Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Note 1 Summary of Significant Accounting Policies****Basis of Financial Statement Presentation**

The accounting and financial reporting policies of Umpqua Holdings Corporation (referred to in this report as we, our or the Company) conform to accounting principles generally accepted in the United States of America. The accompanying interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Umpqua Bank (Bank), and Umpqua Investments, Inc. (Umpqua Investments). All material inter-company balances and transactions have been eliminated. The consolidated financial statements have not been audited. In preparing these financial statements, the Company has evaluated events and transactions subsequent to September 30, 2011 for potential recognition or disclosure. A more detailed description of our accounting policies is included in the 2010 Annual Report filed on Form 10-K. These interim condensed consolidated financial statements should be read in conjunction with the financial statements and related notes contained in the 2010 Annual Report filed on Form 10-K.

In management's opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation. The results for interim periods are not necessarily indicative of results for the full year or any other interim period. Certain reclassifications of prior period amounts have been made to conform to current classifications.

Note 2 Business Combinations

On January 22, 2010, the Washington Department of Financial Institutions closed EvergreenBank (Evergreen), Seattle, Washington and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver. That same date, Umpqua Bank assumed the banking operations of Evergreen from the FDIC under a whole bank purchase and assumption agreement with loss-sharing. Under the terms of the loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (OREO) and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$90.0 million on covered assets for Evergreen and absorb 95% of losses and share in 95% of loss recoveries exceeding \$90.0 million, except the Bank will incur losses up to \$30.2 million before the loss-sharing commences. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date. With this agreement, Umpqua Bank assumed six additional store locations in the greater Seattle, Washington market. This acquisition is consistent with our community banking expansion strategy and provides further opportunity to fill in our market presence in the greater Seattle, Washington market.

On February 26, 2010, the Washington Department of Financial Institutions closed Rainier Pacific Bank (Rainier), Tacoma, Washington and appointed the FDIC as receiver. That same date, Umpqua Bank assumed the banking operations of Rainier from the FDIC under a whole bank purchase and assumption agreement with loss-sharing. Under the terms of the loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$95.0 million of losses on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$95.0 million. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates. With this agreement, Umpqua Bank assumed 14 additional store locations in Pierce County and surrounding areas. This acquisition expands our presence in the south Puget Sound region of Washington State.

The operations of Evergreen and Rainier are included in our operating results from January 23, 2010 and February 27, 2010, respectively, and added combined revenue of \$13.3 million and \$36.4 million, non-interest expense of \$9.2 million and \$18.7 million, and earnings of \$2.5 million and \$10.7 million, net of tax, for the three and nine months ended September 30, 2011, and added combined revenue of \$8.7 million and \$31.4 million, non-interest expense of \$6.6 million and \$17.9 million, and earnings of \$1.3 million and \$8.9 million, net of tax, for the three and nine months ended September 30, 2010, respectively. These operating results include a bargain purchase gain of \$6.4 million, which is not indicative of future operating results. Evergreen's and Rainier's results of operations prior to the acquisition are not included in our operating results. Merger-related expenses of none and \$88,000 for the three and nine months ended September 30, 2011, respectively, and \$748,000 and \$4.1 million for the three and nine months ended September 30, 2010, respectively, have been incurred in connection with these acquisitions and recognized in a separate line item on the *Condensed Consolidated Statements of Operations*.

On June 18, 2010, the Nevada State Financial Institutions Division closed Nevada Security Bank (Nevada Security), Reno, Nevada and appointed the FDIC as receiver. That same date, Umpqua Bank assumed the banking operations of Nevada Security from the FDIC under a

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

whole bank purchase and assumption agreement with loss-sharing. Under the terms of the loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO, and accrued interest

Table of Contents

on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on all covered assets. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates. With this agreement, Umpqua Bank assumed five additional store locations, including three in Reno, Nevada, one in Incline Village, Nevada, and one in Roseville, California. This acquisition expands our presence into the State of Nevada.

The operations of Nevada Security are included in our operating results from June 19, 2010, and added revenue of \$5.9 million and \$14.3 million, non-interest expense of \$2.8 million and \$8.9 million, and income of \$850,000 and \$648,000, net of tax, for the three and nine months ended, September 30, 2011 and revenue of \$3.9 million and \$4.4 million, non-interest expense of \$3.0 million and \$3.6 million, and earnings of \$578,000 and \$544,000, net of tax, for the three and nine months ended, September 30, 2010, respectively. Nevada Security's results of operations prior to the acquisition are not included in our operating results. Merger-related expenses of none and \$101,000 for the three and nine months ended September 30, 2011, respectively, and \$741,000 and \$1.1 million for the three and nine months ended September 30, 2010, respectively, have been incurred in connection with the acquisition of Nevada Security and recognized as a separate line item on the *Condensed Consolidated Statements of Operations*.

We refer to the acquired loans and other real estate owned that are subject to the loss-sharing agreements as covered loans and covered other real estate owned, respectively, and these are presented as separate line items in our consolidated balance sheet. Collectively these balances are referred to as covered assets. Certain types of modifications or restructuring activities subsequent to acquisition may disqualify a loan from loss-share coverage under the provisions of the loss-share agreement. Loans that have been disqualified from loss-share coverage are prospectively reported as non-covered loans.

The assets acquired and liabilities assumed from the Evergreen, Rainier, and Nevada Security acquisitions have been accounted for under the acquisition method of accounting. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the acquisition dates. The fair values of the assets acquired and liabilities assumed were determined based on the requirements of the Fair Value Measurements and Disclosures topic of the Financial Accounting Standards Board Accounting Standards Codification (the FASB ASC). The amounts are subject to adjustments based upon final settlement with the FDIC. In addition, the tax treatment of FDIC-assisted acquisitions is complex and subject to interpretations that may result in future adjustments of deferred taxes as of the acquisition date. The terms of the agreements provide for the FDIC to indemnify the Bank against claims with respect to liabilities of Evergreen, Rainier, and Nevada Security not assumed by the Bank and certain other types of claims identified in the agreement. The application of the acquisition method of accounting resulted in the recognition of a bargain purchase gain of \$6.4 million in the Evergreen acquisition, \$35.8 million of goodwill in the Rainier acquisition and \$10.4 million of goodwill in the Nevada Security acquisition.

A summary of the net assets (liabilities) received from the FDIC and the estimated fair value adjustments are presented below:

(in thousands)

	Evergreen	Rainier	Nevada Security
	January 22, 2010	February 26, 2010	June 18, 2010
Cost basis net assets (liabilities)	\$ 58,811	\$ (50,295)	\$ 53,629
Cash payment received from (paid to) the FDIC	-	59,351	(29,950)
Fair value adjustments:			
Loans	(117,449)	(103,137)	(112,975)
Other real estate owned	(2,422)	(6,581)	(17,939)
Other intangible assets	440	6,253	322
FDIC indemnification asset	71,755	76,603	99,160
Deposits	(1,023)	(1,828)	(1,950)
Term debt	(2,496)	(13,035)	-
Other	(1,179)	(3,139)	(690)
Bargain purchase gain (goodwill)	\$ 6,437	\$ (35,808)	\$ (10,393)

In FDIC-assisted transactions, only certain assets and liabilities are transferred to the acquirer and, depending on the nature and amount of the acquirer's bid, the FDIC may be required to make a cash payment to the acquirer or the acquirer may be required to make payment to the FDIC.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

In the Evergreen acquisition, cost basis net assets of \$58.8 million were transferred to the Company. The bargain purchase gain represents the excess of the estimated fair value of the assets acquired over the estimated fair value of the liabilities assumed.

In the Rainier acquisition, cost basis net liabilities of \$50.3 million and a cash payment received from the FDIC of \$59.4 million were transferred to the Company. The goodwill represents the excess of the estimated fair value of the liabilities assumed over the estimated fair value of the assets acquired. Goodwill of \$27.6 million and core deposit intangible assets of \$1.1 million recognized are deductible for income tax purposes.

Table of Contents

In the Nevada Security acquisition, cost basis net assets of \$53.6 million were transferred to the Company and a cash payment of \$30.0 million was made to the FDIC. The goodwill represents the excess of the estimated fair value of the liabilities assumed over the estimated fair value of the assets acquired. Goodwill of \$36.8 million and core deposit intangible assets of \$322,000 recognized are deductible for income tax purposes.

The Bank did not immediately acquire all the real estate, banking facilities, furniture or equipment of Evergreen, Rainier, or Nevada Security as part of the purchase and assumption agreements. Rather, the Bank was granted the option to purchase or lease the real estate and furniture and equipment from the FDIC. The term of this option expired 90 days from the acquisition dates. Acquisition costs of the real estate and furniture and equipment are based on current mutually agreed upon appraisals. Umpqua exercised the right to purchase approximately \$344,000 of furniture and equipment for Evergreen, \$26.3 million of real estate and furniture and equipment for Rainier, and \$2.0 million of real estate and furniture and equipment for Nevada Security. The Bank had the option to purchase one store location as part of the Nevada Security acquisition and purchased it in the second quarter of 2011.

The statement of assets acquired and liabilities assumed at their estimated fair values of Evergreen, Rainier, and Nevada Security are presented below:

(in thousands)

	Evergreen January 22, 2010	Rainier February 26, 2010	Nevada Security June 18, 2010
Assets Acquired:			
Cash and equivalents	\$ 18,919	\$ 94,067	\$ 66,060
Investment securities	3,850	26,478	22,626

Total liabilities assumed	346,842	721,174	437,595
Net assets acquired/bargain purchase gain	\$ 6,437	\$ -	\$ -

Rainier's assets and liabilities were significant at a level to require disclosure of one year of historical financial statements and related pro forma financial disclosure. However, given the pervasive nature of the loss-sharing agreement entered into with the FDIC, the historical information of Rainier is much less relevant for purposes of assessing the future operations of the combined entity. In addition, prior to closure Rainier had not completed an audit of their financial statements, and we determined that audited financial statements were not and would not be reasonably available for the year ended December 31, 2009. Given these considerations, the Company requested, and received, relief from the Securities and Exchange Commission from submitting certain financial information of Rainier. The assets and liabilities of Evergreen and Nevada Security were not at a level that requires disclosure of historical or pro forma financial information.

Table of Contents**Note 3 Investment Securities**

The following table presents the amortized costs, unrealized gains, unrealized losses and approximate fair values of investment securities at September 30, 2011 and December 31, 2010:

Investment securities that were in an unrealized loss position as of September 30, 2011 and December 31, 2010 are presented in the following tables, based on the length of time individual securities have been in an unrealized loss position. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral.

All of the available for sale residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at September 30, 2011 are issued or guaranteed by governmental agencies. The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will not be settled at a price less than the amortized cost of each investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (OTTI) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors. For debt securities, if we intend to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (OCI). Impairment losses related to all other factors are presented as separate categories within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively based on the amount and timing of future estimated cash flows. The accretion of the impairment related to factors other than credit amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is re-evaluated accordingly to the procedures described above.

Table of Contents

The following tables present the OTTI losses for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

	Three months ended September 30,	
	2011	2010
Total other-than-temporary impairment losses	\$ -	\$ 37
Portion of other-than-temporary impairment losses transferred from in other comprehensive income ⁽¹⁾	-	7
Net impairment losses recognized in earnings ⁽²⁾	\$ -	\$ 44

	Nine months ended September 30,	
	2011	2010
Total other-than-temporary impairment losses	\$ 110	\$ 42
Portion of other-than-temporary impairment losses (recognized in) transferred from other comprehensive income ⁽¹⁾	(38)	290
Net impairment losses recognized in earnings ⁽²⁾	\$ 72	\$ 332

(1) Represents other-than-temporary impairment losses related to all other factors.

(2) Represents other-than-temporary impairment losses related to credit losses.

The OTTI recognized on investment securities held to maturity relate to non-agency residential collateralized mortgage obligations. Each of these securities holds various levels of credit subordination. The underlying mortgage loans of these securities were originated from 2003 through 2007. At origination, the weighted average loan-to-value of the underlying mortgages was 69%; the underlying borrowers had weighted average FICO scores of 731, and 59% were limited documentation loans. These securities are valued by third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. We estimate cash flows of the underlying collateral for each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then used a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows are then discounted at the interest rate used to recognize interest income on each security. We review the actual collateral performance of these securities on a quarterly basis and update the inputs as appropriate to determine the projected cash flows. The following table presents a summary of the significant inputs utilized to measure management's estimate of the credit loss component on these non-agency collateralized mortgage obligations as of September 30, 2011 and 2010:

	2011			2010		
	Minimum	Range Maximum	Weighted Average	Minimum	Range Maximum	Weighted Average
Constant prepayment rate	5.0%	20.0%	14.1%	4.0%	25.0%	14.9%
Collateral default rate	5.0%	55.0%	14.3%	8.0%	45.0%	16.8%
Loss severity	30.0%	65.0%	39.8%	20.0%	50.0%	34.6%

Table of Contents

The following table presents a roll forward of the credit loss component of held to maturity debt securities that have been written down for OTTI with the credit loss component recognized in earnings and the remaining impairment loss related to all other factors recognized in OCI for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

	Three months ended September 30,	
	2011	2010
Balance, beginning of period	\$ 12,850	\$ 12,652
Subsequent OTTI credit losses	-	44
Reductions:		
Securities sold, matured or paid-off	(1,016)	-
Balance, end of period	\$ 11,834	\$ 12,696

(in thousands)

	Nine months ended September 30,	
	2011	2010
Balance, beginning of period	\$ 12,778	\$ 12,364
Subsequent OTTI credit losses	72	332
Reductions:		
Securities sold, matured or paid-off	(1,016)	-
Balance, end of period	\$ 11,834	\$ 12,696

The following table presents the maturities of investment securities at September 30, 2011:

(in thousands)

	Available For Sale		Held To Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AMOUNTS MATURING IN:				
Three months or less	\$ 12,717	\$ 12,783	\$ 85	\$ 85
Over three months through twelve months	265,185	269,926	-	-
After one year through five years	2,079,869	2,125,689	1,475	1,532
After five years through ten years	598,435	617,997	1,021	929
After ten years	59,261	61,587	2,296	2,288
Other investment securities	1,959	2,082	-	-
	\$ 3,017,426	\$ 3,090,064	\$ 4,877	\$ 4,834

The amortized cost and fair value of collateralized mortgage obligations and mortgage-backed securities are presented by expected average life, rather than contractual maturity, in the preceding table. Expected maturities may differ from contractual maturities because borrowers have the right to prepay underlying loans without prepayment penalties.

Table of Contents

The following table presents the gross realized gains and gross realized losses on the sale of securities available for sale for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

	Three months ended September 30, 2011		Three months ended September 30, 2010

Deferred loan fees, net	(11,250)	(11,031)
Total	\$ 5,828,114	\$ 5,658,987

As of September 30, 2011, loans totaling \$5.1 billion were pledged to secure borrowings and available lines of credit.

Table of Contents

Note 5 Allowance for Non-Covered Loan Loss and Credit Quality

Allowance for Non-Covered Loan and Lease Losses

The Bank has a management Allowance for Loan and Lease Losses (ALLL) Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance

with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Our methodology for assessing the appropriateness of the ALLL consists of three key elements, which include 1) the formula allowance; 2) the specific allowance; and 3) the unallocated allowance. By incorporating these factors into a single allowance requirement analysis, all risk-based activities within the loan portfolio are simultaneously considered.

Formula Allowance

The Bank performs regular credit reviews of the loan and lease portfolio to determine the credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically during the term of the loan through the credit review process. The Company's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the formula allowance.

The formula allowance is calculated by applying risk factors to various segments of pools of outstanding loans. Risk factors are assigned to each portfolio segment based on management's evaluation of the losses inherent within each segment. Segments or regions with greater risk of loss will therefore be assigned a higher risk factor.

Base risk The portfolio is segmented into loan categories, and these categories are assigned a Base Risk factor based on an evaluation of the loss inherent within each segment.

Extra risk Additional risk factors provide for an additional allocation of ALLL based on the loan risk rating system and loan delinquency, and reflect the increased level of inherent losses associated with more adversely classified loans.

Changes to risk factors Risk factors are assigned at origination and may be changed periodically based on management's evaluation of the following factors: loss experience; changes in the level of non-performing loans; regulatory exam results; changes in the level of adversely classified loans (positive or negative); improvement or deterioration in local economic conditions; and any other factors deemed relevant.

Specific Allowance

Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a Specific Allowance to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. Loans determined to be impaired with a specific allowance are excluded from the formula allowance so as not to double-count the loss exposure. The non-accrual impaired loans as of period end have already been partially charged off to their estimated net realizable value, and are expected to be resolved over the coming quarters with no additional material loss, absent further decline in market prices.

The combination of the formula allowance component and the specific allowance component lead to an allocated allowance for loan and lease losses.

Unallocated Allowance

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 10% of the allowance, but may be maintained at higher levels during times of deteriorating economic conditions characterized by falling real estate values. The unallocated amount is reviewed quarterly with consideration of factors including, but not limited to:

Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;

Changes in international, national, regional, and local economic and business conditions and developments that affect the collectability of the portfolio, including the condition of various market segments;

Changes in the nature and volume of the portfolio and in the terms of loans;

Changes in the experience and ability of lending management and other relevant staff;

Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans;

Table of Contents

Changes in the quality of the institution's loan review system;

Changes in the value of underlying collateral for collateral-dependent loans;

The existence and effect of any concentrations of credit, and changes in the level of such concentrations;

The effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the institution's existing portfolio.

These factors are evaluated through a management survey of the Chief Credit Officer, Chief Lending Officers, Special Asset Manager, and Credit Review Manager. The survey requests responses to evaluate current changes in the nine qualitative factors. This information is then incorporated into our understanding of the reasonableness of the formula factors and our evaluation of the unallocated portion of the ALLL.

Management believes that the ALLL was adequate as of September 30, 2011. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 80% of our loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses. The U.S. recession, the housing market downturn, and declining real estate values in our markets have negatively impacted aspects of our residential development, commercial real estate, commercial construction and commercial loan portfolios. A continued deterioration in our markets may adversely affect our loan portfolio and may lead to additional charges to the provision for loan and lease losses.

The reserve for unfunded commitments (RUC) is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. For each portfolio segment, these factors include:

The quality of the current loan portfolio;

The trend in the loan portfolio's risk ratings;

Current economic conditions;

Loan concentrations;

Loan growth rates;

Past-due and non-performing trends;

Evaluation of specific loss estimates for all significant problem loans;

Historical short (one year), medium (three year), and long-term charge-off rates;

Recovery experience;

Peer comparison loss rates.

There have been no significant changes to the Bank's methodology or policies in the periods presented.

Table of Contents**Activity in the Non-Covered Allowance for Loan and Lease Losses**

The following tables summarizes activity related to the allowance for non-covered loan and lease losses by non-covered loan portfolio segment for the three and nine months ended September 30, 2011 and 2010, respectively:

(in thousands)

Asset Quality and Non-Performing Loans

We manage asset quality and control credit risk through diversification of the non-covered loan portfolio and the application of policies designed to promote sound underwriting and loan monitoring practices. The Bank's Credit Quality Group is charged with monitoring asset quality, establishing credit policies and procedures and enforcing the consistent application of these policies and

Table of Contents

procedures across the Bank. Reviews of non-performing, past due non-covered loans and larger credits, designed to identify potential charges to the allowance for loan and lease losses, and to determine the adequacy of the allowance, are conducted on an ongoing basis. These reviews consider such factors as the financial strength of borrowers, the value of the applicable collateral, loan loss experience, estimated loan losses, growth in the loan portfolio, prevailing economic conditions and other factors.

A loan is considered impaired when based on current information and events, we determine it is probable that we will not be able to collect all amounts due according to the loan contract, including scheduled interest payments. Generally, when loans are identified as impaired they are moved to our Special Assets Division. When we identify a loan as impaired, we measure the loan for potential impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining external appraisals. Generally, external appraisals are updated every six to nine months. We obtain appraisals from a pre-approved list of independent, third party, local appraisal firms. Approval and addition to the list is based on experience, reputation, character, consistency and knowledge of the respective real estate market. At a minimum, it is ascertained that the appraiser is: (a) currently licensed in the state in which the property is located, (b) is experienced in the appraisal of properties similar to the property being appraised, (c) is actively engaged in the appraisal work, (d) has knowledge of current real estate market conditions and financing trends, (e) is reputable, and (f) is not on Freddie Mac's nor the Bank's Exclusionary List of appraisers and brokers. In certain cases appraisals will be reviewed by our Real Estate Valuation Services group to ensure the quality of the appraisal and the expertise and independence of the appraiser. Upon receipt and review, an external appraisal is utilized to measure a loan for potential impairment. Our impairment analysis documents the date of the appraisal used in the analysis, whether the officer preparing the report deems it current, and, if not, allows for internal valuation adjustments with justification. Typical justified adjustments might include discounts for continued market deterioration subsequent to appraisal date, adjustments for the release of collateral contemplated in the appraisal, or the value of other collateral or consideration not contemplated in the appraisal. An appraisal over one year old in most cases will be considered stale dated and an updated or new appraisal will be required. Any adjustments from appraised value to net realizable value are detailed and justified in the impairment analysis, which is reviewed and approved by senior credit quality officers and the Company's Allowance for Loan and Lease Losses (ALLL) Committee. Although an external appraisal is the primary source to value collateral dependent loans, we may also utilize values obtained through purchase and sale agreements, negotiated short sales, broker price opinions, or the sales price of the note. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. Impairment analyses are updated, reviewed and approved on a quarterly basis at or near the end of each reporting period. Appraisals or other alternative sources of value received subsequent to the reporting period, but prior to our filing of periodic reports, are considered and evaluated to ensure our periodic filings are materially correct and not misleading. Based on these processes, we do not believe there are significant time lapses for the recognition of additional loan loss provisions or charge-offs from the date they become known.

