\* Certain Trusts estimate that they have distributed more than the amount of earned income and net realized gains; therefore, a portion of the distribution may be a return of capital. A return of capital may occur, for example, when some or all of the shareholder s investment in a Trust is returned to the shareholder. A return of capital does not necessarily reflect a Trust s investment performance and should not be confused with yield or income. When distributions exceed total return performance, the difference will reduce the Trust s net asset value per share.

Section 19(a) notices for the Trusts, as applicable, are available on the BlackRock website <http://www.blackrock.com>.

**Section 19(b) Disclosure**

The Trusts, acting pursuant to a U.S. Securities and Exchange Commission ( SEC ) exemptive order and with the approval of each Trust s Board of Trustees/Directors (the Board ), each have adopted a plan, consistent with its investment objectives and policies to support a level distribution of income, capital gains and/or return of capital (the Plan ). In accordance with the Plans, the Trusts distribute the following fixed amounts per share on a monthly basis as of December 31, 2016:

Exchange Symbol	Amount Per Common Share
BGR	\$0.0776
CII	\$0.0828
BDJ	\$0.0467

## Edgar Filing: BlackRock Enhanced Equity Dividend Trust - Form N-CSR

BOE	\$0.0780
BME	\$0.2000
BGY	\$0.0380
BCX	\$0.0446
BST	\$0.1000
BUI	\$0.1210

The fixed amounts distributed per share are subject to change at the discretion of each Trust's Board. Under its Plan, each Trust will distribute all available investment income to its shareholders, consistent with its primary investment objectives and as required by the Internal Revenue Code of 1986, as amended (the Code). If sufficient investment income is not available on a monthly basis, the Trusts will distribute long-term capital gains and/or return of capital to shareholders in order to maintain a level distribution. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential distribution rate increases or decreases to enable the Trusts to comply with the distribution requirements imposed by the Code.

Shareholders should not draw any conclusions about each Trust's investment performance from the amount of these distributions or from the terms of the Plan. Each Trust's total return performance on net asset value is presented in its financial highlights table.

The Board may amend, suspend or terminate a Trust's Plan at any time without prior notice to the Trust's shareholders if it deems such actions to be in the best interests of the Trust or its shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if the Trust's stock is trading at or above net asset value) or widening an existing trading discount. The Trusts are subject to risks that could have an adverse impact on their ability to maintain level distributions. Examples of potential risks include, but are not limited to, economic downturns impacting the markets, decreased market volatility, companies suspending or decreasing corporate dividend distributions and changes in the Code. Please refer to each Trust's prospectus for a more complete description of its risks.

## The Markets in Review

Dear Shareholder,

The year 2016 started on a fraught note with worries about slowing growth in China, plunging oil prices and sliding share prices. Then reflationary expectations in the United States helped drive a second-half global growth pick-up and big market reversals. As such, higher-quality asset classes such as Treasury bonds, municipals and investment grade credit prevailed in the first half of the year, only to struggle in the second. In contrast, risk assets sold off at the start of the year and rebounded in the latter half, with some asset classes posting strong year-end returns.

A key takeaway from 2016's market performance is that economics can trump politics. The global reflationary theme—governments taking policy action to support growth—was the dominant driver of 2016 asset returns, outweighing significant political upheavals and uncertainty. This trend accelerated after the U.S. election on expectations for an extra boost to U.S. growth via fiscal policy.

Markets were remarkably resilient during the year. Spikes in equity volatility after big surprises such as the U.K.'s vote to leave the European Union and the outcome of the U.S. presidential election were short-lived. Instead, political surprises and initial sell-offs were seized upon as buying opportunities. We believe this reinforces the case for taking the long view rather than reacting to short-term market noise.

Asset returns varied widely in 2016. Perceived safe assets such as government bonds and low-volatility shares underperformed the higher-risk areas of the market. And the reversal of longstanding trends created opportunities, such as in the recovery of value stocks and commodities.

We expect some of these trends to extend into 2017 and see the potential for more flows into risk assets this year. Learn more by reading our market insights at [blackrock.com](http://blackrock.com).

Sincerely,

## The Benefits and Risks of Option Over-Writing

In general, the goal of each of the Trusts is to provide total return through a combination of current income and realized and unrealized gains (capital appreciation). The Trusts seek to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to enhance the Trusts' distribution rate and total return performance. However, these objectives cannot be achieved in all market conditions.

