Table of Contents**JABIL CIRCUIT, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****Note 1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary to present fairly the information set forth therein have been included. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes included in the Annual Report on Form 10-K of Jabil Circuit, Inc. (the Company) for the fiscal year ended August 31, 2008. Results for the six-month period ended February 28, 2009 are not necessarily an indication of the results that may be expected for the fiscal year ending August 31, 2009.

Note 2. Inventories

The components of inventories consist of the following (in thousands):

	February 28, 2009	August 31, 2008
Raw materials	\$ 1,006,050	\$ 1,070,163
Work in process	250,375	277,699
Finished goods	147,163	181,000
Total inventories	\$ 1,403,588	\$ 1,528,862

Note 3. (Loss)/Earnings Per Share and Dividends***a. (Loss)/Earnings Per Share***

The following table sets forth the calculation of basic and diluted (loss)/earnings per share (EPS) (in thousands, except per share data):

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Numerator:				
Net (loss)/income	\$ (866,100)	\$ (24,045)	\$ (1,141,957)	\$ 37,956
Denominator:				
Weighted-average common shares outstanding basic	206,711	205,082	206,557	204,866
Dilutive common shares issuable upon exercise of stock options, exercise of stock appreciation rights and employee stock plan purchases				1,214
Dilutive unvested common shares associated with restricted stock awards				372
Weighted-average common shares diluted	206,711	205,082	206,557	206,452

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

(Loss)/earnings per share:

Basic	\$	(4.19)	\$	(0.12)	\$	(5.53)	\$	0.19
Diluted	\$	(4.19)	\$	(0.12)	\$	(5.53)	\$	0.18

In accordance with Statement of Financial Accounting Standards No. 128, *Earnings Per Share* (SFAS 128), no potential common shares relating to stock-based compensation awards have been included in the computation of diluted earnings per share as a result of the Company's net losses for the three months ended February 28, 2009 and February 29, 2008

Table of Contents

as well as for the six months ended February 28, 2009. The Company excluded from the computation of diluted earnings per share 17,157,181 and 14,070,320 ordinary share equivalents and 8,010,799 and 7,991,067 stock appreciation rights outstanding at February 28, 2009 and February 29, 2008, respectively.

For the six months ended February 29, 2008 options to purchase 7,406,089 shares of common stock were outstanding during the periods but were not included in the computation of diluted earnings per share because the options exercise prices were greater than the average market price of the common shares, and therefore, their effect would be anti-dilutive as calculated under the treasury method promulgated by SFAS 128. In accordance with the contingently issuable shares provision of SFAS 128, 3,087,144 shares of performance-based, unvested common stock awards (restricted stock) granted in fiscal years 2006 through 2008 were not included in the calculation of earnings per share for the six months ended February 29, 2008 because all the necessary conditions for vesting had not been satisfied. In addition, for the six months ended February 29, 2008, 7,163,966 stock appreciation rights were not included in the calculation of diluted earnings per share because the shares considered repurchased with the assumed proceeds were greater than the shares issuable or the exercise price was greater than the average market price, and therefore, their effect would be anti-dilutive.

b. Dividends

The following table sets forth certain information relating to the Company's cash dividends declared to common stockholders during the six months ended February 28, 2009 and February 29, 2008.

Dividend Information						
	Dividend		Total of cash	Date of record for	Dividend cash	
	declaration date	Dividend	dividends	dividend payment	payment date	
		per share	paid			
			(in thousands, except for per share data)			
Fiscal year 2008:	November 1, 2007	\$ 0.07	\$ 14,667	November 15, 2007	December 3, 2007	
	January 17, 2008	\$ 0.07	\$ 14,704	February 15, 2008	March 3, 2008	
Fiscal year 2009:	October 24, 2008	\$ 0.07	\$ 14,916	November 17, 2008	December 1, 2008	
	January 22, 2009	\$ 0.07	\$ 14,974	February 17, 2009	March 2, 2009	

Note 4. Stock-Based Compensation

The Company applies the provisions of Statement of Financial Accounting Standards No. 123R, *Share-Based Payment* (SFAS 123R), for its share-based compensation plans. Under SFAS 123R, all share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as an expense in operations over the requisite service period.

The Company applies a lattice valuation model for all stock options and stock appreciation rights (collectively known as Options), excluding those granted under the Company's employee stock purchase plan (ESPP), granted subsequent to August 31, 2005. The lattice valuation model is a more flexible analysis to value employee Options because of its ability to incorporate inputs that change over time, such as volatility and interest rates, and to allow for actual exercise behavior of Option holders. The Company uses the Black-Scholes model for valuing the shares granted under the ESPP and Options granted prior to September 1, 2005. Compensation for restricted stock awards (both restricted stock and restricted stock units) is measured at fair value on the date of grant based on the number of shares expected to vest and the quoted market price of the Company's common stock. Compensation cost for all awards is recognized in operations, net of estimated forfeitures, on a straight-line basis over the requisite service period.

The Company recorded \$8.6 million and \$19.2 million of stock-based compensation expense in the Condensed Consolidated Statements of Operations for the three months and six months ended February 28, 2009, respectively, net of related tax effects of \$(3.4) million and \$0.8 million, respectively. The Company recorded \$14.3 million and \$16.1 million of stock-based compensation expense in the Condensed Consolidated Statements of Operations for the three months and six months ended February 29, 2008, respectively, net of related tax effects of \$0.6 million and \$4.0 million, respectively. The Company capitalizes stock-based compensation costs related to awards granted to employees whose compensation costs are directly attributable to the cost of inventory. At February 28, 2009, \$0.5 million of stock-based compensation was classified as inventory costs on the Condensed Consolidated Balance Sheets.

The fair-value method is applied to non-employee awards in accordance with SFAS 123R. The measurement date for equity awards granted to non-employees is the earlier of the performance commitment date or the date the services required under the arrangement have been completed. The Company generally considers the measurement date for such non-employee

Table of Contents

awards to be the date that the award has vested. The Company re-measures the awards at each interim reporting period between the grant date and the measurement date. Non-employee awards are classified as liabilities on the Condensed Consolidated Balance Sheets and are therefore remeasured at each interim reporting period until the options are exercised, cancelled or expire unexercised. At February 28, 2009, \$4.0 thousand related to non-employee stock-based awards was classified as a liability on the Company's Condensed Consolidated Balance Sheets. The Company recognized a gain in the Condensed Consolidated Statement of Operations related to remeasuring the awards for the three months and six months ended February 28, 2009 of \$12.0 thousand and \$0.2 million, respectively. The Company recognized a gain of \$0.1 million and \$0.4 million in the Condensed Consolidated Statement of Operations, respectively, related to remeasuring the awards for the three months and six months ended February 29, 2008.

Cash received from options exercises under all share-based payment arrangements, including the Company's ESPP, for the six months ended February 28, 2009 and February 29, 2008 was \$3.4 million and \$9.2 million, respectively. These proceeds for the six months ended February 28, 2009 and February 29, 2008 are off-set by \$0.2 million and \$1.2 million, respectively, in market value of restricted shares withheld by the Company to satisfy the minimum amount of its income tax withholding requirements. This market value was determined on the date that the restricted shares vested and resulted in the withholding of 23,988 shares of the Company's common stock. The amount has been classified as treasury stock on the Condensed Consolidated Balance Sheets. The Company currently expects to satisfy share-based awards with registered shares available to be issued.

As described in Note 6 – Commitments and Contingencies, the Company is involved in a putative shareholder class action and has received a subpoena from the U.S. Attorney's office for the Southern District of New York in connection with certain historical stock option grants. The Company has cooperated and intends to continue to cooperate with the U.S. Attorney's office. The Company cannot, however, predict the outcome of the litigation or that investigation.

a. Stock Option and Stock Appreciation Right Plans

The Company's 1992 Stock Option Plan (the "1992 Plan") provided for the granting to employees of incentive stock options within the meaning of Section 422 of the Internal Revenue Code and for the granting of non-statutory stock options to employees and consultants of the Company. A total of 23,440,000 shares of common stock were reserved for issuance under the 1992 Plan. The 1992 Plan was adopted by the Board of Directors in November of 1992 and was terminated in October 2001 with the remaining shares transferred into a new plan created in fiscal year 2002.

In October 2001, the Company established a new Stock Option Plan (the "2002 Incentive Plan"). The 2002 Incentive Plan was adopted by the Board of Directors in October 2001 and approved by the stockholders in January 2002. The 2002 Incentive Plan provides for the granting of Section 422 Internal Revenue Code and non-statutory stock options, as well as restricted stock, stock appreciation rights and other stock-based awards. The 2002 Incentive Plan has a total of 33,608,726 shares reserved for grant, including 2,608,726 shares that were transferred from the 1992 Plan when it was terminated in October 2001, 10,000,000 shares authorized in January 2004, 7,000,000 shares authorized in January 2006, 3,000,000 shares authorized in August 2007, 2,500,000 shares authorized in January 2008 and 1,500,000 shares authorized in January 2009. The Company also adopted sub-plans under the 2002 Incentive Plan for its United Kingdom employees (the "CSOP Plan") and for its French employees (the "FSOP Plan"). The CSOP Plan and FSOP Plan are tax advantaged plans for the Company's United Kingdom and French employees, respectively. Shares are issued under the CSOP Plan and FSOP Plan from the authorized shares under the 2002 Incentive Plan.

The 2002 Incentive Plan provides that the exercise price of Options generally shall be no less than the fair market value of shares of common stock on the date of grant. Exceptions to this general rule apply to grants of stock appreciation rights, grants of Options intended to preserve the economic value of stock options and other equity-based interests held by employees of acquired entities, and grants of Options intended to provide a material inducement for a new employee to commence employment with the Company. It is and has been the Company's intention for the exercise price of Options granted under the 2002 Incentive Plan to be at least equal to the fair market value of shares of common stock on the date of grant. However, as we previously discussed in Note 2 – Stock Option Litigation and Restatements to the Consolidated Financial Statements in the Annual Report on Form 10-K for the fiscal year ended August 31, 2006, a certain number of Options were identified that had a measurement date based on the date that the Compensation Committee or management (as appropriate) decided to grant the Options, instead of the date that the terms of such grants became final, and, therefore, the related Options had an exercise price less than the fair market value of shares of common stock on the final date of measurement.

As a result, the holders of the Options with an exercise price less than the fair market value of shares of common stock on the final date of measurement could have possibly incurred adverse tax consequences, however, this was remedied by the Company's actions described in the paragraph immediately below. Such adverse tax consequences relate to the portions of such Options that vest after December 31, 2004 ("Section 409A Affected Options") and subject the option holders to accelerated income taxation and a penalty tax under Internal Revenue Code Section 409A ("Section 409A").

Table of Contents

On May 12, 2008, the Company commenced an exchange offer to its non-executive officer employees who are subject to taxation in the United States to amend or replace the Section 409A Affected Options (the Exchange Offer). The purpose of the Exchange Offer was to permit eligible affected employees to avoid the adverse tax consequences that would be imposed on the Section 409A Affected Options under Section 409A. Pursuant to the Exchange Offer, the Company offered to eligible affected employees the right to have their eligible Section 409A Affected Options amended or replaced and, in certain circumstances, to receive cash payment as compensation for an increased exercise price. The replaced awards have the same terms as the original awards except for a new exercise price or a new grant date, or both, as applicable. The Exchange Offer was completed on June 13, 2008. Substantially all affected employees elected to accept the offer, which covered options to acquire 2,055,869 shares of the Company's common stock. A similar separate offer was made to one executive officer on July 16, 2008, and resulted in 19,616 shares being tendered. Collectively, the Company paid \$0.3 million to all of the affected employees, and recorded compensation expense, in connection with this offer.

In October 2007, the Board of Directors approved comprehensive procedures governing the manner in which Options are granted to, among other things, substantially reduce the likelihood that future grants of Options will be made with an exercise price that is less than the fair market value of shares of common stock on the Option measurement date for financial accounting and reporting purposes. With respect to any participant who owns stock representing more than 10% of the voting power of all classes of stock of the Company, the exercise price of any incentive stock option granted is to equal at least 110% of the fair market value on the grant date and the maximum term of the option may not exceed five years. The term of all other Options under the 2002 Incentive Plan may not exceed ten years. Beginning in fiscal year 2006, Options generally vest at a rate of one-twelfth 15 months after the grant date with an additional one-twelfth vesting at the end of each three-month period thereafter, becoming fully vested after a 48-month period. Prior to this change, Options generally vested at a rate of 12% after the first six months and 2% per month thereafter, becoming fully vested after a 50-month period.

The following table summarizes Option activity from September 1, 2008 through February 28, 2009:

	Shares Available for Grant	Options Outstanding	Aggregate Intrinsic Value (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (years)
Balance at September 1, 2008	7,262,639	16,466,315	\$ 8,771	\$ 24.09	5.8
Options authorized	1,500,000				
Options expired	(181,614)			\$ 16.56	
Options granted	(55,290)	55,290		\$ 8.19	
Options cancelled	675,748	(675,748)		\$ 25.56	
Restricted stock awards (1)	(4,974,749)				
Options exercised		(1,160)		\$ 5.88	
Balance at February 28, 2009	4,226,734	15,844,697	\$ 0	\$ 24.07	5.3
Exercisable at February 28, 2009		12,019,117	\$ 0	\$ 23.73	4.4

(1) Represents the maximum number of shares that can be issued based on the achievement of certain performance criteria. The weighted-average grant-date fair value per share of Options granted during the six months ended February 28, 2009 and February 29, 2008 was \$3.50 and \$8.73, respectively. The total intrinsic value of Options exercised during the six months ended February 28, 2009 and February 29, 2008 was \$3.6 thousand and \$1.8 million, respectively.

At February 28, 2009, there were \$35.1 million of unrecognized compensation costs related to non-vested Options that are expected to be recognized over a weighted-average period of 1.5 years. The total fair value of Options vested during the six months ended February 28, 2009 and February 29, 2008 was \$12.1 million and \$8.5 million, respectively.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

The Company uses historical data to estimate the Option exercise and employee departure behavior used in the lattice valuation model. The expected term of Options granted is derived from the output of the option pricing model and represents the period of time that Options granted are expected to be outstanding. The risk-free rate for periods within the contractual term of the Options is based on the U.S. Treasury yield curve in effect at the time of grant. The volatility used for the lattice model is a constant volatility for all periods within the contractual term of the Option. The constant volatility is a weighted

Table of Contents

average of implied volatilities from traded options and historical volatility corresponding to the contractual term of the Option. The expected dividend yield of Options granted is derived based on the expected annual dividend yield over the expected life of the option expressed as a percentage of the stock price on the date of grant.

Following are the weighted-average and range assumptions, where applicable, used for each respective period:

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Expected dividend yield	4.4%	1.9%	4.3%	1.3%
Risk-free interest rate	0% to 2.6%	2.5% to 3.7%	0% to 2.9%	2.5% to 4.4%
Weighted-average expected volatility	67.3%	56.4%	68.1%	50.2%
Expected life	5.9 years	6.1 years	6.3 years	5.8 years

At February 28, 2009, the Company has 82,844 Options outstanding that will be settled by the Company with cash. SFAS 123R requires that the Company classify cash settled awards as liabilities on the Company's Condensed Consolidated Balance Sheets and measure these awards at fair value at each reporting date until the award is ultimately settled (i.e. until the Option is exercised or canceled). All changes in fair value are recorded to the Company's Condensed Consolidated Statement of Operations at each reporting date. At February 28, 2009, \$10.8 thousand related to cash settled awards was recorded as a liability on the Company's Condensed Consolidated Balance Sheets. The Company recognized a gain of \$36.3 thousand and \$89.3 thousand in the Condensed Consolidated Statement of Operations for the three months and six months ended February 28, 2009, respectively, to record the awards at fair value.

b. Stock Purchase and Award Plans

The ESPP was approved by the Company's Board of Directors in January 2002. Initially there were 2,000,000 shares reserved under the ESPP. An additional 2,000,000 shares and 3,000,000 shares were authorized for issuance under the ESPP and approved by stockholders in January 2006 and January 2009, respectively. The Company also adopted a sub-plan under the ESPP for its Indian employees. The Indian sub-plan is a tax advantaged plan for the Company's Indian employees. Shares are issued under the Indian sub-plan from the authorized shares under the ESPP. As of February 28, 2009, a total of 3,997,275 shares had been issued under the ESPP.

Employees are eligible to participate in the ESPP after 90 days of employment with the Company. The ESPP permits eligible employees to purchase common stock through payroll deductions, which may not exceed 10% of an employee's compensation, as defined in the ESPP, at a price equal to 85% of the fair market value of the common stock at the beginning or end of the offering period, whichever is lower. The ESPP is intended to qualify under section 423 of the Internal Revenue Code. Unless terminated sooner, the ESPP will terminate on October 17, 2011.

Awards under the ESPP are generally granted in June and December. As such, there were 580,887 and 432,202 shares purchased under the ESPP during the six months ended February 28, 2009 and February 29, 2008, respectively.

The fair value of shares issued under the ESPP was estimated on the commencement date of each offering period using the Black-Scholes option pricing model. The following weighted-average assumptions were used in the model for each respective period:

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Expected dividend yield	0.9%	1.1%	0.9%	1.1%
Risk-free interest rate	2.1%	5.0%	2.1%	5.0%
Weighted-average expected volatility	58.1%	30.2%	58.1%	30.2%
Expected life	.5 years	.5 years	.5 years	.5 years

Table of Contents**c. Restricted Stock Awards**

In fiscal year 2005, the Company granted restricted stock awards to certain key employees pursuant to the 2002 Stock Incentive Plan. The awards granted in fiscal year 2005 will vest after five years, but may vest earlier if specific performance criteria are met.

Beginning in fiscal year 2006, the Company began granting certain restricted stock awards that have certain performance conditions that will be measured at the end of the employee's requisite service period, which provide a range of vesting possibilities from 0% to 200%. The fair value of each award was measured on the date of grant and was originally recognized over the requisite service period based on the number of shares that would vest if the Company achieved 100% of the performance goal, which was the probable outcome at the grant date. In the fourth quarter of fiscal year 2007, the Company determined that for the restricted stock awards that were granted in fiscal year 2006 that have the aforementioned performance conditions, it was probable that the performance goal resulting in 100% of the awards being vested would not be achieved. However, it was probable that 40% of the awards would vest. This change in estimate resulted in the reversal of \$9.1 million in stock-based compensation expense from the Company's Consolidated Statement of Operations in the fourth quarter of fiscal year 2007. It was further determined in the first quarter of fiscal year 2008 that for such restricted stock awards granted in fiscal year 2006, it was probable that none of the awards would vest, which resulted in an additional reversal of \$5.9 million in stock-based compensation expense from the Company's Consolidated Statement of Operations. During the third quarter of fiscal year 2008, it was determined that 50% of the restricted stock awards that were granted in fiscal year 2007 with performance conditions would vest. This change in estimate resulted in a reversal of \$6.9 million in stock-based compensation expense from the Company's Consolidated Statement of Operations in the third quarter of fiscal year 2008. It was further determined in the fourth quarter of fiscal year 2008 that for restricted stock awards granted in fiscal year 2007, it was probable that none of the awards would vest, which resulted in an additional reversal of \$7.6 million in stock-based compensation expense from the Company's Consolidated Statement of Operations in the fourth quarter of fiscal year 2008. During the second quarter of fiscal year 2009, it was determined that none of the restricted stock awards that were granted in fiscal year 2008 with performance conditions would vest. This change in estimate resulted in a reversal of \$10.2 million in stock-based compensation expense from the Company's Consolidated Statement of Operations in the second quarter of fiscal year 2009. The restricted stock awards that were granted in fiscal year 2009 continue to be recognized based on an estimated 100% performance goal, the probable outcome. If it becomes probable, based on the Company's performance, that more or less than the current estimate of the awarded shares will vest, an adjustment to compensation cost will be recognized. Alternatively, if any of the performance goals are not met, any recognized compensation cost will be reversed. In addition to restricted stock awards that have certain performance conditions, the Company has also granted certain restricted stock awards that vest over time.

Beginning in fiscal year 2008, the Company began granting certain restricted stock awards with a vesting condition that is tied to the Standard and Poor's 500 Composite Index. In accordance with SFAS 123R, such a market condition must be considered in the grant date fair value of the award which contemplates that the market condition may never be met. Stock-based compensation expense related to an award with a market condition will be recognized over the requisite service period regardless of whether the market condition is satisfied, provided that the requisite service period has been completed.

The following table summarizes restricted stock activity from September 1, 2008 through February 28, 2009:

	Shares	Weighted - Average Grant-Date Fair Value
Nonvested balance at September 1, 2008	5,989,884	\$ 24.17
Changes during the period		
Shares granted (1)	5,446,707	\$ 7.42
Shares vested	(114,810)	\$ 21.51
Shares forfeited	(471,958)	\$ 24.58
Nonvested balance at February 28, 2009	10,849,823	\$ 15.77

(1) Represents the maximum number of shares that can vest based on the achievement of certain performance criteria.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

At February 28, 2009, there was \$37.7 million of total unrecognized compensation cost related to restricted stock awards granted under the 2002 Stock Incentive Plan. That cost is expected to be recognized over a weighted-average period of 1.6 years.

Table of Contents**Note 5. Concentration of Risk and Segment Data****a. Concentration of Risk**

The Company operates in 22 countries worldwide. Revenues to unaffiliated customers are based on the Company's location providing the electronics design, production, product management or aftermarket services. The following table sets forth external net revenue, net of intercompany eliminations, and long-lived asset information where individual countries represent a material portion of the total (in thousands):

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
External net revenue:				
Mexico	\$ 703,635	\$ 515,033	\$ 1,295,201	\$ 1,057,847
China	508,981	630,713	1,332,168	1,419,493
U.S.	495,401	635,867	1,038,939	1,248,663
Hungary	327,609	238,676	530,649	392,756
Malaysia	179,035	248,507	414,492	492,321
Poland	118,037	244,393	325,847	632,358
Other	554,702	545,424	1,332,613	1,183,122
	\$ 2,887,400	\$ 3,058,613	\$ 6,269,909	\$ 6,426,560

	February 28, 2009	August 31, 2008
Long-lived assets:		
China	\$ 432,190	\$ 481,770
U.S.	264,673	359,451
Mexico	235,082	188,823
Taiwan	140,908	633,301
Malaysia	107,814	117,344
India	88,188	294,322
Hungary	72,361	149,010
Other	199,815	460,403
	\$ 1,541,031	\$ 2,684,424

Foreign source revenue represented 82.8% and 83.4% of net revenue for the three months and six months ended February 28, 2009 compared to 79.2% and 80.6% for the three months and six months ended February 29, 2008.

Sales of the Company's products are concentrated among specific customers. For the six months ended February 28, 2009, the Company's five largest customers accounted for approximately 42% of its net revenue and 50 customers accounted for approximately 90% of its net revenue. Sales to the following customers, expressed as a percentage of consolidated net revenue, and the percentage of trade accounts receivable for each customer, were as follows:

Percentage of Net Revenue Six Months Ended		Percentage of Trade Accounts Receivable	
February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Hewlett-Packard Company	10%	11%	*	*
Royal Philips Electronics	*	10%	*	12%

* Amount was less than 10% of total

Sales to the above customers were reported in the Consumer, Electronic Manufacturing Services (EMS) and Aftermarket Services (AMS) operating segments.

Table of Contents**b. Segment Data**

Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information* (SFAS 131), establishes standards for reporting information about segments in financial statements. Operating segments are defined as components of an enterprise that engage in business activities from which it may earn revenues and incur expenses; for which separate financial information is available; and whose operating results are regularly reviewed by the chief operating decision maker to assess the performance of the individual segment and make decisions about resources to be allocated to the segment.

The Company derives its revenue from providing comprehensive electronics design, production, product management and aftermarket services. Management, including the Chief Executive Officer, evaluates performance and allocates resources on a divisional basis for manufacturing and service operating segments. The Company's operating segments consist of three segments – Consumer, EMS and AMS.

Net revenue for the operating segments is attributed to the division in which the product is manufactured or service is performed. An operating segment's performance is evaluated based upon its pre-tax operating contribution, or segment income. Segment income is defined as net revenue less cost of revenue, segment selling, general and administrative expenses, segment research and development expenses and an allocation of corporate selling, general and administrative expenses, and does not include, intangible amortization, stock-based compensation expense, restructuring and impairment charges, goodwill impairment charges, other expense, interest income, interest expense, income taxes or minority interest. Total segment assets are defined as trade accounts receivable, inventories, customer related machinery and equipment, intangible assets and goodwill. All other non-segment assets are reviewed on a global basis by management. Transactions between operating segments are generally recorded at amounts that approximate arm's length.

The following table sets forth operating segment information (in thousands):

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008

Note 6. Commitments and Contingencies

a. Legal Proceedings

i. Private Litigation Related to Certain Historical Stock Option Grant Practices

In April and May of 2006, shareholder derivative lawsuits were filed in State Circuit Court in Pinellas County, Florida on behalf of a purported shareholder of the Company naming the Company as a nominal defendant, and naming certain of the Company's officers and directors as defendants. Those lawsuits were subsequently consolidated (the Consolidated State Derivative Action). The Consolidated State Derivative Action alleged breaches of certain fiduciary duties to the Company by backdating certain stock option grants between August 1998 and October 2004 to make it appear that they were granted on a prior date when the Company's stock price was lower. Subsequently, two similar federal derivative suits were filed and consolidated in January 2007 into one action (the Consolidated Federal Derivative Action).

On May 3, 2006, the Company's Board of Directors appointed a Special Committee that reviewed the allegations asserted in all of the above derivative actions and concluded that the evidence did not support a finding of intentional manipulation of stock option grant pricing by any member of management. In addition, the Special Committee concluded that it was not in the Company's best interests to pursue the derivative actions and stated that it would assert that position on the Company's behalf in each of the pending derivative lawsuits. The Special Committee identified certain factors related to the controls surrounding the process of accounting for option grants that contributed to the accounting errors that led to a restatement of certain of the Company's historical financial statements.

