Securities and Exchange Commission
Washington, D.C. 20549

Form 10-Q

x **Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**
For the quarterly period ended: September 30, 2009

Or

“ **Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**
For the transition period from _____ to _____

Commission file number: 001-13221

Cullen/Frost Bankers, Inc.

(Exact name of registrant as specified in its charter)

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Texas
(State or other jurisdiction of
incorporation or organization)

74-1751768
(I.R.S. Employer
Identification No.)

100 W. Houston Street, San Antonio, Texas
(Address of principal executive offices)

78205
(Zip code)

(210) 220-4011

(Registrant's telephone number, including area code)

N/A

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of October 15, 2009, there were 59,940,184 shares of the registrant's Common Stock, \$.01 par value, outstanding.

Cullen/Frost Bankers, Inc.

Notes to Consolidated Financial Statements

(Table amounts are stated in thousands, except for share and per share amounts)

Note 1 - Significant Accounting Policies

Nature of Operations. Cullen/Frost Bankers, Inc. (Cullen/Frost) is a financial holding company and a bank holding company headquartered in San Antonio, Texas that provides, through its subsidiaries, a broad array of products and services throughout numerous Texas markets. In addition to general commercial and consumer banking, other products and services offered include trust and investment management, investment banking, insurance, brokerage, leasing, asset-based lending, treasury management and item processing.

Basis of Presentation. The consolidated financial statements in this Quarterly Report on Form 10-Q include the accounts of Cullen/Frost and all other entities in which Cullen/Frost has a controlling financial interest (collectively referred to as the Corporation). All significant intercompany balances and transactions have been eliminated in consolidation. The accounting and financial reporting policies the Corporation follows conform, in all material respects, to accounting principles generally accepted in the United States and to general practices within the financial services industry.

The consolidated financial statements in this Quarterly Report on Form 10-Q have not been audited by an independent registered public accounting firm, but in the opinion of management, reflect all adjustments necessary for a fair presentation of the Corporation's financial position and results of operations. All such adjustments were of a normal and recurring nature. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q adopted by the Securities and Exchange Commission (SEC). Accordingly, the financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements and should be read in conjunction with the Corporation's consolidated financial statements, and notes thereto, for the year ended December 31, 2008, included in the Corporation's Annual Report on Form 10-K filed with the SEC on February 3, 2009 (the 2008 Form 10-K). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period. The Corporation has evaluated subsequent events for potential recognition and/or disclosure through October 21, 2009, the date the consolidated financial statements included in this Quarterly Report on Form 10-Q were issued.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for possible loan losses, the fair value of stock-based compensation awards, the fair values of financial instruments and the status of contingencies are particularly subject to change.

Accounting Standards Codification. The Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC) became effective on July 1, 2009. At that date, the ASC became FASB's officially recognized source of authoritative U.S. generally accepted accounting principles (GAAP) applicable to all public and non-public non-governmental entities, superseding existing FASB, American Institute of Certified Public Accountants (AICPA), Emerging Issues Task Force (EITF) and related literature. Rules and interpretive releases of the SEC under the authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. All other accounting literature is considered non-authoritative. The switch to the ASC affects the way companies refer to U.S. GAAP in financial statements and accounting policies. Citing particular content in the ASC involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure.

Cash Flow Reporting. Cash paid for interest totaled \$75.9 million and \$124.8 million during the nine months ended September 30, 2009 and 2008. Cash paid for income taxes totaled \$59.2 million and \$65.0 million during the nine months ended September 30, 2009 and 2008. Significant non-cash transactions during the nine months ended September 30, 2009 and 2008 included transfers of loans to other real estate owned and foreclosed assets in connection with loan foreclosures totaling \$25.7 million during 2009 and \$9.8 million during 2008, common stock issued to the Corporation's 401(k) plan in connection with matching contributions totaling \$2.9 million during 2009 and loans to facilitate the sale of other real estate owned totaling \$1.8 million in 2009.

Comprehensive Income. Comprehensive income includes all changes in shareholders' equity during a period, except those resulting from transactions with shareholders. Besides net income, other components of the Corporation's comprehensive income include the after tax effect of changes in the net unrealized gain/loss on securities available for sale, changes in the net actuarial gain/loss on defined benefit post-retirement

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

benefit plans and changes in the accumulated gain/loss on effective cash flow hedging instruments. Comprehensive income for the nine months ended September 30, 2009 and 2008 is reported in the accompanying consolidated statements of changes in shareholders' equity. The Corporation had comprehensive income of \$119.7 million and \$81.7 million for the three months ended September 30, 2009 and 2008. Comprehensive income during

Table of Contents

the three months ended September 30, 2009 included net after-tax gains of \$70.2 million due to an increase in the net unrealized gain on securities available for sale and \$4.2 million due to a change in the accumulated gain/loss on cash flow hedging derivatives. Comprehensive income during the three months ended September 30, 2008 included net after-tax gains of \$12.7 million due to a decrease in the net unrealized loss on securities available for sale and \$19.8 million due to a change in the accumulated gain/loss on cash flow hedging derivatives.

Earnings Per Share. Effective January 1, 2009, the Corporation adopted new authoritative accounting guidance under FASB ASC Topic 260, Earnings Per Share, which provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. The Corporation has determined that its outstanding non-vested stock awards and deferred stock units are participating securities. Accordingly, effective January 1, 2009, earnings per common share is computed using the two-class method prescribed under FASB ASC Topic 260. All previously reported earnings per common share data has been retrospectively adjusted to conform to the new computation method.

Reclassifications. Certain items in prior financial statements have been reclassified to conform to the current presentation.

Note 2 - Securities

A summary of the amortized cost and estimated fair value of securities, excluding trading securities, is presented below.

	September 30, 2009				December 31, 2008			
	Amortized	Gross	Gross	Estimated	Amortized	Gross	Gross	Estimated
	Cost	Unrealized	Unrealized	Fair Value	Cost	Unrealized	Unrealized	Fair Value
		Gains	Losses			Gains	Losses	
Securities Held to Maturity:								
Residential mortgage-backed securities issued by U.S. government agencies and corporations	\$ 5,351	\$ 139	\$	\$ 5,490	\$ 5,948	\$ 60	\$ 60	\$ 5,948
Other	1,000			1,000	1,000			1,000
Total	\$ 6,351	\$ 139	\$	\$ 6,490	\$ 6,948	\$ 60	\$ 60	\$ 6,948

Table of Contents

Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. In estimating other-than-temporary impairment losses, management considers, among other things, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) the intent and ability of the Corporation to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in cost.

Management has the ability and intent to hold the securities classified as held to maturity in the table above until they mature, at which time the Corporation will receive full value for the securities. Furthermore, as of September 30, 2009, management does not have the intent to sell any of the securities classified as available for sale in the table above and believes that it is more likely than not that the Corporation will not have to sell any such securities before a recovery of cost. The unrealized losses are largely due to increases in market interest rates over the yields available at the time the underlying securities were purchased. The fair value is expected to recover as the bonds approach their maturity date or repricing date or if market yields for such investments decline. Management does not believe any of the securities are impaired due to reasons of credit quality. Accordingly, as of September 30, 2009, management believes the impairments detailed in the table above are temporary and no impairment loss has been realized in the Corporation's consolidated income statement.

The amortized cost and estimated fair value of securities, excluding trading securities, at September 30, 2009 are presented below by contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. Mortgage-backed securities and equity securities are shown separately since they are not due at a single maturity date.

	Held to Maturity		Available for Sale	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 1,000	\$ 1,000	\$ 282,720	\$ 283,262
Due after one year through five years			272,673	276,056
Due after five years through ten years			125,497	133,095
Due after ten years			1,364,092	1,466,808
Mortgage-backed securities	5,351	5,490	2,219,412	2,324,993
Equity securities			47,473	47,473
Total	\$ 6,351	\$ 6,490	\$ 4,311,867	\$ 4,531,687

Trading account securities, at estimated fair value, were as follows:

	September 30, 2009	December 31, 2008
U.S. Treasury	\$ 14,914	\$ 14,489
Equity securities		63
	\$ 14,914	\$ 14,552

The net gain on trading account securities, which includes amounts realized from sale transactions and mark-to-market adjustments, totaled \$546 thousand and \$1.5 million during the three and nine months ended September 30, 2009 and \$741 thousand and \$1.9 million during the three and nine months ended September 30, 2008.

Table of Contents**Note 3 - Loans**

Loans were as follows:

	September 30, 2009	Percentage of Total	December 31, 2008	Percentage of Total	September 30, 2008	Percentage of Total
Commercial and industrial:

Total loans	\$ 8,518,608	100.0%	\$ 8,844,082	100.0%	\$ 8,595,986	100.0%

Concentrations of Credit. Most of the Corporation's lending activity occurs within the State of Texas, including the four largest metropolitan areas of Austin, Dallas/Ft. Worth, Houston and San Antonio as well as other markets. The majority of the Corporation's loan portfolio consists of commercial and industrial and commercial real estate loans. As of September 30, 2009, other than energy, which totaled approximately 10.4% of total loans, there were no concentrations of loans related to any single industry in excess of 10% of total loans.

Student Loans Held for Sale. Student loans are primarily originated for resale on the secondary market. These loans, which are generally sold on a non-recourse basis, are carried at the lower of cost or market on an aggregate basis. During the second quarter of 2008, the Corporation elected to discontinue the origination of student loans for resale, aside from previously outstanding commitments.

Foreign Loans. The Corporation has U.S. dollar denominated loans and commitments to borrowers domiciled in Mexico as well as certain non-U.S. dollar denominated loans and commitments to borrowers domiciled in the United States. The outstanding balance of these loans and the unfunded amounts available under these commitments were not significant at September 30, 2009 or December 31, 2008.

Non-Performing/Past Due Loans. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations, which typically occurs when principal or interest payments are more than 90 days past due. Non-accrual loans totaled \$191.8 million at September 30, 2009 and \$65.2 million at December 31, 2008. Accruing loans past due more than 90 days totaled \$32.7 million at September 30, 2009 and \$19.8 million at December 31, 2008.

Impaired Loans. Loans are considered impaired when, based on current information and events, it is probable the Corporation will be unable to collect all amounts due in accordance with the original contractual terms of the loan agreement, including scheduled principal and interest payments. If a loan is impaired, a specific valuation allowance is allocated, if necessary, so that the loan is reported net, at the present value of

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Interest payments on impaired loans are typically applied to principal unless collectibility of the principal amount is reasonably assured, in which case interest is recognized on a cash basis. Impaired loans, or portions thereof, are charged off when deemed uncollectible.

Table of Contents

Impaired loans were as follows:

	September 30, 2009	December 31, 2008	September 30, 2008
Balance of impaired loans with no allocated allowance	\$ 90,165	\$ 38,095	\$ 22,235
Balance of impaired loans with an allocated allowance	92,638	20,849	17,260
Total recorded investment in impaired loans	\$ 182,803	\$ 58,944	\$ 39,495
Amount of the allowance allocated to impaired loans	\$ 28,251	\$ 8,188	\$ 6,181

The impaired loans included in the table above were primarily comprised of collateral dependent commercial and commercial real estate loans. The average recorded investment in impaired loans was \$171.1 million and \$126.8 million for the three and nine months ended September 30, 2009 and \$36.7 million and \$28.2 million for the three and nine months ended September 30, 2008. No interest income was recognized on these loans subsequent to their classification as impaired.

Note 4 - Allowance for Possible Loan Losses

The allowance for possible loan losses is a reserve established through a provision for possible loan losses charged to expense, which represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. The level of the allowance reflects management's continuing evaluation of industry concentrations, specific credit risks, loan loss experience, current loan portfolio quality, present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio, as well as trends in the foregoing. Portions of the allowance may be allocated for specific credits; however, the entire allowance is available for any credit that, in management's judgment, should be charged off. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance is dependent upon a variety of factors beyond the Corporation's control, including the performance of the Corporation's loan portfolio, the economy, changes in interest rates and the view of the regulatory authorities toward loan classifications.

Activity in the allowance for possible loan losses was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Balance at the beginning of the period	\$ 122,501	\$ 94,520	\$ 110,244	\$ 92,339
Provision for possible loan losses	16,940	18,940	43,142	29,273
Net charge-offs:				
Losses charged to the allowance	(18,987)	(8,093)	(37,077)	(21,298)
Recoveries of loans previously charged off	2,668	1,742	6,813	6,795
Net charge-offs	(16,319)	(6,351)	(30,264)	(14,503)
Balance at the end of the period	\$ 123,122	\$ 107,109	\$ 123,122	\$ 107,109

Note 5 - Goodwill and Other Intangible Assets

Goodwill. Goodwill totaled \$527.7 million at September 30, 2009 and \$526.6 million at December 31, 2008. The increase in goodwill was related to purchase accounting adjustments related to the acquisitions of a Dallas-based insurance agency on March 1, 2009 and a San Marcos-based insurance agency on July 1, 2009.

Other Intangible Assets. Other intangible assets totaled \$20.9 million at September 30, 2009 including \$17.3 million related to core deposits, \$3.2 million related to customer relationships and \$493 thousand related to non-compete agreements. Other intangible assets totaled \$24.3

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

million at December 31, 2008 including \$21.3 million related to core deposits, \$2.5 million related to customer relationships and \$515 thousand related to non-compete agreements. The changes in intangibles related to customer relationships and non-compete agreements, net of amortization, were related to the aforementioned acquisitions.

Table of Contents

Amortization expense related to intangible assets totaled \$1.6 million and \$5.1 million during the three and nine months ended September 30, 2009 and totaled \$2.0 million and \$6.0 million during the three and nine months ended September 30, 2008. The estimated aggregate future amortization expense for intangible assets remaining as of September 30, 2009 is as follows:

Remainder of 2009	\$ 1,472
2010	5,125
2011	4,299
2012	3,500
2013	2,729
Thereafter	3,808
	\$ 20,933

Note 6 - Deposits

Deposits were as follows:

	September 30, 2009	Percentage of Total	December 31, 2008	Percentage of Total	September 30, 2008	Percentage of Total
Non-interest-bearing demand deposits:						
Commercial and individual	\$ 3,972,598	30.7%	\$ 3,593,390	31.2%	\$ 3,303,191	31.1%
Correspondent banks	316,215	2.5	468,632	4.1	435,880	4.1
Public funds	138,094	1.1	90,326	0.8	78,243	0.8
Total non-interest-bearing demand deposits	4,426,907	34.3	4,152,348	36.1	3,817,314	36.0
Interest-bearing deposits:						
Private accounts:						
Savings and interest checking	2,106,872	16.3	1,898,303	16.5	1,715,707	16.1
Money market accounts	4,411,682	34.1	3,543,487	30.8	3,475,607	32.7
Time accounts under \$100,000	808,931	6.3	884,214	7.7	591,535	5.6
Time accounts of \$100,000 or more	775,337	6.0	633,972	5.5	697,871	6.6
Public funds	392,009	3.0	396,613	3.4	320,186	3.0
Total interest-bearing deposits	8,494,831	65.7	7,356,589	63.9	6,800,906	64.0
Total deposits	\$ 12,921,738	100.0%	\$ 11,508,937	100.0%	\$ 10,618,220	100.0%

At September 30, 2009 and December 31, 2008, interest-bearing public funds deposits included \$194.3 million and \$215.9 million in savings and interest checking accounts, \$72.2 million and \$116.1 million in money market accounts, \$3.3 million and \$4.1 million in time accounts under \$100 thousand and \$122.3 million and \$60.5 million in time accounts of \$100 thousand or more.

Some of the Corporation's interest-bearing deposits were obtained through brokered transactions and the Corporation's participation in the Certificate of Deposit Account Registry Service (CDARS). Brokered money market deposits totaled \$105.2 million at September 30, 2009 and \$49.5 million at December 31, 2008. CDARS deposits totaled \$200.1 million at September 30, 2009 and \$13.3 million at December 31, 2008. Deposits from foreign sources, primarily Mexico, totaled \$738.7 million at September 30, 2009 and \$653.4 million at December 31, 2008.

Note 7 - Borrowed Funds

In January 2009, the Corporation borrowed an aggregate of \$230 million in three separate variable-rate Federal Home Loan Bank (FHLB) advances (one \$30 million advance and two \$100 million advances). Each of the advances bear interest at a rate per annum equal to three-month

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

LIBOR for the related interest period plus 0.36%, payable quarterly in January, April, July and October commencing in April 2009. Principal payments on the advances are due upon maturity in January 2019; however, the advances are redeemable at the option of the Corporation at any time. The advances are collateralized by a blanket floating lien on all first mortgage loans, certain pledged securities, the FHLB capital stock owned by the Corporation and any funds on deposit with the FHLB.

