Registrant's telephone number, including area code

Securities registered pursuant to section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, \$.01 par value	NASDAQ Global Market

Securities registered pursuant to section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Table of Contents

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Smaller reporting company

Non-accelerated filer

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the common stock of the registrant held by non-affiliates of the registrant computed by reference to the average of the closing bid and ask prices of the common stock as of the last business day of the registrant's most recently completed second quarter was \$95,927,799. Solely for the purposes of this response, the registrant has assumed, without admitting for any purpose, that all executive officers and directors of the registrant,

and no other persons, are the affiliates of the registrant at that date.

The number of shares outstanding of the registrant's common stock, as of February 22, 2019: 5,916,910 shares of \$.01 par value common stock.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive Proxy Statement for its Annual Meeting of Stockholders to be held on April 24, 2019, are incorporated by reference in Part III of this report. Such proxy statement will be filed with the Securities and Exchange Commission of the Registrant's fiscal year ended December 31, 2018.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K (this "Report") contains forward-looking statements, including statements about our operating and growth strategies, our expected financial position and operating results, industry trends, our capital expenditure and financing plans and similar matters. Such forward-looking statements are found throughout this Report, including under Item 1, Business, Item 1A, Risk Factors, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 7A, Quantitative and Qualitative Disclosures About Market Risk. In those and other portions of this Report, the words "believe," "may," "will," "estimate," "continue," "anticipate," "intend," "expect," "project", "could", "should", "would" and similar expressions, as they relate to us, our management, and our industry are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends affecting our business. Actual results may differ materially. Some of the risks, uncertainties and assumptions that may cause actual results to differ from these forward-looking statements are described under the headings "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Quantitative and Qualitative Disclosures About Market Risk."

All forward-looking statements attributable to us, or to persons acting on our behalf, are expressly qualified in their entirety by this cautionary statement.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this Report might not transpire.

PART I

Item 1. Business.

Unless the context otherwise requires, all references in this Annual Report on Form 10-K to “P.A.M.,” the “Company,” “we,” “our,” or “us” mean P.A.M. Transportation Services, Inc. and its subsidiaries.

We are a truckload dry van carrier transporting general commodities throughout the continental United States, as well as in certain Canadian provinces. We also provide transportation services in Mexico under agreements with Mexican carriers. Our freight consists primarily of automotive parts, expedited goods, consumer goods, such as general retail store merchandise, and manufactured goods, such as heating and air conditioning units.

P.A.M. Transportation Services, Inc. is a holding company incorporated under the laws of the State of Delaware in June 1986. We conduct operations principally through the following wholly owned subsidiaries: P.A.M. Transport, Inc., T.T.X., LLC, P.A.M. Cartage Carriers, LLC, Overdrive Leasing, LLC, P.A.M. Logistics Services, Inc., Choctaw Express, LLC, Choctaw Brokerage, Inc., Transcend Logistics, Inc., Decker Transport Co., LLC, East Coast Transport and Logistics, LLC, S & L Logistics, Inc., and P.A.M. International, Inc. Our operating authorities are held by P.A.M. Transport, Inc., P.A.M. Cartage Carriers, LLC, Choctaw Express, LLC, Choctaw Brokerage, Inc., T.T.X., LLC, Decker Transport Co., LLC, and East Coast Transport and Logistics, LLC. Effective on January 1, 2010, the operations of most of the Company’s operating subsidiaries were consolidated under the P.A.M. Transport, Inc. name in an effort to more clearly reflect the Company’s scope and available service offerings.

We are headquartered and maintain our primary terminal, maintenance facilities, and our corporate and administrative offices in Tontitown, Arkansas, which is located in northwest Arkansas, a major center for the trucking industry and where the support services (including warranty repair services) for most major truck and trailer equipment manufacturers are readily available.

Segment Financial Information

The Company's operations are all in the motor carrier segment and are aggregated into a single reporting segment in accordance with the aggregation criteria under Generally Accepted Accounting Principles (“GAAP”).

Operations

Our operations can generally be classified into truckload services or brokerage and logistics services. This designation is based primarily on the ownership of the asset that performed the freight transportation service. Truckload services are performed by Company divisions that generally utilize Company owned trucks, long-term contractors, or single-trip contractors to transport loads of freight for customers, while brokerage and logistics services coordinate or facilitate the transport of loads of freight for customers and generally involve the utilization of single-trip contractors. Both our truckload operations and our brokerage and logistics operations have similar economic characteristics and are impacted by virtually the same economic factors as discussed elsewhere in this Report. Truckload services operating revenues, before fuel surcharges, represented 80.0%, 86.3% and 88.4% of total operating revenues for the years ended December 31, 2018, 2017 and 2016, respectively. The remaining operating revenues, before fuel surcharge for the same periods were generated by brokerage and logistics services, representing 20.0%, 13.7% and 11.6%, respectively.

Approximately 57% of the Company's revenues are derived from domestic shipments while approximately 43% of our revenues are derived from freight originating from or destined to locations in Mexico or Canada.

Table of Contents

Business and Growth Strategy

Our strategy focuses on the following elements:

Providing a Full Suite of Complimentary Truckload Transportation Solutions. Our objective is to provide our customers with a comprehensive solution to their truckload transportation needs. Our array of asset-based service offerings consist of dedicated, expedited, automotive, local, regional, and long-haul truckload services. Our brokerage and logistics solutions offer similar services, but utilize third party equipment to expand available capacity. Our area of service includes the continental United States, Mexico and to a lesser degree Canada.

Developing Customer Relationships within High Density Traffic Lanes. We strive to maximize utilization and increase revenue per truck while minimizing our time and empty miles between loads. In this regard, we seek to provide equipment to our customers in defined regions and disciplined traffic lanes. This strategy enables us to:

- maintain more consistent equipment capacity;
- provide a high level of service to our customers, including time-sensitive delivery schedules;
- attract and retain drivers; and
- maintain a sound safety record as drivers travel familiar routes.

Providing Superior and Flexible Customer Service. We strive to provide a very high level of service to our customers, thus creating a level of satisfaction, value and loyalty within our customer base. We closely monitor each shipment for compliance regarding scheduled pickup, delivery and transit times, service levels and customer specific expectations. We provide verbal and electronic updates through various forums to customers to allow visibility of their products as they progress through the transport process.

Many of our customers depend on us to deliver shipments on a time-definite basis, meaning that parts or raw materials are scheduled for delivery as they are needed on a manufacturer's production line. The need for this service is a product of modern manufacturing and assembly methods that are designed to decrease inventory levels and handling costs. Such requirements place a premium on our delivery performance and reliability.

Employing Stringent Cost Controls. Throughout our organization, emphasis is placed on gaining efficiency in our processes with the primary goals of decreasing costs and improving customer satisfaction. Maintaining a high level of efficiency and prioritizing our focus on improvements allows us to minimize the number of non-driving personnel we employ and positively influence other overhead costs. Expenses are intensely scrutinized for opportunities for elimination, reduction or to further leverage our purchasing power to achieve more favorable pricing.

Industry

According to the American Trucking Association's "American Trucking Trends 2018" report, the trucking industry transported approximately 70% of the total volume of freight transported in the United States during 2017, which equates to 10.8 billion tons and over \$700 billion in revenue. The truckload industry is highly fragmented and is impacted by several economic and business factors, many of which are beyond the control of individual carriers. The state of the economy, coupled with equipment capacity levels, can impact freight rates. Volatility of various operating expenses, such as fuel and insurance, make the predictability of profit levels uncertain. Availability, attraction, retention and compensation of drivers also affect operating costs, as well as equipment utilization. In addition, the capital requirements for equipment, coupled with potential uncertainty of used equipment values, impact the ability of many carriers to expand their operations.

Table of Contents

The current operating environment is characterized by the following:

• Competition for drivers;

• Competition for freight;

• Price increases by truck and trailer equipment manufacturers;

• Volatile fuel costs; and

• Pressure on less profitable or undercapitalized carriers to consolidate or exit the industry.

Competition

The trucking industry is highly competitive and includes thousands of carriers, none of which dominates the market in which the Company operates. The Company's market share is less than 1%, and we compete primarily with other route medium- to long-haul truckload carriers, with private carriage conducted by our existing and potential customers, and, to a lesser extent, with the railroads. We compete on the basis of quality of service and delivery performance, as well as price. Many of the long-haul truckload carriers have substantially greater financial resources, own more equipment or carry a larger total volume of freight as compared to the Company.

Marketing and Significant Customers

Our marketing emphasis is directed to that portion of the truckload market which is generally service-sensitive, as opposed to being solely price driven. We seek to become a “core carrier” for our customers in order to maintain high utilization and capitalize on recurring revenue opportunities. Our marketing efforts are diversified and designed to gain access to dedicated, expedited, regional, automotive, and long-haul opportunities (including those in Mexico and Canada) and to expand brokerage and logistics offerings.

Our sales efforts are conducted by a staff of ten employees who are located in our major markets and supervised from our headquarters. These individuals work to improve profitability by maintaining an even flow of freight traffic (taking into account the balance between originations and destinations in a given geographical area), high utilization, and minimizing movement of empty equipment.

Our five largest customers, for which we provide carrier services covering a number of geographic locations, accounted for approximately 42%, 41% and 43% of our total revenues in 2018, 2017 and 2016, respectively. Fiat Chrysler Automobiles accounted for approximately 16%, 10% and 9% of our revenues in 2018, 2017 and 2016, respectively. General Motors Company accounted for approximately 13%, 18% and 18% of our revenues in 2018, 2017 and 2016, respectively. Ford Motor Company accounted for approximately 8%, 9% and 10% of our revenues in 2018, 2017 and 2016, respectively.

We also provide transportation services to other manufacturers who are suppliers for automobile manufacturers. Approximately 46%, 46% and 45% of our revenues were derived from transportation services provided to the automobile industry during 2018, 2017 and 2016, respectively.

Revenue Equipment

At December 31, 2018, we operated a fleet of 2,031 trucks, which included 597 independent contractor trucks. At December 31, 2018, our trailer fleet consisted of 6,397 trailers. Our company-owned trucks and leased trucks are late model, well-maintained, premium trucks, which we believe help to attract and retain drivers, maximize fuel efficiency, promote safe operations, minimize maintenance and repair costs, and improve customer service by minimizing service interruptions caused by breakdowns. The average age of our trucks and trailers as of December 31, 2018 was 1.20 years and 3.54 years respectively. We evaluate our equipment purchasing decisions based on factors such as initial cost, useful life, warranty terms, expected maintenance costs, fuel economy, driver comfort, customer needs, manufacturer support, and resale value.

Table of Contents

We contract with independent contractors to provide greater flexibility in responding to fluctuations in consumer demand. Independent contractors provide their own trucks and are contractually responsible for all associated expenses, including financing costs, fuel, maintenance, insurance, and taxes, among other things. They are also responsible for maintaining compliance with the Federal Motor Carrier Safety Administration regulations.

Technology

Our trucks are equipped with cellular-based global positioning and communications systems that allows fleet managers to communicate directly with drivers. Drivers provide location, status, and informational updates directly to our computer system which increases productivity, convenience, and customer visibility. This system provides information that allows us to calculate accurate estimated time of arrival information, which helps to optimize planning and customer service levels.

Our information systems manage the data provided by our on-board devices to update system information regarding the location and load status of our trucks, which permits us to better manage customer delivery schedules, respond to customer inquiries, and perform optimized equipment to load matching, among various other planning and support functions. In many instances, our systems also directly provide real-time information electronically to our customers regarding the status of freight shipments and anticipated arrival times, adding flexibility and convenience by extending supply chain visibility.

Maintenance

We have a strictly-enforced, comprehensive preventive maintenance program for our trucks and trailers. Inspections and various levels of preventive maintenance are performed at set intervals on both trucks and trailers. A maintenance and safety inspection is performed on all vehicles each time they return to a terminal.

Our trucks carry full warranty coverage for at least three years or 375,000 miles. Extended truck warranties are often negotiated with the truck manufacturers and manufacturers of major components, such as engine, transmission, and differential manufacturers, for up to five years or 575,000 miles. Our trailers carry full warranties by the manufacturer for up to seven years with certain components covered for up to ten years.

Employees

At December 31, 2018, we employed 2,748 persons, of whom 2,067 were drivers, 159 were employed in maintenance, 282 were employed in operations, 45 were employed in marketing, 132 were employed in safety and personnel, and 63 were employed in general administration and accounting. A total of 2,730 of our employees were employed on a full-time basis as of December 31, 2018. None of our employees are represented by a collective bargaining unit, and we believe that our employee relations are good.

Drivers

At December 31, 2018, we utilized 2,067 company drivers in our operations. We also had 677 drivers for independent contractors under contract who were compensated on a per mile basis. Our drivers are compensated on the basis of calculated miles driven, loading and unloading, extra stops, and layovers in transit. Drivers can earn bonuses by recruiting other qualified drivers who become employed by us, and both cash and non-cash prizes are awarded for achieving certain safety and miles-per-gallon goals. All of our drivers are recruited, screened, and drug tested and participate in our driver training program. Our driver training program stresses the importance of safety and reliable, on-time delivery. Drivers are required to report to their driver managers daily and at the earliest possible moment when any condition occurs en route that might delay their scheduled delivery time.

We contract with independent contractors to supply one or more trucks and drivers for our use. Independent contractors must pay their own truck expenses, fuel, maintenance, insurance, and driver costs. They must meet and operate within our guidelines with respect to safety. We have a lease-purchase program whereby we offer independent contractors the opportunity to lease a truck, with the option to purchase the truck at the end of the lease term. We believe our lease-purchase program has contributed to our ability to attract and retain independent contractors. At December 31, 2018, approximately 359 independent contractors were leasing 475 trucks in this program.

Table of Contents

In addition to strict application screening and drug testing, before being permitted to operate a vehicle, our drivers must undergo classroom instruction on our policies and procedures, safety techniques as taught by the Smith System of Defensive Driving, and the proper operation of equipment, and must pass both written and road tests. Instruction in defensive driving and safety techniques continues after hiring, with seminars at several of our terminals. At December 31, 2018, we employed 110 persons on a full-time basis in our driver recruiting, training and safety instruction programs.

Intense competition in the trucking industry for qualified drivers has resulted in additional expense to recruit and retain an adequate supply of drivers, and has had a negative impact on the industry. Our operations have also been impacted and from time to time we have experienced under-utilization and increased expenses due to a shortage of qualified drivers. We place a high priority on the recruitment and retention of an adequate supply of qualified drivers.

Available Information

The Company maintains a website where additional information concerning its business can be found. The address of that website is www.pamtransport.com. The Company makes available free of charge on its website its Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") as soon as reasonably practicable after it electronically files or furnishes such materials to the Securities and Exchange Commission.

Seasonality

Generally, our revenues do not exhibit a significant seasonal pattern; however, revenue is affected by adverse weather conditions, holidays and the number of business days that occur during a given period because revenue is directly related to the available work days of shippers. Operating expenses are typically higher in the winter months primarily due to decreased fuel efficiency and increased maintenance costs associated with inclement weather. In addition, automobile plants for which we transport a large amount of freight typically undergo scheduled shutdowns in July and December and the volume of automotive freight we ship is reduced during such scheduled plant shutdowns.

Regulation

We are a common and contract motor carrier regulated by various United States federal and state, Canadian provincial, and Mexican federal agencies. These regulatory agencies have broad powers, generally governing matters

such as authority to engage in motor carrier operations, motor carrier registration, driver hours-of-service (“HOS”), drug and alcohol testing of drivers, and safety, size, and weight of transportation equipment. The primary regulatory agencies affecting the Company’s operations include the Federal Motor Carrier Safety Administration (“FMCSA”), the Pipeline and Hazardous Materials Safety Agency, and the Surface Transportation Board, which are all agencies within the U.S. Department of Transportation (“DOT”). We believe that we are in compliance in all material respects with applicable regulatory requirements relating to our business and operate with a “satisfactory” rating (the highest of three rating categories) from the DOT. In addition, we are subject to compliance with cargo-security and transportation regulations issued by the Transportation Security Administration, a component department within the U.S. Department of Homeland Security. To the extent that we conduct operations outside the United States, we are subject to the Foreign Corrupt Practices Act, which generally prohibits U.S. companies and their intermediaries from offering bribes to foreign officials for the purpose of obtaining or retaining favorable treatment.

