Taitron Components Incorporated

Notes to Condensed Consolidated Financial Statements

September 30, 2003 and 2002

(All amounts are unaudited, except for the balance sheet as of December 31, 2002)

(1) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Taitron Components Incorporated (the Company) were prepared in accordance with accounting principles generally accepted in the United States of America and reflect all adjustments, consisting of normal recurring accruals and adjustments, which are, in the opinion of management, necessary for a fair presentation of the consolidated financial position and results of operations at and for the periods presented. Such financial statements do not include all the information or footnotes necessary for a complete presentation and, accordingly, should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, and the notes thereto, which include significant accounting policies and estimates. The results of operations for the interim periods are not necessarily indicative of results for the full year.

(2) Summary of Significant Accounting Policies and Estimates

Principles of Consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiary. All significant intercompany transactions have been eliminated in consolidation.

Revenue Recognition

Revenue is recognized upon shipment of the merchandise. Reserves for sales allowances and customer returns are established based upon historical experience and management's estimates as shipments are made. Sales returns for the quarters ended September 30, 2003 and 2002 aggregated \$31,000 and \$52,000, respectively and for the nine months ended September 30, 2003 and 2002 aggregated \$150,000 and \$203,000, respectively. The allowance for sales returns and doubtful accounts at September 30, 2003 and December 31, 2002 aggregated \$141,000 and \$135,000, respectively.

Inventory

Inventory, consisting principally of products held for resale, is recorded at the lower of cost (determined using the first in-first out method) or estimated market value. Inventory is presented net of valuation allowances of \$1,596,000 and \$1,083,000 at September 30, 2003 and December

31, 2002, respectively.

Deferred Taxes

The Company reviews the nature of each component of its net deferred income tax assets for an assessment of future realization. The Company has fully reserved against its deferred income tax assets, as management could not determine that it was more likely than not such assets would be realized.

Loss Per Share

Common equivalent shares of approximately 646,000 for the nine months ended September 30, 2002 are excluded from the computation of diluted loss per share as their effect is anti-dilutive.

Stock Option Plan

The Company has adopted the disclosure requirements of SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure. SFAS No. 123 allows companies to choose whether to account for stock-based compensation on a fair value method, or to continue to account for stock-based compensation under the current intrinsic value method as prescribed by APB Opinion No. 25, Accounting for Stock Issued to Employees. The Company has elected to continue to follow the provisions of APB Opinion No. 25. SFAS No. 148 requires interim disclosures regarding the pro forma effects of compensation expense had the Company's 1995 Stock Incentive Plan been determined based on the fair value consistent with SFAS No. 123.

Accordingly, under SFAS No. 123, the Company's net earnings (loss) and diluted earnings (loss) per share for the quarter and nine months ended September 30, 2003 and September 30, 2002, would have been changed to the pro forma amounts indicated below:

		Three Month Period Ended September 30,		Nine Month Period Ended September 30,	
		2003	2002	2003	2002
Net earnings (loss)	As reported	\$ 222	\$ 144	\$ 136	\$ (792)
	Pro Forma	\$ 235	\$ 137	\$ 174	\$ (812)
Diluted earnings (loss) per share	As reported	\$.04	\$.02	\$.02	\$ (.14)
	Pro Forma	\$.04	\$.02	\$.03	\$ (.14)

At September 30, 2003, the number of options exercisable was 417,000 and weighted average exercise prices of those options were \$2.12.

Use of Estimates

Management has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States. These estimates have a significant impact on the Company's valuation and reserve accounts relating to the allowance for sales returns, doubtful accounts, inventory reserves and deferred income taxes. Actual results could differ from these estimates.

(3) Revolving Line of Credit

As of September 30, 2003, the Company has completed the repayment of this revolving line of credit facility. This credit facility originally matured on December 31, 2002, with the bank also previously indicating that no further borrowings would be made available.