In September 2007, the Company reached an agreement to resolve the Consolidated State Derivative Action and the Consolidated Federal Derivative Action that did not involve the Company paying any monetary damages, but it did adopt several new policies and procedures to improve the process through which equity awards are determined, approved and accounted for. In April 2008, the State Court entered an order dismissing the Consolidated State Action and finding that the proposed settlement was fair, adequate and reasonable, and that awarded the plaintiffs' counsel \$700.0 thousand in attorney fees and costs (\$575.0 thousand of which was paid by the Company's Directors and Officers insurance carriers and \$125.0 thousand of which was paid by the Company). On April 25, 2008, the Federal Court approved the proposed settlement agreement and dismissed the Consolidated Federal Action.

In addition to the derivative actions, on September 18, 2006, a putative shareholder class action was filed in the U.S. District Court for the Middle District of Florida, Tampa Division against the Company and various present and former officers and directors, including Forbes I.J. Alexander, Scott D. Brown, Laurence S. Grafstein, Mel S. Lavitt, Chris Lewis, Timothy Main, Mark T. Mondello, William D. Morean, Lawrence J. Murphy, Frank A. Newman, Steven A. Raymund, Thomas A. Sansone and Kathleen A. Walters on behalf of a proposed class of plaintiffs comprised of persons that purchased the Company's shares between September 19, 2001 and June 21, 2006. A second putative class action, containing virtually identical legal claims and allegations of fact was filed on October 12, 2006. The two actions were consolidated into a single proceeding (the Consolidated Class Action) and on January 18, 2007, the Court appointed The Laborers Pension Trust Fund for Northern California and Pension Trust Fund for Operating Engineers as lead plaintiffs in the action. On March 5, 2007, the lead plaintiffs filed a consolidated class action complaint (the Consolidated Class Action Complaint). The Consolidated Class Action Complaint is purported to be brought on behalf of all persons who purchased the Company's publicly traded securities between September 19, 2001 and December 21, 2006, and names the Company and certain of its current and former officers, including Forbes I.J. Alexander, Scott D. Brown, Wesley B. Edwards, Chris A. Lewis, Mark T. Mondello, Robert L. Paver and Ronald J. Rapp, as well as certain of the Company's Directors, Mel S. Lavitt, William D. Morean, Frank A. Newman, Laurence S. Grafstein, Steven A. Raymund, Lawrence J. Murphy, Kathleen A. Walters and Thomas A. Sansone, as defendants. The Consolidated Class Action Complaint alleged violations of Sections 10(b), 20(a), and 14(a) of the Securities Exchange Act of 1934, as amended (the Exchange Act), and the rules promulgated thereunder. The Consolidated Class Action Complaint alleged that the defendants engaged in a scheme to fraudulently backdate the grant dates of options for various senior officers and directors, causing the Company's consolidated financial statements to understate management compensation and overstate net earnings, thereby inflating the Company's stock price. In addition, the complaint alleged that the Company's proxy statements falsely stated that it had adhered to its option grant policy of granting options at the closing price of its shares on the trading date immediately prior to the date of the grant. Also, the

Table of Contents

complaint alleged that the defendants failed to timely disclose the facts and circumstances that led the Company, on June 12, 2006, to announce that it was lowering its prior guidance for net earnings for the third quarter of fiscal year 2006. On April 30, 2007, the plaintiffs filed a First Amended Consolidated Class Action Complaint asserting claims substantially similar to the Consolidated Class Action Complaint it replaced but adding additional allegations relating to the restatement of earnings previously announced in connection with the correction of errors in the calculation of compensation expense for certain stock option grants. The Company filed a motion to dismiss the First Amended Consolidated Class Action Complaint on June 29, 2007. The plaintiffs filed an opposition to the Company's motion to dismiss, and the Company then filed a reply memorandum in further support of its motion to dismiss on September 28, 2007. On April 9, 2008, the Court dismissed the First Amended Consolidated Class Action Complaint without prejudice and with leave to amend such complaint on or before May 12, 2008.

On May 12, 2008, plaintiffs filed a Second Amended Class Action Complaint. The Second Amended Class Action Complaint asserts substantially the same causes of action against the same defendants, predicated largely on the same allegations of fact as in the First Amended Consolidated Class Action Complaint except insofar as plaintiffs added KPMG LLP, the Company's independent registered public accounting firm, as a defendant and added additional allegations with respect to (a) pre-class period option grants, (b) the professional background of certain defendants, (c) option grants to non-executive employees, (d) the restatement of the Company's financial results for certain periods between 1996 and 2005 and (e) trading by the named plaintiffs and certain of the defendants during the class period. The Second Amended Class Action Complaint also includes an additional claim for insider trading against certain defendants pursuant to Rules 10b-5 and 10b5-1 promulgated pursuant to the Exchange Act. The Company filed a motion to dismiss the Second Amended Class Action Complaint.

On January 26, 2009, the Court dismissed the Second Amended Class Action Complaint with prejudice. The plaintiffs appealed this dismissal on February 20, 2009. The Company believes that the Second Amended Class Action Complaint is without merit and it will continue to vigorously defend the action, although no assurance can be given as to the ultimate outcome of any such further proceedings.

ii. Securities Exchange Commission Informal Inquiry and U.S. Attorney Subpoena Related to Certain Historical Stock Option Grant Practices

In addition to the private litigation described above, the Company was notified on May 2, 2006 by the Staff of the Securities and Exchange Commission (SEC) of an informal inquiry concerning the Company's stock option grant practices. In May 2006, the Company received a subpoena from the U.S. Attorney's office for the Southern District of New York requesting certain stock option related material. Such information was subsequently provided and the Company did not hear further from such U.S. Attorney's office. In addition, the Company's review of its historical stock option practices led it to review certain transactions proposed or effected between fiscal years 1999 and 2002 to determine if it properly recognized revenue associated with those transactions. The Audit Committee of the Company's Board of Directors engaged independent legal counsel to assist it in reviewing certain proposed or effected transactions with certain customers that occurred during this period. The review determined that there was inadequate documentation to support the Company's recognition of certain revenues received during the period. The Company's Audit Committee concluded that there was no direct evidence that any of the Company's employees intentionally made or caused false accounting entries to be made in connection with these transactions, and the Company concluded that the impact was immaterial. The Company provided the SEC with the report that this independent counsel produced regarding these revenue recognition issues, the Special Committee's report regarding the Company's stock option grant practices, and the other information requested and cooperated fully with the Special Committee, the SEC and the U.S. Attorney's office.

The Company received a letter from the SEC Division of Enforcement on November 24, 2008, advising the Company that the Division had completed its investigation and did not intend to recommend that the SEC take any enforcement action.

iii. Other Litigation

The Company is party to certain other lawsuits in the ordinary course of business. The Company does not believe that these proceedings, individually or in the aggregate, will have a material adverse effect on the Company's financial position, results of operations or cash flows.

Table of Contents***b. Warranty Provision***

The Company maintains a provision for limited warranty repair of shipped products, which is established under the terms of specific manufacturing contract agreements. The warranty liability is included in accrued expenses on the Company's Condensed Consolidated Balance Sheets. The warranty period varies by product and customer industry sector. The provision represents management's estimate of probable liabilities, calculated as a function of sales volume and historical repair experience, for each product under warranty. The estimate is reevaluated periodically for accuracy. A rollforward of the warranty liability for the six months ended February 28, 2009 and February 29, 2008 is as follows (in thousands):

	Amount
Balance at August 31, 2008	\$ 9,877
Accruals for warranties	4,433
Settlements made	(3,774)
 Balance at February 28, 2009	 \$ 10,536
	Amount
Balance at August 31, 2007	\$ 7,575
Accruals for warranties	2,962
Settlements made	(2,088)
 Balance at February 29, 2008	 \$ 8,449

Note 7. Restructuring and Impairment Charges***a. 2009 Restructuring Plan***

In conjunction with the restructuring plan that was approved by the Company's Board of Directors in the second quarter of fiscal year 2009 (the 2009 Restructuring Plan), the Company charged \$32.7 million of restructuring and impairment costs during the three months and six months ended February 28, 2009 to the Condensed Consolidated Statement of Operations. The restructuring and impairment costs for the three months and six months ended February 28, 2009 include \$27.4 million related to employee severance and benefits costs, \$0.1 million related to lease commitments and \$5.2 million related to fixed asset impairments.

These restructuring and impairment charges related to the 2009 Restructuring Plan incurred through February 28, 2009 of \$32.7 million include cash costs totaling \$27.5 million, of which \$1.3 million was paid in the second fiscal quarter of 2009. The cash costs consist of employee severance and benefits costs of approximately \$27.4 million and costs related to lease commitments of approximately \$0.1 million. Non-cash costs of approximately \$5.2 million primarily represent fixed asset impairment charges related to the Company's restructuring activities.

Employee severance and termination benefit costs of \$27.4 million recorded in the three months and six months ended February 28, 2009 are related to the reduction of employees across all functions of the business in manufacturing facilities in Europe, Asia and the Americas. To date, approximately 2,100 employees have been included in the 2009 Restructuring Plan. The Company identified certain fixed assets that have ceased being used by the Company and, accordingly, recorded a fixed asset impairment charge of \$5.2 million in the three months and six months ended February 28, 2009.

In addition, as part of the 2009 Restructuring Plan, management determined that it was more likely than not that certain deferred tax assets would not be realized as a result of the contemplated restructuring activities. Therefore, the Company recorded a valuation allowance of \$13.5 million on deferred tax assets as a result of the 2009 Restructuring Plan. The valuation allowances are excluded from the table below as they were recorded through the provision for income taxes on the Condensed Consolidated Statement of Operations.

The tables below set forth the significant components and activity in the 2009 Restructuring Plan during the three months and six months ended February 28, 2009 (in thousands):

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Total	\$	\$ 32,735	\$ (5,944)	\$ (1,289)	\$ 25,502

At February 28, 2009, accrued liabilities of approximately \$22.8 million related to the 2009 Restructuring Plan are expected to be paid over the next twelve months. The remaining liability of \$2.7 million is expected to be paid through fiscal year 2011.

In relation to the 2009 Restructuring Plan, the Company currently expects to recognize approximately \$65.0 million in total restructuring and impairment costs primarily over the course of fiscal years 2009 and 2010.

b. 2006 Restructuring Plan

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

In conjunction with the restructuring plan that was approved by the Company's Board of Directors in the fourth quarter of fiscal year 2006 (the 2006 Restructuring Plan), the Company reversed \$1.2 million and \$0.6 million of restructuring and impairment costs during the three months and six months ended February 28, 2009, respectively, compared to an additional charge of \$41.8 million and \$51.1 million of restructuring and impairment costs during the three months and six months ended February 29, 2008, respectively. The restructuring and impairment costs (reversals) for the three months ended February 28, 2009 include \$(1.4) million related to employee severance and benefits costs and \$0.2 million related to lease commitments. The restructuring and impairment costs (reversals) for the six months ended February 28, 2009 include \$(1.0) million related to employee severance and benefits costs and \$0.4 million related to lease commitments. The restructuring and impairment costs (reversals) for the three months ended February 29, 2008 include \$40.9 million related to employee

Table of Contents

severance and benefits costs, \$0.6 million related to lease commitments, \$(0.1) million related to fixed asset impairments and \$0.4 million related to other restructuring costs. The restructuring and impairment costs (reversals) for the six months ended February 29, 2008 include \$44.5 million related to employee severance and benefits costs, \$6.2 million related to lease commitments, \$(0.1) million related to fixed asset impairments and \$0.5 million related to other restructuring costs.

These restructuring and impairment charges related to the 2006 Restructuring Plan incurred through February 28, 2009 of \$208.4 million include cash costs totaling \$159.5 million, of which \$1.5 million was paid in the fourth fiscal quarter of 2006, \$64.8 million was paid in fiscal year 2007, \$57.2 million was paid in fiscal year 2008, \$24.7 million was paid in the first two fiscal quarters of 2009 and \$11.3 million is expected to be paid primarily during the remainder of fiscal year 2009 through fiscal year 2011. The cash costs consist of employee severance and benefits costs of approximately \$145.3 million, costs related to lease commitments of approximately \$20.4 million and other restructuring costs of \$2.1 million. These cash costs were off-set by approximately \$8.3 million of cash proceeds received in connection with facility closure costs. Non-cash costs of approximately \$48.9 million primarily represent fixed asset impairment charges related to the Company's restructuring activities.

Employee severance and termination benefit cost reversals of \$(1.4) million and \$(1.0) million recorded in the three months and six months ended February 28, 2009, respectively, were due to revised estimates of severance and termination benefits that will be paid by the Company. Employee severance and termination benefit costs of \$40.9 million and \$44.5 million recorded in the three months and six months ended February 29, 2008, are related to the reduction of employees across all functions of the business in manufacturing facilities in Europe, Asia and the Americas. Approximately 10,500 employees have been included in the 2006 Restructuring Plan to date. Lease commitment costs of \$0.2 million and \$0.4 million recorded in the three months and six months ended February 28, 2009, respectively, compared to \$0.6 million and \$6.2 million recorded in the three months and six months ended February 29, 2008, respectively, primarily relate to future lease payments for facilities that were vacated in the Americas and Europe.

In addition, as part of the restructuring plan, management determined that it was more likely than not that certain entities within foreign jurisdictions would not be able to utilize their deferred tax assets as a result of the contemplated restructuring activities. Therefore, the Company recorded valuation allowances of \$38.8 million on net deferred tax assets as part of the restructuring plan prior to September 1, 2008. The valuation allowances are excluded from the table below as they were recorded through the provision for income taxes on the Consolidated Statement of Operations. See Note 4 Income Taxes to the Consolidated Financial Statements in the Annual Report on Form 10-K for the fiscal year ended August 31, 2008 for further discussion of the Company's net deferred tax assets and provision for income taxes.

The tables below set forth the significant components and activity in the 2006 Restructuring Plan during the three months and six months ended February 28, 2009 (in thousands):

2006 Restructuring Plan Three Months Ended February 28, 2009

	Liability Balance at November 30, 2008	Restructuring Related Charges	Asset Impairment Charge and Other Non-Cash Activity	Cash (Payments) Proceeds	Liability Balance at February 28, 2009

Total	\$ 40,504	\$ (590)	\$ (4,387)	\$ (24,691)	\$ 10,836

At February 28, 2009, accrued liabilities of approximately \$6.9 million related to the 2006 Restructuring Plan are expected to be paid over the next twelve months. The additional remaining accrued liabilities of \$3.9 million relate primarily to the charge for certain lease commitments and employee severance and termination benefits payments and is expected to be paid primarily during the remainder of fiscal year 2009 through fiscal year 2011.

In relation to the 2006 Restructuring Plan, the Company currently expects to recognize approximately \$250.0 million in total restructuring and impairment costs. The Company has substantially completed restructuring activities under the 2006 Restructuring Plan, and approximately \$2.3 million of remaining contract termination costs are expected to be incurred over the remainder of fiscal year 2009 through fiscal year 2011.

Note 8. Goodwill and Other Intangible Assets

In accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS 142), the Company performs a goodwill impairment analysis using the two-step method on an annual basis and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability of goodwill is measured at the reporting unit level, which the Company has determined to be consistent with its operating segments by comparing the reporting unit's carrying amount, including goodwill, to the fair market value of the reporting unit. The Company consistently determines the fair market value of its reporting units based on an average weighting of both projected discounted future results and the use of comparative market multiples. The use of comparative market multiples (the market approach) compares the Company to other comparable companies based on valuation multiples to arrive at a fair value. The Company regularly compares itself and its divisions to its competitors and the Company believes the judgments used to arrive at these comparable companies are reasonable. The use of projected discounted future results (discounted cash flow approach) is based on assumptions that are consistent with the Company's estimates of future growth and the strategic plan used to manage the underlying business, and also includes a

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

probability-weighted expectation as to the Company's future cash flows. Factors requiring significant judgment include assumptions related to future growth rates, discount factors, and tax rates, amongst other considerations. Changes in economic and operating conditions that occur after the annual impairment analysis or an interim impairment analysis, and that impact these assumptions, may result in a future goodwill impairment charge.

Table of Contents

During the fiscal quarter ended November 30, 2008, based upon a combination of factors, including a significant and sustained decline in the Company's market capitalization below the Company's carrying value, the deteriorating macro-economic environment, which has resulted in a significant decline in customer demand, and illiquidity in the overall credit markets, the Company concluded that sufficient indicators existed to require it to perform an interim goodwill impairment analysis at November 30, 2008. Accordingly, at November 30, 2008, the Company determined that the goodwill related to the Consumer reporting unit was impaired and recorded a preliminary non-cash goodwill impairment charge of approximately \$317.7 million. The income tax expense associated with the preliminary goodwill impairment charge was \$4.4 million. This included a tax benefit of \$30.6 million for the write-off of tax deductible goodwill and tax expense of \$35.0 million resulting from the recognition of a valuation allowance against a deferred tax asset, which related primarily to net operating losses, that the Company now believes will not be realized.

During the second quarter of fiscal year 2009 and prior to finalizing the preliminary non-cash goodwill impairment charge recorded at November 30, 2008 related to the Consumer reporting unit, the Company concluded that additional indicators of potential impairment were present. Those indicators, based upon a combination of factors, included a continued deterioration in the macro-economic environment which resulted in further decline in customer demand and a further sustained decline in the Company's market capitalization below the Company's carrying value. Furthermore, the average closing price of the Company's common stock on the New York Stock Exchange (NYSE) in the second quarter of fiscal year 2009 was \$6.16 compared to an average of \$8.89 in the first quarter of fiscal year 2009, a decline of approximately 31%. At February 28, 2009, the closing price of the Company's common stock was \$4.14 compared to \$6.58 at November 30, 2008, a decline of approximately 37%. Accordingly, the Company performed an interim first step of its goodwill impairment test for each of its reporting units and determined that the carrying values of the Consumer and EMS reporting units exceeded their fair value, indicating potential goodwill impairment existed. Having determined that the goodwill of the Consumer and EMS reporting units was potentially impaired, the Company began performing the second step of the goodwill impairment analysis which involves calculating the implied fair value of goodwill of the Consumer and EMS reporting units by allocating the fair value of the respective reporting units to all of their assets and liabilities other than goodwill (including both recognized and unrecognized intangible assets) and comparing the residual amount to the carrying value of goodwill. As of the date of the filing of the Company's Quarterly Report on Form 10-Q for the fiscal quarter ended February 28, 2009, the Company has determined that the goodwill related to the Consumer reporting unit is fully impaired and has recorded an additional non-cash goodwill impairment charge of approximately \$82.7 million for the three months ended February 28, 2009. Further, the Company has also determined that the goodwill related to the EMS reporting unit is impaired and has recorded a preliminary non-cash goodwill impairment charge of approximately \$622.4 million for the three months ended February 28, 2009. The Company has recorded this charge based on a preliminary assessment and will continue to evaluate the valuations of tangible and intangible assets and the allocation of fair value to all of the assets and liabilities other than goodwill of the EMS reporting unit. After the recognition of the non-cash goodwill impairment charge, no goodwill remained with the Consumer and EMS reporting units, respectively.

The income tax expense associated with the goodwill impairment was \$111.8 million for the fiscal quarter ended February 28, 2009. This includes a tax benefit of \$9.0 million for the write-off of tax deductible goodwill and income tax expense of \$120.8 million resulting from the recognition of a valuation allowance against the deferred tax assets that the Company no longer believes are more likely than not to be realized. The recognition of the valuation allowance was primarily attributable to the same conditions that caused the goodwill impairment as referenced above.

The Company currently expects to finalize its goodwill impairment analysis relating to the EMS reporting unit during the fiscal quarter ending May 31, 2009. There could be material adjustments to the goodwill impairment charge recorded in the EMS reporting unit upon completion of the goodwill impairment analysis. Any adjustments to the Company's preliminary estimates as a result of completion of this evaluation are currently expected to be recorded in the Company's condensed consolidated financial statements for the fiscal quarter ending May 31, 2009.

The impairment evaluation for indefinite lived intangible assets, which for the Company is its trade name, is conducted during the fourth quarter of each fiscal year, or more frequently if events or changes in circumstances indicate that an asset may be impaired. As a result of the impairment indicators described above, during the first quarter and again in the second quarter of fiscal year 2009, the Company evaluated its trade name for impairment by comparing the discounted estimates of future revenue projections to its carrying value and determined that there was no impairment. Significant judgments inherent in this analysis included assumptions regarding appropriate revenue growth rates, discount rates and royalty rates.

The Company reviews long-lived assets, including its intangible assets subject to amortization, which for the Company are its contractual agreements, customer relationships and intellectual property, for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of long-lived assets is measured by a comparison of the carrying amount of the asset group to the future undiscounted net cash flows expected to

Table of Contents

be generated by those assets. If such assets are considered to be impaired, the impairment charge recognized is the amount by which the carrying amounts of the assets exceeds the fair value of the assets. As a result of the impairment indicators described above, during the first quarter and again in the second quarter of fiscal year 2009, the Company tested its long-lived assets for impairment and determined that there was no impairment.

The following table presents the changes in goodwill allocated to the Company's reportable segments during the six months ended February 28, 2009 (in thousands):

Reportable Segment	Balance at August 31, 2008	Adjustments	Foreign Currency Impact	Impairment Charges	Balance at February 28, 2009
Consumer	\$ 423,059	\$ 414	\$ (23,066)	\$ (400,407)	\$
EMS	671,616	(302)	(48,900)	(622,414)	
AMS	24,435		(1,175)		23,260
Total	\$ 1,119,110	\$ 112	\$ (73,141)	\$ (1,022,821)	\$ 23,260

Intangible assets are comprised primarily of contractual agreements and customer relationships, which are being amortized on a straight-line basis over periods of up to ten years, and trade names which have an indefinite life. No significant residual value is estimated for the amortizable intangible assets. The value of the Company's intangible assets purchased through business acquisitions is principally determined based on valuations of the net assets acquired. The following tables present the Company's total purchased intangible assets at February 28, 2009 and August 31, 2008 (in thousands):

February 28, 2009	Gross carrying amount	Accumulated amortization	Net carrying amount
Contractual agreements and customer relationships	\$ 102,022	\$ (40,709)	\$ 61,313
Intellectual property	83,875	(42,725)	41,150
Trade name	43,938		43,938
Total	\$ 229,835	\$ (83,434)	\$ 146,401

August 31, 2008	Gross carrying amount	Accumulated amortization	Net carrying amount
Contractual agreements and customer relationships	\$ 121,855	\$ (53,636)	\$ 68,219
Intellectual property	89,576	(33,606)	55,970
Trade names	48,646		48,646
Total	\$ 260,077	\$ (87,242)	\$ 172,835

The weighted-average amortization period for aggregate intangible assets at February 28, 2009 is 7.0 years, which includes a weighted-average amortization period of 9.1 years for contractual agreements and customer relationships and a weighted-average amortization period of 4.5 years for intellectual property.

Intangible asset amortization for the three months and six months ended February 28, 2009 was \$7.7 million and \$15.7 million, respectively. Intangible asset amortization for the three months and six months ended February 29, 2008 was \$9.7 million and \$18.6 million, respectively.

The estimated future amortization expense is as follows (in thousands):

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Fiscal year ending August 31,	Amount
2009 (remaining six months)	\$ 14,683
2010	26,367
2011	22,084
2012	14,186
2013	10,163
Thereafter	14,980
Total	\$ 102,463

Table of Contents**Note 9. Accounts Receivable Securitizations*****a. North American Asset-Backed Securitization Program***

In February 2004, the Company entered into an asset-backed securitization program with a bank, which originally provided for net cash proceeds at any one time of an amount up to \$100.0 million on the sale of eligible trade accounts receivable of certain domestic operations. Subsequent to fiscal year 2004, several amendments increased the net cash proceeds available at any one time under the securitization program up to an amount of \$280.0 million. Accounts receivable sold under this securitization program are accounted for as a sale in accordance with Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (a replacement of FASB Statement No. 125)*, (SFAS 140). Under the agreement, the Company continuously sells a designated pool of trade accounts receivable to a wholly-owned subsidiary, which in turn sells an ownership interest in the receivables to a conduit, administered by an unaffiliated financial institution. This wholly-owned subsidiary is a separate bankruptcy-remote entity and its assets would be available first to satisfy the creditor claims of the conduit. As the receivables sold are collected, the Company is able to sell additional receivables up to the maximum permitted amount under the program. The securitization program requires compliance with several financial covenants including an interest coverage ratio and debt to EBITDA ratio, as defined in the securitization agreement, as amended. The securitization agreement, as amended on March 20, 2008, was to expire on March 19, 2009. See Note 15 Subsequent Events for further discussion of the Company's North American asset-backed securitization program.

For each pool of eligible receivables sold to the conduit, the Company retains a percentage interest in the face value of the receivables, which is calculated based on the terms of the agreement. Net receivables sold under this program are excluded from trade accounts receivable on the Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Consolidated Statement of Cash Flows. The Company continues to service, administer and collect the receivables sold under this program. The Company pays facility fees of 0.35% per annum of 102% of the average purchase limit and program fees of up to 0.275% of the average daily outstanding amounts. The investors and the securitization conduit have no recourse to the Company's assets for failure of debtors to pay when due.

The Company continues servicing the receivables sold. No servicing asset is recorded at the time of sale because the Company does not receive any servicing fees from third parties or other income related to servicing the receivables. The Company does not record any servicing liability at the time of sale as the receivable collection period is relatively short and the costs of servicing the receivables sold over the servicing period are insignificant. Servicing costs are recognized as incurred over the servicing period.

