1. Business Overview

BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, BlackRock or the Company) provides diversified investment management and securities lending services to institutional clients, intermediary and individual investors through various investment vehicles. Investment management services primarily consist of the management of equity, fixed income, multi-asset class, alternative investment and cash management products. BlackRock offers its investment products in a variety of vehicles, including open-end and closed-end mutual funds, *iShares*® exchange traded funds (ETFs), collective investment trusts and separate accounts. In addition, BlackRock provides market risk management, financial markets advisory and enterprise investment system services to a broad base of clients. Financial markets advisory services include valuation services relating to illiquid securities, dispositions and workout assignments (including long-term portfolio liquidation assignments), risk management and strategic planning and execution.

On December 1, 2009, BlackRock completed its acquisition of Barclays Global Investors (BGI) from Barclays Bank PLC (Barclays) (the BGI Transaction). In exchange for BGI, BlackRock paid approximately $6.65 billion in cash and issued capital stock valued at $8.53 billion comprised of 3,031,516 shares of BlackRock common stock and 34,535,255 shares of BlackRock Series B and D non-voting participating preferred stock. See Note 3, Mergers and Acquisitions, for more details on this transaction.

On September 30, 2010, equity ownership of BlackRock was as follows:

	Voting Common Stock	Capital Stock[1]
Bank of America/Merrill Lynch & Co., Inc.	3.7%	33.9%
The PNC Financial Services Group, Inc. (PNC)	34.7%	24.3%

2. Significant Accounting Policies

Basis of Presentation

These condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) and include the accounts of the Company and its controlled subsidiaries. Non-controlling interests on the condensed consolidated statements of financial condition include the portion of consolidated sponsored investment funds in which the Company does not have direct equity ownership. Significant accounts and transactions between consolidated entities have been eliminated.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates. Certain financial information that normally is included in annual financial statements, including certain financial statement footnotes, is not required for interim reporting purposes and has been condensed or omitted herein. These financial statements should be read in conjunction with the Company s consolidated financial statements and notes related thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009, which was filed with the Securities and Exchange Commission (SEC) on March 10, 2010.

The interim financial information at September 30, 2010 and for the three and nine months ended September 30, 2010 and 2009 is unaudited. However, in the opinion of management, the interim information includes all normal recurring adjustments necessary for the fair presentation of the Company s results for the periods presented. The results of operations for interim periods are not necessarily indicative of results to be expected for the full year.

Business Combinations

In accordance with the requirements of Accounting Standards Codification (ASC) 805, *Business Combinations* (ASC 805), certain line items on the condensed consolidated statement of financial condition, including goodwill, intangible assets, and deferred tax liabilities, have been retrospectively adjusted as of December 31, 2009 to reflect new information obtained about facts that existed as of December 1, 2009, the BGI acquisition date. See Note 3, Mergers and Acquisitions, for a summary of the changes in 2010 to the BGI purchase price allocation.

Fair Value Measurements

ASC 820-10, *Fair Value Measurements and Disclosures* (ASC 820-10), requires among other things, disclosures about assets and liabilities that are measured and reported at fair value. The provisions of ASC 820-10 establish a hierarchy that prioritizes inputs to valuation techniques used to measure fair value and requires companies to disclose the fair value of their financial instruments according to the fair value hierarchy (i.e., Level 1, 2 and 3 inputs, as defined). The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Additionally, companies are required to provide additional disclosure regarding instruments in the Level 3 category (which have inputs to the valuation techniques that are unobservable and require significant management judgment), including a reconciliation of the beginning and ending balances separately for each major category of assets and

liabilities.

2. Significant Accounting Policies (continued)

Basis of Presentation (continued)

Fair Value Measurements (continued)

Financial instruments measured and reported at fair value are classified and disclosed in one of the following categories:

Level 1 Inputs:

Quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date. Level 1 assets include listed mutual funds and ETFs, equities and certain derivatives.

Level 2 Inputs:

Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not active; and inputs other than quoted prices that are observable, such as models or other valuation methodologies. Assets that generally are included in this category may include debt securities, bank loans, short-term floating rate notes and asset-backed securities, certain equity method limited partnership interests in hedge funds and mutual funds in which the valuations for substantially all of the investments within the fund are based upon Level 1 or Level 2 inputs, restricted public securities valued at a discount, as well as over the counter derivatives, including interest and inflation rate swaps and foreign currency exchange contracts that have inputs to the valuations that can be generally corroborated by observable market data. These prices are generally determined by a third party valuation source.

Level 3 Inputs:

Unobservable inputs for the valuation of the asset or liability, which may include non-binding broker quotes. Level 3 assets include investments for which there is little, if any, market activity. These inputs require significant management judgment or estimation. Assets included in this category generally include general and limited partnership interests in private equity funds, funds of private equity funds, real estate funds, hedge funds, and funds of hedge funds, direct private equity investments held within consolidated funds and certain held for sale real estate disposal assets. Liabilities included in this category include borrowings of consolidated collateralized loan obligations.

Level 3 inputs include BlackRock capital accounts for its partnership interests in various alternative investments, including distressed credit hedge funds, real estate and private equity funds, which may be adjusted by using the returns of certain market indices. The various partnerships are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund. Fair value policies at the underlying fund generally require the fund to utilize pricing/valuation information, including independent appraisals, from third party sources. However, in some instances current valuation information for illiquid securities or securities in markets that are not active, may not be available from any third party source or fund management may conclude that the valuations that are available from third party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that may be used to value these investments.

The Company s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument.

Fair Value Option

ASC 825-10, *Financial Instruments* (ASC 825-10), provides a fair value option election that allows companies to irrevocably elect fair value as the initial and subsequent accounting measurement attribute for certain financial assets and liabilities. ASC 825-10 permits entities to elect to measure eligible financial assets and liabilities at fair value on an ongoing basis. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. The decision to elect the fair value option is determined on an instrument by instrument basis, must be applied to an entire instrument and is irrevocable once elected. Assets and liabilities measured at fair value pursuant to ASC 825-10 are required to be reported separately from those instruments measured using another accounting method.

Acquired Management Contracts with Indefinite Useful Lives

The value of contracts to manage assets in proprietary open-end funds, closed-end funds and collective trusts without a specified termination date are generally classified as indefinite-lived intangible assets. The assignment of indefinite lives to such contracts is primarily based upon the following: a) the assumption that there is no foreseeable limit on the contract period to manage these funds; b) the Company expects to, and has the ability to continue to operate these products indefinitely; c) the products have multiple investors and are not reliant on a single investor or small group of investors for their continued operation; d) current competitive factors and economic conditions do not indicate a finite life; and e) there is a high likelihood of continued renewal based on historical experience.

Collateral Assets Held and Liabilities Under Securities Lending Agreements

The Company facilitates securities lending arrangements whereby securities held by separate account assets are lent to third parties. In exchange, the Company receives collateral, principally cash and securities, with minimums generally ranging from approximately 102% to 112% of the value of the securities lent in order to reduce counterparty risk. Under the Company s securities lending arrangements, the Company can resell or re-pledge the collateral and the borrower can re-sell or re-pledge the loaned securities. The securities lending transactions entered into by the Company are accompanied by an agreement that entitles the Company to request the borrower to return the securities at any time. These transactions are not reported as sales under ASC 860, *Transfers and Servicing,* because of the obligation of the Company to repurchase the securities.

As a result, the Company records the collateral received under these arrangements (both cash and non-cash), as its own asset in addition to a corresponding liability for the obligation to return the collateral. As with the securities lending collateral discussed above, the fair value of the asset received and related obligation to return the collateral are recorded by the Company. At September 30, 2010, the fair value of loaned securities held by separate account assets was approximately $17.5 billion and the collateral held under these securities lending agreements was approximately $19.0 billion. During the nine months ended September 30, 2010 and for the full year ended December 31, 2009, the Company had not sold or repledged any of the collateral received under these arrangements. The fair value of the collateral liability approximates the fair value of the collateral assets and is recorded in collateral liability under securities lending agreements on the Company s condensed consolidated statements of financial condition.

Classification and Measurement of Redeemable Securities

The provisions of ASC 480-10, *Distinguishing Liabilities from Equity,* require temporary equity classification for instruments that are currently redeemable or convertible for cash or other assets at the option of the holder. At September 30, 2010 and December 31, 2009, the Company determined that $54 million and $49 million, respectively, of non-controlling interests related to certain consolidated sponsored investment funds were redeemable for cash or other assets at the option of the holder, resulting in temporary equity classification on the Company s condensed consolidated statements of financial condition.

Assets and Liabilities to be Disposed of by Sale

In the course of the business of establishing real estate and other alternative investment funds, the Company may purchase land, properties and other assets while incurring liabilities directly associated with the assets, together a disposal group, with the intention to sell the disposal group to sponsored investment funds upon their launch. In accordance with the provisions of ASC 360-10, *Property, Plant, and Equipment,* the Company treats these assets and liabilities as a disposal group , measured at the lower of the carrying amount or fair value. Losses are recognized for any initial or subsequent write-down to fair value and gains are recognized for any subsequent increase in fair value, but not in excess of the cumulative loss previously recognized.

At September 30, 2010, the Company held disposal group assets of $26 million and related liabilities of $26 million in other assets and other liabilities, respectively, on its condensed consolidated statement of financial condition. Disposal group liabilities include approximately $23 million of borrowings directly associated with the disposal group assets. During the nine months ended September 30, 2009, the Company recorded a net loss of $1 million, within non-operating income (expense) on its condensed consolidated statement of income related to the disposal group and did not record any adjustments in 2010.

Convertible Debt Instruments

In accordance with the provisions within ASC 470-20, *Debt* (ASC 470-20), issuers of convertible debt instruments that may be settled in cash upon conversion should separately account for the liability and equity components in the statement of financial condition. The excess of the initial proceeds of the convertible debt instrument over the amount allocated to the liability component creates a debt discount, which should be amortized as interest expense over the expected life of the liability. At September 30, 2010, the Company had $67 million of principal convertible debentures outstanding, which were issued in February 2005, bear interest at a rate of 2.625%, and are due in 2035. The Company retrospectively adopted the requirements of ASC 470-20 on January 1, 2009 resulting in a total cumulative impact of a $9 million reduction to retained earnings at December 31, 2008. The effective borrowing rate for nonconvertible debt at the time of issuance was estimated to be 4.3%, which resulted in $18 million of the $250 million initial aggregate principal amount of the debentures issued, or $12 million after tax, being attributable to equity. As of March 31, 2010, the initial $18 million debt discount was fully amortized.

Comprehensive Income Attributable to BlackRock

Subsequent to the issuance of BlackRock s second quarter 2010 Form 10-Q, the Company determined that pursuant to ASC 810, *Consolidation*, it should have presented the amount of comprehensive income attributable to non-controlling interests and comprehensive income attributable to BlackRock in its Consolidated Statements of Comprehensive Income and it mislabeled total comprehensive income as being attributable to BlackRock. The affected periods include each of the three years in the period ended December 31, 2009 and each of the interim periods in 2009 and 2010. The accompanying Consolidated Statements of Comprehensive Income for the interim period ended September 30, 2009 has been corrected to include the required information.

For the years ended December 31, 2009, 2008 and 2007, the corrected presentation of comprehensive income is $987 million, $372 million, and $1,383 million, respectively, and comprehensive income attributable to BlackRock is $965 million, $527 million, and $1,019 million, respectively. For the years ended December 31, 2009, 2008 and 2007, net income (loss) attributable to non-controlling interests was $22 million, ($155) million, and $364 million. The Company believes this correction is not material to the consolidated financial statements taken as a whole, therefore, the 2008 and 2009 presentation will be corrected prospectively in the 2010 Form 10-K.

Accounting Policies Adopted in the Nine Months Ended September 30, 2010

New Consolidation Guidance for Variable Interest Entities

In June 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2009-17, *Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities* (ASU 2009-17), which amended the consolidation guidance for variable interest entities. The amendments include: (1) the elimination of the exemption from consolidation for qualifying special purpose entities, (2) a new approach for determining the primary beneficiary of a variable interest entity (VIE), which requires that the primary beneficiary have both (i) the power to control the most significant activities of the VIE and (ii) either the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE, and (3) the requirement to continually reassess the primary beneficiary of a VIE.

In February 2010, the FASB issued ASU 2010-10, *Amendments to Statement 167 for Certain Investment Funds* (ASU 2010-10). This ASU defers the application of Statement of Financial Accounting Standards (SFAS) No. 167, *Amendments to FASB Interpretation No. 46(R),* for a reporting enterprise s interest in an entity if all of the following conditions are met:

(1) the entity either has all of the attributes of an investment company, as specified in ASC 946-10, *Financial Services-Investment Companies* (ASC 946-10) or it is industry practice to apply measurement principles for financial reporting that are consistent with those in ASC 946-10; (2) the entity is not a securitization entity, an asset-backed financing entity, or an entity formerly considered a qualifying special-purpose entity, and (3) the reporting enterprise does not have an explicit or implicit obligation to fund losses of the entity that could potentially be significant to the entity.

In addition, the deferral applies to a reporting entity s interest in an entity that is required to comply or operate in accordance with the requirement of Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds.

The amendments in ASU 2010-10 clarify that for entities that do not qualify for the deferral, related parties should be considered when evaluating each of the criteria for determining whether a decision maker or service provider fee represents a variable interest.

An entity that qualifies for the deferral will continue to be assessed for consolidation under the overall guidance on variable interest entities in ASC 810, *Consolidation* (ASC 810) (before its amendment by SFAS No. 167) or other applicable consolidation guidance, including guidance for the consolidation of partnerships in ASC 810. The amendment does not defer the disclosure requirements of ASU 2009-17.

On January 1, 2010, upon adoption of ASU 2009-17, the Company determined it was the primary beneficiary of three collateralized loan obligations (CLOs), which resulted in consolidation of these CLOs on the Company s condensed consolidated financial statements. Upon consolidation, the Company elected the fair value option for eligible financial assets and liabilities, to mitigate accounting mismatches between the carrying value of the assets and liabilities and to achieve operational simplifications. Upon adoption of the provisions of ASU 2009-17, the Company recorded a cumulative effect adjustment to appropriated retained earnings of $114 million.

Appropriated Retained Earnings

Upon adoption of ASU 2009-17, BlackRock consolidated three CLOs and recorded a cumulative effect adjustment to appropriated retained earnings on the condensed consolidated statement of financial condition equal to the difference between the fair value of the CLOs assets and the fair value of their liabilities. Such amounts are recorded as appropriated retained earnings as the CLO noteholders, not BlackRock, ultimately will receive the benefits or absorb the losses associated with the CLOs assets and liabilities. Subsequent to adoption of ASU 2009-17, the net change in the fair value of the CLOs assets and liabilities will be recorded as net income (loss) attributable to nonredeemable non-controlling interests and as an adjustment to appropriated retained earnings.

Improving Disclosures about Fair Value Measurements

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures* (ASU 2010-06). ASU 2010-06 amends ASC 820-10 to require new disclosures with regards to significant transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances, and other settlements within the Level 3 fair value rollforward. ASU 2010-06 also clarifies existing fair value disclosures about the appropriate level of disaggregation and about inputs and valuation techniques for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales and settlements in the rollforward of activity in Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption on January 1, 2010 of the additional disclosure requirements of ASU 2010-06 did not materially impact BlackRock s condensed consolidated financial statements. The adoption of the additional Level 3 rollforward disclosure requirements, which will be effective in 2011, are not expected to materially impact BlackRock s financial statement disclosures.

3. Mergers and Acquisitions

Barclays Global Investors

On December 1, 2009, BlackRock acquired from Barclays all of the outstanding equity interests of subsidiaries of Barclays conducting the investment management business of BGI in exchange for an aggregate of 37,566,771 shares of BlackRock common stock and participating preferred stock and $6.65 billion in cash. The fair value of the 37,566,771 shares at closing, on December 1, 2009, was $8.53 billion, at a price of $227.08 per share, the closing price of BlackRock s common stock on November 30, 2009.

A summary of the initial and revised fair values of the assets acquired and liabilities and non-controlling interests assumed on December 1, 2009 in this acquisition is as follows:

(Dollar amounts in millions)	Initial Estimate of Fair Value	Purchase Price Adjustments	Revised Estimate of Fair Value

Capital stock at fair value	8,531		8,531
Total cash and stock consideration	$ 14,126	$	$ 14,126

At this time, except for the items noted below, the Company does not expect additional material changes to the value of the assets acquired or liabilities assumed in conjunction with the transaction.

As management receives additional tax related information the following items are subject to change: deferred income tax assets and liabilities, goodwill, other assets, due from and to related parties and other liabilities.

Helix Financial Group LLC

In January 2010, the Company completed the acquisition of substantially all of the net assets of Helix Financial Group LLC, which provides advisory, valuation and analytics solutions to commercial real estate lenders and investors (the Helix Transaction). The assets acquired and liabilities assumed, as well as the total consideration paid for the acquisition, were not material to the Company s condensed consolidated financial statements.

Available-for-Sale Investments

A summary of the cost and carrying value of investments classified as available-for-sale is as follows:

(Dollar amounts in millions)

September 30, 2010	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Carrying Value
Available-for-sale investments:				
Equity securities:				
Sponsored investment funds	$ 45	$ 6	($ 2)	$ 49

Debt securities:				
Mortgage debt	6	1		7
Asset-backed debt	10			10
Total available-for-sale investments	$ 71	$ 3	($ 1)	$ 73

Available-for-sale investments include seed investments in BlackRock sponsored investment funds and debt securities received upon closure of an enhanced cash fund in lieu of the Company s remaining investment in the fund and securities purchased from another enhanced cash fund.

