Table of Contents**PRIMEENERGY CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

March 31, 2012

(Unaudited)

(1) Interim Financial Statements:

The accompanying condensed consolidated financial statements of PrimeEnergy Corporation ("PEC" or the "Company") have not been audited by independent public accountants. During the interim periods, the Company follows the same accounting policies as used and described in its Annual Report on Form 10-K for the year ended December 31, 2011. In accordance with applicable Securities and Exchange Commission ("SEC") rules and regulations, the accompanying interim financial statements do not include all disclosures presented in annual financial statements and the reader should refer to the Company's Form 10-K for the year ended December 31, 2011 filed with the SEC on March 29, 2012. In the opinion of management, the accompanying interim condensed consolidated financial statements contain all material adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the Company's Condensed Consolidated Balance Sheets as of March 31, 2012 and December 31, 2011, the Condensed Consolidated Statements of Operations for the three months ended March 31, 2012 and 2011, the Condensed Consolidated Statement of Stockholders' Equity for the three months ended March 31, 2012, and the Condensed Consolidated Statements of Cash Flows for the three months ended March 31, 2012 and 2011. Certain amounts presented in prior period financial statements have been reclassified for consistency with current period presentation. The results for interim periods are not necessarily indicative of annual results. For purposes of disclosure in the condensed consolidated financial statements, subsequent events have been evaluated through the date the statements were issued.

Recently Issued Accounting Pronouncements

There are no new significant accounting standards applicable to the Company that have been issued but not yet adopted as of the quarter ended March 31, 2012.

(2) Acquisitions and Dispositions:

Historically the Company has repurchased the interests of the partners and trust unit holders in the eighteen oil and gas limited partnerships (the "Partnerships") and the two asset and business income trusts (the "Trusts") managed by the Company as general partner and as managing trustee, respectively. The Company purchased such interests in an amount totaling \$22,000 and \$124,000 for the three months ended March 31, 2012 and 2011, respectively.

(3) Restricted Cash and Cash Equivalents:

Restricted cash and cash equivalents include \$4.69 million and \$4.39 million at March 31, 2012 and December 31, 2011, respectively, of cash primarily pertaining to oil and gas revenue payments. There were corresponding accounts payable recorded at March 31, 2012 and December 31, 2011 for these liabilities. Both the restricted cash and the accounts payable are classified as current on the Condensed Consolidated Balance Sheets.

(4) Additional Balance Sheet Information:

Certain balance sheet amounts are comprised of the following:

<i>(Thousands of dollars)</i>	March 31, 2012	December 31, 2011
<u>Accounts Receivable:</u>		
Joint interest billing	\$ 2,161	\$ 2,347

Less: Accumulated depreciation	13,849	13,608
Field and Office Equipment, Net	\$ 7,816	\$ 7,945
Total Property and Equipment, Net	\$ 157,376	\$ 144,695

(6) Long-Term Bank Debt:**Bank Debt:**

Effective July 30, 2010 the Company entered into a Second Amended and Restated Credit Agreement between Compass Bank as agent and a syndicated group of lenders (Credit Agreement). The Credit Agreement has a revolving line of credit and letter of credit facility of up to \$250 million with a final maturity date of July 30, 2014. The credit facility is subject to a borrowing base determined by the lenders taking into consideration the estimated value of PEC's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. This process involves reviewing PEC's estimated proved reserves and their valuation. The borrowing base is re-determined semi-annually, and the available borrowing amount could be increased or decreased as a result of such redetermination. In addition, PEC and the lenders each have at their discretion the right to request the borrowing base be re-determined with a maximum of one such request each year. A revision to PEC's reserves may prompt such a request on the part of the lenders, which could possibly result in a reduction in the borrowing base and availability under the credit facility. At any time if the sum of the outstanding borrowings and letter of credit exposures exceed the applicable portion of the borrowing base, PEC would be required to repay the excess amount within a prescribed period.