At February 28, 2009, the Company had sold \$329.3 million of eligible trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, the Company received cash proceeds of \$226.9 million and retained an interest in the receivables of approximately \$102.4 million. In connection with the securitization program, the Company recognized pretax losses on the sale of receivables of approximately \$0.9 million and \$3.2 million during the three months and six months ended February 28, 2009, respectively, compared to approximately \$3.3 million and \$7.8 million during the three months and six months ended February 29, 2008, respectively, which are recorded as other expense on the Condensed Consolidated Statement of Operations.

b. Foreign Asset-Backed Securitization Program

On April 7, 2008, the Company entered into an asset-backed securitization program with a bank conduit. In connection with the securitization program certain of its foreign subsidiaries sell, on an ongoing basis, an undivided interest in designated pools of trade accounts receivable to a special purpose entity, which in turn borrows up to \$200.0 million from the bank conduit to purchase those receivables and in which it grants security interests as collateral for the borrowings. The securitization program is accounted for as a borrowing under SFAS 140. The loan balance is calculated based on the terms of the securitization program agreements. The securitization program requires compliance with several covenants including a limitation on certain corporate actions such as mergers, consolidations and sale of substantially all assets. The Company pays interest at designated commercial paper rates plus a spread. The securitization program was to expire on April 6, 2009. See Note 15 Subsequent Events for further discussion of the Company's foreign asset-backed securitization program.

Table of Contents

At February 28, 2009, the Company had \$75.4 million of debt outstanding under the program. In addition, the Company incurred interest expense at a variable rate of approximately 0.93% plus a fixed spread during the three months ended February 28, 2009 in its Condensed Consolidated Statement of Operations.

c. Accounts Receivable Factoring Agreements

In October 2004, the Company entered into an agreement with an unrelated third-party for the factoring of specific trade accounts receivable of a foreign subsidiary. The factoring of trade accounts receivable under this agreement is accounted for as a sale in accordance with SFAS 140. Under the terms of the factoring agreement, the Company transfers ownership of eligible trade accounts receivable without recourse to the third-party purchaser in exchange for cash. Proceeds on the transfer reflect the face value of the account less a discount. The discount is recorded as a loss on the Consolidated Statement of Operations in the period of the sale. The factoring agreement expired in October 2008 and was extended for a six month period.

The receivables sold pursuant to this factoring agreement are excluded from trade accounts receivable on the Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Consolidated Statement of Cash Flows. The Company continues to service, administer and collect the receivables sold under this program. The third-party purchaser has no recourse to the Company's assets for failure of debtors to pay when due.

At February 28, 2009, the Company had sold \$26.7 million of trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, the Company received cash proceeds of \$26.6 million. The resulting loss on the sale of trade accounts receivable sold under this factoring agreement was \$0.1 million for the three months and six months ended February 28, 2009 compared to \$0.1 million for the three months and six months ended February 29, 2008.

In July 2007, the Company entered into a second agreement with another unrelated third party (the Purchaser) for the factoring of specific trade accounts receivable of another foreign subsidiary. The factoring of trade accounts receivable under this agreement does not meet the criteria for recognition as a sale in accordance with SFAS 140. Under the terms of the agreement, the Company transfers ownership of eligible trade accounts receivable to the Purchaser in exchange for cash, however, as the transaction does not qualify as a sale, the relating trade accounts receivable are included in the Company's Condensed Consolidated Balance Sheets until the cash is received by the Purchaser from the Company's customer for the trade accounts receivable. There was no outstanding liability recorded on the Company's Condensed Consolidated Balance Sheets at February 28, 2009 related to cash that the Company received from the Purchaser for specific trade accounts receivable, but for which the Company's customer has not remitted payment yet.

Note 10. Retirement Benefits

During the first quarter of fiscal year 2002, the Company established a defined benefit pension plan for all permanent employees of Jabil Circuit UK Limited. This plan was established in accordance with the terms of the business sale agreement with Marconi Communications plc (Marconi). The benefit obligations and plan assets from the terminated Marconi plan were transferred to the newly established defined benefit plan. The plan, which is closed to new participants, provides benefits based on average employee earnings over a three-year service period preceding retirement. The Company's policy is to contribute amounts sufficient to meet minimum funding requirements as set forth in U.K. employee benefit and tax laws plus such additional amounts as are deemed appropriate by the Company. Plan assets are held in trust and consist of equity and debt securities.

As a result of acquiring various operations in Austria, Brazil, France, Germany, India, Japan, The Netherlands, Poland, and Taiwan, the Company assumed primarily unfunded retirement benefits to be paid based upon years of service and compensation at retirement. All permanent employees meeting the minimum service requirement are eligible to participate in the plans.

There are no domestic pension or postretirement benefit plans maintained by the Company.

On August 31, 2007, the Company adopted the recognition provisions of Statement of Financial Accounting Standards No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106, and 132(R)* (SFAS 158). SFAS 158 requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income.

SFAS 158 also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position. The measurement requirement will be effective for fiscal years ending after December 15, 2008, which is the Company's current fiscal year. The

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Company previously used a May 31 measurement date for substantially all of the above referenced plans, with the exception of the Jabil Circuit UK Limited plan, which used a June 30 measurement date.

Table of Contents

The following table provides information about net periodic benefit cost for the Company's pension plans for the periods indicated (in thousands of dollars):

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Service cost	\$ 523	\$ 545	\$ 1,043	\$ 1,077
Interest cost	1,520	1,923	3,194	3,880
Expected long-term return on plan assets	(1,050)	(1,404)	(2,243)	(2,847)
Amortization of prior service cost	(9)	(10)	(19)	(20)
Recognized actuarial loss	289	386	617	783
Net periodic benefit cost	\$ 1,273	\$ 1,440	\$ 2,592	\$ 2,873

For the six months ended February 28, 2009, the Company has made contributions of approximately \$1.6 million to its defined benefit pension plans. The Company presently anticipates total fiscal year 2009 contributions to approximate \$4.1 million to \$4.6 million.

Note 11. Notes Payable, Long-Term Debt and Long-Term Lease Obligations

Notes payable, long-term debt and long-term lease obligations outstanding at February 28, 2009 and August 31, 2008 are summarized below (in thousands).

	February 28, 2009	August 31, 2008
5.875% Senior Notes due 2010	\$ 298,690	\$ 298,198
8.250% Senior Notes due 2018	396,568	396,377
Short-term factoring debt		617
Borrowings under credit facilities	62,845	55,579
Borrowings under loans	403,392	423,064
Green Point debt obligations	5,775	24,583
Securitization program obligations	75,383	170,975
Miscellaneous borrowings	11	17
Total notes payable, long-term debt and long-term lease obligations	1,242,664	1,369,410
Less current installments of notes payable, long-term debt and long-term lease obligations	172,948	269,937
Notes payable, long-term debt and long-term lease obligations, less current installments	\$ 1,069,716	\$ 1,099,473

a. Bridge Facility Amendment

On December 20, 2007, the Company amended (the Amendment) its bridge credit facility that it entered into as of December 21, 2006 (the Bridge Facility). As a result of the Amendment, (1) the termination date of the Bridge Facility was extended from December 20, 2007 to June 17, 2008, (2) the Bridge Facility was converted to a \$200.0 million revolving credit facility that was available only if the Company had fully drawn on the revolving credit portion of the Company's existing amended and restated five year unsecured credit facility dated as of July 19, 2007 (the Credit Facility) and (3) as described below, certain other portions of the Bridge Facility were also amended (the Amended Bridge Facility). Also on December 20, 2007, the Company drew \$400.0 million on the revolving credit portion of the Credit Facility in order to pay down the full \$400.0 million outstanding under the term portion of the Bridge Facility.

The Amendment specified that the proceeds of the revolving credit advances under the Amended Bridge Facility were to be used for general corporate purposes of the Company and its subsidiaries. Pursuant to the Amendment, interest and fees on advances under the Amended Bridge Facility continued to be based on the Company's unsecured long-term indebtedness rating as determined by Standard & Poor's Rating Service

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

(S&P) and Moody s Investor Service (Moody s). The interest rate was increased, such that interest was charged at either a rate equal to 0.3% to 1.5% above the base rate or a rate equal to 1.3% to 2.5% above the Eurocurrency rate, where the base rate represented the greater of Citibank, N.A. s prime rate or 0.5% plus the federal funds rate, and the Eurocurrency rate represented the applicable London Interbank Offered Rate (LIBOR), each as more fully defined in the Amended Bridge Facility. The applicable interest rate, whether based on the base rate or the Eurocurrency rate, was to have been increased by 0.25% on and after March 20, 2008. Fees included extension fees payable

Table of Contents

on March 20, 2008 and unused commitment fees based on the amount of the lenders' commitments minus the principal amounts of any outstanding advances made by the lenders. Based on the Company's unsecured long-term indebtedness rating as determined by S&P and Moody's at the date of termination of the Amended Bridge Facility, the then current rate of interest (excluding the unused commitment fees and other fees) on a base rate draw would have been 0.5% above the base rate or on a Eurocurrency rate draw 1.5% above the Eurocurrency rate, as defined above.

On February 13, 2008 the Amended Bridge Facility was terminated.

b. 8.250% Notes Offering

On January 16, 2008 and May 19, 2008, the Company completed its offerings of \$250.0 million and \$150.0 million, respectively, in aggregate principal amounts of 8.250% senior unsecured unregistered notes due March 15, 2018, resulting in net proceeds of approximately \$245.7 million and \$148.5 million, respectively. On June 18, 2008, the Company commenced an offer to exchange the outstanding unregistered 8.250% Notes for registered 8.250% Notes (collectively the 8.250% Senior Notes) that are substantially identical to the unregistered notes except that the 8.250% Senior Notes are registered under the Securities Act of 1933, as amended, and do not have any transfer restrictions, registration rights or rights to additional special interest. Upon completion of the exchange offer on July 18, 2008, all outstanding unregistered notes were exchanged. The 8.250% Senior Notes were issued pursuant to an Indenture dated as of January 16, 2008, by and between the Company and The Bank of New York Mellon Trust Company, N.A. (formerly The Bank of New York Trust Company, N.A.), as trustee (the Indenture), as supplemented by the Officers' Certificates dated January 16, 2008 and May 19, 2008, that were delivered by certain of its officers pursuant to Sections 1.2, 3.1 and 3.3 of the Indenture.

The 8.250% Senior Notes mature on March 15, 2018. Interest on the 8.250% Senior Notes is payable on March 15 and September 15 of each year, beginning on September 15, 2008. The interest rate payable on the 8.250% Senior Notes is subject to adjustment from time to time if the credit ratings assigned to the 8.250% Senior Notes increase or decrease, as provided in the 8.250% Senior Notes. The 8.250% Senior Notes are senior unsecured obligations of the Company and rank equally with all other existing and future senior unsecured debt obligations.

The Indenture contains certain covenants, including, but not limited to, covenants limiting the Company's ability and/or its subsidiaries' ability to: create certain liens; enter into sale and leaseback transactions; create, incur, issue, assume or guarantee any funded debt (applicable only to the Company's restricted subsidiaries); guarantee any of the Company's indebtedness (applicable only to the Company's subsidiaries); and consolidate or merge with, or convey, transfer or lease all or substantially all of its assets to another person. The Indenture also contains a covenant regarding the repurchase by the Company of the 8.250% Senior Notes upon a change of control repurchase event.

During the fourth quarter of fiscal year 2007, the Company entered into forward interest rate swap transactions to hedge the fixed interest rate payments for an anticipated debt issuance. The swaps were accounted for as a cash flow hedge under Financial Accounting Standards Board (FASB) Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133). The notional amount of the swaps was \$400.0 million. Concurrently with the pricing of the first \$250.0 million of the 8.250% Senior Notes, the Company settled \$250.0 million of the swaps by its payment of \$27.5 million. The Company also settled the remaining \$150.0 million of swaps during the second quarter of fiscal year 2008 by its payment of \$15.6 million. As a result, the Company settled the amount recognized as a current liability on its Consolidated Balance Sheets. The Company also recorded \$0.7 million in interest expense (as ineffectiveness) in the Consolidated Statement of Operations during the three months ended February 29, 2008, with the remainder recorded in accumulated other comprehensive income, net of taxes, in its Consolidated Balance Sheets. On May 19, 2008, the Company issued the remaining \$150.0 million of 8.250% Senior Notes and recorded no additional interest expense (as ineffectiveness) in the Consolidated Statement of Operations. The remaining portion of the amount originally recorded in accumulated other comprehensive income on the Company's Consolidated Balance Sheets will be amortized to interest expense on the Consolidated Statement of Operations over the life of the 8.250% Senior Notes.

Note 12. Derivative Financial Instruments and Hedging Activities

The Company applies SFAS 133, as amended by Statement of Financial Accounting Standards No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activity, an Amendment of SFAS 133*, Statement of Financial Accounting Standards No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities* and Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS 161). In accordance with these standards, all derivative instruments are recorded on the Condensed Consolidated Balance Sheets at their respective fair values. Generally, if a derivative instrument is designated as a cash flow hedge, the change in the fair value of the derivative is recorded in other comprehensive income to the extent the derivative is effective, and recognized in the statement of operations when the hedged item affects earnings. If a derivative instrument is designated as a fair value hedge, the change in fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings in the current period. Changes in fair value of derivatives that are not designated as hedges are recorded in operations.

Table of Contents

The Company is exposed to certain risks relating to its ongoing business activities. The primary risks managed by the use of derivative instruments are foreign currency fluctuation risk and interest rate risk. Forward contracts are entered into to manage the foreign currency risk associated with various commitments arising from trade accounts receivable, trade accounts payable and fixed purchase obligations. Interest rate swaps are entered into in order to manage interest rate risk associated with the Company's variable rate borrowings. The Company, in the normal course of business, holds the following types of derivatives at February 28, 2009 that have been designated as hedging instruments under SFAS 133:

Derivative	Risk Being Hedged
Interest rate swap	Cash flows of interest payments on variable rate debt

Derivatives are held only for the purpose of hedging such risks, not for speculation. Generally, the Company enters into hedging relationships such that the cash flows of items and transactions being hedged are expected to be offset by corresponding changes in the values of the derivatives. At February 28, 2009, a hedging relationship exists related to \$100.0 million of the Company's variable rate debt. The swap is accounted for as a cash flow hedge under SFAS 133. This interest rate swap transaction effectively locks in a fixed interest rate of 88.25 basis points for variable rate interest payments that are expected to be made from January 28, 2009 through January 28, 2010. Under the terms of the swap, the Company will pay a fixed rate and will receive a variable rate based on the one month USD LIBOR rate plus a credit spread.

The following is an analysis of the changes in the net loss on cash flow hedges included in accumulated other comprehensive income (in thousands):

	Six Months Ended February 28, 2009
Balance, beginning of period	\$
Net loss for the period	61
Transferred to earnings	(39)
Balance, end of period	\$ 22

At February 28, 2009, the fair value of derivatives in the Condensed Consolidated Balance Sheets is as follows (in thousands):

	Fair Values of Derivative Instruments			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments under SFAS 133				
Interest rate swap			Accrued	
	Not applicable	\$	expenses	\$ 22
Derivatives not designated as hedging instruments under SFAS 133				
Forward foreign exchange contracts			Prepaid	
			expenses and	
	other assets	\$ 24,398	expense	\$ 14,490

Table of Contents

Refer to Note 13 Fair Value of Financial Instruments for further discussion on the fair value measurements related to the forward foreign exchange contracts and interest rate swap.

The effect of derivative instruments designated as cash flow hedges on the Consolidated Statement of Operations for the six months ended February 28, 2009 is as follows (in thousands):

Derivatives in SFAS	Amount of Gain (Loss) Recognized in OCI on Derivative (Effective Portion) for the Six months ended February 28, 2009	Location of Gain (Loss)		Amount of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded) from Effectiveness Testing)	Amount of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded) from Effectiveness Testing)
		Reclassified from Accumulated OCI into Income (Effective Portion) for the Six months ended February 28, 2009	Location of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded) from Effectiveness Testing)		
133 Cash Flow Hedging					
Relationship					
Interest rate swap	\$ (61)	Interest expense	\$ (39)	Interest expense	\$

The interest rate swap expires in January 2010, and to the extent that it is effective in offsetting the variability of the hedged cash flows, the changes in the derivative's fair value will not be included in current earnings but rather will be included in accumulated other comprehensive income/(loss). These changes in fair value will be subsequently reclassified into earnings as a component of interest expense as interest is accrued on the Company's variable rate debt.

The Company transacts business in various foreign countries and is, therefore, subject to risk of foreign currency exchange rate fluctuations. The Company enters into forward contracts to economically hedge transactional exposure associated with commitments arising from trade accounts receivable, trade accounts payable and fixed purchase obligations denominated in a currency other than the functional currency of the respective operating entity. All derivative instruments are recorded on the Condensed Consolidated Balance Sheets at their respective fair market values in accordance with SFAS 133. The Company has elected not to prepare and maintain the documentation required for the transaction to qualify as an accounting hedge and, therefore, changes in fair value are recorded in the Consolidated Statement of Operations.

The aggregate notional amount of the outstanding contracts at February 28, 2009 and February 29, 2008 was \$1.3 billion and \$1.5 billion, respectively.

The effect of derivative instruments not designated as hedging instruments under SFAS 133 on the Consolidated Statement of Operations for the six months ended February 28, 2009 is as follows (in thousands):

Derivatives Not Designated as Hedging Instruments under SFAS 133	Location of Gain or (Loss) Recognized in Income on Derivative	Amount of Gain or (Loss) Recognized in Income on Derivative for the Six Months ended February 28, 2009
Forward foreign exchange contracts	Cost of revenue	\$ 101,673

Note 13. Fair Value of Financial Instruments

On September 1, 2008, the Company adopted the provisions of Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS 157) which applies to financial assets and liabilities that are being measured and reported on a fair-value basis and expands disclosures about fair-value measurements. The adoption of SFAS 157 for financial assets and liabilities did not have a material impact on the Company's existing fair-value measurement practices but requires disclosure of a fair-value hierarchy of inputs used to value an asset or a liability. The three levels of the fair-value hierarchy include: Level 1 quoted market prices in active markets for identical assets and liabilities; Level 2 inputs other than quoted market prices included in level 1 above that are observable for the asset or liability, either directly or indirectly; and Level 3 unobservable inputs for the asset or liability.

Table of Contents

The following table presents the Company's assets and liabilities measured at fair value on a recurring basis as of February 28, 2009, aggregated by the level in the fair-value hierarchy within which those measurements fall (in thousands):

	Level 1	Level 2	Level 3	Total
Assets:				
Forward foreign exchange contracts	\$	\$ 24,398	\$	\$ 24,398
Liabilities:				
Interest rate swap		(22)		(22)
Forward foreign exchange contracts		(14,490)		(14,490)
Total	\$	\$ 9,886	\$	\$ 9,886

The Company's forward foreign exchange contracts are measured on a recurring basis based on foreign currency spot rates and forward rates quoted by banks or foreign currency dealers and are marked-to-market each period with gains and losses on these contracts recorded in the cost of revenue line on the Company's Condensed Consolidated Statement of Operations in the period in which their value changes, with the offsetting amount for unsettled positions being included in either prepaid expenses and other current assets or accrued expenses in the Condensed Consolidated Balance Sheets. At February 28, 2009, the Company recognized a net unrealized gain of approximately \$9.9 million on forward foreign exchange contracts which was recorded in the cost of revenue line on the Condensed Consolidated Statement of Operations and offset by the change in the fair value of the underlying hedged assets or liabilities.

The Company's interest rate swap is measured on a recurring basis based on the LIBOR forward rate as quoted by certain financial institutions.

The \$300.0 million of 5.875% Senior Notes and \$400.0 million of 8.250% Senior Notes outstanding are carried at cost. The estimated fair value of these senior debentures was approximately \$282.0 million and \$309.0 million at February 28, 2009, respectively, and is based upon non-binding market quotes that are corroborated by observable market data (level 2 criteria).

None of the Company's financial assets or liabilities currently covered by the disclosure provisions of SFAS 157 are measured at fair value using significant unobservable inputs.

Note 14. New Accounting Pronouncements*Recently Adopted Accounting Pronouncements:*

On September 1, 2008, the Company adopted FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 permits entities to choose to measure financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option) with changes in fair value reported in earnings each reporting period. The fair value option enables some companies to reduce the volatility in reported earnings caused by measuring related assets and liabilities differently without applying the complex hedge accounting requirements under SFAS 133, to achieve similar results. The Company already records its derivative contracts and hedging activities at fair value in accordance with SFAS 133. The Company did not elect the fair value option for any other financial instruments or certain other financial assets and liabilities that were not previously required to be measured at fair value.

On September 1, 2008, the Company adopted SFAS 157 which defines fair value, establishes a framework for measuring fair value in accordance with U.S. GAAP and expands disclosures about fair value measurements. Accordingly, SFAS 157 does not require any new fair value measurements. The provisions of SFAS 157 are effective for fiscal years beginning after November 15, 2007. In February 2008, FASB Staff Position No. 157-2, *Effective Date of FASB Statement No. 157* (FSP 157-2) was issued delaying the effective date of SFAS 157 with respect to nonfinancial assets and nonfinancial liabilities that are not remeasured on a recurring basis (at least annually), until fiscal years beginning after November 15, 2008. The adoption of the provisions of SFAS 157 during the first fiscal quarter of 2009 did not have a material impact on the Company's consolidated financial position, results of operations or cash flows, but requires expanded annual disclosures regarding the Company's fair value measurements. The additional disclosures required by SFAS 157 are included in Note 13 Fair Value of Financial Instruments.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

On September 1, 2008, the Company adopted EITF Issue No. 06-11, *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards* (EITF 06-11). EITF 06-11 requires companies to recognize a realized income tax benefit associated with dividends or dividend equivalents paid on nonvested equity-classified employee share-based payment awards that are charged to retained earnings as an increase to additional paid-in capital. The adoption of EITF 06-11 did not have a material impact on the Company's financial position, results of operations or cash flows.

Table of Contents

In September 2006, the FASB issued SFAS 158 which requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. This statement also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position. The requirement to recognize the funded status of a defined benefit postretirement plan was effective as of the end of the fiscal period ending after December 15, 2006. The Company has adopted this requirement and the effects are reflected in the financial statements as of August 31, 2007. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. The Company does not anticipate that the adoption of the measurement requirements of this standard will have a material impact on its financial position, results of operations or cash flows.

On December 1, 2008, the Company adopted SFAS 161 which changes the disclosure requirements for derivative instruments and hedging activities. The Company will be required to provide enhanced disclosures about (a) how and why derivative instruments are used, (b) how derivative instruments and related hedged items are accounted for under SFAS 133, and its related interpretations, and (c) how derivative instruments and related hedged items affect the Company's results of operations, financial performance, and cash flows. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The additional disclosures required by SFAS 161 are included in Note 12 Derivative Financial Instruments and Hedging Activities.

On December 1, 2008, the Company adopted FASB Staff Position No. FAS 140-4 (FSP 140-4) and FASB Interpretation No. 46(R)-8 (FIN 46(R)-8), *Disclosures by Public Entities (Enterprises) about Transfers of Financial Assets and Interests in Variable Interest Entities*. FSP 140-4 and FIN 46(R)-8 enhance disclosure regarding the transfer of financial assets and the use of variable interest entities. Adoption of this standard did not have a material impact on the Company's results of operations, financial position or cash flows. Refer to Note 9 Accounts Receivable Securitizations for further discussion.

Recently Issued Accounting Pronouncements:

In June 2008, the FASB issued Staff Position EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1 states that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities as defined in EITF 03-6, *Participating Securities and the Two-Class Method under FASB Statement No. 128*, and therefore should be included in computing earnings per share using the two-class method. According to FSP EITF 03-6-1, a share-based payment award is a participating security when the award includes nonforfeitable rights to dividends or dividend equivalents. The rights result in a noncontingent transfer of value each time an entity declares a dividend or dividend equivalent during the award's vesting period. However, the award would not be considered a participating security if the holder forfeits the right to receive dividends or dividend equivalents in the event that the award does not vest. FSP EITF 03-6-1 is effective for financial statements issued in fiscal years beginning after December 15, 2008, and interim periods within those years. When adopted, its requirements are applied by recasting previously reported EPS. The Company is currently evaluating the requirements of FSP EITF 03-6-1 and has not yet determined the impact of adoption.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141R, *Business Combinations* (SFAS 141R). SFAS 141R states all assets and liabilities of an acquired business (whether full, partial or step acquisitions) will be recorded at fair value. Certain forms of contingent consideration and certain acquired contingencies will be recorded at fair value at the acquisition date. SFAS 141R also states acquisition costs will generally be expensed as incurred and restructuring costs will be expensed in periods after the acquisition date. The Company will be required to apply this new standard prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 with the exception of the accounting for valuation allowances on deferred taxes and acquired tax contingencies. SFAS 141R amends certain provisions of SFAS 109 such that adjustments made to valuation allowances on deferred taxes and acquired tax contingencies associated with acquisitions that closed prior to the effective date of SFAS 141 would also apply the provisions of SFAS 141R.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* (SFAS 160). SFAS 160 requires a company to clearly identify and present ownership interests in subsidiaries held by parties other than the company in the consolidated financial statements within the equity section but separate from the company's equity. It also requires that the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the

Table of Contents

consolidated statement of income; changes in ownership interest be accounted for similarly, as equity transactions; and when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary and the gain or loss on the deconsolidation of the subsidiary be measured at fair value. This statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company is currently evaluating the requirements of SFAS 160 and has not yet determined the impact of adoption, if any, on its financial position, results of operations or cash flows.

Note 15. Subsequent Events

a. North American Asset-Backed Securitization Program

On March 18, 2009, the Company amended and restated its North American asset-backed securitization program to decrease the purchase limit to \$250.0 million. The amendment also extended the asset-backed securitization program until March 17, 2010. The program is assessed a fee on the unused portion of the facility ranging between 0.875% and 0.925% per annum based on the average daily unused aggregate capital during the period. Further, a usage fee on the utilized portion of the facility is equal to 1.75% per annum on the average daily outstanding aggregate capital during the immediately preceding calendar month. For further discussion of the North American asset-backed securitization program, refer to Note 9 Accounts Receivable Securitization.

b. Foreign Asset-Backed Securitization Program

On March 19, 2009, the Company amended its foreign asset-backed securitization program to extend the program until March 18, 2010. For further discussion of the foreign asset-backed securitization program, refer to Note 9 Accounts Receivable Securitization.