Table of Contents

In December 2011, the FMCSA released new rules regulating HOS that became effective in July 2013. These rules reduced the maximum hours that could be worked in a consecutive seven day period from 82 to 70, required that a driver take a mandatory thirty minute break during each consecutive eight hour driving period, and required that a driver take a 34 hour rest period, or restart, that included two periods between 1:00 a.m. and 5:00 a.m. that could only be used one time every seven calendar days.

In December 2014, the Consolidated and Further Continuing Appropriations Act of 2015 suspended enforcement of the requirements for use of the 34 hour restart that became effective in July 2013 and replaced them with the previous restart rules that were in effect on June 30, 2013 pending the completion of the Commercial Vehicle Driver Restart Study which is designed to measure and compare the fatigue and safety performance of truck drivers using the two different versions of the HOS restart provisions. As of December 31, 2018, the study has been completed, but the findings have not been publicly disclosed.

In July 2012, Congress passed legislation renewing the mandate for electronic logging devices and designated authority to the FMCSA to propose a new rule. In December 2015, the FMCSA amended the Federal Motor Carrier Safety Regulations to establish minimum performance and design standards for HOS electronic logging devices (“ELDs”), requirements for the mandatory use of these devices by drivers currently required to prepare HOS records of duty status, requirements concerning HOS supporting documents, and measures to address concerns about harassment resulting from the mandatory use of ELDs. In May 2018 the FMCSA released a notice that they would allow a motor carrier that installed and required its drivers to use an Automatic on Board Recording Device (“AOBRD”) before December 18, 2017 and who uses registered ELD capable devices that run compliant AOBRD software to continue to do so until December 16, 2019. The Company was an early adopter of ELD capable devices, requiring the devices to be installed on its entire fleet and requiring its drivers to use AOBRD’s since 2010. These rulings affect the majority of carriers, including us. We do not anticipate a material impact to our profitability as a result of implementation of existing rules; however, we believe that enforcement of these rules on non-compliant carriers may present challenges for them and may improve our competitive position.

The FMCSA administers carrier safety compliance and enforcement through its Compliance, Safety, Accountability (“CSA”) program that became effective in December 2010. CSA is designed to measure and evaluate the safety performance of carriers and drivers through categorization of inspection and crash results into Behavior Analysis and Safety Improvement Categories (“BASICS”) including unsafe/fatigued driving, driver fitness, controlled substances and alcohol, maintenance, cargo, and crashes. BASIC scores are evaluated relative to carrier peer groups to determine carriers that exceed certain thresholds, identifying them for intervention. Intervention status might include targeted roadside inspections, onsite investigations and the development of cooperative safety plans, among other things. Ongoing compliance with CSA may result in additional expenses to the Company or a reduction in the pool of drivers eligible for us to hire. In addition to FMCSA action, a BASIC score that exceeds an intervention threshold might have a negative impact on our ability to attract customers and drivers.

The Environmental Protection Agency (“EPA”) and the National Highway Traffic Safety Administration (“NHTSA”) jointly developed new standards for various vehicles, including heavy duty trucks, that were adopted in August 2011

and cover model years 2014 through 2018. The standard adopted for heavy duty trucks was intended to achieve a reduction in CO₂ and fuel consumption ranging from 7% to 20% by model year 2017. In August 2016, the EPA and NHTSA finalized the second phase of these standards which will further reduce GHG emissions and fuel consumption for heavy duty trucks through model year 2027. In addition, the state of California has adopted its own fuel efficiency regulations that include the use of special aerodynamic equipment for trucks and 53 foot trailers traveling through the state. Compliance with these federal and state requirements has increased the cost of our equipment and may further increase the cost of replacement equipment in the future.

Our motor carrier operations are also subject to environmental laws and regulations, including laws and regulations dealing with the transportation of hazardous materials and other environmental matters, and our operations involve certain inherent environmental risks. Our operations involve the risks of fuel spillage or seepage, environmental damage, and hazardous waste disposal, among others. We have instituted programs to monitor and control environmental risks and assure compliance with applicable environmental laws. As part of our safety and risk management program, we periodically perform internal environmental reviews so that we can achieve environmental compliance and avoid environmental risk. We transport a minimum amount of environmentally hazardous substances and, to date, have experienced no significant claims for hazardous materials shipments. If we should fail to comply with applicable regulations, we could be subject to substantial fines or penalties and to civil and criminal liability.

Table of Contents

Company operations are often conducted in industrial areas, where truck terminals and other industrial activities are conducted, and where groundwater or other forms of environmental contamination have occurred, which could potentially expose us to claims that we contributed to the environmental contamination.

We believe we are currently in material compliance with applicable laws and regulations and that the cost of compliance has not materially affected results of operations.

Item 1A. Risk Factors.

Set forth below, and elsewhere in this Report and in other documents we file with the SEC, are risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this Report.

Risks Related to Our Business

Our business is subject to general economic and business factors that are largely beyond our control, any of which could have a material adverse effect on our operating results.

Our business is dependent upon a number of general economic and business factors that may adversely affect our results of operations. These factors include significant increases or rapid fluctuations in fuel prices, excess capacity in the trucking industry, surpluses in the market for used equipment, interest rates, fuel taxes, license and registration fees, insurance premiums, self-insurance levels, and difficulty in attracting and retaining qualified drivers, independent contractors, and third party carriers.

We operate in a highly competitive and fragmented industry, and our business may suffer if we are unable to adequately address any downward pricing pressures or other factors that may adversely affect our ability to compete with other carriers.

Further, we are affected by recessionary economic cycles and downturns in customers' business cycles, particularly in market segments and industries, such as the automotive industry, where we have a significant concentration of customers. Economic conditions may also adversely affect our customers and their ability to pay for our services.

Deterioration in the United States and/or world economies could exacerbate any difficulties experienced by our customers and suppliers in obtaining financing, which, in turn, could materially and adversely impact our business, financial condition, results of operations and cash flows.

Numerous competitive factors could impair our ability to operate at an acceptable profit. These factors include, but are not limited to, the following:

• we compete with many other truckload carriers of varying sizes and, to a lesser extent, with less-than-truckload carriers and railroads, some of which have more equipment and greater capital resources than we do;

• some of our competitors periodically reduce their freight rates to gain business, especially during times of reduced growth rates in the economy, which may limit our ability to maintain or increase freight rates, maintain our margins or maintain significant growth in our business;

• many customers reduce the number of carriers they use by selecting so-called “core carriers” as approved service providers, and in some instances we may not be selected;

Table of Contents

• many customers periodically accept bids from multiple carriers for their shipping needs, and this process may depress freight rates or result in the loss of some of our business to competitors;

• the trend toward consolidation in the trucking industry may create other large carriers with greater financial resources and other competitive advantages relating to their size and with whom we may have difficulty competing;

• advances in technology require increased investments to remain competitive, and our customers may not be willing to accept higher freight rates to cover the cost of these investments;

• competition from Internet-based and other logistics and freight brokerage companies may adversely affect our customer relationships and freight rates; and

• economies of scale that may be passed on to smaller carriers by procurement aggregation providers may improve their ability to compete with us.

We are highly dependent on our major customers, the loss of one or more of which could have a material adverse effect on our business.

A significant portion of our revenue is generated from our major customers. For 2018, our top five customers, based on revenue, accounted for approximately 42% of our revenue, and our three largest customers, Fiat Chrysler Automobiles, General Motors Company, and Ford Motor Company, accounted for approximately 16%, 13% and 8% of our revenue, respectively. We also provide transportation services to other manufacturers who are suppliers for automobile manufacturers. As a result, the concentration of our business within the automobile industry is greater than the concentration in a single customer. Approximately 46% of our revenues for 2018 were derived from transportation services provided to the automobile industry.

Generally, we do not have long-term contractual relationships with our major customers, and we cannot assure that our customer relationships will continue as presently in effect. A reduction in or termination of our services by our major customers could have a material adverse effect on our business and operating results.

We may be adversely impacted by fluctuations in the price and availability of diesel fuel.

Diesel fuel represents a significant operating expense for the Company and we do not currently hedge against the risk of diesel fuel price increases. An increase in diesel fuel prices or diesel fuel taxes, or any change in federal or state regulations that results in such an increase, could have a material adverse effect on our operating results to the extent

we are unable to recoup such increases from customers in the form of increased freight rates or through fuel surcharges. Historically, we have been able to offset, to a certain extent, diesel fuel price increases through fuel surcharges to our customers, but we cannot be certain that we will be able to do so in the future. We continuously monitor the components of our pricing, including base freight rates and fuel surcharges, and address individual account profitability issues with our customers when necessary. While we have historically been able to adjust our pricing to help offset changes to the cost of diesel fuel through changes to base rates and/or fuel surcharges, we cannot be certain that we will be able to do so in the future.

Difficulty in attracting drivers and independent contractors could affect our profitability and ability to grow.

The transportation industry often experiences significant difficulty in attracting and retaining qualified drivers and independent contractors. This shortage is exacerbated by several factors, including demand from competing industries, such as manufacturing, construction and farming, demand from other transportation companies, and the impact of regulations, including CSA and hours of service rules. Economic conditions affecting operating costs such as fuel, insurance, equipment and maintenance costs can negatively impact the number of qualified independent contractors available to us. We have from time to time experienced under-utilization and increased expenses due to a shortage of qualified drivers. If we are unable to attract drivers or contract with independent contractors when needed, we could be required to further adjust our driver compensation packages, increase driver recruiting efforts, or let trucks sit idle, any of which could adversely affect our growth and profitability.

Table of Contents

If we are unable to retain our key employees, our business, financial condition and results of operations could be harmed.

We are highly dependent upon the services of our key employees and executive officers. The loss of any of their services could have a material adverse effect on our operations and future profitability. We must continue to develop and retain a core group of managers if we are to realize our goal of expanding our operations and continuing our growth. We cannot be certain of our ability to retain these key individuals.

Ongoing insurance and claims expenses could significantly reduce our earnings.

Our future insurance and claims expenses might exceed historical levels, which could reduce our earnings. The Company is self-insured for health and workers' compensation insurance coverage up to certain limits. If medical costs continue to increase, or if the severity or number of claims increase, and if we are unable to offset the resulting increases in expenses with higher freight rates, our earnings could be materially and adversely affected. Healthcare legislation and inflationary cost increases could also have a negative effect on our results.

Purchase price increases for new revenue equipment and/or decreases in the value of used revenue equipment could have an adverse effect on our results of operations, cash flows and financial condition.

During the last decade, the purchase price of new revenue equipment has increased significantly as equipment manufacturers recover increased materials and engine design costs resulting from compliance with increasingly stringent EPA engine emission standards. Additional EPA emission mandates in the future could result in higher purchase prices of revenue equipment which could result in higher than anticipated depreciation expenses. If we were unable to offset any such increase in expenses with freight rate increases, our cash flows and results of operations could be adversely affected. If the market price for used revenue equipment declines, we could incur substantial losses upon disposition of our revenue equipment which could adversely affect our results of operations and financial condition.

We have significant ongoing capital requirements that could affect our liquidity and profitability if we are unable to generate sufficient cash from operations or obtain sufficient financing on favorable terms.

The trucking industry is capital intensive. If we are unable to generate sufficient cash from operations in the future, we may have to limit our growth, enter into unfavorable financing arrangements, or operate our revenue equipment for longer periods, any of which could have a material adverse effect on our profitability.

We have a substantial amount of debt, which could restrict our growth, place us at a competitive disadvantage or otherwise materially adversely affect our financial health. Our substantial debt levels could have important consequences such as the following:

• impair our ability to obtain additional future financing for working capital, capital expenditures, acquisitions or general corporate expenses;

• limit our ability to use operating cash flow in other areas of our business due to the necessity of dedicating a substantial portion of these funds for payments on our indebtedness;

• limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

• make it more difficult for us to satisfy our obligations;

• increase our vulnerability to general adverse economic and industry conditions; and

• place us at a competitive disadvantage compared to our competitors.

Table of Contents

Our ability to make scheduled payments on, or to refinance, our debt and other obligations will depend on our financial and operating performance, which, in turn, is subject to our ability to implement our strategic initiatives, prevailing economic conditions and certain financial, business and other factors beyond our control. If our cash flow and capital resources are insufficient to fund our debt service and other obligations, we may be forced to reduce or delay expansion plans and capital expenditures, sell material assets or operations, obtain additional capital or restructure our debt. We cannot provide any assurance that our operating performance, cash flow and capital resources will be sufficient to pay our debt obligations when they become due. We also cannot provide assurance that we would be able to dispose of material assets or operations or restructure our debt or other obligations if necessary or, even if we were able to take such actions, that we could do so on terms that are acceptable to us.

Disruptions in the credit markets may adversely affect our business, including the availability and cost of short-term funds for liquidity requirements and our ability to meet long-term commitments, which could adversely affect our results of operations, cash flows and financial condition.

If cash from operations is not sufficient, we may be required to rely on the capital and credit markets to meet our financial commitments and short-term liquidity needs. Disruptions in the capital and credit markets could adversely affect our ability to draw on our bank revolving credit facility. Our access to funds under the credit facility is dependent on the ability of banks to meet their funding commitments. A bank may not be able to meet their funding commitments if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests from other borrowers within a short period of time.

Longer term disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation, reduced alternatives, or failures of significant financial institutions could adversely affect our access to liquidity needed for our business. Any disruption could require us to take measures to conserve cash until the markets stabilize or until alternative credit arrangements or other funding for our business needs can be arranged, which could adversely affect our growth and profitability.

We operate in a highly regulated industry and increased costs of compliance with, or liability for violation of, existing or future regulations could have a material adverse effect on our business.

Our operations are authorized and regulated by various federal and state agencies in the United States, Mexico and Canada, that generally govern such activities as authorization to engage in motor carrier operations, safety, and financial reporting. Specific standards and regulations such as equipment dimensions, engine emissions, maintenance, drivers' hours of service, drug and alcohol testing, and hazardous materials are regulated by the Department of Transportation, Federal Motor Carrier Safety Administration, the Environmental Protection Agency and various other state and federal agencies. We may become subject to new or more restrictive regulations imposed by these authorities

which could significantly impair equipment and driver productivity and increase operating expenses.

The FMCSA administers carrier safety compliance and enforcement through its CSA program that became effective in December 2010. The program places carriers in peer groups and assigns each carrier a relative ranking compared to their peers in various categories. Carriers that exceed allowable thresholds in a particular category are placed in “intervention” status by the FMCSA until the score improves to a level below the threshold. If future roadside inspections or crashes were to result in the Company being placed in intervention status, we may incur additional operating costs to improve our safety program in deficient categories, experience increased roadside inspections, or have onsite visits by the FMCSA. If the intervention category is not remedied, it could affect our ability to attract and retain drivers and customers as they seek competitive carriers with scores below intervention thresholds. In addition, the CSA program could increase competition and related compensation and recruitment costs for drivers and independent contractors by reducing the pool of qualified drivers if existing drivers exit the profession, become disqualified due to low scores or as carriers focus recruiting efforts on drivers with the best relative safety scores.

Table of Contents

The EPA and the NHTSA jointly developed standards for various vehicles, including heavy duty trucks, that were adopted in August 2011 and cover model years 2014 through 2018. These standards are designed to reduce GHG emissions and improve fuel economy for heavy duty trucks. In August 2016, the EPA and NHTSA finalized the second phase of these standards which will further reduce GHG emissions and fuel consumption for heavy duty trucks through model year 2027. Compliance with these federal and state requirements has increased the cost of our equipment and may further increase the cost of replacement equipment in the future.

The Regulation section in Item 1 of Part I of this Annual Report on Form 10-K discusses several proposed and final regulations that could materially impact our business and operations.

We are subject to certain risks arising from doing business in Mexico.

As we continue to grow our business in Mexico, we are subject to greater risks of doing business internationally, including fluctuations in foreign currencies, changes in the economic strength of Mexico, difficulties in enforcing contractual obligations and intellectual property rights, burdens of complying with a wide variety of international and U.S. export and import laws, and social, political, and economic instability. We also face additional risks associated with our Mexico business, including potential restrictive trade policies and imposition of any import or export taxes, duties, fees, etc. If we are unable to address business concerns related to our international operations in a timely and cost efficient manner, our financial position, results of operations or cash flows could be adversely affected. The agreement permitting cross-border movements for both United States and Mexican based carriers in the United States and Mexico presents additional risks in the form of potential increased competition and the potential for increased congestion in our lanes that cross the border between countries.

A determination by regulators that independent contractors are employees could expose us to various liabilities and additional costs.

