MARRONE BIO INNOVATIONS, INC.

Notes to Condensed Consolidated Financial Statements

September 30, 2017

(Unaudited)

1. Summary of Business, Basis of Presentation and Liquidity

Marrone Bio Innovations, Inc. (“Company”), formerly Marrone Organic Innovations, Inc., was incorporated under the laws of the State of Delaware on June 15, 2006, and is located in Davis, California. In July 2012, the Company formed a wholly-owned subsidiary, Marrone Michigan Manufacturing LLC (“MMM LLC”), which holds the assets of a manufacturing plant the Company purchased in July 2012. These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary. All significant intercompany balances and transactions have been eliminated in consolidation. The Company makes bio-based pest management and plant health products. The Company targets the major markets that use conventional chemical pesticides, including certain agricultural and water markets where its bio-based products are used as alternatives for, or mixed with, conventional chemical pesticides. The Company also targets new markets for which (i) there are no available conventional chemical pesticides or (ii) the use of conventional chemical pesticides may not be desirable or permissible either because of health and environmental concerns (including for organically certified crops) or because the development of pest resistance has reduced the efficacy of conventional chemical pesticides. The Company delivers EPA-approved and registered biopesticide products and other bio-based products that address the global demand for effective, safe and environmentally responsible products.

In April 2017, the Company completed an underwritten public offering of 6,571,000 registered shares of its common stock (inclusive of 857,000 shares of its common stock to cover over-allotments). The public offering price of the shares sold in the offering was \$1.40 per share. The total gross proceeds to the Company from the offering were approximately \$9,200,000, and after deducting underwriting discounts and commissions and estimated offering expenses payable by the Company, the aggregate net proceeds to the Company totaled approximately \$8,200,000.

The Company is an early stage company with a limited operating history and has a limited number of commercialized products. As of September 30, 2017, the Company had an accumulated deficit of \$258,191,000, has incurred significant losses since inception and expects to continue to incur losses for the foreseeable future. The Company has funded operations primarily with net proceeds from public offerings of common stock, private placements of convertible preferred stock, convertible notes, and promissory notes and term loans, as well as with the proceeds from the sale of its products and payments under strategic collaboration and distribution agreements and government grants. The Company will need to generate significant revenue growth to achieve and maintain profitability. As of September 30, 2017, the Company had negative working capital of \$8,619,000, including cash and cash equivalents of

\$3,737,000. In addition, as of September 30, 2017, the Company had a total of \$2,493,000 of restricted cash relating to a debt agreement (see Note 6). As of September 30, 2017, the Company had debt and debt due to related parties of \$22,696,000 and \$37,531,000, respectively, for which the underlying debt agreements contain various financial and non-financial covenants, as well as a material adverse change clause.

The Company believes that its existing cash and cash equivalents of \$3,737,000 at September 30, 2017, expected revenues and incremental borrowings, if any, from LSQ Financing (as defined and discussed in Note 6) will not be sufficient to fund operations as currently planned through one year from the date of the issuance of these financial statements, which raises substantial doubt as to the Company's ability to continue as a going concern. The Company has based this belief on assumptions and estimates that may prove to be wrong, and the Company could spend its available financial resources less or more rapidly than currently expected. The Company will continue to require additional sources of cash for general corporate purposes, which may include operating expenses, working capital to improve and promote its commercially available products, advance product candidates, expand international presence and commercialization, general capital expenditures and satisfaction of debt obligations. Management intends to seek additional capital through equity and/or debt financings, collaborative or other funding arrangements with partners, or through other sources of financing. Should the Company seek additional financing from outside sources, the Company may not be able to raise such financing on terms acceptable to the Company or at all. If the Company is unable to raise additional capital when required or on acceptable terms, the Company may be required to scale back or to discontinue the promotion of currently available products, scale back or discontinue the advancement of product candidates, reduce headcount, sell assets, file for bankruptcy, reorganize, merge with another entity, or cease operations.

Additionally, if the Company breaches any of the covenants contained within the debt agreements or if the material adverse change clause is triggered, the entire unpaid principal and interest balances would be due and payable upon demand. Without entering into a continuation of its current waiver, which expires October 1, 2018, entering into strategic agreements that include significant cash payments upfront, significantly increasing revenues from sales or raising additional capital through the issuance of equity, the Company expects it will exceed its maximum debt-to-worth requirement under a promissory note with Five Star Bank. Further, a violation of a covenant in one debt agreement will cause the Company to be in violation of certain covenants under each of its other debt agreements. Breach of covenants included in the Company's debt agreements, which could result in the lenders demanding payment of the unpaid principal and interest balances, will have a material adverse effect upon the Company and would likely require the Company to seek to renegotiate these debt arrangements with the lenders. If such negotiations are unsuccessful, the Company may be required to seek protection from creditors through bankruptcy proceedings. The Company's inability to maintain compliance with its debt covenants could have a negative impact on the Company's financial condition and ability to continue as a going concern.

The June 2014 Secured Promissory Note (as defined in Note 6) contains a material adverse change clause that could be invoked by the lender as a result of the uncertainty related to the Company's ability to continue as a going concern. If the lender were to declare an event of default, the entire amount of borrowings related to all debt agreements at that time would have to be reclassified as current in the financial statements. The lender has waived its right to deem recurring losses, liquidity, going concern, and financial condition a material adverse change through October 1, 2018. As a result, none of the long term portion of the Company's outstanding debt has been reclassified to current in these financial statements as of September 30, 2017.

The Company participates in a heavily regulated and highly competitive crop protection industry and believes that adverse changes in any of the following areas could have a material effect on the Company's future financial position, results of operations or cash flows: inability to obtain regulatory approvals, increased competition in the pesticide market, market acceptance of the Company's products, weather and other seasonal factors beyond the Company's control, litigation or claims against the Company related to intellectual property, patents, products or governmental regulation, and the Company's ability to support increased growth.

Although the Company recognizes that it will likely need to raise additional funds in the future, there can be no assurance that such efforts will be successful or that, in the event that they are successful, the terms and conditions of such financing will not be unfavorable. Any future equity financing is expected to result in dilution to existing stockholders and any debt financing is expected to include additional restrictive covenants. Any failure to obtain additional financing or to achieve the revenue growth necessary to fund the Company with cash flows from operations will have a material adverse effect upon the Company and will likely result in a substantial reduction in the scope of the Company's operations and impact the Company's ability to achieve its planned business objectives.

The accompanying financial statements have been prepared under the assumption that the Company will continue to operate as a going concern, which contemplates the realization of assets and the settlement of liabilities in the normal course of business. The consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts of liabilities that may result from the Company's inability to continue as a going concern.

If the Company becomes unable to continue as a going concern, the Company may have to liquidate its assets, and might realize significantly less than the values at which they are carried on its financial statements, and stockholders may lose all or part of their investment in the Company's common stock.

2. Significant Accounting Policies

Basis of Presentation

The accompanying financial information as of September 30, 2017, and for the three and nine months ended September 30, 2017 and 2016, have been prepared by the Company, without audit, in accordance with generally accepted accounting principles in the United States (“GAAP”) and applicable rules and regulations of the Securities and Exchange Commission (“SEC”) regarding interim financial reporting. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such SEC rules and regulations and accounting principles applicable for interim periods. However, the Company believes that the disclosures are adequate to make the information presented not misleading. The information included in this Quarterly Report on Form 10-Q should be read in connection with the consolidated financial statements and accompanying notes included in the Company’s Annual Report filed on Form 10-K, for the fiscal year ended December 31, 2016.

In the opinion of management, the condensed consolidated financial statements as of September 30, 2017, and for the three and nine months ended September 30, 2017 and 2016, reflect all adjustments, which are normal recurring adjustments, necessary to present a fair statement of financial position, results of operations, comprehensive loss and cash flows. The results of operations for the three and nine months ended September 30, 2017 are not necessarily indicative of the operating results for the full fiscal year or any future periods.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid financial instruments purchased with a maturity of three months or less to be cash equivalents. Cash and cash equivalents consists of cash on deposit, money market funds and certificates of deposit accounts with United States (“U.S.”) financial institutions. The Company is exposed to credit risk in the event of default by financial institutions to the extent that cash and cash equivalents balances with financial institutions are in excess of amounts that are insured by the Federal Deposit Insurance Corporation. The Company has not experienced any losses on these deposits.

Restricted Cash

The Company’s restricted cash consists of cash that the Company is contractually obligated to maintain in accordance with the terms of its June 2014 Secured Promissory Note (as defined in Note 6). See Note 6 for further discussion.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash, cash equivalents, accounts receivable and debt. The Company deposits its cash and cash equivalents with high credit quality domestic financial institutions with locations in the U.S. Such deposits may exceed federal deposit insurance limits. The Company believes the financial risks associated with these financial instruments are minimal.

The Company’s customer base is dispersed across many different geographic areas, and currently most customers are pest management distributors in the U.S. Generally, receivables are due up to 120 days from the invoice date and are considered past due after this date, although the Company may offer extended terms from time to time.

Revenues generated from international customers were, for the three months ended September 30, 2017 and 2016, 4% and 8%, respectively. Revenues generated from international customers were, for the nine months ended September 30, 2017 and 2016, 9% and 5%, respectively.

The Company’s principal sources of revenues are its Regalia, Grandevo and Venerate product lines. These three product lines accounted for 87% and 91% of the Company’s total revenues for the three months ended September 30,

2017 and 2016, respectively, and 87% and 88% for the nine months ended September 30, 2017 and 2016, respectively.

Customers to which 10% or more of the Company's total revenues are attributable for any one of the periods presented consist of the following:

	CUSTOMER A		CUSTOMER B	
Three months ended September 30, 2017	20	%	16	%
2016	25	%	—	
Nine months ended September 30, 2017	25	%	4	%
2016	30	%	—	

Customers to which 10% or more of the Company's outstanding accounts receivable are attributable as of either September 30, 2017 or December 31, 2016 consist of the following:

	CUSTOMER A		CUSTOMER B		CUSTOMER C		CUSTOMER D		CUSTOMER E		CUSTOMER F	
September 30, 2017	12	%	14	%	—		33	%	14	%	11	%
December 31, 2016	21	%	10	%	14	%	—		—		—	

Concentrations of Supplier Dependence

The active ingredient in the Company's Regalia product line is derived from the giant knotweed plant, which the Company obtains from China. The Company currently has one supplier of this plant. Such single supplier acquires raw knotweed from numerous regional sources and performs an extraction process on this plant, creating a dried extract that is shipped to the Company's manufacturing plant. While the Company does not have a long-term supply contract with this supplier, the Company does have a long term business relationship with this supplier. The Company maintains 6 months of knotweed extract at any given time, but an unexpected disruption in supply could have an effect on Regalia supply and revenues. Although the Company has identified additional sources of raw knotweed, there can be no assurance that the Company will continue to be able to obtain dried extract from China at a competitive price.

Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined on the first in, first out basis. The Company provides for inventory reserves when conditions indicate that the selling price may be less than cost due to physical deterioration, obsolescence, changes in price levels or other factors. Additionally, the Company provides reserves for excess and slow-moving inventory on hand that is not expected to be sold to reduce the carrying amount of excess and slow-moving inventory to its estimated net realizable value. The reserves are based upon estimates about future demand from the Company's customers and distributors as well as market conditions.

Deferred Cost of Product Revenues

Deferred cost of product revenues are stated at the lower of cost or net realizable value and include product sold where title has transferred but the criteria for revenue recognition have not been met. As of September 30, 2017 and December 31, 2016, the Company recorded deferred cost of product revenues of \$2,943,000 and \$2,688,000 respectively.

Property, Plant and Equipment

During the three and nine months ended September 30, 2017, the Company identified certain equipment that it disposed of, or intends to dispose of or sell. The Company has committed to sell or dispose of this equipment with an estimated total realizable fair value, less costs to sell, of approximately \$20,000. Assets held for sale are included in prepaid expenses and other current assets. The fair value measurements were based on the sales value received subsequent to September 30, 2017. The Company recognized a combined loss on disposals or impairment charge totaling \$369,000 for the three and nine months ended September 30, 2017 on these disposed or held for sale assets. The Company included the loss on disposal or impairment charge in selling, general and administrative expenses.

Revenue Recognition

The Company recognizes revenues when persuasive evidence of an arrangement exists, transfer of title has occurred or services have been rendered, the price is fixed or determinable and collectability is reasonably assured. If contractual obligations, acceptance provisions or other contingencies exist which indicate that the price is not fixed or determinable, revenue is recognized after such obligations or provisions are fulfilled or expire.

Product revenues consist of revenues generated from sales of the Company's products to distributors and direct customers, net of rebates and cash discounts. For sales of products made to distributors, the Company recognizes revenue either on a sell-in or sell-through basis depending on the specific facts and circumstances of the transaction(s) with the distributor. Factors considered include, but are not limited to, whether the payment terms offered to the distributor are structured to correspond to when product is resold, the distributor history of adhering to the terms of its contractual arrangements with the Company, whether the Company has a pattern of granting concessions for the benefit of the distributor and whether there are other conditions that may indicate that the sale to the distributor is not substantive.

In some cases, the Company recognizes distributor revenue as title and risk of loss passes, provided all other revenue recognition criteria have been satisfied (the "sell-in" method). For certain sales to certain distributors, the revenue recognition criteria for distributor sales are not satisfied at the time title and risk of loss passes to the distributor; for example, in instances where "inventory protection" arrangements were historically offered to distributors that permitted these distributors to return to the Company certain unsold products, the Company considers future arrangements with that distributor not to be fixed or determinable, and accordingly, revenue with that distributor is deferred until products are resold to customers of the distributor (the "sell-through" method). As of September 30, 2017 and December 31, 2016, the Company recorded current deferred product revenues of \$5,438,000 and \$5,411,000, respectively. In addition, the Company had \$490,000 in deferred product revenue that was classified as long-term as of September 30, 2017. There was no deferred product revenues classified as long term as of December 31, 2016. Included in deferred revenue as of September 30, 2017 and December 31, 2016 but excluded from deferred product revenues is deferred revenue related to license revenues. As of September 30, 2017, the Company recorded current and non-current deferred revenues of \$260,000 and \$1,588,000, respectively, related to payments received under licensing agreements as discussed further below. As of December 31, 2016, the Company recorded current and non-current deferred revenues of \$236,000 and \$1,787,000, respectively, related to payments received under licensing agreements as discussed further below. The cost of product revenues associated with such deferrals are also deferred and classified as deferred cost of product revenues in the consolidated balance sheets. Cash received from customers related to delivered product that may not represent a true sale is classified as customer refund liabilities in the consolidated balance sheets and the related cost of inventory remains in inventory in the consolidated balance sheets until the product is returned or is resold to customers of the distributor and revenue is recognized. During the three months ended September 30, 2017 and 2016, 41% and 44%, respectively, and for the nine months ended September 30, 2017 and 2016, 41% and 46%, respectively, of total revenues were recognized on a sell-through basis.

