) Customer relationships:

The Company has recognized as intangible assets customer relationships that were acquired in a business combination and recognized at fair value as of the acquisition date. Customer relationships are amortized to selling and marketing expenses over their estimated useful economic lives (5 to 10 years) based on the straight line method. See note 13(2) with respect of impairment charges in 2015.

(4) 012 Smile trade name:

Trade name was acquired in a business combination. In 2015, the Group decided to cease the usage of the "012 Smile" trade name in 2017. As a result the Group revised its expected useful life to end in 2017 as a change in accounting estimate. As a result the amortization expenses of the 012 Smile trade name increased by NIS 1 million, NIS 16 million, and NIS 6 million in 2015, 2016, 2017 respectively, see also notes 4(a)(2), and 13(2). As of December 31, 2017 the trade name was fully amortized.

(5) Capitalization of contract costs according to IFRS15 (see note 2(n)):

According to IFRS 15 (see note 2(n)) incremental costs of obtaining contracts with customers are recognized as assets when the costs are incremental to obtaining the contracts, and it is probable that the Group will recover these costs, instead of recognizing these costs in the statement of income as incurred (mainly direct commissions paid to resellers and sales employees for sales and upgrades). The assets are amortized in accordance with the expected service period (mainly over 2-3 years), using the portfolio approach, see also note 4(a)(1). IFRS 15 also determines that direct costs of fulfilling a contract which the Group can specifically identify and which produce or improve the Group's resources that are used for its future performance obligation (and it is probable that the Group will recover these costs) are recognized as assets (together: "contract costs"), see note 11. Contract costs that were recognized as assets are presented in the statements of cash flows as part of cash flows used in investing activities. Other costs incurred that would arise regardless of whether a contract with a customer was obtained are recognized as an expense when incurred.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

g. Right Of Use (ROU)

Right of use (ROU) of international fiber optic cables was acquired in a business combination, subsequent additions and right of use in PHI's assets are recognized at cost. The ROU with respect of fiber optic cables is presented as deferred expenses (current and non-current) and is amortized on a straight line basis over a period beginning each acquisition of additional ROU in this framework and until 2030 (including expected contractual extension periods). See also notes 12 and 17(4). See note 13(2) with respect to impairment charges to ROU in 2015 in an amount of NIS 76 million. Other costs of right to use PHI's assets are presented as deferred expenses and amortized on a straight line basis over the assets useful lives.

h. Goodwill

Goodwill acquired in a business combination represents the excess of the consideration transferred over the net fair value of the identifiable assets acquired, and identifiable liabilities and contingent liabilities assumed. The goodwill has an indefinite useful economic life and is not subject to amortization; rather is measured at cost less accumulated impairment losses. For the purpose of impairment testing, goodwill is allocated to a group of CGUs under the fixed line segment that is expected to benefit from the synergies of the combination. The group of CGUs represents the lowest level within the entity which the goodwill is monitored for internal management purposes.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. Any impairment loss would be recognized for the amount by which the carrying amount of goodwill exceeded its recoverable amount. The recoverable amount is the higher of value-in-use and the fair value less costs to sell. Value-in-use is determined by discounting expected future cash flows using a pre-tax discount rate. Any impairment is recognized immediately as an expense and is not subsequently reversed. See also note 13(1) with respect to impairment tests.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

i. Impairment of non-financial assets with finite useful economic lives

Assets that are subject to depreciation and amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If such indications exist an impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. If this is the case, recoverable amount is determined for the cash-generating unit (CGU) to which the asset belongs. The recoverable amount is the higher of an asset's fair value less costs to sell and value-in-use. Value-in-use is determined by discounting expected future cash flows using a pre-tax discount rate.

An impairment loss recognized in prior periods for an asset (or CGU) other than goodwill shall be reversed if, and only if, there has been a change in the estimates used to determine the asset's (or CGU's) recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset (or CGU) shall be increased to its recoverable amount. The increased carrying amount of an asset (or CGU) other than goodwill attributable to a reversal of an impairment loss shall not exceed the carrying amount that would have been determined (net of amortization or depreciation) had no impairment loss been recognized for the asset (or CGU) in prior years. A reversal of an impairment loss is recognized immediately in the statement of income.

The Group recorded in 2015 impairment charges of intangible assets, deferred expenses – right of use, and fixed assets, see note 13(2) and note 4(a)(2).

j. Financial instruments

The Group classifies its financial instruments in the following categories: (1) at fair value through profit or loss, (2) loans and receivables, and (3) liabilities at amortized cost. See note 6(c) as to classification of financial instruments to the categories.

Financial assets are classified as current if they are expected to mature within 12 months after the end of the reporting period; otherwise they are classified as non-current. Financial liabilities are included in current liabilities, except for maturities greater than 12 months after the end of the reporting period, which are classified as non-current liabilities. Financial assets and liabilities are offset and the net amount reported in the statement of financial position when the Group has currently a legal enforceable right to offset the recognized amounts and has an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legal enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

j. Financial instruments (continued)

(1) Financial instruments at fair value through profit or loss category:

Gains or losses arising from changes in the fair value of derivative financial instruments are presented in the income statement within "finance costs, net" in the period in which they arise. These financial instruments are classified into 2 levels based on their valuation method (see also note 6(c)):

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within level 1 that are observable for the assets or liabilities, either directly (as prices) or indirectly (derived from prices).

(2) Loans and receivables category:

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are recognized initially at fair value and subsequently measured at amortized costs using the effective interest method, less any impairment loss. Cash and cash equivalents are highly liquid investments, which include short-term bank deposits (up to 3 months from date of deposit) that are not restricted as to withdrawal or use.

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognized in the consolidated income statement. Trade receivables are presented net of allowance for doubtful accounts. Individual receivables which are known to be uncollectable are written off by reducing the carrying amount directly. The other receivables are assessed collectively. For these receivables the allowance is determined based on percentage of doubtful debts in collection, considering the likelihood of recoverability based on the age of the balances, the historical write-off experience net of recoveries, changes in the credit worthiness, and collection trends.

Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership of the assets. The Group factored trade receivables resulting from sales of equipment by credit cards. The factoring was on a non-recourse basis. The factoring of accounts receivable was recorded by the Company as a sales transaction. The results of the factoring transaction were charged to financial income and expenses on the settlement date, see also note 7(a).

(3) Financial liabilities and borrowings at amortized cost category:

Financial liabilities at amortized cost are non-derivative financial instruments with fixed or determinable payment, including trade payables. Financial liabilities at amortized cost are recognized initially at fair value, net of transaction costs, and subsequently measured at amortized costs using the effective interest method. See also note 15.

The Group revised its estimates of payments with respect to long term borrowings L and K due to early repayments (see note 15(5)), therefore the Group adjusted the carrying amount of the financial liabilities to reflect the actual and revised estimated cash flows. The Group recalculated the carrying amount by computing the present value of estimated future cash flows at the financial instrument's original effective interest rate. The adjustment was recognized in profit or loss as interest expense of NIS 18 million for 2017.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

k. Employee benefits

(i) Post-employment benefits

1. Defined contribution plan

According to Section 14 of the Israeli Severance Pay Law the Group's liability for some of the employee rights upon retirement is covered by regular contributions to various pension schemes. The schemes are generally funded through payments to insurance companies or trustee-administered funds. These plans are defined contribution plans, since the Group pays fixed contributions into a separate and independent entity. The Group has no legal or constructive obligations to pay further contribution if the fund does not hold sufficient assets to pay all employees the benefit relating to employee service in the current or prior periods. The amounts funded as above are not reflected in the statement of financial position. Obligations for contributions to defined contribution pension plans are recognized as an expense in the statement of income when they are due.

2. Defined benefit plan

Labor laws, agreements and the practice of the Group, require paying retirement benefits to employees dismissed or retiring in certain other circumstances (except for those described in 1 above), measured by multiplying the years of employment by the last monthly salary of the employee (i.e. one monthly salary for each year of tenure), the obligation of the Group to pay retirement benefits is treated as a defined benefit plan.

The liability recognized in the statement of financial position in respect of the defined benefit plan is the present value of the defined benefit obligation at end of the reporting period less the fair values of plan assets.

The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. According to IAS 19 employee benefits, the present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of deep market for high-quality corporate bonds.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Interest costs in respect of the defined benefit plan are charged or credited to finance costs.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

k. Employee benefits (continued)

(ii) Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits when it is demonstrably legally or constructively committed either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy.

(iii) Short term employee benefits

1. Vacation and recreation benefits

The employees are legally entitled to vacation and recreation benefits, both computed on an annual basis. This entitlement is based on the term of employment. This obligation is treated as a short term benefit under IAS 19. The Group charges a liability and expense due to vacation and recreation pay, based on the benefits that have been accumulated for each employee, on an undiscounted basis.