(4) Long-Term Debt

Long-term debt is summarized as follows:

	September 30, 2003	December 31, 2002
Note payable collateralized by real property, due December 31, 2009, bearing an interest rate of 6.875%	\$ 2,578,000	\$ 2,625,000
Subordinated note, due September 30, 2005, bearing an interest rate of 4.75% per annum.	1,000,000	1,000,000
Subordinated note, due February 20, 2006, bearing an interest rate of 4.75% per annum.	500,000	
Note payable collateralized by real property, due December 1, 2013, bearing an interest rate of 6.359% per annum.		388,000
	<u>4,078,000</u>	<u>4,013,000</u>
Less current maturities	(69,000)	(91,000)
	<u>4,009,000</u>	<u>3,922,000</u>
Less unamortized debt discount	(31,000)	(26,000)
	<u>3,978,000</u>	<u>3,896,000</u>

The subordinated note of \$1,000,000 bearing interest at 4.75% is due to K.S. Best International Co. Ltd., a company controlled by the brother of the Company's Chief Executive Officer.

In connection with the subordinated notes of \$1,000,000 and \$500,000 bearing interest at 4.75%, the Company issued 100,000 and 50,000 stock options, respectively, with relative estimated fair values of \$29,000 and \$15,000, respectively. Such amounts have been presented as debt discounts and accreted through periodic interest charges through the maturity date of these notes.

(5) Subsequent Events

As of the date of this report, the Company has continued listing for sale or lease, its office building facility located in Taipei, Taiwan.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following should be read in conjunction with the condensed consolidated financial statements, including the related notes, appearing in Item 1 of this Report as well as the Company's most recent annual report on Form 10-K. Also, several of the matters discussed in this document contain forward looking statements that involve risks and uncertainties. Such forward looking statements are usually denoted by words or phrases such as believes, expects, projects, estimates, anticipates, will likely result, or similar expressions. We wish to caution readers that all forward looking statements are necessarily speculative and not to place undue reliance on such forward looking statements, which speak only as of the date made, and to advise readers that actual results could vary due to a variety of risks and uncertainties. Factors associated with the forward looking statements that could cause the forward looking statements to be inaccurate and could otherwise impact our future results are set forth in detail in our most recent annual report on Form 10-K. In addition to the other information contained in this document, readers should carefully consider the information contained in our Form 10-K for the year ended December 31, 2002 under the heading Cautionary Statements and Risk Factors.

Overview

Taitron Components Incorporated (Taitron or the Company) is a national distributor of electronic components manufactured by others. The Company distributes a wide variety of transistors, diodes and other discrete semiconductors, optoelectronic devices and passive components to other electronic distributors, original equipment manufacturers (OEMs) and to contract electronic manufacturers (CEMs) who incorporate these devices in their products. In order to meet the rapid delivery requirements of its customers, the Company maintains a significant inventory of discrete and passive components. The Company distributes over 13,000 different products manufactured by more than 50 different suppliers.

Discrete semiconductors are basic electronic building blocks. One or more different types of discrete semiconductors generally are found in the electronic or power supply circuitry of such diverse products as automobiles, televisions, radios, telephones, computers, medical equipment, airplanes, industrial robotics and household appliances. The term discrete is used to differentiate those single function semiconductor products which are packaged alone, such as transistors or diodes, from those which are integrated into microchips and other integrated circuit devices.

The demand for discrete semiconductors in the U.S. market decreased from 1996 through the middle of 1999. From 1999 throughout 2000, demand had increased as a result of industry wide shortages. The industry wide shortage began to diminish towards the end of 2000 and demand through today has drastically declined. This declining demand has primarily resulted from the accelerated trend of moving the production capacity of OEM/CEM customers abroad and the consolidation of CEM customers domestically.

