CARDIUM THERAPEUTICS, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

Delaware
(State of incorporation)

27-0075787
(IRS Employer

Identification No.)

12255 El Camino Real, Suite 250

San Diego, California 92130
(Address of principal executive offices)

(858) 436-1000
(Registrant's telephone number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.): Yes No

As of November 9, 2012, the registrant had 129,217,356 shares of common stock outstanding.

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

Certain statements in this report, including information incorporated by reference, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and the Private Securities Litigation Reform Act of 1995. Forward-looking statements reflect current views about future events and financial performance based on certain assumptions. They include opinions, forecasts, intentions, plans, goals, projections, guidance, expectations, beliefs or other statements that are not statements of historical fact. Words such as may, will, should, could, would, expects, plans, believes, anticipates, intends, estimates, ap projects, or the negative or other variation of such words, and similar expressions may identify a statement as a forward-looking statement. Any statements that refer to projections of our future financial performance, our anticipated growth and trends in our business, our goals, strategies, focus and plans, and other characterizations of future events or circumstances, including statements expressing general optimism about future operating results and the development of our products, are forward-looking statements. Forward-looking statements in this report may include statements about:

our ability to fund operations and business plans, and the timing of any funding or corporate development transactions we may pursue;

planned development pathways and potential commercialization activities or opportunities;

the timing, conduct and outcome of discussions with regulatory agencies, regulatory submissions and clinical trials;

our beliefs and opinions about the safety and efficacy of our products and product candidates and the anticipated results of our clinical studies and trials;

our ability to enter into acceptable relationships with one or more contract manufacturers or other service providers on which may depend, and the ability of such contract manufacturers or other service providers to manufacture biologics, devices, nutraceuticals or other key products or components, or to provide other services, of an acceptable quality on a timely and cost-effective basis;

our ability to enter into acceptable relationships with one or more development or commercialization partners to advance the commercialization of new products and product candidates and the timing of any product launches;

our growth, expansion and acquisition strategies, the success of such strategies, and the benefits we believe can be derived from such strategies;

our ability to pursue and effectively develop new product opportunities and acquisitions and to obtain value from such product opportunities and acquisitions;

our ability to maintain the listing of our common stock on a national exchange;

the scope, potential value or enforceability of our intellectual property rights and those of others, including actual or potential competitors;

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

the potential or expected outcome of litigation matters;

the anticipated activities of our personnel, consultants and collaborators;

expectations concerning our operations outside the United States;

current and future economic and political conditions and their expected impact on our business;

anticipated trends in the industries and markets we pursue;

the impact of new accounting pronouncements;

management's goals and plans for future operations; and

other assumptions described in this report underlying or relating to any forward-looking statements.

The forward-looking statements in this report speak only as of the date of this report and caution should be taken not to place undue reliance on any such forward-looking statements. Forward-looking statements are subject to certain events, risks, and uncertainties that may be outside of our control. When considering forward-looking statements, you should carefully review the risks, uncertainties and other cautionary statements in this report as they identify certain important factors that could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. These factors include, among others, the risks described under Item 1A and elsewhere in this report, as well as in other reports and documents we file with the United States Securities and Exchange Commission (SEC).

Unless the context requires otherwise, all references in this report to the Company, Cardium, we, our, and us refer to Cardium Therapeutics, and, as applicable, Post-Hypothermia Corporation (formerly, InnerCool Therapies, Inc.), Tissue Repair Company and MedPodium Health Sciences, Inc., each a wholly-owned subsidiary of Cardium.

CARDIUM THERAPEUTICS, INC. AND SUBSIDIARIES

(a development stage company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Organization, Liquidity and Going Concern

Organization

Cardium Therapeutics, Inc. (the Company, Cardium, we, our and us) was incorporated in Delaware in December 2003. We are a medical technology company primarily focused on the development and commercialization of a portfolio of novel products and devices for cardiovascular and ischemic disease, wound healing and tissue repair.

We are currently operating in three primary business lines. Our Cardium Biologics business is developing innovative cardiovascular product candidates. Our Tissue Repair Company subsidiary is developing and commercializing a late-stage line of regenerative medicine product candidates. Finally our MedPodium Health Sciences subsidiary and our newly-acquired To Go Brands business are developing and marketing a line of nutraceuticals and other healthy lifestyle products.

In October 2005, we acquired a portfolio of biologic growth factors and related delivery techniques from the Schering AG Group (now part of Bayer AG) for potential use in treating ischemic and other cardiovascular conditions.

In March 2006, we acquired the technologies and products of InnerCool Therapies, Inc., a medical technology company in the emerging field of therapeutic hypothermia, or patient temperature modulation, whose systems and products are designed to rapidly and controllably cool the body to reduce cell death and damage following acute ischemic events such as cardiac arrest and stroke, and to potentially lessen or prevent associated injuries such as adverse neurologic outcomes.

In August 2006, we acquired rights to assets and technologies of Tissue Repair Company, a company focused on the development of growth factor therapeutics for the potential treatment of tissue wounds such as chronic diabetic wounds, and whose product candidate, Excellagen is initially being developed as a single administration therapeutic for the treatment of non-healing, neuropathic diabetic foot ulcers. Tissue Repair Company is operated as a wholly-owned subsidiary of Cardium.

On July 24, 2009, we sold all of the assets and liabilities of our InnerCool Therapies business to Philips Electronics North America Corporation (Philips) for \$11.25 million, as well as the transfer of approximately \$1.5 million in trade payables (the Philips Transaction).

On September 28, 2012 we acquired substantially all of the business assets and product portfolio of privately-held To Go Brands, Inc. (Seller). To Go Brands develops, markets and sells a portfolio of products, including nutraceutical powder mixes, supplements and chews intended to support healthy lifestyles. These products are sold through food, drug and mass channels at retailers including Whole Foods®, CVS®, Kroger®, GNC®, Jewel-Osco®, Ralph s Supermarkets®, Meijr®, and the Vitamin Shoppe® and from the Company s web-based store.

Our business is focused on the acquisition and strategic development of product opportunities or businesses having the potential to address significant unmet medical needs, and having definable pathways to commercialization. We intend to consider various corporate development transactions designed to place our product candidates into larger organizations or with partners having existing commercialization, sales and marketing resources, and a need for innovative products. Such transactions could involve the sale, partnering or other monetization of particular product opportunities or businesses.