2. Profit-sharing and bonus plans

The Group recognizes a liability and an expense for bonuses based on consideration of individual performance and the Group's overall performance. The Group recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

3. Other short term benefits

The Group recognized expenses for other short term benefits provided by the collective employment agreement (see note 28).

l. Share based payments

The Group operates an equity-settled share-based compensation plan, under which the Group receives services from employees as consideration for equity instruments of the Group. The fair value of the employee services received in exchange for the grant of the equity instruments is recognized as an expense. The total amount to be expensed is determined by reference to the fair value of the equity instruments granted, at the grant date. Non-market vesting conditions are included among the assumptions used to estimate the number of options expected to vest. The total expense is recognized during the vesting period, which is the period over which all of the specified vesting conditions of the share-based payment are to be satisfied. At the end of each reporting period, the Group revises its estimates of the number of equity instruments that are expected to vest based on the vesting conditions, and recognizes the impact of the revision of original estimates, if any, in the statement of income, with corresponding adjustment to accumulated earnings.

The proceeds received net of any directly attributable transactions costs are credited to share capital and capital surplus when the equity instruments are exercised.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

m. Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will require settling the obligation, and the amount has been reliably estimated, See note 14.

In the ordinary course of business, the Group is involved in a number of lawsuits and litigations. The costs that may result from these lawsuits are only accrued for when it is probable that a liability, resulting from past events, will be incurred and the amount of that liability can be quantified or estimated within a reasonable range. The amount of the provisions recorded is based on a case-by-case assessment of the risk level, and events arising during (1) the course of legal proceedings that may require a reassessment of this risk, and where applicable discounted at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. The Group's assessment of risk is based both on the advice of legal counsel and on the Group's estimate of the probable settlements amount that are expected to be incurred, if any. See also note 20.

The Company is required to incur certain costs in respect of a liability to dismantle and remove assets and to restore sites on which the assets were located. The dismantling costs are calculated according to best estimate of (2) future expected payments discounted at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as finance costs.

Provisions for equipment warranties include obligations to customers in respect of equipment sold. Where there are a number of similar obligations, the likelihood that an outflow will be required in a settlement is determined by (3) considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any item included in the same class of obligations may be small.

(4) Group's share in provisions recognized by PHI is recognized to the extent probable that the Group will be required to cover, see also note 9.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

n. Revenues

Early adoption of IFRS 15 Revenue from Contracts with Customers – change in accounting policy:

In the third quarter of 2017 the Group has early adopted (the standard is effective from January 1, 2018, earlier application is permitted) with a date of initial application of January 1, 2017 (the transition date) IFRS 15, Revenue from Contracts with Customers, and its clarifications ("IFRS 15", "The Standard") using the cumulative effect approach, which effect was immaterial as of the transition date. The standard outlines a single comprehensive model of accounting for revenue arising from contracts with customers and supersedes IAS 18, Revenue, and IAS 11, Construction contracts (the "previous standards"). The model includes five steps for analyzing transactions so as to determine when to recognize revenue and at what amount:

- 1) Identifying the contract with the customer.
- 2) Identifying separate performance obligations in the contract.
- 3) Determining the transaction price.
- 4) Allocating the transaction price to separate performance obligations.
- 5) Recognizing revenue when the performance obligations are satisfied.

In accordance with the model, the Group recognizes revenue when it satisfies performance obligations by transferring control over the goods or services to the customers. Revenue is measured based on the consideration that the Group expects to receive for the transfer of the goods or services specified in a contract with the customer, taking into account rebates and discounts, excluding amounts collected on behalf of third parties, such as value added taxes. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component (such as sales of equipment with non-current credit arrangements, mainly in 36 monthly installments) and for any consideration payable to the customer. With respect to sales that constitute a revenue arrangement with multiple performance obligations, the transaction price is allocated to separate performance obligations based of their relative stand-alone selling prices, see also note 4(b)(2).

The performance obligations are separately identifiable where the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from other promises in the contract. The performance obligations are mainly services, equipment and options to purchase additional goods or services that provide a material right to the customer. Revenues from services and from providing rights to use the Group's assets, (see note 1(b)) (either month-by-month or long term arrangements) are recognized over time, as the services are rendered to the customers, and all other revenue recognition criteria are met. Revenue from sale of equipment (see note 1(b)) is recognized at a point of time when the control over the equipment is transferred to the customer (mainly upon delivery) and all other revenue recognition criteria are met.

The Group determines whether it is acting as a principal or as an agent. The Group is acting as a principal if it controls a promised good or service before they are transferred to a customer. Indicators for acting as a principal include: (1) the Group is primarily responsible for fulfilling the promise to provide the specified good or service, (2) the Group has inventory risk in the specified good or service and (3) the Group has discretion in establishing the price for the specified good or service. On the other hand, the Group is acting as an agent or an intermediary, if these criteria are not met. When the Group is acting as an agent, revenue is recognized in the amount of any fee or commission to which the Group expects to be entitled in exchange for arranging for the other party to provide its goods or services. A Group's fee or commission might be the net amount of consideration that the Group retains after paying the other party the consideration received in exchange for the goods or services to be provided by that party. The Group determined that it is acting as an agent in respect of certain content services provided by third parties to customers; therefore the

revenues recognized from these services are presented on a net basis in the statement of income.

F - 27

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

n. Revenues (continued)

The application of IFRS 15 did not have a material effect on the measurement and timing of the Group's revenue in the reporting period, compared to the provisions of the previous standards.

Capitalization of contract costs resulted in a significant impact from the adoption, see below.

Transition to the new revenue recognition model:

The Group applied IFRS 15 using the cumulative effect approach as from the transition date, without a restatement of comparative figures. As part of the initial implementation of IFRS 15, the Group has chosen to apply the expedients in the transitional provisions, according to which the cumulative effect approach is applied only for contracts not yet complete at the transition date, and therefore there is no change in the accounting treatment for contracts completed at the transition date. The Group also applied the practical expedient of examining the aggregate effect of contracts changes that occurred before the transition date, instead of examining each change separately. Contracts that are renewed on a monthly basis and may be cancelled by the customer at any time, without penalty, were considered completed contracts at the transition date. The transition resulted in an immaterial amount on the statement of financial position as of the transition date, as the cumulative effect as of the transition date was immaterial.

Other practical expedients implemented:

The Group applies IFRS 15 practical expedient to the revenue model to a portfolio of contracts with similar characteristics if the Group reasonably expects that the financial statement effects of applying the model to the individual contracts within the portfolio would not differ materially.

The Group applies a practical expedient in the standard and measures progress toward completing satisfaction of a performance obligation and recognizes revenue based on billed amounts if the Group has a right to invoice a customer at an amount that corresponds directly with its performance to date; for which, or where the original expected duration of the contract is one year or less, the group also applies the practical expedient in the standard and does not disclose the transaction price allocated to unsatisfied, or partially unsatisfied, performance obligations, such as constrained variable consideration.

The Group applies a practical expedient in the standard and does not adjust the transaction price for the effects of a significant financing component if, at contract inception, the Group expects the period between customer payment and the transfer of goods or services to be one year or less (see note 23 – unwinding of trade receivables and note 7(a)).

The Group applies in certain circumstances where the customer has a material right to acquire future goods or services and those goods or services are similar to the original goods or services in the contract and are provided in accordance with the same terms of the original contract, a practical alternative to estimating the stand-alone selling price of the customer option, and instead allocates the transaction price to the optional goods or services by reference to the goods or services expected to be provided and the corresponding expected consideration.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

n. Revenues (continued)

Recognition of receivables:

A receivable is recognized when the control over the goods or services is transferred to the customer, and the consideration is unconditional because only the passage of time is required before the payment is due. See note 7 and also note 6(a)(3) regarding trade receivables credit risk.

Recognition of contract assets and contract liabilities:

A contract asset is a Group's right to consideration in exchange for goods or services that the entity has transferred to a customer when that right is conditioned on something other than the passage of time (for example, the Group's future performance).

A contract liability is a Group's obligation to transfer goods or services to a customer for which the entity has received consideration (or the amount is due) from the customer; therefore the Group records contract liabilities for payments received in advance for services, such as transmission services and pre-paid calling cards, as deferred revenues until such related services are provided.

Capitalization of contract costs:

The main effect of the Group's application of IFRS 15 is the accounting treatment for the incremental costs of obtaining contracts with customers, which in accordance with IFRS 15, are recognized as assets under certain conditions, see notes 2(f)(5), 11.

Under the previous accounting policy these costs were not capitalized, and instead, subsidies, in some cases, of sales of handsets to end subscribers at a price below its cost, securing a fixed-term service contract were capitalized as subscriber acquisition and retention costs (SARC costs). SARC costs were eliminated upon the transition to IFRS 15, see note 11.

Use of judgments and estimates:

Implementation of the accounting policy described above requires management to exercise discretion in estimates and judgments, see notes 4(a)(1) and 4(b)(2).

See additional information with respect to revenues in note 22(a).

F - 30

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

o. Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from lessor) are charged to income statements on a straight-line basis over the lease term, including extending options which are reasonably certain.

p. Tax expenses

The tax expense for the period comprises current and deferred tax. Tax is recognized in the income statement except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantially enacted as of the end of the reporting period. Management periodically evaluates positions taken with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized on temporary differences arising between that tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognized if they arise from initial recognition of goodwill. Deferred income tax is determined using the tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax is realized or the deferred income tax liability is settled. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. Deferred income tax assets are presented as non-current, see also note 25.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on the same taxable entity where there is an intention to settle the balances on a net basis.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

q. Share capital

Ordinary shares are classified as equity.

