Table of Contents

Table of Contents

We are very pleased to report that Komatsu Ltd. continued to record improvements in both sales and profits for the interim period ended September 30, 2003, following the previous interim period. Overseas sales, in particular, scored a record-high interim figure, demonstrating the solid results of our globalization strategy centering on the construction and mining equipment business.

On a nonconsolidated basis as well, Komatsu completed the interim period with an increase in both sales and profits from the corresponding six-month period last year, supported by not only increased export sales of construction and mining equipment, but also improved domestic sales from the previous interim period.

	<u>Billions of yen</u>	<u>Change* (%)</u>
Consolidated <Based on USGAAP>		
Net sales	567.6	9.5
Operating profit**	28.2	96.7
Income before income taxes	21.4	280.3
Net income	9.4	406.5
	<u>Billions of yen</u>	<u>Change* (%)</u>
Nonconsolidated		
Net sales	190.8	9.4
Operating profit	8.7	242.9
Ordinary profit	9.9	104.7
Net income	5.2	19.0

* Change from the previous interim period.

** Operating profit on a consolidated basis is the sum of segment profit. In conformity with generally accepted accounting principles of Japan, it is obtained by deducting cost of sales and SG&A expenses from sales.

Concerning cash dividends to shareholders, Komatsu maintains the basic policy of redistributing profits by taking payout ratios into account and reflecting business results, as it secures sufficient internal reserve for reinvestment. Based on this policy, the Board of Directors resolved interim dividends of 3 yen per share in its meeting held on November 7.

Table of Contents

Paid-Off from the Reform of Business Structure Project: Construction and Mining Equipment Business Further Improving against Expanding Demand

Demand for construction and mining equipment bottomed out and took on a note of recovery, beginning in the six-month period under review. While the Chinese market continued to sustain a high rate of growth, demand picked up momentum for recovery in the major markets of North America, Europe and Japan which had suffered from depressed demand for the last few years.

Since October 2001, Komatsu has worked to strengthen its business practices by aggressively engaging in the Reform of Business Structure project, which centers on the New Growth Strategy for the Construction and Mining Equipment Business, reduction of fixed costs and substantial cutbacks on production costs. As a result, Komatsu was able to attain a recovery of business results for the previous fiscal year, when demand for construction and mining equipment was slack worldwide. For the interim period under review, Komatsu expanded its mainstay business of construction and mining equipment, supported by an improved market environment, compared to the previous interim period, coupled with the added results of its reform efforts.

Taking the Offensive with Unique and Unrivaled Products

We have previously reported that Komatsu was focusing its efforts to develop new products with Unique and Unrivaled features by our development and production people working more closely with sales and service people. As the first campaign for such Unique and Unrivaled products, we unveiled four models of the new MR-2 mini hydraulic excavator series in July this year. In addition to cab comfort and safety that reset all conventions of mini excavators, we have also ensured an impressive improvement of maintainability of the MR-2 series by developing it from the viewpoints of customers in the rental industry. Orders are pouring in at a pace remarkably faster than originally anticipated.

In September, we launched sales of PC400 large hydraulic excavators as the second campaign for our Unique and Unrivaled products. With outstanding improvement in productivity in terms of fuel consumption, we are sure that new PC400 models will help our customers reduce their machine operating costs even more than before.

Table of Contents

Industrial Machinery and Vehicles, and Electronics Businesses All Improving

In the business areas in which we can demonstrate advantages of our superior manufacturing, such as forklift trucks, sheet-metal machines and forging presses, and agricultural and forestry equipment, the related companies of the Komatsu Group have introduced to the market in a timely manner, new products with original features. By aggressively undertaking sales and service activities with such products in the center, they continued to expand both sales and profits.

In the electronics business, while we saw a slow recovery of the semiconductor market, intensified competition resulted in a continuing tough market environment. Even in those conditions, our electronics business further lifted its earnings position with improved results including better performance of the silicon wafer business in Taiwan.

Management with Speed and Business Structure for Profits: Mid-Range Management Plan Developed

We anticipate that global demand for construction and mining equipment will continue to grow steadily after having bottomed out in 2001. This growth will be fueled by expanding demand in developing markets such as China, with ongoing infrastructure development proceeding at a rapid pace; CIS, former Soviet Republics with natural resource development; and Southeast Asia, with continued recovery of the economies. In addition, demand is upturning in North America.

