INTRODUCTION

Cautionary Note Regarding Forward-Looking Statements

Certain statements in this report constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Rule 175 promulgated thereunder, Section 21E of the Securities and Exchange Act of 1934, as amended, Rule 3b-6 promulgated thereunder, or Exchange Act, and as such involve risk and uncertainties. All statements in this Form 10-K other than statements of historical fact are forward-looking statements for purposes of federal and state securities laws. These forward-looking statements relate to, among other things, anticipated future operating and financial performance, the allowance for credit losses, our financial position and liquidity, business strategies, regulatory and competitive outlook, investment and expenditure plans, capital and financing needs and availability, plans and objectives of management for future operations, expectations of the environment in which we operate, projections of future performance, perceived opportunities in the market and strategies regarding our mission and vision and statements relating to any of the foregoing.

Words such as will likely result, aims, anticipates, believes, could, estimates, expects, hopes, intends, may, plans, projects, seeks, should, will and variations of these words and similar expressions help to identify these forward looking statements, which involve risks and uncertainties. Our actual results may differ significantly from the results discussed in such forward-looking statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include but are not limited to:

Local, regional, national and international economic conditions and events and the impact they may have on us and our customers;

Ability to attract deposits and other sources of liquidity;

Oversupply of inventory and continued deterioration in values of California real estate, both residential and commercial;

A prolonged slowdown in construction activity;

Changes in our ability to receive dividends from our subsidiaries;

The effect of any goodwill impairment;

Accounting adjustments in connection with our acquisition of assets and assumptions of liabilities from San Joaquin Bank;

The effect of climate change and attendant regulation on our customers and borrowers;

Our ability to manage the loan portfolio acquired from San Joaquin Bank within the limits of the loss protection provided by the Federal Deposit Insurance Corporation (FDIC);

Compliance with our agreements with the FDIC with respect to the loans we acquired from San Joaquin Bank and our loss-sharing arrangements with the FDIC;

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Impact of reputational risk on such matters as business generation and retention, funding and liquidity;

Changes in the financial performance and/or condition of our borrowers;

Changes in the level of nonperforming assets and charge-offs;

Changes in critical accounting policies and judgments;

Effects of acquisitions we may make;

The effect of changes in laws and regulations (including laws and regulations concerning taxes, banking, securities, executive compensation and insurance) with which we and our subsidiaries must comply, including, but not limited to, the Dodd-Frank Act of 2010;

Changes in estimates of future reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements;

Inflation, interest rate, securities market and monetary fluctuations;

Cybersecurity breaches of our systems or vendor systems;

Changes in government interest rate policies;

Fluctuations of our stock price;

Political developments or instability;

Acts of war or terrorism, or natural disasters, such as earthquakes, or the effects of pandemic flu;

Table of Contents

The timely development and acceptance of new banking products and services and perceived overall value of these products and services by users;

Changes in consumer spending, borrowing and savings habits;

Technological changes including but not limited to the adoption by customers and competitors of innovations such as mobile banking capabilities;

The ability to increase market share and to control expenses;

Changes in the competitive environment among financial and bank holding companies and other financial service providers;

Volatility in the credit and equity markets and its effect on the general economy;

The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters;

Changes in our organization, management, compensation and benefit plans;

The costs and effects of legal and regulatory developments, including the resolution of legal proceedings or regulatory or other governmental inquiries, including, but not limited to, the current investigation by the Securities and Exchange Commission and the related class-action lawsuits filed against us, and the results of regulatory examinations or reviews; and

Our success at managing the multiple risks involved in the foregoing items.

For additional information concerning risks we face, see Item 1A. Risk Factors and any additional information we set forth in our periodic reports filed pursuant to the Exchange Act, including this Annual Report on Form 10-K. We do not undertake any obligation to update our forward-looking statements to reflect occurrences or unanticipated events or circumstances arising after the date of such statements, except as required by law.

Table of Contents

PART I

ITEM 1. BUSINESS
CVB Financial Corp.

CVB Financial Corp. (referred to herein on an unconsolidated basis as *CVB* and on a consolidated basis as *we* or the *Company*) is a bank holding company incorporated in California on April 27, 1981 and registered with the Board of Governors of the Federal Reserve System (*Federal Reserve*) under the Bank Holding Company Act of 1956, as amended (the *Bank Holding Company Act*). The Company commenced business on December 30, 1981 when, pursuant to a reorganization, it acquired all of the voting stock of Chino Valley Bank. On March 29, 1996, Chino Valley Bank changed its name to Citizens Business Bank (the *Bank*). The Bank is our principal asset. The Company has three other inactive subsidiaries: CVB Ventures, Inc.; Chino Valley Bancorp; and ONB Bancorp. The Company is also the common stockholder of CVB Statutory Trust II and CVB Statutory Trust III. CVB Statutory Trust II was created in December 2003 and CVB Statutory Trust III was created in January 2006 to issue trust preferred securities in order to raise capital for the Company.

CVB's principal business is to serve as a holding company for the Bank and for other banking or banking related subsidiaries, which the Company may establish or acquire. We have not engaged in any other material activities to date. As a legal entity separate and distinct from its subsidiaries, CVB's principal source of funds is, and will continue to be, dividends paid by and other funds advanced from the Bank and capital raised directly by CVB. Legal limitations are imposed on the amount of dividends that may be paid and loans that may be made by the Bank to CVB. See Item 1. Business Regulation and Supervision Dividends. As of December 31, 2012, the Company had \$6.36 billion in total consolidated assets, \$3.36 billion in net loans, \$4.77 billion in deposits, \$473.2 million in customer repurchase agreements, and \$198.9 million in Federal Home Loan Bank (*FHLB*) advances.

On October 16, 2009, we acquired substantially all of the assets and assumed substantially all of the liabilities of San Joaquin Bank (*SJB*), headquartered in Bakersfield, California, in an FDIC-assisted transaction. We acquired all five branches of SJB, one of which we consolidated with our existing Bakersfield business financial center. Through this acquisition, we acquired \$489.1 million in loans, \$25.3 million in investment securities, \$530.0 million in deposits, and \$121.4 million in borrowings. The foregoing amounts were reflected at fair value as of the acquisition date.

The principal executive offices of CVB and the Bank are located at 701 North Haven Avenue, Suite 350, Ontario, California. Our phone number is (909) 980-4030.

Citizens Business Bank

The Bank commenced operations as a California state-chartered bank on August 9, 1974. The Bank's deposit accounts are insured under the Federal Deposit Insurance Act up to applicable limits. The Bank is not a member of the Federal Reserve System. At December 31, 2012, the Bank had \$6.36 billion in assets, \$3.36 billion in net loans, \$4.79 billion in deposits, \$473.2 million in customer repurchase agreements, and \$198.9 million in FHLB advances.

As of December 31, 2012, we had 41 Business Financial Centers located in the Inland Empire, Los Angeles County, Orange County and the Central Valley areas of California. Of the 41 Business Financial Centers, we opened 13 as de novo centers and obtained the other 28 in acquisition transactions. In October 2012, we closed a center location in Orange County, California. We consolidated this location into our Katella Business Financial Center, located less than two miles away.

We also have five Commercial Banking Centers, of which four were opened in 2008 and one was opened in 2009. Although able to take deposits, these centers operate primarily as sales offices and focus on business clients and their principals, professionals, and high net-worth individuals. These centers are located in Encino (in the San Fernando Valley), Los Angeles, Torrance and Burbank. The fifth one is located in our Headquarters building in Ontario, California. We also have three trust offices in Ontario, Irvine and Pasadena. These offices serve as sales offices for wealth management, trust and investment products.

Through our network of banking offices, we emphasize personalized service combined with a full range of banking and trust services for businesses, professionals and individuals located in the service areas of our offices. Although we focus the marketing of our services to small-and medium-sized businesses, a full range of retail banking services are made available to the local consumer market.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

We offer a wide range of deposit instruments. These include checking, savings, money market and time certificates of deposit for both business and personal accounts. We also serve as a federal tax depository for our business customers.

We provide a full complement of lending products, including commercial, agribusiness, consumer, real estate loans and equipment and vehicle leasing. Commercial products include lines of credit and other working capital financing, accounts receivable lending and letters of credit. Agribusiness products are loans to finance the operating needs of wholesale dairy farm operations, cattle feeders, livestock raisers, and farmers. We provide lease financing for municipal governments. Financing products for consumers include automobile leasing and financing, lines of credit, credit cards, and home equity loans and lines of credit. Real estate loans include mortgage and construction loans.

Table of Contents

We also offer a wide range of specialized services designed for the needs of our commercial accounts. These services include cash management systems for monitoring cash flow, a credit card program for merchants, courier pick-up and delivery, payroll services, remote deposit capture, electronic funds transfers by way of domestic and international wires and automated clearinghouse, and on-line account access. We make available investment products to customers, including mutual funds, a full array of fixed income vehicles and a program to diversify our customers' funds in federally insured time certificates of deposit of other institutions.

We offer a wide range of financial services and trust services through our CitizensTrust division. These services include fiduciary services, mutual funds, annuities, 401(k) plans and individual investment accounts.

Business Segments

We are a community bank with two reportable operating segments: (i) Business Financial and Commercial Banking Centers (Centers) and (ii) Treasury. Our Centers are the focal points for customer sales and services. As such, these Centers comprise the biggest segment of the Company. Our other reportable segment, Treasury, manages all of the investments for the Company. All administrative and other smaller operating departments are combined into the Other category for reporting purposes. See the sections captioned Results by Segment Operations in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 22 Business Segments in the notes to consolidated financial statements.

Competition

The banking and financial services business is highly competitive. The increasingly competitive environment faced by banks is a result primarily of changes in laws and regulations, changes in technology and product delivery systems, and the accelerating pace of consolidation among financial services providers. We compete for loans, deposits, and customers with other commercial banks, savings and loan associations, savings banks, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market funds, credit unions, and other nonbank financial service providers. Many competitors are much larger in total assets and capitalization, have greater access to capital markets, including foreign ownership, and/or offer a broader range of financial services.

Regulation and Supervision

Economic Conditions/Government Policies

Our profitability, like most financial institutions, is primarily dependent on interest rate spreads. In general, the difference between the interest rates paid by the Bank on interest-bearing liabilities, such as deposits and other borrowings, and the interest rates received by the Bank on interest-earning assets, such as loans extended to customers and securities held in the investment portfolio, will comprise the major portion of our earnings. These rates are highly sensitive to many factors that are beyond our control, such as inflation, recession and unemployment, and the impact which future changes in domestic and foreign economic conditions might have on us cannot be predicted.

Our business is also influenced by the monetary and fiscal policies of the federal government and the policies of regulatory agencies, particularly the Board of Governors of the Federal Reserve System (the FRB). The FRB implements national monetary policies (with objectives such as curbing inflation, increasing employment and combating recession) through its open-market operations in U.S. Government securities by buying and selling treasury and mortgage-backed securities, by adjusting the required level of reserves for depository institutions subject to its reserve requirements, and by varying the target federal funds and discount rates applicable to borrowings by depository institutions. The actions of the FRB in these areas influence the growth of bank loans, investments, and deposits and also affect interest earned on interest-earning assets and paid on interest-bearing liabilities. Government fiscal and budgetary policies, including deficit spending, can also have a significant impact on the capital markets and interest rates. The nature and impact of any future changes in monetary and fiscal policies on us cannot be predicted.

Table of Contents

The Company and the Bank are subject to significant regulation and restrictions by federal and state laws and regulatory agencies. These regulations and restrictions are intended primarily for the protection of depositors and the deposit insurance fund and for the protection of borrowers, and secondarily for the stability of the U.S. banking system. They are not intended for the benefit of shareholders of financial institutions. The following discussion of statutes and regulations is a summary and does not purport to be complete nor does it address all applicable statutes and regulations. This discussion is qualified in its entirety by reference to the statutes and regulations referred to in this discussion. From time to time, federal and state legislation is enacted and implemented by regulations which may have the effect of materially increasing the cost of doing business, limiting or expanding permissible activities, or affecting the competitive balance between banks and other financial services providers.

Legislation and Regulation

The events of the past several years have led to numerous new laws and regulatory pronouncements in the United States and internationally for financial institutions. The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank), enacted in 2010, is one of the most far reaching legislative actions affecting the financial services industry in decades and significantly restructures the financial regulatory regime in the United States. Dodd-Frank broadly affects the financial services industry by creating new resolution authorities, requiring ongoing stress testing of capital, mandating higher capital and liquidity requirements, increasing regulation of executive and incentive-based compensation and requiring numerous other provisions aimed at strengthening the sound operation of the financial services sector depending, in part, on the size of the financial institution. Among other things, the Dodd-Frank Act provides for:

capital standards applicable to bank holding companies may be no less stringent than those applied to insured depository institutions;

annual stress tests and early remediation or so-called living wills are required for larger banks with more than \$50 billion in assets as well as risk committees of its board of directors that include a risk expert; such requirements may have the effect of establishing new best practices standards for smaller banks;

trust preferred securities must generally be deducted from Tier 1 capital over a three-year phase-in period ending in 2016, although depository institution holding companies such as the Company with assets of less than \$15 billion as of year-end 2009 are grandfathered with respect to such securities for purposes of calculating regulatory capital. The proposed rules would also remove the grandfather exemption in Section 171 of Dodd-Frank for banks with less than \$15 billion in assets, but more than \$500 million, and would require the phase out of the inclusion of trust preferred securities from Tier I capital instead over ten years, beginning in 2013;

the assessment base for federal deposit insurance was changed to consolidated assets less tangible capital instead of the amount of insured deposits, which generally increased the insurance fees for larger banks, but had relatively less impact on smaller banks;

repeal of the federal prohibition on the payment of interest on demand deposits, including business checking accounts through 2012, and made permanent the \$250,000 limit for federal deposit insurance;

the establishment of the Consumer Finance Protection Bureau (the CFPB), with responsibility for promulgating regulations designed to protect consumers' financial interests and prohibit unfair, deceptive and abusive acts and practices by financial institutions, and with authority to directly examine those financial institutions with \$10 billion or more in assets for compliance with the regulations promulgated or overseen by the CFPB;

limits, or places significant burdens and compliance and other costs, on activities traditionally conducted by banking organizations, such as originating and securitizing mortgage loans and other financial assets, arranging and participating in swap and derivative transactions, proprietary trading and investing in private equity and other funds; and

the establishment of new compensation restrictions and standards regarding the time, manner and form of compensation given to key executives and other personnel receiving incentive compensation, including documentation and governance, proxy access by stockholders, deferral and claw-back requirements.

As required by the Dodd-Frank Act, federal regulators have published for comment proposed regulations to (i) increase capital requirements on banks and bank holding companies, and (ii) implement the so-called "Volcker Rule" of the Dodd-Frank Act, which would significantly restrict certain activities by covered bank holding companies, including restrictions on proprietary trading and private equity investing. Final rules are expected in 2013.

Table of Contents

Many of the regulations to implement the Dodd-Frank Act have not yet been published for comment or adopted in final form and/or will take effect over several years, making it difficult to anticipate the overall financial impact on the Company and the Bank, our customers or the financial industry more generally. Individually and collectively, these proposed regulations resulting from the Dodd-Frank Act may materially and adversely affect the Company's and the Bank's business, financial condition, and results of operations, and could require the Company and/or the Bank to seek additional sources of capital in the future.

We cannot predict whether or when other legislation or new regulations may be enacted, and if enacted, the effect that new legislation or any implemented regulations and supervisory policies would have on our financial condition and results of operations. Such developments may further alter the structure, regulation, and competitive relationship among financial institutions, and may subject us to increased regulation, disclosure, and reporting requirements. Moreover, the bank regulatory agencies remain aggressive in the current economic environment in responding to concerns and trends identified in examinations, and this has resulted in the increased issuance of enforcement actions to financial institutions requiring action to address credit quality, liquidity and risk management and capital adequacy, as well as other safety and soundness concerns.

Bank Holding Company Regulation

Bank holding companies and their subsidiaries are subject to significant regulation and restrictions by Federal and State laws and regulatory agencies, which may affect the cost of doing business, and may limit permissible activities and expansion or impact the competitive balance between banks and other financial services providers.

A wide range of requirements and restrictions are contained in both Federal and State banking laws, which together with implementing regulatory authority:

Require periodic reports and such additional information as the Federal Reserve may require;

Require bank holding companies to maintain increased levels of capital (See *Capital Adequacy Requirements* below);

Require that bank holding companies serve as a source of financial and managerial strength to subsidiary banks and commit resources as necessary to support each subsidiary bank. This *source-of-strength* doctrine most directly affects bank holding companies where a bank holding company's subsidiary bank fails to maintain adequate capital levels. In such a situation, the subsidiary bank will be required by the bank's federal regulator to take *prompt corrective action*. See *Prompt Corrective Action Provisions* below.

Limit on dividends payable to shareholders and restrictions on the ability of bank holding companies to obtain dividends or other distributions from their subsidiary banks. The Company's ability to pay dividends on both its common and preferred stock are subject to legal and regulatory restrictions. Substantially all of the Company's funds to pay dividends or to pay principal and interest on our debt obligations are derived from dividends paid by the Bank;

Terminate an activity or terminate control of or liquidate or divest certain subsidiaries, affiliates or investments if the Federal Reserve believes the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any bank subsidiary;

Require the prior approval of senior executive officer or director changes and prohibit golden parachute payments, including change in control agreements, or new employment agreements with such payment terms, which are contingent upon termination;

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Regulate provisions of certain bank holding company debt, including the authority to impose interest ceilings and reserve requirements on such debt and require prior approval to purchase or redeem securities in certain situations;

Approve acquisitions and mergers with banks and consider certain competitive, management, financial or other factors in granting these approvals, in addition to similar California or other state banking agency approvals which may also be required.

Other Restrictions on Activities

Subject to prior notice or Federal Reserve approval, bank holding companies may generally engage in, or acquire shares of companies engaged in, activities determined by the Federal Reserve to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. Bank holding companies which elect and retain financial holding company status pursuant to the Gramm-Leach-Bliley Act of 1999 (GLBA) may engage in these nonbanking activities and broader securities, insurance, merchant banking and other activities that are determined to be financial in nature or are incidental or complementary to activities that are financial in nature without prior Federal Reserve approval. Pursuant to GLBA and Dodd-Frank, in order to elect and retain financial holding company status, a bank holding company and all

Table of Contents

depository institution subsidiaries of a bank holding company must be well capitalized and well managed, and, except in limited circumstances, depository subsidiaries must be in satisfactory compliance with the Community Reinvestment Act (CRA), which requires banks to help meet the credit needs of the communities in which they operate. Failure to sustain compliance with these requirements or correct any non-compliance within a fixed time period could lead to divestiture of subsidiary banks or require all activities to conform to those permissible for a bank holding company. CVB has not elected financial holding company status and neither CVB nor the Bank has engaged in any activities determined by the Federal Reserve to be financial in nature or incidental or complementary to activities that are financial in nature.

CVB is also a bank holding company within the meaning of Section 3700 of the California Financial Code. Therefore, CVB and any of its subsidiaries are subject to examination by, and may be required to file reports with, the California Department of Financial Institutions (DFI). DFI approvals may also be required for certain mergers and acquisitions.

Securities Exchange Act of 1934

CVB's common stock is publicly held and listed on the NASDAQ Stock Market (NASDAQ), and CVB is subject to the periodic reporting, information, proxy solicitation, insider trading, corporate governance and other requirements and restrictions of the Securities Exchange Act of 1934 and the regulations of the Securities and Exchange Commission (SEC) promulgated thereunder as well as listing requirements of NASDAQ.

Sarbanes-Oxley Act

The Company is subject to the accounting oversight and corporate governance requirements of the Sarbanes-Oxley Act of 2002, including, among other things, required executive certification of financial presentations, requirements for board audit committees and their members, and disclosure of controls and procedures and internal control over financial reporting.

Bank Regulation

As a California commercial bank whose deposits are insured by the FDIC, the Bank is subject to regulation, supervision, and regular examination by the DFI and by the FDIC, as the Bank's primary Federal regulator, and must additionally comply with certain applicable regulations of the Federal Reserve. Specific federal and state laws and regulations which are applicable to banks regulate, among other things, the scope of their business, their investments, their reserves against deposits, the timing of the availability of deposited funds, their activities relating to dividends, investments, loans, the nature and amount of and collateral for certain loans, servicing and foreclosing on loans, borrowings, capital requirements, certain check-clearing activities, branching, and mergers and acquisitions. California banks are also subject to statutes and regulations including Federal Reserve Regulation O and Federal Reserve Act Sections 23A and 23B and Regulation W, which restrict or limit loans or extensions of credit to insiders, including officers, directors, and principal shareholders, and loans or extension of credit by banks to affiliates or purchases of assets from affiliates, including parent bank holding companies, except pursuant to certain exceptions and terms and conditions at least as favorable to those prevailing for comparable transactions with unaffiliated parties. Dodd-Frank expanded definitions and restrictions on transactions with affiliates and insiders under Sections 23A and 23B and also lending limits for derivative transactions, repurchase agreements and securities lending and borrowing transactions.

Pursuant to the Federal Deposit Insurance Act (FDI Act) and the California Financial Code, California state chartered commercial banks may generally engage in any activity permissible for national banks. Therefore, the Bank may form subsidiaries to engage in the many so-called closely related to banking or nonbanking activities commonly conducted by national banks in operating subsidiaries or subsidiaries of bank holding companies. Further, pursuant to GLBA, California banks may conduct certain financial activities in a subsidiary to the same extent as may a national bank, provided the bank is and remains well-capitalized, well-managed and in satisfactory compliance with the CRA. The Bank currently has no financial subsidiaries.

Enforcement Authority

The federal and California regulatory structure gives the bank regulatory agencies extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of appropriate loan loss reserves for regulatory purposes. The regulatory agencies have adopted guidelines to assist in identifying and addressing potential safety and soundness concerns before an institution's capital becomes impaired. The guidelines establish operational and managerial standards generally relating to: (1) internal controls, information systems, and internal audit systems; (2) loan documentation; (3) credit underwriting; (4) interest-rate exposure; (5) asset growth and asset quality; and (6) compensation, fees, and benefits. Further, the regulatory agencies have adopted safety and soundness guidelines for asset quality and for evaluating and monitoring earnings to ensure that earnings are sufficient for the maintenance of adequate capital and reserves. If, as a result of an examination, the DFI or the FDIC should determine that the

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

financial condition, capital resources, asset quality, earnings prospects, management, liquidity, or other aspects of the Bank's operations are unsatisfactory or that the Bank or its management is violating or has

Table of Contents

violated any law or regulation, the DFI and the FDIC, and separately the FDIC as insurer of the Bank's deposits, have residual authority to:

Require affirmative action to correct any conditions resulting from any violation or practice;

Direct an increase in capital and the maintenance of higher specific minimum capital ratios, which may preclude the Bank from being deemed well capitalized and restrict its ability to accept certain brokered deposits;

Restrict the Bank's growth geographically, by products and services, or by mergers and acquisitions, including bidding in FDIC receiverships for failed banks;

Enter into or issue informal or formal enforcement actions, including required Board resolutions, memoranda of understanding, written agreements and consent or cease and desist orders or prompt corrective action orders to take corrective action and cease unsafe and unsound practices;

Require prior approval of senior executive officer or director changes; remove officers and directors and assess civil monetary penalties; and

Terminate FDIC insurance, revoke the charter and/or take possession of and close and liquidate the Bank or appoint the FDIC as receiver.

Deposit Insurance

The FDIC is an independent federal agency that insures deposits, up to prescribed statutory limits, of federally insured banks and savings institutions and safeguards the safety and soundness of the banking and savings industries. The FDIC insures our customer deposits through the Deposit Insurance Fund (the "DIF") up to prescribed limits for each depositor. Pursuant to Dodd-Frank, the maximum deposit insurance amount has been permanently increased to \$250,000 and all non-interest-bearing transaction accounts were insured through December 31, 2012 without an extension of this date. The amount of FDIC assessments paid by each DIF member institution is based on its relative risk of default as measured by regulatory capital ratios and other supervisory factors. The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices that pose a risk to the DIF or that may prejudice the interest of the bank's depositors. The termination of deposit insurance for a bank would also result in the revocation of the bank's charter by the DFI.

Our FDIC insurance expense totaled \$3.2 million for 2012. We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures or if the FDIC otherwise determines, we may be required to pay even higher FDIC premiums than the recently increased levels. These announced increases and any future increases in FDIC insurance premiums may have a material and adverse effect on our earnings and could have a material adverse effect on the value of, or market for, our common stock.

Capital Adequacy Requirements

Bank holding companies and banks are subject to various regulatory capital requirements administered by state and federal banking agencies. Increased capital requirements are expected as a result of expanded authority set forth in Dodd-Frank and the Basel III international supervisory developments described below. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting, and other factors. At December 31, 2012, the Company's and the Bank's capital ratios significantly exceeded the minimum capital adequacy guideline percentage requirements of the federal banking agencies for well capitalized institutions. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Capital Resources.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

The current risk-based capital guidelines for bank holding companies and banks adopted by the federal banking agencies are expected to provide a measure of capital that reflects the degree of risk associated with a banking organization's operations for both transactions reported on the balance sheet as assets, such as loans, and those recorded as off-balance sheet items, such as commitments, letters of credit and recourse arrangements. The risk-based capital ratio is determined by classifying assets and certain off-balance sheet financial instruments into weighted categories, with higher levels of capital being required for those categories perceived as representing greater risks and dividing its qualifying capital by its total risk-adjusted assets and off-balance sheet items. Bank holding companies and banks engaged in significant trading activity may also be subject to the market risk capital guidelines and be required to incorporate additional market and interest rate risk components into their risk-based capital standards.

Table of Contents

Qualifying capital is classified depending on the type of capital:

Tier 1 capital currently includes common equity and trust preferred securities, subject to certain criteria and quantitative limits. Accordingly, the capital received from trust preferred offerings qualifies as Tier 1 capital, but is subject to the new provisions of Dodd-Frank. Under Dodd-Frank, depository institution holding companies with more than \$15 billion in total consolidated assets as of December 31, 2009, will no longer be able to include trust preferred securities as Tier 1 regulatory capital after the end of a 3-year phase-out period beginning 2013, and would need to replace any outstanding trust preferred securities issued prior to May 19, 2010 with qualifying Tier 1 regulatory capital during the phase-out period. For institutions with less than \$15 billion in total consolidated assets, existing trust preferred capital will still qualify as Tier 1 to be phased out over a ten year period. Small bank holding companies with less than \$500 million in assets could issue new trust preferred which could still qualify as Tier 1; however, the market for any new trust preferred capital raises is uncertain.

Tier 2 capital includes hybrid capital instruments, other qualifying debt instruments, a limited amount of the allowance for credit losses, and a limited amount of unrealized holding gains on equity securities. Following the phase-out period under Dodd-Frank, trust preferred securities will be treated as Tier 2 capital for institutions with more than \$15 billion in total consolidated assets.

Tier 3 capital consists of qualifying unsecured debt. The sum of Tier 2 and Tier 3 capital may not exceed the amount of Tier 1 capital.

Under the current capital guidelines, there are three fundamental capital ratios: a total risk-based capital ratio, a Tier 1 risk-based capital ratio and a Tier 1 leverage ratio. To be deemed well capitalized a bank must have a total risk-based capital ratio, a Tier 1 risk-based capital ratio and a Tier 1 leverage ratio of at least ten percent, six percent and five percent, respectively. There is currently no Tier 1 leverage requirement for a holding company to be deemed well-capitalized. At December 31, 2012, the respective capital ratios of the Company and the Bank exceeded the minimum percentage requirements to be deemed well-capitalized. As of December 31, 2012, the Bank's total risk-based capital ratio was 19.03% and its Tier 1 risk-based capital ratio was 17.77%. As of December 31, 2012, the Company's total risk-based capital ratio was 19.49% and its Tier 1 risk-based capital ratio was 18.23%. The federal banking agencies may change existing capital guidelines or adopt new capital guidelines in the future and have required many banks and bank holding companies subject to enforcement actions to maintain capital ratios in excess of the minimum ratios otherwise required to be deemed well capitalized, in which case institutions may no longer be deemed well capitalized and may therefore be subject to restrictions on taking brokered deposits.

The Company and the Bank are also required to maintain a leverage capital ratio designed to supplement the risk-based capital guidelines. Banks and bank holding companies that have received the highest rating of the five categories used by regulators to rate banks and that are not anticipating or experiencing any significant growth must maintain a ratio of Tier 1 capital (net of all intangibles) to adjusted total assets of at least 3%. All other institutions are required to maintain a leverage ratio of at least 100 to 200 basis points above the 3% minimum, for a minimum of 4% to 5%. Pursuant to federal regulations, banks must maintain capital levels commensurate with the level of risk to which they are exposed, including the volume and severity of problem loans. Federal regulators may, however, set higher capital requirements when a bank's particular circumstances warrant. As of December 31, 2012, the Bank's leverage capital ratio was 11.21%, and the Company's leverage capital ratio was 11.50%, both ratios significantly exceeding regulatory minimums.

The regulatory agencies' risk-based capital guidelines are based upon the 1988 capital accord (Basel I) of the international Basel Committee on Bank Supervision (Basel Committee), a committee of central banks and bank supervisors/regulators from the major industrialized countries that develops broad policy guidelines, which each country's supervisors can use to determine the supervisory policies they apply to their home jurisdiction. In 2004 the Basel Committee proposed a new capital accord (Basel II) to replace Basel I that provided approaches for setting capital standards for credit risk and capital requirements for operational risk and refining the existing capital requirements for market risk exposures. U.S. banking regulators published a final rule for Basel II implementation requiring banks with over \$250 billion in consolidated total assets or on-balance sheet foreign exposure of \$10 billion (core banks) to adopt the advanced approaches of Basel II while allowing other banks to elect to opt in. The regulatory agencies later issued a proposed rule for larger banks that would give banking organizations that do not use the advanced approaches the option to implement a new risk-based capital framework that would adopt the standardized approach of Basel II for credit risk, the basic indicator approach of Basel II for operational risk and related disclosure requirements. A definitive rule was not issued.

In December 2010, the Basel Committee released its final framework for strengthening international capital and liquidity regulation, now officially identified as Basel III. If and when implemented by the U.S. banking agencies and fully phased-in, it would require bank holding companies and their bank subsidiaries to maintain substantially more capital than currently required, with a greater emphasis on common equity.

The Basel III capital framework, among other things:

introduces as a new capital measure, Common Equity Tier 1 (CET1), more commonly known in the United States as Tier 1 Common, and defines CET1 narrowly by requiring that most adjustments to regulatory capital measures be made to CET1 and not to the other components of capital, and expands the scope of the adjustments as compared to existing regulations;

Table of Contents

if fully phased in as currently proposed, requires covered banks to maintain: (i) a newly adopted international standard, a minimum ratio of CET1 to risk-weighted assets of at least 4.5%, plus a 2.5% capital conservation buffer (which is added to the 4.5% CET1 ratio as that buffer is phased in, effectively resulting in a minimum ratio of CET1 to risk-weighted assets of at least 7%); (ii) an additional SIFI buffer for those large institutions deemed to be systemically important, ranging from 1.0% to 2.5%, and up to 3.5% under certain conditions; (iii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased in, effectively resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation); (iv) a minimum ratio of Total (that is, Tier 1 plus Tier 2) capital to risk-weighted assets of at least 8.0%, plus the capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation); and (v) as a newly adopted international standard, a minimum leverage ratio of 3%, calculated as the ratio of Tier 1 capital to balance sheet exposures plus certain off-balance sheet exposures (as the average for each quarter of the month-end ratios for the quarter); and

an additional countercyclical capital buffer, generally to be imposed when national regulators determine that excess aggregate credit growth becomes associated with a buildup of systemic risk, that would be a CET1 add-on to the capital conservation buffer in the range of 0% to 2.5% when fully implemented.

In June 2012, the U.S. federal bank regulatory agencies jointly issued a notice of proposed rulemaking to increase capital requirements for almost all banks and bank holding companies as required by the Dodd-Frank Act and make them consistent with the international Basel III agreement. Higher risk weighting would be required for exposures that are more than 90 days past due or are on nonaccrual status and for certain commercial real estate facilities that finance the acquisition, development or construction of real property. The proposed rules also require unrealized gains and losses on certain securities holdings to be included in calculating capital ratios. The proposed rules would apply to all depository institutions and top-tier bank holding companies with assets of \$500 million or more. The proposed rules include new minimum risk-based capital and leverage ratios, which would be phased in during 2013 and 2014, and would refine the definition of what constitutes capital for purposes of calculating those ratios. The new minimum capital level requirements would be: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4% for all institutions. The proposed rules would also establish a "capital conservation buffer" of 2.5% above the new regulatory minimum capital ratios, and would result in the following minimum ratios: (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new capital conservation buffer requirement would be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase each year until fully implemented in January 2019. An institution would be subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary executive bonuses, if its capital level falls below the buffer amount. These limitations would establish a maximum percentage of eligible retained income that could be utilized for such actions.

The proposed rules, including alternative requirements for smaller community financial institutions, would, when finalized, become effective in stages through 2019. The proposed rules would also remove the grandfather exemption in Section 171 of Dodd-Frank for banks with less than \$15 billion in assets, but more than \$500 million, and would require the phase out of the inclusion of trust preferred securities from Tier 1 capital instead over ten years, beginning in 2013. The proposed new framework was to have been effective January 1, 2013; however, due to the number of comment letters received by the federal banking agencies in response to the notice of proposed rule making, the initial implementation has been postponed indefinitely. While the proposed new regulatory capital requirements will likely result in generally higher regulatory capital standards for the Company, it is difficult at this time to predict when or how many of the proposed provisions will ultimately be adopted or whether broader exemptions may be provided for community banks. In addition, bank regulators may also continue their past policies of expecting banks to maintain additional capital beyond the new minimum requirements. The implementation of more stringent requirements to maintain higher levels of capital or to maintain higher levels of liquid assets could adversely impact the Company's net income and return on equity, restrict the ability to pay dividends and require the raising of additional capital.

Prompt Corrective Action Provisions

The Federal Deposit Insurance Act (FDIA) provides a framework for regulation of depository institutions and their affiliates, including parent holding companies, by their federal banking regulators. Among other things, it requires the relevant federal banking regulator to take prompt corrective action with respect to a depository institution if that institution does not meet certain capital adequacy standards, including requiring the prompt submission of an acceptable capital restoration plan. Supervisory actions by the appropriate federal banking regulator under the prompt corrective action rules generally depend upon an institution's classification within five capital categories as defined in the regulations. The relevant capital measures are the capital ratio, the Tier 1 capital ratio, and the leverage ratio.

Table of Contents

A depository institution's capital tier under the prompt corrective action regulations will depend upon how its capital levels compare with various relevant capital measures and the other factors established by the regulations. A bank will be: (i) well capitalized if the institution has a total risk-based capital ratio of 10.0% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, and a leverage ratio of 5.0% or greater and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure; (ii) adequately capitalized if the institution has a total risk-based capital ratio of 8.0% or greater, a Tier 1 risk-based capital ratio of 4.0% or greater, and a leverage ratio of 4.0% or greater and is not well capitalized; (iii) undercapitalized if the institution has a total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based capital ratio of less than 4.0%, or a leverage ratio of less than 4.0%; (iv) significantly undercapitalized if the institution has a total risk-based capital ratio of less than 6.0%, a Tier 1 risk-based capital ratio of less than 3.0%, or a leverage ratio of less than 3.0%; and (v) critically undercapitalized if the institution's tangible equity is equal to or less than 2.0% of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters.

The FDIA generally prohibits a depository institution from making any capital distributions (including payment of a dividend) or paying any management fee to its parent holding company if the depository institution would thereafter be undercapitalized. Undercapitalized institutions are subject to growth limitations and are required to submit a capital restoration plan. The regulatory agencies may not accept such a plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution's capital. In addition, for a capital restoration plan to be acceptable, the depository institution's parent holding company must guarantee that the institution will comply with such capital restoration plan. The bank holding company must also provide appropriate assurances of performance with potential liability of up to 5.0% of the depository institution's total assets at the time it became undercapitalized.