From time to time, the Company offers certain product rebates and incentives to its distributors and growers, which are estimated and recorded as reductions to product revenues when the revenue is recognized. The accrued liability associated with rebate and incentives is recorded at the time the liability is incurred.

The Company recognizes license revenues pursuant to strategic collaboration and distribution agreements under which the Company receives payments for the achievement of certain testing validation, regulatory progress and commercialization events. As these activities and payments are associated with exclusive rights that the Company provides in connection with strategic collaboration and distribution agreements over the term of the agreements, revenues related to the payments received are deferred and recognized over the term of the exclusive distribution period of the respective agreement. No payments were received under these agreements for the three and nine months ended September 30, 2017. For the three and nine months ended September 30, 2016, the Company had received payments totaling \$300,000 under these agreements. For the three months ended September 30, 2017 and 2016, the Company recognized \$58,000 and \$85,000, respectively, as license revenues. For the nine months ended September 30, 2017 and 2016, the Company recognized \$174,000 and \$269,000, respectively, as license revenues.

Research, Development and Patent Expenses

Research and development expenses include payroll-related expenses, field trial costs, toxicology costs, regulatory costs, consulting costs and lab costs. Patent expenses include legal costs relating to the patents and patent filing costs. These costs are expensed to operations as incurred. For the three months ended September 30, 2017 and 2016, research and development expenses totaled \$2,890,000 and \$2,393,000, respectively, and patent expenses totaled \$262,000 and \$269,000, respectively. For the nine months ended September 30, 2017 and 2016, research and development expenses totaled \$7,881,000 and \$6,550,000, respectively, and patent expenses totaled \$568,000 and \$747,000, respectively.

Net Loss per Share

Net loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding for the period. The calculation of basic and diluted net loss per share is the same for all periods presented as the effect of the potential common stock equivalents, which consist of stock options and warrants to purchase common stock, are anti-dilutive due to the Company's net loss position. Anti-dilutive common stock equivalents are excluded from diluted net loss per share. The following table sets forth the potential shares of common stock as of the end of each period presented that are not included in the calculation of diluted net loss per share because to do so would be anti-dilutive (in thousands):

	SEPTEMBER	
	30,	
	2017	2016
Stock options outstanding	3,198	3,056
Warrants to purchase common stock	4,232	4,027
Restricted stock units outstanding	672	415

Recently Adopted Accounting Pronouncements

In November 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2015-17, Balance Sheet Classification of Deferred Taxes (“ASU 2015-17”), which amends the current requirement for organizations to present deferred tax assets and liabilities as current and noncurrent in a classified balance sheet. Organizations will now be required to classify all deferred tax assets and liabilities as noncurrent. ASU 2015-17 is effective for public companies for financial statements issued for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early adoption is permitted. The amendments may be applied prospectively to all deferred tax liabilities and assets or retrospectively to all periods presented. The Company adopted ASU 2015-17 effective January 1, 2017. Adoption of this standard did not have a material impact on the Company’s consolidated financial position, results of operations or cash flows.

In March 2016, the FASB issued Accounting Standards Update No. 2016-09, Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting (“ASU 2016-09”). The amendments are effective for public companies for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Several aspects of the accounting for share-based payment award transactions are simplified, including: (a) income tax consequences; (b) classification of awards as either equity or liabilities; and (c) classification on the statement of cash flows. The Company adopted ASU 2016-09 effective January 1, 2017. Adoption of this standard did not have a material impact on the Company’s consolidated financial position, results of operations or cash flows.

In July 2015, the FASB issued Accounting Standards Update No. 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory (“ASU 2015-11”), which applies guidance on the subsequent measurement of inventory. ASU 2015-11 states that an entity should measure inventory at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonable predictable costs of completion, disposal and transportation. The guidance excludes inventory measured using last-in, first-out or the retail inventory method. ASU 2015-11 is effective for interim and annual reporting periods beginning after December 15, 2016 including interim periods within those fiscal years. Early adoption is permitted. The Company did not early adopt ASU 2015-11. The Company adopted ASU 2015-11 effective January 1, 2017. Adoption of this standard did not have a material impact on the Company’s consolidated financial position, results of operations or cash flow.

Recently Issued Accounting Pronouncements

In August 2016, the FASB issued Accounting Standards Update No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (“ASU 2016-15”). The amendments in this update clarify how certain cash receipts and cash payments are presented and classified in the statement of cash flows. ASU No. 2016-15 will be effective for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company has not elected to early adopt this guidance and is currently evaluating ASU 2016-15 to determine the impact to its consolidated financial statements.

In June 2016, the FASB issued Accounting Standards Update No. 2016-13, Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments (“ASU 2016-13”). ASU 2016-13 introduces a new forward-looking approach, based on expected losses, to estimate credit losses on certain types of financial instruments, including trade receivables. The estimate of expected credit losses will require entities to incorporate considerations of historical information, current information and reasonable and supportable forecasts. ASU 2016-13 also expands the disclosure requirements to enable users of financial statements to understand the entity’s assumptions, models and methods for estimating expected credit losses. For public business entities that meet the definition of a Securities and Exchange Commission filer, ASU 2016-13 is effective for annual and interim reporting periods beginning after December 15, 2019, and the guidance is to be applied using the modified-retrospective approach. Earlier adoption is permitted for annual and interim reporting periods beginning after December 15, 2018. The Company is currently evaluating ASU 2016-13 to determine the impact to its consolidated financial statements and related disclosures.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, Leases (Topic 842) Leases: Amendments to the FASB Accounting Standards Codifications (“ASU 2016-02”), to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. ASU 2016-02 is effective for public companies for financial statements issued for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. Companies must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified

retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. The Company is currently evaluating ASU 2016-02 to determine the potential impact to its consolidated financial statements and related disclosures.

In January 2016, the FASB issued Accounting Standards Update 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities (“ASU 2016-01”). ASU 2016-01 applies to all entities that hold financial assets or owe financial liabilities and is intended to provide more useful information on the recognition, measurement, presentation and disclosure of financial instruments. Among other things, ASU 2016-01 (i) requires equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (ii) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; (iii) eliminates the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities; (iv) eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; (v) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (vi) requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; (vii) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements; and (viii) clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity’s other deferred tax assets. For public business entities, ASU 2016-01 is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company is currently evaluating ASU 2016-01 to determine the potential impact to its consolidated financial statements and related disclosures.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”). ASU 2014-09 and its related amendments provide new, globally applicable converged guidance concerning recognition and measurement of revenue. The new guidance requires the application of a five-step model to determine the amount and timing of revenue to be recognized. The underlying principle is that revenue is to be recognized for the transfer of goods or services to customers that reflects the amount of consideration that the Company expects to be entitled to in exchange for those goods or services. Additionally, significant additional disclosures are required about the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The new guidance is effective for annual and interim periods beginning on or after December 15, 2017. ASU 2014-09 allows for either full retrospective or modified retrospective adoption. The full retrospective method requires ASU 2014-09 be applied to each prior period presented in the year of adoption and the cumulative effect of adoption would be reflected at the beginning of the year of adoption. The modified retrospective method has the cumulative effect of applying ASU 2014-09 at the beginning of the year of adoption. The Company is currently evaluating the transition method that will be elected and the potential effects of adopting the provisions of ASU 2014-09.

The Company is continuing to assess the impact of the new guidance on its accounting policies and procedures and is evaluating the new requirements as applied to existing revenue contracts. Although the Company is continuing to assess the impact of the new guidance, the Company believes the most significant impact will relate to the recognition of product sales made to distributors. The Company currently recognizes revenue from the sale of products made to distributors on either a sell-in or sell-through basis depending on the specific circumstances of the arrangement. The new guidance will likely result in an acceleration of revenue as under the new standard, the Company may no longer be required to defer revenues related to distributors that are currently recognized on the sell-through basis. In addition, the new guidance will likely also result in expanded disclosures related to the variable consideration and the judgments used to estimate it. This change will also impact our balance sheet presentation with an expected decrease in deferred revenues, deferred cost of product revenues and net period-specific increases to retained earnings for the change in revenue recognition for current sell-through basis contracts. The Company is reviewing its revenue contracts and working on its plan for implementation of the new guidance which it will adopt beginning in the first quarter of 2018.

3. Fair Value Measurements

Accounting Standards Codification (“ASC”) 820, *Fair Value Measurements* (“ASC 820”), clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability.

ASC 820 requires that the valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. ASC 820 establishes a three tier value hierarchy, which prioritizes inputs that may be used to measure fair value as follows:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3—Inputs that are generally unobservable and typically reflect management’s estimate of assumptions that market participants would use in pricing the asset or liability.

The following table presents the Company’s financial assets measured at fair value on a recurring basis as of September 30, 2017 and December 31, 2016 (in thousands):

	SEPTEMBER 30, 2017			
	TOTAL	LEVEL 1	LEVEL 2	LEVEL 3
Assets				
Money market funds	\$—	\$—	\$—	\$—

	DECEMBER 31, 2016			
	TOTAL	LEVEL 1	LEVEL 2	LEVEL 3
Assets				
Money market funds	\$3,752	\$3,752	\$ —	\$ —

The Company's money market funds are held at registered investment companies. As of December 31, 2016, the money market funds were in active markets and, therefore, are measured based on the Level 1 valuation hierarchy.

4. Inventories

Inventories, net consist of the following (in thousands):

As of September 30, 2017 and December 31, 2016, the Company had \$270,000 and \$127,000, respectively, in reserves against its inventories.

	SEPTEMBER 30, 2017	DECEMBER 31, 2016
Raw materials	\$ 2,238	\$ 3,491
Work in progress	2,110	2,044
Finished goods	4,985	2,947
	\$ 9,333	\$ 8,482

5. Accrued Liabilities

Accrued liabilities consist of the following (in thousands):

	SEPTEMBER 30, 2017	DECEMBER 31, 2016
Accrued customer incentives	\$ 2,473	\$ 639
Accrued compensation	1,511	1,403
Accrued legal costs	854	569
Accrued warranty costs	578	754
Accrued liabilities, other	2,880	2,143
	\$ 8,296	\$ 5,508

The Company warrants the specifications and/or performance of its products through implied product warranties and has extended product warranties to qualifying customers on a contractual basis. The Company estimates the costs that may be incurred during the warranty period and records a liability in the amount of such costs at the time product is shipped. The Company's estimate is based on historical experience and estimates of future warranty costs as a result of increasing usage of the Company's products. During the nine months ended September 30, 2017, the Company recognized \$153,000 in warranty expense associated with product shipments for the period. This expense was reduced by \$319,000 as a result of the historical usage of warranty reserves being lower than previously estimated. The Company periodically assesses the adequacy of its recorded warranty liability and adjusts the amount as necessary. Changes in the Company's accrued warranty costs during the period are as follows (in thousands):

Balance at December 31, 2016	\$754
Warranties issued (released) during the period	(166)
Settlements made during the period	(10)
Balance at September 30, 2017	\$578

6. Debt

Debt, including debt due to related parties, consists of the following (in thousands):

	SEPTEMBER 30, 2017	DECEMBER 31, 2016
Secured promissory notes (“October 2012 and April 2013 Secured Promissory Notes”) bearing interest at 14.00% per annum, payable monthly through October 2018, collateralized by substantially all of the Company’s assets, net of unamortized debt discount as of September 30, 2017 and December 31, 2016 of \$135 and \$228, respectively, with an imputed interest rate of 15.5%	\$ 12,315	\$ 12,222
Secured promissory note (“June 2014 Secured Promissory Note”) bearing interest at prime plus 2% (6.25% as of September 30, 2017) per annum, payable monthly through June 2036, collateralized by certain of the Company’s deposit accounts and MMM LLC’s inventories, chattel paper, accounts, equipment and general intangibles, net of unamortized debt discount as of September 30, 2017 and December 31, 2016 of \$231 and \$247, respectively, with an imputed interest rate of 6.5%	8,931	9,113
Secured revolving borrowing (“LSQ Financing”) bearing interest at (12.8% annually) payable through the lenders direct collection of certain accounts receivable through March 2018, collateralized by substantially all of the Company’s personal property, net of unamortized debt discount as of September 30, 2017 and December 31, 2016 of \$108 and \$0, respectively, with an imputed interest rate of 105%	1,096	—
Secured equipment financing agreement (“Equipment Financing Agreement”) no stated interest rate, payable monthly through December 2017, net of an imputed interest discount as of September 30, 2017 and December 31, 2016 of \$73 and \$0, respectively with an imputed interest rate of 176%	354	—
Senior secured promissory notes due to related parties (“August 2015 Senior Secured Promissory Notes”) bearing interest at 8% per annum, interest is payable biannually with principal payments due in increments at three, four and five years from the closing date, collateralized by substantially all of the Company’s assets, net of unamortized discount as of September 30, 2017 and December 31, 2016 of \$2,469 and \$3,333, respectively with an imputed interest rate of 10.8% (see Note 10)	37,531	36,667
Debt, including debt due to related parties	60,227	58,002
Less debt due to related parties	(37,531)	(36,667)
Less current portion	(1,692)	(252)
	\$ 21,004	\$ 21,083

The fair value of the Company’s outstanding debt obligations as of September 30, 2017 and December 31, 2016 was \$21,498,000 and \$21,611,000, respectively, which was estimated based on a discounted cash flow model using an estimated market rate of interest of 15% for the fixed rate debt and 6% for the variable rate debt, and is classified as Level 3 within the fair value hierarchy.

October 2012 and April 2013 Secured Promissory Notes

On October 2, 2012, the Company borrowed \$7,500,000 pursuant to senior notes (“October 2012 Secured Promissory Notes”) with a group of lenders. On April 10, 2013 (“Conversion Date”), the Company entered into an amendment to increase, by up to \$5,000,000, the amount available under the terms of the loan agreement with respect to the October 2012 Secured Promissory Notes. Under this amendment, an additional \$4,950,000 was issued in partial consideration for \$3,700,000 in cash received and in partial conversion for the cancellation of a \$1,250,000 subordinated convertible note (collectively, “April 2013 Secured Promissory Notes”). The total amount borrowed under the amended loan agreement for the October 2012 Secured Promissory Notes and the April 2013 Secured Promissory Notes increased from \$7,500,000 to \$12,450,000 as of the Conversion Date. The October 2012 and April 2013 Secured Promissory Notes bear interest at 14% at September 30, 2017. This loan is collateralized by substantially all of the Company’s assets.