To accelerate the recovery speed of business performance by seizing the opportunities of demand recovery with self-driven, aggressive actions and placing more efforts to reinforce corporate strength, Komatsu has recently started the **Move The World. KOMATSU 5-800** mid-range management plan for the year ending March 31, 2006. Having defined the goals for return on assets, net debt-to-equity ratio in addition to sales and profits for business growth in the new management plan, we are resolutely determined to further enhance utilization of assets and maintain a sound financial position.

While we are also concerned about such factors as overheating investment in China, volatile political conditions in the Middle East and drastic appreciation of the Japanese yen, there will be no change in what Komatsu has to do. In addition to construction and mining equipment, we have placed **Industrial-use machinery**, such as metal-sheet machines and forging presses, forklift trucks and forestry equipment, as Komatsu's core business. To solidly ensure the Number One position in Asia and Number Two in the global marketplace for our construction and mining equipment business, we are converging our utmost efforts in the following five management tasks.

1) To accelerate the implementation of the New Growth Strategy for the Construction and Mining Equipment Business.

2) To reinforce our competitiveness based on the Spirit of Manufacturers.

3) To facilitate selective focus on the criteria of technological advantage and profitability.

4) To reinforce our competitive foundation based on technological capabilities and financial position.

5) To further strengthen corporate governance.

Mid-Range Management Plan Move The World. KOMATSU 5-800

Table of Contents

All Komatsu Group employees worldwide, including those of us in management, are determined to work with speed on the above tasks and strive to improve Komatsu's business results and accomplish management goals. With respect to profits, in particular, we are going to place all-out efforts to accomplish the **Move The World. KOMATSU 5-800** plan and renew our record-high operating profit of ¥78.7 billion for the year ended December 31, 1982.

While establishing corporate ethics and ensuring soundness of management, Komatsu is also going to engage in environmental conservation and safety management ever more seriously than before. Committed in **Quality and Reliability** for all aspects of Komatsu's operation, we are working to maximize the corporate value of the Komatsu Group and make Komatsu a company that will enjoy the greater trust of shareholders and all other stakeholders.

On behalf of the members of the board, we would like to extend our sincere appreciation to our valued shareholders, customers, business partners and employees around the world for their support.

December 2003

Construction and Mining Equipment

Consolidated net sales of construction and mining equipment for the interim period under review expanded 10.1% over the previous interim period, to ¥408.9 billion (US\$3,685 million). Of this amount, overseas sales advanced 12.0%, to ¥289.6 billion (US\$2,610 million), representing a record-high figure for interim results. On a nonconsolidated basis, interim sales improved 8.9%, to ¥166.2 billion (US\$1,498 million).

During the six-month period under review, demand upturned in all major markets of construction and mining equipment, namely North America, Europe and Japan. Demand also expanded in China, whose demand growth outpaced others in recent years, Southeast Asia, the Middle East, and the Commonwealth of Independent States (CIS) or former Soviet Republics.

Japan:

Captures Demand Recovery with Full-lined GALEO Series

During the six-month period under review, Komatsu continued to aggressively broaden the line-up of the GALEO series, a new generation of Komatsu construction and mining equipment. Starting in July 2003, Komatsu also embarked on market introduction of new products with Unique and Unrivaled features. Developed by Komatsu Zenoah Co. where we have concentrated our Japanese development and sales capabilities for utility equipment, Komatsu launched the MR-2 series minimal rear-swing mini hydraulic excavators as the first campaign for the Unique and Unrivaled products. This series has enjoyed high marks given by customers for their safety and maintainability, and Komatsu received substantially more orders than initially planned for.

In the downstream aftersales markets, Komatsu Used Equipment Corp. continued to advance sales by capturing brisk overseas demand and further expanding its sales channels with the Internet bidding system, which the company developed. Rental companies of the Komatsu Group continued to promote rental of comprehensive equipment and facilities related to civil engineering jobs, while working to optimize assets and strengthen sales capabilities. To help customers cut down their repair and maintenance costs, Komatsu also worked to increase sales of service-contract products such as Komatsu All Support when selling new equipment.

