

EASTMAN KODAK CO  
Form 10-K  
March 07, 2017

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the year ended December 31, 2016 or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number 1-87

EASTMAN KODAK COMPANY

(Exact name of registrant as specified in its charter)

NEW JERSEY 16-0417150  
(State of incorporation) (IRS Employer Identification No.)

343 STATE STREET, ROCHESTER, NEW YORK 14650  
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code:585-724-4000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.01 par value	New York Stock Exchange

Edgar Filing: EASTMAN KODAK CO - Form 10-K

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes No

The aggregate market value of the voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, as of the last business day of the registrant's most recently completed second fiscal quarter, June 30, 2016 was approximately \$171 million. The registrant has no non-voting common stock.

The number of shares outstanding of the registrant's common stock as of March 1, 2017 was 42,430,666 shares of common stock.

## PART I

### ITEM 1. BUSINESS

When used in this report, unless otherwise indicated by the context, “we,” “our,” “us,” and “Kodak” refer to the consolidated company on the basis of consolidation described in Note 1 to the consolidated financial statements in Part II, Item 8, “Financial Statements and Supplementary Data” of this Form 10-K Report. Also, unless otherwise indicated by the context, “EKC” means the parent company, Eastman Kodak Company (the “Company”).

Kodak provides directly and through partnerships with other innovative companies hardware, software, consumables and services to customers in graphic arts, commercial print, publishing, packaging, electronic displays, entertainment and commercial films, and consumer products markets. With its world-class R&D capabilities, innovative solutions portfolio and highly trusted brand, Kodak is helping customers around the globe to sustainably grow their own businesses and enjoy their lives.

Kodak is a global commercial printing and imaging company with proprietary technologies in materials science, digital imaging science and software, and deposition processes (methods whereby one or more layers of various materials in gaseous, liquid or small particle form are deposited on a substrate in precise quantities and positions). Kodak leverages its core technology products and services to develop solutions for the product goods packaging and graphic communications markets, and is commercializing products for the functional printing market. Kodak also offers brand licensing and intellectual property opportunities, provides products and services for motion pictures and other commercial films, and sells ink to its existing installed consumer inkjet printer base.

The Company was founded by George Eastman in 1880 and incorporated in 1901 in the State of New Jersey. Kodak is headquartered in Rochester, New York.

### REPORTABLE SEGMENTS

Kodak has seven reportable segments: Print Systems, Micro 3D Printing and Packaging, Software and Solutions, Consumer and Film, Enterprise Inkjet Systems, Intellectual Property Solutions and Eastman Business Park. The balance of Kodak’s continuing operations, which do not meet the criteria of a reportable segment, are reported in All Other which primarily represents the RED utilities variable interest entity until deconsolidation in December 2016 (refer to Note 1, “Summary of Significant Accounting Policies”).

Information on Kodak’s revenues and long-lived assets by geographic area as well as revenues and earnings by reportable segment for each of the past three years are shown in Note 24, “Segment Information,” in the Notes to Financial Statements.

#### Print Systems

The Print Systems segment is comprised of Prepress Solutions, which includes Kodak’s digital offset plate offerings and computer-to-plate imaging solutions, and Electrophotographic Printing Solutions, which offers high-quality digital printing solutions using electrically charged toner based technology. The Print Systems segment provides digital and traditional product and service offerings to a variety of commercial industries, including commercial print, direct mail, book publishing, newspapers and magazines and packaging. While the businesses in this segment are experiencing pricing pressure, continued innovations in Kodak product lines that can command premium prices offset some of the long term market price erosion.

Prepress Solutions capitalizes on a contract-based, stable and recurring cash flow-generative business model. The average duration of customer contracts is two years. These contracts offer stability and generate recurring revenue. The core of the business is the manufacturing of aluminum digital printing plates of varying sizes. These plates can be as small as 23cm x 27cm and as large as 126cm x 287cm. Unexposed plates are sold to commercial printing

companies for use in the offset printing process. Kodak also manufactures equipment, known as Computer to Plate (“CTP”) equipment, which images the plates with a laser. The plates are used in the offset printing process, which transfers ink from the plate onto a rubber blanket and then onto the substrate to be printed. Due to the nature of the imaging and printing process, a new plate must be used for each printing run. As a result, there is a recurring revenue stream from the sale of these plates.

The Print Systems products and services are sold globally to customers through both a direct sales team as well as indirectly through dealers. Primary competitors are Fuji and Agfa. Kodak expects to benefit from current industry trends, including customers’ increasing focus on sustainability initiatives, which strengthens demand for Kodak’s process-free solutions.

**Prepress Solutions:**

• Digital offset plates, including KODAK SONORA Process Free Plates. KODAK SONORA Process Free Plates are prepared directly with a CTP thermal output device and do not require subsequent processing chemistry, processing equipment or chemical disposal. As a result, the plates deliver cost savings and efficiency for customers and promote environmental sustainability practices.

• CTP output devices that are used by customers to transfer images onto aluminum offset printing plates and provide consistent and high quality imaging for offset press applications. CTP products provide high resolution, consistency and stability in thermal imaging. Kodak also offers a lower cost CTP system using TH5 imaging technology, which provides a highly efficient and cost-effective imaging solution at a lower price point.

• Net sales for Prepress Solutions accounted for 56%, 54% and 51% of total net revenue for the years ended December 31, 2016, 2015 and 2014, respectively.

#### Electrophotographic Printing Solutions:

• NEXPRESS printers produce high-quality, differentiated printing of short-run, personalized print applications, such as direct mail, books, marketing collateral and photo products.

• DIGIMASTER printers use monochrome electrophotographic printing technology for transactional printing, short-run books, corporate documentation, manuals and direct mail.

• Net sales for Electrophotographic Printing Solutions accounted for 10%, 11% and 10% of total net revenue for the years ended December 31, 2016, 2015 and 2014, respectively.

The Print Systems segment also provides service and support related to these products.

#### Micro 3D Printing and Packaging

The Micro 3D Printing and Packaging segment includes flexographic printing equipment and plates and related consumables and services, as well as printed functional materials and components. Micro 3D Printing seeks to provide innovative printing techniques to customers for both premium marketing applications and manufacturing applications. Because Micro 3D Printing products are in the process of being commercialized, a higher degree of investment is required. Micro 3D Printing and Packaging products are sold directly by Kodak and indirectly through dealers.

#### Micro 3D Printing

• The Micro 3D Printing products have the potential to offer many advantages over traditionally manufactured products, including lower cost points and avoidance of environmental impacts associated with the mining of a rare metal. Kodak achieved an initial launch into the large format market in 2016, and is making technical advancements to broaden addressable markets in 2017. The touch panel sensor industry is served by many technologies with overlapping applications being fulfilled by multiple suppliers, both global and local.

#### Packaging

• The Flexographic Packaging business consists of flexographic printing equipment and related consumables and services, which enable graphic customization of a wide variety of packaging materials. The FLEXCEL NX system provides imaging devices to deliver high productivity and consistency, as well as a full tonal range for flexographic printing. The industry is highly competitive. The most significant competitors are Esko-Graphics BVBA and Dainippon Screen Mfg. Co., Ltd. for imaging equipment and Asahi Kasei Corporation, E.I. du Pont de Nemours and Company, Flint Group S.A., Fuji, MacDermid Incorporated, Toray Industries, Inc. and Toyobo Co., Ltd. for consumables. Competition is based on quality, technology, performance, price, reliability, brand, reputation, range of products and services, and service and support.

#### Software and Solutions

The Software and Solutions segment is comprised of Unified Workflow Solutions and Kodak Technology Solutions, which includes enterprise services and solutions. Unified Workflow Solutions is an established product line whereas Kodak Technology Solutions includes growing product lines that leverage existing Kodak technologies and intellectual property in new applications. The contributions these business initiatives make to earnings is expected to grow with a modest amount of additional investment. Software and Solutions products and services are sold directly by Kodak and indirectly through dealers. Sales in Software and Solutions are project-based and can vary from year to year depending on the nature and number of projects in existence that year.

#### Unified Workflow Solutions

•

Unified Workflow Solutions offers a leading suite of solutions for print production workflow, including the PRINERGY workflow production software, by providing customer value through automation, web integration and integration with other Kodak systems and third-party offerings. Production workflow software is used by customers to manage digital and conventional print content from file creation to output. Production workflow software manages content and color, reduces manual errors and helps customers manage the collaborative creative process. Kodak believes it is a leader in production workflow solutions for the commercial print and packaging industries with over 15,000 systems installed in some of the largest printing and packaging establishments around the world. The markets that Unified Workflow Solutions serves are highly competitive. Key customer segments each face competitive market pressure in pricing and new product introduction. Primary competitors include Heidelberg, Agfa, Fuji, and Esko.

#### ✦Kodak Technology Solutions

✦Kodak Technology Solutions assists organizations with challenges and opportunities created by the worldwide digital transformation. It provides print and managed media services that assist customers with solutions for their printing requirements and document management services, including expertise in the capture, archiving, retrieval and delivery of documents. Kodak Technology Solutions serves enterprise customers primarily in the government and financial services sectors. Digitization and document management services are provided by a variety of players, both global and local, in a market that varies significantly in terms of quality and pricing of services provided.

4

---

## Consumer and Film

The Consumer and Film segment is comprised of three lines of business: Motion Picture, Industrial Films and Chemicals; Consumer Inkjet Solutions; and Consumer Products. Consumer and Film products are distributed directly by Kodak and indirectly through dealers. Two Industrial Films and Chemicals customers represent approximately 30 percent of total Consumer and Film segment revenues.

### • Motion Picture, Industrial Films and Chemicals:

• Includes the motion picture film business serving the entertainment and advertising industries. Motion picture products are sold directly to studios, laboratories and independent filmmakers.

• Offers industrial films, including films used by the electronics industry to produce printed circuit boards. Primary competitors are Fuji and Agfa.

• The business also includes related component businesses: Polyester Film; Solvent Recovery; and Specialty Chemicals, Inks and Dispersions.

• Net sales for Motion Picture, Industrial Chemicals and Films accounted for 11%, of total net revenue for each of the years ended December 31, 2016, 2015 and 2014.

### • Consumer Inkjet Solutions:

• Involves the sale of ink to an existing installed base of consumer inkjet printers.

### • Consumer Products:

• Includes licensing of Kodak brands to third parties and consumer products such as the Super 8 camera. Kodak currently licenses its brand for use with a range of consumer products including batteries, cameras and camera accessories and recordable media. Kodak intends to continue efforts to grow its portfolio of consumer product licenses in order to generate both ongoing royalty streams and upfront payments.

## Enterprise Inkjet Systems

The Enterprise Inkjet Systems segment contains a base of customers which use KODAK VERSAMARK printing systems, comprised of inkjet printing heads, inks, head refurbishment services as well as on-site maintenance service from Kodak. Applications of the VERSAMARK printing systems include publishing, transactional, commercial print and direct mail. Enterprise Inkjet Systems products are distributed directly by Kodak and indirectly through dealers. The markets that the Enterprise Inkjet Systems segment serves are highly competitive in variable printing applications like direct mail, newspapers and books. Key competitors are Canon, Ricoh, Domino and Screen.

## Intellectual Property Solutions

The Intellectual Property Solutions segment contains the research laboratories and includes licensing as well as new business development activities related to Kodak's patents and proprietary technology. Through this segment Kodak conducts research and files patent applications with fundamental inventions from the Kodak Research Laboratories, located in the Eastman Business Park in Rochester, New York. Additionally, Kodak continues to file significant numbers of new patent applications in areas aligned with its core businesses. Via these core business patent applications along with the research inventions, Kodak maintains a large worldwide portfolio of pending applications and issued patents. Kodak actively seeks opportunities to leverage its patents and associated technology in licensing and/or cross-licensing deals to support both revenue growth and its ongoing businesses. While revenues from these licensing activities tend to be unpredictable in nature, this segment still carries potential for material revenue generation. The Intellectual Property Solutions segment also actively pursues additional revenues via new business development through commercialization partnerships and grants or external investment in commercialization of new technologies and products.

## Eastman Business Park

The Eastman Business Park segment includes the operations of the Eastman Business Park, a more than 1,200 acre technology center and industrial complex in Rochester, New York and the leasing activities related to that space. A

large portion of this facility is used in Kodak's own manufacturing and other operations, while the remaining portion is occupied by external tenants or available for rent to external tenants. Three tenants represent over 60 percent of total Eastman Business Park segment revenues

#### DISCONTINUED OPERATIONS

Discontinued operations of Kodak include the PROSPER Enterprise Inkjet business and the Personalized Imaging and Document Imaging businesses ("PI/DI Business"). Refer to Note 26, "Discontinued Operations" in the Notes to Financial Statements for additional information.

#### FINANCIAL INFORMATION BY GEOGRAPHIC AREA

Financial information by geographic area for the past three years is shown in Note 24, "Segment Information," in the Notes to Financial Statements.

## RAW MATERIALS

The raw materials used by Kodak are many and varied, and are generally readily available. Lithographic aluminum is the primary material used in the manufacture of offset printing plates. Kodak procures lithographic aluminum coils from several suppliers with pricing based, in part, on either prevailing market prices for aluminum or on fixed prices for aluminum agreed to up to two years prior. Electronic components are used in the manufacturing of commercial printers and other electronic devices. Although most electronic components are generally available from multiple sources, certain key electronic components included in the finished goods manufactured by and purchased from Kodak's third party suppliers are obtained from single or limited sources, which may subject Kodak to supply risks.

## SEASONALITY OF BUSINESS

Equipment and plate unit sales generally are higher in the fourth quarter, resulting from customer or industry budgeting practices and buying patterns.

## RESEARCH AND DEVELOPMENT

Through the years, Kodak has engaged in extensive and productive efforts in research and development.

Kodak's general practice is to protect its investment in research and development and its freedom to use its inventions by obtaining patents. The ownership of these patents contributes to Kodak's ability to provide industry-leading products. Kodak holds portfolios of patents in several areas important to its business, including the specific technologies previously discussed, such as flexographic and lithographic printing plates and related equipment systems; digital printing workflow and color management proofing systems; color and black-and-white electrophotographic printing systems including key press components and toners; commercial inkjet writing systems and components, presses and inks; consumer inkjet inks and media; functional printing materials, formulations, and deposition modalities; security materials; embedded information; and color negative films, processing and print films. Each of these areas is important to existing and emerging business opportunities that bear directly on Kodak's overall business performance.

Kodak's major products are not dependent upon one single, material patent. Rather, the technologies that underlie Kodak's products are supported by an aggregation of patents having various remaining lives and expiration dates. There is no individual patent, or group of patents, whose expiration is expected to have a material impact on Kodak's results of operations.

Total research and development expenses were \$40 million in 2016, \$44 million in 2015 and \$64 million in 2014.

## ENVIRONMENTAL PROTECTION

Kodak is subject to various laws and governmental regulations concerning environmental matters. The U.S. federal environmental legislation and state regulatory programs having an impact on Kodak include the Toxic Substances Control Act, the Resource Conservation and Recovery Act, the Clean Air Act, the Clean Water Act, the NY State Chemical Bulk Storage Regulations and the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (the "Superfund Law").

It is Kodak's policy to carry out its business activities in a manner consistent with sound health, safety and environmental management practices, and to comply with applicable health, safety and environmental laws and regulations. Kodak continues to engage in programs for environmental, health and safety protection and control.

Based upon information presently available, future costs associated with environmental compliance are not expected to have a material effect on Kodak's capital expenditures or competitive position, although costs could be material to a

particular quarter or year.

## EMPLOYMENT

At the end of 2016, Kodak employed the full time equivalent of approximately 6,100 people globally, of whom approximately 2,700 were employed in the U.S. The actual number of employees may be greater because some individuals work part time.

## AVAILABLE INFORMATION

Kodak files many reports with the Securities and Exchange Commission (“SEC”) ([www.sec.gov](http://www.sec.gov)), including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. These reports, and amendments to these reports, are made available free of charge as soon as reasonably practicable after being electronically filed with or furnished to the SEC. They are available through Kodak's website at [www.Kodak.com](http://www.Kodak.com). To reach the SEC filings, follow the links to About Kodak, Investor Center, Financial Information and then SEC Filings.

## ITEM 1A. RISK FACTORS

Kodak operates in rapidly changing economic and technological environments which present numerous risks, many of which are driven by factors it cannot control or predict. Certain factors may have a material adverse effect on its business, financial condition, and results of operations. You should consider carefully the risks and uncertainties described below, in addition to other information contained in this Annual Report on Form 10-K, including the Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) section and the consolidated financial statements and related notes. The following discussion of “risk factors” identifies Kodak's assessment of the most significant factors which

may adversely affect its business, operations, financial position or future financial performance. Additional risks and uncertainties Kodak is unaware of, or currently believes are not material, may also become important factors which could adversely affect its business, operations, financial position or future financial performance.

#### Risks Related to Kodak's Business

The ability to generate positive operating cash flows will be necessary for Kodak to continue to operate its business.

Kodak has significantly reduced its rate of negative operating cash flow over the past three years. The Print Systems segment is its largest segment and has declining revenues and its segment earnings are also expected to decline. Kodak's "stable" and "growth" business segments may not grow or continue to generate the same or enough cash flow to offset businesses with declining cash flows. Kodak may be unable to generate positive cash flow from operations in the future, which would have a material adverse effect on its liquidity and financial position.

Continued investment, capital needs, restructuring payments, dividends and servicing the Company's debt require a significant amount of cash and it may not be able to generate cash necessary to fund these activities, which could adversely affect its business, operating results and financial condition.

Kodak's business may not generate cash flow in an amount sufficient to enable it to pay the principal of, or interest on its indebtedness, or to fund Kodak's other liquidity needs, including working capital, capital expenditures, product development efforts, strategic acquisitions, investments and alliances, restructuring actions and other general corporate requirements.

Kodak's ability to generate cash is subject to general economic, financial, competitive, litigation, regulatory and other factors beyond our control. There are no assurances:

- Kodak's businesses will generate sufficient cash flow from operations;
- Kodak will be able to generate expected levels of operational EBITDA;
- Kodak will be able to repatriate or move cash to locations where and when it is needed;
- the Company will meet all the conditions associated with making borrowings or issuing letters of credit under the ABL Credit Agreement;
- Kodak will realize cost savings, earnings growth and operating improvements resulting from the execution of its business and restructuring plan;
- Kodak will not have to expend cash defending lawsuits regardless of the merits of any claims raised; or
- Future sources of funding will be available in amounts sufficient to enable funding of its liquidity needs.

If Kodak cannot fund its liquidity needs, it will have to take actions, such as reducing or delaying capital expenditures, product development efforts, strategic acquisitions, and investments and alliances; selling additional assets; restructuring or refinancing the Company's debt; or seeking additional equity capital. Such actions could increase the Company's debt, negatively impact customer confidence in its ability to provide products and services, reduce its ability to raise additional capital and delay sustained profitability. There are no assurances any of these actions could, if necessary, be taken on commercially reasonable terms, or at all, or they would satisfy Kodak's liquidity needs. In addition, if it incurs additional debt, the risks associated with the Company's substantial leverage, including the risk it will be unable to service its debt, generate cash flow sufficient to fund its liquidity needs, or maintain compliance with the covenants in the Credit Agreements, could intensify.