June 2014 Secured Promissory Note

In June 2014, the Company borrowed \$10,000,000 pursuant to a business loan agreement and promissory note (“June 2014 Secured Promissory Note”) with Five Star Bank (“Lender”) which bears interest at 6.25% as of September 30, 2017. The interest rate is subject to change and is based on the prime rate plus 2.00% per annum. The June 2014 Secured Promissory Note is repayable in monthly payments of \$69,721 and adjusted from time-to-time as the interest rate changes, with the final payment due in June 2036. Certain of the Company’s deposit accounts and MMM LLC’s inventories, chattel paper, accounts, equipment and general intangibles have been pledged as collateral for the promissory note. The Company is required to maintain a deposit balance with the Lender of \$1,560,000, which is recorded as restricted cash included in non-current assets. In addition, until the Company provides documentation that the proceeds were used for construction of the Company’s manufacturing plant, proceeds from the loan will be maintained in a restricted deposit account with the Lender. As of September 30, 2017, the Company had \$933,000 remaining in this restricted deposit account, which is recorded as restricted cash included in current assets.

LSQ Financing

On March 24, 2017, the Company entered into an Invoice Purchase Agreement (the “LSQ Financing”) with LSQ Funding Group, L.C. (“LSQ”), pursuant to which LSQ may elect to purchase up to \$7,000,000 of eligible customer invoices from the Company. The Company’s obligations under the LSQ Financing are secured by a lien on substantially all of the Company’s personal property; such lien is first priority with respect to the Company’s accounts receivable, inventory, and related property, pursuant to an intercreditor agreement, dated March 22, 2017 (the “Three Party Intercreditor Agreement”), with administrative agents for the October 2012 and April 2013 Secured Promissory Notes holders and the August 2015 Senior Secured Promissory Notes holders.

Advances by LSQ may be made at an advance rate of up to 80% of the face value of the receivables being sold. Upon the sale of the receivable, we will not maintain servicing. LSQ may require us to repurchase accounts receivable if (i) the payment is disputed by the account debtor, with the purchaser being under no obligation to determine the bona fides of such dispute, (ii) the account debtor has become insolvent or (iii) upon the effective date of the termination of the LSQ Financing. LSQ will retain its security interest in any accounts repurchased by the Company.

The Company pays to LSQ (i) an invoice purchase fee equal to 1% of the face amount of each purchased invoice, at the time of the purchase, and (ii) a funds usage fee equal to 0.035%, payable monthly in arrears. An aging and collection fee is charged at the time when the purchased invoice is collected, calculated as a percentage of the face amount of such invoice while unpaid (which percentage ranges from 0% to 0.35% depending upon the duration the invoice remains outstanding). The LSQ Financing will be effective for one year with automatic one year renewals thereafter unless terminated by the Company at least 60 and not greater than 90 days from the end of the then-effective term; a termination fee is due upon early termination by the Company if such termination is not requested within such

30-day window. LSQ may terminate this agreement with 30 days written notice at which time the LSQ Financing will be terminated at the earlier of the 30-day period, the end of the current term, or the end of the then renewal term. The events of default under the LSQ Financing include failure to pay amounts due, failure to turn over amounts due to LSQ within a cure period, breach of covenants, falsity of representations, and certain insolvency events. The Company incurred \$215,000 in financing-related costs as part of the LSQ Financing that were recorded as a debt discount and amortized to interest expenses over the initial one-year term. The unamortized portion of these financing costs is \$108,000 as of September 30, 2017.

In April 2017, the Company began receiving advances under the LSQ Financing. The Company accounted for sales of accounts receivable under the LSQ Financing as a secured borrowing in accordance with ASC 860, Transfers and Servicing.

Upon sale of the receivable, the Company may elect to set up a reserve where upon the cash for the sale remains with LSQ and the Company can draw on the available amount on the reserve account at any time. As of September 30, 2017, the Company had \$1,512,000 included in accounts receivable that were transferred under this arrangement and had \$25,000 in excess funds available on the reserve account.

Equipment Financing

On August 22, 2017, the Company signed an equipment financing agreement (“Equipment Financing Agreement”) to purchase certain equipment it had leased under a capital lease. The total borrowed under the Equipment Financing Agreement was \$496,000. Principal payments of \$142,000 had been made under the Equipment Financing Agreement as of September 30, 2017. Additional monthly principal payments totaling \$354,000 are due through December 1, 2017. The Company will acquire title to the equipment once all payments have been made in accordance with the Equipment Financing Agreement. In the event the Company does not make all payments in accordance with Equipment Financing Agreement, the Equipment Financing Agreement will terminate and the lease schedule under which this equipment was originally acquired will resume. The Equipment Financing Agreement has no stated interest rate. The Company recorded imputed interest on this agreement of \$69,000 for the three and nine months ended September 30, 2017.

7. Share-Based Plans

As of September 30, 2017, there were 3,198,000 options outstanding, 672,000 restricted stock units outstanding and 2,416,000 share-based awards available for grant under the outstanding equity incentive plans.

For the three months ended September 30, 2017 and 2016, the Company recognized share-based compensation of \$555,000 and \$698,000, respectively. For the nine months ended September 30, 2017 and 2016, the Company recognized share-based compensation of \$1,724,000 and \$2,025,000, respectively. During the three months ended September 30, 2017 and 2016, the Company granted 29,000 and 308,000 options, respectively, at a weighted-average exercise price of \$1.18 and \$0.91, respectively. During the nine months ended September 30, 2017 and 2016, 85,000 and 1,261,000 options, respectively, were granted at a weighted-average exercise price of \$1.56 and \$1.12 per share, respectively. No options were exercised during the three months ended September 30, 2017. During the three months ended September 30, 2016, 8,000 options were exercised at a weighted average exercise price of \$1.19 per share. During the nine months ended September 30, 2017, 14,000 and 45,000 options were exercised at a weighted-average exercise price of \$1.21 and \$0.56 per share, respectively.

The following table summarizes the activity of restricted stock units from December 31, 2016 to September 30, 2017 (in thousands, except weighted average grant date fair value):

	SHARES OUTSTANDING	WEIGHTED AVERAGE GRANT DATE FAIR VALUE
Nonvested at December 31, 2016	350	\$ 0.75
Granted	257	\$ 1.14
Vested	(395)) \$ 0.88
Forfeited	—	—
Nonvested at September 30, 2017	212	\$ 0.98

8. Capital Leases

Capital Lease Termination

Until July 31, 2017, the capital lease termination date, the Company accounted for certain equipment acquired under financing arrangements as capital leases. On August 22, 2017, the Company signed the Equipment Financing Agreement to purchase certain equipment it was leasing under a capital lease as further discussed in Note 6. The Company had no outstanding capital leases as of September 30, 2017.

9. Commitments and Contingencies

Operating Leases

In September 2013 and then amended in April 2014, the Company entered into a lease agreement for approximately 27,300 square feet of office and laboratory space located in Davis, California. The initial term of the lease is for a period of 60 months and commenced in August 2014. The monthly base rent is \$44,000 per month for the first 12 months with a 3% increase each year thereafter. Concurrent with this amendment, in April 2014, the Company entered into a lease agreement with an affiliate of the landlord to lease approximately 17,400 square feet of office and laboratory space in the same building complex in Davis, California. The initial term of the lease is for a period of 60 months and commenced in August 2014. The monthly base rent is \$28,000 with a 3% increase each year thereafter.

On January 19, 2016, the Company entered into an agreement with a sublessee to sublease approximately 3,800 square feet of vacant office space located in Davis, California pursuant to the terms of its lease agreement. The initial term of the sublease is for a period of approximately 43 months and commenced on February 1, 2016. The monthly base rent is approximately \$5,000 per month for the first 12 months with a 5% increase each year thereafter.

On July 21, 2017, the Company entered into an agreement with a sublessee to sublease approximately 2,500 square feet of vacant office space located in Davis, California pursuant to the terms of its lease agreement. The initial term of the sublease is for a period of approximately 17 months and commenced on August 1, 2017. The monthly base rent for the term of the lease is approximately \$3,000 per month.

Litigation

On September 5, 2014, September 8, 2014, September 11, 2014, September 15, 2014 and November 3, 2014, the Company, along with certain of its current and former officers and directors and others were named as defendants in putative securities class action lawsuits filed in the U.S. District Court for the Eastern District of California. On February 13, 2015, these actions were consolidated as *Special Situations Fund III QP, L.P. et al v. Marrone Bio Innovations, Inc. et al*, Case No 2:14-cv-02571-MCE-KJN. On September 2, 2015, an initial consolidated complaint was filed on behalf of (i) all persons who purchased or otherwise acquired the Company's publicly traded common stock directly in or traceable to the Company's August 1, 2013 initial public offering; (ii) all persons who purchased or otherwise acquired the Company's publicly traded common stock directly in the Company's June 6, 2014 secondary offering; and (iii) all persons who purchased or otherwise acquired the Company's publicly traded common stock on the open market between March 7, 2014 and September 2, 2014 (the "Class Action"). The initial consolidated complaint also named certain of the Company's current and former officers and directors and the Company's independent registered public accounting firm as defendants. The initial consolidated complaint alleged violations of the Securities Act of 1933, the Securities Exchange Act of 1934 ("Exchange Act") and SEC Rule 10b-5, arising out of the issuance of allegedly false and misleading statements about the Company's business and prospects, including its financial statements, product revenues and system of internal controls. An amended consolidated complaint was filed on January 11, 2016. On March 15, 2016, lead plaintiffs moved to amend their consolidated complaint to, among other things, assert claims on behalf of all persons who purchased or otherwise acquired securities of the Company on the open market between August 1, 2013 and November 10, 2015. On April 4, 2016, counsel for the Company and its current and former officer and directors, counsel for the Company's primary and excess directors' and officers' liability insurers, and counsel for lead plaintiffs attended a private mediation before Jed D. Melnick at the JAMS offices in New York, New York. On May 25, 2016, the parties executed a final stipulation of settlement and lead plaintiff's counsel filed an unopposed motion for preliminary approval of the settlement. The stipulation provided for dismissal of the action as to the Company and the officer and director defendants, and a payment by the Company's insurers of \$12.0 million to an escrow account, to be distributed upon order of the court. On May 27, 2016, the Federal Court approved lead plaintiffs' motion to amend their consolidated complaint. At the Federal Court's request, the settling parties revised the stipulation and papers in support of preliminary approval to reflect the amended consolidated complaint, and refiled for preliminary approval of the settlement on June 16, 2016. On July 8, 2016, the Federal Court granted preliminary approval of the class action settlement. On September 27, 2016, the Federal Court granted final approval of the settlement.

On September 9, 2014 and November 25, 2014, shareholder derivative actions were filed in the Superior Court of California, County of Yolo (Case No. CV14-1481) and the U.S. District Court for the Eastern District of California (Case No. 1:14-cv-02779-JAM-CKD), purportedly on the Company's behalf, against certain current and former officers and members of its board of directors (the "2014 Derivative Actions"). The plaintiffs in the 2014 Derivative Actions alleged that the defendants breached their fiduciary duties, committed waste, were unjustly enriched and aided and abetted breaches of fiduciary duty by causing the Company to issue allegedly false and misleading statements.

On October 14, 2015, a shareholder derivative action was filed in the Superior Court of California, County of Yolo (Case No. CV15-1423), purportedly on the Company's behalf, against certain current and former officers and members

of the Company's board of directors and the Company's independent registered public accounting firm (the "2015 Derivative Action," and with the 2014 Derivative Actions, the "Derivative Actions"). The plaintiff in the 2015 Derivative Action alleged that the director and officer defendants breached their fiduciary duties, committed waste and were unjustly enriched by causing the Company to issue allegedly false and misleading statements and that the Company's independent registered public accounting firm committed professional negligence and malpractice. The issues in the 2014 Derivative Actions and 2015 Derivative Action overlap substantially with those at issue in the Class Action described above. On November 15, 2016, the Company, in its capacity as a nominal defendant, entered into a stipulation of settlement (the "Stipulation") in the Derivative Actions. On January 11, 2017, the Superior Court of California, County of Yolo entered an order preliminarily approving the settlement set forth in the Stipulation, and on April 5, 2017, it entered the final order and judgment approving the settlement set forth in the Stipulation. The Stipulation provides for dismissal of the shareholder derivative actions as to the Company, the certain current and former officers and members of the board of directors and the Company's independent registered public accounting firm, and the Company agrees to adopt or maintain certain corporate governance reforms for at least four years. The Stipulation also provides for attorneys' fees and expenses to be paid by the Company's insurers to plaintiffs' counsel. On June 22, 2017, plaintiffs in the derivative action in the U.S. District Court for the Eastern District of California filed a Notice of Voluntary Dismissal with Prejudice.

10. Related Party Transactions

August 2015 Senior Secured Promissory Notes

On August 20, 2015, the Company entered into a purchase agreement with Ivy Science & Technology Fund, Waddell & Reed Advisors Science & Technology Fund and Ivy Funds VIP Science and Technology, each an affiliate of Waddell & Reed, which is a beneficial owner of more than 5% of the Company's common stock. Pursuant to such purchase agreement, the Company sold to such affiliates senior secured promissory notes ("August 2015 Senior Secured Promissory Notes") in the aggregate principal amount of \$40,000,000. The August 2015 Senior Secured Promissory Notes bear interest at a rate of 8% per annum payable semi-annually on June 30 or December 31 of each year, commencing on December 31, 2015, with \$10,000,000 payable three years from the closing, \$10,000,000 payable four years from the closing and \$20,000,000 payable five years from the closing. On May 31, 2016, the terms of the August 2015 Secured Promissory Notes were amended to remove the provisions that had required the Company to maintain a \$15 million minimum cash balance. Debt due to related parties as of September 30, 2017 was \$37,531,000, net of unamortized debt discount of \$2,469,000. The fair value of the Company's debt due to related parties was \$38,141,000 and \$38,120,000 as of September 30, 2017 and December 31, 2016, respectively, which was estimated based on a discounted cash flow model using an estimated market rate of interest of 11.25%, and is classified as Level 3 within the fair value hierarchy. Accrued interest due to related parties was \$815,000 and \$1,618,000 as of September 30, 2017 and December 31, 2016, respectively.