Loans are classified as non-accrual when collection of principal or interest is doubtful generally if they are past due as to maturity or payment of principal or interest by 90 days or more unless such loans are well-secured and in the process of collection. Additionally, all loans that are impaired are considered for non-accrual status. Loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospects for future payments in accordance with the loan agreement appear relatively certain.

Loans are reported as restructured when the Bank grants a concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include a reduction in the loan rate, forgiveness of principal or accrued interest, extending the maturity date(s) or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, restructured loans are impaired as the Bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

Loans are reported as past due when installment payments, interest payments, or maturity payments are past due based on contractual terms. All loans determined to be impaired are individually assessed for impairment except for impaired consumer loans which are collectively evaluated for impairment in accordance with ASC 450, *Contingencies*. The specific factors considered in determining that a loan is impaired include borrower financial capacity, current economic, business and market conditions, collection efforts, collateral position and other factors deemed relevant. Generally, impaired loans are placed on non-accrual status and all cash receipts are applied to the principal balance. Continuation of accrual status and recognition of interest income is generally limited to performing restructured loans.

The Company has written down impaired, non-accrual loans as of September 30, 2011 to their estimated net realizable value, generally based on disposition value, and expects resolution with no additional material loss, absent further decline in market prices.

Loans with no related allowance reported generally represent non-accrual loans. The Company recognizes the charge-off of impairment reserves on impaired loans in the period it arises for collateral dependent loans. Therefore, the non-accrual loans as of September 30, 2011 have already been written-down to their estimated net realizable value, based on disposition value, and are expected to be resolved with no additional material loss, absent further decline in market prices. The valuation allowance on impaired loans primarily represents the impairment reserves on performing restructured loans, and is measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value.

The impaired loans for which these interest income amounts were recognized primarily relate to accruing restructured loans.

Non-covered Credit Quality Indicators

As previously noted, the Company's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The Bank differentiates its lending portfolios into homogeneous loans (generally consumer loans) and non-homogeneous loans (generally all non-consumer loans). The 10 risk rating categories can be generally described by the following groupings for non-homogeneous loans:

Minimal Risk A minimal risk loan, risk rated 1, is to a borrower of the highest quality. The borrower has an unquestioned ability to produce consistent profits and service all obligations and can absorb severe market disturbances with little or no difficulty.

Low Risk A low risk loan, risk rated 2, is similar in characteristics to a minimal risk loan. Margins may be smaller or protective elements may be subject to greater fluctuation. The borrower will have a strong demonstrated ability to produce profits, provide ample debt service coverage and to absorb market disturbances.

Modest Risk A modest risk loan, risk rated 3, is a desirable loan with excellent sources of repayment and no currently identifiable risk of collection. The borrower exhibits a very strong capacity to repay the credit in accordance with the repayment agreement. The borrower may be susceptible to economic cycles, but will have reserves to weather these cycles.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Average Risk An average risk loan, risk rated 4, is an attractive loan with sound sources of repayment and no material collection or repayment weakness evident. The borrower has an acceptable capacity to pay in accordance with the agreement. The borrower is susceptible to economic cycles and more efficient competition, but should have modest reserves sufficient to survive all but the most severe downturns or major setbacks.

Acceptable Risk An acceptable risk loan, risk rated 5, is a loan with lower than average, but still acceptable credit risk. These borrowers may have higher leverage, less certain but viable repayment sources, have limited financial reserves and may possess weaknesses that can be adequately mitigated through collateral, structural or credit enhancement. The borrower is susceptible to economic cycles and is less resilient to negative market forces or financial events. Reserves may be insufficient to survive a modest downturn.

Table of Contents

Watch A watch loan, risk rated 6, is still pass-rated, but represents the lowest level of acceptable risk due to an emerging risk element or declining performance trend. Watch ratings are expected to be temporary, with issues resolved or manifested to the extent that a higher or lower rating would be appropriate. The borrower should have a plausible plan, with reasonable certainty of success, to correct the problems in a short period of time. Borrowers rated Watch are characterized by elements of uncertainty, such as:

Borrower may be experiencing declining operating trends, strained cash flows or less-than anticipated performance. Cash flow should still be adequate to cover debt service, and the negative trends should be identified as being of a short-term or temporary nature.

The borrower may have experienced a minor, unexpected covenant violation.

Companies who may be experiencing tight working capital or have a cash cushion deficiency.

Loans may also be a Watch if financial information is late, there is a documentation deficiency, the borrower has experienced unexpected management turnover, or if they face industry issues that, when combined with performance factors create uncertainty in their future ability to perform.

Delinquent payments, increasing and material overdraft activity, request for bulge and/or out-of-formula advances may be an indicator of inadequate working capital and may suggest a lower rating.

Failure of the intended repayment source to materialize as expected, or renewal of a loan (other than cash/marketable security secured or lines of credit) without reduction are possible indicators of a Watch or worse risk rating.

Special Mention A Special Mention loan, risk rated 7, has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or the institutions credit position at some future date. They contain unfavorable characteristics and are generally undesirable. Loans in this category are currently protected but are potentially weak and constitute an undue and unwarranted credit risk, but not to the point of a Substandard classification. A Special Mention loan has potential weaknesses, which if not checked or corrected, weaken the asset or inadequately protect the Bank's position at some future date. Such weaknesses include:

Performance is poor or significantly less than expected. There may be a temporary debt-servicing deficiency or inadequate working capital as evidenced by a cash cushion deficiency, but not to the extent that repayment is compromised. Material violation of financial covenants is common.

Loans with unresolved material issues that significantly cloud the debt service outlook, even though a debt servicing deficiency does not currently exist.

Modest underperformance or deviation from plan for real estate loans where absorption of rental/sales units is necessary to properly service the debt as structured. Depth of support for interest carry provided by owner/guarantors may mitigate and provide for improved rating.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

This rating may be assigned when a loan officer is unable to supervise the credit properly, an inadequate loan agreement, an inability to control collateral, failure to obtain proper documentation, or any other deviation from prudent lending practices.

Unlike a Substandard credit, there should be a reasonable expectation that these temporary issues will be corrected within the normal course of business, rather than liquidation of assets, and in a reasonable period of time.

Substandard A substandard asset, risk rated 8, is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified substandard. Loans are classified as Substandard when they have unsatisfactory characteristics causing unacceptable levels of risk. A substandard loan normally has one or more well-defined weaknesses that could jeopardize repayment of the debt. The likely need to liquidate assets to correct the problem, rather than repayment from successful operations is the key distinction between Special Mention and Substandard. The following are examples of well-defined weaknesses:

Cash flow deficiencies or trends are of a magnitude to jeopardize current and future payments with no immediate relief. A loss is not presently expected, however the outlook is sufficiently uncertain to preclude ruling out the possibility.

Borrower has been unable to adjust to prolonged and unfavorable industry or economic trends.

Material underperformance or deviation from plan for real estate loans where absorption of rental/sales units is necessary to properly service the debt and risk is not mitigated by willingness and capacity of owner/guarantor to support interest payments.

Management character or honesty has become suspect. This includes instances where the borrower has become uncooperative.

Due to unprofitable or unsuccessful business operations, some form of restructuring of the business, including liquidation of assets, has become the primary source of loan repayment. Cash flow has deteriorated, or been diverted, to the point that sale of collateral is now the Bank's primary source of repayment (unless this was the original source of repayment). If the collateral is under the Bank's control and is cash or other liquid, highly marketable securities and properly margined, then a more appropriate rating might be Special Mention or Watch.

Table of Contents

The borrower is bankrupt, or for any other reason, future repayment is dependent on court action.

There is material, uncorrectable faulty documentation or materially suspect financial information.

Doubtful Loans classified as doubtful, risk rated 9, have all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work towards strengthening of the asset, classification as a loss (and immediate charge-off) is deferred until more exact status may be determined. Pending factors include proposed merger, acquisition, liquidation procedures, capital injection, and perfection of liens on additional collateral and refinancing plans. In certain circumstances, a Doubtful rating will be temporary, while the Bank is awaiting an updated collateral valuation. In these cases, once the collateral is valued and appropriate margin applied, the remaining un-collateralized portion will be charged off. The remaining balance, properly margined, may then be upgraded to Substandard, however must remain on non-accrual.

Loss Loans classified as loss, risk rated 10, are considered un-collectible and of such little value that the continuance as an active Bank asset is not warranted. This rating does not mean that the loan has no recovery or salvage value, but rather that the loan should be charged off now, even though partial or full recovery may be possible in the future.

Impaired Loans are classified as impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due, in accordance with the terms of the original loan agreement, without unreasonable delay. This generally includes all loans classified as non-accrual and troubled debt restructurings. Impaired loans are risk rated for internal and regulatory rating purposes, but presented separately for clarification.

Homogeneous loans are not risk rated until they are greater than 30 days past due, and risk rating is based primarily on the past due status of the loan. The risk rating categories can be generally described by the following groupings for commercial, commercial real estate and homogeneous loans:

Special Mention A homogeneous special mention loan, risk rated 7, is 30-59 days past due from the required payment date at month-end.

Substandard A homogeneous substandard loan, risk rated 8, is 60-119 days past due from the required payment date at month-end.

Doubtful A homogeneous doubtful loan, risk rated 9, is 120-149 days past due from the required payment date at month-end.

Loss A homogeneous loss loan, risk rated 10, is 150 days and more past due from the required payment date. These loans are generally charged-off in the month in which the 150- day time period elapses.

The risk rating categories can be generally described by the following groupings for residential and consumer and other homogeneous loans:

Special Mention A homogeneous retail special mention loan, risk rated 7, is 30-89 days past due from the required payment date at month-end.

Substandard A homogeneous retail substandard loan, risk rated 8, is an open-end loan 90-180 days past due from the required payment date at month-end or a closed-end loan 90-120 days past due from the required payment date at month-end.

Loss A homogeneous retail loss loan, risk rated 10, is a closed-end loan that becomes past due 120 cumulative days or an open-end retail loan that becomes past due 180 cumulative days from the contractual due date. These loans are generally charged-off in the month in which the 120- or 180-day period elapses.

Table of Contents

The following table summarizes our internal risk rating by loan class as of September 30, 2011 and December 31, 2010:

(in thousands)

Deferred loan fees, net						(11,031)
Total						\$ 5,658,987

The percentage of impaired loans classified as special mention, substandard, and doubtful was 3.7%, 94.5%, and 1.8%, respectively, as of September 30, 2011.

Troubled Debt Restructurings

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

At September 30, 2011 and December 31, 2010, impaired loans of \$80.6 million and \$84.4 million were classified as accruing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The restructured loans on accrual status represent the only impaired loans accruing interest. In order for a restructured loan to be considered for accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow.

Impaired restructured loans carry a specific allowance calculated and the allowance on impaired restructured loans is calculated consistently across the portfolios.

As a result of adopting the amendments in Accounting Standards Update No. 2011-02, the Company reassessed all restructurings that occurred on or after the beginning of the current fiscal year (January 1, 2011) for identification as troubled debt restructurings. The Company identified as troubled debt restructurings certain receivables for which the allowance for credit losses had previously been measured under a general allowance for credit losses methodology. Upon identifying those receivables as troubled debt restructurings, the Company identified them as impaired under the guidance in Section 310-10-35. The amendments in Accounting Standards Update No. 2011-02 require prospective application of the impairment measurement guidance in Section 310-10-35 for those receivables newly identified as impaired. At the end of the first interim period of adoption (September 30, 2011), the recorded investment in receivables for which the allowance for credit losses was previously measured under a general allowance for credit losses methodology and are now impaired under Section 310-10-35 was \$5.4 million, and there was no allowance for credit losses associated with those receivables, on the basis of a current evaluation of loss. In evaluating concessions made during the year, the Company frequently obtained adequate compensation for concessions made. As a result, few loans qualified as troubled debt restructuring under the new definitions outlined in Section 310-10-35.

Available commitments for troubled debt restructurings outstanding as of September 30, 2011 totaled \$348,000. As of December, 2010, no available commitments were outstanding on troubled debt restructurings.

Table of Contents

The following tables present troubled debt restructurings by accrual versus non-accrual status and by loan class as of September 30, 2011 and 2010:

(in thousands)

	September 30, 2011

Consumer & other	-	-	-
Total	\$ 84,441	\$ 22,986	\$ 107,427

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appear relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

The types of modifications offered can generally be described in the following categories:

Rate Modification A modification in which the interest rate is modified.

Term Modification A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Interest Only Modification A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification A modification in which the payment amount is changed, other than an interest only modification described above.

Combination Modification Any other type of modification, including the use of multiple types of modifications.

Note 6 Covered Assets and FDIC Indemnification Asset**Covered Loans**

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as covered loans and reported separately in our statements of financial condition. Covered loans are reported exclusive of the expected cash flow reimbursements expected from the FDIC.

Acquired loans are valued as of acquisition date in accordance with Financial Accounting Standards Board Accounting Standards Codification (FASB ASC) 805, *Business Combinations*. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under FASB ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*. Because of the significant fair value discounts associated with the acquired portfolios, the concentration of real estate related loans (to finance or secured by real estate collateral) and the decline in real estate values in the regions serviced, and after considering the underwriting standards of the acquired originating bank, the Company elected to account for all acquired loans under ASC 310-30. Under FASB ASC 805 and ASC 310-30, loans are to be recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date. We have aggregated the acquired loans into various loan pools based on multiple layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing.

Acquired loans were first segregated between those designated as performing versus those designated as non-performing. In this application, performing and non-performing loans were defined in accordance with the scoping requirements of ASC 310-30, that is the non-performing loans individually exhibited evidence of deteriorated credit quality since origination for which it is probable that we will not be able to collect all contractually required payments receivable. Our Credit Quality and Credit Review teams identified these non-performing credits on a loan-by-loan basis during the due diligence process. Generally, identified non-performing loans tended to be risk rated substandard or worse on the acquired institution's books. Collectively, the non-performing loans would be considered the classic application of ASC 310-30. The remaining performing notes were accounted for under ASC 310-30 by analogy due to the significant fair value discounts associated with the pools resulting from the underwriting standards of the acquired bank (that often contributed to the bank's failure), the concentration of loans for the purpose of, and collateralized by, real estate, and the general economic condition of the regions each acquired bank serviced. We deem analogizing all loans to ASC 310-30 acceptable as a significant component of the fair value discount applied to each loan pool is attributed to estimated credit losses that are anticipated to occur over the life of each respective loan pool.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Once notes were separated based on their expected future performance, they were further segregated based on specific loan types (purpose/collateral) and then their principal cash flow and interest rate characteristics. The most significant loan type categories utilized (in no particular order) were commercial residential development, commercial construction, farmland, 1st lien single family mortgages, 2nd lien single family loans, single family revolving lines of credit, multifamily mortgages, owner occupied commercial real estate, non-owner occupied commercial real estate, commercial loans, commercial lines of credit, consumer installment loans, and consumer lines of credit. Next, groups of loans were segregated based on repayment characteristics, specifically whether the notes' principal balances were amortizing or interest-only. Lastly, loans were separated by various interest rate characteristics, such as whether the interest rate was fixed or variable. For those loans whose interest rates were variable, they were also segregated by their underlying indices (e.g. PRIME, Federal Home Loan Bank, or constant maturity treasury) and whether or not there were interest rate floors.

Table of Contents

The following table presents the number of pools, number of loans and acquired unpaid principal balance, by performing (Analogized ASC 310-30), non-performing (Classic ASC 310-30) and in total, separately for each institution acquired in 2010.

(dollars in millions)

	Evergreen	Rainier Pacific	Nevada Security
Performing loans ("Analogized ASC 310-30"):			
Number of Pools	15	19	19
Number of Loans	1,263	3,647	402
Acquired Unpaid Principal Balance	\$ 247.9	\$ 516.9	\$ 224.2
Non-performing loans ("Classic ASC 310-30"):			
Number of Pools	8	10	9
Number of Loans	127	39	106
Acquired Unpaid Principal Balance	\$ 120.6	\$ 44.5	\$ 103.4
Total Portfolio			
Number of Pools	23	29	28
Number of Loans	1,390	3,686	508
Acquired Unpaid Principal Balance	\$ 368.5	\$ 561.4	\$ 327.6

The fair value of each loan pool was computed by discounting the expected cash flows at their estimated market discount rate. Cash flows expected to be collected at acquisition date were estimated by applying certain key assumptions to each loan pool, such as credit loss rates, prepayment speeds, and resolution terms related to non-performing loans, against the contractual cash flows of the underlying loans. Credit loss estimates for each pool were determined by considering factors such as, underlying collateral types, collateral locations, estimated collateral values, and credit quality indicators such as risk ratings. Market discount rates were determined using a buildup approach which included assumptions with respect to funding cost and funding mix, a market participant's required rate of return on equity capital, servicing costs and a liquidity premium.

The following table reflects the estimated fair value of the acquired loans at the acquisition dates:

(in thousands)

	Evergreen January 22, 2010	Rainier February 26, 2010	Nevada Security June 18, 2010	Total
Commercial real estate				
Term & multifamily	\$ 141,076	\$ 331,869	\$ 154,119	\$ 627,064
Construction & development	18,832	562	9,481	28,875
Residential development	16,219	10,340	15,641	42,200
Commercial				
Term	27,272	14,850	18,257	60,379
LOC & other	23,965	18,169	11,408	53,542
Residential				
Mortgage	11,886	39,897	1,539	53,322
Home equity loans & lines	8,308	31,029	4,421	43,758
Consumer & other	4,935	11,624	641	17,200
Total	\$ 252,493	\$ 458,340	\$ 215,507	\$ 926,340

In estimating the fair value of the covered loans at the acquisition date, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments and (b) estimated the amount and timing of undiscounted expected principal and interest payments. The difference between these two amounts represents the nonaccretable difference. On the acquisition date, the amount by which the undiscounted expected cash flows exceed the estimated fair value of the acquired loans is the "accretable yield". The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans.

Table of Contents

The following table presents a reconciliation of the undiscounted contractual cash flows, nonaccretable difference, accretable yield, and fair value of covered loans for each respective acquired loan portfolio at the acquisition dates:

(in thousands)

	Evergreen January 22, 2010	Rainier February 26, 2010	Nevada Security June 18, 2010	Total
Undiscounted contractual cash flows	\$ 498,216	\$ 821,972	\$ 396,134	\$ 1,716,322
Undiscounted cash flows not expected to be collected (nonaccretable difference)	(124,131)	(125,774)	(115,021)	(364,926)
Undiscounted cash flows expected to be collected	374,085	696,198	281,113	1,351,396
Accretable yield at acquisition	(121,592)	(237,858)	(65,606)	(425,056)
Estimated fair value of loans acquired at acquisition	\$ 252,493	\$ 458,340	\$ 215,507	\$ 926,340

The covered loan portfolio also includes revolving lines of credit with funded and unfunded commitments. Funds advanced at the time of acquisition are included in the loan pools and are accounted for under ASC 310-30. Any additional advances on these loans subsequent to the acquisition date may or may not be covered depending on the nature of the disbursement and the terms of each respective loss-sharing agreement, and are not accounted for under ASC 310-30.

The covered loans acquired are and will continue to be subject to the Company's internal and external credit review and monitoring. To the extent there is experienced or projected credit deterioration on the acquired loan pools subsequent to amounts estimated at the previous remeasurement date, this deterioration will be measured, and a provision for credit losses will be charged to earnings. Additionally, provision for credit losses will be recorded on advances on covered loans subsequent to acquisition date in a manner consistent with the allowance for non-covered loan and lease losses. These provisions will be mostly offset by an increase to the FDIC indemnification asset, which is recognized in non-interest income.

Covered Loans

The following table presents the major types of covered loans as of September 30, 2011 and December 31, 2010:

(in thousands)

	September 30, 2011			Total
	Evergreen	Rainier	Nevada Security	
Commercial real estate

Allowance for covered loans				(2,721)
Total				\$ 785,898

The outstanding contractual unpaid principal balance, excluding purchase accounting adjustments, at September 30, 2011 was \$233.1 million, \$433.9 million and \$276.4 million, for Evergreen, Rainier, and Nevada Security, respectively, as compared to \$286.6 million, \$481.7 million and \$295.4 million, for Evergreen, Rainier, and Nevada Security, respectively, at December 31, 2010.

In estimating the fair value of the covered loans at the acquisition date, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments and (b) estimated the amount and timing of undiscounted expected principal and interest payments. The difference between these two amounts represents the nonaccretable difference.

On the acquisition date, the amount by which the undiscounted expected cash flows exceed the estimated fair value of the acquired loans is the accretable yield. The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans.