Kodak has significantly restructured its business and implemented a new segment reporting structure. The restructured Kodak has been in effect for a limited period of time and there are no assurances Kodak will be able to successfully operate as a restructured business.

Kodak has focused its investments on imaging and printing for business, specifically, commercial inkjet, packaging and functional (Micro 3D) printing solutions, and enterprise services and solutions. Each of these businesses requires

additional investment and may not be successful. The introduction of successful innovative products at market competitive prices and the achievement of scale are necessary for it to grow these businesses, improve margins and achieve its financial objectives. Additionally, its strategy is based on a number of factors and assumptions, some of which are not within its control, such as the actions of third parties. There can be no assurance it will be able to successfully execute all or any elements of its strategy, or its ability to successfully execute its strategy will be unaffected by external factors. If it is unsuccessful in growing Kodak's investment businesses as planned, or perceiving the needs of its target customers, its financial performance could be adversely affected.

If Kodak is not able to successfully implement its strategic business plans, or experiences implementation delays in cost structure reduction, Kodak's consolidated results of operations, financial position and liquidity could be negatively affected.

Kodak continues to rationalize its workforce and streamline operations to a leaner and more focused organization aligned with its business initiatives. There are no assurances such measures will prove to be successful or the cost savings or other results it achieves through these plans will be consistent with its expectations. As a result, its results of operations, financial position and liquidity could be negatively impacted. Additionally, if

restructuring plans are not effectively managed, it may experience lost customer sales, product delays, additional costs and other unanticipated effects, causing harm to its business and customer relationships. The business plans are subject to a number of assumptions, projections, and analysis. If these assumptions prove to be incorrect, Kodak may be unsuccessful in executing its business plan or achieving the projected results, which could adversely impact its financial results and liquidity. Finally, the timing and implementation of these plans require compliance with numerous laws and regulations, including local labor laws, and the failure to comply with such requirements may result in damages, fines and penalties which could adversely affect Kodak's business.

Kodak's inability to effectively complete and manage strategic transactions could adversely impact its business performance, including its financial results.

As part of Kodak's strategy, it may be engaged in discussions with third parties regarding possible divestitures, asset sales, spin-offs, investments, acquisitions, strategic alliances, joint ventures, and outsourcing transactions and may enter into agreements relating to such transactions in order to further its business objectives. For example, Kodak is in talks with prospective buyers about offers to purchase its Prosper enterprise inkjet business. In order to successfully pursue its strategic transaction strategy, it must identify suitable buyers, sellers and partners and successfully complete transactions, some of which may be large and complex, and manage post-closing issues such as the elimination of any remaining post-sale costs related to divested businesses. Transaction risk can be more pronounced for larger and more complicated transactions, or when multiple transactions are pursued simultaneously. If Kodak fails to identify and successfully complete transactions that further its strategic objectives, it may be required to expend resources to develop products and technology internally, it may be at a competitive disadvantage or it may be adversely affected by negative market perceptions. Any of these factors could have an adverse effect on its revenue, gross margins and profitability. In addition, unpredictability surrounding the timing of such transactions could adversely affect its financial results.

Kodak may pursue acquisitions or combinations which could fail or present unanticipated problems for its business in the future, which would adversely affect its ability to realize the anticipated benefits of those transactions or increase the price it would be required to pay.

Kodak may seek to enter into transactions which may include acquiring or combining with other businesses. It may not be able to identify suitable acquisition or combination opportunities or finance and complete any particular acquisition or combination successfully. Furthermore, acquisitions and combinations involve a number of risks and challenges, including:

- the ability to obtain required regulatory and other approvals;
- the need to integrate acquired or combined operations with its business;
- potential loss of key employees;
- difficulty in evaluating operating costs, infrastructure requirements, environmental and other liabilities and other factors beyond its control;
- potential lack of operating experience in new business or geographic areas;
- an increase in its expenses and working capital requirements;
- management's attention may be temporarily diverted; and
- the possibility it may be required to issue a substantial amount of additional equity or debt securities or assume additional debt in connection with any such transactions.

Any of these factors could adversely affect its ability to achieve anticipated levels of cash flows or realize synergies or other anticipated benefits from a strategic transaction. Furthermore, the market for transactions is highly competitive, which may adversely affect its ability to find transactions which fit its strategic objectives or increase the price it would be required to pay (which could decrease the benefit of the transaction or hinder its desire or ability to consummate the transaction). Strategic transactions may occur at any time and may be significant in size relative to its assets and operations.

Due to the nature of the products it sells and Kodak's worldwide distribution, it is subject to changes in currency exchange rates, interest rates and commodity costs which may adversely impact its results of operations and financial position.

As a result of Kodak's global operating and financing activities, it is exposed to changes in currency exchange rates and interest rates, which may adversely affect its results of operations and financial position. Exchange rates and interest rates in markets in which it does business tend to be volatile and, at times, its sales and profitability can be negatively impacted across all its segments depending upon the value of the U.S. dollar and other major currencies such as the euro, the Japanese yen, the British pound and the Chinese yuan. In addition, Kodak's products contain aluminum, silver, petroleum based or other commodity based raw materials, the prices of which have been, and may continue to be, volatile. If the global economic situation remains uncertain or worsens, there could be further volatility in changes in currency exchange rates, interest rates and commodity prices, which could have negative effects on its revenue and earnings.

Weakness or worsening of global economic conditions could adversely affect Kodak's financial performance and liquidity.

The global economic environment may adversely affect sales of Kodak's products, profitability and liquidity. Global financial markets have been experiencing volatility. Economic conditions could accelerate any decline in demand for products, which could also place pressure on its results of operations and liquidity. There is no guarantee that anticipated economic growth levels in markets which have experienced some economic strength will continue in the future, or Kodak will succeed in expanding sales in these markets. In addition, accounts receivable and past due accounts could increase due to a decline in its customers' ability to pay as a result of an economic downturn, and its liquidity, including its ability to use credit lines, could be negatively impacted by failures of financial instrument counterparties, including banks and other financial institutions. If global economic weakness and tightness in the credit markets exist, worsen or are attenuated, Kodak's profitability and related cash generation capability could be adversely affected and, therefore, affect its ability to meet its anticipated cash needs, impair its liquidity or increase its costs of borrowing.

If Kodak is unable to successfully develop or commercialize new products, its business, financial position and operating results may suffer.

Kodak generally sells its products in industries which are characterized by rapid technological changes, frequent new product and service introductions and changing industry standards. Without the timely introduction of new products, services and enhancements, its products and services will become technologically obsolete over time, in which case its revenue and operating results would suffer. Therefore, its future results of operations will depend to a significant extent upon its ability to successfully commercialize new products in a timely manner. The success of its new products and services will depend on several factors, including its ability to:

- identify customer needs;
- innovate and develop new technologies, services, and applications;
- commercialize new technologies in a timely manner;
- manufacture and deliver its products in sufficient volumes and on time;
- differentiate its offerings from its competitors' offerings;
- price its products and services competitively;
- anticipate its competitors' development of new products, services or technological innovations;
- work successfully alongside its partners; and
- control product quality in its manufacturing processes.

As a result of these and other factors, products currently in development by Kodak (for example, Micro 3D printing, UltraStream technology, small particle technology and Ultra NX) may or may not be successfully commercialized in a timely manner, or at all. If any of its key products cannot be successfully or timely commercialized, its operating results could be adversely affected. Moreover, it cannot guarantee any investment made in developing products will be recouped, even if it is successful in commercializing those products, which could have a material adverse effect on its business, financial position and operating results.

If Kodak's commercialization and manufacturing processes fail to prevent issues with product reliability, yield and quality, its product launch plans may be delayed, its financial results may be adversely impacted, and its reputation may be harmed.

In developing, commercializing and manufacturing Kodak's products and services, it must adequately address reliability, and prevent yield and other quality issues, including defects in its engineering, design and manufacturing processes, as well as defects in third-party components included in its products. Because Kodak's products are sophisticated and complicated to develop and commercialize with rapid advances in technologies, the occurrence of defects may increase, particularly with the introduction of new product lines. Unanticipated issues with product

performance may delay product launch plans which could result in additional expenses, lost revenue and earnings. Although it has established internal procedures to minimize risks which may arise from product quality issues, there can be no assurance it will be able to eliminate or mitigate occurrences of these issues and associated liabilities. Product reliability, yield and quality issues can impair its relationships with new or existing customers and adversely affect its brand image; product quality issues can result in recalls, warranty, or other service obligations and litigation, and its reputation as a producer of high quality products could suffer, which could adversely affect its business as well as its financial results.

If the reputation of Kodak or its brand erodes significantly, it could have a material impact on its financial results.

Kodak's reputation, and the reputation of its brand, form the foundation of its relationships with key stakeholders and other constituencies, including customers, suppliers and consumers. The quality and safety of Kodak's products are critical to its business. Kodak's products have worldwide recognition, and its financial success is directly dependent on the success of its product offering. The success of Kodak's brand can suffer if its marketing plans or product initiatives do not have the desired impact on its brand's image or its ability to attract customers. Its results could also be negatively impacted if its brand suffers substantial harm to its reputation due to significant product reliability and quality issues, and product-related litigation. Additionally, negative or inaccurate postings or comments on social media or networking websites about Kodak or its brand could generate adverse publicity which could damage the reputation of its brand. Kodak also devotes significant time and resources to programs consistent with its

corporate values that are designed to protect and preserve its reputation, such as social responsibility and environmental sustainability. If these programs are not executed as planned or suffer negative publicity, Kodak's reputation and financial results could be adversely impacted.

The competitive pressures it faces could harm Kodak's revenue, gross margins, cash flow and market share.

The markets in which Kodak does business are highly competitive with large, entrenched, and well financed industry participants, many of which are larger than Kodak. In addition, it encounters aggressive price competition for many of its products and services from numerous companies globally. Any of its competitors may:

- foresee the course of market developments more accurately than it does;
- sell superior products and provide superior services or offer a broader variety of products and services;
- have the ability to produce or supply similar products and services at a lower cost;
- have better access to supplies and the ability to acquire supplies at a lower cost;
- develop stronger relationships with its suppliers or customers;
- adapt more quickly to new technologies or evolving customer requirements than it does; or
- have access to capital markets or other financing sources on more favorable terms than it can obtain.

As a result, Kodak may not be able to compete successfully with its competitors. Finally, it may not be able to maintain its operating costs or prices at levels which would allow it to compete effectively. Kodak's results of operations and financial condition may be adversely affected by these and other industry-wide pricing pressures. If its products, services and pricing are not sufficiently competitive with current and future competitors, it could also lose market share, adversely affecting its revenue, gross margins and cash flow.

An inability to provide competitive financing arrangements to Kodak's customers or extension of credit to customers whose creditworthiness deteriorates could adversely impact its revenue, profitability and financial position.

The competitive environment in which Kodak operates may require it to facilitate or provide financing to its customers. Customer financing arrangements may cover all or a portion of the purchase price for its products and services. It may also assist customers in obtaining financing from banks and other sources. Its success may be dependent, in part, upon its ability to provide customer financing on competitive terms and on its customers' creditworthiness. Tightening of credit in the global financial markets can adversely affect the ability of Kodak's customers to obtain financing for significant purchases, which may result in a decrease in, or cancellation of, orders for its products and services. If Kodak is unable to provide competitive financing solutions to its customers or if it extends credit to customers whose creditworthiness deteriorates, its revenues, profitability and financial position could be adversely impacted.

If Kodak cannot attract, retain and motivate key management and other key employees, its revenue and earnings could be harmed.

In order for it to be successful, Kodak must continue to attract, retain and motivate executives and other key employees, including technical, managerial, marketing, sales, research and support positions. Hiring and retaining qualified executives, research and engineering professionals, and qualified sales representatives, particularly in Kodak's targeted growth markets, are critical to its future. It may be unable to attract and retain highly qualified management and employees, particularly if it does not offer employment terms competitive with the rest of the market. Failure to attract and retain qualified individuals, key leaders, executives and employees, or failure to develop and implement a viable succession plan, could result in inadequate depth of institutional knowledge or skill sets, which could adversely affect its business.

If Kodak cannot effectively anticipate technology trends and develop and market new products to respond to changing customer preferences, its revenue, earnings and cash flow could be adversely affected.

Kodak serves imaging needs for business markets, including packaging, micro 3D printing, graphic communications and enterprise services. Its success in these markets depends on its ability to offer differentiated solutions and technologies to capture market share and grow scale. To enable this, it must continually develop and introduce new products and services in a timely manner to keep pace with technological developments and achieve customer acceptance. In addition, the services and products it provides to customers may not or may no longer meet the needs of its customers as the business models of its customers evolve. Its customers may decide to outsource their imaging needs or may purchase imaging services and needs from other suppliers. In addition, it is difficult to predict successfully the products and services its customers will demand. The success of Kodak's business depends in part on its ability to identify and respond promptly to changes in customer preferences, expectations and needs. If it does not timely assess and respond to changing customer expectations, preferences and needs, its financial condition, results of operations or cash flows could be adversely affected.

If Kodak is unable to timely anticipate new technology trends, develop improvements to its current technology to address changing customer preferences, and effectively communicate its businesses, products, and the markets it serves, its revenue, earnings and cash flow could be adversely affected.

The success of Kodak's technology development efforts may be affected by the development efforts of its competitors, which may have more financial and other resources to better ascertain technology trends, changing customer preferences, and changing business expectations or models. Kodak's assessment and response may as a result be incomplete or inferior when compared to its competitors, which could adversely affect its product roadmaps and associated revenue streams.

If Kodak's investment in research and product development is inadequate, its response to changing customer needs and changing market dynamics may be too slow and this may adversely affect revenue streams from new products and services.

Kodak makes sizeable investments in new products and services that may not achieve expected returns.

Commercial success depends on many factors, including innovativeness, developer support, and effective distribution and marketing. If customers do not perceive Kodak's latest offerings as providing significant new functionality or other value, they may reduce their purchases of new products or upgrades, unfavorably affecting revenue. Kodak may not achieve significant revenue from new product, service, and distribution channel investments for several years, if at all. New products and services may not be profitable, and even if they are profitable, operating margins for some new products and businesses will not be as high as the margins Kodak has experienced historically. Developing new technologies is complex. It can require long development and testing periods. Significant delays in new releases or significant problems in creating new products or services could adversely affect Kodak's revenue.

Kodak relies on third-party suppliers and service providers to support its manufacturing, logistics, and business operations and faces the risks associated with reliance on external business partners.

Kodak's relies on third-party suppliers for goods and services to support its manufacturing, logistics, and business operations. To the extent it relies on third-parties, it faces the risks that those third parties may not be able to:

- develop manufacturing methods appropriate to Kodak's products
- maintain an adequate control environment
- quickly respond to changes in customer demand for Kodak
- obtain supplies and materials necessary for the manufacturing process; or
- mitigate the impact of labor shortages and/or disruptions.

Further, even if Kodak honors its payment and other obligations to its key suppliers of products, components and services, such suppliers may choose to unilaterally withhold products, components or services, or demand changes in payment terms. In addition, it may experience shortages in supply and disruptions in service as a result of unexpected demand, transportation and logistical limitations, and/or disruptions or production difficulties at its suppliers, such as disruptions due to fires, other natural disasters or events outside of a supplier's control. In addition, disruptions could result from a reduction in the number of its suppliers due to their own financial difficulties or a reduction in the products offered by such suppliers. As a result of the loss of any supplier, or a substantial decrease in the availability of products from its suppliers, Kodak may be unable to meet its customer commitments, its costs could be higher than planned, and its cash flows and the reliability of its products could be negatively impacted. Kodak will vigorously

enforce its contractual rights under such circumstances, but there is no guarantee it will be successful in preventing or mitigating the effects of unilateral actions by its suppliers. Other supplier problems that Kodak could face include electronic component shortages, excess supply, risks related to the duration and termination of its contracts with suppliers for components and materials and risks related to the ability to obtain products, components or services from single source suppliers on favorable terms or at all. The realization of any of these risks, should alternative third-party relationships not be established, could cause interruptions in supply or increases in costs which might result in Kodak's inability to meet customer demand for its products, damage to its relationships with its customers, and reduced market share, all of which could adversely affect its results of operations and financial condition.

Business disruptions could seriously harm Kodak's future revenue and financial condition and increase its costs and expenses.

Worldwide operations could be subject to earthquakes, power shortages, telecommunications failures, cyber-attacks, terrorism, water shortages, tsunamis, floods, hurricanes, typhoons, fires, extreme weather conditions, medical epidemics, political or economic instability, and other natural or manmade disasters or business interruptions, for which Kodak is predominantly self-insured. The occurrence of any of these business disruptions could seriously harm its revenue and financial condition and increase its costs and expenses. In addition, some areas, including parts of the east and west coasts of the United States, have previously experienced, and may experience in the future, major power shortages and blackouts. These blackouts could cause disruptions to its operations or the operations of its suppliers, distributors and resellers, or customers. It has operations including research and development facilities in geographically disparate locations, such as Israel, Japan, China, Canada and Germany. The impact of these risks is greater in areas where products are manufactured at a sole or limited number of location(s), and where the sourcing of materials is limited to a sole or limited base of suppliers, since any material interruption in operations in such locations or suppliers could impact Kodak's ability to provide a particular product or service for a period of time.

Cyber-attacks or disruptions to our information technology (IT) environment could impact revenue, operations, cost, and competitiveness.

To effectively manage our global business, we depend on secure and reliable information technology systems with accurate data. These systems and their underlying infrastructure are provided by a combination of Kodak and third-parties, and if unavailable or unreliable, could disrupt our operations, causing delays or cancellation of customer orders, impeding the manufacturing or delivery of products, delaying the reporting of financial results, or impacting other business processes critical to running our business.

Our IT systems contain critical information about our business, including intellectual property and confidential information of our customers, business partners, and employees. Cyber-attacks or defects in our systems could result in this proprietary information being disclosed or modified, which could cause significant damage to our business or our reputation. We have system controls and security measures in place that are designed to protect our IT systems against intentional or unintentional disruptions of our operations or disclosure of confidential information, but we may not be able to implement solutions that result in stopping or detecting all of these risks to our internal information systems or those of our third-party providers. A breach of our security measures could result in unauthorized access to and misuse of our information, corruption of data, or disruption of operations, any of which could have a material adverse impact on our business.

We also provide IT-based products and services to our customers, both businesses and consumers, and a breach of our security or reliability measures, or those of our third-party service providers, could negatively impact our customers' operations or data privacy.

Improper disclosure of personal data could result in liability and harm Kodak's reputation.

Kodak stores and processes personally-identifiable information of its employees and, in some case, its customers. At the same time, the continued occurrence of high-profile data breaches provides evidence of the increasingly hostile information security environment. This environment demands Kodak continuously improve its design and coordination of security controls across its businesses and geographies. Despite these efforts, it is possible its security controls over personal data, its training of employees and vendors on data security, and other practices it follows may not prevent the improper disclosure of personally identifiable information. Improper disclosure of this information could harm its reputation or subject it to liability under laws which protect personal data, resulting in increased costs or loss of revenue.