The Company's core strategy includes maintaining a substantial inventory of discrete and passive components purchased at prices generally lower than those commonly available to its competitors. This strategy allows the Company to fill customer orders immediately from stock held in inventory. Since demand remains weak resulting from an overall economic slowdown and excess product availability, the Company continued to focus on lowering its inventory balances and changing the product mix. As such, inventory levels decreased throughout the current period from \$24,314,000 as of December 31, 2002 to \$22,348,000 as of September 30, 2003, including a non-cash provision of approximately \$238,000 during the current nine month period ending September 30, 2003 to increase the Company's inventory reserves. Since demand continued to be weak throughout the current period, the Company expects to continue lowering inventory balances throughout 2003.

In accordance with accounting principles generally accepted in the United States, management has classified inventory as a current asset. However, if all or a substantial portion of the inventory was required to be immediately liquidated, the inventory would not be as readily marketable or liquid as other items included or classified as a current asset, such as cash.

Our gross profit margins in general have been stable mainly because our purchasing price decrease has offset the selling price erosion in the down market. Our gross profit margins are subject to a number of factors, including product demand, a strong US dollar, manufacturer's price protection programs, our ability to purchase inventory at favorable prices and our sales product mix, all of which could adversely impact margins. There are no assurances that demand in the discrete semiconductor market will increase and that market conditions will improve. Therefore, it's possible that further declines in our carrying values of inventory could result.

Readers are cautioned that the foregoing statements are forward looking and are necessarily speculative. There can be no guarantee that a recovery in the discrete semiconductor market will take place. Also, if prices of components held in our inventory decline or if new technology is developed that displaces products distributed by us and held in inventory, our business could be materially adversely affected.

Critical Accounting Policies and Estimates

Use Of Estimates Management has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States. These estimates have a significant impact on the Company's valuation and reserve accounts relating to the allowance for sales returns, doubtful accounts, inventory reserves and deferred income taxes. Actual results could differ from these estimates.

Revenue Recognition Revenue is recognized upon shipment of the merchandise. Reserves for sales allowances and customer returns are established based upon historical experience and management's estimates of future returns. Sales returns for the quarters ended September 30, 2003 and 2002 were \$31,000 and \$52,000, respectively and for the nine months ended September 30, 2003 and 2002 aggregated \$150,000 and \$203,000 respectively. The allowance for sales returns and doubtful accounts at September 30, 2003 and December 31, 2002 were \$141,000 and \$135,000, respectively. The Company reviews the actual sales returns and bad debts for its customers and establishes an estimate of future returns and allowance for doubtful accounts.

Inventory Inventory, consisting principally of products held for resale, is recorded at the lower of cost (determined using the first in-first out method) or estimated market value. The Company had inventory balances in the amounts of \$22,348,000 and \$24,314,000 at September 30, 2003 and December 31, 2002, respectively, which are presented net of valuation allowances of \$1,596,000 and \$1,083,000 at September 30, 2003 and December 31, 2002, respectively. The Company evaluates inventories to identify excess, high cost, slow-moving, or other factors rendering inventories as unmarketable at normal profit margins. For inventories supplied under franchise agreements, the Company relies upon its contractual rights to receive compensation for price differences caused by market fluctuations. Due to the large number of transactions and the complexity of managing and maintaining a large inventory of product offerings, estimates are made regarding adjustments to the cost of inventories. Based on our assumptions about future demand and market conditions, inventories are carried at the lower of cost or estimated market value. If our assumptions about future demand change, and/or market conditions are less favorable than those projected, additional write-downs of inventories may be required. In any case, actual amounts could be different from those estimated.

Deferred Taxes The Company reviews the nature of each component of its net deferred income tax assets for an assessment of future realization. The Company has fully reserved for its deferred income tax assets, as management could not determine that it was more likely than not such assets would be realized.

Revolving Line of Credit Facility

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

The Company has completed the repayment of its revolving line of credit facility. This credit facility originally matured on December 31, 2002, with the bank also previously indicating that no further borrowings would be made available.

Results of Operations

Three month Period Ended September 30, 2003 Compared To The Three month Period Ended September 30, 2002.