During the nine months ended September 30, 2010 and 2009, the Company recorded other-than-temporary impairments of less than $1 million and $4 million, respectively, which were recorded in non-operating (expense) on the condensed consolidated statements of income. The $4 million of impairments during the nine months ended September 30, 2009 included $2 million of credit loss impairments on debt securities, which was determined by comparing the estimated discounted cash flows versus the amortized cost for each individual debt security.

The Company reviewed the gross unrealized losses of $2 million as of September 30, 2010 related to available-for-sale equity securities, of which approximately $1 million had been in a loss position for greater than twelve months, and determined that these unrealized losses were not other-than-temporary primarily because the Company has the ability and intent to hold the securities for a period of time sufficient to allow for recovery of such unrealized losses. As a result, the Company did not record impairments on such equity securities.

5. Consolidated Sponsored Investment Funds

The Company consolidates certain sponsored investment funds primarily because it is deemed to control such funds in accordance with GAAP. The investments that are owned by these consolidated sponsored investment funds are classified as other or trading investments. At September 30, 2010 and December 31, 2009, the following balances related to these funds were consolidated on the condensed consolidated statements of financial condition:

(Dollar amounts in millions)	September 30, 2010	December 31, 2009
Cash and cash equivalents	$ 92	$ 75
Investments	470	463
Other net assets (liabilities)	(11)	(7)
Non-controlling interests	(234)	(273)
Total net interests in consolidated investment funds	$ 317	$ 258

At December 31, 2009, the above balances included a consolidated sponsored investment fund that was also deemed a VIE. This VIE, as well as three consolidated CLOs, which are also VIEs, were excluded from the September 30, 2010 balances above. See Note 7, Variable Interest Entities, for further discussion on these consolidated products.

BlackRock s total exposure to consolidated sponsored investment funds of $317 million and $258 million at September 30, 2010 and December 31, 2009, respectively, represents the value of the Company s economic ownership interest in these sponsored investment funds. Valuation changes associated with these consolidated investment funds are reflected in non-operating income (expense) and partially offset in net income (loss) attributable to non-controlling interests for the portion not attributable to BlackRock.

The Company may not be readily able to access cash and cash equivalents held by consolidated sponsored investment funds to use in its operating activities. In addition, the Company may not be readily able to sell investments held by consolidated sponsored investment funds in order to obtain cash for use in its operations.

Separate Account Assets

BlackRock Pensions Limited and BlackRock Asset Management Pensions Limited, both wholly-owned subsidiaries of the Company, are registered life insurance companies that maintain separate account assets, representing segregated funds held for purposes of funding individual and group pension contracts, and equal and offsetting separate account non-financial liabilities. The changes in Level 3 assets in the three and nine months ended September 30, 2009, primarily related to purchases, sales and gains/(losses). The net investment income and net gains and losses attributable to separate account assets accrue directly to the contract owners and are not reported on the Company s condensed consolidated statements of income.

Money Market Funds within Cash and Cash Equivalents

At September 30, 2010 and December 31, 2009, approximately $125 million and $1.4 billion, respectively, of money market funds were recorded within cash and cash equivalents on the Company s condensed consolidated statements of financial condition. Money market funds are valued through the use of quoted market prices (a Level 1 input), or $1.00, which is generally the net asset value of the fund.

Level 3 Assets

Level 3 assets recorded within investments, which include equity method investments and consolidated investments of real estate funds, private equity funds and funds of private equity funds, are valued based upon valuations, including capital accounts, received from internal as well as third party fund managers. Fair valuations of the underlying funds are based on a combination of methods, which may include third-party independent appraisals and discounted cash flow techniques. Direct investments in private equity companies held by funds of private equity funds are valued based on an assessment of each underlying investment, incorporating evaluation of additional significant third party financing, changes in valuations of comparable peer companies, the business environment of the companies and market indices, among other factors.

Level 3 assets recorded within separate account assets may include single broker non-binding quotes for fixed income securities and equity securities, which have unobservable inputs due to certain corporate actions.

Level 3 investments of consolidated VIEs include direct private equity investments and private equity funds valued based upon valuations received from internal as well as third party fund managers.

Level 3 Liabilities

Level 3 liabilities recorded as borrowings of consolidated VIEs, include CLO borrowings valued based upon non-binding broker quotes.

Realized and Unrealized Gains / (Losses) for Level 3 Assets and Liabilities

Realized and unrealized gains / (losses) recorded for Level 3 assets and liabilities are reported in non-operating income (expense) on the Company s condensed consolidated statements of income. A portion of net income (loss) for consolidated investments and all of the net income (loss) for consolidated VIEs is allocated to non-controlling interests to reflect net income (loss) not attributable to the Company.

Significant Transfers in and/or out of Levels

Transfers in and/or out of Levels are reflected as of the beginning of the period when significant inputs, including market inputs or performance attributes, used for the fair value measurement become observable or when the book value of certain equity method investments no longer represents fair value as determined under fair value methodologies.

Separate Account Assets

In the nine months ended September 30, 2010 there were net transfers out of Level 3 to Level 2 related to debt securities held within separate account assets. The net transfers in Levels were primarily due to availability of additional observable market inputs, including additional broker quotes.

In the nine months ended September 30, 2010 there were $63 million of net transfers into Level 3 from Level 1 and Level 2 of equity securities held within separate account assets. The net transfers into Level 3 were primarily due to market inputs no longer being considered observable.

Significant Other Settlements in 2010

As of January 1, 2010, upon the adoption of ASU 2009-17 there was a $35 million reclassification of assets from Level 3 private equity investments to Level 3 private equity assets of consolidated VIEs as well as the consolidation of $1,157 million of borrowings within the consolidated CLOs.

Investments in Certain Entities that Calculate Net Asset Value Per Share

As a practical expedient to value certain investments, the Company relies on net asset values as the fair value for certain investments. The following table lists information regarding all investments that use a fair value measurement to account for both their financial assets and financial liabilities in their calculation of a net asset value per share (or its equivalent) at September 30, 2010:

(b) This category includes the underlying third party private equity funds within consolidated BlackRock sponsored private equity funds of funds. The fair values of the investments in the third party funds have been estimated using the net asset value of the Company s ownership interest in partners capital in each fund in the portfolio as well as other performance inputs. These investments are not subject to redemption, however, for certain funds the Company may sell or transfer its interest, which may need approval by the general partner of the underlying funds. Due to the nature of the investments in this category, the Company reduces its investment by distributions that are received through the realization of the underlying assets of the funds. It is estimated that the underlying assets of these funds will be liquidated over a weighted-average period of approximately 9 years. Total remaining unfunded commitments to other third party funds is $65 million. The Company is contractually obligated to fund only $47 million to the consolidated funds, while the remaining unfunded balance in the table above would be funded by capital contributions from non-controlling interest holders.

(c) This category includes several consolidated funds of hedge funds that invest in multiple strategies to diversify risks. The fair values of the investments in this category have been estimated using the net asset value of the fund s ownership interest in partners capital of each fund in the portfolio. Investments in this category can generally be redeemed, as long as there are no restrictions in place by the underlying funds.

(d) This category includes hedge funds and funds of hedge funds that invest primarily in equities, fixed income securities, distressed credit and mortgage instruments and other third party hedge funds. The fair values of the investments in this category have been estimated using the net asset value of the Company s ownership interest in partners capital. It is estimated that the investments in the funds that are not subject to redemptions will be liquidated over a weighted-average period of less than 7 years.

(e) This category includes several private equity funds that initially invest in non-marketable securities of private companies, which ultimately may become public in the future. The fair values of these investments have been estimated using the net asset value of the Company s ownership interest in partners capital as well as other performance inputs. The Company s investment in each fund is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying assets of the private equity funds. It is estimated that the investment in these funds will be liquidated over a weighted-average period of approximately 7 years.

(f) This category includes several real estate funds that invest primarily to acquire, expand, renovate, finance, hold for investment, and ultimately sell income-producing apartment properties or to capitalize on the distress in the residential real estate market. The fair values of the investments in this category have been estimated using the net asset value of the Company s ownership interest in partners capital. The Company s investment in each fund is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying assets of the real estate funds. It is estimated that the investments in these funds will be liquidated over a weighted-average period of approximately 4 years.

(g) This category includes investments in certain hedge funds that invest in energy and health science related equity securities. The fair values of the investments in this category have been estimated using the net asset value of the Company s ownership interest in partners capital as well as performance inputs.

(h) This category includes the underlying third party private equity funds within one consolidated BlackRock sponsored private equity fund of funds. The fair values of the investments in the third party funds have been estimated using the net asset value of the Company s ownership interest in partners capital in each fund in the portfolio as well as other performance inputs. These investments are not subject to redemption, however for certain funds the Company may sell or transfer its interest, which may need approval by the general partner of the underlying funds. Due to the nature of the investments in this category, the Company reduces its investment by distributions that are received through the realization of the underlying assets of the funds. It is estimated that the underlying assets of these funds will be liquidated over a weighted-average period of approximately 5 years. Total remaining unfunded commitments to other third party funds is $2 million, which will be funded by capital contributions from non-controlling interest holders.

Fair Value Option

Upon consolidation of three CLOs on January 1, 2010, the Company elected to adopt the fair value accounting provisions for eligible assets, including bank loans and borrowings of the CLOs. To the extent there is a difference between the change in fair value of the assets and liabilities, the difference will be reflected as net income (loss) attributable to nonredeemable non-controlling interests on the condensed consolidated statements of income and offset by a change in appropriated retained earnings on the condensed consolidated statements of financial condition.

The following table presents, as of September 30, 2010, the fair value of those assets and liabilities selected for fair value accounting:

(Dollar amounts in millions)	September 30, 2010
CLO Bank Loans:	
Aggregate principal amounts outstanding	$ 1,268
Fair value	$ 1,154
Aggregate unpaid principal balance in excess of fair value	$ 114
Unpaid principal balance of loans more than 90 days past due	$ 7
Aggregate fair value of loans more than 90 days past due	$ 1
Aggregate unpaid principal balance in excess of fair value for loans more than 90 days past due	$ 6
CLO Borrowings:	
Aggregate principal amounts outstanding	$ 1,434
Fair value	$ 1,237

The principal amounts outstanding of the borrowings issued by the CLOs mature between 2016 and 2019.

During the nine months ended September 30, 2010, the change in fair value of the bank loans, along with the bonds held at fair value, resulted in a $108 million gain, which was offset by a $119 million loss in the fair value of the CLO borrowings. The net loss was recorded in non-operating income (expense) on the condensed consolidated statement of income. The change in fair value of the assets and liabilities includes interest income and expense, respectively.

7. Variable Interest Entities

In the normal course of business, the Company is the manager of various types of sponsored investment vehicles, including collateralized debt/loan obligations (CDO or CLO) and sponsored investment funds, which may be considered VIEs. The Company receives advisory fees and/or other incentive related fees for its services and may from time to time own equity or debt securities or enter into derivatives with the vehicles, each of which are considered variable interests. The Company enters into these variable interests principally to address client needs through the launch of such investment vehicles. The VIEs are primarily financed via capital contributed by equity and debt holders. The Company s involvement in financing the operations of the VIEs is limited to its equity interests.

The primary beneficiary of a VIE that is an investment fund that meets the conditions of ASU 2010-10 is the enterprise that has a variable interest (or combination of variable interests, including those of related parties) that will absorb a majority of the entity s expected losses, receive a majority of the entity s expected residual returns or both. Effective January 1, 2010, the primary beneficiary of a CDO/CLO that is a VIE that does not meet the conditions of ASU 2010-10 is the enterprise that has the power to direct activities of the entity that most significantly impact the entity s economic performance and has the obligation to absorb losses or the right to receive benefits that potentially could be significant to the CDO/CLO.

In order to determine whether the Company is the primary beneficiary of a VIE, management must make significant estimates and assumptions of probable future cash flows of the VIEs. Assumptions made in such analyses may include, but are not limited to, market prices of securities, market interest rates, potential credit defaults on individual securities or default rates on a portfolio of securities, pre-payments, realization of gains, liquidity or marketability of certain securities, discount rates and the probability of certain other outcomes.

VIEs in which BlackRock is the Primary Beneficiary

At September 30, 2010

At September 30, 2010, BlackRock was the primary beneficiary of four VIEs, which included three CLOs in which it did not have an investment, however, BlackRock, as the collateral manager, was deemed to have both the power to control the activities of the CLOs and the right to receive benefits that could potentially be significant to the VIE. In addition, BlackRock was the primary beneficiary of one sponsored private equity investment fund, in which it had a non-substantive investment, which absorbed the majority of the variability due to its de-facto third party relationships with other partners in the fund. The assets of these VIEs are not available to creditors of the Company. In addition, the investors in these VIEs have no recourse to the credit of the Company. At September 30, 2010, the following balances related to these four VIEs, which were consolidated on the Company s condensed consolidated statement of financial condition:

(Dollar amounts in millions)	September 30, 2010

Assets of consolidated VIEs:		
Cash and cash equivalents	$	91
Bank loans, bonds and other investments		1,293
Liabilities of consolidated VIEs:		
Borrowings		(1,237)
Other liabilities		(7)
Appropriated retained earnings		(94)
Non-controlling interests of consolidated VIEs		(46)
Total net interests in consolidated VIEs	$	

For the nine months ended September 30, 2010, the Company recorded non-operating expense of $16 million offset by a $16 million net loss attributable to nonredeemable non-controlling interests on the Company s condensed consolidated statements of income. For the nine months ended September 30, 2009, the Company recorded a non-operating expense of $2 million offset by a $2 million net loss attributable to nonredeemable non-controlling interests on its condensed consolidated statements of income.

At September 30, 2010, bank loans, bonds and other investments of consolidated VIEs were $1,154 million, $100 million, and $39 million, respectively. The weighted-average maturity of the bank loans and bonds was approximately 4.2 years.

VIEs in which BlackRock is the Primary Beneficiary (continued)

As of December 31, 2009

As of December 31, 2009, BlackRock was the primary beneficiary of one VIE, a sponsored private equity investment fund in which it did not have a substantive investment, due to its de-facto third party relationships with other partners in the fund. Due to the consolidation of this VIE, at December 31, 2009, the Company recorded $54 million of net assets, primarily comprised of investments and cash and cash equivalents. These net assets were offset by $54 million of nonredeemable non-controlling interests, which reflect the equity ownership of third parties, on the Company s condensed consolidated statements of financial condition.

VIEs in which the Company holds significant variable interests or is the sponsor that holds a variable interest but is not the Primary Beneficiary of the VIE

At September 30, 2010 and December 31, 2009, the Company s carrying value of assets and liabilities and its maximum risk of loss related to VIEs in which it holds a significant variable interest or is the sponsor that holds a variable interest, but for which it was not the primary beneficiary, were as follows:

At September 30, 2010

	(Dollar amounts in millions)			
	Variable Interests on the Condensed Consolidated Statement of Financial Condition			
	Investments	Advisory Fee Receivables	Other Net Assets (Liabilities)	Maximum Risk of Loss
CDOs/CLOs	$ 2	$ 3	($ 3)	$ 21
Other sponsored investment funds	22	203		225
Total	$ 24	$ 206	($ 3)	$ 246

The size of the net assets of the VIEs that the Company does not consolidate related to CDOs/CLOs, collective trust funds and other sponsored investment funds were as follows:

CDOs/CLOs - approximately ($5) billion, comprised of approximately $8 billion of assets at fair value and $13 billion of liabilities, primarily comprised of unpaid principal debt obligations to CDO/CLO debt holders.

Other sponsored investments funds approximately $1.5 trillion to $1.6 trillion

This amount includes approximately $1.2 trillion of collective trusts. Each collective trust has been aggregated separately and may include collective trusts that invest in other collective trusts.

The net assets of the VIEs are primarily comprised of cash and cash equivalents and investments offset by liabilities primarily comprised of various accruals for the sponsored investment vehicles.

At September 30, 2010, BlackRock s maximum risk of loss associated with these VIEs primarily relates to: (i) BlackRock s investments, (ii) advisory fee receivables and (iii) credit protection sold by BlackRock to a third party in a synthetic CDO transaction.

The size of the net assets of the VIEs that the Company does not consolidate related to CDOs/CLOs, collective trust funds and other sponsored investment funds were as follows:

CDOs/CLOs - approximately ($8) billion, comprised of approximately $10 billion of assets at fair value and $18 billion of liabilities, primarily comprised of unpaid principal debt obligations to CDO/CLO debt holders.

Other sponsored investments funds approximately $1.5 trillion to $1.6 trillion

This amount includes approximately $1.1 trillion of collective trusts. Each collective trust has been aggregated separately and may include collective trusts that invest in other collective trusts.

The net assets of the VIEs are primarily comprised of cash and cash equivalents and investments offset by liabilities primarily comprised of various accruals for the sponsored investment vehicles.

At December 31, 2009, BlackRock s maximum risk of loss associated with these VIEs primarily relates to: (i) BlackRock s investments, (ii) advisory fee receivables and (iii) credit protection sold by BlackRock to a third party in a synthetic CDO transaction.

8. Derivatives and Hedging

For the nine months ended September 30, 2010 and the year ended December 31, 2009, the Company did not hold any derivatives designated in a formal hedge relationship under ASC 815-10, *Derivatives and Hedging* (ASC 815-10).

By using derivative financial instruments, the Company exposes itself to market and counterparty risk. Market risk from forward foreign currency exchange contracts is the effect on the value of a financial instrument that results from a change in currency exchange rates. The Company manages exposure to market risk associated with foreign currency exchange contracts by establishing and monitoring parameters that limit the types and degrees of market risk that may be undertaken. At September 30, 2010, the Company had two outstanding forward foreign currency exchange contracts with two counterparties with an aggregate notional value of $100 million.