If Kodak cannot protect the intellectual property rights on which its business depends, or if third parties assert it violates their intellectual property rights, its revenue, earnings, expenses and liquidity may be adversely impacted.

A key differentiator for Kodak in many of its businesses is its technological advantage over competitors' products and solutions. Its technological advantage is supported by Kodak's intellectual property rights. Patent, copyright, trademark and trade secret laws in the United States and similar laws in other countries, and non-disclosure, confidentiality and other types of agreements with Kodak's employees, customers, suppliers and other parties, may not be effective in establishing, maintaining, protecting and enforcing Kodak's intellectual property rights. Any of Kodak's direct or indirect intellectual property rights could be challenged, invalidated, circumvented, infringed, diluted, disclosed or misappropriated, or such intellectual property rights may not be sufficient to permit it to take advantage of current market trends or otherwise to provide competitive advantages, which could result in costly product redesign efforts, discontinuance of certain product offerings or other competitive harm. Further, the laws of certain countries do not protect proprietary rights to the same degree as the laws of the United States. Therefore, in certain jurisdictions, Kodak may be unable to protect its proprietary technology adequately against unauthorized third party copying, infringement or use, which could adversely affect its competitive position. Also, much of Kodak's business and many of its products rely on key technologies developed or licensed by third parties and, because of the rapid pace of technological change in the information technology industry, it may not be able to obtain or continue to obtain licenses and technologies from relevant third parties on reasonable terms, or at all.

Kodak also licenses third parties to use its trademarks. In an effort to preserve its trademark rights, Kodak enters into license agreements with these third parties which govern the use of its trademarks, and which require its licensees to abide by quality control standards with respect to the goods and services they provide under the trademarks. Although Kodak makes efforts to police the use of its trademarks by its licensees, there can be no assurance these efforts will be sufficient to ensure the licensees abide by the terms of their licenses. In the event Kodak's licensees fail to do so, its trademark rights could be diluted. Also, failure by Kodak and its licensee to sufficiently exploit any of Kodak's trademarks in any markets could erode Kodak's trademark rights with respect to the relevant trademarks. Because the laws and enforcement regimes of certain countries do not protect proprietary rights to the same degree as those in the United States, in certain jurisdictions Kodak may be unable to adequately prevent such unauthorized uses, which could result in impairment of its trademark rights.

Kodak has made substantial investments in new, proprietary technologies and has filed patent applications and obtained patents to protect its intellectual property rights in these technologies as well as the interests of its licensees. There can be no assurance Kodak's patent applications will be approved, any patents issued will be of sufficient scope or strength to provide it with meaningful protection, or such patents will not be challenged by third parties. Furthermore, Kodak may fail to accurately predict all of the countries where patent protection will ultimately be desirable, and if it fails to timely file a patent application in any such country, it may be precluded from doing so at a later date. The patents issuing may vary in scope of coverage depending on the country in which such patents issue.

In addition, the intellectual property rights of others could inhibit Kodak's ability to conduct its business. Other companies may hold patents on technologies used in Kodak's industries and some of the companies are aggressively seeking to expand, enforce or license their patent portfolios. Third parties may claim Kodak and its customers, licensees or other parties indemnified by it are infringing upon their intellectual property rights. Such claims may be made by competitors seeking to block or limit Kodak's access to certain markets. Additionally, in recent years, individuals and groups have begun purchasing intellectual property assets for the sole purpose of making claims of infringement and attempting to extract

settlements from large companies like Kodak. Even if it believes the claims are without merit, these claims may have the following negative impacts on its business:

- claims can be time consuming and costly to defend and may distract management's attention and resources;

• claims of intellectual property infringement may require it to redesign affected products, enter into costly settlement or license agreements or pay costly damage awards, or face a temporary or permanent injunction prohibiting it from marketing or selling certain of its products;

• even if it has an agreement with a third party to indemnify it against such costs, the indemnifying party may be unable to uphold such party's contractual obligations; and

• if it cannot or does not license the infringed technology at all, license the technology on reasonable terms or substitute similar technology from another source, its revenue and earnings could be adversely impacted.

Finally, Kodak uses open source software in connection with its products and services. Companies which incorporate open source software into their products have, from time to time, faced claims challenging the ownership of open source software and/or compliance with open source license terms. As a result, Kodak could be subject to suits by parties claiming ownership of what it believes to be open source software or noncompliance with open source licensing terms. Some open source software licenses require users who distribute open source software as part of their software to publicly disclose all or part of the source code to such software and/or make available any derivative works of the open source code on unfavorable terms or at no cost; any requirement to disclose Kodak's source code or pay damages for breach of contract could be harmful to its business results of operations and financial condition.

Kodak's future pension and other postretirement benefit plan costs and required level of contributions could be unfavorably impacted by changes in actuarial assumptions, market performance of plan assets and obligations imposed by legislation or pension authorities which could adversely affect its financial position, results of operations, and cash flow.

Kodak has significant defined benefit pension and other postretirement benefit obligations. The funded status of its U.S. and non U.S. defined benefit pension plans (and other postretirement benefit plans), and the related cost reflected in its financial statements, are affected by various factors subject to an inherent degree of uncertainty. Key assumptions used to value these benefit obligations, funded status and expense recognition include the discount rate for future payment obligations, the long term expected rate of return on plan assets, salary growth, healthcare cost trend rates, mortality trends, and other economic and demographic factors. Significant differences in actual experience, or significant changes in future assumptions or obligations imposed by legislation or pension authorities could lead to a potential future need to contribute cash or assets to Kodak's plans in excess of currently estimated contributions and benefit payments and could have an adverse effect on Kodak's consolidated results of operations, financial position or liquidity.

In past years, Kodak has experienced increases in the costs of these defined benefit pension and postretirement benefit obligations as a result of macro-economic factors beyond its control, including increases in health care costs, declines in investment returns on pension plan assets and changes in discount rates and mortality rates used to calculate pension and related liabilities. At least some of these macro-economic factors may again put pressure on the cost of providing pension and medical benefits. There can be no assurance it will succeed in limiting cost increases. In addition, continued upward pressure, including any as a result of new legislation, could reduce the profitability of its businesses.

Kodak may be required to recognize impairments in the value of its goodwill and/or other long-lived assets resulting from the application of fresh start accounting, which could adversely affect its results of operations.

Upon emergence from bankruptcy, Kodak applied fresh start accounting pursuant to which the reorganization value was allocated to the individual assets and liabilities based on their estimated fair values. The excess reorganization value over the fair value of identified tangible and intangible assets is reported as goodwill. In connection with fresh

start, Kodak also fair valued its other long-lived assets, including intangible assets. The determination of reorganization value, equity value of the Company's common stock and fair value of assets and liabilities is dependent on various estimates and assumptions, including financial projections and the realization of certain events. Kodak tests goodwill and indefinite lived intangible assets for impairment annually or whenever events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Kodak evaluates other long-lived assets for impairments whenever events or changes in circumstances indicate the carrying value may not be recoverable. Impairments could occur in the future if Kodak's expected future cash flows decline, market or interest rate environments deteriorate, or if carrying values change materially compared with changes in their respective fair values.

Kodak's businesses experience seasonality of sales. Therefore, lower demand for Kodak's products or increases in costs during periods which are expected to be at peak in seasonality may have a pronounced negative effect on its results of operations.

Equipment and consumables sales generally exhibit higher levels in the fourth quarter due to the seasonal nature of placements, resulting from customer or industry budgeting practices. As a result, a sequential quarter-to-quarter comparison is not a good indication of Kodak's performance or how it will perform in the future. In addition, adverse developments during what are expected to be peak periods in seasonality, such as lower-than-anticipated demand for its products, an internal systems failure, increases in materials costs, or failure of or performance problems with one of its key logistics, components supply, or manufacturing partners, could have a material adverse impact on its financial condition and operating results. Tight credit markets which limit capital investments or a weak economy which decreases print demand could negatively impact equipment or consumable sales. These external developments are often unpredictable and may have an adverse impact on its business and results of operations.

If Kodak fails to manage distribution of its products and services properly, its revenue, gross margins and earnings could be adversely impacted.

Kodak uses a variety of different distribution methods to sell and deliver its products and services, including third-party resellers and distributors and direct and indirect sales to both enterprise accounts and customers. Successfully managing the interaction of direct and indirect channels to various potential customer segments for its products and services is a complex process. Moreover, since each distribution method has distinct risks and costs, Kodak's failure to achieve the most advantageous balance in the delivery model for its products and services could adversely affect its revenue, gross margins and earnings. This has concentrated Kodak's credit and operational risk and could result in an adverse impact on its financial performance.

Kodak's future results could be harmed if it is unsuccessful in its sales in emerging markets.

Because Kodak is seeking to expand its sales and number of customer relationships outside the United States, including in emerging markets in Asia, Latin America and Eastern Europe, Kodak's business is subject to risks associated with doing business internationally, such as:

- support of multiple languages;
- recruitment of sales and technical support personnel with the skills to design, manufacture, sell and supply products;
- compliance with governmental regulation of imports and exports, including obtaining required import or export approval for its products;
- complexity of managing international operations;
- exposure to foreign currency exchange rate fluctuations;
- commercial laws and business practices which may favor local competition;
- multiple, potentially conflicting, and changing governmental laws, regulations and practices, including differing export, import, tax, anti-corruption, anti-dumping, economic sanction, labor, and employment laws;
- difficulties in collecting accounts receivable;
- limitations or restrictions on the repatriation of cash;
- limitations or reductions in protection of intellectual property rights;
- complications in logistics and distribution arrangements; and
- political or economic instability.

There can be no assurance Kodak will be able to market and sell its products in all of its targeted markets. If its efforts are not successful, its business growth and results of operations could be harmed. As a global company, Kodak is subject to regulatory requirements and laws in the jurisdictions in which it operates, and any alleged non-compliance with these requirements or laws could result in an adverse financial or reputational impact.

Kodak is subject to environmental laws and regulations and failure to comply with such laws and regulations or liabilities imposed as a result of such laws and regulations could have an adverse effect on its business, results of operations and financial condition.

Kodak is subject to environmental laws and regulations world-wide that govern, for example, the discharge of pollutants, the management of hazardous materials, the cleanup of contaminated sites, and the composition and end-of-life management of its products. Non-conformance with applicable laws or liability incurred without regard to fault, could have a material adverse effect on its business, results of operations and financial condition. The cost of complying with such laws could have a material adverse effect on its business, results of operations and financial condition.

In addition, the Company, the New York State Department of Environmental Conservation and the New York State Urban Development Corporation have entered into a settlement agreement concerning certain of the Company's historical environmental liabilities at Eastman Business Park or from discharges to the Genesee River through the establishment of a \$49 million environmental remediation trust. Should historical liabilities exceed \$49 million, New

York State is responsible for payments of cost up to an additional \$50 million. In the event the historical liabilities exceed \$99 million, the Company will become liable for 50% of the portion above \$99 million, which could have a material adverse effect on its financial condition. The settlement agreement was implemented on May 20, 2014. The settlement agreement includes a covenant not to sue from the U.S. Environmental Protection Agency. Any uncertainties related to the Company's environmental obligations may impact its ability to further develop and transform Eastman Business Park.

Kodak's business, financial position, results of operations, cash flows and reputation may be negatively impacted by legal matters.

Kodak has various contingencies which are not reflected on its balance sheet, including those arising as a result of being involved from time to time in a variety of claims, lawsuits, investigations and proceedings concerning: commercial, customs, employment, and intellectual property matters, as well as compliance with various domestic and international laws and regulations. Should developments in any of these matters cause a change in its determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final

adverse judgment or be settled for significant amounts, they could have a material adverse effect on its business, financial position, results of operations, cash flows.

Regulations related to “conflict minerals” may require Kodak to incur additional expenses and could limit the supply and increase the cost of certain metals used in manufacturing Kodak’s products.

The Dodd-Frank Wall Street Reform and Consumer Protection Act contains provisions to improve transparency and accountability concerning the supply of minerals originating from the conflict zones of the Democratic Republic of Congo (DRC) and adjoining countries. As a result, in August 2012, the SEC adopted rules requiring disclosure related to sourcing of specified minerals, known as “conflict minerals,” which are necessary to the functionality or production of products manufactured or contracted to be manufactured by public companies. Kodak has designed its overall conflict minerals policies and procedures to be consistent with the guidance issued by the Organization for Economic Co-operation and Development (OECD), and continues to perform due diligence on its supply chain. Kodak filed its Conflict Minerals Disclosure report on May 31, 2016. As of the date of the report, Kodak determined certain of its products contain such specified minerals, but was unable to determine whether or not such minerals originate from the DRC or an adjoining country. Kodak may incur additional costs to comply with these disclosure requirements, including costs related to determining the sources of the specified minerals used in its products, in addition to the cost of any changes to products, processes, or sources of supply as a consequence of such verification activities, which may adversely affect its business. In addition, the number of suppliers who provide “conflict-free” minerals may be limited, which may make it difficult to satisfy customers who require all of the components of its products be certified as conflict-free, which could place it at a competitive disadvantage if it is unable to do so. Because Kodak’s supply chain is complex, it may also not be sufficiently able to verify the origins of the relevant minerals used in its products through its due diligence procedures, which may harm its reputation.

#### Risks Related to the Company’s Indebtedness and Access to Capital Markets

There can be no assurance the Company will be able to comply with the terms of its various credit facilities.

A breach of any of the financial or other covenants contained in the Senior Secured First Lien Term Credit Agreement (the “First Lien Term Credit Agreement”) or the Asset Based Revolving Credit Agreement (the “ABL Credit Agreement”) and, together with the First Lien Term Credit Agreement, the “Credit Agreements”) could result in an event of default under these facilities. If any event of default occurs and the Company is not able to either cure it or obtain a waiver from the requisite lenders under each of these facilities, the administrative agent of each credit facility may, and at the request of the requisite lenders for that facility must, declare all of the Company’s outstanding obligations under the applicable credit facility, together with accrued interest and fees, to be immediately due and payable and the agent under the ABL Credit Agreement may, and at the request of the requisite lenders must, terminate the lenders’ commitments under that facility and cease making further loans, and if applicable, each respective agent could institute foreclosure proceedings against the pledged assets. Any of these outcomes could adversely affect the Company’s operations and its ability to satisfy its obligations as they come due.

The combination of covenant requirements in the First Lien Term Credit Agreement and Kodak’s on-going investment in growth businesses, and continuing softness and volatility of global economic conditions and foreign currency exchange rates, could make it difficult for the Company to satisfy the leverage covenants under the Term Credit Agreements on an on-going basis.

The Company is obligated to comply with a number of financial and other covenants contained in the Credit Agreements. Kodak intends to conduct its operations in a manner which will result in continued compliance with the secured leverage ratio covenants under the Term Credit Agreements; however, compliance for future quarters may depend on Kodak undertaking one or more non-operational transactions, such as a monetization of assets, a debt refinancing, the raising of equity capital, or a similar transaction. If the Company is unable to remain in compliance and does not make alternate arrangements with its term lenders, an event of default would occur under the Credit

Agreements which, among other remedies, would entitle the lenders or their agents to declare the outstanding obligations under the Term Credit Agreements to be immediately due and payable. Refer to “Risks Related to Kodak’s Business risk factor—There can be no assurance the Company will be able to comply with the terms of its various credit facilities” for a description of additional risks relating to compliance with the covenants under the Credit Agreements.

The availability of borrowings and letters of credit under the ABL Credit Agreement is limited by the amount of various types of assets and, under certain circumstances, the administrative agent under the ABL Credit Agreement will have greater control over Kodak’s cash.

Availability under the Company’s ABL Credit Agreement is based on the amount of Eligible Receivables, Eligible Inventory, Eligible Machinery and Equipment and Eligible Cash less specified reserves as described in Note 8, “Debt and Capital Leases” to the consolidated financial statements. Kodak’s U.S. Accounts Receivable and Inventory levels have declined over the past three years, and Machinery and Equipment for purposes of the ABL Credit Agreement amortizes down by \$1 million per quarter. If Eligible Receivables, Eligible Inventory and Eligible Machinery and Equipment continue to decline and an asset base cannot be maintained to support the \$116 million of outstanding letters of credit and the \$19 million of Excess Availability required under the ABL Credit Agreement, the Company would be required to increase restricted cash deposited in the Eligible Cash account or remain in compliance with the ABL Credit Agreement’s Fixed Charge Coverage Ratio and operate under cash dominion by the administrative agent under the ABL Credit Agreement. Additional cash deposited in the Eligible Cash account would be classified as restricted cash, would not be available to support ongoing working capital and investment needs and could not be used in determining the Net Secured Leverage Ratio under the First Lien Term Credit Agreement. If the administrative agent under the ABL Credit Agreement executed cash dominion, it would increase operational complexities for the Company. An event of default would occur if neither of these alternatives were achieved.

The Company's substantial monetary obligations require a portion of its cash flow be used to pay interest, dividends and fund other obligations rather than be invested in the business and could adversely affect its ability to fund its operations.

The Company's indebtedness under the Credit Agreements and its other obligations including the potential mandatory redemption of the Series A Preferred Stock could have important negative consequences to the Company and investors in its securities. These include the following:

- it may not be able to satisfy all of its obligations, including, but not limited to, its obligations under the Credit Agreements, which may cause a cross-default or cross-acceleration on other debt it may have incurred;
- it could have difficulties obtaining necessary financing in the future for working capital, capital expenditures, debt service requirements, mandatory redemption of the Series A Preferred Stock, refinancing or other purposes;
- it will have to use a significant part of its cash flow or cash balances to make payments on its debt or Series A Preferred Stock and to satisfy the other obligations set forth above, which may reduce the capital available for operations and expansion; and
- adverse economic or industry conditions may have more of a negative impact on it.

The Company cannot be sure cash generated from its business will be as high as it expects or its expenses will not be higher than it expects. Because a portion of its expenses are fixed in any given year, its operating cash flow margins are highly dependent on revenues, which are largely driven by customer demand. A lower amount of cash generated from its business or higher expenses than expected, when coupled with its debt obligations, could adversely affect its ability to fund its operations.

Kodak's access to the capital markets may be limited.

Because of Kodak's current non-investment grade credit ratings, and/or general conditions in the financial and credit markets, its access to the capital markets may be limited. Moreover, the urgency of a capital-raising transaction may require it to pursue additional capital at an inopportune time or unattractive cost. Kodak's ability to obtain capital and the costs of such capital are dependent on numerous factors, including:

- covenants in the Credit Agreements;
- obtaining a consent from the holders of Series A Preferred Stock for the issuance of additional preferred shares which rank senior or pari passu to the Series A Preferred Stock;
- investor confidence in Kodak and the markets in which it operates;
- its financial performance and the financial performance of its subsidiaries;
- its levels of debt and redemption obligations;
- its ability to generate positive cash flow;
- its requirements for posting collateral under various commercial agreements;
- its credit ratings;
- its cash flow;
- its long-term business prospects; and
- general economic and capital market conditions, including the timing and magnitude of any market recovery.