Tax and other regulatory authorities often seek to assert that independent contractors in the transportation service industry are employees rather than independent contractors. There can be no assurance that interpretations and tax laws that support the independent contractor status will not change or that various authorities will not successfully assert a position that re-classifies independent contractors to be employees. If our independent contractors are determined to be our employees, that determination could materially increase our exposure under a variety of federal and state tax, workers' compensation, unemployment benefits, labor, employment and tort laws, as well as our potential liability for employee benefits. In addition, such changes may be applied retroactively, and if so, we may be required to pay additional amounts to compensate for prior periods. Any of the above increased costs would adversely affect our business and operating results.

Our results of operations may be affected by seasonal factors.

Our productivity may decrease during the winter season when severe winter weather impedes operations. Also, some shippers may reduce their shipments after the winter holiday season. At the same time, operating expenses may increase and fuel efficiency may decline due to engine idling during periods of inclement weather. Harsh weather conditions generally also result in higher accident frequency, increased freight claims, and higher equipment repair expenditures. In addition, automobile plants for which we transport a large amount of freight typically undergo scheduled shutdowns in July and December, which reduces the volume of automotive freight we ship during these plant shutdowns.

Our business may be disrupted by natural disasters and severe weather conditions causing supply chain disruptions.

Natural disasters such as earthquakes, tsunamis, hurricanes, tornadoes, floods or other adverse weather and climate conditions, whether occurring in the United States or abroad, could disrupt our operations or the operations of our customers or could damage or destroy infrastructure necessary to transport products as part of the supply chain. Specifically, these events may damage or destroy our assets, disrupt fuel supplies, increase fuel costs, disrupt freight shipments or routes, and affect regional economies. As a result, these events could make it difficult or impossible for us to provide logistics and transportation services; disrupt or prevent our ability to perform functions at the corporate level; and/or otherwise impede our ability to continue business operations in a continuous manner consistent with the level and extent of business activities prior to the occurrence of the unexpected event, which could adversely affect our business and results of operations or make our results more volatile.

Table of Contents

We may incur additional operating expenses or liabilities as a result of potential future requirements to address climate change issues.

As global warming issues become more prevalent, federal, state and local governments as well as some of our customers, have made efforts to respond to these issues. This increased focus on sustainability may result in new legislation or regulations and customer requirements that could negatively affect us as we may incur additional costs or be required to make changes to our operations in order to comply with any new regulations or customer requirements. Legislation or regulations that potentially impose restrictions, caps, taxes, or other controls on emissions of greenhouse gases such as carbon dioxide, a by-product of burning fossil fuels such as those used in the Company's trucks, could adversely affect our operations and financial results. More specifically, legislative or regulatory actions relating to climate change could adversely impact the Company by increasing our fuel costs and reducing fuel efficiency and could result in the creation of substantial additional capital expenditures and operating costs in the form of taxes, emissions allowances, or required equipment upgrades. Any of these factors could impair our operating efficiency and productivity and result in higher operating costs. In addition, revenues could decrease if we are unable to meet regulatory or customer sustainability requirements. These additional costs, changes in operations, or loss of revenues could have a material adverse effect on our business, financial condition and results of operations.

Our operations are subject to various environmental laws and regulations, the violation of which could result in substantial fines or penalties.

We are subject to various environmental laws and regulations dealing with the handling of hazardous materials, underground fuel storage tanks, and discharge and retention of storm-water. We operate in industrial areas, where truck terminals and other industrial activities are located, and where groundwater or other forms of environmental contamination could occur. In prior years, we also maintained bulk fuel storage and fuel islands at two of our facilities. Our operations may involve the risks of fuel spillage or seepage, environmental damage, and hazardous waste disposal, among others. If we are involved in a spill or other accident involving hazardous substances, or if we are found to be in violation of applicable laws or regulations, it could have a materially adverse effect on our business and operating results. If we should fail to comply with applicable environmental regulations, we could be subject to substantial fines or penalties and to civil and criminal liability.

If our employees were to unionize, our operating costs would increase and our ability to compete would be impaired.

None of our employees are currently represented by a collective bargaining agreement. However, we can offer no assurance that our employees will not unionize in the future, particularly if legislation is passed that facilitates unionization. If our employees were to unionize, our operating costs would increase and our profitability could be adversely affected.

Our information technology systems are subject to certain cyber security and disaster risks that are beyond our control.

We depend heavily on the proper functioning and availability of our information, communications, and data processing systems, including operating and financial reporting systems, in operating our business. Our operating system is critical in meeting customer expectations, effectively tracking, maintaining and operating our equipment, directing and compensating our employees, and interfacing with our financial reporting system. Our financial reporting system receives, processes, controls and reports information for operating our business and for tabulation into our financial statements.

- 12 -

Table of Contents

While we are not aware of a breach that has resulted in lost productivity or exposure of sensitive information to date, we are aware that our systems are targeted by various viruses and cyber-attacks and expect these efforts to continue. Our systems and those of our technology and communications providers are vulnerable to interruptions caused by natural disasters, power loss, telecommunication and internet failures, cyber-attack, and other events beyond our control. Accordingly, information security and the continued development and enhancement of the controls and processes designed to protect our systems, computers, software, data and networks from attack, damage or unauthorized access remain a priority for us and we maintain information security processes and policies to protect our systems and data from cyber security events and threats.

Although we have processes, policies and procedures in place and our information systems are protected through physical and software security as well as redundant backup systems, they remain susceptible to cyber security risks. Some of our software systems are utilized by third parties who provide outsourced processing services which may increase the risk of a cyber-security incident.

A successful cyber-attack or catastrophic natural disaster could significantly affect our operating and financial systems and could temporarily disrupt our ability to provide required services to our customers, impact our ability to manage our operations and perform vital financial processes, any of which could have a materially adverse effect on our business. In addition, regulatory and enforcement focus on data protection in the U.S., and failure to comply with applicable U.S. data protection regulations or other data protection standards may expose us to litigation, fines, sanctions or other penalties, which could harm our reputation and adversely impact our business, results of operations and financial condition.

We have substantial fixed costs and, as a result, our operating income fluctuates disproportionately with changes in our net sales.

A significant portion of our expenses are fixed costs that neither increase nor decrease proportionately with sales. There can be no assurance that we would be able to reduce our fixed costs proportionately in response to a decline in our sales, and therefore our competitiveness could be significantly impacted. As a result, a decline in our sales would result in a higher percentage decline in our income from operations and net income.

Our financial results may be adversely impacted by potential future changes in accounting standards or practices.

Future changes in accounting standards or practices, and related legal and regulatory interpretations of those changes, may adversely impact public companies in general, the transportation industry or our operations specifically. New accounting standards or requirements, could change the way we account for, disclose and present various aspects of our financial position, results of operations or cash flows and could be costly to implement.

Our business may be harmed by terrorist attacks, future war or anti-terrorism measures.

In order to prevent terrorist attacks, federal, state and municipal authorities have implemented and continue to follow various security measures, including checkpoints and travel restrictions on large trucks. Our international operations in Canada and Mexico may be affected significantly if there are any disruptions or closures of border traffic due to security measures. Such measures may have costs associated with them, which, in connection with the transportation services we provide, we or our independent contractors could be forced to bear. In addition, war or risk of war also may have an adverse effect on the economy. A decline in economic activity could adversely affect our revenue or restrict our future growth. Instability in the financial markets as a result of terrorism or war also could affect our ability to raise capital. In addition, the insurance premiums charged for some or all of the coverage currently maintained by us could increase dramatically or such coverage could be unavailable in the future.

We may be unable to successfully integrate businesses we acquire into our operations.

Integrating businesses we acquire may involve unanticipated delays, costs or other operational or financial problems. Successful integration of the businesses we acquire depends on a number of factors, including our ability to transition acquired companies to our information systems. In integrating businesses we acquire, we may not achieve expected economies of scale or profitability or realize sufficient revenues to justify our investment. We also face the risk that an unexpected problem at one of the companies we acquire will require substantial time and attention from senior management, diverting management's attention from other aspects of our business. We cannot be certain that our management and operational controls will be able to support us as we grow.

Table of Contents

Risks Related to Our Common Stock

The Chairman of our board of directors holds a controlling interest in the Company; therefore, the influence of our public shareholders over significant corporate actions is limited, and we are not subject to certain corporate governance standards that apply to other publicly traded companies.

Matthew T. Moroun, the Chairman of our Board of Directors, and a trust of which Mr. Moroun is a co-trustee together own approximately 65.6% of our outstanding common stock. As a result, Mr. Moroun has the power to:

- control all matters submitted to our shareholders;
- elect our directors;
- adopt, extend or remove any anti-takeover provisions that are available to us; and
- exercise control over our business, policies and affairs.

This concentration of ownership could limit the price that some investors might be willing to pay for shares of our common stock, and our ability to engage in significant transactions, such as a merger, acquisition or liquidation, will require the consent of Mr. Moroun. Conflicts of interest could arise between us and Mr. Moroun, and any conflict of interest may be resolved in a manner that does not favor us. Accordingly, Mr. Moroun could cause us to enter into transactions or agreements of which our other shareholders would not approve or make decisions with which they may disagree. Because of Mr. Moroun's level of ownership, we have elected to be treated as a controlled company in accordance with the rules of the NASDAQ Stock Market. Accordingly, we are not required to comply with NASDAQ Stock Market rules which would otherwise require a majority of our Board to be comprised of independent directors and require our Board to have a compensation committee and a nominating and corporate governance committee comprised of independent directors.

Mr. Moroun may continue to retain control of the Company for the foreseeable future and may decide not to enter into a transaction in which shareholders would receive consideration for our common stock that is much higher than the then-current market price of our common stock. In addition, Mr. Moroun could elect to sell a controlling interest in us to a third-party and our other shareholders may not be able to participate in such transaction or, if they are able to participate in such a transaction, such shareholders may receive less than the then-current fair market value of their shares. Any decision regarding ownership of us that Mr. Moroun may make at some future time will be in his absolute discretion, subject to applicable laws and fiduciary duties.

Our stock trading volume may not provide adequate liquidity for investors.

Although shares of our common stock are traded on the NASDAQ Global Market, the average daily trading volume in our common stock is less than that of other larger transportation and logistics companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of a sufficient number of willing buyers and sellers of the common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which we have no control. Given the daily average trading volume of our common stock, significant sales of the common stock in a brief period of time, or the expectation of these sales, could cause a decline in the price of our common stock. Additionally, low trading volumes may limit a stockholder's ability to sell shares of our common stock.

We currently do not intend to pay future dividends on our common stock.

We currently do not anticipate paying future cash dividends on our common stock. Any determination to pay future dividends and other distributions in cash, stock, or property by the Company in the future will be at the discretion of our Board of Directors and will be dependent on then-existing conditions, including our financial condition and results of operations and contractual restrictions. Therefore, stockholders should not rely on future dividend income from shares of our common stock.

Table of Contents

Item 1B. Unresolved Staff Comments.

None.

Table of Contents**Item 2. Properties.**

Our executive offices and primary terminal facilities, which we own, are located in Tontitown, Arkansas. These facilities are located on approximately 46.1 acres and consist of 153,420 square feet of office space and maintenance and storage facilities.

Our subsidiaries lease facilities in Indianapolis, Indiana; Romulus, Michigan; Tahlequah, Oklahoma; Memphis, Tennessee, and Monterrey, Mexico. Our terminal facilities in North Little Rock, Arkansas; North Jackson, Ohio; Willard, Ohio; and Irving and Laredo, Texas are owned. The leased facilities are leased primarily on contractual terms typically ranging from one to five years and have provisions for early cancellation if we so choose. As of December 31, 2018, the following table provides a summary of the ownership and types of activities conducted at each location:

<u>Location</u>	Own/ Dispatch Maintenance Safety			
	<u>Lease</u>	<u>Office</u>	<u>Facility</u>	<u>Training</u>
Tontitown, Arkansas	Own	Yes	Yes	Yes
North Little Rock, Arkansas	Own	No	Yes	Yes
Indianapolis, Indiana	Lease	No	Yes	No
Romulus, Michigan	Lease	No	Yes	No
North Jackson, Ohio	Own	Yes	Yes	Yes
Willard, Ohio	Own	Yes	Yes	No
Tahlequah, Oklahoma	Lease	No	No	No
Memphis, Tennessee	Lease	No	Yes	No
Irving, Texas	Own	Yes	Yes	Yes
Laredo, Texas	Own	Yes	Yes	Yes
Monterrey, Mexico	Lease	No	No	No

We also have access to trailer drop and relay stations in various other locations across the country. We lease certain of these facilities on a month-to-month basis from affiliates of our largest stockholder.

We believe that all of the properties that we own or lease are suitable for their purposes and adequate to meet our needs.

Item 3. Legal Proceedings.

The nature of our business routinely results in litigation, primarily involving claims for personal injuries and property damage incurred in the transportation of freight. We believe that all such routine litigation is adequately covered by insurance and that adverse results in one or more of those cases would not have a material adverse effect on our financial statements.

We are a defendant in a collective-action lawsuit which was re-filed on December 9, 2016, in the United States District Court for the Western District of Arkansas. The plaintiffs, who are former drivers who worked for the Company during the period of December 6, 2013, through the date of the filing, allege violations under the Fair Labor Standards Act and the Arkansas Minimum Wage Law. The plaintiffs, through their attorneys, have filed causes of action alleging “Failure to pay minimum wage during orientation, failure to pay minimum wage to team drivers after initial orientation, failure to pay minimum wage to solo-drivers after initial orientation, failure to pay for compensable travel time, Comdata card fees, unlawful deductions, and breach of contract.” The plaintiffs are seeking actual and liquidated damages to include court costs and legal fees. The related litigation is ongoing and we cannot reasonably estimate, at this time, the possible loss or range of loss, if any, that may arise from this lawsuit. Management has determined that any losses under this claim will not be covered by existing insurance policies.

Item 4. Mine Safety Disclosures.

Not applicable.

Table of Contents

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is traded on the NASDAQ Global Market under the symbol PTSI. As of February 22, 2019, there were approximately 74 holders of record of our common stock.

Dividends

The Company paid cash dividends of \$1.00 per common share during each of the months of April 2012 and December 2012. No dividends were paid during any year prior to 2012 or subsequent to 2012. Future dividend policy and the payment of dividends, if any, will be determined by the Board of Directors in light of circumstances then existing, including our earnings, financial condition and other factors deemed relevant by the Board of Directors. Currently, the Company does not intend to pay dividends in the foreseeable future.

Repurchases of Equity Securities by the Issuer

The Company’s stock repurchase program has been extended and expanded several times, most recently in April 2017, when the Board of Directors reauthorized 500,000 shares of common stock for repurchase under the initial September 2011 authorization. Since the reauthorization, the Company has repurchased 212,070 shares of its common stock under this repurchase program.

In addition, the Company has repurchased 185,597 shares, 143,859 shares and 567,413 shares during 2018, 2017 and 2016, respectively, through publicly announced Dutch auction tender offers. See “Item 8. Financial Statements and Supplementary Data, Note 9 to the Consolidated Financial Statements – Capital Stock” for additional information regarding these tender offers.

The following table summarizes the Company’s common stock repurchases during the fourth quarter of 2018. No shares were purchased during the quarter other than through the repurchase program described above, and all purchases were made by or on behalf of the Company and not by any “affiliated purchaser.”

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs(1)
October 1-31, 2018	42,266	\$ 59.36	42,266	302,687
November 1-30, 2018	1,704	58.88	1,704	300,983
December 1-31, 2018	13,053	38.94	13,053	287,930
Total	57,023	\$ 54.67	57,023	

(1)The Company’s stock repurchase program does not have an expiration date.

Securities Authorized for Issuance Under Equity Compensation Plans

See Part III, Item 12, “Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters” of this Annual Report for a presentation of compensation plans under which equity securities of the Company are authorized for issuance.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.**Business Overview**

The Company's administrative headquarters are in Tontitown, Arkansas. From this location we manage operations conducted through our wholly owned subsidiaries based in various locations around the United States, Mexico, and Canada. The operations of these subsidiaries can generally be classified into either truckload services or brokerage and logistics services. This designation is based primarily on the ownership of the asset that performed the freight transportation service. Truckload services are performed by Company divisions that generally utilize Company owned trucks, long-term contractors, or single-trip contractors to transport loads of freight for customers, while brokerage and logistics services coordinate or facilitate the transport of loads of freight for customers and generally involve the utilization of single-trip contractors. Both our truckload operations and our brokerage/logistics operations have similar economic characteristics and are impacted by virtually the same economic factors as discussed elsewhere in this Report. All of the Company's operations are in the motor carrier segment.

