GPA Food

GPA Food's gross sales increased 11.0% in 1Q12 over 1Q11. Gross same-store sales revenue were up 9.3%. In real terms, i.e. deflated by the IPCA inflation index, sales were up 4.1%. The main factors which contributed to this increase were:

4 Retail: gross sales increased 8.9% over 1Q11, chiefly due to the following factors:

- § The food category, in which grocery and perishables posted similar growth;
- § The non-food category, in which the highlight was the textile segment at Extra, due to the adoption of the new strategy for the Fall/Winter collection. The campaign to launch the collection was notable for the participation of actress Camila Pitanga, with garments by designer Marcelo Sommer;
- § The top performers among the Group's formats were Extra Supermercado and Minimercado Extra, whose gross same-store sales revenue increased above the Group's average;

2/14

§ The Company opened one Extra Hiper store and converted five Extra Fácil stores into Minimercado Extra. Another 14 stores are under construction.

4 Cash-and-carry: gross sales increased by 24.2%, chiefly due to:

§ The repositioning of Assaí's assortment, a process that began in the second half of 2011, for adjusting the assortment to the target publics (processors, distributors and users), benefiting average ticket growth;

§ The opening of one store in São Paulo.

GPA Consolidated

4 Consolidated gross sales totaled R\$13,660 million in 1Q12, up 10.4% over 1Q11. In addition to GPA Food, as mentioned above, the performance of Viavarejo also contributed to this result. Casas Bahia and Ponto Frio implemented new marketing campaigns for their bricks-and-mortar stores and continued to revise and adjust their assortments and reorganize their stores to adapt to the new positioning. E-commerce also contributed to this growth, strengthening the importance of the purchasing experience as a competitive advantage.

GPA Food

In 1Q12, EBITDA totaled R\$493 million, up 16.9% over 1Q11, with margin at 7.4%.

4 Retail: the EBITDA margin reached 8.1%, up 10 bps over 1Q11, due to:

§ A 50-bps gain in the gross margin as a result of: (i) continuous process of improving negotiations with suppliers; (ii) the improved sales mix and changes in the new consumption habits of Brazil's middle class. This performance was in line with that in previous quarters.

§ Total operating expenses as a percentage of net sales revenue grew by 40 bps, chiefly due to the increase in personnel expenses as a result of the collective bargaining agreement, which was above inflation (as measured by the IPCA consumer price index), as well as higher marketing expenses in the period.

4 Cash-and-carry: the EBITDA margin came to 3.8%, a 250 bps improvement over 1Q11, due to:

§ A 60 bps gain in the gross margin, due to changes in the assortment for favoring a more profitable mix, with a focus on the channels aimed at processors, distributors and users. These initiatives enable scale gains and access to advantageous negotiations with suppliers. The sales area was also restructured, streamlining inventory management and increasing store productivity. The format adjustments also led to gains due to a reduction in logistics costs.

§ A reduction of 190 bps in total operating expenses as a percentage of net sales revenue, chiefly due to the upturn in sales as a result of store maturation and the dilution of fixed expenses, as well as the elimination of the bakery and butcher's sections as of the second half of 2011.

GPA Consolidated

4 In 1Q12, consolidated EBITDA totaled R\$758 million, up 30.1% over 1Q11, due to the previously-mentioned operational improvement at GPA Food, and progress in Viavarejo's integration process, which centralized purchasing negotiations and operating expenses, leading to gross margin gains and reduction in expenses.