Company's shares acquired by the Company (treasury shares) are presented as a reduction of equity, at the consideration paid, including any incremental attributable costs, net of tax. Treasury shares do not have a right to receive dividends or to vote. See also note 21(a)

r. Earnings Per Share (EPS)

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the year excluding ordinary shares purchased by the Company and held as treasury shares.

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume exercise of all dilutive potential ordinary shares. The instruments that are potential dilutive ordinary shares are equity instruments granted to employees, see note 21(b). A calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average annual market share price of the company's shares) based on the monetary value of the subscription rights attached to outstanding share options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options (see note 27).

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 3 – RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

The following relevant new standards, amendments to standards or interpretations have been issued, but are not effective for the financial periods beginning January 1, 2017, and have not been early adopted:

(1) IFRS 9, Financial Instruments, addresses the classification, measurement and derecognition of financial assets and financial liabilities, introduces new rules for hedge accounting and a new impairment model for financial assets. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortized cost, fair value through OCI and fair value through profit or loss. It introduces a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. The Group will apply the new rules retrospectively from January 1, 2018, with the practical expedients permitted under the standard. Comparatives for 2017 will not be restated. The effect of IFRS 9 implementation is not expected to be material.

(2) IFRS 16, Leases, was issued in January 2016. It will result in almost all leases, where the Group is the lessee, being recognized on the balance sheet, as the distinction between operating and finance leases is removed for lessees. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognized. The only exceptions are short-term and low-value leases. The accounting for lessors will not significantly change. The standard will affect primarily the accounting for the Group's operating leases. As at the reporting date, the Group has non-cancellable operating lease commitments of NIS 578 million (undiscounted) see note 19(5). However, the group has not yet assessed what adjustments, are necessary. It is therefore not yet possible to estimate the amount of right-of-use assets and lease liabilities that will have to be recognized on adoption of the new standard and how this will affect the Group's profit or loss and classification of cash flows going forward. The Standard is mandatory for financial years commencing on or after January 1, 2019, early application is permitted.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4 –CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

a. Critical accounting estimates and assumptions

(1) Assessing the useful lives of assets:

The useful economic lives of the Group's assets are an estimate determined by management. The Group defines useful economic life of its assets in terms of the assets' expected utility to the Group. This estimation is based on assumptions of future changes in technology or changes in the Group's intended use of these assets, and experience of the Group with similar assets, and legal or contract periods where relevant. The assets estimated economic useful lives are reviewed, and adjusted if appropriate, at least annually. See also note 2(e) and note 2(f). See also information with respect to the change in estimate of the useful life of the "012 Smile" trade name in note 4(2) below.

The useful economic lives of contract costs (see notes 2(n), 2(f)(5)) are an estimate determined by management. Contract costs are amortized in accordance with the expected service period (mainly over 2-3 years), using the portfolio approach. The assets estimated economic useful lives are reviewed, and adjusted if appropriate, at least annually. See also note 11.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4 –CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

a. Critical accounting estimates and assumptions (continued)

(2) Assessing the recoverable amount for impairment tests of assets with finite useful lives:

The Group is required to determine at the end of each reporting period whether there is any indication that an asset may be impaired. If indicators for impairment are identified the Group estimates the assets' recoverable amount, which is the higher of an asset's fair value less costs to sell and value in use. The value-in-use calculations require management to make estimates of the projected future cash flows. Determining the estimates of the future cash flows is based on management past experience and best estimate for the economic conditions that will exist over the remaining useful economic life of the Cash Generating Unit (CGU). See also note 2(i).

No indicators for an impairment or reversal of impairment of assets with finite useful lives were identified in 2017.

In the fourth quarter of 2015, the Group decided to cease the usage of the "012 Smile" trade name in 2017, this change in business induced the Group to determine that an indicator of impairment existed in 2015 for the fixed-line segment. See note 13(2). An Impairment test in the fourth quarter of 2015 for the VOB/ISP CGU of the fixed line segment resulted in an impairment charge to certain assets in a total amount of NIS 98 million, based on the key assumptions described in note 13(2). The recoverable amount of the VOB/ISP CGU assets as of December 31, 2015 was assessed by management with the assistance of an external independent expert ("Giza Singer Even. Ltd") based on value-in-use calculations, which was NIS 250 million. The value in use calculations use pre-tax cash flow projections covering a five-year period and using extrapolation with specific adjustments expected until 2027, which was the economic life of the main asset of the CGU: the deferred expenses – Right of Use, and a pre-tax discount rate of 12.9%. The value-in-use calculations included all factors in real terms. The value-in-use of the assets of the CGU was estimated to exceed the fair value less costs to sale. The impairment test in the fourth quarter of 2015 was based on assessments of financial performance and future strategies in light of current and expected market and economic conditions.

Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts in future periods. See also note 2(i).

As a result of the decision to cease the usage of the "012 Smile" trade name the Group revised in 2015 its expected useful life to end in 2017 as a change in accounting estimate. As a result the amortization expenses of the trade name increased in 2015, 2016 and 2017 by NIS 1 million, NIS 16 million and NIS 6 million, respectively (compared with the amortization rate in 2014). See also note 11.

Further increase in the level of competition that might continue to push downward prices may require the Group to perform further impairment tests of assets. Such impairment tests may lead to recording significant impairment charges, which could have a material negative impact on the Group's operating profit and profit.

 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4 –CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

a. Critical accounting estimates and assumptions (continued)

(3) Assessing the recoverable amount of goodwill for impairment tests:

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The recoverable amount of the fixed line segment to which goodwill has been allocated to have been determined based on value-in-use calculations. For the purpose of the goodwill impairment tests as of December 31, 2015, 2016 and 2017 the recoverable amount was assessed by management with the assistance of an external independent experts (2015: "Giza Singer Even. Ltd", 2016 and 2017: BDO Ziv Haft Consulting & Management Ltd.) based on value-in-use calculations. The value-in-use calculations use pre-tax cash flow projections covering a five-year period. Cash flows beyond the five-year period to be generated from continuing use are extrapolated using estimated growth rates. The growth rate represents the long-term average growth rate of the fixed-line communications services business.

The key assumptions used in the December 31, 2017 test were as follows:

Terminal growth rate	0.9 %
After-tax discount rate	9.3 %
Pre-tax discount rate	11.2%

The impairment test as of December 31, 2017 was based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts. See also note 13(1) and note 2(h). No impairment charges were recognized with respect to goodwill in 2015, 2016 and 2017.

Sensitivity Analysis:

The headroom of the fixed line segment recoverable amount over the carrying amount as of December 31, 2015, 2016 and 2017 was approximately 9%, 23% and 23% respectively. Sensitivity analysis was performed for the recoverable amount as of December 31, 2017 for a change of the after-tax discount rate within the range of $\pm 10\%$ multiplied by the variable 9.3% (8.4% to 10.2%), assuming all other variables constant. Sensitivity analysis was also performed for a change of the terminal permanent growth rate within the range of $\pm 1\%$ of the variable 0.9% (minus 0.9% to 1.9%), assuming all other variables constant. Results showed that no impairment charge is required for both analyses.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4 –CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

a. Critical accounting estimates and assumptions (continued)

(4) Assessing allowance for doubtful accounts:

The allowance is established when there is objective evidence that the Group will not be able to collect amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, or delinquency or default in debtor payments are considered indicators that a trade receivable is impaired. Individual receivables which are known to be uncollectable are written off by reducing the carrying amount directly. The other receivables are assessed collectively. For these receivables the allowance is determined based on percentage of doubtful debts in collection, considering the likelihood of recoverability based on the age of the balances, the historical write-off experience net of recoveries, changes in the credit worthiness, and collection trends. The trade receivables are periodically reviewed for impairment. See note 7.

(5) Considering uncertain tax positions:

The assessment of amounts of current and deferred taxes requires the Group's management to take into consideration uncertainties that its tax position will be accepted and of incurring any additional tax expenses. This assessment is based on estimates and assumptions based on interpretation of tax laws and regulations, and the Group's past experience. It is possible that new information will become known in future periods that will cause the final tax outcome to be different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. See also notes 2(p) and note 25.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4 – CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

b. Critical judgments in applying the Group's accounting policies

(1) Considering the likelihood of contingent losses and quantifying possible settlements:

Provisions are recorded when a loss is considered probable and can be reasonably estimated. Judgment is necessary in assessing the likelihood that a pending claim or litigation against the Group will succeed, or a liability will arise, quantifying the possible range of final settlement. These judgments are made by management with the support of internal specialists, or with the support of outside consultants such as legal counsel. Because of the inherent uncertainties in this evaluation process, actual results may be different from these estimates. See notes 2(m), 14 and 20.

(2) Considering contracts with customers with multiple performance obligations:

Some contracts with customers include several performance obligations, and consideration (including any discounts) is allocated to them based their relative stand-alone selling prices.

Management estimates the stand-alone selling price at contract inception based on observable prices of the type of goods and services in similar circumstances to similar customers. Where these are not directly observable, they are estimated based on cost-plus expected margin or adjusted market approach. See also note 2(n).

(3) Accounting treatment for the investment in PHI:

The board of directors of Net 4 P.H.I Ltd. consists of 3 directors nominated by the Company, 3 directors nominated by Hot Mobile and one independent director who acts as a chairman. Net 4 P.H.I Ltd controls PHI. This governance provides that the Company does not control PHI nor does it have joint control over it, and the Company accounts for its investment in PHI according to the equity method, see also note 2(c)(2) and note 9.