As of March 31, 2012, the credit facility borrowing base was \$125.0 million with no required monthly reduction amount. The borrowings made within the credit facility may be placed in a base rate loan or LIBO rate loan. The Company's borrowing rates in the credit facility provide for base rate loans at the prime rate (3.25% at March 31, 2012) plus applicable margin utilization rates that range from 1.75% to 2.0%, and LIBO rate loans at LIBO published rates plus applicable utilization rates (2.75% to 3.00% at March 31, 2012). As of March 31, 2012, the Company had in place one base rate loan and one LIBO rate loan with effective rates of 5.00% and 2.99%, respectively.

At March 31, 2012, the Company had \$84.5 million of borrowings outstanding under its revolving credit facility at a weighted-average interest rate of 3.84% and \$40.5 million available for future borrowings. The combined weighted average interest rates paid on outstanding bank borrowings subject to base rate and LIBO interest were 3.93% for the three months ended March 31, 2012 as compared to 5.67% for the three

months ended March 31, 2011.

Table of Contents**(7) Other Long-Term Obligations and Commitments:*****Operating Leases:***

The Company has several non-cancelable operating leases, primarily for rental of office space, that have a term of more than one year. The future minimum lease payments for the rest of the fiscal 2012 and thereafter for the operating leases are as follows:

<i>(Thousands of dollars)</i>	Operating Leases
2012	\$ 416
2013	434
2014	16
 Total minimum payments	 \$ 866

Rent expense for office space for the three months ended March 31, 2012 and 2011 was \$226,000 and \$182,000, respectively.

Asset Retirement Obligation:

A reconciliation of the liability for plugging and abandonment costs for the three months ended March 31, 2012 is as follows:

<i>(Thousands of dollars)</i>		
Asset retirement obligation	December 31, 2011	\$ 19,013
Liabilities incurred		200
Liabilities settled		(93)
Accretion expense		741
Revisions in estimated liabilities		104
 Asset retirement obligation	March 31, 2012	 \$ 19,965

The Company's liability is determined using significant assumptions, including current estimates of plugging and abandonment costs, annual inflation of these costs, the productive life of wells and a risk-adjusted interest rate. Changes in any of these assumptions can result in significant revisions to the estimated asset retirement obligation. Revisions to the asset retirement obligation are recorded with an offsetting change to producing properties, resulting in prospective changes to depreciation, depletion and amortization expense and accretion of discount. Because of the subjectivity of assumptions and the relatively long life of most of the Company's wells, the costs to ultimately retire the wells may vary significantly from previous estimates.

In December 2011, the Company entered into a fixed price contract for the plugging and abandonment of a substantial portion of its offshore properties. In connection with this contract, the Company deposited a net \$6.0 million with the contractor which is reflected in prepaid obligations at March 31, 2012 and December 31, 2011. All work under this contract is expected to be completed in 2012.

(8) Contingent Liabilities:

The Company, as managing general partner of the affiliated Partnerships, is responsible for all Partnership activities, including the drilling of development wells and the production and sale of oil and gas from productive wells. The Company also provides the administration, accounting and tax preparation work for the Partnerships, and is liable for all debts and liabilities of the affiliated Partnerships, to the extent that the assets of a given limited Partnership are not sufficient to satisfy its obligations. As of March 31, 2012, the affiliated Partnerships have established cash reserves in excess of their debts and liabilities and the Company believes these reserves will be sufficient to satisfy Partnership obligations.

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

The Company is subject to environmental laws and regulations. Management believes that future expenses, before recoveries from third parties, if any, will not have a material effect on the Company's financial condition. This opinion is based on expenses incurred to date for remediation and compliance with laws and regulations, which have not been material to the Company's results of operations.

From time to time, the Company is party to certain legal actions arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

(9) Stock Options and Other Compensation:

In May 1989, non-statutory stock options were granted by the Company to four key executive officers for the purchase of shares of common stock. At March 31, 2012 and 2011, remaining options held by two key executive officers on 767,500 shares were outstanding and exercisable at prices ranging from \$1.00 to \$1.25. According to their terms, the options have no expiration date.