For both operations, substantially all of our revenue is generated by transporting freight for customers and is predominantly affected by the rates per mile received from our customers, equipment utilization, and our percentage of non-compensated miles. These aspects of our business are carefully managed and efforts are continuously underway to achieve favorable results. Truckload services revenues, excluding fuel surcharges, represented 80.0%, 86.3% and 88.4% of total revenues, excluding fuel surcharges for the twelve months ended December 31, 2018, 2017 and 2016, respectively.

The main factors that impact our profitability on the expense side are costs incurred in transporting freight for our customers. Currently, our most challenging costs include fuel, driver recruitment, training, wage and benefit costs, independent broker costs (which we record as purchased transportation), insurance, and maintenance and capital equipment costs.

Table of Contents

In discussing our results of operations we use revenue, before fuel surcharge (and operating supplies and expense, net of fuel surcharge), because management believes that eliminating the impact of this sometimes volatile source of revenue allows a more consistent basis for comparing our results of operations from period to period. During 2018, 2017 and 2016, approximately \$87.4 million, \$64.3 million and \$50.1 million, respectively, of the Company's total revenue was generated from fuel surcharges. We also discuss certain changes in our expenses as a percentage of revenue, before fuel surcharge, rather than absolute dollar changes. We do this because we believe the high variable cost nature of certain expenses makes a comparison of changes in expenses as a percentage of revenue more meaningful than absolute dollar changes.

Results of Operations - Truckload Services

The following table sets forth, for truckload services, the percentage relationship of expense items to operating revenues, before fuel surcharges, for the periods indicated. Operating supplies and expenses are shown net of fuel surcharges.

	Years Ended December		
	31,		
	2018	2017	2016
Operating revenues, before fuel surcharge	100.0%	100.0%	100.0%
Operating expenses:			
Salaries, wages and benefit	32.4	30.9	32.6
Operating supplies and expenses, net of fuel surcharge	1.5	4.7	9.7
Rent and purchased transportation	34.4	39.9	34.7
Depreciation	13.7	13.1	11.5
Insurance and claims	4.8	5.4	4.9
Other	3.0	2.7	2.4
Gain on sale or disposal of property	(0.1)	(0.0)	(1.4)
Total operating expenses	89.7	96.7	94.4
Operating income	10.3	3.3	5.6
Non-operating (expense) income	(1.0)	1.7	0.4
Interest expense	(1.6)	(1.1)	(1.0)
Income before income taxes	7.7 %	3.9 %	5.0 %

2018 Compared to 2017

For the year ended December 31, 2018, truckload services revenue, before fuel surcharges, increased 10.6% to \$356.6 million as compared to \$322.4 million for the year ended December 31, 2017. The increase relates primarily to a 13.3% increase in our rate per loaded mile, from \$1.51 for the year ended December 31, 2017 to \$1.71 for the year ended December 31, 2018, and to an increase in the average number of trucks in service from 1,835 during 2017 to

1,901 during 2018. These increases were partially offset by a decrease in the average number of miles travelled per day by our trucks in 2018 compared to 2017, which was a result of a decrease in the average length of haul of shipments offered by our customers.

Salaries, wages and benefits increased from 30.9% of revenues, before fuel surcharges, during 2017 to 32.4% of revenues, before fuel surcharges, during 2018. The increase relates primarily to an increase in company driver wages paid during 2018 compared to 2017. The increase in driver wages relates primarily to a per mile pay increase that went into effect during the last week of December 2017, and to route specific raises that were phased in throughout 2018. These per mile pay increases raised the average rate per mile paid to company drivers, which increased driver pay by approximately \$7.4 million for 2018 compared to 2017. In addition, the proportion of total miles driven by company drivers increased as the number of company drivers increased year-over-year. Also contributing to the increase were salaries, wages and benefits paid to regional and short haul drivers, which increased by approximately \$5.1 million for the periods compared. This increase occurred as we expanded our regional dedicated service offerings during 2018.

Table of Contents

Operating supplies and expenses decreased from 4.7% of revenues, before fuel surcharges, during 2017 to 1.5% of revenues, before fuel surcharges, during 2018. The decrease relates primarily to a decrease in the average surcharge-adjusted fuel price paid per gallon of diesel fuel, which was a result of increased fuel surcharge collections from customers. Fuel surcharge collections can fluctuate significantly from period to period as they are generally based on changes in fuel prices from period to period so that, during periods of rising fuel prices, fuel surcharge collections increase, while fuel surcharge collections decrease during periods of falling fuel prices. Fuel surcharge revenue generated from transportation services performed by owner-operators is reflected as a reduction in net operating supplies and expenses, while fuel surcharges paid to owner-operators for their services is reported along with their base rate of pay in the Rent and purchased transportation category. These categorizations have the effect of reducing our net operating supplies and expenses while increasing the Rent and purchased transportation category, as discussed below.

Rent and purchased transportation decreased from 39.9% of revenues, before fuel surcharges, during 2017 to 34.4% of revenues, before fuel surcharges, during 2018. The decrease was primarily due to a reduction in amounts paid for equipment leases during 2018 compared to 2017, as the scheduled expiration of our final truck operating lease occurred during the first quarter of 2018. Trucks leased under these operating leases were replaced with company owned trucks as the scheduled expirations occurred. Also contributing to the decrease was a decrease in the average number of owner-operators under contract from 634 during 2017 to 574 during 2018, partially offset by an increase in the average rate per mile, including fuel surcharges, paid to owner operators during the respective periods.

Depreciation increased from 13.1% of revenues, before fuel surcharges, during 2017 to 13.7% of revenues, before fuel surcharges, during 2018. This increase is primarily the result of an increase in the average number of trucks and trailers owned by the company. As previously discussed, new trucks were purchased to replace trucks returned under expiring operating leases. This transition resulted in a shift in expense from the Rent and purchased transportation category to the Depreciation category as leased trucks were replaced with owned trucks. During 2018, the average number of company owned trucks and trailers increased by 305 and 597, respectively, compared to 2017. The Company uses a three-year and seven-year equipment replacement cycle for trucks and trailers, respectively, and the cost of new trucks and trailers have increased significantly over the previous three-year and seven-year periods. Depreciating higher cost equipment over the same length of time will result in an increase in depreciation expense during the respective period.

Insurance and claims decreased from 5.4% of revenues, before fuel surcharges, during 2017 to 4.8% of revenues, before fuel surcharges, during 2018. This decrease primarily resulted from a decision to become self-insured for property damage on company owned trucks commencing on September 1, 2018. During 2017, the Company paid for property damage coverage for company owned trucks through a third party insurance carrier for the entire year. This coverage was in place through August 31, 2018, when the Company dropped insurance coverage and became self-insured. Also contributing to the decrease as a percentage of revenue, before fuel surcharges, is the interaction of the increase in revenue with the decrease in total miles driven. Miles driven generally serve as the premium basis for the majority of our insurance coverage.

Non-operating income decreased from 1.7% of revenues, before fuel surcharges, during 2017 to a loss of 1.0% of revenue, before fuel surcharges, during 2018. This decrease resulted primarily from the adoption of ASU 2016-01 on January 1, 2018. As discussed in Note 4 to the consolidated financial statements, this standard requires that equity investments be adjusted to market value each period with current period gains and losses in value recorded in net income. Previous guidance generally required that unrealized gains and losses be reported on our consolidated balance sheets in Accumulated Other Comprehensive Income. During 2017, equity investments were sold with pre-tax realized gains of approximately \$4,735,000. During 2018, equity investments were sold with pre-tax realized gains of approximately \$375,000. In addition, our marketable securities portfolio had net unrealized pre-tax losses in market value of approximately \$5,763,000, which was reported as Non-operating expense for 2018.

Table of Contents

Interest expense increased from 1.1% of revenues, before fuel surcharges, during 2017 to 1.6% of revenues, before fuel surcharges, during 2018. This increase is attributable to market increases in interest rates, and to increases in amounts financed by the Company for new equipment. The increase in amounts financed was the result of the replacement of trucks operated under equipment leases during 2017 with company owned trucks, as discussed previously, and to overall growth in the number of company owned trucks and trailers operated within our fleet.

The truckload services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, improved from 96.7% for 2017 to 89.7% for 2018.

2017 Compared to 2016

For the year ended December 31, 2017, truckload services revenue, before fuel surcharges, decreased 4.7% to \$322.4 million as compared to \$338.3 million for the year ended December 31, 2016. The decrease related primarily to a decrease in the number of miles traveled and a decrease in the average revenue per mile. The number of miles traveled decreased from 237.3 million miles during 2016 to 229.4 million miles during 2017, primarily as a result of a decrease in the average number of trucks in service, which decreased from 1,891 during 2016 to 1,835 during 2017.

Salaries, wages and benefits decreased from 32.6% of revenues, before fuel surcharges, during 2016 to 30.9% of revenues, before fuel surcharges, during 2017. The decrease related primarily to a decrease in company driver wages paid during 2017 compared to 2016. Our driver pool consists of both company drivers and third-party owner-operator drivers. Company drivers are employees of the Company and perform services in company-owned equipment while owner-operator drivers provide services, under contract, using their own equipment. While each group is generally compensated on a per-mile basis, owner-operator payments are classified in the Company's financial statements under Rent and purchased transportation. The decrease in Salaries, wages and benefits primarily resulted from a decrease in the overall number of miles driven and to the proportion of total miles driven by company drivers during 2017 compared to 2016. Also contributing to the decrease was a decrease in group health insurance claims under the Company's self-insured health plan during 2017 as compared to 2016.

Operating supplies and expenses decreased from 9.7% of revenues, before fuel surcharges, during 2016 to 4.7% of revenues, before fuel surcharges, during 2017. The decrease relates primarily to a decrease in the average surcharge-adjusted fuel price paid per gallon of diesel fuel. The average surcharge-adjusted fuel price paid per gallon of diesel fuel decreased as a result of increased fuel surcharge collections from customers and to an increase in the proportion of total miles travelled by owner-operators in 2017 compared to 2016. Fuel surcharge collections can fluctuate significantly from period to period as they are generally based on changes in fuel prices from period to period so that, during periods of rising fuel prices, fuel surcharge collections increase, while fuel surcharge collections decrease during periods of falling fuel prices. Fuel surcharge revenue generated from transportation services performed by owner-operators is reflected as a reduction in net operating supplies and expenses, while fuel surcharges paid to owner-operators for their services is reported along with their base rate of pay in the Rent and purchased

transportation category. These categorizations have the effect of reducing our net operating supplies and expenses while increasing the Rent and purchased transportation category, as discussed below. Also contributing to the decrease was a decrease in amounts paid for driver recruiting and to driver training schools during 2017 as compared to amounts paid during 2016.

Rent and purchased transportation increased from 34.7% of revenues, before fuel surcharges, during 2016 to 39.9% of revenues, before fuel surcharges, during 2017. The increase was primarily due to an increase in driver lease expense as average number of owner-operator trucks under contract increased from 557 during 2016 to 634 during 2017. The increase in costs in this category, as it relates to the increase in owner-operators, is partially offset by a decrease in other cost categories, such as repairs and fuel, which are generally borne by the owner-operator.

- 23 -

Table of Contents

Depreciation increased from 11.5% of revenues, before fuel surcharges, during 2016 to 13.1% of revenues, before fuel surcharges, during 2017. The increase relates primarily to an increase in equipment acquisition costs, increases in the size of the Company's owned truck and trailer fleet, and to a change in the estimated residual values of certain equipment. The Company uses a three-year and seven-year equipment replacement cycle for trucks and trailers, respectively, and the cost of new trucks and trailers have increased significantly over the previous three-year and seven-year periods. Depreciating higher cost equipment over the same length of time will result in an increase in depreciation expense during the respective period. During 2017, the company-owned trailer fleet increased by 328 trailers as rented trailers were turned in and replaced by company owned trailers. The number of company owned trucks being depreciated increased as trucks used under operating leases were turned in and replaced by company owned equipment. In addition, year over year depreciation increased due to a reduction in expected residual values of certain groups of trucks in August 2016 due to a prolonged depressed used truck market. The reduction in expected residual values resulted in additional depreciation expense of approximately \$2.7 million during 2017 compared to \$1.3 million during 2016.

Gains and losses on sale or disposal of property decreased from a net gain of 1.4% of revenues, before fuel surcharges, during 2016 to less than 0.05% of revenues, before fuel surcharges, during 2017. The decrease relates primarily to fewer trailers being sold during 2017 as compared to 2016 and to the continued depressed market for used equipment.

The truckload services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, increased to 96.7% for 2017 from 94.4% for 2016.

Results of Operations - Logistics and Brokerage Services

The following table sets forth, for logistics and brokerage services, the percentage relationship of expense items to operating revenues, before fuel surcharges, for the periods indicated. Brokerage operations occur specifically in certain divisions; however, brokerage operations occur throughout the Company in similar operations having substantially similar economic characteristics. Rent and purchased transportation, which includes costs paid to third party carriers, are shown net of fuel surcharges.

	Years Ended December		
	31,		
	2018	2017	2016
Operating revenues, before fuel surcharge	100.0%	100.0%	100.0%
Operating expenses:			
Salaries, wages and benefits	4.6	4.9	4.5
Rent and purchased transportation	88.1	89.8	92.5
Insurance and claims	0.1	0.1	0.0
Other	1.6	1.2	0.6

Total operating expenses	94.4	96.0	97.6
Operating income	5.6	4.0	2.4
Non-operating (expense) income	(0.5)	0.8	0.1
Interest expense	(0.7)	(0.6)	(0.5)
Income before income taxes	4.4 %	4.2 %	2.0 %

2018 Compared to 2017

For the year ended December 31, 2018, logistics and brokerage services revenues, before fuel surcharges, increased 74.7% to \$89.3 million as compared to \$51.1 million for the year ended December 31, 2017. The increase was primarily the result of an increase in the number of loads brokered and to improvement in freight rates during 2018 as compared to 2017.

Salaries, wages and benefits decreased from 4.9% of revenues, before fuel surcharges, in 2017 to 4.6% of revenues, before fuel surcharges, in 2018. This decrease primarily relates to increases in freight rates outpacing employee wage growth and to efficiency improvements in our brokerage and logistics operations which allowed improvements in the quantity of loads booked per employee to increase year over year.

Rent and purchased transportation decreased from 89.8% of revenues, before fuel surcharges, in 2017 to 88.1% of revenues, before fuel surcharges, in 2018. The decrease results from paying third party carriers a smaller percentage of customer revenue.

Table of Contents

The logistics and brokerage services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, improved from 96.0% for 2017 to 94.4% for 2018.

2017 Compared to 2016

For the year ended December 31, 2017, logistics and brokerage services revenues, before fuel surcharges, increased 15.1% to \$51.1 million as compared to \$44.4 million for the year ended December 31, 2016. The increase was primarily the result of an increase in the number of loads brokered during 2017 as compared to 2016.

Salaries, wages and benefits increased from 4.5% of revenues, before fuel surcharges, in 2016 to 4.9% of revenues, before fuel surcharges, in 2017. The increase related to an increase in wages paid to employees assigned to the logistics and brokerage division during 2017 as compared to 2016 and to an increase in the number of employees assigned to the logistics and brokerage services division.

Rent and purchased transportation decreased from 92.5% of revenues, before fuel surcharges, in 2016 to 89.8% of revenues, before fuel surcharges, in 2017. The decrease resulted from paying third party carriers a smaller percentage of customer revenue.

The logistics and brokerage services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, improved to 96.0% for 2017 from 97.6% for 2016.

Results of Operations - Combined Services

2018 Compared to 2017

Income tax expense was approximately \$7.3 million in 2018, resulting in an effective rate of 23.4%, as compared to an income tax benefit of approximately \$(24.3) million in 2017, resulting in an effective rate of (165.9%). This increase primarily resulted from tax benefits in 2017 resulting from the passage of the Tax Cuts and Jobs Act on December 22, 2017. The Company recorded a tax benefit of \$29.3 million in the fourth quarter 2017 related to the revaluation of its net deferred tax attributes. This benefit to 2017 was partially offset by a reduction in the federal corporate income tax rate from 35% in 2017 to 21% effective January 1, 2018. The effective tax rate is also impacted by the existence of partially non-deductible meal and incidental expense per-diem payments to company drivers.

Per-diem payments may cause a significant difference in the Company's effective tax rate from period-to-period as the proportion of non-deductible expenses to pre-tax net income increases or decreases.