The Trusts primarily write single stock covered call options, and may also from time to time write single stock put options. When writing (selling) a covered call option, the Trust holds an underlying equity security and enters into an option transaction which allows the counterparty to purchase the equity security at an agreed-upon price (strike price) within an agreed-upon time period. The Trusts receive cash premiums from the counterparties upon writing (selling) the option, which along with net investment income and net realized gains, if any, are generally available to support current or future distributions paid by the Trusts. During the option term, the counterparty may elect to exercise the option if the market value of the equity security rises above the strike price, and the Trust is obligated to sell the equity security to the counterparty at the strike price, realizing a gain or loss. Premiums received increase gains or reduce losses realized on the sale of the equity security. If the option remains unexercised upon its expiration, the Trusts realize gains equal to the premiums received. Alternatively, an option may be closed out by an offsetting purchase or sale of an option prior to expiration. The Trust realizes a capital gain from a closing purchase or sale transaction if the premium paid is less than the premium received from writing the option. The Trust realizes a capital loss from a closing purchase or sale transaction if the premium received is less than the premium paid to purchase the option.

Writing covered call options entails certain risks, which include, but are not limited to, the following: an increase in the value of the underlying equity security above the strike price can result in the exercise of a written option (sale by the Trust to the counterparty) when the Trust might not otherwise have sold the security; exercise of the option by the counterparty may result in a sale below the current market value and a gain or loss being realized by the Trust; and limiting the potential appreciation that could be realized on the underlying equity security to the extent of the strike price of the option. As such, an option over-writing strategy may outperform the general equity market in flat or falling markets but underperform in rising markets.

Each Trust employs a plan to support a level distribution of income, capital gains and/or return of capital. The goal of the plan is to provide shareholders with consistent and predictable cash flows by setting distribution rates based on expected long-term returns of the Trusts. Such distributions, under certain circumstances, may exceed a Trust's total return performance. When total distributions exceed total return performance for the period, the difference reduces the Trust's total assets and net asset value per share (NAV) and, therefore, could have the effect of increasing the Trust's expense ratio and reducing the amount of assets, the Trust has available for long term investment. In order to make these distributions, a Trust may have to sell portfolio securities at less than opportune times.

The final tax characterization of distributions is determined after the fiscal year and is reported in the Trust's annual report to shareholders. Distributions can be characterized as ordinary income, capital gains and/or return of capital. The Trust's taxable net investment income or net realized capital gains (taxable income) may not be sufficient to support the level of distributions paid. To the extent that distributions exceed the Trust's current and accumulated earnings and profits, the excess may be treated as a non-taxable return of capital. Distributions that exceed a Trust's taxable income but do not exceed the Trust's current and accumulated earnings and profits, may be classified as ordinary income which are taxable to shareholders. Such distributions are reported as distributions in excess of net investment income.

A return of capital distribution does not necessarily reflect a Trust's investment performance and should not be confused with yield or income. A return of capital is a return of a portion of an investor's original investment. A return of capital is not taxable, but it reduces a shareholder's tax basis in his or her shares, thus reducing any loss or increasing any gain on a subsequent disposition by the shareholder of his or her shares. It is possible that a substantial portion of the distributions paid during a calendar year may ultimately be classified as return of capital or as distributions in excess of net investment income for income tax purposes when the final determination of the source and character of the distributions is made.

To illustrate these concepts, assume the following: (1) a common stock purchased at and currently trading at \$37.15 per share; (2) a three-month call option is written by a Trust with a strike price of \$40 (i.e., 7.7% higher than the current market price); and (3) the Trust receives \$2.45, or 6.6% of the common stock's value, as a premium. If the stock price remains unchanged, the option expires and there would be a 6.6% return for the three-month period. If the stock were to decline in price by 6.6% (i.e., decline to \$34.70 per share), the option strategy would break-even from an economic perspective resulting in neither a gain nor a loss. If the stock were to climb to a price of \$40 or above, the option would be exercised and the stock would return 7.7% coupled with the option premium received of 6.6% for a total return of 14.3%. Under this scenario, the Trust loses the benefit of any appreciation of the stock above \$40, and thus is limited to a 14.3% total return. The premium from writing the call option serves to offset some of the unrealized loss on the stock in the event that the price of the stock declines, but if the stock were to decline more than 6.6% under this scenario, the Trust's downside protection is eliminated and the stock could eventually become worthless.