11. Subsequent Event

October 2017 Convertible Note

On October 12, 2017, the Company and Dwight W. Anderson (the "Lender") entered into a convertible promissory note, which was restated in its entirety by a convertible promissory note entered into by the Company and the Lender on October 23, 2017, (the "October 2017 Convertible Note"). The October 2017 Convertible Note is an unsecured promissory note in the aggregate principal amount of up to \$6,000,000, due on October 23, 2020 (the "Maturity Date"). The initial funding of \$1,000,000 of the principal amount of the October 2017 Convertible Note occurred on October 12, 2017, and a second closing of an additional \$1,000,000 of the principal amount of the October 2017 Convertible Note was funded on October 23, 2017. Pursuant to the terms of the October 2017 Convertible Note, the Lender may, in his sole discretion, fund an additional \$2,000,000 of principal under the October 2017 Convertible Note on each of November 3, 2017 and December 3, 2017. The Company had not received the second discretionary payment under the October 2017 Convertible Note in the amount of \$2,000,000 as of November 14, 2017.

From the date of the closing through December 31, 2017, the October 2017 Convertible Note will bear interest at a rate of 1% per annum, payable in arrears on the Maturity Date, unless earlier converted into shares of the Company's common stock as described below. Thereafter, beginning January 1, 2018, the October 2017 Convertible Note will bear interest at a rate of 10% per annum, payable in arrears on the Maturity Date, unless earlier converted into shares of the Company's common stock as described below.

Any or all of the principal or accrued interest under the October 2017 Convertible Note may be converted into shares of the Company's common stock at a rate of one share of common stock per \$1.00 of converting principal or interest, rounded down to the nearest share with any fractional amounts cancelled, at the election of the Lender by delivery of written notice to the Company. In addition, upon the consummation of a qualified equity financing of the Company prior to the Maturity Date, the aggregate outstanding principal balance of the October 2017 Convertible Note and all accrued and unpaid interest thereon may convert, at the option of the Lender, into that number of the securities issued and sold in such financing, determined by dividing (a) such aggregate principal and accrued interest amounts, by (b) the purchase price per share or unit paid by the purchasers of the Company's securities issued and sold in such financing. Notwithstanding the foregoing, Lender's ability to affect any such conversions will be limited by applicable provisions governing issuances of shares of the Company's common stock under the rules of The Nasdaq Capital Market, subject to the Company's receipt of any applicable waivers thereof, and any amounts not issuable to the Lender in the Company's equity securities as a result of this limitation will be payable in cash.

The Company has not yet determined the potential impact of the October 2017 Convertible Note to its consolidated financial statements and related disclosures.

ITEM MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS 2. OF OPERATIONS

You should read the following discussion of our financial condition and results of operations in connection with our condensed consolidated financial statements and the related notes included elsewhere in this Quarterly Report on Form 10-Q (“Quarterly Report”) and with our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2016 (“Annual Report”), as filed with the Securities and Exchange Commission.

In addition to historical condensed consolidated financial information, this Quarterly Report on Form 10-Q contains forward-looking statements that reflect our plans, estimates and beliefs. Forward-looking statements are identified by words such as “believe,” “will,” “may,” “estimate,” “continue,” “anticipate,” “intend,” “should,” “plan,” “expect,” “predict,” “could,” “potentially” or the negative of these terms or similar expressions. You should read these statements carefully because they discuss future expectations, contain projections of future results of operations or financial condition, or state other “forward-looking” information. These statements relate to our future plans, objectives, expectations, intentions and financial performance and the assumptions that underlie these statements. For example, forward-looking statements include any statements regarding the strategies, prospects, plans, expectations or objectives of management for future operations, our expectations regarding registering or introduction of new products and new formulations and expanded use labels for existing products, including our anticipated launch of Stargus biofungicide, the benefits that may be derived from product or the commercial or market opportunity of any product, our ability to protect intellectual property rights, our anticipated operations, financial position, revenues, costs or expenses, statements regarding future economic conditions or performance, statements of belief and any statement of assumptions underlying any of the foregoing. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere, including those discussed in our Quarterly Report, Part II, Item 1A—“Risk Factors” of this Quarterly Report, and in Part I—Item 1A—“Risk Factors” of our Annual Report. Forward-looking statements are based on our management’s beliefs and assumptions and on information currently available to our management. These statements, like all statements in this report, speak only as of their date, and we undertake no obligation to update or revise these statements in light of future developments. We caution investors that our business and financial performance are subject to substantial risks and uncertainties.

Overview

We make bio-based pest management and plant health products. Bio-based products are comprised of naturally occurring microorganisms, such as bacteria and fungi, and plant extracts. Our current products target the major markets that use conventional chemical pesticides, including certain agricultural and water markets, where our bio-based products are used as alternatives for, or mixed with, conventional chemical products. We also target new markets for which (i) there are no available conventional chemical pesticides or (ii) the use of conventional chemical pesticides may not be desirable or permissible either because of health and environmental concerns (including for

organically certified crops) or because the development of pest resistance has reduced the efficacy of conventional chemical pesticides. Six of seven of our current products, our newest biological fungicide, Stargus, are approved by the United States Environmental Protection Agency (“EPA”) and registered as “biopesticides.” Our first non-EPA product is Haven, a plant health product, is a “biostimulant” which requires state registrations, but does not require EPA registration. We believe our current portfolio of products and our pipeline address the growing global demand for effective, efficient and environmentally responsible products to control pests, increase crop yields and reduce crop stress.

The agricultural industry is increasingly dependent on effective and sustainable pest management practices to maximize yields and quality in a world of increased demand for agricultural products, rising consumer awareness of food production processes and finite land and water resources. In addition, our research has shown that the global market for biopesticides is growing substantially faster than the overall market for pesticides. This demand is in part a result of conventional growers acknowledging that there are tangible benefits to adopting bio-based pest management products into integrated pest management (“IPM”) programs, as well as increasing consumer demand for organic food. We seek to capitalize on these global trends by providing both conventional and organic growers with solutions to a broad range of pest management needs through strategies such as adding new products to our product portfolio, continuing to broaden the commercial applications of our existing product lines, leveraging growers’ positive experiences with existing product lines, educating growers with on-farm product demonstrations and controlled product launches with key target customers and other early adopters. To that end, in March 2016 we entered into an agreement with Isagro USA to distribute Bio-Tam 2.0, a biofungicide for soil-borne disease control and grapevine trunk disease control that complements our existing products, particularly Regalia. In addition, in May 2017, we entered into an agreement with Jet Harvest Solutions to sell their contact Biofungicide, Jet-Ag in most regions of the United States. We believe this approach enables us to stay ahead of our competition in providing innovative pest management solutions, enhances our sales process at the distributor level and helps us to capture additional value from our products.

Our research and development efforts are focused on supporting existing commercial products, including Regalia, Grandevo, Venerate Majestene, and Haven with a focus on reducing cost of product revenues, further understanding the modes of action, manufacturing support and improving formulations. In addition, we have focused our internal efforts in developing and commercializing three promising products, Stargus and Amplitude biofungicides (previously referred to as MBI-110) which has been submitted to the EPA for registration, Ennoble biofumigant (previously referred to as MBI-601), which is EPA-registered and MBI-014 (formerly 010) bioherbicide. We continued under this focused plan to launch new products. We had the first sales of Majestene in 2016 and Haven in 2017. In addition, during 2016, we submitted our MBI-110 fungicide to the EPA for registration and received EPA registration for our biofumigant, MBI-601. Simultaneously, we are seeking collaborations with third parties to develop and commercialize more early stage candidates on which we have elected not to expend significant internal resources given our reduced budget. We believe collectively, these measures, together with our competitive strengths, including our leadership in the biologicals industry, commercially available products, robust pipeline of novel product candidates, proprietary discovery and development processes and industry experience, position us for growth.

We sell our crop protection products to leading agrichemical customers while also working directly with growers to increase existing and generate new product demand. To date, we have marketed our bio-based pest management and plant health products for agricultural applications to U.S. growers, through distributors and our own sales force, and we have focused primarily on high value specialty crops such as grapes, citrus, tomatoes and leafy greens. A large portion of our sales are currently attributable to conventional growers who use our bio-based pest management products either to replace conventional chemical pesticides or enhance the efficacy of their IPM programs. In addition, a portion of our sales are attributable to organic farmers who cannot use conventional pesticides and have few alternatives for pest management. As we continue to demonstrate the efficacy of our bio-based pest management and plant health products on new crops or for new applications, we may either continue to sell our products through our in-house sales force or collaborate with third parties for distribution to select markets.

Although we have historically sold a significant majority of our products in the United States, expanding our international presence and commercialization is an important component of our growth strategy. Regalia, Venerate and Grandevo are currently available in select international markets under distribution agreements with major agrichemical companies or regional distributors. Currently, our plan is to focus first on countries where we can gain the fastest registration approval to permit product launches while also pursuing key countries and regions with the largest and fastest growing biopesticide and plant health product markets for specialty crops and selected row crops. We are working with regional or national distributors in key countries who have brand recognition and established customer bases and who can conduct field trials and grower demonstrations and lead or assist in regulatory processes and market development.

We currently market our water treatment product, Zequanox, directly to a selected group of U.S. power and industrial companies. Due to our prioritization plan, we have not committed sufficient resources to Zequanox in order to market it full-scale. We are seeking sales and distribution partners for in-pipe and open water uses, and are currently in discussions with a large water treatment company to further develop Zequanox and expand it commercially. In addition, we continue to work with state, federal and bi-national partners to further develop Zequanox in the Great Lakes/Upper Mississippi River Basin as a habitat restoration tool and potential harmful algal bloom management tool.

We believe that Zequanox presents a unique opportunity for generating long-term revenue as there are limited water treatment options available to date, most of which are time-consuming, costly or subject to high levels of regulation. Our ability to generate significant revenues from Zequanox from in-pipe treatments is dependent on our ability to persuade customers to evaluate the costs of our Zequanox products compared to the overall cost, and environmental impact, of the chlorine treatment process, the primary current alternative to using Zequanox, rather than the cost of purchasing chemicals alone. In the fourth quarter of 2015, we implemented a new process at our manufacturing plant that reduced the cost of product revenues to be more competitive with other mussel treatment chemicals. Sales of Zequanox have also remained lower than our other products due to our prioritization of our crop protection business, the length of the treatment cycle, the longer sales cycle (the bidding process with utility companies and governmental agencies occurs on a yearly or multi-year basis), the unique nature of the treatment approach for each customer based on the extent of the infestation and the design of the facility.

Although our initial EPA-approved master labels cover our products' anticipated crop-pest use combinations, we launch early formulations of our pest management and plant health products to targeted customers under commercial labels that list a limited number of crops and applications that our initial efficacy data can best support. We then gather new data from experiments, field trials and demonstrations, gain product knowledge and get feedback to our research and development team from customers, researchers and agricultural agencies. Based on this information, we enhance our products, refine our recommendations for their use in optimal IPM programs, expand our commercial labels and submit new product formulations to the EPA and other regulatory agencies. For example, we began sales of Regalia SC, an earlier formulation of Regalia, in the Florida fresh tomatoes market in 2008, while a more effective formulation of Regalia with an expanded master label, including listing for use in organic farming, was under review by the EPA. In 2011, we received EPA approval of a further expanded Regalia master label covering hundreds of crops and various new uses for applications to soil and through irrigation systems, and we recently expanded sales of Regalia in large-acre row crops as a plant health product, in addition to its beneficial uses as a fungicide. In January 2016, we launched a new formulation of Regalia that no longer contains a solvent that is difficult to source and may experience future regulatory restrictions. This new formulation of Regalia disperses better in water and is easier to mix and rinse from containers and spray equipment. In addition, in June 2016, we launched a new formulation of Grandevo, Grandevo WDG, which offers improved handling and better, more convenient packaging. The water dispersible granule mixes easily in spray tanks with no dust or foam, which saves valuable time in the preparation and application processes. Similarly, ongoing field development research on the microbe used in Venerate, one of our insecticide products, led to our October 2015 registration of Majestene as a nematicide. We believe we have opportunities to broaden the commercial applications and expand the use of our existing products lines to help drive significant growth for our company.

Our total revenues were \$4.2 million and \$3.6 million for the three months ended September 30, 2017 and 2016, respectively, and \$14.8 million and \$11.4 million for the nine months ended September 30, 2017 and 2016, respectively, and have risen as growers have adopted our products and have used our products on an expanded number of crops. We generate our revenues primarily from product sales, which are principally attributable to sales of our Regalia, Grandevo, Venerate, Majestene and Zequanox product lines, but which also include sales of Bio-Tam 2.0, Haven and Jet Ag. We believe concerns regarding our ability to continue operations have impacted our ability to grow more robustly. Going forward, we believe our revenues will largely be impacted by weather, natural disasters and other factors affecting planting and growing seasons and incidence of pests and plant disease, and, accordingly, the decisions by our distributors, direct customers and end users about the types and amounts of pest management and plant health products to purchase and the timing of use of such products. For example, sales in the third quarter of 2017 were affected by Hurricane Irma in Florida.