During 2007, the Company commenced a program to enter into a series of total return swaps to economically hedge against market price exposures with respect to certain seed investments in sponsored investment products. At September 30, 2010, the Company had outstanding total return swaps with two counterparties with an aggregate notional value of approximately $24 million.

The Company acts as the portfolio manager for a synthetic CDO transaction, referred to as Pillars. In connection with the transaction, the Company entered into a credit default swap with Citibank, N.A. (Citibank), providing Citibank credit protection of approximately $17 million, representing the Company s maximum risk of loss with respect to the provision of credit protection. Pursuant to ASC 815-10, the Company carries the Pillars credit default swap at fair value based on the expected future cash flows under the arrangement.

On behalf of clients that maintain separate accounts representing segregated funds held for the purpose of funding individual and group pension contracts, the Company invests in various derivative instruments, which may include futures and forward foreign currency exchange contracts and interest rate and inflation rate swaps.

The Company consolidates certain sponsored investment funds, which may utilize derivative instruments as a part of the fund s investment strategy. The change in fair value of such derivatives, which is recorded in non-operating income (expense), was not material to the Company s condensed consolidated financial statements.

8. Derivatives and Hedging (continued)

The following table presents gains (losses) recognized in income on derivative instruments for the three and nine months ended September 30, 2010:

(Dollar amounts in millions)	Income Statement Location	Three Months Ended September 30, 2010	Nine Months Ended September 30, 2010
Foreign currency exchange contracts	General and administration expenses	($ 3)	($ 3)
Total return swaps	Non-operating income (expense)	(3)	
Credit default swap (Pillars)	Non-operating income (expense)		
Total		($ 6)	($ 3)

Net realized and unrealized gains and losses attributable to derivatives held by separate account assets and liabilities accrue directly to the contract owners and are not reported in the Company s condensed consolidated statements of income.

9. Goodwill

Goodwill at September 30, 2010 and changes during the nine months ended September 30, 2010 were as follows:

(Dollar amounts in millions)	
December 31, 2009, as reported	$ 12,570
BGI purchase price allocation adjustments	68
December 31, 2009, as adjusted	12,638
Impact of excess tax basis amortization	(13)
Other net additions	16
September 30, 2010	$ 12,641

In accordance with ASC 805, goodwill has been retrospectively adjusted to reflect new information obtained about facts that existed as of December 1, 2009, the BGI acquisition date. During the nine months ended September 30, 2010, goodwill increased by $71 million. The increase related to purchase price allocation adjustments related to the BGI Transaction, the purchase of substantially all of the net assets of Helix Financial Group LLC and other net additions, offset by a decline related to tax benefits realized from tax-deductible goodwill in excess of book goodwill.

At September 30, 2010, the balance of the Quellos tax-deductible goodwill in excess of book goodwill was approximately $330 million. Goodwill related to the Quellos Transaction will continue to be reduced in future periods by the amount of tax benefits realized from tax-deductible goodwill in excess of book goodwill.

In accordance with ASC 805, intangible assets have been retrospectively adjusted to reflect new information obtained about facts that existed at December 1, 2009, the BGI acquisition date. During the nine months ended September 30, 2010, intangible assets decreased $102 million related to $120 million of amortization expense, partially offset by $18 million of BGI purchase price allocation adjustments.

11. Borrowings

Short-Term Borrowings

The carrying value of short-term borrowings included the following:

(Dollar amounts in millions)	September 30, 2010	December 31, 2009
Commercial paper program	$	$ 2,034
2007 Revolving credit facility	100	200
Total short-term borrowings	$ 100	$ 2,234

Commercial Paper Program

On October 14, 2009, BlackRock established a commercial paper program (the CP Program) under which the Company may issue unsecured commercial paper notes (the CP Notes) on a private placement basis up to a maximum aggregate amount outstanding at any time of $3 billion. The proceeds of the commercial paper issuances were used for the financing of a portion of the BGI Transaction. Subsidiaries of Bank of America and Barclays, as well as other third parties, act as dealers under the CP Program. The CP Program is supported by the 2007 revolving credit facility.

The Company began issuance of CP Notes under the CP Program on November 4, 2009. As of September 30, 2010, BlackRock did not have any outstanding CP Notes.

Short-Term Borrowings (continued)

2007 Revolving Credit Facility

In August 2007, the Company entered into a five-year $2.5 billion unsecured revolving credit facility (the 2007 facility), which permits the Company to request an additional $500 million of borrowing capacity, subject to lender credit approval, up to a maximum of $3.0 billion. The 2007 facility requires the Company not to exceed a maximum leverage ratio (ratio of net debt to earnings before interest, taxes, depreciation and amortization, where net debt equals total debt less domestic unrestricted cash) of 3 to 1, which was satisfied with a ratio of less than 1 to 1 at September 30, 2010.

The 2007 facility provides back-up liquidity, funds ongoing working capital for general corporate purposes and funds various investment opportunities. At September 30, 2010, the Company had $100 million outstanding under the 2007 facility with an interest rate of 0.48% and a maturity date during November 2010.

Lehman Commercial Paper Inc. has a $140 million participation under the 2007 facility; however BlackRock does not expect that Lehman Commercial Paper Inc. will honor its commitment to fund additional amounts. Bank of America, a related party, has a $140 million participation under the 2007 facility.

Japan Commitment-line

In September 2010, BlackRock Japan Co., Ltd., a wholly-owned subsidiary of the Company, renewed a five billion Japanese yen commitment-line agreement with a banking institution (the Japan Commitment-line). The term of the renewed Japan Commitment-line is one year and will accrue interest on outstanding borrowings at the applicable Japanese short-term prime rate. The Japan Commitment-line is intended to provide liquidity and flexibility for operating requirements in Japan. At September 30, 2010, the Company had no borrowings outstanding under the Japan Commitment-line.

Convertible Debentures

The carrying value of the 2.625% convertible debentures due in 2035 included the following:

(Dollar amounts in millions)	September 30, 2010	December 31, 2009
Maturity amount / Carrying value	$ 67	$ 243

The Company recognized interest expense of $2 million and $8 million for the nine months ended September 30, 2010 and 2009, respectively, comprised of $2 million and $5 million related to the coupon and less than $1 million and $3 million related to amortization of the discount for the nine months ended September 30, 2010 and 2009, respectively. At September 30, 2010, the estimated fair value of the convertible debentures was $111 million, which was estimated using a market price at the end of September 2010.

On February 15, 2009, the convertible debentures became convertible at the option of the holder into cash and shares of the Company s common stock at any time prior to maturity. During the nine months ended September 30, 2010, holders of $176 million of debentures converted their holdings into cash and approximately 942 thousand shares.

Fair value	$ 513	$ 1,063	$ 831	$ 1,116	$ 3,523

2017 Notes

In September 2007, the Company issued $700 million in aggregate principal amount of 6.25% senior unsecured notes maturing on September 15, 2017 (the 2017 Notes). Interest is payable semi-annually on March 15 and September 15 of each year, or approximately $44 million per year. The 2017 Notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a make-whole redemption price. The 2017 Notes were issued at a discount of $6 million, which is being amortized over their ten-year term. The Company incurred approximately $4 million of debt issuance costs, which are being amortized over ten years. As of September 30, 2010, $3 million of unamortized debt issuance costs were included in other assets on the condensed consolidated statement of financial condition.

2012, 2014 and 2019 Notes

In December 2009, the Company issued $2.5 billion in aggregate principal amount of unsecured and unsubordinated obligations. These notes were issued as three separate series of senior debt securities including $0.5 billion of 2.25% notes, $1.0 billion of 3.50% notes and $1.0 billion of 5.0% notes maturing in December 2012, 2014 and 2019, respectively. Net proceeds of this offering were used to repay borrowings under the CP Program and for general corporate purposes. Interest on these notes is payable semi-annually on June 10 and December 10 of each year beginning June 10, 2010, or approximately $96 million per year. These notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a make-whole redemption price. These notes were issued collectively at a discount of $5 million that is being amortized over the terms of the notes. The Company incurred approximately $13 million of debt issuance costs, which are being amortized over

the respective terms of these notes. As of September 30, 2010, $12 million of unamortized debt issuance costs were included in other assets on the condensed consolidated statement of financial condition.

12. Commitments and Contingencies

Investment Commitments

At September 30, 2010, the Company had approximately $241 million of investment commitments relating primarily to funds of private equity funds, real estate funds and hedge funds. Amounts to be funded generally are callable at any time prior to the expiration of the commitment. This amount excludes additional commitments made by consolidated sponsored funds of funds to underlying third party funds as third party non-controlling interest holders have the legal obligation to fund the respective commitments of such funds of funds.

Legal Proceedings

From time to time, BlackRock receives subpoenas or other requests for information from various U.S. federal, state governmental and regulatory authorities in connection with certain industry-wide or other investigations or proceedings. It is BlackRock s policy to cooperate fully with such inquiries. The Company and certain of its subsidiaries have been named as defendants in various legal actions, including arbitrations and other litigation arising in connection with BlackRock s activities. Additionally, certain of the investment funds that the Company manages are subject to lawsuits, any of which potentially could harm the investment returns of the applicable fund or result in the Company being liable to the funds for any resulting damages.

Management, after consultation with legal counsel, currently does not anticipate that the aggregate liability, if any, arising out of regulatory matters or lawsuits will have a material adverse effect on BlackRock s earnings, financial position, or cash flows although, at the present time, management is not in a position to determine whether any such pending or threatened matters will have a material adverse effect on BlackRock s results of operations in any future reporting period.

Indemnifications

In the ordinary course of business, BlackRock enters into contracts pursuant to which it may agree to indemnify third parties in certain circumstances. The terms of these indemnities vary from contract to contract and the amount of indemnification liability, if any, cannot be determined.

Under the transaction agreement in the MLIM Transaction, the Company has agreed to indemnify Merrill Lynch & Co., Inc. (Merrill Lynch) for losses it may incur arising from (1) any alleged or actual breach, failure to comply, violation or other deficiency with respect to any regulatory or fiduciary requirements relating to the operation of BlackRock s business, (2) any fees or expenses incurred or owed by BlackRock to any brokers, financial advisors or comparable other persons retained or employed by BlackRock in connection with the MLIM Transaction, and (3) certain specified tax covenants.

Under the transaction agreement in the BGI Transaction, the Company has agreed to indemnify Barclays for losses it may incur arising from (1) breach by the Company of certain representations, (2) breach by the Company of any covenant in the agreement, (3) liabilities of the entities acquired in the transaction other than liabilities assumed by Barclays or for which it is providing indemnification, and (4) certain taxes.

Management believes that the likelihood of any liability arising under the MLIM Transaction and BGI Transaction indemnification provisions is remote. Management cannot estimate any potential maximum exposure due both to the remoteness of any potential claims and the fact that items that would be included within any such calculated claim would be beyond the control of BlackRock. Consequently, no liability has been recorded on the Company s condensed consolidated statements of financial condition.

Contingent Payments Related to Business Acquisitions

On October 1, 2007, the Company acquired the fund of funds business of Quellos. As part of this transaction, Quellos is entitled to receive two contingent payments upon achieving certain investment advisory revenue measures through December 31, 2010, totaling up to an additional $969 million in a combination of cash and stock. The first contingent payment was paid in 2009 and the second contingent payment, of up to $595 million, is payable in cash in 2011.

During 2009, the Company determined the first contingent payment to be $219 million, of which $11 million was previously paid in cash during 2008. Of the remaining $208 million, $156 million was paid in cash and $52 million was paid in common stock, or approximately 330,000 shares based on a price of $157.33 per share. Quellos may also be entitled to a catch-up payment related to the first contingent payment if certain performance measures are met in 2010 as the value of the first contingent payment was less than $374 million.

In connection with the acquisition of SSR, the holding company of State Street Research and Management Company, which closed in January 2005, the Company made a final contingent payment in August 2010 of approximately $8 million based on the Company s retained assets under management associated with the MetLife, Inc. defined benefit and defined contribution plans.

Other Contingent Payments

The Company acts as the portfolio manager in a series of credit default swap transactions and has a maximum potential exposure of $17 million under a credit default swap between the Company and Citibank. See Note 8, Derivatives and Hedging, for further discussion of this transaction and the related commitment.

Drapers Gardens

In January 2010, the Company entered into an agreement with Mourant & Co Trustees Limited and Mourant Property Trustees Limited as Trustees of the Drapers Gardens Unit Trust, for the lease of approximately 292,418 square feet of office and ancillary (including retail) space located at Drapers Gardens, 12 Throgmorton Avenue, London, EC2, United Kingdom.

The term of the lease began on February 17, 2010 (the Effective Date) and will continue for 25 years, with the option to renew for an additional five year term. The lease provides for total annual base rental payments of approximately £13 million (exclusive of value added tax and other lease charges, or approximately $21.7 million based on an exchange rate of $1.60 per £1), payable quarterly in advance. The annual rent is subject to increase on each fifth anniversary of the Effective Date to the then open market rent. The lease includes an initial rent free period for 36 months and 22 days following the Effective Date.

In addition, the Company entered into a purchase obligation for construction services of approximately £43 million. The Company incurred £3 million of construction services during the nine months ended September 30, 2010 resulting in a remaining obligation of £40 million (or approximately $63 million based on the September 30, 2010 exchange rate of $1.58 per £1).

(1) At September 30, 2010, 24,728 awards have vested but have not been converted.

The Company values restricted stock and RSUs at their grant-date fair value as measured by BlackRock s common stock price.

In January 2010, the Company granted the following awards under the BlackRock, Inc. 1999 Stock Award and Incentive Plan:

846,884 RSUs to employees as part of annual incentive compensation that vest ratably over three years from the date of grant.

256,311 RSUs to employees that cliff vest on January 31, 2012. Awards to certain individuals require that BlackRock has actual GAAP earnings per share of at least $6.13 in 2010 or $6.50 in 2011 or has attained an alternative performance hurdle based on the Company s earnings per share growth rate versus certain peers over the term of the awards. The RSUs may not be sold before the one-year anniversary of the vesting date.

The RSUs may not be sold before the one-year anniversary of the vesting date.

At September 30, 2010, there was $631 million in total unrecognized stock-based compensation expense related to unvested restricted stock and RSUs. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of 1.5 years.

Long-Term Incentive Plans Funded by PNC

Under a share surrender agreement, PNC committed to provide up to 4,000,000 shares of BlackRock stock, held by PNC, to fund certain BlackRock long-term incentive plans (LTIP). In February 2009, the share surrender agreement was amended for PNC to provide BlackRock series C non-voting participating preferred stock to fund the remaining committed shares.

The BlackRock, Inc. 2002 Long-Term Retention and Incentive Plan (the 2002 LTIP Awards) permitted the grant of up to $240 million in deferred compensation awards, of which the Company previously granted approximately $233 million. Approximately $208 million of the 2002 LTIP Awards were paid in January 2007. The 2002 LTIP Awards were settled for approximately 16.7% in cash and the remainder in BlackRock stock contributed by PNC and distributed to plan participants. During the nine months ended September 30, 2010, approximately $6 million of previously issued 2002 LTIP Awards were settled in cash and BlackRock shares held by PNC at a conversion price approximating the market price on the settlement date. On the payment date, the Company recorded a capital contribution from PNC for the amount of shares funded by PNC.

14. Related Party Transactions

Loan Commitments with Anthracite

Prior to March 31, 2010, the Company was committed to provide financing of up to $60 million to Anthracite Capital, Inc. (Anthracite), a specialty commercial real estate finance company that was managed by a subsidiary of BlackRock. The financing is collateralized by a pledge by Anthracite of its ownership interest in a real estate debt investment fund, which is also managed by a subsidiary of BlackRock. At September 30, 2010, $33.5 million of financing was outstanding and remains outstanding as of November 2010, which is past its final maturity date of March 5, 2010. At September 30, 2010, the carrying value of the collateral was estimated to be $8 million, which resulted in an additional $4.5 million reduction in amounts due from related parties on the Company s condensed consolidated statement of financial condition and an equal amount recorded in general and administrative expenses on the Company s condensed consolidated statement of income in the nine months ended September 30, 2010. The Company has no obligation to loan additional amounts to Anthracite under this facility. Anthracite filed a voluntary petition for relief under Chapter 7 of Title 11 of the U.S. Code in the U.S. Bankruptcy Court for the Southern District of New York on March 15, 2010. The management agreement between the Company and Anthracite has expired. Recovery of any amount of the financing provided by the Company in excess of the value of the collateral is not anticipated. The Company continues to evaluate the collectability of the outstanding borrowings by reviewing the carrying value of the net assets of the collateral, which fluctuates each period.

15. Net Capital Requirements

The Company is required to maintain net capital in certain regulated subsidiaries within a number of jurisdictions, which is partially maintained by retaining cash and cash equivalent investments in those jurisdictions. As a result, such subsidiaries of the Company may be restricted in their ability to transfer cash between different jurisdictions and to their parents. Additionally, transfers of cash between international jurisdictions, including repatriation to the United States, may have adverse tax consequences that could discourage such transfers.

Banking Regulatory Requirements

BlackRock Institutional Trust Company, N.A. (BTC), a wholly-owned subsidiary of the Company, is chartered as a national bank whose powers are limited to trust activities. BTC is subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company s condensed consolidated financial statements. Under the capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that invoke quantitative measures of the Company s assets, liabilities, and certain off-balance sheet items as calculated under the regulatory accounting practices. BTC s capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Broker-dealers

BlackRock Investments, LLC, BlackRock Capital Markets, LLC, BlackRock Execution Services and BlackRock Fund Distribution Company are registered broker-dealers and wholly-owned subsidiaries of BlackRock that are subject to the Uniform Net Capital requirements under the

Securities Exchange Act of 1934, which requires maintenance of certain minimum net capital levels.