NOTE 5 – SEGMENT INFORMATION (continued)

(1) Mainly amortization of employee share based compensation.

Adjusted EBITDA as reviewed by the CODM represents Earnings Before Interest (finance costs, net), Taxes, Depreciation and Amortization (including amortization of intangible assets, deferred expenses-right of use and impairment charges) and Other expenses (mainly amortization of share based compensation). Adjusted EBITDA is not a financial measure under IFRS and may not be comparable to other similarly titled measures for other (2) companies. Adjusted EBITDA may not be indicative of the Group's historic operating results nor is it meant to be predictive of potential future results. The usage of the term "Adjusted EBITDA" is to highlight the fact that the Amortization includes amortization of deferred expenses – right of use and amortization of employee share based compensation and impairment charges; it is fully comparable to EBITDA information which has been previously provided for prior periods.

(3) Operating expenses include selling and marketing expenses and general and administrative expenses.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

a. Financial risk factors

The Group is exposed to a variety of financial risks: credit, liquidity and market risks as part of its normal course of business. The Group's risk management objective is to monitor risks and minimize the possible influence that results from this exposure, according to its evaluations and expectations of the parameters that affect the risks.

1. Risk Management

Risk management is carried out by the financial division under policies and/or directions resolved and approved by the audit committee and the board of directors.

2. Market risks

(a) Description of market risks

Cash flow risk due to interest rate changes and CPI changes

The Group is exposed to fluctuations in the Israeli Consumer Price index (CPI) notes payable which are linked to the CPI. The Group did not enter into CPI hedging transactions in 2015, 2016 and 2017.

Furthermore, the Group's notes payable bearing variable interest rate cause cash flow risks. Based on simulations performed, an increase (decrease) of 1% interest rates during 2017 in respect of the abovementioned financial instruments would have resulted in an annual increase (decrease) in interest expenses of NIS 5 million. The Group does not enter into interest rate hedging transactions.

Foreign exchange risk

The Group's operating income and cash flows are exposed to currency risk, mainly due to trade receivables and trade payables denominated in USD. The Group did not enter into free standing forward transactions in 2015, 2016 and 2017.

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

a. Financial risk factors (continued)

2. Market risks (continued)

(a) Description of market risks (continued)

Data regarding the US Dollar and Euro exchange rate and the Israeli CPI:

	Exchange rate of one Dollar	Exchange rate of one Euro	Israeli CPI*
At December 31:			
2017	NIS 3.467	NIS 4.153	221.57 points
2016	NIS 3.845	NIS 4.044	220.68 points
2015	NIS 3.902	NIS 4.247	221.13 points
Increase (decrease) during the year:			
2017	(9.8)%	2.7 %	0.4 %
2016	(1.5)%	(4.8)%	(0.2)%
2015	0.3 %	(10.1)%	(1.0)%

* Index for each reporting period's last month, on the basis of 1993 average = 100 points.

Sensitivity analysis:

An increase (decrease) of 2% in the CPI as at December 31, 2015, 2016 and 2017 would have decreased (increased) equity and profit by NIS 20 million, NIS 9 million, and NIS 3 million, for the years ended December 31, 2015, 2016, 2017 respectively, assuming all other variables remain constant.

An increase (decrease) of 5% in the USD exchange rate as at December 31, 2015, 2016 and 2017 would have decreased (increased) equity and profit by NIS 5 million, NIS 3 million, and NIS 3 million, for the years ended December 31, 2015, 2016, 2017 respectively, assuming that all other variables remain constant.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

a. Financial risk factors (continued)

3. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's trade receivables, and also from cash and cash equivalents and other receivables. Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. The Group conducts credit evaluations on receivables of certain types over a certain amount, and requires collaterals against them. Accordingly, the financial statements include appropriate allowances for estimated irrecoverable amounts. See also note 2(j)(2).

The face amount of financial assets represents the maximum credit exposure, see note 6(c).

The cash and cash equivalents are held in leading Israeli commercial banks, rated by Standard & Poor's Maalot at between ilAA+/Stable to ilAAA/stable.

The trade receivables are significantly widespread, and include individuals and businesses, and therefore have no representing credit rating.

See also note 7 as to the assessment by aging of the trade receivables and related allowance for doubtful accounts.

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

a. Financial risk factors (continued)

4. Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, without incurring unacceptable losses or risking damage to the Group's reputation. The Group's policy is to ensure that it has sufficient cash and cash equivalents to meet expected operational expenses and financial obligations.

Maturities of financial liabilities as of December 31, 2017:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 6 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

c. Fair values of financial instruments

As detailed in note 2(j) the financial instruments are categorized as following:

Fair Value through Profit or Loss (FVTPL); Loans and Receivables (L&R); Amortized Cost (AC). The financial instruments that are categorized FVTPL are derivative financial instruments. Their fair values are calculated by discounting estimated future cash flows based on the terms and maturity of each contract and using forward rates for a similar instrument at the measurement date. All significant inputs in this technique are observable market data and rely as little as possible on entity specific estimates – this method matches the "Level 2" fair value measurement level hierarchy. There were no transfers between fair value levels during the year. Carrying amounts and fair values of financial assets and liabilities, and their categories:

Category		December 31, 2016		December 31, 2017		Interest rate used (**)	Interest rate used (**)
		Carrying amount	Fair value	Carrying amount	Fair value

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 7 – TRADE RECEIVABLES

(a) Composition:

	New Israeli Shekels	
	December 31	
	2016	2017
	In millions	
Trade (current and non-current)	1,545	1,260
Deferred interest income (note 2(n))	(32)	(27)
Allowance for doubtful accounts	(190)	(193)
	1,323	1,040
Current	990	808
Non – current	333	232

Non-current trade receivables bear no interest. These balances are in respect of equipment sold in installments (13-36 monthly payments (mainly 36)). The amount is computed on the basis of the interest rate relevant at the date of the transaction (2016: 3.72% - 4.72%) (2017: 4.47% - 4.72%).

During 2016 the Company factored some trade receivables resulting from sales of equipment through credit cards in an amount of NIS 72 million. The factoring was executed through a clearing company, on a non-recourse basis. The factoring of accounts receivable was recorded by the Company as a sale transaction under the provisions of IAS 39. The resulting costs were charged to "finance expenses" in the statement of income, as incurred. The Group does not have continuing involvement in the factored trade receivables.

(b) Allowance for doubtful accounts:

The changes in the allowance for the years ended December 31, 2015, 2016 and 2017 are as follows:

	New Israeli Shekels		
	Year ended		
	2015	2016	2017
	In millions		
Balance at beginning of year	166	169	190
Receivables written-off during the year as uncollectible	(61)	(61)	(49)
Charge or expense during the year	64	82	52
Balance at end of year	169	190	193

Doubtful accounts expenses are recorded in the statement of income under General and administrative expenses. See note 6(a)(3) regarding trade receivables credit risk.

Allowance for doubtful accounts resulting from services provided under operating lease are not separately disclosed due to immateriality.

NOTE 9 – INVESTMENT IN PHI

Network sharing agreement and right of use

On November 8, 2013 the Company and Hot Mobile Ltd. ("Hot Mobile") entered into a 15-year network sharing agreement ("NSA"), which was approved by the Antitrust Commissioner as described below, and by the Ministry of Communications. Pursuant to the NSA, the parties created a 50-50 limited partnership - P.H.I. Networks (2015) Limited Partnership (hereinafter "PHI"), which operates and develops a radio access network shared by both parties, starting with a pooling of both parties' radio access network infrastructures creating a single shared pooled radio access network (the "Shared Network"). The parties also established a 50-50 company limited by shares under the name Net 4 P.H.I Ltd., to be the general partner of the limited partnership. In May 2014, the Antitrust Commissioner (the "Commissioner") approved the NSA, subject to conditions that include: (a) Prohibition on exchange of information that is not required for the activities of PHI; (b) Limitations with respect to the serving as an officer or employee in either of the companies concurrent with serving as an officer or employee in PHI and certain cooling off periods were set in case of transition of officers and employees from PHI to the companies. However, this should not prevent PHI from employing employees or officers, that are currently serving as employees or officers in the companies (that is, employees will move to PHI and work for PHI only); (c) As of April 2021, the Commissioner will be allowed to notify the parties of the cancellation of his resolution, if at that time it will be of his opinion that the establishment of PHI, its existence or operations are liable to be substantively detrimental to competition, in which case the parties will be required to cease sharing the active part of the shared network within two years and the passive parts within five years from the Antitrust Commissioner's notice to that effect.

In February 2016, HOT Mobile exercised its option under the NSA to advance the payment date of a onetime amount of NIS 250 million ("Lump Sum"), which was received by the Group in 2016. Therefore in accordance the NSA from April 2016 onward (i) each party bears half of the expenditures relating to the Shared Network, and (ii) the bearing of the operating costs of the Shared Network is according to a pre-determined mechanism, according to which one half of the operating costs is shared equally by the parties, and one half is divided between the parties according to the relative volume of traffic consumption of each party in the Shared Network (the "Capex-Opex Mechanism"). The Lump Sum is treated by the Group as payments for rights of use of the Group's network and therefore recognized as deferred revenue which is amortized to revenues in the income statement over a period of eight years, which is determined to be the shorter of the expected period of the arrangement or the expected life of the related assets, see note 22(a).