The weighted-average rate on the advances was 1.03% at September 30, 2009. Concurrent with the advances, the Corporation entered into three separate interest rate swap transactions that effectively fix the interest rates on the advances at a weighted-average rate of 2.85%. See Note 10 - Derivative Financial Instruments for additional information related to the interest rate swaps.

Table of Contents
Note 8 - Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet Risk. In the normal course of business, the Corporation enters into various transactions, which, in accordance with generally accepted accounting principles are not included in its consolidated balance sheets. The Corporation enters into these transactions to meet the financing needs of its customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The Corporation minimizes its exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures.

Commitments to Extend Credit. The Corporation enters into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of the Corporation's commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. Commitments to extend credit totaled \$4.4 billion at September 30, 2009 and \$4.8 billion at December 31, 2008.

Standby Letters of Credit. Standby letters of credit are written conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Corporation would be required to fund the commitment. The maximum potential amount of future payments the Corporation could be required to make is represented by the contractual amount of the commitment. If the commitment were funded, the Corporation would be entitled to seek recovery from the customer. The Corporation's policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements. Standby letters of credit totaled \$251.5 million at September 30, 2009 and \$288.4 million at December 31, 2008.

The Corporation considers the fees collected in connection with the issuance of standby letters of credit to be representative of the fair value of its obligation undertaken in issuing the guarantee. In accordance with applicable accounting standards related to guarantees, the Corporation defers fees collected in connection with the issuance of standby letters of credit. The fees are then recognized in income proportionately over the life of the standby letter of credit agreement. The Corporation had deferred standby letter of credit fees totaling \$1.3 million at September 30, 2009 and \$1.4 million at December 31, 2008, which represents the fair value of the Corporation's potential obligations under the standby letter of credit guarantees.

Lease Commitments. The Corporation leases certain office facilities and office equipment under operating leases. Rent expense for all operating leases totaled \$5.0 million and \$15.3 million for the three and nine months ended September 30, 2009 and \$4.5 million and \$13.8 million for the three and nine months ended September 30, 2008. There has been no significant change in the future minimum lease payments payable by the Corporation since December 31, 2008. See the 2008 Form 10-K for information regarding these commitments.

Litigation. The Corporation is subject to various claims and legal actions that have arisen in the normal course of conducting business. Management does not expect the ultimate disposition of these matters to have a material adverse impact on the Corporation's financial statements.

Note 9 - Regulatory Matters

Regulatory Capital Requirements. Banks and bank holding companies are subject to various regulatory capital requirements administered by state and federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting and other factors.

Quantitative measures established by regulations to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital to adjusted quarterly average assets (as defined).

Cullen/Frost's and Frost Bank's Tier 1 capital consists of shareholders' equity excluding unrealized gains and losses on securities available for sale, the accumulated gain or loss on effective cash flow hedging derivatives, the net actuarial gain/loss on the Corporation's defined benefit post-retirement benefit plans, goodwill and other intangible assets. Tier 1 capital for Cullen/Frost also includes \$132 million of trust preferred securities issued by unconsolidated subsidiary trusts. Cullen/Frost's and Frost Bank's total capital is comprised of Tier 1 capital for each entity plus \$30 million of the Corporation's aggregate \$150 million of 6.875% subordinated notes payable (of which the permissible portion decreases 20% per year during the final five years of the term of the notes) and a permissible portion of the allowance for possible loan losses. The Corporation's aggregate \$100 million of 5.75% fixed-to-floating rate subordinated notes are not included in Tier 1 capital but are included in total

capital of Cullen/Frost.

Table of Contents

The Tier 1 and total capital ratios are calculated by dividing the respective capital amounts by risk-weighted assets. Risk-weighted assets are calculated based on regulatory requirements and include total assets, excluding goodwill and other intangible assets, allocated by risk weight category, and certain off-balance-sheet items (primarily loan commitments). The leverage ratio is calculated by dividing Tier 1 capital by adjusted quarterly average total assets, which exclude goodwill and other intangible assets.

Actual and required capital ratios for Cullen/Frost and Frost Bank were as follows:

	Actual		Minimum Required for Capital Adequacy Purposes		Required to be Well Capitalized Under Prompt Corrective Action Regulations	
	Capital Amount	Ratio	Capital Amount	Ratio	Capital Amount	Ratio
September 30, 2009						
Total Capital to Risk-Weighted Assets						
Cullen/Frost	\$ 1,555,642	13.72%	\$ 907,045	8.00%	N/A	N/A
Frost Bank	1,440,707	12.72	906,252	8.00	\$ 1,132,816	10.00%
Tier 1 Capital to Risk-Weighted Assets						
Cullen/Frost	1,302,520	11.49	453,523	4.00	N/A	N/A
Frost Bank	1,287,585	11.37	453,126	4.00	679,689	6.00
Leverage Ratio						
Cullen/Frost	1,302,520	8.47	615,151	4.00	N/A	N/A
Frost Bank	1,287,585	8.38	614,550	4.00	768,188	5.00
December 31, 2008						
Total Capital to Risk-Weighted Assets						
Cullen/Frost	\$ 1,489,046	12.58%	\$ 946,579	8.00%	N/A	N/A
Frost Bank	1,392,351	11.78	945,853	8.00	\$ 1,182,316	10.00%
Tier 1 Capital to Risk-Weighted Assets						
Cullen/Frost	1,218,802	10.30	473,289	4.00	N/A	N/A
Frost Bank	1,222,107	10.34	472,926	4.00	709,389	6.00
Leverage Ratio						
Cullen/Frost	1,218,802	8.80	554,281	4.00	N/A	N/A
Frost Bank	1,222,107	8.83	553,796	4.00	692,245	5.00
Cullen/Frost believes that, as of September 30, 2009, its bank subsidiary, Frost Bank, was well capitalized based on the ratios presented above.						

Cullen/Frost is subject to the regulatory capital requirements administered by the Federal Reserve, while Frost Bank is subject to the regulatory capital requirements administered by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation. Regulatory authorities can initiate certain mandatory actions if Cullen/Frost or Frost Bank fail to meet the minimum capital requirements, which could have a direct material effect on the Corporation's financial statements. Management believes, as of September 30, 2009, that Cullen/Frost and Frost Bank met all capital adequacy requirements to which they are subject.

Dividend Restrictions. In the ordinary course of business, Cullen/Frost is dependent upon dividends from Frost Bank to provide funds for the payment of dividends to shareholders and to provide for other cash requirements. Banking regulations may limit the amount of dividends that may be paid. Approval by regulatory authorities is required if the effect of dividends declared would cause the regulatory capital of Frost Bank to fall below specified minimum levels. Approval is also required if dividends declared exceed the net profits for that year combined with the retained net profits for the preceding two years. At September 30, 2009, Frost Bank could pay aggregate dividends of up to \$254.5 million to Cullen/Frost without prior regulatory approval.

Trust Preferred Securities. In accordance with the applicable accounting standard related to variable interest entities, the accounts of the Corporation's wholly owned subsidiary trusts, Cullen/Frost Capital Trust II and Summit Bancshares Statutory Trust I, have not been included in the Corporation's consolidated financial statements. However, the \$132.0 million in trust preferred securities issued by these subsidiary trusts have been included in the Tier 1 capital of Cullen/Frost for regulatory capital purposes pursuant to guidance from the Federal Reserve Board.

Table of Contents**Note 10 - Derivative Financial Instruments**

The fair value of derivative positions outstanding is included in accrued interest receivable and other assets and accrued interest payable and other liabilities in the accompanying consolidated balance sheets and in the net change in each of these financial statement line items in the accompanying consolidated statements of cash flows.

Interest Rate Derivatives. The Corporation utilizes interest rate swaps, caps and floors to mitigate exposure to interest rate risk and to facilitate the needs of its customers. The Corporation's objectives for utilizing these derivative instruments is described below:

The Corporation has entered into certain interest rate swap contracts that are matched to specific fixed-rate commercial loans or leases that the Corporation has entered into with its customers. These contracts have been designated as hedging instruments to hedge the risk of changes in the fair value of the underlying commercial loan/lease due to changes in interest rates. The related contracts are structured so that the notional amounts reduce over time to generally match the expected amortization of the underlying loan/lease.

The Corporation has entered into three interest rate swap contracts on variable-rate loans with a total notional amount of \$1.2 billion. The interest rate swap contracts were designated as hedging instruments in cash flow hedges with the objective of protecting the overall cash flows from the Corporation's monthly interest receipts on a rolling portfolio of \$1.2 billion of variable-rate loans outstanding throughout the 84-month period beginning in October 2007 and ending in October 2014 from the risk of variability of those cash flows such that the yield on the underlying loans would remain constant. The desired constant yield is 7.559% in the case of the first contract (underlying loan pool totaling \$650.0 million carrying an interest rate equal to Prime), 8.059% in the case of the second contract (underlying loan pool totaling \$230.0 million carrying an interest rate equal to Prime plus a margin of 50 basis points) and 8.559% in the case of the third contract (underlying loan pool totaling \$320.0 million carrying an interest rate equal to Prime plus a margin of 100 basis points). Under the swaps, the Corporation will receive a fixed interest rate of 7.559% and pay a variable interest rate equal to the daily Federal Reserve Statistical Release H-15 Prime Rate (Prime), with monthly settlements.

The Corporation has entered into an interest rate swap contract on junior subordinated deferrable interest debentures with a total notional amount of \$120.0 million. The interest rate swap contract was designated as a hedging instrument in a cash flow hedge with the objective of protecting the quarterly interest payments on the Corporation's \$120.0 million of junior subordinated deferrable interest debentures issued to Cullen/Frost Capital Trust II throughout the five-year period beginning in December 2008 and ending in December 2013 from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate. Under the swap, the Corporation will pay a fixed interest rate of 5.47% and receive a variable interest rate of three-month LIBOR plus a margin of 1.55% on a total notional amount of \$120.0 million, with quarterly settlements.

During the first quarter of 2009, the Corporation entered into three interest rate swap contracts on FHLB advances with a total notional amount of \$230.0 million. The interest rate swap contracts were designated as hedging instruments in cash flow hedges with the objective of protecting the forty quarterly interest payments on each of the Corporation's variable-rate (three-month LIBOR plus a margin of 0.36%) FHLB advances which, in the aggregate, total \$230 million throughout the forty quarterly periods beginning in January 2009 and ending in January 2019 from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate. Under the swaps, the Corporation will pay a weighted-average fixed interest rate of 2.85% and receive a variable interest rate of three-month LIBOR plus a margin of 0.36% on a total notional amount of \$230.0 million, with quarterly settlements.

The Corporation has entered into certain interest rate swap, cap and floor contracts that are not designated as hedging instruments. These derivative contracts relate to transactions in which the Corporation enters into an interest rate swap, cap and/or floor with a customer while at the same time entering into an offsetting interest rate swap, cap and/or floor with another financial institution. In connection with each swap transaction, the Corporation agrees to pay interest to the customer on a notional amount at a variable interest rate and receive interest from the customer on a similar notional amount at a fixed interest rate. At the same time, the Corporation agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the Corporation's customer to effectively convert a variable rate loan to a fixed rate. Because the Corporation acts as an intermediary for its customer, changes in the fair value of the underlying derivative contracts for the most part offset each other and do not significantly impact the Corporation's results of operations except in certain situations where there is a significant deterioration in the customer's credit worthiness.

Table of Contents

The notional amounts and estimated fair values of interest rate derivative contracts outstanding at September 30, 2009 and December 31, 2008 are presented in the following table. The Corporation obtains dealer quotations to value its interest rate derivative contracts designated as hedges of cash flows, while the fair values of other interest rate derivative contracts are estimated utilizing internal valuation models with observable market data inputs.

	September 30, 2009		December 31, 2008	
	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Interest rate derivatives designated as hedges of fair value:				
Commercial loan/lease interest rate swaps	\$ 138,511	\$ (11,423)	\$ 157,835	\$ (15,777)
Interest rate derivatives designated as hedges of cash flows:				
Interest rate swaps on variable-rate loans	1,200,000	128,495	1,200,000	191,087
Interest rate swap on junior subordinated deferrable interest debentures	120,000	(7,781)	120,000	(10,316)
Interest rate swaps on FHLB advances	230,000	15,297		
Non-hedging interest rate derivatives:				
Commercial loan/lease interest rate swaps	619,629	42,476	587,540	61,248
Commercial loan/lease interest rate swaps	619,629	(42,694)	587,540	(61,248)
Commercial loan/lease interest rate caps	23,164	958	4,236	1
Commercial loan/lease interest rate caps	23,164	(958)	4,236	(1)
Commercial loan/lease interest rate floors	3,164	61	4,236	95
Commercial loan/lease interest rate floors	3,164	(61)	4,236	(95)

The weighted-average rates paid and received for interest rate swaps outstanding at September 30, 2009 were as follows:

	Weighted-Average	
	Interest Rate Paid	Interest Rate Received
Interest rate swaps:		
Fair value hedge commercial loan/lease interest rate swaps	4.85%	0.31%
Cash flow hedge interest rate swaps on variable-rate loans	3.25	7.56
Cash flow hedge interest rate swaps on junior subordinated deferrable interest debentures	5.47	1.91
Cash flow hedge interest rate swaps on FHLB advances	2.85	0.88
Non-hedging interest rate swaps	1.66	5.11
Non-hedging interest rate swaps	5.11	1.66

The weighted-average strike rates for interest rate caps and floors outstanding at September 30, 2009 were as follows:

Non-hedging commercial loan/lease interest rate caps	3.15%
Non-hedging commercial loan/lease interest rate floors	3.29

Table of Contents

Commodity Derivatives. The Corporation enters into commodity swaps and option contracts that are not designated as hedging instruments primarily to accommodate the business needs of its customers. Upon the origination of a commodity swap or option contract with a customer, the Corporation simultaneously enters into an offsetting contract with a third party to mitigate the exposure to fluctuations in commodity prices.

The notional amounts and estimated fair values of commodity derivative positions outstanding are presented in the following table. The Corporation obtains dealer quotations to value its commodity derivative positions.

	Notional Units	September 30, 2009		December 31, 2008	
		Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Non-hedging commodity swaps:					
Oil	Barrels	104	\$ 1,025	153	\$ 2,268
Oil	Barrels	104	(1,002)	153	(2,230)
Natural gas	MMBTUs	345	425	1,640	1,642
Natural gas	MMBTUs	345	(416)	1,640	(1,590)
Non-hedging commodity options:					
Oil	Barrels	1,204	8,400	1,184	23,295
Oil	Barrels	1,204	(8,400)	1,184	(23,268)
Natural gas	MMBTUs	8,180	5,408	4,300	2,656
Natural gas	MMBTUs	8,180	(5,408)	4,300	(2,656)

Foreign Currency Derivatives. The Corporation enters into foreign currency forward contracts that are not designated as hedging instruments primarily to accommodate the business needs of its customers. Upon the origination of a foreign currency forward contract with a customer, the Corporation simultaneously enters into an offsetting contract with a third party to negate the exposure to fluctuations in foreign currency exchange rates. The Corporation also utilizes foreign currency forward contracts that are not designated as hedging instruments to mitigate the economic effect of fluctuations in foreign currency exchange rates on certain short-term, non-U.S. dollar denominated loans. The notional amounts and fair values of open foreign currency forward contracts were not significant at September 30, 2009 and December 31, 2008.

Gains, Losses and Derivative Cash Flows. For fair value hedges, the changes in the fair value of both the derivative hedging instrument and the hedged item are included in other non-interest income or other non-interest expense. The extent that such changes in fair value do not offset represents hedge ineffectiveness. Net cash flows from interest rate swaps on commercial loans/leases designated as hedging instruments in effective hedges of fair value are included in interest income on loans. For cash flow hedges, the effective portion of the gain or loss due to changes in the fair value of the derivative hedging instrument is included in other comprehensive income, while the ineffective portion (indicated by the excess of the cumulative change in the fair value of the derivative over that which is necessary to offset the cumulative change in expected future cash flows on the hedge transaction) is included in other non-interest income or other non-interest expense. Net cash flows from interest rate swaps on variable-rate loans designated as hedging instruments in effective hedges of cash flows are included in interest income on loans. Net cash flows from the interest rate swap on junior subordinated deferrable interest debentures designated as a hedging instrument in an effective hedge of cash flows are included in interest expense on junior subordinated deferrable interest debentures. Net cash flows from interest rate swaps on FHLB advances designated as hedging instruments in effective hedges of cash flows are included in interest expense on other long-term borrowings. For non-hedging derivative instruments, gains and losses due to changes in fair value and all cash flows are included in other non-interest income and other non-interest expense.