Kodak may not be successful in obtaining additional capital for these or other reasons. An inability to access capital may limit its ability to meet its operating needs and, as a result, may have a material adverse effect on its financial condition, results of operations and cash flows.

The current non-investment grade status may adversely impact Kodak's commercial operations, increase its liquidity requirements and increase the cost of refinancing opportunities. It may not have adequate liquidity to post required amounts of additional collateral.

The Company's corporate family credit rating is currently below investment grade and there are no assurances its credit ratings will improve, or they will not decline, in the future. Its credit ratings may affect the evaluation of its

creditworthiness by trading counterparties and lenders, which could put it at a disadvantage to competitors with higher or investment grade ratings.

In carrying out its commercial business strategy, the current non-investment grade credit ratings have resulted and will likely continue to result in requirements that Kodak either prepay obligations or post significant amounts of collateral to support its business. Additionally, the current non-investment grade credit ratings may limit its ability to obtain additional sources of liquidity, refinance its debt obligations, including any mandatory redemption of its Series A Preferred Stock, or access the capital markets at the lower borrowing costs which would presumably be available to competitors with higher or investment grade ratings. Should its ratings continue at their current levels, or should its ratings be further downgraded, it would expect these negative effects to continue and, in the case of a downgrade, become more pronounced.

## Risks Related to the Company's Common Stock

The conversion of the Company's Series A Preferred Stock into shares of the Company's common stock may dilute the value for the current holders of the Company's common stock.

The 2,000,000 outstanding shares of the Company's Series A Preferred Stock are convertible into shares of the Company's common stock at a conversion rate of 5.7471 shares of common stock per share of Series A Preferred Stock. As a result of the conversion of any issued and outstanding Series A Preferred Stock, the Company's existing shareholders will own a smaller percentage of its outstanding common stock. Based on the capitalization of the Company as of March 1, 2017, the conversion of all shares of the Series A Preferred Stock would result in the issuance to holders thereof of approximately 21% of the outstanding common stock after giving effect to such conversion. Further, additional shares of common stock may be issuable pursuant to certain other features of the Series A Preferred Stock, with such issuances being further dilutive to existing holders of common stock.

If Series A Preferred Stock is converted into common stock, holders of such converted common stock will be entitled to the same dividend and distribution rights as holders of the common stock currently authorized and outstanding. As such, another dilutive effect resulting from the conversion of any issued and outstanding shares of Series A Preferred Stock will be a dilution to dividends and distributions.

Holders of the Company's common stock will not realize any dilution in their ownership, dividend or distribution rights solely as a result of the reservation of any shares of common stock for issuance upon conversion of the Series A Preferred Stock or for issuance of additional shares of common stock pursuant to certain other features of the Series A Preferred Stock, but will experience such dilution to the extent additional shares of common stock are issued in the future as described above.

The holders of the Company's Series A Preferred Stock own a large portion of the voting power of the Company's outstanding securities and have the right to nominate two members to the Company's Board. As a result, these holders may influence the composition of the Board and future actions taken by the Board.

The holders of the Company's Series A Preferred Stock are entitled to vote upon all matters upon which holders of the Company's common stock have the right to vote and are entitled to the number of votes equal to the number of full shares of common stock into which such shares of Series A Preferred Stock could be converted at the then applicable conversion rate. These holders currently hold approximately 22% of the voting power of the Company on an as-converted basis. As a result, these holders may have the ability to influence future actions by the Company requiring shareholder approval.

Further, beginning at the 2017 annual meeting of shareholders of the Company and for as long as they hold any shares of Series A Preferred Stock, the current holders of the Series A Preferred Stock will be entitled to nominate for election (collectively and not individually) at the Company's annual meeting of shareholders a number of directors to the board of directors of the Company (the "Board") commensurate with their ownership percentage of common stock on an as-converted basis. Accordingly, it is expected that these current holders will be able to nominate two directors to the Board at the Company's next annual meeting of shareholders, assuming they retain ownership of their shares of Series A Preferred Stock or any common stock into which it may be converted. These current holders also have the right to fill vacancies on the Board created by one of their designees ceasing to serve on the Board. The nomination and other rights regarding the Board granted to the current holders of Series A Preferred Stock are not transferrable to any other person. Also, whenever dividends on the Series A Preferred Stock are in arrears for six or more dividend periods, the holders of Series A Preferred Stock (voting with holders of all other classes of preferred stock of the Company whose voting rights are then exercisable) are entitled to vote for the election of two additional directors at the Company's next annual meeting and all subsequent meetings until all accumulated dividends on such Series A Preferred Stock and other voting preferred stock have been paid or set aside (during which time the number of directors the current holders of Series A Preferred Stock are entitled to nominate under the Purchase Agreement will

be reduced by two). As a result, the potential presence of directors on the Board nominated by the current holders of Series A Preferred Stock or elected by the holders of Series A Preferred Stock would enable such current holders or the holders of Series A Preferred Stock to influence the composition of the Board and, in turn, potentially influence and impact future actions taken by the Board.

The Company has registered, or expects to register, the resale of a large portion of its outstanding securities. The resale of the Company's common stock, or the perception that such resale may occur, may adversely affect the price of its common stock.

In compliance with two Registration Rights Agreements to which the Company is a party, it has registered the resale of an aggregate of 20,723,050 shares of outstanding common stock and 863,804 shares of common stock issuable upon the exercise of outstanding warrants, and it expects to complete the registration of the resale of 2,000,000 shares of outstanding Series A Preferred Stock and 11,494,200 shares of common stock, subject to anti-dilution adjustments, issuable upon the conversion of outstanding Series A Preferred Stock. The resale of a substantial number of shares of common stock in the public market, or the perception that such resale might occur, could cause the market price of the Company's common stock to decline. Under the terms of the Registration Rights Agreements to which the Company is subject, the counterparties to such Registration Rights Agreements can, in certain circumstances, require the Company to participate in an underwritten public offering of the registered securities. Any shares sold in a registered resale will be freely tradable without restriction under the Securities Act. While the Company cannot predict the size of future resales or distributions of its common stock, if there is a perception that such resales or distributions could occur, or if the holders of the Company's securities registered for resale sell a large number of the registered securities, the market price for the Company's common stock could be adversely affected.

The resale of a significant portion of the Company’s securities registered for resale could result in a change of control of the Company and the loss of favorable tax attributes.

The Company has registered, or filed a registration statement with respect to, the resale of securities representing approximately 60% of its outstanding shares of common stock assuming the issuance of all common stock issuable upon the conversion of the Series A Preferred Stock or the exercise of the warrants corresponding to shares of common stock registered for resale. Although the holders of the subject securities consist of several unaffiliated groups, these holders collectively have a controlling influence over all matters presented to the Company’s shareholders for approval, including election of members to the Board and change of control transactions. In addition, the holders of subject securities collectively would be able to cause a change of control of the Company by selling a sufficient portion of the Company’s securities held by them. If such a transaction, in combination with other transactions including the issuance of the Series A Preferred Stock, were to result in an “ownership change” as determined under Section 382 of the Internal Revenue Code of 1986, as amended, then the Company’s ability to offset taxable income with tax attributes generated prior to the ownership change date could be limited, possibly substantially. For more information on the Company’s tax attributes refer to Note 14, “Income Taxes”. The interests of the holders of the securities registered or to be registered for resale may not always coincide with the interests of the other holders of our common stock.

ITEM 1B.UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Kodak's worldwide headquarters is located in Rochester, New York.

As of December 31, 2016, Kodak owned 18 million square feet and leased 3 million square feet of administrative, research and development, manufacturing and marketing facilities in various parts of the world and leased 3 million square feet of owned property to third parties. The leases are for various periods and are generally renewable.

The location of Kodak’s manufacturing facilities, by segment, are listed below. Properties in a location may be shared by all segments operating in that location.

Micro 3D Printing and Packaging	Print Systems	Enterprise Inkjet Systems
Rochester, New York	Rochester, New York	Rochester, New York
Weatherford, Oklahoma	Columbus, Georgia	Dayton, Ohio
Yamanashi, Japan	Osterode, Germany	Shanghai, China
Shanghai, China	Gunma, Japan	
	Shanghai, China	
Consumer and Film	Xiamen, China	Software and Solutions
Rochester, New York	Vancouver, Canada	Vancouver, Canada
Shanghai, China		(software development)

Regional distribution centers are located in various places within and outside of the United States.

Research and development is headquartered at the Kodak Research Laboratories which is part of the Eastman Business Park in Rochester, New York, where Kodak conducts research and files patent applications with

fundamental inventions. Other U.S. research and development groups are located in Oakdale, Minnesota; and Columbus, Georgia. Outside the U.S., research and development groups are located in Canada, Israel, Germany, Japan and China. The research and development groups located outside of Rochester, New York work in close cooperation with manufacturing units and marketing organizations to develop new products and applications to serve both existing and new markets.

Kodak has excess capacity in some locations. Kodak is pursuing monetizing its excess capacity by selling or leasing the associated properties.

### ITEM 3. LEGAL PROCEEDINGS

Subsequent to the Company's Bankruptcy Filing, between January 27, 2012 and March 22, 2012, several putative class action suits were filed in federal court in the Western District of New York against the committees of the Company's Employee Stock Ownership Plan ("ESOP") and Savings and Investment Plan ("SIP"), and certain former and current executives of the Company. The suits were consolidated into a single action brought under the Employee Retirement Income Security Act, styled as *In re Eastman Kodak ERISA Litigation* (the "Action"). The allegations concerned the decline in the Company's stock price and its alleged impact on the ESOP and SIP. Defendants and plaintiffs, individually and as class representatives, entered into a settlement agreement in April of 2016. On October 4, 2016, the court entered an Order and Final Judgment certifying the Action as a binding non-opt-out class action, approving and confirming the settlement agreement and dismissing the Action with prejudice. The settlement agreement became final in November 2016 when the time for any party to appeal the Order and Final Judgment passed. The Company was not a party to the Action and was not obligated to make any payments under the settlement agreement.

Kodak's Brazilian operations are involved in various litigation matters and have received or been the subject of numerous governmental assessments related to indirect and other taxes in various stages of litigation, as well as civil litigation and disputes associated with former employees and contract labor. The tax matters, which comprise the majority of the litigation matters, are primarily related to federal and state value-added taxes and income taxes. Kodak's Brazilian operations are disputing these matters and intend to vigorously defend their position. Kodak routinely assesses these matters as to the probability of ultimately incurring a liability in its Brazilian operations and records its best estimate of the ultimate loss in situations where it assesses the likelihood of loss as probable. As of December 31, 2016, Kodak maintained accruals of approximately \$13 million for claims aggregating approximately \$213 million inclusive of interest and penalties where appropriate. In connection with assessments and litigation in Brazil, local regulations may require Kodak to post security for a portion of the amounts in dispute. Generally, any encumbrances of the Brazilian assets would be removed to the extent the matter is resolved in Kodak's favor.

Kodak is involved in various lawsuits, claims, investigations, remediations and proceedings, including, from time to time, commercial, customs, employment, environmental, and health and safety matters, which are being handled and defended in the ordinary course of business. Kodak is also subject, from time to time, to various assertions, claims, proceedings and requests for indemnification concerning intellectual property, including patent infringement suits involving technologies that are incorporated in a broad spectrum of Kodak's products. These matters are in various stages of investigation and litigation, and are being vigorously defended. Based on information currently available, Kodak does not believe that it is probable that the outcomes in any of these matters, individually or collectively, will have a material adverse effect on its financial condition or results of operations. Litigation is inherently unpredictable, and judgments could be rendered or settlements entered that could adversely affect Kodak's operating results or cash flows in a particular period. Kodak routinely assesses all of its litigation and threatened litigation as to the probability of ultimately incurring a liability, and records its best estimate of the ultimate loss in situations where it assesses the likelihood of loss as probable.

#### ITEM 4. MINE SAFETY DISCLOSURES

None.

#### EXECUTIVE OFFICERS OF THE REGISTRANT

Pursuant to General Instructions G (3) of Form 10-K, the following list is included as an unnumbered item in Part I of this report in lieu of being included in the Proxy Statement for the Annual Meeting of Shareholders.

Name	Age	Positions Held	Year First Elected an Executive Officer	to Present Office
Jeffrey J. Clarke	55	Chief Executive Officer	2014	2014
David E. Bullwinkle	42	Chief Financial Officer and Senior Vice President	2016	2016
Philip Cullimore	51	Senior Vice President	2015	2015
Brad W. Kruchten	57	Senior Vice President	2009	2015
Eric-Yves Mahe	54	Senior Vice President	2015	2015
John O'Grady	53	Senior Vice President	2016	2016
Steven Overman	48	Senior Vice President	2015	2015
Eric H. Samuels	49	Chief Accounting Officer and Corporate Controller	2009	2009
Terry R. Taber	62	Senior Vice President	2009	2010
Sharon E. Underberg	55	General Counsel, Secretary, and Senior Vice President	2015	2015

The executive officers' biographies follow:

Jeffrey J. Clarke

Jeff Clarke is the Chief Executive Officer and a member of the Board of Directors of Kodak.

Prior to joining Kodak in March 2014, Clarke was a Managing Partner of Augusta Columbia Capital, a private investment firm he co-founded in 2012. From 2012 to 2014, Clarke was the Chairman of Travelport, Inc., a private travel technology firm, where he served as CEO from 2006 to 2011, after leading its sale from Cendant Corporation to the Blackstone Group for \$4.3 billion in 2006.

Clarke was the Chief Operating Officer of CA, Inc. (now called CA Technologies), an enterprise software company, from 2004 to 2006. At CA, he was responsible for sales, services, distribution, corporate finance, mergers & acquisitions, information technology, corporate strategy and planning.

From 2002 to 2003, Clarke was Executive Vice President of Global Operations at Hewlett Packard ("HP"). In this role, he was responsible for HP's worldwide supply chain, manufacturing, procurement and internet operations. He also co-led HP's merger integration with Compaq Computer. Prior to HP, Clarke was the Chief Financial Officer of Compaq Computer, which he joined in 1998 following the merger of Compaq with Digital Equipment Corporation ("DEC"). Clarke was with DEC from 1985 to 1998, serving in management roles in international operations, finance and manufacturing.

In March 2016, Clarke joined the board of directors of Autodesk, Inc., a leader in 3D design, engineering and entertainment software. Clarke served on the board of directors of Red Hat, Inc., an enterprise software company, from November 2008 through August 2016. He served as Chairman of Orbitz Worldwide, a global online travel agency, after leading the company's IPO in July 2007, until April 2014 and was also a director for the Compuware Corporation, an enterprise software company, from November 2013 until December 2014. Clarke served on the board of directors of Utstarcom, which designs and manufactures communications equipment, from 2005 to 2010.

Clarke earned an MBA from Northeastern University, where he serves as a Trustee. He holds a B.A. degree in Economics from SUNY Geneseo.

David E. Bullwinkle

Dave Bullwinkle is Chief Financial Officer and Senior Vice President of Kodak. The Board of Directors elected Bullwinkle to this position effective July 2016. Bullwinkle reports to Chief Executive Officer Jeff Clarke.

Bullwinkle is responsible for Kodak's financial strategy and all functions within Kodak's Finance organization. Purchasing, credit and collections, and internal audit also report to the CFO office under Bullwinkle.

Bullwinkle joined Kodak in 2004 and has worked in several financial management roles at the company including Worldwide BU Controller, Assistant Corporate Controller and External Reporting Manager. He served as the Director of Corporate Financial Planning and Analysis, Director of Investor Relations and Vice President, Finance at Kodak from 2010 to June 2016.

Prior to joining Kodak, Bullwinkle worked as the Manager of Financial Reporting at Birds Eye Foods, Inc. and previously at PricewaterhouseCoopers from 1996 to 2002 in various roles including serving as an Assurance Manager. He holds an MBA from St. John Fisher College and Bachelor of Science in Accounting degree from SUNY Geneseo. Bullwinkle is also a Certified Public Accountant in the State of New York.

Philip Cullimore

Effective January 1, 2015, Philip Cullimore is President of the Enterprise Inkjet Systems Division, which serves existing and future commercial inkjet printing customers, and President of the Micro 3D Printing and Packaging Division, which serves packaging customers and display original equipment manufacturer ("OEM") partners with products such as KODAK FLEXCEL NX Systems and Plates, legacy packaging solutions, and touch sensor films. He reports to Chief Executive Officer Jeff Clarke.

The Board of Directors elected Cullimore a senior vice president effective January 2015.

From December 2010 to December 2014, Cullimore was Regional Managing Director, Europe, Africa and Middle East Region (EAMER) and Chairman Eastman Kodak Sàrl.

During Cullimore's 16 years at Kodak, he has directed Kodak's strategy in the photographic printing market and taken responsibility for Kodak's Wide Format Printer and Inks participation at ENCAD Inc., with assignments in the U.K., U.S., and Switzerland.

Prior to rejoining Kodak in 2000, Cullimore's career included periods as U.K. Managing Director for Purup-Eskofot and Worldwide Business Director for Workflow Software at Fujifilm Electronic Imaging. He also founded, grew, and sold two software businesses during the 1990s.

Cullimore holds a B. S. Honours Degree in Physics and Environmental Sciences from the University of East Anglia.

Brad W. Kruchten

Effective January 1, 2015, Brad Kruchten is President of the Print Systems Division, which serves graphic arts and commercial print customers with printing plates, computer to plate imaging solutions, electrophotographic printing solutions, OEM toner, and all equipment services. He reports to Chief Executive Officer Jeff Clarke.

From January 2012 to January 2015, Kruchten was President of the Graphics, Entertainment and Commercial Films business segment, and from May 2009 to January 2012, he was the President of the Film, Photofinishing & Entertainment Group ("FPEG"). In this capacity, he was responsible for profit and loss for all silver halide products. The Board of Directors elected him a senior vice president in 2009.

Previously, Kruchten was the worldwide General Manager for Retail Printing and managed the products and services that enable retailers to offer an integrated retail solution to analog and digital photographers. These products and services included kiosks, paper, retail workflow software, service, and support. Before that, Kruchten was the General Manager for the Consumer and Professional film business. The Board of Directors elected him a corporate vice president in July 2002.

Kruchten's career at Kodak began in 1982 as a Quality Engineer. In 1986, he moved into a sales position for Copy Products and over the next five years held a number of sales and marketing positions within Printer Products and Business Imaging Systems. In 1993, Kruchten became a product line manager for Business Imaging Systems. In 1998, he was named Strategic Business Unit Manager and a divisional vice president of the Capture and Services business within the Document Imaging unit. During his tenure, Kodak introduced a number of scanners which made the company the world's leading seller of high-speed production scanning. In 2000, Kruchten was named Chief Operating Officer and vice president of the Document Imaging unit. As COO, he led the acquisition of the Imaging division of Bell & Howell. In 2001, Kruchten was named Site Manager, Kodak Colorado

Division, and became a divisional vice president of Kodak's Global Manufacturing unit. In 2002, he was the Chief Executive Officer of Encad Inc., a wholly-owned Kodak subsidiary.

Prior to Kodak, Kruchten worked as a project engineer at Inland Steel and as a tool designer for General Motors Corp.