JABIL CIRCUIT, INC. AND SUBSIDIARIES

References in this report to the Company, Jabil, we, our, or us mean Jabil Circuit, Inc. together with its subsidiaries, except where the context otherwise requires. This Quarterly Report on Form 10-Q contains certain statements that are, or may be deemed to be, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act) which are made in reliance upon the protections provided by such acts for forward-looking statements. These forward-looking statements (such as when we describe what will, may or should occur, what we plan, intend, estimate, believe, expect or anticipate will occur, and other similar statements) include, but are not limited to, statements regarding future sales and operating results, future prospects, anticipated benefits of proposed (or future) acquisitions and new facilities, growth, the capabilities and capacities of business operations, any financial or other guidance and all statements that are not based on historical fact, but rather reflect our current expectations concerning future results and events. We make certain assumptions when making forward-looking statements, any of which could prove inaccurate, including, but not limited to, statements about our future operating results and business plans. Therefore, we can give no assurance that the results implied by these forward-looking statements will be realized. Furthermore, the inclusion of forward-looking information should not be regarded as a representation by the Company or any other person that future events, plans or expectations contemplated by the Company will be achieved. The ultimate correctness of these forward-looking statements is dependent upon a number of known and unknown risks and events, and is subject to various uncertainties and other factors that may cause our actual results, performance or achievements to be different from any future results, performance or achievements expressed or implied by these statements. The following important factors, among others, could affect future results and events, causing those results and events to differ materially from those expressed or implied in our forward-looking statements:

business conditions and growth or declines in our customers' industries, the electronic manufacturing services industry and the general economy;

the impairment of our goodwill;

the results of litigation related to our past stock option grants and any ramifications thereof;

variability of our operating results;

our dependence on a limited number of major customers;

the potential consolidation of our customer base, and the movement, and potential further movement, by some of our customers of a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity;

availability of components;

our dependence on certain industries;

seasonality;

the variability of customer requirements;

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

our substantial international operations, and the resulting risks related to our operating internationally;

our ability to successfully negotiate definitive agreements and consummate acquisitions, and to integrate operations following the consummation of acquisitions;

our ability to take advantage of our past, current and possible future restructuring efforts to improve utilization and realize savings and whether any such activity will adversely affect our cost structure, our ability to service customers and our labor relations;

our ability to maintain our engineering, technological and manufacturing process expertise;

other economic, business and competitive factors affecting our customers, our industry and our business generally; and

other factors that we may not have currently identified or quantified.

For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations sections contained elsewhere in this document, as well as our Annual Report on Form 10-K for the fiscal year ended August 31, 2008, any subsequent Reports on Form 10-Q and Form 8-K and other filings with the Securities and Exchange Commission. Given these risks and uncertainties, the reader should not place undue reliance on these forward-looking statements.

Table of Contents

All forward-looking statements included in this Quarterly Report on Form 10-Q are made only as of the date of this Quarterly Report on Form 10-Q, and we do not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur, or of which we hereafter become aware. You should read this document and the documents that we incorporate by reference into this Quarterly Report on Form 10-Q completely and with the understanding that our actual future results may be materially different from what we expect. We may not update these forward-looking statements, even if our situation changes in the future. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

Item 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
Overview

We are one of the leading providers of worldwide electronic manufacturing services and solutions. We provide comprehensive electronics design, production, product management and aftermarket services to companies in the aerospace, automotive, computing, consumer, defense, industrial, instrumentation, medical, networking, peripherals, storage and telecommunications industries. We currently depend, and expect to continue to depend, upon a relatively small number of customers for a significant percentage of our net revenue. Based on net revenue for the six months ended February 28, 2009 our largest customers currently include Cisco Systems, Inc., EchoStar Corporation, Hewlett-Packard Company, International Business Machines Corporation, Network Appliance Inc., Nokia Corporation, Nokia Siemens Networks S.p.A., Pace Micro Technology, Research in Motion Limited and Royal Philips Electronics.

We offer our customers electronics design, production, product management and aftermarket solutions that are responsive to their manufacturing needs. Our business units are capable of providing our customers with varying combinations of the following services:

integrated design and engineering;

component selection, sourcing and procurement;

automated assembly;

design and implementation of product testing;

parallel global production;

enclosure services;

systems assembly, direct order fulfillment and configure to order; and

aftermarket services.

We currently conduct our operations in facilities that are located in Austria, Belgium, Brazil, China, England, France, Germany, Hungary, India, Ireland, Italy, Japan, Malaysia, Mexico, The Netherlands, Poland, Scotland, Singapore, Taiwan, Ukraine, Vietnam and the U.S. Our global manufacturing production sites allow our customers to manufacture products in parallel in what they believe are the optimal locations to manufacture their products. Our services allow customers to improve supply-chain management, reduce inventory obsolescence, lower transportation costs and reduce product fulfillment time. We have identified our global presence as a key to assessing our business performance.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

We manage our business based on divisions. Our operating segments consist of three segments – Consumer, Electronic Manufacturing Services (EMS) and Aftermarket Services (AMS). We believe that these divisions provide cost-effective solutions for our customers by grouping business units with similar needs together into divisions, each with full accountability for design, operations, supply chain management and delivery. Our Consumer division has dedicated resources designed to meet the particular needs of the consumer products industry and focuses on cell phones and mobile products, televisions, set-top boxes and peripheral products such as printers. Our EMS division focuses on the traditional and emerging electronic manufacturing services business sectors, including automotive, computing, defense and aerospace, industrial, medical, networking, storage and telecommunications businesses. Our AMS division provides warranty and repair services to customers in a broad range of industries, including certain of our manufacturing customers.

The industry in which we operate is composed of companies that provide a range of manufacturing and design services to companies that utilize electronics components. The industry experienced rapid change and growth through the 1990 s as an increasing number of companies chose to outsource an increasing portion, and, in some cases, all of their manufacturing requirements. In mid-2001, the industry s revenue declined as a result of significant cut-backs in customer production

Table of Contents

requirements, which was consistent with the overall global economic downturn at the time. In response to this industry and global economic downturn, we implemented restructuring programs to reduce our cost structure and further align our manufacturing capacity with the geographic production demands of our customers. Industry revenues generally began to stabilize in 2003 and companies continue to turn to outsourcing versus internal manufacturing. In addition, the number of industries serviced, as well as the market penetration in certain industries, by electronic manufacturing service providers has increased over the past several years. We believe further growth opportunities exist for our industry to penetrate the worldwide electronics markets. The U.S., Europe and certain countries in Asia, however, are currently in the midst of a period of declining gross domestic product. These economic conditions have had a negative impact on our results of operations due to reduced customer demand which is expected to continue for at least the next several fiscal quarters. Also, as a result of recent economic conditions, some of our customers have moved a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity. This movement, and possible future movements, if any occurs, may negatively impact our results of operations. Finally, recent economic conditions led us to implement the 2009 Restructuring Plan discussed below.

Summary of Results

Net revenues for the second quarter of fiscal year 2009 decreased compared to the second quarter of fiscal year 2008 due to decreases in all of our sectors, except for the peripheral and AMS sectors. These decreases were largely due to reduced customer demand resulting from the global macro-economic environment that continues to weaken.

During the second quarter of fiscal year 2009, our Board of Directors approved a restructuring plan to better align our manufacturing capacity in certain geographies and to reduce our worldwide workforce by approximately 3,000 employees in order to reduce operating expenses (the 2009 Restructuring Plan). These restructuring activities are intended to address the current market conditions and properly size our manufacturing facilities to increase the efficiencies of our operations. Based on the analysis completed to date, we currently expect to recognize approximately \$65.0 million in pre-tax restructuring and impairment costs over the course of our fiscal years 2009 and 2010. The restructuring charges include pre-tax employee severance and benefit costs, contract termination costs and other related restructuring costs. The impairment charges include pre-tax fixed asset impairment costs, as well as valuation allowances against net deferred tax assets. This information will be subject to the finalization of timetables for the transition of functions, consultation with employees and their representatives as well as the statutory severance requirements of the particular legal jurisdictions impacted, and the amount and timing of the actual charges may vary due to a variety of factors. Based on the ongoing assessment of market conditions, it is possible that we may perform additional restructuring activities in the future. For further discussion of this restructuring program and the restructuring and impairment costs recognized, refer to Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations Restructuring and Impairment Charges and Note 7

Restructuring and Impairment Charges to the Condensed Consolidated Financial Statements. See also Risk Factors We face risks arising from the restructuring of our operations.

The following table sets forth, for the three-month and six-month periods indicated, certain key operating results and other financial information (in thousands, except per share data).

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Net revenue	\$ 2,887,400	\$ 3,058,613	\$ 6,269,909	\$ 6,426,560
Gross profit	\$ 155,546	\$ 187,905	\$ 379,259	\$ 427,619
Operating (loss)/income	\$ (705,579)	\$ 1,621	\$ (945,539)	\$ 100,531
Net (loss)/income	\$ (866,100)	\$ (24,045)	\$ (1,141,957)	\$ 37,956
(Loss)/earnings per share basic	\$ (4.19)	\$ (0.12)	\$ (5.53)	\$ 0.19
(Loss)/earnings per share diluted	\$ (4.19)	\$ (0.12)	\$ (5.53)	\$ 0.18
Cash dividend per share declared	\$ 0.07	\$ 0.07	\$ 0.14	\$ 0.14

Key Performance Indicators

Management regularly reviews financial and non-financial performance indicators to assess the Company's operating results. The following table sets forth, for the quarterly periods indicated, certain of management's key financial performance indicators.

Table of Contents

	Three months ended			
	February 28, 2009	November 30, 2008	August 31, 2008	May 31, 2008
Sales cycle	20 days	24 days	20 days	21 days
Inventory turns	8 turns	8 turns	8 turns	8 turns
Days in trade accounts receivable	36 days	44 days	40 days	39 days
Days in inventory	46 days	46 days	45 days	47 days
Days in accounts payable	62 days	66 days	65 days	65 days

The sales cycle is calculated as the sum of days in trade accounts receivable and days in inventory, less the days in accounts payable; accordingly, the variance in the sales cycle quarter over quarter is a direct result of changes in these indicators. During the three months ended February 28, 2009, days in trade accounts receivable decreased eight days to 36 days from the prior sequential quarter as a result of the timing of sales and focused efforts on cash collection during the quarter, as well as related seasonality factors. During the three months ended February 28, 2009, days in inventory and inventory turns remained consistent at 46 days and eight turns, respectively, from the prior consecutive quarter. During the three months ended February 28, 2009, days in accounts payable decreased four days to 62 days as compared to 66 days in the prior sequential quarter, as a result of lower volume and the timing of purchases and cash payments during the quarter.

Critical Accounting Policies and Estimates

The preparation of our financial statements and related disclosures in conformity with accounting principles generally accepted in the U.S. (U.S. GAAP) requires management to make estimates and judgments that affect our reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. Management believes that our estimates and assumptions are reasonable under the circumstances; however, actual results may vary from these estimates and assumptions under different future circumstances. We have identified the following critical accounting policies that affect the more significant judgments and estimates used in the preparation of our condensed consolidated financial statements. For further discussion of our significant accounting policies, refer to Note 1 Description of Business and Summary of Significant Accounting Policies to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended August 31, 2008.

Revenue Recognition

We derive revenue principally from the product sales of electronic equipment built to customer specifications. We also derive revenue to a lesser extent from aftermarket services, design services and excess inventory sales. Revenue from product sales and excess inventory sales is generally recognized, net of estimated product return costs, when goods are shipped; title and risk of ownership have passed; the price to the buyer is fixed or determinable; and recoverability is reasonably assured. Aftermarket service related revenue is recognized upon completion of the services. Design service related revenue is generally recognized upon completion and acceptance by the respective customer. We assume no significant obligations after product shipment.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts related to receivables not expected to be collected from our customers. This allowance is based on management's assessment of specific customer balances, considering the age of receivables and financial stability of the customer. If there is an adverse change in the financial condition and circumstances of our customers, or if actual defaults are higher than provided for, an addition to the allowance may be necessary.

Inventory Valuation

We purchase inventory based on forecasted demand and record inventory at the lower of cost or market. Management regularly assesses inventory valuation based on current and forecasted usage and other lower of cost or market considerations. If actual market conditions or our customers' product demands are less favorable than those projected, additional valuation adjustments may be necessary.

Long-Lived Assets

We review property, plant and equipment and amortizable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of property, plant and equipment is measured by comparing its carrying value to the undiscounted projected cash flows that the asset(s) or asset groups(s) are expected to generate. If the carrying amount of an asset or an asset group is not recoverable, we recognize an

Table of Contents

impairment loss based on the excess of the carrying amount of the long-lived asset over its respective fair value, which is generally determined as either the present value of estimated future cash flows or the appraised value. The impairment analysis is based on significant assumptions of future results made by management, including revenue and cash flow projections. Circumstances that may lead to impairment of property, plant and equipment include unforeseen decreases in future performance or industry demand and the restructuring of our operations resulting from a change in our business strategy. For further discussion of our current restructuring program, refer to Note 7 Restructuring and Impairment Charges to the Condensed Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations Restructuring and Impairment Charges.

We have recorded intangible assets, including goodwill, in connection with business acquisitions. Estimated useful lives of amortizable intangible assets are determined by management based on an assessment of the period over which the asset is expected to contribute to future cash flows. The allocation of amortizable intangible assets impacts the amounts allocable to goodwill.

In accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS 142), we perform a goodwill impairment analysis using the two-step method on an annual basis and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability of goodwill is measured at the reporting unit level, which we have determined to be consistent with our operating segments by comparing the reporting unit's carrying amount, including goodwill, to the fair market value of the reporting unit. We consistently determine the fair market value of our reporting units based on an average weighting of both projected discounted future results and the use of comparative market multiples. The use of comparative market multiples (the market approach) compares us to other comparable companies based on valuation multiples to arrive at a fair value. We regularly compare our Company and our divisions to our competitors and we believe the judgments used to arrive at these comparable companies are reasonable. The use of projected discounted future results (discounted cash flow approach) is based on assumptions that are consistent with our estimates of future growth and the strategic plan used to manage the underlying business and also includes a probability-weighted expectation as to our future cash flows. Factors requiring significant judgment include assumptions related to future growth rates, discount factors, and tax rates, amongst other considerations. Changes in economic and operating conditions that occur after the annual impairment analysis or an interim impairment analysis, and that impact these assumptions, may result in a future goodwill impairment charge.

During the first quarter of fiscal year 2009, based upon a combination of factors, including a significant and sustained decline in our market capitalization below our carrying value, the deteriorating macro-economic environment and illiquidity in the overall credit markets, we concluded that sufficient indicators existed to require us to perform an interim goodwill impairment analysis at November 30, 2008. Accordingly, at November 30, 2008, we determined that the goodwill related to the Consumer reporting unit was impaired and recorded a preliminary non-cash goodwill impairment charge of approximately \$317.7 million. The income tax expense associated with the preliminary goodwill impairment charge was \$4.4 million. This included a tax benefit of \$30.6 million for the write-off of tax deductible goodwill and tax expense of \$35.0 million resulting from the recognition of a valuation allowance against a deferred tax asset, which related primarily to net operating losses, that we now believe will not be realized.

During the second quarter of fiscal year 2009 and prior to finalizing the preliminary non-cash goodwill impairment charge recorded at November 30, 2008, related to the Consumer reporting unit, we concluded that additional indicators of potential impairment were present. Those indicators, based upon a combination of factors, included a continued deterioration in the macro-economic environment which resulted in further decline in customer demand and further sustained decline in our market capitalization below our carrying value. Furthermore, the average closing price of our common stock on the New York Stock Exchange (NYSE) in the second quarter of fiscal year 2009 was \$6.16 compared to an average of \$8.89 in the first quarter of fiscal year 2009, a decline of approximately 31%. At February 28, 2009, the closing price of our common stock was \$4.14 compared to \$6.58 at November 30, 2008, a decline of approximately 37%. Accordingly, we performed an interim first step of goodwill impairment test for each of our reporting units and determined that the carrying values of the Consumer and EMS reporting units exceeded their fair value, indicating potential goodwill impairment existed. Having determined that the goodwill of the Consumer and EMS reporting units were potentially impaired, we began performing the second step of the goodwill impairment analysis which involves calculating the implied fair value of the goodwill of the Consumer and EMS reporting units by allocating the fair value of the respective reporting units to all of our assets and liabilities other than goodwill (including both recognized and unrecognized intangible assets) and comparing the residual amount to the carrying value of goodwill. As of the date of the filing of our Quarterly Report on Form 10-Q for the fiscal quarter ended February 28, 2009, we have determined that the goodwill related to the Consumer reporting unit is fully impaired and have recorded an additional non-cash goodwill impairment charge of approximately \$82.7 million for the three months ended February 28, 2009. Further, we have also determined that the goodwill related to the EMS reporting unit is impaired and have recorded a preliminary non-cash goodwill impairment charge of approximately \$622.4 million for the three months ended February 28, 2009. We have recorded this charge based on a preliminary assessment and will continue to

Table of Contents

evaluate the valuations of tangible and intangible assets and the allocation of fair value to all of the assets and liabilities other than goodwill of the EMS reporting unit. After the recognition of the non-cash goodwill impairment charge, no goodwill remained with the Consumer and EMS reporting units, respectively.

The income tax expense associated with the goodwill impairment was \$111.8 million for the fiscal quarter ended February 28, 2009. This includes a tax benefit of \$9.0 million for the write-off of tax deductible goodwill and income tax expense of \$120.8 million resulting from the recognition of a valuation allowance against the deferred tax assets that we no longer believe are more likely than not to be realized. The recognition of the valuation allowance was primarily attributable to the same conditions that caused the goodwill impairment as referenced above.

We currently expect to finalize our goodwill impairment analysis during the fiscal quarter ending May 31, 2009. There could be material adjustments to the goodwill impairment charge in the EMS reporting unit upon completion of the goodwill impairment analysis. Any adjustment to our preliminary estimate as a result of completion of this evaluation is currently expected to be recorded in our Condensed Consolidated Financial Statements for the fiscal quarter ending May 31, 2009.

The non-cash goodwill impairment charge of \$ 705.1 million and \$1.0 billion for the three months and six months ended February 28, 2009, respectively, did not impact our cash balance or debt covenant compliance.

As a result of performing the interim first step of our goodwill impairment analysis for the AMS reporting unit, we determined that the fair value of this unit exceeded its carrying value and therefore there was no impairment. Furthermore, we also performed a sensitivity analysis on our estimated fair value using the income approach for the AMS unit given the amount of goodwill recorded in this reporting unit. At February 28, 2009, there was \$23.3 million of recorded goodwill. Significant assumptions used in our fair value estimate are discount rates and market multiples. We noted that an increase in the discount rate of approximately 48% would have resulted in the need for us to have performed the second step of the goodwill impairment analysis. In addition, a decrease in the market multiple of 23.5% would have resulted in the need for us to perform the second step of the goodwill impairment analysis. If we experience a further significant decline in our stock price and market capitalization, a significant decline in our expected future cash flows, a significant adverse change in the business climate or slower growth rates, we may need to perform an interim impairment analysis under SFAS 142 in future periods, in addition to our annual impairment test, any of which may result in a future goodwill impairment charge to the AMS reporting unit. Additionally, there are no assurances that valuation multiples will not decline, discount rates will not increase, or earnings or projected earnings and cash flows of the reporting unit will not decline. It is reasonably possible that such changes may occur.

The impairment evaluation for indefinite lived intangible assets, which for us is our trade name, is conducted during the fourth quarter of each fiscal year, or more frequently if events or changes in circumstances indicate that an asset may be impaired. As a result of the impairment indicators described above, during the first quarter and again in the second quarter of fiscal year 2009, we evaluated our trade name for impairment by comparing the discounted estimates of future revenue projections to its carrying value and determined that there was no impairment. Significant judgments inherent in this analysis included assumptions regarding appropriate revenue growth rates, discount rates and royalty rates.

We review long-lived assets, including intangible assets subject to amortization, which for us are our contractual agreements, customer relationships and intellectual property, for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of long-lived assets is measured by a comparison of the carrying amount of the asset group to the future undiscounted net cash flows expected to be generated by those assets. If such assets are considered to be impaired, the impairment charge recognized is the amount by which the carrying amounts of the assets exceeds the fair value of the assets. As a result of the impairment indicators described above, during the first quarter and again in the second quarter of fiscal year 2009, we tested our long-lived assets for impairment and determined that there was no impairment.

Restructuring and Impairment Charges

We have recognized restructuring and impairment charges related to reductions in workforce, re-sizing and closure of certain facilities, and the transition of production from certain facilities into other new and existing facilities. These charges were recorded pursuant to formal plans developed and approved by management and our Board of Directors. The recognition of restructuring and impairment charges requires that we make certain judgments and estimates regarding the nature, timing and amount of costs associated with these plans. The estimates of future liabilities may change, requiring additional restructuring and impairment charges or the reduction of liabilities already recorded. At the end of each reporting period, we evaluate the remaining accrued balances to ensure that no excess accruals are retained and the utilization of the provisions are for their intended purpose in accordance with the restructuring programs. For further discussion of our restructuring programs, refer to Note 7 *Restructuring and Impairment Charges* to the Condensed Consolidated Financial Statements and *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Results of Operations* *Restructuring and Impairment Charges*.

Table of Contents*Retirement Benefits*

We have pension and postretirement benefit costs and liabilities, which are developed from actuarial valuations. Actuarial valuations require management to make certain judgments and estimates of discount rates, compensation rate increases and return on plan assets. We evaluate these assumptions on a regular basis taking into consideration current market conditions and historical market data. The discount rate is used to state expected future cash flows at a present value on the measurement date. This rate represents the market rate for high-quality fixed income investments. A lower discount rate increases the present value of benefit obligations and increases pension expense. When considering the expected long-term rate of return on pension plan assets, we take into account current and expected asset allocations, as well as historical and expected returns on plan assets. Other assumptions include demographic factors such as retirement, mortality and turnover. For further discussion of our pension and postretirement benefits, refer to Note 10 *Retirement Benefits* to the Condensed Consolidated Financial Statements.

Income Taxes

We estimate our income tax provision in each of the jurisdictions in which we operate, a process that includes estimating exposures related to examinations by taxing authorities. We must also make judgments regarding the ability to realize the deferred tax assets. The carrying value of our net deferred tax assets is based on our belief that it is more likely than not that we will generate sufficient future taxable income in certain jurisdictions to realize these deferred tax assets. A valuation allowance has been established for deferred tax assets that we do not believe meet the more likely than not criteria established by Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes* (SFAS 109). Our judgments regarding future taxable income may change due to changes in market conditions, changes in tax laws or other factors. If our assumptions and consequently our estimates change in the future, the valuation allowances we have established may be increased or decreased, resulting in a respective increase or decrease in either income tax expense or goodwill.

In June of 2006, the Financial Accounting Standards Board (the FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109* (FIN 48), which clarifies the accounting for uncertainty in income taxes in an enterprise's financial statements in accordance with SFAS 109. FIN 48 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. For further discussion related to our income taxes, refer to Note 4 *Income Taxes* to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended August 31, 2008.

Stock-Based Compensation

In accordance with the provisions of Statement of Financial Accounting Standards No. 123(R), *Share-Based Payments* (SFAS 123R) and the Securities and Exchange Commission Staff Accounting Bulletin No. 107 (SAB 107), we began recognizing stock-based compensation expense in our consolidated statement of operations on September 1, 2005. The fair value of options granted prior to September 1, 2005 were valued using the Black-Scholes model while the stock appreciation rights granted after this date were valued using a lattice valuation model. Option pricing models require the input of subjective assumptions, including the expected life of the option or stock appreciation right, risk-free rate, expected dividend yield and the price volatility of the underlying stock. Judgment is also required in estimating the number of stock awards that are expected to vest as a result of satisfaction of time-based vesting schedules or the achievement of certain performance conditions. If actual results or future changes in estimates differ significantly from our current estimates, stock-based compensation could increase or decrease. For further discussion of our stock-based compensation, refer to Note 4 *Stock-Based Compensation* to the Condensed Consolidated Financial Statements and *Risk Factors* We are involved in reviews of our historical stock option grant practices.

Recent Accounting Pronouncements

See Note 14 *New Accounting Pronouncements* to the Condensed Consolidated Financial Statements for a discussion of recent accounting pronouncements.

Table of Contents**Results of Operations**

The following table sets forth, for the periods indicated, certain statements of operations data expressed as a percentage of net revenue:

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Net revenue	100.0%	100.0%	100.0%	100.0%
Cost of revenue	94.6%	93.9%	94.0%	93.3%
Gross profit	5.4%	6.1%	6.0%	6.7%
Operating expenses:				
Selling, general and administrative	3.8%	4.0%	3.9%	3.7%
Research and development	0.2%	0.3%	0.1%	0.3%
Amortization of intangibles	0.3%	0.3%	0.3%	0.3%
Restructuring and impairment charges	1.1%	1.4%	0.5%	0.8%
Goodwill impairment charge	24.4%		16.3%	
Operating (loss)/ income	(24.4)%	0.1%	(15.1)%	1.6%
Other expense	0.0%	0.1%	0.0%	0.1%
Interest income	(0.0)%	(0.1)%	0.1%	(0.1)%
Interest expense	0.7%	0.8%	0.7%	0.8%
(Loss)/income before income taxes and minority interest (net of tax)	(25.1)%	(0.7)%	(15.7)%	0.8%
Income tax expense	4.9%	0.1%	2.5%	0.2%
Minority interest (net of tax)	0.0%	0.0%	0.0%	0.0%
Net (loss)/income	(30.0)%	(0.8)%	(18.2)%	0.6%

Net Revenue. Our net revenue for the three months ended February 28, 2009 decreased 5.6% to \$2.9 billion, from \$3.1 billion for the three months ended February 29, 2008. The decrease for the three months ended February 28, 2009 from the same period of the previous fiscal year was due to decreased sales levels across most of our industry sectors. Specific decreases include a 52% decrease in the sale of display products; a 33% decrease in the sale of other products; a 28% decrease in the sale of networking products; a 23% decrease in the sale of automotive products; a 21% decrease in the sale of telecom products; a 12% decrease in the sale of computing and storage products; a 3% decrease in the sale of instrumentation and medical products; and a 2% decrease in the sale of peripheral products. These decreases were largely driven by reduced production levels as a result of reduced customer demand due to the weakened macro-economic environment. These decreases were slightly offset by a 3% increase in the sale of after-market services products and a 92% increase in the sale of mobility products predominately related to the ramping of new products with an existing customer within the sector.