Table of Contents**(10) Related Party Transactions:**

The Company, as managing general partner or managing trustee, makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships or Trusts. The Company purchased such interests in amounts totaling \$22,000 and \$124,000 for the three months ended March 31, 2012 and 2011, respectively.

Receivables from related parties consist of reimbursable general and administrative costs, lease operating expenses and reimbursement for property development and related costs. These receivables are due from joint venture partners, which may include members of the Company's Board of Directors.

Payables owed to related parties primarily represent receipts collected by the Company as agent for the joint venture partners, which may include members of the Company's Board of Directors, for oil and gas sales net of expenses.

(11) Financial Instruments***Fair Value measurements:***

Authoritative guidance on fair value measurements defines fair value, establishes a framework for measuring fair value and stipulates the related disclosure requirements. The Company follows a three-level hierarchy, prioritizing and defining the types of inputs used to measure fair value. The fair values of the Company's interest rate swaps, natural gas and crude oil price collars and swaps are designated as Level 3. The following fair value hierarchy table presents information about the Company's assets and liabilities measured at fair value on a recurring basis as of March 31, 2012 and December 31, 2011:

March 31, 2012 <i>(Thousands of dollars)</i>	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of March 31, 2012

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Commodity derivative contracts	\$	\$	\$ (3,507)	\$ (3,507)
Total liability	\$	\$	\$ (3,507)	\$ (3,507)

The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as Level 3 in the fair value hierarchy for the three months ended March 31, 2012.

(Thousands of dollars)

Net liabilities	December 31, 2011	\$ (3,507)
Total realized and unrealized gains or losses:		
Unrealized losses included in earnings, net (a)		(3,660)
Realized gains from purchases, sales, issuances and settlements, net		(119)
Net liabilities	March 31, 2012	\$ (7,286)

- (a) Derivative instruments are reported in revenues as realized gain/loss and on a separately reported line item captioned unrealized gain/loss on derivative instruments.

Table of Contents**Derivative Instrument:**

The Company is exposed to commodity price and interest rate risk, and management considers periodically the Company's exposure to cash flow variability resulting from the commodity price changes and interest rate fluctuations. Futures, swaps and options are used to manage the Company's exposure to commodity price risk inherent in the Company's oil and gas production operations. The Company does not apply hedge accounting to any of its commodity based derivatives. Both realized and unrealized gains and losses associated with derivative instruments are recognized in earnings.

The following table sets forth the effect of derivative instruments on the condensed consolidated balance sheets as of March 31, 2012 and December 31, 2011:

(Thousands of dollars)	Balance Sheet Location	Fair Value	
		March 31, 2012	December 31, 2011
Liability Derivatives:			
<i>Derivatives not designated as hedging instruments:</i>			
Crude oil commodity contracts	Derivative liability short term	\$ (3,503)	\$ (2,046)
Crude oil commodity contracts	Derivative liability long term	(3,783)	(1,461)
Total		\$ (7,286)	\$ (3,507)
Total derivative instruments		\$ (7,286)	\$ (3,507)

The following table sets forth the effect of derivative instruments on the condensed consolidated statement of operations for the three-month periods ended March 31, 2012 and 2011:

(Thousands of dollars)	Location of gain/loss recognized in income	Amount of gain/loss recognized in income	
		2012	2011
<i>Derivatives not designated as cash-flow hedge instruments</i>			
Natural gas commodity contracts	Unrealized loss on derivative instruments, net	\$	\$ (918)
Crude oil commodity contracts	Unrealized loss on derivative instruments, net	(3,779)	(8,591)
Natural gas commodity contracts	Realized gain on derivative instruments, net		1,054
Crude oil commodity contracts	Realized gain (loss) on derivative instruments, net	119	(732)
		\$ (3,660)	\$ (9,187)

(12) Earnings Per Share:

Basic earnings per share are computed by dividing earnings available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect per share amounts that would have resulted if dilutive potential common stock had been converted to common stock in gain periods. The following reconciles amounts reported in the financial statements:

	Three Months Ended March 31,	
2012		2011

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report may contain statements relating to the future results of the Company that are considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995 (the PSLRA). In addition, certain statements may be contained in the Company's future filings with the SEC, in press releases, and in oral and written statements made by or with the approval of the Company that are not statements of historical fact and constitute forward-looking statements within the meaning of the PSLRA. Such forward-looking statements, in addition to historical information, which involve risk and uncertainties, are based on the beliefs, assumptions and expectations of management of the Company. Words such as expects, believes, should, plans, anticipates, will, potential, could, intend, may, outlook, prediction, estimates, assumes, likely and variations of such similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks and uncertainties and are based on a number of assumptions that could ultimately prove inaccurate and, therefore, there can be no assurance that they will prove to be accurate. Actual results and outcomes may vary materially from what is expressed or forecast in such statements due to various risks and uncertainties. These risks and uncertainties include, among other things, the possibility of drilling cost overruns and technical difficulties, volatility of oil and gas prices, competition, risks inherent in the Company's oil and gas operations, the inexact nature of interpretation of seismic and other geological and geophysical data, imprecision of reserve estimates, and the Company's ability to replace and expand oil and gas reserves. Accordingly, stockholders and potential investors are cautioned that certain events or circumstances could cause actual results to differ materially from those projected. The forward looking statements are made as of the date of this report and other than as required by the federal securities laws, the Company assumes no obligation to update the forward-looking statement or to update the reasons why actual results could differ from those projected in the forward-looking statements.

The following discussion is intended to assist you in understanding our results of operations and our present financial condition. Our Condensed Consolidated Financial Statements and the accompanying Notes to the Condensed Consolidated Financial Statements included elsewhere in this Report contains additional information that should be referred to when reviewing this material.

OVERVIEW

We are an independent oil and natural gas company engaged in acquiring, developing and producing oil and natural gas. We presently own producing and non-producing properties located primarily in Texas, Oklahoma, West Virginia, the Gulf of Mexico, New Mexico, Colorado and Louisiana. In addition, we own a substantial amount of well servicing equipment. All of our oil and gas properties and interests are located in the United States. Assets in our principal focus areas include mature properties with long-lived reserves and significant development opportunities as well as newer properties with development and exploration potential. We believe our balanced portfolio of assets and our ongoing hedging program position us well for both the current commodity price environment and future potential upside as we develop our attractive resource opportunities. Our primary sources of liquidity are cash generated from our operations and our credit facility.

We attempt to assume the position of operator in all acquisitions of producing properties and will continue to evaluate prospects for leasehold acquisitions and for exploration and development operations in areas in which we own interests. We continue to actively pursue the acquisition of producing properties. In order to diversify and broaden our asset base, we will consider acquiring the assets or stock in other entities and companies in the oil and gas business. Our main objective in making any such acquisitions will be to acquire income producing assets so as to build stockholder value through consistent growth in our oil and gas reserve base on a cost-efficient basis.

Our cash flows depend on many factors, including the price of oil and gas, the success of our acquisition and drilling activities and the operational performance of our producing properties. We use derivative instruments to manage our commodity price risk. This practice may prevent us from receiving the full advantage of any increases in oil and gas prices above the maximum fixed amount specified in the derivative agreements and subjects us to the credit risk of the counterparties to such agreements. Since all of our derivative contracts are accounted for under mark-to-market accounting, we expect continued volatility in gains and losses on mark-to-market derivative contracts in our consolidated income statement as changes occur in the NYMEX price indices.

RECENT ACTIVITIES

During 2012, we continued our drilling program in our West Texas and Mid-Continent regions. Thru April 30, 2012, we have drilled a total of 12 gross (9.43 net) wells, with 11 gross (9.40 net) wells having successful completions. We intend to drill a total of approximately 35 gross wells (30 net) this year, primarily in the West Texas area.