We are a development stage company. We have yet to generate positive cash flows from operations, and are essentially dependent on debt and equity funding to finance our operations.

Liquidity and Going Concern

As of September 30, 2012, we had \$4,472,131 in cash and cash equivalents, and \$50,000 in restricted cash. Our working capital at September 30, 2012 was \$4,766,074.

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

Net cash used in operating activities was \$7,068,324 for the nine months ended September 30, 2012 compared to \$5,606,574 for the nine months ended September 30, 2011. The increase in net cash used in operating activities was due primarily to testing and process

Table of Contents

validation costs for the initial inventory of our Excellagen topical treatment gel. Since inception, our operations have consumed substantial amounts of cash and we have had only limited revenues. From inception (December 22, 2003) to September 30, 2012, net cash used in operating activities has been \$92,150,085.

Our primary source of liquidity has been cash flows from financing activities and in particular proceeds from sales of our debt and equity securities. Net cash provided by financing activities was \$6,835,042 for the nine months ended September 30, 2012. This included a registered direct equity financing with three institutional investors of 17.9 million shares of Cardium common stock priced at \$0.28 per share with no warrant coverage for net proceeds of \$4.5 million and the sale of 5.2 million shares of common stock in at-the-market transactions for net proceeds of \$1.9 million. From inception (December 22, 2003) to September 30, 2012 net cash provided by financing activities has been \$101,019,633.

Net cash used in investing activities for the nine month period ended September 30, 2012 was \$15,866. Net cash used in investing activities since inception has been \$4,397,417. At September 30, 2012 we did not have any significant capital expenditure requirements.

We anticipate that negative cash flow from operations will continue for the foreseeable future. Although we believe that we have sufficient capital to support our operations through March 30, 2013, we are still a development stage company subject to all the risks and uncertainties that are typical in the lifecycle stage of our business. Our principal business objective is to complete an additional strategic licensing agreement to advance sales of the Excellagen product family and/or another corporate transaction. If we fail to enter into an additional strategic licensing arrangement or generate sufficient product sales, we will not generate sufficient cash flows to cover our operating expenses.

We do not have any unused credit facilities or other sources of capital available to us at this time. We intend to secure additional working capital through sales of additional debt or equity securities. On September 28, 2010, we entered into a Sale Agreement with Brinson Patrick Securities Corporation which enables us to use Brinson Patrick as a sales manager to sell shares of our common stock on a best efforts basis from time to time in at-the-market transactions pursuant to our shelf registration statement. During the nine months ended September 30, 2012 we raised \$1.9 million under this agreement, all of which was raised during the first quarter of 2012. Other than this at-the-market facility, we do not have any financing arrangements in place at this time, nor can we provide any assurance about the availability or terms of this or any future financing.

Our history of recurring losses and uncertainties as to whether our operations will become profitable raise substantial doubt about our ability to continue as a going concern. Our consolidated financial statements do not include any adjustments related to the recoverability of assets or classifications of liabilities that might be necessary should we be unable to continue as a going concern.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements have been prepared in accordance with authoritative guidance for development stage enterprises.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles for interim financial information and the instructions to Form 10-Q. In the opinion of management, all adjustments (consisting of normal accruals) considered for a fair presentation have been included. Operating results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. For further information, refer to the condensed consolidated financial statements and footnotes thereto included in the Company's Form 10-K for the year ended December 31, 2011 filed with the Securities and Exchange Commission on March 30, 2012.

Principles of Consolidation

The accompanying consolidated financial statements include the financial statements of Cardium and its wholly-owned subsidiaries Tissue Repair Company and MedPodium Health Sciences, Inc. All inter-company balances and transactions have been eliminated in consolidation.

FDIC Insured Limits

Financial instruments that subject us to concentration of credit risk consist primarily of cash and cash equivalents. We maintain all of our cash and cash equivalents on deposit with one institution. We perform periodic evaluations of the relative credit standing of this institution. At September 30, 2012, our cash on deposit exceeded the FDIC insured limits.

Restricted Cash

We have a total of \$50,000 invested in a certificate of deposit that serves as collateral for an outstanding letter of credit, and is therefore restricted. The letter of credit is a security deposit towards tenant improvements for our office space and is expected to be reduced by \$50,000 on March 1, 2013. Therefore, \$50,000 is classified as current restricted cash as of September 30, 2012 in our consolidated condensed balance sheet.

Inventory

Inventories are stated at lower of cost or market and consist of raw materials and finished goods associated with the Excellagen, To Go Brands and MedPodium Nutra-Apps product lines. Inventories are valued on a first-in, first-out (FIFO) basis.

Table of Contents

Revenue Recognition

Revenue is recorded when (1) the customer accepts delivery of the product, title has been transferred and the Company has no significant obligations remaining to be performed; (2) a final understanding as to specific nature and terms of the agreed upon transaction has occurred; (3) price is fixed; and (4) collection is reasonably assured. Sales are presented net of discounts and allowances.

Impairment of Long-Lived Assets

Long-lived assets to be held and used, including property, plant and equipment as well as intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable such as:

a significant decline in the observable market value of an asset;

a significant change in the extent or manner in which an asset is used; or

a significant adverse change that would indicate that the carrying amount of an asset or group of assets is not recoverable.

Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. In the event that such cash flows are not expected to be sufficient to recover the carrying amount of the assets, the assets are written-down to their estimated fair values. Long-lived assets to be disposed of are carried at fair value less costs to sell. We do not believe there was any impairment of long-lived assets at September 30, 2012.

Loss Per Common Share

We compute loss per share, in accordance with ASC Topic 260 which requires dual presentation of basic and diluted earnings per share.

Basic income or loss per common share is computed by dividing net income or loss by the weighted average number of common shares outstanding during the period. Diluted income or loss per common share is computed by dividing net income or loss by the weighted average number of common shares outstanding, plus the issuance of common shares, if dilutive, that could result from the exercise of outstanding stock options and warrants. These potentially dilutive securities were not included in the calculation of loss per common share for the three and nine months ended September 30, 2012 or 2011 because their effect would be anti-dilutive.

As of September 30, 2012 potentially dilutive securities consist of outstanding stock options and warrants to acquire 32,499,025 shares of our common stock. As of September 30, 2011, potentially dilutive securities consisted of outstanding stock options and warrants to acquire 35,254,835 shares of our common stock.