Table of Contents

The following table presents the changes in the accretable yield for the three and nine months ended September 30, 2011 and 2010 for each respective acquired loan portfolio:

(in thousands)

	Three months ended September 30, 2011

Reclassifications to nonaccretable difference	(31,983)	(8,527)	(1,132)	(41,642)
Balance, end of period	\$ 63,639	\$ 200,797	\$ 58,744	\$ 323,180

The significant reclassification to nonaccretable difference presented for the nine months ended September 30, 2010 in the Evergreen and Rainier portfolios represent the refinement and finalization of the initial cash flow estimates that occurred at the end of the first quarter of 2011. The estimated fair value of the loan portfolios and expected credit losses continued to be based on a weighted average pool-level basis. However, the undiscounted contractual cash flows estimate was refined to be based off of the underlying individual loans and resulted in a reduction in the undiscounted contractual cash flows and a corresponding decrease in accretable yield. As these acquisitions occurred in the first

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

quarter of 2010, the Company elected to reflect these changes, beginning in the second quarter of 2010, in the reclassification to nonaccretable difference line item of the accretable yield reconciliation, rather than adjust the acquisition date balance disclosure as the estimated fair values did not change. The updated initial cash flows did not have a material impact on or result in retrospective adjustments to the Company's consolidated financial statements.

Table of Contents**Allowance for Covered Loan and Lease Losses**

The following table summarizes activity related to the allowance for covered loan and lease losses by covered loan portfolio segment for the three and nine months ended September 30, 2011, respectively:

(in thousands)

	Three Months Ended September 30, 2011

Total	\$ 541,844	\$ 66,504	\$ 69,799	\$ 8,406	\$ 686,553
-------	------------	-----------	-----------	----------	------------

- (1) In accordance with ASC 310-30, the valuation allowance is netted against the carrying value of the covered loan and lease balance.
- (2) The allowance on covered loan and lease losses includes an allowance on covered loan advances on acquired loans subsequent to acquisition.

There was a \$667,000 valuation allowance on covered loans and no allowance on covered loan advances on acquired loans subsequent to acquisition at September 30, 2010.

The valuation allowance on covered loans was reduced by recaptured provision of \$901,000 and \$1.3 million, respectively, for the three and nine months ended September 30, 2011. There was no recaptured provision for the three and nine months ended September 30, 2010.

Covered Credit Quality Indicators

Covered loans are risk rated in a manner consistent with non-covered loans. As previously noted, the Company's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating groupings are described fully in Note 5. The below table includes both loans acquired with deteriorated credit quality accounted for under ASC 310-30 and covered loan advances on acquired loans subsequent to acquisition.

Table of Contents

The following table summarizes our internal risk rating grouping by covered loans, net class as of September 30, 2011 and December 31, 2010:

(in thousands)

Covered Other Real Estate Owned

All OREO acquired in FDIC-assisted acquisitions that are subject to a FDIC loss-share agreement are referred to as covered OREO and reported separately in our statements of financial position. Covered OREO is reported exclusive of expected reimbursement cash flows from the FDIC. Foreclosed covered loan collateral is transferred into covered OREO at the collateral's net realizable value, less selling costs.

Covered OREO was initially recorded at its estimated fair value on the acquisition date based on similar market comparable valuations less estimated selling costs. Any subsequent valuation adjustments due to declines in fair value will be charged to non-interest expense, and will be mostly offset by non-interest income representing the corresponding increase to the FDIC indemnification asset for the offsetting loss reimbursement amount. Any recoveries of previous valuation adjustments will be credited to non-interest expense with a corresponding charge to non-interest income for the portion of the recovery that is due to the FDIC.

The following table summarizes the activity related to the covered OREO for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

	Three months ended September 30,		Nine months ended September 30,

Dispositions of covered OREO	(5,044)	(4,806)	(11,501)	(6,119)
Valuation adjustments in the period	(5,326)	(920)	(7,247)	(925)
Balance, end of period	\$ 23,039	\$ 30,348	\$ 23,039	\$ 30,348

FDIC Indemnification Asset

The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset in accordance with FASB ASC 805, *Business Combinations*. The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the present value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted into non-interest income over the life of the FDIC indemnification asset.

Table of Contents

Subsequent to initial recognition, the FDIC indemnification asset is reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered assets. These adjustments are measured on the same basis as the related covered loans and covered other real estate owned. Any increases in cash flow of the covered assets over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the covered assets under those expected will increase the FDIC indemnification asset. Increases and decreases to the FDIC indemnification asset are recorded as adjustments to non-interest income. The resulting carrying value of the indemnification asset represents the amounts recoverable from the FDIC for future expected losses, and the amounts due from the FDIC for claims related to covered losses the Company have incurred less amounts due back to the FDIC relating to shared recoveries.

The following table summarizes the activity related to the FDIC indemnification asset for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

	Three months ended September 30, 2011			
	Evergreen	Rainier	Nevada Security	Total

Table of Contents**Note 7 Mortgage Servicing Rights**

The following table presents the changes in the Company's mortgage servicing rights (MSR) for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Balance, beginning of period	\$16,350	\$12,895	\$14,454	\$12,625
Additions for new mortgage servicing rights capitalized	1,693	1,616	4,100	3,624
Acquired mortgage servicing rights	-	-	-	62
Changes in fair value:				
Due to changes in model inputs or assumptions ⁽¹⁾	(590)	(890)	(564)	(761)
Other ⁽²⁾	(841)	(167)	(1,378)	(2,096)
Balance, end of period	\$16,612	\$13,454	\$16,612	\$13,454

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our serviced loan portfolio as of September 30, 2011 and December 31, 2010 was as follows:

(dollars in thousands)

	September 30, 2011	December 31, 2010
Balance of loans serviced for others	\$ 1,848,220	\$ 1,603,414
MSR as a percentage of serviced loans	0.90%	0.90%

The amount of contractually specified servicing fees, late fees and ancillary fees earned, recorded in mortgage banking revenue on the *Condensed Consolidated Statements of Operations*, was \$1.2 million and \$3.5 million for the three and nine months ended September 30, 2011, as compared to \$1.0 million and \$2.8 million for the three and nine months ended September 30, 2010.

Key assumptions used in measuring the fair value of MSR as of September 30, 2011 and December 31, 2010 were as follows:

	September 30, 2011	December 31, 2010
Constant prepayment rate	18.13%	18.54%
Discount rate	8.60%	8.62%
Weighted average life (years)	4.8	4.5

Note 8 Non-covered Other Real Estate Owned

The following table presents the changes in non-covered other real estate owned (OREO) for the three and nine months ended September 30, 2011 and 2010:

(in thousands)

- (1) Includes purchase accounting adjustments, net of accumulated amortization, for junior subordinated debentures assumed in connection with previous mergers as well as fair value adjustments related to trusts recorded at fair value.
- (2) Contractual interest rate of junior subordinated debentures.
- (3) Effective interest rate based upon the carrying value as of September 2011.
- (4) Rate based on LIBOR plus 3.35%, adjusted quarterly.
- (5) Rate based on LIBOR plus 3.45%, adjusted quarterly.
- (6) Rate based on LIBOR plus 2.85%, adjusted quarterly.
- (7) Rate based on LIBOR plus 1.35%, adjusted quarterly.
- (8) Rate based on LIBOR plus 2.75%, adjusted quarterly.
- (9) Rate based on LIBOR plus 3.60%, adjusted quarterly.
- (10) Rate based on LIBOR plus 2.95%, adjusted quarterly.
- (11) Rate based on LIBOR plus 3.58%, adjusted quarterly.
- (12) Rate based on LIBOR plus 2.90%, adjusted quarterly.

The Trusts are reflected as junior subordinated debentures in the Condensed Consolidated Balance Sheets. The common stock issued by the Trusts is recorded in other assets in the Condensed Consolidated Balance Sheets, and totaled \$6.9 million at September 30, 2011 and December 31, 2010.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

On January 1, 2007, the Company selected the fair value measurement option for certain pre-existing junior subordinated debentures (the Umpqua Statutory Trusts). The remaining junior subordinated debentures as of the adoption date were acquired through business combinations and were measured at fair value at the time of acquisition. In 2007, the Company issued two series of trust preferred securities and elected to measure each instrument at fair value. Accounting for the junior subordinated debentures originally issued by the Company at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost are presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

The significant inputs utilized in the estimation of fair value of these instruments are the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR will result in negative fair value adjustments.

Through the first quarter of 2010 we obtained valuations from a third-party pricing service to assist with the estimation and determination of fair value of these liabilities. In these valuations, the credit risk adjusted interest spread for potential new issuances

Table of Contents

through the primary market and implied spreads of these instruments when traded as assets on the secondary market, were estimated to be significantly higher than the contractual spread of our junior subordinated debentures measured at fair value. The difference between these spreads has resulted in the cumulative gain in fair value, reducing the carrying value of these instruments as reported on our Condensed Consolidated Balance Sheets. In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) was signed into law which, among other things, limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. This law may require many banks to raise new Tier 1 capital and is expected to effectively close the trust-preferred securities markets from offering new issuances in the future. As a result of this legislation, our third-party pricing service noted that they were no longer to be able to provide reliable fair value estimates related to these liabilities given the absence of observable or comparable transactions in the market place in recent history or as anticipated into the future.

Due to inactivity in the junior subordinated debenture market and the inability to obtain observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The Company monitors activity in the trust preferred and related markets, to the extent available, changes related to the current and anticipated future interest rate environment, and considers our entity-specific creditworthiness, to validate the reasonableness of the credit risk adjusted spread and effective yield utilized in our discounted cash flow model. Regarding the activity in and condition of the junior subordinated debt market, we noted no observable changes in the current period as it relates to companies comparable to our size and condition, in either the primary or secondary markets. Relating to the interest rate environment, we noted no significant change to the slope or shape of the forward LIBOR swap curve in the current period that would result in a significant change in the fair value of these liabilities.

The Company's specific credit risk is implicit in the credit risk adjusted spread used to determine the fair value of our junior subordinated debentures. As our Company is not specifically rated by any credit agency, it is difficult to specifically attribute changes in our estimate of the applicable credit risk adjusted spread to specific changes in our own creditworthiness versus changes in the market's required return from similar companies. As a result, these considerations must be largely based off of qualitative considerations as we do not have a credit rating and we do not regularly issue senior or subordinated debt that would provide us an independent measure of the changes in how the market quantifies our perceived default risk.

On a quarterly basis we assess entity-specific qualitative considerations that if not mitigated or represents a material change from the prior reporting period may result in a change to the perceived creditworthiness and ultimately the estimated credit risk adjusted spread utilized to value these liabilities. Entity-specific considerations that positively impact our creditworthiness include: our strong capital position resulting from our successful public stock offerings in 2009 and 2010, that offers us flexibility to pursue business opportunities such as mergers and acquisitions, or expand our footprint and product offerings; having significant levels of on and off-balance sheet liquidity; being profitable (after excluding the one-time goodwill impairment charge recognized in 2009); and, having an experienced management team. However, these positive considerations are mitigated by significant risks and uncertainties that impact our creditworthiness and ability to maintain capital adequacy in the future. Specific risks and concerns include: given our concentration of loans secured by real estate in our loan portfolio, a continued and sustained deterioration of the real estate market may result in declines in the value of the underlying collateral and increased delinquencies that could result in an increased of charge-offs; despite recent improvement, our credit quality metrics remain negatively elevated since 2007 relative to historical standards; the continuation of current economic downturn that has been particularly severe in our primary markets could adversely affect our business; recent increased regulation facing our industry, such as the Emergency Economic Stabilization Act of 2008, the American Recovery and Reinvestment Act of 2009 and the Dodd-Frank Wall Street Reform and Consumer Protection Act, will increase the cost of compliance and restrict our ability to conduct business consistent with historical practices, and could negatively impact profitability; we have a significant amount of goodwill and other intangible assets that dilute our available tangible common equity; and the carrying value of certain material, recently recorded assets on our balance sheet, such as the FDIC loss-sharing indemnification asset, are highly reliant on management estimates, such as the timing or amount of losses that are estimated to be covered, and the assumed continued compliance with the provisions of the loss-share agreement. To the extent assumptions ultimately prove incorrect or should we consciously forego or unknowingly violate the guidelines of the agreement, an impairment of the asset may result which would reduce capital.

Additionally, the Company periodically utilizes an external valuation firm to determine or validate the reasonableness of the assessments of inputs and factors that ultimately determines the estimated fair value of these liabilities. The extent we involve or engage these external third parties correlates to management's assessment of the current subordinated debt market, how the current environment and market compares to the preceding quarter, and perceived changes in the Company's own creditworthiness during the quarter. In periods of potential significant valuation changes and at year-end reporting periods we typically engage third parties to perform a full independent valuation of these liabilities. For periods where management has assessed the market and other factors impacting the underlying valuation assumptions of these liabilities, and has determined significant changes to the valuation of these liabilities in the current period are remote, the scope of the valuation specialist's review is limited to a review the reasonableness of Management's assessment of inputs. Based on the procedures and methodology as described above, the Company has determined that the underlying inputs and assumptions have not materially changed since that last full-scope third-party valuation as of December 31, 2010.

Table of Contents

Absent changes to the significant inputs utilized in the discounted cash flow model used to measure the fair value of these instruments at each reporting period, the cumulative discount for each junior subordinated debenture will reverse over time, ultimately returning the carrying values of these instruments to their notional values at their expected redemption dates, in a manner similar to the effective yield method as if these instruments were accounted for under the amortized cost method. This will result in recognizing losses on junior subordinated debentures carried at fair value on a quarterly basis within non-interest income. For the three and nine months ended September 30, 2011, we recorded a loss of \$554,000 and \$1.6 million and, for the three and nine months ended September 30, 2010, we recorded a loss of \$554,000 and a gain of \$5.5 million, respectively, resulting from the change in fair value of the junior subordinated debentures recorded at fair value. Observable activity in the junior subordinated debenture and related markets in future periods may change the effective rate used to discount these liabilities, and could result in additional fair value adjustments (gains or losses on junior subordinated debentures measured at fair value) outside the expected periodic change in fair value had the fair value assumptions remained unchanged.

As noted above, the Dodd-Frank Act limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. As the Company had less than \$15 billion in assets at December 31, 2009, under the Dodd-Frank Act, the Company will be able to continue to include its existing trust preferred securities, less the common stock of the Trusts, in Tier 1 capital. At September 30, 2011, the Company's restricted core capital elements were 18.2% of total core capital, net of goodwill and any associated deferred tax liability.

Note 10 Commitments and Contingencies

Lease Commitments The Company leases 141 sites under non-cancelable operating leases. The leases contain various provisions for increases in rental rates, based either on changes in the published Consumer Price Index or a predetermined escalation schedule. Substantially all of the leases provide the Company with the option to extend the lease term one or more times following expiration of the initial term.

Rent expense for the three and nine months ended September 30, 2011 was \$4.2 million and \$12.3 million, respectively, compared to \$4.0 million and \$11.3 million respectively, in the comparable periods in 2010. Rent expense was offset by rent income for the three and nine months ended September 30, 2011 of \$286,000 and \$758,000, respectively, compared to \$275,000 and \$750,000, respectively, in the comparable periods in 2010.

Financial Instruments with Off-Balance-Sheet Risk The Company's financial statements do not reflect various commitments and contingent liabilities that arise in the normal course of the Bank's business and involve elements of credit, liquidity, and interest rate risk.

The following table presents a summary of the Bank's commitments and contingent liabilities:

(in thousands)

	As of September 30, 2011
Commitments to extend credit	\$ 1,209,497
Commitments to extend overdrafts	\$ 223,400
Forward sales commitments	\$ 201,370
Commitments to originate loans held for sale	\$ 173,082
Standby letters of credit	\$ 60,530

The Bank is a party to financial instruments with off-balance-sheet credit risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees. Those instruments involve elements of credit and interest-rate risk similar to the risk involved in on-balance sheet items recognized in the *Condensed Consolidated Balance Sheets*. The contract or notional amounts of those instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, and financial guarantees written, is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any covenant or condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash

requirements. While most standby letters of credit are not utilized, a significant portion of such utilization is on an immediate payment basis. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The

Table of Contents

amount of collateral obtained, if it is deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral varies but may include cash, accounts receivable, inventory, premises and equipment and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements, including international trade finance, commercial paper, bond financing and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds cash, marketable securities, or real estate as collateral supporting those commitments for which collateral is deemed necessary. The Bank has not been required to perform on any financial guarantees but did incur losses of \$110,000 in connection with standby letters of credit during the three and nine months ended September 30, 2011. The Bank was not required to perform on any financial guarantees and did not incur any losses in connection with standby letters of credit during the three and nine months ended September 30, 2010. At September 30, 2011, approximately \$32.5 million of standby letters of credit expire within one year, and \$28.0 million expire thereafter. Upon issuance, the Company recognizes a liability equivalent to the amount of fees received from the customer for these standby letter of credit commitments. Fees are recognized ratably over the term of the standby letter of credit. The estimated fair value of guarantees associated with standby letters of credit was \$288,000 as of September 30, 2011.

Mortgage loans sold to investors may be sold with servicing rights retained, for which the Bank makes only standard legal representations and warranties as to meeting certain underwriting and collateral documentation standards. In the past two years, the Bank has had to repurchase fewer than 10 loans due to deficiencies in underwriting or loan documentation and has not realized significant losses related to these repurchases. Management believes that any liabilities that may result from such recourse provisions are not significant.

Legal Proceedings The Bank owns 468,659 shares of Class B common stock of Visa Inc. which are convertible into Class A common stock at a conversion ratio of 0.4881 per Class A share. As of September 30, 2011, the value of the Class A shares was \$85.72 per share. Utilizing the conversion ratio, the value of unredeemed Class A equivalent shares owned by the Company was \$19.6 million as of September 30, 2011, and has not been reflected in the accompanying financial statements. The shares of Visa Class B common stock are restricted and may not be transferred. Visa Member Banks are required to fund an escrow account to cover settlements, resolution of pending litigation and related claims. If the funds in the escrow account are insufficient to settle all the covered litigation, Visa may sell additional Class A shares, use the proceeds to settle litigation, and further reduce the conversion ratio. If funds remain in the escrow account after all litigation is settled, the Class B conversion ratio will be increased to reflect that surplus.

In the ordinary course of business, various claims and lawsuits are brought by and against the Company, the Bank and Umpqua Investments. In the opinion of management, there is no pending or threatened proceeding in which an adverse decision could result in a material adverse change in the Company's consolidated financial condition or results of operations.

Concentrations of Credit Risk The Company grants real estate mortgage, real estate construction, commercial, agricultural and installment loans and leases to customers throughout Oregon, Washington, California, and Nevada. In management's judgment, a concentration exists in real estate-related loans, which represented approximately 80% of the Company's non-covered loan and lease portfolio at September 30, 2011, and 82% at December 31, 2010. Commercial real estate concentrations are managed to assure wide geographic and business diversity. Although management believes such concentrations have no more than the normal risk of collectability, a substantial decline in the economy in general, material increases in interest rates, changes in tax policies, tightening credit or refinancing markets, or a decline in real estate values in the Company's primary market areas in particular, such as was seen with the deterioration in the residential development market since 2007, could have an adverse impact on the repayment of these loans. Personal and business incomes, proceeds from the sale of real property, or proceeds from refinancing, represent the primary sources of repayment for a majority of these loans.

The Bank recognizes the credit risks inherent in dealing with other depository institutions. Accordingly, to prevent excessive exposure to any single correspondent, the Bank has established general standards for selecting correspondent banks as well as internal limits for allowable exposure to any single correspondent. In addition, the Bank has an investment policy that sets forth limitations that apply to all investments with respect to credit rating and concentrations with an issuer.

Note 11 Derivatives

The Company may use derivatives to hedge the risk of changes in the fair values of interest rate lock commitments, residential mortgage loans held for sale, and mortgage servicing rights. None of the Company's derivatives are designated as hedging instruments. Rather, they are accounted for as free-standing derivatives, or economic hedges, with changes in the fair value of the derivatives reported in income. The Company primarily utilizes forward interest rate contracts in its derivative risk management strategy.

Table of Contents

The Bank enters into forward delivery contracts to sell residential mortgage loans or mortgage-backed securities to broker/dealers at specific prices and dates (MBS TBAs) in order to hedge the interest rate risk in its portfolio of mortgage loans held for sale and its residential mortgage loan commitments. Credit risk associated with forward contracts is limited to the replacement cost of those forward contracts in a gain position. There were no counterparty default losses on forward contracts in the three and nine months ended September 30, 2011 and 2010. Market risk with respect to forward contracts arises principally from changes in the value of contractual positions due to changes in interest rates. The Bank limits its exposure to market risk by monitoring differences between commitments to customers and forward contracts with broker/dealers. In the event the Company has forward delivery contract commitments in excess of available mortgage loans, the Company completes the transaction by either paying or receiving a fee to or from the broker/dealer equal to the increase or decrease in the market value of the forward contract. At September 30, 2011, the Bank had commitments to originate mortgage loans held for sale totaling \$173.1 million and forward sales commitments of \$201.4 million.

The Company's mortgage banking derivative instruments do not have specific credit risk-related contingent features. The forward sales commitments do have contingent features that may require transferring collateral to the broker/dealers upon their request. However, this amount would be limited to the net unsecured loss exposure at such point in time and would not materially affect the Company's liquidity or results of operations.