Our net revenue for the six months ended February 28, 2009 decreased 2.4% to \$6.3 billion, from \$6.4 billion for the six months ended February 29, 2008. The decrease for the six months ended February 28, 2009 from the same period of the previous fiscal year was due to decreased sales levels across most industry sectors. Specific decreases include a 45% decrease in the sale of display products; a 20% decrease in the sale of other products; an 18% decrease in the sale of networking products; a 12% decrease in the sale of automotive products; a 9% decrease in the sale of computing and storage products; and a 4% decrease in the sale of after-market services products. These decreases were largely driven by reduced production levels as a result of softened customer demand due to the weakened macro-economic environment. These decreases were partially offset by an 8% increase in the sale of telecom products; a 12% increase in the sale of peripheral products; a 1% increase in the sale of instrumentation and medical products; and a 48% increase in the sale of mobility products predominately related to the ramping of new products with an existing customer within the sector.

A portion of our net revenue is attributable to businesses we acquire. Generally, we assess revenue on a global customer basis regardless of whether the growth is associated with organic growth or as a result of an acquisition. Accordingly, we do not differentiate or report separately

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

revenue increases generated by acquisitions as opposed to existing business. In addition, the added cost structures associated with our acquisitions have historically been relatively insignificant when compared to our overall cost structure.

Table of Contents

The following table sets forth, for the periods indicated, revenue by industry sector expressed as a percentage of net revenue. The distribution of revenue across our industry sectors has fluctuated, and will continue to fluctuate, as a result of numerous factors, including but not limited to the following: fluctuations in customer demand as a result of the weakened macro-economic environment; our continuing efforts to rationalize the economic performance of certain sectors, most specifically in the automotive and display sectors; seasonality in the business; and business growth from new and existing customers, including new product ramps in the mobility sector.

	Three months ended		Six months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
EMS				
Automotive	3%	4%	3%	4%
Computing and Storage	12%	13%	12%	12%
Instrumentation and Medical	19%	18%	19%	17%
Networking	17%	22%	17%	21%
Telecommunications	5%	7%	5%	6%
Other	2%	2%	1%	2%
Total EMS	58%	66%	57%	62%
Consumer Electronics				
Display	4%	7%	4%	10%
Mobility	21%	11%	21%	12%
Peripherals	11%	11%	12%	11%
Total Consumer Electronics	36%	29%	37%	33%
AMS	6%	5%	6%	5%
Total	100%	100%	100%	100%

Foreign source revenue represented 82.8% and 83.4% of net revenue for the three months and six months ended February 28, 2009, respectively. This is compared to 79.2% and 80.6% of net revenue for the three months and six months ended February 29, 2008, respectively. We currently expect our foreign source revenue to slightly increase as compared to current levels over the course of the next twelve months.

Gross Profit. Gross profit decreased to 5.4% and 6.0% of net revenue for the three months and six months ended February 28, 2009, respectively, from 6.1% and 6.7% of net revenue for the three months and six months ended February 29, 2008, respectively. The decrease in gross profit as a percentage of net revenue for the three months and six months ended February 28, 2009 versus the same period of fiscal year 2008 was primarily due to (i) our revenues decreasing at a higher rate than certain of our fixed costs as we seek to reduce our cost structure in order to align with lower demand levels; (ii) our excess capacity given current macro-economic conditions; and (iii) additional costs incurred related to the ramping of new products in the mobility sector during fiscal year 2009.

Selling, General and Administrative. Selling, general and administrative expenses for the three months ended February 28, 2009 decreased to \$111.1 million (3.8% of net revenue) compared to \$124.9 million (4.0%) for the three months ended February 29, 2008. The decrease for the three months ended February 28, 2009 was primarily due to the reversal of \$10.2 million of stock-based compensation expense during the second quarter of fiscal year 2009 due to the expectation that the performance goals associated with certain restricted stock awards granted in fiscal year 2008 would not be fully met. See Note 4 – Stock-Based Compensation to the Condensed Consolidated Financial Statements for further discussion.

Selling, general and administrative expenses for the six months ended February 28, 2009 increased to \$242.7 million (3.9% of net revenue) compared to \$241.1 million (3.7% of net revenue) for the six months ended February 29, 2008. The increase for the six months ended February 28, 2009 was primarily due to incremental costs of \$1.9 million due to the acquisition of certain manufacturing operations of Nokia Siemens Networks S.p.A. (NSN) which was acquired in October 2007.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Research and Development. Research and development expenses for the three months and six months ended February 28, 2009 decreased to \$5.8 million (0.2% of net revenue) and \$11.4 million (0.1% of net revenue), respectively, from \$9.9 million (0.3% of net revenue) and \$16.4 million (0.3% of net revenue) for the six months ended February 29, 2008. The decrease is attributed primarily to the repositioning of certain design resources to lower-cost regions as well as reduced spending in the consumer sectors.

Table of Contents

Amortization of Intangibles. We recorded \$7.7 million and \$15.7 million of amortization of intangible assets for the three months and six months ended February 28, 2009, respectively, as compared to \$9.7 million and \$18.6 million for the three months and six months ended February 29, 2008, respectively. The decrease is primarily attributable to certain intangible assets that became fully amortized since February 29, 2008 and, therefore, we are no longer recognizing amortization expense. For additional information regarding purchased intangibles, see Note 8 Goodwill and Other Intangible Assets to the Condensed Consolidated Financial Statements.

Restructuring and Impairment Charges.

a. 2009 Restructuring Plan

In conjunction with the 2009 Restructuring Plan, we charged \$32.7 million of restructuring and impairment costs during the three months and six months ended February 28, 2009 to the Condensed Consolidated Statement of Operations. The restructuring and impairment costs for the three months and six months ended February 28, 2009 include \$27.4 million related to employee severance and benefits costs, \$0.1 million related to lease commitments and \$5.2 million related to fixed asset impairments.

At February 28, 2009, accrued liabilities of approximately \$22.8 million related to the 2009 Restructuring Plan are expected to be paid over the next twelve months. The remaining liability of \$2.7 million is expected to be paid through fiscal year 2011.

These restructuring and impairment charges related to the 2009 Restructuring Plan incurred through February 28, 2009 of \$32.7 million include cash costs totaling \$27.5 million, of which \$1.3 million was paid in the second fiscal quarter of 2009. The cash costs consist of employee severance and benefits costs of approximately \$27.4 million and costs related to lease commitments of approximately \$0.1 million. Non-cash costs of approximately \$5.2 million primarily represent fixed asset impairment charges related to our restructuring activities.

In relation to the 2009 Restructuring Plan, the Company currently expects to recognize approximately \$65.0 million in total restructuring and impairment costs primarily over the course of fiscal years 2009 and 2010.

Upon its completion, the 2009 Restructuring Plan is expected to yield annualized cost savings of approximately \$55.0 million. The majority of these annual cost savings is expected to be reflected as a reduction in cost of revenue, with a small portion being reflected as a reduction of selling, general and administrative expense. We currently expect to begin to realize a portion of these costs savings in the third quarter of fiscal year 2009, and we are still evaluating any cost savings offsets.

b. 2006 Restructuring Plan

Upon the approval by our Board of Directors, we initiated a restructuring plan in the fourth quarter of fiscal year 2006 (the 2006 Restructuring Plan). We have substantially completed restructuring activities under this plan and expect to incur the remaining costs over the remainder of fiscal year 2009 with certain contract termination costs to be incurred through fiscal year 2011.

During the three months and six months ended February 28, 2009, we reversed \$1.2 million and \$0.6 million of restructuring and impairment costs, respectively, compared to \$41.8 million and \$51.1 million of additional restructuring and impairment charges recognized for the three months and six months ended February 29, 2008, respectively. The restructuring and impairment costs (reversals) for the three months ended February 28, 2009 include \$(1.4) million related to employee severance and benefits costs and \$0.2 million related to lease commitments. The restructuring and impairment costs (reversals) for the six months ended February 28, 2009 include \$(1.0) million related to employee severance and benefits costs and \$0.4 million related to lease commitments.

At February 28, 2009, liabilities of approximately \$6.9 million related to the 2006 Restructuring Plan are expected to be paid out over the next twelve months. The remaining liability of \$3.9 million relates primarily to the charge for certain lease commitments and employee severance and termination benefits payments and is expected to be paid primarily during the remainder of fiscal year 2009 through 2011.

As of February 28, 2009, as a result of the restructuring activities completed through February 28, 2009 related to the 2006 Restructuring Plan, we expect to avoid annual costs of approximately \$151.5 million that would otherwise have been incurred if the restructuring activities had not been completed. The expected avoided annual costs consist of a reduction in employee related expenses of approximately \$137.7 million, a reduction in depreciation expense associated with impaired fixed assets of approximately \$8.5 million, and a reduction in rent expense associated with leased buildings that have been vacated of approximately \$5.3 million. The majority of these annual cost savings will be reflected as a reduction in cost of

Table of Contents

revenue, with a small portion being reflected as a reduction in selling, general and administrative expense. These annual costs savings are expected to be offset by decreased revenues associated with certain products that are approaching the end-of-life stage; decreased revenues as a result of shifting production to plants located in lower cost regions where competitive environmental pressures require that we pass those cost savings onto our customers; and incremental employee related costs expected to be incurred by those plants to which the production will be shifted. After considering these cost savings offsets, we currently expect to begin to realize the full net annualized cost savings of approximately \$30.0 million to \$40.0 million during the second half of fiscal year 2009. For further discussion of the restructuring programs, see Note 7 *Restructuring and Impairment Charges* to the Condensed Consolidated Financial Statements.

Goodwill Impairment Charge. We recorded a preliminary non-cash goodwill impairment charge in the amount of \$705.1 million and \$1.0 billion for the three months and six months ended February 28, 2009, respectively, to reduce the carrying amount of our goodwill for our Consumer and EMS reporting units to their estimated fair value based upon the results of our interim impairment tests performed during the first and second quarters of fiscal year 2009.

During the second quarter of fiscal year 2009, and prior to finalizing the preliminary non-cash goodwill impairment charge related to the Consumer reporting unit of \$317.7 million, we concluded that additional indicators of potential impairment were present. Those indicators, based upon a combination of factors, included a continued deterioration in the macro-economic environment which resulted in further decline in customer demand and further sustained decline in our market capitalization below our carrying value. As a result of the impairment analysis, we have determined that the goodwill related to the Consumer reporting unit is fully impaired and recorded an additional non-cash goodwill impairment charge of approximately \$82.7 million for the three months ended February 28, 2009. In addition, we also determined that the goodwill related to the EMS reporting unit is impaired and have recorded a preliminary non-cash goodwill impairment charge of approximately \$622.4 million for the three months ended February 28, 2009. There could be material adjustments to the preliminary goodwill impairment charge in the EMS reporting unit upon completion of the goodwill impairment analysis. Any adjustments to our preliminary estimates as a result of the completion of this evaluation are currently expected to be recorded in our condensed consolidated financial statements for the fiscal quarter ended May 31, 2009. For further discussion of goodwill impairment charges recorded, see Note 8 *Goodwill and Other Intangible Assets* to the Condensed Consolidated Financial Statements and *Management's Discussion and Analysis of Financial Condition and Results of Operations* *Critical Accounting Policies and Estimates* *Long-Lived Assets*.

Other Expense. We recorded other expense of \$0.9 million and \$3.2 million for the three months and six months ended February 28, 2009, respectively, as compared to other expense of \$3.3 million and \$7.8 million for the three months and six months ended February 29, 2008, respectively. The decrease in other expense for the three months and six months ended February 28, 2009 compared to the three months and six months ended February 29, 2008, was primarily due to the net cash proceeds available at any one time under the North American asset-backed securitization program being decreased from \$325.0 million to \$280.0 million, as well as decreased interest rates during the period. For further discussion of our North American asset-backed securitization program, see Note 9 *Accounts Receivable Securitization* to the Condensed Consolidated Financial Statements. See also Note 15 *Subsequent Events* to the Condensed Consolidated Financial Statements for discussion surrounding an amendment that was executed related to the securitization program subsequent to February 28, 2009.

Interest Income. Interest income decreased to \$1.9 million and \$4.2 million for the three months and six months ended February 28, 2009, respectively, from \$3.2 million and \$6.2 million for the three months and six months ended February 29, 2008, respectively. The decrease was primarily due to lower overall interest rates during the three months and six months ended February 28, 2009.

Interest Expense. Interest expense decreased to \$20.1 million and \$43.8 million for the three months and six months ended February 28, 2009, respectively, from \$23.7 million and \$49.3 million for the three months and six months ended February 29, 2008, respectively, primarily due to lower variable interest rates and lower average revolving debt balances.

Income Taxes. Income tax expense reflects an effective tax rate of (19.6)% and (15.6)% for the three months and six months ended February 28, 2009, respectively, as compared to an effective rate of (13.9)% and 25.7% for the three months and six months ended February 29, 2008, respectively. The effective tax rate for the three months and six months ended February 28, 2009 differs from previous periods due to a preliminary impairment of deductible and non-deductible goodwill and the resulting recognition of a deferred income tax benefit related to the deductible portion, net of a valuation allowance against certain deferred tax assets that are no longer more likely than not to be realized. The tax rate is predominantly a function of the mix of tax rates in the various jurisdictions in which we do business. Most of our international operations have historically been taxed at a lower rate than in the U.S., primarily due to tax incentives granted to our sites in Brazil, China, Hungary, India, Malaysia and Poland that expire at various dates through 2017. Such tax incentives are subject to conditions with which we expect to continue to comply.

Table of Contents**Acquisitions and Expansion**

We have made a number of acquisitions that were accounted for using the purchase method of accounting. Our condensed consolidated financial statements include the operating results of each business from the date of acquisition. See **Risk Factors** We may not achieve expected profitability from our acquisitions.

Seasonality

Production levels for our Consumer division and the automotive industry sector of our EMS division are subject to seasonal influences. We may realize greater net revenue during our first fiscal quarter due to high demand for consumer products during the holiday selling season. Therefore, quarterly results should not be relied upon as necessarily indicative of results for the entire fiscal year.

Dividends

The following table sets forth certain information relating to our cash dividends declared to common stockholders during fiscal years 2008 and 2009.

	Dividend Information				
	Dividend	Dividend per share	Total of cash dividends declared	Date of record for dividend payment	Dividend cash payment date
	declaration date				
	(in thousands, except for per share data)				
Fiscal year 2008:	November 1, 2007	\$ 0.07	\$ 14,667	November 15, 2007	December 3, 2007
	January 17, 2008	\$ 0.07	\$ 14,704	February 15, 2008	March 3, 2008
	April 17, 2008	\$ 0.07	\$ 14,704	May 15, 2008	June 2, 2008
	July 16, 2008	\$ 0.07	\$ 14,739	August 15, 2008	September 2, 2008
Fiscal year 2009:	October 24, 2008	\$ 0.07	\$ 14,916	November 17, 2008	December 1, 2008
	January 22, 2009	\$ 0.07	\$ 14,974	February 17, 2009	March 2, 2009

We currently expect to continue to declare and pay quarterly dividends of an amount similar to our past declarations. However, the declaration and payment of future dividends are discretionary and will be subject to determination by our Board of Directors each quarter following its review of our financial performance.

Table of Contents**Liquidity and Capital Resources**

At February 28, 2009, our principal sources of liquidity consisted of cash, available borrowings under our credit facilities and the accounts receivable securitization programs. The following table sets forth, for the periods indicated, selected consolidated cash flow information (in thousands).

	Six months ended	
	February 28, 2009	February 29, 2008
Net cash provided by operating activities	\$ 308,963	\$ 272,808
Net cash used in investing activities	(181,909)	(203,721)
Net cash used in financing activities	(133,531)	(146,247)
Effect of exchange rate changes on cash	8,490	(55,096)
Net increase (decrease) in cash and cash equivalents	\$ 2,013	\$ (132,256)

Net cash provided by operating activities for the six months ended February 28, 2009 was approximately \$309.0 million. This consisted primarily of a \$1.1 billion net loss, a \$27.5 million increase in prepaid and other current assets and a decrease in account payables and accrued expenses of \$188.3 million offset by a \$1.0 billion non-cash goodwill impairment charge, \$146.1 million in non-cash depreciation and amortization expense, a decrease of \$255.6 million in trade accounts receivable and a \$70.9 million decrease in inventories. The decrease in accounts payable and accrued expenses was primarily driven by lower volume levels as well as the timing of purchases during the first six months of fiscal year 2009. The decrease in accounts receivable and inventories were primarily due to focused efforts during the second quarter of fiscal year 2009 to improve cash collections and to reduce inventory levels to better align with current customer demand.

Net cash used in investing activities for the six months ended February 28, 2009 was \$181.9 million. This consisted primarily of capital expenditures of \$184.7 million for investments in information technology infrastructure and capacity to support the ongoing ramp of new programs within the mobility sector and \$1.1 million for cash payments related to recent business acquisitions. These expenditures were offset by \$3.9 million of proceeds from the sale of property and equipment.

Net cash used in financing activities for the six months ended February 28, 2009 was \$133.5 million. This resulted from our receipt of approximately \$2.1 billion of proceeds from borrowings under existing debt agreements, which primarily included an aggregate of \$1.8 billion of borrowings under the revolving portion of the Credit Facility and \$162.4 million of borrowings under our short-term Indian working capital facilities. This was offset by repayments in an aggregate amount of \$2.2 billion during the six months ended February 28, 2009, which primarily included \$1.8 billion toward repayment of borrowings under the revolving portion of the Credit Facility and \$156.5 million toward repayment of borrowings under our short-term Indian working capital facilities. In addition we paid \$29.7 million of dividends to stockholders during the six months ended February 28, 2009.

We may need to finance day-to-day working capital needs, as well as future growth and any corresponding working capital needs, with additional borrowings under our revolving credit facilities described below, as well as additional public and private offerings of our debt and equity. Currently, we have a shelf registration statement with the SEC registering the potential sale of an indeterminate amount of debt and equity securities in the future, from time to time, to augment our liquidity and capital resources.

During the second quarter of fiscal year 2004, we entered into an asset-backed securitization program with a bank, which originally provided for net cash proceeds at any one time of an amount up to \$100.0 million on the sale of eligible trade accounts receivable of certain domestic operations. Subsequent to fiscal year 2004, several amendments have increased the net cash proceeds available at any one time under the securitization program up to an amount of \$250.0 million and extended the program until March 17, 2010. Under this agreement, we continuously sell a designated pool of trade accounts receivable to a wholly-owned subsidiary, which in turn sells an ownership interest in the receivables to a conduit, administered by an unaffiliated financial institution. This wholly-owned subsidiary is a separate bankruptcy-remote entity and its assets would be available first to satisfy the claims of the conduit. As the receivables sold are collected, we are able to sell additional receivables up to the maximum permitted amount under the program. The securitization program requires compliance with several financial covenants including an interest coverage ratio and debt to EBITDA ratio, as defined in the securitization agreements, as amended. For each pool of eligible receivables sold to the conduit, we retain a percentage interest in the face value of the receivables, which is calculated based on the terms of the agreement. Net receivables sold under this program are excluded from trade accounts receivable on the Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Condensed Consolidated Statement of Cash Flows. We continue to service, administer and collect the receivables sold under this program. We pay a fee on the unused portion of the facility

Table of Contents

ranging between 0.875% and 0.925% per annum based on the average daily unused aggregate capital during the period. Further, we pay a usage fee on the utilized portion of the facility equal to 1.75% per annum on the average daily outstanding aggregate capital during the immediately preceding calendar month. The investors and the securitization conduit have no recourse to our assets for failure of debtors to pay when due. At February 28, 2009, we had sold \$329.3 million of eligible trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, we received cash proceeds of \$226.9 million and retained an interest in the receivables of approximately \$102.4 million. In connection with the securitization program, we recognized pretax losses on the sale of receivables of approximately \$0.9 million and \$3.2 million during the three months and six months ended February 28, 2009, respectively, and \$3.3 million and \$7.8 million for the three months and six months ended February 29, 2008, respectively, which are recorded as other expense on the Condensed Consolidated Statement of Operations.

During the third quarter of fiscal year 2008, we entered into our foreign asset-backed securitization program with a bank conduit. In connection with the securitization program certain foreign subsidiaries sell, on an ongoing basis, an undivided interest in designated pools of trade accounts receivable to a special purpose entity, which in turn borrows up to \$200.0 million from the bank conduit to purchase those receivables and in which it grants security interests as collateral for the borrowings. The securitization program is accounted for as a borrowing under Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (a replacement of FASB Statement No. 125)*, (SFAS 140). The loan balance is calculated based on the terms of the securitization program agreements. The securitization program requires compliance with several covenants including a limitation on certain corporate actions such as mergers, consolidations and sale of substantially all assets. At February 28, 2009, we had \$75.4 million of debt outstanding under the program. In addition, we incurred interest expense at a variable rate of approximately 0.93% plus a fixed spread during the three months ended February 28, 2009 on the Condensed Consolidated Statement of Operations. This foreign asset-backed securitization program is set to expire on March 18, 2010.

During the first quarter of fiscal year 2005, we entered into an agreement with an unrelated third-party for the factoring of specific trade accounts receivable of a foreign subsidiary. Under the terms of the factoring agreement, we transfer ownership of eligible trade accounts receivable without recourse to the third-party purchaser in exchange for cash. Proceeds on the transfer reflect the face value of the account less a discount. The discount is recorded as a loss on the Condensed Consolidated Statement of Operations in the period of the sale. The factoring agreement expired in October 2008 and was extended for a six month period. The receivables sold pursuant to this factoring agreement are excluded from trade accounts receivable on the Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Condensed Consolidated Statement of Cash Flows. We continue to service, administer and collect the receivables sold under this program. The third-party purchaser has no recourse to our assets for failure of debtors to pay when due. At February 28, 2009, we had sold \$26.7 million of trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, we received cash proceeds of \$26.6 million. The resulting loss on the sale of trade accounts receivable sold under this factoring agreement was \$0.1 million for the three months and six months ended February 28, 2009 and \$0.1 million for the three months and six months ended February 29, 2008.

Notes payable, long-term debt and long-term lease obligations outstanding at February 28, 2009 and August 31, 2008 are summarized below (in thousands).

	February 28, 2009	August 31, 2008
5.875% Senior Notes due 2010 (a)	\$ 298,690	\$ 298,198
8.250% Senior Notes due 2018 (b)	396,568	396,377
Short-term factoring debt (c)		617
Borrowings under credit facilities (d)	62,845	55,579
Borrowings under loans (e)	403,392	423,064
Green Point debt obligations (f)	5,775	24,583
Securitization program obligations (g)	75,383	170,975
Miscellaneous borrowings	11	17
Total notes payable, long-term debt and long-term lease obligations	\$ 1,242,664	\$ 1,369,410
Less current installments of notes payable, long-term debt and long-term lease obligations	172,948	269,937
Notes payable, long-term debt and long-term lease obligations, less current installments	\$ 1,069,716	\$ 1,099,473

Table of Contents

- (a) During the fourth quarter of fiscal year 2003, we issued a total of \$300.0 million, seven-year, 5.875% Senior Notes (the "5.875% Senior Notes") at 99.803% of par, resulting in net proceeds of approximately \$297.2 million. The 5.875% Senior Notes were offered pursuant to our shelf registration statement. The 5.875% Senior Notes mature on July 15, 2010 and pay interest semiannually on January 15 and July 15. We are subject to covenants such as: limitation upon our consolidation, merger or sale; limitation upon our liens; limitation upon our sales and leasebacks; limitation upon our subsidiaries' funded debt; limitation on guarantees given by our subsidiaries for our indebtedness; our corporate existence; reports; and compliance and notice requirements.

In July 2003, we entered into an interest rate swap transaction to effectively convert the fixed interest rate of our 5.875% Senior Notes to a variable rate. The swap, which was to expire in 2010, was accounted for as a fair value hedge under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Certain Hedging Activities* ("SFAS 133"). The notional amount of the swap was \$300.0 million, which is related to the 5.875% Senior Notes. Under the terms of the swap, we paid an interest rate equal to the six-month London Interbank Offered Rate ("LIBOR") set in arrears, plus a fixed spread of 1.945%. In exchange, we received a fixed rate of 5.875%. The swap transaction qualified for the shortcut method of recognition under SFAS 133, therefore no portion of the swap was treated as ineffective. The interest rate swap was terminated on June 3, 2005. The fair value of the interest rate swap of \$4.5 million was recorded in long-term liabilities, with the corresponding offset recorded as a decrease to the carrying value of the 5.875% Senior Notes, on the Condensed Consolidated Balance Sheets at the termination date. In addition, we had recorded \$0.4 million of interest receivable from the issuing bank as of the termination date. Upon termination, we made a net \$4.1 million cash payment to the issuing bank to derecognize the interest rate swap and the accrued interest. The \$4.5 million decrease to the carrying value of the 5.875% Senior Notes on the Condensed Consolidated Balance Sheets will be amortized to operations through interest expense over the remaining term of the debt.