Stock-Based Compensation

Stock-based compensation costs are recognized on a straight-line basis over the requisite service period of the award, which is generally the vesting term of the award.

Total stock-based compensation expense included in the condensed consolidated statements of operations was allocated to research and development and general and administrative expenses as follows:

	For the Three Months Ended September 30,	
	2012	2011
Research and development	\$ 5,999	\$ 9,821
General and administrative	36,152	43,334

Table of Contents

Income Taxes

We file income tax returns in the United States (federal) and California. In most instances, we are no longer subject to federal, state and local income tax examinations by tax authorities for years prior to 2009. We are currently subject to examination for the years ended December 31, 2010 and 2011.

We follow the provisions of ASC Topic 740, *Accounting for Uncertainty in Income Taxes*, issued on January 1, 2007. This Interpretation clarifies the accounting and reporting for uncertainties in income tax law. It prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions. Differences between a tax position taken or expected to be taken in the Company's tax returns and the amount of benefit recognized and measured in the financial statements result in unrecognized tax benefits, which are recorded in the balance sheet as either a liability for unrecognized tax benefits or reductions to recorded tax assets, as applicable. As of September 30, 2012 and December 31, 2011, no liability for unrecognized tax benefits was required to be recorded.

Interest costs related to unrecognized tax benefits are required to be calculated and would be classified as interest expense in the condensed consolidated statement of operations. Penalties would be recognized as a component of general and administrative expenses. No interest and penalties were recorded during the three and nine months ended September 30, 2012 and 2011.

As of September 30, 2012 and December 31, 2011 we had net operating loss carryovers of \$89 million and \$80 million, respectively. These net operating losses are subject to Internal Revenue Code Section 382, which could result in limitations on the amount of such losses that could be utilized during any taxable year. The net operating losses begin to expire in 2023 for federal income purposes and in 2013 for state income tax purposes.

The ultimate realization of deferred tax assets depends on the generation of future taxable income during the periods in which those net operating losses are available. We consider projected future taxable income and tax planning strategies in making our assessment. At present, we do not have a sufficient history of income to conclude that it is more-likely-than-not that we will be able to realize all tax benefits in the near future and therefore a valuation allowance was established for the full value of the deferred tax asset.

A valuation allowance will be maintained until sufficient positive evidence exists to support the reversal of any portion or all of the valuation.

Recent Accounting Pronouncements

We do not believe that any recently issued accounting standards, if adopted, would have a material impact on our condensed consolidated financial statements.

Note 3. Business Combinations

On September 28, 2012 we completed our acquisition of privately-held To Go Brands, Inc, a Nevada corporation (Seller). To Go Brands develops, markets and sells a portfolio of products, including nutraceutical powder mixes, supplements and chews intended to support healthy lifestyles. We acquired the Seller's interest in substantially all of the assets, properties, goodwill and rights related to the business, including without limitation, accounts receivable, inventory, furniture and fixtures, patents, trademarks, and other intellectual property rights. The product line includes drink mixes in convenient stick packs that are designed to pour directly into a water bottle, as well as mix packages for home use and capsule-based dietary supplements. These products are sold through food, drug and mass channels at retailers including Whole Foods®, CVS®, Kroger®, GNC®, Jewel-Osco®, Ralph's Supermarkets®, Meijr®, and the Vitamin Shoppe® and from the company's web-based store.

Pursuant to the terms of the asset purchase agreement, we issued to the Seller 9.6 million shares of our common stock, which are unregistered and restricted shares. We issued 8.4 million unregistered shares of common stock into an escrow account, to be held for 6 months and then released in tranches over the following one year period ending 18 months following the closing of the transaction. An additional 1.2 million shares of common stock have been issued into escrow and will be held for an 18-month period as security for indemnification claims that may arise in connection with the asset purchase transaction or the related business. We acquired the Seller's interest in substantially all of the assets, properties, goodwill and rights related to the business, including without limitation, accounts receivable, inventory, furniture and fixtures, patents, trademarks, and other intellectual property rights.

We accounted for the acquisition of To Go Brands in accordance with ASC 805 *business combinations*. The results of operations of this business have been included in the accompanying condensed consolidated financial statements from September 28, 2012, the date of acquisition. The estimated total cost of the acquisition is as follows:

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

Issuance of common stock	\$ 2,016,000
Transaction costs	80,000
Total purchase price	\$ 2,096,000

Table of Contents

The preliminary allocation of the purchase price for the To Go Brands acquisition as of September 28, 2012, the date of the acquisition, is as follows:

Assets acquired:	
Cash	\$ 288,151
Accounts receivable	64,000
Inventory	433,738
Property and equipment	53,958
Prepaid expenses	6,720
Deposits	13,298
Brands	385,000
Product Formulas	596,000
Customer database	77,000
Goodwill	539,863
Total assets acquired	\$ 2,457,728
Less liabilities assumed:	
Accounts payable	\$ 118,961
Other accrued expenses	242,767
Total liabilities assumed	\$ 361,728
Total consideration	\$ 2,096,000

Our allocation of the purchase price is preliminary and is subject to change as additional information becomes available to us.

The unaudited pro forma consolidated financial information for the three and nine month periods ended September 30, 2012, is as follows:

Pro Forma Combined for the Acquisition of To Go Brands, Inc.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Net Sales	\$ 410,582	\$ 1,559,078	\$ 2,134,868	\$ 4,0314,239
Net (loss)	(2,160,726)	(1,413,603)	(6,924,099)	(5,041,290)
Net (loss) per common share - basic and diluted	(\$ 0.02)	(\$ 0.02)	(\$ 0.06)	(\$ 0.05)
Weighted average common shares outstanding basic and diluted	127,027,356	92,697,967	123,593,856	92,697,967

Unaudited pro forma condensed consolidated financial information is presented above as if the To Go Brands acquisition had occurred at the beginning of the periods shown. The results have been adjusted to account for the amortization of acquired intangibles and other pro forma adjustments. The pro forma information presented does not purport to present what actual results would have been had the acquisition occurred at the beginning of such periods, nor does the information project results for any future period. The proforma information includes net sales of To Go Brands for the nine months ended September 30, 2012 totaling \$2.1 million, compared to net sales of \$4.0 million for the nine months ended September 30, 2011; net sales for the three months ended September 30, 2012 were \$405,000, compared to net sales of \$1.56 million for the same period in 2011; net loss for To Go Brands for the nine months ended September 30, 2012 was \$(445,000), compared to a net income of \$126,000 for the nine months ended September 30, 2011.