Trust Summary as of December 31, 2016

**BlackRock Energy and Resources Trust**

**Trust Overview**

**BlackRock Energy and Resources Trust s (BGR) (the Trust )** investment objective is to provide total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its total assets in equity securities of energy and natural resources companies and equity derivatives with exposure to the energy and natural resources industry. The Trust may invest directly in such securities or synthetically through the use of derivatives. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

No assurance can be given that the Trust s investment objective will be achieved.

Returns for the 12-month period ended December 31, 2016 were as follows:

	Returns Based On	
	Market Price	Net Asset Value
BGR <sup>1,2</sup>	24.01%	25.07%
Lipper Natural Resources Funds <sup>3</sup>	37.40%	32.14%

<sup>2</sup> The Trust s discount to NAV widened during the period, which accounts for the difference between performance based on price and performance based on NAV.

<sup>3</sup> Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles.

**The following discussion relates to the Trust's absolute performance based on NAV:**

**What factors influenced performance?**

The Trust's positions in the U.S. exploration & production companies Laredo Petroleum, Inc. and Energen Corp. were the largest detractors from performance. The investment adviser exited both positions early in the period due to its concerns about the two companies' significant financial leverage. As a result, the Trust was not in a position to benefit from their subsequent recovery.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance given the strength in the overall sector.

After losing ground in the initial weeks of the year, energy stocks rallied to close as one of the top-performing market segments of 2016. An improving balance of supply and demand for oil, together with expectations for stronger global growth, provided a firm underpinning for the sector. Consistent with the broader environment, the Trust produced a robust absolute return in the 12-month period.

Royal Dutch Shell PLC and BG Energy Holdings Ltd. completed a merger in February, whereby the Trust's substantial position in the latter stock made a positive contribution to performance.

ExxonMobil Corp., which announced a significant oil discovery off the coast of Guyana in conjunction with Hess Corp., was the largest contributor in the period. The deep-water Liza field could hold as many as 1.4 billion barrels of oil equivalent, making it one of a handful of billion-barrel discoveries in the last half-decade. Exxon found oil in the Liza field in 2015 when it drilled its first well in the area, and a second well revealed the potential for twice as much crude. ExxonMobil shares were also boosted by the significant increase in oil prices that occurred during 2016.

**BlackRock Energy and Resources Trust****Performance and Portfolio Management Commentary (concluded)****Describe recent portfolio activity.**

After holding an underweight position in the refining subsector for much of 2015, the Trust moved to reduce the extent of this underweight early in the period by adding positions in the refining stocks Valero Energy and Tesoro Corp., both of which are benefiting from strong U.S. gasoline consumption. Additionally, the Trust rotated its oil services exposure by reducing its weighting in Schlumberger Ltd. and initiating a position in Baker Hughes, Inc.

**Describe portfolio positioning at period end.**

The investment adviser positioned the Trust with a higher-quality bias, focusing on companies with robust balance sheets, below-average costs and higher-quality management teams. At the sub-sector level, the Trust remained overweight in the exploration and production industry and underweight in larger, integrated producers. The investment adviser saw the former group as being in a better position to benefit from the improving backdrop for oil prices.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. **The following discussion relates to the Trust s relative performance based on the index cited above:**

**What factors influenced performance?**

In sector terms, health care was the prime detractor from relative performance due to weakness in pharmaceuticals and, to a lesser extent, biotechnology. Consumer discretionary also weighed, in particular specialty retail and household durables, as did the Trust's underweight exposure to telecommunication services and energy. Helping to partially offset negative results was strong selection in financials, where banks were a standout. An underweight to real estate and stock selection in materials proved advantageous as well.

On a stock-specific basis, Teva Pharmaceutical Industries Ltd. was the largest single detractor. The stock underperformed amid concerns over exclusivity for the company's key drug Copaxone, as well as broad pricing pressures in the generic segment throughout the year. Earlier in the period, concerns that the Allergan deal would be delayed also weighed on the stock. The deal ultimately closed, but it was considerably later than expected, thereby depriving Teva of capturing revenue from a high volume generic launch. Teva's management turnover in the fourth quarter and a need to revise guidance twice over the last six months further contributed to negative sentiment.