The NSA term will be automatically extended for consecutive terms of five years each, unless either party provided the other party with prior notice of at least two years prior to the commencement of the respective extended term. At any time after the eighth anniversary of the NSA's effective date (i.e. following April 2023), either party may provide the other party with two years termination notice, and terminate the NSA, without cause, effective as of the end of the said two-year period. On the expiry of the NSA, other than following a material breach, the parties shall divide the network between themselves according to a mechanism provided by the NSA, based on the parties then-respective interests in PHI, with priority that each party shall first receive its own assets.

On November 8, 2013, the Company and Hot Mobile entered into a separate Right of Use agreement which was valid until March 2016 ("ROU"), under which the Company provided services to Hot Mobile, in the form of access to use its cellular network. According to the ROU, Hot Mobile paid the Company fixed base payments together with additional variable payments which were based, among other things, on traffic exceeding a defined threshold. Hot Mobile ceased making payments under the ROU from April 2016. In 2015 and 2016, the Company recorded revenues

relating to the ROU in amounts of approximately NIS 120 million and NIS 51 million, respectively.

See also note 26(d) with respect to transactions and balances with PHI.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 13 – IMPAIRMENT TESTS

(1) Goodwill impairment tests

Goodwill is allocated to a single group of CGUs which constitute all the operations of the fixed-line segment, in an amount of NIS 407 million.

For the purpose of the goodwill impairment tests as of December 31, 2015, 2016 and 2017 the recoverable amount was assessed by management with the assistance of an external independent experts (2015: "Giza Singer Even. Ltd", 2016 and 2017: BDO Ziv Haft Consulting & Management Ltd.) based on value-in-use calculations. The value-in-use calculations use pre-tax cash flow projections covering a five-year period. Cash flows beyond the five-year period to be generated from continuing use are extrapolated using estimated growth rates. The growth rate represents the long-term average growth rate of the fixed-line communications services business. The key assumptions used are as follows:

	As of December 31,		
	2015	2016	2017
	(negative)		
Terminal growth rate	0.09%	0.5 %	0.9 %
After-tax discount rate	10.3%	9.8 %	9.3 %
Pre-tax discount rate	13.4%	11.9%	11.2%

The impairment tests as of December 31, 2015, 2016 and 2017 were based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts. As a result of the impairment tests, the Group determined that no goodwill impairment existed as of December 31, 2015, 2016 and 2017. See also note 4(a)(3) and note 2(h).

(2) Impairment tests of assets with finite useful lives

No indicators for impairment or reversal of impairment of assets with finite useful lives were identified in 2016 and 2017.

In 2015, the Group decided to cease the usage of the "012 Smile" trade name in 2017, this change in business induced the Group to determine that an indicator of impairment exist for the fixed-line segment. See also information with respect to change in estimate of useful life of the intangible asset trade name in note 4(a)(2) and 4(a)(1). For the purpose of the impairment test, the assets were grouped to the lowest level for which there are separately identifiable cash flows (CGU).

The Group reviewed in 2015 the recoverability of the VOB/ISP CGU assets. As a result, an impairment charge in a total amount of NIS 98 million was recognized in 2015. The impairment charge was allocated to the assets of the (i) CGU pro rata, on the basis of the carrying amount of each asset, provided that the impairment did not reduce the carrying amount of an asset below the highest of its fair value less costs to sell and its value-in-use, and zero. Accordingly, the following impairment charges were recorded in 2015 in the assets of the above CGU:

- (a) Right of use by NIS 76 million, recorded in cost of revenues (see note 12).
- (b) Customer relationships by NIS 8 million, recorded in selling and marketing expenses.
- (c) Computers and information systems by NIS 7 million, recorded in cost of revenues.
- (d) Communication network by NIS 5 million, recorded in cost of revenues.
- (e) Trade name by NIS 2 million, recorded in selling and marketing expenses.

F - 58

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 13 – IMPAIRMENT TESTS (continued)

(2) Impairment tests of assets with finite useful lives (continued)

The recoverable amount of the VOB/ISP CGU assets as of December 31, 2015 was assessed by management with the assistance of an external independent expert ("Giza Singer Even. Ltd") based on value-in-use calculations, which was NIS 250 million. The value in use calculations use pre-tax cash flow projections covering a five-year period and using extrapolation with specific adjustments expected until 2027, which was the economic life of the main asset of the CGU: the deferred expenses – Right of Use, and a pre-tax discount rate of 12.9%. The value-in-use calculations included all factors in real terms. This impairment test was based on assessments of financial performance and future strategies in light of current and expected market and economic conditions. Trends in the economic and financial environment, competition and regulatory authorities' decisions, or changes in competitors' behavior in response to the economic environment may affect the estimate of recoverable amounts in future periods. See also note 2(i) and note 4(a)(2).

(ii) The Group reviewed the recoverability of the ILD CGU of the fixed line segment and determined that no impairment existed as of December 31, 2015.

NOTE 15 –BORROWINGS AND NOTES PAYABLE

(1) Borrowings and Notes Payable

The Group has received borrowings from leading Israeli commercial banks and institutions. The Group may, at its discretion early repay the borrowings, subject to certain conditions, including that the Group shall reimburse the lender for losses sustained by it as a result of the early repayment. The reimbursement is mainly based on the difference between the interest rate that the Group would otherwise pay and the current market interest rate on the early repayment date.

The notes payable are unsecured, non-convertible and listed for trade on the TASE.

The notes payable have been rated ilA+, on a local scale, by Standard & Poor's Maalot.

Composition as of December 31, 2017:

		Linkage terms (principal and interest)	Annual interest rate
Notes payable series C	Note 15(4)	CPI	3.35% CPI adj.
Notes payable series D			'Makam'(*) plus 1.2%
Notes payable series F	Note 15(2), (6)		2.16% fixed
Borrowing K (received in 2015)	Note 15(5)		3.71% fixed
Borrowing L (received in 2015)	Note 15(5)		4.25% fixed
Borrowing O (received in 2017)	Note 15(3), (5)		4.34% fixed
Borrowing P (received in 2017)	Note 15(3)		2.38% fixed
Borrowing Q (received in 2017)	Note 15(3)		2.5% fixed

(*) 'Makam' is a variable interest that is based on the yield of 12 month government bonds issued by the Government of Israel. The interest is updated on a quarterly basis.

The interest rates paid (in annual terms, and including the additional interest of 1.2%) for the period from October 1, 2017 to December 30, 2017 was 1.294%.

See note 6(a)(4) as to the balances and maturities of the borrowings and the notes payable.

See note 6(c) as to the fair value of the borrowings and the notes payable.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 15 –BORROWINGS AND NOTES PAYABLE (continued)

(2)Notes payable issuance

In July 2017, the Company issued Series F Notes in a principal amount of NIS 255 million, payable in 5 equal annual installments on June 25 of each of the years 2020 through 2024. The principal bears fixed annual interest of 2.16%, payable on a semiannual basis on June 25 and December 25.

In December 2017, the Company expanded Series F Notes in a principal amount of NIS 389 million under the same conditions.

The Company has engaged to expand Series F Notes in the future, see note 15(6) below.

(3)New borrowings received

Borrowing O: In December 2017, the Company received a long-term loan from a group of institutional corporations in a principal amount of NIS 100 million. The loan was received according to a loan agreement that was signed in November 2014. The loan will bear unlinked interest at the rate of 4.34% per annum. The Company early repaid the loan in March 2018 (see note 15(5)).

Borrowing P: In December 2017, the Company received a long-term loan from a commercial bank in the principal amount of NIS 125 million. The loan will bear unlinked interest at the rate of 2.38% per annum and will be paid in quarterly payments over 5 years. The principal will be paid in quarterly equal payments commencing in December 2018.

Borrowing Q: In December 2017, the Company received a long-term loan from a commercial bank in the principal amount of NIS 125 million. The loan will bear unlinked interest at the rate of 2.5% per annum and will be paid in quarterly payments over 6.5 years. The principal will be paid in quarterly equal payments commencing in March 2019.

(4)Notes payable buy back

The Company's series B, C and E notes, which are traded on the Tel Aviv Stock Exchange, were partially repurchased in 2016 (these notes are considered legally extinguished) as follows:

In March 2016, the Company repurchased approximately NIS 43 million par value of notes payable series B, at an average transaction price of approximately 1.104 NIS par value. The total amount paid was approximately NIS 48 million.

In March 2016, the Company repurchased approximately NIS 131 million par value of notes payable series E, at an average transaction price of approximately 1.073 NIS par value. The total amount paid was approximately NIS 141 million.

In April 2016, the Company repurchased approximately NIS 54 million par value of notes payable series C, at an average transaction price of approximately 1.136 NIS par value. The total amount paid was approximately NIS 61.5 million.

The buy-back costs of the aforementioned repurchases were recorded in finance expenses in an amount of NIS 12 million in 2016.

NOTE 15 –BORROWINGS AND NOTES PAYABLE (continued)

(5) Borrowings early repayments

In June 2017, the Company made early repayment of principal outstanding of borrowings C, D, E, F, G and H in a total amount of NIS 700 million, thus completing full and final repayment of these borrowings.