Table of Contents

We will be providing audited financial statements for the To Go Brands business along with complete pro-forma financial statements by amendment to Form 8-K not later than December 14, 2012

Note 4. Intangible Assets

On November 17, 2010 we entered into a custom technology access and product license agreement with BioZone Laboratories, Inc. (BioZone) for the co-development and strategic licensing of a portfolio of up to 20 aesthetics, advanced skin care formulations and other products for our MedPodium product line. The agreement grants us a royalty-free license of BioZone technology to develop a portfolio of 20 products, customized to our product specifications. We have exclusive rights to the products developed to our specifications. The license is for a term of 10 years with an automatic 1 year renewal at our option, without any material restrictions or additional consideration. In exchange for the technology access license we paid BioZone a fee of \$1.0 million. The license fee was paid through the issuance of 2 million shares of our unregistered common stock. The license fee is being amortized over 11 years on a straight line basis.

On December 20, 2011 we received a license for a portfolio of nutraceutical, pharmaceutical and medical food product opportunities with SourceOne Global Partners, LLC (SourceOne). In exchange for the license we issued 1.5 million restricted shares of our common stock valued at \$0.29 per share. The shares were deposited in escrow for nine months and subject to release at future dates thereafter based on our advancement of certain jointly-developed products. Under terms of the licensing arrangement, we received a fully-paid-up license to commercialize formulations of various SourceOne ingredients to be marketed as nutraceuticals, pharmaceuticals and/or medical foods. In addition, we obtained the right to designate up to ten products to be jointly developed by the parties, with cash and other resources to be contributed jointly under a profit-share arrangement. The license fee is being amortized over 10 years on a straight line basis.

Under the SourceOne agreement, we also made an equity investment in the form of unregistered, restricted shares of our common stock to acquire an option to purchase to a 15% ownership interest in SourceOne Global Partners. The option was acquired through the issuance into escrow of 1.5 million shares of our common stock which were recorded at a value of \$0.29 per share based on the closing price of our stock on December 19, 2011, and is exercisable for an exercise fee of \$10,000. The shares of our common stock issued for the option are being held in escrow and are subject to release in four allotments at 6, 9, 12 and 18 months following the closing date. During the nine months ended September 30 2012, 750,000 shares have been released from the escrow account. We also have certain rights to maintain our proportionate ownership interest in SourceOne, and a right of first refusal to acquire SourceOne on the terms that SourceOne were to offer a third-party acquiror.

On September 28, 2012 we acquired substantially all of the assets, business and product portfolio of privately-held To Go Brands, Inc., a Nevada corporation or Seller pursuant to an Asset Purchase Agreement among Cardium, its wholly-owned subsidiary and Seller.

Technology license fees and intangible assets consisted of the following:

		September 30, 2012	
	Cost	Accumulated Amortization	Net Asset
Technology and product license fee	\$ 1,435,000	\$ 203,079	\$ 1,231,921
Intangible assets	1,058,000		1,058,000
	\$ 2,493,000	\$ 203,079	\$ 2,289,921

		December 31, 2011	
	Cost	Accumulated Amortization	Net Asset
Technology and product license fee	\$ 1,435,000	\$ 102,273	\$ 1,332,727

Amortization expense for the three months ended September 30, 2012 and September 30, 2011 was \$33,602 and \$22,728, respectively.

Amortization expense for the nine months ended September 30, 2012 and September 30, 2011 was \$100,806 and \$68,182, respectively.

Table of Contents

Based on the carrying amount of the intangible assets as of September 30, 2012 the amortization expense for the next five years and thereafter is estimated as follows:

Year Ending December 31,	Amount
2012	\$ 71,907
2013	287,642
2014	287,642
2015	287,642
2016	287,642
Thereafter	1,067,446
Total	\$ 2,289,921

Note 5. Accrued Liabilities

Accrued liabilities consisted of the following:

	September 30, 2012	December 31, 2011
Accrued expenses - other	163,454	125,769
Accrued payroll and benefits	493,291	339,125
Total	\$ 656,745	\$ 464,894

Note 6. Derivative Liabilities

Derivative liabilities consisted of warrants to purchase 2,134,920 shares of our common stock that contain down-round provisions. The down-round provisions contained in these warrants reduce the exercise price of these warrants or increase the number of shares issuable upon exercise of these warrants if we issue new equity or equity-linked securities at prices, or with exercise or conversion prices, that are less than the exercise price of these warrants. On February 16, 2012 the warrants were re-priced to \$0.28 due to the issuance of new equity. On March 9, 2012 the five year warrants expired. On that date the warrants were fair valued at \$21,349 and were reclassified to paid in capital upon expiration.

The fair value of the warrants was calculated as of March 9, 2012 using a Binomial Option Pricing Model approach with the following assumptions: exercise price \$0.28, closing price of common stock \$0.28, risk free interest rate of 0.06%, dividend yield of 0%, volatility of 102%. We recorded a change in fair value of \$64,157 for the three months ended March 31, 2012 which is shown as change in fair value of derivative liabilities in our condensed consolidated statement of operations.

	Fair Value
Balance outstanding, December 31, 2011	\$ 85,506
Change in fair value of derivative liability	(64,157)
Reclass to equity upon expiration of warrant	(21,349)
 Balance outstanding, September 30, 2012	 \$ 0

The fair value hierarchy distinguishes between assumptions based on market data (observable inputs) and an entity's own assumptions (unobservable inputs). The hierarchy consists of three levels:

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

Level one Quoted market prices in active markets for identical assets or liabilities;

Level two Inputs other than level one inputs that are either directly or indirectly observable; and

Level three Unobservable inputs developed using estimates and assumptions, which are developed by the reporting entity and reflect those assumptions that a market participant would use.

Table of Contents

Determining which category an asset or liability falls within the hierarchy requires significant judgment. We evaluate our hierarchy disclosures each quarter. Liabilities measured at fair value on a recurring basis are summarized as follows:

	Level 1	Level 2	Level 3	September 30, 2012
Liabilities				
Fair value of common stock warrants (derivative liabilities)	\$ 0	\$ 0	\$ 0	\$ 0
Total	\$ 0	\$ 0	\$ 0	\$ 0

	Level 1	Level 2	Level 3	December 31, 2011
Liabilities				
Fair value of common stock warrants (derivative liabilities)	\$ 0	\$ 0	\$ 85,506	\$ 85,506
Total	\$ 0	\$ 0	\$ 85,506	\$ 85,506

Note 7. Stock Option Activity

We have an equity incentive plan that was established in 2005 under which 5,665,856 shares of our common stock have been reserved for issuance to our employees, non-employee directors and consultants.