- (b) During the second and third quarters of fiscal year 2008, we completed our offering of \$250.0 million and \$150.0 million, respectively, in aggregate principal amount of 8.250% senior unsecured unregistered notes due March 15, 2018, resulting in net proceeds of approximately \$245.7 million and \$148.5 million, respectively. On June 18, 2008, we commenced an offer to exchange the outstanding unregistered 8.250% Notes for registered 8.250% Notes (collectively the "8.250% Senior Notes") that are substantially identical to the unregistered notes except that the 8.25% Senior Notes are registered under the Securities Act and do not have any transfer restrictions, registration rights or rights to additional special interest. Upon completion of the exchange offer on July 18, 2008, all outstanding unregistered notes were exchanged. The 8.250% Senior Notes were issued pursuant to an Indenture dated as of January 16, 2008, by and between the Company and The Bank of New York Mellon Trust Company, N.A. (formerly known as The Bank of New York Trust Company, N.A.), as trustee (the "Indenture"), as supplemented by the Officers' Certificates dated January 16, 2008 and May 19, 2008, that were delivered by certain of our officers pursuant to Sections 1.2, 3.1 and 3.3 of the Indenture.

The 8.250% Senior Notes will mature on March 15, 2018. Interest on the 8.250% Senior Notes will be payable on March 15 and September 15 of each year, beginning on September 15, 2008. The interest rate payable on the 8.250% Senior Notes is subject to adjustment from time to time if the credit ratings assigned to the 8.250% Senior Notes increase or decrease, as provided in the 8.250% Senior Notes. The 8.250% Senior Notes are our senior unsecured obligations and rank equally with all other existing and future senior unsecured debt obligations.

The Indenture contains certain covenants, including, but not limited to, covenants limiting our ability and/or our subsidiaries' ability to: create certain liens; enter into sale and leaseback transactions; create, incur, issue, assume or guarantee any funded debt (applicable only to our restricted subsidiaries); guarantee any of our indebtedness (applicable only to our subsidiaries); and consolidate or merge with, or convey, transfer or lease all or substantially all of our assets to another person. The Indenture also contains a covenant regarding our repurchase of the 8.250% Senior Notes upon a change of control repurchase event.

During the fourth quarter of fiscal year 2007, we entered into forward interest rate swap transactions to hedge the fixed interest rate payments for an anticipated debt issuance. The swaps are accounted for as a cash flow hedge under SFAS 133. The notional amount of the swaps was \$400.0 million. Concurrently with the pricing of the first \$250.0 million of the 8.250% Senior Notes, we settled \$250.0 million of the swaps by our payment of \$27.5 million. We also settled the remaining \$150.0 million of swaps during the second quarter of fiscal year 2008 by our payment of \$15.6 million. As a result, we settled the amount recognized as a current liability on our Condensed Consolidated Balance Sheets. We also recorded \$0.7 million in interest expense (as ineffectiveness) in the Condensed Consolidated Statement of Operations during the three months ended February 29, 2008, with the remainder recorded in accumulated other comprehensive income, net of taxes, in our Condensed Consolidated Balance Sheets. On May 19, 2008, we issued the remaining \$150.0 million of 8.250% Senior Notes and recorded no additional interest expense (as ineffectiveness) in the Condensed Consolidated Statement of Operations. The effective portion of the swaps remaining on our Condensed Consolidated Balance Sheets will be amortized to interest expense on the Condensed Consolidated Statement of Operations over the life of the 8.250% Senior Notes.

Table of Contents

(c) During the fourth quarter of fiscal year 2007, we entered into an agreement with an unrelated third party (the Purchaser) for the factoring of specific trade accounts receivable of a foreign subsidiary. The factoring of trade accounts receivable under this agreement does not meet the criteria for recognition as a sale in accordance with SFAS 140. Under the terms of the agreement, we transfer ownership of eligible trade accounts receivable to the Purchaser in exchange for cash, however, as the transaction does not qualify as a sale, the relating trade accounts receivable are included in our Condensed Consolidated Balance Sheets until the cash is received by the Purchaser from our customer for the trade accounts receivable. We did not have a liability outstanding on our Condensed Consolidated Balance Sheets at February 28, 2009 related to cash that we have received from the Purchaser for specific trade accounts receivable, but for which our customer has not remitted payment yet.

(d) Various of our foreign subsidiaries have entered into several credit facilities to finance their future growth and any corresponding working capital needs. These credit facilities are denominated in various foreign currencies, including Indian rupees and Japanese yen, as well as U.S. dollars. At February 28, 2009, these credit facilities incur interest at both fixed and variable rates ranging from 2.9% to 6.8% and range in outstanding amounts from \$1.0 million to \$48.5 million.

(e) During the second quarter of fiscal year 2007, we entered into a three-year loan agreement to borrow \$20.3 million from a software vendor in connection with various software licenses that we purchased from them. The software licenses were capitalized and are being amortized over a three-year period. The loan agreement is non-interest bearing and payments are due quarterly through October 2009. At February 28, 2009, \$5.1 million is outstanding under this loan agreement.

During the third quarter of fiscal year 2005, we negotiated a five-year, 400.0 million Indian rupee construction loan for an Indian subsidiary with an Indian branch of a global bank. Under the terms of the loan, we pay interest on outstanding borrowings based on a fixed rate of 7.45%. The construction loan expires on April 15, 2010 and all outstanding borrowings are then due and payable. The 400.0 million Indian rupee principal outstanding is equivalent to approximately \$7.8 million based on currency exchange rates at February 28, 2009.

During the third quarter of fiscal year 2005, we negotiated a five-year, 25.0 million Euro construction loan for a Hungarian subsidiary with a Hungarian branch of a global bank. Under the terms of the loan facility, we pay interest on outstanding borrowings based on the Euro Interbank Offered Rate plus a spread of 0.925%. Quarterly principal repayments began in September 2006 to repay the amount of proceeds drawn under the construction loan. The construction loan expires on April 13, 2010. At February 28, 2009, borrowings of 7.2 million Euros (approximately \$9.1 million based on currency exchange rates at February 28, 2009) were outstanding under the construction loan.

During the fourth quarter of fiscal year 2007, we entered into the five-year revolving Credit Facility. This agreement provides for a revolving credit portion in the initial amount of \$800.0 million, subject to potential increases up to \$1.0 billion, and provides for a term portion in the amount of \$400.0 million. Some or all of the lenders under the Credit Facility and their affiliates have various other relationships with us and our subsidiaries involving the provision of financial services, including cash management, loans, letter of credit and bank guarantee facilities, investment banking and trust services. We, along with some of our subsidiaries, have entered into foreign exchange contracts and other derivative arrangements with certain of the lenders and their affiliates. In addition, many, if not most, of the agents and lenders under the Credit Facility held positions as agent and/or lender under our old revolving credit facility and the Bridge Facility. The revolving credit portion of the Credit Facility terminates on July 19, 2012, and the term loan portion of the Credit Facility requires payments of principal in annual installments of \$20.0 million each, with a final payment of the remaining principal due on July 19, 2012. Interest and fees on Credit Facility advances are based on our unsecured long-term indebtedness rating as determined by S&P and Moody's. Interest is charged at a rate equal to either 0% to 0.75% above the base rate or 0.375% to 1.75% above the Eurocurrency rate, where the base rate represents the greater of Citibank, N.A.'s prime rate or 0.50% above the federal funds rate, and the Eurocurrency rate represents the applicable London Interbank Offered Rate, each as more fully defined in this credit agreement. Fees include a facility fee based on the revolving credit commitments of the lenders, a letter of credit fee based on the amount of outstanding letters of credit, and a utilization fee to be added to the revolving credit interest rate and any letter of credit fee during any period when the aggregate amount of outstanding advances and letters of credit exceeds 50% of the total revolving credit commitments of the lenders. Based on our current senior unsecured long-term indebtedness rating as determined by S&P and Moody's, the current rate of interest (including the applicable facility and utilization fee) on a full draw under the revolving credit would be 0.275% above the base rate or 0.875% above the Eurocurrency rate, and the current rate of interest on the term portion would be the base rate or 0.875% above the Eurocurrency rate. We, along with our subsidiaries, are subject to the following financial covenants: (1) a maximum ratio of (a) Debt (as defined in the credit agreement) to (b) Consolidated EBITDA (as defined in the credit agreement) and (2) a minimum

Table of Contents

ratio of (a) Consolidated EBITDA to (b) interest payable on, and amortization of debt discount in respect of, Debt and loss on sales of trade accounts receivables pursuant to our securitization program. In addition, we are subject to other covenants, such as: limitation upon liens; limitation upon mergers, etc; limitation upon accounting changes; limitation upon subsidiary debt; limitation upon sales, etc of assets; limitation upon changes in nature of business; payment restrictions affecting subsidiaries; compliance with laws, etc; payment of taxes, etc; maintenance of insurance; preservation of corporate existence, etc; visitation rights; keeping of books; maintenance of properties, etc; transactions with affiliates; and reporting requirements. During the second quarter of fiscal year 2009, we borrowed \$860.0 million against the revolving credit portion of the Credit Facility. These borrowings were repaid in full during the second quarter. A draw in the amount of \$400.0 million has been made under the term portion of the Credit Facility and \$380.0 million remains outstanding at February 28, 2009.

In addition to the loans described above, at February 28, 2009 we have additional loans outstanding to fund working capital needs. These additional loans total approximately \$1.3 million and are denominated in Euros. The loans are due and payable within 12 months and are classified as short term on the Condensed Consolidated Balance Sheets.

- (f) Through the acquisition of Green Point we assumed certain liabilities, including short and long term debt obligations totaling approximately \$102.2 million at the date of acquisition. At February 28, 2009 approximately \$0.9 million of debt is outstanding under these short term facilities, with a current interest of 3.4%. The long term debt obligations include mortgage and credit facilities with various banks in Taiwan and China. At February 28, 2009, approximately \$0.5 million of fixed assets, including buildings and land, were pledged as collateral on the mortgage facility outstanding. The long term facilities are denominated in U.S. dollars and New Taiwan dollars, and incur interest at both fixed rates and rates that fluctuate based upon changes in various base interest rates. At February 28, 2009, approximately \$4.9 million of debt is outstanding under the long term facilities, with current interest rates ranging from 2.4% to 3.4%. Approximately \$0.1 million of this total is due and payable within 12 months and is classified as short term on the Condensed Consolidated Balance Sheets. The remaining \$4.8 million will mature at various dates through July 2012 and is classified as long term on the Condensed Consolidated Balance Sheets.
- (g) On April 7, 2008, we entered into a foreign asset-backed securitization program with a bank conduit. In connection with the foreign securitization program certain of our foreign subsidiaries sell, on an ongoing basis, an undivided interest in designated pools of trade accounts receivable to a special purpose entity, which in turn borrows up to \$200.0 million from the bank conduit to purchase those receivables and in which it grants security interests as collateral for the borrowings. The securitization program is accounted for as a borrowing under SFAS 140. The loan balance is calculated based on the terms of the securitization program agreements. The foreign securitization program requires compliance with several covenants including a limitation on certain corporate actions such as mergers, consolidations and sale of substantially all assets. We pay interest at designated commercial paper rates plus a spread. The foreign securitization program was to expire on April 6, 2009. At February 28, 2009, we had \$75.4 million of debt outstanding under the program. In addition, we incurred interest expense at a variable rate of approximately 0.93% plus a fixed spread during the three months ended February 28, 2009 in our Condensed Consolidated Statement of Operations. See Note 15 Subsequent Events to the Condensed Consolidated Financial Statements for the amendment of our foreign securitization program subsequent to February 28, 2009 to extend the program to March 18, 2010.

At February 28, 2009, our principal sources of liquidity consisted of cash, available borrowings under our credit facilities and our asset-backed securitization programs.

Our working capital requirements and capital expenditures could continue to increase in order to support future expansions of our operations through construction of greenfield operations or acquisitions. It is possible that future expansions may be significant and may require the payment of cash. Future liquidity needs will also depend on fluctuations in levels of inventory and shipments, changes in customer order volumes and timing of expenditures for new equipment.

We currently anticipate that during the next twelve months, our capital expenditures will be in the range of \$130.0 million to \$160.0 million, principally for machinery and equipment and for information technology infrastructure upgrades. We believe that our level of resources, which include cash on hand, available borrowings under our revolving credit facilities, additional proceeds available under our accounts receivable securitization program and funds provided by operations, will be adequate to fund these capital expenditures, the payment of any declared quarterly dividends, payments for current and future restructuring activities, and our working capital requirements for the next twelve months.

Should we desire to consummate significant additional acquisition opportunities or undertake significant additional expansion activities, our capital needs would increase and could possibly result in our need to increase available borrowings under our revolving credit facilities or access public or private debt and equity markets. There can be no assurance, however, that we would be successful in raising additional debt or equity

on terms that we would consider acceptable.

Table of Contents

Our contractual obligations for short and long-term debt arrangements, future interest on notes payable and long-term debt, future minimum lease payments under non-cancelable operating lease arrangements estimated future benefit plan payments and capital commitments as of February 28, 2009 are summarized below. We do not participate in, or secure financing for, any unconsolidated limited purpose entities. We generally do not enter into non-cancelable purchase orders for materials until we receive a corresponding purchase commitment from our customer. Non-cancelable purchase orders do not typically extend beyond the normal lead time of several weeks at most. Purchase orders beyond this time frame are typically cancelable.

	Total	Payments due by period (in thousands)			After 5 years
		Less than 1 year	1-3 years	4-5 years	
Contractual Obligations					
Notes payable, long-term debt and long-term lease obligations	\$ 1,242,664	\$ 172,948	\$ 353,150	\$ 320,000	\$ 396,566
Future interest on notes payable and long-term debt	356,784	61,091	90,502	69,983	135,208
Operating lease obligations	207,920	51,909	66,074	43,884	46,053
Estimated future benefit plan payments	64,565	5,440	10,867	13,199	35,059
Capital commitments (a)					
Total contractual cash obligations (b)	\$ 1,871,933	\$ 291,388	\$ 520,593	\$ 447,066	\$ 612,886

- (a) During the first fiscal quarter of 2009, the Company committed \$10.0 million to an independent private equity limited partnership which invests in companies that address resource limits in energy, water and materials (commonly referred to as the CleanTech sector). Of that amount, the Company has invested \$2.0 million at February 28, 2009. The remaining commitment of \$8.0 million is callable over the next five years by the general partner. As the timing of capital calls have no specified dates, this commitment has been excluded from the above table as we cannot currently determine when such commitment calls will occur.
- (b) At February 28, 2009, we have \$2.9 million recorded as a current liability for uncertain tax positions under FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109* (FIN 48). We are not able to reasonably estimate the timing of long-term payments, or the amount by which our liability will increase or decrease over time; therefore, the long-term portion of our FIN 48 liability of \$83.9 million has not been included in the contractual obligations table.

Item 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
Foreign Currency Exchange Risks

We transact business in various foreign countries and are, therefore, subject to risk of foreign currency exchange rate fluctuations. We enter into forward contracts to economically hedge transactional exposure associated with commitments arising from trade accounts receivable, trade accounts payable and fixed purchase obligations denominated in a currency other than the functional currency of the respective operating entity. All derivative instruments are recorded on the Condensed Consolidated Balance Sheets at their respective fair market values in accordance with SFAS 133. We have elected not to prepare and maintain the documentation required for the transaction to qualify as an accounting hedge and, therefore, changes in fair value are recorded in the Condensed Consolidated Statement of Operations.

The aggregate notional amount of outstanding contracts at February 28, 2009 was \$1.3 billion. The fair value of these contracts amounted to a \$24.4 million asset recorded in prepaid and other current assets and a \$14.5 million liability recorded in accrued expenses on the Condensed Consolidated Balance Sheets. The forward contracts will generally expire in less than four months, with five months being the maximum term of the contracts outstanding at February 28, 2009. Upon expiration of the contracts, the change in fair value will be reflected in cost of revenue on the Condensed Consolidated Statement of Operations. The forward contracts are denominated in British pounds, Chinese yuan renminbi, Euro dollars, Hungarian forints, Japanese yen, Malaysian ringgits, Mexican pesos, Singapore dollars, Taiwanese dollars and U.S. dollars.

Interest Rate Risk

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

A portion of our exposure to market risk for changes in interest rates relates to our domestic investment portfolio. We do not use derivative financial instruments in our investment portfolio. We place cash and cash equivalents with various major financial institutions. We protect our invested principal funds by limiting default risk, market risk and reinvestment

Table of Contents

risk. We mitigate default risk by generally investing in investment grade securities and by frequently positioning the portfolio to try to respond appropriately to a reduction in credit rating of any investment issuer, guarantor or depository to levels below the credit ratings dictated by our investment policy. The portfolio typically includes only marketable securities with active secondary or resale markets to ensure portfolio liquidity. At February 28, 2009, there were no significant outstanding investments.

We pay interest on several of our outstanding borrowings at interest rates that fluctuate based upon changes in various base interest rates. There were \$528.2 million in borrowings outstanding under these facilities at February 28, 2009. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources and Note 11—Notes Payable, Long-Term Debt and Long-Term Lease Obligations to the Condensed Consolidated Financial Statements for additional information regarding our outstanding debt obligations.

In the second quarter of fiscal year 2009, we entered into an interest rate swap related to \$100.0 million of our variable rate debt. The swap is accounted for as a cash flow hedge under SFAS 133. The interest rate swap transaction effectively locks in a fixed interest rate of 88.25 basis points for variable rate interest payments that are expected to be made from January 28, 2009 through January 28, 2010. Under the terms of the swap, we will pay a fixed rate and will receive a variable rate based on the one month USD LIBOR rate plus a credit spread.

Item 4: CONTROLS AND PROCEDURES **Evaluation of Disclosure Controls and Procedures**

We carried out an evaluation required by Rules 13a-15 and 15d-15 under the Exchange Act (the Evaluation), under the supervision and with the participation of our President and Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15 and 15d-15 under the Exchange Act (Disclosure Controls) as of February 28, 2009. Based on the Evaluation, our CEO and CFO concluded that the design and operation of our Disclosure Controls were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) accumulated and communicated to our senior management, including our CEO and CFO, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

For our fiscal quarter ended February 28, 2009, we did not identify any modifications to our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our internal control over financial reporting, including our internal control documentation and testing efforts, remain ongoing to ensure continued compliance with the Exchange Act. For our fiscal quarter ended February 28, 2009, we identified certain internal controls that management believed should be modified to improve them. These improvements include further formalization of policies and procedures, improved segregation of duties, additional information technology system controls and additional monitoring controls. We are making improvements to our internal control over financial reporting as a result of our review efforts. We have reached our conclusions set forth above, notwithstanding those improvements and modifications.

Limitations on the Effectiveness of Controls and Other Matters

Our management, including our CEO and CFO, does not expect that our Disclosure Controls and internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls may be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

Notwithstanding the foregoing limitations on the effectiveness of controls, we have nonetheless reached the conclusions set forth above on our disclosure controls and procedures and our internal control over financial reporting.

On October 17, 2007, we entered into an agreement to acquire certain manufacturing operations of NSN. The scope of our evaluation of internal control over financial reporting as of February 28, 2009 did not include the internal control over financial reporting of the acquired operations of NSN. NSN is included in our condensed consolidated financial statements beginning in November 2007. As part of our integration of NSN, we continue to evaluate NSN's internal control over financial reporting and address controls that we note need improvement. From the date that we purchased the manufacturing operations of NSN to February 28, 2009, the processes and systems of NSN's acquired operations were discrete and did not significantly impact our internal control over financial reporting.

CEO and CFO Certifications

Exhibits 31.1 and 31.2 are the Certifications of the CEO and the CFO, respectively. The Certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 (the "Section 302 Certifications"). This Item of this report, which you are currently reading is the information concerning the Evaluation referred to in the Section 302 Certifications and this information should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

PART II. OTHER INFORMATION

Item 1: LEGAL PROCEEDINGS

As more fully described in Part I, Item 3, "Legal Proceedings," of our Annual Report on Form 10-K for the fiscal year ended August 31, 2008, we are involved in certain ongoing litigation matters and have received a subpoena from a U.S. attorney's office relating to certain of our historical stock option grant practices, and we have also had committees of our Board of Directors review certain of our historical stock option grant and revenue recognition practices. For further discussion, see Part I, Item 3, "Legal Proceedings," of our Annual Report on Form 10-K for the fiscal year ended August 31, 2008 and Note 6 "Commitments and Contingencies" to the Condensed Consolidated Financial Statements of this quarterly report on Form 10-Q.

On January 26, 2009, the U.S. District Court for the Middle District of Florida, Tampa Division dismissed with prejudice the Second Amended Class Action Complaint in the putative shareholder class action that was previously filed against us, KPMG LLP, our directors and certain of our current and former officers. The plaintiffs appealed this dismissal on February 20, 2009. We believe that the Second Amended Class Action Complaint is without merit and are currently awaiting the court's ruling on the plaintiffs' appeal. We will continue to vigorously defend the action, although no assurance can be given as to the ultimate outcome of any such further proceedings.

We are party to certain other lawsuits in the ordinary course of business. We do not believe that these proceedings, individually or in the aggregate, will have a material adverse effect on our financial position, results of operations or cash flows.

Item 1A: Risk Factors

As referenced, this Quarterly Report on Form 10-Q includes certain forward-looking statements regarding various matters. The ultimate correctness of those forward-looking statements is dependent upon a number of known and unknown risks and events, and is subject to various uncertainties and other factors that may cause our actual results, performance or achievements to be different from those expressed or implied by those statements. Undue reliance should not be placed on those forward-looking statements. The following important factors, among others, as well as those factors set forth in our other SEC filings from time to time, could affect future results and events, causing results and events to differ materially from those expressed or implied in our forward-looking statements.

Our operating results may fluctuate due to a number of factors, many of which are beyond our control.

Our annual and quarterly operating results are affected by a number of factors, including:

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

adverse changes in current macro-economic conditions, both in the U.S. and internationally;

the level and timing of customer orders;

the level of capacity utilization of our manufacturing facilities and associated fixed costs;

the composition of the costs of revenue between materials, labor and manufacturing overhead;

price competition;

Table of Contents

changes in demand for our products or services;

changes in demand in our customers' end markets;

our level of experience in manufacturing a particular product;

the degree of automation used in our assembly process;

the efficiencies achieved in managing inventories and fixed assets;

fluctuations in materials costs and availability of materials;

adverse changes in political conditions, both in the U.S. and internationally, including among other things, adverse changes in tax laws and rates, adverse changes in trade policies and adverse changes in fiscal and monetary policies;

seasonality in customers' product requirements; and

the timing of expenditures in anticipation of increased sales, customer product delivery requirements and shortages of components or labor.

The volume and timing of orders placed by our customers vary due to variation in demand for our customers' products; our customers' attempts to manage their inventory; electronic design changes; changes in our customers' manufacturing strategies; and acquisitions of or consolidations among our customers. In addition, our Consumer division and the automotive industry sector of our EMS division are subject to seasonal influences. We may realize greater revenue during our first fiscal quarter due to high demand for consumer products during the holiday selling season. In the past, changes in customer orders that reduce net revenue have had a significant effect on our results of operations as a result of our overhead remaining relatively fixed while our net revenue decreased. Any one or a combination of these factors could adversely affect our annual and quarterly results of operations in the future. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations.

Because we depend on a limited number of customers, a reduction in sales to any one of our customers could cause a significant decline in our revenue.

For the six months ended February 28, 2009, our five largest customers accounted for approximately 42% of our net revenue and 50 customers accounted for approximately 90% of our net revenue. We currently depend, and expect to continue to depend, upon a relatively small number of customers for a significant percentage of our net revenue and upon their growth, viability and financial stability. If any of our customers experience a decline in the demand for their products due to economic or other forces, they may reduce their purchases from us or terminate their relationship with us. Our customers' industries have experienced rapid technological change, shortening of product life cycles, consolidation, and pricing and margin pressures. Consolidation among our customers may further reduce the number of customers that generate a significant percentage of our net revenue and exposes us to increased risks relating to dependence on a small number of customers. A significant reduction in sales to any of our customers or a customer exerting significant pricing and margin pressures on us could have a material adverse effect on our results of operations. In the past, some of our customers have terminated their manufacturing arrangements with us or have significantly reduced or delayed the volume of design, production, product management or aftermarket services ordered from us.

Our industry's revenue declined in mid-2001 as a result of significant cut backs in customer production requirements, which was consistent with the overall global economic downturn. A similar decline has recently occurred as consumers and businesses have postponed spending in response to tighter credit, negative financial news, declines in income or asset values or general uncertainty about global economic conditions. These economic conditions have had a negative impact on our results of operations during fiscal year 2009 due to reduced customer demand. In

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

addition, some of our customers have moved a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity and are expected to continue to have a negative impact on our operations over at least the next several fiscal quarters. We cannot assure you that present or future customers will not terminate their design, production, product management and aftermarket services arrangements with us or significantly change, reduce or delay the amount of services ordered from us. If they do, it could have a material adverse effect on our results of operations. In addition, we generate significant accounts receivable in connection with providing design, production, product management and aftermarket services to our customers. If one or more of our customers were to become insolvent or otherwise were unable to pay for the services provided by us on a timely basis, or at all, our operating results and financial condition could be adversely affected. Such adverse effects could include one or more of the following: a decline in revenue, a charge for bad debts, a charge for inventory write-offs, a decrease in inventory turns, an increase in days in inventory and an increase in days in trade accounts receivable. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents

Certain of the industries to which we provide services, including the automobile industry, have recently experienced significant financial difficulty, with some of the participants filing for bankruptcy. Such significant financial difficulty has negatively affected our business and, if further experienced by one or more of our customers, may further negatively affect our business due to the decreased demand of these financially distressed customers, the potential inability of these companies to make full payment on amounts owed to us, or both.

Consolidation in industries that utilize electronics components may adversely affect our business.