This PC8000 super-large hydraulic shovel produced by Komatsu Mining Germany GmbH is in full operation at an iron ore mine of Companhia Vale do Rio Doce of Brazil.

North America:

Expands Sales by Capturing Upturned Demand

Edgar Filing: KOMATSU LTD - Form 6-K

Komatsu's North American sales for the interim period under review increased over the corresponding period last year against the backdrop of demand rebounded after four years, supported by brisk housing starts. Komatsu seized on this opportunity of upturned demand with aggressive sales of GALEO-series equipment, including hydraulic excavators and articulated dump trucks. Komatsu also expanded sales of utility equipment such as backhoe loaders. For the mining equipment business, while demand recovery for off-highway dump trucks still remained dull, Komatsu increased sales of equipment slightly from the previous interim period.

Sales By Operation (Consolidated)

Table of Contents

Europe and CIS:

Strengthens Sales Organization through Consolidation of Marketing Capabilities

Overall European demand for construction and mining equipment during the six-month period under review grew over the previous interim period, as the largest European market of Germany, the United Kingdom, Spain and some other markets sustained a high level of demand. Under such an environment, Komatsu worked to strengthen its European sales organization by consolidating marketing capabilities at Komatsu Europe International N.V. in April this year.

In CIS, new demand for equipment grew for use in mines and energy-related projects. Komatsu took advantage of its extensive product offerings, such as dump trucks, bulldozers and pipelayers, and expanded interim sales substantially over the previous interim period. Komatsu has established the Moscow Branch of Komatsu CIS Co. and worked to strengthen operation to capture growing demand for construction equipment for urban use resulting from the progress of the free market economy.

Moscow Branch of Komatsu CIS Co. commenced operation to capture emerging demand for equipment for use in urban areas.

China:

Meets Rapid Market Growth through Prompt and Dedicated Operation

With almost no critical effect of severe acute respiratory syndrome (SARS) on the Chinese market, demand for equipment continued to skyrocket during the six-month period under review. Komatsu Shantui Construction Machinery Co., Ltd. engaged in aggressive production and sales of renewed models of the flagship PC200 hydraulic excavators, and maintained a large market share. In April 2003, Komatsu Shantui accomplished cumulative production and sales of 10,000 units of hydraulic excavators, demonstrating its remarkable growth to Komatsu Group's largest base for the supply of PC200 hydraulic excavators. As part of its efforts to broaden the product mix, the company also embarked on the production and sales of smaller hydraulic excavators, namely the PC60. In addition, Komatsu continued to carry out aggressive operations, including further development of local distributors and expansion of production capacity of a subsidiary, and accomplished a substantial increase of Chinese sales over the previous interim period.

Southeast Asia & Oceania and the Middle East & Africa

In Southeast Asia and Oceania, Komatsu's sales for the interim period under review slightly declined from the corresponding period last year, reflecting orders received from a large-lot customer in Indonesia a year ago.

In the Middle East, Komatsu capitalized on steady demand for construction equipment from infrastructure development and other projects by drawing on its strength as a full-line manufacturer, and secured the same level of interim sales as those of the previous interim period. In Africa,

Komatsu boosted sales for the six-month period under review.

Sales By Region (Consolidated)

Table of Contents

Industrial Machinery, Vehicles and Others

Consolidated net sales of industrial machinery, vehicles and others grew 11.2% over the previous interim period, to ¥115.3 billion (US\$1,039 million) for the six-month period under review. On a nonconsolidated basis*, the Company expanded sales of large presses, equipment to Japan's Defense Agency and other products, posting interim sales of ¥24.6 billion (US\$222 million), up 13.1% over the corresponding period a year ago.

Komatsu Forklift Co., Ltd. carried out aggressive sales and service activities, centering on the LEO-NXT engine-driven forklift trucks for which the company had secured excellent market response since their market introduction, and achieved growth of sales surpassing that of demand in Japan. With respect to overseas sales, the company's subsidiary in the United States sustained strong sales, while the company expanded exports to the Middle East and CIS. As a result, consolidated interim sales of Komatsu Forklift improved over the corresponding period last year.