Amounts included in the consolidated statements of income related to interest rate derivatives designated as hedges of fair value were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Commercial loan/lease interest rate swaps:				
Amount of gain (loss) included in interest income on loans	\$ (1,484)	\$ (786)	\$ (4,441)	\$ (2,243)
Amount of (gain) loss included in other non-interest expense	23	15	419	2

Table of Contents

Amounts included in the consolidated statements of income and in other comprehensive income for the period related to interest rate derivatives designated as hedges of cash flows were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Interest rate swaps/caps/floors on variable-rate loans:				
Amount reclassified from accumulated other comprehensive income to interest income on loans	\$ 13,214	\$ 7,581	\$ 39,237	\$ 19,307
Amount of gain (loss) recognized in other comprehensive income	27,460	38,084	(23,388)	54,243
Interest rate swaps on junior subordinated deferrable interest debentures:				
Amount reclassified from accumulated other comprehensive income to interest expense on junior subordinated deferrable interest debentures	1,028		2,503	
Amount of gain (loss) recognized in other comprehensive income	(2,655)		387	
Interest rate swaps on FHLB advances:				
Amount reclassified from accumulated other comprehensive income to interest expense on other long-term borrowings	1,114		2,552	
Amount of gain (loss) recognized in other comprehensive income	(7,295)		13,767	

No ineffectiveness related to interest rate derivatives designated as hedges of cash flows was recognized in the consolidated statements of income during the reported periods. The accumulated net after-tax gain related to effective cash flow hedges included in accumulated other comprehensive income totaled \$87.8 million at September 30, 2009 and \$116.0 million at December 31, 2008.

As stated above, the Corporation enters into non-hedge related derivative positions primarily to accommodate the business needs of its customers. Upon the origination of a derivative contract with a customer, the Corporation simultaneously enters into an offsetting derivative contract with a third party. The Corporation recognizes immediate income based upon the difference in the bid/ask spread of the underlying transactions with its customers and the third party. Because the Corporation acts only as an intermediary for its customer, subsequent changes in the fair value of the underlying derivative contracts for the most part offset each other and do not significantly impact the Corporation's results of operations except in certain situations where there is a significant deterioration in the customer's credit worthiness.

Amounts included in the consolidated statements of income related to non-hedging interest rate and commodity derivative instruments were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Non-hedging interest rate derivatives:				
Other non-interest income	\$ 249	\$ 126	\$ 879	\$ 1,258
Other non-interest expense	155		238	
Non-hedging commodity derivatives:				
Other non-interest income	35	54	277	109

Counterparty Credit Risk. Derivative contracts involve the risk of dealing with both bank customers and institutional derivative counterparties and their ability to meet contractual terms. Institutional counterparties must have an investment grade credit rating and be approved by the Corporation's Asset/Liability Management Committee. The Corporation's credit exposure on interest rate swaps is limited to the net favorable value and interest payments of all swaps by each counterparty, while the Corporation's credit exposure on commodity swaps/options is limited to the net favorable value of all swaps/options by each counterparty. Credit exposure may be reduced by the amount of collateral pledged by the counterparty. There are no credit-risk-related contingent features associated with any of the Corporation's derivative contracts.

Table of Contents

The Corporation's credit exposure relating to interest rate swaps and commodity swaps/options with bank customers was approximately \$45.9 million at September 30, 2009. This credit exposure is partly mitigated as transactions with customers are generally secured by the collateral, if any, securing the underlying transaction being hedged. The Corporation's credit exposure, net of collateral pledged, relating to interest rate swaps and commodity swaps/options with upstream financial institution counterparties was approximately \$1.7 million at September 30, 2009. Collateral levels for upstream financial institution counterparties are monitored and adjusted as necessary.

The aggregate fair value of securities posted as collateral by the Corporation related to derivative contracts totaled \$16.4 million at September 30, 2009. At such date, the Corporation also had \$6.8 million in cash collateral on deposit with other financial institution counterparties.

Note 11 - Earnings Per Common Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net earnings allocated to common stock by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include non-vested stock awards and deferred stock units, though no actual shares of common stock related to deferred stock units have been issued. Non-vested stock awards and deferred stock units are considered participating securities because holders of these securities receive non-forfeitable dividends at the same rate as holders of the Corporation's common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method.

The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Distributed earnings allocated to common stock	\$ 25,619	\$ 24,760	\$ 76,016	\$ 72,901
Undistributed earnings allocated to common stock	18,899	24,008	51,012	80,773
Net earnings allocated to common stock	\$ 44,518	\$ 48,768	\$ 127,028	\$ 153,674
Weighted-average shares outstanding for basic earnings per common share	59,537,287	58,932,372	59,353,464	58,735,792
Dilutive effect of stock compensation	91,162	297,996	68,985	360,991
Weighted-average shares outstanding for diluted earnings per common share	59,628,449	59,230,368	59,422,449	59,096,783

Note 12 - Stock-Based Compensation

A combined summary of activity in the Corporation's active stock plans is presented in the following table.

	Shares Available for Grant	Non-Vested Stock Awards Outstanding		Stock Options Outstanding	
		Number of Shares	Weighted- Average Grant-Date Fair Value	Number of Shares	Weighted- Average Exercise Price
Balance, January 1, 2009	963,825	229,000	\$ 52.16	4,272,050	\$ 49.98
Shares authorized - 2005 Plan Granted	3,310,725 (7,238)				
Stock options exercised				(417,425)	37.98

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Stock awards vested					
Forfeited	21,000			(21,000)	52.81
Cancelled/expired	(3,475)			(5,875)	52.13
Balance, September 30, 2009	4,284,837	229,000	52.16	3,827,750	51.27

During the second quarter of 2009, the Corporation awarded non-employee directors a total of 7,238 deferred stock units. As of September 30, 2009, 12,688 deferred stock units were outstanding. Upon retirement from the Corporation's board of directors, non-employee directors will receive one share of the Corporation's common stock for each deferred stock unit held.

Table of Contents

The deferred stock units were fully vested upon being awarded and will receive equivalent dividend payments as such dividends are declared on the Corporation's common stock.

During the nine months ended September 30, 2009 and 2008, proceeds from stock option exercises totaled \$15.9 million and \$34.5 million. During the nine months ended September 30, 2009, all of the shares issued in connection with stock option exercises were issued from available treasury stock.

Stock-based compensation expense totaled \$3.1 million and \$9.5 million during the three and nine months ended September 30, 2009 and \$2.4 million and \$7.4 million during the three and nine months ended September 30, 2008. Stock-based compensation expense is recognized ratably over the requisite service period for all awards. Unrecognized stock-based compensation expense related to stock options totaled \$15.2 million at September 30, 2009, while unrecognized stock-based compensation expense related to non-vested stock awards totaled \$4.9 million at September 30, 2009.

Note 13 - Defined Benefit Plans

The components of the combined net periodic benefit cost for the Corporation's qualified and non-qualified defined benefit pension plans were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Expected return on plan assets, net of expenses	\$ (2,281)	\$ (2,310)	\$ (6,844)	\$ (6,930)
Interest cost on projected benefit obligation	1,993	1,935	5,979	5,806
Net amortization and deferral	1,057	307	3,173	922
Net periodic benefit cost	\$ 769	\$ (68)	\$ 2,308	\$ (202)

The Corporation's non-qualified defined benefit pension plan is not funded. No contributions to the qualified defined benefit pension plan were made during the nine months ended September 30, 2009. The Corporation does not expect to make any contributions during the remainder of 2009.

Note 14 - Income Taxes

Income tax expense was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Current income tax expense	\$ 10,897	\$ 27,481	\$ 43,234	\$ 72,760
Deferred income tax expense (benefit)	(1,290)	(6,307)	(6,492)	(5,359)
Income tax expense as reported	\$ 9,607	\$ 21,174	\$ 36,742	\$ 67,401
Effective tax rate	17.7%	30.2%	22.4%	30.4%

Net deferred tax liabilities totaled \$87.0 million at September 30, 2009 and \$61.3 million at December 31, 2008. No valuation allowance was recorded against deferred tax assets at September 30, 2009 as management believes that it is more likely than not that all of the deferred tax assets will be realized because they were supported by recoverable taxes paid in prior years.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The Corporation files income tax returns in the U.S. federal jurisdiction. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for years before 2006.

Note 15 - Operating Segments

The Corporation is managed under a matrix organizational structure whereby significant lines of business, including Banking and the Financial Management Group (FMG), overlap a regional reporting structure. The regions are primarily based upon geographic location and include Austin, Corpus Christi, Dallas, Fort Worth, Houston, Rio Grande Valley, San Antonio and Statewide. The Corporation is primarily managed based on the line of business structure. In that regard, all regions have the same lines of business, which have the same product and service offerings, have similar types and classes of customers and utilize similar service delivery methods. Pricing guidelines for products and services are the same across all regions. The regional reporting structure is primarily a means to scale the lines of business to provide a local, community focus for customer relations and business development.

Table of Contents

The Corporation has two primary operating segments, Banking and FMG, that are delineated by the products and services that each segment offers. The Banking operating segment includes both commercial and consumer banking services, Frost Insurance Agency and Frost Securities, Inc. Commercial banking services are provided to corporations and other business clients and include a wide array of lending and cash management products. Consumer banking services include direct lending and depository services. Frost Insurance Agency provides insurance brokerage services to individuals and businesses covering corporate and personal property and casualty products, as well as group health and life insurance products. Frost Securities, Inc. provides advisory and private equity services to middle market companies. The FMG operating segment includes fee-based services within private trust, retirement services, and financial management services, including personal wealth management and brokerage services. The third operating segment, Non-Banks, is for the most part the parent holding company, as well as certain other insignificant non-bank subsidiaries of the parent that, for the most part, have little or no activity. The parent company's principal activities include the direct and indirect ownership of the Corporation's banking and non-banking subsidiaries and the issuance of debt and equity. Its principal source of revenue is dividends from its subsidiaries.

The accounting policies of each reportable segment are the same as those of the Corporation except for the following items, which impact the Banking and FMG segments: (i) expenses for consolidated back-office operations and general overhead-type expenses such as executive administration, accounting and internal audit are allocated to operating segments based on estimated uses of those services, (ii) income tax expense for the individual segments is calculated essentially at the statutory rate, and (iii) the parent company records the tax expense or benefit necessary to reconcile to the consolidated total.

The Corporation uses a match-funded transfer pricing process to assess operating segment performance. The process helps the Corporation to (i) identify the cost or opportunity value of funds within each business segment, (ii) measure the profitability of a particular business segment by relating appropriate costs to revenues, (iii) evaluate each business segment in a manner consistent with its economic impact on consolidated earnings, and (iv) enhance asset and liability pricing decisions.

Summarized operating results by segment were as follows:

	Banking	FMG	Non-Banks	Consolidated
Revenues from (expenses to) external customers:				
Three months ended:				
September 30, 2009	\$ 184,157	\$ 22,336	\$ (3,013)	\$ 203,480
September 30, 2008	183,216	30,948	(2,113)	212,051
Nine months ended:				
September 30, 2009	\$ 544,439	\$ 69,582	\$ (8,575)	\$ 605,446
September 30, 2008	532,006	89,998	(7,936)	614,068
Net income (loss):				
Three months ended:				
September 30, 2009	\$ 44,901	\$ 1,789	\$ (1,991)	\$ 44,699
September 30, 2008	42,924	7,417	(1,376)	48,965
Nine months ended:				
September 30, 2009	\$ 127,912	\$ 6,404	\$ (6,776)	\$ 127,540
September 30, 2008	140,062	20,748	(6,518)	154,292

Note 16 - Fair Value Measurements

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Corporation utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Table of Contents

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Corporation's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Corporation's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Corporation's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein. A more detailed description of the valuation methodologies used for assets and liabilities measured at fair value is set forth in the 2008 Form 10-K.

Financial Assets and Financial Liabilities: The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Securities available for sale:				
U.S. Treasury	\$ 425,145	\$	\$	\$ 425,145
U.S. government agencies and corporations		2,324,993		2,324,993
States and political subdivisions		1,734,076		1,734,076
Other		47,473		47,473
Trading account securities:				
U.S. Treasury	14,914			14,914
Derivative assets		201,356	1,189	202,545
Derivative liabilities		78,143		78,143

The following table reconciles the beginning and ending balances of derivative assets measured at fair value on a recurring basis using significant unobservable (Level 3) inputs during the nine months ended September 30, 2009:

Balance, beginning of period	\$
Transfers into Level 3	1,354
Net unrealized gains included in other assets	53
Net realized losses included in non-interest expense	(218)
Balance, end of period	\$ 1,189

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets and liabilities measured at fair value on a non-recurring basis during the nine months ended September 30, 2009 include certain impaired loans reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. During the nine months ended September 30, 2009, certain impaired loans were remeasured and reported at fair value through a specific valuation

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

allowance allocation of the allowance for possible loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of \$11.8 million were reduced by specific valuation allowance allocations during the nine months ended September 30, 2009 totaling \$3.1 million to a total reported fair value of \$8.7 million based on collateral valuations utilizing Level 2 valuation inputs. Impaired loans with a carrying value of \$34.7 million were reduced by specific valuation allowance allocations during the nine months ended September 30, 2009 totaling \$12.8 million to a total reported fair value of \$21.9 million based on collateral valuations utilizing Level 3 valuation inputs.

Table of Contents

Non-Financial Assets and Non-Financial Liabilities: Certain non-financial assets measured at fair value on a non-recurring basis include foreclosed assets (upon initial recognition or subsequent impairment), non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment.

During the nine months ended September 30, 2009, certain foreclosed assets, upon initial recognition, were remeasured and reported at fair value through a charge-off to the allowance for possible loan losses based upon the fair value of the foreclosed asset. The fair value of a foreclosed asset, upon initial recognition, is estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. Foreclosed assets measured at fair value upon initial recognition totaled \$25.7 million (utilizing Level 2 valuation inputs) during the nine months ended September 30, 2009. In connection with the measurement and initial recognition of the foregoing foreclosed assets, the Corporation recognized charge-offs of the allowance for possible loan losses totaling \$4.1 million. Foreclosed assets totaling \$2.9 million were remeasured at fair value subsequent to initial recognition during the nine months ended September 30, 2009. In connection with the remeasurement of these assets, the Corporation recognized losses, included in other non-interest expense, totaling \$1.1 million during the nine months ended September 30, 2009.

FASB ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments is set forth in the 2008 Form 10-K.

The estimated fair values of financial instruments were as follows:

	September 30, 2009		December 31, 2008	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Cash and cash equivalents	\$ 1,789,291	\$ 1,789,291	\$ 1,237,331	\$ 1,237,331
Securities	4,552,952	4,553,091	3,576,029	3,576,029
Loans, net	8,395,486	8,435,222	8,733,838	8,776,473
Cash surrender value of life insurance policies	124,270	124,270	121,197	121,197
Interest rate swaps on variable rate loans designated as hedges of cash flows	128,495	128,495	191,087	191,087
Non-hedging commercial loan/lease interest rate swaps, caps and floors	43,495	43,495	61,344	61,344
Interest rate swaps on FHLB advances	15,297	15,297		
Commodity and foreign exchange derivatives	15,258	15,258	29,861	29,861
Accrued interest receivable	50,013	50,013	55,632	55,632
Financial liabilities:				
Deposits	12,904,458	12,908,734	11,508,937	11,515,591
Federal funds purchased and repurchase agreements	452,921	452,921	1,073,279	1,073,279
Junior subordinated deferrable interest debentures	136,084	136,084	136,084	136,084
Subordinated notes payable and other borrowings	486,566	483,870	256,577	210,336
Interest rate swap on junior subordinated deferrable interest debentures designated as a hedge of cash flows	7,781	7,781	10,316	10,316
Commercial loan/lease interest rate swaps designated as hedges of fair value	11,423	11,423	15,777	15,777
Non-hedging commercial loan/lease interest rate swaps, caps and floors	43,713	43,713	61,344	61,344
Commodity and foreign exchange derivatives	15,230	15,230	29,744	29,744
Accrued interest payable	12,745	12,745	20,006	20,006

Table of Contents**Note 17 - New Authoritative Accounting Guidance**

As discussed in Note 1 - Significant Accounting Policies, on July 1, 2009, the Accounting Standards Codification became FASB's officially recognized source of authoritative U.S. generally accepted accounting principles applicable to all public and non-public non-governmental entities, superseding existing FASB, AICPA, EITF and related literature. Rules and interpretive releases of the SEC under the authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. All other accounting literature is considered non-authoritative. The switch to the ASC affects the way companies refer to U.S. GAAP in financial statements and accounting policies. Citing particular content in the ASC involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure.