Consolidation in industries that utilize electronics components may further increase as companies combine to achieve further economies of scale and other synergies, which could result in an increase in excess manufacturing capacity as companies seek to divest manufacturing operations or eliminate duplicative product lines. Excess manufacturing capacity may increase pricing and competitive pressures for our industry as a whole and for us in particular. Consolidation could also result in an increasing number of very large companies offering products in multiple industries. The significant purchasing power and market power of these large companies could increase pricing and competitive pressures for us. If one of our customers is acquired by another company that does not rely on us to provide services and has its own production facilities or relies on another provider of similar services, we may lose that customer's business. Such consolidation among our customers may further reduce the number of customers that generate a significant percentage of our net revenue and exposes us to increased risks relating to dependence on a small number of customers. Any of the foregoing results of industry consolidation could adversely affect our business.

Our customers face numerous competitive challenges, such as decreasing demand from their customers, rapid technological change and short life cycles for their products, which may materially adversely affect their business, and also ours.

Factors affecting the industries that utilize electronics components in general, and our customers specifically, could seriously harm our customers and, as a result, us. These factors include:

Recessionary periods in our customers' markets;

The inability of our customers to adapt to rapidly changing technology and evolving industry standards, which result in short product life cycles;

The inability of our customers to develop and market their products, some of which are new and untested, the potential that our customers' products may become obsolete or the failure of our customers' products to gain widespread commercial acceptance;

Increased competition among our customers and their respective competitors which may result in a loss of business, or a reduction in pricing power, for our customers; and

New product offerings by our customers' competitors may prove to be more successful than our customers' product offerings. If our customers are unsuccessful in addressing these competitive challenges, or any others that they may face, then their business may be materially adversely affected, and as a result, the demand for our services could decline. Even if our customers are successful in responding to these challenges, their responses may have consequences which affect our business relationships with our customers (and possibly our results of operations) by altering our production cycles and inventory management.

The success of our business is dependent on both our ability to independently keep pace with technological changes and competitive conditions in our industry, and also our ability to effectively adapt our services in response to our customers keeping pace with technological changes and competitive conditions in their respective industries.

If we are unable to offer technologically advanced, cost effective, quick response manufacturing services, demand for our services will decline. In addition, if we are unable to offer services in response to our customers' changing requirements, then demand for our services will also decline. A substantial portion of our net revenue is derived from our offering of complete service solutions for our customers. For example, if we fail to maintain high-quality design and engineering services, our net revenue may significantly decline.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Most of our customers do not commit to long-term production schedules, which makes it difficult for us to schedule production and achieve maximum efficiency of our manufacturing capacity.

The volume and timing of sales to our customers may vary due to:

variation in demand for our customers' products;

Table of Contents

our customers' attempts to manage their inventory;

electronic design changes;

changes in our customers' manufacturing strategy; and

acquisitions of or consolidations among customers.

Due in part to these factors, most of our customers do not commit to firm production schedules for more than one quarter in advance. Our inability to forecast the level of customer orders with certainty makes it difficult to schedule production and maximize utilization of manufacturing capacity. In the past, we have been required to increase staffing and other expenses in order to meet the anticipated demand of our customers. Anticipated orders from many of our customers have, in the past, failed to materialize or delivery schedules have been deferred as a result of changes in our customers' business needs, thereby adversely affecting our results of operations. On other occasions, our customers have required rapid increases in production, which have placed an excessive burden on our resources. Such customer order fluctuations and deferrals have had a material adverse effect on us in the past, including the most recent several fiscal quarters, and we may experience such effects in the future. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

Our customers may cancel their orders, change production quantities, delay production or change their sourcing strategy.

Our industry must provide increasingly rapid product turnaround for its customers. We generally do not obtain firm, long-term purchase commitments from our customers and we continue to experience reduced lead-times in customer orders. Customers have previously cancelled their orders, changed production quantities, delayed production and changed their sourcing strategy for a number of reasons, and may do one or more of these in the future. Such changes, delays and cancellations have led to, and may lead in the future to a decline in our production and our possession of excess or obsolete inventory which we may not be able to sell to the customer or a third party. This has resulted in a, and could result in a future additional, write down of inventories that have become obsolete or exceed anticipated demand or net realizable value.

The success of our customers' products in the market affects our business. Cancellations, reductions, delays or changes in sourcing strategy by a significant customer or by a group of customers have negatively impacted, and could further negatively impact in the future, our operating results by reducing the number of products that we sell, delaying the payment to us for inventory that we purchased and reducing the use of our manufacturing facilities which have associated fixed costs not dependent on our level of revenue.

In addition, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, component procurement commitments, personnel needs and other resource requirements, based on our estimate of customer requirements. The short-term nature of our customers' commitments, their uncertainty about future economic conditions, and the possibility of rapid changes in demand for their products reduce our ability to accurately estimate the future requirements of those customers. In addition, uncertainty about future economic conditions makes it difficult to forecast operating results and make production planning decisions about future periods.

On occasion, customers may require rapid increases in production, which can stress our resources and reduce operating margins. In addition, because many of our costs and operating expenses are relatively fixed, a reduction in customer demand can harm our gross profits and operating results.

The gross domestic product for the U.S., Europe and certain countries in Asia has declined, indicating that many of these countries economies, including the U.S. economy, are in a recession.

There has been a continuing erosion of global consumer confidence amidst concerns over declining asset values, inflation, volatility in energy costs, geopolitical issues, the availability and cost of credit, rising unemployment, and the stability and solvency of financial institutions, financial markets, businesses, and sovereign nations. These concerns have slowed global economic growth and have resulted in recessions in many countries, including in the U.S., Europe and certain countries in Asia. In mid-2001, an overall global economic downturn resulted in a decline in demand for our customers' products which had a negative impact on our results of operations (as well as our overall industry's results of operations). Recent economic conditions have had a negative impact on our results of operations during fiscal year 2009 due to reduced customer demand which is expected to continue for the next several fiscal quarters. If these economic conditions continue to persist or worsen, a number of negative effects on our business could result, including customers or potential customers reducing or delaying orders, the insolvency of key suppliers, which could result in production delays, the inability of customers to obtain credit, and the insolvency of one or more customers.

Table of Contents

These economic conditions could negatively impact our ability to effectively manage inventory levels and collect receivables, increase our need for cash, and have decreased our net revenue and profitability. Depending on the length of time that these conditions exist, they may lead to future additional negative effects, including some of those listed above. In addition, the value of certain of our properties and other assets has been negatively impacted, and may be further impacted in the future.

The financial markets have recently experienced significant turmoil.

The credit market turmoil could negatively impact the counterparties to our interest rate swap agreements and our forward exchange contracts, our lenders under the Credit Facility, as well as lenders under various foreign subsidiary credit facilities, and our securitization programs and thus potentially limit our ability to borrow under the Credit Facility and various foreign subsidiary credit facilities. In addition, if we attempt to obtain future additional financing, the credit market turmoil could negatively impact our ability to obtain such financing. Finally, the credit market turmoil has negatively impacted certain of our customers, especially those in the automotive industry, and certain of their customers. These impacts could have several consequences which could have a negative effect on our results of operations, including one or more of the following: a negative impact on our liquidity; a decrease in demand for our products; and a decrease in demand for our customers' products.

We are exposed to intangible asset risk; specifically, our goodwill may become further impaired.

As of the date of the filing of our Quarterly Report on Form 10-Q for the second quarter of fiscal 2009, we determined that goodwill related to the Consumer and EMS reporting units was impaired and recorded non-cash goodwill impairment charges of \$400.4 million for the Consumer reporting unit and a preliminary non-cash goodwill impairment charge of \$622.4 million for the EMS reporting unit for the six months ended February 28, 2009, respectively. We recorded the charge for the Consumer reporting unit based on a preliminary assessment which was determined in the first quarter of fiscal year 2009 and which was finalized in the second quarter of fiscal year 2009, and we recorded the charge for the EMS reporting unit based on a preliminary assessment which was determined in the second quarter of fiscal year 2009. We recorded the non-cash goodwill impairment charge for the EMS reporting unit based on a preliminary assessment because we continue to evaluate the valuations of tangible and intangible assets and the allocation of fair value to all of the EMS reporting unit's assets and liabilities other than goodwill. We currently expect to complete the goodwill analysis in the third quarter of fiscal year 2009. In addition, a further significant and sustained decline in our stock price and market capitalization, a significant decline in our expected future cash flows, a significant adverse change in the business climate or slower growth rates could result in the need to perform an impairment analysis under SFAS 142 in future periods. If we were to conclude that a future write down of our goodwill is necessary, then we would record the appropriate charge, which could result in material charges that are adverse to our operating results and financial position. See Note 8 Goodwill and Other Intangible Assets to the Condensed Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Long-Lived Assets.

We are involved in reviews of our historical stock option grant practices.

As described in Part I, Item 3 Legal Proceedings, of our Annual Report on Form 10-K for the fiscal year ended August 31, 2008 and Part II, Item 1 Legal Proceedings of this Quarterly Report on Form 10-Q, we are involved in a putative shareholder class action in connection with certain historical stock option grants.

In response to shareholder derivative actions that also were filed in connection with these certain grants, an independent Special Committee of our Board of Directors (the Special Committee) was appointed to review the allegations in such actions. We cooperated fully with the Special Committee. The Special Committee concluded that the evidence does not support a finding of intentional manipulation of stock option grant pricing by any member of management. In addition, the Special Committee concluded that it was not in our best interests to pursue the derivative actions. The Special Committee identified certain factors related to our controls surrounding the process of accounting for option grants that contributed to the accounting errors that led to the restatement of our consolidated operations for certain of our previous fiscal years (as further described in the Explanatory Note immediately preceding Part I of our Annual Report on Form 10-K for the fiscal year ended August 31, 2006 and discussed below). Pursuant to the state court's approval on April 7, 2008, and the federal court's approval on April 25, 2008, of our proposed settlement of the derivative actions, these actions are no longer pending.

In May 2006 we received a subpoena from the U.S. Attorney's office for the Southern District of New York requesting certain stock option related material. Such information was subsequently provided and we did not hear further from such U.S. Attorney's office. The investigation of the U.S. Attorney's office may look at the accuracy of the stated dates of our historical option grants, our disclosures regarding executive compensation, whether all proper corporate and other procedures were followed, whether our historical financial statements are materially accurate and other issues. We cannot predict the outcome of that investigation. Regardless of the outcome of the investigation, we will continue to incur costs and the investigation will

Table of Contents

cause a diversion of our management's time and attention, which could have an adverse effect on our financial condition and results of operations. We cannot provide assurances that such investigation will not find inappropriate activity in connection with our historical stock option practices or result in further revising of our historical accounting associated with such stock option grant practices.

The matters relating to the Special Committee's review of our historical stock option granting practices and the restatement of our Consolidated Financial Statements have resulted in expanded litigation and regulatory proceedings against us and may result in future litigation, which could have a material adverse effect on us.

On May 3, 2006, the Board of Directors established the Special Committee to conduct a review of our historical stock option granting practices during fiscal years 1996 through 2006. As a result of that review and management's undertaking of a separate review of our historical stock option grant practices, we identified a number of occasions in which stock option awards that were granted to officers, employees and a non-employee consultant director were not properly accounted for. To correct these accounting errors, we restated prior year and prior quarter Consolidated Financial Statements and disclosures in our Annual Report on Form 10-K for the fiscal year ended August 31, 2006. The review of our historical stock option granting practices and the resulting restatements, required us to incur substantial expenses for legal, accounting, tax and other professional services and diverted our management's attention from our business and could in the future adversely affect our business, financial condition, results of operations and cash flows.

Our historical stock option granting practices and the restatement of our prior financial statements exposed us to greater risks associated with litigation and regulatory proceedings. As described in Part I, Item 3 – Legal Proceedings, of our Annual Report on Form 10-K for the fiscal year ended August 31, 2008 and Part II, Item 1 – Legal Proceedings of this Quarterly Report on Form 10-Q, we are parties to several lawsuits containing allegations relating to stock option grants. We cannot assure you that any determinations made in the current litigation or any future litigation or regulatory action will reach the same conclusions on these issues that we reached. The conduct and resolution of these matters may continue to be time consuming, expensive and distracting from the conduct of our business. Furthermore, if we are subject to adverse findings in any of these matters, we could be required to pay damages or penalties or have other remedies imposed upon us which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our business could be adversely affected by any delays, or increased costs, resulting from issues that our common carriers are dealing with in transporting our materials, our products, or both.

We rely on a variety of common carriers to transport our materials from our suppliers to us, and to transport our products from us to our customers. Problems suffered by any of these common carriers, whether due to a natural disaster, labor problem, increased energy prices or some other issue, could result in shipping delays, increased costs, or some other supply chain disruption, and could therefore have a material adverse effect on our operations.

We compete with numerous other electronic manufacturing services and design providers and others, including our current and potential customers who may decide to manufacture all of their products internally.

Our business is highly competitive. We compete against numerous domestic and foreign electronic manufacturing services and design providers, including Benchmark Electronics, Inc., Celestica, Inc., Elcoteq SE, Flextronics International Ltd., Hon-Hai Precision Industry Co., Ltd., Plexus Corp. and Sanmina-SCI Corporation. In addition, we may in the future encounter competition from other large electronic manufacturers, and manufacturers that are focused solely on design and manufacturing services, that are selling, or may begin to sell electronics manufacturing services. Most of our competitors have international operations, significant financial resources and some have substantially greater manufacturing, R&D and marketing resources than us. These competitors may:

respond more quickly to new or emerging technologies;

have greater name recognition, critical mass and geographic market presence;

be better able to take advantage of acquisition opportunities;

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

adapt more quickly to changes in customer requirements;

devote greater resources to the development, promotion and sale of their services;

be better positioned to compete on price for their services, as a result of any combination of lower labor costs, lower components costs, lower facilities costs or lower operating costs; and

be better able to utilize excess capacity which may reduce the cost of their product or service.

We also face competition from the manufacturing operations of our current and potential customers, who are continually evaluating the merits of manufacturing products internally against the advantages of outsourcing. Recently, some

Table of Contents

of our customers have moved a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity. In addition, consolidation in our industry results in larger and more geographically diverse competitors who have significant combined resources with which to compete against us. See **Business Competition** in our Annual Report on Form 10-K for the fiscal year ended August 31, 2008.

We may be operating at a cost disadvantage compared to competitors who have greater direct buying power from component suppliers, distributors and raw material suppliers or who have lower cost structures as a result of their geographic location or the services they provide or who are willing to make sales or provide services at lower margins than us. As a result, competitors may procure a competitive advantage and obtain business from our customers. Our manufacturing processes are generally not subject to significant proprietary protection. In addition, companies with greater resources or a greater market presence may enter our market or increase their competition with us. We also expect our competitors to continue to improve the performance of their current products or services, to reduce their current products or service sales prices and to introduce new products or services that may offer greater performance and improved pricing. Any of these developments could cause a decline in sales, loss of market acceptance of our products or services, profit margin compression or loss of market share.

We derive a substantial portion of our revenue from our international operations, which may be subject to a number of risks and often require more management time and expense to achieve profitability than our domestic operations.

We derived 82.8% and 83.4% of net revenue from international operations for the three months and six months ended February 28, 2009, compared to 79.2% and 80.6% for the three months and six months ended February 29, 2008. We currently expect our foreign source revenue to slightly increase as compared to current levels over the course of the next twelve months. We currently operate outside the U.S. in Vienna, Austria; Hasselt, Belgium; Belo Horizonte, Manaus, Sao Paulo and Sorocaba, Brazil; Beijing, Huangpu, Nanjing, Shanghai, Shenzhen, Suzhou, Tianjin, Wuxi and Yantai, China; Coventry, England; Brest, Lunel and Meung-sur-Loire, France; Jena, Germany; Szombathely and Tiszaujvaros, Hungary; Chennai, Pune and Ranjangaon, India; Cassina de Pecchi, Marcianise and Bergamo, Italy; Gotemba and Tokyo, Japan; Penang, Malaysia; Chihuahua, Guadalajara and Reynosa, Mexico; Amsterdam, The Netherlands; Bydgoszcz and Kwidzyn, Poland; Ayr and Livingston, Scotland; Singapore City, Singapore; Taichung and Taipei, Taiwan; Uzhgorod, Ukraine and Ho Chi Minh City, Vietnam. We continually consider additional opportunities to make foreign acquisitions and construct new foreign facilities. Our international operations may be subject to a number of risks, including:

difficulties in staffing and managing foreign operations;

less flexible employee relationships which can be difficult and expensive to terminate;

labor unrest;

political and economic instability (including acts of terrorism and outbreaks of war);

inadequate infrastructure for our operations (i.e. lack of adequate power, water, transportation and raw materials);

coordinating our communications and logistics across geographic distances and multiple time zones;

risk of governmental expropriation of our property;

less favorable, or relatively undefined, intellectual property laws;

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

unexpected changes in regulatory requirements and laws;

longer customer payment cycles and difficulty collecting trade accounts receivable;

export duties, import controls and trade barriers (including quotas);

adverse trade policies, and adverse changes to any of the policies of either the U.S. or any of the foreign jurisdictions in which we operate;

adverse changes in tax rates;

legal or political constraints on our ability to maintain or increase prices;

governmental restrictions on the transfer of funds to us from our operations outside the U.S.;

burdens of complying with a wide variety of labor practices and foreign laws, including those relating to export and import duties, environmental policies and privacy issues;

fluctuations in currency exchange rates, which could affect local payroll, utility and other expenses; and

inability to utilize net operating losses incurred by our foreign operations against future income in the same jurisdiction.

Table of Contents

In addition, several of the countries where we operate have emerging or developing economies, which may be subject to greater currency volatility, negative growth, high inflation, limited availability of foreign exchange and other risks. These factors may harm our results of operations, and any measures that we may implement to reduce the effect of volatile currencies and other risks of our international operations may not be effective. In our experience, entry into new international markets requires considerable management time as well as start-up expenses for market development, hiring and establishing office facilities before any significant revenue is generated. As a result, initial operations in a new market may operate at low margins or may be unprofitable. See Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources.

Another significant legal risk resulting from our international operations is compliance with the U.S. Foreign Corrupt Practices Act (FCPA). In many foreign countries, particularly in those with developing economies, it may be a local custom that businesses operating in such countries engage in business practices that are prohibited by the FCPA or other U.S. laws and regulations. Although we have implemented policies and procedures designed to ensure compliance with the FCPA and similar laws, there can be no assurance that all of our employees, and agents, as well as those companies to which we outsource certain of our business operations, will not take actions in violation of our policies. Any such violation, even if prohibited by our policies, could have a material adverse effect on our business.

If we do not manage our growth effectively, our profitability could decline.

Areas of our business may experience periods of rapid growth which could place considerable additional demands upon our management team and our operational, financial and management information systems. Our ability to manage growth effectively will require us to continue to implement and improve these systems; avoid cost overruns; maintain customer, supplier and other favorable business relationships during possible transition periods; continue to develop the management skills of our managers and supervisors; and continue to train, motivate and manage our employees. Our failure to effectively manage growth could have a material adverse effect on our results of operations. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

We may not achieve expected profitability from our acquisitions.

We cannot assure you that we will be able to successfully integrate the operations and management of our recent acquisitions. Similarly, we cannot assure you that we will be able to (1) identify future strategic acquisitions, (2) consummate these potential acquisitions on favorable terms, if at all, or (3) if consummated, successfully integrate the operations and management of future acquisitions. Acquisitions involve significant risks, which could have a material adverse effect on us, including:

Financial risks, such as (1) the payment of a purchase price that exceeds the future value that we may realize from the acquired operations and businesses; (2) an increase in our expenses and working capital requirements, which could reduce our return on invested capital; (3) potential known and unknown liabilities of the acquired businesses; (4) costs associated with integrating acquired operations and businesses; (5) the dilutive effect of the issuance of additional equity securities; (6) the incurrence of additional debt; (7) the financial impact of valuing goodwill and other intangible assets involved in any acquisitions, potential future impairment write-downs of goodwill and indefinite life intangibles and the amortization of other intangible assets; (8) possible adverse tax and accounting effects; and (9) the risk that we spend substantial amounts purchasing these manufacturing facilities and assume significant contractual and other obligations with no guaranteed levels of revenue or that we may have to close facilities at our cost.

Operating risks, such as (1) the diversion of management's attention to the assimilation of the businesses to be acquired; (2) the risk that the acquired businesses will fail to maintain the quality of services that we have historically provided; (3) the need to implement financial and other systems and add management resources; (4) the need to maintain customer, supplier or other favorable business relationships of acquired operations and restructure or terminate unfavorable relationships; (5) the potential for deficiencies in internal controls of the acquired operations; (6) we may not be able to attract and retain the employees necessary to support the acquired businesses; (7) unforeseen difficulties (including any unanticipated liabilities) in the acquired operations; and (8) the impact on us of any unionized work force we may acquire or any labor disruptions that might occur.

Most of our acquisitions involve operations outside of the U.S. which are subject to various risks including those described in Risk Factors. We derive a substantial portion of our revenue from our international operations, which may be subject to a number of risks and often require more management time and expense to achieve profitability than our domestic operations.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

We have acquired and may continue to pursue the acquisition of manufacturing and supply chain management operations from our customers (or potential customers). In these acquisitions, the divesting company will typically enter into

Table of Contents

a supply arrangement with the acquirer. Therefore, the competition for these acquisitions is intense. In addition, certain divesting companies may choose not to consummate these acquisitions with us because of our current supply arrangements with other companies or may require terms and conditions that may impact our profitability. If we are unable to attract and consummate some of these acquisition opportunities at favorable terms, our growth and profitability could be adversely impacted.

In addition to those risks listed above, arrangements entered into with these divesting companies typically involve certain other risks, including the following:

The integration into our business of the acquired assets and facilities may be time-consuming and costly.

We, rather than the divesting company, may bear the risk of excess capacity.

We may not achieve anticipated cost reductions and efficiencies.

We may be unable to meet the expectations of the divesting company as to volume, product quality, timeliness and cost reductions.

If demand for the divesting company's products declines, it may reduce the volume of purchases and we may not be able to sufficiently reduce the expenses of operating the facility or use the facility to provide services to other customers.

As a result of these and other risks, we may be unable to achieve anticipated levels of profitability under these arrangements, and they may not result in any material revenue or contribute positively to our operations.

Our ability to achieve the expected benefits of the outsourcing opportunities associated with these acquisitions is subject to risks, including our ability to meet volume, product quality, timeliness and pricing requirements, and our ability to achieve the divesting company's expected cost reduction. In addition, when acquiring manufacturing operations, we may receive limited commitments to firm production schedules. Accordingly, in these circumstances, we may spend substantial amounts purchasing these manufacturing facilities and assume significant contractual and other obligations with no guaranteed levels of revenue. We may also not achieve expected profitability from these arrangements. As a result of these and other risks, these outsourcing opportunities may not be profitable.

We are expanding the primary scope of our acquisitions strategy beyond our customers and potential customers to include companies seeking to divest their internal manufacturing operations to manufacturing providers such as us. The amount and scope of the risks associated with acquisitions of this type extend beyond those that we have traditionally faced in making acquisitions. These extended risks include greater uncertainties in the financial benefits and potential liabilities associated with this expanded base of acquisitions.

We face risks arising from the restructuring of our operations.

Over the past few years, we have undertaken initiatives to restructure our business operations with the intention of improving utilization and realizing cost savings in the future. These initiatives have included changing the number and location of our production facilities, largely to align our capacity and infrastructure with current and anticipated customer demand. This alignment includes transferring programs from higher cost geographies to lower cost geographies. The process of restructuring entails, among other activities: moving production between facilities, closing facilities, reducing staff levels, realigning our business processes and reorganizing our management.

We continuously evaluate our operations and cost structure relative to general economic conditions, market demands and cost competitiveness, and our geographic footprint as it relates to our customers' production requirements. As a result of this ongoing evaluation, we have initiated the 2006 Restructuring Plan and the 2009 Restructuring Plan. See Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations Restructuring and Impairment Charges and Note 7 Restructuring and Impairment Charges to the Condensed Consolidated Financial Statements for further details. If we incur restructuring charges related to the 2006 Restructuring Plan, the 2009 Restructuring Plan, or both, or in connection with any potential future restructuring program, in addition to those charges that we currently expect to incur, our financial condition and results of operations may suffer.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

We expect that in the future we may continue to transfer certain of our operations to lower cost geographies, which may require us to take additional restructuring charges. Restructurings present significant potential risks of events occurring that could adversely affect us, including a decrease in employee morale, delays encountered in finalizing the scope of, and implementing, the restructurings (including extensive consultations concerning potential workforce reductions (particularly in locations outside of the U.S.)), the failure to achieve targeted cost savings and the failure to meet operational targets and customer requirements due to the loss of employees and any work stoppages that might occur. These risks are further complicated by our extensive international operations, which subject us to different legal and regulatory requirements

Table of Contents

that govern the extent, and the speed, of our ability to reduce our manufacturing capacity and workforce. In addition, we may have to obtain agreements from our affected customers for the re-location of our facilities in certain instances. Obtaining these agreements, along with the volatility in our customers' demand, can further delay restructuring activities.

We depend on a limited number of suppliers for components that are critical to our manufacturing processes. A shortage of these components or an increase in their price could interrupt our operations and reduce our profits.

Substantially all of our net revenue is derived from turnkey manufacturing in which we provide materials procurement. While most of our significant long-term customer contracts permit quarterly or other periodic adjustments to pricing based on decreases and increases in component prices and other factors, we may bear the risk of component price increases that occur between any such re-pricings or, if such re-pricing is not permitted, during the balance of the term of the particular customer contract. Accordingly, certain component price increases could adversely affect our gross profit margins. Almost all of the products we manufacture require one or more components that are available from only a single source. Some of these components are allocated from time to time in response to supply shortages. In some cases, supply shortages will substantially curtail production of all assemblies using a particular component. In addition, at various times industry-wide shortages of electronic components have occurred, particularly of semiconductor products. In the past, such circumstances have produced insignificant levels of short-term interruption of our operations, but could have a material adverse effect on our results of operations in the future. Also, our production of a customer's product could be negatively impacted by any quality or reliability issues with any of our component suppliers. See Management's Discussion and Analysis of Financial Condition and Results of Operations and Business Components Procurement in our Annual Report on Form 10-K for the fiscal year ended August 31, 2008.