Kruchten has a B.S. degree in Engineering from Michigan State University, an M.S. in Statistics and Quality Management from the Rochester Institute of Technology, and has attended the Executive Management Development program at Penn State University.

#### Eric-Yves Mahe

Effective January 1, 2015, Eric-Yves Mahe is President of Software and Solutions, which serves existing and future workflow software customers with software to manage digital and conventional print content from creation to output, as well as serving enterprise customers primarily in the government and financial services sectors with managed media services to assist with printing requirements and document management services, including the capture, archiving, retrieval and delivery of documents. He reports to Chief Executive Officer Jeff Clarke.

Beginning April 2014, Mahe was Senior Vice President Kodak Technology Solutions, Sales Strategy and Sales Operations. In that capacity, Mahe was responsible for formulating a strategy to drive and measure sales of Kodak's unique and innovative portfolio of hardware, consumables, software and services. Mahe also advised Kodak's senior management team on software, OEM partnerships and the sale of complex solutions. In April 2014, the Board of Directors elected Mahe a senior vice president.

Mahe has more than 25 years of experience in the IT industry with several multinational companies. Prior to joining Kodak, he was based in Singapore with Pitney Bowes Inc., most recently as President, Global Growth Markets, with responsibility for the company's operations in Latin America, Asia Pacific, Middle East, Africa and emerging markets, from July 2010 until March 2014. Mahe managed this innovation-centered business from inception, and in two years, it became Pitney Bowes's best performing operation worldwide. Mahe joined Pitney Bowes in 2007 as President, Asia Pacific, Middle East and Africa.

Previously, Mahe was Vice President and General Manager of Asia North for CA, Inc. (now called CA Technologies), with responsibility for business operations and enterprise sales in China, Hong Kong and Taiwan. He also has held sales management positions with Sun Microsystems, where he focused on OEM partnerships; Siemens Nixdorf; and Xerox.

Mahe earned his MBA. in Marketing and International Trade from Ecole Superieure de Commerce et d'Administration des Entreprises in Bretagne, France.

#### John O'Grady

Effective January 1, 2016, John O'Grady is General Manager, Worldwide Sales, Print Systems Division. In this role, O'Grady manages the sales, service and regional marketing for the Print Systems Division on a worldwide basis in addition to the go-to-market back office operations for Kodak. He reports to Chief Executive Officer Jeff Clarke and Brad Kruchten, President, Print Systems Division.

From January 2015 to December 2015, O'Grady was Managing Director of the Europe, United States and Canada, Australia and New Zealand (EUCAN) Region. From December 2010 to December 2014, he was Managing Director, U.S. & Canada Region. From December 2008 to December 2010, O'Grady was Regional Managing Director, Europe, Africa and Middle East Region (EAMER) and Chairman Eastman Kodak Sàrl, and from May 2007 to December 2008, he was Managing Director, EAMER, Consumer Businesses. The Board of Directors elected him a corporate vice president in March 2007, and then a senior vice president in August 2016.

O'Grady joined Kodak in 1997 following a 12-year career at Verbatim, and has held key business development and regional management positions in Kodak's digital imaging businesses.

O'Grady graduated from the University of Limerick in Ireland with a Bachelor of Science degree in Electronics.

Steven Overman

Effective January 1, 2015, Steven Overman is President of the Consumer and Film Division and Kodak's Chief Marketing Officer. He reports to Chief Executive Officer Jeff Clarke.

As President of the Consumer and Film Division, Overman leads Kodak's most consumer-facing division, with responsibility for consumer inkjet solutions, motion picture and commercial films, synthetic chemicals, and consumer products. This division is responsible for the exploration of other potential initiatives in the consumer space.

In his Chief Marketing Officer role, Overman is responsible for leading a global, company-wide renewal of the Kodak brand to increase its power, relevance and value. He leads the strategic development and coordination of Kodak's brand identity; global marketing programs and activities; and communication of Kodak's vision, strategy and progress in an integrated way to all of the company's stakeholders. The Board of Directors elected him a senior vice president effective January 2015.

Overman previously served as vice president and global head of brand strategy and marketing creation for Nokia from June 2010 until April 2013. He founded Match & Candle, a consultancy supporting startups and marketing service agencies with brand strategy development in September 2013 and was there until October 2014. He also held several different leadership roles in technology companies and marketing services agencies. In

those roles, his responsibilities included corporate brand strategy and execution, product and service innovation, corporate strategic initiatives, product launches and sales development. He was among the first employees at Wired.

Overman is a graduate of the Rhode Island School of Design.

Eric H. Samuels

Eric Samuels was appointed Corporate Controller and Chief Accounting Officer in July 2009. Samuels previously served as the Company's Assistant Corporate Controller and brings to his position more than 20 years of leadership experience in corporate finance and public accounting. He joined Kodak in 2004 as Director, Accounting Research and Policy. He reports to Chief Financial Officer David Bullwinkle.

Prior to joining Kodak, Samuels had a 14-year career in public accounting during which he served as a senior manager at KPMG LLP's Department of Professional Practice (National Office) in New York City. Prior to joining KPMG in 1996, he worked in Ernst & Young's New York City office.

Samuels has a B.S. degree in business economics from the State University of New York College at Oneonta. He is a Certified Public Accountant in New York and a member of the American Institute of Certified Public Accountants.

Terry R. Taber, PhD

Terry Taber joined Kodak in 1980. In January 2009, he was named Chief Technical Officer, a position he currently holds. The Board of Directors elected him a corporate vice president in December 2008, and then a senior vice president in December 2010. Effective January 1, 2015, Taber was named President of the newly created Intellectual Property Solutions segment, which contains the research laboratories and includes licensing as well as new business development activities related to Kodak's patents and proprietary technology. He reports to Chief Executive Officer Jeff Clarke.

Taber was previously the Chief Operating Officer of Kodak's Image Sensor Solutions ("ISS") business, a leading developer of advanced CCD and CMOS sensors serving imaging and industrial markets. Prior to joining ISS in 2007, Taber held a series of senior positions in Kodak's research and development and product organizations. During his more than 35 years at Kodak, Taber has been involved in new materials research, product development and commercialization, manufacturing, and executive positions in R&D and business management.

Taber's early responsibilities included research on new synthetic materials, an area in which he holds several patents. He then became a program manager for several film products before completing the Sloan Fellows program at the Massachusetts Institute of Technology ("MIT"). He returned from MIT to become the worldwide consumer film business product manager from 1999 to 2002, and then became an Associate Director of R&D from 2002 to 2005, followed by a position as the director of Materials & Media R&D from 2005 to 2007.

Taber received a B.S. degree in Chemistry from Purdue University and a Ph.D. in Organic Chemistry from the California Institute of Technology. He also received an M.S. in General Management from MIT as a Kodak Sloan Fellow. Taber was a Board Member of the Innovation & Material Sciences Institute and serves on the Executive Advisory Board of FIRST Rochester (For Inspiration and Recognition of Science and Technology). He also serves on the Executive Committee of the Greater Rochester Chamber of Commerce and on the Board of Trustees for Roberts Wesleyan College and Northeastern Seminary.

Sharon E. Underberg

Sharon Underberg has served as General Counsel, Secretary and Senior Vice President since January 2015. She is responsible for leading the company's global legal function and for providing legal guidance to senior leadership and

the Board of Directors. Underberg reports to Chief Executive Officer Jeff Clarke.

Underberg has been an attorney with Kodak for over 27 years, previously serving as Deputy General Counsel and Vice President, Legal Department from September 2014 to January 2015, and as Assistant General Counsel and Vice President, Legal Department, from June 2006 until September 2014. For much of her tenure with Kodak, she has specialized in global commercial transactions, particularly acquisitions, divestitures, joint ventures and corporate financings. Underberg led the legal team on numerous deals, including the completion of the acquisitions of the Kodak Polychrome Graphics and NexPress joint ventures, the divestiture of the Health Imaging business, and the spinoff of the PI / DI Business. She has advised on every major financing transaction the Company has completed in the past 15 plus years. In addition, Underberg was an instrumental part of the team that led the Company through its chapter 11 restructuring, providing advice on a wide range of contractual, litigation, financing, and divestiture activities.

Underberg has been a manager in the Legal Department since 2006. During this time, she led legal teams in a wide variety of substantive areas, including corporate, transactional and commercial matters worldwide. From 2004 to 2006, Underberg served as Assistant Secretary, working with the Board of Directors and senior management on matters related to corporate governance, executive compensation, and SEC reporting and disclosure.

Prior to joining Kodak, Underberg was an attorney in the New York City office of international law firm Fulbright & Jaworski (currently Norton Rose Fulbright).

Underberg received a B.A. degree in political science from Brandeis University and a J.D. from the University of Pennsylvania School of Law.

## PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND  
5. ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is listed on the New York Stock Exchange (NYSE) under the symbol "KODK" and has been trading since September 23, 2013, following emergence from bankruptcy on September 3, 2013 after confirmation of the revised First Amended Joint Chapter 11 Plan of Reorganization.

There were 2,903 shareholders of record of common stock on December 31, 2016.

Information regarding securities authorized for issuance under equity compensation plans is included in Item 12. "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" under the caption "Equity Compensation Plan Information."

## MARKET PRICE DATA

The market price data below reflects the high and low sales price of the Company's stock.

Price per share:	2016		2015	
	High	Low	High	Low
1st Quarter	\$12.47	\$7.56	\$22.17	\$17.80
2nd Quarter	\$16.80	\$10.00	\$20.97	\$16.54
3rd Quarter	\$17.29	\$14.01	\$16.92	\$13.25
4th Quarter	\$17.30	\$13.87	\$17.31	\$10.75

## DIVIDEND INFORMATION

No dividends on common stock were declared or paid during 2015 or 2016.

Dividends for common shareholders may be restricted under Kodak's Credit Agreements and the Series A Preferred Stock Agreement. Refer to Note 8, "Debt and Capital Leases," and Note 18, "Redeemable, Convertible Series A Preferred Stock" in the Notes to Financial Statements.

## PERFORMANCE GRAPH - SHAREHOLDER RETURN

The following graph compares the performance of the Company's common stock with the performance of the Standard & Poor's (S&P) Small Cap 600 Information Technology Index, the Russell 2000 Index (in which the Company is currently included), the S&P Information Technology Index and the S&P Midcap 400 Composite Stock Price Index by measuring the quarterly changes in common stock prices from September 23, 2013, plus reinvested dividends. Prior to 2016, the performance of the Company's common stock was compared to the S&P Information Technology Index and the S&P Midcap 400 Composite Stock Price Index. In 2016, the Company reviewed the indices being used and determined the market capitalization of the companies included in the S&P Small Cap 600 Information Technology Index and the Russell 2000 Index was more comparable to the Company's market capitalization. The comparison with the performance of the S&P Information Technology Index and the S&P Midcap 400 Composite Stock Price Index is presented during the transition to the S&P Small Cap 600 Information Technology Index and the Russell 2000 Index.

ISSUER PURCHASES OF EQUITY SECURITIES DURING THE QUARTER ENDED DECEMBER 31, 2016 (1)

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs <sup>(2)</sup>	Maximum That May Be Purchased under the Plans or Programs
October 1 through 31, 2016	5,389	15.00	n/a	n/a
December 1 through 31, 2016	17,736	16.35	n/a	n/a
Total	23,125	16.04		

<sup>(1)</sup>These purchases were made to satisfy tax withholding obligations in connection with the vesting of restricted stock units issued to employees.

<sup>(2)</sup>Kodak does not currently have a publicly announced repurchase plan or program.

## ITEM 6. SELECTED FINANCIAL DATA

As a result of the application of fresh-start accounting as of September 3, 2013, following the Company's emergence from bankruptcy, the financial statements prior to September 3, 2013 are not comparable with the financial statements after September 3, 2013. References to "Successor" relate to the reorganized Kodak subsequent to September 3, 2013. References to "Predecessor" refer to Kodak prior to September 3, 2013.

## SUMMARY OF OPERATING DATA – UNAUDITED

SUMMARY OF OPERATING DATA – UNAUDITED (CONT'D)

Historical results are not indicative of future results.

- (1) Includes \$70 million in revenues from non-recurring intellectual property agreements that increased net after-tax income from continuing operations by \$70 million.
- (2) Includes proceeds of \$535 million from the sale and licensing of certain intellectual property assets, pre-tax goodwill impairment charges of \$77 million; income of \$2,026 million in pre-tax reorganization items, net; and net charges of \$84 million related to discrete tax items. These items increased after-tax income from continuing operations by \$2.4 billion.
- (3) Includes \$843 million in pre-tax reorganization items, net; and a net benefit of \$320 million related to discrete tax items. These items increased net after-tax loss from continuing operations by \$523 million.
- (4) Refer to Note 26, “Discontinued Operations” in the Notes to Financial Statements for a discussion regarding the (loss) earnings from discontinued operations.
- (5) Effective in the first quarter of 2016, due to a determination to sell the KODAK PROSPER Enterprise Inkjet Business (the “Prosper Business”), results for 2013, 2014 and 2015 were revised to report the Prosper Business as discontinued operations. Results for 2012 were not revised. Additionally, the related assets and liabilities of the Prosper Business are classified as held for sale for 2014, 2015 and 2016. The related assets and liabilities of the Prosper Business are not classified as held for sale for 2012 or 2013.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand the results of operations and financial condition of Kodak for the years ended December 31, 2016, 2015 and 2014. All references to Notes relate to Notes to the Financial Statements in Item 8. "Financial Statements and Supplementary Data."

### CAUTIONARY STATEMENT PURSUANT TO SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This report on Form 10-K includes "forward-looking statements" as that term is defined under the Private Securities Litigation Reform Act of 1995.

Forward-looking statements include statements concerning Kodak's plans, objectives, goals, strategies, future events, future revenue or performance, capital expenditures, liquidity, investments, financing needs and business trends and other information that is not historical information. When used in this document, the words "estimates," "expects," "anticipates," "projects," "plans," "intends," "believes," "predicts," "forecasts," "strategy," "continues," "goals," "targets" or future conditional verbs, such as "will," "should," "could," or "may," and similar expressions, as well as statements that do not relate strictly to historical or current facts, are intended to identify forward-looking statements. All forward-looking statements, including management's examination of historical operating trends and data, are based upon Kodak's expectations and various assumptions. Future events or results may differ from those anticipated or expressed in the forward-looking statements. Important factors that could cause actual events or results to differ materially from the forward-looking statements include, among others, the risks and uncertainties described in more detail in this report on Form 10-K under the headings "Business," "Risk Factors," "Legal Proceedings" and/or "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources," and in other filings the Company makes with the SEC from time to time, as well as the following:

- ✘ Kodak's ability to improve and sustain its operating structure, cash flow, profitability and other financial results;
- ✘ the ability of Kodak to achieve cash forecasts, financial projections, and projected growth;
- ✘ Kodak's ability to achieve the financial and operational results contained in its business plans;
- ✘ Kodak's ability to fund continued investments, capital needs and restructuring payments and service its debt and Series A Preferred Stock;
- ✘ Kodak's ability to discontinue, sell or spin-off certain businesses or operations, including the Prosper Business, or otherwise monetize assets;
- ✘ changes in foreign currency exchange rates, commodity prices and interest rates;
- ✘ Kodak's ability to effectively anticipate technology trends and develop and market new products, solutions and technologies;
- ✘ Kodak's ability to effectively compete with large, well-financed industry participants;
- ✘ Kodak's ability to comply with the covenants in its various credit facilities;
- ✘ continued sufficient availability of borrowings and letters of credit under the Amended Credit Agreement, Kodak's ability to obtain additional financing if and as needed and Kodak's ability to provide or facilitate financing for its customers;
- ✘ the performance by third parties of their obligations to supply products, components or services to Kodak; and
- ✘ the impact of the global economic environment on Kodak.

There may be other factors that may cause Kodak's actual results to differ materially from the forward-looking statements. All forward-looking statements attributable to Kodak or persons acting on its behalf apply only as of the date of this report on Form 10-K and are expressly qualified in their entirety by the cautionary statements included in this document. Kodak undertakes no obligation to update or revise forward-looking statements to reflect events or

circumstances that arise after the date made or to reflect the occurrence of unanticipated events.

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

### Revenue Recognition

Kodak's revenue transactions include sales of products (such as components and consumables for use in Kodak, and other manufacturers' equipment, and film based products), equipment, software, services, integrated solutions, and intellectual property and brand licensing. Complex arrangements with nonstandard terms and conditions may require significant contract interpretation to determine the appropriate accounting. For equipment sales, revenue recognition may depend on completion of installation based on the type of equipment, level of customer specific customization and other contractual terms. In instances in which the agreement with the customer contains a customer acceptance clause, revenue is deferred until customer acceptance is obtained, provided the customer acceptance clause is considered to be substantive.

At the time revenue is recognized, Kodak also records reductions to revenue for customer incentive programs. Such incentive programs include cash and volume discounts and promotional allowances. For those incentives that require the estimation of sales volumes or redemption rates, such as for volume rebates, Kodak uses historical experience and both internal and customer data to estimate the sales incentive at the time revenue is recognized. In the event that the actual results of these items differ from the estimates, adjustments to the sales incentive accruals are recorded.

Future market conditions and product transitions may require Kodak to take actions to increase customer incentive offers, possibly resulting in an incremental reduction of revenue at the time the incentive is offered.

#### Valuation and Useful Lives of Long-Lived Assets, Including Goodwill and Intangible Assets

Kodak performs a test for goodwill impairment annually and whenever events or changes in circumstances occur that would more likely than not reduce the fair value of the reporting unit below its carrying amount.

Goodwill is tested for impairment at a level of reporting referred to as a reporting unit, which is an operating segment or one level below an operating segment (a component) if the component constitutes a business for which discrete financial information is available and regularly reviewed by segment management.

The Print Systems segment has two goodwill reporting units: Prepress Solutions and Electrophotographic Printing Solutions. The Micro 3D Printing and Packaging segment has two goodwill reporting units: Packaging and Micro 3D Printing. The Software and Solutions segment has two goodwill reporting units: Kodak Technology Solutions and Unified Workflow Solutions. The Consumer and Film segment has three goodwill reporting units: Consumer Inkjet Solutions, Motion Picture, Industrial Chemicals and Films and Consumer Products. The Enterprise Inkjet Systems segment, Intellectual Property Solutions segment and Eastman Business Park segment all have one goodwill reporting unit. Goodwill is recorded in the Prepress Solutions, Packaging, United Workflow Solutions, Consumer Inkjet Solutions and Consumer Products reporting units.

If the fair value of a reporting unit is less than its carrying value, Kodak must determine the implied fair value of the goodwill associated with that reporting unit. The implied fair value of goodwill is determined by first allocating the fair value of the reporting unit to all of its assets and liabilities and then computing the excess of the reporting unit's fair value over the amounts assigned to the assets and liabilities. If the carrying value of goodwill exceeds the implied fair value of goodwill, such excess represents the amount of goodwill impairment charge that must be recognized.