We currently rely, and expect to continue to rely, on a limited number of customers for a significant portion of our revenues since we sell to highly concentrated, traditional distributor-type customers. Customers to which 10% or more of our total revenues are attributable for any one of the periods presented consist of the following:

	CUSTOMER A		CUSTOMER B	
Three months ended September 30, 2017	20	%	16	%
2016	25	%	—	
Nine months ended September 30, 2017	25	%	4	%
2016	30	%	—	

While we expect product sales to a limited number of customers to continue to be our primary source of revenues, as we continue to develop our pipeline and introduce new products to the marketplace, we anticipate that our revenue stream will be diversified over a broader product portfolio and customer base. Our cost of product revenues was \$2.5 million for the three months ended September 30, 2017 and 2016, and \$8.7 million and \$7.9 million for the nine months ended September 30, 2017 and 2016, respectively. Cost of product revenues consists principally of the cost of inventory, which includes the cost of raw materials, and third party services and allocation of operating expenses of our manufacturing plant related to procuring, processing, formulating, packaging, and shipping our products. Cost of product revenues also include charges recorded for write-downs of inventory, warranty, and, beginning in 2014, under-absorbed costs at our manufacturing plant when the manufacturing plant was placed into service. We have seen our costs of product revenues related to under-absorbed costs of our manufacturing plant decrease as we expand sales and increase production of our existing commercial products Regalia, Grandevo, Venerate, Majestene and Zequanox and during the three months ended September 30, 2017 we had sales of our new products, Haven and Jet Ag. Our costs related to write downs of inventory are expected to fluctuate based on increased volume of manufacturing and reliance on third party manufacturing services in the production of finished goods inventory. Our cost of product revenues will fluctuate as a percentage of total revenues primarily due to changes in product mix, based on margins the introduction of new products, and the growth of overall revenues, which also allows for better absorption of

overhead costs from the realization of better production efficiencies. We expect to see a gradual increase in gross margin over the life cycle of each of our products as we improve production processes, gain efficiencies, increase product yields, and grow revenues. These increases may be offset by additional charges for inventory write-downs and under-absorbed costs of our manufacturing plant until overall volume in the plant stabilizes at its optimum utilization levels, and/or we experience similar issues related to our third party manufacturing partners. We also expect fluctuation in margins on a quarterly basis due to seasonal product mix, and due to variations in the yield and efficacy of various individual batches of production until volumes get to a level that average out individual variances.

Our research, development and patent expenses have historically comprised a significant portion of our operating expenses. For the three months ended September 30, 2017 and 2016, these costs were \$3.2 million and \$2.7 million, respectively, and \$8.4 million and \$7.3 million for the nine months ended September 30, 2017 and 2016, respectively. We have made and will continue to make, substantial investments in research and development and we intend to continue to devote significant resources toward improving our processes and formulations of commercial products and the advancement of product candidates that are expected to have the greatest impact on near-term growth potential. Simultaneously, we are seeking collaborations with third parties to develop and commercialize more early stage candidates, which we have elected not to expend significant resources on given our focused strategy.

Selling, general and administrative expenses incurred to establish and build our market presence and business infrastructure have generally comprised the remainder of our operating expenses, amounting to \$5.2 million and \$3.8 million for the three months ended September 30, 2017 and 2016, respectively, and \$15.6 million and \$13.8 million for the nine months ended September 30, 2017 and 2016, respectively. In connection with our new strategy, we have been building a new sales and marketing organization which provides for increased training and a better ability to educate and support customers and growers as well as transitioning our product development staff to undertake greater responsibility for technical sales support, field trials and demonstrations to promote sales growth. In February 2016, we entered into a settlement agreement with the SEC with respect to the SEC's investigation, which was principally related to the accounting and other matters that were initially identified by us and that led to the financial restatement completed by us on November 10, 2015. Under the terms of the settlement agreement, we paid a \$1.75 million civil penalty in March 2016. We had previously recorded an expense for \$1.75 million in our consolidated statements of operations for the year ended December 31, 2014 to accrue its estimate of the penalties arising from such enforcement action.

Historically, we have funded our operations from the issuance of shares of common stock, preferred stock, warrants and convertible notes, the issuance of debt and entry into financing arrangements, product sales, payments under strategic collaboration and distribution agreements and government grants, but we have experienced significant losses as we invested heavily in research and development. We expect to incur additional losses related to our investment in the continued development, expansion and marketing of our product portfolio.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements and the related notes included elsewhere in this Quarterly Report on Form 10-Q are prepared in accordance with GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, net revenue, costs and expenses, and any related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Changes in accounting estimates are reasonably likely to occur from period to period. Accordingly, actual results could differ significantly from the estimates made by our management. We evaluate our estimates and assumptions on an ongoing basis. To the extent that there are material differences between these estimates and our actual results, our future financial statement presentation, financial condition, results of operations and cash flows will be affected.

We believe that the assumptions and estimates associated with revenue recognition, including assumptions and estimates used in determining the timing and amount of revenue to recognize for those transactions accounted for on a "sell-through" method, inventory valuation and share-based compensation have the greatest potential impact on our consolidated financial statements. Therefore, we consider these to be our critical accounting policies and estimates. There have been no material changes to our critical accounting policies as described in our Annual Report filed on Form 10-K, as amended, for the fiscal year ended December 31, 2016.

Key Components of Our Results of Operations

Product Revenues

Product revenues consist of revenues generated primarily from sales to customers, net of rebates and cash discounts. Product revenues constituted 99 and 98% of our total revenues for the three months ended September 30, 2017 and 2016, respectively, and 99% and 98% of our total revenues for the nine months ended September 30, 2017 and 2016, respectively.

In some cases, we recognize customers' revenue as title and risk of loss passes, provided all other revenue recognition criteria have been satisfied (the "sell-in" method). For sales to certain customers, the revenue recognition criteria are not satisfied at the time title and risk of loss passes to the customer; specifically, in instances where "inventory protection" arrangements were offered in the past to customers that permitted these customers to return to the Company certain unsold or unused products, or where the risk of future concessions may exist, we consider the arrangement not to be fixed or determinable, and accordingly, revenue is deferred until products are resold by our customers to their customers, or used (the "sell-through" method). The cost of goods sold associated with such deferral are also deferred and classified as deferred cost of product revenues in the consolidated balance sheets. For the three months ended September 30, 2017 and 2016, 42% and 44%, respectively, of product revenues were recognized on a sell-through basis. For the nine months ended September 30, 2017 and 2016, 42% and 47%, respectively, of product revenues were recognized on a sell-through basis.

License Revenues

License revenues generally consist of revenues recognized under our strategic collaboration and distribution agreements for exclusive distribution rights, either for Regalia, for other commercial products, or for our broader pipeline of products, for certain geographic markets or for market segments that we are not addressing directly through our internal sales force. Our strategic collaboration and distribution agreements generally outline overall business plans and include payments we receive at signing and for the achievement of certain testing validation, regulatory progress and commercialization events. As these activities and payments are associated with exclusive rights that we provide over the term of the strategic collaboration and distribution agreements, revenues related to the payments received are deferred and recognized as revenues over the term of the exclusive period of the respective agreements, which we estimate to be between 5 and 17 years based on the terms of the contract and the covered products and regions. License revenues represented 1% and 2% of total revenues for the three months ended September 30, 2017 and 2016, respectively, and 1% and 2% of total revenues for the nine months ended September 30, 2017 and 2016, respectively. As of September 30, 2017, including agreements with related parties discussed below, we had received an aggregate of \$3.9 million in payments under our strategic collaboration and distribution agreements. In addition, there will be an additional \$0.3 million in payments due on certain anniversaries of regulatory approval and an additional \$1.1 million in payments under these agreements that we could potentially receive if the testing validation, regulatory progress and commercialization events occur.

Product Shipments

We believe that product shipments is a useful measure of our sales that illustrates the value of our product shipment volumes in a given period. As certain of our product revenues are recognized on a “sell-in” basis while others are recognized on a “sell-through” basis, we believe product shipments facilitates a comparison of our operating performance on a consistent basis from period-to-period and provides for a more complete understanding of factors and trends affecting our business. We define product shipments as product revenues, plus related party product revenues related to product shipments, plus, or minus, the incremental amount of deferred revenues accrued during the applicable period from the shipment of products. This calculation specifically excludes changes in deferred revenue related to license revenues and customer deposits.

Cost of Product Revenues and Gross Profit

Cost of product revenues consists principally of the cost of raw materials, including inventory costs and third-party services related to procuring, processing, formulating, packaging and shipping our products. As we have used our Bangor, Michigan manufacturing plant to produce certain of our products, cost of product revenues includes an allocation of operating costs including direct and indirect labor, productions supplies, repairs and maintenance, depreciation, utilities and property taxes. The amount of indirect labor and overhead allocated to finished goods is

determined on a basis presuming normal capacity utilization. Operating costs incurred in excess of production allocations, considered idle capacity, are expensed to cost of product revenues in the period incurred rather than added to the cost of the finished goods produced. Cost of product revenues may also include charges due to inventory adjustments and reserves. In addition, costs associated with license revenues have been included in cost of product revenues as they have not been significant. Gross profit is the difference between total revenues and cost of product revenues. Gross margin is gross profit expressed as a percentage of total revenues.

We have entered into in-license technology agreements with respect to the use and commercialization of four of our commercially available product lines, Regalia, Grandevo, Zequanox, and Haven and certain other products under development. Under these licensing arrangements, we typically make royalty payments based on net product revenues, with royalty rates varying by product and ranging between 2% and 5% of net sales, subject in certain cases to aggregate dollar caps. These royalty payments are included in cost of product revenues, but they have historically not been significant. The exclusivity and royalty provisions of these agreements are generally tied to the expiration of underlying patents. Our in-licensed patents for Regalia and Zequanox expire in 2017 and our in-licensed U.S. patent for Grandevo is expected to expire in 2024. The licensed patents for Haven begin to expire in 2019.

There is, however, a pending in-licensed patent application relating to Grandevo, which could expire later than 2024 if issued. After the termination of these provisions, we may continue to produce and sell these products. While third parties thereafter may develop products using the technology under expired patents, we do not believe that they can produce competitive products without infringing other aspects of our proprietary technology, including issued patents and pending patent applications related to Regalia, Grandevo, Zequanox, and Haven and we therefore do not expect the expiration of the patents or the related exclusivity obligations to have a significant adverse financial or operational impact on our business.

We expect to see fluctuation in gross profit over the life cycle of each of our products and gross margins are expected to fluctuate over time based on product sales mix, and as production processes improve and as we gain efficiencies and increase product yields. We expect margins to improve on a product-by-product basis, as shipments expand and manufacturing efficiencies are realized our overall gross margins may vary as we introduce new products, introduce new sales incentives and programs, or have to rely on third-party manufacturing to address our demand. Gross margin has been and will continue to be affected by a variety of factors, including plant utilization, product manufacturing yields, changes in production processes, new product introductions, product mix and average selling prices.

In July 2012, we acquired a manufacturing facility, which we repurposed for manufacturing operations. We began full-scale manufacturing using this facility in 2014. We continue to use third party manufacturers for Venerate and Majestene, Haven, and Stargus, and for spray-dried powder formulations of Grandevo and Zequanox. We expect gross margins to improve using this facility as sales volumes are large enough to realize greater operational efficiencies, which could be offset by other factors mentioned above.

Research, Development and Patent Expenses

Research, development and patent expenses include personnel costs, including salaries, wages, benefits and share-based compensation, related to our research, development and patent staff in support of product discovery and development activities. Research, development and patent expenses also include costs incurred for patents, laboratory supplies, field trials and toxicology tests, quality control assessment, consultants and facility and related overhead costs.

Beginning in the fourth quarter of 2014, we reduced our research and development staff and prioritized our pipeline candidates, focusing first on Majestene and Haven, which are now commercially available, Stargus, which was recently approved by the EPA and which we expect to launch as soon as state registrations are received and other products that can be in the market in the next few years. We expect research, development and patent expenses to decrease in the near term as we have reduced headcount and will focus our efforts on select pipeline products. We are working to find partners to assist with the development of other pipeline candidates.

Selling, General and Administrative Expenses

Selling, general and administrative expenses consist primarily of personnel costs, including salaries, wages, benefits and share-based compensation, related to our executive, sales, marketing, finance and human resources personnel, as well as professional fees, including legal and accounting fees, and other selling costs incurred related to business development and to building product and brand awareness. We create brand awareness through programs such as speaking at industry events, trade show displays and hosting local-level grower and distributor meetings. In addition, we dedicate significant resources to technical marketing literature, targeted advertising in print and online media, webinars and radio advertising. Costs related to these activities, including travel, are included in selling expenses.

We expect our selling expenses to fluctuate in the near-term, both in absolute dollars and as a percentage of total revenues. For the three and nine months ended September 30, 2017, we incurred \$0.2 million in litigation-related expenses related to the restatement of our financial statements, net of insurance proceeds. As the proceeds received or to be received during the three months ended September 30, 2016 were greater than the expenses incurred during the

period ended, we recognized a benefit of \$0.7 million during the period related to these expenses. For the nine months ended September 30, 2016, we received insurance proceeds or commitments from our insurance providers in excess of expenses during the period of \$0.1 million.

Interest Expense

We recognize interest expense on notes payable and other debt obligations. In September 2014, we entered into a \$10.0 million promissory note with a variable interest rate that varies with the prime rate. Accordingly, our interest expense will increase as the prime rate increases. In August 2015, pursuant to a purchase agreement, we issued and sold to affiliates of Waddell & Reed Financial, Inc. senior secured promissory notes in the aggregate principal amount of \$40.0 million with a fixed interest rate and warrants to purchase up to 4.0 million shares of our common stock at an exercise price of \$1.91 per share for aggregate consideration of \$40.0 million. In November 2016, pursuant to an amendment to the October 2012 and April 2013 Secured Promissory Notes with a combined total of \$12.5 million outstanding, the interest rate on these notes decreased from 18% to 14%. This decrease in interest was partially offset by the additional interest associated with the valuation of 125,000 warrants in the amount of \$0.2 million. The value of the warrants is treated as a discount to this note and is being amortized to interest expense through the maturity date of these secured notes. In March 2017, we entered into the LSQ Financing which allows us to receive advances of up to \$7.0 million against receivables sold to LSQ. In April 2017, we began to draw down the LSQ Financing and as of September 30, 2017, we had an outstanding balance of \$1.2 million in secured borrowings. In August 2017, we entered into an equipment financing agreement in which we borrowed \$0.5 million to purchase certain equipment that had previously been financed under a capital lease. The outstanding balance under the equipment financing agreement was \$0.4 million as of September 30, 2017.

Interest Income

Interest income consists primarily of interest earned on cash balances. Our interest income will vary each reporting period depending on our average cash balances during the period and market interest rates.

Income Tax Provision

Since our inception, we have been subject to income taxes principally in the United States. We anticipate that as we further expand our sales into foreign countries, we will become subject to taxation based on the foreign statutory rates and our effective tax rate could fluctuate accordingly.

Income taxes are computed using the asset and liability method, under which deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. As of September 30, 2017, based on the available information, it is more likely than not that our deferred tax assets will not be realized, and accordingly we have taken a full valuation allowance against all of our U.S. deferred tax assets.