Komatsu Industries Corporation accelerated sales of forging presses, centering on Hybrid AC Servo presses for which the company enjoyed solid trust of customers for their outstanding productivity, energy savings and super low noise. In the area of services, Komatsu Industries focused its efforts to expand the engineering business such as retrofitting and improved earnings. As a result, the company increased both sales and profits for the interim period over the corresponding six-month period a year ago.

During the interim period under review, Komatsu Machinery Corp. expanded sales of not only crankshaft millers and other machine tools for its major customer portfolio of automobile manufacturers, but also manufacturing equipment for liquid crystal displays. As a result, Komatsu Machinery improved its interim results substantially over the corresponding period last year.

Komatsu Zenoah Co.'s agricultural and forestry equipment business, while facing slack demand due to bad weather in Japan, enjoyed positive results of market introduction of products with original features, including a knapsack-type brushcutter that features an outstanding degree of freedom of maneuverability resulting from its innovative engine layout. As a result, Komatsu Zenoah increased interim Japanese sales over the corresponding period last year. The company also expanded overseas sales by successfully capitalizing on strong demand in Europe, China and Southeast Asia and gaining a new distributor in Oceania. As a result, interim sales of the agricultural and forestry equipment business advanced over the corresponding period last year, marking a record-high figure for interim results.

In November 2003, Komatsu Zenoah launched this new G3200EZ chainsaw which features an original mechanism for easy tightening of the saw. Sales are already picking up.

* Starting the interim period under review, sales of the Company's electronics segment on a nonconsolidated basis are included in Industrial Machinery, Vehicles and Others, as the percentage of sales of Electronics represented by this operation has declined.

Sales by Operation (Nonconsolidated)

Table of Contents

Electronics

Consolidated net sales of the electronics business amounted to ¥43.3 billion (US\$390 million) for the six-month period under review, showing no significant change from the corresponding interim period last year.

Undertaken by Komatsu Electronic Metals Co., Ltd., Komatsu's silicon wafer business continued to experience difficult market conditions, most notably the intensified competition, although the market generated a slow recovery of demand. Komatsu Electronic Metals remained committed to production exclusively in Japan and Taiwan. Formosa Komatsu Silicon Corporation, its operation in Taiwan, further improved both sales and profits by expanding its sales channels in Taiwan, China and Southeast Asia as well as improving the ratio of prime wafers. As a result, Komatsu Electronic Metals sustained consolidated interim sales at about the same level as the corresponding interim period last year, while substantially improving profits. To secure the monthly production of 45,000 pieces of the next-generation mainstream 300mm wafer in the near future, the company continued to make facilities investment within the range of cash flow.

Advanced Silicon Materials LLC. (ASiMI), a manufacturing subsidiary of polycrystalline silicon and other products, expanded sales of monosilane gas mainly for use in the production of semiconductors and liquid crystal displays during the interim period under review. While interim sales declined from the six-month period a year ago, ASiMI improved its profit/loss account with the benefits of consolidation of production implemented in March 2002.

During the interim period under review, Komatsu Electronics, Inc. faced continued slack investment in fiber optic telecommunication-related facilities in North America, in particular, and sales of thermoelectric modules remained sluggish. In the field of semiconductor manufacturing equipment, meanwhile, the company continued its efforts in product development to capture future demand from facilities investment related to 300mm wafers.

Expansion of the production capacity for 300mm wafers is on schedule at the Nagasaki Plant of Komatsu Electronic Metals.

Sales by Operation (Nonconsolidated)

Table of Contents

Komatsu Delivers 12 Large Dump Trucks for Gold Mine in Russia

Komatsu has received an order of twelve HD785 off-highway dump trucks from Sumitomo Corporation for the gold mining company POLYUS, the largest mining and producer of gold in the Russian Federation. In response to a steady growth in the number of resource development-related projects in Russia, Komatsu is working to expand sales by capitalizing on its advantages as a full-line equipment manufacturer and is further strengthening its customer support capability there.