Determining the fair value of a reporting unit involves the use of significant estimates and assumptions. Kodak estimates the fair value of its reporting units using the guideline public company method and discounted cash flow method. To estimate fair value utilizing the guideline public company method, Kodak applies valuation multiples, derived from the operating data of publicly-traded benchmark companies, to the same operating data of the reporting units. The valuation multiples are based on earnings before interest, taxes, depreciation and amortization ("EBITDA"). To estimate fair value utilizing the discounted cash flow method, Kodak establishes an estimate of future cash flows for each reporting unit and discounts those estimated future cash flows to present value.

Kodak performed a quantitative test of impairment for all reporting units for its annual impairment test as of December 31, 2016. Except for Consumer Inkjet Solutions, Kodak utilized the discounted cash flow method and guideline public company method for the reporting units with goodwill. For these reporting units, Kodak selected equal weighting of the guideline public company method and the discounted cash flow method as the valuation approaches produced comparable ranges of fair value. Fair values for the other reporting units were estimated using the discounted cash flow method only.

To estimate fair value utilizing the discounted cash flow method, Kodak established an estimate of future cash flows for the period ranging from January 1, 2017 to December 31, 2021 and discounted the estimated future cash flows to present value. The expected cash flows were derived from earnings forecasts and assumptions regarding growth and margin projections, as applicable. The discount rates are estimated based on an after-tax weighted average cost of capital ("WACC") for each reporting unit reflecting the rate of return that would be expected by a market participant. The WACC also takes into consideration a company specific risk premium for each reporting unit reflecting the risk associated with the overall uncertainty of the financial projections. Discount rates of 10.1% to 21.2% were utilized in the valuation based on Kodak's best estimates of the after-tax weighted-average cost of capital of each reporting unit.

A terminal value was included for all reporting units, except for the Consumer Inkjet Solutions reporting unit, at the end of the cash flow projection period to reflect the remaining value that the reporting unit is expected to generate. The terminal value was calculated using either the constant growth method (“CGM”) based on the cash flows of the final year of the discrete period or the H-model, which assumes the growth during the terminal period starts at a higher rate and declines in a linear manner over a specified transition period toward a stable growth rate.

Based upon the results of Kodak’s December 31, 2016 analysis, Kodak concluded that no impairment of goodwill was indicated. Impairment of goodwill could occur in the future if a reporting unit’s fair value changes significantly, if Kodak’s market capitalization significantly declines, if a reporting unit’s carrying value changes materially compared with changed in its fair values, or as a result of changes in operating segments or reporting units.

The carrying value of the indefinite-lived intangible asset related to the Kodak trade name is evaluated for potential impairment annually or whenever events or changes in circumstances indicate that it is more likely than not that the asset is impaired. Kodak performed the annual test of impairment as of December 31, 2016.

The fair value of the Kodak trade name, which has a carrying value of \$40 million, was valued using the income approach, specifically the relief from royalty method based on the following significant assumptions: (a) forecasted revenues ranging from January 1, 2017 to December 31, 2021, including a terminal year with growth rates ranging from -3% to 3%; (b) royalty rates ranging from .5% to 1% of expected net sales determined with regard to comparable market transactions and profitability analysis; and (c) discount rates ranging from 10.1% to 21.2%, which were based on the after-tax weighted-average cost of capital.

Based on the results of Kodak's December 31, 2016 assessment, no impairment of the Kodak trade name was indicated. Impairment of the Kodak trade name could occur in the future if expected revenues decline or if there are significant changes in the discount or royalty rates.

Long-lived assets other than goodwill and indefinite-lived intangible assets are evaluated for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable. When evaluating long-lived assets for impairment, the carrying value of an asset group is compared to its estimated undiscounted future cash flows. An impairment is indicated if the estimated future cash flows are less than the carrying value of the asset group. The impairment is the excess of the carrying value over the fair value of the long-lived asset group.

The value of property, plant, and equipment is depreciated over its expected useful life in such a way as to allocate it as equitably as possible to the periods during which services are obtained from their use, which aims to distribute the value over the remaining estimated useful life of the unit in a systematic and rational manner. An estimate of useful life not only considers the economic life of the asset, but also the remaining life of the asset to the entity. Impairment of long-lived assets other than goodwill and indefinite lived intangible assets could occur in the future if expected future cash flows decline or if there are significant changes in the estimated useful life of the assets.

#### Taxes

Kodak recognizes deferred tax liabilities and assets for the expected future tax consequences of operating losses, credit carry-forwards and temporary differences between the carrying amounts and tax basis of Kodak's assets and liabilities. Kodak records a valuation allowance to reduce its net deferred tax assets to the amount that is more likely than not to be realized. Kodak has considered forecasted earnings, future taxable income, the geographical mix of earnings in the jurisdictions in which Kodak operates and prudent and feasible tax planning strategies in determining the need for these valuation allowances. As of December 31, 2016, Kodak has net deferred tax assets before valuation allowances of approximately \$1,228 million and a valuation allowance related to those net deferred tax assets of approximately \$1,209 million, resulting in net deferred tax assets of approximately \$19 million. The net deferred tax assets can be used to offset taxable income in future periods and reduce Kodak's income tax payable in those future periods. At this time, it is considered more likely than not that taxable income in the future will be sufficient to allow realization of these net deferred tax assets. However, if Kodak is unable to generate sufficient taxable income, then a valuation allowance to reduce net deferred tax assets may be required, which could materially increase expenses in the period the valuation allowance is recognized. Conversely, if Kodak were to make a determination that it is more likely than not that deferred tax assets, for which there is currently a valuation allowance, would be realized, the related valuation allowance would be reduced and a benefit to earnings would be recorded. Kodak considers both positive and negative evidence in determining whether a valuation allowance is needed by territory including, but not limited to, whether particular entities are in three-year cumulative income positions.

In general, the amount of tax expense or benefit from continuing operations is determined without regard to the tax effects of other categories of income or loss, such as Other comprehensive (loss) income. However, an exception to this rule applies when there is a loss from continuing operations and income from items outside of continuing operations that must be considered. This exception requires that income from discontinued operations and items charged or credited directly to other comprehensive income be considered in determining the amount of tax benefit that results from a loss in continuing operations. This exception affects the allocation of the tax provision amongst categories of income.

The undistributed earnings of Kodak's foreign subsidiaries are not considered permanently reinvested. Kodak has a deferred tax liability (net of related foreign tax credits) of \$56 million and \$102 million on the foreign subsidiaries' undistributed earnings as of December 31, 2016 and 2015, respectively. Kodak also has a deferred tax liability of \$20 million and \$19 million for the potential foreign withholding taxes on the undistributed earnings as of December 31, 2016 and 2015, respectively.

Kodak operates within multiple taxing jurisdictions worldwide and is subject to audit in these jurisdictions. These audits can involve complex issues, which may require an extended period of time for resolution. Management's ongoing assessments of the outcomes of these issues and related tax positions require judgment, and although management believes that adequate provisions have been made for such issues, there is the possibility that the ultimate resolution of such issues could have an adverse effect on the earnings of Kodak. Conversely, if these issues are resolved favorably in the future, the related provisions would be reduced, thus having a positive impact on earnings.

#### Pension and Other Postretirement Benefits

Kodak's defined benefit pension and other postretirement benefit costs and obligations are estimated using several key assumptions. These assumptions, which are reviewed at least annually by Kodak, include the discount rate, long-term expected rate of return on plan assets ("EROA"), salary growth, healthcare cost trend rate, mortality trends and other economic and demographic factors. Actual results that differ from Kodak's assumptions are recorded as unrecognized gains and losses and are amortized to earnings over the estimated future service period of the active participants in the plan or, if the plan is almost entirely inactive, the average remaining lifetime expectancy of inactive participants, to the extent such total net unrecognized gains and losses exceed 10% of the greater of the plan's projected benefit obligation or the calculated value of plan assets. Significant differences in actual experience or significant changes in future assumptions would affect Kodak's pension and other postretirement benefit costs and obligations.

Asset and liability modeling studies are utilized by Kodak to adjust asset exposures and review a liability hedging program through the use of forward-looking correlation, risk and return estimates. Those forward-looking estimates of correlation, risk and return generated from the modeling studies are also used to estimate the EROA. The EROA is estimated utilizing a forward-looking building block model factoring in the expected risk of each asset category, return and correlation over a five to seven-year horizon, and weighting the exposures by the current asset allocation. Historical inputs are utilized in the forecasting model to frame the current market environment with adjustments made based on the forward-looking view.

Kodak aggregates investments into major asset categories based on the underlying benchmark of the strategy. Kodak's asset categories include broadly diversified exposure to U.S. and non-U.S. equities, U.S. and non-U.S. government and corporate bonds, inflation-linked bonds, commodities and absolute return strategies. Each allocation to these major asset categories is determined within the overall asset allocation to accomplish unique objectives, including enhancing portfolio return, providing portfolio diversification, or hedging plan liabilities.

The EROA, once set, is applied to the calculated value of plan assets in the determination of the expected return component of Kodak's pension expense. Kodak uses a calculated value of plan assets, which recognizes gains and losses in the fair value of assets over a four-year period, to calculate expected return on assets. At December 31, 2016, the calculated value and the fair value of the assets of Kodak's major U.S. and non-U.S. defined benefit pension plans were both approximately \$4.3 billion. Asset gains and losses that are not yet reflected in the calculated value of plan assets are not included in amortization of unrecognized gains and losses.

Kodak reviews its EROA assumption annually. To facilitate this review, every three years, or when market conditions change materially, Kodak's larger plans will undertake asset allocation or asset and liability modeling studies. The weighted average EROA used to determine the 2016 net pension expense for major U.S. and non-U.S. defined benefit pension plans was 7.40 % and 4.65%, respectively.

Generally, Kodak bases the discount rate assumption for its significant plans on high quality corporate bond yields in the respective countries as of the measurement date. Specifically, for its U.S., Canadian, Euro-zone and UK plans, Kodak determines a discount rate using a cash flow model to incorporate the expected timing of benefit payments and an AA-rated corporate bond yield curve. For Kodak's U.S. plans, the Citigroup Above Median Pension Discount Curve is used. For Kodak's other non-U.S. plans, discount rates are determined by comparison to published local high quality bond yields or indices considering estimated plan duration and removing any outlying bonds, as warranted.

Kodak uses the spot yield curve approach to estimate the service and interest costs by applying the specific spot rates along the yield curve used to determine the benefit obligations to relevant projected cash outflows.

The salary growth assumptions are determined based on Kodak's long-term actual experience and future and near-term outlook. The healthcare cost trend rate assumptions are based on historical cost and payment data, the near-term outlook and an assessment of the likely long-term trends.

The following table illustrates the sensitivity to a change to certain key assumptions used in the calculation of expense for the year ending December 31, 2017 and the projected benefit obligation ("PBO") at December 31, 2016 for Kodak's major U.S. and non-U.S. defined benefit pension plans:

(in millions)	Impact on 2017		Impact on PBO	
	Pre-Tax Pension Expense		December 31, 2016	
	Increase (Decrease)		Increase (Decrease)	
	U.S.	Non-U.S.	U.S.	Non-U.S.
<b>Change in assumption:</b>				
25 basis point decrease in discount rate	\$ —	\$ —	\$ 86	\$ 23
25 basis point increase in discount rate	6	—	(83)	(22)
25 basis point decrease in EROA	9	2	N/A	N/A
25 basis point increase in EROA	(9)	(2)	N/A	N/A

Total pension income from continuing operations before special termination benefits, curtailments and settlements for the major defined benefit pension plan in the U.S. was \$137 million for 2016 and is expected to be approximately \$123 million in 2017. Pension income from continuing operations before special termination benefits, curtailments and settlements for the major non-U.S. defined benefit pension plans was \$11 million for 2016 and is projected to be approximately \$8 million in 2017. The reductions in income are driven primarily by lower EROA assumptions in 2017.

#### Inventories

Inventories are stated at the lower of cost or market. Carrying values of excess and obsolete inventories are reduced to net realizable value. Judgment is required to assess the ultimate demand for and realizable value of inventory. The analysis of inventory carrying values considers several factors including length of time inventory is on hand, historical sales, product shelf life, product life cycle, product category, and product obsolescence.

#### Accounts Receivable Reserves

Accounts receivable reserves are based on historical collections experience as well as reserves for specific receivables deemed to be at risk for collection. The collectability of customer receivables is reviewed on an ongoing basis considering past due invoices and the current creditworthiness of each customer. Judgment is required in assessing the ultimate realization of accounts receivables.

#### OVERVIEW

Revenue declined \$166 million (9.7%) from 2015 to 2016 and \$337 million from 2014 to 2015 (16.5%). Operating cost reductions more than offset the resulting impact of the revenue decline in earnings.

Kodak's strategy is to:

- Use Kodak's divisional structure to drive accountability, transparency, and speed of decision making;

31

---

- Focus product investment in growth engines - Sonora, Packaging, Micro 3D Printing and Software and Services;
- Maintain stable market leadership position and cash flows associated with Print Systems;
- Manage the expected decline in and maximize cash generated by mature businesses;
- Continue to streamline processes to drive cost reductions and improve operating leverage; and
- Continue to explore opportunities to monetize the asset base.

A discussion of opportunities and challenges related to Kodak's strategy follows:

Print Systems' digital plate products include traditional digital plates and KODAK SONORA Process Free Plates. SONORA process free plates allow Kodak customers to skip the plate processing step prior to mounting plates on a printing press. This improvement in the printing process saves time and costs for customers. Also, SONORA process free plates reduce the environmental impact of the printing process because they eliminate the use of chemicals (including solvents), water and power that is otherwise required to process a traditional plate. While traditional digital plate offerings are experiencing pricing pressure, innovations in Kodak product lines which command premium prices, such as SONORA Process Free Plates, are expected to offset some of the long-term price erosion in the market. Print Systems' revenues declined \$88 million (8.0%) in 2016 and \$151 million (12.0%) in 2015, driven by competitive pricing pressures, lower volumes and, in 2015, the adverse impact of foreign currency. Despite the revenue decline, segment earnings increased \$5 million from 2014 to 2015 and \$6 million from 2015 to 2016 due to cost reductions.

In Micro 3D Printing and Packaging, the earnings contribution from Packaging offsets the cost of developing the Micro 3D Printing business. Kodak expects growth in Packaging, as well as the transition from investment to commercialization of product in Micro 3D Printing, will result in revenue and earnings growth in this segment.

The Software and Solutions segment is comprised of Unified Workflow Solutions and Kodak Technology Solutions, which includes Enterprise Services and Solutions. Unified Workflow Solutions is an established product line, whereas Kodak Technology Solutions includes growing product lines that leverage existing technologies and intellectual property in new applications. These business initiatives generally do not require substantial additional investment, and Kodak expects that they will grow in contribution to earnings. Software and Solutions' revenue declined \$26 million (23.2%) in 2016, primarily due to reductions in government contracts within Kodak Technology Solutions, compared to a \$4 million (3.7%) increase from 2014 to 2015. Kodak Technology Solutions revenues are project based and can vary from year to year depending on the nature and number of projects in existence in a given year.

The Consumer and Film segment's revenues are expected to stabilize and grow modestly. Consumer and Film's revenue declined \$49 million (18.5%) from 2016 to 2015 and \$87 million (24.7%) from 2014 to 2015. Earnings of the Consumer and Film segment declined \$36 million (69.2%) and \$14 million (21.2%) from 2015 to 2016 and from 2014 to 2015, respectively, primarily due to lower sales of ink as a result of the declining installed base of Consumer Inkjet Printers. Kodak plans to continue to promote the use of film to utilize as much film manufacturing capacity as possible. The division will seek to develop consumer products, both with internal resources and also through partnerships with external companies, which can benefit from the Kodak brand as well as enter into agreements for the license of the Kodak brand.

Film and related component manufacturing operations and Kodak Research Laboratories utilize capacity at Eastman Business Park ("EBP"), which helps cost absorption at EBP.

Selling, general and administrative expenses ("SG&A") and research and development ("R&D") expenses declined a combined \$36 million (14.5%) compared with 2015 and \$100 million (28.7%) from 2014 to 2015, as the result of a number of actions including headcount reductions, reduced overhead costs, savings from global benefit changes, facilities consolidations, renegotiations of vendor contracts and the focusing of R&D spending on materials science. Lower interest cost on pension plans also impacted operating costs.

Kodak plans to continue to pursue monetization of its asset base, including selling the Prosper Business, selling and licensing intellectual property, selling and leasing excess capacity in its properties, and pursuing rights to an earn-out from a previous divestiture.

## DETAILED RESULTS OF OPERATIONS

## Net Revenues from Continuing Operations by Reportable Segment

	Year Ended December		
	2016	2015	2014
(in millions)			
Print Systems	\$1,018	\$1,106	\$1,257
Micro 3D Printing and Packaging	132	128	130
Software and Solutions	86	112	108
Consumer and Film	216	265	352
Enterprise Inkjet Systems	76	84	115
Intellectual Property Solutions	—	1	70
Eastman Business Park	15	13	14
Consolidated total	\$1,543	\$1,709	\$2,046

## Segment Operational EBITDA and Consolidated Earnings (Loss) from Continuing Operations Before Income Taxes

(1) RED utilities variable interest entity (interest and depreciation of RED are included in the respective lines below).

(2) Composed of interest cost, expected return on plan assets, amortization of actuarial gains and losses, and curtailments and settlement components of pension and other postretirement benefit expenses.

(3) Primarily consists of costs for shared resources allocated to the Prosper Enterprise Inkjet business discontinued operation in the prior year periods which are now included in the results of continuing operations and an estimate of costs for shared resources which would have been allocated to the Prosper Enterprise Inkjet business discontinued operation in the current year period had the business remained in continuing operations.

33

---

- (4) In the fourth quarter of 2015, Kodak changed the timing of when affected U.S. employees earn their vacation benefits, which reduced Kodak's obligation to employees and the related accrual by \$17 million as of December 31, 2015. The reduction in the accrual impacted gross profit by approximately \$9 million, SG&A by approximately \$5 million, R&D by approximately \$2 million, and discontinued operations by \$1 million.
- (5) Consulting and other costs are primarily related to professional services provided for corporate strategic initiatives in 2016 and 2015. The costs in 2014 primarily represent the cost of AlixPartners filling interim executive positions which are not captured within "Reorganization items, net" as well as consulting services provided by former executives during transitional periods.
- (6) Consists of third party costs such as security, maintenance, and utilities required to maintain land and buildings in certain locations not used in any Kodak operations.
- (7) Consists of manufacturing costs originally planned to be absorbed by silver metal mesh touch screen production that are now excluded from the measure of segment profit and loss.
- (8) In 2015 a \$3 million gain was recognized related to assets that were acquired for no monetary consideration as a part of the termination of the relationship with Unipixel. The gain was reported in Other operating (income) expense, net in the Consolidated Statement of Operations. Other operating (income) expense, net is typically excluded from the segment measure. However, this particular gain was included in the Micro 3D Printing and Packaging segment's earnings in 2015.
- (9) As reported in the Consolidated Statement of Operations.

Kodak reduced workers' compensation reserves by approximately \$8 million in both 2016 and 2015, primarily driven by changes in discount rates. The reduction in reserves impacted gross profit by approximately \$4 million, SG&A by approximately \$3 million and R&D by approximately \$1 million in both years. In 2014, Kodak increased workers' compensation reserves by \$6 million, which impacted gross profit by approximately \$3 million, SG&A by approximately \$2 million and R&D by approximately \$1 million.