Key Components of Our Results of Operations

Results of Operations

The following table sets forth certain statements of operations and other financial and operating data:

	THREE MONTHS ENDED		NINE MONTHS ENDED	
	SEPTEMBER 30,		SEPTEMBER 30,	
	2017	2016	2017	2016
Revenues:				
Product	\$4,161	\$3,549	\$14,675	\$11,083
License	58	85	174	269
Total revenues	4,219	3,634	14,849	11,352
Cost of product revenues	2,492	2,493	8,737	7,880
Gross profit	1,727	1,141	6,112	3,472
Operating Expenses:				
Research, development and patent	3,152	2,662	8,449	7,297
Selling, general and administrative	5,174	3,754	15,590	13,796
Total operating expenses	8,326	6,416	24,039	21,093
Loss from operations	(6,599)	(5,275)	(17,927)	(17,621)
Other income (expense):				
Interest income	—	8	1	33
Interest expense	(804)	(755)	(2,309)	(2,264)
Interest expense to related parties	(1,098)	(1,099)	(3,257)	(3,265)
Other income (expense), net	(29)	(81)	(52)	(144)
Total other expense, net	(1,931)	(1,927)	(5,617)	(5,640)
Loss before income taxes	(8,530)	(7,202)	(23,544)	(23,261)
Income taxes	—	—	—	—

Net loss	\$(8,530)	\$(7,202)	\$(23,544)	\$(23,261)
Product shipments ⁽¹⁾	\$3,053	\$3,097	\$15,191	\$11,151

Product shipments is a supplemental measure of financial performance that is not required by, or presented in accordance with, GAAP. We define product shipments as product revenues, plus the incremental amount of deferred revenues accrued during the applicable period from shipment of products. This calculation specifically excludes changes in deferred revenue related to license revenues and customer deposits, and is intended to approximate the total value of products sold and under contract for sale in a given period. Product shipments, as defined herein, may not be comparable to similarly titled measures used by other companies. Our management uses this non-GAAP financial measure in order to have comparable results to analyze sales performance from quarter to quarter. We have chosen to provide this supplemental information regarding our sales in a given period to investors to facilitate a meaningful evaluation of actual operating results on a comparable basis with historical results, including to track product adoption, and to assist investors in their valuation of the Company.

The following table presents a reconciliation of product revenues, the most directly comparable GAAP financial measure, to product shipments for the periods indicated below (in thousands):

	THREE MONTHS ENDED		NINE MONTHS ENDED	
	SEPTEMBER 30,		SEPTEMBER 30,	
	2017	2016	2017	2016
Product revenues	\$4,161	\$3,549	\$14,675	\$11,083
Change in deferred product revenue(a)	(1,108)	(452)	516	68
Product shipments	\$3,053	\$3,097	\$15,191	\$11,151

Change in deferred product revenue is defined as the increase in the amount of deferred product revenues accrued during the applicable period, less prior deferred product revenues recognized during the applicable period, (a)excluding the change in deferred revenue associated with license fees and customer deposits. For the three months ended September 30, 2017 and 2016, deferred license revenues decreased \$58,000 and \$85,000, respectively, and \$174,000 and \$269,000 for the nine months ended September 30, 2017 and 2016, respectively.

The following table sets forth certain statements of operations data as a percentage of total revenues:

	THREE MONTHS ENDED		NINE MONTHS ENDED	
	SEPTEMBER 30,		SEPTEMBER 30,	
	2017	2016	2017	2016

*Comparison of Three Months Ended September 30, 2017 and 2016**Product Revenues*

	THREE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Dollars in thousands)			
Product revenues	\$4,161		\$3,549	
% of total revenues	99	%	98	%

Product revenues increased by \$0.6 million, or 17%, during the third quarter of 2017 as compared to the third quarter of 2016, as a result of increased product demand during the third quarter of 2017, offset by severe weather conditions that impacted such demand.

License Revenues

	THREE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Dollars in thousands)			
License revenues	\$ 58		\$ 85	
% of total revenues	1	%	2	%

License revenues related to certain strategic collaboration and distribution agreements decreased during the third quarter of 2017 as compared to the third quarter of 2016, as some of these agreements became fully amortized to revenue in 2016, and were not offset by new agreements in 2017.

Cost of Product Revenues and Gross Profit

	THREE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Dollars in thousands)			
Cost of product revenues	\$2,492		\$2,493	
% of total revenues	59	%	69	%
Gross profit	1,727		1,141	
% of total revenues	41	%	31	%

Cost of product revenues were flat during the third quarter of 2017 as compared to the third quarter of 2016, and gross profit improved by \$0.6 million. Gross margins were better by 10% during the third quarter of 2017 as compared to the third quarter of 2016 as a result of more favorable product sales mix experienced during the third quarter of 2017. Cost of product revenues as a percentage of revenue declined modestly, based on that favorable product sales mix, as well as manufacturing efficiencies realized at both our plant and through third party manufacturing service providers.

Research, Development and Patent Expenses

	THREE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Dollars in thousands)			
Research, development and patent	\$3,152		\$2,662	
% of total revenues	75	%	73	%

Research, development and patent expenses increased by \$0.5 million, or 18% during the third quarter of 2017 as compared to the third quarter of 2016, as we continued to focus our research and development resources on margin improvement, improved formulations of already commercialized products and our focused pipeline of new products. Related to these efforts, we saw an increase in field trials costs of \$0.4 million over the third quarter of 2016, as we test our existing and developing product lines on a wider range of crops and markets, and perform field testing of near term pipeline products.

Selling, General and Administrative Expenses

	THREE MONTHS ENDED SEPTEMBER 30, 2017 2016	
	(Dollars in thousands)	
Selling, general administrative expenses	\$5,174	\$3,754
% of total revenues	123 %	103 %

Selling, general and administrative expenses increased by \$1.4 million or 38% during the third quarter of 2017 as compared to the third quarter of 2016, primarily due to a \$1.0 million increase in third quarter legal expenses and a \$0.4 million non-cash loss on the disposal, sale or impairment of fixed assets. The increase in legal expenses during the third quarter of 2017 was primarily due to an insurance related-credit of \$0.7 million received during the third quarter of 2016 which offset expenses otherwise incurred.

Other Expense, Net

	THREE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Dollars in thousands)	
Interest income	\$—	8
Interest expense	(804)	(755)
Interest expense to related parties	(1,098)	(1,099)
Other income (expense) net	(29)	(81)
	\$(1,931)	\$(1,927)

Interest expense was flat year over year.

Comparison of Nine Months Ended September 30, 2017 and 2016

Product Revenues

	NINE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Dollars in thousands)	
Product revenues	\$ 14,675	\$ 11,083
% of total revenues	99 %	98 %

Product revenues increased by \$3.6 million, or 32% in the first nine months of 2017 as compared to the first nine months of 2016 as a result of increased demand for our portfolio of products.

License Revenues

NINE
MONTHS
ENDED
SEPTEMBER
30,
2017 2016

(Dollars in
thousands)

License revenues	\$ 174	\$ 269		
% of total revenues	1 %	2 %		

License revenues related to certain strategic collaboration and distribution agreements decreased in the first nine months of 2017 as compared to the first nine months of 2016, as some of these agreements became fully amortized to revenue in 2016, and were not offset by new agreements.

Cost of Product Revenues and Gross Profit

NINE MONTHS
ENDED
SEPTEMBER
30,
2017 2016

(Dollars in
thousands)

Cost of product revenues	\$8,737	\$7,880		
% of total revenues	59 %	69 %		
Gross profit	6,112	3,472		
% of total revenues	41 %	31 %		

Cost of product revenues and gross profit were up for in the first nine months of 2017 as compared to the first nine months of 2016, \$0.9 million or 11% and \$2.6 million or 76%, respectively. Cost of product revenues increased due to higher sales, and were offset by manufacturing efficiencies realized at both our manufacturing plant and through third

party manufacturing service providers. Gross profit increased as both a result of the revenue improvement, as well as a favorable product mix in the first nine months of 2017 as compared to the first nine months of 2016, as well as the manufacturing efficiencies previously mentioned.

Research, Development and Patent Expenses

	NINE MONTHS ENDED SEPTEMBER 30, 2017		2016	
	(Dollars in thousands)			
Research, development and patent	\$8,449		\$7,297	
% of total revenues	57	%	64	%

Research, development and patent expenses increased by \$1.2 million, or 16% in the first nine months of 2017 as compared to the first nine months of 2016, as we continued to focus our research and development resources on margin improvement, improved formulations of already commercialized products and our focused pipeline of new products. Costs increased primarily related to increased field trials and patent costs, supplies and chemicals, and employee-related costs. These costs are expected to fluctuate in the future.

Selling, General and Administrative Expenses

	NINE MONTHS ENDED SEPTEMBER 30, 2017		2016	
	(Dollars in thousands)			
Selling, general administrative expenses	\$15,590		\$13,796	
% of total revenues	105	%	122	%

Selling, general and administrative expenses increased by \$1.8 million or 13% in the first nine months of 2017 as compared to the first nine months of 2016, primarily due to an increase in employee related expenses, consulting associated with the new ERP system implementation and increased marketing consulting costs, legal fees, as well as a \$0.4 million non-cash loss related to the disposal, sale or impairment of equipment. These increases were offset by a reduction in audit and tax related fees. The Company also incurred increased costs related to outside legal fees for our restatement-related investigation and litigation activities as the Company realized greater insurance recoveries during the nine months ended September, 2016.

Other Expense, Net

	NINE MONTHS ENDED SEPTEMBER 30, 2017 2016	
	(Dollars in thousands)	
Interest income	\$1	\$33
Interest expense	(2,309)	(2,264)
Interest expense to related parties	(3,257)	(3,265)
Other income (expense) net	(52)	(144)
	\$ (5,617)	\$ (5,640)

Interest expense increased by \$0.0 million, or less than 1% in the first nine months of 2017 as compared to the first nine months of 2016, primarily due to a decrease in the interest rate on the October 2012 and April 2013 Secured Promissory Notes as documented in Note 6 to the condensed consolidated financial statements included in Part I—Item 1— “Financial Information.”

Seasonality and Quarterly Results

The level of seasonality in our business overall is difficult to evaluate as a result of our relatively early stage of development, our relatively limited number of commercialized products, our expansion into new geographical territories, the introduction of new products, the timing of introductions of new formulations and products and our recognition of revenue on both a “sell-in” and “sell-through” basis, depending on the transaction. It is possible that our business may become more seasonal, or experience seasonality in different periods, than anticipated, particularly if we expand into new geographical territories, add or change distributors or distributor programs or introduce new products with different applicable growing seasons, or if a more significant component of our revenue becomes comprised of sales of Zequanox, which has a separate seasonal sales cycle compared to our crop protection products. Notwithstanding any such seasonality, we expect substantial fluctuation in sales year over year and quarter over quarter as a result of a number of variables on which sales of our products are dependent. Weather conditions, natural disasters and other factors affect planting and growing seasons and incidence of pests and plant disease, and accordingly affect decisions by our distributors, direct customers and end users about the types and amounts of pest management and plant health products to purchase and the timing of use of such products. In addition, disruptions that cause delays by growers in harvesting or planting can result in the movement of orders to a future quarter, which would negatively affect the quarter and cause fluctuations in our operating results. For example, late snows and cold temperatures in the Midwestern and Eastern United States in the first and second quarters of 2014 delayed planting and pesticide and plant health applications, and the California drought in 2015 and the Northeast U.S. drought in 2016 affected fungicide sales and cold, wet weather in the Pacific Northwest in 2017 and Hurricanes Irma and Maria affected Florida and Puerto Rico crops in the third quarter of 2017. Customers also may purchase large quantities of our products in a particular quarter to store and use over long periods of time or time their purchases to manage their

inventories, which may cause significant fluctuations in our operating results for a particular quarter or year, and low commodity prices may discourage growers from purchasing our products in an effort to reduce their costs and increase their margins for a growing season.

Liquidity and Capital Resources

Since our inception, our operations have been financed primarily by net proceeds from public offerings of common stock and private placements of convertible preferred stock, convertible notes and promissory notes, and term loans, as well as proceeds from the sale of our products and payments under strategic collaboration and distribution agreements and government grants.

As of September 30, 2017, our cash and cash equivalents totaled \$3.7 million, and we had an additional \$2.5 million of restricted cash that we are contractually obligated to maintain in accordance with our debt agreements, which are discussed further below. Unless Five Star Bank extends its waiver of the applicable covenant, or we enter into strategic agreements that include significant cash payments upfront, significantly increase revenues from sales or raise additional capital through the issuance of equity, we will exceed the maximum debt-to-worth requirement under our promissory note to them upon the expiration of the current waiver on October 1, 2018. As of September 30, 2017, we had an accumulated deficit of \$258.2 million, and we estimate that we will continue to incur losses, which will further increase our accumulated deficit. Based on this cash on hand and our expectation that it will continue to incur significant operating losses, we do not have the capital to finance operations for the next twelve months. These circumstances raise substantial doubt about our ability to continue as a going concern, which depends on our ability to obtain further waivers of our covenants, enter into strategic agreements that include significant cash payments upfront or raise additional capital. There is no assurance that we will be able to obtain waivers of our debt covenants or raise capital, or if we are able to raise capital, that it will be on favorable terms. Adequate funds for these and the other purposes may not be available to us when needed or on acceptable terms, and we may need to raise capital that may not be available on favorable or acceptable terms, if at all. If we cannot raise money when needed, we may have to reduce or slow sales and product development activities, further reduce operating expenses and/or reduce capital investment. We incorporated additional information regarding risks related to our capital and liquidity described in Part I— Item 1A— “Risk Factors”, in our Annual Report filed on Form 10-K for the fiscal year ended December 31, 2016.

Since our inception, we have incurred significant net losses, and we expect to incur additional losses related to the continued development and expansion of our business. Our liquidity may be negatively impacted as a result of slower than expected adoption of our products. We have certain strategic collaboration and distribution agreements under which we receive payments for the achievement of certain testing validation, regulatory progress and commercialization events. As of September 30, 2017, we had received an aggregate of \$3.9 million in payments under these agreements. In addition, there will be an additional \$0.3 million in payments due on certain anniversaries of regulatory approval and an additional \$1.1 million in payments under these agreements that we could potentially receive if the testing validation, regulatory progress and commercialization events occur.

We had the following debt arrangements in place as of September 30, 2017, in each case as discussed below (dollars in thousands):

	PRINCIPAL
STATED	BALANCE
ANNUAL	(INCLUDING

DESCRIPTION	INTEREST RATE	ACCRUED INTEREST)	PAYMENT/MATURITY
Promissory Notes ⁽¹⁾	14.00 %	\$ 12,595	Monthly ⁽⁷⁾ /October 2018 ⁽⁸⁾
Promissory Note ⁽²⁾	6.25 %	9,190	Monthly/June 2036
Promissory Notes ⁽³⁾	8.00 %	40,815	Biannually ⁽⁹⁾ /August 2020

Equipment Financing ⁽⁵⁾	—	385	Varies/December 2017

(1) See “—October 2012 and April 2013 Secured Promissory Notes.”