## Edgar Filing: BlackRock Enhanced Equity Dividend Trust - Form N-CSR

Positions in CVS Health Corp. and Gilead Sciences Inc. were also a drag. CVS underperformed as the company lost a number of high-profile contracts to rival Walgreens (also a holding). While the value of any individual contract is small, investors were concerned that CVS's advantage may be under threat as the UnitedHealth-Walgreens Boots Alliance partnership combines UnitedHealth's PBM offering with Walgreens Boots Alliance's convenient store locations, a combination previously unique to CVS. Later in the reporting period, the company lowered its long-term guidance, causing additional share weakness. The major reason behind lower growth rates is lost scripts due to a narrow network arrangement in favor of Walgreens and pharmacy reimbursement changes. Gilead continues to execute well in its HIV business segment, but is facing significant uncertainty in the HCV (Hepatitis C) business following several years of exceptional revenue growth. The investment adviser believes that, at current levels, Gilead shares are pricing in significant revenue declines in HCV and is comfortable owning shares for eventual stabilization in the HCV segment and a likely deployment of cash toward value-creating business development opportunities.

The top individual contributors in the 12 months were Bank of America Corp. and JPMorgan Chase & Co. The stocks outperformed most notably in the second half of the reporting period on strong earnings reports led by solid fee-based revenue performance (trading, payments & mortgage), as well as the increased likelihood of a December rate hike. Bank holdings' strong price momentum continued (even accelerated) following the election of Donald Trump as investors positioned for improving future earnings power driven by higher economic growth, inflation, corporate tax reform, and interest rates (the Fed ultimately raised rates), as well as a softening of regulations that could lead to accelerating capital returns and potentially lower legal & compliance costs.

Consumer finance name SLM also added value. Shares outperformed as the bear case scenario of government subsidized tuition plans, as proposed by the Clinton campaign, was eliminated with a Trump victory. Moreover, Trump has proposed restoring private sector participation in student financing, which holds the potential to materially expand the market for private student loans, where SLM holds a dominant 50%+ market share.

**BlackRock Enhanced Capital and Income Fund, Inc.****Performance and Portfolio Management Commentary (concluded)**

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance during the period.

**Describe recent portfolio activity.**

Due to a combination of portfolio trading activity and market movement during the 12-month period, the Trust's exposure to the information technology (IT) and energy sectors increased, particularly semiconductors, software and oil, gas & consumable fuels. Materials exposure increased as well. The largest reduction was in health care, largely with respect to providers & services. Consumer discretionary exposure also declined.

**Describe portfolio positioning at period end.**

Relative to the S&P 500® Index, the Trust ended the period with its largest overweights in the IT, consumer discretionary and financials sectors. The Trust's largest relative underweights were in industrials, real estate and telecommunication services.

## Trust Summary as of December 31, 2016

## BlackRock Enhanced Equity Dividend Trust

## Trust Overview

**BlackRock Enhanced Equity Dividend Trust s (BDJ) (the Trust )** primary investment objective is to provide current income and current gains, with a secondary investment objective of long-term capital appreciation. The Trust seeks to achieve its investment objectives by investing in common stocks that pay dividends and have the potential for capital appreciation and by utilizing an option writing (selling) strategy to seek total return performance and enhance distributions. The Trust invests, under normal market conditions, at least 80% of its total assets in dividend paying equities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. **The following discussion relates to the Trust s relative performance based on the index cited above:**

**What factors influenced performance?**

The largest detractor from relative return came from a combination of stock selection and allocation decisions within the industrials sector. An underweight to the machinery and airlines industries weighed on relative performance. The Trust's underweight to machinery was predicated on the view that weak end-market fundamentals limit attractive investment opportunities in the near term. Overweight positions in General Electric Co. and Honeywell International, Inc. also detracted from relative returns. Additionally, stock selection in the consumer staples sector subtracted from relative performance. In particular, non-benchmark holding Kroger Co. lagged after lowering its earnings forecast and reporting weaker-than-consensus earnings, due in part to food price deflation and increased competition. Lastly, stock selection within the materials and information technology sectors detracted from relative return.