FASB ASC Topic 260, Earnings Per Share. On January 1, 2009, the Corporation adopted new authoritative accounting guidance under FASB ASC Topic 260, Earnings Per Share, which provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. See Note 1 - Significant Accounting Policies.

FASB ASC Topic 320, Investments - Debt and Equity Securities. New authoritative accounting guidance under ASC Topic 320, Investments - Debt and Equity Securities, (i) changes existing guidance for determining whether an impairment is other than temporary to debt securities and (ii) replaces the existing requirement that the entity's management assert it has both the intent and ability to hold an impaired security until recovery with a requirement that management assert: (a) it does not have the intent to sell the security; and (b) it is more likely than not it will not have to sell the security before recovery of its cost basis. Under ASC Topic 320, declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. The Corporation adopted the provisions of the new authoritative accounting guidance under ASC Topic 320 during the first quarter of 2009. Adoption of the new guidance did not significantly impact the Corporation's financial statements.

FASB ASC Topic 715, Compensation - Retirement Benefits. New authoritative accounting guidance under ASC Topic 715, Compensation - Retirement Benefits, provides guidance related to an employer's disclosures about plan assets of defined benefit pension or other post-retirement benefit plans. Under ASC Topic 715, disclosures should provide users of financial statements with an understanding of how investment allocation decisions are made, the factors that are pertinent to an understanding of investment policies and strategies, the major categories of plan assets, the inputs and valuation techniques used to measure the fair value of plan assets, the effect of fair value measurements using significant unobservable inputs on changes in plan assets for the period and significant concentrations of risk within plan assets. The disclosures required by ASC Topic 715 will be included in the Corporation's financial statements beginning with the financial statements for the year-ended December 31, 2009.

FASB ASC Topic 805, Business Combinations. On January 1, 2009, new authoritative accounting guidance under ASC Topic 805, Business Combinations, became applicable to the Corporation's accounting for business combinations closing on or after January 1, 2009. ASC Topic 805 applies to all transactions and other events in which one entity obtains control over one or more other businesses. ASC Topic 805 requires an acquirer, upon initially obtaining control of another entity, to recognize the assets, liabilities and any non-controlling interest in the acquiree at fair value as of the acquisition date. Contingent consideration is required to be recognized and measured at fair value on the date of acquisition rather than at a later date when the amount of that consideration may be determinable beyond a reasonable doubt. This fair value approach replaces the cost-allocation process required under previous accounting guidance whereby the cost of an acquisition was allocated to the individual assets acquired and liabilities assumed based on their estimated fair value. ASC Topic 805 requires acquirers to expense acquisition-related costs as incurred rather than allocating such costs to the assets acquired and liabilities assumed, as was previously the case under prior accounting guidance. Assets acquired and liabilities assumed in a business combination that arise from contingencies are to be recognized at fair value if fair value can be reasonably estimated. If fair value of such an asset or liability cannot be reasonably estimated, the asset or liability would generally be recognized in accordance with ASC Topic 450, Contingencies. Under ASC Topic 805, the requirements of ASC Topic 420, Exit or Disposal Cost Obligations, would have to be met in order to accrue for a restructuring plan in purchase accounting. Pre-acquisition contingencies are to be recognized at fair value, unless it is a non-contractual contingency that is not likely to materialize, in which case, nothing should be recognized in purchase accounting and, instead, that contingency would be subject to the probable and estimable recognition criteria of ASC Topic 450, Contingencies.

FASB ASC Topic 810, Consolidation. New authoritative accounting guidance under ASC Topic 810, Consolidation, amended prior guidance to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. Under ASC Topic 810, a non-controlling interest in a subsidiary, which is sometimes referred to as minority interest, is an ownership interest in the consolidated entity that should be reported as a component of equity in the consolidated financial statements. Among other requirements, ASC Topic 810 requires consolidated net income

Table of Contents

to be reported at amounts that include the amounts attributable to both the parent and the non-controlling interest. It also requires disclosure, on the face of the consolidated income statement, of the amounts of consolidated net income attributable to the parent and to the non-controlling interest. The new authoritative accounting guidance under ASC Topic 810 became effective for the Corporation on January 1, 2009 and did not have a significant impact on the Corporation's financial statements.

Further new authoritative accounting guidance under ASC Topic 810 amends prior guidance to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity's financial statements. The new authoritative accounting guidance under ASC Topic 810 will be effective January 1, 2010 and is not expected to have a significant impact on the Corporation's financial statements.

FASB ASC Topic 815, Derivatives and Hedging. New authoritative accounting guidance under ASC Topic 815, Derivatives and Hedging, amends prior guidance to amend and expand the disclosure requirements for derivatives and hedging activities to provide greater transparency about (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedge items are accounted for under ASC Topic 815, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, the new authoritative accounting guidance requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. The new authoritative accounting guidance under ASC Topic 815 became effective for the Corporation on January 1, 2009 and the required disclosures are reported in Note 10 - Derivative Financial Instruments.

FASB ASC Topic 820, Fair Value Measurements and Disclosures. New authoritative accounting guidance under ASC Topic 820, Fair Value Measurements and Disclosures, affirms that the objective of fair value when the market for an asset is not active is the price that would be received to sell the asset in an orderly transaction, and clarifies and includes additional factors for determining whether there has been a significant decrease in market activity for an asset when the market for that asset is not active. ASC Topic 820 requires an entity to base its conclusion about whether a transaction was not orderly on the weight of the evidence. The new accounting guidance amended prior guidance to expand certain disclosure requirements. The Corporation adopted the new authoritative accounting guidance under ASC Topic 820 during the first quarter of 2009. Adoption of the new guidance did not significantly impact the Corporation's financial statements.

Further new authoritative accounting guidance (Accounting Standards Update No. 2009-5) under ASC Topic 820 provides guidance for measuring the fair value of a liability in circumstances in which a quoted price in an active market for the identical liability is not available. In such instances, a reporting entity is required to measure fair value utilizing a valuation technique that uses (i) the quoted price of the identical liability when traded as an asset, (ii) quoted prices for similar liabilities or similar liabilities when traded as assets, or (iii) another valuation technique that is consistent with the existing principles of ASC Topic 820, such as an income approach or market approach. The new authoritative accounting guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The forgoing new authoritative accounting guidance under ASC Topic 820 will be effective for the Corporation's financial statements beginning October 1, 2009 and is not expected to have a significant impact on the Corporation's financial statements.

FASB ASC Topic 825 Financial Instruments. New authoritative accounting guidance under ASC Topic 825, Financial Instruments, requires an entity to provide disclosures about the fair value of financial instruments in interim financial information and amends prior guidance to require those disclosures in summarized financial information at interim reporting periods. The new interim disclosures required under Topic 825 are included in Note 16 - Fair Value Measurements.

FASB ASC Topic 855, Subsequent Events. New authoritative accounting guidance under ASC Topic 855, Subsequent Events, establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. ASC Topic 855 defines (i) the period after the balance sheet date during which a reporting entity's management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and (iii) the disclosures an entity should make about events or transactions that occurred after the balance sheet date. The new authoritative accounting guidance under ASC Topic 855 became effective for the Corporation's financial statements for periods ending after June 15, 2009 and did not have a significant impact on the Corporation's financial statements.

Table of Contents

FASB ASC Topic 860, Transfers and Servicing. New authoritative accounting guidance under ASC Topic 860, Transfers and Servicing, amends prior accounting guidance to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. The new authoritative accounting guidance eliminates the concept of a qualifying special-purpose entity and changes the requirements for derecognizing financial assets. The new authoritative accounting guidance also requires additional disclosures about all continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. The new authoritative accounting guidance under ASC Topic 860 will be effective January 1, 2010 and is not expected to have a significant impact on the Corporation's financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Financial Review

Cullen/Frost Bankers, Inc.

The following discussion should be read in conjunction with the Corporation's consolidated financial statements, and notes thereto, for the year ended December 31, 2008, included in the 2008 Form 10-K. Operating results for the three and nine months ended September 30, 2009 are not necessarily indicative of the results for the year ending December 31, 2009 or any future period.

Dollar amounts in tables are stated in thousands, except for per share amounts.

Forward-Looking Statements and Factors that Could Affect Future Results

Certain statements contained in this Quarterly Report on Form 10-Q that are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Act"), notwithstanding that such statements are not specifically identified as such. In addition, certain statements may be contained in the Corporation's future filings with the SEC, in press releases, and in oral and written statements made by or with the approval of the Corporation that are not statements of historical fact and constitute forward-looking statements within the meaning of the Act. Examples of forward-looking statements include, but are not limited to:

(i) projections of revenues, expenses, income or loss, earnings or loss per share, the payment or nonpayment of dividends, capital structure and other financial items; (ii) statements of plans, objectives and expectations of Cullen/Frost or its management or Board of Directors, including those relating to products or services; (iii) statements of future economic performance; and (iv) statements of assumptions underlying such statements. Words such as "believes", "anticipates", "expects", "intends", "targeted", "continue", "remain", "will", "should", "may" and other similar words are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those in such statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

Local, regional, national and international economic conditions and the impact they may have on the Corporation and its customers and the Corporation's assessment of that impact.

Volatility and disruption in national and international financial markets.

Government intervention in the U.S. financial system.

Changes in the level of non-performing assets and charge-offs.

Changes in estimates of future reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements.

The effects of and changes in trade and monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve Board.

Inflation, interest rate, securities market and monetary fluctuations.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Political instability.

Acts of God or of war or terrorism.

The timely development and acceptance of new products and services and perceived overall value of these products and services by users.

Changes in consumer spending, borrowings and savings habits.

Changes in the financial performance and/or condition of the Corporation's borrowers.

Technological changes.

Acquisitions and integration of acquired businesses.

The ability to increase market share and control expenses.

Changes in the competitive environment among financial holding companies and other financial service providers.

The effect of changes in laws and regulations (including laws and regulations concerning taxes, banking, securities and insurance) with which the Corporation and its subsidiaries must comply.

The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Changes in the Corporation's organization, compensation and benefit plans.

The costs and effects of legal and regulatory developments including the resolution of legal proceedings or regulatory or other governmental inquiries and the results of regulatory examinations or reviews.

Greater than expected costs or difficulties related to the integration of new products and lines of business.

The Corporation's success at managing the risks involved in the foregoing items.

Table of Contents

Forward-looking statements speak only as of the date on which such statements are made. The Corporation undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, or to reflect the occurrence of unanticipated events.

Application of Critical Accounting Policies and Accounting Estimates

The accounting and reporting policies followed by the Corporation conform, in all material respects, to accounting principles generally accepted in the United States and to general practices within the financial services industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. While the Corporation bases estimates on historical experience, current information and other factors deemed to be relevant, actual results could differ from those estimates.

The Corporation considers accounting estimates to be critical to reported financial results if (i) the accounting estimate requires management to make assumptions about matters that are highly uncertain and (ii) different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, could have a material impact on the Corporation's financial statements. Accounting policies related to the allowance for possible loan losses are considered to be critical, as these policies involve considerable subjective judgment and estimation by management.

For additional information regarding critical accounting policies, refer to Note 1 - Summary of Significant Accounting Policies in the notes to consolidated financial statements and the sections captioned Application of Critical Accounting Policies and Allowance for Possible Loan Losses in Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2008 Form 10-K. There have been no significant changes in the Corporation's application of critical accounting policies related to the allowance for possible loan losses since December 31, 2008.

Overview

A discussion of the Corporation's results of operations is presented below. Certain reclassifications have been made to make prior periods comparable. Taxable-equivalent adjustments are the result of increasing income from tax-free loans and securities by an amount equal to the taxes that would be paid if the income were fully taxable based on a 35% federal income tax rate, thus making tax-exempt asset yields comparable to taxable asset yields. All of the Corporation's acquisitions during the reported periods were accounted for as purchase transactions and, as such, their related results of operations are included from the date of acquisition.

Table of Contents**Results of Operations**

Net income totaled \$44.7 million, or \$0.75 diluted per share, for the three months ended September 30, 2009 compared to \$49.0 million, or \$0.83 diluted per share, for the three months ended September 30, 2008 and \$37.9 million, or \$0.63 diluted per share, for the three months ended June 30, 2009. Net income totaled \$127.5 million, or \$2.14 diluted per share, for the nine months ended September 30, 2009 compared to \$154.3 million, or \$2.61 diluted per share, for the nine months ended September 30, 2008.

Selected income statement data and other selected data for the comparable periods was as follows:

	Three Months Ended			Nine Months Ended	
	September 30, 2009	June 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
Taxable-equivalent net interest income	\$ 144,915	\$ 144,325	\$ 139,655	\$ 426,972	\$ 410,647
Taxable-equivalent adjustment	10,926	9,861	4,919	28,887	14,703
Net interest income	133,989	134,464	134,736	398,085	395,944
Provision for possible loan losses	16,940	16,601	18,940	43,142	29,273
Net interest income after provision for possible loan losses	117,049	117,863	115,796	354,943	366,671
Non-interest income	69,491	68,006	77,315	207,361	218,124
Non-interest expense	132,234	136,289	122,972	398,022	363,102
Income before income taxes	54,306	49,580	70,139	164,282	221,693
Income taxes	9,607	11,721	21,174	36,742	67,401
Net income	\$ 44,699	\$ 37,859	\$ 48,965	\$ 127,540	\$ 154,292
Earnings per common share - basic	\$ 0.75	\$ 0.64	\$ 0.83	\$ 2.14	\$ 2.62
Earnings per common share - diluted	0.75	0.63	0.83	2.14	2.61
Dividends per common share	0.43	0.43	0.42	1.28	1.24
Return on average assets	1.11%	0.98%	1.44%	1.10%	1.53%
Return on average equity	9.70	8.35	12.39	9.45	13.23
Average shareholder's equity to average total assets	11.40	11.72	11.66	11.65	11.57

Net income decreased \$4.3 million, or 8.7%, for the three months ended September 30, 2009 and decreased \$26.8 million, or 17.3%, for nine months ended September 30, 2009 compared to the same periods in 2008. The decrease during the three months ended September 30, 2009 was primarily the result of a \$9.3 million increase in non-interest expense, a \$7.8 million decrease in non-interest income and a \$747 thousand decrease in net interest income partly offset by an \$11.6 million decrease in income tax expense and a \$2.0 million decrease in the provision for possible loan losses. The decrease during the nine months ended September 30, 2009 was primarily the result of a \$34.9 million increase in non-interest expense, a \$13.9 million increase in the provision for possible loan losses and a \$10.8 million decrease in non-interest income partly offset by a \$30.7 million decrease in income tax expense and a \$2.1 million increase in net interest income.

Net income for the third quarter of 2009 increased \$6.8 million, or 18.1%, from the second quarter of 2009. The increase was primarily the result of a \$4.1 million decrease in non-interest expense, a \$1.5 million increase in non-interest income and a \$2.1 million decrease in income tax expense partly offset by a \$475 thousand decrease in net interest income and a \$339 thousand increase in the provision for possible loan losses.

Details of the changes in the various components of net income are further discussed below.

Net Interest Income

Net interest income is the difference between interest income on earning assets, such as loans and securities, and interest expense on liabilities, such as deposits and borrowings, which are used to fund those assets. Net interest income is the Corporation's largest source of revenue,

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

representing 65.7% of total revenue during the first nine months of 2009. Net interest margin is the ratio of taxable-equivalent net interest income to average earning assets for the period. The level of interest rates and the volume and mix of earning assets and interest-bearing liabilities impact net interest income and net interest margin.

The Federal Reserve Board influences the general market rates of interest, including the deposit and loan rates offered by many financial institutions. The Corporation's loan portfolio is significantly affected by changes in the prime interest rate. The prime interest rate, which is the rate offered on loans to borrowers with strong credit, began 2008 at 7.25% and decreased

Table of Contents

200 basis points in the first quarter, 25 basis points in the second quarter and 175 basis points in the fourth quarter to end the year at 3.25%. During the first nine months of 2009, the prime interest rate remained at 3.25% for the entire period. The Corporation's loan portfolio is also impacted, to a lesser extent, by changes in the London Interbank Offered Rate (LIBOR). At September 30, 2009, the one-month and three-month U.S. dollar LIBOR rates were 0.25% and 0.29%, respectively, while at September 30, 2008, the one-month and three-month U.S. dollar LIBOR rates were 3.93% and 4.05%, respectively. The intended federal funds rate, which is the cost of immediately available overnight funds, has moved in a similar manner to the prime interest rate. It began 2008 at 4.25% and decreased 200 basis points in the first quarter, 25 basis points in the second quarter and 175 to 200 basis in the fourth quarter to end the year at zero to 0.25%. During the first nine months of 2009, the intended federal funds rate remained at zero to 0.25% for the entire period.