Capital Requirements as of September 30, 2010

At September 30, 2010, the Company was required to maintain approximately $885 million in net capital in certain regulated subsidiaries, including BTC, and is in compliance with all applicable regulatory minimum net capital requirements.

The following table sets forth the computation of basic and diluted EPS for the nine months ended September 30, 2010 and 2009:

	Nine Months Ended September 30,			
	2010		2009	
(Dollar amounts in millions, except per share data)	Basic	Diluted	Basic	Diluted

Weighted-average common shares outstanding	190,385,046	190,385,046	131,481,677	131,481,677
Dilutive effect of:				
Stock options and non-participating RSUs		1,578,143		1,365,891
Convertible debt		317,490		1,154,231
Total weighted-average shares outstanding		192,280,679		134,001,799
Earnings per share attributable to BlackRock, Inc., common stockholders:	$ 7.28	$ 7.21	$ 4.58	$ 4.50

(a) Allocation to common shareholders is based on the total of common and participating security shareholders. For the nine months ended September 30, 2010 and 2009, participating securities include 2.8 million and 3.8 million, respectively, of unvested RSUs that contain nonforfeitable rights to dividends.

Basic EPS is calculated pursuant to the two-class method to determine income attributable to common shareholders. Basic EPS is calculated by dividing net distributed and undistributed earnings allocated to common shareholders by the weighted-average number of common shares outstanding. Diluted EPS includes the determinants of basic EPS and in addition, reflects the impact of other potentially dilutive shares, including RSU awards that do not contain nonforfeitable rights to dividends, unexercised stock options and convertible debentures. The dilutive effect of participating securities is calculated under the more dilutive of either the treasury method or the two-class method.

Due to the similarities in terms between BlackRock series A, B, C and D non-voting participating preferred stock and the Company s common stock, the Company considers the series A, B, C and D non-voting participating preferred stock to be a common stock equivalent for purposes of EPS calculations. As such, the Company has included the outstanding series A, B, C and D non-voting participating preferred stock in the calculation of average basic and diluted shares outstanding for the three and nine months ended September 30, 2010 and 2009.

For the three and nine months ended September 30, 2010, 340,526 and zero options, respectively, were excluded from the calculation of diluted EPS because to include them would have an anti-dilutive effect. For the three and nine months ended September 30, 2010, 1,412,212 and 1,155,977 RSUs, respectively, were excluded from the calculation of diluted EPS because to include them would have an anti-dilutive effect.

Financial Highlights

(continued)

BlackRock reports its financial results in accordance with accounting principles generally accepted in the United States (GAAP); however, management believes that evaluating the Company s ongoing operating results may be enhanced if investors have additional non-GAAP basis financial measures. Management reviews non-GAAP financial measures to assess ongoing operations and, for the reasons described below, considers them to be effective indicators, for both management and investors, of BlackRock s financial performance over time. BlackRock s management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

Certain prior period non-GAAP data has been reclassified to conform to the current presentation. Computations for all periods are derived from the Company s condensed consolidated statements of income as follows:

(a) Operating income, as adjusted, and operating margin, as adjusted:

Operating income, as adjusted, equals operating income, GAAP basis, excluding certain items deemed non-recurring by management or transactions that ultimately will not impact BlackRock s book value, as indicated in the table below. Operating income used for operating margin measurement equals operating income, as adjusted, excluding the impact of closed-end fund launch costs and commissions. Operating margin, as adjusted, equals operating income used for operating margin measurement, divided by revenue used for operating margin measurement, as indicated in the table below.

(a) (continued)

Management believes that operating income, as adjusted, and operating margin, as adjusted, are effective indicators of BlackRock s financial performance over time. As such, management believes that operating income, as adjusted, and operating margin, as adjusted, provide useful disclosure to investors.

Operating income, as adjusted:

BGI transaction and integration costs recorded in 2010 and 2009 consist principally of certain advisory payments, compensation expense, legal fees, marketing and promotional, occupancy and consulting expenses incurred in conjunction with the BGI Transaction. Restructuring charges recorded in 2009 consist of compensation costs, occupancy costs and professional fees. The expenses associated with restructuring and BGI transaction and integration costs have been deemed non-recurring by management and have been excluded from operating income, as adjusted, to help enhance the comparability of this information to prior periods. As such, management believes that operating margins exclusive of these costs are useful measures in evaluating BlackRock s operating performance for the respective periods.

The portion of compensation expense associated with certain long-term incentive plans (LTIP) that will be funded through the distribution to participants of shares of BlackRock stock held by PNC and a Merrill Lynch & Co., Inc. (Merrill Lynch) cash compensation contribution, a portion of which has been received, has been excluded because these charges ultimately do not impact BlackRock s book value.

Compensation expense associated with appreciation (depreciation) on investments related to certain BlackRock deferred compensation plans has been excluded as returns on investments set aside for these plans, which substantially offset this expense, are reported in non-operating income (expense).

Operating margin, as adjusted:

Operating income used for measuring operating margin, as adjusted, is equal to operating income, as adjusted, excluding the impact of closed-end fund launch costs and commissions. Management believes that excluding such costs and commissions is useful because these costs can fluctuate considerably and revenues associated with the expenditure of these costs will not fully impact the Company s results until future periods.

Operating margin, as adjusted, allows the Company to compare performance from period-to-period by adjusting for items that may not recur, recur infrequently or may fluctuate based on market movements, such as restructuring charges, transaction and integration costs, closed-end fund launch costs, commissions paid to certain employees as compensation and fluctuations in compensation expense based on mark-to-market movements in investments held to fund certain compensation plans. The Company also uses operating margin, as adjusted, to monitor corporate performance and efficiency and as a benchmark to compare its performance to other companies. Management uses both the GAAP and non-GAAP financial measures in evaluating the financial performance of BlackRock. The non-GAAP measure by itself may pose limitations

because it does not include all of the Company s revenues and expenses.

Revenue used for operating margin, as adjusted, excludes distribution and servicing costs paid to related parties and other third parties. Management believes that excluding such costs is useful to BlackRock because it creates consistency in the treatment for certain contracts for similar services, which due to the terms of the contracts, are accounted for under GAAP on a net basis within investment advisory, administration fees and securities lending revenue. Amortization of deferred sales commissions is excluded from revenue used for operating margin measurement, as adjusted, because such costs, over time, offset distribution fee revenue earned by the Company. For each of these items, BlackRock excludes from revenue used for operating margin, as adjusted, the costs related to each of these items as a proxy for such offsetting revenues.

(b) Non-operating income (expense), less net income (loss) attributable to non-controlling interests, as adjusted:

Non-operating income (expense), less net income (loss) attributable to non-controlling interests (NCI), as adjusted, equals non-operating income (expense), GAAP basis, less net income (loss) attributable to NCI, GAAP basis, adjusted for compensation expense associated with depreciation (appreciation) on investments related to certain BlackRock deferred compensation plans. The compensation expense offset is recorded in operating income. This compensation expense has been included in non-operating income (expense), less net income (loss) attributable to NCI, as adjusted, to offset returns on investments set aside for these plans, which are reported in non-operating income (expense), GAAP basis.

[1] Net of net income (loss) attributable to non-controlling interests.

Management believes that non-operating income (expense), less net income (loss) attributable to NCI, as adjusted, provides for comparability of this information to prior periods and is an effective measure for reviewing BlackRock s non-operating contribution to its results. As compensation expense associated with (appreciation) depreciation on investments related to certain deferred compensation plans, which is included in operating income, offsets the gain/(loss) on the investments set aside for these plans, management believes that non-operating income (expense), less net income (loss) attributable to NCI, as adjusted, provides a useful measure, for both management and investors, of BlackRock s non-operating results that impact book value.

The restructuring charges and BGI transaction and integration costs reflected in GAAP net income attributable to BlackRock, Inc. have been deemed non-recurring by management and have been excluded from net income attributable to BlackRock, Inc., as adjusted, to help enhance the comparability of this information to prior reporting periods.

The portion of the compensation expense associated with certain LTIP awards that will be funded through the distribution to participants of shares of BlackRock stock held by PNC and the Merrill Lynch cash compensation contribution, a portion of which has been received, has been excluded from net income attributable to BlackRock, Inc., as adjusted, because these charges ultimately do not impact BlackRock s book value.

During third quarter 2010 and third quarter 2009, the United Kingdom and New York City, respectively, enacted legislation reducing corporate income tax rates, which resulted in a revaluation of certain net deferred tax liabilities primarily related to acquired intangible assets. The resulting decrease in income taxes has been excluded from net income attributable to BlackRock, Inc., as adjusted, as these were non-recurring enacted tax legislation changes that do not have a cash flow impact and to ensure comparability of this information to current reporting periods.

Overview (continued)

BlackRock has portfolio managers located around the world, including the United States, the United Kingdom, the Netherlands, Japan, Hong Kong, Australia and Germany. The Company provides a wide array of taxable and tax-exempt fixed income, equity and multi-asset class investment funds, including exchange traded funds and mutual funds, and separate accounts, as well as a wide assortment of index-based equity and alternative investment products for a diverse global clientele. BlackRock provides global advisory services for investment funds and other non-U.S. retail products. The Company s non-U.S. investment funds are based in a number of domiciles and cover a range of asset classes, including cash management, fixed income and equities.

iShares® is the global product leader in exchange traded funds for institutional, retail and high net worth investors with over 460 funds globally across equities, fixed income and commodities, which trade like common stocks on 19 exchanges worldwide. The BlackRock Global Funds, the Company s primary retail fund group offered outside the United States, are authorized for distribution in more than 35 jurisdictions worldwide. In the United States, the primary retail offerings include various open-end and closed-end funds, including *iShares*. Additional fund offerings include structured products, real estate funds, hedge funds, hedge funds of funds, private equity funds and funds of funds, managed futures funds and exchange funds. These products are sold to both U.S. and non-U.S. high net worth, retail and institutional investors in a wide variety of active and passive strategies covering both equity and fixed income assets.

BlackRock s client base consists of financial institutions and other corporate clients, pension plans, charities, official institutions, such as central banks, sovereign wealth funds, supranational authorities and other government entities, high net worth individuals and retail investors around the world. BlackRock maintains a significant sales and marketing presence both inside and outside the United States that is focused on establishing and maintaining retail and institutional investment management relationships by marketing its services to retail and institutional investors directly and through financial professionals, pension consultants and establishing third-party distribution relationships. BlackRock also distributes its products and services through Merrill Lynch under a global distribution agreement, which following Bank of America Corporation s (Bank of America) acquisition of Merrill Lynch, runs through January 2014. After such term, the agreement will renew for one automatic three-year extension if certain conditions are met.

BlackRock derives a substantial portion of its revenue from investment advisory and administration fees, which are recognized as the services are performed. Such fees are primarily based on pre-determined percentages of the market value of AUM, percentages of committed capital during investment periods of certain alternative products, or, in the case of certain real estate equity clients, net operating income generated by the underlying properties, and are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net subscriptions or redemptions. Net subscriptions or redemptions represent the sum of new client assets, additional fundings from existing clients (including dividend reinvestment), withdrawals of assets from, and termination of, client accounts, purchases and redemptions of investment fund shares and distributions to investors representing return of capital and return on investments to investors. Market appreciation or depreciation includes current income earned on, and changes in the fair value of, securities held in client accounts. Foreign exchange translation reflects the impact of converting non-U.S. dollar denominated AUM into U.S. dollars for reporting purposes.

BlackRock also earns revenue by lending securities on behalf of clients, primarily to brokerage institutions. Such revenues are accounted for on an accrual basis. The securities loaned are secured by collateral in the form of cash or securities, with minimums generally ranging from approximately 102% to 112% of the value of the loaned securities. The revenue earned is shared between BlackRock and the funds or other third-party accounts managed by the Company from which the securities are borrowed.

Investment advisory agreements for certain separate accounts and BlackRock s alternative investment products provide for performance fees, based upon relative and/or absolute investment performance, in addition to base fees based on AUM. Investment advisory performance fees generally are earned after a given period of time and when investment performance exceeds a contractual threshold. As such, the timing of recognition of performance fees may increase the volatility of BlackRock s revenue and earnings. Historically, the magnitude of performance

fees in the fourth quarter generally exceeds the first three calendar quarters in a year due to the higher number of products with performance measurement periods that end on December 31.

Overview (continued)

BlackRock provides a variety of risk management, investment analytic and investment system and advisory services to financial institutions, pension funds, asset managers, foundations, consultants, mutual fund sponsors, real estate investment trusts and government agencies. These services are provided under the brand name *BlackRock Solutions* and include a wide array of risk management services, valuation services related to illiquid securities, disposition and workout assignments (including long-term portfolio liquidation assignments), strategic planning and execution, and enterprise investment system outsourcing to clients. Over $9.5 trillion of positions are processed on our *Aladdin*® operating platform, which serves as the investment system for BlackRock and other institutional investors. Fees earned for *BlackRock Solutions* and advisory services are determined using some, or all, of the following methods: (i) fixed fees, (ii) percentages of various attributes of advisory assets under management and (iii) performance fees if contractual thresholds are met.

BlackRock also builds upon its leadership position to meet the growing need for investment and risk management solutions. Through its scale and diversity of products, it is able to provide its clients with customized solutions including fiduciary outsourcing for liability-driven investments and overlay strategies for pension plan sponsors, balance sheet management and related services for insurance companies and target date and target return funds, as well as asset allocation portfolios, for retail investors. BlackRock is also able to service these clients via its *Aladdin* platform to provide risk management and other outsourcing services for institutional investors and custom and tailored solutions to address complex risk exposures.

The Company also earns fees for transition management services comprised of referral fees or agency commissions from acting as an introducing broker-dealer in buying and selling securities on behalf of its customers. Commissions and clearing expenses related to transition management services are recorded on a trade-date basis as securities transactions occur.

Operating expenses reflect employee compensation and benefits, distribution and servicing costs, amortization of deferred sales commissions, direct fund expenses, general and administration expenses and amortization of finite-lived intangible assets.

Employee compensation and benefits expense includes salaries, commissions, temporary help, severance, deferred and incentive compensation, employer payroll taxes and related benefit costs.

Distribution and servicing costs include payments made to Merrill Lynch-affiliated entities under a global distribution agreement, to PNC-affiliated entities and Barclays, as well as other third parties, primarily associated with obtaining and retaining client investments in certain BlackRock products.

Direct fund expenses primarily consist of third party non-advisory expenses incurred by BlackRock related to certain funds for the use of index trademarks, reference data for indices, custodial services, fund administration, fund accounting, transfer agent services, shareholder reporting services, legal expenses, audit and tax services as well as other fund related expenses directly attributable to the non-advisory operations of the fund. These expenses may vary over time with fluctuations in AUM, number of shareholder accounts, or other attributes directly related to volume of business.

BlackRock primarily holds investments in sponsored investment products that invest in a variety of asset classes, including private equity, distressed credit/mortgage debt securities, hedge funds and real estate. Investments generally are made for co-investment purposes, to establish a performance track record, to hedge exposure to certain deferred compensation plans, or for regulatory purposes, including Federal Reserve Bank

stock. Non-operating income (expense) and other comprehensive income, for available-for-sale investments, includes the impact of changes in the valuations and pick up of equity method earnings of these investments, as well as interest and dividend income and interest expense.

In addition, non-operating income (expense) includes the impact of changes in the valuations of consolidated sponsored investment funds and consolidated collateralized loan obligations. The portion of non-operating income (expense) not attributable to BlackRock is allocated to non-controlling interests on the consolidated statements of income.

(2) Includes BGI merger-related outflows due to manager concentration considerations and active quantitative performance.
(3) Foreign exchange reflects the impact of converting non-U.S. dollar denominated AUM into U.S. dollars for reporting purposes.
(4) Advisory AUM represents long-term portfolio liquidation assignments.

AUM increased approximately $295 billion, or 9%, to $3.446 trillion at September 30, 2010, compared to $3.151 trillion at June 30, 2010. The increase in AUM primarily was attributable to $50 billion of net subscriptions excluding outflows due to manager concentration considerations and active quantitative performance (merger-related outflows), $213 billion in net market appreciation, and a $67 billion increase due to foreign exchange movements, partially offset by $34 billion of BGI merger-related outflows. Merger-related outflows since the close of the BGI transaction represents less than 5% of acquired AUM.

Net market appreciation of $213 billion included net appreciation of $161 billion in equity products due to an increase in global equity markets, $36 billion in fixed income products, $12 billion in multi-asset class products and $4 billion in alternative investments. The $67 billion net increase in AUM from foreign exchange movements was due to the weakening of the U.S. dollar, primarily against the Euro and Pound Sterling, which resulted in an increase in AUM from converting non-U.S. dollar denominated AUM into U.S. dollars.

Total Net Subscriptions/(Redemptions)

Combined net subscriptions of $50 billion and BGI merger-related outflows of $34 billion for the three months ended September 30, 2010, included net subscriptions of $13 billion from *iShares* clients and $9 billion from institutional clients, partially offset by net redemptions of $6 billion from retail and high net worth clients.

Long-term Net Subscriptions/(Redemptions) excluding merger-related outflows

Net subscriptions in long-term mandates of $53 billion were the result of net subscriptions of: (a) $32 billion in index fixed income products, which were primarily related to local currency and global strategies, (b) $26 billion in index equity products, which were primarily related to global and regional/country strategies including over $6 billion in *iShares*, (c) $5 billion in multi-asset class products, including global asset allocation and target date solutions, such as the *LifePath*® portfolios, partially offset by net redemptions of: (a) $5 billion in active fixed income primarily related to outflows in U.S core, U.S. sector-specialty products and U.S. target duration products offset by inflows in various global fixed income strategies, (b) $4 billion in active equity products, primarily related to sector, U.S. equity and regional/country fundamental equity products and (c) $1 billion in alternative mandates including distributions from opportunistic hedge funds and real estate outflows partially offset by inflows in currency and commodity products.

