## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

Braskem S.A.

We have reviewed the accompanying condensed consolidated balance sheet of Braskem S.A. and its subsidiaries as of March 31, 2014, and the related condensed consolidated statements of operations and comprehensive income, and changes in shareholders' equity for the three month periods ended March 31, 2014, and March 31, 2013 and the condensed consolidated statement of cash flows for the three month periods ended March 31, 2014 and March 31, 2013. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with IAS 34 — Interim Financial Reporting issued by the International Accounting Standard Board (IASB).

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2013, and the related consolidated statements of operations, comprehensive income, and changes in equity, and of cash flows for the year then ended (not presented herein), and in our report dated February 13, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2013, is fairly stated in all material respects in relation to the consolidated balance sheet from which it

has been derived.

## 2. Summary of significant accounting policies

### 2.1. Basis of preparation

This Quarterly Information should be read together with the financial statements of Braskem as of December 31, 2013, which were prepared and presented in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

The preparation of the quarterly information requires the use of certain critical accounting estimates. It also requires the Management of the Company to exercise its judgment in the process of applying its accounting policies. There were no significant changes in the assumptions and judgments made by the Company's management in the use of estimates for the preparation of the Quarterly Information in relation to those used in the December 31, 2013 financial statements.

On March 31, 2014, the Company started to include in its balance sheet the net value, per legal entity, of the amounts related to deferred income and social contribution tax assets and liabilities on its profit as the Company has the legally enforceable right to offset these amounts. The balance sheet at December 31, 2013 was revised to reflect such adjustment, as shown in Note 2.1.1(a).

#### 2.1.1 Revised

- (a) December 31, 2013 – The balance sheets and respective notes were revised to reflect deferred Income Tax (“IR”) and Social Contribution (“CSL”) on a net basis (Note 2.1); and

(b) March 31, 2013 – The statements of operations, equity, cash flows and respective notes were revised to include the results of the operations of Quantiq Distribuidora Ltda. (“Quantiq”) and IQAG Armazéns Gerais Ltda. (“IQAG”) as a result of the Company’s decision to sell these assets.

**14.3. Sensitivity analysis**

Financial instruments, including derivatives, may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

**(a) Selection of risks**

On March 31, 2014, the main risks that can affect the value of Braskem's financial instruments are:

- Brazilian real/U.S. dollar exchange rate;
- U.S. dollar/Mexican peso exchange rate;
- U.S. dollar/Euro exchange rate;
- Libor floating interest rate;
- CDI interest rate; and
- TJLP interest rate.

For the purposes of the risk sensitivity analysis, Braskem presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

**Braskem S.A.**

**Notes to the financial statements**

**at March 31, 2014**

**All amounts in thousands of reais, except where stated otherwise**

**(b) Selection of scenarios**

**(b.1) Probable scenario**

The *Market Readout* published by the Central Bank of Brazil on March 28, 2014 was used to create the probable scenario for the U.S. dollar/Brazilian real exchange rate and the CDI interest rate, using the reference date of March 31, 2014. The *Market Readout* presents a consensus of market expectations based on a survey of the forecasts made by various financial and non-financial institutions.

The *Market Readout* does not publish forecasts for the interest rates Libor and TJLP. Therefore, Braskem considered the expectations for the CDI interest rate for determining the probable scenario for those rates, given their correspondence. The probable scenario for the TJLP is an increase of 0.5% from the current rate of 5%, in line with the size of the government's most recent decisions to increase or decrease the rate, and accompanying the forecast for the cumulative increase in the CDI rate by end-2014 of 0.50%.

**(b.2) Possible and extreme adverse scenarios**

The sensitivity values in the table below are the changes in the value of the financial instruments in each scenario and show the changes in future cash flows:

<b>Instrument</b>	<b>Sensibility</b>	<b>Probable</b>	<b>Possible adverse (25%)</b>	<b>Extreme adverse (50%)</b>

**Notes to the financial statements**

**All amounts in thousands of reais, except where stated otherwise**

**(a) Petros Plans**

In August and October 2012, the Brazilian Private Pension Plan Superintendence (PREVIC - Superintendência Nacional de Previdência Complementar) approved the withdrawal of the sponsorship by Braskem of these plans, which required the payment of the mathematical reserves of the respective beneficiaries and in turn the monetization of the assets of the plans managed by Petros. In view of the unlikelihood of said monetization after almost two years since the approval by PREVIC, Management of the Company had no other option but to start all necessary procedures to resume the sponsorship of the plans. This decision was formalized through a legal injunction dated April 3 2014 that had the main goal of safeguarding Braskem's rights. Management expects that during the next months, the conditions for the resumption of sponsorship of the plan, including the preparation of the actuarial reports, would be established as a result of the discussions that will necessarily be conducted with PREVIC and Petros. The provision booked by the Company, measured based on the criteria that has been adopted since the decision to withdraw sponsorship, was increased by the estimate of the past service cost (Note 23) and was reclassified to non-current liabilities.

**19. Contingencies**

Braskem has contingent liabilities related to lawsuits and administrative proceedings arising from the normal course of its business, of a labor and social security, tax, civil and corporate nature, which involve risks of losses that are classified by the Company's management as possible.

In the quarter ended March 31, 2014, there were no material events or changes in the provisions reported on December 31, 2013.

A detailed presentation of the Company's contingent liabilities was presented in the 2013 financial statements, in Note 29.