In July 2017, the Company made early repayment of principal outstanding of borrowings I and J in a total amount of NIS 175 million, thus completing full and final repayment of these borrowings.

In December 2017, the Company made early repayment of principal outstanding of borrowings M and N in a total amount of NIS 408 million, thus completing full and final repayment of these borrowings.

In December 2017 the Company did not take a borrowing that was contracted in November 2014 (a deferred loan) with a group of institutional corporations in a principal amount of NIS 100 million.

The early repayment fees of the aforementioned repayments totaled to an amount of NIS 76 million and were recorded in finance expenses in 2017.

In March 2018 the Company early repaid borrowings O and L in a total principal amount of NIS 300 million. In addition, the Company intends to early repay borrowing K during 2018, in a principal amount of NIS 75 million. The early repayments resulted in a change in expected cash flows and the Company recorded in December 2017 additional finance costs of NIS 18 million, mainly due to early repayment fees (see also note 2(j)(3) and note 15(1) above).

(6) Notes payable issuance commitments

In September 2017, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, in an aggregate principal amount of NIS 150 million of additional Series F debentures in December 2018.

In December 2017, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, in an aggregate principal amount of NIS 126.75 million of additional Series F debentures in December 2019.

In January 2018, the Company entered into an agreement with certain Israeli institutional investors, according to which the Company undertook to issue to the institutional investors, and the institutional investors undertook to purchase from the Company, in the framework of a private placement, in an aggregate principal amount of NIS 100 million of additional Series F debentures in December 2019.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 15 –BORROWINGS AND NOTES PAYABLE (continued)

(7)Financial covenants

Regarding Series F Notes and borrowings P and Q, the Company is required to comply with a financial covenant that the ratio of Net Debt to Adjusted EBITDA shall not exceed 5. Compliance will be examined and reported on a quarterly basis. For the purpose of the covenant, Adjusted EBITDA is calculated as the sum total for the last 12 month period, excluding adjustable one-time items. As of December 31, 2017, the ratio of Net Debt to Adjusted EBITDA was 1.0. Additional stipulations regarding Series F Notes and borrowings P and Q mainly include:

(a) shareholders' equity shall not decrease below NIS 400 million; the Company shall not create floating liens subject to certain terms; the Company has the right for early redemption under certain conditions; the Company shall pay additional annual interest of 0.5% in the case of a two-notch downgrade in the Series F Notes rating and an additional annual interest of 0.25% for each further single-notch downgrade, up to a maximum additional interest of 1%; the Company shall pay additional annual interest of 0.25% during a period in which there is a breach of the financial covenant. The Group was in compliance with the financial covenant and the additional stipulations for the year 2017.

Regarding borrowings K, L and O, as of December 31, 2017 (see information about early repayments in note 15(5) (b)above), the Company is required to comply with financial covenants on a consolidated basis. Their main provisions are two ratios:

The ratio of (a) the amount of all financial obligations of the Company including bank guarantees that the (1)Company has undertaken ("Total Debt") to (b) EBITDA less Capital Expenditures shall not exceed 6.5 (the ratio as of December 31, 2016 and 2017 was 4.5 and 4.1, respectively); and

(2) The ratio of (a) Total Debt to (b) the EBITDA of the Company shall not exceed 4 (the ratio as of December 31, 2016 and 2017 was 3.4 and 2.2, respectively).

EBITDA is defined as the sum of (a) the net income before extraordinary items, (b) the amount of tax expenses set against the net profits including, without double counting, any provisions for tax expenses, (c) and depreciation and amortization expenses, and (d) any finance costs, net.

Capital Expenditures are defined as any expenditure classified as fixed and intangible asset in the financial statements.

The Group was in compliance with all covenants stipulated for the years 2016 and 2017. The covenants are measured every six months (on June 30, and December 31) on an annualized basis of twelve months and are based on the financial results for the preceding period of twelve months.

The existing loans agreements allow the lenders to demand an immediate repayment of the loans in certain events (events of default), including, among others, a material adverse change in the Company's business and non-compliance with the financial covenants set in those agreements.

The Company provided the lenders with a negative pledge undertaking (i.e., not to pledge any of its assets to a third party), except for a number of exceptions that were agreed upon, including pledge (other than by way of floating charge) in favor of a third party over specific assets or rights of the Company, securing obligations no greater than NIS 100 million in aggregate. See note 6 regarding the Company's exposure to market risks and liquidity risk.

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 16 - LIABILITY FOR EMPLOYEE RIGHTS UPON RETIREMENT

Israeli labor laws and agreements require payment of severance pay upon dismissal of an employee or upon termination of employment in certain other circumstances. See also note 2(k).

(1) Defined contribution plan

The Group had contributed NIS 15 million, NIS 14 million, NIS 17 million for the years 2015, 2016 and 2017 respectively, in accordance with Section 14 of the Israeli Severance Pay Law. See also note 2(k)(i)(1).

(2) Defined benefit plan

Liability for employee rights upon retirement, net is presented as non-current liability.

The amounts recognized in the statement of financial position, in respect of a defined benefit plan (see note 2(k)(i)(2)) and changes during the year in the obligation recognized for post-employment defined benefit plans were as follows:

	New Israeli Shekels in millions		
	Present value of obligation	Fair value of plan assets	Total
At January 1, 2016	133	(99)	34
Current service cost	17		17
Interest expense (income)	5	(3)	2
Employer contributions		(12)	(12)
Benefits paid	(19)	9	(10)
Remeasurements:			
Experience loss	9		9
Loss (gain) from change in demographic assumptions	(4)		(4)
Loss from change in financial assumptions	1		1
Return on plan assets		2	2
At December 31, 2016	142	(103)	39
Current service cost	11		11
Past service cost	4		4
Interest expense (income)	4	(3)	1
Employer contributions		(9)	(9)
Benefits paid	(25)	17	(8)
Remeasurements:			
Experience loss	2		2
Loss (gain) from change in financial assumptions	1		1
Return on plan assets		(1)	(1)
At December 31, 2017	139	(99)	40

Remeasurements are recognized in the statement of comprehensive income.

The expected contribution to the defined benefit plan during the year ending December 31, 2018 is approximately NIS 10 million.

F - 65

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 16 - LIABILITY FOR EMPLOYEE RIGHTS UPON RETIREMENT (continued)

(2) Defined benefit plan (continued)

The principal actuarial assumptions used were as follows:

	December 31	
	2016	2017
Interest rate weighted average	2.95 %	2.73 %
Inflation rate weighted average	1.04 %	1.11 %
Expected turnover rate	9%-56%	9%-56%
Future salary increases	1%-6 %	1%-6 %

The sensitivity of the defined benefit obligation to changes in the principal assumptions is:

	December 31, 2017	
	NIS in millions	
	Increase	Decrease of
	of	10% of the
	10%	of the
	of	assumption
	the	assumption
Interest rate	(0.6)	0.8
Expected turnover rate	0.2	(0.3)
Future salary increases	0.4	(0.4)

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method has been applied as when calculating the pension liability recognized within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

The defined benefit plan exposes the Group to a number of risks, the most significant are asset volatility, and a risk that salary increases will be higher than expected in the actuarial calculations. The assets are invested in provident funds, managed by managing companies and are subject to laws and regulations, and supervision (including investment portfolio) of the Capital Markets, Insurance and Saving Division of the Israeli Ministry of Finance.

Expected maturity analysis of undiscounted defined benefits as at December 31, 2017:

	NIS in millions
2018	24
2019	20
2020	11

2021 and 2022	20
2023 and thereafter	83
	158

PARTNER COMMUNICATIONS COMPANY LTD.

(An Israeli Corporation)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 17 – COMMITMENTS

Under the Telegraph Regulations the Company is committed to pay an annual fixed fee for each frequency used. For the years 2015, 2016 and 2017 the Company recorded expenses in a total amount of approximately NIS 65 million, NIS 64 million and NIS 63 million, respectively. Under the above Regulations should the Company choose to return a frequency, such payment is no longer due. Commencing August 2016, the total amount of frequency fees of both the Company and Hot Mobile under the regulations are divided between the Company and Hot Mobile, through PHI ,according to the OPEX-CAPEX mechanism (see also note 9).

(1) At December 31, 2017, the Group is committed to acquire property and equipment and software elements for approximately NIS 5 million.

(2) At December 31, 2017, the Group is committed to acquire inventory in an amount of approximately NIS 818 million.

(4) Right of Use (ROU)

The Group signed long-term agreements with service providers to receive indefeasible Rights of Use (ROU) of international capacities through submarine infrastructures (see note 12), most extendable until 2030. As of December 31, 2017, the Group is committed to pay for capacities over the following years an amount of NIS 207 million (excluding maintenance fees) as follows:

	New Israeli Shekels in millions
2018	43
2019	41
2020	41
2021	41
2022	41
	207

In addition, under the terms of the ROU agreements, as of December 31, 2017 the Group is committed to pay annual maintenance fees during the usage period. The total aggregated expected maintenance fee for the years 2018-2023 is approximately NIS 52 million. Some payments under the ROU agreements are linked to the USD.

PARTNER COMMUNICATIONS COMPANY LTD.