The following is a summary of stock option activity under our equity incentive plan and warrants issued outside of such plan to our employees and consultants, during the nine months ended September 30, 2012. At September 30, 2012, there was no intrinsic value in the outstanding options. The 50,000 options granted during the nine months ended September 30, 2012 had a fair value of \$0.16 and were subsequently cancelled.

	Number of Options or Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)
Balance outstanding, January 1, 2012	3,584,686	\$ 1.67	3.8
Granted	50,000	0.74	0
Exercised	0	0	0
Expired (vested)	(79,686)	0.94	0
Cancelled (unvested)	(50,000)	0.74	0
Balance outstanding, September 30, 2012	3,505,000	\$ 1.69	3.0
Exercisable, September 30, 2012	3,311,644	1.74	2.9

At September 30, 2012 we had unamortized stock option expense of \$90,722.

Note 8. Common Stock Purchase Warrants

In connection with various financing transactions we have issued common stock purchase warrants to investors. The following table summarizes warrant activity for the nine months ended September 30, 2012:

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)
Balance outstanding, January 1, 2012	31,649,835	\$ 0.97	2.8
Warrants issued	0	0	0
Warrants exercised	(2,730)	0.28	0
Warrants expired	(2,653,080)	1.04	0
Warrants cancelled	0	0	0
Balance outstanding, September 30, 2012	28,994,025	\$ 0.96	2.5
Warrants exercisable at September 30, 2012	28,994,025	\$ 0.96	2.5

Table of Contents

	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)
Warrants by Price Range			
Warrants priced between \$0.50 and \$0.64	18,283,513	\$ 0.59	2.7
Warrants priced between \$0.90 and \$3.78	10,710,512	\$ 1.59	2.1
Balance outstanding, September 30, 2012	28,994,025	\$ 0.96	2.3

Note 9. Subsequent Events

Management has evaluated subsequent events to determine if transactions occurring through the date on which the financial statements were available to be issued, require potential adjustments to, or disclosure in the Company's financial statements.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to help you understand our financial condition and results of operations for the three and nine months ended September 30, 2012. You should read the following discussion and analysis together with our unaudited condensed consolidated financial statements and the notes to the condensed consolidated financial statements included under Item 1 in this report, as well as the risk factors and other information included Part II, Item 1A, in our annual report on Form 10-K for our year ended December 31, 2011 (our 2011 Annual Report), and other reports and documents we file with the United States Securities and Exchange Commission (SEC). Our future financial condition and results of operations will vary from our historical financial condition and results of operations described below.

Overview

We are a medical technology company primarily focused on the development and commercialization of a portfolio of novel products and devices for cardiovascular and ischemic disease, wound healing and tissue repair.

Since we were initially funded in October 2005, we have made four strategic acquisitions and sold one business unit. We are currently operating in three primary business lines. Our Cardium Biologics business is developing innovative cardiovascular product candidates. Our Tissue Repair Company subsidiary is developing and commercializing a late-stage line of regenerative medicine product candidates. Finally our MedPodium Health Sciences subsidiary is developing and marketing a line of nutraceuticals and other healthy lifestyle products and recently acquired the products and assets of To Go Brands, Inc.

Our business is focused on the acquisition and strategic development of product opportunities or businesses having the potential to address significant unmet medical needs, and having definable pathways to commercialization, and on partnering or other monetization following the achievement of corresponding development objectives. Consistent with our overall business strategy, as our product opportunities and businesses are advanced and corresponding valuations established, we intend to consider various corporate development transactions designed to place our product candidates into larger organizations or with partners having existing commercialization, sales and marketing resources, and a need for innovative products. Such transactions could involve the sale, partnering or other monetization of particular product opportunities or businesses.

More detailed information about our products, product candidates, our intended efforts to develop our products and our business strategy is included in our 2011 Annual Report.

Recent Developments

During 2012, we have concentrated our operations on the following activities:

advancing our clinical study for Generx, the APSIRE clinical study, initially for the international markets

commercializing our initial Excellagen product through planned strategic partnerings and development of new product extensions based on our custom formulated collagen product platform for additional wound healing applications

Building our nutraceutical initiative, which has recently been expanded through our acquisition of To Go Brands; and

Continuing to review acquisitions of other businesses, product opportunities and technologies on favorable economic terms consistent with our long-term business strategy.

Generx® Commercial Development Plans

Generx (alferminogene tadenovec/CardioNovo) is a DNA-based angiogenic therapy being developed for the potential treatment of myocardial ischemia due to advanced coronary artery disease. Generx is designed to stimulate and promote the growth of supplemental collateral vessels to enhance myocardial blood flow (perfusion) following a one-time intracoronary administration from a standard cardiac infusion catheter in patients who have insufficient blood flow due to atherosclerotic plaque build-up in the coronary arteries.

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

In 2012, we initiated a follow-on clinical study of Generx involving approximately 100 patients at up to nine leading medical centers in Russia, and using SPECT imaging as a key clinical endpoint. The clinical study began in the first quarter of 2012. If the trial is successful, we hope to gain approval to sell Generx in Russian and other eastern European countries, where treatment with Generx may serve as a lower cost alternative to traditional surgery and stents. We also believe that having additional clinical evidence confirming the safety and effectiveness of Generx for improving coronary collateral circulation in men and women with severe coronary artery disease could potentially be used to optimize and broaden commercial development pathways in the U.S. and other industrialized countries.

Commercial Advancement of Excellagen®

On October 10, 2011, our Tissue Repair Company subsidiary received a 510(k) premarket notification from the U.S. Food and Drug Administration (FDA) for its fibrillar collagen-based Excellagen topical gel for wound healing of diabetic foot ulcers and other dermal wounds. Our 510(k) filing covers Excellagen's use as a wound care management medical device for topical application by health care professionals for patients with dermal wounds, which can include diabetic ulcers, pressure ulcers, venous ulcers, tunneled/undermined wounds, surgical and trauma wounds, second degree burns, and other types of wounds.