In determining whether a tax asset valuation allowance is necessary, management, in accordance with the provisions of Accounting Standards Codification ("ASC") 740-10-30, weighs all available evidence, both positive and negative to determine whether, based on the weight of that evidence, a valuation allowance is necessary. If negative conditions exist which indicate a valuation allowance might be necessary, consideration is then given to what effect the future reversals of existing taxable temporary differences and the availability of tax strategies might have on future taxable income to determine the amount, if any, of the required valuation allowance. As of December 31, 2018, management determined that the future reversals of existing taxable temporary differences and available tax strategies would generate sufficient future taxable income to realize its tax assets and therefore a valuation allowance was not necessary.

The Company recognizes a tax benefit from an uncertain tax position only if it is more likely than not that the position will be sustained on examination by taxing authorities, based on the technical merits of the position. As of December 31, 2018, an adjustment to the Company's consolidated financial statements for uncertain tax positions has not been required as management believes that the Company's tax positions taken in income tax returns filed or to be filed are supported by clear and unambiguous income tax laws. The Company recognizes interest and penalties related to uncertain income tax positions, if any, in income tax expense. During 2018 and 2017, the Company has not recognized or accrued any interest or penalties related to uncertain income tax positions.

Table of Contents

The Company and its subsidiaries are subject to U.S. and Canadian federal income tax laws as well as the income tax laws of multiple state jurisdictions. The major tax jurisdictions in which we operate generally provide for a deficiency assessment statute of limitation period of three years and as a result, the Company's tax years 2015 and forward remain open to examination in those jurisdictions.

The combined net income for all divisions was \$24.0 million, or 5.4% of revenues, before fuel surcharge, for 2018 as compared to the combined net income for all divisions of \$38.9 million or 10.4% of revenues, before fuel surcharge, for 2017. The decrease in net income resulted in a decrease in diluted earnings per share to \$3.90 for 2018 from a diluted earnings per share of \$6.08 for 2017.

2017 Compared to 2016

Income tax benefit was approximately \$(24.3) million in 2017 resulting in an effective rate of (165.9%), as compared to an income tax expense of approximately \$6.7 million in 2016 resulting in an effective rate of 37.5%.

On December 22, 2017, the Tax Cuts and Jobs Act (the "Act") was signed into law. The Act included numerous changes to tax laws, including a permanent reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 and repeal of the alternative minimum tax ("AMT") allowing a refund of existing AMT carryovers during the years 2018 through 2021. As a result, the Company recorded a tax benefit of \$29.3 million in the fourth quarter of 2017 related to the revaluation of its net deferred tax attributes. In addition, the effective tax rate was also impacted by the existence of partially non-deductible meal and incidental expense per-diem payments to company drivers. Per-diem payments may cause a significant difference in the Company's effective tax rate from period-to-period as the proportion of non-deductible expenses to pre-tax net income increases or decreases.

The combined net income for all divisions was \$38.9 million, or 10.4% of revenues, before fuel surcharge, for 2017 as compared to the combined net income for all divisions of \$11.1 million, or 2.9% of revenues, before fuel surcharge, for 2016. The increase in net income resulted in an increase in diluted earnings per share to \$6.08 for 2017 from a diluted earnings per share of \$1.67 for 2016.

Quarterly Results of Operations

The following table presents selected consolidated financial information for each of our last eight fiscal quarters through December 31, 2018. The information has been derived from unaudited consolidated financial statements that, in the opinion of management, reflect all adjustments, consisting of normal recurring adjustments, necessary for a fair

presentation of the quarterly information.

	Quarter Ended							
	Mar. 31,	June 30,	Sept. 30,	Dec. 31,	Mar. 31,	June 30,	Sept. 30,	Dec. 31,
	2018	2018	2018	2018	2017	2017	2017	2017
	(unaudited)							
	(in thousands, except earnings per share data)							
Operating revenues	\$119,458	\$135,302	\$140,325	\$138,176	\$109,405	\$108,646	\$108,899	\$110,888
Total operating expenses	115,702	125,285	127,172	123,500	106,743	105,748	105,131	107,536
Operating income	3,756	10,017	13,153	14,676	2,662	2,898	3,768	3,352
Net income	1,387	7,289	9,248	6,070	2,283	1,609	3,446	31,561
Income per common share:								
Basic	\$0.22	\$1.18	\$1.53	\$1.02	\$0.36	\$0.25	\$0.54	\$5.07
Diluted	\$0.22	\$1.17	\$1.52	\$1.01	\$0.36	\$0.25	\$0.54	\$5.00

Liquidity and Capital Resources

Our business has required, and will continue to require, a significant investment in new revenue equipment. Our primary sources of liquidity have been funds provided by operations, proceeds from the sales of revenue equipment, borrowings under our lines of credit, installment notes and investment margin account, and issuances of equity securities.

Table of Contents

During 2018, we generated \$82.3 million in cash from operating activities compared to \$50.6 million and \$47.7 million in 2017 and 2016, respectively. Investing activities used \$55.3 million in cash during 2018 compared to \$45.3 million and \$53.1 million in 2017 and 2016, respectively. The cash used for investing activities in all three years related primarily to the purchase of revenue equipment such as trucks and trailers and related equipment such as auxiliary power units. Financing activities used \$27.0 million in cash during 2018 compared to using \$5.2 million during 2017 and providing \$5.4 million during 2016. See the Consolidated Statements of Cash Flows in Item 8 of this Report.

Our primary use of funds is for the purchase of revenue equipment. We typically use installment notes, our existing lines of credit on an interim basis, proceeds from the sale or trade of equipment, and cash flows from operations, to finance capital expenditures and repay long-term debt. During 2018 and 2017, we utilized cash on hand, installment notes, and our lines of credit to finance revenue equipment purchases of approximately \$140.4 million and \$66.8 million, respectively.

We often finance the acquisition of revenue equipment through installment notes with fixed interest rates and terms ranging from 36 to 84 months. At December 31, 2018, the Company's subsidiaries had combined outstanding indebtedness under such installment notes of \$211.0 million. These installment notes are payable in monthly installments, ranging from 36 monthly installments to 84 monthly installments, at a weighted average interest rate of 3.61%. At December 31, 2017, the Company's subsidiaries had combined outstanding indebtedness under such installment notes of \$172.6 million. These installment notes were payable in monthly installments, ranging from 36 to 84 months at a weighted average interest rate of 2.52%.

In order to maintain our truck and trailer fleet count, it is often necessary to purchase replacement units and place them in service before trade units are removed from service. The timing of this process often requires the Company to pay for new units without any reduction in price for trade units. In this situation, the Company later receives payment for the trade units as they are delivered to the equipment vendor and have passed vendor inspection. During the twelve months ended December 31, 2018 and 2017, the Company received approximately \$11.9 million and \$15.7 million, respectively, for units delivered for trade.

During 2018, the Company maintained a \$40.0 million revolving line of credit. Amounts outstanding under the line bear interest at LIBOR (determined as of the first day of each month) plus 1.50% (3.85% at December 31, 2018), are secured by our trade accounts receivable and mature on July 1, 2020. At December 31, 2018, outstanding advances on the line were approximately \$10.9 million, including approximately \$0.7 million in letters of credit with availability to borrow \$29.1 million. On January 25, 2019, certain terms of this revolving line of credit were amended to increase the borrowing limit to \$60.0 million, extend the term by one year, reduce the interest rate by 25 basis points and make certain other changes. See "Item 8. Financial Statements and Supplementary Data, Note 1 to the Consolidated Financial Statements - Subsequent Events" for additional information.

Trade accounts receivable increased from \$59.1 million at December 31, 2017 to \$63.4 million at December 31, 2018. The increase relates to a general increase in freight revenue and fuel surcharge revenue, which flows through the accounts receivable account, during 2018 as compared to the freight revenue and fuel surcharge revenue generated during 2017.

Marketable equity securities at December 31, 2018 increased approximately \$0.9 million as compared to December 31, 2017. The increase resulted from purchases of marketable equity securities of \$7.3 million, offset by sales of marketable equity securities of approximately \$1.0 million and a decrease in the market value of the portfolio of approximately \$5.4 million. At December 31, 2018, the remaining marketable equity securities have a combined cost basis of approximately \$25.6 million and a combined fair market value of approximately \$27.6 million. The Company has developed a strategy to invest in securities from which it expects to receive dividends that qualify for favorable tax treatment, as well as appreciate in value. The Company anticipates that increases in the market value of the investments combined with dividend payments will exceed interest rates paid on borrowings for the same period. During 2018, the Company received dividends of approximately \$1.2 million. The holding term of these securities depends largely on the general economic environment, the equity markets, borrowing rates, and the Company's cash requirements.

Table of Contents

Revenue equipment at December 31, 2018, which generally consists of trucks, trailers, and revenue equipment accessories such as Qualcomm™ satellite tracking units and auxiliary power units, increased approximately \$81.3 million as compared to December 31, 2017. The increase relates primarily to the replacement of trucks that had been leased under operating leases with new company owned trucks and to growth in both our company owned tractor and trailer fleet size. The increase is also reflective of the higher purchase price of new trucks and trailers compared to the trucks and trailers which are being replaced and sold.

Current maturities of long term-debt and long-term debt fluctuations are reviewed on an aggregate basis as the classification of amounts in each category are typically affected merely by the passage of time. Current maturities of long-term debt and long-term debt, on an aggregate basis, at December 31, 2018, increased approximately \$48.6 million as compared to December 31, 2017. The increase was related to additional borrowings on our revolving line of credit and on installment notes received during 2018, net of the principal portion of scheduled installment note payments made during 2018.

For 2019, we expect to purchase 500 new trucks and 500 new trailers while continuing to sell or trade equipment that has reached the end of its life cycle, which we expect to result in net capital expenditures of approximately \$62.4 million. Management believes we will be able to finance our existing needs for working capital over the next twelve months, as well as acquisitions of revenue equipment during such period, with cash balances, cash flows from operations, and borrowings believed to be available from financing sources. We will continue to have significant capital requirements over the long-term, which may require us to incur debt or seek additional equity capital. The availability of additional capital will depend upon prevailing market conditions, the market price of our common stock and several other factors over which we have limited control, as well as our financial condition and results of operations. Nevertheless, based on our anticipated future cash flows and sources of financing that we expect will be available to us, we do not expect that we will experience any significant liquidity constraints in the foreseeable future.

Contractual Obligations and Commercial Commitments

The following table sets forth the Company's contractual obligations and commercial commitments as of December 31, 2018:

Payments due by period

(in thousands)

	Less than	1 to 3 Years	3 to 5 Years	More than 5 Years
Total	1 year	Years	Years	5 Years

Long-term debt (1)	\$229,663	\$70,805	\$94,066	\$59,801	\$4,991
Operating leases (2)	284	284	-	-	-
Total	\$229,947	\$71,089	\$94,066	\$59,801	\$4,991

(1) Including interest.

(2) Represents building, facilities, and drop yard operating leases.

Off-Balance Sheet Arrangements

At December 31, 2018 the Company did not have any equipment operating leases or other arrangements that meet the definition of an off-balance sheet arrangement.

At December 31, 2017, the Company operated 56 trucks under operating lease agreements. These trucks were turned in pursuant to the lease agreement in January 2018. The trucks held under operating leases were not carried on our balance sheet and the respective lease payments were reflected in our consolidated statements of operations as a component of the caption "Rents and purchased transportation." Rent expense related to the trucks under the operating lease agreements totaled approximately \$5.5 million for the year ended December 31, 2017.

Table of Contents

Insurance

The Company maintains certain insurance coverage for auto liability and cargo loss risks as well as other general business risks. This coverage is provided through insurance policies with various insurance carriers which have per occurrence deductibles of up to \$10,000. The Company maintains workers' compensation coverage in Arkansas, Ohio, Oklahoma, Mississippi, and Florida with a \$500,000 self-insured retention and a \$500,000 per occurrence excess policy. The Company has elected to opt out of workers' compensation coverage in Texas and is providing coverage through the P.A.M. Texas Injury Plan. The Company has reserved for estimated losses to pay such claims as well as claims incurred but not yet reported. The Company has not experienced any adverse trends involving differences in claims experienced versus claims estimates for workers' compensation claims. Letters of credit aggregating approximately \$515,000 and certificates of deposit totaling \$300,000 are held by banks as security for workers' compensation claims. The Company self-insures for employee health claims with a stop loss of \$325,000 per covered employee per year and estimates its liability for claims incurred but not reported.

Inflation

Inflation has an impact on most of our operating costs. Over the past three years, the effect of inflation has been minimal.

Adoption of Accounting Policies

See "Item 8. Financial Statements and Supplementary Data, Note 1 to the Consolidated Financial Statements - Recent Accounting Pronouncements."

Critical Accounting Policies

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to adopt accounting policies and make significant judgments and estimates that impact the amounts reported in our consolidated financial statements and accompanying notes. Therefore, the reported amounts of assets, liabilities, revenue, expenses, and associated disclosures of contingent assets and liabilities are affected by judgments and estimates. In many cases, there are alternative assumptions, policies, or estimation techniques that could be used. Management evaluates its assumptions, policies, and estimates on an ongoing basis, utilizing historical experience, and other methods considered reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates and assumptions, and it is possible that materially different

amounts would be reported using differing estimates or assumptions. Management considers our critical accounting policies to be those that require more significant judgments and estimates when we prepare our consolidated financial statements. Our critical accounting policies include the following:

Accounts receivable and allowance for doubtful accounts. Accounts receivable are presented in the Company's consolidated financial statements net of an allowance for estimated uncollectible amounts. Management estimates this allowance based upon an evaluation of the aging of our customer receivables and historical write-offs, as well as other trends and factors surrounding the credit risk of specific customers. The Company continually updates the history it uses to make these estimates so as to reflect the most recent trends, factors and other information available. In order to gather information regarding these trends and factors, the Company also performs ongoing credit evaluations of its customers. Customer receivables are considered to be past due when payment has not been received by the invoice due date. Write-offs occur when we determine an account to be uncollectible and could differ from the allowance estimate as a result of a number of factors, including unanticipated changes in the overall economic environment or factors and risks surrounding a particular customer. Management believes its methodology for estimating the allowance for doubtful accounts to be reliable; however, additional allowances may be required if the financial condition of our customers were to deteriorate and could have a material effect on the Company's consolidated financial statements.

Table of Contents

Depreciation of trucks and trailers. Depreciation of trucks and trailers is calculated by the straight-line method over the assets estimated useful life, which range from three to seven years, down to an estimated salvage value at the end of the assets estimated useful life. Management must use its judgment in the selection of estimated useful lives and salvage values for purposes of this calculation. In some cases, the Company has agreements in place with certain manufacturers whereby salvage values are guaranteed by the manufacturer. In other cases, where salvage values are not guaranteed, estimates of salvage value are based on the expected market values of equipment at the time of disposal.

The depreciation of trucks and trailers over their estimated useful lives and the determination of any salvage value also require management to make judgments about future events. Therefore, the Company's management periodically evaluates whether changes to estimated useful lives or salvage values are necessary to ensure these estimates accurately reflect the economic reality of the assets. This periodic evaluation may result in changes in the estimated lives and/or salvage values used by the Company to depreciate its assets, which can affect the amount of periodic depreciation expense recognized and, ultimately, the gain or loss on the disposal of an asset. Future changes in our estimated useful life or salvage value estimates, or fluctuations in market value that are not reflected in current estimates, could have a material effect on the Company's consolidated financial statements.

Impairment of long-lived assets. Long-lived assets are reviewed for impairment in accordance with ASC Topic 360, "Property, Plant, and Equipment." This authoritative guidance provides that whenever there are certain significant events or changes in circumstances the value of long-lived assets or groups of assets must be tested to determine if their value can be recovered from their future cash flows. In the event that undiscounted cash flows expected to be generated by the asset are less than the carrying amount, the asset or group of assets must be evaluated for impairment. Impairment exists if the carrying value of the asset exceeds its fair value.

Significantly all of the Company's cash flows from operations are generated by trucks and trailers, and as such, the cost of other long-lived assets are funded by those operations. Therefore, management tests for the recoverability of all of the Company's long-lived assets as a single group at the entity level and examines the forecasted future cash flows generated by trucks and trailers, including their eventual disposition, to determine if those cash flows exceed the carrying value of the long-lived assets. Forecasted cash flows are estimated using assumptions about future operations. To the extent that facts and circumstances change in the future, our estimates of future cash flows may also change either positively or negatively. In light of the Company's market capitalization during 2018 and net operating profits of the Company for the years ended December 31, 2018 and 2017, no impairment indicators existed which required management to test the Company's long-lived assets for recoverability as of December 31, 2018. As such, no impairment losses were recorded during 2018.