Dividends

It is the Federal Reserve's policy that bank holding companies should generally pay dividends on common stock only out of income available over the past year, and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. It is also the Federal Reserve's policy that bank holding companies should not maintain dividend levels that undermine their ability to be a source of strength to its banking subsidiaries. Additionally, in consideration of the current financial and economic environment, the Federal Reserve has indicated that bank holding companies should carefully review their dividend policy and has discouraged payment ratios that are at maximum allowable levels unless both asset quality and capital are very strong.

The Bank is a legal entity that is separate and distinct from its holding company. CVB receives income through dividends paid by the Bank. Subject to the regulatory restrictions which currently further restrict the ability of the Bank to declare and pay dividends, future cash dividends by the Bank will depend upon management's assessment of future capital requirements, contractual restrictions, and other factors.

The power of the board of directors of the Bank to declare a cash dividend to CVB is subject to California law, which restricts the amount available for cash dividends to the lesser of a bank's retained earnings or net income for its last three fiscal years (less any distributions to shareholders made during such period). Where the above test is not met, cash dividends may still be paid, with the prior approval of the DFI, in an amount not exceeding the greatest of (1) retained earnings of the bank; (2) the net income of the bank for its last fiscal year; or (3) the net income of the bank for its current fiscal year.

Operations and Consumer Compliance Laws

The Bank must comply with numerous federal and state anti-money laundering and consumer protection statutes and implementing regulations, including the USA PATRIOT Act of 2001, the Bank Secrecy Act, the Foreign Account Tax Compliance Act (effective 2013), the CRA, the Fair Credit Reporting Act, as amended by the Fair and Accurate Credit Transactions Act, the Equal Credit Opportunity Act, the Truth in Lending Act, the Fair Housing Act, the Home Mortgage Disclosure Act, the Real Estate Settlement Procedures Act, the National Flood Insurance Act, the California Homeowner Bill of Rights and various federal and state privacy protection laws. Noncompliance with any of these laws could subject the Bank to lawsuits and could also result in administrative penalties, including, fines and reimbursements. The Bank and the Company are also subject to federal and state laws prohibiting unfair or fraudulent business practices, untrue or misleading advertising and unfair competition.

These laws and regulations mandate certain disclosure and reporting requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans, servicing, collecting and foreclosure of loans, and providing other services. Failure to comply with these laws and regulations can subject the Bank to various penalties, including but not limited to enforcement actions, injunctions, fines or criminal penalties, punitive damages to consumers, and the loss of certain contractual rights.

Table of Contents

Dodd-Frank provides for the creation of the CFPB as an independent entity within the Federal Reserve and as a new regulatory agency for United States banks. It has broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards, and contains provisions on mortgage-related matters such as steering incentives, determinations as to a borrower's ability to repay and prepayment penalties. The bureau's functions include investigating consumer complaints, conducting market research, rulemaking, supervising and examining bank consumer transactions, and enforcing rules related to consumer financial products and services. Banks with less than \$10 billion in assets, such as the Bank, will continue to be examined for compliance by their primary federal banking agency.

Available Information

Reports filed with the SEC include our proxy statements, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. These reports and other information on file can be inspected and copied on official business days between 10:00 a.m. and 3:00 p.m. at the public reference facilities of the SEC on file at 100 F Street, N.E., Washington D.C., 20549. The public may obtain information on the operation of the public reference rooms by calling the SEC at 1-800-SEC-0330. The SEC maintains a website that contains the reports, proxy and information statements and other information we file with them. The address of the site is <http://www.sec.gov>. The Company also maintains an Internet website at <http://www.cbcbank.com>. We make available, free of charge through our website, our Proxy Statement, Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, and current Report on Form 8-K, and any amendment there to, as soon as reasonably practicable after we file such reports with the SEC. None of the information contained in or hyperlinked from our website is incorporated into this Form 10-K.

Executive Officers of the Company

The following sets forth certain information regarding our executive officers, their positions and their ages.

Executive Officers:

Name	Position	Age
Christopher D. Myers	President and Chief Executive Officer of the Company and the Bank	50
Richard C. Thomas	Chief Financial Officer of the Company and Executive Vice President and	
	Chief Financial Officer of the Bank	64
James F. Dowd	Executive Vice President and Chief Credit Officer of the Bank	60
David A. Brager	Executive Vice President and Sales Division Manager of the Bank	45
David C. Harvey	Executive Vice President and Chief Operations Officer of the Bank	45

Mr. Myers assumed the position of President and Chief Executive Officer of the Company and the Bank on August 1, 2006. Prior to that, *Mr. Myers* served as Chairman of the Board and Chief Executive Officer of Mellon First Business Bank from 2004 to 2006. From 1996 to 2003, *Mr. Myers* held several management positions with Mellon First Business Bank, including Executive Vice President, Regional Vice President, and Vice President/Group Manager.

Mr. Thomas assumed the position of Chief Financial Officer of the Company and Executive Vice President and Chief Financial Officer of the Bank on March 1, 2011. *Mr. Thomas* initially joined the Bank as an Executive Vice President Finance and Accounting on December 13, 2010. Previously, *Mr. Thomas* served as Chief Risk Officer of Community Bank. From 1987 to 2009, he was an audit partner of Deloitte & Touche LLP.

Mr. Dowd assumed the position of Executive Vice President and Chief Credit Officer of the Bank on June 30, 2008. From 2006 to 2008, he served as Executive Vice President and Chief Credit Officer for Mellon First Business Bank. From 1991 to 2006, *Mr. Dowd* held several management positions with City National Bank, including Senior Vice President and Manager of Special Assets, Deputy Chief Credit Officer, and Interim Chief Credit Officer.

Mr. Brager assumed the position of Executive Vice President and Sales Division Manager of the Bank on November 22, 2010. From 2007 to 2010, he served as Senior Vice President and Regional Manager of the Central Valley Region for the Bank. From 2003 to 2007, he served as Senior Vice President and Manager of the Fresno Business Financial Center for the Bank. From 1997 to 2003, *Mr. Brager* held management positions with Westamerica Bank.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Mr. Harvey assumed the position of Executive Vice President and Chief Operations Officer of the Bank on December 31, 2009. From 2000 to 2008, he served as Senior Vice President and Operations Manager at Bank of the West. From 2008 to 2009 he served as Executive Vice President and Commercial and Treasury Services Manager at Bank of the West.

Table of Contents

ITEM 1A. RISK FACTORS

Risk Factors That May Affect Future Results Together with the other information on the risks we face and our management of risk contained in this Annual Report or in our other SEC filings, the following presents significant risks which may affect us. Events or circumstances arising from one or more of these risks could adversely affect our business, financial condition, operating results and prospects and the value and price of our common stock could decline. The risks identified below are not intended to be a comprehensive list of all risks we face, and additional risks that we may currently view as not material may also impair our business operations and results.

Risk Relating to Recent Economic Conditions and Government Response Efforts

Difficult economic and market conditions have adversely affected our industry

After suffering sharp declines over the past several years, the pace of housing price declines has appeared to slow more recently, although existing delinquencies and foreclosures continue to create overhang. This in turn has negatively impacted the credit performance of mortgage and construction loans and resulted in significant write-downs of assets by many financial institutions. In addition, while there are signs that general economic conditions, including the employment markets, have started to show improvement, such signs remain tentative, and compared to prior periods of growth, most areas and industries continue to experience reduced availability of commercial credit and high unemployment. This in turn has negatively impacted the credit performance of commercial and consumer credit, resulting in additional write-downs. Concerns over the stability of the financial markets and the economy have resulted in decreased lending by financial institutions to their customers and to each other. These economic conditions and tightening of credit has led to increased commercial and consumer delinquencies, lack of customer confidence, increased market volatility and widespread reduction in general business activity. The resulting economic pressure on consumers and businesses and the lack of confidence in the economy and financial markets may adversely affect our business, financial condition, results of operations and stock price. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial institutions industry. In particular, we may face the following risks in connection with these events, or any downward turn in the economy:

The process we use to estimate losses inherent in our credit exposure requires difficult, subjective and complex judgments, including forecasts of economic conditions and how these economic conditions might impair the ability of our borrowers to repay their loans. The level of uncertainty concerning economic conditions may adversely affect the accuracy of our estimates which may, in turn, impact the reliability of the process.

The Company's commercial, residential and consumer borrowers may be unable to make timely repayments of their loans, or the decrease in value of real estate collateral securing the payment of such loans could result in significant credit losses, increasing delinquencies, foreclosures and customer bankruptcies, any of which could have a material adverse effect on the Company's operating results.

The value of the portfolio of investment securities that we hold may be adversely affected by increasing interest rates and defaults by debtors.

Further disruptions in the capital markets or other events, including actions by rating agencies and deteriorating investor expectations, may result in changes in applicable rates of interest, difficulty in accessing capital or an inability to borrow on favorable terms or at all from other financial institutions.

Increased competition among financial services companies due to expected further consolidation in the industry may adversely affect the Company's ability to market its products and services.

If economic conditions do not significantly improve, there can be no assurance that we will not experience an adverse effect, which may be material, on our business, financial condition and results of operations.

U.S. and international financial markets and economic conditions could adversely affect our liquidity, results of operations and financial condition

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

As described in Business Economic Conditions, Government Policies, Legislation and Regulation , turmoil and downward economic trends have been particularly acute in the financial sector. Although the Company and the Bank remain well capitalized and have not suffered any significant liquidity issues as a result of these events, the cost and availability of funds may be adversely affected by illiquid credit markets and the demand for our products and services may decline as our borrowers and customers continue to realize the impact of an economic slowdown, previous recession and ongoing high unemployment rates. In view of the concentration of our operations and the collateral securing our loan portfolio in Central and Southern California, we may be particularly susceptible to adverse economic conditions in the state of California, where our business is concentrated. In addition, adverse economic conditions may exacerbate our exposure to credit risk and adversely affect the ability of borrowers to perform, and thereby, adversely affect our liquidity, financial condition, results or operations and profitability.

Table of Contents***We may be required to make additional provisions for credit losses and charge off additional loans in the future, which could adversely affect our results of operations***

For the year ended December 31, 2012, we recorded zero provision for credit losses, charged off \$5.3 million, and had net recoveries of \$3.8 million. As of December 31, 2012, we had \$2.17 billion in commercial real estate loans, \$61.3 million in construction loans and \$160.7 million in single-family residential mortgages. Although there are signs that the U.S. economy may be emerging from a period of severe recession followed by slower than normal growth, business activity and real estate values remain below pre-recession levels, and may not recover fully or could again decline from current levels, and this in turn could affect the ability of our loan customers to service their debts, including those customers whose loans are secured by commercial or residential real estate. This, in turn, could result in loan charge-offs and provisions for credit losses in the future, which could have a material adverse effect on our financial condition, net income and capital. In addition, the Federal Reserve Board and other government officials have expressed concerns about banks' concentration in commercial real estate lending and the ability of commercial real estate borrowers to perform pursuant to the terms of their loans.

Volatility in commodity prices may adversely affect our results of operations.

As of December 31, 2012, approximately 9.8% of our total gross loan portfolio was comprised of dairy, livestock and agribusiness loans. Recent volatility in certain commodity prices, including milk prices, could adversely impact the ability of those to whom we have made dairy and livestock loans to perform under the terms of their borrowing arrangements with us. In addition, certain grains are being diverted from the food chain into the production of ethanol which is causing the price of feed stocks for dairies to remain high, therefore putting pressure on margins of milk sales and cash flows. These situations, as well as others, could result in additional loan charge-offs and provisions for credit losses in the future, which could have a material adverse effect on our financial condition, net income and capital.

Risks Related to Our Market and Business***Our allowance for credit losses may not be appropriate to cover actual losses***

A significant source of risk arises from the possibility that we could sustain losses because borrowers, guarantors, and related parties may fail to perform in accordance with the terms of their loans and leases. The underwriting and credit monitoring policies and procedures that we have adopted to address this risk may not prevent unexpected losses that could have a material adverse effect on our business, financial condition, results of operations and cash flows. We maintain an allowance for credit losses to provide for loan and lease defaults and non-performance. The allowance is also appropriately increased for new loan growth. While we believe that our allowance for credit losses is appropriate to cover inherent losses, we cannot assure you that we will not increase the allowance for credit losses further or that regulators will not require us to increase this allowance.

Liquidity risk could impair our ability to fund operations and jeopardize our financial condition

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale of loans and other sources could have a material adverse effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us. Our ability to acquire deposits or borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole. Many if not all of these same factors could also significantly raise the cost of deposits to our Company and/or to the banking industry in general. This in turn could negatively affect the amount of interest we pay on our interest-bearing liabilities, which could have an adverse impact on our interest rate spread and profitability.

The actions and commercial soundness of other financial institutions could affect our ability to engage in routine funding transactions.

Financial service institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to different industries and counterparties, and execute transactions with various counterparties in the financial industry, including brokers and dealers, commercial banks, investment banks, mutual funds, and other institutional clients. Defaults by financial services institutions, even rumors or questions about one or more financial institutions or the financial services industry in general, could lead to market wide liquidity problems and further, could lead to losses or defaults by the Company or other institutions. Many of these transactions expose us to credit risk in the event of default of the applicable counterparty or client. In addition, our credit risk may increase when the collateral held by us cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure due to us. Any such losses could materially and adversely affect our consolidated financial statements.

Table of Contents

Our loan portfolio is predominantly secured by real estate and thus we have a higher degree of risk from a downturn in our real estate markets

A further downturn in our real estate markets could hurt our business because many of our loans are secured by real estate. Real estate values and real estate markets are generally affected by changes in national, regional or local economic conditions, fluctuations in interest rates and the availability of loans to potential purchasers, changes in tax laws and other governmental statutes, regulations and policies, and acts of nature, such as earthquakes and national disasters particular to California. Substantially all of our real estate collateral is located in California. If real estate values, including values of land held for development, continue to decline, the value of real estate collateral securing our loans could be significantly reduced. Our ability to recover on defaulted loans by foreclosing and selling the real estate collateral would then be diminished and we would be more likely to suffer losses on defaulted loans. Commercial real estate loans typically involve large balances to single borrowers or group of related borrowers. Since payments on these loans are often dependent on the successful operation or management of the properties, as well as the business and financial condition of the borrower, repayment of such loans may be subject to adverse conditions in the real estate market, adverse economic conditions or changes in applicable government regulations.

Additional risks associated with our real estate construction loan portfolio include failure of developers and/or contractors to complete construction on a timely basis or at all, market deterioration during construction, cost overruns and failure to sell or lease the security underlying the construction loans so as to generate the cash flow anticipated by our borrower.

Continued declines in real estate values, coupled with the current economic downturn and an associated increase in unemployment, may result in higher than expected loan delinquencies or problem assets, a decline in demand for our products and services, or a lack of growth or decrease in deposits, which may cause us to incur losses, adversely affect our capital or hurt our business.

We are exposed to risk of environmental liabilities with respect to properties to which we take title

In the course of our business, we may foreclose and take title to real estate, and could be subject to environmental liabilities with respect to these properties. While we will take steps to mitigate this risk, we may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean-up hazardous or toxic substances, or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, while there are certain statutory protections afforded lenders who take title to property through foreclosure on a loan, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. If we become subject to significant environmental liabilities, our business, financial condition, results of operations and prospects could be adversely affected.

We may experience goodwill impairment

If our estimates of segment fair value change due to changes in our businesses or other factors, we may determine that impairment charges on goodwill recorded as a result of acquisitions are necessary. Estimates of fair value are determined based on a complex model using cash flows, the fair value of our Company as determined by our stock price, and company comparisons. If management's estimates of future cash flows are inaccurate, fair value determined could be inaccurate and impairment may not be recognized in a timely manner. If the fair value of the Company declines, we may need to recognize goodwill impairment in the future which would have a material adverse effect on our results of operations and capital levels.

Our business is subject to interest rate risk and variations in interest rates may negatively affect our financial performance

A substantial portion of our income is derived from the differential or spread between the interest earned on loans, securities and other interest-earning assets, and the interest paid on deposits, borrowings and other interest-bearing liabilities. Because of the differences in the maturities and repricing characteristics of our interest-earning assets and interest-bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest-earning assets and interest paid on interest-bearing liabilities. At December 31, 2012 our balance sheet was slightly asset-sensitive over a one-year horizon assuming no balance sheet growth, and as a result, our net interest margin tends to expand in a rising interest rate environment and decrease in a declining interest rate environment. Accordingly, fluctuations in interest rates could adversely affect our interest rate spread and, in turn, our profitability. In addition, loan origination volumes are affected by market interest rates. Rising interest rates, generally, are associated with a lower volume of loan originations while lower interest rates are usually associated with higher loan originations. Conversely, in rising interest rate environments, loan repayment rates may decline and in falling interest rate environments, loan repayment rates may increase. In addition, in a rising interest rate environment, we may need to accelerate the pace of rate increases on our deposit accounts as compared to the pace of future increases in short-term market rates. Accordingly, changes in levels of market interest rates could materially and adversely affect our net interest spread, asset quality, as well as loan origination and

prepayment volume.

Table of Contents

We are subject to extensive government regulation that could limit or restrict our activities, which, in turn, may hamper our ability to increase our assets and earnings

Our operations are subject to extensive regulation by federal, state and local governmental authorities and are subject to various laws and judicial and administrative decisions imposing requirements and restrictions on part or all of our operations. Similarly, the lending, credit and deposit products we offer, including our new residential mortgage lending operation which commenced origination activities in 2012, are subject to broad oversight and regulation. Because our business is highly regulated, the laws, rules, regulations and supervisory guidance and policies applicable to us are subject to regular modification and change. Perennially, various laws, rules and regulations are proposed, which, if adopted, could impact our operations by making compliance much more difficult or expensive, restricting our ability to originate or sell loans or further restricting the amount of interest or other charges or fees earned on loans or other products.

Additional requirements imposed by the Dodd-Frank Act could adversely affect us.

Recent government efforts to strengthen the U.S. financial system have resulted in the imposition of additional regulatory requirements, including expansive financial services regulatory reform legislation. Dodd-Frank sets out sweeping regulatory changes. Changes imposed by Dodd-Frank include, among others: (i) new requirements on banking, derivative and investment activities, including modified capital requirements, the repeal of the prohibition on the payment of interest on business demand accounts, and debit card interchange fee requirements; (ii) corporate governance and executive compensation requirements; (iii) enhanced financial institution safety and soundness regulations, including increases in assessment fees and deposit insurance coverage; and (iv) the establishment of new regulatory bodies, such as the CFPB. As many provisions still await final implementing rulemaking and regulations, we cannot yet assess the full impact of Dodd-Frank on us.

Revisions to Regulation Z, which implements the Truth in Lending Act (TILA), are being made pursuant to Dodd-Frank which would apply to all consumer mortgages (except home equity lines of credit, timeshare plans, reverse mortgages, or temporary loans), mandating specific underwriting criteria for home loans and providing for various repayment options to the borrower. This may impact our underwriting of single family residential loans in our new residential mortgage lending operation and could have a resulting unknown effect on potential delinquencies. In addition, the uniformity of the requirements may make it difficult for regional and community banks to compete against the larger national banks for single family residential loan originations.

Current and future legal and regulatory requirements, restrictions and regulations, including those imposed under Dodd-Frank, may adversely impact our profitability and may have a material and adverse effect on our business, financial condition, and results of operations, may require us to invest significant management attention and resources to evaluate and make any changes required by the legislation and accompanying rules, and may make it more difficult for us to attract and retain qualified executive officers and employees.

The impact of new regulatory standards will likely impose enhanced capital adequacy requirements on us

The Federal Reserve has proposed new capital requirements on banks and bank holding companies as required by Dodd-Frank and incorporating the Basel Committee international capital, leverage and liquidity guidelines which are expected to have the effect of raising our capital requirements and imposing new capital requirements beyond those required by current law. Increased regulatory capital requirements (and the associated compliance costs), whether due to the adoption of new laws and regulations, changes in existing laws and regulations, or more expansive or aggressive interpretations of existing laws and regulations, may have a material adverse effect on our business, liquidity, financial condition and results of operations.

Failure to manage our growth may adversely affect our performance

Our financial performance and profitability depend on our ability to manage past and possible future growth. Future acquisitions and our continued growth may present operating, integration, regulatory and other issues that could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We could be liable for breaches of security in our online banking services. Fear of security breaches (including cybersecurity breaches) could limit the growth of our online services

We offer various internet-based services to our clients, including online banking services. The secure transmission of confidential information over the Internet is essential to maintain our clients' confidence in our online services. In certain cases, we are responsible for protecting customers' proprietary information as well as their accounts with us. We have

Table of Contents

security measures and processes in place to defend against these cybersecurity risks but these cyber attacks are rapidly evolving (including computer viruses, malicious code, phishing or other information security breaches), and we may not be able to anticipate or prevent all such attacks, which could result in the unauthorized release, gathering, monitoring, misuse, loss or destruction of our or our customers' confidential, proprietary and other information. Advances in computer capabilities, new discoveries or other developments could result in a compromise or breach of the technology we use to protect client transaction data. In addition, individuals may seek to intentionally disrupt our online banking services or compromise the confidentiality of customer information with criminal intent. Although we have developed systems and processes that are designed to prevent security breaches and periodically test our security, failure to protect against or mitigate breaches of security could adversely affect our ability to offer and grow our online services, constitute a breach of privacy or other laws, result in costly litigation and loss of customer relationships, negatively impact the Bank's reputation, and could have an adverse effect on our business, results of operations and financial condition. We may also incur substantial increases in costs in an effort to minimize or mitigate cyber security risks and to respond to cyber incidents.

Our business is exposed to the risk of changes in technology

The rapid pace of technology changes and the impact of such changes on financial services generally and on our Company specifically could impact our cost structure and our competitive position with our customers. Salient although not exclusive examples of such developments are the rapid movement by customers and some competitor financial institutions to web-based services, mobile banking and cloud computing. Because of our relatively smaller size and limited resources, our Company has typically followed rather than lead such developments and applications by larger institutions and technology providers, and we are reliant on legacy systems and software that may not be as efficient or adaptable as those utilized by competitors. Our failure or inability to anticipate, plan for or implement technology change could adversely affect our competitive position, financial condition and profitability.

Our controls and procedures could fail or be circumvented

Management regularly reviews and updates our internal controls, disclosure controls and procedures and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and on the conducts of individuals, and can provide only reasonable, but not absolute, assurances of the effectiveness of these systems and controls, and that the objectives of these controls have been met. Any failure or circumvention of our controls and procedures, and any failure to comply with regulations related to controls and procedures could adversely affect our business, results of operations and financial condition.

We may engage in FDIC-assisted transactions, which could present additional risks to our business

On October 16, 2009, we acquired substantially all of the assets and assumed substantially all of the liabilities of San Joaquin Bank from the FDIC. We may have opportunities to acquire the assets and liabilities of additional failed banks in FDIC-assisted transactions. Although these FDIC-assisted transactions typically provide for FDIC assistance to an acquirer to mitigate certain risks, such as sharing exposure to loan losses and providing indemnification against certain liabilities of the failed institution, we are (and would be in future transactions) subject to many of the same risks we would face in acquiring another bank in a negotiated transaction, including risks associated with maintaining customer relationships and failure to realize the anticipated acquisition benefits in the amounts and within the timeframes we expect. In addition, because these acquisitions are structured in a manner that would not allow us the time and access to information normally associated with preparing for and evaluating a negotiated acquisition, we may face additional risks in FDIC-assisted transactions, including additional strain on management resources, management of problem loans, problems related to integration of personnel and operating systems and impact to our capital resources requiring us to raise additional capital. We cannot assure you that we will be successful in overcoming these risks or any other problems encountered in connection with FDIC-assisted transactions. Although we have entered into a loss sharing agreement with the FDIC in connection with our acquisition of loans from San Joaquin Bank, we cannot guarantee that we will be able to adequately manage the loan portfolio within the limits of the loss protections provided by the FDIC from the San Joaquin Bank acquisition or any other FDIC-assisted acquisition we may make. Our inability to overcome these risks could have a material adverse effect on our business, financial condition and net income.

Income that we recognized and continue to recognize in connection with our 2009 FDIC-assisted San Joaquin Bank acquisition may be non-recurring or finite in duration

Through the acquisition of San Joaquin Bank, we acquired approximately \$673.1 million of assets and assumed \$660.9 million of liabilities. The San Joaquin Bank acquisition was accounted for under the purchase method of accounting and we recorded an after-tax bargain purchase gain totaling \$12.3 million as a result of the acquisition. This gain was included as a component of other operating income on our statement of earnings for 2009. The amount of the gain was equal to the amount by which the fair value of assets purchased exceeded the fair value of liabilities. The bargain purchase gain resulting from the acquisition was a one-time gain that is not expected to be repeated in future periods.

Table of Contents

Our decisions regarding the fair value of assets acquired, including FDIC loss sharing assets, could be different than initially estimated, which could materially and adversely affect our business, financial condition, results of operations, and future prospects.

We acquired significant portfolios of loans in the San Joaquin Bank acquisition and we may acquire other loan portfolios in similar acquisition scenarios. Although the San Joaquin Bank loans were marked down to their estimated fair value, there is no assurance that the acquired loans will not suffer further deterioration in value resulting in additional charge-offs. The fluctuations in national, regional and local economic conditions, including those related to local residential, commercial real estate and construction markets, may increase the level of charge-offs in the loan portfolio that we acquired from San Joaquin Bank (or that we may acquire in a similar future transaction) and correspondingly reduce our net income. These fluctuations are not predictable, cannot be controlled and may have a material adverse impact on our operations and financial condition, even if other favorable events occur.

Although we have entered into loss sharing agreements with the FDIC which provide that a significant portion of losses related to the assets acquired from San Joaquin Bank will be borne by the FDIC, we are not protected for all losses resulting from charge-offs with respect to those assets. Additionally, the loss sharing agreements have limited terms. Therefore, any additional charge-offs of related losses that we experience after the term of the loss sharing agreements will not be reimbursed by the FDIC and would negatively impact our net income.

Our ability to obtain reimbursement under the loss sharing agreement on covered assets depends on our compliance with the terms of the loss sharing agreement.

We must certify to the FDIC on a quarterly basis our compliance with the terms of the FDIC loss sharing agreement as a prerequisite to obtaining reimbursement from the FDIC for realized losses on covered assets. The required terms of the agreement are extensive and failure to comply with any of the guidelines could result in a specific asset or group of assets permanently losing their loss sharing coverage. As of December 31, 2012, \$221.6 million, or 3.5%, of our assets were covered by the FDIC loss sharing agreement. No assurances can be given that we will manage the covered assets in such a way as to always maintain loss share coverage on all such assets.

We face strong competition from financial services companies and other companies that offer banking services

We conduct most of our operations in California. The banking and financial services businesses in California are highly competitive and increased competition in our primary market area may adversely impact the level of our loans and deposits. Ultimately, we may not be able to compete successfully against current and future competitors. These competitors include national banks, regional banks and other community banks. We also face competition from many other types of financial institutions, including savings and loan associations, finance companies, brokerage firms, insurance companies, credit unions, mortgage companies and other financial intermediaries. In particular, our competitors include major financial companies whose greater resources may afford them a marketplace advantage by enabling them to offer products at lower costs, maintain numerous locations, and mount extensive promotional and advertising campaigns. Areas of competition include interest rates for loans and deposits, efforts to obtain loan and deposit customers and a range in quality of products and services provided, including new technology driven products and services. If we are unable to attract and retain banking customers, we may be unable to continue our loan growth and level of deposits.

We rely on communications, information, operating and financial control systems technology from third-party service providers, and we may suffer an interruption in those systems

We rely heavily on third-party service providers for much of our communications, information, operating and financial control systems technology, including our internet banking services and data processing systems. Any failure or interruption of these services or systems or breaches in security of these systems could result in failures or interruptions in our customer relationship management, the Bank's reputation, general ledger, deposit, servicing and/or loan origination systems. The occurrence of any failures or interruptions may require us to identify alternative sources of such services, which may result in increased costs or other consequences that in turn could have an adverse effect on our business.

We are dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect our prospects

Competition for qualified employees and personnel in the banking industry is intense and there are a limited number of qualified persons with knowledge of, and experience in, the California community banking industry. The process of recruiting personnel with the combination of skills and attributes required to carry out our strategies is often lengthy. In addition, legislation and regulations which impose restrictions on executive compensation may make it more difficult for us to retain and recruit key personnel. Our success depends to a significant degree upon our ability to attract and retain qualified management, loan origination, finance, administrative, risk management, marketing and technical personnel and upon the continued contributions of our management and personnel. In particular, our success has been and continues to be highly

Table of Contents

dependent upon the abilities of key executives, including our President and Chief Executive Officer, and certain other employees. In addition, our success has been and continues to be highly dependent upon the services of our directors, some of whom may be considering retirement, and we may not be able to identify and attract suitable candidates to replace such directors.

Managing reputational risk is important to attracting and maintaining customers, investors and employees

Threats to our reputation can come from many sources, including adverse sentiment about financial institutions generally, unethical practices, employee misconduct or fraud, failure to deliver minimum standards of service or quality, compliance deficiencies, government investigations, litigation, and questionable or fraudulent activities of our customers. We have policies and procedures in place to protect our reputation and promote ethical conduct, but these policies and procedures may not be fully effective. Negative publicity regarding our business, employees, or customers, with or without merit, may result in the loss of customers, investors and employees, costly litigation, a decline in revenues and increased governmental scrutiny and regulation.

We are subject to legal and litigation risk, including a pending investigation by the SEC, a consolidated class action lawsuit and a similar state law derivative action which could adversely affect us.

Because our Company is extensively regulated by a variety of federal and state agencies, and because we are subject to a wide range of business and consumer laws and regulations at the federal, state and local levels, we are at risk of governmental investigations and lawsuits as well as claims and litigation from private parties. We are from time to time involved in disputes with and claims from customers, vendors, employees and other business parties, and such disputes and claims may result in litigation or settlements, any one of which or in the aggregate could have an adverse impact on the Company's operating flexibility, employee relations, financial condition or results of operations, as a result of the costs of any judgment, the terms of any settlement and/or the expenses incurred in defending the applicable claim.

We are subject to an investigation by the SEC. In addition, two federal securities class action lawsuits, which have been consolidated, were filed against us and certain of our officers, and a state law derivative action was filed in the name of the Company against our directors. Although the consolidated federal action complaint and a first amended complaint were each dismissed by the federal district court in January and August, respectively, of 2012, the plaintiffs were given leave by the court to file a second amended complaint, which the plaintiffs filed in September, 2012.

We are unable, at this time, to estimate our potential liability in these matters, but we may be required to pay judgments, settlements or other penalties and incur other costs and expenses in connection with the SEC investigation and the consolidated federal lawsuit and the state law derivative action, which could have a material adverse effect on our business, results of operations and financial condition. In addition, responding to requests for information in the SEC investigation and the federal and state lawsuits may divert internal resources away from managing our business. See Legal Proceedings

Federal and state laws and regulations may restrict our ability to pay dividends

The ability of the Bank to pay dividends to the Company and of the Company to pay dividends to its shareholders is limited by applicable federal and California law and regulations. See Business Regulation and Supervision and Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Cash Flow.

The price of our common stock may be volatile or may decline

The trading price of our common stock may fluctuate widely as a result of a number of factors, many of which are outside our control. In addition, the stock market is subject to fluctuations in its share prices and trading volumes that affect the market prices of the shares of many companies. These specific and broad market fluctuations could adversely affect the market price of our common stock. Among the factors that could affect our stock price are:

actual or anticipated quarterly fluctuations in our operating results and financial condition;

changes in revenue or earnings estimates or publication of research reports and recommendations by financial analysts;

credit events or losses;

failure to meet analysts' revenue or earnings estimates;

speculation in the press or investment community;

strategic actions by us or our competitors, such as acquisitions or restructurings;

actions or trades by institutional shareholders or other large shareholders;

fluctuations in the stock price and operating results of our competitors;

Table of Contents

actions by hedge funds, short term investors, activist shareholders or shareholder representative organizations;

general market conditions and, in particular, developments related to market conditions for the financial services industry;

proposed or adopted regulatory changes or developments;

anticipated or pending investigations, proceedings or litigation that involve or affect the Company and/or the Bank; or

domestic and international economic factors unrelated to the Company's performance.

The stock market and, in particular, the market for financial institution stocks, has experienced significant volatility in recent years. The market price of our common stock and the trading volume in our common stock may fluctuate and cause significant price variations to occur. The trading price of the shares of our common stock and the value of our other securities will depend on many factors, which may change from time to time, including, without limitation, our financial condition, performance, creditworthiness and prospects, future sales of our equity or equity related securities, and other factors identified above in *Cautionary Note Regarding Forward-Looking Statement*. The capital and credit markets have been experiencing volatility and disruption for more than four years. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial strength. A significant decline in our stock price could result in substantial losses for individual shareholders and could lead to costly and disruptive securities litigation. Extensive sales by large shareholders could also exert sustained downward pressure on our stock price.

Anti-takeover provisions and federal law may limit the ability of another party to acquire us, which could cause our stock price to decline

Various provisions of our articles of incorporation and by-laws and certain other actions we have taken could delay or prevent a third-party from acquiring us, even if doing so might be beneficial to our shareholders. The Bank Holding Company Act of 1956, as amended, and the Change in Bank Control Act of 1978, as amended, together with federal regulations, require that, depending on the particular circumstances, either Federal Reserve approval must be obtained or notice must be furnished to the Federal Reserve and not disapproved prior to any person or entity acquiring control of a state member bank, such as the Bank. These provisions may prevent a merger or acquisition that would be attractive to shareholders and could limit the price investors would be willing to pay in the future for our common stock.

Changes in stock market prices could reduce fee income from our brokerage, asset management and investment advisory businesses

We earn substantial wealth management fee income for managing assets for our clients and also providing brokerage and investment advisory services. Because investment management and advisory fees are often based on the value of assets under management, a fall in the market prices of those assets could reduce our fee income. Changes in stock market prices could affect the trading activity of investors, reducing commissions and other fees we earn from our brokerage business.

We may face other risks

From time to time, we detail other risks with respect to our business and/or financial results in our filings with the SEC.

For further discussion on additional areas of risk, see *Item 7. Management's Discussion and Analysis of Financial Condition and the Results of Operations - Risk Management*.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

The principal executive offices of the Company and the Bank are located in Ontario, California, and are owned by the Company.

As of December 31, 2012, the Bank occupied a total of 49 premises consisting of (i) 46 Business Financial and Commercial Banking Centers (Centers) of which two Centers are located at our Corporate Headquarters, (ii) a Corporate Headquarters and two operations/administrative centers, and (iii) a storage facility. We own 11 of these locations and the remaining properties are leased under various agreements with expiration dates ranging from 2013 through 2020, some with lease renewal options that could extend certain leases through 2034. All properties are located in Southern and Central California.

Table of Contents

As of December 31, 2012, our consolidated investment in premises and equipment, net of accumulated depreciation and amortization totaled \$35.1 million. Our total occupancy expense, exclusive of furniture and equipment expense, for the year ended December 31, 2012, was \$10.8 million. We believe that our existing facilities are adequate for our present purposes. The Company believes that if necessary, it could secure suitable alternative facilities on similar terms without adversely affecting operations. For additional information concerning properties, see Note 9 of the Notes to the Consolidated Financial Statements included in this report. See Item 8. Financial Statements and Supplemental Data.

ITEM 3. LEGAL PROCEEDINGS

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. Where appropriate, we establish reserves in accordance with FASB guidance over contingencies (ASC 450). The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect on our liquidity, consolidated financial position, and/or results of operations. As of December 31, 2012, the Company does not have any litigation reserves.

In addition, the Company is involved in the following significant legal actions and complaints.