We may not be able to maintain our engineering, technological and manufacturing process expertise.

The markets for our manufacturing and engineering services are characterized by rapidly changing technology and evolving process development. The continued success of our business will depend upon our ability to:

hire, retain and expand our qualified engineering and technical personnel;

maintain technological leadership;

develop and market manufacturing services that meet changing customer needs; and

successfully anticipate or respond to technological changes in manufacturing processes on a cost-effective and timely basis. Although we believe that our operations use the assembly and testing technologies, equipment and processes that are currently required by our customers, we cannot be certain that we will develop the capabilities required by our customers in the future. The emergence of new technology, industry standards or customer requirements may render our equipment, inventory or processes obsolete or noncompetitive. In addition, we may have to acquire new assembly and testing technologies and equipment to remain competitive. The acquisition and implementation of new technologies and equipment may require significant expense or capital investment, which could reduce our operating margins and our operating results. In facilities that we establish or acquire, we may not be able to maintain our engineering, technological and manufacturing process expertise. Our failure to anticipate and adapt to our customers' changing technological needs and requirements or to hire and retain a sufficient number of engineers and maintain our engineering, technological and manufacturing expertise, could have a material adverse effect on our business.

If our manufacturing processes and services do not comply with applicable statutory and regulatory requirements, or if we manufacture products containing design or manufacturing defects, demand for our services may decline and we may be subject to liability claims.

We manufacture and design products to our customers' specifications, and, in some cases, our manufacturing processes and facilities may need to comply with applicable statutory and regulatory requirements. For example, medical devices that we manufacture or design, as well as the facilities and manufacturing processes that we use to produce them, are regulated by the Food and Drug Administration and non-U.S. counterparts of this agency. Similarly, items we manufacture for customers in the defense and aerospace industries, as well as the processes we use to produce them, are regulated by the Department of Defense and the Federal Aviation Authority. In addition, our customers' products and

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

the manufacturing processes that we use to produce them often are highly complex. As a result, products that we manufacture may at times contain manufacturing or design defects, and our manufacturing processes may be subject to errors or not be in compliance with applicable statutory and regulatory requirements. Defects in the products we manufacture or design, whether caused by a design, manufacturing or component failure or error, or deficiencies in our manufacturing processes, may result in delayed shipments to customers or reduced or cancelled customer orders. If these defects or deficiencies are significant, our business reputation may also be damaged. The failure of the products that we manufacture or our manufacturing processes and facilities to comply with

Table of Contents

applicable statutory and regulatory requirements may subject us to legal fines or penalties and, in some cases, require us to shut down or incur considerable expense to correct a manufacturing process or facility. In addition, these defects may result in liability claims against us or expose us to liability to pay for the recall of a product. The magnitude of such claims may increase as we expand our medical, automotive and aerospace and defense manufacturing services, as defects in medical devices, automotive components and aerospace and defense systems could seriously harm or kill users of these products and others. Even if our customers are responsible for the defects, they may not, or may not have resources to, assume responsibility for any costs or liabilities arising from these defects, which could expose us to additional liability claims.

Our regular manufacturing process and services may result in exposure to intellectual property infringement and other claims.

Providing manufacturing services can expose us to potential claims that the product design or manufacturing processes infringe third party intellectual property rights. Even though many of our manufacturing services contracts generally require our customers to indemnify us for infringement claims relating to the product specifications and designs, a particular customer may not, or may not have the resources to assume responsibility for such claims. In addition, we may be responsible for claims that our manufacturing processes or components used in manufacturing infringe third party intellectual property rights. Infringement claims could subject us to significant liability for damages, and potentially injunctive action and, regardless of merits, could be time-consuming and expensive to resolve.

Our design services offerings may result in additional exposure to product liability, intellectual property infringement and other claims, in addition to the business risk of being unable to produce the revenues necessary to profit from these services.

We continue our efforts to offer certain design services, primarily those relating to products that we manufacture for our customers, and we now offer design services related to collaborative design manufacturing and turnkey solutions (including end-user products and components as products). Providing such services can expose us to different or greater potential liabilities than those we face when providing our regular manufacturing services. Our design services business increases our exposure to potential product liability claims resulting from injuries caused by defects in products we design, as well as potential claims that products we design or processes we use infringe third-party intellectual property rights. Such claims could subject us to significant liability for damages, subject the infringing portion of our business to injunction and, regardless of their merits, could be time-consuming and expensive to resolve. We also may have greater potential exposure from warranty claims, and from product recalls due to problems caused by product design. Costs associated with possible product liability claims, intellectual property infringement claims, and product recalls could have a material adverse effect on our results of operations. When providing collaborative design manufacturing or turnkey solutions, we may not be guaranteed revenue needed to recoup or profit from the investment in the resources necessary to design and develop products. Particularly, no revenue may be generated from these efforts if our customers do not approve the designs in a timely manner or at all, or if they do not then purchase anticipated levels of products. Furthermore, contracts may allow the customer to delay or cancel deliveries and may not obligate the customer to any volume of purchases, or may provide for penalties or cancellation of orders if we are late in delivering designs or products. We may even have the responsibility to ensure that products we design satisfy safety and regulatory standards and to obtain any necessary certifications. Failure to timely obtain the necessary approvals or certifications could prevent us from selling these products, which in turn could harm our sales, profitability and reputation.

The success of our turnkey solution activities depends in part on our ability to obtain, protect and leverage intellectual property rights to our designs.

We strive to obtain and protect certain intellectual property rights to our turnkey solutions designs. We believe that having a significant level of protected proprietary technology gives us a competitive advantage in marketing our services. However, we cannot be certain that the measures that we employ will result in protected intellectual property rights or will result in the prevention of unauthorized use of our technology. If we are unable to obtain and protect intellectual property rights embodied within our designs, this could reduce or eliminate the competitive advantages of our proprietary technology, which would harm our business.

Intellectual property infringement claims against our customers or us could harm our business.

Our turnkey solutions products and the products of our customers may compete against the products of other companies, many of whom may own the intellectual property rights underlying those products. Patent clearance or licensing activities, if any, may be inadequate to anticipate and avoid third party claims. As a result, in addition to the risk that we could become subject to claims of intellectual property infringement, our customers could become subject to infringement claims. Additionally, customers for our turnkey solutions services, or collaborative designs in which we have significant technology contributions, typically require that we indemnify them against the risk of intellectual property infringement. If

Table of Contents

any claims are brought against us or against our customers for such infringement, regardless of their merits, we could be required to expend significant resources in defense of such claims. In the event of a claim, we may be required to spend a significant amount of money to develop non-infringing alternatives or obtain licenses. We may not be successful in developing such alternatives or obtaining such a license on reasonable terms or at all. Our customers may be required to or decide to discontinue products which are alleged to be infringing rather than face continued costs of defending the infringement claims, and such discontinuance may result in a significant decrease in our business.

If our turnkey solutions products are subject to design defects, our business may be damaged and we may incur significant fees.

In our contracts with turnkey solutions customers, we generally provide them with a warranty against defects in our designs. If a turnkey solutions product or component that we design is found to be defective in its design, this may lead to increased warranty claims. Although we have product liability insurance coverage, it may not be available on acceptable terms, in sufficient amounts, or at all. A successful product liability claim in excess of our insurance coverage or any material claim for which insurance coverage was denied or limited and for which indemnification was not available could have a material adverse effect on our business, results of operations and financial condition.

We depend on our officers, managers and skilled personnel.

Our success depends to a large extent upon the continued services of our executive officers and other skilled personnel. Generally our employees are not bound by employment or non-competition agreements, and we cannot assure you that we will retain our executive officers and other key employees. We could be seriously harmed by the loss of any of our executive officers. In order to manage our growth, we will need to recruit and retain additional skilled management personnel and if we are not able to do so, our business and our ability to continue to grow could be harmed. In addition, in connection with expanding our turnkey solutions activities, we must attract and retain experienced design engineers. Competition for highly skilled employees is substantial. Our failure to recruit and retain experienced design engineers could limit the growth of our turnkey solutions activities, which could adversely affect our business.

Any delay in the implementation of our information systems could disrupt our operations and cause unanticipated increases in our costs.

We have completed the installation of an Enterprise Resource Planning system in most of our manufacturing sites, excluding the Green Point sites, and in our corporate location. We are in the process of installing this system in certain of our remaining plants, including certain Green Point sites, which will replace the current Manufacturing Resource Planning system, and financial information systems. Any delay in the implementation of these information systems could result in material adverse consequences, including disruption of operations, loss of information and unanticipated increases in costs.

Compliance or the failure to comply with current and future environmental, product stewardship and producer responsibility laws or regulations could cause us significant expense.

We are subject to a variety of federal, state, local and foreign environmental, product stewardship and producer responsibility laws and regulations, including those relating to the use, storage, discharge and disposal of hazardous chemicals used during our manufacturing process or requiring design changes, conformity assessments or recycling of products we manufacture. If we fail to comply with any present and future regulations, we could become subject to future liabilities, the suspension of production, or prohibitions on sales of products we manufacture. In addition, such regulations could restrict our ability to expand our facilities or could require us to acquire costly equipment, or to incur other significant expenses, including expenses associated with the recall of any non-compliant product or with changes in our procurement and inventory management activities.

Certain environmental laws impose liability for the costs of investigation, removal or remediation of hazardous or toxic substances on an owner, occupier or operator of real estate, even if such person or company was unaware of or not responsible for the presence of such substances. Soil and groundwater contamination may have occurred at some of our facilities. From time to time we investigate, remediate and monitor soil and groundwater contamination at certain of our operating sites. In certain instances where contamination existed prior to our ownership or occupation of a site, landlords or former owners have retained some contractual responsibility for contamination and remediation. However, failure of such persons to perform those obligations could result in us being required to remediate such contamination. As a result, we may incur clean-up costs in such potential removal or remediation efforts. In other instances, we may be solely responsible for clean-up costs associated with remediation efforts.

Table of Contents

From time to time new regulations are enacted, or existing requirements are changed, and it is difficult to anticipate how such regulations and changes will be implemented and enforced. We continue to evaluate the necessary steps for compliance with regulations as they are enacted.

Over the last several years, we have become subject to certain legal requirements, principally in Europe, regarding the use of certain hazardous substances in, and the collection, reuse and recycling of waste from, certain products that use or generate electricity. Similar requirements are being developed or imposed in other areas of the world where we manufacture or sell products, including China and the U.S. We believe that we comply, and will be able to continue to comply, with such emerging requirements. We may experience negative consequences from these emerging requirements however, including, but not limited to, supply shortages or delays, increased raw material and component costs, accelerated obsolescence of certain of our raw materials, components and products and the need to modify or create new designs for our existing and future products.

Our failure to comply with any applicable regulatory requirements or with related contractual obligations could result in our being directly or indirectly liable for costs (including product recall and/or replacement costs), fines or penalties and third-party claims, and could jeopardize our ability to conduct business in the jurisdictions implementing them.

In addition, as global warming issues become more prevalent, the U.S. and foreign governments are beginning to respond to these issues. This increasing governmental focus on global warming may result in new environmental regulations that may negatively affect us, our suppliers and our customers. This could cause us to incur additional direct costs in complying with any new environmental regulations, as well as increased indirect costs resulting from our customers, suppliers or both incurring additional compliance costs that get passed on to us. These costs may adversely impact our operations and financial condition.

Certain of our existing stockholders have significant control.

At February 28, 2009, our executive officers, directors and certain of their family members collectively beneficially owned 13.2% of our outstanding common stock, of which William D. Morean, our Chairman of the Board, beneficially owned 7.6%. As a result, our executive officers, directors and certain of their family members have significant influence over (1) the election of our Board of Directors, (2) the approval or disapproval of any other matters requiring stockholder approval and (3) the affairs and policies of Jabil.

We are subject to the risk of increased taxes.

We base our tax position upon the anticipated nature and conduct of our business and upon our understanding of the tax laws of the various countries in which we have assets or conduct activities. Our tax position, however, is subject to review and possible challenge by taxing authorities and to possible changes in law. We cannot determine in advance the extent to which some jurisdictions may assess additional tax or interest and penalties on such additional taxes. In addition, our effective tax rate may be increased by the generation of higher income in countries with higher tax rates, or changes in local tax rates. For example, China enacted a new unified enterprise income tax law, effective January 1, 2008, which will result in a higher tax rate on operations in China as the rate increase is phased in over several years.

Several countries in which we are located allow for tax incentives to attract and retain business. We have obtained incentives where available and practicable. Our taxes could increase if certain tax incentives are retracted (which in some cases could occur if we fail to satisfy the conditions on which such incentives are based), or if they are not renewed upon expiration, or tax rates applicable to us in such jurisdictions are otherwise increased. It is anticipated that tax incentives with respect to certain operations will expire within the next year. However, due to the possibility of changes in existing tax law and our operations, we are unable to predict how these expirations will impact us in the future. In addition, acquisitions may cause our effective tax rate to increase, depending on the jurisdictions in which the acquired operations are located.

Our credit rating was downgraded in fiscal years 2008 and 2007 and is subject to further change.

Our credit is rated by credit rating agencies. Our 5.875% Senior Notes and our 8.250% Senior Notes are currently rated BB+ by Fitch Ratings (Fitch), Ba1 by Moody's and BB+ by S&P, and are considered to be below investment grade debt by all three rating agencies. S&P's rating downgrade in April 2008, along with those by Fitch in October 2007 and Moody's in February 2007, and any potential future negative change in our credit rating, may make it more expensive for us to raise additional capital in the future on terms that are acceptable to us, if at all; may negatively impact the price of our common stock; may increase our interest payments under existing debt agreements; and may have other negative implications on our business, many of which are beyond our control. In addition, as discussed above in Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources, the interest rate payable on the 8.250% Senior Notes is subject to adjustment from time to time if our credit ratings change. Thus, any potential future negative change in our credit rating may increase the interest rate payable on the 8.250% Senior Notes and certain of our other borrowings.

Table of Contents

Our amount of debt could significantly increase in the future.

As of February 28, 2009, our debt obligations on the Condensed Consolidated Balance Sheets consisted of \$396.6 million under our 8.250% Senior Notes, \$298.7 million under our 5.875% Senior Notes and \$380.0 million outstanding under the term portion of our Credit Facility. As of February 28, 2009, there was \$167.4 million outstanding under various bank loans to certain of our foreign subsidiaries and under various other debt obligations. Refer to Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources and Note 11—Notes Payable, Long-Term Debt and Long-Term Lease Obligations to the Condensed Consolidated Financial Statements for further details.

As of February 28, 2009, we have the ability to borrow up to \$800.0 million under the revolving credit portion of our Credit Facility. In addition, the Credit Facility contemplates a potential increase of the revolving credit portion of up to an additional \$200.0 million, if we and the lenders later agree to such increase. We could incur additional indebtedness in the future in the form of bank loans, notes or convertible securities.

Should we desire to consummate significant additional acquisition opportunities or undertake significant additional expansion activities, our capital needs would increase and could possibly result in our need to increase available borrowings under our revolving credit facilities or access public or private debt and equity markets. There can be no assurance, however, that we would be successful in raising additional debt or equity on terms that we would consider acceptable.

An increase in the level of our indebtedness, among other things, could:

make it difficult for us to obtain any necessary financing in the future for other acquisitions, working capital, capital expenditures, debt service requirements or other purposes;

limit our flexibility in planning for, or reacting to changes in, our business;

make us more vulnerable in the event of a downturn in our business; and

impact certain financial covenants that we are subject to in connection with our debt and securitization programs, including, among others, the maximum ratio of debt to consolidated EBITDA.

There can be no assurance that we will be able to meet future debt service obligations.

We are subject to risks of currency fluctuations and related hedging operations.

A portion of our business is conducted in currencies other than the U.S. dollar. Changes in exchange rates among other currencies and the U.S. dollar will affect our cost of sales, operating margins and net revenue. We cannot predict the impact of future exchange rate fluctuations. We use financial instruments, primarily forward purchase contracts, to economically hedge U.S. dollar and other currency commitments arising from trade accounts receivable, trade accounts payable and fixed purchase obligations. Based on our calculations and current forecasts, we believe that our hedging activities enable us to largely protect ourselves from future exchange rate fluctuations. If, however, these hedging activities are not successful or if we change or reduce these hedging activities in the future, we may experience significant unexpected expenses from fluctuations in exchange rates.

An adverse change in the interest rates for our borrowings could adversely affect our financial condition.

We pay interest on outstanding borrowings under our revolving credit facilities and certain other long term debt obligations at interest rates that fluctuate based upon changes in various base interest rates. An adverse change in the base rates upon which our interest rates are determined could have a material adverse effect on our financial position, results of operations and cash flows.

We face certain risks in collecting our trade accounts receivable.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

We generate a significant amount of trade accounts receivable sales from our customers. If any of our customers has any liquidity issues (the risk of which is likely rising due to current economic conditions), then we could encounter delays or defaults in payments owed to us which could have a significant adverse impact on our financial condition and results of operations. For example, on January 14, 2009, one of our customers, Nortel Networks, filed a petition for reorganization under bankruptcy law. We have analyzed our financial exposure resulting from Nortel's bankruptcy filing and recorded an allowance for doubtful accounts provision related to Nortel of \$6.1 million, as well as certain other inventory related write-offs of \$1.2 million during the second quarter of fiscal year 2009. Our allowance for doubtful accounts receivables was \$16.8 million as of February 28, 2009 (which represented 1% of our gross trade accounts receivable balance) and \$10.1 million as of August 31, 2008 (which represented less than 1% of our gross trade accounts receivable balance).

Table of Contents

Customer relationships with emerging companies may present more risks than with established companies.

Customer relationships with emerging companies present special risks because such companies do not have an extensive product history. As a result, there is less demonstration of market acceptance of their products making it harder for us to anticipate needs and requirements than with established customers. In addition, due to the current economic environment, additional funding for such companies may be more difficult to obtain and these customer relationships may not continue or materialize to the extent we planned or we previously experienced. This tightening of financing for start-up customers, together with many start-up customers' lack of prior operations and unproven product markets increase our credit risk, especially in trade accounts receivable and inventories. Although we perform ongoing credit evaluations of our customers and adjust our allowance for doubtful accounts receivable for all customers, including start-up customers, based on the information available, these allowances may not be adequate. This risk exists for any new emerging company customers in the future.

Our stock price may be volatile; and further decreases in our stock price, among other factors, may lead to further impairment of goodwill.

Our common stock is traded on the New York Stock Exchange (the "NYSE"). The market price of our common stock has fluctuated substantially in the past and could fluctuate substantially in the future, based on a variety of factors, including future announcements covering us or our key customers or competitors, government regulations, litigation, changes in earnings estimates by analysts, fluctuations in quarterly operating results, or general conditions in our industry and the aerospace, automotive, computing, consumer, defense, instrumentation, medical, networking, peripherals, storage and telecommunications industries. Furthermore, stock prices for many companies and high technology companies in particular, fluctuate widely for reasons that may be unrelated to their operating results. Those fluctuations and general economic, political and market conditions, such as recessions or international currency fluctuations and demand for our services, may adversely affect the market price of our common stock.

Also, as discussed in "Risk Factors" We are exposed to intangible asset risk; specifically, our goodwill may become further impaired, a further decline in our stock price could result in the need for us to perform further goodwill impairment analysis in future periods.

Provisions in our charter documents and state law may make it harder for others to obtain control of us even though some shareholders might consider such a development to be favorable.

Our shareholder rights plan, provisions of our amended certificate of incorporation and the Delaware Corporation Laws may delay, inhibit or prevent someone from gaining control of us through a tender offer, business combination, proxy contest or some other method. These provisions may adversely impact our shareholders because they may decrease the possibility of a transaction in which our shareholders receive an amount of consideration in exchange for their shares that is at a significant premium to the then current market price of our shares. These provisions include:

- a. poison pill shareholder rights plan;

- a. statutory restriction on the ability of shareholders to take action by less than unanimous written consent; and

- a. statutory restriction on business combinations with some types of interested shareholders.

Previous changes in the securities laws and regulations have increased, and may continue to increase, our costs; and any future changes would likely increase our costs.

The Sarbanes-Oxley Act of 2002, as well as related new rules promulgated by the SEC and the NYSE, required changes in some of our corporate governance, securities disclosure and compliance practices. Compliance with these new rules has increased our legal and financial accounting costs for several years following the announcement and effectiveness of these new rules. While these costs are no longer increasing, they may in fact increase in the future. In addition, any future changes in securities laws, SEC rules or NYSE rules may cause our legal and financial accounting costs to increase.

Due to inherent limitations, there can be no assurance that our system of disclosure and internal controls and procedures will be successful in preventing all errors or fraud, or in informing management of all material information in a timely manner.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Our management, including our CEO and CFO, does not expect that our disclosure controls and internal controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide

Table of Contents

only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system reflects that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been or will be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur simply because of error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

If we receive other than an unqualified opinion on the adequacy of our internal control over financial reporting as of August 31, 2009 and future year-ends as required by Section 404 of the Sarbanes-Oxley Act of 2002, investors could lose confidence in the reliability of our financial statements, which could result in a decrease in the value of your shares.

As directed by Section 404 of the Sarbanes-Oxley Act of 2002, the SEC adopted rules requiring public companies to include an annual report on internal control over financial reporting in their annual reports on Form 10-K that contains an assessment by management of the effectiveness of the company's internal control over financial reporting. The independent registered public accounting firm KPMG LLP issued an unqualified opinion on the effectiveness of our internal control over financial reporting as of August 31, 2008. While we continuously conduct a rigorous review of our internal control over financial reporting in order to assure compliance with the Section 404 requirements, if our independent registered public accounting firm interprets the Section 404 requirements and the related rules and regulations differently from us or if our independent registered public accounting firm is not satisfied with our internal control over financial reporting or with the level at which it is documented, operated or reviewed, they may issue a qualified report. A qualified opinion could result in an adverse reaction in the financial markets due to a loss of confidence in the reliability of our consolidated financial statements.

In addition, we have spent a significant amount of resources in complying with Section 404's requirements. For the foreseeable future, we will likely continue to spend substantial amounts complying with Section 404's requirements, as well as improving and enhancing our internal control over financial reporting.

There are inherent uncertainties involved in estimates, judgments and assumptions used in the preparation of financial statements in accordance with U.S. GAAP. Any changes in estimates, judgments and assumptions could have a material adverse effect on our business, financial position and results of operations.

The consolidated and condensed consolidated financial statements included in the periodic reports we file with the SEC are prepared in accordance with U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP involves making estimates, judgments and assumptions that affect reported amounts of assets (including intangible assets), liabilities and related reserves, revenues, expenses and income. Estimates, judgments and assumptions are inherently subject to change in the future, and any such changes could result in corresponding changes to the amounts of assets, liabilities, revenues, expenses and income. Any such changes could have a material adverse effect on our financial position and results of operations. In addition, the principles of U.S. GAAP are subject to interpretation by the Financial Accounting Standards Board, the American Institute of Certified Public Accountants, the SEC and various bodies formed to create appropriate accounting policies, and interpret such policies. A change in those policies can have a significant effect on our accounting methods. For example, although not yet currently required, the SEC could require us to adopt the International Financial Reporting Standards in the next few years, which could have a significant effect on certain of our accounting methods.

We are subject to risks associated with natural disasters and global events.

Our operations may be subject to natural disasters or other business disruptions, which could seriously harm our results of operation and increase our costs and expenses. We are susceptible to losses and interruptions caused by hurricanes (including in Florida, where our headquarters are located), earthquakes, power shortages, telecommunications failures, water shortages, tsunamis, floods, typhoons, fire, extreme weather conditions, geopolitical events such as terrorist acts and other natural or manmade disasters. Our insurance coverage with respect to natural disasters is limited and is subject to deductibles and coverage limits. Such coverage may not be adequate, or may not continue to be available at commercially reasonable rates and terms.

Table of Contents

Energy price increases may negatively impact our results of operations.

Certain of the components that we use in our manufacturing activities are petroleum-based. In addition, we, along with our suppliers and customers, rely on various energy sources (including oil) in our transportation activities. After several years of increases, energy prices have recently declined significantly. While significant uncertainty currently exists about the future levels of energy prices, a significant increase is possible. Increased energy prices could cause an increase to our raw material costs and transportation costs. In addition, increased transportation costs of certain of our suppliers and customers could be passed along to us. We may not be able to increase our product prices enough to offset these increased costs. In addition, any increase in our product prices may reduce our future customer orders and profitability.

Item 4: SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

January 22, 2009 was the date established for Jabil's annual meeting of stockholders. Set forth below are the voting results from the proposals presented for a stockholder vote at such meeting.

1. To elect the full Board of Directors.

	Number of shares	
	For	Withheld
Laurence S. Grafstein	181,604,184	4,016,059
Mel S. Lavitt	175,058,885	10,561,358
Timothy L. Main	175,872,797	9,747,446
William D. Morean	175,575,678	10,044,565
Lawrence J. Murphy	175,770,388	9,849,855
Frank A. Newman	167,842,806	17,777,437
Steven A. Raymund	175,828,162	9,792,081
Thomas A. Sansone	175,742,909	9,877,334
Kathleen A. Walters	180,137,527	5,482,716

2. To approve an amendment to increase the size of the Jabil Circuit, Inc. 2002 Stock Incentive Plan by 1,500,000 shares.

For	Against	Abstain	Broker Non-Votes
113,620,584	46,340,745	80,733	25,578,181

3. To approve an amendment to increase the size of the Jabil Circuit, Inc. 2002 Employee Stock Purchase Plan by 3,000,000 shares.

For	Against	Abstain	Broker Non-Votes
157,861,127	2,102,736	78,199	25,578,181

4. To approve KPMG LLP as the independent registered public accounting firm for the fiscal year ending August 31, 2009 for the Company.

For	Against	Abstain
178,042,070	7,346,540	231,633