Claims accruals. The Company is self-insured for health and workers' compensation benefits up to certain stop-loss limits. Such costs are accrued based on known claims and an estimate of incurred but not reported (IBNR) claims. IBNR claims are estimated using historical lag information and other data either provided by outside claims administrators or developed internally. Actual claims payments may differ from management's estimates as a result of a number of factors, including evaluation of severity, increases in legal or medical costs, and other case-specific

factors. The actual claims payments are charged against the Company's recorded accrued claims liabilities and have been reasonable with respect to the estimates of the liabilities made under the Company's methodology. However, the estimation process is generally subjective, and to the extent that future actual results materially differ from original estimates made by management, adjustments to recorded accruals may be necessary which could have a material effect on the Company's consolidated financial statements. Based upon our 2018 health and workers' compensation expenses, a 10% increase in both claims incurred and IBNR claims, would increase our annual health and workers' compensation expenses by approximately \$0.6 million.

Revenue recognition. Revenue is recognized over time as freight progresses towards its destination and the transportation service obligation is fulfilled. For loads picked up during the reporting period, but delivered in a subsequent reporting period, revenue is allocated to each period based on the transit time in each period as a percentage of total transit time. See "Item 8. Financial Statements and Supplementary Data, Note 2 to the Consolidated Financial Statements – Revenue Recognition."

Table of Contents

Income Taxes. The Company's deferred tax assets and liabilities represent items that will result in taxable income or a tax deduction in future years for which the Company has already recorded the related tax expense or benefit in its consolidated statements of operations. Deferred tax accounts arise as a result of timing differences between when items are recognized in the Company's consolidated financial statements compared to when they are recognized in the Company's tax returns. In establishing the Company's deferred income tax assets and liabilities, management makes judgments and interpretations based on the enacted tax laws and published tax guidance that are applicable to its operations. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

In determining whether a tax asset valuation allowance is necessary, management, in accordance with the provisions of ASC 740-10-30, weighs all available evidence, both positive and negative to determine whether, based on the weight of that evidence, a valuation allowance is necessary. If negative conditions exist which indicate a valuation allowance might be necessary, consideration is then given to what effect the future reversals of existing taxable temporary differences and the availability of tax strategies might have on future taxable income to determine the amount, if any, of the required valuation allowance. Significant management judgment is required as it relates to future taxable income, future capital gains, tax settlements, valuation allowances, and the Company's ability to utilize tax loss and credit carryforwards. As of December 31, 2018, management determined that the future reversals of existing taxable temporary differences and available tax strategies would generate sufficient future taxable income to realize its tax assets and therefore a valuation allowance was not necessary.

Management believes that future tax consequences have been adequately provided for based on the current facts and circumstances and current tax law. However, should current circumstances change or the Company's tax positions be challenged, different outcomes could result which could have a material effect on the Company's consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Our primary market risk exposures include equity price risk, interest rate risk, commodity price risk (the price paid to obtain diesel fuel for our trucks), and foreign currency exchange rate risk. The potential adverse impact of these risks are discussed below. While the Company has used derivative financial instruments in the past to manage its interest rate and commodity price risks, the Company does not currently enter into such instruments for risk management purposes or for speculation or trading.

The following sensitivity analyses do not consider the effects that an adverse change may have on the overall economy nor do they consider additional actions we may take to mitigate our exposure to such changes. Actual results of changes in prices or rates may differ materially from the hypothetical results described below.

Equity Price Risk

We hold certain actively traded marketable equity securities, which subjects the Company to fluctuations in the fair market value of its investment portfolio based on current market price. The recorded value of marketable equity securities increased to \$27.5 million at December 31, 2018 from \$26.7 million at December 31, 2017. The increase resulted from purchases of marketable equity securities of approximately \$7.3 million, offset by sales of marketable equity securities of approximately \$1.0 million and a decrease in market value of the portfolio of approximately \$5.4 million. A 10% decrease in the market price of our marketable equity securities would cause a corresponding 10% decrease in the carrying amounts of these securities, or approximately \$2.8 million. For additional information with respect to the marketable equity securities, see “Item 8. Financial Statements and Supplementary Data, Note 4 to the Consolidated Financial Statements – Marketable Equity Securities.”

Table of Contents

Interest Rate Risk

Our line of credit bears interest at a floating rate equal to LIBOR plus a fixed percentage. Accordingly, changes in LIBOR, which are affected by changes in interest rates, will affect the interest rate on, and therefore our costs under, the line of credit. Assuming \$10.2 million of variable rate debt was outstanding under our line of credit for a full fiscal year; a hypothetical 100 basis point increase in LIBOR would result in approximately \$102,000 of additional interest expense.

Commodity Price Risk

Prices and availability of all petroleum products are subject to political, economic and market factors that are generally outside of our control. Accordingly, the price and availability of diesel fuel, as well as other petroleum products, can be unpredictable. Because our operations are dependent upon diesel fuel, significant increases in diesel fuel costs could materially and adversely affect our results of operations and financial condition. Based upon our 2018 fuel consumption, a 10% increase in the average annual price per gallon of diesel fuel would increase our annual fuel expenses by approximately \$5.2 million.

Foreign Currency Exchange Rate Risk

We are exposed to foreign currency exchange rate risk related to the activities of our branch office located in Mexico. Currently, we do not hedge our exchange rate exposure through any currency forward contracts, currency options, or currency swaps as all of our revenues, and substantially all of our expenses and capital expenditures, are transacted in U.S. dollars. However, certain operating expenditures and capital purchases related to our Mexico branch office are incurred within or exposed to fluctuations in the exchange rate between the U.S. Dollar and the Mexican peso. Based on 2018 expenditures denominated in pesos, a 10% decrease in the exchange rate would increase our annual operating expenses by approximately \$267,000.

Item 8. Financial Statements and Supplementary Data.

The following statements are filed with this report:

Report of Independent Registered Public Accounting Firm – Grant Thornton LLP

Edgar Filing: PAM TRANSPORTATION SERVICES INC - Form 10-K

Consolidated Balance Sheets - December 31, 2018 and 2017

Consolidated Statements of Operations - Years ended December 31, 2018, 2017 and 2016

Consolidated Statements of Comprehensive Income - Years ended December 31, 2018, 2017 and 2016

Consolidated Statements of Stockholders' Equity - Years ended December 31, 2018, 2017 and 2016

Consolidated Statements of Cash Flows - Years ended December 31, 2018, 2017 and 2016

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

P.A.M. Transportation Services, Inc.

Opinion on the financial statements

We have audited the accompanying consolidated balance sheets of P.A.M. Transportation Services, Inc. (a Delaware corporation) and subsidiaries (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income, changes in stockholders’ equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in the 2013 Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”), and our report dated March 12, 2019 expressed an unqualified opinion.

Basis for opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our

audits provide a reasonable basis for our opinion.

/s/ GRANT THORNTON LLP

We have served as the Company's auditor since 2005.

P.A.M. TransportATIOn SERVICES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2018, 2017 AND 2016

1. ACCOUNTING POLICIES

Description of Business and Principles of Consolidation—P.A.M. Transportation Services, Inc. (the “Company”), through its subsidiaries, operates as a truckload transportation and logistics company.

The consolidated financial statements include the accounts of the Company and its wholly owned operating subsidiaries: P.A.M. Transport, Inc., P.A.M. Cartage Carriers, LLC, Overdrive Leasing, LLC, Choctaw Express, LLC, Decker Transport Co., LLC, T.T.X., LLC, Transcend Logistics, Inc., and East Coast Transport and Logistics, LLC. The following subsidiaries were inactive during all periods presented: P.A.M. International, Inc., P.A.M. Logistics Services, Inc., Choctaw Brokerage, Inc., and S & L Logistics, Inc.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the financial statement date and reported amounts of revenue and expenses during the reporting period. The Company periodically reviews these estimates and assumptions. The Company's estimates were based on its historical experience and various other assumptions that management believes to be reasonable under the circumstances. Actual results could differ from those estimates.

Cash and Cash Equivalents—The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. At times cash held at banks may exceed FDIC insured limits.

Accounts Receivable and Allowance for Doubtful Accounts—Accounts receivable are presented in the Company's consolidated financial statements net of an allowance for estimated uncollectible amounts. Management estimates this allowance based upon an evaluation of the aging of our customer receivables and historical write-offs, as well as other trends and factors surrounding the credit risk of specific customers. The Company continually updates the history it uses to make these estimates so as to reflect the most recent trends, factors and other information available. In order to gather information regarding these trends and factors, the Company also performs ongoing credit evaluations of its

customers. Customer receivables are considered to be past due when payment has not been received by the invoice due date. Write-offs occur when management determines an account to be uncollectible and could differ from the allowance estimate as a result of a number of factors, including unanticipated changes in the overall economic environment or factors and risks surrounding a particular customer. Management believes its methodology for estimating the allowance for doubtful accounts to be reliable. However, additional allowances may be required if the financial condition of our customers were to deteriorate, and could have a material effect on the Company's consolidated financial statements in future periods.

Bank Overdrafts—The Company classifies bank overdrafts in current liabilities as accounts payable and does not offset other positive bank account balances located at the same or other financial institutions. Bank overdrafts generally represent checks written that have not yet cleared the Company's bank accounts. The majority of the Company's bank accounts are zero balance accounts that are funded at the time items clear against the account by drawings against a line of credit; therefore, the outstanding checks represent bank overdrafts. Because the recipients of these checks have generally not yet received payment, the Company continues to classify bank overdrafts as accounts payable. Bank overdrafts are classified as changes in accounts payable in the cash flows from operating activities section of the Company's Consolidated Statement of Cash Flows. Bank overdrafts as of December 31, 2018 and 2017 were approximately \$3,669,000 and \$4,377,000, respectively.

Table of Contents

Accounts Receivable Other—The components of accounts receivable other consist primarily of amounts representing company driver advances, independent contractor advances, and equipment manufacturer warranties. Advances receivable from company drivers as of December 31, 2018 and 2017, were approximately \$220,000 and \$448,000, respectively. Accounts receivable from independent contractors as of December 31, 2018 and 2017, were approximately \$1,724,000 and \$1,813,000, respectively. Independent contractors are allowed to purchase items such as fuel, repairs and tolls on Company accounts in order to share in favorable pricing negotiated by the Company. Independent contractors and trip lease carriers are also allowed to receive advances for a portion of the revenue that they expect to receive for loads that they transport for the Company.

Marketable Equity Securities— The Company’s investment in marketable equity securities is accounted for in accordance with ASC Topic 321, (“ASC Topic 321”), Investments-Equity Securities. ASC Topic 321 requires companies to measure equity investments at fair value, with changes in fair value recognized in net income. The Company’s investments in marketable securities consist of equity securities with readily determinable fair values. The cost of securities sold is based on the specific identification method. Realized and unrealized gains and losses, interest and dividends on marketable equity securities are included in non-operating income (expense) in our consolidated statements of operations.

Prior to the adoption of ASU 2016-01 on January 1, 2018, marketable equity securities were classified by the Company as either available for sale or trading. Securities classified as available for sale were carried at market value with unrealized gains and losses recognized in accumulated other comprehensive income in the statements of stockholders’ equity. Securities classified as trading were carried at market value with unrealized gains and losses recognized in the consolidated statements of operations. Realized gains and losses were computed utilizing the specific identification method.

For additional information with respect to marketable equity securities, “Item 8. Financial Statements and Supplementary Data, Note 4 to the Consolidated Financial Statements – Marketable Equity Securities.”

Impairment of Long-Lived Assets—The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of a long-lived asset may not be recoverable. An impairment loss would be recognized if the carrying amount of the long-lived asset is not recoverable, and it exceeds its fair value. For long-lived assets classified as held and used, if the carrying value of the long-lived asset exceeds the sum of the future net undiscounted cash flows, it is not recoverable. No impairment losses were recorded during 2018 or 2017.

Property and Equipment—Property and equipment is recorded at historical cost, less accumulated depreciation. For financial reporting purposes, the cost of such property is depreciated principally by the straight-line method. For tax reporting purposes, accelerated depreciation or applicable cost recovery methods are used. Depreciation is recognized over the estimated asset life, considering the estimated salvage value of the asset. Such salvage values are based on

estimates using expected market values for used equipment and the estimated time of disposal which, in many cases include guaranteed residual values by the manufacturers. Gains and losses are reflected in the year of disposal. The following is a table reflecting estimated ranges of asset useful lives by major class of depreciable assets:

Asset Class	Estimated Asset Life (in years)		
Service vehicles	3	-	5
Office furniture and equipment	3	-	7
Revenue equipment	3	-	8
Structures and improvements	5	-	40

The Company's management periodically evaluates whether changes to estimated useful lives and/or salvage values are necessary to ensure its estimates accurately reflect the economic use of the assets. During 2018 and 2017, management determined that an adjustment to the estimated useful lives or salvage values of trucks or trailers was not necessary based on such an evaluation. During 2016, management adjusted the estimated useful lives and salvage values of certain trucks based on such an evaluation. These changes resulted in an increase in depreciation expense of approximately \$1.0 million, \$2.7 million and \$1.3 million during 2018, 2017 and 2016, respectively.

Table of Contents

Inventory—Inventories consist primarily of revenue equipment parts, tires, supplies, and fuel. Inventories are carried at the lower of cost or market with cost determined using the first in, first out method.

Prepaid Tires—Tires purchased with revenue equipment are capitalized as a cost of the related equipment. Replacement tires are included in prepaid expenses and deposits and are amortized over a 24-month period. Amounts paid for the recapping of tires are expensed when incurred.

Advertising Expense—Advertising costs are expensed as incurred and totaled approximately \$1,234,000, \$1,087,000 and \$1,019,000 for the years ended December 31, 2018, 2017 and 2016, respectively.

Repairs and Maintenance—Repairs and maintenance costs are expensed as incurred.

Self-Insurance Liability—A liability is recognized for known health, workers' compensation, cargo damage, property damage, and auto liability damage claims. An estimate of the incurred but not reported claims for each type of liability is made based on historical claims made, estimated frequency of occurrence, and considering changing factors that contribute to the overall cost of insurance.

Income Taxes—The Company applies the asset and liability method of accounting for income taxes, under which deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is more likely than not that some or all of the deferred tax assets will not be realized.

The application of income tax law to multi-jurisdictional operations such as those performed by the Company, is inherently complex. Laws and regulations in this area are voluminous and often ambiguous. As such, we may be required to make subjective assumptions and judgments regarding our income tax exposures. Interpretations of and guidance surrounding income tax laws and regulations may change over time which could cause changes in our assumptions and judgments that could materially affect amounts recognized in the consolidated financial statements.

We recognize the impact of tax positions in our financial statements. These tax positions must meet a more-likely-than-not recognition threshold to be recognized and tax positions that previously failed to meet the more-likely-than-not threshold are recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not threshold are derecognized in the first subsequent financial reporting period in which that threshold is no longer met. We recognize potential

accrued interest and penalties related to unrecognized tax benefits within the consolidated statements of income as income tax expense.

In determining whether a tax asset valuation allowance is necessary, management, in accordance with the provisions of ASC 740-10-30, weighs all available evidence, both positive and negative to determine whether, based on the weight of that evidence, a valuation allowance is necessary. If negative conditions exist which indicate a valuation allowance might be necessary, consideration is then given to what effect the future reversals of existing taxable temporary differences and the availability of tax strategies might have on future taxable income to determine the amount, if any, of the required valuation allowance. As of December 31, 2018 and 2017, management determined that the future reversals of existing taxable temporary differences and available tax strategies would generate sufficient future taxable income to realize its tax assets and therefore a valuation allowance was not necessary.

Revenue Recognition— Revenue is recognized over time as the freight progresses towards its destination and the transportation service obligation is fulfilled. For loads picked up during the reporting period, but delivered in a subsequent reporting period, revenue is allocated to each period based on the transit time in each period as a percentage of total transit time. There are no assets or liabilities recorded in conjunction with revenue recognized, other than Accounts Receivable and Allowance for doubtful accounts.

Table of Contents

Share-Based Compensation—The Company estimates the fair value of stock option awards on the option grant date using the Black-Scholes pricing model and recognizes compensation for stock option awards expected to vest on a straight-line basis over the requisite service period for the entire award. Forfeitures are estimated at grant date based on historical experience. For additional information with respect to share-based compensation, see “Item 8. Financial Statements and Supplementary Data, Note 14 to the Consolidated Financial Statements – Stock-based Compensation.”