In February 2012, we closed the acquisition of additional working interest in producing properties which we operate. These properties are located in our Gulf Coast region and were acquired at a net cost of \$6.32 million.

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

During the first quarter 2012, we began plugging and abandoning a substantial portion of our offshore properties. This work is being performed under a fixed price contract and is expected to be completed within the next three or four months.

Table of Contents**RESULTS OF OPERATIONS****2012 and 2011 Compared**

We reported net income for the three months ended March 31, 2012 of \$1.32 million, or \$0.49 per share. For the three months ended March 31, 2011, we reported a net loss of \$2.38 million, or \$0.86 per share. Net income increased in 2012 by \$3.70 million primarily due to increased operating revenues including a decrease in unrealized losses on derivative instruments partially offset by increased lease operating and depreciation and depletion expenses and income tax expenses. Operating revenues increased by \$7.94 million in 2012 as compared to 2011 largely due to an increase in our price per barrel realized on crude oil sales and less unrealized losses on crude oil commodity contracts.

The significant components of net income are discussed below.

Oil and gas sales increased \$1.91 million, or 9% from \$21.12 million for the three months ended March 31, 2011 to \$23.03 million for the three months ended March 31, 2012. Crude oil and natural gas sales vary due to changes in volumes of production sold and realized commodity prices. Our realized prices at the well head increased an average of \$10.11 per barrel, or 11% on crude oil during the first quarter 2012 from the same period in 2011 while our average well head price for natural gas decreased \$1.42 per mcf, or 24% during the first quarter 2012 from the same period in 2011.

Our crude oil production increased by 21,000 barrels, or 13% from 156,000 barrels for the first quarter 2011 to 177,000 barrels for the first quarter 2012. Our natural gas production decreased by 11,000 mcf, or 1% from 1,166,000 mcf for the first quarter 2011 to 1,155,000 mcf for the first quarter 2012. The crude oil production variances are a result of our recent drilling success in West Texas and drilling and acquisition activities in the Gulf Coast regions as we place new wells into production, partially offset by the natural decline of existing properties. The natural gas volume decreases are primarily due to the natural decline of the primary natural gas producing offshore properties, partially offset by production from wells in the West Texas region recently placed into production.

The following table summarizes the primary components of production volumes and average sales prices realized for the three months ended March 31, 2012 and 2011 (excluding realized gains and losses from derivatives).

	Three Months Ended March 31,		
	2012	2011	Increase / (Decrease)
Barrels of Oil Produced	177,000	156,000	21,000
Average Price Received	\$ 100.46	\$ 90.35	\$ 10.11
Oil Revenue (In 000 s)	\$ 17,755	\$ 14,136	\$ 3,619
Mcf of Gas Produced	1,155,000	1,166,000	(11,000)
Average Price Received	\$ 4.57	\$ 5.99	\$ (1.42)
Gas Revenue (In 000 s)	\$ 5,276	\$ 6,987	\$ (1,711)
Total Oil & Gas Revenue (In 000 s)	\$ 23,031	\$ 21,123	\$ 1,908

Realized net gains on derivative instruments include net gains of \$0.12 million on the settlements of crude oil derivatives for the first quarter 2012 and net losses of \$0.73 million and net gains of \$1.05 million on the settlements of crude oil and natural gas derivatives, respectively, for the first quarter 2011. In the first quarter 2012, we unwound and monetized crude oil swaps with original settlement dates from January 2012 through December 2013 for net proceeds of \$0.66 million. The \$0.66 million gain associated with these early settlement transactions is included in realized gain on derivative instruments for the three months ended March 31, 2012.