Effective in the second quarter of 2011, the Bank began executing interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting the interest rate swaps that the Bank executes with a third party, such that the Bank minimizes its net risk exposure. As of September 30, 2011, the Bank had 26 interest rate swaps with an aggregate notional amount of \$135.6 million related to this program.

In connection with the interest rate swap program with commercial customers, the Bank has agreements with its derivative counterparties that contain a provision where if the Bank defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Bank could also be declared in default on its derivative obligations.

The Bank also has agreements with its derivative counterparties that contain a provision where if the Bank fails to maintain its status as a well/adequately capitalized institution, then the counterparty could terminate the derivative positions and the Bank would be required to settle its obligations under the agreements. Similarly, the Bank could be required to settle its obligations under certain of its agreements if specific regulatory events occur, such as if the Bank were issued a prompt corrective action directive or a cease and desist order, or if certain regulatory ratios fall below specified levels.

As of September 30, 2011 the termination value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$5.0 million. The Bank has minimum collateral posting thresholds with certain of its derivative counterparties, and has been required to post collateral against its obligations under these agreements of \$4.5 million as of September 30, 2011. If the Bank had breached any of these provisions at September 30, 2011, it could have been required to settle its obligations under the agreements at the termination value.

The following tables summarize the types of derivatives, separately by assets and liabilities, their locations on the *Condensed Consolidated Balance Sheets*, and the fair values of such derivatives as of September 30, 2011 and December 31, 2010:

(in thousands)

Derivatives not designated as hedging instrument	Balance Sheet Location	Asset Derivatives		Liability Derivatives	
		September 30, 2011	December 31, 2010	September 30, 2011	December 31, 2010
Interest rate lock commitments	Other assets/Other liabilities	\$ 2,097	\$ 306	\$ 26	\$ 170
Interest rate forward sales commitments	Other assets/Other liabilities	104	754	1,788	191
Interest rate swaps	Other assets/Other liabilities	4,793	-	4,972	-
Total		\$ 6,994	\$ 1,060	\$ 6,786	\$ 361

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The following table summarizes the types of derivatives, their locations within the *Condensed Consolidated Statements of Operations*, and the gains (losses) recorded during the three and nine months ended September 30, 2011 and 2010:

(in thousands)

Derivatives not designated as hedging instrument	Income Statement Location	Three months ended September 30,		Nine months ended September 30,	
		2011	2010	2011	2010
Interest rate lock commitments	Mortgage banking revenue	\$ 1,844	\$ (8)	\$ 1,936	\$ 1,198
Interest rate forward sales commitments	Mortgage banking revenue	(6,732)	(2,183)	(8,714)	(6,532)
Interest rate swaps	Other income	(264)	-	(178)	-
Total		\$ (5,152)	\$ (2,191)	\$ (6,956)	\$ (5,334)

Table of Contents**Note 12 Shareholders Equity**

On February 3, 2010, the Company raised \$303.6 million through a public offering by issuing 8,625,000 shares of the Company's common stock, including 1,125,000 shares pursuant to the underwriters' over-allotment option, at a share price of \$11.00 per share and 18,975,000 depository shares, including 2,475,000 depository shares pursuant to the underwriter's over-allotment option, also at a price of \$11.00 per share. Fractional interests (1/100th) in each share of the Series B Common Stock Equivalent were represented by the 18,975,000 depository shares; as a result, each depository share would convert into one share of common stock. The net proceeds to the Company after deducting underwriting discounts and commissions and offering expenses were \$288.1 million. The net proceeds from the offering were used to redeem the preferred stock issued to the United States Department of the Treasury (U.S. Treasury) under the Troubled Asset Relief Program (TARP) Capital Purchase Program (CPP), to fund FDIC-assisted acquisition opportunities and for general corporate purposes.

On February 17, 2010, the Company redeemed all of the outstanding Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury under the TARP CPP for an aggregate purchase price of \$214.2 million. As a result of the repurchase of the Series A preferred stock, the Company incurred a one-time deemed dividend of \$9.7 million due to the accelerated amortization of the remaining issuance discount on the preferred stock.

On March 31, 2010, the Company repurchased the common stock warrant issued to the U.S. Treasury pursuant to the TARP CPP, for \$4.5 million. The warrant repurchase, together with the Company's redemption in February 2010 of the entire amount of Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury, represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the U.S. Treasury.

On April 20, 2010, shareholders of the Company approved an amendment to the Company's Restated Articles of Incorporation. The amendment, which became effective on April 21, 2010, increased the number of authorized shares of common stock to 200,000,000

(from 100,000,000). As a result of the effectiveness of the amendment, as of the close of business on April 21, 2010, the Company's

Series B Common Stock Equivalent preferred stock automatically converted into newly issued shares of common stock at a

conversion rate of 100 shares of common stock for each share of Series B Common Stock Equivalent preferred stock. All shares of Series B Common Stock Equivalent preferred stock and representative depository shares ceased to exist upon the conversion. Trading in the depository shares on NASDAQ (ticker symbol UMPQP) ceased and the UMPQP symbol voluntarily delisted effective as of the close of business on April 21, 2010.

Stock-Based Compensation

The compensation cost related to stock options, restricted stock and restricted stock units (included in salaries and employee benefits) was \$942,000 and \$2.9 million for the three and nine months ended September 30, 2011, respectively, as compared to \$1.2 million and \$2.6 million for the three and nine months ended September 30, 2010, respectively. The total income tax benefit recognized related to stock-based compensation was \$377,000 and \$1.2 million for the three and nine months ended September 30, 2011, respectively, as compared to \$481,000 and \$1.1 million for the comparable periods in 2010, respectively.

On June 17, 2011, the Company's Compensation Committee modified restricted stock awards and option grants that were originally issued to fourteen executive officers on January 31, 2011, as follows:

Added performance vesting conditions linking total shareholder return, compared to the return of a regional bank stock total return index;

Awards will cliff vest after three years instead of time vest over a four year period, but only to the extent that the performance conditions are met; and

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The modified grants will vest in whole or in part only if total shareholder return achieves specified targets, subject to prorated vesting upon death, disability, qualifying retirement, termination for good reason or a change of control. As a result of the modification, there was no incremental compensation cost.

Table of Contents

The following table summarizes information about stock option activity for the nine months ended September 30, 2011:

(in thousands, except per share data)

	Options Outstanding	Nine months ended September 30, 2011		
		Weighted-Avg Exercise Price	Weighted-Avg Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance, beginning of period	2,067	\$ 14.82		
Granted	237	\$ 11.01		
Exercised	(40)	\$ 7.67		
Forfeited/expired	(102)	\$ 15.97		
Balance, end of period	2,162	\$ 14.48	5.78	\$ 641
Options exercisable, end of period	1,340	\$ 16.12	4.23	\$ 641

The total intrinsic value (which is the amount by which the stock price exceeded the exercise price on the date of exercise) of options exercised during the three and nine months ended September 30, 2011 was none and \$147,000, respectively. This compared to the total intrinsic value of options exercised during the three and nine months ended September 30, 2010 of \$26,000 and \$408,000, respectively. During the three and nine months ended September 30, 2011, the amount of cash received from the exercise of stock options was none and \$309,000, respectively, as compared to \$59,000 and \$976,000 for the same periods in 2010, respectively.

The fair value of each option grant is estimated as of the grant date using the Black-Scholes option-pricing model. The following weighted average assumptions were used for stock options granted in the nine months ended September 30, 2011 and 2010:

	Nine months ended September 30,	
	2011	2010
Dividend yield	2.79%	2.72%
Expected life (years)	7.1	7.1
Expected volatility	52%	52%
Risk-free rate	2.71%	2.72%
Weighted average fair value of options on date of grant	\$ 4.65	\$ 5.27

The Company grants restricted stock periodically as a part of the 2003 Stock Incentive Plan for the benefit of employees. Restricted shares issued generally vest on an annual basis over five years. A deferred restricted stock award was granted to an executive in the second quarter of 2007. That award is now fully vested. The Company will issue certificates for the vested award within the seventh month following termination of the executive's employment. The following table summarizes information about nonvested restricted share activity for the nine months ended September 30, 2011:

(in thousands, except per share data)

	Nine months ended September 30, 2011	
	Restricted Shares	Weighted Average Grant

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

	Outstanding		Date Fair Value
Balance, beginning of period	401	\$	15.29
Granted	280	\$	11.02
Released	(79)	\$	17.77
Forfeited/expired	(15)	\$	13.04
Balance, end of period	587	\$	12.98

The total fair value of restricted shares vested and released during the three and nine months ended September 30, 2011 was \$120,000 and \$886,000, respectively. This compares to the total fair value of restricted shares vested and released during the three and nine months ended September 30, 2010 of \$9,000 and \$547,000, respectively.

Table of Contents

The Company grants restricted stock units as a part of the 2007 Long Term Incentive Plan for the benefit of certain executive officers. Restricted stock unit grants are subject to performance-based vesting as well as other approved vesting conditions. The total number of restricted stock units granted represents the maximum number of restricted stock units eligible to vest based upon the performance and service conditions set forth in the grant agreements. The following table summarizes information about restricted stock unit activity for the nine months ended September 30, 2011:

(in thousands, except per share data)

Nine months ended September 30, 2011

	Restricted Stock Units Outstanding	Weighted Average Grant Date Fair Value
Balance, beginning of period	225	\$ 11.13
Granted	105	\$ 10.42
Released	(63)	\$ 14.33
Forfeited/expired	(48)	\$ 14.33
Balance, end of period	219	\$ 9.17

No restricted stock units were vested and released during the three months ended September 30, 2011. The total fair value of restricted stock units vested and released during the three and nine months ended September 30, 2011 was none and \$677,000, respectively. This compares to the total fair value of restricted stock units vested and released during the three and nine months ended September 30, 2010 of none and \$213,000, respectively.

As of September 30, 2011, there was \$2.9 million of total unrecognized compensation cost related to nonvested stock options which is expected to be recognized over a weighted-average period of 2.6 years. As of September 30, 2011, there was \$4.1 million of total unrecognized compensation cost related to nonvested restricted stock which is expected to be recognized over a weighted-average period of 2.7 years. As of September 30, 2011, there was \$891,000 of total unrecognized compensation cost related to nonvested restricted stock units which is expected to be recognized over a weighted-average period of 1.3 years, assuming expected performance conditions are met.

For the three and nine months ended September 30, 2011, the Company received income tax benefits of \$48,000 and \$682,000, respectively, related to the exercise of non-qualified employee stock options, disqualifying dispositions on the exercise of incentive stock options, the vesting of restricted shares and the vesting of restricted stock units. For the three and nine months ended September 30, 2010, the Company received income tax benefits of \$11,000 and \$391,000, respectively. In the nine months ended September 30, 2011, the Company had net tax deficiencies (tax deficiency resulting from tax deductions less than the compensation cost recognized) of \$260,000, compared to net tax deficiencies of \$207,000 for the nine months ended September 30, 2010. Only cash flows from gross excess tax benefits are classified as financing cash flows.

Note 13 Income Taxes

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, as well as the Oregon and California state jurisdictions. Except for the California amended returns of an acquired institution for the tax years 2001, 2002, and 2003, and only as it relates to the net interest deduction taken on these amended returns, the Company is no longer subject to U.S. federal tax authority examinations for years before 2008, Oregon state tax authority examinations for years before 2007 and California state tax authority examinations for years before 2004. During 2010, the Internal Revenue Service concluded an examination of the Company's U.S. income tax returns through 2008. The results of these examinations had no significant impact on the Company's financial statements.

Income taxes are accounted for using the asset and liability method. Under this method a deferred tax asset or liability is determined based on the enacted tax rates which will be in effect when the differences between the financial statement carrying amounts and tax basis of existing assets and liabilities are expected to be reported in the Company's income tax returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established to reduce the net carrying amount of deferred tax assets if it is determined to be more likely than not, that all or some portion of the potential deferred tax asset will not be realized.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The Company applies the provisions of FASB ASC 740, *Income Taxes*, relating to the accounting for uncertainty in income taxes. The Company periodically reviews its income tax positions based on tax laws and regulations and financial reporting considerations, and records adjustments as appropriate. This review takes into consideration the status of current taxing authorities' examinations of the Company's tax returns, recent positions taken by the taxing authorities on similar transactions, if any, and the overall tax environment.

The Company recorded a reduction in its liability for unrecognized tax benefits relating to temporary differences settled during audit in 2010. The Company had gross unrecognized tax benefits relating to California tax incentives of \$551,000 recorded as of September 30, 2011. If recognized, the unrecognized tax benefit would reduce the 2011 annual effective tax rate by 0.3%. During the first nine months of 2011, the Company recognized a reduction of expense of \$10,000 in interest relating to its liability for unrecognized tax benefits during the same period. Interest expense/benefit is reported by the Company as a component of tax expense. As of September 30, 2011, the accrued interest related to unrecognized tax benefits is \$161,000.

Table of Contents**Note 14 Earnings Per Common Share**

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of EPS pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Certain of the Company's nonvested restricted stock awards qualify as participating securities.

Net earnings, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. *Basic earnings per common share* is computed by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. For all periods presented, warrants, stock options, certain restricted stock awards and restricted stock units are the only potentially dilutive non-participating instruments issued by the Company. Next, we determine and include in diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

The following is a computation of basic and diluted earnings per common share for the three and nine months ended September 30, 2011 and 2010:

(in thousands, except per share data)

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
NUMERATORS:				
Net income	\$ 21,862	\$ 8,191	\$ 53,114	\$ 20,168
Less:				
Preferred stock dividends	-	-	-	12,192

Non-participating, nonvested restricted shares	105	8	-	10
	1,932	1,601	1,845	2,138

Note 15 Segment Information

The Company operates three primary segments: Community Banking, Mortgage Banking and Wealth Management. The Community Banking segment's principal business focus is the offering of loan and deposit products to business and retail customers in its primary market areas. As of September 30, 2011, the Community Banking segment operated 191 locations throughout Oregon, Northern California, Washington, and Nevada.

The Mortgage Banking segment, which operates as a division of the Bank, originates, sells and services residential mortgage loans.

The Wealth Management segment consists of the operations of Umpqua Investments, which offers a full range of retail brokerage services and products to its clients who consist primarily of individual investors, and Umpqua Private Bank, which serves high net worth individuals with liquid investable assets and provides customized financial solutions and offerings, and Umpqua Financial Advisors. The Company accounts for intercompany fees and services between Umpqua Investments and the Bank at estimated fair value according to regulatory requirements for services provided. Intercompany items relate primarily to management services, referral fees and deposit rebates.

Prior to January 1, 2011, the Company reported Retail Brokerage, consisting of Umpqua Investments, as its own segment. Effective in 2011, the Company began reporting Umpqua Investments, Umpqua Private Bank, and Umpqua Financial Advisors under the Wealth Management segment. Umpqua Private Bank and Umpqua Financial Advisors do not meet the quantitative thresholds for reporting as separate segments and service the same customer base on Umpqua Investments. As a result of the change in reportable segment, prior periods have been adjusted in the financial information below.

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables:

(1) Principally represents U.S. Treasury and agencies or residential mortgage-backed securities issued or guaranteed by governmental agencies.

The following methods were used to estimate the fair value of each class of financial instrument above:

Cash and Cash Equivalents For short-term instruments, including cash and due from banks, and interest bearing deposits with banks, the carrying amount is a reasonable estimate of fair value.

Securities Fair values for investment securities are based on quoted market prices when available or through the use of alternative approaches, such as matrix or model pricing, or broker indicative bids, when market quotes are not readily accessible or available.

Loans Held For Sale For loans held for sale, carrying value approximates fair value.

Non-covered Loans and Leases Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type, including commercial, real estate and consumer loans. Each loan category is further segregated by fixed and variable rate. For variable rate loans, carrying value approximates fair value. Effective in the second quarter of 2010, the fair value of fixed rate loans is calculated by discounting contractual cash flows at rates which similar loans are currently being made. These amounts are discounted further by embedded probable losses expected to be realized in the portfolio.

Covered Loans and Leases Covered loans are initially measured at their estimated fair value on their date of acquisition as described in Note 6. Subsequent to acquisition, the fair value of covered loans is measured using the same methodology as that of non-covered loans.

Restricted Equity Securities The carrying value of restricted equity securities approximates fair value as the shares can only be redeemed by the issuing institution at par.

Mortgage Servicing Rights - The fair value of mortgage servicing rights is estimated using a discounted cash flow model. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income. This model is

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. Management believes the significant inputs utilized are indicative of those that would be used by market participants.

Bank Owned Life Insurance Assets - Fair values of insurance policies owned are based on the insurance contract's cash surrender value.

Table of Contents

FDIC Indemnification Asset The FDIC indemnification asset is calculated as the expected future cash flows under the loss-share agreement discounted by a rate reflective of the creditworthiness of the FDIC as would be required from the market.

Visa Class B Common Stock The fair value of Visa Class B common stock is estimated by applying a 5% discount to the value of the unredeemed Class A equivalent shares. The discount primarily represents the risk related to the further potential reduction of the conversion ratio between Class B and Class A shares and a liquidity risk premium.

Deposits The fair value of deposits with no stated maturity, such as non-interest bearing deposits, savings and interest checking accounts, and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Securities Sold under Agreements to Repurchase and Federal Funds Purchased For short-term instruments, including securities sold under agreements to repurchase and federal funds purchased, the carrying amount is a reasonable estimate of fair value.

Term Debt The fair value of medium term notes is calculated based on the discounted value of the contractual cash flows using current rates at which such borrowings can currently be obtained.

Junior Subordinated Debentures The fair value of junior subordinated debentures is estimated using an income approach valuation technique. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants. Due to credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, we have classified this as a Level 3 fair value measure.

Derivative Instruments The fair value of the derivative instruments is estimated using quoted or published market prices for similar instruments, adjusted for factors such as pull-through rate assumptions based on historical information, where appropriate.

The following table provides a reconciliation of assets and liabilities measured at fair value using significant unobservable inputs (Level 3) on a recurring basis during the three and nine months ended September 30, 2011 and 2010.

(in thousands)

	Beginning Balance	Change included in earnings	Purchases and issuances	Sales and settlements	Ending Balance	Net change in unrealized gains or (losses) relating to items held at end of period

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

2011						
Mortgage servicing rights	\$ 14,454	\$ (1,942)	\$ 4,100	\$ -	\$ 16,612	\$ (1,037)
Junior subordinated debentures	80,688	4,564	-	(2,928)	82,324	4,564
2010						
Mortgage servicing rights	\$ 12,625	\$ (2,857)	\$ 3,686	\$ -	\$ 13,454	\$ (1,697)
Junior subordinated debentures	85,666	(2,550)	-	(2,970)	80,146	(2,550)

Losses on mortgage servicing rights carried at fair value are recorded in mortgage banking revenue within other non-interest income. Gains (losses) on junior subordinated debentures carried at fair value are recorded within other non-interest income. The contractual interest expense on the junior subordinated debentures is recorded on an accrual basis as interest on junior subordinated debentures within interest expense. Settlements related to the junior subordinated debentures represent the payment of accrued interest that is embedded in the fair value of these liabilities.

Table of Contents

Management believes that the credit risk adjusted spread being utilized is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. Management attributes the change in fair value of the junior subordinated debentures during the period to market changes in the nonperformance expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk. The widening of the credit risk adjusted spread above the Company's contractual spreads has primarily contributed to the positive fair value adjustments. Future contractions in the credit risk adjusted spread relative to the spread currently utilized to measure the Company's junior subordinated debentures at fair value as of September 30, 2011, or the passage of time, will result in negative fair value adjustments. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR swap curve will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR swap curve will result in negative fair value adjustments.

Additionally, from time to time, certain assets are measured at fair value on a nonrecurring basis. These adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment. The following table presents information about the Company's assets and liabilities measured at fair value on a nonrecurring basis for which a nonrecurring change in fair value has been recorded during the reporting period. The amounts disclosed below represent the fair values at the time the nonrecurring fair value measurements were made, and not necessarily the fair value as of the dates reported upon.

(in thousands)

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Covered other real estate owned	5,326	920	7,247	925
Total loss from nonrecurring measurements	\$ 22,664	\$ 32,749	\$ 63,370	\$ 99,352

The investment securities held to maturity above relate to non-agency collateralized mortgage obligations where other-than-temporary impairment (OTTI) has been identified and the investments have been adjusted to fair value. The fair value of these investments securities were obtained from third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. While we do not expect to recover the entire amortized cost basis of these securities, as we as we do not intend

Table of Contents

to sell these securities and it is not likely that we will be required to sell these securities before maturity, only the credit loss component of the impairment is recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. The remaining impairment loss related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to a separate component other comprehensive income (OCI). We estimate the cash flows of the underlying collateral within each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then use a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows are then discounted at the interest rate used to recognize interest income on each security.

The non-covered loans and leases amount above represents impaired, collateral dependent loans that have been adjusted to fair value. When we identify a collateral dependent loan as impaired, we measure the impairment using the current fair value of the collateral, less selling costs. Depending on the characteristics of a loan, the fair value of collateral is generally estimated by obtaining external appraisals. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. The loss represents charge-offs or impairments on collateral dependent loans for fair value adjustments based on the fair value of collateral. The carrying value of loans fully charged-off is zero.