(2) See “—June 2014 Secured Promissory Note.”

(3) See “—August 2015 Senior Secured Promissory Notes.”

(4) See “—LSQ Financing.”

(5) See “—Equipment Financing”

(6) No stated interest rate.

(7) Monthly payments are interest only until maturity.

(8) In November 2016, the maturity date was extended to October 2018.

- (9) Biannual payments are interest only until maturity with principal payments due in increments at three, four and five years from the closing date.
- (10) Payable through the lender's direct collection of certain accounts receivable through March 2018. This financing terminates in March 2018, but automatically extends if the Company does not provide written notice of termination. The lender can terminate this agreement with 30 days written notice. See the further
- (11) discussion in "LSQ Financing."

October 2012 and April 2013 Secured Promissory Notes

On October 2, 2012, we borrowed \$7,500,000 pursuant to senior notes ("October 2012 Secured Promissory Notes") with a group of lenders. On April 10, 2013 ("Conversion Date"), we entered into an amendment to increase, by up to \$5,000,000, the amount available under the terms of the loan agreement with respect to the October 2012 Secured Promissory Notes. Under this amendment, an additional \$4,950,000 was issued in partial consideration for \$3,700,000 in cash received and in partial conversion for the cancellation of a \$1,250,000 subordinated convertible note (collectively, "April 2013 Secured Promissory Notes"). The total amount borrowed under the amended loan agreement for the October 2012 Secured Promissory Notes and the April 2013 Secured Promissory Notes increased from \$7,500,000 to \$12,450,000 as of the Conversion Date. The October 2012 and April 2013 Secured Promissory Notes bear interest at 14% at September 30, 2017. This loan is collateralized by substantially all of the Company's assets.

June 2014 Secured Promissory Note

In June 2014, we borrowed \$10,000,000 pursuant to a business loan agreement and promissory note ("June 2014 Secured Promissory Note") with Five Star Bank ("Lender") which bears interest at 6.25% as of September 30, 2017. The interest rate is subject to change and is based on the prime rate plus 2.00% per annum. The September 2014 Secured Promissory Note is repayable in monthly payments of \$69,721 and adjusted from time-to-time as the interest rate changes, with the final payment due in September 2036. Certain of our deposit accounts and MMM LLC's inventories, chattel paper, accounts, equipment and general intangibles have been pledged as collateral for the promissory note. We are required to maintain a deposit balance with the Lender of \$1,560,000, which is recorded as restricted cash included in non-current assets. In addition, until we provide documentation that the proceeds were used for construction of our manufacturing plant, proceeds from the loan will be maintained in a restricted deposit account with the Lender. As of September 30, 2017, we had \$933,000 remaining in this restricted deposit account, which is recorded as restricted cash included in current assets.

August 2015 Senior Secured Promissory Notes

On August 20, 2015, we entered into a purchase agreement with Ivy Science & Technology Fund, Waddell & Reed Advisors Science & Technology Fund and Ivy Funds VIP Science and Technology, each an affiliate of Waddell & Reed, which is a beneficial owner of more than 5% of our common stock. Pursuant to such purchase agreement, we sold to such affiliates senior secured promissory notes (“August 2015 Senior Secured Promissory Notes”) in the aggregate principal amount of \$40,000,000. The August 2015 Senior Secured Promissory Notes bear interest at a rate of 8% per annum payable semi-annually on June 30 or December 31 of each year, commencing on December 31, 2015, with \$10,000,000 payable three years from the closing, \$10,000,000 payable four years from the closing and \$20,000,000 payable five years from the closing. On May 31, 2016, we entered into an amendment to the August 2015 Senior Secured Promissory Notes, pursuant to which each such affiliate agreed to delete from the August 2015 Senior Secured Promissory Notes the provisions that had required us to maintain a \$15 million minimum cash balance.

The August 2015 Senior Secured Promissory Notes are secured by substantially all of our personal property assets. The agent, acting on behalf of the lenders, shall be entitled to have a first priority lien on our intellectual property assets, pursuant to intercreditor arrangements with certain of our existing lenders.

LSQ Financing

On March 24, 2017, we entered into an Invoice Purchase Agreement (the “LSQ Financing”) with LSQ Funding Group, L.C. (“LSQ”), pursuant to which LSQ may elect to purchase up to \$7,000,000 of eligible customer invoices from the Company. Our obligations under the LSQ Financing are secured by a lien on substantially all of our personal property; such lien is first priority with respect to our accounts receivable, inventory, and related property, pursuant to an intercreditor agreement, dated March 22, 2017 (the “Three Party Intercreditor Agreement”), with administrative agents for the October 2012 and April 2013 Secured Promissory Notes holders and the August 2015 Senior Secured Promissory Notes holders.

Advances by LSQ may be made at an advance rate of up to 80% of the face value of the receivables being sold. Upon the sale of the receivable, we will not maintain servicing. LSQ may require us to repurchase accounts receivable if (i) the payment is disputed by the account debtor, with the purchaser being under no obligation to determine the bona fides of such dispute, (ii) the account debtor has become insolvent or (iii) upon the effective date of the termination of the LSQ Financing. LSQ will retain its security interest in any accounts repurchased from us.

We also pay to LSQ (i) an invoice purchase fee equal to 1% of the face amount of each purchased invoice, at the time of the purchase, and (ii) a funds usage fee equal to 0.035%, payable monthly in arrears. An aging and collection fee is charged at the time when the purchased invoice is collected, calculated as a percentage of the face amount of such invoice while unpaid (which percentage ranges from 0% to 0.35% depending upon the duration the invoice remains outstanding). The LSQ Financing will be effective for one year with automatic one year renewals thereafter unless terminated by the Company at least 60 and not greater than 90 days from the end of the then-effective term; a termination fee is due upon early termination by the Company if such termination is not requested within such 30-day window. LSQ may terminate this agreement with 30 days written notice at which time the LSQ Financing will be terminated at the earlier of the 30-day period, the end of the current term, or the end of the then renewal term. The events of default under the LSQ Financing include failure to pay amounts due, failure to turn over amounts due to LSQ within a cure period, breach of covenants, falsity of representations, and certain insolvency events. We incurred \$215,000 in financing-related costs as part of the LSQ Financing that were recorded as a debt discount and amortized to interest expenses over the initial one-year term. The unamortized portion of these financing costs is \$108,000 as of September 30, 2017.

In April 2017, we began receiving advances under the LSQ Financing. There was a \$1.2 million in outstanding balance under the LSQ Financing as of September 30, 2017.

Upon sale of the receivable, we may elect to set up a reserve where upon the cash for the sale remains with the third-party and the Company can draw on the available amount on the reserve account at any time. Since April 2017, there were times when we elected to utilize the reserve account, but there were no amounts outstanding under the reserve as of September 30, 2017. As of September 30, 2017, we had \$1,512,000 included in accounts receivable that were transferred under this arrangement and had \$25,000 in excess funds available on the reserve account.

Equipment Financing

On August 22, 2017, we signed an equipment financing agreement (“Equipment Financing Agreement”) to purchase certain equipment we had leased under a capital lease. The total borrowed under the Equipment Financing Agreement was \$496,000. Principal payments of \$142,000 had been made under the Equipment Financing Agreement as of September 30, 2017. Additional monthly principal payments totaling \$354,000 are due through December 1, 2017. We will acquire title to the equipment once all payments have been made in accordance with the Equipment Financing Agreement. In the event the Company does not make all payments in accordance with Equipment Financing Agreement, the Equipment Financing Agreement will terminate and the lease schedule under which this equipment was originally acquired will resume. The Equipment Financing Agreement has no stated interest rate. We recorded imputed interest on this agreement of \$69,000 for the three and nine months ended September 30, 2017.

Common Stock Offering

In April 2017, we completed a public offering of 6.6 million registered common shares for estimated net proceeds totaling \$8.2 million, as discussed in Note 1 to the condensed consolidated financial statements included in Part I—Item 1—“Financial Information.”

The following table sets forth a summary of our cash flows for the periods indicated (in thousands):

	NINE MONTHS ENDED SEPTEMBER 30, 2017 2016 (Unaudited)	
Net cash used in operating activities	\$(14,437)	\$(18,350)
Net cash used in investing activities	(376)	(169)
Net cash provided by financing activities	8,941	14,694
Net decrease in cash and cash equivalents	\$(5,872)	\$(3,825)

Cash Flows from Operating Activities

Net cash used in operating activities of \$14.4 million during the nine months ended September 30, 2017 resulted primarily from our net loss of \$23.5 million which was partially offset by \$4.3 million in cash provided by operating assets and liabilities, certain non-cash charges consisting of share-based compensation of \$1.7 million, depreciation and amortization of \$1.5 million, \$1.1 million of non-cash interest expense, and \$0.4 million in loss on disposal of equipment.

Net cash used in operating activities of \$18.4 million during the nine months ended September 30, 2016 primarily resulted from our net loss of \$23.3 million which was partially offset by certain non-cash charges consisting of share-based compensation of \$2.0 million, depreciation and amortization of \$1.7 million, \$1.0 million of non-cash interest expense, and \$0.1 million in cash provided by operating assets and liabilities.

Cash Flows from Investing Activities

Net cash used in investing activities were \$0.4 million during the nine months ended September 30, 2017 resulted from purchases of property, plant and equipment to support our operations.

Net cash used in investing activities was \$0.2 million during the nine months ended September 30, 2016 that resulted primarily from purchases of property, plant and equipment to support our operations.

Cash Flows from Financing Activities

Net cash provided by financing activities of \$8.9 million during the nine months ended September 30, 2017 consisted primarily of \$8.2 million in net proceeds from a sale of common stock, net proceeds from a secured borrowing of \$1.2 million and \$0.5 million reclassified from restricted cash to cash and cash equivalents, which were reduced by payments under capital leases and debt obligations, exclusive of the secured borrowings, of \$0.8 million, and financing costs of \$0.2 million.

Net cash provided by financing activities of \$14.7 million during the nine months ended September 30, 2016 consisted primarily of the reclassification of \$15.4 million in restricted cash to cash and equivalents. See Note 6 and 9 for further discussion. This was partially offset by cash used in financing activities of as a result of payments under capital leases of \$0.5 million and payments under debt obligations of \$0.2 million.

Contractual Obligations

The following is a summary of our contractual obligations as of September 30, 2017 (in thousands):

**2022
AND****BEYOND**

	TOTAL	2017	2018-2019	2020-2021	
	(In thousands)				
Operating lease obligations	\$1,801	\$237	\$ 1,564	\$ —	\$ —
Debt and capital leases	63,169	1,621	33,003	20,626	7,919
Interest payments relating to debt and capital leases	16,002	2,265	7,454	2,075	4,208
Total	\$80,972	\$4,123	\$ 42,021	\$ 22,701	\$ 12,127

Operating leases consist of contractual obligations from agreements for non-cancelable office space and leases used to finance the acquisition of equipment. Debt and capital equipment lease payments and the interest payments relating thereto include promissory notes and capital lease obligations in accordance with the payment terms under the agreements.

In September 2013 and then amended in April 2014, we entered into a lease agreement for approximately 27,300 square feet of office and laboratory space located in Davis, California. The initial term of the lease is for a period of 60 months and commenced in August 2014. The monthly base rent is \$44,000 for the first 12 months with a 3% increase each year thereafter. Concurrent with this amendment, in April 2014, we entered into a lease agreement with an affiliate of the landlord to lease approximately 17,400 square feet of office and laboratory space in the same building complex in Davis, California. The initial term of the lease is for a period of 60 months and commenced in August 2014. The monthly base rent is \$28,000 with a 3% increase each year thereafter.

In January 2016, we entered into an agreement with a sublessee to sublease approximately 3,800 square feet of vacant office space in the aforementioned building complex pursuant to the terms of our lease agreement. The initial term of the sublease is for a period of approximately 43 months and commenced on February 1, 2016. The monthly base rent is approximately \$5,000 per month for the first 12 months with increases of approximately 5% each year thereafter.

On July 21, 2017, we entered into an agreement with a sublessee to sublease approximately 2,500 square feet of vacant office space located in Davis, California pursuant to the terms of its lease agreement. The initial term of the sublease is for a period of approximately 17 months and commenced on August 1, 2017. The monthly base rent for the term of the lease is approximately \$3,000 per month.

Since September 30, 2017, we have not added any additional leases that would qualify as operating leases.

On November 11, 2016, we entered into the Amendment, which decreased the interest rate under the October 2012 and April 2013 Secured Promissory Notes to 14% effective November 1, 2016 and extended the maturity date by one year to October 2, 2018, resulting in a decrease in the total contractual obligations due in 2017 of \$12.5 million and an increase in the total contractual obligations due in 2018 of \$12.5 million.

Inflation

We believe that inflation has not had a material impact on our results of operations for the three months ended September 30, 2017 and 2016.

Off-Balance Sheet Arrangements

We have not been involved in any material off-balance sheet arrangements.

Recently Issued Accounting Pronouncements

See Note 2 to the condensed consolidated financial statements included in this Quarterly Report on Form 10-Q in Part I—Item 1—“Financial Information.”

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We currently have minimal exposure to the effect of interest rate changes, foreign currency fluctuations and changes in commodity prices. We are exposed to changes in the general economic conditions in the countries where we conduct business, which currently is substantially all in the United States. Our current investment strategy is to invest in financial instruments that are highly liquid, readily convertible into cash and which mature within nine months from the date of purchase. To date, we have not used derivative financial instruments to manage any of our market risks or entered into transactions using derivative financial instruments for trading purposes.

We do not believe our cash equivalents have significant risk of default or illiquidity. While we believe our cash equivalents do not contain excessive risk, we cannot provide absolute assurance that in the future our investments will not be subject to adverse changes in market value.

Interest Rate Risk

We had cash and cash equivalents of \$3.7 million as of September 30, 2017, which was held for working capital purposes. We do not enter into investments for trading or speculative purposes. We entered into a promissory note in June 2014, which bears interest at the prime rate plus 2%. A change in market interest rates of 1% would have an impact of approximately \$0.1 million on our future annual interest expense. All of our other debt is at fixed interest rates and thus a change in market interest rates would not have an impact on interest expense.