On July 26, 2010, we received a subpoena from the Los Angeles office of the SEC regarding the Company's allowance for credit loss methodology, loan underwriting guidelines, methodology for grading loans, and the process for making provisions for loan losses. In addition, the subpoena requested information regarding certain presentations Company officers have given or conferences Company officers have attended with analysts, brokers, investors or prospective investors. We have fully cooperated with the SEC in its investigation, and we will continue to do so to the extent any further information is requested. We cannot predict the timing or outcome of the investigation.

In the wake of the Company's disclosure of the SEC investigation, on August 23, 2010, a purported shareholder class action complaint was filed against the Company in an action captioned *Lloyd v. CVB Financial Corp., et al.*, Case No. CV 10-06256-MMM, in the United States District Court for the Central District of California. Along with the Company, Christopher D. Myers (President and Chief Executive Officer) and Edward J. Biebrich, Jr. (our former Chief Financial Officer) were also named as defendants. On September 14, 2010, a second purported shareholder class action complaint was filed against the Company in an action originally captioned *Englund v. CVB Financial Corp., et al.*, Case No. CV 10-06815-RGK, in the United States District Court for the Central District of California. The Englund complaint named the same defendants as the Lloyd complaint and made allegations substantially similar to those included in the Lloyd complaint. On January 21, 2011, the Court consolidated the two actions for all purposes under the Lloyd action now captioned as Case No. CV 10-06256-MMM (PJWx). That same day, the Court also appointed the Jacksonville Police and Fire Pension Fund (the "Jacksonville Fund") as lead plaintiff in the consolidated action and approved the Jacksonville Fund's selection of lead counsel for the plaintiffs in the consolidated action. On March 7, 2011, the Jacksonville Fund filed a consolidated complaint naming the same defendants and alleging violations by all defendants of Section 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder and violations by the individual defendants of Section 20(a) of the Exchange Act. Specifically, the complaint alleges that defendants misrepresented and failed to disclose conditions adversely affecting the Company throughout the purported class period, which is alleged to be between October 21, 2009 and August 9, 2010. The consolidated complaint seeks compensatory damages and other relief in favor of the purported class.

Following the filing by each side of various motions and memoranda and a hearing on August 29, 2011, the District Court issued a ruling on January 12, 2012, granting defendants' motion to dismiss the consolidated complaint, but the ruling provided the plaintiffs with leave to file an amended complaint within 45 days of the date of the order. On February 27, 2012, the plaintiffs filed a first amended complaint against the same defendants, and once again, following filings by both sides and another hearing on June 4, 2012, the District Court issued a ruling on August 21, 2012, granting defendants' motion to dismiss the first amended complaint, but providing the plaintiffs with leave to file another amended complaint within 30 days of the ruling. On September 20, 2012, the plaintiffs filed a second amended complaint against the same defendants, and the Company filed its third motion to dismiss on October 25, 2012. The District Court has taken the Company's third motion to dismiss under submission, and the Company intends to continue to vigorously contest the plaintiff's allegations in this case.

On February 28, 2011, a purported and related shareholder derivative complaint was filed in an action captioned *Sanderson v. Borba, et al.*, Case No. CIVRS1102119, in California State Superior Court in San Bernardino County. The complaint names as defendants the members of our board of directors and also refers to unnamed defendants allegedly responsible for the conduct alleged. The Company is included as a nominal defendant. The complaint alleges breaches of fiduciary duties, abuse of control, gross mismanagement and corporate waste. Specifically, the complaint alleges, among other things, that defendants engaged in accounting manipulations in order to falsely portray the Company's financial results in connection with its commercial real estate portfolio. Plaintiff seeks compensatory and exemplary damages to be paid by the defendants and awarded to the Company, as well as other relief. On June 20, 2011, defendants filed a demurrer requesting dismissal of the derivative complaint. Following the filing by each side of additional motions, the parties have subsequently filed repeated notices to postpone the Court's hearing on the defendants' demurrer, pending resolution of the federal securities shareholder class action complaint, and these postponements are

currently extended to at least September 11, 2013.

Table of Contents

Because the outcome of these proceedings is uncertain, we cannot predict any range of loss or even if any loss is probable related to the actions described above.

ITEM 4. *MINE SAFETY DISCLOSURES*

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is traded on the NASDAQ Global Select National Market under the symbol CVBF. The following table presents the high and low sales prices and dividend information for our common stock during each quarter for the past two years. The Company had approximately 1,673 shareholders of record as of February 15, 2013.

Quarter Ended	High	Low	Cash Dividends Declared
12/31/2012	\$ 12.17	\$ 9.43	\$ 0.085
9/30/2012	\$ 12.95	\$ 11.35	\$ 0.085
6/30/2012	\$ 11.92	\$ 10.16	\$ 0.085
3/31/2012	\$ 11.97	\$ 9.99	\$ 0.085
12/31/2011	\$ 10.27	\$ 7.28	\$ 0.085
9/30/2011	\$ 10.00	\$ 7.41	\$ 0.085
6/30/2011	\$ 9.94	\$ 8.18	\$ 0.085
3/31/2011	\$ 9.32	\$ 7.83	\$ 0.085

For information on the statutory and regulatory limitations on the ability of the Company to pay dividends to its shareholders and on the Bank to pay dividends to the Company, see Item 1. Business-Regulation and Supervision Dividends and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Cash Flow.

Issuer Purchases of Equity Securities

On July 16, 2008, our Board of Directors approved a program to repurchase up to 10,000,000 shares of our common stock (such number will not be adjusted for stock splits, stock dividends, and the like) in the open market or in privately negotiated transactions, at times and at prices considered appropriate by us, depending upon prevailing market conditions and other corporate and legal considerations. There is no expiration date for our current stock repurchase program. There were no issuer repurchases of the Company's common stock as part of its repurchase program in the fourth quarter of the year ended December 31, 2012. As of December 31, 2012, there were 7,765,171 shares remaining to be purchased.

Performance Graph

The following Performance Graph and related information shall not be deemed soliciting material or be filed with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that the Company specifically incorporates it by reference into such filing.

The following graph compares the yearly percentage change in CVB Financial Corp.'s cumulative total shareholder return (stock price appreciation plus reinvested dividends) on common stock (i) the cumulative total return of the Nasdaq Composite Index; and (ii) a published index comprised by Morningstar (formerly Hemscoff, Inc.) of banks and bank holding companies in the Pacific region (the industry group line depicted below). The graph assumes an initial investment of \$100 on January 1, 2008, and reinvestment of dividends through December 31, 2012. Points on the graph represent the performance as of the last business day of each of the years indicated. The graph is not necessarily indicative of future price performance.

- (1) Stockholders' equity divided by total assets.
- (2) Dividends declared on common stock divided by net earnings.
- (3) Net interest income (TE) divided by total average earning assets.
- (4) Noninterest expense divided by net interest income before provision for credit losses plus noninterest income. Please also refer to noninterest expense and efficiency ratio reconciliation (non-GAAP) on page 31 of this Form 10-K.
- (5) Covered loans are those loans acquired from SJB and covered by a loss sharing agreement with the FDIC.

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND THE RESULTS OF OPERATIONS
GENERAL**

Management's discussion and analysis is written to provide greater detail of the results of operations and the financial condition of CVB Financial Corp. and its subsidiaries. This analysis should be read in conjunction with the audited financial statements contained within this report including the notes thereto.

CRITICAL ACCOUNTING POLICIES

The preparation of these consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and are essential to understanding Management's Discussion and Analysis of Financial Condition and Results of Operations. The following is a summary of the more judgmental and complex accounting estimates and principles. In each area, we have identified the variables most important in the estimation process. We have used the best information available to make the necessary estimates to value the related assets and liabilities. Actual performance that differs from our estimates and future changes in the key variables could change future valuations and impact the results of operations.

Allowance for Credit Losses: Arriving at an appropriate level of allowance for credit losses involves a high degree of judgment. Our allowance for credit losses provides for probable losses based upon evaluations of known and inherent risks in the loan and lease portfolio. The determination of the balance in the allowance for credit losses is based on an analysis of the loan and lease finance receivables portfolio using a systematic methodology and reflects an amount that, in our judgment, is appropriate to provide for probable credit losses inherent in the portfolio, after giving consideration to the character of the loan portfolio, current economic conditions, past credit loss experience, and such other factors as deserve current recognition in estimating inherent credit losses. The provision for credit losses is charged to expense. For a full discussion of our methodology of assessing the adequacy of the allowance for credit losses, see Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation Risk Management and Notes 3 and 6 of our Consolidated Financial Statements presented elsewhere in this report.

Investment Securities: The investment portfolio is an integral part of our financial performance. Accounting estimates are used in the presentation of the investment portfolio and these estimates do impact the presentation of our financial condition and results of operations.

We classify as held-to-maturity securities those debt securities that we have the positive intent and ability to hold to maturity. Securities classified as trading are those securities that are bought and held principally for the purpose of selling them in the near term. All other debt and equity securities are classified as available-for-sale. Securities held-to-maturity are accounted for at cost and adjusted for amortization of premiums and accretion of discounts. Trading securities are accounted for at fair value with the unrealized gains and losses being included in current earnings. Available-for-sale securities are accounted for at fair value, with the net unrealized gains and losses, net of income tax effects, presented as a separate component of stockholders' equity. Realized gains and losses on sales of securities are recognized in earnings at the time of sale. Purchase premiums and discounts are recognized in interest income using the effective-yield method over the terms of the securities. For mortgage-backed securities (MBS), the amortization or accretion is based on estimated average lives of the securities. The lives of these securities can fluctuate based on the amount of prepayments received on the underlying collateral of the securities. Our investment in FHLB stock is carried at cost. The classification and accounting for investment securities are discussed in detail in Note 5, Investment Securities, of the Consolidated Financial Statements presented elsewhere in this report.

The fair values of investment securities are generally determined by reference to an independent external pricing service provider who has experience in valuing these securities. In obtaining such valuation information from third parties, management has evaluated the methodologies used to develop the resulting fair values. Management performs an analysis on the broker quotes received from third parties at least quarterly to ensure that the prices represent a reasonable estimate of the fair value. The procedures include, but are not limited to, initial and on-going review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. Prices from third party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations, which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

Table of Contents

At each reporting date, securities are assessed to determine whether there is an other-than-temporary impairment (OTTI). Such impairment, if any, is required to be recognized in earnings. The determination of other-than-temporary impairment is a subjective process, requiring the use of judgment and assumptions. We examine all individual securities that are in an unrealized loss position at each reporting date for other-than-temporary impairment. Specific investment-related factors that we examine to assess impairment include the nature of the investment, severity and duration of the loss, the probability that we will be unable to collect all amounts due, an analysis of the issuers of the securities, and whether there has been any cause for default on the securities and any change in the rating of the securities by the various rating agencies. Additionally, we evaluate whether the creditworthiness of the issuer calls the realization of contractual cash flows into question. We reexamine the financial resources, intent and the overall ability of the Company to hold the securities until their fair values recover. Management does not believe that there are any investment securities, other than those identified in the current and previous periods, which are deemed to be other-than-temporarily impaired as of December 31, 2012.

Income Taxes: We account for income taxes using the asset and liability method by deferring income taxes based on estimated future tax effects of differences between the tax and book basis of assets and liabilities considering the provisions of enacted tax laws. These differences result in deferred tax assets and liabilities, which are included in our balance sheets. We must also assess the likelihood that any deferred tax assets will be recovered from future taxable income and establish a valuation allowance for those assets determined to not likely be recoverable. Our judgment is required in determining the amount and timing of recognition of the resulting deferred tax assets and liabilities, including projections of future taxable income. Although we have determined a valuation allowance is not required for any of our deferred tax assets, there is no guarantee that these assets are recoverable.

Goodwill and Goodwill Impairment: We have acquired entire banks and branches of banks. Those acquisitions accounted for under the purchase method of accounting have given rise to goodwill and intangible assets. ASC Topic 805 (previously SFAS No. 141), Business Combinations, requires an entity to record the assets acquired and liabilities assumed at their fair value as of the acquisition date. These fair values are determined by use of internal and external valuation techniques. The excess purchase price is allocated to assets and liabilities respectively, resulting in identified intangibles. The identified intangible assets and liabilities are amortized over the estimated lives of the assets or liabilities. Any excess purchase price after this allocation results in goodwill.

Under ASC 350 (previously SFAS No. 142, *Goodwill and Other Intangibles*), goodwill must be allocated to reporting units and tested for impairment. The Company tests goodwill for impairment at least annually, or more frequently if events or circumstances, such as adverse changes in the business, indicate that there may be justification for conducting an interim test. Impairment testing is performed at the reporting-unit level (which is the same level as the Company's two major operating segments identified in Note 22 of the Company's consolidated financial statements presented elsewhere in this report). Under the market approach utilized, the fair value is calculated using the current fair values of comparable peer banks of similar size, geographic footprint and focus. The market capitalization and multiple was used to calculate the market price of the Company and each reporting unit. The fair value was also subject to a control premium adjustment, which is the cost savings that a purchase of the reporting unit could achieve by eliminating duplicative costs. If the fair value is less than the carrying value, then the second part of the test is needed to measure the amount of goodwill impairment. The implied fair value of the reporting unit goodwill is calculated and compared to the actual carrying value of goodwill allocated to the reporting unit. If the carrying value of reporting unit goodwill exceeds the implied fair value of that goodwill, then the Company would recognize an impairment loss for the amount of the difference, which would be recorded as a charge against net income. There was no recorded impairment as of December 31, 2012.

Acquired Loans: Acquired loans are valued as of the acquisition date in accordance with ASC 805 *Business Combinations* (formerly FAS 141R *Business Combinations*). Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (formerly SOP 03-3 *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*). Further, the Company elected to account for all other acquired loans within the scope of ASC 310-30 using the same methodology.

Under ASC 805 and ASC 310-30, loans are recorded at fair value at the acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for credit losses is not carried over or recorded as of the acquisition date. In situations where loans have similar risk characteristics, loans were aggregated into pools to estimate cash flows under ASC 310-30. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The Company aggregated non-distressed loans acquired in the FDIC-assisted acquisition of San Joaquin Bank in ten different pools, based on common risk characteristics.

Under ASC 310-30, the excess of the expected cash flows at the acquisition over the fair value is considered to be the accretable yield and is recognized as interest income over the life of the loan or pool. The excess of the contractual cash flows over the expected cash flows is considered to be the nonaccretable difference. Subsequent to the acquisition date, any increases in cash flow over those expected at the acquisition date in excess of fair value are recorded as an adjustment to the

Table of Contents

accretable yield on a prospective basis. Any subsequent decreases in cash flow over those expected at the acquisition date are recognized by recording an allowance for credit losses. Any disposals of loans, including sales of loans, payments in full or foreclosures result in the removal of the loan from the ASC 310-30 portfolio at the allocated carrying amount.

Covered Loans: We refer to covered loans as those loans that we acquired in the SJB acquisition for which we will be reimbursed for a substantial portion of any future losses under the terms of the FDIC loss sharing agreement. The majority of the loans acquired in the FDIC-assisted acquisition of SJB are included in a FDIC shared-loss agreement. Covered loans are reported exclusive of the expected cash flow reimbursements expected from the FDIC. At the date of acquisition, all covered loans were accounted for under ASC 805 and ASC 310-30. Subsequent to acquisition all covered loans are accounted for under ASC 310-30.

Covered Other Real Estate Owned: All other real estate owned acquired in the FDIC-assisted acquisition of SJB are included in a FDIC shared-loss agreement and are referred to as covered other real estate owned. Covered other real estate owned is reported exclusive of expected reimbursement cash flows from the FDIC. Fair value adjustments on covered other real estate owned result in a reduction of the covered other real estate carrying amount with the estimated net loss charged against earnings and a corresponding increase in the estimated FDIC loss sharing asset based on the appropriate loss-sharing percentage.

FDIC Loss Sharing Asset: In conjunction with the FDIC-assisted acquisition of SJB, the Company entered into a shared-loss agreement with the FDIC for amounts receivable under the shared-loss agreement. At the date of the acquisition the Company elected to account for amounts receivable under the shared-loss agreement as a loss sharing asset in accordance with ASC 805. Subsequent to the acquisition, the loss sharing asset is adjusted for payments received and changes in estimates of expected losses and is not being accounted for under fair value. The loss estimates used in calculating the FDIC loss sharing asset are determined on the same basis as the related covered loans and is the present value of the cash flows the Company expects to collect from the FDIC under the shared-loss agreement. The difference between the present value and the undiscounted cash flow the Company expects to collect from the FDIC is accreted or amortized into noninterest income over the life of the FDIC indemnification asset. The FDIC indemnification asset is adjusted for any changes in expected cash flows based on the loan performance. Any increases in cash flow of the loans over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the loans over those expected will increase the FDIC indemnification asset. Increases and decreases to the FDIC indemnification asset are recorded as adjustments to noninterest income.

Non-Covered Other Real Estate Owned: Other real estate owned (OREO) represents properties acquired through foreclosure or through full or partial satisfaction of loans, is considered held-for-sale, and is recorded at the lower of cost or estimated fair value at the time of foreclosure. Loan balances in excess of fair value of the real estate acquired at the date of foreclosure are charged against the allowance for credit losses. After foreclosure, valuations are periodically performed as deemed necessary by management and the real estate is carried at the lower of carrying value or fair value less costs to sell. Subsequent declines in the fair value of the OREO below the carrying value are written down to fair value with a direct charge to noninterest expense. Any subsequent operating expenses or income of such properties are charged to noninterest expense or income, respectively. Revenue recognition upon disposition of a property is dependent on the sale having met certain criteria relating to the buyer's initial investment in the property sold.

We are able and willing to provide financing for entities purchasing loans or OREO assets. Our general guideline is to seek an adequate down payment (as a percentage of the purchase price) from the buyer. We will consider lower down payments when this is not possible; however, accounting rules require certain minimum down payments in order to record the profit on sale, if any. The minimum down payment varies by the type of underlying real estate collateral.

Fair Value of Financial Instruments: We use fair value measurements to record fair value adjustments to certain financial instruments and to determine fair value disclosures. Investment securities available-for-sale and interest-rate swaps are financial instruments recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other financial assets on a non-recurring basis, such as impaired loans and OREO. These nonrecurring fair value adjustments typically involve application of lower-of-cost-or-market accounting or write-downs of individual assets. Further, we include in Note 21 to the consolidated financial statements information about the extent to which fair value is used to measure assets and liabilities, the valuation methodologies used and its impact to earnings. Additionally, for financial instruments not recorded at fair value we disclose the estimate of their fair value.

Stock-based Compensation: Consistent with the provisions of ASC 718, *Stock Compensation*, we recognize expense for the grant date fair value of stock options and restricted shares issued to employees, officers and non-employee directors over the their requisite service periods (generally the vesting period). The service periods may be subject to performance conditions.

At December 31, 2012, the Company has three stock-based employee compensation plans. The Company accounts for stock compensation using the modified prospective method. Under this method, awards that are granted, modified, or settled after December 31, 2005, are measured at fair value as of the grant date with compensation costs recognized over the vesting period on a straight-lined basis. Also under this method, unvested

stock awards as of January 1, 2006 are recognized over the remaining service period with no change in historical reported earnings.

Table of Contents

The fair value of each stock option grant is estimated as of the grant date using the Black-Scholes option-pricing model. Management assumptions used at the time of grant impact the fair value of the option calculated under the Black-Scholes option-pricing model, and ultimately, the expense that will be recognized over the life of the option.

The grant date fair value of restricted stock awards is measured at the fair value of the Company's common stock as if the restricted shares were vested and issued on the date of grant.

Additional information is included in Note 19, Stock Option Plans and Restricted Stock Awards, of the Consolidated Financial Statements included herein.

OVERVIEW

For the year ended December 31, 2012, we reported net earnings of \$77.3 million, compared with \$81.7 million for 2011, a decrease of \$4.4 million, or 5.45%. Diluted earnings per share were \$0.74 per share for the year ended December 31, 2012, a decrease from \$0.77 per share for 2011. This decrease was due to the \$20.4 million in pre-tax debt termination expense, which represents the present value of future interest payments and lender hedge termination fees, resulting from the repayment of \$250.0 million of fixed rate loans to the Federal Home Loan Bank (FHLB). The terminated FHLB loans carried an average coupon rate of 3.39% and a weighted average remaining life of 2.6 years. The Company also elected to redeem \$48.0 million in junior subordinated debentures during 2012 bearing interest at 2.85% to 3.25% above the 90-day LIBOR. These repayments were made to reduce future interest expense.

Net income for the year ended December 31, 2012 produced a return on beginning equity of 10.81%, a return on average equity of 10.31% and a return on average assets of 1.19%. The efficiency ratio for 2012 was 54.64% (46.58% excluding the FHLB debt termination), compared to 52.45% (51.21% excluding the prior year FHLB debt termination) for 2011.

Net interest income, before provision for credit losses of \$237.0 million for the year ended December 31, 2012 increased \$2.3 million, or 0.97%, compared to \$234.7 million for 2011. Excluding the impact of the yield adjustment on covered loans, tax equivalent (TE) net interest margin was 3.66% for 2012, compared with 3.78% for 2011. Total cost of funds decreased to 0.44% for 2012 from 0.60% for 2011.

Noninterest income was \$15.9 million for 2012, compared with \$34.2 million for 2011. Noninterest income for 2012 was reduced by a \$21.9 million net decrease in the FDIC loss sharing asset, compared to an increase of \$171,000 for 2011.

As a percentage of average assets, noninterest expense was 2.13% for the year ended December 31, 2012, compared to 2.17% for 2011. If the FHLB debt termination expense of \$20.4 million and \$3.3 million for 2012 and 2011, respectively, are eliminated from this calculation, non-interest expense was 1.82% for 2012 and 2.12% for 2011. In terms of dollars, this represents a year-over-year decrease of \$19.9 million. The decrease was primarily attributable to decreases of \$7.5 million in legal expenses, \$4.6 million in OREO related expenses, \$1.5 million in salaries and related expenses, \$1.4 million in regulatory assessments, \$1.3 million in other professional expenses, and \$1.3 million in amortization of intangible assets.

Total assets of \$6.36 billion at December 31, 2012 decreased \$119.6 million, or 1.84%, from total assets of \$6.48 billion at December 31, 2011. Earning assets totaled \$6.04 billion at December 31, 2012, a decrease of \$92.4 million, or 1.51%, when compared with earning assets of \$6.13 billion at December 31, 2011. The decrease in earning assets was primarily due to a decrease in interest-earning cash as a result of prepaying \$250.0 million of FHLB Advances and \$48.0 million of Trust Preferred Securities and a \$35.1 million decrease in loans, partially offset by a \$247.5 million increase in investment securities.

Investment securities totaled \$2.45 billion at December 31, 2012, up from \$2.20 billion at December 31, 2011. As of December 31, 2012, we had a pretax unrealized gain of \$74.6 million of which \$41.7 million is attributed to our municipal securities portfolio and \$32.9 million is attributed to the remainder of the portfolio which is predominantly our mortgage-backed securities (MBS) portfolio.

For the year ended December 31 2012, we purchased \$546.1 million of MBS with an average yield of 1.79%, \$23.1 million of municipal securities with an average tax-equivalent yield of 3.42%, \$166.3 million of SBA Pools with an average yield of 1.79% percent, and \$176.5 million of callable Agencies with an average yield of 1.74%.

Table of Contents

Total loans and leases, net of deferred fees and discount of \$3.45 billion at December 31, 2012 decreased by \$35.1million, or 1.01%, from \$3.48 billion at December 31, 2011. Non-covered loans grew by \$32.2 million, while total covered loans declined by \$67.3 million. Non-covered commercial real estate loans totaled \$1.99 billion at December 31, 2012, an increase of \$41.8 million when compared with December 31, 2011. The market remains very competitive for new loan originations for both commercial real estate and commercial and industrial loans. We continue to focus our sales efforts on these two key areas but continue to remain cautious in terms of credit quality.

We continue to grow our noninterest bearing deposits. As of December 31, 2012, our noninterest bearing deposits grew to \$2.42 billion, an increase of \$393.1 million, or 19.39%, compared to \$2.03 billion at December 31, 2011. At December 31, 2012, noninterest bearing deposits were 50.71% of total deposits, up from 44.04% at December 31, 2011. Our total cost of deposits for the year ended December 31, 2012 were 13 basis points, compared to 19 basis points for 2011.

Our capital ratios are well-above regulatory standards. As of December 31, 2012, our Tier 1 leverage capital ratio totaled 11.50%, our Tier 1 risk-based capital ratio totaled 18.23% and our total risk-based capital ratio totaled 19.49%.

Total equity increased \$48.2 million, or 6.74%, to \$763.0 million at December 31, 2012, compared with total equity of \$714.8 million at December 31, 2011.

Table of Contents**ANALYSIS OF THE RESULTS OF OPERATIONS****Financial Performance**

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands, except per share amounts)</i>		
Net earnings	\$ 77,280	\$ 81,733	\$ 62,935
Earnings per common share:			
Basic (1)	\$ 0.74	\$ 0.77	\$ 0.59
Diluted (1)	\$ 0.74	\$ 0.77	\$ 0.59
Return on average assets	1.19%	1.26%	0.93%
Return on average shareholders' equity	10.31%	12.00%	9.40%

Noninterest Expense and Efficiency Ratio Reconciliation (Non-GAAP)

We use certain non-GAAP financial measures to provide supplemental information regarding our performance. Noninterest expense for the year ended December 31, 2012, includes a debt termination expense of \$20.4 million. We believe that presenting the efficiency ratio, and the ratio of noninterest expense to average assets, excluding the impact of debt termination expense and related net interest expense savings, provides additional clarity to the users of financial statements regarding core financial performance.

	For the Year Ended December 31,		
	2012	2011	2010
Net interest income	\$ 236,950	\$ 234,681	\$ 259,317
Noninterest income	\$ 15,903	\$ 34,216	\$ 57,114
Noninterest expense	\$ 138,160	\$ 141,025	\$ 168,492
Less: Termination expense on borrowings	(20,379)	(3,310)	(18,663)
Adjusted noninterest expense	\$ 117,781	\$ 137,715	\$ 149,829
Efficiency ratio	54.64%	52.45%	53.25%
Adjusted efficiency ratio	46.58%	51.21%	47.35%
Adjusted noninterest expense	\$ 117,781	\$ 137,715	\$ 149,829
Average assets	\$ 6,485,942	\$ 6,505,508	\$ 6,771,817
Adjusted noninterest expense to average assets	1.82%	2.12%	2.21%

Income and Expense Related to Covered Assets

The following table summarizes the components of income and expense related to covered assets excluding normal accretion of interest income on covered loans for 2012, 2011 and 2010:

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>		
Interest income-accelerated accretion	\$ 22,607	\$ 12,586	\$ 26,740
Other income-increase/(decrease) in FDIC loss share asset	(21,916)	171	(15,856)
Other income-gain/(loss) on sale of OREO	996	446	(916)
Other Income-gain on sale (loss) of loans held-for-sale	815		
Expenses-legal and professional	(1,358)	(2,011)	(1,912)
Expenses-OREO write-down	(586)	(4,484)	(1,917)
Expenses-OREO expenses	(284)	(988)	(616)
Expenses-Other expenses (appraisals)	(225)	(485)	(376)

Net income before income taxes related to covered assets	\$	49	\$	5,235	\$	5,147
--	----	----	----	-------	----	-------

Table of Contents

Income and expense related to covered loans include accretion of the difference between the carrying amount of the covered loans and their expected cash flows, net increase (decrease) in the FDIC loss sharing asset as well as the other noninterest expenses related to covered loans.

2012 Compared to 2011

The discount accretion of \$22.6 million in 2012, recognized as part of interest income from covered loans, increased \$10.0 million, compared to \$12.6 million in 2011. This increase was reduced by the changes in FDIC loss sharing asset, a net decrease of \$21.9 million in 2012, compared to a net increase of \$171,000 in 2011.

Loans acquired from the SJB acquisition continued to perform better than originally expected. At December 31, 2012, the remaining discount associated with the SJB loans approximates \$25.3 million. Based on the current forecast of expected cash flows, approximately \$16.4 million of the discount is expected to accrete into interest income over the remaining lives of the loans. The FDIC loss sharing asset totaled \$18.5 million at December 31, 2012. The loss sharing asset will continue to be reduced by loss claims submitted to the FDIC with the remaining balance amortized on the same basis as the discount, not to exceed its remaining life of the loss share contract of approximately 1.75 years.

The Company also recognized net gain on sales of covered assets of \$1.8 million for 2012, compared to \$446,000 in 2011.

Noninterest expense related to covered assets includes OREO expense, legal and professional expenses and other covered asset related expenses totaled \$2.5 million and \$8.0 million for 2012 and 2011, respectively. Covered loans decreased \$109.9 million to \$220.5 million at December 31, 2012 from \$330.4 million at December 31, 2011.

2011 Compared to 2010

The discount accretion of \$12.6 million in 2011 decreased by \$14.1 million from \$26.7 million in 2010. This decrease was partially offset by a \$16.0 million increase resulting from the changes in the FDIC loss sharing asset (\$171,000 net increase in 2011, compared to a net decrease of \$15.9 million in 2010).

The Company also recognized net gain on sales of covered OREO of \$446,000 in 2011 compared to a loss of \$916,000 for 2010. Noninterest expense related to covered assets includes OREO expense, legal and professional expense and other covered asset related expenses, which totaled \$8.0 million in 2011, up from \$4.8 million in 2010.

Table of Contents

Net Interest Income

The principal component of our earnings is net interest income, which is the difference between the interest and fees earned on loans and investments (earning assets) and the interest paid on deposits and borrowed funds (interest-bearing liabilities). Net interest margin is the taxable-equivalent of net interest income as a percentage of average earning assets for the period. The level of interest rates and the volume and mix of earning assets and interest-bearing liabilities impact net interest income and net interest margin. The net interest spread is the yield on average earning assets minus the cost of average interest-bearing liabilities. Our net interest income, interest spread, and net interest margin are sensitive to general business and economic conditions. These conditions include short-term and long-term interest rates, inflation, monetary supply, and the strength of the international, national and state economies, in general, and more specifically the local economies in which we conduct business. Our ability to manage net interest income during changing interest rate environments will have a significant impact on our overall performance. As of December 31, 2012, our balance sheet is slightly asset-sensitive over a one-year horizon assuming no balance sheet growth; meaning interest-earning assets will generally reprice faster than interest-bearing liabilities. Therefore, our net interest margin is likely to modestly increase in sustained periods of rising interest rates and decrease modestly in sustained periods of declining interest rates. We manage net interest income through affecting changes in the mix of earning assets as well as the mix of interest-bearing liabilities, changes in the level of interest-bearing liabilities in proportion to earning assets, and in the growth of earning assets.

The table below presents the interest rate spread, net interest margin and the composition of average interest-earning assets and average interest-bearing liabilities by category for the periods indicated, including the changes in average balance, composition, and average yield/rate between these respective periods:

Net interest margin tax equivalent excluding discount			
Net interest margin excluding loan fees	3.87%	3.83%	4.07%
Net interest margin excluding loan fees tax equivalent	4.01%	4.00%	4.23%

(1) Non tax-equivalent (TE) rate was 2.40% for 2012, 3.09% for 2011, and 3.82% for 2010.

(2) Includes loan fees of: \$2,761 for 2012, \$2,124 for 2011, and \$2,646 for 2010.

Prepayment penalty fees are included in interest income, and are as follows: \$3,701 for 2012, \$1,862 for 2011, and \$1,362 for 2010.

(3) Includes interest-bearing demand and money market accounts.

Table of Contents**Net Interest Income and Net Interest Margin Reconciliations (Non-GAAP)**

We use certain non-GAAP financial measures to provide supplemental information regarding our performance. The 2012, 2011 and 2010 net interest income and net interest margin include a yield adjustment of \$22.6 million, \$12.6 million and \$26.7 million, respectively, from discount accretion on covered loans. We believe that presenting the net interest income and net interest margin excluding the yield adjustment provides additional clarity to the users of financial statements regarding core net interest income and net interest margin.

	For the Year Ended December 31,								
	Average Balance	2012 Interest	Yield	Average Balance	2011 Interest	Yield	Average Balance	2010 Interest	Yield

Yield adjustment to interest income from discount accretion		(22,607)			(12,586)			(26,740)	
Net interest income and net interest margin (TE), excluding yield adjustment		\$ 222,885	3.66%		\$ 231,962	3.78%		\$ 232,577	3.76%

The following table presents a comparison of interest income and interest expense resulting from changes in the volumes and rates on average earning assets and average interest-bearing liabilities for the periods indicated. Changes in interest income or expense attributable to volume changes are calculated by multiplying the change in volume by the initial average interest rate. The change in interest income or expense attributable to changes in interest rates is calculated by multiplying the change in interest rate by the initial volume. The changes attributable to interest rate and volume changes are calculated by multiplying the change in rate times the change in volume.

Rate and Volume Analysis for Changes in Interest Income, Interest Expense and Net Interest Income

Table of Contents*2012 Compared to 2011*

Excluding the impact of the yield adjustment on covered loans, our net interest margin (tax equivalent) was 3.66% for 2012, compared to 3.78% for 2011. Total average earning asset yields (excluding discount) decreased 28 basis points to 4.06% for 2012 from 4.34% for 2011. Total cost of funds decreased to 0.44% for 2012 from 0.60% for 2011. Net interest margin was up slightly year-over-year primarily due to an 18 basis point decrease in the cost of interest-bearing liabilities, offset by a decrease in the yield on average earning assets.

The average yield on loans was 5.28% for 2012, compared to 5.37% for 2011. This year-over-year decrease in loan yield was primarily due to the refinancing of higher yielding loans and lower rates on new originations. The average balance of total loans decreased \$156.9 million to \$3.47 billion for 2012, compared to \$3.62 billion for 2011. The \$11.3 million decrease in total interest on loans was partially offset by the \$10.0 million increase in the discount accretion from covered SJB loans, primarily due to improved credit loss experienced on covered loans. We also earned \$3.7 million in loan prepayment penalty fees for 2012, compared with \$1.9 million for 2011.

Total average earning assets for 2012 were \$6.07 billion, a decrease of \$233,000 from \$6.07 billion for 2011. This decrease was principally due to a \$185.1 million decrease in average interest-earning cash to \$276.8 million, compared to \$461.8 million for 2011 as a result of prepaying \$250.0 million of FHLB advances during the third quarter of 2012. The average investment in FHLB stock also decreased \$14.3 million to \$65.8 million for 2012, compared to \$80.1 million for 2011. The total average loan balance, net of discount, also decreased \$114.4 million. These decreases were partially offset by an increase of \$313.6 million in lower yielding investment securities to \$2.30 billion for 2012, compared to \$1.98 billion for 2011.

In general, we stop accruing interest on a loan after its principal or interest becomes 90 days or more past due. When a loan is placed on nonaccrual status, all interest previously accrued but not collected is charged against earnings. There was no interest income that was accrued and not reversed for nonaccrual loans at December 31, 2012 and 2011. As of December 31, 2012 and 2011, we had \$58.0 million and \$62.7 million of non-covered nonaccrual loans, respectively. Had non-covered nonaccrual loans for which interest was no longer accruing complied with the original terms and conditions, interest income would have been approximately \$3.9 million and \$3.5 million greater for 2012 and 2011, respectively.

Fees collected on loans are an integral part of the loan pricing decision. Net loan fees and the direct costs associated with the origination of loans are deferred and deducted from total loans on our balance sheet. Net deferred loan fees are recognized in interest income over the term of the loan using the effective-yield method. We recognized loan fee income of \$2.8 million for 2012 and \$2.1 million for 2011.