Cash Management Net Subscriptions/(Redemptions) excluding merger-related outflows

Cash management net inflows of $2 billion primarily included flows from clients in the Americas. The Company experienced net subscriptions of $11 billion from institutional clients, largely offset by $8 billion of net outflows from retail and high net worth clients and the $1 billion effect of the reclassification of an exchange-traded fund as fixed income. The $2 billion of net flows primarily related to inflows in offshore liquidity products which were largely offset by outflows in tax exempt and prime liquidity products.

Assets Under Management (continued)

AUM increased approximately $100 billion, or 3%, to $3.446 trillion at September 30, 2010, compared to $3.346 trillion at December 31, 2009. The increase in AUM primarily was attributable to $103 billion of net subscriptions in long-term products excluding merger-related outflows, $141 billion in net market appreciation and an $11 billion increase due to foreign exchange movements, partially offset by $82 billion, or less than 5% of acquired BGI AUM, of total BGI merger-related outflows, $62 billion of cash management net outflows and $7 billion of advisory distributions and outflows. Net market appreciation of $141 billion included $78 billion in fixed income products, $53 billion in equity products due to an increase in global equity markets, $8 billion in multi-asset class products and $1 billion in alternative products.

Net Subscriptions/(Redemptions)

Combined net subscriptions of $34 billion and BGI merger-related outflows of $82 billion for the nine months ended September 30, 2010 included net redemptions of $78 billion from institutional clients, offset by net subscriptions of $30 billion from clients for U.S. and international *iShares*.

Long-term Net Subscriptions/(Redemptions) excluding merger-related outflows

Net subscriptions in long-term mandates of $103 billion, were primarily the result of net subscriptions of: (a) $55 billion in index fixed income products related to institutional and *iShares* clients in local currency, U.S. targeted duration, U.S. sector specialty strategies and global index strategies, (b) $47 billion in index equity products primarily related to institutional and *iShares* clients in global and regional/country strategies, (c) $20 billion in multi-asset class products, including global asset allocation and target date solutions, such as the *LifePath* portfolios, and (d) $2 billion in alternative products, partially offset by net redemptions of $19 billion in active fixed income primarily related to U.S. targeted duration and U.S. core products.

Cash Management Net Subscriptions/(Redemptions) excluding merger-related outflows

Cash management net outflows of $62 billion included $44 billion, $17 billion and $1 billion from institutional clients, retail/high net worth clients and the $1 billion effect of the reclassification of an exchange-traded fund as fixed income, respectively, across all cash management strategies, concentrated in prime, government and tax exempt products.

(1) Data reflects the reclassification of prior period AUM into the current period presentation.
(2) Includes distributions representing return of capital and return on investment to investors.
(3) Includes BGI merger-related outflows due to manager concentration considerations and active quantitative performance.
(4) Includes AUM acquired from Barclays in December 2009 and acquisition adjustments to conform to current period combined AUM policy.
(5) Foreign exchange reflects the impact of converting non-U.S. dollar denominated AUM into U.S. dollars for reporting purposes.
(6) Advisory AUM represents long-term portfolio liquidation assignments.

AUM increased approximately $2.011 trillion, or 140%, to $3.446 trillion at September 30, 2010, compared to $1.435 trillion at September 30, 2009. The growth in AUM primarily was attributable to $1.845 trillion of acquired AUM in the BGI Transaction, $148 billion of long-term net subscriptions excluding BGI merger-related outflows and $180 billion in net market appreciation, partially offset by $85 billion, or less than 5% of acquired BGI AUM, of total BGI merger-related outflows, $62 billion of cash management net outflows, $9 billion of advisory distribution and outflows and $5 billion in foreign exchange movements. Net market appreciation of $180 billion included $68 billion of fixed income products due to current income and changes in interest rate spreads, $101 billion in equity products due to improvements in global equity markets in fourth quarter 2009 and 2010 and $10 billion in multi-asset class products.

Net Subscriptions/(Redemptions)

Combined net subscriptions of $76 billion and BGI merger-related outflows of $85 billion for the twelve months ended September 30, 2010 included net redemptions of $60 billion from institutional clients, partially offset by net subscriptions of $42 billion from clients for U.S. and international *iShares* and $9 billion from retail and high net worth clients.

Long-term Net Subscriptions/(Redemptions) excluding merger-related outflows

Net subscriptions in long-term mandates of $148 billion were primarily the result of net subscriptions of: (a) $64 billion in index equity products primarily related to institutional and *iShares* clients in regional/country and global equity products, (b) $61 billion in index fixed income products, related to institutional and *iShares* clients in local currency, U.S. targeted duration, U.S. sector specialty strategies and global index strategies, (c) $25 billion in multi-asset class products, including global asset allocation and target date solutions, such as the *LifePath* portfolios, and (d) $3 billion in alternative products, including commodities and currency overlay strategies partially offset by net redemptions of $5 billion in active fixed income strategies, primarily attributable to U.S. target duration and U.S. core products.

Cash Management Net Subscriptions/(Redemptions) excluding merger-related outflows

Cash management net outflows of $62 billion included $41 billion, $20 billion and $1 billion from institutional clients, retail/high net worth clients and the effect of the reclassification of an exchange traded fund as fixed income, respectively, across prime, tax exempt and government liquidity products.

The three months ended September 30, 2010 included the results of the BGI Transaction, which closed on December 1, 2009. Given the magnitude of the acquired business, certain line item variances are primarily driven by the inclusion of BGI results in 2010**.**

Total revenue for the three months ended September 30, 2010 increased $952 million, or 84%, to $2,092 million, compared with $1,140 million for the three months ended September 30, 2009. The $952 million increase was the result of an $879 million increase in total investment advisory, administration fees and securities lending revenue, a $65 million increase in performance fees, a $25 million increase in other revenue, a $4 million increase in distribution fees, partially offset by a $21 million decrease in *BlackRock Solutions* and advisory revenue.

Operating results for the three months ended September 30, 2010, as compared with the three months ended September 30, 2009

Revenue (continued)

Investment Advisory, Administration Fees and Securities Lending Revenue

The increase in investment advisory, administration fees and securities lending revenues of $879 million for the three months ended September 30, 2010, compared with the three months ended September 30, 2009 consisted of increases of $496 million in index equity products, $120 million in active equity products, $114 million in index fixed income products, $47 million in active fixed income products, $56 million in multi-asset class products and $66 million in alternative investment products, partially offset by a $20 million decrease in cash management products. The $879 million net increase primarily related to fees earned on products acquired in the BGI acquisition as well as organic growth in long-term AUM due to net market appreciation and net new business during the prior twelve month period, partially offset by a decline in fees from cash management products due to lower average AUM.

Performance Fees

Investment advisory performance fees increased $65 million, or 133%, to $114 million for the three months ended September 30, 2010, as compared to $49 million for the three months ended September 30, 2009, primarily due to an increase in performance fees from U.K. equity hedge funds, alternative fixed income hedge funds, including opportunistic funds and regional/country equity strategies, partially offset by lower performance fees in multi-asset class separate accounts.

BlackRock Solutions and Advisory

BlackRock Solutions and advisory revenue for the three months ended September 30, 2010 decreased $21 million, or 17%, compared with the three months ended September 30, 2009. The decrease in *BlackRock Solutions* and advisory revenue was primarily due to fewer advisory assignments, including portfolio liquidation assignments, which have AUM based fees, partially offset by additional *Aladdin*, risk management solutions and investment accounting mandates.

Distribution Fees

Distribution fees of $29 million for the three months ended September 30, 2010 increased $4 million, as compared to $25 million for the three months ended September 30, 2009. The increase included the effect of higher AUM in certain share classes of *BlackRock Funds*.

Other revenue of $54 million for the three months ended September 30, 2010 increased $25 million, or 86%, compared with the three months ended September 30, 2009. The increase in other revenue primarily was the result of an $18 million increase in fees earned for transition management services due to an increase in transactions to execute transitions of equity mandates and a $7 million increase in marketing fees earned for services to distribute Barclays iPath products.

Total GAAP expenses increased $602 million, or 77%, to $1,385 million for the three months ended September 30, 2010, compared to $783 million for the three months ended September 30, 2009. Excluding certain items deemed non-recurring by management or transactions that ultimately will not affect the Company s book value, total expenses, as adjusted, increased $615 million, or 83%. The increase in total expenses, as adjusted, primarily is attributable to increases in employee compensation and benefits, general and administration expenses and direct fund expenses, partially offset by a reduction of distribution and servicing costs.

Employee compensation and benefits, as adjusted	$ 747	$ 417	$ 330	79%

NM Not Meaningful

Employee compensation and benefits expense increased $330 million, or 74%, to $774 million for the three months ended September 30, 2010, compared to $444 million for the three months ended September 30, 2009.

The $330 million increase in employee compensation and benefits, as adjusted, was attributable to a $170 million increase in salaries, benefits, payroll taxes and commissions and a $160 million increase in incentive compensation. The $170 million increase in salaries, benefits, payroll taxes and commissions reflects an increase in the number of employees primarily resulting from the BGI Transaction. Employees at September 30, 2010 totaled approximately 8,900 as compared to 5,000 at September 30, 2009. The $160 million increase in incentive compensation primarily is associated with the increase in operating income after excluding the BGI integration costs and a $40 million increase in stock-based compensation expense related to the effect of additional grants to a larger number of employees at the end of January 2010.

Distribution and Servicing Costs

Distribution and servicing costs decreased $14 million to $105 million for the three months ended September 30, 2010, compared to $119 million for the three months ended September 30, 2009. These costs include payments to Bank of America/Merrill Lynch under a global distribution agreement, PNC and Barclays, as well as other third parties, primarily associated with the distribution and servicing of client

investments in certain BlackRock products. The $14 million decrease primarily related to lower levels of distribution payments due to lower levels of average cash management AUM, and a decrease of costs due to an increase in advisory fee waivers for certain cash management funds serviced by Merrill Lynch.

Distribution and servicing costs for the three months ended September 30, 2010 included $65 million of costs attributable to Bank of America/Merrill Lynch and affiliates and $1 million of costs attributable to PNC and affiliates as compared to $88 million and $4 million of costs, respectively, in the three months ended September 30, 2009. Distribution and servicing costs related to other third parties, including Barclays, increased $12 million to $39 million for the three months ended September 30, 2010, as compared to $27 million for the three months ended September 30, 2009 due to an expansion of distribution platforms and higher long term AUM.

BGI Transaction and Integration Costs

BGI transaction and integration costs of $3 million for the three months ended September 30, 2010 decreased $13 million as compared to the three months ended September 30, 2009 primarily due to advisory costs incurred in third quarter 2009.

General and Administration Expenses, as Adjusted

Excluding the BGI transaction and integration expenses, general and administration expenses, as adjusted, increased $183 million, or 141%, for the three months ended September 30, 2010 compared with the three months ended September 30, 2009.

Marketing and promotional expenses increased $59 million, primarily due to an increase in global and exchange traded fund marketing expenses, which included travel, promotional, rebranding and advertising expenses. Occupancy costs increased $31 million primarily related to growth of the Company due to the acquisition of BGI. Portfolio service costs increased $22 million, or 96%, to $45 million, primarily due to an increase in market data and research expenses as well as transition management execution and clearing expenses. Closed-end fund launch costs (excluding compensation costs) increased $15 million as compared with the three months ended September 30, 2009 due to the third quarter 2010 launch of the Build America Bond Trust fund, which generated approximately $1.2 billion in AUM. Technology expenses increased $11 million, or 42%, to $37 million, primarily due to an increase in software licensing and maintenance and hardware depreciation expenses. Professional services increased $6 million, or 40%, to $21 million compared to $15 million for the three months ended September 30, 2009, primarily related to legal and consulting costs as a result of growth of the Company due to the acquisition of BGI. Other general and administration expenses increased $39 million, to $53 million compared to $14 million for the three months ended September 30, 2009, primarily related to increases in foreign currency remeasurement costs of $10 million, communications and other miscellaneous expenses as a result of growth of the Company due to the acquisition of BGI.

Amortization of Intangible Assets

Amortization of intangible assets increased $4 million to $40 million for the three months ended September 30, 2010, as compared to $36 million for the three months ended September 30, 2009. The increase in amortization of intangible assets reflects additional amortization for finite-lived management contracts acquired in the BGI Transaction.

Operating Income and Operating Margin

GAAP

Operating income totaled $707 million for the three months ended September 30, 2010, which was an increase of $350 million compared with the three months ended September 30, 2009. Operating income for the three months ended September 30, 2010 included the effect of revenue and expenses related to the December 1, 2009 acquisition of BGI and $6 million of BGI integration costs as compared to $16 million of BGI transaction costs for the three months ended September 30, 2009. The transaction/integration expenses are not part of the on-going business and are principally comprised of compensation expense, legal fees, advisory payments, occupancy costs, marketing and promotional and consulting expenses.

The increase in operating income for the three months ended September 30, 2010 included the effect of an $879 million increase in investment advisory, administration fees and securities lending revenue associated with the acquired BGI AUM and growth in long-term AUM, which included net new business during the prior twelve months, a $65 million increase in performance fees revenue and a $29 million increase in distribution fees and other revenue, partially offset by a $21 million decrease in *BlackRock Solutions* and advisory revenue. The increase in total revenue is partially offset by a $602 million net increase in operating expenses due to increases in employee compensation and benefits, general and administration expenses, direct fund expenses and amortization of intangible assets, partially offset by a decrease in distribution and servicing costs.

The Company s operating margin was 33.8% for the three months ended September 30, 2010, compared to 31.3% for the three months ended September 30, 2009. The increase in operating margin for the three months ended September 30, 2010, as compared with the three months ended September 30, 2009 included the effect of the BGI Transaction, a decline in BGI transaction and integration costs, partially offset by a $40 million increase in stock-based compensation related to additional grants to a larger number of employees at the end of January 2010, $17 million of closed-end fund launch costs/commissions, a $10 million increase in foreign currency remeasurement costs, as well as increased investments to grow the business.

As Adjusted

Operating income, as adjusted, totaled $737 million for the three months ended September 30, 2010, which was an increase of $337 million compared with the three months ended September 30, 2009. The increase in operating income, as adjusted, for the three months ended September 30, 2010 as compared with the three months ended September 30, 2009 is related to the effect of the $952 million increase in total revenue, partially offset by a $615 million increase in operating expenses, as adjusted, due to increases in employee compensation and benefits, general and administration expenses, direct fund expenses and amortization of intangible assets and deferred sales commissions, partially offset by a decrease in distribution and servicing costs.

Operating margin, as adjusted, was 38.4% and 40.1% for the three months ended September 30, 2010 and 2009, respectively. The decrease in operating margin included the effects of a $10 million increase in foreign currency remeasurement costs, a $40 million increase in stock-based compensation related to additional grants to a larger number of employees at the end of January 2010, as well as increased investments to grow the business.

Operating income, as adjusted, and operating margin, as adjusted, are described in more detail in the Overview to Management s Discussion and Analysis of Financial Condition and Results of Operations.

Non-Operating Income (Expense), Less Net Income (Loss) Attributable to Non-Controlling Interests (continued)

Non-operating income, less net income (loss) attributable to non-controlling interests, decreased $16 million to $45 million for the three months ended September 30, 2010, as compared to $61 million for the three months ended September 30, 2009 due to an increase in net interest expense. The $45 million non-operating income, net of non-controlling interests for the three months ended September 30, 2010, was comprised of $66 million of net gains primarily on co-investments and $6 million of appreciation related to hedges of deferred compensation, partially offset by $27 million of net interest expense.

The $66 million net gain on investments included net gains in distressed credit/mortgage funds of $25 million, private equity investments of $20 million, real estate equity/debt products of $11 million, hedge funds/funds of hedge funds of $4 million and other investments of $6 million.

Net interest expense of $27 million increased $16 million primarily due to an increase in interest expense related to the December 2009 issuances of $2.5 billion of long-term notes, partially offset by higher dividend income related to a regulatory investment.

Net Economic Investment Portfolio

The Company presents total net economic investments to enable investors to understand the portion of its investments that are owned by the Company, net of non-controlling interests, as a gauge to measure the impact of changes in net non-operating gain (loss) on investments to net income (loss) attributable to BlackRock, Inc. The Company further presents the total net economic investment exposure, net of deferred compensation investments and hedged investments, to reflect another gauge for investors as the economic impact of investments held pursuant to deferred compensation arrangements is substantially offset by a change in compensation expense and the impact of hedged investments is substantially mitigated by total return swap hedges. Finally, the Company s regulatory investment in Federal Reserve Bank stock which is not subject to market or interest rate risk is excluded from the Company s net economic investment exposure.

Changes in the investment portfolio are due to purchases, sales, maturities and distributions as well as the impact of valuations. The following table represents the carrying value of investments, by asset type, at September 30, 2010 and December 31, 2009:

Fair Value Measurements

BlackRock reports its investments on a GAAP basis, which includes investments that are owned by sponsored investment funds that are deemed to be controlled by BlackRock in accordance with GAAP and therefore consolidated even though BlackRock may not own the majority of any such funds. As a result, management reviews its investments on an economic basis, which eliminates the portion of investments that do not impact BlackRock s book value. BlackRock s management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

The following table represents investments measured at fair value on a recurring basis at September 30, 2010:

(Dollar amounts in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Other Investments Not Held at Fair Value[3]	Investments at September 30, 2010
Total investments, GAAP	$ 151	$ 190	$ 727	$ 444	$ 1,512
Net assets for which the Company does not bear economic exposure[1]	(10)	(13)	(130)		(153)
Net economic investments[2]	$ 141	$ 177	$ 597	$ 444	$ 1,359

(1) Consists of net assets attributable to non-controlling investors of consolidated non-VIE sponsored investment funds.