The non-covered and covered other real estate owned amount above represents impaired real estate that has been adjusted to fair value. Non-covered other real estate owned represents real estate which the Bank has taken control of in partial or full satisfaction of loans. At the time of foreclosure, other real estate owned is recorded at the lower of the carrying amount of the loan or fair value less costs to sell, which becomes the property's new basis. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan and lease losses. After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned. The loss represents impairments on non-covered other real estate owned for fair value adjustments based on the fair value of the real estate.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Forward-Looking Statements**

This Report contains certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as anticipates, expects, believes, estimates and intends and words or phrases of similar meaning. We make forward-looking statements regarding projected sources of funds, use of proceeds, availability of acquisition and growth opportunities, dividends, adequacy of our allowance for loan and lease losses and provision for loan and lease losses, our commercial real estate portfolio and subsequent chargeoffs. Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Risks and uncertainties include those set forth in our filings with the SEC, and the following factors that might cause actual results to differ materially from those presented:

our ability to attract new deposits and loans and leases;

demand for financial services in our market areas;

competitive market pricing factors;

deterioration in economic conditions that could result in increased loan and lease losses;

risks associated with concentrations in real estate related loans;

market interest rate volatility;

stability of funding sources and continued availability of borrowings;

changes in legal or regulatory requirements or the results of regulatory examinations that could restrict growth;

our ability to recruit and retain key management and staff;

availability of, and competition for, FDIC-assisted and other acquisition opportunities;

risks associated with merger and acquisition integration;

significant decline in the market value of the Company that could result in an impairment of goodwill;

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

our ability to raise capital or incur debt on reasonable terms;

regulatory limits on the Bank's ability to pay dividends to the Company;

the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and related rules and regulations on the Company's business operations and competitiveness, including the impact of executive compensation restrictions, which may affect the Company's ability to retain and recruit executives in competition with firms in other industries who do not operate under those restrictions;

the impact of the Dodd-Frank Act on the Company's interchange fee revenue, interest expense, FDIC deposit insurance assessments and regulatory compliance expenses, which include the following adopted final rules:

Effective October 1, 2011, the maximum permissible interchange fee that an issuer may receive for an electronic debit transaction is the sum of \$0.21 per transaction plus 5 basis points multiplied by the value of the transaction. The rule allows for an upward adjustment of no more than \$0.01 if the issuer develops and implements policies and procedures reasonably designed to achieve fraud-prevention standards. This represents an approximate 50% decrease in interchange revenue on an average transaction.

Effective July 21, 2011, Regulation Q, which prohibited the payment of interest on demand deposit account, was repealed and we anticipate that this will result in increased interest expense.

There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. We do not intend to update these forward-looking statements. Readers should consider any forward-looking statements in light of this explanation, and we caution readers about relying on forward-looking statements.

General

Umpqua Holdings Corporation (referred to in this report as we, our, Umpqua, and the Company), an Oregon corporation, is a financial holding company with two principal operating subsidiaries, Umpqua Bank (the Bank) and Umpqua Investments, Inc. (Umpqua Investments).

Table of Contents

Our headquarters are located in Portland, Oregon, and we engage primarily in the business of commercial and retail banking and the delivery of retail brokerage services. The Bank provides a wide range of banking, mortgage banking and other financial services to corporate, institutional and individual customers. Along with our subsidiaries, we are subject to the regulations of state and federal agencies and undergo periodic examinations by these regulatory agencies.

We are considered one of the most innovative community banks in the United States, with a strategy that combines a retail product delivery approach with an emphasis on quality-assured personal service. The Bank has evolved from a traditional community bank into a community-oriented financial services retailer by implementing a differentiated delivery of bank products and services, building a culture focused on service and competing on the customer experience, not on price. We believe all of these factors have contributed to our ability to increase revenue and have allowed Umpqua to differentiate itself from the competition.

Umpqua Investments is a registered broker-dealer and investment advisor with offices in Portland, Lake Oswego, and Medford, Oregon, Santa Rosa, California, and in many Umpqua Bank stores. The firm is one of the oldest investment companies in the Northwest and is active in many community events. Umpqua Investments offers a full range of investment products and services including: stocks, fixed income securities (municipal, corporate, and government bonds, CDs, and money market instruments), mutual funds, annuities, options, retirement planning, money management services, and life insurance.

Executive Overview

Significant items for the third quarter of 2011 were as follows:

Net earnings available to common shareholders per diluted common share were \$0.19 and \$0.46 for the three and nine months ended September 30, 2011, as compared to net earnings available to common shareholders per diluted common share of \$0.07 for the three and nine months ended September 30, 2010. Operating earnings per diluted common share, defined as earnings available to common shareholders before net gains or losses on junior subordinated debentures carried at fair value, net of tax, bargain purchase gains, net of tax, and merger related expenses, net of tax, divided by the same diluted share total used in determining diluted earnings per common share, were \$0.19 and \$0.47 for the three and nine months ended September 30, 2011, as compared to operating earnings per diluted common share of \$0.08 and \$0.04 for the three and nine months ended September 30, 2010. Operating earnings per diluted share is considered a non-GAAP financial measure. More information regarding this measurement and reconciliation to the comparable GAAP measurement is provided under the heading *Results of Operations-Overview* below.

Net interest margin, on a tax equivalent basis, was 4.12% and 4.21% for the three and nine months ended September 30, 2011, compared to 4.42% and 4.18% for the same periods a year ago. The decrease in net interest margin for the current quarter compared to the same quarter prior year resulted from a decrease in covered loans and an increase in interest bearing deposits, partially offset by a decrease in interest bearing cash, the increase in investment securities, increased non-covered loans outstanding and declining cost of interest bearing deposits.

The provision for non-covered loan and lease losses was \$9.1 million and \$39.6 million for the three and nine months ended September 30, 2011, as compared to the \$24.2 million and \$96.1 million recognized for the three and nine months ended September 30, 2010. The decrease resulted from a decrease in net charge-offs and overall decline in non-performing loans.

Mortgage banking revenue was \$7.1 million and \$17.2 for the three and nine months ended September 30, 2011, compared to \$7.1 million and \$13.8 million for the three and nine months ended September 30, 2010. Closed mortgage volume increased 25% in the current year-to-date over the prior year same period due to an increase in purchase and refinancing activity related to historically low interest rates.

Total gross non-covered loans and leases were \$5.8 billion as of September 30, 2011, an increase of \$169.1 million as compared to December 31, 2010. This increase is principally attributable to loan production, primarily related to the commercial and industrial segment of the portfolio, offset by charge-offs and transfers to other real estate owned during the period.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Total deposits were \$9.4 billion as of September 30, 2011, a decrease of \$29.4 million, as compared to December 31, 2010. Despite the decline in total deposits, non-interest bearing deposits increased \$324.2 million, or 20%, as compared to December 31, 2010.

Total consolidated assets were \$11.8 billion as of September 30, 2011, representing an increase of \$104.2 million from December 31, 2010. The increase is attributable to the increase in non-covered loans and leases and an increase in investment securities.

Table of Contents

Non-covered, non-performing assets decreased to \$146.4 million, or 1.24% of total assets, as of September 30, 2011, as compared to \$178.0 million, or 1.53% of total assets, as of December 31, 2010. Non-covered, non-performing loans decreased to \$111.6 million, or 1.91% of total non-covered loans, as of September 30, 2011, as compared to \$145.2 million, or 2.57% of total non-covered loans as of December 31, 2010. Non-accrual loans have been written-down to their estimated net realizable values.

Net charge-offs on non-covered loans were \$14.0 million for the three months ended September 30, 2011, or 0.96% of average non-covered loans and leases (annualized), as compared to net charge-offs of \$30.0 million, or 2.08% of average non-covered loans and leases (annualized), for the three months ended September 30, 2010. Net charge-offs on non-covered loans were \$48.6 million for the nine months ended September 30, 2011, or 1.14% of average non-covered loans and leases (annualized), as compared to net charge-offs of \$95.7 million, or 2.2% of average non-covered loans and leases (annualized), for the nine months ended September 30, 2010.

Total risk based capital decreased to 17.50% as of September 30, 2011, compared to 17.62% as of December 31, 2010, due to the increase in risk-weighted assets during the quarter.

Cash dividends declared in the third quarter of 2011 were \$0.07 per common share, an increase of 40% compared to the previous quarter.

Summary of Critical Accounting Policies

Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements for the year ended December 31, 2010 included in the Form 10-K filed with the Securities and Exchange Commission (SEC) on February 17, 2011. Not all of these critical accounting policies require management to make difficult, subjective or complex judgments or estimates. Management believes that the following policies would be considered critical under the SEC's definition.

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The Bank performs regular credit reviews of the loan and lease portfolio to determine the credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically during the term of the loan through the credit review process. Consumer and residential loan portfolios are reviewed monthly for their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. In contrast, the monitoring process for the commercial and commercial real estate portfolios includes periodic reviews of individual loans with risk ratings assigned to each loan and performance judged on a loan by loan basis. The Company's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the allowance for loan and lease losses. The Bank has a management ALLL Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Each risk rating is assessed an inherent credit loss factor that determines the amount of the allowance for loan and lease losses provided for that group of loans and leases with similar risk rating. Credit loss factors may vary by region based on management's belief that there may ultimately be different credit loss rates experienced in each region.

Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral for collateral dependent loans. A loan is considered collateral dependent if repayment of the loan is expected to be provided solely by the underlying collateral and there are no other available and reliable sources of repayment. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific component to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. The combination of the risk rating-based allowance component and the impairment

reserve allowance component lead to an allocated allowance for loan and lease losses.

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 10% of the allowance, but may be maintained at higher levels during times of economic conditions characterized by falling real estate values. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends.

Table of Contents

The reserve for unfunded commitments (RUC) is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all significant problem loans; historical charge-off and recovery experience; and other pertinent information.

Management believes that the ALLL was adequate as of September 30, 2011. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 80% of our loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses.

Covered Loans and FDIC Indemnification Asset

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as covered loans and reported separately in our statements of financial condition. Acquired loans were aggregated into pools based on individually evaluated common risk characteristics and aggregate expected cash flows were estimated for each pool. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The cash flows expected to be received over the life of the pool were estimated by management with the assistance of a third party valuation specialist. These cash flows were input into a ASC 310-30 compliant accounting loan system which calculates the carrying values of the pools and underlying loans, book yields, effective interest income and impairment, if any, based on actual and projected events. Default rates, loss severity, and prepayment speeds assumptions are periodically reassessed and updated within the accounting model to update our expectation of future cash flows. The excess of the cash flows expected to be collected over a pool's carrying value is considered to be the accretable yield and is recognized as interest income over the estimated life of the loan or pool using the effective yield method. The accretable yield may change due to changes in the timing and amounts of expected cash flows. Changes in the accretable yield are disclosed quarterly.

The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset in accordance with FASB ASC 805, *Business Combinations*. The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the carrying value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted or amortized into non-interest income over the life of the FDIC indemnification asset, which is maintained at the loan pool level.

Mortgage Servicing Rights (MSR)

The Company determines its classes of servicing assets based on the asset type being serviced along with the methods used to manage the risk inherent in the servicing assets, which includes the market inputs used to value the servicing assets. The Company measures its residential mortgage servicing assets at fair value and reports changes in fair value through earnings. Fair value adjustments encompass market-driven valuation changes and the runoff in value that occurs from the passage of time, which are separately reported. Under the fair value method, the MSR is carried in the balance sheet at fair value and the changes in fair value are reported in earnings under the caption mortgage banking revenue in the period in which the change occurs.

Retained mortgage servicing rights are measured at fair value as of the date of sale. We use quoted market prices when available. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSR, the present value of expected future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available.

The expected life of the loan can vary from management's estimates due to prepayments by borrowers, especially when rates fall. Prepayments in excess of management's estimates would negatively impact the recorded value of the mortgage servicing rights. The value of the mortgage servicing rights is also dependent upon the discount rate used in the model, which we base on current market rates. Management reviews this rate on an ongoing basis based on current market rates. A significant increase in the discount rate would reduce the value of mortgage servicing rights. Additional information is included in Note 7 of the *Notes to Consolidated Financial Statements*.

Table of Contents

Valuation of Goodwill and Intangible Assets

At September 30, 2011, we had \$678.4 million in goodwill and other intangible assets as a result of business combinations. Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management performs an impairment analysis for the intangible assets with indefinite lives on an annual basis as of December 31. Additionally, goodwill and other intangible assets with indefinite lives are evaluated on an interim basis when events or circumstance indicate impairment potentially exists. The impairment analysis requires management to make subjective judgments. Events and factors that may significantly affect the estimates include, among others, competitive forces, customer behaviors and attrition, changes in revenue growth trends, cost structures, technology, changes in discount rates and specific industry and market conditions. There can be no assurance that changes in circumstances, estimates or assumption may result in additional impairment of all, or some portion of, goodwill.

Stock-based Compensation

In accordance with FASB ASC 718, *Stock Compensation*, we recognize expense in the income statement for the grant-date fair value of stock options and other equity-based forms of compensation issued to employees over the employees' requisite service period (generally the vesting period). The requisite service period may be subject to performance conditions. The fair value of each option grant is estimated as of the grant date using the Black-Scholes option-pricing model. Management assumptions utilized at the time of grant impact the fair value of the option calculated under the Black-Scholes methodology, and ultimately, the expense that will be recognized over the life of the option. Additional information is included in Note 12 of the *Notes to Consolidated Financial Statements*.

Fair Value

FASB ASC 820, *Fair Value Measurements and Disclosures*, establishes a hierarchical disclosure framework associated with the level of pricing observability utilized in measuring financial instruments at fair value. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have little or no pricing observability and a higher degree of judgment utilized in measuring fair value. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and the characteristics specific to the transaction. See Note 16 of the *Notes to Consolidated Financial Statements* for additional information about the level of pricing transparency associated with financial instruments carried at fair value.

Recent Accounting Pronouncements

In December 2010, the FASB issued ASU No. 2010-29, *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations*. This update clarifies that if comparative financial statements are presented in disclosure of supplementary pro forma information for a business combination, revenue and earnings of the combined entity should be disclosed as though the business combination occurred as of the beginning of the comparable prior annual reporting period only. Additionally, supplemental pro forma disclosures should include a description of the nature and amount of material, nonrecurring pro forma adjustments included in the reported pro forma revenue and earnings. This update is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In December 2010, the FASB issued ASU No. 2010-28, *Intangibles - Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts*. The amendments in this update modify step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance, which requires that goodwill of a reporting unit be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. For public entities, the amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Early adoption is not permitted. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In April 2011, the FASB issued ASU No. 2011-02, *A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring*. The Update provides additional guidance relating to when creditors should classify loan modifications as troubled debt restructurings. The ASU

also ends the deferral issued in January 2010 of the disclosures about troubled debt restructurings required by

Table of Contents

ASU No. 2010-20. The provisions of ASU No. 2011-02 and the disclosure requirements of ASU No. 2010-20 are effective for the Company's interim reporting period ending September 30, 2011. The guidance applies retrospectively to restructurings occurring on or after January 1, 2011. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In April 2011, the FASB issued ASU No. 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*. The Update amends existing guidance to remove from the assessment of effective control, the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee and, as well, the collateral maintenance implementation guidance related to that criterion. ASU No. 2011-02 is effective for the Company's reporting period beginning on or after December 15, 2011. The guidance applies prospectively to transactions or modification of existing transactions that occur on or after the effective date and early adoption is not permitted. The adoption of this ASU will not have a material impact on the Company's consolidated financial statements.

In April 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The Update amends existing guidance regarding the highest and best use and valuation premise by clarifying these concepts are only applicable to measuring the fair value of nonfinancial assets. The Update also clarifies that the fair value measurement of financial assets and financial liabilities which have offsetting market risks or counterparty credit risks that are managed on a portfolio basis, when several criteria are met, can be measured at the net risk position. Additional disclosures about Level 3 fair value measurements are required including a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, a description of the valuation process in place, and discussion of the sensitivity of fair value changes in unobservable inputs and interrelationships about those inputs as well disclosure of the level of the fair value of items that are not measured at fair value in the financial statements but disclosure of fair value is required. The provisions of ASU No. 2011-04 are effective for the Company's reporting period beginning after December 15, 2011 and should be applied prospectively. The Company is currently evaluating the impact of this ASU and does not expect it to have a material impact on the Company's consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income*. The Update amends current guidance to allow a company the option of presenting the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The provisions do not change the items that must be reported in other comprehensive income or when an item of other comprehensive must be reclassified to net income. The amendments do not change the option for a company to present components of other comprehensive income either net of related tax effects or before related tax effects, with one amount shown for the aggregate income tax expense (benefit) related to the total of other comprehensive income items. The amendments do not affect how earnings per share is calculated or presented. The provisions of ASU No. 2011-05 are effective for the Company's reporting period beginning after December 15, 2011 and should be applied retrospectively. Early adoption is permitted and there are no required transition disclosures. The adoption of this ASU will not have a material impact on the Company's consolidated financial statements.

In September 2011, the FASB issued ASU No. 2011-08, *Testing Goodwill for Impairment*. With the Update, a company testing goodwill for impairment now has the option of performing a qualitative assessment before calculating the fair value of the reporting unit (the first step of goodwill impairment test). If, on the basis of qualitative factors, the fair value of the reporting unit is more likely than not greater than the carrying amount, a quantitative calculation would not be needed. Additionally, new examples of events and circumstances that an entity should consider in performing its qualitative assessment about whether to proceed to the first step of the goodwill impairment have been made to the guidance and replace the previous guidance for triggering events for interim impairment assessment. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this ASU will not have a material impact on the Company's consolidated financial statements.

RESULTS OF OPERATIONS**OVERVIEW**

For the three months ended September 30, 2011, net earnings available to common shareholders were \$21.8 million, or \$0.19 per diluted common share, as compared to net earnings available to common shareholders of \$8.2 million, or \$0.07 per diluted common share, for the three months ended September 30, 2010. For the nine months ended September 30, 2011, net earnings available to common shareholders was \$52.9 million, or \$0.46 per diluted common share, as compared to net earnings available to common shareholders of \$7.9 million, or \$0.07 per diluted common share, for the nine months ended September 30, 2010.

The increase in net earnings for the three months ended September 30, 2011 compared to the same period of the prior year is principally attributable to decreased provision for non-covered loan losses, and increased non-interest income, partially offset by decreased net interest income, increased provision for covered loan losses and increased non-interest expense. The increase in net income for the nine months ended

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

September 30, 2011 compared to the same period of the prior year is principally attributable to increased net interest income, decreased provision for non-covered loan losses and increased non-interest income, partially offset by

Table of Contents

increased provision for covered loan losses and increased non-interest expense. Non-interest income includes a bargain purchase gain on acquisition in the nine months ended September 30, 2010 of \$6.4 million relating to the acquisition of Evergreen. We assumed certain assets and liabilities of Evergreen, Rainier, and Nevada Security on January 22, 2010, February 26, 2010, and June 18, 2010, respectively, and the results of the acquired operations are included in our financial results starting on January 23, 2010, February 27, 2010, and June 19, 2010, respectively.

Umpqua recognizes gains or losses on our junior subordinated debentures carried at fair value resulting from the estimated market credit risk adjusted spread and changes in interest rates that do not directly correlate with the Company's operating performance. Also, Umpqua incurs significant expenses related to the completion and integration of mergers and acquisitions. Additionally, we may recognize goodwill impairment losses that have no direct effect on the Company's or the Bank's cash balances, liquidity, or regulatory capital ratios. Lastly, Umpqua may recognize one-time bargain purchase gains on certain FDIC-assisted acquisitions that are not reflective of Umpqua's on-going earnings power. Accordingly, management believes that our operating results are best measured on a comparative basis excluding the impact of gains or losses on junior subordinated debentures measured at fair value, net of tax, merger-related expenses, net of tax, and other charges related to business combinations such as goodwill impairment charges or bargain purchase gains, net of tax. We define *operating earnings* as earnings available to common shareholders before gains or losses on junior subordinated debentures carried at fair value, net of tax, bargain purchase gains on acquisitions, net of tax, merger related expenses, net of tax, and goodwill impairment, and we calculate operating earnings per diluted share by dividing operating earnings by the same diluted share total used in determining diluted earnings per common share.