In first quarter 2012, we initiated market introduction of Excellagen in the U.S. and also announced our first international agreement for the sales and marketing of Excellagen with BL&H Co. Ltd., a South Korean pharmaceutical company. We also entered into a logistics and cold chain services agreement with Smith Medical Partners, a subsidiary of H. D. Smith focused on distribution of specialty, brand and generic pharmaceuticals, vaccines, injectables and medical/surgical materials. Smith Medical Partners provides practitioners with valuable product insights, information about patient assistant programs and can provide next-day delivery to all 50 states, allowing physicians and wound care clinics to receive Excellagen swiftly and reliably.

During the second quarter of 2012 we entered into an agreement with UK-based Angel Biomedical Limited, a subsidiary of Angel Biotechnology Holdings plc to manufacture Excellagen's formulated collagen. In addition to the manufacturing, Angel Biomedical Limited agreed to assist us to facilitate filing for a CE Mark for Excellagen's marketing and sale in the European Union and in other countries recognizing CE Mark approval. Additionally, Angel Biomedical will assist us in establishing its own Device Master File with the FDA's Center for Devices and Radiological Health covering the process for manufacturing Excellagen formulated fibrillar collagen gel.

We have entered into an agreement with Advanced Biosciences Research, an affiliate of bioRASI, for the planned commercialization of Cardium's professional-use Excellagen topical wound care management product in Russia and the nine additional member countries comprising the Commonwealth of Independent States (CIS). Under this agreement, bioRASI will be responsible for the registration and approval for the marketing and sales of Excellagen in the Russian Federation, and will assist us to develop an infrastructure plan for the marketing, sales and distribution of Excellagen in Russia and the CIS following final market approval. bioRASI is the sponsor and development partner responsible for the management and regulatory compliance of our Generx DNA-based

Table of Contents

cardiovascular angiogenic biologic Phase 3 / registration study for the treatment of patients with myocardial ischemia due to coronary disease which is currently underway in Russia. We intend to continue to promote Excellagen for sale in the U.S. and internationally and are in discussions with additional potential partners to commercialize Excellagen.

Commercialization of MedPodium® Modern Lifestyle Product Line

On December 20, 2011 we licensed a portfolio of nutraceutical, pharmaceutical and medical food product opportunities with Source One Global Partners, LLC (SourceOne). In exchange for the license we issued 1.5 million restricted shares of our common stock. The shares of common stock are being held in escrow for nine months and are subject to release at future dates thereafter based on our advancement of certain jointly-developed products. Under terms of the licensing arrangement, we received a fully-paid-up license to commercialize formulations of various SourceOne ingredients to be marketed as nutraceuticals, pharmaceuticals and/or medical foods. In addition, we can designate up to ten products to be jointly developed by the parties, with cash and other resources to be contributed jointly under a profit-share arrangement. We expect to develop additional nutraceuticals for the Medpodium product line under this license agreement.

Under the SourceOne agreement, we also made an equity investment in the form of unregistered, restricted shares of our common stock to acquire an option to purchase to a 15% ownership interest in SourceOne Global Partners. The option was acquired through the issuance into escrow of 1.5 million shares of our common stock which were recorded at a value of \$0.29 per share based on the closing price of our stock on December 19, 2011, and is exercisable for an exercise fee of \$10,000. The shares of our common stock issued for the option are held in escrow and are subject to release in four allotments at 6, 9, 12 and 18 months following the closing date. During the nine months ended September 30 2012, 750,000 shares have been released from the escrow account. We also have certain rights to maintain our proportionate ownership interest in SourceOne, and a right of first refusal to acquire SourceOne on the terms that SourceOne were to offer a third-party acquiror.

In December 2011, we launched MedPodium Nutra-Apps®, small, pharmaceutically-sealed, tasteless, easy-use capsules in pocket-sized packaging that are designed to address the unique needs of today’s highly mobile and technology-driven millennial consumers (aged 20-35). The launch included Neo-Energy® a dietary supplement capsule that provides a customized blend of natural caffeine, green tea leaf extract and Vitamin B3 (Niacin). Each of Neo-Energy’s small, easy-to-use capsules provide an amount of caffeine comparable to commonly-sold energy shots or a premium coffee, or multiple cans (about 20 ounces) of various energy drinks. We also launched Neo-Carb Bloc as a dietary supplement featuring a custom formulation of white kidney bean extract that has been shown to reduce the enzymatic digestion of dietary starches contained in many carbohydrate-rich foods such as pastas, rice, crackers, breads, pastries, potato chips, and donuts.*

During second quarter 2012, we introduced our new MedPodium Neo-Chill Nutra-App® at the National Association of Chain Drug Stores (NACDS) Marketplace 2012. MedPodium’s Neo-Chill Nutra-App® contains 200 mg Suntheanine®, a 100% pure L-theanine amino acid also found in green tea, which clinical studies have shown to promote an alert state of relaxation without drowsiness and to promote mental clarity and focus.* The company’s business strategy is focused on building relationships with distributors to handle product placement to retailers.

On September 28, 2012 we acquired substantially all of the assets, business and product portfolio of privately-held To Go Brands, Inc., a Nevada corporation. To Go Brands develops, markets and sells a portfolio of over 25 products, including nutraceutical powder mixes, supplements and chews to support healthy lifestyles. The product line includes antioxidant-rich drink mixes in convenient stick packs that are designed to pour directly into a water bottle, as well as mix packages for home use and capsule-based dietary supplements, including Trim Energy Green Coffee Bean , which supports healthy weight loss. * These products are sold through food, drug and mass channels at retailers including Whole Foods®, CVS®, Kroger®, GNC®, Jewel-Osco®, Ralph’s Supermarkets®, Meijr®, and the Vitamin Shoppe® and from the company’s web-based store. Based on our acquisition, To Go Brands will be responsible for coordinating the commercial activity of our MedPodium Products.

* Note: These statements have not been evaluated by the Food and Drug Administration, these products are not intended to diagnose, treat, or prevent any disease.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements included in Item 1 of this report have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of our financial statements in accordance with GAAP requires that we make estimates and assumptions that affect the amounts reported in our financial statements and their accompanying notes.