(An Israeli Corporation)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 17 – COMMITMENTS (continued)

(5) Liens and guarantees

As of December 31, 2017, the Group has provided bank guarantees in respect of licenses (see note 1(d)) in an amount of NIS 100 million, in addition to bank guarantees in favor of other parties in an aggregate amount of approximately NIS 26 million. Therefore, the total bank guarantees provided by the Group as of December 31, 2017 is NIS 126 million. In addition, the Company provided a guarantee to PHI's debt in an amount of NIS 50 million.

(6) Covenants and negative pledge – see note 15(7).

(7) See note 15(6) with respect of notes payable issuance commitments.

(8) Operating leases – see note 19.

(9) See note 9 with respect to network sharing and PHI's commitments.

NOTE 18 – DEFERRED INCOME WITH RESPECT TO SETTLEMENT AGREEMENT WITH ORANGE

In June 2015, the Company announced that it had entered into a settlement agreement with Orange Brand Services Ltd ("Orange") which created a new framework for their relationship and provided both Partner and Orange the right to terminate the brand license agreement which had been in force since 1998. In accordance with the terms of the settlement agreement, the Company received advance payments in a total of €90 million during 2015; €40 million of which was received between the signing of the agreement and the completion of a market study to assess the Company's position within the dynamics of the Israeli telecommunications services market; and €50 million of which was received in the fourth quarter of 2015, following the Company's notice to Orange of its decision to terminate the brand license agreement.

As set forth in the settlement agreement, the advance payments were recognized and reconciled evenly on a quarterly basis over a period until the second quarter of 2017, against contingent marketing, sales, customer services and other expenses that were incurred over this period. The income was recorded in the Company's income statement under "Income with respect to settlement agreement with Orange". For 2015, 2016 and 2017, the Company recognized income with respect to the settlement agreement in an amount of NIS 61 million, NIS 217 million and NIS 108 million, respectively. Based on a legal opinion obtained by the Company, the advance payments are considered compensation payments and are therefore not subject to VAT charges.

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 19 – OPERATING LEASES

The Group has entered into operating lease agreements as follows:

(1) The Group leases its headquarter facilities in Rosh Ha-ayin, Israel, with a total of approximately 51,177 gross square meters (including parking lots). The lease term is until the end of 2024. The rental payments are linked to the Israeli CPI.

(2) The Group also leases call centers, retail stores and service centers. The leases for each site have different lengths and specific terms. The lease agreements are for periods of two to ten years. The Group has options to extend some lease contract periods for up to twenty years (including the original lease periods). Some of the rental payments are linked to the dollar or to the Israeli CPI. Some of the extension options include an increase of the lease payment in a range of 2%-15%.

(3) Lease agreements in respect of cell sites and switching stations throughout Israel are for periods of two to ten years. The Company has an option to extend some of the lease contract periods for up to ten years (including the original lease periods). Some of the rental payments fees are linked to the dollar or linked to the Israeli CPI. Some of the extension options include an increase of the lease payment mostly in a range of 2%-10%.

(4) As of December 31, 2017 operating lease agreements in respect of vehicles are for periods of up to three years. The rental payments are linked to the Israeli CPI.

(5) Non-cancelable minimum operating lease rentals (undiscounted) in respect of all the above leases are payable including option periods which are reasonably certain are as follows:

	New Israeli Shekels December 31, 2017 In millions
2018	158
2019	100
2020	77
2021	59
2022-2023	100
2024-2025	52
2026-2027	13
2028 and thereafter	19
	578

(6) The rental expenses for the years ended December 31, 2015, 2016 and 2017 were approximately NIS 260 million, NIS 213 million, and NIS 178 million, respectively. Commencing April 2016, rent expenses of cell sites of the Company, Hot Mobile and PHI are divided between the Company and Hot Mobile, through PHI, according to the OPEX-CAPEX mechanism (see also note 9).

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 20 – LAWSUITS AND LITIGATIONS

A. Claims

Total provision recorded in the financial statements in respect of all lawsuits against the Group amounted to NIS 72 million at December 31, 2017.

Described below are the main litigation and claims against the Group:

1. Consumer claims

This category includes class actions and motions for the recognition of these lawsuits as class actions with respect to, among others, alleged claims regarding charges and claims regarding alleged breach of the Consumer Protection Law, the Privacy Protection Law, the Communications Law (Telecommunications and Broadcasting), license provisions, other legal provisions and engagement agreements with customers.

Described hereunder are the outstanding consumer class actions and motions for the recognition of these lawsuits as class actions, detailed according to the amount claimed, as of the date of approval of these financial statements:

Claim amount	Number of claims	Total claims amount (NIS million)
Up to NIS 100 million	26	640
NIS 100 - 400 million	6	1,330
NIS 400 million - NIS 1 billion	2	1,405
Unquantified claims	13	-
Total	47	3,375

With respect to 3 of the claims mentioned in the table above, the court approved these claims as class actions:

On April 13, 2011, a claim and a motion to certify the claim as a class action were filed against Partner. The claim alleges that Partner sent a message to its customers that their internet package was fully utilized before it was fully utilized. The amount claimed in the lawsuit was estimated by the plaintiffs to be approximately NIS 4.6 million. In June 2013, the Court approved the motion and recognized the lawsuit as a class action. In August 2013, Partner filed a request to appeal to the Supreme Court. In February 2014, the Supreme Court dismissed Partner's request, and a hearing has been set. In January 2015, the parties filed a request to approve a settlement agreement. In July 2015, the parties filed an amended request to approve the settlement agreement. In June 2016 the Court approved the request and in February 2018 the parties filed a request to the Court regarding the completion of the settlement agreement. The damages that Partner was required to pay were immaterial.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 20 – LAWSUITS AND LITIGATIONS (continued)

On September 7, 2010, a claim and a motion to certify the claim as a class action were filed against Partner. The claim alleges that Partner unlawfully charged its customers for services of various content providers which are sent through text messages (SMS). The total amount claimed from Partner is estimated by the plaintiffs to be 2. approximately NIS 405 million. The claim was certified as a class action in December 2016. In February 2017, the plaintiffs filed an appeal to the Supreme Court, regarding the definition of the group of customers. Partner estimates that even if the claim will be decided in favor of the approved group of customers (as defined by the District Court), the damages that Partner will be required to pay for, will be immaterial.

On April 3, 2012, a claim and a motion to certify the claim as a class action were filed against Partner. The claim alleges that Partner breached its license conditions in connection with benefits provided to customers that purchased 3. handsets from third parties. The amount claimed in the lawsuit was estimated by the plaintiffs to be approximately NIS 22 million. In September 2014, The Court approved the motion and recognized the lawsuit as a class action. In July 2017, the parties filed a request to the Court to approve a settlement agreement. Partner estimates that the damages that Partner will be required to pay for will be immaterial.

With respect to 3 claims mentioned in the table above, with a total amount of NIS 392 million (other than the 3 claims mentioned above), the parties filed requests to approve settlement agreements and with respect to 4 additional claims in the amount of NIS 352 million (other than the 3 claims mentioned above), the court approved settlement agreements.

2. Employees and other claims

This category includes 2 claims: a claim and a motion for the recognition of this claim as a class action in the amount of NIS 100 million (in September 2016, the parties filed a request to approve a settlement agreement regarding this claim and in November 2017 the parties filed an amended request to approve a settlement agreement regarding this claim) and a civil lawsuit in the amount of NIS 40 million, which was settled during 2017 in an immaterial amount.

In addition to all the above mentioned claims the Group is a party to various claims arising in the ordinary course of its operations.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 20 – LAWSUITS AND LITIGATIONS (continued)

B. Contingencies in respect of building and planning procedures

- (1) Under the Telegraph Regulations the Company is committed to pay an annual fixed fee for each frequency used. Under the above Regulations should the Company choose to return a frequency, such payment is no longer due.
- (2) Section 197 of the Building and Planning Law states that a property owner has the right to be compensated by a local planning committee for reductions in property value as a result of a new building plan.

In January 2006, the Non-ionizing Radiation Law was published, amending the Planning and Building Law so that local Planning and Building committees must require indemnification letters against reduction in property value from the cellular operators requesting building permits.

Accordingly, on January 3, 2006, the National Council for Planning and Building published an interim decision conditioning the issuance of building permits for cell site permits by local planning and building councils upon provision of a 100% indemnification undertaking by the cellular operators. This decision shall remain in effect until it is replaced with an amendment to the National Zoning Plan 36. Between January 3, 2006 and December 31, 2017 the Company provided the local authorities with 488 indemnification letters as a pre-condition for obtaining building permits.

In case the Company shall be required to make substantial payments under the indemnity letters, it could have an adverse effect on the Company's financial results.

According to the company's management estimation and based on its legal counsel, a provision in the financial statement was not included.

The Company assumes that the requirement to provide indemnification letters might require it to change locations of sites to different, less suitable locations and to dismantle some of its sites. These changes in the deployment of the sites might have an adverse effect on the extent, quality and capacity of the network coverage.

PARTNER COMMUNICATIONS COMPANY LTD.
(An Israeli Corporation)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 21 – EQUITY AND SHARE BASED PAYMENTS

a. Share capital:

The Company's share capital consists of ordinary shares, which are traded on the Tel Aviv Stock Exchange Ltd. under the symbol "PTNR", and are quoted on the NASDAQ Global Select Market™, in the form of American Depositary Shares ("ADSs"), each representing one of the Company's ordinary shares, under the symbol "PTNR", according to the dual listing regulations. The ADSs are evidenced by American Depositary Receipts ("ADRs"). Since November 2011, Citibank, N.A. serves as the Company's depository for ADSs. The holders of ordinary shares are entitled vote in the general meetings of shareholders and to receive dividends as declared.

