#### F & M BANK CORP. Notes to Unaudited Consolidated Financial Statements

#### Note 1. Accounting Principles

The unaudited consolidated financial statements include the accounts of F & M Bank Corp. and its subsidiaries (the "Company"). Significant intercompany accounts and transactions have been eliminated in consolidation.

The unaudited consolidated financial statements conform to accounting principles generally accepted in the United States of America and to general industry practices. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position as of September 30, 2013 and the results of operations for the quarters and nine-month periods ended September 30, 2013 and 2012. The notes included herein should be read in conjunction with the notes to financial statements included in the 2012 annual report to stockholders of F & M Bank Corp.

The Company does not expect the anticipated adoption of any newly issued accounting standards to have a material impact on future operations or financial position.

#### Comprehensive Income

Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Certain changes in assets and liabilities, such as unrealized gains and losses on available for sale securities and gains or losses on certain derivative contracts, are reported as a separate component of the equity section of the balance sheet. Such items, along with operating net income, are components of comprehensive income.

#### Subsequent Events

In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

#### Loans

Loans are carried on the balance sheet net of any unearned interest and the allowance for loan losses. Interest income on loans is determined using the effective interest method on the daily amount of principal outstanding except where serious doubt exists as to collectability of the loan, in which case the accrual of income is discontinued.

#### Allowance for Loan Losses

The provision for loan losses charged to operations is an amount sufficient to bring the allowance for loan losses to an estimated balance that management considers adequate to absorb potential losses in the portfolio. Loans are charged against the allowance when management believes the collectability of the principal is unlikely. Recoveries of amounts previously charged-off are credited to the allowance. Management's determination of the adequacy of the allowance is based on an evaluation of the composition of the loan portfolio, the value and adequacy of collateral, current economic conditions, historical loan loss experience, and other risk factors. Management believes that the allowance for loan losses is adequate. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on changes in economic conditions, particularly those affecting real estate values. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize

additions to the allowance based on their judgments about information available to them at the time of their examination.

#### F & M BANK CORP.

#### Notes to Unaudited Consolidated Financial Statements

#### Note 1. Accounting Principles, continued

Allowance for Loan Losses, continued

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

#### Nonaccrual Loans

Loans are placed on nonaccrual status when they become ninety days or more past due, unless there is an expectation that the loan will either be brought current or paid in full in a reasonable period of time.

#### Note 2. Investment Securities

Investment securities available for sale are carried in the consolidated balance sheets at their approximate market value, amortized cost and unrealized gains and losses at September 30, 2013 and December 31, 2012 are reflected in the table below. The amortized costs of investment securities held to maturity are carried in the consolidated balance sheets and their approximate market values at September 30, 2013 and December 31, 2012 are as follows:

	2	013	2	2012
		Market		Market
	Cost	Value	Cost	Value

Due after one year through five years	-	-	6,308	6,305	
Due after five years	-	-	-	-	
Total	\$107	\$107	\$8,308	\$8,305	

There were no gains and losses on sales of debt and equity securities in the nine months of 2013 or 2012.

#### Securities Impairment

The Company follows the guidance in ASC 320-10 and Staff Accounting Bulletin (SAB) Topic 5M, Other Than Temporary Impairment in evaluating if these impairments are temporary or other than temporary in nature. This determination is made on an investment by investment basis and includes all available evidence at the time of the determination including the following:

The length of time of impairment;

The extent of the impairment relative to the cost of the investment;

Recent volatility in the market value of the investment;

The financial condition and near-term prospects of the issuer, including any specific events which may impair the earnings potential of the issuer; or

The intent and ability of the Company to hold its investment for a period of time sufficient to allow for any anticipated recovery in market value.

The following description provides our policies/procedures for the evaluation for Other Than Temporary Impairment (OTTI):

We begin our evaluation using a default position that OTTI has occurred and then use all available evidence to determine whether prospects for the individual security are sufficient to support temporary impairment at the date of the SEC filing. This evaluation will be conducted at each filing date.

For purposes of determining OTTI, the security value recovery period will be projected for a maximum of a two year holding period. This will be the maximum; a shorter period may be used when there are particular conditions related to the individual security which make recovery unlikely.

The primary focus in determining whether a security is OTTI, and projecting potential recovery, is the prospects for the individual security, rather than broad market indices. All available evidentiary material is considered, including the Company's public filings with the SEC, press releases, analyst reports, etc.

#### Notes to Unaudited Consolidated Financial Statements

#### Note 2. Investment Securities, continued

#### Securities Impairment continued

Secondary consideration is given to historic returns, but only to the extent that this evidence is instructive in determining whether the individual security has shown a history of outperforming (or underperforming) the market (or industry) in prior economic cycles. These factors are only considered when the declines in value are not limited to the individual security, but were prevalent over the broader market. This measure is considered to aid in determining whether OTTI should be recognized earlier, rather than later (i.e. a security which underperforms relative to the industry or market will result in early recognition of OTTI). In no event will OTTI recognition be delayed beyond the two year projection period.

OTTI may be recognized as early as quarter 1, regardless of holding period projections, when there are specific factors relative to the security which make recovery unlikely. These factors could include evidence contained in the aforementioned SEC filings, press releases, analyst reports, but may also be based on the severity of the impairment.

Situations where a security has declined in value more rapidly than the industry (or market), absent strong evidence supporting prospects for recovery, will result in OTTI being recognized in quarter 1 or quarter 2 rather than continuing to evaluate the security over several quarters, based on holding period projections. Declines determined to be other than temporary are charged to operations; there were no OTTI charges in the

Declines determined to be other than temporary are charged to operations; there were no OTTI charges in the first nine months of 2013 or 2012.

The fair value and gross unrealized losses for securities, segregated by the length of time that individual securities have been in a continuous gross unrealized loss position, at September 30, 2013 and December 31, 2012 were as follows (dollars in thousands):

	Less than	12 Months		More that	in 12 Months	Total