Interest income on investments of \$54.7 million for 2012 decreased \$6.2 million, or 10.18%, from \$60.9 million for 2011. Total yield (TE) on investments was 2.78% for 2012, compared to 3.59% for the same period in 2011. We have been strategically reinvesting our cash flow from our investment portfolio, carefully weighing current rates and overall interest rate risks and we continually adjust our investment strategies in response to the changing interest rate environment. For the year 2012, we purchased \$546.1 million of mortgage-backed securities with an average yield of 1.79%, \$23.1 million of municipal securities with an average tax-equivalent yield of 3.42%, \$166.3 million SBA Pools with an average yield of 1.79%, and \$176.5 million of callable Agencies with an average yield of 1.74%. Finding bank-qualified municipal securities that meet our investment criteria remains challenging, but desirable.

Interest expense of \$25.3 million for 2012 decreased \$9.7 million, or 27.87%, compared to \$35.0 million for 2011. The average rate paid on interest-bearing liabilities decreased 18 basis points, to 0.73% in 2012 from 0.91% in 2011 as a result of the lower interest rate environment in 2012 as well as the mix of interest-bearing liabilities. The decline in interest expense was driven by lower rates paid and lower average balances on deposits as reflected by the decrease in our average cost of interest-bearing deposits (0.24% for 2012, compared to 0.33% for 2011). Average interest-bearing deposits of \$2.48 billion for 2012 decreased \$169.4 million, or 6.39%, from \$2.65 billion in 2011. Average noninterest-bearing deposits increased \$315.1 million to \$2.22 billion, or 47.22% of total average deposits for 2012, compared to \$1.91 billion, or 41.81% of total average deposits for 2011. The decrease in rates paid on deposits (0.13% for 2011 compared to 0.19% for 2011) also contributed to our lower cost of funds.

Other borrowings typically have higher interest costs than interest-bearing deposits. The \$7.0 million decrease in interest from other borrowings was primarily due to the redemption of \$250.0 million of fixed rate loans from the FHLB during the third quarter of 2012, and \$48.0 million redemption of junior subordinated debentures during 2012. These FHLB loans carried an average coupon rate of 3.39% and a weighted average remaining life of 2.6 years. We also repaid \$100.0 million of FHLB loans, with a coupon rate of 2.89%, at the end of December, 2011. On January 7, 2012, we redeemed all outstanding debentures and trust preferred securities issued by First Coast Capital Trust II for a total consideration of approximately \$6.8 million. During 2012, we redeemed \$41.2 million of CVB Statutory Trust I junior subordinated debentures bearing interest at 2.85% above the 90-day LIBOR.

Table of Contents*2011 Compared to 2010*

Net interest income, before provision for credit losses, decreased \$24.6 million, or 9.50%, over net interest income of \$259.3 million for 2010. This decrease in net interest income for 2011 resulted from a decrease of \$47.6 million in interest income, partially offset by a decrease of \$22.9 million in interest expense. The 17 basis point decrease in our net interest spread (TE) resulted from a 59 basis point decrease in the yield on average earning assets, offset by a 42 basis point decrease in the average cost of interest-bearing liabilities.

Interest income of \$269.7 million decreased \$47.6 million, or 14.99% compared to total interest income of \$317.3 million for 2010. The decrease in interest income was primarily due to a \$444.6 million decrease in the average balance of loans for 2011 which decreased interest income by \$23.4 million. In addition, there was a \$14.1 million decrease in the discount accretion from covered SJB loans, and \$13.3 million from a 101 basis point decrease in the yield on taxable investment securities as result of the decreasing interest rate environment. The discount accretion represents accelerated principal payments on SJB loans and is recorded as a yield adjustment to interest income. As a result, the average yield (TE) on interest-earning assets decreased to 4.61% in 2011, or 59 basis points, from 5.20% in 2010. Average earning assets decreased by \$238.4 million, or 3.78%, from \$6.31 billion for 2010, compared to \$6.07 billion for 2011. Excluding the accelerated accretion, the yield in interest-earning assets would have been 4.34% for 2011 compared to 4.65% for 2010.

As of December 31, 2011 and 2010, we had \$62.7 million and \$157.0 million of non-covered nonaccrual loans, respectively. There was no interest income that was accrued and not reversed for nonaccrual loans at December 31, 2011 and 2010. Had non-covered nonaccrual loans for which interest was no longer accruing complied with the original terms and conditions, interest income would have been approximately \$3.5 million and \$5.2 million greater for 2011 and 2010, respectively.

Fees collected on loans are an integral part of the loan pricing decision. Net loan fees and the direct costs associated with the origination of loans are deferred and deducted from total loans on our balance sheet. Net deferred loan fees are recognized in interest income over the term of the loan using the effective-yield method. We recognized loan fee income of \$2.1 million for 2011 and \$2.6 million for 2010. The decrease in loan fee income during 2011 was due to a decrease in loan originations as a result of the sustained weakness in the economy resulting in declining loan demand.

Interest income includes dividends earned on our investment in FHLB capital stock. For the year ended December 31, 2011 and 2010, dividends earned on FHLB stock totaled \$242,000 and \$324,000, respectively. In 2009, the FHLB announced that there can be no assurance that the FHLB will pay dividends at the same rate it has paid in the past. However, the FHLB did declare and pay dividends during both 2010 and 2011.

Interest expense of \$35.0 million for 2011 decreased \$22.9 million, or 39.56% compared to \$58.0 million for 2010. The average rate paid on interest-bearing liabilities decreased 42 basis points, to 0.91% in 2011 from 1.33% in 2010 as a result of a decreasing interest rate environment in 2011 as well as the mix of interest-bearing liabilities. Other borrowings typically have a higher cost than interest-bearing deposits. The average cost of borrowings decreased to 2.19% for 2011 from 2.68% for 2010 and was primarily due to a \$283.7 million decrease in the average balance of other borrowings for 2011 which increased interest expense by \$7.6 million. The prepayments of a \$250 million structured repurchase agreement and \$100 million in FHLB advances in 2010 resulted in an additional reduction of \$5.6 million in interest expense compared to 2010. The \$100.0 million in FHLB maturities, which we elected not to renew, also contributed to the decrease in the average cost of borrowings for 2011. The decline in interest expense was driven by lower rates paid and lower average balances on deposits as reflected by the decrease in our average cost of interest-bearing deposits (0.33% for 2011 compared to 0.63% for 2010). Average interest-bearing deposits decreased \$235.4 million, or 8.15%, from \$2.89 billion in 2010 to \$2.65 billion in 2011. Average noninterest-bearing deposits increased \$236.0 million to \$1.91 billion, or 41.81% of total average deposits for 2011, compared to \$1.67 billion, or 36.64% of total average deposits for 2010. The decrease in rates paid on deposits (0.19% for 2011 compared to 0.40% for 2010) also contributed to our lower cost of funds.

Provision for Credit Losses

We maintain an allowance for credit losses that is increased by a provision for non-covered credit losses charged against operating results. The provision for credit losses is determined by management as the amount to be added to the allowance for credit losses after net charge-offs have been deducted to bring the allowance to an appropriate level which, in management's best estimate, is necessary to absorb probable credit losses within the existing loan portfolio.

Our provision for credit losses on non-covered loans was zero for 2012, \$7.1 million for 2011 and \$61.2 million for 2010. The decrease in the provision for credit losses was primarily due to overall improvement in the performance of our loan portfolio. We believe the allowance is appropriate at December 31, 2012. We periodically assess the quality of our portfolio to determine whether additional provisions for credit losses are necessary. The ratio of the allowance for credit losses to total non-covered net loans as of December 31, 2012, 2011 and 2010 was 2.84%, 2.92% and 3.12%, respectively.

Table of Contents

No assurance can be given that economic conditions which adversely affect the Company's service areas or other circumstances will not be reflected in increased provisions for credit losses in the future, as the nature of this process requires considerable judgment. Net charge-offs totaled \$1.5 million for 2012, \$18.4 million for 2011, and \$64.9 million in 2010. See Risk Management Credit Risk herein.

SJB loans acquired in the FDIC-assisted transaction were initially recorded at their fair value and are covered by a loss sharing agreement with the FDIC. Due to the timing of the acquisition and the October 16, 2009 fair value estimate, there was no provision for credit losses on the covered SJB loans in 2009. In 2012 there were \$657,000 in net recoveries, compared to \$893,000 in net charge-offs in 2011, for loans in excess of the amount originally expected in the fair value of the loans at acquisition. Our reduction of provision for credit losses on covered SJB loans was \$657,000 in 2012, compared to provision of \$893,000 for credit losses in 2011. An offsetting adjustment was recorded to the FDIC loss-sharing asset based on the appropriate loss-sharing percentage.

Noninterest Income

Noninterest income includes income derived from special services offered, such as CitizensTrust, BankCard services, international banking, and other business services. Also included in noninterest income are service charges and fees, primarily from deposit accounts; gains (net of losses) from the disposition of investment securities, loans, other real estate owned, and fixed assets; and other revenues not included as interest on earning assets.

The following table sets forth the various components of noninterest income for the periods indicated.

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>		
Noninterest income:			
Service charges on deposit accounts	\$ 16,106	\$ 15,768	\$ 16,745
CitizensTrust	8,169	8,683	8,363
Bankcard services	3,650	3,144	2,776
BOLI Income	2,973	3,259	3,125
Gain on sale of securities			38,900
Increase (decrease) in FDIC loss sharing asset, net	(21,916)	171	(15,856)
Impairment loss on investment security		(656)	(904)
Gain/(loss) on OREO	1,544	1,076	(242)
Gain/(loss) on loans held for sale	815	(1,651)	(598)
Other	4,562	4,422	4,805
Total noninterest income	\$ 15,903	\$ 34,216	\$ 57,114

2012 Compared to 2011

Noninterest income for 2012 was reduced by a \$21.9 million net decrease in the FDIC loss sharing asset, partially offset by a \$1.8 million net gain on sale of covered assets. Our credit loss experience on loans acquired from the SJB acquisition continued to improve. At December 31, 2012, the remaining discount associated with the SJB loans approximated \$25.3 million. Based on the current forecast of expected cash flows, approximately \$16.4 million of the discount is expected to accrete into interest income over the remaining lives of the loans. The FDIC loss sharing asset totaled \$18.5 million at December 31, 2012. The loss sharing asset will continue to be reduced by loss claims submitted to the FDIC with the remaining balance amortized on the same basis as the discount, not to exceed the remaining life of the loss share contract of approximately 1.75 years.

CitizensTrust consists of Wealth Management and Investment Services income. The Wealth Management Group provides a variety of services, which include asset management, financial planning, estate planning, retirement planning, private and corporate trustee services, and probate services. Investment Services provides self-directed brokerage, 401(k) plans, mutual funds, insurance and other non-insured investment products. CitizensTrust had approximately \$2.10 billion in assets under management and administration, including \$1.58 billion in assets under management, as of December 31, 2012. CitizensTrust generated fees of \$8.2 million in 2012, compared to \$8.7 million in 2011.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

The Bank invests in Bank-Owned Life Insurance (BOLI). BOLI involves the purchasing of life insurance by the Bank on a selected group of employees. The Bank is the owner and beneficiary of these policies. BOLI is recorded as an asset at its cash surrender value. Increases in the cash value of these policies, as well as insurance proceeds received, are recorded in noninterest income and are not subject to income tax, as long as they are held for the life of the covered parties. BOLI income for 2012 decreased \$286,000, or 8.78%, from \$3.3 million 2011.

Table of Contents*2011 Compared to 2010*

Noninterest income of \$34.2 million in 2011 decreased \$22.9 million, or 40.09%, over noninterest income of \$57.1 million for 2010. This decrease was primarily due to \$38.9 million in net gain on sales of securities for 2010, compared to zero gain on sale of securities for 2011, partially offset by a \$15.9 million net reduction in the FDIC loss sharing asset.

During 2011, we recognized a \$656,000 other-than-temporary impairment on a private-label mortgage-backed investment security, which was charged to other operating income. There were no securities sold during 2011.

CitizensTrust generated fees of \$8.7 million in 2011. This represented a modest increase of \$320,000, or 3.83%, from fees generated of \$8.4 million in 2010. BOLI income of \$3.3 million in 2011 reflected a slight increase of \$134,000, or 4.29%, compared to BOLI income earned in 2010.

Noninterest Expense

The following table sets for the various components of noninterest expense for the periods indicated.

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>		
Noninterest expense:			
Salaries and employee benefits	\$ 68,496	\$ 69,993	\$ 69,419
Occupancy	10,822	11,261	12,127
Equipment	4,651	5,322	7,221
Professional services	6,249	15,031	13,308
Software licenses and maintenance	4,269	3,669	5,031
Stationery and supplies	3,592	3,645	4,965
Promotion	4,869	4,977	6,084
Amortization of intangibles	2,159	3,481	3,732
Provision for unfunded commitments	(1,000)	(918)	2,600
Debt termination	20,379	3,310	18,663
OREO expense	2,146	6,729	7,490
Regulatory assessments	3,596	4,970	8,774
Loan expense	2,084	2,436	1,804
Other	5,848	7,119	7,274
Total noninterest expense	\$ 138,160	\$ 141,025	\$ 168,492

2012 Compared to 2011

Our ability to control noninterest expenses in relation to asset growth can be measured in terms of total noninterest expenses as a percentage of average assets. Excluding the impact of the debt termination expense, noninterest expense measured as a percentage of average assets was 1.82% for 2012, compared to 2.12% for 2011.

Our ability to control noninterest expenses in relation to the level of total revenue (net interest income before provision for credit losses plus noninterest income) is measured by the efficiency ratio and indicates the percentage of net revenue that is used to cover expenses. For 2012, the efficiency ratio was 54.64%, compared to 52.45% for 2011. The \$20.4 million in debt termination expense was the main reason for the increase in our efficiency ratio. Excluding the impact of the debt termination expense, the efficiency ratio was 46.58% and 51.21% for 2012 and 2011, respectively.

Excluding the \$20.4 million debt termination expense, the overall decrease of \$19.9 million in noninterest expense was primarily attributable to decreases of \$7.5 million in legal expenses (included in professional services), \$4.6 million in OREO expense, \$1.5 million in salaries and employee benefits, \$1.4 million in regulatory assessment fees, and \$1.3 million in intangible amortization expense.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Overall salaries and related expenses decreased \$1.5 million compared to 2011. At December 31, 2012, we employed 809 associates (589 full-time and 221 part-time), compared to 809 associates (578 full-time and 231 part-time) at December 31, 2011. Salaries and related expenses as a percent of average assets was at 1.06% for 2012 and 1.08% for 2011.

Table of Contents

The \$8.8 million decrease in professional services expense was primarily due to a decrease of \$7.5 million in legal expenses associated with credit and collection issues, the Securities and Exchange Commission investigation, and other litigation issues in which the Company is involved. See Item 3 Legal Proceedings .

2011 Compared to 2010

Total noninterest expense of \$141.0 million for 2011 represented a decrease of \$27.5 million, or 16.30%, over noninterest expense of \$168.5 million for 2010. The overall decrease was primarily attributable to decreases of \$15.4 million in prepayment penalties on FHLB advances, \$2.7 million in supplies and software expense, \$3.8 million for regulatory assessment fees, and \$1.9 million in equipment expenses. We also recorded a reduction in our reserve for unfunded commitments of \$918,000 during 2011, compared to an increase in our reserve for unfunded commitments of \$2.6 million during 2010.

Professional services totaled \$15.0 million for 2011, compared to \$13.3 million for 2010. The 2011 increases were primarily due to increases in legal expenses for credit and collection issues, a Securities and Exchange Commission investigation and other litigation issues in which the Company is involved.

Salaries and related expenses totaled \$70.0 million for 2011, an increase of \$574,000, or 0.83%, over salaries and related expenses of \$69.4 million for 2010. At December 31, 2011, we employed 809 associates (578 full-time and 231 part-time) compared to 811 associates (572 full-time and 239 part-time) at December 31, 2010. Salaries and related expenses as a percent of average assets increased to 1.08% for 2011, compared to 1.03% for 2010.

Income Taxes

The Company's effective tax rate for 2012 was 32.62%, compared to 32.34% for 2011, and 27.44% for 2010. The effective tax rates are below the nominal combined Federal and State tax rates as a result of tax-advantaged income from certain investments and municipal loans and leases as a percentage of total income for each period. The majority of tax-advantaged income is derived from municipal securities.

RESULTS BY BUSINESS SEGMENTS

We have two reportable business segments: which are (i) Business Financial and Commercial Banking Centers and (ii) Treasury. The results of these two segments are included in the reconciliation between business segment totals and our consolidated total. Our business segments do not include the results of administration units that do not meet the definition of an operating segment. There are no provisions for credit losses or taxes in the segments as these are accounted for at the corporate level.

Business Financial and Commercial Banking Centers

Key measures we use to evaluate the Business Financial and Commercial Banking Center's performance are included in the following table for years ended December 31, 2012, 2011, and 2010. The table also provides additional significant segment measures useful to understanding the performance of this segment.

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>		
Key Measures:			
<i>Statement of Operations</i>			
Interest income	\$ 175,835	\$ 182,187	\$ 242,087
Interest expense	11,304	15,295	34,181
Net interest income	\$ 164,531	\$ 166,892	\$ 207,906
Noninterest income	23,020	21,622	23,204
Noninterest expense	45,189	49,802	51,922

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Segment pre-tax profit	\$ 142,362	\$ 138,712	\$ 179,188
------------------------	------------	------------	------------

Balance Sheet

Average loans	\$ 2,621,327	\$ 2,639,628	\$ 2,822,184
Average interest-bearing deposits and customer repurchases	\$ 2,739,389	\$ 2,946,270	\$ 3,179,968
Yield on loans	5.72%	5.96%	6.04%
Rate paid on interest-bearing deposits and customer repurchases	0.26%	0.35%	0.71%

- (1) Interest income and interest expense include credit for funds provided and charge for funds used, respectively. These are eliminated in the consolidated presentation.
- (2) Yield on loans excludes SJB discount accretion as this is accounted for at the Corporate level.

Table of Contents

For the year ended December 31, 2012, Business Financial and Commercial Banking Centers segment pre-tax profits increased by \$3.7 million, or 2.63%, compared to 2011. This was primarily due to a decrease in noninterest expense of \$4.6 million, a decrease in interest expense of \$4.0 million, and an increase in noninterest income of \$1.4 million, offset by a decrease in interest income of \$6.4 million. The decrease in net interest income was primarily due to a 24 basis point decrease in the loan yield in 2012, compared to 2011.

For the year ended December 31, 2011, segment pre-tax profits decreased by \$40.5 million, or 22.59%, compared to 2010. This was primarily due to a decrease in interest income of \$59.9 million, offset by a decrease in interest expense of \$18.9 million. The decrease in interest income was primarily due to a \$182.6 million, or 6.47% decrease in the average loan balance in 2011, compared to 2010. The decrease in interest expense was primarily due to a decrease in rates paid on deposits and a decrease in average interest-bearing deposits and customer repurchase agreements. During 2011 average interest-bearing deposits and customer repurchase agreements decreased \$233.7 million, or 7.35%, compared to 2010.

Treasury

Key measures we use to evaluate Treasury's performance are included in the following table for the years ended December 31, 2012, 2011 and 2010. The table also provides additional significant segment measures useful to understand the performance of this segment.

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>		
Key Measures:			
<i>Statement of Operations</i>			
Interest income	\$ 56,559	\$ 62,732	\$ 76,651
Interest expense	56,666	56,386	73,786
Net interest income	\$ (107)	\$ 6,346	\$ 2,865
Noninterest income		(655)	37,997
Noninterest expense	729	807	1,462
Debt termination	20,379	3,310	18,663
Segment pre-tax profit (loss)	\$ (21,215)	\$ 1,574	\$ 20,737
<i>Balance Sheet</i>			
Average investments	\$ 2,297,359	\$ 1,983,774	\$ 1,970,412
Average interest-bearing deposits	\$ 240,002	\$ 240,302	\$ 240,316
Average borrowings	\$ 363,152	\$ 552,155	\$ 796,321
Yield on investments-TE	2.78%	3.59%	4.35%
Non-tax equivalent yield	2.40%	3.09%	3.82%
Rate paid on borrowings	4.09%	3.80%	4.00%

(1) Interest income and interest expense include credit for funds provided and charge for funds used, respectively. These are eliminated in the consolidated presentation.

For the year ended December 31, 2012, the Company's Treasury department reported segment pre-tax loss of \$21.2 million. The decrease was primarily due to \$20.4 million in debt termination expense as a result of prepaying \$250.0 million of FHLB advances during 2012, compared to \$3.3 million debt termination expense in 2011. Excluding the \$20.4 million and \$3.3 million in debt termination expense for 2012 and 2011, respectively, segment pre-tax loss was \$836,000 for 2012, compared to pre-tax profit of \$4.9 million for 2011. This year-over-year decrease was primarily due to a decline of \$6.2 million in interest income due to an 81 basis point decrease in yield on investments in 2012, partially offset by zero realized gains or losses for 2012, compared to an impairment loss of \$655,000 for 2011.

For the year ended December 31, 2011, Treasury segment profits decreased by \$19.2 million compared to 2010. The decrease was primarily due to \$38.9 million in gain on the sale of investment securities in 2010, and a decrease of \$15.4 million in prepayment penalties in 2011. This was partially offset by a \$13.9 million reduction in interest income due to a 76 basis point decrease in yield on investments in 2011. Interest expense

decreased \$17.4 million primarily due to a decrease of \$244.2 million in average borrowings from 2010 to 2011.

Table of Contents**Other**

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>		
Key Measures:			
<i>Statement of Operations</i>

(1) Interest income and interest expense include credit for funds provided and charge for funds used, respectively. These are eliminated in the consolidated presentation.

The Company's administration and other operating departments reported pre-tax loss of \$6.5 million for the year ended December 31, 2012. This represented a decrease of \$13.0 million or 66.87%, from pre-tax loss of \$19.5 million for 2011. The reduction in pre-tax loss was primarily attributed to a decrease of \$15.2 million in noninterest expense, an increase of \$11.1 million in net interest income, and a decrease of \$7.1 million in provision for credit losses, partially offset by a net decrease in FDIC loss sharing asset of \$22.1 million. Interest income in 2012 included \$22.6 million in accelerated accretion on SJB acquired loans, compared to \$12.6 million in 2011.

Pre-tax loss for 2011 decreased \$93.7 million to \$19.5 million, from pre-tax loss of \$113.2 million for 2010. The reduction in pre-tax loss was primarily attributed to the decrease in provision for credit losses of \$54.1 million, an increase in noninterest income of \$17.3 million, an increase in net interest income of \$12.9 million, and a decrease in noninterest expense of \$9.3 million. Interest income in 2011 included \$12.6 million in accelerated accretion on SJB acquired loans, compared to \$26.7 million in 2009.

Table of Contents**ANALYSIS OF FINANCIAL CONDITION**

The Company reported total assets of \$6.36 billion at December 31, 2012. This represented a decrease of \$119.6 million, or 1.84 %, from total assets of \$6.48 billion at December 31, 2011. Earnings assets totaled \$6.04 billion at December 31, 2012. This represented a decrease of \$92.4 million, or 1.51%, from total earning assets of \$6.13 billion at December 31, 2011. The decrease in earning assets was due to a decrease in interest-earning cash as a result of prepaying \$250.0 million of FHLB advances. Total liabilities were \$5.60 billion at December 31, 2012, down \$167.7 million, or 2.91%, from total liabilities of \$5.77 billion at December 31, 2011. Total equity increased \$48.2 million, or 6.74%, to \$763.0 million at December 31, 2012, compared to total equity of \$714.8 million at December 31, 2011.

Investment Securities

The Company maintains a portfolio of investment securities to provide interest income and to serve as a source of liquidity for its ongoing operations. The tables below set forth information concerning the composition of the investment securities portfolio at December 31, 2012 and 2011.

At December 31, 2012, we reported total investment securities of \$2.45 billion. This represented an increase of \$247.5 million, or 11.23%, from total investment securities of \$2.20 billion at December 31, 2011. Investment securities comprised 40.61% of the Company's total earning assets as of December 31, 2012. No securities were sold in 2012 and 2011.

At December 31, 2012, securities held as available-for-sale had a fair value of \$2.45 billion with an amortized cost of \$2.37 billion. At December 31, 2012, the net unrealized holding gain on securities available-for-sale was \$74.6 million that resulted in accumulated other comprehensive gain of \$43.3 million (net of \$31.3 million in deferred taxes). At December 31, 2011, the net unrealized holding gain on securities available-for-sale was \$71.5 million that resulted in an accumulated other comprehensive gain of \$41.5 million.

Composition of the Fair Value of Investment Securities Available-for-Sale

	2012		December 31, 2011		2010	
	Fair Value	Percent	Fair Value	Percent	Fair Value	Percent
<i>(Dollars in thousands)</i>						
Investment securities available for sale:						
Government agency	\$ 359,300	14.67%	\$ 46,507	2.11%	\$ 106,273	5.93%
Residential mortgage-backed securities	887,598	36.24%	888,000	40.33%	808,409	45.12%

Table of Contents

The maturity distribution of the available-for-sale portfolio at December 31, 2012 consists of the following:

	December 31, 2012				Total	Percent to Total
	One Year or Less	After One Year Through Five Years	After Five Year Through Ten Years	After Ten Years		
<i>(Dollars in thousands)</i>						
Maturity distribution:						
Government agency	\$ 151,000	\$ 12,171	\$ 196,129	\$	\$ 359,300	14.67%
Mortgage-backed securities	8,069	805,852	73,677		887,598	36.24%
CMO/REMICs	79,071	479,147	13,742		571,960	23.35%
Municipal bonds (1)	34,417	419,709	141,571	29,732	625,429	25.53%
Other securities	5,100				5,100	0.21%
Total	\$ 277,657	\$ 1,716,879	\$ 425,119	\$ 29,732	\$ 2,449,387	100.00%
Weighted average yield:						
Government agency	1.69%	0.94%	1.89%	0.00%	1.77%	
Mortgage-backed securities	4.08%	2.12%	2.86%	0.00%	2.20%	
CMO/REMICs	1.06%	1.88%	4.53%	0.00%	1.83%	
Municipal bonds (1)	3.98%	3.88%	3.63%	4.03%	3.83%	
Other securities	5.95%	0.00%	0.00%	0.00%	0.06%	
Total	1.94%	2.48%	2.72%	4.03%	2.47%	

(1) The weighted average yield is not tax-equivalent. The tax-equivalent yield as of December 31, 2012 was 5.20%

The maturity of each security category is defined as the contractual maturity except for the categories of mortgage-backed securities and CMO/REMICs whose maturities are defined as the estimated average life. The final maturity of mortgage-backed securities and CMO/REMICs will differ from their contractual maturities because the underlying mortgages have the right to repay such obligations without penalty. The speed at which the underlying mortgages repay is influenced by many factors, one of which is interest rates. Mortgages tend to repay faster as interest rates fall and slower as interest rate rise. This will either shorten or extend the estimated average life. Also, the yield on mortgage-backed securities and CMO/REMICs are affected by the speed at which the underlying mortgages repay. This is caused by the change in the amount of amortization of premiums or accretion of discounts of each security as repayments increase or decrease. The Company obtains the estimated average life of each security from independent third parties.

The weighted-average yield on the investment portfolio at December 31, 2012 was 2.47% with a weighted-average life of 3.1 years. This compares to a weighted-average yield of 2.99% at December 31, 2011 with a weighted-average life of 3.6 years. The weighted average life is the average number of years that each dollar of unpaid principal due remains outstanding. Average life is computed as the weighted-average time to the receipt of all future cash flows, using as the weights the dollar amounts of the principal pay-downs.

Approximately 75% of the securities in the investment portfolio, at December 31, 2012, are issued by the U.S. government or U.S. government-sponsored agencies which have the implied guarantee of payment of principal and interest. As of December 31, 2012, approximately \$106.0 million in U.S. government agency bonds are callable.

As of December 31, 2012 and 2011, the Company held investment securities in excess of ten-percent of shareholders' equity from the following issuers:

The tables above show the Company's investment securities' gross unrealized losses and fair value by investment category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2012 and 2011. The unrealized losses on these securities were primarily attributed to changes in interest rates. The issuers of these securities have not, to our knowledge, established any cause for default on these securities. These securities have fluctuated in value since their purchase dates as market rates have fluctuated. However, we have the ability and the intention to hold these securities until their fair values recover to cost or maturity. As such, management does not deem these securities to be other-than-temporarily-impaired except for one bond held-to-maturity described below. A summary of our analysis of these securities and the unrealized losses is described more fully in Note 5 – Investment Securities in the notes to the consolidated financial statements. Economic trends may adversely affect the value of the portfolio of investment securities that we hold.

For the years ended December 31, 2011, and 2010, the Company recorded net other-than-temporary impairment losses on the held-to-maturity investment security in the amounts of \$656,000, and \$904,000, respectively. The Company did not record any charges for other-than-temporary impairment losses during the year ended December 31, 2012.

Non-Covered Loans

At December 31, 2012, total non-covered loans, net of deferred loan fees, were \$3.25 billion. This represented an increase of \$32.6 million, or 1.01%, from non-covered loans of \$3.22 billion at December 31, 2011. The loan portfolio was affected by real estate trends, diminished loan demand and the weakening of the economy. The overall increase was attributed to the following:

\$53.1 million increase in commercial and industrial loans.

\$41.8 million increase in commercial real estate loans.

\$26.2 million decline in purchased mortgage pool loans.

\$16.4 million decline in construction loans.

\$15.8 million decrease in the dairy and livestock portfolio.

The table below presents the distribution of our non-covered loans at the dates indicated.

Table of Contents**Distribution of Loan Portfolio by Type (Non-Covered Loans)**

Commercial and industrial loans are loans to commercial entities to finance capital purchases or improvements, or to provide cash flow for operations. Real estate loans are loans secured by conforming trust deeds on real property, including property under construction, land development, commercial property and single-family and multi-family residences. Consumer loans include installment loans to consumers as well as home equity loans and other loans secured by junior liens on real property. Municipal lease finance receivables are leases to municipalities. Dairy, livestock and agribusiness loans are loans to finance the operating needs of wholesale dairy farm operations, cattle feeders, livestock raisers, and farmers.

Our loan portfolio is primarily located throughout our marketplace. The following is the breakdown of our total non-covered held-for-investment commercial real estate loans by region as of December 31, 2012.

Non-Covered Loans by Market Area	December 31, 2012			
	Total Non-Covered Loans		Commercial Real Estate Loans	
	<i>(Dollars in thousands)</i>			
Los Angeles County	\$ 1,190,214	36.5%	\$ 795,566	40.0%
Inland Empire	627,173	19.2%	485,176	24.3%
Central Valley	662,420	20.3%	389,297	19.6%
Orange County	461,001	14.1%	187,585	9.4%
Other Areas (1)	318,430	9.9%	132,483	6.7%
	\$ 3,259,238	100.0%	\$ 1,990,107	100.0%

(1) Other areas include loans that are out-of-state or in other areas of California.

Our real estate loans are comprised of industrial, office, retail, single-family residences, multi-family residences, and farmland. We strive to have an original loan-to-value ratio less than 75%. This table breaks down our non-covered real estate portfolio, with the exception of construction loans which are addressed in a separate table.

Table of Contents

		December 31, 2012

		\$ 2,149,395	100.0%	40.2%	1,121

(1) Represents percentage of reported owner-occupied in each real estate loan category.

In the table above, Single-family residential-Direct represents those single-family residence loans that we have made directly to our customers. These loans totaled \$53.3 million. In addition, we have purchased pools of owner-occupied single-family loans from real estate lenders, Single-family residential-Mortgage Pools, totaled \$106.0 million. These loans were purchased with average FICO scores predominantly ranging from 700 to over 800 and overall original loan-to-value ratios of 60% to 80%. These pools were purchased to diversify our loan portfolio. Due to market conditions, we have not purchased any mortgage pools since August 2007.

(1) Other areas include loans that are out-of-state or in other areas of California.

As of December 31, 2012, the Company had \$59.7 million in non-covered construction loans. This represents 1.83% of total non-covered gross loans outstanding of \$3.26 billion. Of the \$59.7 million in construction loans, approximately 8.43%, or \$5.0 million, were for single-family residences, residential land loans, and multi-family land development loans. The remaining construction loans, totaling \$54.7 million, were related to commercial construction. The average balance of any single construction loan was approximately \$2.5 million. Our construction loans are located throughout our marketplace as can be seen in the table above.

Table of Contents**Covered Loans from the SJB Acquisition**

These covered loans were acquired from SJB on October 16, 2009 and are subject to a loss sharing agreement with the FDIC, the terms of which provide that the FDIC will absorb 80% of losses and share in 80% of loss recoveries up to \$144.0 million with respect to covered assets, after a first loss amount of \$26.7 million, which is assumed by the Bank. The FDIC will reimburse the Bank for 95% of losses and share in 95% of loss recoveries in excess of \$144.0 million with respect to covered assets. The loss sharing agreement is in effect for 5 years for commercial loans and 10 years for single-family residential loans from the October 16, 2009 acquisition date and the loss recovery provisions are in effect for 8 and 10 years, respectively for commercial and single-family residential loans from the acquisition date.

The SJB loan portfolio included unfunded commitments for commercial lines or credit, construction draws and other lending activity. The total commitment outstanding as of the acquisition date is included under the shared-loss agreement. As such, any additional advances up to the total commitment outstanding at the time of acquisition are covered loans.

Covered loans acquired will continue to be subject to our credit review and monitoring. If deterioration is experienced subsequent to the October 16, 2009 acquisition fair value amount, such deterioration will be in our loan loss methodology and a provision for credit losses will be charged to earnings with a partially offsetting other operating income item reflecting the increase to the FDIC loss sharing asset.

The table below presents the distribution of our covered loans as of December 31, 2012 and 2011.

Distribution of Loan Portfolio by Type (Covered Loans)

	December 31, 2012		December 31, 2011

Purchased accounting discount	(25,344)		(50,780)	
Net valuation of Loans	\$ 195,215		\$ 256,869	

The excess of cash flows expected to be collected over the initial fair value of acquired loans is referred to as the accretable yield and is accreted into interest income over the estimated life of the acquired loans using the effective yield method. The accretable yield will change due to:

estimate of the remaining life of acquired loans which may change the amount of future interest income;

estimate of the amount of contractually required principal and interest payments over the estimated life that will not be collected (the nonaccretable difference); and

indices for acquired loans with variable rates of interest.

	\$ 738,362	\$ 966,216	\$ 1,775,219	\$ 3,479,797

As a normal practice in extending credit for commercial and industrial purposes, we may accept trust deeds on real property as collateral. In some cases, when the primary source of repayment for the loan is anticipated to come from the cash flow from normal operations of the borrower, and real property has been taken as collateral, the real property is considered a secondary source of repayment for the loan. Since we

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

lend primarily in Southern and Central California, our real estate loan collateral is concentrated in this region. At December 31, 2012, substantially all of our loans secured by real estate were collateralized by properties located in California. This concentration is considered when determining the adequacy of our allowance for credit losses.

Nonperforming Assets (*Non-Covered*)

The following table provides information on non-covered nonperforming assets as of December 31 for each of the last five years.

Other real estate owned (OREO)	14,832	13,820	5,290	3,936	6,565
Total nonperforming assets	\$ 72,829	\$ 76,492	\$ 162,310	\$ 73,715	\$ 24,249
Troubled debt restructured performing loans	\$ 50,392	\$ 38,554	\$ 13,274	\$ 2,500	\$ 2,500
Percentage of nonperforming assets to total net loans outstanding & OREO	2.23%	2.37%	4.80%	2.04%	0.65%
Percentage of nonperforming assets to total assets	1.14%	1.18%	2.52%	1.09%	0.36%

We had loans with a gross balance of \$108.4 million classified as impaired as of December 31, 2012. This balance included the nonperforming loans of \$58.0 million. Impaired loans which were restructured in a troubled debt restructuring represented \$81.7 million, of which \$31.3 million were nonperforming and \$50.4 million were performing, as of December 31, 2012. Of the \$31.3 million in nonperforming TDRs, \$10.6 million are not paying in accordance with the modified terms at December 31, 2012 and the remaining \$20.7 million have either not demonstrated repayment performance for a sustained period and/or we have not received all necessary documents to determine the borrower's ability to meet all future principal and interest payments under the modified terms. As of December 31, 2011, we had impaired loans with a balance of \$101.2 million. Impaired loans measured 3.33% of total non-covered loans as of December 31, 2012.

