- (1) Senior floating-rate loans (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will typically have an

Edgar Filing: Eaton Vance Short Duration Diversified Income Fund - Form N-Q

expected average life of approximately two to four years. Senior Loans typically have rates of interest which are redetermined periodically by reference to a base lending rate, plus a spread. These base lending rates are primarily the London Interbank Offered Rate (LIBOR) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate). Base lending rates may be subject to a floor, or minimum rate.

- (2) The stated interest rate represents the weighted average interest rate at January 31, 2018 of contracts within the senior loan facility. Interest rates on contracts are primarily redetermined either weekly, monthly or quarterly by reference to the indicated base lending rate and spread and the reset period.
- (3) This Senior Loan will settle after January 31, 2018, at which time the interest rate will be determined.
- (4) For fair value measurement disclosure purposes, security is categorized as Level 3.

- (5) Fixed-rate loan.
- (6) Issuer is in default with respect to interest and/or principal payments. For a variable rate security, interest rate has been adjusted to reflect non-accrual status.
- (7) Amount is less than 0.05%.
- (8) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be sold in certain transactions in reliance on an exemption from registration (normally to qualified institutional buyers). At January 31, 2018, the aggregate value of these securities is \$91,197,698 or 33.4% of the Fund's net assets.
- (9) Security (or a portion thereof) has been pledged to cover collateral requirements on open derivative contracts.
- (10) Variable rate security. The stated interest rate represents the rate in effect at January 31, 2018.
- (11) Represents a payment-in-kind security which may pay interest in additional principal at the issuer's discretion.
- (12) Security exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered and sold outside the United States. Security may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At January 31, 2018, the aggregate value of these securities is \$25,494,808 or 9.3% of the Fund's net assets.
- (13) Loan is subject to scheduled mandatory prepayments. Maturity date shown reflects the final maturity date.
- (14) Adjustable rate mortgage security whose interest rate generally adjusts monthly based on a weighted average of interest rates on the underlying mortgages. The coupon rate may not reflect the applicable index value as interest rates on the underlying mortgages may adjust on various dates and at various intervals and may be subject to lifetime ceilings and lifetime floors and lookback periods. Rate shown is the coupon rate at January 31, 2018.
- (15) Inverse floating-rate security whose coupon varies inversely with changes in the interest rate index. The stated interest rate represents the coupon rate in effect at January 31, 2018.
- (16) Interest only security that entitles the holder to receive only interest payments on the underlying mortgages. Principal amount shown is the notional amount of the underlying mortgages on which coupon interest is calculated.

Edgar Filing: Eaton Vance Short Duration Diversified Income Fund - Form N-Q

- (17) Principal only security that entitles the holder to receive only principal payments on the underlying mortgages.
- (18) Weighted average fixed-rate coupon that changes/updates monthly. Rate shown is the rate at January 31, 2018.
- (19) When-issued security. For a variable rate security, interest rate will be determined after January 31, 2018.
- (20) Non-income producing security.
- (21) Security was acquired in connection with a restructuring of a Senior Loan and may be subject to restrictions on resale.
- (22) Affiliated investment company, available to Eaton Vance portfolios and funds, which invests in high quality, U.S. dollar denominated money market instruments. The rate shown is the annualized seven-day yield as of January 31, 2018. Net income from the investment in Eaton Vance Cash Reserves Fund, LLC for the fiscal year to date ended January 31, 2018 was \$57,388.

- * If the Fund is the seller of credit protection, the notional amount is the maximum potential amount of future payments the Fund could be required to make if a credit event, as defined in the credit default swap agreement, were to occur. At January 31, 2018, such maximum potential amount for all open credit default swaps in which the Fund is the seller was \$67,600,000.

- ** The contract annual fixed rate represents the fixed rate of interest received by the Fund (as a seller of protection) on the notional amount of the credit default swap contract.

- *** Current market annual fixed rates, utilized in determining the net unrealized appreciation or depreciation as of period end, serve as an indicator of the market's perception of the current status of the payment/performance risk associated with the credit derivative. The current market annual fixed rate of a particular reference entity reflects the cost, as quoted by the pricing vendor, of selling protection against default of that entity as of period end and may include upfront payments required to be made to enter into the agreement. The higher the fixed rate, the greater the market perceived risk of a credit event involving the reference entity. A rate identified as Defaulted indicates a credit event has occurred for the reference entity.

At January 31, 2018, the Fund had sufficient cash and/or securities to cover commitments under open derivative contracts.

In the normal course of pursuing its investment objectives, the Fund is subject to the following risks:

Credit Risk: The Fund enters into credit default swap contracts to enhance total return and/or as a substitute for the purchase of securities.

Foreign Exchange Risk: The Fund holds foreign currency denominated investments. The value of these investments and related receivables and payables may change due to future changes in foreign currency exchange rates. To hedge against this risk, the Fund enters into forward foreign currency exchange contracts.

Interest Rate Risk: The Fund utilizes various interest rate derivatives including futures contracts and interest rate swaps to manage the duration of its portfolio and to hedge against fluctuations in securities prices due to interest rates.

The fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) by risk exposure at January 31, 2018 was as follows:

Risk	Derivative	Fair Value	
		Asset Derivative	Liability Derivative
Credit	Credit Default Swaps	\$ 350,159	\$ (428,290)
Credit	Credit Default Swaps (Centrally Cleared)*	62,472	
Total		\$ 412,631	\$ (428,290)
Foreign Exchange	Forward Foreign Currency Exchange Contracts	\$ 4,142	\$ (202,198)
Total		\$ 4,142	\$ (202,198)
Interest Rate	Financial Futures Contracts*	\$ 231,785	\$
Interest Rate	Interest Rate Swaps (Centrally Cleared)	123,202	
Total		\$ 354,987	\$

* For futures contracts and centrally cleared credit default swap contracts, amount represents cumulative unrealized appreciation or (depreciation).

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

* None of the unobservable inputs for Level 3 assets, individually or collectively, had a material impact on the Fund. Level 3 investments at the beginning and/or end of the period in relation to net assets were not significant and accordingly, a reconciliation of Level 3 assets for the fiscal year to date ended January 31, 2018 is not presented. At January 31, 2018, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.