The largest contribution to relative performance for the 12-month period came from stock selection and allocation decisions within the financials sector. Notably, the Trust's large overweight position in the banking industry proved beneficial. Bank earnings in the second half of 2016 were generally positive and the sector's relative outperformance accelerated following the November 8 presidential election results. Stock selection in the health care sector also added to relative return. Notable outperformers in the sector included overweight positions in UnitedHealth Group, Inc. and Quest Diagnostics, Inc. UnitedHealth Group outperformed due to above-consensus growth in its Optum business and robust membership gains within its Medicare, Medicaid and commercial segments. Shares of Quest Diagnostics, a low-cost provider of laboratory services, advanced due to solid pricing growth amid the continued shift to more complex esoteric testing. Lastly, an underweight to real estate and stock selection in utilities added to relative performance.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance during the period.

**Describe recent portfolio activity.**

During the 12-month period, the Trust's exposure to the energy sector was increased by initiating new positions in Hess Corp. and Suncor Energy, Inc. Other notable new purchases included Qualcomm Inc., a manufacturer of digital wireless communications equipment, and the property & casualty insurer The Allstate Corporation. Conversely, the Trust reduced exposure to the industrials sector by exiting positions in Tyco International PLC and United Technologies Corp., as well as by trimming

its holdings in General Electric Co. and Raytheon Co. Other notable sales from the portfolio included McDonald's Corp. and Bristol-Myers Squibb Co.

## Describe portfolio positioning at period end.

Relative to the benchmark, the Trust's largest overweight positions were in the health care, financials and industrials sectors. Conversely, the Trust's largest relative underweights were in the real estate, energy and telecommunication services sectors.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. **The following discussion relates to the Trust's relative performance based on the index cited above:**

### **What factors influenced performance?**

Stock selection within the industrials and information technology ( IT ) sectors led detractors for the period. Within industrials, stock selection in the construction machinery & heavy trucks sub-industry led detractors after the Trust's position in CRRC Corp. Ltd., a Chinese transportation vehicle company, sold off sharply due to concerns around growth in the region. The downturn in the stock was exacerbated given the company's exposure to the manufacturing sector of the Chinese economy, and the Trust exited the position. Within IT, stock selection in the internet software & services sub-industry was the next largest detractor as Hortonworks, Inc. reported mixed financial results coupled with an announcement that it was planning a secondary stock offering. The market received the news of additional financing negatively given that the company's share price was trading near all-time lows. The Trust sold the position during the period and rotated into more attractive opportunities.

The Trust's underweight positioning and stock selection within the health care sector led contributors during the 12-month period. In particular, the Trust's underweight to lagging stocks such as Novo Nordisk A/S in the pharmaceuticals sub-industry added to performance. In the energy sector, the Trust's position in EOG Resources, Inc. from the oil & gas exploration & production sub-industry benefited from a strengthening in energy prices.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance during the period.

### **Describe recent portfolio activity.**

The Trust reduced exposure to the health care and industrials sectors, while increasing exposure to the energy and materials sectors. Regionally, these sector decisions resulted in reduced exposure to Europe and increased positions within North America, the Pacific Basin and the emerging markets.

## BlackRock Global Opportunities Equity Trust

## Performance and Portfolio Management Commentary (concluded)

## Describe portfolio positioning at period end.

Relative to the MSCI All Country World Index, the Fund ended the period with its largest overweights in the IT, materials and consumer discretionary sectors, and its largest underweights in the industrials, financials and health care sectors. Regionally, the Trust was most overweight in Europe and the emerging markets, funded by a large underweight to the Pacific Basin.

BlackRock Health Sciences Trust

**Trust Overview**

**BlackRock Health Sciences Trust s (BME) (the Trust )** investment objective is to provide total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in equity securities of companies engaged in the health sciences and related industries and equity derivatives with exposure to the health sciences industry. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

N/A Not applicable as the index does not have a market price.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. **The following discussion relates to the Trust s relative performance based on the index cited above:**

**What factors influenced performance?**

Health care stocks finished the year with a loss and trailed the broader market by a wide margin, due in part by concerns about increased regulatory scrutiny of pharmaceutical and biotechnology companies' pricing practices. Consistent with the overall environment, the Trust's negative absolute return was driven by its allocations to these two sub-sectors. In the former, performance was hampered by specialty pharmaceutical companies such as Allergan PLC, Teva Pharmaceuticals Ltd. and Mylan NV, combined with several non-U.S. holdings such as Roche Holding AG, AstraZeneca PLC and Bayer AG. In the biotechnology group, broader weakness pressured higher-beta small- to mid-cap positions. In addition, a number of large-cap biotechnology holdings including Vertex Pharmaceuticals, Alexion Pharmaceuticals, Inc., Gilead Sciences, Inc. and Celgene Corp. weighed on absolute returns.