Of the total impaired loans as of December 31, 2012, \$78.0 million were considered collateral dependent and measured using the fair value of the collateral based on current appraisals (obtained within 1 year). The amount of impaired loans measured using the present value of expected future cash flows discounted at the loans effective rate were \$30.4 million.

At December 31, 2012 and December 31, 2011, TDRs of \$50.4 million and \$38.6 million, respectively, were classified as accruing restructured loans, respectively. At December 31, 2012, performing TDRs were comprised of 13 commercial real estate loans of \$21.1 million, two construction loans of \$19.9 million, five dairy and livestock loans of \$6.9 million, six single-family residential loans of \$1.7 million, six commercial and industrial loans of \$554,000, and two municipal lease and finance receivables of \$263,000. The performing restructurings were granted in response to borrower financial difficulty, and generally provide for a modification of loan repayment terms. The performing restructured loans represent the only impaired loans accruing interest at each respective date. A performing restructured loan is reasonably assured of repayment and is performing according to the modified terms.

At December 31, 2012 and December 31, 2011, there was \$1.4 million and \$27,000 of related allowance on TDRs, respectively. Impairment amounts identified are typically charged off against the allowance at the time a probable loss is determined. Total charge-offs of TDRs for 2012 and 2011 were \$1.2 million and \$13.1 million, respectively.

We have not restructured loans into multiple loans in what is typically referred to as an A/B note structure, where normally the A note meets current underwriting standards and the B note is typically immediately charged-off upon restructuring.

At December 31, 2012, we had \$14.8 million in Other Real Estate Owned (OREO), an increase of \$1.0 million from the eleven OREO properties totaling \$13.8 million at December 31, 2011. During 2012, we added seven properties to OREO for a total of \$8.5 million, which included one \$5.6 million construction loan that went to OREO in the fourth quarter. We sold eleven properties with an OREO value of \$7.0 million, realizing a net gain of \$397,000. We now have seven non-covered OREO properties.

Nonperforming Assets and Delinquencies (Non-Covered)

The table below provides trends in our nonperforming assets and delinquencies during 2012 for total non-covered loans.

We had \$58.0 million in non-covered nonperforming loans, defined as nonaccrual loans and nonperforming TDRs, at December 31, 2012, or 1.78% of total non-covered net loans. This compares to \$62.7 million in nonperforming loans at December 31, 2011. Six customer relationships make up \$31.1 million, or 53.58%, of our nonperforming loans at December 31, 2012. Three of these customer relationships are commercial real estate developers (owner/non-owner occupied) and the primary collateral for these loans is commercial real estate properties. The other three customer relationships are in the dairy and livestock industry; and the collateral is primarily the dairy farm property and the dairy livestock. These six customer relationships have had total charge-offs of \$5.1 million and have \$1.6 million of related allowance at December 31, 2012.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

The economic downturn has had an impact on our market area and on our loan portfolio. We continually monitor these conditions in determining our estimates of needed reserves. However, we cannot predict the extent to which the deterioration in general economic conditions, real estate values, increases in general rates of interest, and changes in the financial conditions or business of a borrower may adversely affect a borrower's ability to pay. See "Risk Management - Credit Risk" herein.

Nonperforming Assets-Covered

Loans acquired through the SJB acquisition are accounted for under ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (ASC 310-30). Covered loans accounted for under ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of future cash flows is not reasonably estimable, the loans may be classified as nonperforming loans and interest income is not recognized until the timing and amount of future cash flows can

Table of Contents

be reasonably estimated. As of December 31, 2012, there were no covered loans considered as nonperforming as described above. There were three properties in covered OREO totaling \$1.1 million as of December, 2012, compared to sixteen properties totaling \$9.8 million as of December 31, 2011.

Deposits

The primary source of funds to support earning assets (loans and investments) is the generation of deposits.

Total deposits were \$4.77 billion at December 31, 2012. This represented an increase of \$169.4 million, or 3.68%, over total deposits of \$4.60 billion at December 31, 2011. This increase was due to organic growth primarily from our Centers. The average balance of deposits by category and the average effective interest rates paid on deposits is summarized for the years ended December 31, 2012, 2011 and 2010 in the table below.

	For the Year Ended December 31,					
	2012		2011		2010	
	Balance	Rate	Average Balance	Average Rate	Balance	Rate
	<i>(Dollars in thousands)</i>					
Noninterest bearing deposits						
Demand deposits	\$ 2,220,714		\$ 1,905,605		\$ 1,669,611	
Interest-bearing deposits						
Investment Checking	315,082	0.05%	343,150	0.10%	427,016	0.27%
Money Market	1,131,268	0.32%	1,135,742	0.40%	1,015,396	0.72%
Savings	268,801	0.14%	262,236	0.26%	256,216	0.58%
Time deposits	767,533	0.23%	910,965	0.34%	1,188,878	0.70%
Total deposits	\$ 4,703,398		\$ 4,557,698		\$ 4,557,117	

The amount of noninterest-bearing demand deposits in relation to total deposits is an integral element in achieving a low cost of funds. Average demand deposits totaled \$2.22 billion for 2012, representing an increase of \$315.1 million, or 16.54%, from average demand deposits of \$1.91 billion for 2011. Average non-interest-bearing demand deposits represented 47.22% of total average deposits for 2012, compared to 41.81% of total average deposits for 2011.

Average savings deposits, which include savings, interest-bearing demand, and money market accounts, were \$1.72 billion for 2012, representing a decrease of \$26.0 million, or 1.49%, from average savings deposits of \$1.74 billion for 2011.

Average time deposits totaled \$767.5 million for 2012, representing a decrease of \$143.4 million, or 15.75%, from total average time deposits of \$911.0 million for 2011.

The following table provides the remaining maturities of large denomination (\$100,000 or more) time deposits, including public funds, at December 31, 2012.

Maturity Distribution of Large Denomination Time Deposits

	<i>(Dollars in thousands)</i>	
3 months or less	\$	477,442
Over 3 months through 6 months		101,673
Over 6 months through 12 months		49,116
Over 12 months		11,810
Total	\$	640,041

Other Borrowed Funds

In order to enhance the Bank's spread between its cost of funds and interest-earning assets, we first seek noninterest-bearing deposits (the lowest cost of funds to the Company). Next, we pursue growth in interest-bearing deposits, and finally, we supplement the growth in deposits with borrowed funds (borrowings and customer repurchase agreements). Average borrowed funds, as a percent of total funding (total deposits plus borrowed funds), was 15.46% for 2012 as compared to 19.24% for 2011.

Table of Contents

The following table summarizes information about our term FHLB advances, repurchase agreements outstanding and other borrowings as of dates indicated:

	Repurchase Agreements	FHLB Advances <i>(Dollars in thousands)</i>	Other Borrowings
At December 31, 2012			
Amount outstanding	\$ 473,244	\$ 198,934	\$ 26,000
Weighted-average interest rate	0.28%	4.52%	0.12%
For the year ended December 31, 2012			
Highest amount at month-end	\$ 537,109	\$ 448,821	\$ 26,000
Daily-average amount outstanding	\$ 496,978	\$ 362,741	\$ 411
Weighted-average interest rate	0.31%	4.17%	0.15%
At December 31, 2011			
Amount outstanding	\$ 509,370	\$ 448,662	\$
Weighted-average interest rate	0.35%	3.89%	
For the year ended December 31, 2011			
Highest amount at month-end	\$ 581,579	\$ 548,639	\$
Daily-average amount outstanding	\$ 530,924	\$ 547,987	\$ 50,828
Weighted-average interest rate	0.38%	3.82%	0.06%
At December 31, 2010			
Amount outstanding	\$ 542,188	\$ 548,390	\$
Weighted-average interest rate	0.55%	3.71%	
For the year ended December 31, 2010			
Highest amount at month-end	\$ 594,661	\$ 998,141	\$
Daily-average amount outstanding	\$ 567,980	\$ 790,590	
Weighted-average interest rate	0.78%	4.02%	

At December 31, 2012, our borrowings included \$198.9 million in term FHLB advances, \$473.2 million of repurchase agreements, and \$26.0 million of other overnight borrowings. At December 31, 2011, our borrowings included \$448.7 million in term FHLB advances and \$509.4 million repurchase agreements.

At December 31, 2012, borrowed funds totaled \$698.2 million. This represented a decrease of \$259.8 million, or 27.12%, from total borrowed funds of \$958.0 million at December 31, 2011. During 2012, we redeemed \$250.0 million of our FHLB advances, which carried an average coupon of 3.39% and a weighted average remaining life of 2.6 years. The repayment of these advances, which resulted in a \$20.4 million pre-tax debt termination expense as reflected in other operating expense, was funded from Citizens Business Bank deposits. During 2011, we prepaid \$100.0 million of our FHLB advances, which carried an interest rate of 2.89% and was scheduled to mature in April 2013. The repayment of this debt resulted in a \$3.3 million prepayment charge. At December 31, 2012 we had \$26.0 million of overnight borrowings with the FHLB at a cost of 12 basis points.

In November 2006, we began a repurchase agreement product with our customers. This product, known as Citizens Sweep Manager, sells our investment securities overnight to our customers under an agreement to repurchase them the next day. These repurchase agreements are with customers who have other banking relationships with us. As of December 31, 2012 and December 31, 2011, total customer repurchases were \$473.2 million and \$509.4 million, respectively, with weighted average interest rates of 0.28% and 0.35%, respectively.

We entered into borrowing agreements with the Federal Home Loan Bank (FHLB). We had outstanding balances of \$198.9 million under these agreements at December 31, 2012 and \$448.7 million at December 31, 2011. The weighted average interest rate was 4.52% and 3.89% at December, 2012 and 2011, respectively. The FHLB holds certain investment securities and loans as collateral for these borrowings.

At December 31, 2012, \$2.32 billion of loans and \$2.24 billion of investment securities, at carrying value, were pledged to secure public deposits, short and long-term borrowings, and for other purposes as required or permitted by law.

Table of Contents**Aggregate Contractual Obligations**

The following table summarizes the aggregate contractual obligations as of December 31, 2012:

	Total	Less Than One Year	Maturity by Period		
			Over One Year Through Three Years	Over Three Years Through Five Years	Over Five Years
			<i>(Dollars in thousands)</i>		
Deposits (1)	\$ 4,773,987	\$ 4,757,698	\$ 12,137	\$ 4,152	\$
Customer repurchase agreements (1)	473,244	473,244			
FHLB advance (1)	200,000			200,000	
Other borrowings (1)	26,000	26,000			
Junior subordinated debentures (1)	67,012				67,012
Deferred compensation	8,781	881	1,647	1,076	5,177
Operating leases	19,372	4,861	7,461	4,374	2,676
Advertising agreements	5,096	1,296	1,600	1,600	600
Total	\$ 5,573,492	\$ 5,263,980	\$ 22,845	\$ 211,202	\$ 75,465

(1) Amounts exclude accrued interest.

Deposits represent noninterest bearing, money market, savings, NOW, certificates of deposits, brokered and all other deposits held by the Company.

Customer repurchase agreements represent excess amounts swept from customer demand deposit accounts, which mature the following business day and are collateralized by investment securities. These amounts are due to customers.

FHLB advance represents the amount that is due to the FHLB. This advance has a fixed maturity date of November 28, 2016.

Junior subordinated debentures represent the amounts that are due from the Company to CVB Statutory Trust II & CVB Statutory Trust III. The debentures have the same maturity as the Trust Preferred Securities. CVB Statutory Trust II matures in 2034, and became callable in whole or in part in January 2009. CVB Statutory Trust III, which matures in 2036, became callable in whole or in part in March 2011.

On January 7, 2013, we redeemed an additional \$20.6 million of the outstanding capital and common securities issued by the Company's trust subsidiary, CVB Statutory Trust II. We took these actions to deleverage the balance sheet and reduce ongoing funding costs.

Deferred compensation represents the amounts that are due to former employees based on salary continuation agreements as a result of acquisitions and amounts due to current employees under our deferred compensation plans.

Operating leases represent the total minimum lease payments due under non-cancelable operating leases.

Advertising agreements represent the amounts that are due on various agreements that provide advertising benefits to the Company.

Table of Contents**Off-Balance Sheet Arrangements**

The following table summarizes the off-balance sheet items at December 31, 2012:

	Total	Less Than One Year	Maturity by Period		
			One Year to Three Years	Four Year to Five Years	After Five Years
			(Dollars in thousands)		
Commitment to extend credit	\$ 512,054	\$ 379,056	\$ 63,361	\$ 15,410	\$ 54,227
Obligations under letters of credit	42,179	37,217	4,962		
Total	\$ 554,233	\$ 416,273	\$ 68,323	\$ 15,410	\$ 54,227

As of December 31, 2012, we had commitments to extend credit of approximately \$512.1 million, and obligations under letters of credit of \$42.2 million. In addition, we had available lines of credit totaling \$2.63 billion from correspondent banks, FHLB and the Federal Reserve Bank. Commitments to extend credit are agreements to lend to customers, provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Commitments are generally variable rate, and many of these commitments are expected to expire without being drawn upon. As such, the total commitment amounts do not necessarily represent future cash requirements. We use the same credit underwriting policies in granting or accepting such commitments or contingent obligations as we do for on-balance sheet instruments, which consist of evaluating customers' creditworthiness individually. The Company had a reserve for undisbursed commitments of \$8.6 million as of December 31, 2012 and \$9.6 million as of December 31, 2011 included in other liabilities.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the financial performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. When deemed necessary, we hold appropriate collateral supporting those commitments. We do not anticipate any material losses as a result of these transactions.

Liquidity and Cash Flow

Since the primary sources and uses of funds for the Company are loans and deposits, the relationship between gross loans and total deposits provides a useful measure of the Bank's liquidity. Typically, the closer the ratio of loans to deposits is to 100%, the more reliant we are on loan portfolio interest and principal payments to provide for short-term liquidity needs. Since repayment of loans tends to be less predictable than the maturity of investments and other liquid resources, the higher the loans to deposit ratio the less liquid are the Company's assets. For 2012, the loan to deposit ratio averaged 72.95%, compared to an average ratio of 77.80% for 2011 and 85.69% for 2010. The ratio of loans to deposits and customer repurchases averaged 65.98% for 2012, 69.68% for 2011, and 76.19% for 2010.

CVB Financial Corp. (CVB) is a company separate and apart from the Bank that must provide for its own liquidity and must service its own obligations. Substantially all of CVB's revenues are obtained from dividends declared and paid by the Bank. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to CVB. In addition, our regulators could limit the ability of the Bank or the Company to pay dividends or make other distributions.

Under applicable California law, the Bank cannot make any distribution (including a cash dividend) to its shareholder in an amount which exceeds the lesser of: (i) the retained earnings of the Bank or (ii) the net income of the Bank for its last three fiscal years, less the amount of any distributions made by the Bank to its shareholder during such period. Notwithstanding the foregoing, with the prior approval of the California Commissioner of Financial Institutions, the Bank may make a distribution (including a cash dividend) to CVB in an amount not exceeding the greatest of: (i) the retained earnings of the Bank; (ii) the net income of the Bank for its last fiscal year; or (iii) the net income of the Bank for its current fiscal year.

At December 31, 2012, approximately \$45.2 million of the Bank's equity was unrestricted and available to be paid as dividends to CVB. Management of the Company believes that such restrictions will not have any current impact on the ability of CVB to meet its ongoing cash obligations. See Item 1. Business Regulation and Supervision Dividends As of December 31, 2012, neither the Bank nor CVB had any material commitments for capital expenditures.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

For the Bank, sources of funds include principal payments on loans and investments, growth in deposits, FHLB advances, and other borrowed funds. Uses of funds include withdrawal of deposits, interest paid on deposits, increased loan balances, purchases, and other operating expenses.

Table of Contents

Net cash provided by operating activities totaled \$154.8 million for 2012, compared to \$130.0 million for 2011, and \$102.9 million for 2010, respectively. The increase in cash provided by operating activities in 2012 was due primarily to the decrease in income taxes and interest paid and the increase in service charges and other fees received, partially offset by a decrease in proceeds from FDIC shared-loss agreements, an increase in vendors and employee payments.

Cash used in investing activities totaled \$221.1 million for 2012, compared to cash used in investing activities of \$86.7 million for 2011, and cash provided by investing activities of \$550.4 million for 2010. The cash used in investing activities in 2012 was primarily the result of a decrease in loan and lease finance receivable and an increase in purchases of investment securities, partially offset by an increase in proceeds from repayment of investment securities.

Net cash used in financing activities totaled \$180.6 million for 2012, compared to \$102.3 million, and \$352.3 million for 2011 and 2010, respectively. The cash used in financing activities during 2012 was primarily due to the redemption of \$250.0 million of FHLB advances, compared to the redemption of \$100.0 million of FHLB advances in 2011, and \$48.0 million for repayment of junior subordinated debentures in 2012, partially offset by an increase in total deposits.

At December 31, 2012, cash and cash equivalents totaled \$98.4 million. This represented a decrease of \$246.9 million, or 71.50%, over a total of \$345.3 million at December 31, 2011.

Capital Resources

Historically, our primary source of capital has been the retention of operating earnings. In order to ensure adequate levels of capital, we conduct an ongoing assessment of projected sources, needs and uses of capital in conjunction with projected increases in assets and the level of risk. As part of this ongoing assessment, the Board of Directors reviews the various components of capital.

The Company's equity capital was \$763.0 million at December 31, 2012. This represented an increase of \$48.2 million, or 6.74%, from equity capital of \$714.8 million at December 31, 2011. The increase in 2012 resulted primarily from \$77.3 million in net earnings, offset by \$35.6 million of common stock dividends declared. The \$71.0 million increase in 2011 resulted primarily from \$81.7 million in net earnings and a \$35.3 million increase in other comprehensive income, net of tax, resulting from the change in fair value of our investment portfolio, offset by \$35.8 million of common stock dividends declared and the repurchase of \$12.5 million of common stock.

The Bank and the Company are required to meet risk-based capital standards set by their respective regulatory authorities. The risk-based capital standards require the achievement of a minimum ratio of total capital to risk-weighted assets of 8.0% (of which at least 4.0% must be Tier 1 capital). In addition, the regulatory authorities require the highest rated institutions to maintain a minimum leverage ratio of 4.0%. To be considered well-capitalized for bank regulatory purposes, the Bank and the Company are required to have a Tier 1 risk-based capital ratio equal to or greater than 6%, a total risk-based capital ratio equal to or greater than 10% and a Tier 1 leverage ratio equal to or greater than 5%. At December 31, 2012, the Bank and the Company exceeded the minimum risk-based capital ratios and leverage ratios required to be considered well-capitalized for regulatory purposes.

For further information about our capital ratios, see Item 1. Business Capital Adequacy Requirements.

During 2012, the Board of Directors of the Company declared quarterly common stock cash dividends that totaled \$0.34 per share for the full year totaling \$35.6 million in the aggregate. Dividends are payable at the discretion of the Board of Directors and there can be no assurance that the Board of Directors will continue to pay dividends at the same rate, or at all, in the future. CVB's ability to pay cash dividends to its shareholders is subject to restrictions under federal and California law, including restrictions imposed by the FRB and covenants set forth in various agreements we are a party to including covenants set forth in our junior subordinated debentures.

In July 2008, our Board of Directors authorized the repurchase of up to 10,000,000 shares of our common stock. During the year ended December 31, 2012, we repurchased zero shares of our common stock. During 2011, we repurchased 1,594,488 shares of common stock at the average price of \$7.86. As of December 31, 2012, we have 7,765,171 shares of our common stock remaining that are eligible for repurchase.

The table below presents the Company's and the Bank's risk-based and leverage capital ratios as of December 31, 2012.

Table of Contents

	December 31, 2012

RISK MANAGEMENT

We have adopted a Risk Management Plan which seeks to implement the proper control and management of all risk factors inherent in the operation of the Company and the Bank. Specifically, credit risk, interest rate risk, liquidity risk, counterparty risk, transaction risk, compliance risk, strategic risk, reputation risk, cybersecurity risk, price risk and foreign exchange risk, can all affect the market risk exposure of the Company. These specific risk factors are not mutually exclusive. It is recognized that any product or service offered by us may expose the Bank to one or more of these risks. Our Risk Management Committee and Risk Management Division monitor these risks to minimize exposure to the Company.

Credit Risk

Credit risk is defined as the risk to earnings or capital arising from an obligor's failure to meet the terms of any contract or otherwise fail to perform as agreed. Credit risk is found in all activities where success depends on a counter party, issuer, or borrower performance. Credit risk arises through the extension of loans and leases, certain securities, and letters of credit.

Severe hurricanes, storms, earthquakes and other weather conditions, as well as natural disasters and problems related to possible climate changes, may from time-to-time cause or create the risk of damage to facilities, buildings, property or other assets of Bank customers, borrowers or municipal debt issuers. This could in turn affect their financial condition or results of operations and as a consequence their ability or capacity to repay debt or fulfill other obligations to the Bank. While we do not currently have reason to believe that any of the Bank's loans or municipal securities are materially impaired as a result of such damage, there can be no assurance that this will continue to be the case, particularly where recent storms and natural disasters whose impact is still being evaluated by the concerned parties.

Credit risk in the investment portfolio and correspondent bank accounts is in part addressed through defined limits in the Company's policy statements. In addition, certain securities carry insurance to enhance the credit quality of the bond. Limitations on industry concentration, aggregate customer borrowings, geographic boundaries and standards on loan quality also are designed to reduce loan credit risk. Senior Management, Directors' Committees, and the Board of Directors are provided with information to appropriately identify, measure, control and monitor the credit risk of the Company.

The general loan policy is updated annually and approved by the Board of Directors. It prescribes underwriting guidelines and procedures for all loan categories in which the Bank participates to establish risk tolerance and parameters that are communicated throughout the Bank to ensure consistent and uniform lending practices. The underwriting guidelines include, among other things, approval limitation and hierarchy, documentation standards, loan-to-value limits, debt coverage ratio, overall credit-worthiness of the borrower, guarantor support, etc. All loan requests considered by the Bank should be for a clearly defined legitimate purpose with a determinable primary source, as well as alternate sources of repayment. All loans should be supported by appropriate documentation including, current financial statements, credit reports, collateral information, guarantor asset verification, tax returns, title reports, appraisals (where appropriate), and other documents of quality that will support the credit.

The major lending categories are commercial and industrial loans, owner-occupied and non owner-occupied commercial real estate loans, construction loans, dairy and livestock loans, agricultural loans, residential real estate loans, and various consumer loan products. Loans underwritten to borrowers within these diverse categories require underwriting and documentation suited to the unique characteristics and inherent risks involved.

Commercial and industrial loans require credit structures that are tailored to the specific purpose of the business loan, involving a thorough analysis of the borrower's business, cash flow, collateral, industry risks, economic risks, credit, character, and guarantor support. Owner-occupied real estate loans are primarily based upon the capacity and stability of the cash flow generated by the occupying business and the market value of the collateral, among other things. Non owner-occupied real estate is typically underwritten to the income produced by the subject property and many considerations unique to the various types of property (i.e. office, retail, warehouse, shopping center, medical, etc.), as well as, the financial support provided by sponsors in recourse transactions. Construction loans will often depend on the specific characteristics of the project, the market for the specific development, real estate values, and the equity and financial strength of the sponsors. Dairy and livestock loans and agricultural loans are largely predicated on the revenue cycles and demand for milk and crops, commodity prices, collateral values of herd, feed, and income-producing dairies or croplands, and the financial support of the guarantors. Underwriting of residential real estate and consumer loans are generally driven by personal income and debt service capacity, credit history and scores, and collateral values.

Implicit in lending activities is the risk that losses will occur and that the amount of such losses will vary over time. Consequently, we maintain an allowance for credit losses by charging a provision for credit losses to earnings. Loans, including impaired loans, determined to be losses are

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

charged against the allowance for credit losses. Our allowance for credit losses is maintained at a level considered by us to be appropriate to provide for estimated probable losses inherent in

Table of Contents

the existing portfolio. In this regard, it is important to note that the Bank's practice with regard to impaired loans, including modified loans or troubled debt restructurings that are classified as impaired, is to generally charge off any impairment amount against the ALLL upon evaluating the loan using one of the three methods described in ASC 310-10-35 at the time a probable loss becomes recognized. As such, the Bank's specific allowance for impaired loans, including troubled debt restructurings, is relatively low as a percentage of impaired loans outstanding since any known impairment amount will generally have been charged off.

The allowance for credit losses is based upon estimates of probable losses inherent in the loan and lease portfolio. The nature of the process by which we determine the appropriate allowance for credit losses requires the exercise of considerable judgment. The amount actually observed in respect of these losses can vary significantly from the estimated amounts. We employ a systematic methodology that is intended to reduce the differences between estimated and actual losses.

Central to our credit risk management is its loan risk rating system. The originating credit officer assigns borrowers an initial risk rating, which is reviewed and possibly changed by Credit Management. The risk rating is based primarily on an analysis of each borrower's financial capacity in conjunction with industry and economic trends. Credit approvals are made based upon our evaluation of the inherent credit risk specific to the transaction and are reviewed for appropriateness by senior line and Credit Management personnel. Credits are monitored by line and Credit Management personnel for deterioration in a borrower's financial condition, which would impact the ability of the borrower to perform under the contract. Risk ratings may be adjusted as necessary.

Loans are risk rated into the following categories: Pass, Pass Watch List, Special Mention, Substandard, Doubtful, and Loss. Each of these groups is assessed and appropriate amounts used in determining the adequacy of our allowance for losses. The Impaired and Doubtful loans are analyzed on an individual basis for allowance amounts. The other categories have formulae used to determine the needed allowance amount.

The Company obtains a quarterly independent credit review by engaging an outside party to review a sample of our loans and leases. The primary purpose of this review is to evaluate our existing loan ratings and provide an assessment as to the effectiveness of our allowance process.

Our methodology for assessing the appropriateness of the allowance is conducted on a regular basis and considers all loans. The systematic methodology consists of two major phases.

In the first phase, individual loans are reviewed to identify loans for impairment. A loan is generally considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the original contractual terms of the loan. A loan for which there is an insignificant delay in the amount of payments is not considered an impaired loan. Utilizing one of the three methods described in ASC 310-10-35-22, impairment is measured based on either the expected future cash flows discounted at each loan's effective interest rate, the fair value of the loan's collateral if the loan is collateral dependent, or an observable market price of the loan (if one exists). Upon measuring the loan's impairment, we then take appropriate steps to ensure an appropriate level of allowance is present or established, including possible charge-off.

The Bank evaluates a loan's collectability from information developed through our loan risk rating system and process, and other sources of information that asset management in monitoring loan performance (e.g. past due loan reports). The Bank then identifies loans for evaluation of impairment and establishes specific allowances in cases where we have identified significant conditions or circumstances related to a credit that we believe indicates the probability that a loss has been incurred. We perform a detailed analysis of these loans, including, but not limited to, cash flows, appraisals of the collateral, conditions of the marketplace for liquidating the collateral and assessment of the guarantors. We then determine the impairment under ASC 310-10, which requires judgment and estimates, and allocate a portion of the allowance for losses as a specific allowance for each of these loans, or charge off the impairment amount as described above. The eventual outcomes may differ from the estimates used to determine the impairment amount.

The second phase is conducted by evaluating or segmenting the remainder of the loan portfolio into groups or pools of loans with similar characteristics in accordance with ASC No. 450-10, Contingencies. In this second phase, groups or pools of homogeneous loans are reviewed to determine a portfolio formula allowance. In the case of the portfolio formula allowance, homogeneous portfolios, such as small business loans, consumer loans, agricultural loans, and real estate loans, are aggregated or pooled in determining the appropriate allowance. The risk assessment process in this case emphasizes trends in the different portfolios for delinquency, loss, and other behavioral characteristics of the subject portfolios.

Included in this second phase is our consideration of known relevant internal and external factors that may affect a loan's collectability. This includes our estimates of the amounts necessary for concentrations, economic uncertainties, the volatility of the market value of collateral, and other relevant factors. We perform an evaluation of various conditions, the effects of which are not directly measured in the determination of the

formula and specific allowances. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty because they are not identified with

Table of Contents

specific problem credits or portfolio segments. The conditions evaluated include, but are not limited to the following conditions that existed as of the balance sheet date:

then-existing general economic and business conditions affecting the key lending areas of the Company,

then-existing economic and business conditions of areas outside the lending areas, such as other sections of the United States,

credit quality trends (including trends in past due loans, adversely graded loans, and nonperforming loans expected to result from existing conditions),

collateral values, including changes in the value of underlying collateral for collateral-dependent loans.

the existence and effect of any concentrations of credit, and changes in the level of such concentrations,

changes in loan volumes,

specific industry conditions within portfolio segments,

recent loss experience in particular segments of the portfolio,

duration of the current business cycle,

the effect of external factors such as legal and regulatory requirements, including bank regulatory examination results and findings of the Company's external credit examiners.

We review these conditions in discussion with our senior credit officers. To the extent that any of these conditions is evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, our estimate of the effect of such condition may be reflected as a specific allowance applicable to such credit or portfolio segment. Where any of these conditions is not evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, our evaluation of the inherent loss related to such condition is reflected in the second phase of the allowance. Although we have allocated a portion of the allowance to specific loan categories, the appropriateness of the allowance must be considered in its entirety.

Allowance for Credit Losses

The allowance for credit losses is established as management's estimate of probable losses inherent in the loan and lease receivables portfolio. The allowance is increased by the provision for losses and decreased by charge-offs when management believes the uncollectability of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance. The determination of the balance in the allowance for credit losses is based on an analysis of the loan and lease finance receivables portfolio using a systematic methodology and reflects an amount that, in management's judgment, is appropriate to provide for probable credit losses inherent in the portfolio, after giving consideration to the character of the loan portfolio, current economic conditions, past credit loss experience, and such other factors that would deserve current recognition in estimating inherent credit losses.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

We maintain an allowance for inherent credit losses that is increased by a provision for credit losses charged against operating results. The allowance for credit losses is also increased by recoveries on loans previously charged-off and reduced by actual loan losses charged to the allowance. We recorded a provision for credit losses of zero, \$7.1 million and \$61.2 million for 2012, 2011 and 2010, respectively.

The allowance for credit losses was \$92.4 million at December 31, 2012. This represents a decrease of \$1.5 million, or 1.62%, compared to the allowance for credit losses of \$94.0 million as of December 31, 2011. During 2012, we recorded net charge-offs of \$1.5 million, compared to net charge-offs \$18.4 million for 2011. Activity in the allowance for credit losses was as follows for the year ended December 31, 2012 and December 31, 2011, respectively.

For 2012, total loans charged-off were \$5.3 million, offset by the recoveries of loans previously charged-off of \$3.8 million resulting in net charge-offs of \$1.5 million. For 2011, total loans charged-off were \$20.5 million, offset by the recoveries of loans previously charged-off of \$2.2 million resulting in net charge-offs of \$18.4 million.

In addition to the allowance for credit losses, the Company also has a reserve for undisbursed commitments for loans and letters of credit. This reserve is carried in the liabilities section of the balance sheet in other liabilities. Provisions to this reserve are included in other expense. The Company recorded a reduction of \$1.0 million, a reduction of \$918,000, and an increase of \$2.6 million in the reserve for undisbursed commitments for 2012, 2011, and 2010, respectively. As of December 31, 2012, the balance in this reserve was \$8.6 million, compared to \$9.6 million as of December 31, 2011. The decrease in provision for unfunded commitments was primarily due to a decrease in loan commitments and, more specifically, reductions in unfunded commitments within our Dairy & Livestock and Commercial & Industrial Loan portfolios.

The following table presents a summary of the net charge-offs and recoveries by loan type, and the resulting allowance for credit losses for each of the years indicated. The table below provides information on non-covered loans only because there was no allowance on covered loans at December 31, 2012.

Allowance for credit losses to total loans at end of period	2.84%	2.92%	3.12%	3.02%	1.44%
Net loans charged-off to allowance for credit losses	2.36%	18.59%	61.27%	23.44%	10.54%
Net loans charged-off to provision for credit losses		247.17%	105.38%	31.72%	21.39%

(1) Net of deferred loan origination fees.

In 2012, there was \$657,000 in net recoveries for loans in excess of the amount originally expected in the fair value of the loans at acquisition, resulting in a reduction of \$657,000 in provision for credit losses on the covered SJB loans. In 2011, there was \$893,000 in net charge-offs for loans, resulting in a \$893,000 provision for credit losses on the covered SJB loans. An offsetting adjustment was recorded to the FDIC loss-sharing asset based on the appropriate loss-sharing percentage.

While we believe that the allowance at December 31, 2012, was appropriate to absorb losses from any known or inherent risks in the portfolio, no assurance can be given that economic conditions, conditions of our borrowers, or natural disasters, which adversely affect our service areas or other circumstances or conditions, including those defined above, will not be reflected in increased provisions for credit losses in the future.

The following table provides a summary of the allocation of the allowance for credit losses for specific loan categories at the dates indicated for non-covered loans. The allocations presented should not be interpreted as an indication that loans charged to the allowance for credit losses will occur in these amounts or proportions, or that the portion of the allowance allocated to each loan category, represents the total amount available for future losses that may occur within these categories.

Market Risk

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

In the normal course of its business activities, we are exposed to market risks, including price and liquidity risk. Market risk is the potential for loss from adverse changes in market rates and prices, such as interest rates (interest rate risk). Liquidity risk arises from the possibility that we may not be able to satisfy current or future commitments or that we may be more reliant on alternative funding sources such as long-term debt. Financial products that expose us to market risk include securities, loans, deposits, debt, and derivative financial instruments.

Table of Contents

The table below provides the actual balances as of December 31, 2012 of interest-earning assets (net of deferred loan fees and allowance for credit losses) and interest-bearing liabilities, including the average rate earned or paid for 2012, the projected contractual maturities over the next five years, and the estimated fair value of each category determined using available market information and appropriate valuation methodologies.

	December 31, 2012	Average Rate	Maturing					Estimated Fair Value
			One year	Two years	Three years	Four years	Five years and beyond	
Interest-earning assets:								
Investment securities available-for-sale (1)	\$ 2,449,387	2.75%	\$ 265,662	\$ 656,823	\$ 385,030	\$ 321,910	\$ 819,962	\$ 2,449,387
Investment securities held-to-maturity	2,050	5.79%				2,050		2,515
Investment in FHLB stock	56,651	1.02%					56,651	56,651
Interest-earning deposits with other institutions	81,157	0.38%	81,157					81,157
Loans held-for-sale								
Loans and lease finance receivables, net (2)	3,355,087	5.28%	739,628	139,364	221,222	270,665	1,984,208	3,503,332
Total interest-earning assets	\$ 5,944,332		\$ 1,086,447	\$ 796,187	\$ 606,252	\$ 594,625	\$ 2,860,821	\$ 6,093,042
Interest-bearing liabilities:								
Interest-bearing deposits	\$ 2,352,994	0.24%	\$ 2,336,705	\$ 7,967	\$ 4,171	\$ 522	\$ 3,629	\$ 2,354,126
Borrowings	698,178	1.91%	499,244			198,934		727,512
Junior subordinated debentures	67,012	2.92%					67,012	67,415
Total interest-bearing liabilities	\$ 3,118,184		\$ 2,835,949	\$ 7,967	\$ 4,171	\$ 199,456	\$ 70,641	\$ 3,149,053

(1) These include mortgage-backed securities which generally prepay before maturity.

(2) Average rate does not reflect discount accretion on covered loans.