Net sales for the three months ended September 30, 2003 were \$2,069,000, compared with \$3,389,000 for the same period last year, a decrease of \$1,320,000 or 39%. The decrease is primarily due to an industry-wide decrease in demand for discrete and passive and semiconductor components.

Cost of goods sold for the quarter ended September 30, 2003 decreased to \$1,451,000 from \$2,396,000 for the same period last year, a decrease of \$945,000 or 39%. Consistent with the decrease in net sales, cost of goods sold decreased, however at a faster rate, resulting in gross profit increasing as a percentage of net sales to 29.9% for the quarter ended September 30, 2003 from 29.3% for the same period last year. Gross profit decreased by \$375,000 to \$618,000 for the quarter ended September 30, 2003 from \$993,000 for the same period in 2002. Included with cost of sales are provisions for inventory reserves of \$82,000 and \$75,000 during the quarters ended September 30, 2003 and 2002, respectively.

Selling, general and administrative (SG&A) expenses decreased by \$216,000 or 22.6% for the quarter ended September 30, 2003 compared to the same period of 2002. The decrease is primarily attributable to cost cutting measures consistently implemented during the last twelve months. As a result, personnel-related expenses decreased by \$130,000, with no other individual item significantly impacting the change during the quarter ended September 30, 2003. The corresponding average employee base declined to 34 from 40 employees, which represents a 15% reduction in overall workforce. As a percentage of net sales, SG&A increased to 35.7% from 28.2% for the three months ended September 30, 2003 and 2002, respectively.

Operating losses were \$121,000 for the quarter ended September 30, 2003 as compared to operating earnings of \$38,000 for the same period last year. Operating results decreased primarily from lower gross profits and lower net sales, as discussed above.

Interest expense, net of interest income, for the quarter ended September 30, 2003 decreased by \$23,000 compared to the same period last year. The decrease is primarily due to lower outstanding borrowing levels incurred during the current quarter, when compared to the same period last year.

Income tax provision was \$220,000 during the quarter ended September 30, 2003 as compared to no income tax provision nor benefit for the same period last year. The current period income tax provision is a direct result of the Company recording a \$663,000 gain on sale of its former warehouse facility during the quarter ended September 30, 2003.

Net earnings were \$222,000 for the quarter ended September 30, 2003 as compared with \$144,000 for the same period last year. The increase was a direct result of the Company recording a \$663,000 gain on sale of its former warehouse facility during the quarter ended September 30, 2003. Also, during the prior period, the Company recorded \$200,000 of non-operating income received from a tenant at our former warehouse facility, to immediately terminate a three year lease, originally scheduled to expire on April 30, 2004. Without recording these other non-operating income items, the Company would have recorded net losses for both the current and prior year periods.

Nine month Period Ended September 30, 2003 Compared To The Nine month Period Ended September 30, 2002.

Edgar Filing: TAITRON COMPONENTS INC - Form 10QSB

Net sales for the nine months ended September 30, 2003 were \$7,548,000 compared with net sales for the nine months ended September 30, 2002 of \$10,674,000, a decrease of \$3,126,000 or 29.3%. The decrease is primarily due to an industry wide decrease in demand for discrete semiconductors.

Cost of goods sold decreased by \$2,491,000 to \$5,233,000 for the nine months ended September 30, 2003, a decrease of 32.3% from the same period in 2002. Consistent with the decrease in net sales, cost of goods sold

decreased, however at a faster rate, resulting in gross profit increasing as a percentage of net sales to 30.7% for the first nine months of this year from 27.6% for the same period last year. Gross profit decreased by \$635,000 to \$2,315,000 for the nine months ended September 30, 2003 from \$2,950,000 for the same period in 2002. Also contributing to the decrease in gross profit was a provision for inventory reserves of \$238,000 and \$340,000 during the nine months ended September 30, 2003 and 2002, respectively.