Foreign Currency Risk

Revenue and expenses have been primarily denominated in U.S. dollars and foreign currency fluctuations have not had a significant impact on our historical results of operations. In addition, our strategic collaboration and distribution agreements for current products provide for payments in U.S. dollars. As we market new products internationally, our product revenues and expenses may be in currencies other than U.S. dollars, and accordingly, foreign currency fluctuations may have a greater impact on our financial position and operating results.

Commodity Risk

Our exposure to market risk for changes in commodity prices currently is minimal. As our commercial operations grow, our exposure will relate mostly to the demand side as our end users are exposed to fluctuations in prices of agricultural commodities.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our principal executive officer and our principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. As of the end of the period covered by this report, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer ("CEO") and our Chief Financial Officer ("CFO"), of the effectiveness of the design and operation of our disclosure controls and procedures in ensuring that material information required to be disclosed in our reports filed or submitted under the Exchange Act has been made known to them in a timely fashion. Based on this evaluation, the CEO and CFO each concluded that our disclosure controls and procedures were effective as of September 30, 2017.

During the fourth quarter of fiscal 2016, we began the implementation of an ERP system. During the second quarter of fiscal 2017, we transitioned to our ERP system for manufacturing operations for material requirements planning, general ledger, procurement, payment, billings and cash receipts functions. We have accordingly, modified our existing internal controls infrastructure, as well as added other processes and internal controls, to adapt to our ERP system. We believe that the ERP system will enhance our internal control over financial reporting while providing us with the ability to scale our business. We believe we have taken the necessary steps to monitor and maintain appropriate internal control over financial reporting during the second and third quarters of fiscal 2017, and we will continue to evaluate the operating effectiveness of related key controls during subsequent periods.

Changes in Internal Control

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the period covered by this Quarterly Report that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute, assurance of achieving the desired control objectives. Because of the inherent limitations in internal control over financial reporting, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of a simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Note 9 to the condensed consolidated financial statements included in this Quarterly Report on Form 10-Q in Part I, Item 1, “Financial Information” describes certain legal proceedings to which we are subject.

ITEM 1A. RISK FACTORS

Other than as described below, we have not identified any material changes to the risk factors previously disclosed in Part I—Item 1A—“Risk Factors” in our Annual Report filed on Form 10-K, as amended, for the fiscal year ended December 31, 2016. Our business, financial condition and operating results can be affected by a number of factors, whether currently known or unknown, including but not limited to those described below or in the Annual Report, any one or more of which could, directly or indirectly, cause our actual financial condition and operating results to vary materially from past, or from anticipated future, financial condition and operating results. Any of these factors, in whole or in part, could materially and adversely affect our business, financial condition, operating results and stock price. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including the section titled “Part I—Item 2—“Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the condensed consolidated financial statements and related notes.

There is uncertainty about our ability to continue as a going concern.

Our consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. However, our cash and cash equivalents were \$3.7 million at September 30, 2017, compared with \$9.6 million at December 31, 2016. Based on this cash on hand and our expectation to continue to incur significant operating losses, we do not have the capital to finance operations for the next twelve months.

Management believes that we have access to capital resources through increased possible public or private equity offerings, debt financings, strategic collaborations involving significant up-front cash payments or other means. In addition, we continue to explore opportunities to strategically monetize our product pipeline, through potential distributor arrangements and licensing transactions, although there can be no assurance that we will be successful with such plans. We have historically been able to raise capital through equity offerings and debt financings, although no

assurance can be provided that we will continue to be successful in the future. Although management believes that significant on-going operating expenditures will be necessary to successfully implement our present business plan, if we are unable to raise sufficient capital, we may be forced to implement significant cost cutting measures and refocus our business as early as the fourth quarter of 2017.

In addition, although under a promissory note with Five Star Bank our lender has waived a requirement to remain below a maximum debt-to-worth ratio under this agreement through October 1, 2018, we expect that immediately after this waiver has expired, if we do not arrange an extension of the current waiver, we will be in violation of this covenant as well. Breach of covenants included in our debt agreements, which could result in the lenders demanding payment of the unpaid principal and interest balances, would have a material adverse effect upon our business and would likely require us to seek to renegotiate these debt arrangements with the lenders. If such negotiations are unsuccessful, we may be required to seek protection from creditors through bankruptcy proceedings.

These circumstances raise substantial doubt about our ability to continue as a going concern, which depends on our ability to obtain further waivers of our covenants, or raise additional capital and increase revenues. Our consolidated financial statements do not include any adjustments that might be necessary should we be unable to continue as a going concern. If we cannot continue as a viable entity, our shareholders may lose some or all of their investment in us.

Our products are early in their life cycle with limited sales history and we have incurred significant losses to date and anticipate continuing to incur losses in the future, and we may not achieve or maintain profitability.

We are an early stage company, and our commercialized products are early in their life cycle with limited sales history. We have incurred operating losses since our inception in June 2006, and we expect to continue to incur operating losses for the foreseeable future. As of September 30, 2017 and December 31, 2016, we had an accumulated deficit of \$258.0 million and \$234.6 million, respectively. For the three months ended September 30, 2017 and 2016, we had a net loss attributable to common stockholders of \$8.3 million, \$7.2 million, respectively. For the nine months ended September 30, 2017 and 2016, we had a net loss attributable to common stockholders of \$23.4 million, \$23.3 million, respectively. As a result, we will need to generate significant revenues to achieve and maintain profitability, and we may not be able to achieve profitability in the near future or at all, which may depress our stock price.

Through September 30, 2017, we have derived substantially all of our revenues from sales of Regalia, Grandevo and Venerate, Majestene and Haven. In addition, we have derived revenues from strategic collaboration and development agreements for the achievement of testing validation, regulatory progress and commercialization events, and from sales of other products. Accordingly, there is only a limited basis upon which to evaluate our business and prospects. Our future success depends, in part, on our ability to market and sell other products, as well as our ability to increase sales of Regalia, Venerate, Grandevo, Majestene and Haven and to introduce new products such as MBI-110, Stargus and Amplitude biofungicides, MBI-601, Ennoble biofumigant and MBI-014 bioherbicide. An investor in our stock should consider the challenges, expenses and difficulties we will face as a company seeking to develop and manufacture new types of products in a relatively established market. We expect to derive future revenues primarily from sales of Regalia, Grandevo, Zequanox, Venerate, Majestene and other products, but we cannot guarantee the magnitude of such sales, if any. We expect to continue to devote substantial resources to expand our research and development activities, further increase manufacturing capabilities and expand our sales and marketing activities for the further commercialization of Regalia, Grandevo, Zequanox, Venerate and Majestene, Haven, and introduce products such as Stargus/Amplitude, Ennoble and MBI-014. We expect to incur additional losses for the foreseeable future, including at least the next several years, and may never become profitable.

There is uncertainty about how the implementation of the new revenue recognition standard impact our financial statements.

In January 2018, as discussed in Note 2 to the condensed consolidated financial statements included in Part I—Item 1—“Financial Information”, the Company will be required to recognize revenue in accordance with the new revenue recognition standard, Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”). We are currently evaluating the possible impact of this new standard and how it will impact our financial statements. The new standard could have a material impact on the timing of how and when we recognize revenue, cost of goods sold, other expenses, and certain balance sheet accounts such as deferred cost of product revenues, deferred revenue, and retained earnings. In addition, depending on how we implement the new standard, certain of our deferred revenue balances at the end of December 31, 2017 under the new standard, may never be recognized in future years’ revenue. Depending upon the methodology used, full retrospective or modified retrospective, a significant component of deferred revenue may either be recast into historical revenues or recast as prior period’s retained earnings, respectively. In order to comply with the requirements of ASC 606 on January 1, 2018, we are continuing to update and enhance our internal accounting systems and our internal controls over financial reporting. If we are not successful in updating our policies, procedures, information systems and internal controls over financial reporting, the revenue that we recognize and the related disclosures that we provide under ASC 606 may not be complete or accurate, which could harm our operating results or cause us to fail to meet our reporting obligations.

We expect to require additional financing in the future to meet our business requirements and to service our debt. Such capital raising may be costly, difficult or not possible to obtain and, if obtained, would significantly dilute current stockholders’ equity interests, and we may be unable to repay our secured indebtedness.

We expect to incur expenses related to our continued operations, including improving and promoting our commercially available products, advancing product candidates, expanding our international presence and commercialization, recruitment and retention of personnel, and other working capital and general corporate purposes.

In addition, we have significant outstanding indebtedness. For example, in October 2017, we borrowed \$2.0 million under a convertible note with a lender, which matures in October 2020. As of September 30, 2017, we had \$1.2 million of debt pursuant to the LSQ Financing and \$0.4 million outstanding under the Equipment Financing Agreement. In our August 2015 private placement transaction, we issued senior secured promissory notes in the initial aggregate principal amount of \$40.0 million, which accrue interest at a rate of 8% per annum, with \$10.0 million payable three years from the closing, \$10.0 million payable four years from the closing and \$20.0 million payable five years from the closing. In June 2014, we borrowed \$10.0 million pursuant to a promissory note with a bank, which accrues interest at a variable interest rate, 6.25% per annum as of December 31, 2015, and which is repayable in monthly payments through June 2036. We also completed private placements in October 2012 and April 2013 of promissory notes in the aggregate principal amount of \$12.5 million, which, following their amendment in November 2016, now accrue interest at 14% through maturity in October 2018. The debt agreements with respect to these transactions contain various financial and other covenants, as discussed below, and our obligations under the loan agreements are secured by all of our real and personal property assets and general intangibles.

As we expect to continue to incur significant losses until we are able to significantly increase our revenue, we expect to need significant additional financing to meet the financial covenants or pay the principal and interest under our debt agreements, as well as to maintain and expand our business. We may seek additional funds from public or private equity offerings, debt financings, strategic collaborations involving up-front cash payments or other means. Additional capital may not be available on terms acceptable to us, or at all. Any additional equity financing would be significantly dilutive to stockholders or, in some cases, require us to seek shareholder approval for the financing, and debt financing, if available, may include restrictive covenants and bear high rates of interest. In addition, our existing loan agreements contain certain restrictive covenants that either limit our ability to, or require a mandatory prepayment if we incur additional indebtedness and liens and enter into various specified transactions. We therefore may not be able to engage in any of the foregoing transactions unless we obtain the consent of our lenders or prepay the outstanding amounts under the debt agreements, which could require us to pay additional prepayment penalties. In addition, we may incur substantial costs in pursuing future capital financing, including investment banking fees, legal fees, accounting fees, securities law compliance fees, printing and distribution expenses and other costs. We also may be required to recognize non-cash expenses in connection with certain securities we issue, such as warrants, which may adversely impact our financial results.

Certain of our debt agreements also contain financial covenants, including maintaining minimum current, debt-to-worth and loan-to-value ratios and provisions providing for an event of default if there is a material adverse change in our financial condition or if we are in default under certain of our other agreements. While we are not currently in default under any of these agreements, and none of our lenders have previously declared an event of default on our indebtedness, prior to our recent receipt of waivers from our lenders, we had not been in compliance with certain of these covenants. Further, we expect that immediately after the waiver under our promissory note with Five Star Bank has expired on October 1, 2018, we will be in violation of the note's requirement to remain below a maximum debt-to-worth ratio. Breach of covenants included in our debt agreements, which could result in the lenders demanding payment of the unpaid principal and interest balances. If we fail to pay any principal or interest under our indebtedness when due, or are otherwise in violation of certain covenants under our debt agreements, this may result in the acceleration of our indebtedness, which would have a material adverse effect upon our business and would likely require us to seek to renegotiate these debt arrangements with the lenders, as we may not have sufficient funds to repay that indebtedness.

In addition, in February 2016, we entered into a settlement agreement with the SEC with respect to the SEC's investigation, which was principally related to the accounting and other matters that were initially identified by us and that led to the financial restatement completed by us on November 10, 2015. Pursuant to the settlement agreement, we agreed to a permanent injunction from violating the Securities Act in future, has caused us to be deemed to be a "bad actor" under Rule 506 of the Securities Act and to be disqualified by the requirements of Rule 262 of Regulation A, which prevents us from relying on an exemption from registration for the sale and issuance of securities under Regulation D and A, respectively. This could make it harder for us to sell shares privately and negatively affect our ability to raise capital.

If we cannot raise more money when needed, or are unable to use our future working capital, borrowings or equity financing to repay or refinance the amounts outstanding under our debt agreements or to renegotiate our debt arrangements with lenders, we may have to reduce our capital expenditures, scale-back our development of new products, reduce our workforce or license to others products that we otherwise would seek to commercialize ourselves. Any of these eventualities would likely have a material adverse impact on our value and the value of our equity. Further, we may not be able to continue operating if we do not raise new capital or generate sufficient revenue from operations needed to stay in business, and we may be required to seek protection from creditors through bankruptcy proceedings. See Part I—Item 2— "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources" above.

Unforeseen problems with the implementation and maintenance of our information systems could have an adverse effect on our operations and if internal controls are not designed and operated effectively our internal control over financial reporting could be ineffective.

Early in fourth quarter of 2016, we began the process of implementing an enterprise resource planning ("ERP") system. During the second quarter of fiscal 2017, we transitioned to our ERP system for manufacturing operations for material

requirements planning, general ledger, procurement, payment, billings and cash receipts functions. The cost of implementing the ERP system is reflected in our financial statements. As we add functionality and increase the use of the ERP throughout the Company, we will incur additional costs and problems could arise that we have not foreseen, including interruptions in service, loss of data, or reduced functionality. Such problems could adversely impact our ability to provide quotes, take customer orders, and otherwise run our business in a timely manner. In addition, if our new systems fail to provide accurate and increased visibility into pricing and cost structures, it may be difficult to improve or maximize our profit margins. As such, our results of operations and cash flows could be adversely affected.

In addition, the ERP system we implemented is new to our organization. We do not have experience with implementing and maintaining controls over this ERP system. While we believe we have designed the appropriate controls around this ERP system, if we have not designed controls within or around these systems that are effective at preventing and detecting unreliable data, or if we are unable to design or operate controls within or around these systems to provide effective control around program changes and access to the systems, we may be at risk for future material weaknesses. The existence of a material weakness could result in errors in our financial statements that could result in a restatement of financial statements, which could cause us to fail to meet our reporting obligations, lead to a loss of investor confidence and have a negative impact on the trading price of our common stock.

Item 2. UNRegistered Sales of Equity Securities and Use of Proceeds

None.