Interest Rate Risk

During periods of changing interest rates, the ability to re-price interest-earning assets and interest-bearing liabilities can influence net interest income, the net interest margin, and consequently, our earnings. Interest rate risk is managed by attempting to control the spread between rates earned on interest-earning assets and the rates paid on interest-bearing liabilities within the constraints imposed by market competition in our service area. Short-term re-pricing risk is minimized by controlling the level of floating rate loans and maintaining a downward sloping ladder of bond payments and maturities. Basic risk is managed by the timing and magnitude of changes to interest-bearing deposit rates. Yield curve risk is reduced by keeping the duration of the loan and bond portfolios relatively short. Options risk in the bond portfolio is monitored monthly and actions are recommended when appropriate.

We monitor the interest rate sensitivity risk to earnings from potential changes in interest rates using various methods, including a maturity/re-pricing gap analysis. This analysis measures, at specific time intervals, the differences between earning assets and interest-bearing liabilities for which re-pricing opportunities will occur. A positive difference, or gap, indicates that earning assets will re-price faster than interest-bearing liabilities. This will generally produce a greater net interest margin during periods of rising interest rates, and a lower net interest margin during periods of declining interest rates. Conversely, a negative gap will generally produce a lower net interest margin during periods of rising interest rates and a greater net interest margin during periods of decreasing interest rates. In managing risks associated with rising interest rates, we utilize interest rate derivative contracts on certain loans and borrowed funds.

FHLB advances and other borrowings	509,370			448,662	958,032
Junior subordinated debentures	115,055				115,055
Total	2,359,733	\$ 114,340	\$ 117,263	\$ 1,058,424	\$ 3,649,759
Period GAP	\$ (714,263)	\$ 190,164	\$ 449,200	\$ 2,537,768	\$ 2,462,869
Cumulative GAP	\$ (714,263)	\$ (524,099)	\$ (74,899)	\$ 2,462,869	

The table above provides the Bank's maturity/re-pricing gap analysis at December 31, 2012, and 2011. We had a negative cumulative 180-day gap of \$475.7 million and a positive cumulative 365-days gap of \$72.0 million at December 31, 2012. This represented a decrease of \$48.4 million, over the 180-day cumulative negative gap of \$524.1 million at December 31, 2011. In theory, this would indicate that at December 31,

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

2012, \$475.7 million more in liabilities than assets would re-price if there were a change in interest rates over the next 180 days. If interest rates increase, the negative gap would tend to result in a lower net interest margin. If interest rates decrease, the negative gap would tend to result in an increase in the net interest margin. However, we do have the ability to anticipate the increase in deposit rates, and the ability to extend interest-bearing liabilities, offsetting, in part, the negative gap.

The interest rates paid on deposit accounts do not always move in unison with the rates charged on loans. In addition, the magnitude of changes in the rates charged on loans is not always proportionate to the magnitude of changes in the rate paid on deposits. Consequently, changes in interest rates do not necessarily result in an increase or decrease in the net interest margin solely as a result of the differences between re-pricing opportunities of earning assets or interest-bearing liabilities. In general, whether we report a positive gap in the short-term period or negative gap in the long-term period does not necessarily indicate that, if interest rates decreased, net interest income would increase, or if interest rates increased, net interest income would decrease.

Table of Contents

Approximately \$1.46 billion, or 60%, of the total investment portfolio at December 31, 2012 consisted of securities backed by mortgages. The final maturity of these securities can be affected by the speed at which the underlying mortgages repay. Mortgages tend to repay faster as interest rates fall, and slower as interest rates rise. As a result, we may be subject to a prepayment risk resulting from greater funds available for reinvestment at a time when available yields are lower. Conversely, we may be subject to extension risk resulting, as lesser amounts would be available for reinvestment at a time when available yields are higher. Prepayment risk includes the risk associated with the payment of an investment's principal faster than originally intended. Extension risk is the risk associated with the payment of an investment's principal over a longer time period than originally anticipated. In addition, there can be greater risk of price volatility for mortgage-backed securities as a result of anticipated prepayment or extension risk.

We also utilize the results of a simulation model to quantify the estimated exposure of net interest income to sustained interest rate changes. The sensitivity of our net interest income is measured over rolling two-year horizons.

The simulation model estimates the impact of changing interest rates on interest income from all interest-earning assets and interest expense paid on all interest-bearing liabilities reflected on our balance sheet. This sensitivity analysis is compared to policy limits, which specify a maximum tolerance level for net interest income exposure over a one-year horizon assuming no balance sheet growth, given a 200 basis point upward and a 100 basis point downward shift in interest rates. A parallel and pro rata shift in rates over a 12-month period is assumed.

The following depicts the Company's net interest income sensitivity analysis as of December 31, 2012:

	Estimated Net Interest Income
Simulated Rate Changes	Sensitivity (1)
+ 200 basis points	3.17%
-100 basis points	1.99%

(1) Changes from the base case for a 12-month period.

Based on our current models, we believe that the interest rate risk profile of the balance sheet remains asset-sensitive throughout the simulation period. The estimated sensitivity does not necessarily represent a forecast and the results may not be indicative of actual changes to our net interest income. These estimates are based upon a number of assumptions including: the nature and timing of interest rate levels including yield curve shape, prepayments on loans and securities, pricing strategies on loans and deposits, and replacement of asset and liability cash flows. While the assumptions used are based on current economic and local market conditions, there is no assurance as to the predictive nature of these conditions including how customer preferences or competitor influences might change.

Liquidity Risk

Liquidity risk is the risk to earnings or capital resulting from our inability to meet obligations when they come due without incurring unacceptable losses. It includes the ability to manage unplanned decreases or changes in funding sources and to recognize or address changes in market conditions that affect our ability to liquidate assets quickly and with minimum loss of value. Factors considered in liquidity risk management are stability of the deposit base; marketability, maturity, and pledging of investments; and the demand for credit.

In general, liquidity risk is managed daily by controlling the level of fed funds and the use of funds provided by the cash flow from the investment portfolio, loan demand and deposit fluctuations. To meet unexpected demands, lines of credit are maintained with correspondent banks, the Federal Home Loan Bank and the FRB. The sale of bonds maturing in the near future can also serve as a contingent source of funds. Increases in deposit rates are considered a last resort as a means of raising funds to increase liquidity.

Management has a Liquidity Committee that meets quarterly. The Committee analyzes the cash flows from loans, investments, deposits and borrowings. In addition, the Company has a Balance Sheet Management Committee of the Board of Directors that meets monthly to review the Company's balance sheet position and liquidity which includes, but is not limited to a: (i) Liquidity Report; (ii) Capital Volatility Report; (iii) Investment Portfolio Activities Report; (iv) Sources and Uses of Funds Report and (v) Balance Sheet Management Policy Report. On a periodic basis, projected cash flows are analyzed and stressed to determine potential liquidity issues. A contingency plan contains the steps the Company would take to mitigate a liquidity crisis. Results of the cash flows are reported to the Balance Sheet Management Committee on a periodic basis.

Table of Contents

Counterparty Risk

Recent developments in the financial markets have placed an increased awareness of Counterparty Risks. These risks occur when a financial institution has an indebtedness or potential for indebtedness to another financial institution. We have assessed our Counterparty Risk with the following results:

We do not have any investments in the preferred stock of any other company.

We have one issuance of a trust preferred security totaling \$5.1 million with a large financial institution.

Most of our investment securities are either municipal securities, callable agencies or securities backed by mortgages, Fannie Mae, Freddie Mac, SBA or FHLB.

All of our commercial line insurance policies are with companies with the highest AM Best ratings of A or above.

We have no significant exposure to our Cash Surrender Value of Life Insurance since 97.39% of the Cash Surrender Value balance is with insurance companies that carry an AM Best rating of A or greater and only one company has a B+ rating.

We have no significant Counterparty exposure related to derivatives such as interest rate swaps with a major financial institution as our agreement requires the Counterparty to post cash collateral for mark-to-market balances due to us.

We believe our risk of loss associated with our counterparty borrowers related to interest rate swaps is generally mitigated as the loans with swaps are underwritten to take into account potential additional exposure.

We have \$446.0 million in Fed Funds lines of credit with other banks. All of these banks are major U.S. banks, each with over \$20.0 billion in assets. We rely on these funds for overnight borrowings. We currently have no outstanding Fed Funds balance.

Our secured borrowing capacity with the FHLB was \$2.18 billion, of which \$1.98 billion was available as of December 31, 2012.

Transaction Risk

Transaction risk is the risk to earnings or capital arising from problems in service or product delivery. This risk is significant within any bank and is interconnected with other risk categories in most activities throughout the Company. Transaction risk is a function of internal controls, information systems, associate integrity, and operating processes. It arises daily throughout the Company as transactions are processed. It pervades all divisions, departments and centers and is inherent in all products and services we offer.

In general, transaction risk is defined as high, medium or low by the internal audit process. The audit plan ensures that high risk areas are reviewed annually. We utilize internal auditors and independent professional service firms to test key controls of operational processes and to audit information systems, compliance management program, and loan review and trust services.

The key to monitoring transaction risk is in the design, documentation and implementation of well defined procedures. All transaction related procedures include steps to report events that might increase transaction risk. Dual controls are also a form of monitoring.

Compliance Risk

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Compliance risk is the risk to earnings or capital arising from violations of, or non-conformance with, laws, rules, regulations, prescribed practices, or ethical standards. Compliance risk also arises in situations where the laws or rules governing certain products or activities of the Bank's customers may be ambiguous or untested. Compliance risk exposes us to fines, civil money penalties, payment of damages, and the voiding of contracts. Compliance risk can also lead to a diminished reputation, reduced business value, limited business opportunities, lessened expansion potential, and lack of contract enforceability.

There is no single or primary source of compliance risk. It is inherent in every activity. Frequently, it blends into operational risk and transaction risk. A portion of this risk is sometimes referred to as legal risk. This is not limited solely to risk from failure to comply with consumer protection laws; it encompasses all laws, as well as prudent ethical standards and contractual obligations. It also includes the exposure to litigation from all aspects of banking, traditional and non-traditional.

Our Risk Management Policy and Program and the Code of Ethical Conduct are cornerstones for controlling compliance risk. An integral part of controlling this risk is the proper training of associates. The Chief Risk Officer is responsible for developing and executing a comprehensive compliance training program. The Chief Risk Officer seeks to provide our associates with adequate training relevant to their job functions to enhance compliance with banking laws and regulations.

Table of Contents

Our Risk Management Policy and Program includes an audit program aimed at identifying problems and ensuring that problems are corrected. The audit program includes two levels of review. One is in-depth audits performed by our internal audit department under the direction of the Chief Risk Officer and supplemented by independent external firms, and the other is periodic monitoring performed by the Risk Management Division. Each year, an Audit Plan for the Company is developed and approved by the Audit Committee of the Board.

The Company utilizes independent external firms to conduct compliance audits as a means of identifying weaknesses in the compliance program. The annual Audit Plan includes a review of selected centers and departments.

The center or department that is the subject of an audit is required to respond to the audit and correct any exceptions noted. The Chief Risk Officer will review audit findings and the response provided by the center or department to identify areas which pose a significant compliance risk.

The Risk Management Division conducts periodic monitoring of our compliance efforts with a special focus on those areas that expose us to compliance risk. The purpose of the periodic monitoring is to verify whether our associates are adhering to established policies and procedures. The Chief Risk Officer will notify the appropriate department head and the Management Compliance Committee, the Audit Committee and the Risk Management Committee of any material exceptions found and noted.

We recognize that customer complaints can often identify weaknesses in our compliance program which could expose us to risk. Therefore, we try to ensure that all complaints are given prompt attention. Our Risk Management Policy and Program include provisions on how customer complaints are to be addressed. The Chief Risk Officer reviews formal complaints to determine if a significant compliance risk exists and communicates those findings to the Risk Management Committee.

Strategic Risk

Strategic risk is the risk to earnings or capital arising from adverse decisions or improper implementation of strategic decisions. This risk is a function of the compatibility between an organization's goals, the resources deployed against those goals and the quality of implementation.

Strategic risks are identified as part of the strategic planning process. Offsite strategic planning sessions, including members of the Board of Directors and Senior Leadership, are held annually. The strategic review consists of an economic assessment, competitive analysis, industry outlook and legislative and regulatory review.

A primary measurement of strategic risk is peer group analysis. Key performance ratios are compared to three separate peer groups to identify any sign of weakness and potential opportunities. The peer group consists of:

1. Banks of comparable size
2. High performing banks
3. A list of specific banks

Another measure is the comparison of the actual results of previous strategic initiatives against the expected results established prior to implementation of each strategy.

The corporate strategic plan is formally presented to all center managers and department managers at an annual leadership conference.

Reputation Risk

Reputation risk is the risk to capital and earnings arising from negative public opinion. This affects the Bank's ability to establish new relationships or services, or continue servicing existing relationships. It can expose the Bank to litigation and, in some instances, financial loss.

Cybersecurity Risk

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Cybersecurity and fraud risk refers to the risk of failures, interruptions of services, or breaches of security with respect to the Company's or the Bank's communication, information, operations, financial control or customer internet banking or data processing systems or applications. In addition, the Company and the Bank rely primarily on third party providers to develop, manage, maintain and protect these systems and applications. Any such failures, interruptions or fraud or security breaches, depending on the scope, duration, affected system(s) or customer(s), could expose the Company and/or the Bank to financial loss, reputation damage, litigation, or regulatory action.

Table of Contents

Price and Foreign Exchange Risk

Price risk arises from changes in market factors that affect the value of traded instruments. Foreign exchange risk is the risk to earnings or capital arising from movements in foreign exchange rates.

Our current exposure to price risk is nominal. We do not have trading accounts. Consequently, the level of price risk within the investment portfolio is limited to the need to sell securities for reasons other than trading. The section of this policy pertaining to liquidity risk addresses this risk.

We maintain deposit accounts with various foreign banks. Our Interbank Liability Policy seeks to limit the balance in any of these accounts to an amount that does not in our judgment present a significant risk to our earnings from changes in the value of foreign currencies.

Our asset liability model seeks to calculate the market value of the Bank's equity. In addition, management prepares, on a monthly basis, a capital volatility report that compares changes in the market value of the investment portfolio. We have as our target to always be well-capitalized by regulatory standards.

The Balance Sheet Management Policy requires the submission of a Fair Value Matrix Report to the Balance Sheet Management Committee on a quarterly basis. The report seeks to calculate the economic value of equity under different interest rate scenarios, revealing the level or price risk of the Bank's interest sensitive asset and liability portfolios.

ITEM 7A. *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*

Market risk is the risk of loss from adverse changes in the market prices and interest rates. Our market risk arises primarily from interest rate risk inherent in our lending and deposit taking activities. We currently do not enter into futures, forwards, or option contracts. For greater discussion on the risk management of the Company, see Item 7. Management's Discussion and Analysis of Financial Condition and the Results of Operations - Risk Management.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE
None**ITEM 9A. CONTROLS AND PROCEDURES****1) Management's Report on Internal Control over Financial Reporting**

Management of CVB Financial Corp., together with its consolidated subsidiaries (the Company), is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed by, or under the supervision of, the Company's principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on our financial statements.

As of December 31, 2012, management conducted an assessment of the effectiveness of the Company's internal control over financial reporting based on the framework established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has determined that the Company's internal control over financial reporting as of December 31, 2012 is effective. KPMG LLP, an independent registered public accounting firm, has issued their report on the effectiveness of internal control over financial reporting as of December 31, 2012.

Table of Contents

2) Auditor attestation

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

CVB Financial Corp.:

We have audited CVB Financial Corp. and subsidiaries' internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). CVB Financial Corp. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, CVB Financial Corp. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of CVB Financial Corp. and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of earnings and comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2012, and our report dated March 1, 2013 expressed an unqualified opinion on those consolidated financial statements.

Table of Contents

3) Changes in Internal Control over Financial Reporting

We maintain controls and procedures designed to ensure that information is recorded and reported in all filings of financial reports. Such information is reported to our management, including our Chief Executive Officer and Chief Financial Officer to allow timely and accurate disclosure based on the definition of disclosure controls and procedures in SEC Rule 13a-15(e) and 15d-15(e).

As of the end of the period covered by this report, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer. Based on the foregoing, our Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report.

During the fiscal quarter ended December 31, 2012, there have been no changes in our internal control over financial reporting that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents**PART III****ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Except as hereinafter noted, the information concerning directors and executive officers of the Company, corporate governance and our audit committee financial experts is incorporated by reference from the section entitled Discussion of Proposals recommended by the Board Proposal 1: Election of Directors and Beneficial Ownership Reporting Compliance, Corporate Governance Principles and Board Matters, and Audit Committee of our definitive Proxy Statement to be filed pursuant to Regulation 14A within 120 days after the end of the last fiscal year. For information concerning the executive officers of the Company, see Item 4A of Part I hereto.

The Company has adopted a Code of Ethics that applies to all of the Company's employees, including the Company's principal executive officer, the principal financial officer, accounting officers, and all employees who perform these functions. A copy of the Code of Ethics is available to any person without charge by submitting a request to the Company's Chief Financial Officer at 701 N. Haven Avenue, Suite 350, Ontario, CA 91764. If the Company shall amend its Code of Ethics as applies to the principal executive officer, principal financial officer, principal accounting officer or controller (or persons performing similar functions) or shall grant a waiver from any provision of the code of ethics to any such person, the Company shall disclose such amendment or waiver on its website at www.cbbank.com under the tab Investor Relations.

CVB FINANCIAL CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

THREE YEARS ENDED DECEMBER 31, 2012

1. BUSINESS

The consolidated financial statements include the accounts of CVB Financial Corp. and its wholly owned subsidiaries (the Company): Citizens Business Bank (the Bank) after elimination of all intercompany transactions and balances. The Company also has three inactive subsidiaries; CVB Ventures, Inc.; Chino Valley Bancorp; and ONB Bancorp. The Company is also the common stockholder of CVB Statutory Trust II, and CVB Statutory Trust III. CVB Statutory Trust II was created in December 2003 and CVB Statutory Trust III was created in January 2006 to issue trust preferred securities in order to raise capital for the Company. In accordance with ASC 810 Consolidation (previously Financial Accounting Standards Board (FASB) Interpretation No. 46R Consolidation of Variable Interest Entities), these trusts do not meet the criteria for consolidation.

The Company's primary operations are related to traditional banking activities, including the acceptance of deposits and the lending and investing of money through the operations of the Bank. The Bank also provides automobile and equipment leasing to customers through its Citizens Financial Services Group and trust and investment-related services to customers through its CitizensTrust Division. The Bank's customers consist primarily of small to mid-sized businesses and individuals located in San Bernardino County, Riverside County, Orange County, Los Angeles County, Madera County, Fresno County, Tulare County, Kern County and San Joaquin County, California. The Bank operates 41 Business Financial Centers, five Commercial Banking Centers, and three trust office locations with its headquarters located in the city of Ontario, California.

2. BASIS OF PRESENTATION

The accompanying consolidated financial statements and notes thereto have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (SEC) for Form 10-K and conform to practices within the banking industry and include all of the information and disclosures required by accounting principles generally accepted in the United States of America (GAAP) for financial reporting.

Reclassification Certain amounts in the prior periods' financial statements and related footnote disclosures have been reclassified to conform to the current presentation with no impact on previously reported net income or stockholders' equity.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Segments The Company's operating business units have been divided into two main segments: (i) Business Financial and Commercial Banking Centers (Centers) and (ii) Treasury. The Business Financial and Commercial Banking Centers lines of business generally consist of loans, deposits, and fee generating products and services that the Bank offers to its clients and prospects. The other segment is Treasury, which manages the investment portfolio of the Company. The Company's remaining centralized functions and eliminations of inter-segment amounts have been aggregated and included in Other.

The internal reporting of the Company considers all business units. Funds are allocated to each business unit based on its need to fund assets (use of funds) or its need to invest funds (source of funds). Net income is determined based on the actual net income of the business unit plus the allocated income or expense based on the sources and uses of funds for each business unit. Non-interest income and non-interest expense are those items directly attributable to a business unit.

Cash and cash equivalents Cash on hand, cash items in the process of collection, and amounts due from correspondent banks, the Federal Reserve Bank and interest-bearing balances due from depository institutions, with initial terms of ninety days or less, are included in Cash and cash equivalents.

Investment Securities The Company classifies as held-to-maturity those debt securities that the Company has the positive intent and ability to hold to maturity. Securities classified as trading are those securities that are bought and held principally for the purpose of selling them in the near term. All other debt and equity securities are classified as available-for-sale. Securities held-to-maturity are accounted for at cost and adjusted for amortization of premiums and accretion of discounts. Trading securities are accounted for at fair value with the unrealized gains and losses being included in current earnings. Available-for-sale securities are accounted for at fair value, with the net unrealized gains and losses,

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

net of income tax effects, presented as a separate component of stockholders' equity. Realized gains and losses on sales of securities are recognized in earnings at the time of sale and are determined on a specific-identification basis. Purchase premiums and discounts are recognized in interest income using the effective-yield method over the terms of the securities. For mortgage-

Table of Contents

backed securities (MBS), the amortization or accretion is based on estimated average lives of the securities. The lives of these securities can fluctuate based on the amount of prepayments received on the underlying collateral of the securities. The Company's investment in the Federal Home Loan Bank of San Francisco (FHLB) stock is carried at cost.

At each reporting date, securities are assessed to determine whether there is an other-than-temporary impairment (OTTI). Other-than-temporary impairment on investment securities is recognized in earnings when there are credit losses on a debt security for which management does not intend to sell and for which it is more-likely-than-not that the Company will not have to sell prior to recovery of the noncredit impairment. In those situations, the portion of the total impairment that is attributable to the credit loss would be recognized in earnings, and the remaining difference between the debt security's amortized cost and its fair value would be included in other comprehensive income.

Loans Held-for-Sale Loans held-for-sale include mortgage loans originated for resale and other non-covered or covered loans transferred from our held-for-investment portfolio when a decision is made to sell a loan(s) and are reported at the lower of cost or fair value. Normally a formal marketing strategy or plan for sale is developed at the time the decision to sell the loan(s) is made. Cost generally approximates fair value at any reporting date, if the mortgage loans were recently originated. The transfer of the loan(s) to held-for-sale is done at the lower of cost or fair value and if a reduction in value is required at time of the transfer, a charge-off is recorded against the allowance for credit losses (ALLL). Any subsequent decline in value or any subsequent gain on sale of the loan is recorded to current earnings and reported as part of other non-interest income. Gains or losses on the sale of loans that are held-for-sale are recognized at the time of sale and determined by the difference between net sale proceeds and the net book value of the loans. We do not currently retain servicing on any mortgage loans sold.

Loans and Lease Finance Receivables Non-covered loans and lease finance receivables that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, less deferred net loan origination fees. In the ordinary course of business, the Company enters into commitments to extend credit to its customers. To the extent that such commitments are unfunded, the related unfunded amounts are not reflected in the accompanying consolidated financial statements.

Interest on non-covered loans and lease finance receivables is credited to income based on the principal amounts of such loans or receivables outstanding. Non-covered loans are considered delinquent when principal or interest payments are past due 30 days or more and generally remain on accrual status between 30 and 89 days past due. Interest income is not recognized on non-covered loans and lease finance receivables when collection of interest is deemed by management to be doubtful. Non-covered loans on which the accrual of interest has been discontinued are designated as nonaccrual loans. In general, the accrual of interest on non-covered loans is discontinued when the loan becomes 90 days past due, or when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Factors considered in determining that the full collection of principal and interest is no longer probable include cash flow and liquidity of the borrower or property, the financial position of the guarantors and their willingness to support the loan as well as other factors, and this determination involves significant judgment. When an asset is placed on nonaccrual status, previously accrued but unpaid interest is reversed against income. Subsequent collections of cash are applied as reductions to the principal balance unless the loan is returned to accrual status. Interest is not recognized using a cash-basis method. Nonaccrual loans may be restored to accrual status when principal and interest become current and when the borrower is able to demonstrate payment performance for a sustained period, typically for six months. A nonaccrual loan may return to accrual status sooner based on other significant events or mitigating circumstances. This policy is consistently applied to all classes of non-covered financing receivables.

The Company receives collateral to support loans, lease finance receivables, and commitments to extend credit for which collateral is deemed necessary. The most significant categories of collateral are real estate, principally commercial and industrial income-producing properties, real estate mortgages, and assets utilized in dairy, livestock and agribusiness, and various personal property assets utilized in commercial and industrial business governed under the Uniform Commercial Code.

Nonrefundable fees and direct costs associated with the origination or purchase of non-covered loans are deferred and netted against outstanding loan balances. The deferred net loan fees and costs are recognized in interest income over the loan term using the effective-yield method.

Troubled Debt Restructurings Loans are reported as a Troubled Debt Restructuring (TDR) if the Company for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. Types of modifications that may be considered concessions, which in turn result in a TDR include, but are not limited to, (i) a reduction of the stated interest rate for the remaining original life of the debt, (ii) an extension of the maturity date or dates at a stated interest rate lower than the current market rate for new debt with similar risk, (iii) a reduction of the face amount or maturity amount of the debt as stated in the instrument or other agreement, or (iv) a reduction of interest. In addition, the Company may provide a concession to the debtor where it offers collateral and the value of such

Table of Contents

collateral is significant in proportion to the nature of the concession requested, and it substantially reduces the Company's risk of loss. In such cases, these modifications are not considered a TDR as, in substance, no concession was made as a result of the significant additional collateral obtained.

When determining whether or not a loan modification is a TDR under ASC 310-40, the Company evaluates loan modification requests from borrowers experiencing financial difficulties on a case-by-case basis. Any such modifications granted are unique to the borrower's circumstances. Because of the Company's focus on the commercial lending sector, each business customer has unique attributes, which in turn means that modifications of loans to those customers are not easily categorized by type, key features, or other terms, but are evaluated individually based on all relevant facts and circumstances pertaining to the modification request and the borrower's/guarantor's financial condition at the time of the request. The evaluation of whether or not a borrower is experiencing financial difficulties will include, among other relevant factors considered by the Company, a review of significant factors such as (i) whether the borrower is in default on any of its debt, (ii) whether the borrower is experiencing payment delinquency, (iii) whether the global cash flows of the borrower and the owner guarantor(s) of the borrower have diminished below what is necessary to service existing debt obligations, (iv) whether the borrowers' forecasted cash flows will be insufficient to service the debt in future periods or in accordance with the contractual terms of the existing agreement through maturity, (v) whether the borrower is unable to refinance the subject debt from other financing sources with similar terms, and (vi) whether the borrower is in jeopardy as a going-concern and/or considering bankruptcy. In any case, the debtor is presumed to be experiencing financial difficulties if the Company determines it is probable the debtor will default on the original loan if the modification is not granted.

The types of loans subject to modification vary greatly, but during the subject period are concentrated in commercial and industrial loans, dairy and agricultural loans, and term loans to commercial real estate investors. Some examples of key features include payment deferrals and delays, interest rate reductions, and extensions or renewals where the contract rate may or may not be below the market rate of interest for debt with similar characteristics as those of the modified debt. The typical length of the modified terms ranges from three (3) to twelve (12) months; however, all actual modified terms will depend on the facts, circumstances and attributes of the specific borrower requesting a modification. In general, after a careful evaluation of all relevant facts and circumstances taken together, including the nature of any concession, certain modification requests will result in troubled debt restructurings while certain other modifications will not, pursuant to the criteria and judgments as discussed throughout this report. In certain cases, modification requests for delays or deferrals of principal were evaluated and determined to be exempt from TDR reporting because they constituted insignificant delays under ASC 310-40-15.

In situations where the Company has determined that the borrower is experiencing financial difficulties and is evaluating whether a concession is *insignificant*, and therefore does not result in a troubled debt restructuring, such analysis is based on an evaluation of both the *amount* and the *timing* of the restructured payments, including the following factors:

1. Whether the amount of the restructured payments subject to delay is insignificant relative to the unpaid principal balance or collateral value of the debt and will result in an insignificant shortfall in the contractual amount due; and
2. The delay is insignificant relative to any of the following:

The frequency of payments due;

The debt's original contractual maturity; or

The debt's original expected duration.

Most modified loans *not* classified and accounted for as troubled debt restructurings were performing and paying as agreed under their original terms in the six-month period immediately preceding a request for modification. Subsequently, these modified loans have continued to perform under the modified terms and deferrals that amounted to insignificant delays, which in turn is supported by the facts and circumstances of each individual customer and loan as described above. Payment performance continues to be monitored once modifications are made. The Company's favorable experience regarding re-defaults under modified terms, or upon return of the loan to its original terms, indicates that such relief may improve ultimate collection and reduces the Company's risk of loss.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

A loan is generally considered impaired when based on current events and information it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. A loan, including a restructured loan, for which there is an insignificant delay relative to the frequency of payments due, and/or the original contractual maturity, is not considered an impaired loan. Generally, impaired loans include loans on nonaccrual status and TDRs.

The Company's policy is to record a specific valuation allowance, which is included in the allowance for credit losses, or to charge off that portion of an impaired loan that represents the impairment or shortfall amount as determined utilizing one of the three methods described in ASC 310-10-35-22. Impairment on non-collateral dependent restructured loans is

Table of Contents

measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. The impairment amount, if any, is generally charged off and recorded against the allowance for credit losses at the time impairment is measurable and a probable loss is determined. As a result, most of the TDRs have no specific allowance allocated because, consistent with the Company's stated practice, any impairment is typically charged-off in the period in which it is identified. Impairment on collateral dependent restructured loans is measured by determining the amount by which the impaired loan exceeds the fair value of the collateral less estimated selling costs. The fair value is generally determined by one or more appraisals of the collateral, performed by a Company approved third-party independent appraiser. The majority of impaired loans that are collateral dependent are charged off down to their estimated fair value of the collateral (less selling costs) at each reporting date based on current appraised value.

Appraisals of the collateral for impaired collateral dependent loans are typically ordered at the time the loan is identified as showing signs of inherent weakness. These appraisals are normally updated at least annually, or more frequently, if there are concerns or indications that the value of the collateral may have changed significantly since the previous appraisal. On an exception basis, a specific valuation allowance is recorded on collateral dependent impaired loans when a current appraisal is not yet available, a recent appraisal is still under review or on single-family mortgage loans if the loans are currently under review for a loan modification. Such valuation allowances are generally based on previous appraisals adjusted for current market conditions, based on preliminary appraisal values that are still being reviewed or for single-family loans under review for modification on an appraisal or indications of comparable home sales from external sources.

Charge-offs of unsecured consumer loans are recorded when the loan reaches 120 days past due or sooner as circumstances indicate. Except for the charge-offs of unsecured consumer loans, the charge-off policy is generally applied consistently across all portfolio segments.

The Company measures impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate, except that as a practical expedient, the Company may measure impairment based on a loan's observable market price, or the fair value of the collateral if the loan is a collateral-dependent loan. Impaired single-family mortgage loans that have been modified in accordance with the various government modification programs are also measured based on the present value of the expected cash flows discounted at the loan's pre-modification interest rate. The Company recognizes the change in present value attributable to the passage of time as interest income on such performing single-family mortgage loans and the amount of interest income recognized to date has been insignificant.

Covered Loans We refer to covered loans as those loans that we acquired in the San Joaquin Bank (SJB) acquisition for which we will be reimbursed for a substantial portion of any future losses under the terms of the Federal Deposit Insurance Corporation (FDIC) loss sharing agreement. We account for loans under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (acquired impaired loan accounting) when (i) we acquire loans deemed to be impaired when there is evidence of credit deterioration since their origination and it is probable at the date of acquisition that we would be unable to collect all contractually required payments and (ii) as a general policy election for non-impaired loans that we acquire in a distressed bank acquisition. Acquired impaired loans are accounted for individually or in pools of loans based on common risk characteristics. The excess of the loan's or pool's scheduled contractual principal and interest payments over all cash flows expected at acquisition is the nonaccretable difference. The remaining amount, representing the excess of the loan's cash flows expected to be collected over the fair value is the accretable yield (accreted into interest income over the remaining life of the loan or pool).

Provision and Allowance for Credit Losses The allowance for credit losses is management's estimate of probable losses inherent in the loan and lease receivables portfolio. The allowance is increased by the provision for losses and decreased by charge-offs when management believes the uncollectability of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance. The determination of the balance in the allowance for credit losses is based on an analysis of the loan and lease finance receivables portfolio using a systematic methodology and reflects an amount that, in management's judgment, is appropriate to provide for probable credit losses inherent in the portfolio, after giving consideration to the character of the loan portfolio, current economic conditions, past credit loss experience, and such other factors that would deserve current recognition in estimating inherent credit losses.

There are different qualitative risks for the loans in each portfolio segment. The construction and real estate segments' predominant risk characteristic is the collateral and the geographic location of the property collateralizing the loan as well as the operating cash flow for commercial real estate properties. The commercial and industrial segment's predominant risk characteristics are the cash flows of the businesses we lend to, the global cash flows and liquidity of the guarantors of such losses, as well as economic and market conditions. The dairy and livestock segment's predominant risk characteristics are milk and beef prices in the market as well as the cost of feed and cattle. The municipal lease segment's predominant risk characteristics are the municipality's general financial condition and tax revenues or if applicable the specific project related financial condition. The consumer, auto and other segment's predominant risk characteristics are employment and income

Table of Contents

levels as they relate to consumers and cash flows of the businesses as they relate to equipment and vehicle leases to businesses. The Agribusiness segment's predominant risk characteristics are the supply and demand conditions of the product, production seasonality, the scale of operations and ability to control costs, the availability and cost of water, and operator experience.

The Company's methodology is consistently applied across all portfolio segments taking into account the applicable historical loss rates and the qualitative factors applicable to each pool of loans. A key factor in the Company's methodology is the loan risk rating (Pass, Special Mention, Substandard, Doubtful and Loss). Loan risk ratings are updated as facts related to the loan or borrower become available. In addition, all term loans in excess of \$1.0 million are subject to an annual internal credit review process where all factors underlying the loan, borrower and guarantors are subject to review which may result in changes to the loan's risk rating. Periodically, we assess various attributes utilized in adjusting our historical loss factors to reflect our view of current economic conditions. The estimate is reviewed quarterly by the Board of Directors and management and periodically by various regulatory agencies and, as adjustments become necessary, they are reported in earnings in the periods in which they become known.

A provision for credit losses on the covered portfolio will be recorded if there is deterioration in the expected cash flows on covered loans as a result of deteriorated credit quality, compared to those previously estimated without regard to the reimbursement from the FDIC under the FDIC loss sharing agreement. The portion of the loss on covered loans reimbursable from the FDIC is recorded in noninterest income as an increase in the FDIC loss sharing asset. Decreases in expected cash flows on the acquired impaired loans as of the measurement date compared to previously estimated are recognized by recording a provision for credit losses on acquired impaired loans. Loans accounted for as part of a pool are measured based on the expected cash flows of the entire pool.

FDIC Loss Sharing Asset On October 16, 2009, the Bank acquired substantially all of the assets and assumed substantially all of the liabilities of San Joaquin Bank (SJB) from the FDIC in an FDIC-assisted transaction. The Bank entered into a loss sharing agreement with the FDIC, whereby the FDIC will cover a substantial portion of any future losses on certain acquired assets. The acquired assets subject to the loss sharing agreement are referred to collectively as covered assets. Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and share in 80% of loss recoveries up to \$144.0 million with respect to covered assets, after a first loss amount of \$26.7 million. The FDIC will reimburse the Bank for 95% of losses and share in 95% of loss recoveries in excess of \$144.0 million with respect to covered assets. The loss sharing agreement is in effect for 5 years for commercial loans and 10 years for single-family residential loans from the October 16, 2009 acquisition date and the loss recovery provisions are in effect for 8 and 10 years, respectively, for commercial and single-family residential loans from the acquisition date.