The Corporation's balance sheet has historically been asset sensitive, meaning that earning assets generally reprice more quickly than interest-bearing liabilities. Therefore, the Corporation's net interest margin was likely to increase in sustained periods of rising interest rates and decrease in sustained periods of declining interest rates. In an effort to make the Corporation's balance sheet less sensitive to changes in interest rates, the Corporation entered into various interest rate swaps which effectively convert certain floating rate loans and borrowings into fixed rate instruments for a period of time (see Note 10 - Derivative Financial Instruments). As a result, the Corporation's balance sheet is more interest-rate neutral and changes in interest rates are expected to have a less significant impact on the Corporation's net interest margin than would have otherwise been the case. The Corporation is primarily funded by core deposits, with non-interest-bearing demand deposits historically being a significant source of funds. This lower-cost funding base is expected to have a positive impact on the Corporation's net interest income and net interest margin in a rising interest rate environment. The Corporation currently believes it is reasonably possible the federal funds rate and the prime interest rate will remain at the current, historically-low levels for the foreseeable future; however, there can be no assurance to that effect or as to the magnitude of any change in market interest rates should a change occur, as such changes are dependent upon a variety of factors that are beyond the Corporation's control. Further analysis of the components of the Corporation's net interest margin is presented below.

The following table presents the changes in taxable-equivalent net interest income and identifies the changes due to differences in the average volume of earning assets and interest-bearing liabilities and the changes due to changes in the average interest rate on those assets and liabilities. The changes in net interest income due to changes in both average volume and average interest rate have been allocated to the average volume change or average interest rate change in proportion to the absolute amounts of the change in each. The comparisons between the quarters include an additional change factor that shows the effect of the difference in the number of days in each period, as further discussed below.

	Third Quarter 2009 vs. Third Quarter 2008	Third Quarter 2009 vs. Second Quarter 2009	First Nine Months 2009 vs. First Nine Months 2008
Due to changes in average volumes	\$ 24,742	\$ 4,822	\$ 27,011
Due to changes in average interest rates	(19,482)	(5,807)	(9,187)
Due to difference in the number days in each of the comparable periods		1,575	(1,499)
Total change	\$ 5,260	\$ 590	\$ 16,325

Taxable-equivalent net interest income for the three months ended September 30, 2009 increased \$5.3 million, or 3.8%, compared to the same period in 2008. The increase primarily resulted from an increase in the average volume of interest-earning assets partly offset by a decrease in the net interest margin. The average volume of interest-earning assets for the three months ended September 30, 2009 increased \$2.4 billion, or 20.6%, compared to the same period in 2008. Over the same time frame, the net interest margin decreased 62 basis points from 4.74% in 2008 to 4.12% in 2009.

Taxable-equivalent net interest income for the nine months ended September 30, 2009 increased \$16.3 million, or 4.0%, compared to the same period in 2008. The increase primarily resulted from an increase in the average volume of interest-earning assets partly offset by a decrease in the net interest margin and the effect of a decrease in the number of days in the first nine months of 2009 due to a leap year in 2008. The average volume of interest-earning assets for the first nine months of 2009 increased \$1.9 billion, or 16.2%, compared to the same period in 2008. Over the same time frame, the net interest margin decreased 45 basis points from 4.69% in 2008 to 4.24% in 2009. Taxable-equivalent net interest income for the first nine months of 2009 included 273 days compared to 274 days for the first nine months of 2008. The additional day added approximately \$1.5 million to taxable-equivalent net interest income during the first nine months of 2008. Excluding the impact of the additional day during the first nine months of 2008 results in an effective increase in taxable-equivalent net interest income of approximately \$17.8 million during the first nine months of 2009 compared to the same period in 2008. This effective increase was the result of the aforementioned increase

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

in the average volume of interest-earning assets. The net interest margin decreased during the first nine months of 2009 compared to the same period in 2008 in part due to the

Table of Contents

decrease in market interest rates discussed above. The net interest margin was also partly impacted by an increase in the proportion of average interest-earning assets invested in lower yielding interest-bearing deposits during 2009 compared to 2008. The average yield on interest-earning assets decreased 106 basis points from 5.98% during the first nine months of 2008 to 4.92% during the first nine months of 2009, while the average cost of funds decreased 84 basis points from 1.83% during the first nine months of 2008 to 0.99% during the first nine months of 2009. The effect of lower average market interest rates on the average yield on average interest-earning assets was partly limited by the aforementioned interest rate swaps on variable-rate loans.

Taxable-equivalent net interest income for the third quarter of 2009 increased \$590 thousand, or 0.41%, from the second quarter of 2009. The increase primarily resulted from an increase in the average volume of interest-earning assets combined with the impact of an additional day in third quarter of 2009 compared to the second quarter of 2009 partly offset by a decrease in the net interest margin. The average volume of interest-earning assets for the third quarter of 2009 increased \$488.9 million, or 3.6%, compared to the second quarter of 2009. The net interest margin decreased 16 basis points from 4.28% in the second quarter of 2009 to 4.12% in the third quarter of 2009. The decrease in the net interest margin was partly due to an increase in the proportion of average interest-earning assets invested in lower yielding interest-bearing deposits and a decrease in the proportion of average interest-earning assets invested in higher yielding loans during the third quarter. As previously stated, taxable-equivalent net interest income for the third quarter of 2009 was also impacted by an increase in the number of days compared to the second quarter of 2009. Taxable-equivalent net interest income for the third quarter of 2009 included 92 days compared to 91 days for the second quarter of 2009. The additional day added approximately \$1.6 million to taxable-equivalent net interest income during the third quarter of 2009. Excluding the impact of the additional day during the third quarter of 2009 results in an effective decrease in taxable-equivalent net interest income of approximately \$985 thousand during the third quarter of 2009 which was primarily related to the aforementioned decrease in the net interest margin.

The average yield on interest-earning assets totaled 4.92% during the nine months ended September 30, 2009 compared to 5.98% during the nine months ended September 30, 2008. The average yield on interest-earning assets is primarily impacted by changes in market interest rates as well as changes in the volume and relative mix of interest-earning assets. As stated above, market interest rates decreased to historically low levels during 2008 and remained at those levels during the first nine months of 2009. The average volume of loans increased \$543.3 million during the nine months ended September 30, 2009 compared to the same period in 2008. Loans made up approximately 64.3% of average interest-earning assets during the first nine months of 2009 compared to 70.1% during the first nine months of 2008. The average yield on loans was 5.04% during the nine months ended September 30, 2009 compared to 6.28% during the nine months ended September 30, 2008. The average volume of securities increased \$803.5 million during the nine months ended September 30, 2009 compared to the same period in 2008. Securities made up approximately 30.5% of average interest-earning assets during the nine months ended September 30, 2009 compared to 28.5% during the nine months ended September 30, 2008. The average yield on securities was 5.48% during the nine months ended September 30, 2009 compared to 5.39% during the nine months ended September 30, 2008. The increase in the average yield on securities during the first nine months ended September 30, 2009 compared to the same period in 2008 resulted as the Corporation had a larger proportion of securities invested in higher-yielding, tax-exempt municipal securities. Average federal funds sold, resell agreements and interest-bearing deposits during the nine months ended September 30, 2009 increased \$544.4 million compared to the same period in 2008. Federal funds sold, resell agreements and interest-bearing deposits made up approximately 5.2% of average interest-earning assets during the nine months ended September 30, 2009 compared to 1.4% during the same period in 2008. The combined average yield on federal funds sold, resell agreements and interest-bearing deposits was 0.27% during the nine months ended September 30, 2009 compared to 2.78% during the same period in 2008.

Average deposits increased \$1.7 billion during the first nine months of 2009 compared to the same period in 2008. Average interest-bearing deposits for the first nine months of 2009 increased \$1.1 billion compared to the same period in 2008. The ratio of average interest-bearing deposits to total average deposits was 65.8% during the first nine months of 2009 compared to 65.9% during the same period in 2008. The average cost of interest-bearing deposits and total deposits was 0.75% and 0.49% during the first nine months of 2009 compared to 1.63% and 1.07% during the first nine months of 2008. The decrease in the average cost of interest-bearing deposits was primarily the result of decreases in interest rates offered on deposit products due to decreases in average market interest rates.

The Corporation's net interest spread, which represents the difference between the average rate earned on earning assets and the average rate paid on interest-bearing liabilities, was 3.93% during the first nine months of 2009 compared to 4.15% during the first nine months of 2008. The net interest spread, as well as the net interest margin, will be impacted by future changes in short-term and long-term interest rate levels, as well as the impact from the competitive environment. A discussion of the effects of changing interest rates on net interest income is set forth in Item 3. Quantitative and Qualitative Disclosures About Market Risk included elsewhere in this report.

Table of Contents

The Corporation's hedging policies permit the use of various derivative financial instruments, including interest rate swaps, swaptions, caps and floors, to manage exposure to changes in interest rates. Details of the Corporation's derivatives and hedging activities are set forth in Note 10 - Derivative Financial Instruments in the accompanying notes to consolidated financial statements included elsewhere in this report. Information regarding the impact of fluctuations in interest rates on the Corporation's derivative financial instruments is set forth in Item 3. Quantitative and Qualitative Disclosures About Market Risk included elsewhere in this report.

Provision for Possible Loan Losses

The provision for possible loan losses is determined by management as the amount to be added to the allowance for possible loan losses after net charge-offs have been deducted to bring the allowance to a level which, in management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The provision for possible loan losses totaled \$16.9 million and \$43.1 million for the three and nine months ended September 30, 2009 compared to \$18.9 million and \$29.3 million for the three and nine months ended September 30, 2008. See the section captioned "Allowance for Possible Loan Losses" elsewhere in this discussion for further analysis of the provision for possible loan losses.

Non-Interest Income

The components of non-interest income were as follows:

	Three Months Ended			Nine Months Ended	
	September 30, 2009	June 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
Trust fees	\$ 16,755	\$ 16,875	\$ 19,749	\$ 49,599	\$ 57,071
Service charges on deposit accounts	26,395	25,152	22,642	76,457	63,869
Insurance commissions and fees	8,505	7,106	8,261	26,362	26,434
Other charges, commissions and fees	6,845	6,288	10,723	19,895	27,150
Net gain (loss) on securities transactions		49	78	49	(26)
Other	10,991	12,536	15,862	34,999	43,626
Total	\$ 69,491	\$ 68,006	\$ 77,315	\$ 207,361	\$ 218,124

Total non-interest income for the three and nine months ended September 30, 2009 decreased \$7.8 million, or 10.1%, and \$10.8 million, or 4.9%, compared to the same periods in 2008. Total non-interest income for the third quarter of 2009 increased \$1.5 million, or 2.2%, compared to the second quarter of 2009. Changes in the components of non-interest income are discussed below.

Trust Fees. Trust fee income for the three and nine months ended September 30, 2009 decreased \$3.0 million, or 15.2%, and \$7.5 million, or 13.1%, compared to the same periods in 2008. Investment fees are the most significant component of trust fees, making up approximately 73% and 68% of total trust fees for the first nine months of 2009 and 2008, respectively. Investment and other custodial account fees are generally based on the market value of assets within a trust account. Volatility in the equity and bond markets impacts the market value of trust assets and the related investment fees.

The decrease in trust fee income during the three months ended September 30, 2009 compared to the same period in 2008 was primarily the result of decreases in oil and gas trust management fees (down \$1.9 million), investment fees (down \$365 thousand), estate fees (down \$299 thousand) and securities lending income (down \$202 thousand). The decrease in trust fee income during the nine months ended September 30, 2009 compared to the same period in 2008 was primarily the result of decreases in oil and gas trust management fees (down \$3.5 million), investment fees (down \$2.9 million) and custody fees (down \$602 thousand). The decreases in oil and gas trust management fees were primarily due to decreases in oil and natural gas prices, which impacted the amount of royalties received and decreases in new lease bonuses. The decrease in investment and custody fees was primarily due to the general decline in the market values of assets in trust accounts on which these fees are generally based. Equity valuations during the first nine months of 2009 have been lower on average compared to the first nine months of 2008. Nonetheless, the Corporation has been successful with business development activities and customer retention, which has helped dampen the effect of the lower average equity valuations.

Trust fee income for the third quarter of 2009 did not significantly fluctuate compared to the second quarter of 2009 as an increase in investment fees (up \$950 thousand) was mostly offset by decreases in tax fees (down \$741 thousand) and securities lending income (down \$255 thousand).

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

At September 30, 2009, trust assets, including both managed assets and custody assets, were primarily composed of fixed income securities (43.6% of trust assets), equity securities (36.0% of trust assets) and cash equivalents (13.2% of trust assets). The estimated fair value of trust assets was \$22.3 billion (including managed assets of \$10.2 billion and custody assets of

Table of Contents

\$12.1 billion) at September 30, 2009, compared to \$21.7 billion (including managed assets of \$9.9 billion and custody assets of \$11.8 billion) at December 31, 2008 and \$23.1 billion (including managed assets of \$10.2 billion and custody assets of \$12.9 billion) at September 30, 2008.

Service Charges on Deposit Accounts. Service charges on deposit accounts for the three and nine months ended September 30, 2009 increased \$3.8 million, or 16.6%, and \$12.6 million, or 19.7%, compared to the same periods in 2008. The increases were primarily related to service charges on commercial accounts, which increased \$3.1 million and \$11.3 million during the three and nine months ended September 30, 2009, respectively, compared to the same periods in 2008. The increase in service charges on commercial accounts was primarily related to increased treasury management fees. The increased treasury management fees resulted primarily from a lower earnings credit rate. The earnings credit rate is the value given to deposits maintained by treasury management customers. Because average market interest rates were lower during the first nine months of 2009 compared to the first nine months of 2008, deposit balances have become less valuable and are yielding a lower earnings credit rate. As a result, customers are paying for more of their services through fees rather than with earnings credits applied to their deposit balances.

Service charges on deposit accounts for the third quarter of 2009 increased \$1.2 million, or 4.9%, compared to the second quarter of 2009. The increase was primarily due to a \$633 thousand increase in overdraft/insufficient funds charges on consumer accounts and a \$405 thousand increase in service charges on commercial accounts. These increases were partly related to deposit growth. Overdraft/insufficient funds charges totaled \$11.0 million during the third quarter of 2009, including \$8.8 million related to consumer accounts and \$2.2 million related to commercial accounts.

Insurance Commissions and Fees. Insurance commissions and fees for the three months ended September 30, 2009 increased \$244 thousand, or 3.0%, compared to the same period in 2008. Insurance commissions and fees for the nine months ended September 30, 2009 did not significantly fluctuate compared to the same period in 2008. The increase for the three month period is related to an increase in commission income (up \$270 thousand). This increase was primarily due to the impact of new commission revenues from agency acquisitions in the first and third quarters of 2009.

Insurance commissions and fees include contingent commissions totaling \$114 thousand and \$3.7 million during the three and nine months ended September 30, 2009 and \$140 thousand and \$3.7 million during the three and nine months ended September 30, 2008. Contingent commissions primarily consist of amounts received from various property and casualty insurance carriers related to the loss performance of insurance policies previously placed. Such commissions are seasonal in nature and are generally received during the first quarter of each year. These commissions totaled \$2.8 million and \$3.0 million during the nine months ended September 30, 2009 and 2008. Contingent commissions also include amounts received from various benefit plan insurance companies related to the volume of business generated and/or the subsequent retention of such business. These commissions totaled \$113 thousand and \$853 thousand during the three and nine months ended September 30, 2009 and \$139 thousand and \$630 thousand during the three and nine months ended September 30, 2008.

Insurance commissions and fees for the third quarter of 2009 increased \$1.4 million, or 19.7%, compared to the second quarter of 2009. The increase was primarily related to higher commission income (up \$1.5 million) primarily due to normal variation in the timing of renewals and in the market demand for insurance products.

