Interim Business Report

(from April 1, 2005 to September 30, 2005)

Hitachi, Ltd.

Tokyo, Japan

(Note) Certain information including product introduction is omitted from this English translation.

## Table of Contents

### **To Our Shareholders:**

We take the opportunity of sending you this report on the business results for the first half of fiscal 2005 to express our heartfelt gratitude for your continued support and understanding.

During the half-year period under review, the Japanese economy was buoyed by rising consumer spending due mainly to improvement in employment and personal income, and also by an increase in private-sector plant and equipment investment.

In this business environment, consolidated revenues increased 2% from the same period of the preceding year, to JPY4,413.3 billion.

Although Power & Industrial Systems, High Functional Materials & Components, and Financial Services posted higher operating income than in the same period a year earlier, falling prices of plasma TVs, LCDs and hard disk drives depressed operating income in Digital Media & Consumer Products, Electronic Devices, and Information & Telecommunication Systems. The result was that consolidated operating income exceeded projected performance but nevertheless decreased 39% from the same period of the previous year, to JPY77.7 billion. Taking non-operating income of JPY29.0 billion and non-operating expense of JPY24.7 billion into account, income before income taxes amounted to JPY82.1 billion. However, owing to an increase in the relative tax burden and other factors, net loss amounted to JPY10.9 billion.

Looking at unconsolidated results, Hitachi, Ltd. (the Company), recorded revenues of JPY1,210.7 billion, up 5% from a year earlier. Although net income was higher than projected, it decreased 24% from the same period of the preceding year, to JPY20.0 billion.

In line with its long-standing policy of endeavoring to maximize shareholder benefit through increase in corporate value and steady dividend growth, the Board of Directors determined the amount of an interim dividend to be paid to shareholders at JPY5.5.

During the period under review, management moved forward to the strengthening of competitiveness in the plasma TV business in response to the rapid expansion of domestic and overseas flat-panel TVs markets. In April, the Company increased its holdings in Fujitsu Hitachi Plasma Display Limited ( FHP ), a joint-venture company between the Company and Fujitsu Limited, so as to make FHP a consolidated subsidiary of the Company and establish capability within the Hitachi Group to manufacture TVs starting from the production of plasma display panels. In May, management decided to invest a total of JPY85.0 billion in new plant and equipment for increasing FHP's production capacity.

In another move, the Hitachi Group is using finger vein authentication technology developed exclusively by the Company to build a stronger position in the information security business. Advantage is being taken of the outstanding robustness against falsification and high accuracy of the Company's technology to provide more reliable personal identification than possible with passwords and similar means in a broad range of fields, including ATMs, building access security systems, and personal computer user authentication devices.

The goal of increasing the ratio of overseas operations continues to be advanced by concentrating on businesses that set Hitachi apart in local markets. One notable success stemming from this initiative came in June, when Hitachi succeeded in securing an order for railway vehicles and related maintenance services in the United Kingdom, birthplace of the public railway.

## Edgar Filing: HITACHI LTD - Form 6-K

In addition, steps are being taken to reinforce core businesses through centralization of management resources within Hitachi. In October 2005, preparation was begun toward the consolidation of Hitachi Plant Engineering & Construction Co., Ltd., Hitachi Kiden Kogyo, Ltd., Hitachi Industries Co., Ltd., and part of the Company's Industrial Systems Group. The new company, to be formally established in April 2006, will provide Hitachi with integrated capability extending from design and production to construction and services of water treatment systems, industrial plants and other businesses at the social and industrial infrastructure level. Elpida Memory, Inc., a semiconductor operations company set up jointly with NEC Corporation in 1999, ceased to be an equity-method affiliate of the Company, in September 2005, when the Company sold part of its shares.

The Hitachi Group Pavilion at the Aichi Expo 2005 was a resounding success that attracted 1.7 million visitors over the 185 days that the Expo ran starting from March 2005. The Pavilion's main attraction, Nature Contact, used advanced Hitachi IT technologies to bring endangered animals to life before the eyes of visitors. Our guests were also given the chance to interact firsthand with some of Hitachi's cutting-edge technologies, like the Mu-chip, a microminiature IC chip able to carry on identification communication with external devices from a distance, and a fuel cell for use with mobile equipment.

Management's view of the future business environment is that the Japanese economy is likely to continue to recover but that the pace of the rebound will be slowed by increasing raw material prices. In order to quickly achieve the improved business results needed to respond to shareholder expectations for higher returns, management intends to meet the challenge of the evolving business environment by making an intensified effort to ensure steady growth of the hard disk drives, plasma TVs and other mainstream businesses and to reduce expenses of every kind, including material procurement, distribution and communication costs. Efforts will also be made to secure and maintain customer confidence in Hitachi. For this, high priority will be placed on thorough adherence to manufacturing company fundamentals, most notably product and service quality control.

The management team hopes that it will continue to receive your understanding and support.

November 2005

Etsuhiko Shoyama  
President and Chief Executive Officer

## **Table of Contents**

### Outline of Business Results

#### Information & Telecommunication Systems

Solid performance was registered in revenues of outsourcing services operations. However, a decline in revenues of hardware business, due in part to the effect that the Company sold shares of former Hitachi Printing Solutions, Ltd. to Ricoh Company, Ltd., segment revenues decreased 1% from the same period of the preceding year, to JPY1,057.1 billion. Operating income decreased 20%, to JPY23.2 billion, due primarily to the significant downturn in the hard disk drive operations' profitability.

#### Electronic Devices

The segment revenues decreased 16% from the same period of the preceding year, to JPY583.1 billion, and operating income decreased 69%, to JPY9.2 billion, respectively, due primarily to a decline in LCDs effected by intensifying competition in the market.

#### Power & Industrial Systems

Solid performance was registered in industrial equipment and air-conditioning equipment. Elevators and escalators business and Hitachi Construction Machinery Co., Ltd. also registered good growth mainly in the overseas market. In addition, revenues of automotive products were boosted by the effect that the Company merged TOKICO LTD. on October 1, 2004. Thus, segment revenues increased 14% from the same period of the preceding year, to JPY1,278.9 billion. Operating income increased 130%, to JPY23.2 billion.

#### Digital Media & Consumer Products

Segment revenues decreased 5% from the same period of the preceding year, to JPY611.8 billion, due primarily to the price decline of flat-screen televisions such as plasma TVs and home appliances. The segment recorded an operating loss of JPY16.2 billion, compared to an operating income of JPY10.6 billion in the same period of the preceding year, due primarily to the downturn in Fujitsu Hitachi Plasma Display Limited.

#### High Functional Materials & Components

Segment revenues increased 3% from the same period of the preceding year, to JPY760.4 billion, due primarily to solid performance registered by Hitachi Chemical Co., Ltd. and Hitachi Metals, Ltd., mostly for the electronic related products and automotive related business. Operating income rose 19%, to JPY48.0 billion.

Logistics, Services & Others

Hitachi Transport System, Ltd. registered a good growth mainly in the third party logistics business, which performs distribution services comprehensively entrusted from customers. However, Hitachi Mobile Co., Ltd. and overseas sales companies performed poorly. Thus, segment revenues decreased 7% from the same period of the preceding year, to JPY570.5 billion, and operating income decreased 8%, to JPY6.8 billion.

Financial Services

Segment revenues decreased 4%, to JPY260.8 billion, from the same period of the preceding year. Operating income increased 60%, to JPY16.0 billion, due primarily to the increased profit of Hitachi Capital Corporation by cutting of financial costs.