Earnings Per Share—The Company computes basic earnings per share (“EPS”) by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted EPS includes the potential dilution that could occur from stock-based awards and other stock-based commitments using the treasury stock or the as if converted methods, as applicable. The difference between the Company's weighted-average shares outstanding and diluted shares outstanding is due to the dilutive effect of stock options for all periods presented. See “Item 8. Financial Statements and Supplementary Data, Note 15 to the Consolidated Financial Statements – Earnings per Share” for more information regarding the computation of diluted EPS.

Fair Value Measurements—Certain financial assets and liabilities are measured at fair value within the financial statements on a recurring basis. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. For additional information with respect to fair value measurements, see “Item 8. Financial Statements and Supplementary Data, Note 19 to the Consolidated Financial Statements – Fair Value of Financial Instruments.”

Reporting Segments—The Company's operations are all in the motor carrier segment and are aggregated into a single reporting segment in accordance with the aggregation criteria under United States generally accepted accounting principles (“GAAP”). The Company provides truckload transportation services as well as brokerage and logistics services to customers throughout the United States and portions of Canada and Mexico. Truckload transportation services revenues, excluding fuel surcharges, represented 80.0%, 86.3% and 88.4% of total revenues, excluding fuel surcharges, for the twelve months ended December 31, 2018, 2017 and 2016, respectively. Remaining revenues, excluding fuel surcharges, for each respective year were generated by brokerage and logistics services.

Concentrations of Credit Risk—The Company performs ongoing credit evaluations and generally does not require collateral from its customers. The Company maintains reserves for potential credit losses. In view of the concentration of the Company's revenues and accounts receivable among a limited number of customers within the automobile industry, the financial health of this industry is a factor in the Company's overall evaluation of accounts receivable.

Subsequent Events— On January 24, 2019, P.A.M. Transportation Services, Inc., a Delaware corporation (the “Company”), and its subsidiary P.A.M. Transport, Inc., an Arkansas corporation (“P.A.M. Transport”), entered into a Second Amendment to Amended and Restated Loan Agreement (the “Amendment”) with First Tennessee Bank

National Association (the “Bank”). The Amendment amends the Company’s Amended and Restated Loan Agreement dated March 28, 2016 (the “Agreement”), under which the Bank committed to lend P.A.M. Transport a principal amount of up to \$40.0 million under a line of credit (the “Loan”), the terms of which have been previously disclosed by the Company in its periodic reports and other filings with the Securities and Exchange Commission. The Company has guaranteed the payment and performance of the Loan.

Table of Contents

The purposes of the Amendment are to extend the term of the Loan by one year to July 1, 2021, to increase the amount the Bank has committed to lend to P.A.M. Transport from \$40.0 million to \$60.0 million, to reduce the interest rate charged on outstanding borrowings from LIBOR plus 1.50% to LIBOR plus 1.25%, to establish an “unused fee” of 0.25% if average monthly borrowings are less than \$18.0 million, and to restate and make other immaterial amendments and updates to the terms of the Agreement.

Under the terms of the Agreement, as amended by the Amendment, the Company may borrow up to a maximum of \$60.0 million, and amounts outstanding under the Loan bear interest at LIBOR (determined as of the first day of each month) plus 1.25%. The Loan continues to be secured by the Company’s accounts receivable and will mature on July 1, 2021. Monthly payments of interest are required under the Agreement. The Agreement contains customary events of default that would permit the Bank to accelerate the amounts due under the Loan if not cured within applicable grace periods.

Foreign Currency Transactions—The functional currency of the Company’s foreign branch office in Mexico is the U.S. dollar. The Company remeasures the monetary assets and liabilities of this branch office, which are maintained in the local currency ledgers, at the rates of exchange in effect at the end of the reporting period. Revenues and expenses recorded in the local currency during the period are remeasured using average exchange rates for each period. Non-monetary assets and liabilities are remeasured using historical rates. Any resulting exchange gain or loss from the remeasurement process are included in non-operating income (loss) in the Company’s consolidated statements of operations.

Recent Accounting Pronouncements— In July 2018, the Financial Accounting Standards Board, (“FASB”) issued Accounting Standards Update, (“ASU”) No. 2018-09, (“ASU 2018-09”), Codification Improvements. ASU 2018-09 was issued to update codification on multiple topics, and includes updates for technical corrections, clarifications and other minor improvements. ASU 2018-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018, with early adoption permitted. The Company has evaluated the new guidance and does not expect it to have a material impact on its financial condition, results of operations, or cash flows.

In July 2018, the FASB issued ASU No. 2018-10, (“ASU 2018-10”), *Codification Improvements to Topic 842, Leases*. ASU 2018-10 was issued to update codification specific to Topic 842, and includes updates for technical corrections, clarifications and other minor improvements. ASU 2018-10 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018, with early adoption permitted. The Company has evaluated the new guidance and does not expect it to have a material impact on its financial condition, results of operations, or cash flows.

In May 2017, the FASB issued ASU No. 2017-09, (“ASU 2017-09”), *Compensation – Stock Compensation (Topic 718)* which provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718. ASU 2017-09 is effective for fiscal years beginning after

December 15, 2017 and interim periods within those fiscal years, and early adoption was permitted, including in an interim period. ASU 2017-09 is to be applied on a prospective basis to an award modified on or after the adoption date. The adoption of this guidance on January 1, 2018 did not have a material impact on the Company's financial condition, results of operations, or cash flows.

In November 2016, the FASB issued ASU No. 2016-18, ("ASU 2016-18"), *Statement of Cash Flows (Topic 230)*. ASU 2016-18 requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. This standard is intended to reduce diversity in practice in how restricted cash or restricted cash equivalents are presented and classified in the statement of cash flows. ASU No. 2016-18 is effective for fiscal years and interim periods beginning after December 15, 2017, with early adoption permitted. The standard requires application using a retrospective transition method. The adoption of this guidance on January 1, 2018 changed the presentation and classification of restricted cash and restricted cash equivalents in our consolidated statements of cash flows but did not have a material impact on our financial condition, results of operations, or cash flows.

Table of Contents

In August 2016, the FASB issued ASU No. 2016-15, (“ASU 2016-15”), *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. ASU 2016-15 amends the guidance in ASC 230, Statement of Cash Flows, and clarifies how entities should classify certain cash receipts and cash payments on the statement of cash flows with the objective of reducing the existing diversity in practice related to eight specific cash flow issues. The amendments in this update are effective for annual periods beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption was permitted. The adoption of this guidance on January 1, 2018 did not have a material impact on the Company’s financial condition, results of operations, or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, (“ASU 2016-13”), *Accounting for Credit Losses (Topic 326)*. ASU 2016-13 requires the use of an “expected loss” model on certain types of financial instruments. The standard also amends the impairment model for available-for-sale debt securities and requires estimated credit losses to be recorded as allowances instead of reductions to amortized cost of the securities. ASU 2016-13 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2019, with early adoption permitted. The Company is evaluating the new guidance, but does not expect it to have a material impact on its financial condition, results of operations, or cash flows.

In March 2016, the FASB issued ASU No. 2016-09, (“ASU 2016-09”), *Compensation – Stock Compensation (Topic 718)*. ASU 2016-09 identifies areas for simplification involving several aspects of accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liability, an option to recognize gross stock compensation expense with actual forfeitures recognized as they occur, as well as certain classifications on the statement of cash flows. ASU 2016-09 is effective for annual and interim periods beginning after December 15, 2016, with early adoption permitted. The adoption of this guidance on January 1, 2017, did not have a material impact on the Company’s financial condition, results of operations, or cash flows.

In February 2016, the FASB issued ASU No. 2016-02, (“ASU 2016-02”), *Leases (Topic 842)*. This update seeks to increase the transparency and comparability among entities by requiring public entities to recognize lease assets and lease liabilities on the balance sheet and disclose key information about leasing arrangements. To satisfy the standard’s objective, a lessee will recognize a right-of-use asset representing its right to use the underlying asset for the lease term and a lease liability for the obligation to make lease payments. Both the right-of-use asset and lease liability will initially be measured at the present value of the lease payments, with subsequent measurement dependent on the classification of the lease as either a finance or an operating lease. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset to not recognize lease assets and lease liabilities. If a lessee makes this election, it should recognize lease expense for such leases generally on a straight-line basis over the lease term. Accounting by lessors will remain mostly unchanged from current U.S. GAAP.

In transition, lessees and lessors will be required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The modified retrospective approach includes a number of optional practical expedients that companies may elect to apply. These practical expedients relate to the identification and classification of leases that commenced before the effective date, initial direct costs for leases that commenced before the effective date, and the ability to use hindsight in evaluating lessee options to extend or terminate a lease or

to purchase the underlying asset. The transition guidance also provides specific guidance for sale and leaseback transactions, build-to-suit leases, leveraged leases, and amounts previously recognized in accordance with the business combinations guidance for leases. The new standard is effective for public companies for annual periods beginning after December 15, 2018, and interim periods within those years, with early adoption permitted.

The Company has evaluated the leases in which it participates as lessee and determined them to be operating leases, the majority of which have lease terms of one year or less. Leases with terms longer than a year have early cancellation provisions, which might be exercised. Leases in which the Company participates as lessor, including our lease to own program, are operating leases. The Company has evaluated the new guidance and does not expect it to have a material impact on its financial condition, results of operations, or cash flows.

In January 2016, the FASB issued ASU No. 2016-01, (“ASU 2016-01”), *Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. The updated guidance enhances the reporting model for financial instruments, which includes amendments to address aspects of recognition, measurement, presentation and disclosure.

Table of Contents

The provisions of ASU 2016-01 require, among other things, that the Company:

- Categorize securities as equity securities or debt securities;
- Eliminate the classification of equity securities as trading or available for sale;
- Determine which securities have readily determinable fair values;
- Use the exit price notion when measuring the fair value of financial instruments for disclosure purposes;
- Consider the need for a valuation allowance related to a deferred tax asset on available-for-sale securities in combination with the Company's other deferred tax assets; and
- Recognize changes in the fair market value of equity securities in net income.

ASU 2016-01 is effective for annual and interim periods beginning after December 15, 2017. With certain exceptions, early adoption was not permitted. The adoption of this guidance on January 1, 2018, did not have a significant impact on the Company's financial condition or cash flows, but did impact the Company's results of operations, as the current guidance requires changes in market value related to equity securities to be recognized in net income, rather than being recognized as other comprehensive income. Upon adoption, approximately \$7.4 million in accumulated changes in the fair market value of the Company's equity securities, net of deferred tax, that were presented at December 31, 2017 as Accumulated Other Comprehensive Income were reclassified to Retained Earnings.

In May 2014, the FASB issued ASU No. 2014-09, ("ASU 2014-09"), *Revenue from Contracts with Customers*. The objective of ASU 2014-09 and subsequent amendments is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and to supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle of ASU 2014-09 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the new guidance, an entity will (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the contract's performance obligations; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification, ("ASC").

The adoption of this guidance on January 1, 2018 did not have a material impact on the Company's financial condition, results of operations, cash flows or internal controls. See "Item 8. Financial Statements and Supplementary Data, Note 2 to the Consolidated Financial Statements – Revenue Recognition," for additional information.

2. REVENUE RECOGNITION

On January 1, 2018, the Company adopted ASU 2014-09 using the modified retrospective method applied to those contracts that were not completed as of the adoption date. Based on the five-step analysis provided in the guidance, the Company determined that its timing and method of recognizing revenue in prior periods was consistent with the

guidance, and therefore, no change in the Company's revenue recognition method or adjustments to the Company's retained earnings or other financial statement line items as of January 1, 2018 were required. Thus, the adoption of ASU 2014-09 did not have a material impact on the Consolidated Financial Statements as of the adoption date or for the year ended December 31, 2018.

The Company has a single performance obligation, to transport our customer's freight from a specified origin to a specified destination. The Company has the discretion to choose to self-transport or to arrange for alternate transportation to fulfill the performance obligation. Where the Company decides to self-transport the freight, the Company classifies the service as truckload services, and where the Company arranges for alternate transportation of the freight, the Company classifies the service as brokerage and logistics services. In either case, the Company is paid a rate to transport freight from its origin location to a specified destination. Because the primary factors influencing revenue recognition, including performance obligation, customer base, and timing of revenue recognition, are the same for both of its service categories, the Company utilizes the same revenue recognition method throughout its operations.

Table of Contents

Company revenue is generated from freight transportation services performed utilizing heavy tractor trailer combinations. While various ownership arrangements may exist for the equipment utilized to perform these services, including Company owned or leased, owner-operator owned, and third party carriers, revenue is generated from the same base of customers. Contracts with these customers establish rates for services performed, which are predominantly rates that will be paid to pick up, transport and drop off freight at various locations. In addition to transportation, revenue is also awarded for various accessorial services performed in conjunction with the base transportation service. The Company also has other revenue categories that are not discussed in this note or broken out in our Statements of Operations due to their non-material amounts.

In fulfilling the Company's obligation to transport freight from a specified origin to a specified destination, control of freight is transferred to us at the point it has been loaded into the driver's trailer, the doors are sealed and the driver has signed a bill of lading, which is the basic transportation agreement that establishes the nature, quantity and condition of the freight loaded, responsibility for invoice payment, and pickup and delivery locations. Our revenue is generated, and our customer receives benefit, as the freight progresses towards delivery locations. In the event our customer cancels the shipment at some point prior to the final delivery location and re-consigns the shipment to an alternate delivery location, we are entitled to receive payment for services performed for the partial shipment. Shipments are generally conducted over a relatively short time span, generally one to three days; however, freight is sometimes stored temporarily in our trailer at one of our drop yard locations or at a location designated by a customer. Our revenue is categorized as either Freight Revenue or Fuel Surcharge Revenue, and both are earned by performing the same freight transportation services, discussed further below.

Freight Revenue – revenue generated by the performance of the freight transportation service, including any accessorial service, provided to customers.

Fuel Surcharge Revenue – revenue designed to adjust freight revenue rates to an agreed upon base cost for diesel fuel. Diesel fuel prices can fluctuate widely during the term of a contract with a customer. At the point that freight revenue rates are negotiated with customers, a sliding scale is agreed upon that approximately adjusts diesel fuel costs to an agreed upon base amount. In general, as fuel prices increase, revenue from fuel surcharge increases, so that diesel fuel cost is adjusted to the approximate base amount agreed upon.

Revenue is recognized over time as the freight progresses towards its destination and the transportation service obligation is fulfilled. For loads picked up during the reporting period, but delivered in a subsequent reporting period, revenue is allocated to each period based on the transit time in each period as a percentage of total transit time. There are no assets or liabilities recorded in conjunction with revenue recognized, other than Accounts Receivable and Allowance for doubtful accounts.

3. TRADE ACCOUNTS RECEIVABLE

The Company's receivables result primarily from the sale of transportation and logistics services. The Company performs ongoing credit evaluations of its customers and generally does not require collateral for accounts receivable. Accounts receivable, which consist of both billed and unbilled receivables, are presented net of an allowance for doubtful accounts. Accounts outstanding longer than contractual payment terms are considered past due and are reviewed individually for collectability. Accounts receivable balances consist of the following components as of December 31, 2018 and 2017:

	2018	2017
	(in thousands)	
Billed	\$56,766	\$51,236
Unbilled	8,808	9,154
Allowance for doubtful accounts	(2,224)	(1,335)
 Total accounts receivable—net	 \$63,350	 \$59,055

- 47 -

Table of Contents

An analysis of changes in the allowance for doubtful accounts for the years ended December 31, 2018, 2017, and 2016 follows:

	2018	2017	2016
	(in thousands)		
Balance—beginning of year	\$1,335	\$994	\$549
Provision for bad debts	889	341	445
Charge-offs	-	-	-
Recoveries	-	-	-
Balance—end of year	\$2,224	\$1,335	\$994

4. MARKETABLE EQUITY SECURITIES

The Company accounts for its marketable securities in accordance with ASC Topic 321, *Investments- Equity Securities*. ASC Topic 321 requires companies to measure equity investments at fair value, with changes in fair value recognized in net income. The Company's investments in marketable securities consist of equity securities with readily determinable fair values. The cost of securities sold is based on the specific identification method, and interest and dividends on securities are included in non-operating income (expense).

Marketable equity securities are carried at fair value, with gains and losses in fair market value included in the determination of net income. The fair market value of marketable equity securities is determined based on quoted market prices in active markets. See "Item 8. Financial Statements and Supplementary Data, Note 19 to the Consolidated Financial Statements – Fair Value of Financial Instruments" for additional information regarding the valuation of marketable equity securities.