COMPANY

Revenues

Current Year

For the year ended December 31, 2016, revenues decreased by approximately \$166 million compared with the same period in 2015. The decline was primarily driven by volume and pricing declines within Print Systems (\$88 million). Also contributing to the decrease were volume declines in Consumer and Film (\$44 million) and Software and Solutions (\$24 million), as well as unfavorable foreign currency rates (\$11 million) and lower non-recurring intellectual property and brand licensing arrangements (\$8 million). Partially offsetting these declines were volume improvements in Micro 3D Printing and Packaging (\$10 million). See segment discussions for additional details.

Prior Year

For the year ended December 31, 2015, revenues decreased by approximately \$337 million compared with the same period in 2014. The decline in revenue was primarily driven by unfavorable foreign currency rates (\$145 million) and lower non-recurring intellectual property and brand licensing arrangements (\$62 million). Also contributing to the decline were volume declines in Consumer and Film (\$82 million), Enterprise Inkjet Systems (\$20 million) and Print Systems (\$15 million) and unfavorable price/mix within Print Systems (\$31 million) primarily due to pricing declines. Partially offsetting these declines were volume improvements in Micro 3D Printing and Packaging (\$13 million) and Software and Solutions (\$13 million). See segment discussions for additional details.

Included in revenues were non-recurring intellectual property and brand licensing arrangements. Across all segments, such arrangements contributed approximately \$8 million to revenue in 2015 and \$70 million to revenues in 2014.

#### Gross Profit

##### Current Year

Gross profit for 2016 increased by approximately \$5 million. The increase was driven by cost improvements within Print Systems (\$54 million, excluding the impact of lower depreciation) and lower depreciation expense (\$21 million) driven by Consumer and Film (\$15 million). Also contributing were favorable impacts from pension income (\$14 million), higher volume within Micro 3D Printing and Packaging (\$6 million) and lower accelerated depreciation from restructuring (\$8 million). Partially offsetting these improvements were pricing declines and lower volume within Print Systems (\$46 million and \$6 million, respectively), lower volume and unfavorable cost within Consumer and Film (\$14 million and \$10 million, respectively), unfavorable foreign currency rates (\$12 million), and unfavorable volume within Software and Solutions (\$5 million). See segment discussions for additional details.

##### Prior Year

Gross profit for 2015 decreased by approximately \$82 million. The decrease was driven by lower revenues from non-recurring intellectual property and brand licensing arrangements (\$62 million), unfavorable foreign currency rates (\$36 million), unfavorable price/mix within Print Systems (\$31 million), and lower volumes within Consumer and Film (\$33 million). Offsetting these declines were lower costs across all segments (\$68 million), primarily due to lower depreciation expense in Consumer and Film and Print Systems. See segment discussions for additional details.

Gross profit for 2015 included a \$9 million favorable impact from the reduction of an accrual due to the change in U.S. vacation benefits.

#### Selling, General and Administrative Expenses

The decrease in consolidated selling, general and administrative expenses from 2015 to 2016 was primarily due to cost reduction actions and the favorable impact of pension and OPEB income (\$14 million). The decrease in consolidated selling, general and administrative expenses from 2014 to 2015 was mainly due to cost reduction actions.

#### Research and Development Costs

Consolidated R&D expenses decreased \$4 million in 2016 as compared with the prior year period as the company focused investment in material science projects and eliminated programs that no longer aligned with this strategy. The decrease in consolidated R&D expenses in 2015 was primarily due to focusing development activities on prioritized projects and certain products reaching or completing the commercialization phase.

#### Restructuring Costs and Other

These costs, as well as the restructuring costs reported in Cost of revenues, are discussed under the "RESTRUCTURING COSTS AND OTHER" section in this MD&A.

#### Other Operating Expense, Net

For details, refer to Note 12, "Other Operating Expense, Net."

#### Other Charges, Net

For details, refer to Note 13, “Other Charges, Net.”

Reorganization Items, Net

For details, refer to Note 25, “Reorganization Items, Net.”

Provision for Income Taxes

For details, refer to Note 14, “Income Taxes”

Discontinued Operations

Discontinued operations of Kodak include the PROSPER Enterprise Inkjet business and the PI/DI Business. Refer to Note 26, “Discontinued Operations” in the Notes to Financial Statements for additional information.

36

---

## PRINT SYSTEMS SEGMENT

	Year Ended December 31,				
	2016	2015	\$ Change	2014	\$ Change
Revenues	\$1,018	\$1,106	\$ (88 )	\$1,257	\$ (151 )
Operational EBITDA	105	99	6	94	5
Operational EBITDA as a % of revenues	10 %	9 %		7 %	

## Revenues

## Current Year

The decrease in Print Systems revenues of approximately \$88 million reflected lower pricing in Prepress consumables (\$42 million) as a result of competitive pressures in the industry, lower volume in Prepress consumables (\$15 million), and lower volume in Electrophotographic Printing Solutions (\$22 million) driven by fewer equipment placements and declines in consumables and service.

## Prior Year

The decrease in Print Systems revenues of approximately \$151 million reflected unfavorable currency rates (\$107 million) and consumables pricing declines within Prepress Solutions (\$31 million) as a result of competitive pressures in the industry. Also contributing to the decline was unfavorable volume within Electrophotographic Printing Solutions driven by lower demand for annuities (\$11 million).

## Operational EBITDA

## Current Year

The increase in Print Systems Operational EBITDA of approximately \$6 million was driven by manufacturing costs improvements in Prepress consumables due to lower aluminum costs (\$28 million) and improved manufacturing efficiency (\$22 million) driven by the closure of the Leeds, England plant at the end of August 2015. Also contributing to the improvement was lower SG&A (\$6 million) due to cost reductions. Offsetting these improvements were pricing declines in Prepress consumables (\$42 million) as a result of competitive pricing pressures in the industry, volume declines in Electrophotographic Printing Solutions (\$3 million), lower volumes in Prepress Solutions (\$3 million) and pricing declines in Electrophotographic Printing Solutions (\$3 million).

## Prior Year

Print Systems Operational EBITDA increased approximately \$5 million as SG&A cost reductions (\$38 million) and improved manufacturing efficiency (\$14 million) driven by the exit of the Leeds manufacturing facility more than offset the impact of consumables pricing declines within Prepress Solutions (\$31 million), unfavorable currency rates (\$9 million), and unfavorable aluminum pricing (\$9 million).

## MICRO 3D PRINTING AND PACKAGING SEGMENT

Edgar Filing: EASTMAN KODAK CO - Form 10-K

	Year Ended December 31,				
	2016	2015	\$ Change	2014	\$ Change
Revenues	\$132	\$128	\$ 4	\$130	\$ (2 )
Operational EBITDA	12	11	1	—	11
Operational EBITDA as a % of revenues	9%	9 %		0 %	

Revenues

Current Year

The increase in Micro 3D Printing and Packaging revenues of approximately \$4 million primarily reflected volume improvements in Packaging consumables (\$12 million) due to a larger installed base of FLEXCEL NX systems driving growth in revenues from FLEXCEL NX consumables, and higher Packaging unit placements (\$2 million). Partially offsetting these improvements were declining revenues from legacy products (\$3 million), unfavorable Packaging equipment product mix (\$1 million), and unfavorable foreign currency rates (\$4 million).

Prior Year

The decrease in Micro 3D Printing and Packaging revenues of approximately \$2 million was driven by unfavorable currency rates (\$14 million). This decrease was partially offset by volume improvements within Packaging (\$13 million) primarily due to a larger installed base of FLEXCEL NX systems driving growth in revenues from FLEXCEL NX consumables.

## Operational EBITDA

## Current Year

Micro 3D Printing and Packaging Operational EBITDA increased by approximately \$1 million as improved gross profit in Packaging driven by higher volume of FLEXCEL NX consumables (\$7 million), cost improvements in Micro 3D Printing (\$2 million), and other individually less significant improvements, were offset by unfavorable currency rates (\$7 million). The prior year included a gain related to assets that were acquired for no monetary consideration as part of the termination of the relationship with Unipixel (\$3 million).

## Prior Year

The \$11 million improvement in the Micro 3D Printing and Packaging Operational EBITDA was due to higher volume within Packaging (\$8 million) driven by increased sales of FLEXCEL NX consumables, as well as increased manufacturing efficiency (\$1 million) within Packaging. These improvements were partially offset by unfavorable currency rates (\$4 million). Also included in Operational EBITDA is a gain related to assets that were acquired for no monetary consideration as a part of the termination of the relationship with Unipixel (\$3 million).

## SOFTWARE AND SOLUTIONS SEGMENT

	Year Ended December 31,				
	2016	2015	\$ Change	2014	\$ Change
Revenues	\$86	\$112	\$ (26 )	\$108	\$ 4
Operational EBITDA	4	9	\$ (5 )	3	\$ 6
Operational EBITDA as a % of revenues	5 %	8 %		3 %	

## Revenues

## Current Year

The decrease in Software and Solutions revenues of approximately \$26 million primarily reflected volume declines in Kodak Technology Solutions due to lower revenues from government contracts (\$17 million), the divestiture of the Design2Launch and brand protection businesses in the second quarter of the current year (\$5 million), lower volume in Unified Workflow Solutions (\$3 million) and unfavorable currency rates (\$2 million).

## Prior Year

The increase in Software and Solutions revenues of approximately \$4 million reflected volume improvements within Kodak Technology Solutions (\$15 million) primarily due to higher revenues from government contracts. Partially offsetting this improvement were unfavorable currency rates (\$9 million) and volume declines in Unified Workflow Solutions (\$2 million).

## Operational EBITDA

## Current Year

The decrease in Software and Solutions Operational EBITDA of approximately \$5 million primarily reflected the volume declines in Kodak Technology Solutions described above (\$5 million) and lower volume in Unified Workflow Solutions (\$1 million). Partially offsetting these declines were favorable impacts from divesting the Design2Launch and brand protection businesses in the second quarter of the current year (\$3 million).

Prior Year

The \$6 million improvement in the Software and Solutions Operational EBITDA was due to cost improvements within Unified Workflow Solutions (\$3 million) due to increased efficiency, as well as SG&A cost reductions (\$3 million) and volume improvements within Kodak Technology Solutions (\$2 million) primarily due to higher revenues from government contracts. Partially offsetting these improvements were unfavorable currency rates (\$3 million).

CONSUMER AND FILM SEGMENT

	Year Ended December 31,				
	2016	2015	\$ Change	2014	\$ Change
Revenues	\$216	\$265	\$ (49 )	\$352	\$ (87 )
Operational EBITDA	16	52	\$ (36 )	66	\$ (14 )
Operational EBITDA as a % of revenues	7 %	20 %		19 %	

Revenues

Current Year

The decrease in Consumer and Film revenues of approximately \$49 million reflected volume declines in Consumer Inkjet Systems (\$30 million) driven by lower sales of ink to the existing installed base of printers and in Motion Picture, Industrial Chemicals and Films (\$20 million) due to declining demand for film products. Also contributing to the decline were lower revenues from brand licensing (\$4 million) and unfavorable currency rates (\$3 million). Partially offsetting these decreases were the favorable impact from a significant industrial films order (\$7 million) and the fulfillment of motion picture film volume commitments (\$3 million).

Prior Year

The decrease in Consumer and Film revenues of approximately \$87 million reflected volume declines within Consumer Inkjet Systems (\$47 million) driven by lower sales of ink to the existing installed base of printers and within Motion Picture, Industrial Chemicals and Films (\$35 million) due to declining demand for film products. Also contributing to the decrease are unfavorable currency rates (\$6 million).

Included in 2015 revenues was \$6 million from a brand licensing arrangement that was amended in the current year. The amendment eliminates a requirement for the licensee to pay quarterly royalties through the end of 2018 in return for an upfront payment.

Operational EBITDA

Current Year

The \$36 million decrease in the Consumer and Film Operational EBITDA was driven by the volume declines in Consumer Inkjet Systems as mentioned above (\$24 million), as well as unfavorable costs in Motion Picture, Industrial Chemicals and Films (\$12 million) primarily due to lower production volume. Also contributing were higher R&D costs (\$6 million) due to increased investment in the Super 8 camera, lower revenues from brand licensing (\$4 million), and unfavorable currency rates (\$3 million). Partially offsetting these decreases were the favorable impact from a significant industrial films order (\$6 million), the fulfillment of motion picture film volume commitments (\$3 million) and lower costs in Consumer Inkjet (\$2 million).

Prior Year

The \$14 million decrease in the Consumer and Film Operational EBITDA was mainly due to the impact of lower consumer ink sales (\$38 million) and unfavorable currency rates (\$5 million). These items were offset by lower SG&A costs (\$14 million) driven by cost reduction actions, favorable price and mix in Motion Picture, Industrial Chemicals and Films (\$9 million) due to a shift in sales to higher margin products as well as price increases, and lower manufacturing costs (\$4 million) due to increased efficiency and improved inventory management.

As discussed above, 2015 included \$6 million from a non-recurring brand licensing payment.

ENTERPRISE INKJET SYSTEMS SEGMENT

	Year Ended December 31,				
	2016	2015	\$ Change	2014	\$ Change
Revenues	\$76	\$84	\$ (8 )	\$115	\$ (31 )

Operational EBITDA	19	20	\$ (1 )	35	\$ (15 )
Operational EBITDA as a % of revenues	25%	24%		30%	

Revenues

Current Year

The decrease in Enterprise Inkjet Systems revenues of approximately \$8 million primarily reflected lower volumes of service and consumables (\$6 million) due to expected declines in the installed base of VERSAMARK systems and components, as well as fewer equipment placements (\$2 million).

Prior Year

The decrease in Enterprise Inkjet Systems revenues of approximately \$31 million primarily reflected volume declines in service and consumables (\$13 million) due to declines in the installed base of VERSAMARK systems and components, as well as lower equipment revenues (\$7 million) primarily due to fewer placements of components. Also contributing to the decrease was unfavorable currency rates (\$9 million).

## Operational EBITDA

## Current Year

The decrease in Enterprise Inkjet Systems Operational EBITDA of \$1 million was primarily driven by the volume declines discussed above. Costs are being managed to maximize Operational EBITDA during the expected revenue declines.

## Prior Year

The decrease in Enterprise Inkjet Systems Operational EBITDA of \$15 million was driven by unfavorable costs (\$8 million) due to lower scale as the category declines, and lower revenues (\$6 million) across the product portfolio as discussed above. Also contributing to the decrease was unfavorable currency rates (\$6 million). Partially offsetting these decreases was lower SG&A (\$5 million) due to cost reduction actions.

## INTELLECTUAL PROPERTY SOLUTIONS SEGMENT

	Year Ended December 31,				
	2016	2015	\$ Change	2014	\$ Change
Revenues	\$—	\$1	\$ (1 )	\$ 70	\$ (69 )
Operational EBITDA	(14)	(22)	\$ 8	40	\$ (62 )
Operational EBITDA as a % of revenues	N/M	N/M		57 %	

## Current Year

Intellectual Property Solutions Operational EBITDA improved approximately \$8 million due to lower R&D costs as the company focused investment in materials science projects and eliminated programs that no longer aligned with this strategy. R&D not directly related to other segments is included in the Intellectual Property Solutions segment.

## Prior Year

Revenues in the Intellectual Property Solutions segment declined \$69 million in 2015 compared to the prior year period due to lower revenues from non-recurring intellectual property licensing arrangements. Operating expenses declined by \$7 million in 2015 from the prior year period primarily due to focusing R&D development activities on prioritized projects.

## EASTMAN BUSINESS PARK SEGMENT

Eastman Business Park revenue and Operational EBITDA did not change significantly in the reporting period.

## RESTRUCTURING COSTS AND OTHER

## 2016

Restructuring actions taken in 2016 were initiated to reduce Kodak's cost structure as part of its commitment to drive sustainable profitability and included actions associated with the exit of Kodak's silver metal mesh touch screen development, continued progress toward the Leeds plate manufacturing facility exit, as well as various targeted reductions in manufacturing, service, sales, research and development and other administrative functions.

As a result of these actions, for the year ended December 31, 2016 Kodak recorded \$16 million of charges, including \$1 million of charges for inventory write-downs which were reported in Cost of revenues and \$15 million which was reported as Restructuring costs and other in the accompanying Consolidated Statement of Operations.

The Company made cash payments related to restructuring of approximately \$16 million for the year ended December 31, 2016.

The restructuring actions implemented in 2016 are expected to generate future annual cash savings of approximately \$18 million. These savings are expected to reduce future annual Cost of revenues, SG&A and R&D expenses by \$7 million, \$9 million and \$2 million, respectively. Kodak expects the majority of the annual savings to be in effect by the end of 2017 as actions are completed.

#### Leeds Plate Manufacturing Facility Exit

On March 3, 2014, Kodak announced a plan to exit its prepress plate manufacturing facility located in Leeds, England. This decision was pursuant to Kodak's initiative to consolidate manufacturing operations globally, and is expected to result in a more efficient delivery of its products and solutions. Kodak began the exit of the facility in the second quarter of 2014, phased out production at the site in the third quarter of 2015 and has substantially completed the exit of the facility.

On a cumulative basis as of December 31, 2016, Kodak has recorded severance charges of \$10 million, long-lived asset impairment charges of \$3 million, accelerated depreciation charges of \$10 million, and other exit costs of \$2 million.

2015

For the year ended December 31, 2015 Kodak recorded \$46 million of charges, including \$8 million for accelerated depreciation which was reported in Cost of sales, \$37 million which was reported as Restructuring costs and other and \$1 million which was reported in (Loss) earnings from discontinued operations in the accompanying Consolidated Statement of Operations.

2014

For the year ended December 31, 2014 Kodak recorded \$61 million of charges, including \$2 million for accelerated depreciation which was reported in Cost of revenues, \$56 million which was reported as Restructuring costs and other and \$3 million which was reported in (Loss) earnings from discontinued operations in the accompanying Consolidated Statement of Operations.

#### Prosper Business Cost Reduction

On January 12, 2017, Kodak announced an action to streamline costs in its Prosper business while the process of selling the business continues. This action is pursuant to Kodak's initiative to focus the Prosper business on developing next generation Ultrastream technology with solutions that place writing systems in original equipment manufacturer and hybrid applications and the continued placement of Prosper 6000 presses and components in suitable high volume applications.

As a result of this decision, Kodak currently expects to incur total restructuring and related charges of \$12-\$17 million, including \$5-\$7 million of charges related to separation benefits, \$5-\$6 million of non-cash related charges for inventory write-downs, \$2-\$3 million of non-cash related charges for asset write-offs and up to \$1 million in other cash related charges associated with this action. The restructuring and related charges incurred will be reported in discontinued operations. Kodak estimates that approximately \$3-\$5 million of the total charges for separation benefits will require cash expenditures and that the remainder will be provided in the form of special termination benefits from Kodak's defined benefit pension plans.