The medical devices & supplies sub-sector was the largest positive contributor. Performance was particularly favorable in the health care equipment industry, where several holdings reported solid financial results. Among these were Boston Scientific Corp., Stryker Corp., St. Jude Medical, Inc., C.R. Bard, Inc., Baxter International, Inc., Edwards Lifesciences Corp. and Masimo Corp. The health care providers & services sub-sector was another large contributor to absolute performance, led by managed care stocks such as UnitedHealth Group, Inc., Humana, Inc. and Aetna, Inc.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a positive impact on performance during the period. The Trust also owned private securities during the period, although this was not a principal strategy.

**Describe recent portfolio activity.**

The Trust reduced its allocations to the pharmaceutical and biotechnology sub-sectors, while maintaining an emphasis on identifying innovative companies in these areas. The Trust increased its weightings in the medical devices & supplies and health care providers & services sub-sectors. In the latter industry, the investment adviser was focused on companies that can benefit from favorable health care policies in their respective industries.

**Describe portfolio positioning at period end.**

The Trust continued to employ a bottom-up, fundamental investment process in an effort to construct a balanced, diversified portfolio of health care stocks.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. **The following discussion relates to the Trust's relative performance based on the index cited above:**

### **What factors influenced performance?**

An underweight position in materials and negative stock selection within the sector represented the largest detractor from relative performance. The sector was one of the top performers in the benchmark and the Trust's limited exposure to the metals & mining industry was particularly detrimental to performance. In addition, an underweight to financials, combined with negative stock selection there, detracted from relative returns. Unfavorable stock selection within consumer staples also detracted from relative returns. One of the largest individual detractors during the period was the Trust's position in Worldpay Group PLC, as shares of the U.K.-based payment services company sold off during the fourth quarter.

For the period, exposure to a Japan-focused ETF provided the largest contribution to relative performance. Underweight exposures to the health care and utilities sectors also were additive, as these sectors were two of the worst performers within the benchmark. One of the largest individual contributors was Nintendo Co. Ltd., as investors reacted very positively to the release of Pokémon Go.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance during the period.

### **Describe recent portfolio activity.**

During the period, the largest change to sector positioning was a reduction in the Trust's underweight exposure to materials. This was largely driven by the addition of two new chemicals companies. In contrast, a modest overweight to health care was trimmed to a meaningful underweight, as two pharmaceutical positions were sold and two were significantly reduced. From a regional perspective, these changes resulted in increased exposure to Europe ex-U.K., particularly France and Germany, and decreased exposure to the United Kingdom.

### **Describe portfolio positioning at period end.**

Relative to the MSCI All Country World Index ex-US, the Trust's largest sector overweights were information technology (in particular software & services) and financials (especially diversified financials). In contrast, the largest sector underweights were industrials, especially the capital goods industry, and utilities. From a regional perspective, the Trust's largest overweight was in Europe, and its largest regional underweight was the Pacific Basin, mainly driven by a large underweight in Japan.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Trust Overview

**BlackRock Resources & Commodities Strategy Trust** s (BCX) (the Trust ) primary investment objective is to seek high current income and current gains, with a secondary objective of capital appreciation. The Trust will seek to achieve its investment objectives, under normal market conditions, by investing at least 80% of its total assets in equity securities issued by commodity or natural resources companies, derivatives with exposure to commodity or natural resources companies or investments in securities and derivatives linked to the underlying price movement of commodities or natural resources. While permitted, the Trust does not currently expect to invest in securities and derivatives linked to the underlying price movement of commodities or natural resources. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option overwriting strategy in an effort to seek total return performance and enhance distributions.

**The following discussion relates to the Trust's absolute performance based on NAV:**

### **What factors influenced performance?**

Within the portfolio's agriculture exposure, a position in Mosaic Co., the world's leading producer of phosphate and potash crop nutrients detracted from performance. After performing well through the first half of the year, the stock lost ground on rumors that the company would acquire the fertilizer division of Vale SA. Mosaic would have required a capital raising to fund the acquisition, and the stock price declined as a result.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance given the strength in the overall sector.