The FDIC loss sharing asset was initially recorded at fair value which represents the present value of the estimated cash payments from the FDIC for future losses on covered loans. The ultimate collectability of this asset is dependent upon the performance of the underlying covered loans, the passage of time and claims paid by the FDIC. The loss estimates used in calculating the FDIC loss sharing asset are determined on the same basis as the loss estimates on the related covered loans and is the present value of the cash flows the Company expects to collect from the FDIC under the loss sharing agreement. The difference between the present value and the undiscounted cash flow the Company expects to collect from the FDIC is accreted (or amortized) into noninterest income over the life of the FDIC indemnification asset. The FDIC indemnification asset is adjusted for any changes in expected cash flows based on covered loan performance. Any increases in the cash flows of covered loans over those expected will reduce the FDIC indemnification asset and any decreases in the cash flows of covered loans over those expected will increase the FDIC indemnification asset, with the remaining balance amortized on the same basis as the discount, not to exceed its remaining contract life. These increases and decreases to the FDIC indemnification asset are recorded as adjustments to noninterest income.

Non-Covered Other Real Estate Owned Non-covered other real estate owned (OREO) represents real estate acquired through foreclosure in lieu of repayment of commercial and real estate loans and is stated at fair value, less estimated costs to sell (fair value at time of foreclosure). Non-covered loan balances in excess of fair value of the real estate acquired at the date of acquisition are charged against the allowance for credit losses. Any subsequent operating expenses or income, reduction in estimated values, and gains or losses on disposition of such properties are charged to current operations. Gain recognition upon disposition of a property is dependent on the sale having met certain criteria relating to the buyer's initial investment in the property sold.

Covered Other Real Estate Owned All other real estate owned acquired in the FDIC-assisted acquisition of SJB are included in a FDIC shared-loss agreement and are referred to as covered other real estate owned. Covered other real estate owned is reported exclusive of expected reimbursement cash flows from the FDIC. Fair value adjustments on covered other real estate owned result in a reduction of the covered other real estate carrying amount with the estimated net loss charged against earnings and a corresponding increase in the estimated FDIC loss sharing asset based on the appropriate loss-sharing percentage.

Table of Contents

Premises and Equipment Premises and equipment are stated at cost, less accumulated depreciation, which is provided for in amounts sufficient to relate the cost of depreciable assets to operations over the estimated service lives of the respective asset and are computed on a straight-line basis. The ranges of useful lives of the principal classes of assets are as follows:

Bank premises	15 - 40 years
Leasehold improvements	Shorter of estimated economic lives of 15 years or term of the lease.
Computer equipment	3 - 5 years
Furniture, fixtures and equipment	5 - 7 years

Long-lived assets are reviewed periodically for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. The existence of impairment is based on undiscounted cash flows. To the extent impairment exists, the impairment is calculated as the difference in fair value of assets and their carrying value. The impairment loss, if any, would be recorded in noninterest expense.

Goodwill and Intangible Assets Goodwill resulting from business combinations prior to January 1, 2009, represents the excess of the purchase price over the fair value of the net assets of the businesses acquired. Goodwill resulting from business combinations after January 1, 2009, is generally determined as the excess of the fair value of the consideration transferred, plus the fair value of any noncontrolling interest in the acquiree, over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually, or more frequently if events and circumstances exist that indicate that a goodwill impairment test should be performed.

Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. Goodwill is the only intangible asset with an indefinite life on our balance sheet. Based on the Company's annual impairment test, there was zero recorded impairment as of December 31, 2012.

Other intangible assets consist of core deposit intangible assets arising from business combinations and are amortized using an accelerated method over their estimated useful lives.

Fair Value of Financial Instruments We use fair value measurements to record fair value adjustments to certain financial instruments and to determine fair value disclosures. Investment securities available-for-sale and interest-rate swaps are financial instruments recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other financial assets on a non-recurring basis, such as impaired loans and OREO. These nonrecurring fair value adjustments typically involve application of lower-of-cost-or-market accounting or writedowns of individual assets. Further, we include in Note 21 of the consolidated financial statements information about the extent to which fair value is used to measure assets and liabilities, the valuation methodologies used and its impact to earnings. Additionally, for financial instruments not recorded at fair value we disclose the estimate of their fair value.

Bank Owned Life Insurance The Company invests in Bank-Owned Life Insurance (BOLI). BOLI involves the purchasing of life insurance by the Company on a select group of employees. The Company is the owner and primary beneficiary of these policies. BOLI is recorded as an asset at the cash surrender value. Increases in the cash value of these policies, as well as insurance proceeds received, are recorded in other non-interest income and are not subject to income tax.

Income Taxes Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Future realization of deferred tax assets ultimately depends on the existence of sufficient taxable income of the appropriate character (for example, ordinary income or capital gain) within the carryback or carryforward periods available under the tax law. Based on historical and future expected taxable earnings and available strategies, the Company considers the future realization of these deferred tax assets more likely than not.

The tax effects from an uncertain tax position are recognized in the financial statements only if, based on its merits, the position is more likely than not to be sustained on audit by the taxing authorities. Interest and penalties related to uncertain tax positions are recorded as part of other operating expense.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Earnings per Common Share The Company calculates earnings per common share (EPS) using the two-class method. The two-class method requires the Company to present EPS as if all of the earnings for the period are distributed to common shareholders and any participating securities. All outstanding unvested share-based payment awards that contain rights to non-forfeitable dividends are considered participating securities. The Company grants restricted shares under the

Table of Contents

2008 Equity Incentive Plan that qualify as participating securities. Restricted shares issued under this plan are entitled to dividends at the same rate as common stock. A reconciliation of the numerator and the denominator used in the computation of basic and diluted earnings per common share is included in Note 18.

Stock-Based Compensation Consistent with the provisions of ASC 718, *Stock Compensation*, we recognize expense for the grant date fair value of stock options and restricted shares issued to employees, officers and non-employee directors over the their requisite service periods (generally the vesting period). The service periods may be subject to performance conditions.

At December 31, 2012, the Company has three stock-based employee compensation plans. The Company accounts for stock compensation using the modified prospective method. Under this method, awards that are granted, modified, or settled after December 31, 2005, are measured at fair value as of the grant date with compensation costs recognized over the vesting period on a straight-lined basis. Also under this method, unvested stock awards as of January 1, 2006 are recognized over the remaining service period with no change in historical reported earnings.

The fair value of each stock option grant is estimated as of the grant date using the Black-Scholes option-pricing model. Management assumptions used at the time of grant impact the fair value of the option calculated under the Black-Scholes option-pricing model, and ultimately, the expense that will be recognized over the life of the option.

The grant date fair value of restricted stock awards is measured at the fair value of the Company's common stock as if the restricted share was vested and issued on the date of grant.

Additional information is included in Note 19, *Stock Option Plans and Restricted Stock Awards*, of the Consolidated Financial Statements included herein.

Derivative Financial Instruments All derivative instruments, including certain derivative instruments embedded in other contracts, are recognized on the consolidated balance sheets at fair value. For derivatives designated as fair value hedges, changes in the fair value of the derivative and the hedged item related to the hedged risk are recognized in earnings. Changes in fair value of derivatives designated and accounted for as cash flow hedges, to the extent they are effective as hedges, are recorded in *Other Comprehensive Income*, net of deferred taxes, and are subsequently reclassified to earnings when the hedged transaction affects earnings. Any hedge ineffectiveness would be recognized in the income statement line item pertaining to the hedged item.

Statement of Cash Flows Cash and cash equivalents as reported in the statements of cash flows include cash and due from banks, interest-bearing balances due from depository institutions and federal funds sold with original maturities of three months or less. Cash flows from loans and deposits are reported net.

CitizensTrust This division provides trust, investment and brokerage related services, as well as financial, estate and business succession planning services. CitizensTrust services its clients through three offices in Southern California: Pasadena, Ontario and Irvine. CitizensTrust has approximately \$2.10 billion in assets under administration, including \$1.58 billion in assets under management. The amount of these funds and the related liability have not been recorded in the accompanying consolidated balance sheets because they are not assets or liabilities of the Bank or Company, with the exception of any funds held on deposit with the Bank.

Use of Estimates in the Preparation of Financial Statements The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. A material estimate that is particularly susceptible to significant change in the near term relates to the determination of the allowance for credit losses. Other significant estimates which may be subject to change include fair value determinations and disclosures, impairment of investments, goodwill, loans, determining the amount and realization of the FDIC loss sharing asset, and valuation of deferred tax assets, other intangibles and OREO.

Other Contingencies In the ordinary course of business, the Company becomes involved in litigation. Based upon the Company's internal records and discussions with legal counsel, the Company records reserves as appropriate, for estimates of the probable outcome of all cases brought against the Company. Except as discussed in Note 15 at December 31, 2012, the Company does not have any litigation reserves and is not aware of any material pending legal action or complaints asserted against the Company.

Recent Accounting Pronouncements In June 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. Under ASU 2011-05, an entity has the option to present the components of net earnings and comprehensive income in either a single continuous statement of comprehensive income or in two

separate but consecutive statements. This ASU

Table of Contents

eliminates the option in U.S. GAAP to present other comprehensive income in the statement of changes in equity. ASU 2011-05 must be applied retrospectively and is effective for fiscal years beginning after December 15, 2011. The Company's adoption of ASU 2011-05 in 2012 did not have a material effect on the Company's consolidated financial statements.

In July 2012, the FASB issued ASU 2012-02, *Intangibles-Goodwill and Other (Topic 350)*. This ASU allows an entity to first assess qualitative factors to determine whether it is necessary to perform the quantitative impairment test for indefinite-lived intangible assets. An organization that elects to perform a qualitative assessment is required to perform the quantitative impairment test for an indefinite-lived intangible asset if it is more likely than not that the asset is impaired, based on the entity's qualitative assessment. This update is effective for fiscal years beginning after September 15, 2012, and should be applied to annual and interim impairment testing. Early adoption is permitted for annual and interim impairment tests as of a date before July 27, 2012, provided that an entity's financial statements for the most recent annual or interim period have yet to have been issued. The adoption of this new guidance is not expected to have a material impact on the Company's consolidated financial statements.

In January 2013, the FASB issued ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities (Topic 210)*, which amends the scope of FASB ASU 2011-11, *Disclosures about Offsetting Assets and Liabilities*, to clarify that the disclosure requirements of ASU 2011-11 are limited to derivatives, including bifurcated embedded derivatives, repurchase and reverse repurchase agreements, and securities borrowing and lending transactions that are either offset in the statement of financial position or subject to an enforceable master netting arrangement or similar agreement. The ASU responds to implementation issues raised by stakeholders about the scope of ASU 2011-11. Consistent with the effective date of ASU 2011-11, an entity is required to apply the amendments retrospectively for annual periods beginning on or after January 1, 2013 (and interim periods within those annual periods). The adoption of this new guidance is not expected to have a material impact on the Company's consolidated financial statements.

4. FEDERALLY ASSISTED ACQUISITION OF SAN JOAQUIN BANK

On October 16, 2009, Citizens Business Bank acquired substantially all of the assets and assumed substantially all of the liabilities of San Joaquin Bank (SJB) from the Federal Deposit Insurance Corporation (FDIC) in an FDIC-assisted transaction. The Bank entered into a loss sharing agreement with the FDIC, whereby the FDIC will cover a substantial portion of any future losses on certain acquired assets. The acquired assets subject to the loss sharing agreement are referred to collectively as covered assets. Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and share in 80% of loss recoveries up to \$144.0 million with respect to covered assets, after a first loss amount of \$26.7 million. The FDIC will reimburse the Bank for 95% of losses and share in 95% of loss recoveries in excess of \$144.0 million with respect to covered assets. The loss sharing agreement is in effect for 5 years for commercial loans and 10 years for single-family residential loans from the October 16, 2009 acquisition date and the loss recovery provisions are in effect for 8 and 10 years, respectively for commercial and single-family residential loans from the acquisition date. The purpose of this acquisition was to expand our presence in the Central Valley region of California.

The acquisition has been accounted for under the purchase method of accounting. The assets and liabilities were recorded at their estimated fair values as of the October 16, 2009 acquisition date. The application of the purchase method of accounting resulted in an after-tax gain of \$12.3 million which was included in 2009 earnings. The gain is the negative goodwill resulting from the acquired assets and liabilities recognized at fair value.

Loans acquired from the SJB acquisition have performed better than originally expected. At December 31, 2012, the remaining discount associated with the SJB loans approximated \$25.3 million. Based on the Company's regular re-forecast of expected cash flows from these loans, approximately \$16.4 million of the related discount is expected to accrete into interest income over the remaining average lives of the respective pools and individual loans, which approximates 4.70 years and 1.14 years, respectively. Due to the decrease in estimated losses to be incurred in the remaining portfolio, the expected reimbursement from the FDIC under the loss sharing agreement decreased. The FDIC loss sharing asset of \$18.5 million at December 31, 2012 will continue to be reduced by loss claims submitted to the FDIC with the remaining balance amortized on the same basis as the discount on the related loans, not to exceed its remaining contract life of approximately 1.75 years.

Table of Contents**5. INVESTMENT SECURITIES**

The amortized cost and estimated fair value of investment securities are summarized below. The majority of securities held are publicly traded, and the estimated fair values were obtained from an independent pricing service based upon market quotes.

	December 31, 2012				
	Amortized Cost	Gross Unrealized Holding Gain	Gross Unrealized Holding Loss	Fair Value	Total Percent
<i>(Dollars in thousands)</i>					
Investment securities available-for-sale:					
Government agency	\$ 357,960	\$ 1,588	\$ (248)	\$ 359,300	14.67%
Residential mortgage-backed securities	862,196	25,529	(127)	887,598	36.24%
CMO s / REMIC s residential	565,968	7,402	(1,410)	571,960	23.35%
Municipal bonds	583,692	41,920	(183)	625,429	25.53%
Other securities	5,000	100		5,100	0.21%
Total investment securities	\$ 2,374,816	\$ 76,539	\$ (1,968)	\$ 2,449,387	100.00%

	December 31, 2011				
	Amortized Cost	Gross Unrealized Holding Gain	Gross Unrealized Holding Loss	Fair Value	Total Percent
<i>(Dollars in thousands)</i>					
Investment securities available-for-sale:					
Government agency	\$ 46,273	\$ 234	\$	\$ 46,507	2.11%
Residential mortgage-backed securities	869,847	18,487	(334)	888,000	40.33%
CMO s / REMIC s residential	594,866	10,307	(665)	604,508	27.46%
Municipal bonds	608,575	43,665	(203)	652,037	29.62%
Other securities	10,468	10	(4)	10,474	0.48%
Total investment securities	\$ 2,130,029	\$ 72,703	\$ (1,206)	\$ 2,201,526	100.00%

Approximately 75% of the available-for-sale portfolio at December 31, 2012 represents securities issued by the U.S government or U.S. government-sponsored enterprises, with the implied guarantee of payment of principal and interest. The remaining CMO/REMICs are backed by agency-pooled collateral or whole loan collateral. All non-agency available-for-sale CMO/REMIC issues held are rated investment grade or better by either Standard & Poor s or Moody s, as of December 31, 2012 and 2011. We have \$1.2 million in CMO/REMIC s backed by whole loans issued by private-label companies (non-government sponsored).

There were no realized gains or losses for the year ended December 31, 2012 and 2011. Gross realized gains were \$38.9 million for the year ended December 31, 2010 and no realized losses.

Other securities	2,500	4			2,500	4
Total	\$ 233,909	\$ 1,206	\$	\$	\$ 233,909	\$ 1,206

The tables above show the Company's investment securities' gross unrealized losses and fair value by investment category and length of time that individual securities have been in a continuous unrealized loss position at December 31, 2012 and 2011. The Company has reviewed individual securities to determine whether a decline in fair value below the amortized cost basis is other-than-temporary.

The following summarizes our analysis of these securities and the unrealized losses. This assessment was based on the following factors: i) the length of the time and the extent to which the fair value has been less than amortized cost; ii) adverse condition specifically related to the security, an industry, or a geographic area and whether or not the Company expects to recover the entire amortized cost, iii) historical and implied volatility of the fair value of the security; iv) the payment structure of the security and the likelihood of the issuer being able to make payments in the future; v) failure of the issuer of the security to make scheduled interest or principal payments, vi) any changes to the rating of the security by a rating agency, and vii) recoveries or additional declines in fair value subsequent to the balance sheet date.

CMO Held-to-Maturity We have one investment security classified as held-to-maturity. This security was issued by Countrywide Financial and is collateralized by Alt-A mortgages. The mortgages are primarily fixed-rate, 30-year loans, originated in early 2006 with average FICO scores of 715 and an average LTV of 71% at origination. The security was a senior security in the securitization, was rated triple AAA at origination and was supported by subordinate securities. This security is classified as held-to-maturity as we have both the intent and ability to hold this debt security to maturity. We acquired this security in February 2008 at a price of 98.25%. The significant decline in the fair value of the security first appeared in August 2008 at the time the financial crisis in the markets occurred and the market for securities collateralized by Alt-A mortgages diminished.

Table of Contents

As of December 31, 2012, the unrealized loss on this security was zero and the fair value of the security was 71% of the current par value. This Alt-A bond, with a book value of \$2.1 million as of December 31, 2012, has had \$1.9 million in net impairment losses to date. These losses have been recorded as a reduction to noninterest income. The security is rated non-investment grade. We evaluated the security for an other-than-temporary decline in fair value as of December 31, 2012. The key assumptions include default rates, loss severities and prepayment rates. There were no changes in credit related other-than temporary impairment recognized in earnings for the year ended December 31, 2012, compared to an other-than-temporary impairment loss of \$656,000 recognized during the same period in 2011.

Government Agency & Government-Sponsored Enterprise The government agency bonds are backed by the full faith and credit of Agencies of the U.S. Government. As of December 31, 2012, approximately \$162.8 million in U.S. government agency bonds are callable. These securities are bullet securities, that is, they have a defined maturity date on which the principal is paid. The contractual term of these investments provides that the Company will receive the face value of the bond at maturity which will equal the amortized cost of the bond. Interest is received throughout the life of the security.

Mortgage-Backed Securities and CMO/REMICs Almost all of the available-for-sale mortgage-backed and CMO/REMICs securities are issued by the government-sponsored enterprises such as Ginnie Mae, Fannie Mae and Freddie Mac. These securities are collateralized or backed by the underlying residential mortgages. All mortgage-backed securities are considered to be rated investment grade with a weighted average life of approximately 2.7 years. Of the total MBS/CMO, 99.92% have the implied guarantee of U.S. government-sponsored agencies. The remaining 0.08% are issued by banks. Accordingly, it is expected the securities would not be settled at a price less than the amortized cost of the bonds.

Municipal Bonds The majority of our municipal bonds are insured by the largest bond insurance companies with maturities of approximately 9.5 years. The Company diversifies its holdings by owning selections of securities from different issuers and by holding securities from geographically diversified municipal issuers, thus reducing the Company's exposure to any single adverse event. Because we believe the decline in fair value is attributable to the changes in interest rates and not credit quality and because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized costs, which may be at maturity, management does not consider these investments to be other than temporarily impaired at December 31, 2012.

We are continually monitoring the quality of our municipal bond portfolio in light of the current financial problems exhibited by certain monoline insurance companies. Many of the securities that would not be rated without insurance are pre-refunded and/or are general obligation bonds. We continue to monitor municipalities, which includes a review of the respective municipalities' audited financial statements to determine whether there are any audit or performance issues. We use outside brokers to assist us in these analyses. Based on our monitoring of the municipal marketplace, to our knowledge, none of the municipalities are exhibiting financial problems that would lead us to believe that there is an OTTI for any given security.

At December 31, 2012 and December 31, 2011, investment securities having a carrying value of \$2.24 billion and \$1.85 billion, respectively, were pledged to secure public deposits, short and long-term borrowings, and for other purposes as required or permitted by law.

The amortized cost and fair value of debt securities at December 31, 2012, by contractual maturity, are shown below. Although mortgage-backed securities and CMO/REMICs have contractual maturities through 2041, expected maturities will differ from contractual maturities because borrowers may have the right to prepay such obligations without penalty. Mortgage-backed securities and CMO/REMICs are included in maturity categories based upon estimated prepayment speeds.

Table of Contents

	Amortized Cost	Available-for-sale Fair Value	Weighted- Average Yield
		<i>(Dollars in thousands)</i>	
Due in one year or less	\$ 276,581	\$ 277,657	1.94%
Due after one year through five years	1,660,947	1,716,879	2.48%
Due after five years through ten years	409,264	425,119	2.72%
Due after ten years	28,024	29,732	4.03%
Total	\$ 2,374,816	\$ 2,449,387	2.47%

The investment in FHLB stock is periodically evaluated for impairment based on, among other things, the capital adequacy of the FHLB and its overall financial condition. No impairment losses have been recorded through December 31, 2012.

6. LOAN AND LEASE FINANCE RECEIVABLES AND ALLOWANCE FOR CREDIT LOSSES

The following tables provide a summary of the components of loan and lease finance receivables:

	Non-Covered Loans	December 31, 2012 Covered Loans	Total

As of December 31, 2012, 62.35% of the total loan portfolio consisted of commercial real estate loans and 1.76% of the total loan portfolio consisted of construction loans, respectively. Substantially all of the Company's real estate loans and construction loans are secured by real properties located in California. At December 31, 2012, the Company held approximately \$1.53 billion of fixed rate loans.

At December 31, 2012 and December 31, 2011, loans totaling \$2.32 billion and \$2.31 billion, respectively, were pledged to secure the borrowings from the FHLB and the Federal Reserve Bank.

The following is the activity of loans held-for-sale for the periods indicated:

Non-Covered Loans Held-for-Sale Activity

	For the Year Ended December 31,	
	2012	2011
	<i>(Dollars in thousands)</i>	
Balance, beginning of period	\$ 348	\$ 2,954
Originations of mortgage loans	25,489	37,304
Sales of mortgage loans	(22,250)	(34,962)
Transfer of mortgage loans to held-for-investment	(3,587)	(3,292)
Sales of other loans		(6,000)
Transfers of other loans to held-for-sale		6,000
Write-down of loans held-for-sale		(1,656)
Balance, end of period	\$	\$ 348

Table of Contents

Occasionally, the Company may decide to retain and not sell certain mortgage loans originated and will transfer them to the held for investment loan portfolio. This is generally done for customer service purposes.

Covered Loans Held-for-Sale Activity

	For the Year Ended December 31,	
	2012	2011
	<i>(Dollars in thousands)</i>	
Balance, beginning of period	\$ 5,664	\$
Originations of mortgage loans		
Sales of mortgage loans		
Transfer of other loans to held-for-investment		
Sales of other loans	(3,745)	
Transfers of other loans to held-for-sale		5,726
Write-down of loans held-for-sale	(1,219)	
Payment on other loans	(700)	(62)
Balance, end of period	\$	\$ 5,664

During 2011, 12 covered loans with an aggregate carrying balance of \$5.7 million were transferred to held-for-sale. During the second quarter ended June 30, 2011, a decision was made to sell one loan and it was transferred to held-for-sale at a fair value of \$6.0 million and resulted in a charge-off against the allowance for credit losses of \$619,000 at the time of transfer. This loan was subsequently sold in July, 2011 at a small gain. Also, during 2011, another loan classified as held-for-sale with a book value of \$1.7 million was written-off to zero with the write-off reported as part of non-interest income. The loan was the subject of legal proceedings regarding our lien position and a preliminary decision by the court found that our lien was not in a first priority position. After careful analysis of the preliminary court decision and valuation of the subject collateral, we wrote off the remaining carrying amount. During 2012, all covered loans held-for-sale were sold.

Credit Quality Indicators

Central to our credit risk management is our loan risk rating system. The originating credit officer assigns borrowers an initial risk rating, which is reviewed and possibly changed by Credit Management, which is based primarily on a thorough analysis of each borrower's financial capacity in conjunction with industry and economic trends. Approvals are made based upon the amount of inherent credit risk specific to the transaction and are reviewed for appropriateness by senior line and credit management personnel. Credits are monitored by line and credit management personnel for deterioration in a borrower's financial condition, which would impact the ability of the borrower to perform under the contract. Risk ratings are adjusted as necessary.

Loans are risk rated into the following categories (Credit Quality Indicators): Pass, Pass Watch List, Special Mention, Substandard, Doubtful and Loss. Each of these groups is assessed for the proper amount to be used in determining the adequacy of our allowance for losses. These categories can be described as follows:

Pass These loans range from minimal credit risk to lower than average, but still acceptable, credit risk.

Pass Watch List Pass Watch list loans usually require more than normal management attention. Loans which qualify for the Pass Watch List may involve borrowers with adverse financial trends, higher debt/equity ratios, or weaker liquidity positions, but not to the degree of being considered a defined weakness or problem loan where risk of loss may be apparent.

Special Mention Loans assigned to this category are currently protected but are weak. Although concerns exist, the Company is currently protected and loss is unlikely. Such loans have potential weaknesses that may, if not checked or corrected, weaken the asset or inadequately protect the Company's credit position at some future date.

Substandard Loans classified as substandard include poor liquidity, high leverage, and erratic earnings or losses. The primary source of repayment is no longer realistic, and asset or collateral liquidation may be the only source of repayment. Loans are marginal and require continuing and close supervision by credit management. Substandard loans have the distinct possibility that the Company will sustain some loss if deficiencies are not corrected.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Doubtful Loans classified doubtful have all the weaknesses inherent in those classified substandard with the added provision that the weaknesses make collection or the liquidation, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonable specific pending factors which may work to the advantage and strengthening of the assets, their classifications as losses are deferred until their more exact status may be determined.

Table of Contents

Loss Loans classified as loss are considered uncollectible and of such little value that their continuance as active assets of the Company is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future.

The following table summarizes our internal risk grouping by loan class as of December 31, 2012 and 2011:

Credit Quality Indicators

	December 31, 2012

Allowance for Credit Losses

The Company's Credit Management Division is responsible for regularly reviewing the allowance for credit losses (ALLL) methodology, including loss factors and economic risk factors. The Bank's Director Loan Committee provides Board oversight of the ALLL process and approves the ALLL methodology on a quarterly basis.

Our methodology for assessing the appropriateness of the allowance is conducted on a regular basis and considers the Bank's overall loan portfolio. The Bank's methodology consists of two major phases.

In the first phase, individual loans are reviewed to identify loans for impairment. A loan is generally considered impaired when principal and interest are deemed uncollectible in accordance with the contractual terms of the loan. A loan for which there is an insignificant delay or shortfall in the amount of payments due is not considered an impaired loan. Impairment is measured as either the expected future cash flows discounted at each loan's effective interest rate, the fair value of the loan's collateral if the loan is collateral dependent, or an observable market price of the loan (if one exists). If we determine that the value of the impaired loan is less than the recorded investment of the loan, we either recognize an impairment reserve as a Specific Allowance to be provided for in the allowance for credit losses or charge off the impaired balance if it is determined that such amount represents a confirmed loss. Loans determined to be impaired are excluded from the formula allowance so as not to double count the loss exposure.

The second phase is conducted by evaluating or segmenting the remainder of the loan portfolio into groups or pools of loans with similar characteristics. In this second phase, groups or pools of homogeneous loans are reviewed to determine a portfolio formula allowance. In the case of the portfolio formula allowance, homogeneous portfolios, such as small business loans, consumer loans, agricultural loans, and real estate loans, are aggregated or pooled in determining the appropriate allowance. The risk assessment process in this case emphasizes trends in the different portfolios for delinquency, loss, and other behavioral characteristics of the subject portfolios.

Included in this second phase is our considerations of qualitative factors, including, all known relevant internal and external factors that may affect the collectability of a loan. This includes our estimates of the amounts necessary for concentrations, economic uncertainties, the volatility of the market value of collateral, and other relevant factors. These qualitative factors are used to adjust the historical loan loss rates for each pool of loans to determine the probable credit losses inherent in the portfolio.

The methodology is consistently applied across all the portfolio segments taking into account the applicable historical loss rates and the qualitative factors applicable to each pool of loans. Periodically, we assess various attributes utilized in adjusting our historical loss factors to reflect current economic conditions. During 2012, many of our dairy and livestock borrowers experienced an increase in feed costs, a decrease in milk prices, and tightened profit margins. As part of our qualitative analysis during the year ended December 31, 2012, we adjusted the attributes used in the allowance for credit losses to account for challenges evident in the current economic environment of the dairy and livestock industry.

Management believes that the ALLL was appropriate at December 31, 2012. No assurance can be given that economic conditions which adversely affect our service areas or other circumstances will not be reflected in increased provisions for credit losses in the future.

Table of Contents

The following table presents the balance and activity in the allowance for credit losses; and the recorded investment in held-for-investment loans by portfolio segment and based upon our impairment method as of December 31, 2012 and 2011:

Past Due and Nonperforming Loans

We seek to manage asset quality and control credit risk through diversification of the non-covered loan portfolio and the application of policies designed to promote sound underwriting and loan monitoring practices. The Bank's Credit Management Division is in charge of monitoring asset

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

quality, establishing credit policies and procedures and enforcing the consistent application of these policies and procedures across the Bank. Reviews of nonperforming, past due non-covered loans and larger credits, designed to identify potential charges to the allowance for credit losses, and to determine the adequacy of the allowance, are conducted on an ongoing basis. These reviews consider such factors as the financial strength of borrowers and any guarantors, the value of the applicable collateral, loan loss experience, estimated loan losses, growth in the loan portfolio, prevailing economic conditions and other factors.

Table of Contents

Loans are reported as a troubled debt restructuring when the Bank grants a concession(s) to a borrower experiencing financial difficulties that the Bank would not otherwise consider. Examples of such concessions include a reduction in the interest rate, deferral of principal or accrued interest, extending the payment due dates or loan maturity date(s), or providing a lower interest rate than would be normally available for new debt of similar risk. As a result of these concessions, restructured loans are classified as impaired. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and credit losses.

Generally, when loans are identified as impaired they are moved to our Special Assets Division. When we identify a loan as impaired, we measure the loan for potential impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining external appraisals.

The accrual of interest on loans is discontinued when the loan becomes 90 or more days past due based on the contractual term of the loan, or when the full collection of principal and interest is in doubt. When an asset is placed on nonaccrual status, previously accrued but unpaid interest is reversed against income. Subsequent collections of cash are applied as reductions to the principal balance unless the loan is returned to accrual status. Nonaccrual loans may be restored to accrual status when principal and interest become current and full payment of principal and interest is expected.

Speculative construction loans are generally for properties where there is no identified buyer or renter.

Table of Contents

The following table presents the recorded investment in non-covered past due and nonaccrual loans and loans past due by class of loans as of December 31, 2012 and 2011:

Non-Covered Past Due and Nonaccrual Loans

Non-Covered Impaired Loans

At December 31, 2012, the Company had non-covered impaired loans of \$108.4 million. Of this amount, \$10.7 million in nonaccrual commercial construction loans, \$13.1 million of nonaccrual single family mortgage loans, \$21.0 million of nonaccrual commercial real estate loans, \$3.1 million of nonaccrual commercial and industrial loans, \$9.8 million of nonaccrual dairy and livestock loans and \$215,000 of other loans. These non-covered impaired loans included \$81.7 million of loans whose terms were modified in a troubled debt restructure, of which \$31.3 million are classified as nonaccrual. The remaining balance of \$50.4 million consists of 34 loans performing according to the restructured terms. The impaired loans had a specific allowance of \$2.3 million at December 31, 2012. At December 31, 2011, the Company had classified as impaired, non-covered loans with a balance of \$101.2 million with a related allowance of \$3.0 million.

Table of Contents

The following table presents held-for-investment and held-for-sale loans, individually evaluated for impairment by class of loans, as of December 31, 2012 and 2011:

The Company recognizes the charge-off of impairment allowance on impaired loans in the period it arises for collateral dependent loans. Therefore, the majority of the nonaccrual loans as of December 31, 2012 and 2011 have already been written down to their estimated net realizable value. The impaired loans with a related allowance recorded are on nonaccrual loans where a charge-off is not yet processed, on nonaccrual SFR loans where there is a potential modification in process, or on smaller balance non-collateral dependent loans.

Impaired construction speculative loans increased in 2012 due to a participating interest in the Company's only Shared National Credit loan that was transferred to nonaccrual status. The outstanding balance was \$10.6 million as of December 31, 2012.

The allowance for off-balance sheet credit exposure relates to commitments to extend credit, letters of credit and undisbursed funds on lines of credit. The Company evaluates credit risk associated with the off-balance sheet commitments at the same time it evaluates credit risk associated with the loan and lease portfolio. The Company recorded a reduction of \$1.0 million in reserve for unfunded commitments for the year ended December 31, 2012, compared to a decrease of \$918,000 in the reserve for the year ended December 31, 2011. As of December 31, 2012 and December 31, 2011, the balance in this reserve was \$8.6 million and \$9.6 million, respectively, and was included in other liabilities.

Troubled Debt Restructurings (TDR)

As a result of adopting the amendments in ASU 2011-02, the Company reassessed all restructurings that occurred on or after January 1, 2011 for identification as troubled debt restructurings. Loans that are reported as TDRs are considered impaired and charge-off amounts are taken on an individual loan basis, as deemed appropriate. The majority of restructured loans are loans for which the terms of repayment have been renegotiated, resulting in a reduction in interest rate or deferral of principal. Refer to Note 3 Summary of Significant Accounting Policies, Troubled Debt Restructurings, included herein.

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

As of December 31 2012, we had loans of \$81.7 million classified as a troubled debt restructured, of which \$31.3 million are nonperforming and \$50.4 million are performing. TDRs on accrual status are comprised of loans that were accruing at the time of restructuring or have demonstrated repayment performance in compliance with the restructured terms for a sustained period and for which the Company anticipates full repayment of both principal and interest. TDRs on accrual status at December 31, 2012 were mainly comprised of commercial real estate loans including construction loans.

Table of Contents

The majority of TDRs have no specific allowance allocated as any impairment amount is normally charged off at the time a probable loss is determined. We have allocated \$1.4 million and \$27,000 specific allowance to TDRs as of December 31, 2012 and December 31, 2011.

The following are the loans modified as troubled debt restructurings for the years ended December 31, 2012 and 2011:

Modifications

	Number of Loans	For the Year Ended December 31, 2012		Outstanding Recorded Investment at December 31, 2012

8. FDIC LOSS SHARING ASSET AND OTHER ASSETS***FDIC Loss Sharing Asset***

The following table summarizes the activity related to the FDIC loss sharing asset for the years indicated:

	For the Year Ended December 31,	
	2012	2011
	<i>(Dollars in thousands)</i>	
Balance, beginning of period	\$ 59,453	\$ 101,461
FDIC share of additional losses, net of recoveries	1,111	7,639
Cash received from FDIC	(18,974)	(42,179)
Net Accretion (1)	(23,027)	(7,468)
Other reductions, net	(74)	
Balance, end of period	\$ 18,489	\$ 59,453

(1) Net accretion included accelerated accretion as a result of loans being paid off in full, sold or transferred to covered OREO. Through December 31, 2012, we have submitted claims to the FDIC for losses on covered loans totaling \$123.3 million.

Table of Contents**Other Assets**

Other assets were comprised of the following as of December 31, 2012, and 2011, respectively:

	As of December 31,	
	2012	2011
	<i>(Dollars in thousands)</i>	
Prepaid expenses	\$ 12,569	\$ 16,699
Interest rate swaps	23,966	20,497
Other assets	8,192	7,477
 Total	 \$ 44,727	 \$ 44,673

Included in prepaid expenses are prepaid FDIC insurance assessments of \$8.4 million and \$12.2 million at December 31, 2012 and 2011, respectively.

9. PREMISES AND EQUIPMENT

Premises and equipment as of the dates indicated were as follows:

	As of December 31,	
	2012	2011
	<i>(Dollars in thousands)</i>	
Land	\$ 8,329	\$ 7,661
Bank premises	47,156	46,270
Furniture and equipment	38,498	38,205
 Premises and equipment, gross	 93,983	 92,136
Accumulated depreciation and amortization	(58,903)	(55,856)
 Premises and equipment, net	 \$ 35,080	 \$ 36,280

Leases

The Company leases land and buildings under operating leases for varying periods extending to 2020, at which time the Company can exercise options that could extend certain leases through 2034. The future minimum annual rental payments required for leases that have initial or remaining noncancelable lease terms in excess of one year as of December 31, 2012, excluding property taxes and insurance, are as follows:

	As of December 31, 2012	
Year:	<i>(Dollars in thousands)</i>	
2013	\$	4,861
2014		4,114
2015		3,347
2016		2,597
2017		1,777
Succeeding years		2,676
 Total minimum payments required	 \$	 19,372

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Total rental expense for the Company was approximately \$5.6 million, \$5.8 million, and \$6.3 million for the years ended December 31, 2012, 2011, and 2010, respectively.