Oil and gas prices received including the impact of derivatives but excluding the early settlement transactions were:

Three Months Ended March 31,

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

	2012	2011	Increase
Oil Price	\$ 97.40	\$ 85.68	\$ 11.72
Gas Price	\$ 4.57	\$ 6.90	\$ (2.33)

We do not apply hedge accounting to any of our commodity based derivatives, thus changes in the fair market value of commodity contracts held at the end of a reported period, referred to as mark-to-market adjustments, are recognized as unrealized gains and losses in the accompanying consolidated statements of operations. As oil and natural gas prices remain volatile, mark-to-market accounting treatment creates volatility in our revenues. During the three months ended March 31, 2012, we recognized \$3.78 million in unrealized losses primarily associated with crude oil fixed swaps and collars due to an increase in crude oil futures market prices between December 31, 2011 and March 31, 2012. For the three months ended March 31, 2011, we recognized \$9.51 million in unrealized losses primarily associated with crude oil fixed swaps and collars due to a decrease in crude oil futures market prices between December 31, 2010 and March 31, 2011.

Table of Contents

Field service income increased \$0.51 million, or 11% from \$4.61 million for the first quarter 2011 to \$5.12 million for the first quarter 2012. This increase is a direct result of upturns in utilization of equipment and the market allowing us to charge higher rates to customers. Workover rig services represent the bulk of our field service operations, and those rates all increased in our most active districts. Utilization of our workover rigs increased in all districts. Water hauling and disposal services also increased in our South Texas district.

Lease operating expense increased \$1.59 million, or 20% from \$7.91 million for the first quarter 2011 to \$9.50 million for the first quarter 2012. This increase is primarily due to higher salt water disposal costs, production taxes and chemical expenses associated with new wells coming on line from the recent drilling success in West Texas, partially offset by decreased operating expenses on the offshore properties and decreased expensed workovers across all districts during the first three months of 2012.

Field service expense increased \$0.48 million, or 12% from \$3.91 million for the first quarter 2011 to \$4.39 million for the first quarter 2012. Field service expenses primarily consist of salaries and vehicle operating expenses which have increased during the three months ended March 31, 2012 over the same period of 2011 as a direct result of increased services and utilization of the equipment.

Depreciation, depletion, amortization and accretion on discounted liabilities increased \$0.80 million, or 13% from \$6.04 million for the first quarter 2011 to \$6.84 million for the first quarter 2012. This increase is primarily due to increased depletion rates recognized during the first quarter of 2012 associated with offshore properties driven by a decrease in estimated remaining economic reserves as several of our offshore properties enter into the last phase of their productive lives.

General and administrative expense increased \$0.85 million, or 28% from \$3.04 million for the three months ended March 31, 2011 to \$3.89 million for the three months ended March 31, 2012. This increase is largely due to increased personnel costs in 2012. The largest component of these personnel costs was salaries, however rent, audit related costs and employee related taxes and insurance also contributed to the increase.

Gain on sale and exchange of assets of \$0.70 million and \$0.22 million for the three months ended March 31, 2012 and 2011, respectively, consists of sales of non-essential field service equipment.

Interest expense decreased \$0.45 million, or 38% from \$1.21 million for the first quarter 2011 to \$0.76 million for the first quarter 2012. This decrease includes the reduction of interest expense of \$0.41 million for the three months ended March 31, 2012 associated with interest on the subordinated credit facility with a related party private lender which was paid off in June 2011. The remaining decreases for the three months ended March 31, 2012, relate to reduced weighted average interest rates substantially offset by an increase in average debt outstanding during the 2012 period.

A provision for income taxes of \$0.39 million, or an effective tax rate of 23% was recorded for the three months ended March 31, 2012 versus a benefit of \$1.11 million, or an effective tax rate of 32% for the three months ended March 31, 2011. Our provision for income taxes varies from the federal statutory tax rate of 34% primarily due to percentage depletion. We are entitled to percentage depletion on certain of our wells, which is calculated without reference to the basis of the property. To the extent that such depletion exceeds a property's basis it creates a permanent difference, which lowers our effective rate. The lower effective tax rate in 2012 is primarily due to larger percentage depletion deductions in excess of basis.

LIQUIDITY AND CAPITAL RESOURCES

Our primary capital resources are cash provided by our operating activities and our credit facility.