Other Charges, Commissions and Fees. Other charges, commissions and fees for the three and nine months ended September 30, 2009 decreased \$3.9 million, or 36.2%, and \$7.3 million, or 26.7%, compared to the same periods in 2008. The decrease during the three months ended September 30, 2009 was primarily due to a decrease in investment banking fees related to corporate advisory services (down \$2.6 million) and decreases in commission income related to the sale of money market accounts (down \$1.0 million) and annuities (down \$281 thousand), as well as decreases in various other categories of service charges. The decrease in other charges, commissions and fees during the nine months ended September 30, 2009 was primarily due to a decrease in investment banking fees related to corporate advisory services (down \$4.2 million) and decreases in commission income related to the sale of money market accounts (down \$2.0 million), annuities (down \$847 thousand) and mutual funds (down \$690 thousand), as well as decreases in various other categories of service charges. Investment banking fees related to corporate advisory services are transaction based and can vary significantly from quarter to quarter. Decreases in commission income related to the sale of money market accounts, annuities and mutual funds are partly related to decreases in volumes due to weaker market conditions. Additionally, the decrease in commission income related to the sale of money market accounts was also related to a reduction in marketing fees paid by fund companies.

Other charges, commissions and fees for the third quarter of 2009 increased \$557 thousand, or 8.9%, compared to the second quarter of 2009. The increase was primarily due to increases in unused commitment balance fees (up \$274 thousand) and commission income related to mutual funds (up \$168 thousand), as well as increases in various other categories of service charges. The increase was partially offset by decreases in commission income related to the sale of money market accounts (down \$213 thousand).

Table of Contents

Net Gain/Loss on Securities Transactions. The Corporation sold available-for-sale securities with an amortized cost totaling \$9.9 million during the nine months ended September 30, 2009. The Corporation realized a net gain of \$49 thousand on those sales. The Corporation sold available-for-sale securities with an amortized cost totaling \$888.3 million during the nine months ended September 30, 2008. The Corporation realized a net loss of \$26 thousand on those sales. A large part of the securities sales during 2008 were related to a restructuring of the Corporation's securities portfolio to help improve net interest income in light of actions taken by the Federal Reserve that resulted in 200 basis point declines in both the federal funds rate and the prime rate. The proceeds from the sales were reinvested in longer-term securities with higher yields. Other securities sales in 2008 were primarily related to liquidity management purposes in support of loan growth and increasing risks associated with unsecured, non-mortgage-backed securities issued by U.S. government agencies and corporations.

Other Non-Interest Income. Other non-interest income decreased \$4.9 million, or 30.7%, for the three months ended September 30, 2009 compared to the same period in 2008. Contributing to the decrease were decreases in sundry income from various miscellaneous items (down \$2.5 million), gains on sale of assets (down \$1.1 million), mineral interest income (down \$725 thousand) and lease rental income (down \$333 thousand). These decreases were partly offset by an increase in income from check card usage (up \$220 thousand). Sundry income from various miscellaneous items generally includes various one-time, non-recurring items. During the third quarter of 2008, sundry income included \$2.2 million in income recognized from the collection of loan interest and other charges written-off in prior years. Also, during the third quarter of 2008, gains on the sale of assets included a \$1.1 million gain related to a tract of land sold in connection with an eminent domain condemnation, while mineral interest income included \$459 thousand related to a new lease bonus. Mineral interest income is related to bonus, rental and shut-in payments and oil and gas royalties received from severed mineral interests on property owned by Main Plaza Corporation, a wholly owned non-banking subsidiary of the Corporation.

Other non-interest income decreased \$8.6 million, or 19.8%, for the nine months ended September 30, 2009 compared to the same period in 2008. Contributing to the decrease were decreases in sundry income from various miscellaneous items (down \$3.3 million), gains on the sale of student loans (down \$1.6 million), earnings on cashier check balances (down \$1.4 million), gains on sale of assets (down \$1.1 million), lease rental income (down \$760 thousand) and income from securities trading and customer derivative activities (down \$518 thousand). These decreases were partly offset by an increase in income from check card usage (up \$946 thousand). During the first quarter of 2008, sundry income from various miscellaneous items included \$1.9 million related to the partial redemption of shares received from the VISA, Inc. initial public offering resulting from the Corporation's membership interest in VISA USA. A portion of the shares allocated to the Corporation in the initial public offering were withheld to cover the costs and liabilities associated with certain litigation for which the Corporation, based on its prior proportionate membership interest in VISA USA, was obligated to indemnify VISA under its indemnification agreement with VISA USA. Since a portion of the shares allocated to the Corporation in the initial public offering were withheld, the Corporation was not required to make any cash payments related to the indemnification agreement. As such, the indemnification accrual related to certain pending litigation was reversed during the first quarter of 2008 and included in the aforementioned \$1.9 million of income. During the third quarter of 2008, sundry income included the aforementioned \$2.2 million in income recognized from the collection of loan interest and other charges written-off in prior years. During the second quarter of 2008, the Corporation elected to discontinue the origination of student loans for resale, aside from previously outstanding commitments. Sales of student loans during 2009 have been limited as the Corporation's student loan servicer has not been able to obtain the necessary funding required to purchase the loans. Earnings on cashier check balances decreased as the Corporation began maintaining cashiers check balances in-house during the second quarter of 2008. While the Corporation no longer receives third-party fees on cashier check balances, maintaining such balances in-house provides investable funds from which the Corporation derives interest income. The decrease in gains on the sale of assets was primarily related to the aforementioned tract of land sold during the third quarter of 2008.

Other non-interest income for the third quarter of 2009 decreased \$1.5 million or 12.3%, compared to the second quarter of 2009. Contributing to the decrease were decreases in income from securities trading and customer derivative activities (down \$372 thousand), mineral interest income (down \$342 thousand) and lease rental income (down \$208 thousand).

Table of Contents**Non-Interest Expense**

The components of non-interest expense were as follows:

	Three Months Ended			Nine Months Ended	
	September 30, 2009	June 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
Salaries and wages	\$ 58,591	\$ 56,540	\$ 57,803	\$ 171,907	\$ 167,475
Employee benefits	13,445	13,783	10,677	42,468	36,702
Net occupancy	11,111	10,864	10,342	32,665	30,080
Furniture and equipment	11,133	10,662	9,657	32,158	27,789
Deposit insurance	4,643	11,667	1,859	20,686	2,812
Intangible amortization	1,564	1,719	1,976	5,064	5,977
Other	31,747	31,054	30,658	93,074	92,267
Total	\$ 132,234	\$ 136,289	\$ 122,972	\$ 398,022	\$ 363,102

Total non-interest expense for the three and nine months ended September 30, 2009 increased \$9.3 million, or 7.5%, and \$34.9 million, or 9.6%, compared to the same periods in 2008. Total non-interest expense for the third quarter of 2009 decreased \$4.1 million, or 3.0%, compared to the second quarter of 2009. Changes in the components of non-interest expense are discussed below.

Salaries and Wages. Salaries and wages for the three and nine months ended September 30, 2009 increased \$788 thousand, or 1.4%, and \$4.4 million, or 2.6%, compared to the same periods in 2008. The increases were primarily related to normal annual merit increases, increases in headcount, decreases in cost deferrals related to lending activity and an increase in stock-based compensation expense. The increases in these items were partly offset by a decrease in incentive compensation expense (down \$1.2 million and \$5.5 million for the three and nine months ended September 30, 2009, respectively).

Salaries and wages expense for the third quarter of 2009 increased \$2.1 million, or 3.6%, compared to the second quarter of 2009. The increase was primarily related to normal annual merit increases, increases in headcount, increases in incentive compensation expense and commissions related to higher insurance revenues.

Employee Benefits. Employee benefits expense for the three and nine months ended September 30, 2009 increased \$2.8 million, or 25.9%, and \$5.8 million, or 15.7%, compared to the same periods in 2008. The increase during the three months ended September 30, 2009 was primarily related to increases in expenses related to the Corporation's 401(k) and profit sharing plans (up \$905 thousand), an increase in medical insurance expense (up \$861 thousand) and expenses related to the Corporation's defined benefit retirement and restoration plans (up \$837 thousand). The increase during the nine months ended September 30, 2009 was primarily related to increases in expenses related to the Corporation's defined benefit retirement and restoration plans (up \$2.5 million), expenses related to the Corporation's 401(k) and profit sharing plans (up \$1.6 million) and medical insurance expense (up \$1.2 million).

Employee benefits expense for the third quarter of 2009 decreased \$338 thousand, or 2.5%, compared to the second quarter of 2009 primarily due to decreases in payroll taxes (down \$315 thousand).

The Corporation's defined benefit retirement and restoration plans were frozen effective as of December 31, 2001 and were replaced by a profit sharing plan. Management believes these actions reduce the volatility in retirement plan expense. However, the Corporation still has funding obligations related to the defined benefit and restoration plans and could recognize retirement expense related to these plans in future years, which would be dependent on the return earned on plan assets, the level of interest rates and employee turnover. The aforementioned increases in expenses related to the Corporation's defined benefit retirement plan during the three and nine months ended September 30, 2009 were partly the result of a weaker return on plan assets during 2008.

Net Occupancy. Net occupancy expense for the three and nine months ended September 30, 2009 increased \$769 thousand, or 7.4%, and \$2.6 million, or 8.6%, compared to the same periods in 2008. The increase during the three months ended September 30, 2009 was primarily related to increases in lease expense (up \$502 thousand) and property taxes (up \$355 thousand) offset by decreases in utilities expense (down \$191 thousand) and building maintenance (down \$153 thousand). The increase during the nine months ended September 30, 2009 was primarily due to increases in lease expense (up \$1.4 million) and property taxes (up \$527 thousand) as well as increases in various other categories of net

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

occupancy expense. The increases in these items were partly related to the additional costs associated with new branch locations. Net occupancy expense for the third quarter of 2009 increased \$247 thousand, or 2.3%, compared to the second quarter of 2009 primarily due to increases in property taxes (up \$318 thousand) and utilities expense (up \$250 thousand) offset by decreases in lease expense (down \$160 thousand) and building maintenance (down \$105 thousand).

Table of Contents

Furniture and Equipment. Furniture and equipment expense for the three and nine months ended September 30, 2009 increased \$1.5 million, or 15.3%, and \$4.4 million, or 15.7%, compared to the same periods in 2008. The increase during the three months ended September 30, 2009 was primarily related to increases in software amortization expense (up \$685 thousand), depreciation expense related to furniture and fixtures (up \$518 thousand) and software maintenance expense (up \$164 thousand). The increase during the nine months ended September 30, 2009 was primarily related to increases in software amortization expense (up \$1.9 million), depreciation expense related to furniture and fixtures (up \$1.1 million) and software maintenance expense (up \$1.1 million). The increases in software amortization and software maintenance expense were primarily related to certain applications related to data management, internet banking, treasury management and teller/retail delivery systems. The increases in depreciation expense related to furniture and fixtures were partly related to new branch locations. Furniture and equipment expense for the third quarter of 2009 increased \$471 thousand, or 4.4%, compared to the second quarter of 2009 primarily due to increases in depreciation expense related to furniture and fixtures (up \$282 thousand), software maintenance expense (up \$117 thousand) and software amortization expense (up \$113 thousand).

Deposit Insurance. Deposit insurance expense for the three and nine months ended September 30, 2009 increased \$2.8 million and \$17.9 million compared to the same periods in 2008. Deposit insurance expense during the third quarter of 2009 decreased \$7.0 million compared to the second quarter of 2009. The increases in deposit insurance expense during 2009 compared to 2008 were due to increases in the fee assessment rates during 2009 and a special assessment applied to all insured institutions as of June 30, 2009. With regard to the increase in fee assessment rates, the FDIC finalized a rule in December 2008 that raised the then current assessment rates uniformly by 7 basis points for the first quarter of 2009 assessment. The new rule resulted in annualized assessment rates for Risk Category 1 institutions ranging from 12 to 14 basis points. In February 2009, the FDIC issued final rules to amend the deposit insurance fund restoration plan, change the risk-based assessment system and set assessment rates for Risk Category 1 institutions beginning in the second quarter of 2009. The new initial base assessment rates for Risk Category 1 institutions range from 12 to 16 basis points, on an annualized basis, and from 7 to 24 basis points after the effect of potential base-rate adjustments, in each case depending upon various factors. The increase in deposit insurance expense during the nine months ended September 30, 2009 compared to the same period a year ago was also partly related to the Corporation's utilization of available credits to offset assessments during the first nine months of 2008. The increases were also partly related to the additional 10 basis point assessment paid on covered transaction accounts exceeding \$250 thousand under the Temporary Liquidity Guaranty Program.

In May 2009, the FDIC issued a final rule which levied a special assessment applicable to all insured depository institutions totaling 5 basis points of each institution's total assets less Tier 1 capital as of June 30, 2009, not to exceed 10 basis points of domestic deposits. The special assessment was part of the FDIC's efforts to rebuild the Deposit Insurance Fund (DIF). Deposit insurance expense during the nine months ended September 30, 2009 included \$7.3 million recognized in the second quarter related to the special assessment. The final rule also allows the FDIC to impose additional special assessments of 5 basis points for the third and fourth quarters of 2009, if the FDIC estimates that the DIF reserve ratio will fall to a level that would adversely affect public confidence in federal deposit insurance or to a level that would be close to or below zero. Any additional special assessment would also be capped at 10 basis points of domestic deposits. The Corporation cannot provide any assurance as to the ultimate amount or timing of any such special assessments, should such special assessments occur, as such special assessments depend upon a variety of factors which are beyond the Corporation's control.

In September 2009, the FDIC proposed a rule that will require all insured depository institutions, with limited exceptions, to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. The FDIC also proposed to adopt a uniform three-basis point increase in assessment rates effective on January 1, 2011. If the rule is finalized as proposed, the Corporation expects to be required to pay approximately \$62 million in prepaid risk-based assessments.

Intangible Amortization. Intangible amortization is primarily related to core deposit intangibles and, to a lesser extent, intangibles related to customer relationships and non-compete agreements. Intangible amortization for the three and nine months ended September 30, 2009 decreased \$412 thousand, or 20.9% and \$913 thousand, or 15.3% compared to the same periods in 2008. The decreases in amortization expense are primarily the result of the completion of amortization of certain intangible assets, as well as a reduction in the annual amortization rate of certain intangible assets as the Corporation uses an accelerated amortization approach which results in higher amortization rates during the earlier years of the useful lives of intangible assets.

Other Non-Interest Expense. Other non-interest expense for the three and nine months ended September 30, 2009 increased \$1.1 million, or 3.6%, and \$807 thousand, or 0.9%, compared to the same periods in 2008. Significant components of the increase during the three months ended September 30, 2009 included losses on the sale/write-down of foreclosed assets

Table of Contents

(up \$1.3 million) and property tax expense on foreclosed assets (up \$624 thousand). These increases were primarily related to a significant increase in real estate foreclosures in 2009 as a result of weaker economic conditions. The increases in the aforementioned items were partly offset by decreases in sundry expense from various miscellaneous items (down \$1.4 million). Sundry expense from various miscellaneous items during the third quarter of 2008 included \$1.0 million for costs related to Hurricane Ike which impacted the Corporation's Houston and Galveston market areas and \$410 thousand related to a lease settlement agreement.

Significant components of the increase during the nine months ended September 30, 2009 included property taxes expense on foreclosed assets (up \$1.7 million), losses on the sale/write-down of foreclosed assets (up \$1.4 million), cost deferrals related to lending activity (down \$816 thousand), advertising/promotions expense (up \$711 thousand), losses on ineffective hedges and customer derivative contracts (up \$417 thousand and \$228 thousand, respectively) and sub-advisor investment management fees related to Frost Investment Advisors, LLC (up \$441 thousand). The increases in the aforementioned items were offset by decreases in sundry expense from various miscellaneous items (down \$3.1 million), amortization of net deferred costs related to loan commitments (down \$753 thousand), correspondent bank service charge expense (down \$554 thousand) and travel expense (down \$543 thousand). Sundry expense from various miscellaneous items for 2008 included \$1.1 million related to a settlement of certain patent infringement claims and the aforementioned \$1.0 million and \$410 thousand accruals for costs related to Hurricane Ike and the lease settlement.

Total other non-interest expense for the third quarter of 2009 increased \$693 thousand, or 2.2%, compared to the second quarter of 2009. The increase was primarily related to losses on the sale/write-down of foreclosed assets (up \$1.7 million) offset by a decreases in professional services expense (down \$566 thousand), losses on ineffective hedges (down \$371 thousand), outside director stock compensation expense (down \$330 thousand) and advertising/promotions expense (down \$277 thousand). The decrease in advertising/promotions expense was primarily related to a concentrated advertising campaign that took place in the second quarter. The decrease in outside director stock compensation expense was related to a regular, annual director award of deferred stock units that occurred in the second quarter.

