Item 1.01 Entry into a Material Definitive Agreement

On May 14, 2013, Tesla Motors, Inc. (the Company) entered into a Limited Consent and Amendment (the Amendment) to the Loan Arrangement and Reimbursement Agreement between the Company and the U.S. Department of Energy (the DOE) dated as of January 20, 2010, as amended, that, among other things, amends the Loan Arrangement and Reimbursement Agreement to permit the Company to issue convertible senior notes to fund the early repayment of the DOE loan.

The full text of the Amendment is attached hereto as Exhibit 10.1 and is incorporated herein by reference.

Item 8.01 Other Events

On May 15, 2013, the Company issued a press release announcing the concurrent public offerings of approximately 2.7 million shares of common stock and \$450 million aggregate principal amount of convertible senior notes due 2018 in concurrent underwritten registered public offerings. In addition, Tesla has granted the underwriters a 30-day option to purchase up to an additional 405,454 shares of common stock and \$67.5 million in aggregate principal amount of the notes.

Elon Musk, Chief Executive Officer and cofounder, intends to purchase shares of common stock at the same public offering price for an aggregate purchase price of \$100 million. Of this amount, approximately \$45 million would be purchased in the common stock offering, and approximately \$55 million would be purchased directly from the Company in a subsequent private placement due to the waiting period requirements of the Hart-Scott-Rodino Act.

The aggregate gross proceeds of the offerings, including the option granted to the underwriters, and the private placement is expected to be approximately \$830 million.

The press release announcing the public offerings is attached hereto as Exhibit 99.1 and is incorporated herein by reference.