Net cash provided by our operating activities for the three month period ended March 31, 2012 was \$10.28 million. Excluding the effects of significant unforeseen expenses or other income, our cash flow from operations fluctuates primarily because of variations in oil and gas production and prices or changes in working capital accounts. Our oil and gas production will vary based on actual well performance but may be curtailed due to factors beyond our control.

Our realized oil and gas prices vary due to world political events, supply and demand of products, product storage levels, and weather patterns. We sell the vast majority of our production at spot market prices. Accordingly, product price volatility will affect our cash flow from operations. To mitigate price volatility we sometimes lock in prices for some portion of our production through the use of financial instruments.

Our activities include development and exploratory drilling. Our strategy is to develop a balanced portfolio of drilling prospects that includes lower risk wells with a high probability of success and higher risk wells with greater economic potential. During 2012, we plan on drilling approximately 35 wells (30 net), mainly in the Permian Basin in West Texas and in the central Oklahoma area.

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

In February 2012 we invested a net \$6.32 million to acquire additional working interest in producing properties that we operate in our Gulf Coast region. It is our goal to increase our oil and gas reserves and production through the acquisition and development of oil and gas properties. We also continue to explore and consider opportunities to further expand our oilfield servicing revenues through additional investment in field service equipment. However, the majority of our capital spending is discretionary, and the ultimate level of expenditures will be dependent on our assessment of the oil and gas business environment, the number and quality of oil and gas prospects available, the market for oilfield services, and oil and gas business opportunities in general.

Table of Contents

We have in place both a stock repurchase program and a limited partnership interest repurchase program under which we expect to continue spending during 2012. For the three month period ended March 31, 2012, we have spent \$0.48 million under these programs.

We currently maintain a credit facility totaling \$250 million, with a current borrowing base of \$125 million. The bank reviews the borrowing base semi-annually and, at their discretion, may decrease or propose an increase to the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit and we are subject to certain financial and operational covenants defined in the agreement. We are currently in compliance with these covenants. If we do not comply with these covenants on a continuing basis, the lenders have the right to refuse to advance additional funds under the facility and/or declare all principal and interest immediately due and payable.

It is our goal to increase our oil and gas reserves and production through the acquisition and development of oil and gas properties. We also continue to explore and consider opportunities to further expand our oilfield servicing revenues through additional investment in field service equipment. However, the majority of our capital spending is discretionary, and the ultimate level of expenditures will be dependent on our assessment of the oil and gas business environment, the number and quality of oil and gas prospects available, the market for oilfield services, and oil and gas business opportunities in general.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 4. CONTROLS AND PROCEDURES

As of the end of the current reported period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective with respect to the recording, processing, summarizing and reporting, within the time periods specified in the Commission's rules and forms, of information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

There were no changes in the Company's internal control over financial reporting that occurred during the first three months of 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. LEGAL PROCEEDINGS**

None.

Item 1A. RISK FACTORS

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no sales of equity securities by the Company during the period covered by this report.

During the three months ended March 31, 2012, the Company purchased the following shares of common stock as treasury shares.

2012 Month	Number of Shares	Average Price Paid per share	Maximum Number of Shares that May Yet Be Purchased Under The Program at Month - End (1)
January	8,119	\$ 22.25	147,294
February	4,563	\$ 22.73	142,731
March	6,938	\$ 24.69	135,793
Total/Average	19,620	\$ 23.23	

- (1) In December 1993, we announced that our Board of Directors authorized a stock repurchase program whereby we may purchase outstanding shares of our common stock from time-to-time, in open market transactions or negotiated sales. The Board of Directors of the Company approved an additional 300,000 shares of the Company's stock to be included in the stock repurchase program effective May 20, 2010. A total of 3,000,000 shares have been authorized, to date, under this program. Through March 31, 2012 we repurchased a total of 2,864,207 shares under this program for \$40,232,924 at an average price of \$14.05 per share. Additional purchases may occur as market conditions warrant. We expect future purchases will be funded with internally generated cash flow or from working capital.