Results of Segment Operations

The Corporation's operations are managed along two operating segments: Banking and the Financial Management Group (FMG). A description of each business and the methodologies used to measure financial performance is described in Note 15 - Operating Segments in the accompanying notes to consolidated financial statements included elsewhere in this report. Net income (loss) by operating segment is presented below:

	Three Months Ended			Nine Months Ended	
	September 30, 2009	June 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
Banking	\$ 44,901	\$ 38,056	\$ 42,924	\$ 127,912	\$ 140,062
Financial Management Group	1,789	2,390	7,417	6,404	20,748
Non-Banks	(1,991)	(2,587)	(1,376)	(6,776)	(6,518)
Consolidated net income	\$ 44,699	\$ 37,859	\$ 48,965	\$ 127,540	\$ 154,292

Banking

Net income for the three and nine months ended September 30, 2009 increased \$2.0 million, or 4.6%, and decreased \$12.2 million, or 8.7%, respectively, compared to the same periods in 2008. The increase during the three months ended September 30, 2009 was primarily the result of an \$8.1 million decrease in income tax expense, a \$3.2 million increase in net interest income and a \$2.0 million decrease in the provision for possible loan losses partly offset by a \$9.1 million increase in non-interest expense and a \$2.2 million decrease in non-interest income. The decrease during the nine months ended September 30, 2009 was primarily the result of a \$33.4 million increase in non-interest expense and a \$13.9 million increase in the provision for possible loan losses partly offset by a \$22.7 million decrease in income tax expense, a \$10.9 million increase in net interest income and a \$1.5 million increase in non-interest income.

Net interest income for the three and nine months ended September 30, 2009 increased \$3.2 million, or 2.4%, and \$10.9 million, or 2.8%, compared to the same periods in 2008. The increases were for the most part the result of increases in the average volume of earning assets partly offset by decreases the net interest margin. The increase for the nine months ended September 30, 2009 was partly impacted by a decrease in the number of days during the period in 2009 due to leap year in 2008. See the analysis of net interest income included in the section captioned *Net Interest Income* included elsewhere in this discussion.

Table of Contents

The provision for possible loan losses for the three and nine months ended September 30, 2009 totaled \$16.9 million and \$43.1 million compared to \$18.9 million and \$29.3 million for the same periods in 2008. See the analysis of the provision for possible loan losses included in the section captioned Allowance for Possible Loan Losses included elsewhere in this discussion.

Non-interest income for the three and nine months ended September 30, 2009 decreased \$2.2 million, or 4.4%, and increased \$1.5 million, or 1.1%, respectively, compared to the same periods in 2008. The decrease during the three months ended September 30, 2009 was primarily due to decreases in other non-interest income and other charges commissions and fees partly offset by an increase in service charges on deposit accounts. The increase during the nine months ended September 30, 2009 was primarily due to an increase in service charges on deposit accounts partly offset by decreases in other non-interest income and other charges commissions and fees. The increases in service charges on deposit accounts were primarily related to increased treasury management fees on commercial accounts. The decreases in other charges, commissions and fees were primarily related to decreases in investment banking fees related to corporate advisory services and commission income related to the sale of money market accounts, annuities and mutual funds. See further analysis of these categories of non-interest income included in the section captioned Non-Interest Income included elsewhere in this discussion.

Non-interest expense for the three months and nine ended September 30, 2009 increased \$9.1 million, or 8.9%, and \$33.4 million, or 11.1%, compared to the same periods in 2008. The increases were primarily due to increases in deposit insurance expense due to increases in the fee assessment rates during 2009 and a special assessment applied to all insured depository institutions as of June 30, 2009. The increases in non-interest expense during the three and nine months ended September 30, 2009 compared to the same periods in 2008 were also partly due to increases in salaries and wages, employee benefits, furniture and equipment expense and net occupancy expense. See the analysis of these items included in the section captioned Non-Interest Expense included elsewhere in this discussion.

Frost Insurance Agency, which is included in the Banking operating segment, had gross commission revenues of \$8.5 million and \$26.5 million during the three and nine months ended September 30, 2009 and \$8.3 million and \$26.6 million during the three and nine months ended September 30, 2008. Insurance commission revenues increased \$244 thousand, or 3.0%, and decreased \$72 thousand, or 0.3%, during the three months and nine months ended September 30, 2009, respectively, compared to the same periods in 2008. See the analysis of insurance commissions and fees included in the section captioned Non-Interest Income included elsewhere in this discussion.

Financial Management Group (FMG)

Net income for the three and nine months ended September 30, 2009 decreased \$5.6 million, or 75.9%, and \$14.3 million, or 69.1%, compared to the same periods in 2008. The decrease during the three months ended September 30, 2009 was primarily due to a \$5.0 million decrease in non-interest income and a \$3.6 million decrease in net interest income partly offset by a \$3.0 million decrease in income tax expense. The decrease during the nine months ended September 30, 2009 was primarily due to an \$11.9 million decrease in non-interest income, an \$8.5 million decrease in net interest income and a \$1.7 million increase in non-interest expense partly offset by a \$7.7 million decrease in income tax expense.

Net interest income for the three and nine months ended September 30, 2009 decreased \$3.6 million, or 67.7%, and \$8.5 million, or 52.3%, compared to the same periods in 2008. The decreases in net interest income were due to decreases in the average volume of funds provided due to a decrease in the average volume of FMGs repurchase agreements combined with a decrease in the funds transfer price received for providing those funds.

Non-interest income for the three and nine months ended September 30, 2009 decreased \$5.0 million, or 19.5%, and \$11.9 million, or 16.1%, compared to the same periods in 2008. The decreases during the three and nine months ended September 30, 2009 were primarily due to decreases in trust fees (down \$3.1 million and \$7.8 million, respectively) and other charges, commissions and fees (down \$1.6 million and \$3.6 million, respectively).

Trust fee income is the most significant income component for FMG. Investment fees are the most significant component of trust fees, making up approximately 73% and 68% of total trust fees for the first nine months of 2009 and 2008, respectively. Investment and other custodial account fees are generally based on the market value of assets within a trust account. Volatility in the equity and bond markets impacts the market value of trust assets and the related investment fees. The decreases in trust fee income during the three and nine months ended September 30, 2009 compared to the same periods in 2008 were primarily the result of decreases in oil and gas trust management fees and investment fees and, to a lesser extent, estate fees and securities lending income during the three months ended September 30, 2009 and custody fees during the nine months ended September 30, 2009. See the analysis of trust fees included in the section captioned Non-Interest Income included elsewhere in this discussion.

Table of Contents

The decrease in other charges, commissions and fees during the three months ended September 30, 2009 compared to the same period in 2008 was primarily due to decreases in commission income related to the sale of money market accounts and annuities and a decrease in account management fees related to a line of business that was discontinued. The decrease in other charges, commissions and fees during the nine months ended September 30, 2009 compared to the same period in 2008 was primarily due to decreases in commission income related to the sale of money market accounts, annuities and mutual funds and a decrease in account management fees related to a line of business that was discontinued offset by an increase in mutual fund management fees related to Frost Investment Advisors, LLC. Decreases in commission income related to the sale of money market accounts, annuities and mutual funds are partly related to decreases in volumes due to weaker market conditions. Additionally, the decrease in commission income related to the sale of money market accounts was also related to a reduction in marketing fees paid by fund companies.

Non-interest expense for the three months ended September 30, 2009 did not significantly fluctuate while non-interest expense for the nine months ended September 30, 2009 increased \$1.7 million, or 2.8%, compared to the same periods in 2008. The increase during the nine months ended September 30, 2009 was primarily due to an increase in salaries and wages and employee benefits (up \$1.1 million on a combined basis) and other non-interest expense (up \$332 thousand). The increase in salaries and wages and employee benefits was primarily the result of normal, annual merit increases, increases in incentive and stock-based compensation expense and expenses related to employee benefit plans. The increase in other non-interest expense was primarily due to sub-advisor costs for Frost Investment Advisors, LLC.

Non-Banks

The net loss for the Non-Banks operating segment increased \$615 thousand and \$258 thousand for the three and nine months ended September 30, 2009, compared to the same periods in 2008. The increased losses were largely related to decreases in mineral interest income. Mineral interest income is related to bonus, rental and shut-in payments and oil and gas royalties received from severed mineral interests on property owned by Main Plaza Corporation. During the third quarter 2008, mineral interest income included \$459 thousand related to a new lease bonus.

Income Taxes

The Corporation recognized income tax expense of \$9.6 million and \$36.7 million, for an effective tax rate of 17.7% and 22.4% for the three and nine months ended September 30, 2009 compared to \$21.2 million and \$67.4 million, for an effective tax rate of 30.2% and 30.4% for the three and nine months ended September 30, 2008. The effective income tax rates differed from the U.S. statutory rate of 35% during the comparable periods primarily due to the effect of tax-exempt income from loans, securities and life insurance policies. The decrease in the effective tax rate during 2009 was primarily the result of an increase in holdings of tax-exempt municipal securities.

Average Balance Sheet

Average assets totaled \$15.5 billion for the nine months ended September 30, 2009 representing an increase of \$2.0 billion, or 15.0%, compared to average assets for the same period in 2008. The increase was primarily reflected in interest-earning assets, which increased \$1.9 billion, or 16.2%, during the first nine months of 2009 compared to the same period in 2008. The increase was primarily due to a \$803.5 million increase in average securities, a \$626.8 million increase in average interest-bearing deposits and federal funds sold and resale agreements and a \$543.3 million increase in average loans. The growth in average interest-earning assets was primarily funded by an increase in deposits. Total deposits averaged \$12.2 billion for the first nine months of 2009, increasing \$1.7 billion, or 16.8%, compared to the same period in 2008. Average interest-bearing accounts decreased from 65.9% of average total deposits in 2008 to 65.8% of average total deposits in 2009.

Table of Contents**Loans**

Loans were as follows as of the dates indicated:

	September 30, 2009	Percent of Total	June 30, 2009	December 31, 2008	September 30, 2008
Commercial and industrial:					
Commercial	\$ 3,710,928	43.6%	\$ 3,803,826	\$ 3,950,648	\$ 3,815,826
Leases	198,813	2.3	202,239	205,290	198,774
Asset-based	121,091	1.4	99,620	85,865	103,400
Total commercial and industrial	4,030,832	47.3	4,105,685	4,241,803	4,118,000
Real estate:					
Construction:					
Commercial	661,289	7.8	670,303	755,704	677,035
Consumer	37,905	0.4	47,523	55,947	58,888
Land:					
Commercial	289,181	3.4	320,780	346,591	370,935
Consumer	1,751		1,605	1,716	1,892
Commercial mortgages	2,289,835	26.9	2,286,292	2,250,442	2,200,798
1-4 family residential mortgages	67,036	0.8	70,838	79,446	83,099
Home equity and other consumer	740,833	8.7	733,053	707,974	688,153
Total real estate	4,087,830	48.0	4,130,394	4,197,820	4,080,800
Consumer:					
Student loans held for sale	24,358	0.3	27,086	28,889	32,097
Other	353,345	4.2	350,167	349,641	345,105
Other	46,284	0.5	55,861	53,662	47,238
Unearned discount	(24,041)	(0.3)	(25,500)	(27,733)	(27,254)
Total loans	\$ 8,518,608	100.0%	\$ 8,643,693	\$ 8,844,082	\$ 8,595,986

Loans decreased \$325.5 million, or 3.7%, compared to December 31, 2008. The majority of the Corporation's loan portfolio is comprised of commercial and industrial loans and real estate loans. Commercial and industrial loans made up 47.3% and 48.0% of total loans at September 30, 2009 and December 31, 2008, respectively while real estate loans made up 48.0% and 47.5% of total loans, respectively, at those dates. Real estate loans include both commercial and consumer balances.

Commercial and industrial loans decreased \$211.0 million, or 5.0%, from December 31, 2008 to September 30, 2009. The Corporation's commercial and industrial loans are a diverse group of loans to small, medium and large businesses. The purpose of these loans varies from supporting seasonal working capital needs to term financing of equipment. While some short-term loans may be made on an unsecured basis, most are secured by the assets being financed with collateral margins that are consistent with the Corporation's loan policy guidelines. The commercial and industrial loan portfolio also includes the commercial lease and asset-based lending portfolios as well as purchased shared national credits (SNCs), which are discussed in more detail below.

Purchased shared national credits are participations purchased from upstream financial organizations and tend to be larger in size than the Corporation's originated portfolio. The Corporation's purchased SNC portfolio totaled \$481.0 million at September 30, 2009, decreasing \$53.1 million, or 9.9%, from \$534.1 million at December 31, 2008. At September 30, 2009, 63.6% of outstanding purchased SNCs was related to the energy industry. The remaining purchased SNCs were diversified throughout various other industries, with no other single industry exceeding 10% of the total purchased SNC portfolio. Additionally, almost all of the outstanding balance of purchased SNCs was included in the commercial and industrial portfolio, with the remainder included in the real estate categories. SNC participations are originated in the normal course of business to meet the needs of the Corporation's customers. As a matter of policy, the Corporation generally only participates in SNCs for companies headquartered in or which have significant operations within the Corporation's market areas. In addition, the Corporation must have direct access to the company's management, and either an existing banking relationship or the expectation of broadening the relationship

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

with other banking products and services within the following 12 to 24 months. SNCs are reviewed at least quarterly for credit quality and business development successes.

Real estate loans decreased \$110.0 million, or 2.6%, during the first nine months of 2009. Real estate loans include both commercial and consumer balances. Commercial real estate loans totaled \$3.2 billion at September 30, 2009 and represented 79.3% of total real estate loans. The majority of this portfolio consists of commercial real estate mortgages, which includes

Table of Contents

both permanent and intermediate term loans. The Corporation's primary focus for its commercial real estate portfolio has been growth in loans secured by owner-occupied properties. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Consequently, these loans must undergo the analysis and underwriting process of a commercial and industrial loan, as well as that of a real estate loan. At September 30, 2009, approximately 60% of the outstanding principal balance of the Corporation's commercial real estate loans were secured by owner-occupied properties.

The consumer loan portfolio, including all consumer real estate, increased \$1.6 million, or 0.1%, from December 31, 2008. As the following table illustrates as of the dates indicated, the consumer loan portfolio has four distinct segments, including consumer real estate, consumer non-real estate, student loans held for sale and 1-4 family residential mortgages.

	September 30, 2009	June 30, 2009	December 31, 2008	September 30, 2008
Consumer real estate:				
Construction	\$ 37,905	\$ 47,523	\$ 55,947	\$ 58,888
Land	1,751	1,605	1,716	1,892
Home equity loans	297,870	303,465	320,220	315,676
Home equity lines of credit	164,594	154,776	122,608	112,662
Other consumer real estate	278,369	274,812	265,146	259,815
Total consumer real estate	780,489	782,181	765,637	748,933
Consumer non-real estate	353,345	350,167	349,641	345,105
Student loans held for sale	24,358	27,086	28,889	32,097
1-4 family residential mortgages	67,036	70,838	79,446	83,099
Total consumer loans	\$ 1,225,228	\$ 1,230,272	\$ 1,223,613	\$ 1,209,234

The consumer non-real estate loan portfolio primarily consists of automobile loans, unsecured revolving credit products, personal loans secured by cash and cash equivalents and other similar types of credit facilities. The Corporation no longer originates 1-4 family mortgage loans. Additionally, during the second quarter of 2008, the Corporation elected to discontinue the origination of student loans for resale, aside from previously outstanding commitments. Student loans were primarily originated for resale on the secondary market and classified as held for sale.

Table of Contents**Non-Performing Assets**

Non-performing assets and accruing past due loans are presented in the table below. The Corporation did not have any restructured loans as of the dates presented.