Table of Contents

10. INTANGIBLE ASSETS

The following summarizes activity of amortizable core deposit intangible assets for the years ended December 2012 and 2011:

	As of And For the Year Ended December 31,			
	2012		2011	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
	<i>(Dollars in thousands)</i>			
Amortizing intangible assets	\$ 31,999	\$ (28,610)	\$ 31,999	\$ (26,451)
Aggregate amortization expense:				
For year ended December 31,	\$ 2,159		\$ 3,481	
Estimated Amortization Expense:				
For the year ended December 31, 2013	\$ 1,127			
For the year ended December 31, 2014	475			
For the year ended December 31, 2015	437			
For the year ended December 31, 2016	395			
For the year ended December 31, 2017	366			
Thereafter	589			

At December 31, 2012 the weighted average remaining life of intangible assets is approximately 1.54 years.

11. INCOME TAXES

Income tax expense consists of the following:

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(Dollars in thousands)</i>

Table of Contents

A reconciliation of the statutory income tax rate to the consolidated effective income tax rate follows:

	For the Year Ended December 31,					
	2012		2010		2009	
	Amount	Percent	Amount	Percent	Amount	Percent
	<i>(Dollars in thousands)</i>					
Federal income tax at statutory rate	\$ 40,143	35.0%	\$ 42,281	35.0%	\$ 30,359	35.0%
State franchise taxes, net of federal benefit	8,081	7.0%	8,512	7.0%	6,112	7.0%
Tax-exempt income	(10,654)	(9.3%)	(11,234)	(9.3%)	(11,874)	(13.7%)
Tax credits	(1,279)	(1.1%)	(1,487)	(1.2%)	(1,427)	(1.6%)
Other, net	1,122	1.0%	999	0.8%	634	0.7%
Provision for income taxes	\$ 37,413	32.6%	\$ 39,071	32.3%	\$ 23,804	27.4%

The change in unrecognized tax benefits in 2012 and 2011 follows:

	For the Year Ended December 31,	
	2012	2011
	<i>(Dollars in thousands)</i>	
Balance, beginning of period	\$ 1,279	\$ 1,279
Additions for tax positions related to prior years		
Reductions due to lapse of statute of limitations		
Settlement with tax authorities	(390)	
Balance, end of period	\$ 889	\$ 1,279

The total amount of unrecognized tax benefits at December 31, 2012, of \$889,000 would, if recognized, affect the effective tax rate. The amount accrued for payment of interest as of December 31, 2012 and 2011 was \$241,000 and \$298,000, respectively. We record interest and penalties related to uncertain tax positions as part of other operating expense. We do not expect the total amount of unrecognized tax benefits to significantly increase or decrease within the next twelve months.

The Company is subject to federal income tax and franchise tax of the state of California. Our federal income tax returns for the years ended December 31, 2007, through 2012 are open to audit by the federal authorities and our California state tax returns for the years ended December 31, 2006, through 2012 are open to audit by state authorities.

12. DEPOSITS

The composition of deposits is as follows:

	As of December 31,			
	2012		2011	
	<i>(Dollars in thousands)</i>			
Noninterest bearing deposits				
Demand deposits	\$ 2,420,993	50.7%	\$ 2,027,876	44.0%
Interest-bearing deposits				
Savings deposits	1,638,827	34.3%	1,739,522	37.8%
Time deposits	714,167	15.0%	837,150	18.2%
Total deposits	\$ 4,773,987	100.0%	\$ 4,604,548	100.0%

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Time certificates of deposit with balances of \$100,000 or more amounted to approximately \$640.0 million and \$744.5 million at December 31, 2012 and 2011, respectively. Interest expense on such deposits amounted to approximately \$1.5 million, \$2.5 million, and \$6.9 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Table of Contents

At December 31, 2012, the scheduled maturities of time certificates of deposit are as follows:

Year of maturity:	December 31, 2012 <i>(Dollars in thousands)</i>
2013	\$ 697,878
2014	7,967
2015	4,171
2016	522
2017 and thereafter	3,629
Total	\$ 714,167

At December 31, 2012, the Company had a single public depositor with certificates of deposit balances of approximately \$240.0 million. These certificates mature January through April 2013.

13. BORROWINGS

During 2009 and 2008, the Bank entered into borrowing agreements with the FHLB. The Bank had \$198.9 million of a term FHLB advance at December 31, 2012 with an interest rate of 4.52% and \$448.7 million at December 31, 2011 with a weighted average rate of 3.89%. FHLB held certain investment securities and loans of the Bank as collateral for those borrowings. The average outstanding balance for 2012 and 2011 was \$362.7 million and \$548.0 million, respectively. The maximum outstanding at any month-end was \$448.8 million during 2012 and \$548.6 million during 2011.

At December 31, 2012, we had \$26.0 million of overnight borrowings with the FHLB at a cost of 12 basis points.

At December 31, 2012, \$2.32 billion of loans and \$2.24 billion of investment securities, at carrying value, were pledged to secure public deposits, short and long-term borrowings, and for other purposes as required or permitted by law.

The Bank incurred prepayment penalties on borrowings of \$20.4 million in 2012, \$3.3 million in 2011 and \$18.7 million in 2010.

In November 2006, we began a repurchase agreement product with our customers. This product, known as Citizens Sweep Manager, sells our securities overnight to our customers under an agreement to repurchase them the next day. As of December 31, 2012 and 2011, total funds borrowed under these agreements were \$473.2 million and \$509.4 million, respectively, with weighted average interest rates of 0.28% and 0.35%.

The future contractual maturity of the term FHLB advance as of December 31, 2012 is as follows:

Year of maturity:	December 31, 2012 <i>(Dollars in thousands)</i>
2013	\$
2014	
2015	
2016	200,000
2017	
Thereafter	
Total borrowed funds	\$ 200,000

Table of Contents
14. JUNIOR SUBORDINATED DEBENTURES

On December 15, 2003, CVB Statutory Trust II completed a \$40,000,000 offering of Trust Preferred Securities and used the gross proceeds from the offering and other cash totaling \$41,238,000 to purchase a like amount of junior subordinated debenture of the Company. The junior subordinated debenture was issued concurrent with the issuance of the Trust Preferred Securities. The interest on junior subordinated debenture, paid by the Company to CVB Statutory Trust II, represents the sole revenues of CVB Statutory Trust II and the sole source of dividend distribution to the holders of the Trust Preferred Securities. The Company has fully and conditionally guaranteed all of CVB Statutory Trust II's obligations under the Trust Preferred Securities. The Company has the right, assuming no default has occurred, to defer payments of interest on the junior subordinated debenture at any time for a period not to exceed 20 consecutive quarters. The Trust Preferred Securities will mature on January 7, 2034, but became callable in part or in total on January 7, 2009 by CVB Statutory Trust II. The Trust Preferred Securities had a fixed interest rate of 6.46% during the first five years. In January 2009, the interest rate changed to floating rate of three-month Libor rate plus 2.85% and resets quarterly. As of December 31, 2012, these securities were outstanding. On January 7, 2013, the Company consummated the partial redemption of capital and common securities issued by the Trust in the principal amount of \$20.6 million.

On January 31, 2006, CVB Statutory Trust III completed a \$25,000,000 offering of Trust Preferred Securities and used the gross proceeds from the offering and other cash totaling \$25,774,000 to purchase a like amount of junior subordinated debenture of the Company. The junior subordinated debenture was issued concurrent with the issuance of the Trust Preferred Securities. The interest on junior subordinated debenture, paid by the Company to CVB Statutory Trust III, represents the sole revenues of CVB Statutory Trust III and the sole source of dividend distribution to the holders of the Trust Preferred Securities. The Company has fully and conditionally guaranteed all of CVB Statutory Trust III's obligations under the Trust Preferred Securities. The Company has the right, assuming no default has occurred, to defer payments of interest on the junior subordinated debenture at any time for a period not to exceed 20 consecutive quarters. The Trust Preferred Securities will mature on March 15, 2036, but became callable in part or in total on March 15, 2011 by CVB Statutory Trust III. The Trust Preferred Securities have a variable per annum rate equal to LIBOR (as defined in the indenture dated as of January 31, 2006 ("Indenture")) between the Company and U.S. Bank National Association, as debenture trustee) plus 1.38% (the "Variable Rate"). As of December 31, 2012, these securities continue to be outstanding.

15. COMMITMENTS AND CONTINGENCIES***Commitments***

At December 31, 2012 and 2011, the Company had commitments to extend credit of approximately \$512.1 million and \$585.2 million, respectively, and obligations under letters of credit of \$42.2 million and \$66.8 million, respectively. Commitments to extend credit are agreements to lend to customers, provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Commitments are generally variable rate, and many of these commitments are expected to expire without being drawn upon. As such, the total commitment amounts do not necessarily represent future cash requirements. The Bank uses the same credit underwriting policies in granting or accepting such commitments or contingent obligations as it does for on-balance-sheet instruments, which consist of evaluating customers' creditworthiness individually. The Company has a reserve for undisbursed commitments of \$8.6 million as of December 31, 2012 and \$9.6 million as of December 31, 2011.

Standby letters of credit written are conditional commitments issued by the Bank to guarantee the financial performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. When deemed necessary, the Bank holds appropriate collateral supporting those commitments. Management does not anticipate any material losses as a result of these transactions.

The Company has available lines of credit totaling \$2.63 billion from correspondent banks, FHLB and Federal Reserve Bank of which \$2.18 billion were secured.

Other Contingencies

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. Where appropriate, we establish reserves in accordance with FASB guidance over contingencies (ASC 450). The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect on our liquidity, consolidated financial position, and/or results of operations. As of December 31, 2012, the Company does not have any litigation reserves.

In addition, the Company is involved in the following significant legal actions and complaints.

Table of Contents

On July 26, 2010, we received a subpoena from the Los Angeles office of the SEC regarding the Company's allowance for credit loss methodology, loan underwriting guidelines, methodology for grading loans, and the process for making provisions for loan losses. In addition, the subpoena requested information regarding certain presentations Company officers have given or conferences Company officers have attended with analysts, brokers, investors or prospective investors. We have fully cooperated with the SEC in its investigation, and we will continue to do so to the extent any further information is requested. We cannot predict the timing or outcome of the investigation.

In the wake of the Company's disclosure of the SEC investigation, on August 23, 2010, a purported shareholder class action complaint was filed against the Company in an action captioned *Lloyd v. CVB Financial Corp., et al.*, Case No. CV 10-06256-MMM, in the United States District Court for the Central District of California. Along with the Company, Christopher D. Myers (President and Chief Executive Officer) and Edward J. Biebrich, Jr. (our former Chief Financial Officer) were also named as defendants. On September 14, 2010, a second purported shareholder class action complaint was filed against the Company in an action originally captioned *Englund v. CVB Financial Corp., et al.*, Case No. CV 10-06815-RGK, in the United States District Court for the Central District of California. The Englund complaint named the same defendants as the Lloyd complaint and made allegations substantially similar to those included in the Lloyd complaint. On January 21, 2011, the Court consolidated the two actions for all purposes under the Lloyd action now captioned as Case No. CV 10-06256-MMM (PJWx). That same day, the Court also appointed the Jacksonville Police and Fire Pension Fund (the "Jacksonville Fund") as lead plaintiff in the consolidated action and approved the Jacksonville Fund's selection of lead counsel for the plaintiffs in the consolidated action. On March 7, 2011, the Jacksonville Fund filed a consolidated complaint naming the same defendants and alleging violations by all defendants of Section 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder and violations by the individual defendants of Section 20(a) of the Exchange Act. Specifically, the complaint alleges that defendants misrepresented and failed to disclose conditions adversely affecting the Company throughout the purported class period, which is alleged to be between October 21, 2009 and August 9, 2010. The consolidated complaint seeks compensatory damages and other relief in favor of the purported class.

Following the filing by each side of various motions and memoranda and a hearing on August 29, 2011, the District Court issued a ruling on January 12, 2012, granting defendants' motion to dismiss the consolidated complaint, but the ruling provided the plaintiffs with leave to file an amended complaint within 45 days of the date of the order. On February 27, 2012, the plaintiffs filed a first amended complaint against the same defendants, and once again, following filings by both sides and another hearing on June 4, 2012, the District Court issued a ruling on August 21, 2012, granting defendants' motion to dismiss the first amended complaint, but providing the plaintiffs with leave to file another amended complaint within 30 days of the ruling. On September 20, 2012, the plaintiffs filed a second amended complaint against the same defendants, and the Company filed its third motion to dismiss on October 25, 2012. The District Court has taken the Company's third motion to dismiss under Submission, and the Company intends to continue to vigorously contest the plaintiff's allegations in this case.

On February 28, 2011, a purported and related shareholder derivative complaint was filed in an action captioned *Sanderson v. Borba, et al.*, Case No. CIVRS1102119, in California State Superior Court in San Bernardino County. The complaint names as defendants the members of our board of directors and also refers to unnamed defendants allegedly responsible for the conduct alleged. The Company is included as a nominal defendant. The complaint alleges breaches of fiduciary duties, abuse of control, gross mismanagement and corporate waste. Specifically, the complaint alleges, among other things, that defendants engaged in accounting manipulations in order to falsely portray the Company's financial results in connection with its commercial real estate portfolio. Plaintiff seeks compensatory and exemplary damages to be paid by the defendants and awarded to the Company, as well as other relief. On June 20, 2011, defendants filed a demurrer requesting dismissal of the derivative complaint. Following the filing by each side of additional motions, the parties have subsequently filed repeated notices to postpone the Court's hearing on the defendants' demurrer, pending resolution of the federal securities shareholder class action complaint and these postponements are currently extended to at least September 11, 2013.

Because the outcome of these proceedings is uncertain, we cannot predict any range of loss or even if any loss is probable related to the actions described above.

16. DEFERRED COMPENSATION PLANS

As a result of the acquisition of Citizens Commercial Trust and Savings Bank of Pasadena (CCT&SB) in 1996, the Bank assumed deferred compensation and salary continuation agreements with several former employees of CCT&SB. These agreements call for periodic payments at the retirement of such employees who have normal retirement dates through 2021. In connection with these agreements, the Bank assumed life insurance policies, which it intends to use to fund the related liability. Benefits paid to retirees amounted to approximately \$60,000 in 2012, and \$106,000 in each of 2011 and 2010.

The Bank also assumed a death benefit program for certain former employees of CCT&SB, under which the Bank will provide benefits to the former employees' beneficiaries: 1) in the event of death while employed by the Bank; 2) after termination of employment for total and permanent disability; 3) after retirement, if retirement occurs after age 65. Amounts

Table of Contents

are to be paid to the former employees' beneficiaries over a 10-year period in equal installments. Further, the Bank assumed life insurance policies to fund any future liability related to this program. Amounts paid for the benefit of retirees totaled approximately \$45,000 in each of 2012, 2011 and 2010.

The Company assumed certain deferred compensation and salary continuation agreements as a result of the merger with Orange National Bancorp (ONB) in 1999. These agreements called for periodic payments over 180 months in the event that ONB experienced a merger, acquisition, or other act wherein the employees were not retained in similar positions with the surviving company. Amounts paid under these agreements totaled approximately \$60,000 in each of 2012, 2011 and 2010.

The Company assumed certain deferred compensation and salary continuation agreements as a result of the merger with Western Security Bank (WSB) in 2002. These agreements called for periodic payments over 180 months in the event that WSB experienced a merger, acquisition, or other act wherein the employees were not retained in similar positions with the surviving company. Amounts paid under these agreements totaled approximately \$636,000 in each of 2012, 2011 and 2010.

In 2003, the Company acquired Kaweah National Bank (KNB) which had severance arrangements with several of its officers should they not retain a similar position upon a change of control. These monies totaling \$879,000 were paid into a Rabbi Trust by KNB prior to the closing of the acquisition. As a result, there is no effect on net earnings. Amounts paid under these agreements totaled approximately \$80,000 in 2012, \$70,200 in 2011, and \$118,950 in 2010.

In February 2006, the Company acquired Granite State Bank (GSB) which had a severance arrangement with an officer should he not retain a similar position upon a change of control. The total of \$1.2 million was paid into a Rabbi Trust by GSB prior to the closing of the acquisition. As a result, there is no effect on net earnings. During 2011, we began making payments under this agreement. Payments pursuant to this agreement totaled \$80,000 in each of 2012, and 2011.

The total expense recorded under these deferred compensation agreements was \$494,000 in 2012, \$473,000 in 2011, and \$494,000 in 2010.

On December 22, 2006, the Company approved a deferred compensation plan for its President and Chief Executive Officer, Christopher D. Myers. Under the Plan, which became effective on January 1, 2007, Mr. Myers may defer up to 75% of his base salary and up to 100% of his bonus for each calendar year in which the Plan is effective. The Company has the discretion to make additional contributions to the Plan for the benefit of Mr. Myers. No discretionary payments were made by the Company in 2010, 2011 or 2012.

On March 31, 2007, the Company approved the Executive Non-qualified Excess Plan, a deferred compensation plan for certain management employees to provide a means by which they may elect to defer receipt of compensation in order to provide retirement benefits. The Plan is intended to be unfunded and primarily serve the purpose of providing deferred compensation benefits for a select group of employees. The amounts funded by employees totaled \$1.1 million as of December 31, 2012.

17. 401(k) AND PROFIT-SHARING PLAN

The Bank sponsors a 401(k) and profit-sharing plan for the benefit of its employees. Employees are eligible to participate in the plan immediately upon hire. Employees may make contributions to the plan under the plan's 401(k) component. The Bank contributes 3%, non-matching, to the plan to comply with ERISA's safe harbor provisions. The Bank may make additional contributions under the plan's profit-sharing component, subject to certain limitations. The Bank's total contributions are determined by the Board of Directors and amounted to approximately \$2.4 million in 2012, \$2.7 million in 2011 and \$1.5 million in 2010.

18. EQUITY AND EARNINGS PER SHARE RECONCILIATION

Earnings Per Common Share Reconciliation

Basic earnings per common share are computed by dividing income allocated to common stockholders by the weighted-average number of common shares outstanding during each period. The computation of diluted earnings per common share considers the number of tax-effected shares issuable upon the assumed exercise of outstanding common stock options. The table below shows earnings per common share and diluted earnings per common share and reconciles the numerator and denominator of both earnings per common share calculations.

Table of Contents

	For the Year Ended December 31,		
	2012	2011	2010
	<i>(In thousands, except per share amounts)</i>		
Earnings per common share:			
Net earnings	\$ 77,280	\$ 81,733	\$ 62,935
Less: Net earnings allocated to restricted stock	247	292	217
Net earnings allocated to common shareholders (numerator)	\$ 77,033	\$ 81,441	\$ 62,718
Weighted average shares outstanding (denominator)	104,419	105,143	105,880
Earnings per common share	\$ 0.74	\$ 0.77	\$ 0.59
Diluted earnings per common share:			
Net income allocated to common shareholders (numerator)	\$ 77,033	\$ 81,441	\$ 62,718
Weighted average shares outstanding	104,419	105,143	105,880
Incremental shares from assumed exercise of outstanding options	239	80	246
Diluted weighted average shares outstanding (denominator)	104,658	105,223	106,126
Diluted earnings per common share	\$ 0.74	\$ 0.77	\$ 0.59

19. STOCK OPTION PLANS AND RESTRICTED STOCK AWARDS

In May 2008, the shareholders approved the 2008 Equity Incentive Plan which authorizes the issuance of up to 3,949,891 shares of Company common stock for grants of stock options and restricted stock to employees, officers, consultants and directors of the Company and its subsidiaries, and expires in 2018. The plan authorizes the issuance of incentive and non-qualified stock options, as well as, restricted stock awards. The 2008 Equity Incentive Plan replaced the 2000 Stock Option Plan. No further grants will be made under the 2000 Stock Option Plan, but shares may continue to be issued under such plan pursuant to grants previously made. As of December 31, 2012, we have 1,016,586 outstanding options under our 2000 Stock Option Plan.

Stock Options

The Company expensed \$1.1 million, \$1.1 million, and \$1.4 million for the years ended December 31, 2012, 2011 and 2010 respectively.

The estimated fair value of the options granted during 2012 and prior years was calculated using the Black-Scholes options pricing model. There were 248,000, 31,000 and 397,000 options granted during 2012, 2011, and 2010, respectively. The options will vest, in equal installments, over a five-year period. The fair value of each stock option granted in 2012, 2011, and 2010 was estimated on the date of grant using the following weighted-average assumptions:

	For the Year Ended December 31,		
	2012	2011	2010
Dividend yield	2.9%	3.8%	4.1%
Volatility	51.0%	50.3%	49.1%
Risk-free interest rate	1.1%	1.3%	1.6%
Expected life	6.8 years	7.0 years	7.4 years
Weighted average grant date fair value	\$ 4.44	\$ 3.07	\$ 2.76

The expected volatility is solely based on the daily historical stock price volatility over the expected option life. The expected life of options granted is derived from the output of the option valuation model and represents the period of time an optionee will hold an option before exercising it. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury five-year constant maturity yield curve in effect at the time of the grant.

Table of Contents

Option activity under the Company's stock option plans as of and for the year ended December 31, 2012 was as follows:

	Number of Stock Options Outstanding <i>(In thousands)</i>	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term <i>(in Years)</i>	Aggregate Intrinsic Value <i>(In thousands)</i>
Outstanding at January 1, 2012	2,865	\$ 10.41		
Granted	248	11.71		
Exercised	(292)	8.74		
Forfeited or expired	(217)	11.26		
Outstanding at December 31, 2012	2,604	\$ 10.66	4.75	\$ 2,296
Vested or expected to vest at December 31, 2012	2,470	\$ 10.72	4.60	\$ 2,120
Exercisable at December 31, 2012	1,861	\$ 11.09	3.58	\$ 1,369

The weighted-average grant-date fair value of options granted was \$4.44, \$3.07 and \$2.76 for 2012, 2011, and 2010, respectively. The total intrinsic value of options exercised during the year ended 2012, 2011 and 2010 was \$618,000, \$20,000 and \$1.2 million, respectively. The Company estimates its forfeiture rates based on its historical experience. The forfeiture rate for 2012 was 6.0%.

As of December 31, 2012, there was \$1.7 million of total unrecognized compensation cost related to nonvested options granted under the Plan. That cost is expected to be recognized over a weighted-average period of approximately 2.98 years. The total fair value of options vested was \$1.1 million during 2012, \$1.5 million in 2011 and \$1.5 million during 2010. Cash received from stock option exercises was \$2.6 million, \$59,000, and \$1.5 million in 2012, 2011, and 2010, respectively.

At December 31, 2012, options for the purchase of 2,603,942 shares of Company common stock were outstanding under the above plans, of which options to purchase 1,861,342 shares were exercisable at prices ranging from \$7.68 to \$15.53.

The Company has a policy of issuing new shares to satisfy share option exercises.

Restricted Stock

Under the 2008 Equity Incentive Plan, we granted 173,000 restricted stock awards during 2012. We did not grant restricted stock awards in 2011. The weighted average grant date fair value of restricted stock awards granted in 2012 was \$11.10 per share. These awards will vest, in equal installments, over a five-year period.

Compensation cost is recognized over the requisite service period, which is five years, and amounted to \$911,000, \$1.1 million and \$775,000 during the years ended December 31, 2012, 2011 and 2010, respectively. Total unrecognized compensation cost related to restricted stock awards was \$2.3 million at December 31, 2012.

A summary of the Company's non-vested restricted shares as of December 31, 2012 and changes during the year ended December 31, 2012, is presented below:

	Shares <i>(In thousands)</i>	Weighted Average Fair Value
Nonvested at January 1, 2012	305	\$ 8.47
Granted	173	11.10
Vested	(94)	8.54
Forfeited	(54)	10.07

Nonvested at December 31, 2012	330	\$	9.57
--------------------------------	-----	----	------

Under the 2008 Equity Incentive Plan, 1,589,127 shares of common stock were available for the granting of future options and restricted stock awards as of December 31, 2012.

20. REGULATORY MATTERS

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct, material

Table of Contents

effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgment by the regulators about components, risk-weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (primarily common stock and retained earnings, less goodwill) to risk-weighted assets, and of Tier 1 capital to average assets. Management believes that, as of December 31, 2012 and 2011, the Company and the Bank meet all capital adequacy requirements to which they are subject.

As of December 31, 2012 and 2011, the most recent notifications from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage (tangible Tier 1 capital divided by average total assets) ratios as set forth in the table below must be maintained. There are no conditions or events since said notification that management believes have changed the Bank's category.

As of December 31, 2012 and 2011, the Company had \$65.0 million and \$111.6 million of trust-preferred securities, which were included in Tier 1 capital for regulatory purposes. The actual amount and capital ratios of the Company and the Bank at December 31 are as follows:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2012:						
Total Capital (to Risk-Weighted Assets)						
Company	\$ 776,101	19.49%	\$ 318,564	³ 8.00%		N/A
Bank	\$ 756,954	19.03%	\$ 318,215	³ 8.00%	\$ 397,769	³ 10.00%
Tier I Capital (to Risk-Weighted Assets)						
Company	\$ 725,702	18.23%	\$ 159,232	³ 4.00%		N/A
Bank	\$ 706,611	17.77%	\$ 159,057	³ 4.00%	\$ 238,586	³ 6.00%
Tier I Capital (to Average-Assets)						
Company	\$ 725,702	11.50%	\$ 252,418	³ 4.00%		N/A
Bank	\$ 706,611	11.21%	\$ 252,136	³ 4.00%	\$ 315,170	³ 5.00%
As of December 31, 2011:						
Total Capital (to Risk-Weighted Assets)						
Company	\$ 774,809	19.05%	\$ 325,379	³ 8.00%		N/A
Bank	\$ 756,702	18.63%	\$ 324,939	³ 8.00%	\$ 406,174	³ 10.00%
Tier I Capital (to Risk-Weighted Assets)						
Company	\$ 723,329	17.79%	\$ 162,637	³ 4.00%		N/A
Bank	\$ 705,273	17.36%	\$ 162,505	³ 4.00%	\$ 243,758	³ 6.00%
Tier I Capital (to Average-Assets)						
Company	\$ 723,329	11.19%	\$ 258,563	³ 4.00%		N/A
Bank	\$ 705,273	10.92%	\$ 258,342	³ 4.00%	\$ 322,927	³ 5.00%

In addition, California Banking Law limits the amount of dividends a bank can pay without obtaining prior approval from bank regulators. Under this law, the Bank could, as of December 31, 2012, declare and pay additional dividends of approximately \$45.2 million.

Table of Contents
21. FAIR VALUE INFORMATION***Fair Value Hierarchy***

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

The following disclosure provides the fair value information for financial assets and liabilities as of December 31, 2012. The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels (Level 1, Level 2, and Level 3).

Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flows and similar techniques.

There were no transfers in and out of Level 1 and Level 2 measurement during 2012 and 2011.

Determination of Fair Value

The following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at fair value.

Cash and Cash Equivalents The carrying amount of cash and cash equivalents is considered to approximate fair value due to the liquidity of these instruments.

Interest-Bearing Balances Due from Depository Institutions The carrying value of due from depository institutions is considered to approximate fair value due to the short-term nature of these deposits.

FHLB Stock The carrying amount of FHLB stock approximates fair value, as the stock may be sold back to the FHLB at carrying value.

Investment Securities Held-to-Maturity Investment securities held-to-maturity are valued based upon quotes obtained from an independent third-party pricing service. The Company categorized its held-to-maturity investment as a level 3 valuation.

Investment Securities Available-for-Sale Investment securities available-for-sale are generally valued based upon quotes obtained from an independent third-party pricing service. This service uses evaluated pricing applications and model processes. Observable market inputs, such as, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data are considered as part of the evaluation. The inputs are related directly to the security being evaluated, or indirectly to a similarly situated security. Market assumptions and market data are utilized in the valuation models. The Company reviews the market prices provided by the third-party pricing service for reasonableness based on the Company's understanding of the market place and credit issues related to the securities. The Company has not made any adjustments to the market quotes provided by them and accordingly, the Company categorized its investment portfolio within Level 2 of the fair value hierarchy.

Loans Held-for-Sale For loans held-for-sale, carrying value approximated fair value as the loans are recorded at the lower of cost or carrying market value (based on appraisals).

Edgar Filing: CVB FINANCIAL CORP - Form 10-K

Non-Covered Loans The carrying amount of loans and lease finance receivables is their contractual amounts outstanding, reduced by deferred net loan origination fees and the allocable portion of the allowance for credit losses.

The fair value of loans, other than loans on nonaccrual status, was estimated by discounting the remaining contractual cash flows using the estimated current rate at which similar loans would be made to borrowers with similar credit risk characteristics and for the same remaining maturities, reduced by deferred net loan origination fees and the allocable portion of the allowance for credit losses. Accordingly, in determining the estimated current rate for discounting purposes, no adjustment has been made for any change in borrowers' credit risks since the origination of such loans. Rather, the allocable portion of the allowance for credit losses is considered to provide for such changes in estimating fair value. As a result, this fair value is not necessarily the value which would be derived using an exit price. These loans are included within Level 3 of the fair value hierarchy.

Table of Contents

Non-covered impaired loans and OREO are generally measured using the fair value of the underlying collateral, which is determined based on the most recent appraisal information received, less costs to sell (approximately 8%). Appraised values may be adjusted based on factors such as the changes in market conditions from the time of valuation or discounted cash flows of the property. As such, these loans and OREO fall within Level 3 of the fair value hierarchy.

The majority of our commitments to extend credit carry current market interest rates if converted to loans. Because these commitments are generally unassignable by either the borrower or us, they only have value to the borrower and us. The estimated fair value approximates the recorded deferred fee amounts and is excluded from the following table because it is not material.

Covered Loans Covered loans were measured at fair value on the date of acquisition. Thereafter, covered loans are not measured at fair value on a recurring basis. The above valuation discussion for non-covered loans is applicable to covered loans following their acquisition date.

Swaps The fair value of the interest rate swap contracts are provided by our counterparty using a system that constructs a yield curve based on cash LIBOR rates, Eurodollar futures contracts, and 3-year through 30-year swap rates. The yield curve determines the valuations of the interest rate swaps. Accordingly, the swap is categorized as a Level 2 valuation.

Deposits & Borrowings The amounts payable to depositors for demand, savings, and money market accounts, and short-term borrowings are considered to approximate fair value. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value of long-term borrowings and junior subordinated debentures is estimated using the rates currently offered for borrowings of similar remaining maturities. Interest-bearing deposits and borrowings are included within Level 2 of the fair value hierarchy.

Accrued Interest Receivable/Payable The amounts of accrued interest receivable on loans and lease finance receivables and investments and accrued interest payable on deposits and borrowings are considered to approximate fair value and are included within Level 2 of the fair value hierarchy.

The tables below presents the balances of assets and liabilities measured at fair value on a recurring basis as of December 31, 2012 and 2011.

Assets & Liabilities Measured at Fair Value on a Recurring Basis

We may be required to measure certain assets at fair value on a non-recurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets. For assets measured at fair value on a non-recurring basis that were still held on the balance sheet at December 31, 2012 and December 31, 2011, respectively, the following tables provide the level of valuation assumptions used to determine each adjustment and the carrying value of the related assets for investments with losses during the period.

Assets & Liabilities Measured at Fair Value on a Non-Recurring Basis

Description of Assets	Carrying Value at December 31, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	For the Year Ended December 31, 2012 Total Losses

The following disclosure presents estimated fair value of financial instruments. The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to develop the estimates of fair value. Accordingly, the estimates presented below are not necessarily indicative of the amounts the Company could have realized in a current market exchange as of December 31, 2012 and 2011, respectively. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The fair value estimates presented herein are based on pertinent information available to management as of December 31, 2012 and 2011. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and therefore, current estimates of fair value may differ significantly from the amounts presented above.

Table of Contents**22. BUSINESS SEGMENTS**

The Company has identified two principal reportable segments: Business Financial and Commercial Banking Centers (Centers) and the Treasury Department. The Company's subsidiary bank has 41 Business Financial Centers and five Commercial Banking Centers organized in geographic regions, which are the focal points for customer sales and services. The Company utilizes an internal reporting system to measure the performance of various operating segments within the Bank which is the basis for determining the Bank's reportable segments. The chief operating decision maker (currently our CEO) regularly reviews the financial information of these segments in deciding how to allocate resources and assessing performance. Business Financial and Commercial Banking Centers are considered one operating segment as their products and services are similar and are sold to similar types of customers, have similar production and distribution processes, have similar economic characteristics, and have similar reporting and organizational structures. The Treasury Department's primary focus is managing the Bank's investments, liquidity, and interest rate risk. Information related to the Company's remaining operating segments, which include construction lending, dairy and livestock lending, SBA lending, leasing, and centralized functions have been aggregated and included in Other. In addition, the Company allocates internal funds transfer pricing to the segments using a methodology that charges users of funds interest expense and credits providers of funds interest income with the net effect of this allocation being recorded in administration.

The following table represents the selected financial information for these two business segments. GAAP does not have an authoritative body of knowledge regarding the management accounting used in presenting segment financial information. The accounting policies for each of the business units is the same as those policies identified for the consolidated Company and identified in the summary of significant accounting policies, Note 3. The income numbers represent the actual income and expenses of each business unit. In addition, each segment has allocated income and expenses based on management's internal reporting system, which allows management to determine the performance of each of its business units. Loan fees, included in the Centers category are the actual loan fees paid to the Company by its customers. These fees are eliminated and deferred in the Other category, resulting in deferred loan fees for the consolidated financial statements. All income and expense items not directly associated with the two business segments are grouped in the Other category. Future changes in the Company's management structure or reporting methodologies may result in changes in the measurement of operating segment results.

The following tables present the operating results and other key financial measures for the individual operating segments for the periods indicated:

Table of Contents**23. DERIVATIVE FINANCIAL INSTRUMENTS**

The Bank is exposed to certain risks relating to its ongoing business operations and utilizes interest rate swap agreements (swaps) as part of its asset liability management strategy to help manage its interest rate risk position. As of December 31, 2012, the Bank entered into 88 interest-rate swap agreements with customers and 88 with a counterparty bank. The swap agreements are not designated as hedging instruments. The purpose of entering into offsetting derivatives not designated as a hedging instrument is to provide the Bank a variable-rate loan receivable and provide the customer the financial effects of a fixed-rate loan without creating volatility in the Bank's earnings.

The structure of the swaps is as follows. The Bank enters into a swap with its customers to allow them to convert variable rate loans to fixed rate loans, and at the same time, the Bank enters into a swap with the counterparty bank to allow the Bank to pass on the interest-rate risk associated with fixed rate loans. The net effect of the transaction allows the Bank to receive interest on the loan from the customer at a variable rate based on LIBOR plus a spread. The changes in the fair value of the swaps primarily offset each other and therefore should not have a significant impact on the Company's results of operations.

We believe our risk of loss associated with our counterparty borrowers related to interest rate swaps is mitigated as the loans with swaps are underwritten to take into account potential additional exposure.

As of December 31, 2012, the total notional amount of the Company's swaps was \$240.1 million. The location of the asset and liability and the amount of gain recognized as of December 31, 2012 and 2011, and for the years ended December 31, 2012, 2011, and 2010 are presented as follows:

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

CVB Financial Corp.:

We have audited the accompanying consolidated balance sheets of CVB Financial Corp. and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of earnings and comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of CVB Financial Corp. and subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), CVB Financial Corp. and subsidiaries' internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 1, 2013 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.