Under the provisions of the Company's licenses (note 1(d)), restrictions are placed on transfer of the Company's shares and placing liens thereon. The restrictions include the requirement of advance written consent of the Minister of Communications be received prior to transfer of 10% or more of the Company's shares to a third party. The restrictions require that the "founding shareholders or their approved substitutes", as defined in the cellular license, hold at least 26% of the means of control in the Company, including 5% which must be held by Israeli shareholders (Israeli citizens and residents), who were approved as such by the Minister of Communications.

Through December 31, 2008 the Company purchased its own 4,467,990 shares at the cost of NIS 351 million ("treasury shares"). In accordance with the Israeli Companies Law, the treasury shares are considered dormant shares as long as they are held by the Company, and as such they do not bear any rights (including the right to vote in general meetings of shareholders and to receive dividends) until they are transferred to a third party. Of which 2,850,472 remained as of December 31, 2017. Of which 1,376,381 were allocated as of December 31, 2017 to a trustee on behalf of the Company's employees under the Company's Equity Incentive Plan (see (b) below). These shares are under the control of the Company until vested under the plan and therefore are not presented in the financial statements as outstanding shares until vested (restricted shares ("RSAs")).

In June 2017, the Company issued 10,178,211 shares of the Company to the public and to classified investors, following a tender under a shelf offering, and by way of a private placement. The total net consideration received was approximately NIS 190 million. The offering expenses totaled NIS 7 million.

b. Share based compensation to employees

(1) Description of the Equity Incentive Plan

Share options and restricted shares were granted to employees in accordance with Company's Equity Incentive Plan (the "Plan"). It includes allocation of restricted shares ("RSAs") to the Company's employees and officers and determines the right to vote at the general meetings of shareholders and the right to receive dividends distributed with respect to the restricted shares. The committee may set performance targets as a vesting criterion (independently or in combination with other criteria).

PARTNER COMMUNICATIONS COMPANY LTD.
 (An Israeli Corporation)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 21 - EQUITY AND SHARE BASED PAYMENTS (continued)

- b. Share based compensation to employees
 (continued)

(1) Description of the Equity Incentive Plan (continued)

The total number of Company's shares reserved for issuance upon exercise of all options or upon the earning of the restricted shares granted under the Plan is 25,917,000, of which 7,816,113 remained ungranted as of December 31, 2017. The vesting of the options and the earning of the restricted shares are subject to vesting/restriction periods. The vesting of the options and the earning of the restricted shares granted after June 2014 are also subject to performance conditions set by the Company's organs. The Company expects that the performance conditions will be met. The Plan's principal terms of the options include:

Exercise price adjustment: The exercise price of options shall be reduced in the following events: (1) dividend distribution other than in the ordinary course: by the gross dividend amount so distributed per share, and (2) -dividend distribution in the ordinary course: the exercise price shall be reduced by the amount of a dividend in excess of 40% of the Company's net income for the relevant period per share, or by the gross dividend amount so distributed per share ("Full Dividend Mechanism"), depending on the date of granting of the options.

Cashless exercise: Most of the options may be exercised only through a cashless exercise procedure, while holders of other options may choose between cashless exercise and the regular option exercise procedure. In accordance with -such cashless exercise, the option holder would receive from the Company, without payment of the exercise price, only the number of shares whose aggregate market value equals the economic gain which the option holder would have realized by selling all the shares purchased at their market price, net of the option exercise price.

(2) Information in respect of options and restricted shares granted under the Plan:

	Through December 31, 2017	
	Number of options	Number of RSAs
Granted	31,304,207	4,298,768
Shares issued upon exercises and vesting	(6,430,589)	(1,617,518)
Cancelled upon net exercises, expiration and forfeitures	(16,165,135)	(1,336,953)
Outstanding	8,708,483	1,344,297
Of which:		
Exercisable	5,190,586	26,556
Vest in 2018	2,502,089	891,309
Vest in 2019	667,254	280,115
Vest in 2020	348,554	146,317

As of December 31, 2017 the Company expects to record a total amount of compensation expenses of approximately NIS 16 million during the next three years with respect to options and restricted shares.

			Options granted in 2015	Options granted in 2016	Options granted in 2017	
Weighted average fair value of options granted using the Black & Scholes option-pricing model – per option (NIS)			5.37	5.02	5.43	
The above fair value is estimated on the grant date based on the following weighted average assumptions:						
Expected volatility			39.28 %	39.5 %	37.6 %	
Risk-free interest rate			0.54 %	0.54 %	0.53 %	
Expected life (years)			3	3	3	
Dividend yield			*	*	*	

* Due to the Full Dividend Mechanism the expected dividend yield used in the fair value determination of such options was 0% for the purpose of using the Black & Scholes option-pricing model.

The expected volatility is based on a historical volatility, by statistical analysis of the daily share price for periods corresponding the option's expected life. The expected life is expected length of time until expected date of exercising the options, based on historical data on employees' exercise behavior and anticipated future condition. The fair value of RSAs was evaluated based on the stock price on grant date.

NOTE 22 – INCOME STATEMENT DETAILS

(a) Revenues:

The aggregate amount of transaction price allocated to performance obligations that were unsatisfied or partially unsatisfied as at December 31, 2017, in addition to deferred revenues (see table below), is approximately NIS 92 million (mainly services). Of which the Group expects that approximately 60% will be recognized as revenue during 2018, approximately 25% will be recognized as revenue during 2019, and the rest in later years. The above excludes contracts that are for periods of one year or less or are billed based on time incurred, as permitted under IFRS 15 the transaction price allocated to these unsatisfied contracts is not disclosed.

The table below describes significant changes in contract liabilities:

	New Israeli Shekels in millions Deferred revenues from Hot Other mobiledeferred * revenues*	
Balance as at December 31, 2016	226	45
Revenue recognized that was included in the contract liability balance at the beginning of the year	(31)	(29)
Increases due to cash received, excluding amounts recognized as revenues during the year	-	30
Balance as at December 31, 2017	195	46

* Current and non-current deferred revenues.

Disaggregation of revenues:

	Year ended December 31, 2017 New Israeli Shekels in millions			
	Cellular segment	Fixed-line segment	Elimination	Consolidated
Segment revenue - Services to private customers	1,173	254	(32)	1,395
Segment revenue - Services to business customers	805	523	(141)	1,187
Segment revenue - Services revenue total	1,978	777	(173)	2,582
Segment revenue - Equipment	610	76		686
Total Revenues	2,588	853	(173)	3,268

Revenues from services are recognized over time. For the year 2017 revenues from equipment are recognized at a point of time, except for NIS 11 million, which were recognized in 2017 over time. Revenues from equipment for the year 2017 include revenues from operating leases according to IAS 17, in an amount of NIS 11 million. Revenues from services for the year 2017 include revenues from operating leases according to IAS 17 in an amount of NIS 10 million. See also note 7 with respect to payment terms of sales of equipment, trade receivables and allowance

for doubtful accounts.

NOTE 25 – INCOME TAX EXPENSES

a. Measurement of results for tax purposes under the Income Tax (Inflationary Adjustments) Law, 1985

Under this law, results for tax purposes through tax-year 2007 were measured in real terms, having regard to the changes in the Israeli CPI. Commencing the tax-year 2008 and thereafter the Company and its subsidiaries are measured for tax purposes in nominal values, except for certain transition provisions: certain losses carryforward for tax purposes, and certain tax deductible depreciation expenses are adjusted to the changes in the CPI until the end of 2007.

b. Corporate income tax rates applicable to the Group

The Group is taxed according to the regular corporate income tax in Israel.

On August 5, 2013, the Law for Change of National Priorities (Legislative Amendments for Achieving the Budgetary Goals for 2013-2014), 2013 was published, enacts, among other things, the raising of the corporate tax rate beginning in 2014 and thereafter to 26.5% (instead of 25%).

In January 2016, the Law for the Amendment of the Income Tax Ordinance (No. 216) was published, enacting a reduction of corporate tax rate in 2016 and thereafter, from 26.5% to 25%.

In December 2016, the Economic Efficiency Law (Legislative Amendments for Implementing the Economic Policy for the 2017 and 2018 Budget Year), 2016 was published, enacting that the corporate tax rate will be 24% in 2017 and 23% in 2018 and thereafter.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 28 – COLLECTIVE EMPLOYMENT AGREEMENT

The Company, the employees' representatives and the Histadrut New General Labor Organization, have reached understandings regarding a retirement plan that includes, among others, an increased retirement payment and range of benefits. As a result, the Company recorded a onetime expense of approximately NIS 35 million in the third quarter of 2015.

The Company signed in 2016 a collective employment agreement with the employees' representatives and the Histadrut New General Labor Organization. The agreement includes an organizational chapter that is for a period of three years (2016-2018) and an economic chapter that is valid for the years 2017 and 2018.

The collective employment agreement also refers to the participation of employees in the Company's profits and regulates the eligibility conditions for receipt of these awards for the years 2017 and 2018.