We have identified certain policies such as derivative liabilities and stock option compensation expense that are calculated using the Black-Scholes and Binomial Option Models that we believe are important to the portrayal of our financial condition and results of

Table of Contents

operations. These policies require certain estimates and assumptions, and the application of significant judgment by our management. We base our estimates on our historical experience, industry standards, and various other assumptions that we believe are reasonable under the circumstances. Actual results could differ from these estimates under different assumptions or conditions. An adverse effect on our financial condition, changes in financial condition, and results of operations could occur if circumstances change that alter the various assumptions or conditions used in such estimates or assumptions. If we were to undervalue derivative liabilities or stock option compensation expense we would understate the expense recognized in our condensed consolidated statements of operations. Conversely if we were to overvalue derivative liabilities and stock option compensation expenses we would overstate the expense recognized in our condensed consolidated statements of operations.

Our other significant accounting policies are described under Item 7 of our 2011 Annual Report and in the notes to the condensed consolidated financial statements included in this report.

Results of Operations

Three months ended September 30, 2012 compared to September 30, 2011.

Revenues for the three months ended September 30, 2012 were \$5,589 and were generated from our continuing distribution of our MedPodium Nutra-Apps and initial sales from our Excellagen topical gel. There were no revenues for the three months ended September 30, 2011. We expect to continue to generate revenues from sales of all our product lines during the balance of 2012.

Cost of sales for the three months ended September 30, 2012 was \$3,640. There were no costs of sales for the three months ended September 30, 2011.

Research and development expenses for the three months ended September 30, 2012 were \$508,342 compared to \$578,891 for the three months ended September 30, 2011. The decrease of \$70,549 was primarily due to reductions in expenses related to the development of our Excellagen product which is now commercially ready.

Selling, general and administrative expenses for the three months ended September 30, 2012 were \$1,389,731 compared to \$1,180,199 for the three months ended September 30, 2011. The increase of \$209,532 was due to increases selling expenses for the promotion and marketing of our MedPodium Nutra-Apps and Excellagen product lines.

Change in fair value of derivative liability was \$0 for the three months ended September 30, 2012, and \$157,628 for the three months ended September 30, 2011. The derivative liability was associated with down round price protection in certain warrants that expired during the first quarter of 2012 and therefore there was no gain or loss recorded during the three months ended September 30, 2012.

Interest income for the three months ended September 30, 2012 was \$1,204 compared to \$1,622 for the same three month period last year. The \$418 decrease in interest income for the three month period when compared to the same period last year was due to the decrease in cash available for investment during the respective periods. Interest expense for the three months ended September 30, 2011 was \$353 at September 30, 2011. There was no interest expense incurred during the three months ended September 30, 2012.

Nine months ended September 30, 2012 compared to September 30, 2011.

Revenues for the nine months ended September 30, 2012 were \$39,241 and were generated from our continuing distribution of our MedPodium Nutra-Apps and initial sales from our Excellagen topical gel. There were no revenues for the nine months ended September 30, 2011. We expect to continue to generate revenues from sales of all our products lines during the balance of 2012.

For the nine months ended September 30, 2012 cost of sales was \$15,191. There was no cost of sales for the nine months ended September 30, 2011

Research and development expenses for the nine months ended September 30, 2012 were \$2,097,675 compared to \$1,874,413 for the nine months ended September 30, 2011. The increase of \$223,262 was mainly due to increases in expenses related to the development of our Excellagen product during the first quarter of this year which became commercially ready, as well as costs related to our Generx Aspire study.

Selling, general and administrative expenses for the nine months ended September 30, 2012 were \$4,358,706 compared to \$3,641,620 for the nine months ended September 30, 2011. The increase of \$717,086 for the nine month period was primarily due to increases in professional fees,

Edgar Filing: Cardium Therapeutics, Inc. - Form 10-Q

payroll related costs, promoting and marketing costs related to our MedPodium & Excellagen product lines.

Changes in the fair value of derivative liability was a gain of \$64,157 for the nine months ended September 30, 2012 compared to a gain of \$458,199 for the same nine month period in 2011. The derivative liability relates to down round price protection feature on some of our outstanding warrants. The change in fair value of derivative liability for the nine months ended September 30, 2012 versus 2011 was the result of the reduced number of warrants classified as derivative liabilities as a result of the expiration of the price protection period and warrant redemptions.

Table of Contents

Interest income for the nine months ended September 30, 2012 was \$5,885 compared to \$10,020 for the same nine month period last year. The \$4,135 decrease in interest income for the nine month period when compared to the same period last year was related to the decrease in cash available for investment during the respective periods. Interest expense for the nine months ended September 30, 2012 was \$2,114 compared to \$4,415 for the nine months ended September 30, 2011 and primarily consisted of charges related to the financing of our annual insurance premiums.

Liquidity and Going Concern

As of September 30, 2012, we had \$4,472,131 in cash and cash equivalents, and \$50,000 in restricted cash. Our working capital at September 30, 2012 was \$4,766,074.

Net cash used in operating activities was \$7,068,324 for the nine months ended September 30, 2012 compared to \$5,606,574 for the nine months ended September 30, 2011. The increase in net cash used in operating activities was due primarily to testing and process validation costs for our initial inventory of our Excellagen topical treatment gel. Since inception, our operations have consumed substantial amounts of cash and we have had only limited revenues. From inception (December 22, 2003) to September 30, 2012, net cash used in operating activities has been \$92,150,085.

Our primary source of liquidity has been cash flows from financing activities and in particular proceeds from sales of our debt and equity securities. Net cash provided by financing activities was \$6,835,042 for the nine months ended September 30, 2012. This included a registered direct equity financing with three institutional investors of 17.9 million shares of Cardium common stock priced at \$0.28 per share with no warrant coverage for net proceeds of \$4.5 million and through the sale of 5.2 million shares of common stock under at-the-market transactions for net proceeds of \$1.9 million. From inception (December 22, 2003) to September 30, 2012 net cash provided by financing activities has been \$101,019,633.

Net cash used in investing activities since inception has been \$4,397,417. At September 30, 2012 we did not have any significant capital expenditure requirements.

We anticipate that negative cash flow from operations will continue for 2012. Although we believe that we have sufficient capital to support our operations through March 30, 2013, we are still a development stage company subject to all the risks and uncertainties that are typical in the lifecycle stage of our business. Our principal business objective is to complete an additional strategic licensing agreement to advance sales of the Excellagen product family and/or another corporate transaction. If we fail to enter into an additional strategic licensing arrangement or generate sufficient product sales, we will not generate sufficient cash flows to cover our operating expenses.

