It may be difficult for you to enforce your rights and any claim  
you may have arising under the U.S. federal securities laws, since the issuers are located in a foreign country, and some or all of  
their  
officers  
and  
directors  
may  
be

residents  
of  
foreign  
countries.

You  
may

Our Carbon Steel Materials assets are Tier 1

Significant producer of Carbon  
Steel Materials (Iron Ore, Coking  
Coal and Manganese)

Resource and mineralisation that  
supports production for more than  
50 years in both Coking Coal and  
Iron Ore

Large high grade ore bodies,  
concentrated around key  
infrastructure

Very low cost curve position and  
close proximity to Asian growth  
market

First class project development

Conclusion

Strength, stability and growth

Strong pricing fundamentals due to increased demand and lagging supply

BHP

Billiton's  
strategy  
is  
unchanged  
-  
a  
diversified  
upstream  
portfolio  
of  
Tier  
1,  
large,  
low-cost, expandable assets

BHP Billiton is well positioned to continue to create strong value for shareholders with a large project pipeline, focussed on high margin investments, which will deliver strong growth

The  
Rio  
Tinto  
acquisition  
can  
generate  
additional  
value  
for  
both  
sets  
of  
shareholders  
and  
is strongly aligned with BHP Billiton's strategy and management philosophy of simplicity, accountability and global talent

The combined organisation would deliver:

More production, faster and lower cost, an enhanced set of future growth options and quantifiable synergies -  
\$3.7B in incremental EBITDA by year 7

A compelling 45% premium for Rio Tinto shareholders and participation in the world's largest mining company