The following table provides the reconciliation of earnings available to common shareholders (GAAP) to operating earnings (non-GAAP), and earnings per diluted common share (GAAP) to operating earnings per diluted share (non-GAAP) for the three and nine months ended September 30, 2011 and 2010:

Reconciliation of Net Earnings Available to Common Shareholders to Operating Earnings

(in thousands, except per share data)

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Net earnings available to common shareholders	\$ 21,757	\$ 8,173	\$ 52,861	\$ 7,927
Adjustments:				
Net loss (gain) on junior subordinated debentures carried at fair value, net of tax	332	332	986	(3,320)
Bargain purchase gain on acquisitions, net of tax	-	-	-	(3,862)
Merger-related expenses, net of tax	31	986	182	3,431
Operating earnings	\$ 22,120	\$ 9,491	\$ 54,029	\$ 4,176
Per diluted share:				
Net earnings available to common shareholders	\$ 0.19	\$ 0.07	\$ 0.46	\$ 0.07
Adjustments:				
Net loss (gain) on junior subordinated debentures carried at fair value, net of tax	-	-	0.01	(0.03)
Bargain purchase gain on acquisitions, net of tax	-	-	-	(0.04)
Merger-related expenses, net of tax	-	0.01	-	0.04
Operating earnings	\$ 0.19	\$ 0.08	\$ 0.47	\$ 0.04

Table of Contents

The following table presents the returns on average assets, average common shareholders' equity and average tangible common shareholders' equity for the three and nine months ended September 30, 2011 and 2010. For each of the periods presented, the table includes the calculated ratios based on reported net earnings available to common shareholders and operating income as shown in the table above. Our return on average common shareholders' equity is negatively impacted as the result of capital required to support goodwill. To the extent this performance metric is used to compare our performance with other financial institutions that do not have merger-related intangible assets, we believe it beneficial to also consider the return on average tangible common shareholders' equity. The return on average tangible common shareholders' equity is calculated by dividing net earnings available to common shareholders by average shareholders' common equity less average goodwill and intangible assets, net (excluding MSR's). The return on average tangible common shareholders' equity is considered a non-GAAP financial measure and should be viewed in conjunction with the return on average common shareholders' equity.

Return on Average Assets, Common Shareholders' Equity and Tangible Common Shareholders' Equity

(dollars in thousands)

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Returns on average assets:				
Net earnings available to common shareholders	0.74%	0.29%	0.61%	0.10%
Operating earnings	0.75%	0.34%	0.62%	0.05%
Returns on average common shareholders' equity:				
Net earnings available to common shareholders	5.11%	1.95%	4.23%	0.68%
Operating earnings	5.20%	2.27%	4.33%	0.36%
Returns on average tangible common shareholders' equity:				
Net earnings available to common shareholders	8.55%	3.32%	7.14%	1.19%
Operating earnings	8.70%	3.86%	7.30%	0.62%
Calculation of average common tangible shareholders' equity:				
Average common shareholders' equity	\$ 1,688,082	\$ 1,660,490	\$ 1,669,373	\$ 1,565,884
Less: average goodwill and other intangible assets, net	(678,967)	(684,488)	(680,212)	(672,114)
Average tangible common shareholders' equity	\$ 1,009,115	\$ 976,002	\$ 989,161	\$ 893,770

Additionally, management believes tangible common equity and the tangible common equity ratio are meaningful measures of capital adequacy. Umpqua believes the exclusion of certain intangible assets in the computation of tangible common equity and tangible common equity ratio provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results and capital of the Company. Tangible common equity is calculated as total shareholders' equity less preferred stock and less goodwill and other intangible assets, net (excluding MSR's). In addition, tangible assets are total assets less goodwill and other intangible assets, net (excluding MSR's). The tangible common equity ratio is calculated as tangible common shareholders' equity divided by tangible assets. The tangible common equity and tangible common equity ratio is considered a non-GAAP financial measure and should be viewed in conjunction with the total shareholders' equity and the total shareholders' equity ratio.

The following table provides a reconciliation of ending shareholders' equity (GAAP) to ending tangible common equity (non-GAAP), and ending assets (GAAP) to ending tangible assets (non-GAAP) as of September 30, 2011 and December 31, 2010:

Reconciliations of Total Shareholders' Equity to Tangible Common Shareholders' Equity and Total Assets to Tangible Assets

(dollars in thousands)

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

	September 30, 2011	December 31, 2010
Total shareholders' equity	\$ 1,695,120	\$ 1,642,574
Subtract:		
Goodwill and other intangible assets, net	678,448	681,969
Tangible common shareholders' equity	\$ 1,016,672	\$ 960,605
Total assets	\$ 11,772,883	\$ 11,668,710
Subtract:		
Goodwill and other intangible assets, net	678,448	681,969
Tangible assets	\$ 11,094,435	\$ 10,986,741
Tangible common equity ratio	9.16%	8.74%

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although we believe these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

NET INTEREST INCOME

Net interest income is the largest source of our operating income. Net interest income for the three months ended September 30, 2011 was \$107.5 million, a decrease of \$783,000 or 1% compared to the same period in 2010. The results for the three months ended

Table of Contents

September 30, 2011 as compared to the same period in 2010 are attributable to a decrease in yields on non-covered and covered loan portfolios, a decline in average covered loan balances and a decline in investment yields, partially offset by increases in average investment balances and average non-covered loan balances and a decline in the cost of deposits.

Net interest income for the nine months ended September 30, 2011 was \$321.8 million, an increase of \$34.1 million or 12% compared to the same period in 2010. The results for the nine months ended September 30, 2011 as compared to the same period in 2010 are attributable to increased average covered loan and average investment balances, increased covered loan yields, decreased cost of deposits, and investing excess interest earning cash into the investment portfolio, partially offset by lower average non-covered loan balances, lower non-covered loan yields, lower investment yields, and increased average interest bearing deposit balances.

The net interest margin (net interest income as a percentage of average interest-earning assets) on a fully tax equivalent basis was 4.12% for the three months ended September 30, 2011, a decrease of 30 basis points as compared to the same period in 2010. The decrease in net interest margin for the three months ended September 30, 2011 as compared to the same period in the prior year primarily resulted from a decrease in yields on non-covered and covered loan portfolios, a decline in average covered loan balances and a decline in investment yields, partially offset by increases in average investment and average non-covered loan balances, a decline in the cost of deposits, and investing excess interest earning cash into the investment portfolio.

The net interest margin on a fully tax-equivalent basis was 4.21% for the nine months ended September 30, 2011, an increase of 3 basis points as compared to the same period in 2010. The increase in net interest margin for the nine months ended September 30, 2011 as compared to the same periods in the prior year primarily resulted from increased average covered loan and average investment balances, increased covered loan yields (as a result of payoffs ahead of expectations), decreased cost of deposits, and investing excess interest earning cash into the investment portfolio, partially offset by lower average non-covered loan balances, lower non-covered loan yields, lower investment yields, and increased average interest bearing deposit balances.

Loan disposal related activities within the covered loan portfolio, either through loans being paid off in full or transferred to other real estate owned (OREO), result in gains within covered loan interest income to the extent assets received in satisfaction of debt (such as cash or the net realizable value of OREO received) exceeds the allocated carrying value of the loan disposed of from the pool. Loan disposal activities contributed \$4.8 million and \$19.7 million of interest income for the three and nine months ended September 30, 2011, compared to \$13.7 million of loan disposal gains recognized during the three and nine months ended September 30, 2010. While dispositions of covered loans positively impact net interest margin, we recognize a corresponding decrease to the change in FDIC indemnification asset at the incremental loss-sharing rate within other non-interest income.

Also, net interest income for the three and nine months ended September 30, 2011 was negatively impacted by the \$149,000 and \$1.9 million reversal of interest and fee income on non-covered, non-accrual loans, as compared to the \$569,000 and \$2.3 million reversal of interest and fee income during the three and nine months ended September 30, 2010. Excluding the impact of covered loan disposal gains and interest and fee income reversals on non-covered, non-accrual loans, tax equivalent net interest margin would have been 3.94% and 3.98% for the three and nine months ended September 30, 2011 and 3.89% and 4.02% for the three and nine months ended September 30, 2010.

Also contributing to the change in net interest margin for the three and nine months ended September 30, 2011, as compared to the same period of the prior year, is the continued efforts of management to reduce the cost of interest-bearing liabilities, specifically interest-bearing deposits. The total cost of interest-bearing deposits for the three and nine months ended September 30, 2011 was 0.77% and 0.79%, representing a 31 and 33 basis point decrease since the three and nine months ended September 30, 2010.

Our net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, as well as changes in the yields earned on interest-earning assets and rates paid on deposits and borrowed funds. The following table presents condensed average balance sheet information, together with interest income and yields on average interest-earning assets, and interest expense and rates paid on average interest-bearing liabilities for the three and nine months ended September 30, 2011 and 2010:

Table of Contents**PROVISION FOR LOAN AND LEASE LOSSES**

The provision for non-covered loan and lease losses was \$9.1 million and \$39.6 million for the three and nine months ended September 30, 2011, as compared to \$24.2 million and \$96.1 million for the same periods in 2010. As an annualized percentage of average outstanding non-covered loans, the provision for non-covered loan losses recorded for the three and nine months ended September 30, 2011 was 0.62% and 0.92% as compared to 1.67% and 2.20% in the same periods in 2010.

The decrease in the provision for loan and lease losses in the three and nine months ended September 30, 2011 as compared to the same period in 2010 is principally attributable to the declining levels of non-performing loans and the decrease in net charge-offs during the period.

The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral dependent loans. Therefore, the non-covered, non-accrual loans of \$99.9 million as of September 30, 2011 have already been written-down to their estimated fair value, less estimated costs to sell, and are expected to be resolved with no additional material loss, absent further decline in market prices. Depending on the characteristics of a loan, the fair value of collateral is estimated by obtaining external appraisals.

The provision for non-covered loan and lease losses is based on management's evaluation of inherent risks in the loan portfolio and a corresponding analysis of the allowance for non-covered loan and lease losses. Additional discussion on loan quality and the allowance for non-covered loan and lease losses is provided under the heading *Asset Quality and Non-Performing Assets* below.

The provision for covered loan and lease losses was \$4.4 million and \$15.4 million for the three and nine months ended September 30, 2011, as compared to \$667,000 for the same periods in 2010. Provisions for covered loan and leases losses are recognized subsequent to acquisition to the extent it is probable we will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimate after acquisition, considering both the timing and amount of those expected cash flows. Provisions may be required when determined losses of unpaid principal incurred exceed previous loss expectations to-date, or future cash flows previously expected to be collectible are no longer probable of collection. Provisions for covered loan and lease losses, including amounts advanced subsequent to acquisition, are not reflected in the allowance for non-covered loan and lease losses, rather as a valuation allowance netted against the carrying value of the covered loan and lease balance accounted for under ASC 310-30, in accordance with the guidance.

NON-INTEREST INCOME

Non-interest income for the three months ended September 30, 2011 was \$24.8 million, an increase of \$12.6 million, or 104%, as compared to the same period in 2010. Non-interest income for the nine months ended September 30, 2011 was \$66.0 million, an increase of \$5.2 million, or 9%, as compared to the same period in 2010. The following table presents the key components of non-interest income for the three and nine months ended September 30, 2011 and 2010:

Non-Interest Income

(in thousands)

	Three months ended September 30,				Nine months ended September 30,			
	2011	2010	Change Amount	Change Percent	2011	2010	Change Amount	Change Percent
Service charges on deposit accounts	\$ 8,849	\$ 8,756	\$ 93	1%	\$ 25,210	\$ 26,706	\$ (1,496)	-6%
Brokerage commissions and fees	3,115	2,609	506	19%	9,768	8,387	1,381	16%
Mortgage banking revenue, net	7,084	7,138	(54)	-1%	17,166	13,825	3,341	24%
Gain on investment securities, net	1,813	2,287	(474)	-21%	7,419	1,999	5,420	271%
(Loss) gain on junior subordinated debentures carried at fair value	(554)	(554)	-	0%	(1,643)	5,534	(7,177)	-130%
	-	-	-	0%	-	6,437	(6,437)	-100%

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Bargain purchase gain on acquisition

Change in FDIC indemnification asset	1,611	(11,948)	13,559	-113%	(1,035)	(11,075)	10,040	-91%
Other income	2,860	3,845	(985)	-26%	9,105	8,930	175	2%
Total	\$ 24,778	\$ 12,133	\$ 12,645	104%	\$ 65,990	\$ 60,743	\$ 5,247	9%

For the nine months ended September 30, 2011, the decrease in service charges on deposit accounts is due to a \$4.8 million, or 33%, reduction in non-sufficient funds and overdraft fee revenue, offset by increases in ATM income and increased other deposit account service charges. The decline in non-sufficient funds and overdraft fee revenue in the respective periods is due to regulatory reform changes which took place in the third quarter of 2010, while other deposit service charges increased as a result of the overall increase in deposits including deposits acquired from the Rainier, Evergreen and Nevada Security acquisitions.

Brokerage commissions and fees for the three and nine months ended September 30, 2011 increased 19% and 16% as a result of the increase in assets under management under the Wealth Management segment.

Table of Contents

For the nine months ended September 30, 2011 mortgage banking revenue increased 24% due to an increase in mortgage production based on an increase in purchase and refinancing activity compared to the same period of the prior year. Closed mortgage volume for the three and nine months ended September 30, 2011 was \$279.6 million and \$631.3 million, representing a 21% and 25% increase compared to the same periods of the prior year.

Early in the third quarter of 2011, the Company sold approximately \$59 million of longer duration investment securities in order to reduce the price risk of the securities portfolio if interest rates were to significantly increase in future periods. In connection with this sale, the Company recognized a gain on sale of investment securities of \$1.8 million. Consistent with the second quarter of 2011, the purpose of the sale was not to recognize gains, rather it was to reduce the overall price risk of the portfolio and to hedge the potential future adverse effects of rising interest rates on accumulated other comprehensive income.

For the three and nine months ended September 30, 2011, we recorded a loss of \$554,000 and \$1.6 million, as compared to a loss of \$554,000 and a gain of \$5.5 million for the three and nine months ended September 30, 2010, in the change of fair value on the junior subordinated debentures recorded at fair value. Additional information on the junior subordinated debentures carried at fair value is included in Note 9 of the *Notes to Condensed Consolidated Financial Statements* and under the heading *Junior Subordinated Debentures*.

In the prior year, a bargain purchase gain of \$6.4 million represented the excess of the estimated fair value of the assets acquired over the estimated fair value of the liabilities assumed in the Evergreen acquisition.

For the three and nine months ended September 30, 2011 and 2010, the change in FDIC indemnification asset represents a change in cash flows expected to be recoverable under the loss-share agreements entered into with the FDIC in connection with the Evergreen, Rainier, and Nevada Security FDIC-assisted acquisitions. Additional information on the FDIC indemnification asset is included in Note 6 of the *Notes to Condensed Consolidated Financial Statements* and under the heading *Covered Assets*.

Other income for the three and nine months ended September 30, 2011 decreased \$1.0 million and increased \$175,000 compared to the same periods in the prior year, primarily due to net revenue related to initiation of an interest rate swap program with commercial banking customers to facilitate their risk management strategies, offset by various non-recurring sundry recoveries recognized in the third quarter of 2010.

NON-INTEREST EXPENSE

Non-interest expense for the three months ended September 30, 2011 was \$86.2 million, an increase of \$1.1 million, or 1%, as compared to the same period in 2010. Non-interest expense for the nine months ended September 30, 2011 was \$253.6 million, an increase of \$23.8 million, or 10%, as compared to the same period in 2010. The following table presents the key elements of non-interest expense for the three and nine months ended September 30, 2011 and 2010:

Non-Interest Expense

(in thousands)	Three months ended September 30,				Nine months ended September 30,			
	2011	2010	Change Amount	Change Percent	2011	2010	Change Amount	Change Percent

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Other expenses	6,641	12,534	(5,893)	-47%	21,631	24,119	(2,488)	-10%
Total	\$ 86,224	\$ 85,170	\$ 1,054	1%	\$ 253,632	\$ 229,874	\$ 23,758	10%

Included in non-interest expense are several categories which are outside of the operational control of the Company or depend on changes in market values, including FDIC deposit insurance assessments and gain or loss on other real estate owned (OREO), as well as infrequently occurring expenses such as merger related costs. Excluding these non-controllable or infrequently occurring items and items related to changes in market values, the remaining non-interest expense items totaled \$77.3 million for the third quarter of 2011 compared to \$79.9 million for the third quarter of 2010, and \$230.0 million for the nine months ended September 30, 2011 compared to \$212.2 million for the nine months ended September 30, 2010.

Table of Contents

Salaries and employee benefits costs increased \$2.1 million in the three months ending September 30, 2011, as compared to the same period prior year. The increase is due to variable mortgage compensation based on increased volume and revenue, and the increase in full-time equivalent employees to generate and support various growth initiatives. Salaries and employee benefits costs increased \$14.6 million in the nine months ending September 30, 2011, as compared to the same period prior year. Compensation increases are due to mortgage and commercial banking production and the increase in full-time equivalent employees throughout the Company to support growth initiatives.

Net occupancy and equipment expense increased \$1.4 million for the three months ended September 30, 2011, and \$4.3 million for the nine months ended September 30, 2011 as compared to the same periods in the prior year. The growth in 2011 is the result of the cost of operating new locations through the acquisition of Rainier, Evergreen and Nevada Security, respectively, and the addition of five de novo Community Banking locations, one Commercial Banking Center and two Mortgage Offices during 2010, and six Community Banking locations, one Mortgage Office and an administrative facility in 2011. Additionally, during 2010 we remodeled 48 stores including locations acquired.

FDIC assessments decreased \$2.0 million for the three months ending September 30, 2011 and \$2.3 million for the nine months ended September 30, 2011 as compared to the same periods of the prior year. The decrease resulted from the adoption by the FDIC of a final rule which changed the assessment rate and the assessment base (from a domestic deposit base to a scorecard based assessment system for banks with more than \$10 billion in assets), effective in the second quarter of 2011.

The economic downturn and depressed real estate values have continued to detrimentally affect our loan portfolio and has led to a continued elevated level of foreclosures on related properties and movement of the properties into other real estate owned. Through the third quarter of 2011, declines in the market values of these properties after foreclosure resulted in additional losses on the sale of the properties or by valuation adjustments. In the three and nine months ended September 30, 2011, the Company recognized net losses on non-covered OREO of \$2.3 million and \$9.0 million as compared to a net loss of \$663,000 and \$3.5 million in the same periods a year ago. During the same periods, the Company recognized net losses on sale and valuation adjustments of covered OREO properties of \$4.8 million and \$5.8 million compared to net gains of \$1.0 million and \$2.5 million in the same three and nine month periods a year ago.

We incur significant expenses in connection with the completion and integration of bank acquisitions that are not capitalized. Classification of expenses as merger-related is done in accordance with the provisions of a Board-approved policy. The merger-related expenses incurred in both 2010 and 2011 relate primarily to the FDIC-assisted acquisitions of Evergreen, Rainier, and Nevada Security.

Other expenses decreased \$5.9 million in the three months ending September 30, 2011, and \$2.5 million in the nine months ending September 30, 2011 as compared to the same period in the prior year. The overall change is primarily associated with decreased covered and non-covered loan and covered and non-covered OREO workout costs, as well as various growth initiatives underway, offset by non-recurring professional fees and severance costs incurred in 2010.

INCOME TAXES

Our consolidated effective tax rate as a percentage of pre-tax income for the three and nine months ended September 30, 2011 was 32.9% and 32.9% as compared to 21.1% and 7.4% for the three and nine months ended September 30, 2010. The effective tax rates differed from the federal statutory rate of 35% and the apportioned state rate of 4.2% (net of the federal tax benefit) principally because of non-taxable income arising from bank-owned life insurance, income on tax-exempt investment securities, tax credits arising from low income housing investments, and Business Energy tax credits.

FINANCIAL CONDITION**INVESTMENT SECURITIES**

Trading securities consist of securities held in inventory by Umpqua Investments for sale to its clients and securities invested in trust for the benefit of certain executives or former employees of acquired institutions as required by agreements. Trading securities were \$2.5 million at September 30, 2011, as compared to \$3.0 million at December 31, 2010. This decrease is principally attributable to a decrease in Umpqua Investments' inventory of trading securities.

Investment securities available for sale were \$3.1 billion as of September 30, 2011 compared to \$2.9 billion at December 31, 2010. Purchases of \$822.9 million of investment securities available for sale, an increase in fair value of investments securities available for sale of \$30.2 million, and gains recognized on sale of \$7.5 million, were partially offset by sales and paydowns of \$665.1 million and amortization of net purchase price premiums of \$24.6 million.

Table of Contents

Investment securities held to maturity were \$4.9 million as of September 30, 2011 as compared to holdings of \$4.8 million at December 31, 2010. The change primarily relates to purchases of \$1.6 million, offset by paydowns and maturities of investment securities held to maturity of \$1.5 million.

The following table presents the available for sale and held to maturity investment securities portfolio by major type as of September 30, 2011 and December 31, 2010:

Investment Securities Composition

(dollars in thousands)

	Investment Securities Available for Sale			
	September 30, 2011		December 31, 2010	
	Fair Value	%	Fair Value	%
U.S. Treasury and agencies	\$ 118,762	4%	\$ 118,789	4%

Total	\$ 3,090,064	100%	\$ 2,919,180	100%

	Investment Securities Held to Maturity			
	September 30, 2011		December 31, 2010	
	Amortized Cost	%	Amortized Cost	%
Obligations of states and political subdivisions	\$ 1,335	27%	\$ 2,370	50%
Residential mortgage-backed securities and collateralized mortgage obligations	3,542	73%	2,392	50%
Total	\$ 4,877	100%	\$ 4,762	100%

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (OTTI) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors. For debt securities, if we intend to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (OCI). Impairment losses related to all other factors are presented as separate categories within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively based on the amount and timing of future estimated cash flows. The accretion of the impairment related to factors other than credit amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is reevaluated according to the procedures described above.

Table of Contents

The following tables present the OTTI losses for the three and nine months ended September 30, 2011 and 2010 in the held to maturity portfolio:

(in thousands)

	Three months ended September 30,	
	2011	2010
Total other-than-temporary impairment losses	\$ -	\$ 37
Portion of other-than-temporary impairment losses transferred from in other comprehensive income ⁽¹⁾	-	7
Net impairment losses recognized in earnings ⁽²⁾	\$ -	\$ 44
	Nine months ended September 30,	
	2011	2010
Total other-than-temporary impairment losses	\$ 110	\$ 42
Portion of other-than-temporary impairment losses (recognized in) transferred from other comprehensive income ⁽¹⁾	(38)	290
Net impairment losses recognized in earnings ⁽²⁾	\$ 72	\$ 332

(1) Represents other-than-temporary impairment losses related to all other factors.

(2) Represents other-than-temporary impairment losses related to credit losses.

The OTTI recognized on investment securities held to maturity primarily relates to non-agency collateralized mortgage obligations for all periods presented. Each of these securities holds various levels of credit subordination. The underlying mortgage loans of these securities were originated from 2003 through 2007. At origination, the weighted average loan-to-value of the underlying mortgages was 69%; the underlying borrowers had weighted average FICO scores of 731, and 59% were limited documentation loans. These securities were valued by third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. We estimated the cash flows of the underlying collateral for each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then used a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows were then discounted at the interest rate used to recognize interest income on each security. We review the actual collateral performance of these securities on a quarterly basis and update the inputs as appropriate to determine the projected cash flows. The following table presents a summary of the significant inputs utilized to measure management's estimate of the credit loss component on these non-agency collateralized mortgage obligations as of September 30, 2011 and 2010:

	2011			2010		
	Range		Weighted Average	Range		Weighted Average
	Minimum	Maximum		Minimum	Maximum	
Constant prepayment rate	5.0%	20.0%	14.1%	4.0%	25.0%	14.9%
Collateral default rate	5.0%	55.0%	14.3%	8.0%	45.0%	16.8%
Loss severity	30.0%	65.0%	39.8%	20.0%	50.0%	34.6%

Gross unrealized losses in the available for sale investment portfolio was \$2.1 million at September 30, 2011. This consisted primarily of unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations of \$2.1 million. The unrealized losses were primarily caused by interest rate increases subsequent to the purchase of the securities, and not credit quality. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral.

Additional information about the investment portfolio is provided in Note 3 of the *Notes to Condensed Consolidated Financial Statements*.

RESTRICTED EQUITY SECURITIES

Restricted equity securities were \$32.7 million at September 30, 2011 and \$34.5 million at December 31, 2010. The decrease of \$1.8 million is attributable to stock redemption by the Federal Home Loan Bank (FHLB) of San Francisco. Of the \$32.7 million at September 30, 2011, \$31.4 million represent the Bank's investment in the FHLB of Seattle and San Francisco. The remaining restricted equity securities represent investments in Pacific Coast Bankers Bancshares stock.

FHLB stock is carried at par and does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions, and can only be purchased and redeemed at par. Although as of September 30, 2011, the FHLB of Seattle complies with all of its regulatory requirements (including the risk-based capital requirement), it remains classified as

Table of Contents

undercapitalized by the Federal Housing Finance Agency (Finance Agency). Under Finance Agency regulations, a FHLB that fails to meet any regulatory capital requirement may not declare a dividend or redeem or repurchase capital stock in excess of what is required for members current loans.

Management periodically evaluates FHLB stock for other-than-temporary or permanent impairment. Management's determination of whether these investments are impaired is based on its assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. Moody's Investors Services rating of the FHLB of Seattle as Aaa with stable outlook was reaffirmed in May 2010, Standard and Poors rating of AA+ was reaffirmed in July 2010 and Fitch Ratings assigned a AAA rating with stable rating outlook in April 2011, reflecting the assumption of U.S. Government support. The Company has determined there is not an other-than-temporary impairment on the FHLB stock investment as of September 30, 2011.

LOANS AND LEASES*Non-covered loans and leases*

Total non-covered loans and leases outstanding at September 30, 2011 were \$5.8 billion, an increase of \$169.1 million as compared to year-end 2010. This increase is principally attributable to net loan originations of \$256.6 million, offset by charge-offs of \$55.9 million and transfers to other real estate owned of \$36.7 million during the period. The following table presents the concentration distribution of our non-covered loan portfolio at September 30, 2011 and December 31, 2010.

Non-covered Loan Concentrations

(dollars in thousands)

Covered loans and leases

Total covered loans and leases outstanding at September 30, 2011 were \$672.1 million, a decrease of \$113.8 million as compared to year-end 2010. This decrease is principally attributable to net covered loan paydowns and maturities of \$75.8 million, transfers to covered other real estate owned of \$11.9 million, and covered loans transferred to non-covered loans of \$10.6 million. The following table presents the concentration distribution of our covered loan portfolio at September 30, 2011 and December 31, 2010.

The covered loans are subject to loss-sharing agreements with the FDIC. Under the terms of the Evergreen acquisition loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (OREO) and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$90.0 million on covered assets for Evergreen and absorb 95% of losses and share in 95% of loss recoveries exceeding \$90.0 million, except for the Bank will incur losses up to \$30.2 million before the loss-sharing will commence. As of September 30, 2011, losses have exceeded \$30.2 million. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Under the terms of the Rainier loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$95.0 million of losses on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$95.0 million. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Under the terms of the Nevada Security loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on all covered assets. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Discussion of and tables related to the covered loan segment is provided under the heading *Asset Quality and Non-Performing Assets*.

ASSET QUALITY AND NON-PERFORMING ASSETS**Non-covered loans and leases**

Non-covered, non-performing loans, which include non-covered, non-accrual loans and non-covered accruing loans past due over 90 days, totaled \$111.6 million, or 1.91% of non-covered total loans, at September 30, 2011, as compared to \$145.2 million or 2.57% of total non-covered loans, at December 31, 2010. Non-covered non-performing assets, which include non-covered non-performing loans and

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

non-covered OREO, totaled \$146.4 million, or 1.24% of total assets, as of September 30, 2011, as compared to \$178.0 million, or 1.53% of total assets, as of December 31, 2010.

A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. Generally, when loans are identified as impaired they are moved to our Special Assets Division. When we identify a loan as impaired, we measure the loan for potential impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining external appraisals. Generally, external appraisals are updated every six to nine months. We obtain appraisals from a pre-approved list of independent, third party, local appraisal firms. Approval and addition to the list is based on experience, reputation, character, consistency and knowledge of the respective real estate market. At a minimum, it is ascertained that

Table of Contents

the appraiser is: (a) currently licensed in the state in which the property is located, (b) is experienced in the appraisal of properties similar to the property being appraised, (c) is actively engaged in the appraisal work, (d) has knowledge of current real estate market conditions and financing trends, (e) is reputable, and (f) is not on Freddie Mac's nor the Bank's Exclusionary List of appraisers and brokers. In certain cases appraisals will be reviewed by our Real Estate Valuation Services group to ensure the quality of the appraisal and the expertise and independence of the appraiser. Upon receipt and review, an external appraisal is utilized to measure a loan for potential impairment. Our impairment analysis documents the date of the appraisal used in the analysis, whether the officer preparing the report deems it current, and, if not, allows for internal valuation adjustments with justification. Typical justified adjustments might include discounts for continued market deterioration subsequent to appraisal date, adjustments for the release of collateral contemplated in the appraisal, or the value of other collateral or consideration not contemplated in the appraisal. An appraisal over one year old in most cases will be considered stale dated and an updated or new appraisal will be required. Any adjustments from appraised value to net realizable value are detailed and justified in the impairment analysis, which is reviewed and approved by senior credit quality officers and the Company's Allowance for Loan and Lease Losses (ALLL) Committee. Although an external appraisal is the primary source to value collateral dependent loans, we may also utilize values obtained through purchase and sale agreements, negotiated short sales, broker price opinions, or the sales price of the note. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. Impairment analyses are updated, reviewed and approved on a quarterly basis at or near the end of each reporting period. Appraisals or other alternative sources of value received subsequent to the reporting period, but prior to our filing of periodic reports, are considered and evaluated to ensure our periodic filings are materially correct and not misleading. Based on these processes, we do not believe there are significant time lapses for the recognition of additional loan loss provisions or charge-offs from the date they become known.

Non-covered loans are classified as non-accrual when collection of principal or interest is doubtful generally if they are past due as of maturity or payment of principal or interest by 90 days or more unless such loans are well-secured and in the process of collection. Additionally, all non-covered loans that are impaired are considered for non-accrual status. Non-covered loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospects for future payments in accordance with the loan agreement appear relatively certain.

Upon acquisition of real estate collateral, typically through the foreclosure process, we promptly begin to market the property for sale. If we do not begin to receive offers or indications of interest we will analyze the price and review market conditions to assess whether a lower price reflects the market value of the property and would enable us to sell the property. In addition, we update appraisals on other real estate owned property six to three months after the most recent appraisal. Increases in valuation adjustments recorded in a period are primarily based on i) updated appraisals received during the period, or ii) management's authorization to reduce the selling price of the property during the period. Unless a current appraisal is available, an appraisal will be ordered prior to a loan moving to other real estate owned. Foreclosed properties held as other real estate owned are recorded at the lower of the recorded investment in the loan or market value of the property less expected selling costs. Non-covered other real estate owned at September 30, 2011 totaled \$34.8 million and consisted of 59 properties.

Non-covered loans are reported as restructured when the Bank grants a concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include a reduction in the loan rate, forgiveness of principal or accrued interest, extending the maturity date(s) or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, restructured loans are impaired as the Bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

The Company has written down impaired, non-covered non-accrual loans as of September 30, 2011 to their estimated net realizable value, based on disposition value, and are expected to be resolved with no additional material loss, absent further decline in market prices. The following table summarizes our non-covered non-performing assets and restructured loans as of September 30, 2011 and December 31, 2010:

Table of Contents**Non-covered Non-Performing Assets**

As of September 30, 2011, the non-covered non-performing assets of \$146.4 million have been written down by 42%, or \$105.4 million, from their original balance of \$251.8 million.

The Company is continually performing extensive reviews of our permanent commercial real estate portfolio, including stress testing. These reviews were performed on both our non-owner and owner occupied credits. These reviews were completed to verify leasing status, to ensure the accuracy of risk ratings, and to develop proactive action plans with borrowers on projects where debt service coverage has dropped below

the Bank's benchmark. The stress testing has been performed to determine the effect of rising cap rates, interest rates and vacancy rates, on this portfolio. Based on our analysis, the Company believes our lending teams are effectively managing the risks in this portfolio. There can be no assurance that any further declines in economic conditions, such as potential increases in retail or office vacancy rates, will exceed the projected assumptions utilized in the stress testing and may result in additional non-covered, non-performing loans in the future.

Non-covered Restructured Loans

At September 30, 2011 and December 31, 2010, non-covered impaired loans of \$80.6 million and \$84.4 million were classified as non-covered performing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The non-covered performing restructured loans on accrual status represent the only impaired loans accruing interest at each respective date. In order for a restructured loan to be considered performing and on accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. The Company had \$348,000 of obligations to lend additional funds on the restructured loans as of September 30, 2011.

Table of Contents**Residential Modification Program**

The Bank's modification program is designed to enable the Bank to work with its customers experiencing financial difficulty to maximize repayment. While the Bank has designed guidelines similar to the government sponsored Home Affordable Refinance Program (HARP) and Home Affordable Modification Program (HAMP), the bank participates in the programs only in the capacity as servicer on behalf of investor loans that have been sold.

A and B Note Workout Structures

The Bank performs A note/B note workout structures as a subset of the Bank's troubled debt restructuring strategy. The amount of loans restructured using this structure was \$23.1 million and \$20.5 million as of September 30, 2011 and December 31, 2010, respectively.

Under an A note/B note workout structure, the new A note is underwritten in accordance with customary troubled debt restructuring underwriting standards and is reasonably assured of full repayment while the B note is not. The B note is immediately charged off upon restructuring.

If the loan was on accrual prior to the troubled debt restructuring being documented with the loan legally bifurcated into an A note fully supporting accrual status and a B note or amount fully contractually forgiven and charged off, the A note may remain on accrual status. If the loan was on nonaccrual at the time the troubled debt restructuring was documented with the loan legally bifurcated into an A note fully supporting accrual status and a B note or amount contractually forgiven and fully charged off, the A note may be returned to accrual status, and risk rated accordingly, after a reasonable period of performance under the troubled debt restructuring terms. Six months of payment performance is generally required to return these loans to accrual status.

The A note will continue to be classified as a troubled debt restructuring and only may be removed from impaired status in years after the restructuring if (a) the restructuring agreement specifies an interest rate equal to or greater than the rate that the Bank was willing to accept at the time of the restructuring for a new loan with comparable risk and (b) the loan is not impaired based on the terms specified by the restructuring agreement.

The following tables summarize our performing non-covered restructured loans by loan type and region as of September 30, 2011 and December 31, 2010:

Total	\$ 80,590

The Bank has had a varying degree of success with different types of concessions. The following table presents the percentage of troubled debt restructurings, by type of concession, at September 30, 2011 that have performed and are expected to perform according to the troubled debt restructuring agreement:

	September 30, 2011
Rate	100%
Term	94%
Interest Only	-
Payment	84%
Combination	80%

A further decline in the economic conditions in our general market areas or other factors could adversely impact individual borrowers or the loan portfolio in general. Accordingly, there can be no assurance that loans will not become 90 days or more past due, become impaired or placed on non-accrual status, restructured or transferred to other real estate owned in the future. Additional information about the loan portfolio is provided in Note 5 of the *Notes to Condensed Consolidated Financial Statements*.

Covered Non-Performing Assets

Covered non-performing assets totaled \$23.0 million, or 0.20% of total assets at September 30, 2011 as compared to \$29.9 million, or 0.26% of total assets at December 31, 2010. These covered nonperforming assets are subject to shared-loss agreements with the FDIC. The following

ALLOWANCE FOR NON-COVERED LOAN AND LEASE LOSSES AND RESERVE FOR UNFUNDED COMMITMENTS

The allowance for non-covered loan and lease losses (ALLL) totaled \$92.9 million at September 30, 2011, a decrease of \$9.0 million from the \$101.9 million at December 31, 2010. The decrease in the ALLL from the prior year-end results is principally attributable to net charge-offs exceeding non-covered provision for loan and lease losses. The following table shows the activity in the ALLL for the three and nine months ended September 30, 2011 and 2010:

Table of Contents**Allowance for Non-covered Loan and Lease Losses**

Consumer & other	(351)	(648)	(1,238)	(1,724)
Total loans charged off	(16,453)	(31,418)	(55,939)	(102,731)
Recoveries:				
Commercial real estate	2,010	883	5,463	5,479
Commercial	346	317	1,437	966
Residential	54	34	175	204
Consumer & other	91	140	297	422
Total recoveries	2,501	1,374	7,372	7,071
Net charge-offs	(13,952)	(30,044)	(48,567)	(95,660)
Non-covered provision charged to operations	9,089	24,228	39,578	96,101
Balance at end of period	\$ 92,932	\$ 108,098	\$ 92,932	\$ 108,098

As a percentage of average non-covered loans and leases (annualized):

Net charge-offs	0.96%	2.08%	1.14%	2.20%
Provision for non-covered loan and lease losses	0.63%	1.68%	0.93%	2.21%
Recoveries as a percentage of charge-offs	15.20%	4.37%	13.18%	6.88%

The decrease in the allowance for loan and lease losses as of September 30, 2011 in relation to the same periods of the prior year is primarily a result of provision for loan and lease losses being less than net charge-offs, which is a result of improving credit quality of the loan portfolio and declining levels of non-performing loans. Additional discussion on the change in provision for loan and lease losses is provided under the heading *Provision for Loan and Lease Losses* above.

The following table sets forth the allocation of the allowance for non-covered loan and lease losses and percent of loans in each category to total loans (excluding deferred loan fees) as of September 30, 2011 and December 31, 2010:

(dollars in thousands)

	September 30, 2011		December 31, 2010

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Allowance for non-covered loan and lease losses	\$ 92,932	100%	\$ 101,921	100%
---	-----------	------	------------	------

All impaired loans are individually evaluated for impairment. If the measurement of each impaired loans' value is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. This can be accomplished by charging-off the impaired portion of the loan or establishing a specific component within the allowance for loan and lease losses. If in management's assessment the sources of repayment will not result in a reasonable probability that the carrying value of a loan can be recovered, the amount of a loan's specific impairment is charged-off against the allowance for loan and lease losses. The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral dependent loans. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

At September 30, 2011, the recorded investment in non-covered loans classified as impaired totaled \$180.4 million, with a corresponding valuation allowance (included in the allowance for non-covered loan and lease losses) of \$1.1 million. The valuation allowance on impaired loans represents the impairment reserves on performing non-covered restructured loans. At December 31, 2010, the total recorded investment in non-covered impaired loans was \$222.6 million, with a corresponding valuation allowance (included in the allowance for non-covered loan and lease losses) of \$5.2 million.

Table of Contents

The following table presents a summary of activity in the reserve for unfunded commitments (RUC):

Summary of Reserve for Unfunded Commitments Activity

(in thousands)

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 988	\$ 734	\$ 818	\$ 731
Net change to other expense:				
Commercial real estate	1	(1)	29	(17)
Commercial	(36)	37	94	63
Residential	10	23	21	15
Consumer & other	8	4	9	5
Total change to other expense	(17)	63	153	66
Balance at end of period	\$ 971	\$ 797	\$ 971	\$ 797

We believe that the ALLL and RUC at September 30, 2011 are sufficient to absorb losses inherent in the loan portfolio and credit commitments outstanding as of that date, respectively, based on the best information available. This assessment, based in part on historical levels of net charge-offs, loan growth, and a detailed review of the quality of the loan portfolio, involves uncertainty and judgment. Therefore, the adequacy of the ALLL and RUC cannot be determined with precision and may be subject to change in future periods. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review.

ALLOWANCE FOR COVERED LOAN AND LEASE LOSSES

The allowance for covered loan and lease losses (ALLL) totaled \$14.4 million at September 30, 2011, an increase of \$11.7 million from the \$2.7 million at December 31, 2010. The increase in the covered ALLL from the prior year end results from decreases in the amount and changes in the timing of expected cash flows on the acquired loans compared to those previously estimated, as measured on a pool basis. The following table summarizes activity related to the allowance for covered loan and lease losses by covered loan portfolio segment for the three and nine months ended September 30, 2011, respectively:

(dollars in thousands)

GOODWILL AND OTHER INTANGIBLE ASSETS

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

At September 30, 2011, we had goodwill and other intangible assets of \$678.4 million, as compared to \$682.0 million at December 31, 2010. The goodwill recorded in connection with acquisitions represents the excess of the purchase price over the estimated fair value of the net assets acquired. At September 30, 2011, we had goodwill of \$656.1 million, as compared to \$655.9 million at December 31, 2010. Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management evaluates intangible assets with indefinite lives on an annual basis as of December 31. Additionally, we perform impairment evaluations on an interim basis when events or circumstances indicate impairment potentially exists. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include, among others, a significant decline in our expected future cash flows; a sustained, significant decline in our stock price and market capitalization; a significant adverse change in legal factors or in the business climate; adverse action or assessment by a regulator; and unanticipated competition.

The goodwill impairment test involves a two-step process. The first step compares the fair value of a reporting unit to its carrying value. If the reporting unit's fair value is less than its carrying value, the Company would be required to proceed to the second step. In the second step the Company calculates the implied fair value of the reporting unit's goodwill. The implied fair value of goodwill is determined in the same manner as goodwill recognized in a business combination. The estimated fair value of the Company is allocated to all of the Company's assets and liabilities, including any unrecognized identifiable intangible assets, as if the Company had been acquired in a business combination and the estimated fair value of the reporting unit is the price paid to acquire it. The allocation process is performed only for purposes of determining the amount of goodwill impairment. No assets or liabilities are written up or down, nor are any additional unrecognized identifiable intangible assets recorded as a part of this process. Any excess of

Table of Contents

the estimated purchase price over the fair value of the reporting unit's net assets represents the implied fair value of goodwill. If the carrying amount of the goodwill is greater than the implied fair value of that goodwill, an impairment loss would be recognized as a charge to earnings in an amount equal to that excess.

At September 30, 2011, we had other intangible assets of \$22.4 million, as compared to \$26.1 million at December 31, 2010. Intangible assets with definite useful lives are amortized to their estimated residual values over their respective estimated useful lives, and are also reviewed for impairment. We amortize other intangible assets on an accelerated or straight-line basis over an estimated ten to fifteen year life. No impairment losses separate from the scheduled amortization have been recognized in the periods presented.

DEPOSITS

Total deposits were \$9.4 billion at September 30, 2011, a decrease of \$29.4 million, or 0.03%, as compared to year-end 2010. The decrease is primarily due to the run-off of higher cost time deposits and the Company reducing interest rates paid on various deposit products consistent with the overall decline in market interest rates.

The following table presents the deposit balances by major category as of September 30, 2011 and December 31, 2010:

Deposits

(dollars in thousands)

	September 30, 2011		December 31, 2010	
	Amount	Percentage	Amount	Percentage

Table of Contents

The Company has an agreement with Promontory Interfinancial Network LLC (Promontory) that makes it possible to provide FDIC deposit insurance to balances in excess of current deposit insurance limits. Promontory's Certificate of Deposit Account Registry Service (CDARS) uses a deposit-matching program to exchange Bank deposits in excess of the current deposit insurance limits for excess balances at other participating banks, on a dollar-for-dollar basis, that would be fully insured at the Bank. This product is designed to enhance our ability to attract and retain customers and increase deposits, by providing additional FDIC coverage to customers. CDARS deposits can be reciprocal or one-way. All of the Bank's CDARS deposits are reciprocal. At September 30, 2011 and December 31, 2010, the Company's CDARS balances totaled \$303.1 million and \$323.2 million, respectively. Of these totals, at September 30, 2011 and December 31, 2010, \$285.2 million and \$300.6 million, respectively, represented time deposits equal to or greater than \$100,000 but were fully insured under current deposit insurance limits.

The Dodd-Frank Act provides for unlimited deposit insurance for non-interest bearing transactions accounts, excluding NOW (interest bearing deposit accounts) and including all IOLTAs (lawyers' trust accounts), beginning December 31, 2010 for a period of two years. The Dodd-Frank Act permanently raises the current standard maximum federal deposit insurance amount from \$100,000 to \$250,000 per qualified account.

BORROWINGS

At September 30, 2011, the Bank had outstanding \$146.4 million of securities sold under agreements to repurchase and no outstanding federal funds purchased balances. The Bank had outstanding term debt with a carrying value of \$256.2 million at September 30, 2011. Term debt outstanding as of September 30, 2011 decreased \$6.6 million since December 31, 2010 as a result of repayment of FHLB borrowings and accretion of purchase accounting adjustments. Advances from the FHLB amounted to \$245.0 million of the total term debt and are secured by investment securities and residential mortgage loans. The FHLB advances have fixed contractual interest rates ranging from 4.46% to 4.72% and mature in 2016 and 2017.

JUNIOR SUBORDINATED DEBENTURES

We had junior subordinated debentures with carrying values of \$184.9 million and \$183.6 million at September 30, 2011 and December 31, 2010, respectively.

At September 30, 2011, approximately \$219.6 million, or 95% of the total issued amount, had interest rates that are adjustable on a quarterly basis based on a spread over three month LIBOR. Interest expense for junior subordinated debentures decreased for the three and nine months ended September 30, 2011, compared to the same periods in 2010, primarily resulting from decreases in short-term market interest rates and LIBOR. Although increases in short-term market interest rates will increase the interest expense for junior subordinated debentures, we believe that other attributes of our balance sheet will serve to mitigate the impact to net interest income on a consolidated basis.

On January 1, 2007, the Company selected the fair value measurement option for certain pre-existing junior subordinated debentures (the Umpqua Statutory Trusts). The remaining junior subordinated debentures as of the adoption date were acquired through business combinations and were measured at fair value at the time of acquisition. In 2007, the Company issued two series of trust preferred securities and elected to measure each instrument at fair value. Accounting for the junior subordinated debentures originally issued by the Company at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost are presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

The significant inputs utilized in the estimation of fair value of these instruments are the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR will result in negative fair value adjustments.

Through the first quarter of 2010 we obtained valuations from a third-party pricing service to assist with the estimation and determination of fair value of these liabilities. In these valuations, the credit risk adjusted interest spread for potential new issuances through the primary market and implied spreads of these instruments when traded as assets on the secondary market, were estimated to be significantly higher than the contractual spread of our junior subordinated debentures measured at fair value. The difference between these spreads has resulted in the cumulative gain in fair value, reducing the carrying value of these instruments as reported on our Condensed Consolidated Balance Sheets. In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) was signed into law which, among other things, limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. This law may require many banks to raise new Tier 1 capital and is expected to effectively close the trust-preferred securities markets from offering new issuances in the

future. As a result of this legislation, our third-party pricing service noted that they were no longer able to provide reliable fair value estimates related to these liabilities given the absence of observable or comparable transactions in the market place in recent history or as anticipated into the future.

Table of Contents

Due to inactivity in the junior subordinated debenture market and the inability to obtain observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The Company monitors activity in the trust preferred and related markets, to the extent available, changes related to the current and anticipated future interest rate environment, and considers our entity-specific creditworthiness, to validate the reasonableness of the credit risk adjusted spread and effective yield utilized in our discounted cash flow model. Regarding the activity in and condition of the junior subordinated debt market, we noted no observable changes in the current period as it relates to companies comparable to our size and condition, in either the primary or secondary markets. Relating to the interest rate environment, we noted no significant change to the slope or shape of the forward LIBOR swap curve in the current period that would result in a significant change in the fair value of these liabilities.

The Company's specific credit risk is implicit in the credit risk adjusted spread used to determine the fair value of our junior subordinated debentures. As our Company is not specifically rated by any credit agency, it is difficult to specifically attribute changes in our estimate of the applicable credit risk adjusted spread to specific changes in our own creditworthiness versus changes in the market's required return from similar companies. As a result, these considerations must be largely based off of qualitative considerations as we do not have a credit rating and we do not regularly issue senior or subordinated debt that would provide us an independent measure of the changes in how the market quantifies our perceived default risk.

On a quarterly basis we assess entity-specific qualitative considerations that if not mitigated or represents a material change from the prior reporting period may result in a change to the perceived creditworthiness and ultimately the estimated credit risk adjusted spread utilized to value these liabilities. Entity-specific considerations that positively impact our creditworthiness include: our strong capital position resulting from our successful public stock offerings in 2009 and 2010, that offers us flexibility to pursue business opportunities such as mergers and acquisitions, or expand our footprint and product offerings; having significant levels of on and off-balance sheet liquidity; being profitable (after excluding the one-time goodwill impairment charge recognized in 2009); and, having an experienced management team. However, these positive considerations are mitigated by significant risks and uncertainties that impact our creditworthiness and ability to maintain capital adequacy in the future. Specific risks and concerns include: given our concentration of loans secured by real estate in our loan portfolio, a continued and sustained deterioration of the real estate market may result in declines in the value of the underlying collateral and increased delinquencies that could result in an increased of charge-offs; despite recent improvement, our credit quality metrics remain negatively elevated since 2007 relative to historical standards; the continuation of current economic downturn that has been particularly severe in our primary markets could adversely affect our business; recent increased regulation facing our industry, such as the Emergency Economic Stabilization Act of 2008, the American Recovery and Reinvestment Act of 2009 and the Dodd-Frank Wall Street Reform and Consumer Protection Act, will increase the cost of compliance and restrict our ability to conduct business consistent with historical practices, and could negatively impact profitability; we have a significant amount of goodwill and other intangible assets that dilute our available tangible common equity; and the carrying value of certain material, recently recorded assets on our balance sheet, such as the FDIC loss-sharing indemnification asset, are highly reliant on management estimates, such as the timing or amount of losses that are estimated to be covered, and the assumed continued compliance with the provisions of the loss-share agreement. To the extent assumptions ultimately prove incorrect or should we consciously forego or unknowingly violate the guidelines of the agreement, an impairment of the asset may result which would reduce capital.

Additionally, the Company periodically utilizes an external valuation firm to determine or validate the reasonableness of the assessments of inputs and factors that ultimately determines the estimate fair value of these liabilities. The extent we involve or engage these external third parties correlates to management's assessment of the current subordinate debt market, how the current environment and market compares to the preceding quarter, and perceived changes in the Company's own creditworthiness during the quarter. In periods of potential significant valuation changes and at year-end reporting periods we typically engage third parties to perform a full independent valuation of these liabilities. For periods where management has assessed the market and other factors impacting the underlying valuation assumptions of these liabilities, and has determined significant changes to the valuation of these liabilities in the current period are remote, the scope of the valuation specialist's review is limited to a review the reasonableness of Management's assessment of inputs. Based on the procedures and methodology as described above, the Company has determined that the underlying inputs and assumptions have not materially changed since that last full-scope third-party valuation as of December 31, 2010.

Absent changes to the significant inputs utilized in the discounted cash flow model used to measure the fair value of these instruments at each reporting period, the cumulative discount for each junior subordinated debenture will reverse over time, ultimately returning the carrying values of these instruments to their notional values at their expected redemption dates, in a manner similar to the effective yield method as if these instruments were accounted for under the amortized cost method. This will result in recognizing losses on junior subordinated debentures carried at fair value on a quarterly basis within non-interest income. For the three and nine months ended September 30, 2011 and 2010, we recorded a loss of \$554,000 and \$1.6 million and a loss of \$554,000 and a gain of \$5.5

Table of Contents

million, respectively, resulting from the change in fair value of the junior subordinated debentures recorded at fair value. Observable activity in the junior subordinated debenture and related markets in future periods may change the effective rate used to discount these liabilities, and could result in additional fair value adjustments (gains or losses on junior subordinated debentures measured at fair value) outside the expected periodic change in fair value had the fair value assumptions remained unchanged.

As noted above, the Dodd-Frank Act limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. As the Company had less than \$15 billion in assets at December 31, 2009, under the Dodd-Frank Act, the Company will be able to continue to include its existing trust preferred securities, less the common stock of the Trusts, in Tier 1 capital. At September 30, 2011, the Company's restricted core capital elements were 18.2% of total core capital, net of goodwill and any associated deferred tax liability.

Additional information regarding junior subordinated debentures measured at fair value is included in Note 16 of the *Notes to Condensed Consolidated Financial Statements*.

All of the debentures issued to the Trusts, less the common stock of the Trusts, qualified as Tier 1 capital as of September 30, 2011, under guidance issued by the Board of Governors of the Federal Reserve System. Additional information regarding the terms of the junior subordinated debentures, including maturity/redemption dates, interest rates and the fair value election, is included in Note 9 of the *Notes to Condensed Consolidated Financial Statements*.

LIQUIDITY AND CASH FLOW

The principal objective of our liquidity management program is to maintain the Bank's ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs.

We monitor the sources and uses of funds on a daily basis to maintain an acceptable liquidity position. One source of funds includes public deposits. Individual state laws require banks to collateralize public deposits, typically as a percentage of their public deposit balance in excess of FDIC insurance. Public deposits represent 9.6% of total deposits at September 30, 2011 and 10.3% at December 31, 2010. The amount of collateral required varies by state and may also vary by institution within each state, depending on the individual state's risk assessment of depository institutions. Changes in the pledging requirements for uninsured public deposits may require pledging additional collateral to secure these deposits, drawing on other sources of funds to finance the purchase of assets that would be available to be pledged to satisfy a pledging requirement, or could lead to the withdrawal of certain public deposits from the Bank. In addition to liquidity from core deposits and the repayments and maturities of loans and investment securities, the Bank can utilize established uncommitted federal funds lines of credit, sell securities under agreements to repurchase, borrow on a secured basis from the FHLB or issue brokered certificates of deposit.

The Bank had available lines of credit with the FHLB totaling \$1.7 billion at September 30, 2011 subject to certain collateral requirements, namely the amount of pledged loans and investment securities. The Bank had available lines of credit with the Federal Reserve totaling \$436.7 million subject to certain collateral requirements, namely the amount of certain pledged loans. The Bank had uncommitted federal funds line of credit agreements with additional financial institutions totaling \$135.0 million at September 30, 2011. Availability of lines is subject to federal funds balances available for loan and continued borrower eligibility. These lines are intended to support short-term liquidity needs, and the agreements may restrict consecutive day usage.

The Company is a separate entity from the Bank and must provide for its own liquidity. Substantially all of the Company's revenues are obtained from dividends declared and paid by the Bank. There were \$10.0 million of dividends paid by the Bank to the Company in the nine months ended September 30, 2011. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to the Company. We believe that such restrictions will not have an adverse impact on the ability of the Company to fund its quarterly cash dividend distributions to common shareholders and meet its ongoing cash obligations, which consist principally of debt service on the \$230.1 million (issued amount) of outstanding junior subordinated debentures. As of September 30, 2011, the Company did not have any borrowing arrangements of its own.

As disclosed in the *Consolidated Statements of Cash Flows*, net cash provided by operating activities was \$142.6 million during the nine months ended September 30, 2011. The difference between cash provided by operating activities and net income largely consisted of non-cash items including a \$39.6 million provision for non-covered loan and lease losses and \$15.4 million provision for covered loan and lease losses.

Net cash of \$247.0 million used by investing activities consisted principally of \$822.9 million of purchases of investment securities available for sale, net non-covered loan originations of \$249.2 million and \$23.1 million of purchases of premises and equipment, partially offset by proceeds from investment securities available for sale of \$665.1 million, net covered loan paydowns of \$75.8 million, net proceeds from the FDIC indemnification asset of \$57.9 million, proceeds from the sale of non-covered other real estate owned of \$25.7 million, and proceeds from the

sale of covered other real estate owned of \$12.6 million.

Table of Contents

Net cash of \$20.0 million provided by financing activities primarily consisted of by \$72.6 million increase in net securities sold under agreements to repurchase, partially offset \$28.6 million decrease in net deposits, and \$17.3 million of dividends paid on common stock, and \$5.0 million repayment of term debt.

Although we expect the Bank's and the Company's liquidity positions to remain satisfactory during 2011, it is possible that our deposit growth for 2011 may not be maintained at previous levels due to pricing pressure or, in order to generate deposit growth, our pricing may need to be adjusted in a manner that results in increased interest expense on deposits.

OFF-BALANCE-SHEET ARRANGEMENTS

Information regarding Off-Balance-Sheet Arrangements is included in Note 10 of the *Notes to Condensed Consolidated Financial Statements*.

CONCENTRATIONS OF CREDIT RISK

Information regarding Concentrations of Credit Risk is included in Note 10 of the *Notes to Condensed Consolidated Financial Statements*.

CAPITAL RESOURCES

Shareholders' equity at September 30, 2011 was \$1.7 billion, an increase of \$52.5 million from December 31, 2010. The increase in shareholders' equity during the nine months ended September 30, 2011 was principally due to net income of \$53.1 million for the nine month period and net increase in unrealized gains on the available for sale securities, offset by common stock dividends of \$19.6 million.

The following table shows Umpqua Holdings' consolidated and Umpqua Bank's capital adequacy ratios, as calculated under regulatory guidelines, compared to the regulatory minimum capital ratio and the regulatory minimum capital ratio needed to qualify as a well-capitalized institution at September 30, 2011 and December 31, 2010:

(dollars in thousands)

	Actual		For Capital Adequacy purposes		To be Well Capitalized

Table of Contents

On February 3, 2010, the Company raised \$303.6 million through a public offering by issuing 8,625,000 shares of the Company's common stock, including 1,125,000 shares pursuant to the underwriters' over-allotment option, at a share price of \$11.00 per share and 18,975,000 depository shares, including 2,475,000 depository shares pursuant to the underwriters' over-allotment option, also at a price of \$11.00 per share. The net proceeds to the Company after deducting underwriting discounts and commissions and offering expenses were \$288.1 million and qualify as tangible common equity and Tier 1 capital. Proceeds were used to redeem the preferred stock issued to the U.S. Treasury under the TARP CPP, to fund FDIC-assisted acquisition opportunities and for general corporate purposes.

On February 17, 2010, the Company redeemed all of the outstanding Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury under the TARP CPP for an aggregate purchase price of \$214.2 million. As a result of the repurchase of the Series A preferred stock, the Company incurred a one-time deemed dividend of \$9.7 million due to the accelerated amortization of the remaining issuance discount on the preferred stock.

On March 31, 2010, the Company repurchased the common stock warrant issued to the U.S. Treasury pursuant to the TARP CPP, for \$4.5 million. The warrant repurchase, together with the Company's redemption in February 2010 of the entire amount of Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury, represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the U.S. Treasury.

On April 22, 2011, the Company announced that the Board of Directors approved an extension to the expiration date of the common stock repurchase plan from September 30, 2011 to September 30, 2013. On September 29, 2011, the number of common shares available for repurchase under the plan was increased to 15 million shares. As of September 30, 2011, a total of 15 million shares remained available for repurchase. There were 6,710 shares repurchased under the repurchase plan during third quarter of 2011. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan. However, there are no longer limitations resulting from the Company's participation in the TARP CPP. In addition, our stock plans provide that option and restricted stock award holders may pay for the exercise price and tax withholdings in part or whole by tendering previously held shares.

The Company's dividend policy considers, among other things, earnings, regulatory capital levels, the overall payout ratio and expected asset growth to determine the amount of dividends declared, if any, on a quarterly basis. There is no assurance that future cash dividends on common shares will be declared or increased. The following table presents cash dividends declared and dividend payout ratios (dividends declared per common share divided by basic earnings per common share) for the three and nine months ended September 30, 2011 and 2010:

Cash Dividends and Payout Ratios per Common Share

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Dividends declared per common share	\$ 0.07	\$ 0.05	\$ 0.17	\$ 0.15
Dividend payout ratio	37%	71%	37%	214%

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our assessment of market risk as of September 30, 2011 indicates there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2010.

Item 4. Controls and Procedures

Our management, including our Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer, has concluded that our disclosure controls and procedures are effective in timely alerting them to information relating to us that is required to be included in our periodic SEC filings. The disclosure controls and procedures were last evaluated by management as of September 30, 2011.

There have been no changes in our internal controls or in other factors that have materially affected or are likely to materially affect our internal controls over financial reporting subsequent to the date of the evaluation.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

In our Form 10-Q for the period ending June 30, 2011, we initially reported on a putative stockholders derivative action filed in the U.S. District Court for the District of Oregon by Plumbers Local No. 137 Pension Fund and Laborers' Local #231 Pension Fund naming Umpqua's present directors, certain executive officers and PricewaterhouseCoopers LLP (PwC) as defendants and Umpqua as nominal party. There were no material developments in the case during the quarter ending September 30, 2011.

See Note 10, Commitments and Contingencies, for a discussion of the Company's involvement in litigation pertaining to Visa, Inc.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed under "Part I Item 1A Risk Factors" in our Form 10-K for the year ended December 31, 2010. These factors could materially and adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

The Dodd-Frank Act and other recent legislative and regulatory initiatives contain numerous provisions and requirements that will detrimentally affect the Company's business.

The Dodd-Frank Act and related regulations subject us and other financial institutions to additional restrictions, oversight, reporting obligations and costs, which could have an adverse impact on our business, financial condition, results of operations or the price of our common stock. In addition, this increased regulation of the financial services industry restricts the ability of firms within the industry to conduct business consistent with historical practices, including aspects such as compensation, interest rates, new and inconsistent consumer protection regulations and mortgage regulation, among others. Congress or state legislatures could also adopt laws reducing the amount that borrowers are otherwise contractually required to pay under existing loan contracts, require lenders to extend or restructure certain loans or limit foreclosure and collection remedies. Federal and state regulatory agencies also frequently adopt changes to their regulations or change the manner in which existing regulations are applied.

Effective October 1, 2011, the maximum permissible interchange fee that an issuer may receive for an electronic debit transaction is the sum of \$0.21 per transaction plus 5 basis points multiplied by the value of the transaction. The rule allows for an upward adjustment of no more than \$0.01 if the issuer develops and implements policies and procedures reasonably designed to achieve fraud-prevention standards. This represents an approximate 50% decrease in interchange revenue on an average transaction. Effective July 21, 2011, Regulation Q, which prohibited the payment of interest on demand deposit account, was repealed and we anticipate that this will result in increased interest expense.

We cannot predict the substance or impact of pending or future legislation or regulation, or the application thereof. Compliance with such current and potential regulation and scrutiny will significantly increase our costs, impede the efficiency of our internal business processes, may require us to increase our regulatory capital and may limit our ability to pursue business opportunities in an efficient manner. In response, we may be required to or choose to raise additional capital, which could have a dilutive effect on the existing holders of our common stock and adversely affect the market price of our common stock.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not Applicable

(b) Not Applicable

(c) The following table provides information about repurchases of common stock by the Company during the quarter ended September 30, 2011:

Table of Contents

Period	Total number of Common Shares Purchased (1)	Average Price Paid per Common Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Number of Remaining Shares that May be Purchased at Period End under the Plan
7/1/11 - 7/31/11	16	\$ 11.65	-	1,422,595
8/1/11 - 8/31/11	3,382	\$ 11.15	-	1,422,595
9/1/11 - 9/30/11	6,888	\$ 8.98	6,710	15,000,000
Total for quarter	10,286	\$ 9.70	6,710	

- (1) Common shares repurchased by the Company during the quarter consisted of 6,710 shares repurchased pursuant to the Company's publicly announced corporate stock repurchase plan described in (2) below, the cancellation of 3,576 restricted stock awards to pay withholding taxes, and no shares tendered in connection with option exercises.
- (2) The repurchase plan, which was first approved by the Board and announced in August 2003, was amended on September 29, 2011 to increase the number of common shares available for repurchase under the plan to 15 million shares. The repurchase program will run through June 2013.

Item 3. Defaults Upon Senior Securities

Not Applicable

Item 4. (Removed and Reserved)**Item 5. Other Information**

- (a) On September 23, 2011, the board of directors of the Company and the Bank appointed Dudley Slater to serve on the Loan and Investment Committee and the Financial Services Committee.