(2) Includes BlackRock s portion of cash and cash equivalents, other assets, accounts payable and accrued liabilities, and other liabilities that are consolidated from non-VIE sponsored investment funds.

(3) Comprised of investments held at cost, amortized cost and equity method investments, which include investment companies, and other assets which in accordance with GAAP are not accounted for under a fair value measure. In accordance with GAAP, certain equity method investees do not account for both their financial assets and financial liabilities under fair value measures, therefore, the Company s investment in such equity method investees may not represent fair value.

The three months ended September 30, 2010 included the effect of third quarter 2010 tax legislation enacted in the United Kingdom, which resulted in approximately a $30 million tax benefit revaluation of certain net deferred tax liabilities primarily related to acquired intangible assets, which has been excluded from net income attributable to BlackRock, Inc., as adjusted, as it was a non-recurring enacted tax legislation change that does not have a cash flow impact and to ensure comparability of this information to prior reporting periods. In addition, the three months ended September 30, 2010 included the effect of favorable tax rulings, a portion of which is attributable to the first half of 2010, and the resolution of certain outstanding tax positions in third quarter 2010.

The three months ended September 30, 2009 included the effect of third quarter 2009 legislation enacted primarily with respect to New York City corporate income taxes, effective January 1, 2009, which resulted in approximately a $45 million revaluation of net deferred tax liabilities primarily related to acquired intangible assets, which has been excluded from net income attributable to BlackRock, Inc., as adjusted, as it was a non-recurring enacted tax legislation change that does not have a cash flow impact and to ensure comparability of this information to prior reporting periods.

Operating results for the three months ended September 30, 2010, as compared with the three months ended September 30, 2009 (continued)

Net Income Attributable to BlackRock, Inc. (continued)

Net income attributable to BlackRock, Inc. of $551 million for the three months ended September 30, 2010 included the after-tax effect of the portion of certain LTIP awards, which will be funded through a capital contribution of BlackRock stock held by PNC of $10 million, the after-tax effect of the BGI integration costs of $4 million and certain compensation for former MLIM employees of $2 million to be funded through a cash contribution by Merrill Lynch, a portion of which was received by BlackRock in third quarter 2010. Net income for the three months ended September 30, 2010 included a $30 million decrease in income taxes related to tax legislation enacted in the United Kingdom, which resulted in a revaluation of certain net deferred tax liabilities primarily related to acquired intangible assets. In addition, net income included the effect of favorable tax rulings, a portion of which is attributable to the first half of 2010, and the resolution of certain outstanding tax positions.

Net income attributable to BlackRock, Inc. of $317 million for the three months ended September 30, 2009 included the after-tax effect of the portion of certain LTIP awards, which will be funded through a capital contribution of BlackRock stock held by PNC of $9 million, BGI transaction/integration cost of $11 million and certain compensation for former MLIM employees of $1 million to be funded through a cash contribution by Merrill Lynch, a portion of which was received by BlackRock in third quarter 2009. In addition, net income for the three months ended September 30, 2009 included a $45 million non-cash reduction in income tax expense as a result of enacted legislation primarily with respect to New York City corporate income taxes, which resulted in a revaluation of certain net deferred tax liabilities.

As Adjusted

Exclusive of the items discussed above, diluted earnings per common share, as adjusted, of $2.75 for the three months ended September 30, 2010 increased $0.65, or 31%, compared to the three months ended September 30, 2009.

Net income attributable to BlackRock, Inc., as adjusted, for the three months ended September 30, 2010 included operating income of $737 million, or $2.61 per diluted common share and non-operating income, less net income attributable to non-controlling interests, of $39 million, or $0.14 per diluted common share. Net income of $293 million or $2.10 per diluted common share attributable to BlackRock, Inc., as adjusted, for the three months ended September 30, 2009 included operating income of $400 million, or $1.86 per diluted common share and non-operating income, less net income attributable to non-controlling interests, of $52 million, or $0.24 per diluted common share. Diluted earnings per common share, as adjusted, is described in more detail in the Overview to Management s Discussion and Analysis of Financial Condition and Results of Operations.

Investment Advisory, Administration Fees and Securities Lending Revenue

Investment advisory, administration fees and securities lending revenues increased $2,767 million to $5,339 million for the nine months ended September 30, 2010, compared to $2,572 million for the nine months ended September 30, 2009. The increase was attributable to an increase in revenue of $1,495 million in index equity products, $532 million in active equity products, $308 million in index fixed income products, $158 million in active fixed income products, $193 million in multi-asset class products and $184 million in alternative investment products, partially offset by a $103 million decrease in cash management products. The $2,767 million net increase primarily related to fees earned on products acquired in the BGI acquisition as well as organic growth in long-term AUM due to market appreciation and net new business during the prior twelve months and an increase in volume of lent securities, partially offset by the effect of lower average AUM in cash management products.

Performance Fees

Investment advisory performance fees increased $137 million, or 178%, to $214 million for the nine months ended September 30, 2010, as compared to $77 million for the nine months ended September 30, 2009, primarily due to an increase in performance fees from fixed income hedge funds, including opportunistic funds, U.K. equity hedge funds, regional/country equity strategies and U.S. core and local currency fixed income products, partially offset by lower performance fees in multi-asset class separate accounts and real estate products.

BlackRock Solutions and Advisory

BlackRock Solutions and advisory revenue for the nine months ended September 30, 2010 decreased $41 million, or 11%, compared with the nine months ended September 30, 2009. The decrease in *BlackRock Solutions* and advisory revenue was primarily due to a decline in non-recurring advisory assignments, as well as the effect of a decline in advisory AUM due to distributions in portfolio liquidation assignments, which have AUM based fees, partially offset by additional *Aladdin*, risk management solutions and investment accounting mandates. Revenue earned on advisory assignments was comprised of advisory and portfolio structuring assignment fees and ongoing fees based on AUM of the respective portfolio assignments.

Distribution Fees

Distribution fees of $89 million for the nine months ended September 30, 2010 increased $16 million, as compared to $73 million for the nine months ended September 30, 2009. The increase primarily is the result of higher AUM in certain share classes of *BlackRock Funds*.

Employee compensation and benefits, as adjusted	$ 2,174	$ 1,118	$ 1,056	94%

NM Not Meaningful

Employee compensation and benefits expense increased $1,071 million, or 90%, to $2,256 million, for the nine months ended September 30, 2010, compared to $1,185 million for the nine months ended September 30, 2009.

Employee compensation and benefits, as adjusted, increased by $1,056 million after excluding the increase of $15 million of non-GAAP adjustments primarily related to an increase in BGI integration costs. The $1,056 million increase in employee compensation and benefits expense for the nine months ended September 30, 2010 was attributable to a $497 million increase in salaries, benefits, payroll taxes, temporary help and commissions and a $559 million increase in incentive compensation. The increase in incentive compensation is primarily associated with the increase in operating income after excluding the BGI integration costs, a $107 million increase in stock-based compensation expense related to the effect of additional grants to a larger number of employees at the end of January 2010, offset by a $6 million decrease in other deferred compensation. The $497 million increase in salaries, benefits, payroll taxes and commissions reflects an increase in the number of employees primarily resulting from the BGI Transaction. Employees at September 30, 2010 totaled approximately 8,900 as compared to 5,000 at September 30, 2009.

Distribution and Servicing Costs

Distribution and servicing costs decreased $69 million to $302 million for the nine months ended September 30, 2010, compared to $371 million for the nine months ended September 30, 2009. These costs include payments to Bank of America/Merrill Lynch under a global distribution agreement, PNC and Barclays, as well as other third parties, primarily associated with the distribution and servicing of client investments in certain BlackRock products. The $69 million decrease primarily related to lower levels of distribution payments due to lower levels of average cash management AUM and a decrease of costs due to an increase in advisory fee waivers for certain cash management funds serviced by Merrill Lynch.

Distribution and servicing costs for the nine months ended September 30, 2010 included $183 million of costs attributable to Bank of America/Merrill Lynch and affiliates, and $10 million of costs attributable to PNC and affiliates as compared to $277 million, and $14 million, respectively, in the nine months ended September 30, 2009. Distribution and servicing costs related to other third parties, including Barclays, increased $29 million to $109 million for the nine months ended September 30, 2010, as compared to $80 million for the nine months ended September 30, 2009 due to an expansion of distribution platforms and higher long-term AUM.

Direct Fund Expenses

Direct fund expenses increased $316 million primarily related to the addition of legacy BGI funds subject to these arrangements under which BlackRock pays certain fund expenses.

Expenses (continued)

General and Administration Expenses, as Adjusted

Excluding the BGI transaction and integration expenses, general and administration expenses, as adjusted of $880 million, increased $449 million, or 104%, for the nine months ended September 30, 2010 compared with $431 million for the nine months ended September 30, 2009.

Marketing and promotional expenses increased $158 million, primarily due to an increase in global and exchange traded fund marketing expenses, which included travel, promotional and rebranding and advertising expenses. Occupancy increased $101 million primarily related to the expansion of the Company and an increase in lease impairments as a result of vacating certain locations in the nine months ended September 30, 2010. Portfolio service costs increased $59 million, or 84%, to $129 million, due to an increase in market data and research expenses as well as transition management execution and clearing expenses. Technology expenses increased $37 million, or 48%, to $114 million, primarily due to an increase in software licensing and maintenance and hardware depreciation expenses. Professional services increased $26 million, or 63%, to $67 million compared to $41 million for the nine months ended September 30, 2009 primarily related to consulting, accounting/tax and legal costs. Closed-end fund launch costs (excluding compensation costs) increased $13 million as compared to the nine months ended September 30, 2009 due to the Build America Bond Trust fund, which launched during the nine months ended September 30, 2010 and generated approximately $1.2 billion in AUM. Other general and administration expenses increased $55 million, or 64%, to $141 million compared to $86 million for the nine months ended September 30, 2009, primarily related to increases in communication, VAT, regulatory filing and license fees, other office related costs and other miscellaneous expenses, partially offset by a $17 million change in foreign currency remeasurement costs/benefits from $13 million of costs in the nine months ended September 30, 2009 to a $4 million benefit in the nine months ended September 30, 2010 and a $10 million decline in an expense for a potentially uncollectible receivable recorded in 2009.

Restructuring Charges

For the nine months ended September 30, 2009, BlackRock recorded pre-tax restructuring charges of $22 million, primarily related to severance, outplacement costs, occupancy costs and accelerated amortization of certain previously granted stock awards associated with a reduction in work force and reengineering efforts.

Amortization of Intangible Assets

Amortization of intangible assets increased $12 million to $120 million for the nine months ended September 30, 2010, as compared to $108 million for the nine months ended September 30, 2009. The increase in amortization of intangible assets reflects amortization of finite-lived management contracts acquired in the BGI Transaction.

Operating Income and Operating Margin

GAAP

Operating income totaled $2,058 million for the nine months ended September 30, 2010, which was an increase of $1,169 million compared with the nine months ended September 30, 2009. Operating income for the nine months ended September 30, 2010 included the effect of revenue and expenses related to the December 1, 2009 acquisition of BGI and $90 million of BGI integration costs as compared to $31 million of BGI transaction costs for the nine months ended September 30, 2009. The transaction/integration expenses are not part of the on-going business and are principally comprised of compensation expense, legal fees, advisory payments, occupancy costs, marketing and promotional and consulting expenses.

The increase in operating income for the nine months ended September 30, 2010 included the effect of a $2,767 million increase in investment advisory, administration fees and securities lending revenue associated with the acquired BGI AUM and growth in long-term AUM, which included market appreciation and net new business during the prior twelve months, a $137 million increase in performance fees revenue and a $100 million increase in distribution fees and other revenue, partially offset by a $41 million reduction in *BlackRock Solutions* and advisory revenue. The increase in total revenue is partially offset by a $1,794 million net increase in operating expenses due to increases in employee compensation and benefits, general and administration expenses, direct fund expenses and amortization of intangible assets, partially offset by decreases in distribution and servicing costs and restructuring expenses.

The Company s operating margin was 33.6% for the nine months ended September 30, 2010, compared to 28.2% for the nine months ended September 30, 2009. The increase in operating margin for nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009 included the effect of the BGI Transaction, growth in long-term AUM, a decline of $22 million in restructuring charges, recorded in the nine months ended September 30, 2009, a change in foreign currency remeasurement costs/benefits from a $13 million cost in the nine months ended September 30, 2009 to a $4 million benefit in the nine months ended September 30, 2010, a $10 million decline in expense for a potentially uncollectible receivable recorded in 2009 and a decline in deferred compensation related to depreciation on deferred compensation investments, partially offset by a $59 million increase of BGI transaction/integration costs, an increase of $107 million in stock-based compensation expense related to additional grants to a larger number of employees at the end of January 2010, an increase in occupancy costs related to lease impairments as a result of vacating certain locations in the nine months ended September 30, 2010, $17 million of closed-end fund launch costs/commissions and a $12 million increase in amortization of intangible assets related to the finite-lived management contracts acquired in the BGI Transaction, as well as increased investments to grow the business.

As Adjusted

Operating income, as adjusted, totaled $2,205 million for the nine months ended September 30, 2010, which was an increase of $1,196 million compared to the nine months ended September 30, 2009. The increase in operating income, as adjusted, for the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009 is related to the effect of the $2,963 million increase in total revenue, partially offset by a $1,767 million increase in operating expenses due to increases in employee compensation and benefits, general and administration expenses, direct fund expenses and amortization of intangible assets, partially offset by a decrease in distribution and servicing costs.

Operating margin, as adjusted, was 38.7% and 37.4% for the nine months ended September 30, 2010 and 2009, respectively. The increase in operating margin reflects the inclusion of BGI, a change in foreign currency remeasurement costs/benefits from a $13 million cost in the nine

months ended September 30, 2009 to a $4 million benefit in the nine months ended September 30, 2010, and a $10 million decline in expense for a potentially uncollectible receivable recorded in 2009, partially offset by an increase of $107 million in stock-based compensation expense related to additional grants to a larger number of employees at the end of January 2010, an increase in occupancy costs related to lease impairments as a result of vacating certain locations in the nine months ended September 30, 2010 and a $12 million increase in amortization of intangible assets related to the finite-lived management contracts acquired in the BGI Transaction, as well as increased investments to grow the business.

Non-operating income, less net income (loss) attributable to non-controlling interests, increased $55 million to $10 million for the nine months ended September 30, 2010, as compared to $45 million net non-operating expense for the nine months ended September 30, 2009. The $10 million non-operating income, net of non-controlling interests for the nine months ended September 30, 2010 was comprised of $101 million of net gains on co-investments and seed investments and $5 million of appreciation related to hedges of deferred compensation, partially offset by $96 million of net interest expense.

The $101 million net gain on investments, less non-controlling interests, related to the Company s co-investments and seed investments, included net gains in distressed credit/mortgage funds of $49 million, private equity investments of $17 million, real estate equity/debt products of $13 million, hedge funds/funds of hedge funds of $11 million and other investments of $11 million.

Net interest expense was $96 million, an increase of $67 million primarily due to an increase in interest expense related to the December 2009 issuances of $2.5 billion of long-term notes.

Income tax expense increased $437 million in the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009. The effective income tax rates for the nine months ended September 30, 2010 and 2009 were 32.0% and 26.7%, respectively.

The nine months ended September 30, 2010 included the effect of third quarter 2010 tax legislation enacted in the United Kingdom, which resulted in approximately a $30 million tax benefit revaluation of certain net deferred tax liabilities primarily related to acquired intangible assets, which has been excluded from net income attributable to BlackRock, Inc., as adjusted, as it was a non-recurring enacted tax legislation change that does not have a cash flow impact and to ensure comparability of this information to prior reporting periods. In addition, the nine months ended September 30, 2010 included the effect of favorable tax rulings and the resolution of certain outstanding tax positions in third

quarter 2010.

The nine months ended September 30, 2009 included the effect of third quarter 2009 legislation enacted primarily with respect to New York City corporate income taxes, effective January 1, 2009 which resulted in approximately a $45 million tax benefit revaluation of net deferred tax liabilities primarily related to acquired intangible assets, which has been excluded from net income attributable to BlackRock, Inc., as adjusted, as it was a non-recurring enacted tax legislation change that does not have a cash flow impact and to ensure comparability of this information to prior reporting periods. The nine months ended September 30, 2009 also included $25 million of tax benefits primarily related to a favorable tax ruling and the final resolution of outstanding tax matters

Operating results for the three months ended September 30, 2010, as compared with the three months ended June 30, 2010 (continued)

Revenue (continued)

Investment Advisory, Administration Fees and Securities Lending Revenue

The increase in investment advisory, administration fees and securities lending revenues of $2 million for the three months ended September 30, 2010, compared with the three months ended June 30, 2010, primarily related to an increase in long-term AUM and the effect of one more revenue day for the three months ended September 30, 2010, partially offset by a $36 million decrease in securities lending revenue from $108 million in second quarter to $72 million in third quarter. The decrease in securities lending revenue in the third quarter was primarily the result of lower earnings on loan balances for international equity securities.