Sales of Minimal Rear-swing Radius Excavators Expand in North America

Komatsu has been expanding sales of the US series minimal rear-swing radius hydraulic excavators in North America, the world's largest market for construction equipment. While the US series was originally developed for use in Japan where construction equipment is often deployed in relatively confined spaces, US series hydraulic excavators are also gaining excellent evaluations from distributors and customers outside of Japan, as they not only prevent accidents when they turn, but also offer operating comfort, free of concerns in the rear. Komatsu is aggressively promoting sales of the US series worldwide as standard equipment for the 21st Century.

Komatsu Signs Acquisition Contract for Partek Forest, European Manufacturer of Forestry Machinery

Komatsu is going to acquire Partek Forestry AB which exclusively manufactures and sells forestry equipment. Komatsu also produces and sells forestry equipment based on its own construction equipment such as hydraulic excavators and bulldozers. By including Partek, a leading manufacturer of forestry equipment, in the Komatsu Group, Komatsu is positioned to step up the pace of its full-line offerings in this product segment. With respect to sales, Komatsu is going to combine Partek's stronghold European network and Komatsu's networks in the Americas, Asia and Oceania. Komatsu is well prepared to expand the forestry equipment business.

Komatsu Shantui Produces and Sells 10,000 Hydraulic Excavators

In April 2003, Komatsu Shantui Construction Machinery Co., Ltd., a manufacturing and sales subsidiary of the PC200, the major hydraulic excavator model, in Shandong, China, accomplished cumulative production and sales of 10,000 units. Since its establishment in 1995, the company has continued to expand its operations in the rapidly growing Chinese market and has become the largest supply center of PC200 hydraulic excavators for the Komatsu Group.

Table of Contents

LEO-NXT Series Forklift Truck Receives Award by the Minister of Economy, Trade and Industry of Japan

In July 2003, the LEO-NXT109 series engine-driven forklift truck produced by Komatsu Forklift Co., Ltd. received the Award by the Minister of Economy, Trade and Industry, the highest award of the 33rd Machine Design Award, sponsored by The Nikkan Kogyo Shimbun, Japan's leading industrial newspaper. The Machine Design Award evaluates all possible aspects which are expected from industrial goods, including external design, performance, quality, safety, environmental conservation, economy and marketability. Outstanding appraisals were given to the LEO-NXT109 series for its innovation in compactness. It measures the size of 1-ton class vehicles, but offers the performance of a 2-ton class vehicle.

Launchings of Unique and Unrivaled Products Continue, Completing Full Line-Up of the GALEO Series

In July 2003, Komatsu launched the PC MR-2 series minimal rear-swing radius hydraulic excavators in Japan. With full-scale renewal after five years, the new MR-2 series features outstanding improvements in maintainability and cab comfort while meeting environmental regulations around the world and ensuring one of the highest safety standards in the world. They have enjoyed superb customer evaluation since their market introduction.

In September, Komatsu also introduced the PC400/450 large excavators designed to achieve an impressive improvement in productivity of 20% in terms of fuel consumption compared with the conventional models. The new models also reduce the noise for the operator by a significant level of 6dB, compared to the conventional models, and offer enhanced cab comfort.

Komatsu Industries Tops Sales of 300 Units of the Hybrid AC Servo Press Series

Komatsu Industries Corporation has topped sales of 300 units of the Hybrid AC Servo Press H1F and H2F series since their market introduction in 2002. This achievement reflects unrivaled ratings given by customers for the micron-level precision, outstanding productivity, high flexibility and low noise of the series, all replacing the conventional standards of presses. In July 2003, Komatsu Industries hosted a special exhibition of the series at the Komatsu Plant by inviting customers to mark the one-year anniversary of sales.

We publish Komatsu Environmental Report on a regular basis, describing our environmental conservation activities in research and development, production, sales, services and other operations.

The report is also available on our website.

Cautionary Statement

This Semi-Annual Report contains forward-looking statements that reflect management's views and assumptions in the light of information currently available with respect to certain future events, including expected financial position, operating results and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects, plans, expects and similar terms and expressions to identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Any forward-looking statements speak only as of the date of this Semi-Annual Report, and Komatsu assumes no duty to update such statements. Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated costs or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new information technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; the impact of regulatory changes and accounting principles and practices; and the introduction, success and timing of business initiatives and strategies.