The following table sets forth cost, market value and unrealized gain on equity securities classified as available-for-sale as of December 31, 2018 and 2017.

	2018	2017
	(in thousands)	
Available-for-sale securities:		
Fair market value	\$27,549	\$26,664
Cost	25,602	16,640
Unrealized gain	\$1,947	\$10,024

Prior to the Company's January 1, 2018 adoption of ASU 2016-01, unrealized gains and losses in fair market value were presented as a component of Accumulated Other Comprehensive Income in shareholders' equity, and only realized gains and losses and declines in value judged to be other-than-temporary on available-for-sale securities were included in the determination of net income. The cost of securities determined to be in an other-than-temporary loss position were required to be presented net of the amount of the other-than-temporary impairment calculated. Subsequent to adoption of ASU 2016-01, cost is no longer presented net of other-than-temporary impairment. The December 31, 2017 cost reflected in the table above was presented net of approximately \$2,314,000 of other-than-temporary impairment.

Table of Contents

The following table sets forth the gross unrealized gains and losses on the Company's marketable securities as of December 31, 2018 and 2017.

	2018	2017
	(in thousands)	
Available-for-sale securities:		
Gross unrealized gains	\$5,668	\$10,150
Gross unrealized losses	3,721	126
Net unrealized gains	\$1,947	\$10,024

For the years ended December 31, 2018, 2017 and 2016, the Company recognized dividends of approximately \$1,171,000, \$999,000, and \$1,024,000 in non-operating income in its statements of operations, respectively.

The following table shows the Company's net realized gains during 2018, 2017 and 2016 on certain marketable equity securities.

	2018	2017	2016
	(in thousands)		
Realized gains:			
Sale proceeds	\$1,044	\$6,833	\$1,550
Cost of securities sold	669	2,098	547
Realized gains	\$375	\$4,735	\$1,003
Realized gains, net of taxes	\$278	\$2,938	\$627

At December 31, 2018, the Company's investments' approximate fair value of securities in a loss position and related gross unrealized losses were \$12,399,000 and \$3,721,000, respectively. At December 31, 2017, the Company's investments' approximate fair value of securities in a loss position and related gross unrealized losses were \$2,980,000 and \$126,000, respectively.

The market value of the Company's equity securities are periodically used as collateral against any outstanding margin account borrowings. As of December 31, 2018 and 2017, the Company had outstanding borrowings of \$11,281,000 and \$5,903,000 under its margin account, respectively. The interest rate on margin account borrowings was 3.11% and 2.07% as of December 31, 2018 and 2017, respectively.

5. ACCRUED EXPENSES AND OTHER LIABILITIES

Accrued expenses and other liabilities at December 31 are summarized as follows:

	2018	2017
	(in thousands)	
Payroll	\$2,955	\$2,710
Accrued vacation	1,987	1,762
Taxes—other than income	2,319	2,488
Interest	249	99
Driver escrows	2,722	2,381
Margin account borrowings	11,281	5,903
Self-insurance claims	1,984	2,266
Total accrued expenses and other liabilities	\$23,497	\$17,609

- 49 -

Table of Contents**6. CLAIMS LIABILITIES**

With respect to cargo loss and auto liability, the Company maintains insurance coverage to protect it from certain business risks. These policies are with various carriers and have per occurrence deductibles of \$10,000 and \$2,500, respectively. Beginning September 1, 2018, the Company became self-insured for physical damage losses on its trucks. Prior to October 1, 2013, the Company was self-insured for physical damage losses on its trailers. From October 1, 2013 until September 30, 2015, the Company insured its trailers for physical damage losses with a \$2,500 deductible per occurrence. Beginning October 1, 2015, the Company elected to self-insure trailers for physical damage losses.

The Company maintains workers' compensation coverage in Arkansas, Ohio, Oklahoma, Mississippi, and Florida with a \$500,000 self-insured retention and a \$500,000 per occurrence excess policy. The Company has elected to opt out of workers' compensation coverage in Texas and is providing coverage through the P.A.M. Texas Injury Plan. The Company has accrued for estimated losses to pay such claims as well as claims incurred but not yet reported. The Company has not experienced any adverse trends involving differences in claims experienced versus claims estimates for workers' compensation claims. Letters of credit aggregating approximately \$515,000 and certificates of deposit totaling \$300,000 are held by banks as security for workers' compensation claims. The Company self-insures for employee health claims with a stop loss of \$325,000 per covered employee per year and estimates its liability for claims outstanding and claims incurred but not reported. See "Item 8. Financial Statements and Supplementary Data, Note 5 to the Consolidated Financial Statements – Accrued Expenses and Other Liabilities" for additional information regarding self-insurance claims liabilities.

7. LONG-TERM DEBT

Long-term debt at December 31, consists of the following:

	2018	2017
	(in thousands)	
Line of credit with a bank—due July 1, 2020, and collateralized by accounts receivable (1)	10,192	-
Equipment financing (2)	211,031	172,636
Total long-term debt	221,223	172,636
Less current maturities	(63,908)	(73,641)
Long-term debt—net of current maturities	\$ 157,315	\$ 98,995

(1) Line of credit agreement with a bank provides for maximum borrowings of \$40.0 million and contains certain restrictive covenants that must be maintained by the Company on a consolidated basis. Borrowings on the line of

credit are at an interest rate of LIBOR as of the first day of the month plus 1.50% (3.85% at December 31, 2018) and are secured by our trade accounts receivable. Monthly payments of interest are required under this agreement. Also, under the terms of the agreement the Company must maintain a debt to EBITDA (earnings before interest, taxes, depreciation, and amortization) ratio of less than 4.00:1. The Company was in compliance with all provisions under this agreement throughout 2018. At December 31, 2018, outstanding advances on the line were approximately \$10.9 million, including letters of credit totaling \$0.7 million, with availability to borrow \$29.1 million.

Equipment financings consist of installment obligations for revenue equipment purchases, payable in various (2) monthly installments with various maturity dates through October 2025, at a weighted average interest rate of 3.61% as of December 31, 2018 and collateralized by revenue equipment.

The Company has provided letters of credit to third parties totaling approximately \$700,000 at December 31, 2018. The letters are held by these third parties to assist such parties in collection of any amounts due by the Company should the Company default in its commitments to the parties.

Table of Contents

Scheduled annual maturities on long-term debt outstanding at December 31, 2018, are:

2019	\$63,908
2020	67,636
2021	28,505
2022	18,558
2023	37,656
2024	3,013
2025	1,947

Total \$221,223

8. NONCASH INVESTING AND FINANCING ACTIVITIES

The Company financed approximately \$68.1 million in equipment purchases during 2018 utilizing noncash financing.

9. CAPITAL STOCK

The Company's authorized capital stock consists of 40,000,000 shares of common stock, par value \$.01 per share, and 10,000,000 shares of preferred stock, par value \$.01 per share. At December 31, 2018, there were 11,612,144 shares of our common stock issued and 5,956,558 shares outstanding. At December 31, 2017, there were 11,529,124 shares of our common stock issued and 6,160,889 shares outstanding. No shares of our preferred stock were issued or outstanding at December 31, 2018 or 2017.

Common Stock

The holders of our common stock, subject to such rights as may be granted to any preferred stockholders, elect all directors and are entitled to one vote per share. All shares of common stock participate equally in dividends when and as declared by the Board of Directors and in net assets on liquidation. The shares of common stock have no preference, conversion, exchange, preemptive, or cumulative voting rights.

Preferred Stock

Preferred stock may be issued from time to time by our Board of Directors, without stockholder approval, in such series and with such preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends, qualifications or other provisions, as may be fixed by the Board of Directors in the resolution authorizing their issuance. The issuance of preferred stock by the Board of Directors could adversely affect the rights of holders of shares of common stock; for example, the issuance of preferred stock could result in a class of securities outstanding that would have certain preferences with respect to dividends and in liquidation over the common stock, and that could result in a dilution of the voting rights, net income per share and net book value of the common stock. As of December 31, 2018, we have no agreements or understandings for the issuance of any shares of preferred stock.

Treasury Stock

In May 2018, our Board of Directors authorized the repurchase of up to 100,000 shares of our common stock through a Dutch auction tender offer (the “2018 tender offer”). Subject to certain limitations and legal requirements, the Company could repurchase up to an additional 2% of its outstanding shares, which totaled 124,248 shares. The 2018 tender offer commenced on May 8, 2018 and expired on June 7, 2018. Through this tender offer, the Company’s shareholders had the opportunity to tender some or all of their shares at a price within the range of \$39.00 to \$43.00 per share. Upon expiration, 185,597 shares were purchased through this offer at a final purchase price of \$40.00 per share for a total of approximately \$7.5 million, including fees and commission. The repurchase was settled on June 12, 2018. The Company accounted for the repurchase of these shares as treasury stock on the Company’s consolidated balance sheet as of December 31, 2018.

Table of Contents

In October 2017, our Board of Directors authorized the repurchase of up to 400,000 shares of our common stock through a Dutch auction tender offer (the “2017 tender offer”). Subject to certain limitations and legal requirements, the Company could repurchase up to an additional 2% of its outstanding shares, which totaled 126,060 shares. The 2017 tender offer commenced on October 10, 2017 and expired on November 7, 2017. Through this tender offer, the Company’s shareholders had the opportunity to tender some or all of their shares at a price within the range of \$27.00 to \$30.00 per share. Upon expiration, 143,859 shares were purchased through this offer at a final purchase price of \$30.00 per share for a total of approximately \$4.4 million, including fees and commission. The repurchase was settled on November 10, 2017. The Company accounted for the repurchase of these shares as treasury stock on the Company’s consolidated balance sheet as of December 31, 2017.

The Company’s stock repurchase program has been extended and expanded several times, most recently in April 2017, when the Board of Directors reauthorized 500,000 shares of common stock for repurchase under the initial September 2011 authorization. The Company repurchased 101,754 shares and 110,316 shares of its common stock under this program during 2018 and 2017, respectively.

The Company accounts for Treasury stock using the cost method, and as of December 31, 2018, 5,655,586 shares were held in the treasury at an aggregate cost of approximately \$142,552,000.

10. COMPREHENSIVE INCOME (LOSS)

Prior to the Company’s January 1, 2018 adoption of ASU 2016-01, unrealized gains and losses in fair market value were presented as a component of Accumulated Other Comprehensive Income in stockholders’ equity, and only realized gains and losses and declines in value judged to be other-than-temporary on available-for-sale securities, were included in the determination of net income.

In accordance with the adoption of ASU 2016-01 on January 1, 2018, unrealized market gains and losses on equity securities are categorized in our consolidated statements of operations as non-operating income (expense) for the current period. The accumulated balance of unrealized gains and losses recorded in Other Comprehensive Income at December 31, 2017 was re-categorized to retained earnings in conjunction with our adoption of the new standard.

The following table summarizes the changes in accumulated balances of other comprehensive income for the years ended December 31, 2018 and 2017:

Unrealized gains and

Edgar Filing: PAM TRANSPORTATION SERVICES INC - Form 10-K

	losses on available-for-sale securities (in thousands)	
Balance at January 1, 2017, net of tax of \$4,576	\$ 7,476	
Other comprehensive income before reclassifications, net of tax of \$(687)	2,001	
Amounts reclassified from accumulated other comprehensive income, net of tax of \$(1,310)	(2,033)
Net other comprehensive income (loss)	(32)
Balance at December 31, 2017, net of tax of \$2,579	7,444	
Cumulative effect adjustment – ASU 2016-01	(7,444)
Net other comprehensive income (loss)	(7,444)
Balance at December 31, 2018	\$ -	

- 52 -

Table of Contents

The following table provides details about reclassifications out of accumulated other comprehensive income for the year ended December 31, 2018 and 2017:

Details about Accumulated Other Comprehensive Income Component	Amounts Reclassified from Accumulated Other Comprehensive Income		Statement of Operations Classification
	2018	2017	
	(in thousands)		
Unrealized gains and losses on available-for-sale securities:			
Unrealized gains and losses on securities sold	\$ -	\$ 3,385	Non-operating income
Impairment expense	-	(42))Non-operating income
Total before tax	-	3,343	Income before income taxes
Tax expense	-	(1,310))Income tax expense
Total after tax	\$ -	\$ 2,033	Net income

11. SEGMENT INFORMATION, SIGNIFICANT CUSTOMERS, INDUSTRY CONCENTRATION AND GEOGRAPHIC AREAS

The Company's revenues for 2018, 2017 and 2016 were all generated from operations in the motor carrier segment and are aggregated into a single reporting segment in accordance with the aggregation criteria under GAAP.

The table below presents revenue dollars and percentages by geographic area:

	Year ended December 31,					
	2018		2017		2016	
	(in thousands)					
	Amount	Percent	Amount	Percent	Amount	Percent
United States - domestic shipments	\$302,754	56.8	\$255,197	58.3	\$251,390	58.1
Shipments to or from Mexico	229,350	43.0	181,099	41.4	181,159	41.9
Shipments to or from Canada	1,157	0.2	1,542	0.3	303	-
Total Operating Revenues	\$533,261	100 %	437,838	100 %	\$432,852	100 %

Our five largest customers, for which we provide carrier services covering a number of geographic locations, accounted for approximately 42%, 41% and 43% of our total revenues in 2018, 2017 and 2016, respectively. Fiat Chrysler Automobiles accounted for approximately 16%, 10% and 9% of our revenues in 2018, 2017 and 2016, respectively. General Motors Company accounted for approximately 13%, 18% and 18% of our revenues in 2018, 2017 and 2016, respectively. Ford Motor Company accounted for approximately 8%, 9% and 10% of our revenues in 2018, 2017 and 2016, respectively.

We also provide transportation services to other manufacturers who are suppliers for automobile manufacturers. Approximately 46%, 46% and 45% of our revenues were derived from transportation services provided to the automobile industry during 2018, 2017 and 2016, respectively.

Accounts receivable from the three largest customers totaled approximately \$30,848,000 and \$29,788,000 at December 31, 2018 and 2017, respectively.

Table of Contents**12. DIVIDENDS**

The Company has paid cash dividends in the past; however, the Company currently intends to retain future earnings and does not anticipate paying cash dividends in the foreseeable future. Any future determination to pay dividends will be at the discretion of the Board and will depend on the Company's financial condition, results of operations, capital requirements, any legal or contractual restrictions on the payment of dividends, and other factors the Board deems relevant.

13. FEDERAL AND STATE INCOME TAXES

Under GAAP, deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and for income tax reporting purposes.

Significant components of the Company's deferred tax liabilities and assets at December 31 are as follows:

	2018	2017
	(in thousands)	
Deferred tax liabilities:		
Property and equipment	\$78,502	\$60,388
Unrealized gains on securities	2,580	2,580
Prepaid expenses and other	2,667	2,603
Total deferred tax liabilities	83,749	65,571
Deferred tax assets:		
Allowance for doubtful accounts	572	344
QAFMV tax credit carryforward	864	864
New hire tax credit	124	124
Compensated absences	460	410
Self-insurance allowances	188	149
Share-based compensation	-	61
Marketable equity securities	2,200	750
Net operating loss carryover	17,241	7,975
Other	203	203
Total deferred tax assets	21,852	10,880

Net deferred tax liability \$61,897 \$54,691

The reconciliation between the effective income tax rate and the statutory Federal income tax rate for the years ended December 31, 2018, 2017 and 2016 is presented in the following table:

	2018		2017		2016	
	(in thousands)					
	Amount	Percent	Amount	Percent	Amount	Percent
Income tax at the statutory federal rate	\$6,582	21.0	\$4,975	34.0	\$6,042	34.0
Impact of the Tax Cuts and Jobs Act ⁽¹⁾	-	-	(29,255)	(199.9)	-	-
Nondeductible expenses	80	0.2	72	0.5	130	0.7
State income taxes/other—net of federal benefit	685	2.2	(60)	(0.5)	499	2.8
Total income tax (benefit) expense	\$7,347	23.4	\$(24,268)	(165.9)	\$6,671	37.5

(1) On December 22, 2017, the Tax Cuts and Jobs Act (the “Act”) was signed into law. The Act included numerous changes to existing tax law, including a permanent reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018 and repeal of the alternative minimum tax (“AMT”) allowing a refund of existing AMT carryovers during the years 2018 through 2021. As a result, the Company recorded a tax benefit of \$29.3 million in the fourth quarter of

2017 related to the
revaluation of its
net deferred tax
liabilities.

- 54 -

Table of Contents

The (benefit) provision for income taxes consisted of the following:
