Excerpt from transcript of Lam Research Corporation earnings call January 25, 2012

WESTIN TWIGG (PACIFIC CREST SECURITIES)

Q: Hi, yes. I was just wondering if you could give us a little bit better of an idea of how your customers are responding to the Novellus acquisition and then maybe moving just a step beyond that, whether it's related or not I don't know but your collaborative relationship with customers and how it relates to some of the technology focus areas you mentioned in 2012.

MARTIN ANSTICE (LAM RESEARCH CORPORATION)

A: Yeah, so relative to the Novellus acquisition, we I think have in the last call, we were communicating that obviously that was the beginning of a process to dialogue with customers in any substance and we spent a lot of time with customers since that time and I would say the feedback is very positive. We are getting very good participation by key customers. We're encouraging them to actively communicate their expectations of the combined Company. We're encouraging them to participate in sharing their thoughts and ideas in terms of organization and/or collaboration models, we're encouraging them to articulate their view of both strengths and weaknesses of both companies and I'm very optimistic as a result of that. We will continue to build upon the customer trust momentum that we've established as independent companies over many years, so the basic headline in terms of customer reaction to the announced acquisition is positive. To the second part of your question which is more directed to the model of collaboration, the most fundamental example of that really speaks to the level of engagement that we have as an equipment company with our customers in their R & D environment, and in the last year, particularly, our engagements, our collaboration with key customer R & D environments two generations and beyond today's production node is dramatically increased and that's necessary for a couple reasons. Their challenges and issues are increasing and the need for a collaboration model is in their interest as much as it is ours and it's part of obviously the strategy we have to continue to grow the Company and at least as importantly to create the type of dynamics around protecting what we gained going forward.
