Security Valuation

Portfolio securities are valued by various methods depending on the primary market or exchange on which they trade. Most equity securities for which the primary market is the United States are valued at the official closing price, last sale price or, if no sale has occurred, at the closing bid price. Most equity securities for which the primary market is outside the United States are valued using the official closing price or the last sale price in the principal market in which they are traded. If the last sale price (on the local exchange) is unavailable, the last evaluated quote or closing bid price normally is used. Certain of the securities in which the Fund invests are priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities. Corporate bonds and notes may be valued according to prices quoted by a bond dealer that offers pricing services. Open end investment companies are valued at their net asset value. Securities for which quotations are not readily available or reliable and other assets may be valued as determined in good faith by the Investment Manager under the direction of or pursuant to procedures established by the Fund's Board of Directors. Due to the inherent uncertainty of valuation, these values may differ from the value that would have been used had a readily available market for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the net asset value of its shares to differ from the net asset value that would be calculated using market prices.

Fair Value Measurements

The Fund uses a three level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect a Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The Fund's investment in its entirety is assigned a level based upon the inputs which are significant to the overall valuation. The inputs or methodology used for valuing investments are not an indication of the risk associated with investing in those securities.

The hierarchy of inputs is summarized below.

- Level 1 - unadjusted quoted prices in active markets for identical assets or liabilities including securities actively traded on a securities exchange.
- Level 2 - observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability which may include quoted prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.
- Level 3 - unobservable inputs for the asset or liability including the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability.

The following is a summary of the inputs used as of February 28, 2011 in valuing the Fund's assets carried at fair value. Refer to the Schedule of Portfolio Investments for detailed information on specific investments.

Illiquid and Restricted Securities

The Fund owns securities which have a limited trading market and/or certain restrictions on trading and, therefore, may be illiquid and/or restricted. Such securities have been valued at fair value in accordance with the procedures described above. Due to the inherent uncertainty of valuation, these values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. Illiquid and/or restricted securities owned at February 28, 2011, were as follows:

	Acquisition Date	Cost	Value
Solar Cayman Ltd.	3/7/07	\$604,763	\$26,400
Star Asia Financial Ltd.	2/22/07	686,145	249,313
Star Asia SPV, LLC	2/22/07	84,805	17,850
		\$1,375,713	\$293,563
Percent of net assets		1.74 %	0.37 %

Cost for Federal Income Tax Purposes

At February 28, 2011, for federal income tax purposes the aggregate cost of securities was \$86,787,412 and net unrealized depreciation was \$11,535,797, comprised of gross unrealized appreciation of \$14,539,108 and gross unrealized depreciation of \$3,003,311.