Performance Fees

Investment advisory performance fees were $114 million for the three months ended September 30, 2010, as compared to $50 million for the three months ended June 30, 2010. The $64 million increase in performance fees included increases of $46 million from U.K. equity hedge funds, which primarily lock in the third quarter, and $26 million in alternative fixed income hedge funds, including an opportunistic fund, partially offset by a $6 million decrease in performance fees from relative performance on equity products.

BlackRock Solutions and Advisory

BlackRock Solutions and advisory revenue for the three months ended September 30, 2010 was $101 million as compared to $114 million for the three months ended June 30, 2010. The decrease was primarily due to fewer advisory assignments, including portfolio liquidation assignments, which have AUM based fees, partially offset by an increase in *Aladdin* fees.

Other revenue of $54 million for the three months ended September 30, 2010 increased $10 million, or 23%, compared with the three months ended June 30, 2010. The increase in other revenue was primarily the result of a $12 million increase in fees earned for transition management services due to an increase in transactions to execute transitions of equity mandates.

NM Not Meaningful

Employee compensation and benefits expense increased $65 million, or 9%, to $774 million, for the three months ended September 30, 2010, compared to $709 million for the three months ended June 30, 2010.

Employee compensation and benefits, as adjusted, increased $54 million after excluding the increase of $11 million of non-GAAP adjustments primarily related to an increase in appreciation on deferred compensation which is offset by an increase in non-operating income related to investments held for these deferred compensation plans. The $54 million increase was attributable to a $33 million increase in incentive compensation which included the effect of the increase in performance fees and a $21 million increase in salaries reflecting an increase in the number of employees. Employees at September 30, 2010 totaled approximately 8,900 as compared to 8,500 at June 30, 2010.

Distribution and Servicing Costs

Distribution and servicing costs increased $8 million to $105 million for the three months ended September 30, 2010, compared to $97 million for the three months ended June 30, 2010. These costs include payments to Bank of America/Merrill Lynch under a global distribution agreement, payments to PNC and payments to Barclays as well as other third parties, primarily associated with the distribution and servicing of client investments in certain BlackRock products. The $8 million increase primarily related to higher levels of average cash management AUM as well as a decrease in fee waivers for cash management funds, resulting in higher levels of distribution costs.

Distribution and servicing costs for the three months ended September 30, 2010 included $65 million of costs attributable to Bank of America/Merrill Lynch and affiliates and $1 million of costs attributable to PNC and affiliates as compared to $59 million and $4 million, respectively, in the three months ended June 30, 2010. Distribution and servicing costs related to other third parties, including Barclays, increased $5 million to $39 million for the three months ended September 30, 2010, as compared to $34 million for the three months ended June 30, 2010.

General and Administration Expenses, as Adjusted

Excluding the BGI integration expenses, general and administration expenses, as adjusted, increased $1 million for the three months ended September 30, 2010 compared to $312 million for the three months ended June 30, 2010.

The $1 million increase primarily related to $15 million of closed-end fund launch costs (excluding compensation costs) due to the Build America Bond Trust fund launch during the three months ended September 30, 2010, which generated approximately $1.2 billion in AUM, a $7 million decrease in foreign currency remeasurement benefits and a $3 million increase in portfolio service costs due to an increase in transition management execution and clearing expenses, partially offset by a $9 million reduction in occupancy costs primarily related to lease impairments to vacate certain locations recorded in the three months ended June 30, 2010, an $8 million reduction of VAT expenses including a reduction related to prior period expenses that have been determined to be recoverable and a $5 million decrease in technology expenses related to consulting services and software maintenance.

Operating Income and Operating Margin

GAAP

Operating income totaled $707 million for the three months ended September 30, 2010, which was an increase of $10 million compared with the three months ended June 30, 2010. Operating income for the three months ended September 30, 2010 included $6 million of BGI integration costs as compared to $32 million of BGI integration costs for the three months ended June 30, 2010. The integration expenses are not part of the on-going business and are principally comprised of compensation expense, legal fees, occupancy costs, marketing and promotional and consulting expenses.

The increase in operating income for the three months ended September 30, 2010 included the effect of a $60 million net increase in total revenues, primarily due to increases in performance fees in U.K. equity hedge funds and alternative fixed income hedge funds, partially offset by a $50 million increase in operating expenses, which included $17 million of closed-end fund launch costs/commissions.

The Company s operating margin was 33.8% for the three months ended September 30, 2010 compared to 34.3% for the three months ended June 30, 2010. The decrease in operating margin for three months ended September 30, 2010 as compared to the three months ended June 30, 2010 included the revenue benefits of our diversified business model while expenses included continued investments in the business as well as a $65 million increase in employee compensation and benefits (including $2 million of closed-end fund launch commissions), $15 million of closed-end fund launch costs, $8 million in distribution and servicing costs and a $7 million decrease in foreign currency remeasurement benefits, partially offset by a $26 million decrease in BGI integration costs, $9 million of lower occupancy costs primarily related to lease impairments to vacate certain locations recorded in the three months ended June 30, 2010 and an $8 million reduction of VAT expenses related to prior period expenses that have been determined to be recoverable.

Operating Income and Operating Margin (continued)

As Adjusted

Operating income, as adjusted, totaled $737 million for the three months ended September 30, 2010 which was a decrease of $4 million compared with the three months ended June 30, 2010. The $4 million decrease in operating income, as adjusted, for the three months ended September 30, 2010 as compared with the three months ended June 30, 2010 is primarily related to a $64 million net increase in operating expenses which included increases of $54 million in employee compensation and benefits (including $2 million of closed-end fund launch commissions) and an $8 million increase in distribution and servicing costs and $15 million of closed-end fund launch costs, partially offset by a $60 million net increase in total revenue, primarily related to an increase in performance fees as well as decreases in occupancy and VAT expenses.

Operating margin, as adjusted, was 38.4% and 38.8% for the three months ended September 30, 2010 and June 30, 2010, respectively. The operating margin reflects the revenue benefits of our diversified business model while expenses included continued investments in the business as well as a $54 million increase in employee compensation and benefits, and a $7 million decrease in foreign currency remeasurement benefits, partially offset by $9 million of lower occupancy costs and an $8 million reduction of VAT expenses including a reduction related to prior period expenses that have been determined to be recoverable.

Non-Operating Income (Expense), Less Net Income (Loss) Attributable to Non-Controlling Interests (continued)

Non-operating income, less net income (loss) attributable to non-controlling interests, increased $77 million to $45 million for the three months ended September 30, 2010, as compared to $32 million of non-operating expenses for the three months ended June 30, 2010. The $45 million non-operating income, net of non-controlling interests, was comprised of $66 million of net gains primarily on co-investments and seed investments, $6 million of positive valuations related to economic investment hedges of deferred compensation, partially offset by $27 million of net interest expense.

The $66 million net gain on co-investments and seed investments included net gains in distressed credit/mortgage funds of $25 million, private equity investments of $20 million, real estate equity/debt products of $11 million, hedge funds/funds of hedge funds of $4 million and other investments of $6 million.

The $77 million increase in non-operating income, net of net income (loss) attributable to non-controlling interests, was related to a $61 million increase in valuation gains on co-investments and seed investments, a $10 million increase in valuations related to hedges of deferred compensation plans and a $6 million decrease in net interest expense. The $61 million net increase in valuations gains on co-investments primarily related to gains of $30 million from private equity investments, $20 million from distressed credit/mortgage funds, $9 million from real estate products and $3 million from hedge funds/funds of hedge funds, partially offset by lower gains of $1 million for other investments. The $6 million decrease in net interest expense was due to higher dividend income related to a regulatory investment.

(1) Net of net income (loss) attributable to non-controlling interests.

Income tax expense decreased $32 million in the three months ended September 30, 2010 as compared to the three months ended June 30, 2010. The effective income tax rates for the three months ended September 30 and June 30, 2010 were 26.7% and 35.0%, respectively.

The three months ended September 30, 2010 included the effect of third quarter 2010 tax legislation enacted in the United Kingdom, which resulted in a $30 million tax benefit revaluation of certain net deferred tax liabilities primarily related to acquired intangible assets, which has been excluded from net income attributable to BlackRock, Inc., as adjusted, as it was a non-recurring enacted tax legislation change that does not impact cash flow and to ensure comparability of this information to prior reporting periods. Excluding this favorable tax benefit, the effective income tax rate would have been approximately 30.8% in the three months ended September 30, 2010. The decline in the adjusted effective tax

rate was attributable to the effect of favorable tax rulings, a portion of which is attributable to the first half of 2010, and the resolution of certain outstanding tax positions in third quarter 2010.

Liquidity and Capital Resources

BlackRock Cash Flows Excluding the Impact of Consolidated Sponsored Investment Funds and VIEs

In accordance with GAAP, certain BlackRock sponsored investment funds and collateralized loan obligations (CLOs) are consolidated into the financial statements of BlackRock, notwithstanding the fact that BlackRock may only have a minority equity interest, if any, in these funds or CLOs. As a result, BlackRock s condensed consolidated statements of cash flows include the cash flows of consolidated sponsored investment funds and CLOs. The Company uses an adjusted cash flow statement, which excludes the impact of consolidated sponsored investment funds and CLOs, as a supplemental non-GAAP measure to assess liquidity and capital requirements. The Company believes that its cash flows, excluding the impact of the consolidated sponsored investment funds and CLOs, provide investors with useful information on the cash flows of BlackRock relating to its ability to fund additional operating, investing and financing activities. BlackRock s management does not advocate that investors consider such non-GAAP measures in isolation from, or as a substitute for its cash flow presented in accordance with GAAP.

BlackRock Cash Flows Excluding the Impact of Consolidated Sponsored Investment Funds and VIEs (continued)

Operating Activities

Sources of BlackRock s operating cash primarily include investment advisory, administration fees and securities lending revenue, revenues from *BlackRock Solutions* and advisory products and services and mutual fund distribution fees. BlackRock uses its cash to pay compensation and benefits, distribution and servicing costs, direct fund expenses, general and administration expenses, interest and principal on the Company s borrowings, income taxes and dividends on BlackRock s capital stock and to purchase co-investments and seed investments, and pay for capital expenditures.

Net cash inflows from operating activities, excluding the impact of consolidated sponsored investment funds and VIEs, for the nine months ended September 30, 2010 primarily include the receipt of investment advisory and administration fees, securities lending revenue and other revenue offset by the payment of operating expenses incurred in the normal course of business. Net cash inflows for the nine months ended September 30, 2010 included the effect of cash payments related to year end incentive compensation, including the payments for BGI employee compensation accruals assumed in the BGI Transaction and repayments to Barclays of approximately $292 million to settle certain non-interest bearing notes assumed in the BGI Transaction.

Investing Activities

Cash outflows from investing activities, excluding the impact of consolidated sponsored investment funds and VIEs, for the nine months ended September 30, 2010 were $460 million and primarily included $522 million of purchases of investments, including $315 million of Federal Reserve Bank stock, and $96 million of purchases of property and equipment, partially offset by $131 million of net proceeds from sales and maturities of investments, $39 million of return of capital from equity method investees and $16 million of acquisition related payments.

Financing Activities

Cash outflows from financing activities, excluding the impact of consolidated sponsored investment funds and VIEs, for the nine months ended September 30, 2010 were $3,092 million primarily included repayments of short-term borrowings and convertible debt of $2,134 million and $176 million, respectively, $582 million of payments for cash dividends and $264 million related to repurchases of common stock, including $140 million of stock repurchases under the repurchase plan approved in July 2010 and $124 million to satisfy tax withholding obligations of employees related to vesting of certain restricted stock awards. Cash outflows from financing activities were partially offset by cash inflows related to $43 million excess tax benefits from vested stock-based compensation and a $10 million Merrill Lynch cash capital contribution in third quarter 2010.

Liquidity and Capital Resources (continued)

Capital Resources

The Company manages its financial condition and funding to maintain appropriate liquidity for the business. Capital resources at September 30, 2010 and December 31, 2009 were as follows:

(Dollar amounts in millions)	September 30, 2010	December 31, 2009	Variance Amount	Variance % Change
Cash and cash equivalents	$ 2,636	$ 4,708	($ 2,072)	(44%)
Cash and cash equivalents held by consolidated sponsored investment funds[1]	(92)	(75)	(17)	(23%)
Subtotal	2,544	4,633	(2,089)	(45%)
2007 credit facility undrawn[2]	2,266	2,171	95	4%
Commercial paper[3]		(2,034)	2,034	100%
Total liquidity	$ 4,810	$ 4,770	$ 40	1%
Required regulatory capital[4]	$ 885	$ 857	$ 28	3%

(1) The Company may not be able to access such cash to use in its operating activities.

(2) Excludes $134 million and $129 million of undrawn amounts at September 30, 2010 and December 31, 2009, respectively related to Lehman Commercial Paper, Inc.

(3) The outstanding commercial paper notes that are supported by the 2007 credit facility reduce the availability of the facility.

(4) A portion of the required regulatory capital is partially met with cash and cash equivalents.

The $40 million increase in total liquidity during the nine months ended September 30, 2010 included the effects of the following: (i) cash payments of 2009 year end incentive awards, including the payments for BGI employee compensation accrual assumed in the BGI Transaction, (ii) the purchase of $315 million of Federal Reserve Bank stock, (iii) the settlement of approximately $292 million of certain non-interest bearing notes assumed in the BGI Transaction and (iv) $176 million of repayments related to convertible debt.

In addition, a significant portion of the Company s $1,359 million of net economic investments are illiquid in nature and, as such, may not be readily convertible to cash.

Operating Lease Drapers Gardens

In January 2010, the Company entered into an agreement with Mourant & Co Trustees Limited and Mourant Property Trustees Limited as Trustees of the Drapers Gardens Unit Trust, for the lease of approximately 292,418 square feet of office and ancillary (including retail) space located at Drapers Gardens, 12 Throgmorton Avenue, London, EC2, United Kingdom.

The lease began on February 17, 2010 (the Effective Date) and will continue for 25 years, with the option to renew for an additional five-year term. The lease provides for total annual base rental payments of approximately $22 million, which is subject to increase on each fifth anniversary of the beginning of the lease. The lease included an initial rent free period for 36 months and 22 days following the Effective Date.

Purchase Obligations Drapers Gardens

In connection with the Drapers Gardens lease described above, the Company entered into a purchase obligation for construction services of approximately £43 million. The Company incurred £3 million of construction services during the nine months ended September 30, 2010. Substantially all of the remaining obligation of £40 million (or approximately $63 million based on the September 30, 2010 exchange rate of $1.58 per £1) is expected to be incurred over the next twelve months.

Investment/Loan Commitments

At September 30, 2010, the Company had $241 million of various capital commitments to fund sponsored investment funds, including funds of private equity funds, real estate funds and distressed credit funds. This amount excludes additional commitments made by consolidated funds of funds to underlying third party funds as third party non-controlling interest holders have the legal obligation to fund the respective commitments of such funds of funds. Generally, the timing of the funding of these commitments is unknown and are callable at any time prior to the expiration of the commitment. These unfunded commitments are not recorded on the Company s condensed consolidated statements of financial condition. The Company intends to make additional capital commitments from time to time to fund additional investment products for, and with, its clients.

Prior to March 31, 2010, the Company was committed to provide financing of up to $60 million to Anthracite Capital, Inc. (Anthracite), a specialty commercial real estate finance company that was managed by a subsidiary of BlackRock. The financing is collateralized by a pledge by Anthracite of its ownership interest in a real estate debt investment fund, which is also managed by a subsidiary of BlackRock. At September 30, 2010, $33.5 million of financing was outstanding and remains outstanding as of November 2010, which is past its final maturity date of March 5, 2010. At September 30, 2010, the carrying value of the collateral was estimated to be $8 million, which resulted in an additional $4.5 million reduction in amounts due from related parties on the Company s condensed consolidated statement of financial condition and an equal amount recorded in general and administrative expenses on the Company s condensed consolidated statements of income in the nine months ended September 30, 2010. The Company has no obligation to loan additional amounts to Anthracite under this facility. Anthracite filed a voluntary petition for relief under Chapter 7 of Title 11 of the U.S. Code in the U.S. Bankruptcy Court for the Southern District of New York on March 15, 2010. The management agreement between the Company and Anthracite has expired. Recovery of any amount of the financing provided by the Company in excess of the value of the collateral is not anticipated. The Company continues to evaluate the collectability of the outstanding borrowings by reviewing the carrying value of the net assets of the collateral, which fluctuates each period.

Short-term Borrowings

2007 Credit Facility

In August 2007, the Company entered into a five-year, $2.5 billion unsecured revolving credit facility (the 2007 facility). The 2007 facility requires the Company not to exceed a maximum leverage ratio (ratio of net debt to earnings before interest, taxes, depreciation and amortization, where net debt equals total debt less domestic unrestricted cash) of 3 to 1, which was satisfied with a ratio of less than 1 to 1 at September 30, 2010. At September 30, 2010, the Company had $100 million outstanding under the 2007 facility with an interest rate of 0.48% and a maturity date during November 2010. Lehman Commercial Paper, Inc. has a $140 million participation under the 2007 facility; however, BlackRock does not expect that Lehman Commercial Paper, Inc. will honor its commitment to fund additional amounts. Bank of America, a related party, has a $140 million participation under the 2007 facility.

Commercial Paper Program

On October 14, 2009, BlackRock established a commercial paper program (the CP Program) under which the Company may issue unsecured commercial paper notes (the CP Notes) on a private placement basis up to a maximum aggregate amount outstanding at any time of $3 billion. The initial proceeds of the commercial paper issuances were used to finance a portion of the BGI Transaction. Subsidiaries of Bank of America and Barclays, both related parties, as well as other third parties, act as dealers under the CP Program. At September 30, 2010 the CP Program was supported by the 2007 facility.