After losing ground in the initial weeks of the year, natural resources stocks rallied to close as one of the top-performing market segments of 2016. Expectations for stronger global growth, together with an improving balance of supply and demand in the commodity market, provided a firm underpinning for the sector. Consistent with the broader environment, the Trust produced a robust absolute return in the 12-month period.

The copper-mining company First Quantum Minerals Ltd. was the leading contributor to the Trust's absolute return. The company announced the sale of its Kevitsa mine for a price that exceeded the market's expectations. Later in the year, First Quantum continued to please markets when the company reported lower costs. In contrast, the majority of companies in the sector reported higher-than-expected costs.

The strong upward move in the price of coking coal had a positive impact on absolute performance by fueling gains for the Trust's positions in Rio Tinto Ltd. and Glencore PLC.

Gold experienced volatility in 2016, shifting between a high of \$1,369 per ounce and a low of \$1,062 per ounce. The metal ultimately finished the year in positive territory, and the Fund's gold exposure contributed positively to performance. A position in Barrick Gold Corp., the world's largest gold producer, was a notable contributor at the individual stock level.

### **Describe recent portfolio activity.**

The investment adviser reduced the Trust's mining exposure following the sector's strong relative performance, and it increased exposure to the energy and agriculture sectors. The Trust also shifted its energy weighting throughout the year to manage the portfolio's sensitivity to oil prices.

**BlackRock Resources & Commodities Strategy Trust****Performance and Portfolio Management Commentary (concluded)****Describe portfolio positioning at period end.**

At the end of the year, the natural resources sector remained supported by a backdrop of improving growth and expectations for rising inflation. In addition, producers' efforts at cost-cutting and greater capital spending discipline led to lower supply in 2016, bringing the commodity market back into balance. In this environment, the Trust held an overweight position in the energy sector, a neutral position in agriculture and an underweight in mining.

## Trust Summary as of December 31, 2016

## BlackRock Science and Technology Trust

## Trust Overview

**BlackRock Science and Technology Trust s (BST) (the Trust )** investment objective is to provide income and total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in equity securities of science and technology companies. The Trust seeks to pursue this goal primarily by investing in a portfolio of equity securities and utilizing an option over-writing strategy in an effort to seek total return performance and enhance distributions.

No assurance can be given that the Trust s investment objective will be achieved.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. **The following discussion relates to the Trust s relative performance based on the index cited above:**

**What factors influenced performance?**

Holdings in 58.com, Inc., a Chinese classified advertising and listing platform holding company, represented the largest individual detractor during the period. The company announced that the Chinese government's steps to tighten the country's property market would have a substantial negative effect on its property listing revenue, and the Trust exited the position. The next largest detractor was the Trust's position in Imperva, Inc., a provider of cyber-security solutions. Imperva substantially reduced its earnings forecast given shifts in consumer and client trends. The Trust also exited this position.

The top individual contributor stock during the period was NVIDIA Corp., which handily exceeded its earnings forecasts throughout the year. NVIDIA provides semiconductor technology to high-growth segments including gaming, data centers and automotive companies. Holdings in Acacia Communications, Inc., a provider of technology to communications networks, represented the second largest contributor to performance as the company had a successful initial public offering and met earnings projections.

The Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a negative impact on performance during the period.

**Describe recent portfolio activity.**

Over the 12-month period, the largest additions to the portfolio came from within the semiconductor & semiconductor equipment industry groups, funded by reductions in both software & services and media industry holdings. Regionally, these shifts resulted in additional exposure to the Pacific Basin and decreased exposure to the emerging markets and North America.

**Describe portfolio positioning at period end.**

At period end, the Trust held its largest allocation within the software & services industry group, particularly idiosyncratic opportunities in the internet software & services and data processing & outsourced services sub-industries. The Trust also held large positions in more stable cash flow businesses within the semiconductor & semiconductor equipment and technology hardware & equipment industries. Regionally, the Trust maintained most of its exposure in North America, followed by notable weights to the emerging markets, Europe and the Pacific Basin.