We do not have any unused credit facilities or other sources of capital available to us at this time. We intend to secure additional working capital through sales of additional debt or equity securities. On September 28, 2010, we entered into a Sale Agreement with Brinson Patrick Securities Corporation which enables us to use Brinson Patrick as a sales manager to sell shares of our common stock on a best efforts basis from time to time in at-the-market transactions pursuant to our shelf registration statement. During the nine months ended September 30, 2012 we raised \$1.9 million under this agreement, all of which was raised during the first quarter of 2012. Other than this at-the-market facility, we do not have any financing arrangements in place at this time, nor can we provide any assurance about the availability or terms of this or any future financing.

Our history of recurring losses and uncertainties as to whether our operations will become profitable raise substantial doubt about our ability to continue as a going concern. Our consolidated financial statements do not include any adjustments related to the recoverability of assets or classifications of liabilities that might be necessary should we be unable to continue as a going concern.

Off-Balance Sheet Arrangements

As of September 30, 2012, we did not have any significant off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Under the rules and regulations of the SEC, as a smaller reporting company we are not required to provide the information required by this item.

ITEM 4. CONTROLS AND PROCEDURES

We maintain certain disclosure controls and procedures. They are designed to help ensure that material information is: (i) gathered and communicated to our management, including our principal executive and financial officers, on a timely basis; and (ii) recorded, processed, summarized, reported and filed with the SEC as required under the Securities Exchange Act of 1934, as amended.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2012. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective for their intended purpose described above.

We acquired the business assets of To Go Brands, Inc. during the quarterly period ended September 30, 2012. That transaction is reasonably likely to materially affect, our internal control over financial reporting. At the time of the acquisition, To Go Brands' business included a number of products and distribution arrangements, including a company owned website. The acquisition will require us to integrate the historical financial and accounting information into our accounting system and to establish additional internal controls related to the acquired business.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

As of September 30, 2012 neither Cardium nor its subsidiaries were a party to any material pending legal proceeding nor was any of their property the subject of any material pending legal proceeding. In the course of our business, however, we could become engaged in various intellectual property, product-related and other matters in connection with the technology we develop, license or partner and the products we develop or sell. To the extent we are not successful in defending against any adverse claims concerning our technology, business relationships or products, we could be compelled to seek licenses from one or more third parties who could be direct or indirect competitors and who might not make licenses available on terms that we find commercially reasonable or at all, or to pay other forms of compensation or expenses. In addition, any such proceedings, even if decided in our favor, involve lengthy processes, are subject to appeals, and typically result in substantial costs and diversion of resources. In the course of our business, we are also routinely involved in proceedings such as disputes involving goods or services provided by various third parties to us, which we do not consider likely to be material to us, but which can nevertheless result in costs and diversions of resources to pursue and resolve.

ITEM 1A. RISK FACTORS

In addition to the risk factors described below, a number of risk factors that could materially affect our business, product candidates, financial condition and results of operations are described in our 2011 Annual Report. You should carefully consider the risks described below and under Item 1A of our 2011 Annual Report, as well as the other information in our 2011 Annual Report, this report and other reports and documents we file with the SEC, when evaluating our business and future prospects. If any of the identified risks actually occur, our business, financial condition and results of operations could be seriously harmed. In that event, the market price of our common stock could decline and you could lose all or a portion of the value of your investment in our common stock.

We will need substantial additional capital to develop our products and for our future operations in the near term, which can adversely affect our stock price and valuation

We will need to raise substantial additional capital to fund our future operations. To the extent we raise additional capital through the sale of equity securities or we issue securities in connection with another transaction, our stock price can be adversely affected and the ownership position of existing stockholders could be substantially diluted. If additional funds are raised through the issuance of preferred stock or debt securities, these securities are likely to have rights, preferences and privileges senior to our common stock and may involve significant fees, interest expense, restrictive covenants and the granting of security interests in our assets. Fluctuating interest rates could also increase the costs of any debt financing we may obtain. Raising capital through a licensing or other transaction involving our intellectual property could require us to relinquish valuable intellectual property rights and thereby sacrifice long term value for short-term liquidity.

If we are unable to enter into successful sales, marketing and distribution agreements with third parties, we may not be able to successfully commercialize our products.

In order to commercialize any products successfully, we expect to principally rely on collaborations or other arrangements with third parties to sell, market and distribute our products. To the extent that we enter into licensing, distributorship, co-promotion, co-marketing or other collaborative arrangements, our product revenues are likely to be lower than if we directly marketed and sold our products, and any revenues we receive will depend upon the efforts of third parties, whose efforts may not meet our expectations or be successful.

For example, we expect to depend upon the efforts of third parties to promote and sell our MedPodium Nutra-Apps[®] and Excellagen[®] products, as well our Generx[®] product if it should achieve regulatory approval, but there can be no assurance that the efforts of such third parties will meet our expectations or result in any significant product sales. While third parties would be largely responsible for

Table of Contents

the timing and extent of sales and marketing efforts, they may not dedicate sufficient resources to our product opportunities, and our ability to cause them to devote additional resources or to otherwise promote sales of our products may be limited. In addition, commercialization efforts could be negatively impacted by the delay or failure to obtain additional supportive data for our products. In some cases, third party partners could be responsible for conducting additional clinical trials to obtain such data and our ability to increase the efforts and resources allocated to these trials may be limited.

We recently completed the acquisition of the assets of To Go Brands, Inc. and may pursue acquisitions of other companies or product rights that, if not successful, could adversely affect our business, financial condition and results of operations.

We recently completed the acquisition of the business assets of To Go Brands, Inc. As part of our business strategy, we may pursue acquisitions of other companies, technologies or products. Acquisitions of businesses or product rights involve numerous risks, including:

our limited experience in evaluating businesses and product opportunities and completing acquisitions;

the use of any existing cash reserves or the need to obtain additional financing to pay for all or a portion of the purchase price of such acquisitions and to support the ongoing operations of the businesses acquired;

the potential need to issue convertible debt, equity securities, stock options and stock purchase warrants to complete an acquisition, which would dilute our stockholders and could adversely affect the market price of our common stock;

potential difficulties related to integrating the technology, products, personnel and operations of the acquired company;

requirements of significant capital infusions in circumstances under which the acquired business, its products and/or technologies may not generate sufficient revenue or any revenue to offset acquisition costs or ongoing expenses;