The Company began to issue CP Notes under the CP Program on November 4, 2009. As of September 30, 2010, BlackRock did not have any outstanding CP Notes. The Company may issue additional CP Notes throughout the remainder of the year.

Japan Commitment-line

In September 2010, BlackRock Japan Co., Ltd., a wholly-owned subsidiary of the Company, renewed its five billion Japanese yen commitment-line agreement (the Japan Commitment-line) for a term of one year. The Japan Commitment-line is intended to provide liquidity and flexibility for operating requirements in Japan. At September 30, 2010, the Company had no borrowings outstanding under the Japan Commitment-line.

Convertible Debentures

In February 2005, the Company issued $250 million aggregate principal amount of convertible debentures due in 2035 and bearing interest at a rate of 2.625% per annum. Beginning in February 2009, the convertible debentures became convertible at the option of the holders at any time and on, and after, February 20, 2010 the convertible debentures became callable by the Company at any time following not more than 60 but not less than 30 days notice. During the nine months ended September 30, 2010, holders of $176 million of debentures converted their holdings into cash and approximately 942 thousand shares. At September 30, 2010, $67 million in convertible debentures were outstanding.

As of September 30, 2010, principal repayment and interest requirements, assuming the convertible debentures are fully repaid in 2010, are $67 million for the remainder of 2010.

Long-term Borrowings

At September 30, 2010, the principal amount of long-term borrowings was $3.2 billion. During the nine months ended September 30, 2010, the Company paid approximately $92 million related to interest on long-term borrowings. Principal repayments and interest requirements are as follows:

(Dollar amounts in millions)

Year	Principal	Interest	Total Payments
Remainder of 2010	$	$ 48	$ 48

2011		140	140
2012	500	140	640

Other 2010 Cash Uses

Settlement of Acquisition Related Liabilities with Barclays

In general, as certain acquired BGI receivables are collected, the Company is required to pay Barclays approximately $342 million, which was recorded as of December 31, 2009 in due to related parties on the condensed consolidated statement of financial condition, to settle certain non-interest bearing notes assumed in the BGI Transaction. As of September 30, 2010, the Company had repaid approximately $292 million.

Federal Reserve Bank stock

BlackRock Institutional Trust Company, N.A. (BTC), a wholly-owned subsidiary of the Company, purchased $315 million of additional Federal Reserve Bank stock during the nine months ended September 30, 2010 pursuant to its regulatory requirements. Additional purchases of Federal Reserve Bank stock, pursuant to BTC s regulatory requirements, may be required; however, such amounts currently are not expected to be material.

SSR Transaction

In connection with the SSR Transaction, which closed in January 2005, the Company made a final contingent payment in August 2010 of approximately $8 million, based on the Company s retained AUM associated with the MetLife defined benefit and defined contribution plans.

Approval to Repurchase up to 5,100,000 shares

In July 2010, BlackRock announced that its Board of Directors approved the repurchase of up to 5,100,000 shares to neutralize the dilutive effects of restricted stock units and options that have been granted to employees and which will become dilutive over the next several years. The shares are to be repurchased with management discretion on the timing of the repurchases. BlackRock s pre-existing repurchase program established in 2006 has been terminated effective with the new authorization. As of September 30, 2010, the Company had repurchased 896,102 shares in open market transactions for approximately $140 million.

Contingent Payments Related to Quellos Transaction

In connection with the Quellos Transaction, Quellos is entitled to receive two contingent payments, subject to achieving certain investment advisory base and performance fee measures through December 31, 2010, totaling up to an additional $969 million in a combination of cash and stock.

During second quarter 2009, the Company determined the amount of the first contingent payment to be $219 million, of which $11 million was previously paid in cash during 2008. Of the remaining $208 million, during second quarter 2009, $156 million was paid in cash and $52 million was paid in common stock, or approximately 330,000 shares based on a price of $157.33 per share.

The second contingent payment, of up to $595 million, is payable in cash in 2011. Quellos also may be entitled to a catch-up payment in 2011 if certain investment advisory base fee measures are met through 2010 as the value of the first contingent payment was less than $374 million. A portion of the second contingent payment, not to exceed $90 million, may be paid to Quellos based on factors including the continued

employment of certain employees with BlackRock. Therefore, this portion, not to exceed $90 million, would be recorded as employee compensation.

As of September 30, 2010, the Company did not anticipate that the base and performance fee measures through December 31, 2010 will be achieved, therefore, the remaining contingent payments are not expected to occur.

Barclays Support of Certain Securities Lending Related Cash Funds

Barclays has provided capital support agreements to support certain securities lending related cash management products acquired by BlackRock in the BGI Transaction. Pursuant to the terms of the capital support agreements, Barclays agreed to cover losses on covered securities within the products in the aggregate of up to $2.2 billion from December 1, 2009 through December 1, 2013 or until certain criteria are met. BlackRock and Barclays have procedures in place to determine loss events on covered securities within the products and to ensure support payments from Barclays. At September 30, 2010, Barclays remaining maximum potential obligation in the aggregate under the capital support agreements was $1.9 billion. At September 30, 2010, BlackRock concluded that although these funds were variable interest entities, it was not the primary beneficiary of these funds.

Net Capital Requirements

The Company is required to maintain net capital in certain regulated subsidiaries within a number of jurisdictions, which is partially maintained by retaining cash and cash equivalents in those jurisdictions. As a result, such subsidiaries of the Company may be restricted in their ability to transfer cash between different jurisdictions and to their parents. Additionally, transfers of cash between international jurisdictions, including repatriation to the United States, may have adverse tax consequences that could discourage such transfers.

BTC is chartered as a national bank that does not accept client deposits and whose powers are limited to trust activities. BTC provides investment management services, including investment advisory and securities lending agency services to institutional investors and other clients. BTC is subject to various regulatory capital and liquid asset requirements administered by Federal banking agencies.

At September 30, 2010, the Company was required to maintain approximately $885 million in net capital in certain regulated subsidiaries, including BTC, and is in compliance with all applicable regulatory minimum net capital requirements.

Critical Accounting Policies

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ significantly from those estimates. In addition to Consolidation of Variable Interest Entities (VIEs) and Fair Value Measurements, discussed below, see Note 2, Significant Accounting Policies, in the Company s condensed consolidated financial statements contained in Part I, Item 1 of this filing and the Company s Significant Accounting Policies in Management s Discussion and Analysis of Financial Condition and Results of Operations in BlackRock s 2009 Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 10, 2010 for details on Significant Accounting Policies.

Consolidation of Variable Interest Entities

In June 2009, the FASB issued ASU 2009-17, *Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities* (ASU 2009-17), which became effective for BlackRock on January 1, 2010. In February 2010 the FASB issued ASU 2010-10, *Amendments to Statement 167 for Certain Investment Funds* (ASU 2010-10). This ASU defers the application of Statement of Financial Accounting Standards (SFAS) No. 167, *Amendments to FASB Interpretation No. 46(R),* for a reporting enterprise s interest in an entity if certain conditions are met. In the normal course of business, the Company is the manager of various types of sponsored investment vehicles, including collateralized debt/loan obligations (CDOs or CLOs) and sponsored investment funds, which may be considered VIEs. At September 30, 2010, the Company consolidated four VIEs, including three CLOs and one sponsored private equity fund. See Note 2, Significant Accounting Policies, in the Company s condensed consolidated financial statements contained in Part I, Item 1 of this filing for further information regarding consolidation of variable interest entities.

CLOs

As of September 30, 2010, BlackRock was the manager of over 20 CLOs/CDOs and other securitization entities, including three CLOs in which BlackRock, in accordance with ASU 2009-17, was determined to be the primary beneficiary, which resulted in consolidation of these VIEs in the Company s condensed consolidated financial statements. At September 30, 2010, the Company had $83 million, $1,255 million, $1,237 million, $7 million and $94 million in cash and cash equivalents, bank loans and other investments, borrowings, other liabilities and appropriated retained earnings, respectively, on its condensed consolidated statement of financial condition related to these consolidated CLOs. The changes in the assets and liabilities of these CLOs will have no impact on net income attributable to BlackRock, Inc.

Sponsored Private Equity Fund

As of September 30, 2010, BlackRock was determined to be the primary beneficiary of one sponsored private equity investment fund of funds, in which it had a non-substantive investment and was deemed to absorb the majority of the variability due to its de-facto third party relationships with other partners in the fund, which limited the ability of the partners to transfer or sell their interests without BlackRock s consent as the general partner of the fund. At September 30, 2010, the Company had recorded $8 million, $38 million and $46 million in cash and cash equivalents, private equity investments and nonredeemable non-controlling interests of consolidated VIEs, respectively, on its condensed consolidated statement of financial condition related to this VIE. The Company has no risk of loss with its involvement with this VIE.

Critical Accounting Policies (continued)

Fair Value Measurements

BlackRock adopted the applicable provisions of ASC 820-10, *Fair Value Measurements and Disclosures* (ASC 820-10), as of January 1, 2008, which require, among other things, disclosures about assets and liabilities that are measured and reported at fair value. The provisions of ASC 820-10 establish a hierarchy that prioritizes inputs to valuation techniques used to measure fair value and requires companies to disclose the fair value of their financial instruments according to a fair value hierarchy (i.e., Level 1, 2 and 3 inputs, as defined). The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Additionally, companies are required to provide disclosure regarding instruments in the Level 3 category (which have inputs to the valuation techniques that are unobservable and require significant management judgment), including a reconciliation of the beginning and ending balances separately for each major category of assets and liabilities.

Level 3 inputs include the most currently available information, including capital account balances for its partnership interests in various alternative investments and returns of certain market indices. BlackRock s $727 million of Level 3 investments, or 48% of total GAAP investments, at September 30, 2010 primarily include co-investments in private equity fund of funds and private equity funds, funds of hedge funds as well as alternative hedge funds that invest in distressed credit and mortgage securities and real estate equity products. The various partnerships are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund, which could include BlackRock employees. Fair value policies at the underlying fund generally utilize pricing information from third party sources, however, in some instances current valuation information, for illiquid securities or securities in markets that are not active, may not be available from any third party source or fund management may conclude that the valuations that are available from third party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that may be used to value these investments.

The Company s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. See Note 2, Significant Accounting Policies, in the Company s condensed consolidated financial statements contained in Part I, Item 1 of this filing for further information regarding fair value measurements.

Goodwill and Intangible Assets

The value of contracts acquired in a business acquisition to manage assets in proprietary open- and closed-end investment funds as well as collective trust funds without a specified termination date and trade names is classified as an indefinite-lived intangible asset. The assignment of indefinite lives to such investment fund contracts is based upon the assumption that there is no foreseeable limit on the contract period to manage these funds due to the likelihood of continued renewal at little or no cost. Goodwill represents the cost of a business acquisition in excess of the fair value of the net assets acquired. In accordance with the applicable provisions of ASC 350, *Intangibles Goodwill and Other* (ASC 350), indefinite-lived intangible assets and goodwill are not amortized. The Company performed its annual impairment assessment review, as required by ASC 350, for goodwill and indefinite and finite lived intangible assets, on BlackRock s annual impairment test date of July 31st.

Goodwill

BlackRock assessed its goodwill for impairment on July 31st and considered such factors as the book value and the market capitalization of the Company. At July 31, 2010, the impairment test that was performed indicated no impairment charge was required. The Company continues to monitor its book value per share as compared to closing prices of its common stock for potential indicators of impairment. As of September 30, 2010 the Company s common stock closed at $170.25, which exceeded its book value, after excluding appropriated retained earnings, of

approximately $133.02 per share.

Goodwill and Intangible Assets (continued)

Indefinite-lived and finite-lived intangibles

BlackRock assessed its indefinite-lived management contract and trade names for impairment on July 31st, considering such factors as AUM, product margins, tax rates and discount rates to determine whether the values of these asset were impaired and whether the indefinite-life classification was still appropriate. As of July 31, 2010 the Company determined that the impairment tests performed indicated that no impairment charges were required and the classification was still appropriate.

In addition, for finite-lived intangibles management determined that no circumstances existed which would result in an impairment charge or a change in the remaining useful life of any of the finite-lived intangible assets.

Performance Fees / Carried Interest

The Company receives performance fees or an incentive allocation from alternative investment products and certain separately managed accounts. These performance fees are earned upon exceeding specified relative or absolute investment return thresholds. Such fees are recorded upon completion of the measurement period which varies by product or account.

The Company receives carried interest from certain alternative investments upon exceeding performance thresholds. BlackRock may be required to return all, or part, of such carried interest depending upon future performance of these investments. BlackRock records carried interest subject to such claw-back provisions as performance fees on its condensed consolidated statements of income upon the earlier of the termination of the alternative investment fund or when the likelihood of claw-back is mathematically improbable. The Company records a deferred carried interest liability to the extent it receives cash or capital allocations prior to meeting the revenue recognition criteria. At September 30, 2010 and December 31, 2009, the Company had $22 million and $13 million, respectively, of deferred carried interest recorded in other liabilities on the condensed consolidated statements of financial condition.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

AUM Market Price Risk

BlackRock s investment management revenues are comprised of fees based on a percentage of the value of AUM and, in some cases, performance fees expressed as a percentage of the returns realized on AUM. At September 30, 2010, the majority of our investment advisory and administration fees were based on average or period end AUM of the applicable investment funds or separate accounts. Movements in equity market prices, interest rates/credit spreads, foreign exchange rates, or all three could cause the value of AUM to decline, which would result in lower investment advisory and administration fees.

Corporate Investments Portfolio Risks

As a leading investment management firm, BlackRock devotes significant resources across all of its operations to identifying, measuring, monitoring, managing and analyzing market and operating risks, including the management and oversight of its own investment portfolio. The Board of Directors of the Company has adopted guidelines for the review of investments to be made by the Company, requiring, among other things, that all investments be reviewed by the Company s Capital Committee, which consists of senior officers of the Company, and that certain investments may be referred to the Audit Committee or the Board of Directors, depending on the circumstances, for approval.

In the normal course of its business, BlackRock is exposed to equity market price risk, interest rate/credit spread risk and foreign exchange rate risk associated with its corporate investments.

BlackRock has investments primarily in sponsored investment products that invest in a variety of asset classes including real estate, private equity and hedge funds. Investments generally are made for co-investment purposes, to establish a performance track record, to hedge exposure to certain deferred compensation plans or for regulatory purposes. Currently, the Company has a seed capital hedging program in which it enters into total return swaps to hedge exposure to certain equity investments. At September 30, 2010, the outstanding total return swaps had an aggregate notional value of approximately $24 million.

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

Corporate Investments Portfolio Risks (continued)

At September 30, 2010, approximately $470 million of BlackRock s total investments were maintained in sponsored investment funds that are deemed to be controlled by BlackRock in accordance with GAAP and therefore are consolidated even though BlackRock may not own a majority of such funds. Excluding the impact of the Federal Reserve Bank stock, investments made to hedge exposure to certain deferred compensation plans and certain equity investments that are hedged via the seed capital hedging program, the Company s net economic exposure to its investment portfolio is as follows:

(Dollar amounts in millions)	September 30, 2010	December 31, 2009	Variance Amount	Variance % Change
Total investments, GAAP	$ 1,512	$ 1,049	$ 463	44%
Investments held by consolidated sponsored investment funds	(470)	(463)	(7)	(2%)
Net exposure to consolidated investment funds	317	258	59	23%
Total net economic investments	1,359	844	515	61%
Federal Reserve Bank stock	(325)	(10)	(315)	NM
Deferred compensation investments	(71)	(71)		%
Hedged investments	(24)	(36)	12	33%
Total net economic investment exposure	$ 939	$ 727	$ 212	29%

NM Not Meaningful

The net economic investment exposure of the portfolio is presented in either the market price or the interest rate/credit spread risk disclosures below:

Market Price Risk

At September 30, 2010, the Company s net exposure to market price risk in its investment portfolio was approximately $555 million of the Company s net economic investment exposure. Investments that are subject to market price risk include private equity and real estate investments, hedge funds and fund of funds, as well as mutual funds. The Company estimates that a 10% adverse change in market prices would result in a decrease of approximately $55.5 million in the carrying value of such investments.

Interest Rate/Credit Spread Risk

At September 30, 2010, the Company was exposed to interest-rate risk and credit spread risk as a result of approximately $384 million of investments in debt securities and sponsored investment products that invest primarily in debt securities. Management considered a hypothetical

100 basis point fluctuation in interest rates or credit spreads and estimates that the impact of such a fluctuation on these investments, in the aggregate, would result in a decrease, or increase, of approximately $6 million in the carrying value of such investments.

Foreign Exchange Rate Risk

As discussed above, the Company invests in sponsored investment products that invest in a variety of asset classes. The carrying value of the net economic investment exposure denominated in foreign currencies, primarily the euro, pound sterling, South Korean won and Australian dollars, was $90 million. A 10% adverse change in foreign exchange rates would result in approximately an $9.0 million decline in the carrying value of such investments.

Disclosure Controls and Procedures

Under the direction of BlackRock s Chief Executive Officer and Chief Financial Officer, BlackRock evaluated the effectiveness of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d - 15(e) under the Exchange Act) at September 30, 2010. Based on this evaluation, BlackRock s Chief Executive Officer and Chief Financial Officer have concluded that BlackRock s disclosure controls and procedures were effective at September 30, 2010.

Internal Control over Financial Reporting

Other than the integration of certain information technology systems and processes of the acquired BGI business to those of BlackRock, there have been no changes in internal control over financial reporting during the quarter ended September 30, 2010 that have materially affected or are reasonably likely to materially affect, such internal control over financial reporting. BlackRock is continuing to evaluate its internal controls as well as the internal controls of the acquired BGI business as BlackRock integrates the BGI business into the existing BlackRock business.