## Trust Summary as of December 31, 2016

## BlackRock Utility and Infrastructure Trust

## Trust Overview

**BlackRock Utility and Infrastructure Trust s (BUI) (the Trust )** investment objective is to provide total return through a combination of current income, current gains and long-term capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in equity securities issued by companies that are engaged in the Utilities and Infrastructure business segments anywhere in the world and by utilizing an option writing (selling) strategy in an effort to seek total return performance and enhance distributions. The Trust considers the Utilities business segment to include products, technologies and services connected to the management, ownership, operation, construction, development or financing of facilities used to generate, transmit or distribute electricity, water, natural resources or telecommunications and the Infrastructure business segment to include companies that own or operate infrastructure assets or that are involved in the development, construction, distribution or financing of infrastructure assets. Under normal circumstances, the Trust invests a substantial amount of its total assets in foreign issuers, issuers that primarily trade in a market located outside the United States or issuers that do a substantial amount of business outside the United States. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

<sup>3</sup> Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles.

**The following discussion relates to the Trust's absolute performance based on NAV:**

**What factors influenced performance?**

The largest detractor from absolute returns was the Trust's position in the transportation infrastructure industry. In this vein, notable detractors from performance included Australian airport operator Sydney Airport Ltd. and Atlantia SpA, which constructs and manages airports and highways in its home country of Italy and abroad. The Trust's exposure to the construction & engineering industry also detracted from performance, in particular a position in Spanish toll-road and airport construction operator Ferrovial SA. Broadly, European construction and infrastructure companies underperformed in the aftermath of the U.K. vote to exit from the European Union (Brexit). The Trust's international exposure detracted from absolute returns from a country allocation perspective, driven largely by portfolio holdings based in France and Spain.

Utilities performed strongly during the first half of the 12-month period, as central bank policy decisions and historically low U.S. interest rates created a strong demand for higher-yielding equities. However, utilities weakened somewhat in the second half of the period as investors anticipated higher interest rates. The Trust's exposure to the electric utilities industry was the largest contributor to performance, led by regulated utility operators Exelon Corp. and NextEra Energy, Inc. The Trust's exposure to the multi-utilities industry also benefited performance, as CMS Energy Corporation and Dominion Resources Inc. performed strongly. Finally, exposure to the energy sector and to the water utilities industry contributed modestly to the Trust's absolute returns.

Also, during the period, the Trust made use of options, principally written call options on individual stocks, in order to seek enhanced income returns while continuing to participate in the performance of the underlying equities. The Trust's option writing strategy had a modestly positive impact on returns for the period.

**Describe recent portfolio activity.**

During the period, the Trust increased exposure to electric utilities, adding to existing positions in NextEra Energy, Inc. and Enel S.p.A and initiating a position in FirstEnergy Corp. The Trust reduced exposure to the

**Performance and Portfolio Management Commentary (concluded)**

gas utilities industry, notably exiting its positions in Italy's Snam SpA and U.S.-based Spire Inc. (formerly known as The Laclede Group). Lastly, the Trust reduced its position size in water utility operator American Water Works Company, primarily on the basis of valuation after strong absolute performance during the period.

**Describe portfolio positioning at period end.**

At period end, the utilities sector accounted for approximately 57% of the Trust's assets, with holdings concentrated in U.S. electric and multi-utilities. Against a backdrop of historically low interest rates, the demand for equity yield has led to valuations for U.S. utilities that are high relative to their historical levels, placing even greater importance on stock selection. As such, the Fund was focused on owning companies with strong management teams that offer the potential for above-sector growth in earnings and dividends. The Fund had a preference for regulated utilities over their non-regulated counterparts given their existing barriers to entry, strong balance sheets, and lower sensitivity to commodity prices.

Additionally, about 37% of the Trust's assets were in global construction and infrastructure operators and master limited partnerships at period end. This positioning was based on the healthy dividend yields and potential long-term capital growth these assets offer, along with diversification across geographies, economies and industries globally.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments. These instruments are used to obtain exposure to a security, commodity, index, market, and/or other asset without owning or taking physical custody of securities, commodities and/or other referenced assets to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage and involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction

or illiquidity of the instrument. The Trusts' successful use of a derivative financial instrument depends on the investment adviser's ability to predict pertinent market movements accurately, which cannot be assured. The use of these instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Trust can realize on an investment and/or may result in lower distributions paid to shareholders. The Trusts' investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.