	September 30, 2009	June 30, 2009	December 31, 2008	September 30, 2008
Non-accrual loans:				
Commercial and industrial	\$ 109,388	\$ 93,381	\$ 27,123	\$ 24,316
Real estate	66,930	59,292	36,764	19,953
Consumer and other	15,436	16,132	1,287	1,206
Total non-accrual loans	191,754	168,805	65,174	45,475
Foreclosed assets:				
Real estate	29,062	20,959	12,312	9,101
Other	50	519	554	582
Total foreclosed assets	29,112	21,478	12,866	9,683
Total non-performing assets	\$ 220,866	\$ 190,283	\$ 78,040	\$ 55,158
Non-performing assets as a percentage of:				
Total loans and foreclosed assets	2.58%	2.20%	0.88%	0.64%
Total assets	1.37	1.21	0.52	0.39
Accruing past due loans:				
30 to 89 days past due	\$ 90,267	\$ 61,002	\$ 102,053	\$ 66,378
90 or more days past due	32,707	41,112	19,751	7,819
Total accruing past due loans	\$ 122,974	\$ 102,114	\$ 121,804	\$ 74,197
Ratio of accruing past due loans to total loans:				
30 to 89 days past due	1.06%	0.70%	1.16%	0.77%
90 or more days past due	0.38	0.48	0.22	0.09
Total accruing past due loans	1.44%	1.18%	1.38%	0.86%

Non-performing assets include non-accrual loans and foreclosed assets. Non-performing assets at September 30, 2009 increased \$142.8 million from December 31, 2008. In general, the increasing trend in non-performing assets is reflective of the current weak economic conditions. The increase in non-accrual commercial loans was partly related to the addition of five credit relationships with an aggregate total of \$66.0 million. The increase in non-accrual commercial loans also included \$19.0 million in loans to Mexican borrowers primarily due to a deterioration in the U.S. dollar exchange rate of the Mexican peso. These loans have third party insurance covering between 80% to 90% of the outstanding balance. The increase in non-accrual real estate loans was primarily related to land development and 1-4 family residential construction credit relationships. Generally, loans are placed on non-accrual status if principal or interest payments become 90 days past due and/or management deems the collectibility of the principal and/or interest to be in question, as well as when required by regulatory requirements. Once interest accruals are discontinued, accrued but uncollected interest is charged to current year operations. Subsequent receipts on non-accrual loans are recorded as a reduction of principal, and interest income is recorded only after principal recovery is reasonably assured.

Foreclosed assets represent property acquired as the result of borrower defaults on loans. Foreclosed assets are recorded at estimated fair value, less estimated selling costs, at the time of foreclosure. Write-downs occurring at foreclosure are charged against the allowance for possible loan losses. On an ongoing basis, properties are appraised as required by market indications and applicable regulations. Write-downs are provided for subsequent declines in value and are included in other non-interest expense along with other expenses related to maintaining the properties.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor's potential operating or financial difficulties. Management monitors these loans closely and reviews their performance on a regular basis. At September 30, 2009 and December 31, 2008, the Corporation had \$10.7 million and \$50.2 million in loans of this type which are not included in either of the non-accrual or 90 days past due loan categories. At September 30, 2009, potential problem loans consisted of six credit relationships. Of the total outstanding balance at September 30, 2009, 61.0% related to three customers in the real estate lot development/single-family residential construction industry. Weakness in these companies' operating performance has caused the Corporation to heighten the attention given to these credits.

Table of Contents

The after-tax impact (assuming a 35% marginal tax rate) of lost interest from non-performing loans was approximately \$1.2 million and \$2.8 million for the three and nine months ended September 30, 2009, compared to \$418 thousand and \$1.0 thousand for the same periods in 2008.

Allowance for Possible Loan Losses

Activity in the allowance for possible loan losses is presented in the following table.

	Three Months Ended			Nine Months Ended	
	September 30, 2009	June 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
Balance at beginning of period	\$ 122,501	\$ 114,168	\$ 94,520	\$ 110,244	\$ 92,339
Provision for possible loan losses	16,940	16,601	18,940	43,142	29,273
Charge-offs:					
Commercial and industrial	(14,548)	(3,626)	(5,261)	(21,068)	(11,297)
Real estate	(1,249)	(4,309)	(697)	(7,590)	(4,215)
Consumer and other	(3,190)	(2,595)	(2,135)	(8,419)	(5,786)
Total charge-offs	(18,987)	(10,530)	(8,093)	(37,077)	(21,298)
Recoveries:					
Commercial and industrial	980	556	479	2,025	2,607
Real estate	169	257	43	447	473
Consumer and other	1,519	1,449	1,220	4,341	3,715
Total recoveries	2,668	2,262	1,742	6,813	6,795
Net charge-offs	(16,319)	(8,268)	(6,351)	(30,264)	(14,503)
Balance at end of period	\$ 123,122	\$ 122,501	\$ 107,109	\$ 123,122	\$ 107,109
Ratio of allowance for possible loan losses to:					
Total loans	1.45%	1.42%	1.25%	1.45%	1.25%
Non-accrual loans	64.2	72.6	235.53	64.2	235.53
Ratio of annualized net charge-offs to average total loans	0.75	0.38	0.30	0.46	0.24

The allowance for possible loan losses is a reserve established through a provision for possible loan losses charged to expense, which represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. The Corporation's allowance for possible loan loss methodology is based on guidance provided in SEC Staff Accounting Bulletin No. 102, "Selected Loan Loss Allowance Methodology and Documentation Issues" and includes allowance allocations calculated in accordance with ASC Topic 310, "Receivables" and allowance allocations calculated in accordance with ASC Topic 450, "Contingencies." Accordingly, the methodology is based on historical loss experience by type of credit and internal risk grade, specific homogeneous risk pools, and specific loss allocations, with adjustments for current events and conditions. The Corporation's process for determining the appropriate level of the allowance for possible loan losses is designed to account for credit deterioration as it occurs. The provision for possible loan losses reflects loan quality trends, including the levels of and trends related to non-accrual loans, past due loans, potential problem loans, criticized loans and net charge-offs or recoveries, among other factors. The provision for possible loan losses also reflects the totality of actions taken on all loans for a particular period. In other words, the amount of the provision reflects not only the necessary increases in the allowance for possible loan losses related to newly identified criticized loans, but it also reflects actions taken related to other loans including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The provision for possible loan losses totaled \$16.9 million and \$43.1 million during the three and nine months ended September 30, 2009, compared to \$18.9 million and \$29.3 million during the three and nine months ended September 30, 2008. The increases in the provision for possible loan losses were partly due to higher levels of net charge-offs and an increase in classified loans related to the weaker economic conditions. The weak economic conditions have particularly affected the performance of many of the Corporation's land development and 1-4 family residential construction credit relationships. The provision for possible loan losses reported during the three and nine months ended September 30, 2008 included approximately \$10 million related to Hurricane Ike which impacted the Corporation's Houston and Galveston

Table of Contents

market areas during the third quarter of 2008. Net charge-offs during the three and nine months ended September 30, 2009 increased \$10.0 million and \$15.8 million compared to the same periods in 2008. As a percentage of average loans, net charge-offs increased 45 basis points and 22 basis points during the three and nine months ended September 30, 2009 compared to the same periods in 2008. The increase in net charge-offs is related to the deterioration of economic conditions. The ratio of the allowance for possible loan losses to total loans increased 20 basis points from 1.25% at December 31, 2008 to 1.45% at September 30, 2009, primarily to compensate for the increase in classified assets. Management believes the level of the allowance for possible loan losses continues to remain adequate. Should any of the factors considered by management in evaluating the adequacy of the allowance for possible loan losses change, the Corporation's estimate of probable loan losses could also change, which could affect the level of future provisions for possible loan losses.

Capital and Liquidity

Capital. At September 30, 2009, shareholders' equity totaled \$1.9 billion compared to \$1.8 billion at December 31, 2008 and \$1.6 billion at September 30, 2008. In addition to net income of \$127.5 million, other significant changes in shareholders' equity during the first nine months of 2009 included \$76.3 million of dividends paid, \$15.9 million in proceeds from stock option exercises and the related tax benefits of \$1.4 million and \$9.5 million related to stock-based compensation. Additionally, the Corporation issued/sold \$4.6 million in common stock held in treasury to the Corporation's 401(k) plan. During the second quarter of 2009, the Corporation began to issue shares of the Corporation's common stock directly to the Corporation's 401(k) plan in connection with matching contributions. Additionally, the 401(k) plan began to purchase shares of the Corporation's common stock directly from the Corporation utilizing proceeds from dividends that plan participants elected to reinvest in the Corporation's common stock. Previously, the Corporation contributed the matching contributions in cash, which, along with the proceeds from dividends on the Corporation's common stock, were then utilized to purchase shares of the Corporation's common stock on the open market.

The accumulated other comprehensive income/loss component of shareholders' equity totaled a net, after-tax, unrealized gain of \$197.1 million at September 30, 2009 compared to a net, after-tax, unrealized gain of \$137.3 million at December 31, 2008. This fluctuation was primarily related to the after-tax effect of a change in the unrealized gain/loss on securities available for sale offset by the after-tax effect of a change in the accumulated net gain/loss on effective cash flow hedges during the first nine months of 2009. Under regulatory requirements, amounts reported as accumulated other comprehensive income/loss related to securities available for sale, effective cash flow hedges and defined benefit post-retirement benefit plans do not increase or reduce regulatory capital and are not included in the calculation of risk-based capital and leverage ratios. Regulatory agencies for banks and bank holding companies utilize capital guidelines designed to measure Tier 1 and total capital and take into consideration the risk inherent in both on-balance sheet and off-balance sheet items. See Note 9 - Regulatory Matters in the accompanying notes to consolidated financial statements included elsewhere in this report.

The Corporation paid quarterly dividends of \$0.42, \$0.43 and \$0.43 per common share during the first, second and third quarters of 2009, respectively, and quarterly dividends of \$0.40, \$0.42 and \$0.42 per common share during the first, second and third quarters of 2008. This equates to a dividend payout ratio of 57.5% and 59.8% and during the three and nine months ended September 30, 2009 and 50.8% and 47.4% during the three and nine months ended September 30, 2008.

From time to time, the Corporation's board of directors has authorized stock repurchase plans. Stock repurchase plans allow the Corporation to proactively manage its capital position and return excess capital to shareholders. Shares purchased under such plans also provide the Corporation with shares of common stock necessary to satisfy obligations related to stock compensation awards. Under the most recent plan, which was approved on April 26, 2007, the Corporation was authorized to repurchase up to 2.5 million shares of its common stock from time to time over a two-year period in the open market or through private transactions. Under the plan, 404 thousand shares approved for repurchase were repurchased during the first quarter of 2008 at a total cost of \$21.9 million. See Part II, Item 2 - Unregistered Sales of Equity Securities and Use of Proceeds, included elsewhere in this report, for details of stock repurchases during the quarter.

Liquidity. Liquidity measures the ability to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to meet loan requests, to accommodate possible outflows in deposits and to take advantage of interest rate market opportunities. The ability of a financial institution to meet its current financial obligations is a function of its balance sheet structure, its ability to liquidate assets, and its access to alternative sources of funds. The Corporation seeks to ensure its funding needs are met by maintaining a level of liquid funds through asset/liability management.

Asset liquidity is provided by liquid assets which are readily marketable or pledgeable or which will mature in the near future. Liquid assets include cash, interest-bearing deposits in banks, securities available for sale, maturities and cash flow from securities held to maturity, and federal funds sold and resell agreements.

Table of Contents

Liability liquidity is provided by access to funding sources which include core deposits and correspondent banks in the Corporation's natural trade area that maintain accounts with and sell federal funds to Frost Bank, as well as federal funds purchased and repurchase agreements from upstream banks and deposits obtained through financial intermediaries.

Since Cullen/Frost is a holding company and does not conduct operations, its primary sources of liquidity are dividends up-streamed from Frost Bank and borrowings from outside sources. Banking regulations may limit the amount of dividends that may be paid by the Corporation's bank subsidiary. See Note 9 - Regulatory Matters in the accompanying notes to consolidated financial statements included elsewhere in this report regarding such dividends. At September 30, 2009, Cullen/Frost had liquid assets, including unrestricted cash and securities purchased under resell agreements, totaling \$99.6 million.

The liquidity position of the Corporation is continuously monitored and adjustments are made to the balance between sources and uses of funds as deemed appropriate. Management is not aware of any events that are reasonably likely to have a material adverse effect on the Corporation's liquidity, capital resources or operations. In addition, management is not aware of any regulatory recommendations regarding liquidity, which if implemented, would have a material adverse effect on the Corporation.

The Corporation's operating objectives include expansion, diversification within its markets, growth of its fee-based income, and growth internally and through acquisitions of financial institutions, branches and financial services businesses. The Corporation seeks merger or acquisition partners that are culturally similar and have experienced management and possess either significant market presence or have potential for improved profitability through financial management, economies of scale and expanded services. The Corporation regularly evaluates merger and acquisition opportunities and conducts due diligence activities related to possible transactions with other financial institutions and financial services companies. As a result, merger or acquisition discussions and, in some cases, negotiations may take place and future mergers or acquisitions involving cash, debt or equity securities may occur. Acquisitions typically involve the payment of a premium over book and market values, and, therefore, some dilution of the Corporation's tangible book value and net income per common share may occur in connection with any future transaction.

New Authoritative Accounting Guidance

See Note 17 - New Authoritative Accounting Guidance in the accompanying notes to consolidated financial statements included elsewhere in this report for details of recently issued accounting pronouncements and their expected impact on the Corporation's financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The disclosures set forth in this item are qualified by the section captioned Forward-Looking Statements and Factors that Could Affect Future Results included in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations of this report and other cautionary statements set forth elsewhere in this report.

Refer to the discussion of market risks included in Item 7A. Quantitative and Qualitative Disclosures About Market Risk in the 2008 Form 10-K. There has been no significant change in the types of market risks faced by the Corporation since December 31, 2008.

The Corporation utilizes an earnings simulation model as the primary quantitative tool in measuring the amount of interest rate risk associated with changing market rates. The model quantifies the effects of various interest rate scenarios on projected net interest income and net income over the next 12 months. The model measures the impact on net interest income relative to a base case scenario of hypothetical fluctuations in interest rates over the next 12 months. These simulations incorporate assumptions regarding balance sheet growth and mix, pricing and the repricing and maturity characteristics of the existing and projected balance sheet. The impact of interest rate derivatives, such as interest rate swaps, caps and floors, is also included in the model. Other interest rate-related risks such as prepayment, basis and option risk are also considered.

As of September 30, 2009, the model simulations projected that 100 and 200 basis point increases in interest rates would result in positive variances in net interest income of 1.1% and 2.2%, respectively, relative to the base case over the next 12 months, while a decrease in interest rates of 25 basis points would result in a negative variance in net interest income of 0.6% relative to the base case over the next 12 months. The likelihood of a decrease in interest rates beyond 25 basis points as of September 30, 2009 was considered remote given current interest rate levels. As of September 30, 2008, the model simulations projected that 100 and 200 basis point increases in interest rates would result in positive variances in net interest income of 0.2% and 0.3% relative to the base case over the next 12 months, while a decrease in interest rates of 100 basis points would result in a negative variance in net interest income of 1.6% relative to the base case over the next 12 months. The likelihood of a 200 basis point decrease in interest rates as of September 30, 2008 was considered to be remote given interest rate levels prevailing at that time.

During the fourth quarter of 2007, the Corporation entered into certain interest rate swap contracts that were designated as hedging instruments in cash flow hedges that effectively fixed the interest rates on \$1.2 billion of variable-rate loans. These actions resulted in a decrease in the Corporation's sensitivity to changes in interest rates during 2008. See Note 17 - Derivative Financial Instruments in the 2008 Form 10-K. The Corporation's increased sensitivity to increases in interest rates during 2009 resulted as excess funds provided from significant growth in deposits were invested in short-term interest-bearing deposits which are generally immediately impacted by changes in interest rates.

As of September 30, 2009, the effect of a 200 basis point increase in interest rates on the Corporation's derivative holdings would result in a 2.2% negative variance in net interest income. The effect of a 25 basis point decrease in interest rates on the Corporation's derivative holdings would result in a 0.5% positive variance in net interest income.

The effects of hypothetical fluctuations in interest rates on the Corporation's securities classified as trading under FASB ASC Topic 320, Investments - Debt and Equity Securities, are not significant, and, as such, separate quantitative disclosure is not presented.

Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was carried out by the Corporation's management, with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report. No change in the Corporation's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the last fiscal quarter that materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Table of Contents**Part II. Other Information****Item 1. Legal Proceedings**

The Corporation and its subsidiaries are subject to various claims and legal actions that have arisen in the normal course of conducting business. Management does not expect the ultimate disposition of these matters to have a material adverse impact on the Corporation's financial statements.

Item 1A. Risk Factors

There has been no material change in the risk factors previously disclosed under Item 1A. of the Corporation's 2008 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information with respect to purchases made by or on behalf of the Corporation or any affiliated purchaser (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of the Corporation's common stock during the three months ended September 30, 2009.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Number of Shares That May Yet Be Purchased Under the Plan at the End of the Period
July 1, 2009 to July 31, 2009		\$		
August 1, 2009 to August 31, 2009				
September 1, 2009 to September 30, 2009				

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.

Item 6. Exhibits

(a) Exhibits

Exhibit Number	Description
31.1	Rule 13a-14(a) Certification of the Corporation's Chief Executive Officer
31.2	Rule 13a-14(a) Certification of the Corporation's Chief Financial Officer