SG&A expenses decreased by \$963,000 or 29% for the nine months ended September 30, 2003 compared to the same period in 2002. The decrease is primarily attributable to cost cutting measures consistently implemented during the last twelve months. As a result, personnel-related expenses decreased by \$616,000, with no other individual item significantly impacting the change during the nine months ended September 30, 2003. The corresponding average employee base declined to 33 from 42 employees, which represents a 21% reduction in overall workforce. As a percentage of net sales, SG&A remained consistently 31% for the nine months ended September 30, 2003 and 2002.

Operating loss was \$41,000 for the nine months ended September 30, 2003 as compared to an operating loss of \$369,000 for the same period ended September 30, 2002. The operating loss decreased primarily due to the cost cutting measures, as discussed above.

Interest expense, net of interest income for the nine months ended September 30, 2003 decreased by \$55,000 compared to the nine months ended September 30, 2002. The decrease is primarily due to lower outstanding borrowing levels incurred during the current period, when compared to the same period last year.

Income tax provision was \$220,000 during the nine months ended September 30, 2003 as compared to \$437,000 for the same period last year. The current period income tax provision is a direct result of the Company recording a \$663,000 gain on sale of its former warehouse facility during the nine months ended September 30, 2003.

Net earnings was \$136,000 for the nine months ended September 30, 2003 compared to a net loss of \$792,000 for the same period in 2002, an increase of \$928,000 resulting from the same reasons discussed above. Without recording a \$663,000 gain on sale of its former warehouse facility, the Company would have recorded a net loss for the current nine months ended September 30, 2003.

Liquidity and Capital Resources

We have satisfied our liquidity requirements principally through cash generated from operations, short-term commercial loans, subordinated promissory notes, sale of assets and issuance of equity securities. A summary of our cash flows resulting from our operating, investing and financing activities for the nine months ended September 30, 2003 and 2002 are as follows:

	Nine months ended September 30,	
	2003	2002
(Dollars in thousands)	(Unaudited)	(Unaudited)
Operating activities	\$ 2,523	\$ 2,574
Investing activities	1,766	(166)
Financing activities	(3,944)	(2,305)

Cash flows provided by operating activities decreased to \$2,523,000 during the nine months ended September 30, 2003, as compared to \$2,574,000 during the same period last year. The overall decrease was affected by a decrease in inventory of \$1,728,000 during the first nine months of 2003, as compared to a decrease of \$1,124,000 during the same period last year. Additionally, the change was affected by a decrease in accounts receivable of \$638,000 during the first nine months of 2003, as compared to an increase of \$377,000 during the same period last year. The Company's ability to continue generating cash from operations is dependent upon using its current inventory (as opposed to new purchases of inventory) for generating sales, collection of its receivables and extended payments of accounts payables.

Cash flows provided by investing activities was \$1,766,000 during the nine months ended September 30, 2003 compared with cash flows used of \$166,000 during the same period last year. The change is due to completing the sale of the Company's former warehouse facility during the nine months ended September 30, 2003.

Cash flows used in financing activities increased to \$3,944,000 from \$2,305,000 during the nine months ended September 30, 2003 and 2002, respectively. The increase was primarily the result of using the net proceeds from the sale of assets for repaying current debt obligations.

Inventory is included in current assets, however, it may take over one year for the inventory to turn and therefore may not be saleable within a one-year time frame. Hence, inventory would not be as readily marketable or liquid as other items included in current assets, such as cash.

We believe that funds generated from operations and issuance of debt or equity securities will be sufficient to finance our working capital and capital expenditure requirements for the foreseeable future or until principal payments are due under the outstanding subordinated notes.

As of the date of this report, we had no commitments for other equity or debt financing or other capital expenditures.

Subsequent Events

As of the date of this report, the Company has continued listing for sale or lease, its office building facility located in Taipei, Taiwan.

Item 3. Controls and Procedures

As of September 30, 2003, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-14 of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, the Chief Executive Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiary) required to be included in the Company's Exchange Act filings.

There have been no significant changes in the Company's internal controls or in other factors which could significantly affect internal controls subsequent to the date the Company carried out its evaluation.