#### LIQUIDITY AND CAPITAL RESOURCES

2016

	As of December 31,	
(in millions)	2016	2015
Cash and cash equivalents	\$433	\$546

#### Cash Flow Activity

(in millions)	Year Ended December 31,		Year-Over-Year
	2016	2015	Change
<b>Cash flows from operating activities:</b>			
Net cash used in operating activities	\$(13 )	\$(95 )	\$ 82
<b>Cash flows from investing activities:</b>			
Net cash used in investing activities	(21 )	(51 )	30
<b>Cash flows from financing activities:</b>			
Net cash used in financing activities	(72 )	(1 )	(71 )
Effect of exchange rate changes on cash	(7 )	(18 )	11
Net decrease in cash and cash equivalents <sup>(1)</sup>	\$(113)	\$(165)	\$ 52

<sup>(1)</sup>The ending cash and cash equivalents balance for the years ended December 31, 2016 and 2015 in the cash flow activity above included \$433 million and \$546 million, respectively, of cash reported in the Statement of Financial Position and \$1 million of cash for each year reported in Current assets held for sale.

#### Operating Activities

Net cash used in operating activities improved by \$82 million for the year ended December 31, 2016 as compared with the prior year primarily due to improved earnings, which includes the \$10 million in net litigation proceeds from DuPont, as well as increased cash provided from declines in accounts receivable and inventory and lower levels of liabilities as Kodak's size declines.

#### Investing Activities

Net cash used in investing activities improved \$30 million for the year ended December 31, 2016 as compared to the prior year primarily due to the net release of restricted cash in the current year, as a result of the lower Excess Availability requirement in the Amended Credit Agreement entered

into in 2016 (Refer to Note 8, “Debt and Capital Leases”), as compared to the net funding of restricted cash in the prior year to support the Company’s borrowing base. The current year also included increased proceeds from the sales of businesses/assets. Partially offsetting the favorable impacts was the \$3 million reduction in cash due to the deconsolidation of RED.

#### Financing Activities

Net cash used in financing activities increased \$71 million in the year ended December 31, 2016 as compared to the prior year primarily due to repayments of emergence credit facilities partially offset by proceeds from the issuance of preferred stock and from equity transactions with non- controlling interests.

#### Sources of Liquidity

Available liquidity includes cash balances and the unused portion of the Amended and Restated Credit Agreement (the “Amended Credit Agreement”). The Amended Credit Agreement had \$20 million of net availability as of December 31, 2016. The amount of available liquidity is subject to fluctuations and includes cash balances held by various entities worldwide. At December 31, 2016 and 2015, approximately \$205 million and \$302 million, respectively, of cash and cash equivalents were held within the U.S. and approximately \$229 million and \$245 million, respectively, of cash and cash equivalents were held outside the U.S. Cash balances held outside of the U.S. are generally required to support local country operations, may have high tax costs, or other limitations that delay the ability to repatriate, and therefore may not be readily available for transfer to other jurisdictions. Additionally, in China, where approximately \$138 million of cash and cash equivalents were held as of December 31, 2016, there are limitations related to net asset balances that impact the ability to make cash available to other jurisdictions in the world. Under the terms of the Senior Secured First Lien Term Credit Agreement (the “Term Credit Agreement”) and the Amended Credit Agreement (together with the Term Credit Agreement, the “Credit Agreements”), the Company is permitted to invest up to \$100 million at any time in subsidiaries and joint ventures that are not party to the loan agreement.

Kodak had funded \$25 million to the Eligible Cash account held with the Amended Credit Agreement and Amended Credit Agreement Administrative Agents as of December 31, 2016, and \$30 million to the Eligible Cash account held with the prior Asset Based Revolving Credit Agreement (the “Prior Credit agreement”) and the Prior Credit Agreement Administrative Agents as of December 31, 2015, which is classified as Restricted cash in the Consolidated Statement of Financial Position, supporting the Excess Availability amount. An additional \$5 million was funded to the Eligible Cash account on January 3, 2017. Under the Amended Credit Agreement, if Excess Availability (\$20 million as of December 31, 2016) falls below 12.5% of lender commitments (\$18.75 million as of December 31, 2016), Kodak may, in addition to the requirement to be in compliance with a minimum Fixed Charge Coverage Ratio, become subject to cash dominion control. Kodak intends to continue to maintain Excess Availability above the minimum threshold which may require additional funding of Eligible Cash. In addition to Eligible Cash, the borrowing base is supported by Eligible Receivables, Eligible Inventory and Eligible Equipment, including assets associated with Kodak’s Prosper business that are classified as held for sale in the Consolidated Statement of Financial Position. To the extent the assets supporting the borrowing base decline, including upon the sale of Prosper, if the remaining assets included in the borrowing base are not sufficient to support the required Excess Availability amount, additional funding of Eligible Cash may be required. Since Excess Availability was greater than 12.5% of lenders commitments Kodak is not required to have a minimum Fixed Charge Coverage Ratio of 1.0 to 1.0. As of December 31, 2016, Kodak is in compliance with all covenants under the Amended Credit Agreement and had Kodak been required to have a Fixed Charge Coverage Ratio of 1.0 to 1.0 EBITDA, as defined in the Amended Credit agreement, exceeded Fixed Charges by approximately \$29 million.

Under the terms of the Term Credit Agreement, Kodak is required to maintain a Secured Leverage Ratio not to exceed specified levels. The Secured Leverage Ratio is tested at the end of each quarter based on the prior four quarters and is generally determined by dividing secured debt, net of U.S. cash and cash equivalents, by consolidated EBITDA, as

calculated under the credit agreement. The maximum Secured Leverage Ratio permitted under the Term Credit Agreement is 2.75 to 1. As of December 31, 2016, Kodak's EBITDA, as calculated under the Term Credit Agreement, exceeded the EBITDA necessary to satisfy the covenant ratios by approximately \$81 million.

On November 15, 2016, Kodak issued 2 million shares of 5.50% Series A Convertible Preferred Stock for an aggregate price of \$200 million. The holders of the Series A Preferred Stock are entitled to cumulative dividends payable quarterly in cash at a rate of 5.50% per annum. Kodak used the net proceeds from the sale of the Series A Preferred Stock, together with cash on hand, to prepay the full principal amount of \$262 million plus accrued interest, fees and other expenses owed to the lenders under the Second Lien Term Credit Agreement. With the issuance of Series A Preferred Stock and the termination of the Second Lien Term Credit Agreement, the Company replaced \$262 million of debt with a weighted average interest rate of 11.04% with \$200 million of Series A Convertible Preferred Stock with cumulative dividends at a rate of 5.50%, lowering future interest expense and associated cash outflows. In addition, the reduction in secured debt had a positive impact on the Secured Leverage Ratio.

Kodak intends to conduct its operations in a manner that will result in continued compliance with the secured leverage ratio covenant; however, future compliance may depend on Kodak undertaking one or more non-operational transactions, such as a monetization of assets, a debt refinancing, the raising of equity capital, or a similar transaction. If Kodak is unable to remain in compliance and does not make alternate arrangements with its term lenders, an event of default would occur under Kodak's credit agreements which, among other remedies, would entitle the lenders or their agents to declare the outstanding obligations under the Term Credit Agreement to be immediately due and payable.

Kodak made contributions (funded plans) or paid net benefits (unfunded plans) totaling approximately \$17 million relating to its defined benefit pension and postretirement benefit plans in 2016. For 2017, the forecasted contribution (funded plans) and net benefit payment (unfunded plans) requirements for its defined benefit pension and postretirement plans are approximately \$15 million.

Cash flows from investing activities included \$41 million for capital expenditures for the year ended December 31, 2016, including \$18 million that occurred in RED, the utilities VIE that was deconsolidated at the end of 2016. Kodak expects approximately \$30 million to \$35 million of cash flows for investing activities from capital expenditures for the year ended December 31, 2017.

Kodak believes that its liquidity position is adequate to fund its operating and investing needs and to provide the flexibility to respond to further changes in the business environment. See Item 1A. "Risk Factors" for a discussion of potential challenges to liquidity.

Refer to Note 8, "Debt and Capital Leases," and Note 18, "Redeemable, Convertible Series A Preferred Stock" in the Notes to Financial Statements for further discussion of long-term debt and convertible preferred shares.

#### Contractual Obligations

The impact that contractual obligations are expected to have on Kodak's cash flow in future periods is as follows:

(in millions)	As of December 31, 2016						
	Total	2017	2018	2019	2020	2021	2022+
Long-term debt <sup>(1)</sup>	\$402	\$2	\$4	\$396	\$—	\$—	\$—
Interest payments on debt <sup>(2)</sup>	101	34	33	26	4	4	—
Capital lease obligations <sup>(3)</sup>	9	3	3	1	—	—	2
Operating lease obligations	87	26	21	14	13	3	10
Purchase obligations <sup>(4)</sup>	14	8	4	2	—	—	—
Preferred stock dividends <sup>(3) (9)</sup>	55	10	11	11	11	12	—
Total <sup>(5) (6) (7) (8)</sup>	\$668	\$83	\$76	\$450	\$28	\$19	\$12

<sup>(1)</sup>Primarily represents the maturity values of Kodak's long-term debt obligations as of December 31, 2016. Annual amounts represent the minimum principal payments owed each year. The contractual obligations do not reflect any contingent mandatory annual principal repayments that may be required to be made upon achieving certain excess cash flow targets, as defined in the Term Credit Agreements. Other prepayments may be required upon the occurrences of certain other events. Refer to Note 8, "Debt and Capital Leases" in the Notes to Financial Statements.

<sup>(2)</sup>Also includes commitment fees for the Amended Credit Agreement.

<sup>(3)</sup>Capital lease obligations and Preferred stock dividends were added to contractual obligations in this Form 10-K.

<sup>(4)</sup>Purchase obligations include agreements related to raw materials, supplies, production and administrative services, as well as marketing and advertising, that are enforceable and legally binding on Kodak and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty.

<sup>(5)</sup>Due to uncertainty regarding the completion of tax audits and possible outcomes, an estimate of the timing of payments related to uncertain tax positions and interest cannot be made. See Note 14, "Income Taxes," in the Notes to Financial Statements for additional information regarding Kodak's uncertain tax positions.

<sup>(6)</sup>Funding requirements for Kodak's major defined benefit retirement plans and other postretirement benefit plans have not been determined, therefore, they have not been included.

<sup>(7)</sup>Because timing of their future cash outflows are uncertain, the other long-term liabilities presented in Note 7, "Other Long-Term Liabilities," in the Notes to Financial Statements are excluded from this table.

- <sup>(8)</sup>On September 3, 2013, Kodak consummated the sale of certain assets of the PI/DI Business to the KPP Purchasing Parties. Up to \$35 million in aggregate of the purchase price is subject to repayment to the KPP Purchasing Parties if the PI/DI Business does not achieve certain annual adjusted EBITDA targets over the four-year period ending December 31, 2018. The PI/DI Business did not achieve the annual adjusted EBITDA targets for the year ending December 31, 2015. As a result, \$4 million of the purchase price, representing the maximum amount that could be owed for 2015, was repaid to the KPP Purchasing Parties. The maximum amount that could be owed in each year of the remaining three-year period is as follows: \$7 million in 2017, \$10 million in 2018 and \$14 million in 2019. Due to uncertainty regarding the level of annual adjusted EBITDA for the PI/DI Business, no payments have been included in the table. Refer to Note 26, “Discontinued Operations.”
- <sup>(9)</sup>On November 15, 2016, the Company issued 2,000,000 shares of 5.50% Series A Convertible Preferred Stock, no par value per share (the “Series A Preferred Stock”), for an aggregate purchase price of \$200 million, or \$100 per share pursuant to a Series A Preferred Stock Purchase Agreement. The Series A Preferred Stock has a liquidation preference of \$100 per share, and the holders of Series A Preferred Stock are entitled to cumulative dividends payable quarterly in cash at a rate of 5.50% per annum. If holders of the Series A Preferred stock convert their shares into common stock, dividends will decrease. The Company is required to redeem all shares not converted prior to the fifth anniversary of the initial issuance at \$100 per share plus the amount of any accrued and unpaid dividends. Due to uncertainty regarding the number of shares that will be redeemed, the redemption has not been included in the above table.

Off-Balance Sheet Arrangements

EKC guarantees obligations to third parties for some of its consolidated subsidiaries. The maximum amount guaranteed is \$13 million and the outstanding amount for those guarantees is \$5 million.

In connection with the settlement of certain of the Company's historical environmental liabilities at EBP and in accordance with the terms of the associated settlement agreement ("Amended EBP Settlement Agreement"), in the event the historical EBP liabilities exceed \$99 million, the Company will become liable for 50% of the portion above \$99 million with no limitation to the maximum potential future payments. There is no liability recorded related to this guarantee.

Kodak issues indemnifications in certain instances when it sells businesses and real estate, and in the ordinary course of business with its customers, suppliers, service providers and business partners. Further, the Company indemnifies its directors and officers who are, or were, serving at the Company's request in such capacities. Historically, costs incurred to settle claims related to these indemnifications have not been material to Kodak's financial position, results of operations or cash flows. Additionally, the fair value of the indemnifications that Kodak issued during the year ended December 31, 2016 was not material to Kodak's financial position, results of operations or cash flows.

2015

Cash Flow Activity

	As of December 31,	
(in millions)	2015	2014
Cash and cash equivalents	\$546	\$712

Cash Flow Activity

(in millions)	Year Ended December 31,		
	2015	2014	Year-Over-Year Change
Cash flows from operating activities:			
Net cash used in operating activities	\$(95 )	\$(128 )	\$ 33
Cash flows from investing activities:			
Net cash (used in) provided by investing activities	(51 )	41	\$ (92 )
Cash flows from financing activities:			
Net cash used in financing activities	(1 )	(7 )	\$ 6
Effect of exchange rate changes on cash	(18 )	(38 )	\$ 20
Net decrease in cash and cash equivalents <sup>(1)</sup>	\$(165 )	\$(132 )	\$ (33 )

(1)

The ending cash and cash equivalents balance for the year ended December 31, 2015 in the cash flow activity above included \$546 million of cash reported in the Statement of Financial Position and \$1 million of cash reported in Current assets held for sale. There was no cash reported in Current assets held for sale for the year ending December 31, 2014.

#### Operating Activities

Net cash used in operating activities improved by \$33 million for the year ended December 31, 2015 as compared with the prior year. The impact of less cash provided by reductions in accounts receivable was more than offset by less cash used to settle accounts payable and employee liabilities in the current year. Additionally, the prior year included a \$49 million payment to settle certain of the Company's historical environmental liabilities at Eastman Business Park. Those items and the benefit of cost reductions realized in the current year were partially offset by \$70 million in intellectual property revenue in the prior year.

#### Investing Activities

Net cash used in investing activities increased \$92 million for the year ended December 31, 2015 as compared with the prior year primarily due to the liquidity provided by the net release of restricted cash in the prior year and the incremental consideration received from the KPP Purchasing Parties in 2014.

#### Financing Activities

Net cash used in financing activities decreased \$6 million for the year ended December 31, 2015 as compared to the prior year due to the year over year increase of \$4 million from net proceeds from other credit facilities and lower equity transactions with noncontrolling interest of \$3 million in the current year.

## SUMMARY OF OPERATING DATA

A summary of operating data for 2016 and for the four years prior is shown in Item 6.

### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Kodak, as a result of its global operating and financing activities, is exposed to changes in foreign currency exchange rates, commodity prices, and interest rates, which may adversely affect its results of operations and financial position. In seeking to minimize the risks associated with such activities, Kodak may enter into derivative contracts. Kodak does not utilize financial instruments for trading or other speculative purposes. Foreign currency forward contracts are used to hedge existing foreign currency denominated assets and liabilities, especially those of Kodak's International Treasury Center, as well as forecasted foreign currency denominated intercompany sales. Kodak's exposure to changes in interest rates results from its investing and borrowing activities used to meet its liquidity needs. Long-term debt is generally used to finance long-term investments, while short-term debt is used to meet working capital requirements.

Using a sensitivity analysis based on estimated fair value of open foreign currency forward contracts using available forward rates, if the U.S. dollar had been 10% stronger at December 31, 2016 and 2015, the fair value of open forward contracts would have decreased \$20 million and \$16 million, respectively. Such changes in fair value would be substantially offset by the revaluation or settlement of the underlying positions hedged.

Kodak is exposed to interest rate risk primarily through its borrowing activities. Kodak may utilize borrowings to fund its working capital and investment needs. The majority of short-term and long-term borrowings are in variable-rate instruments. There is inherent roll-over risk for borrowings as they mature and are renewed at current market rates. The extent of this risk is not predictable because of the variability of future interest rates and business financing requirements.

Kodak's borrowings under the First Lien Term Credit Agreement are in variable-rate instruments with an interest rate floor. See Note 8, "Debt and Capital Leases" in the Notes to Financial Statements. At December 31, 2016 and 2015, the one-month LIBOR rate was approximately 0.77% and 0.43%, respectively. If the LIBOR rate was to rise above the 1% floor, interest expense would increase approximately \$4 million for each 1% of LIBOR above the floor (\$402 million face amount of debt times 1% at December 31, 2016).

Kodak's financial instrument counterparties are high-quality investment or commercial banks with significant experience with such instruments. Kodak manages exposure to counterparty credit risk by requiring specific minimum credit standards and diversification of counterparties. Kodak has procedures to monitor the credit exposure amounts. The maximum credit exposure at December 31, 2016 was not significant to Kodak.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Eastman Kodak Company

In our opinion, the accompanying consolidated statements of financial position and the related consolidated statements of operations, of comprehensive income, of equity (deficit), and of cash flows present fairly, in all material respects, the financial position of Eastman Kodak Company and its subsidiaries at December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule of valuation and qualifying accounts appearing under Item 15 for each of the three years in the period ended December 31, 2016 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for deferred income taxes in 2016.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have

a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Income taxes (net of refunds)	24	12	14

The accompanying notes are an integral part of these consolidated financial statements.

EASTMAN KODAK COMPANY

NOTES TO FINANCIAL STATEMENTS

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ACCOUNTING PRINCIPLES

The consolidated financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The following is a description of the significant accounting policies of Kodak.

BASIS OF CONSOLIDATION

The consolidated financial statements include the accounts of EKC and all companies directly or indirectly controlled by EKC, either through majority ownership or otherwise. Kodak consolidates variable interest entities if Kodak has a controlling financial interest and is determined to be the primary beneficiary of the entity.

In 2013, Kodak sold certain utilities and related facilities and entered into utilities supply and servicing arrangements with RED – Rochester, LLP (“RED”), a variable interest entity (“VIE”). Kodak determined it was the primary beneficiary and consolidated the financial statements of the VIE. In September 2016, RED’s parent, RED Investment, LLC and its portfolio of four U.S. facilities (including RED) were acquired. During the fourth quarter of 2016, RED’s parent increased its equity investment in RED in conjunction with RED’s project to replace and convert its coal-fired boilers by installing new steam generating equipment to achieve compliance with EPA air emissions regulations (“MACT Upgrade”). With the third quarter change in ownership, the reduction in certain rights and obligations of Kodak, the increase in equity and progress towards completion of the MACT Upgrade, Kodak determined it was no longer the primary beneficiary and RED was deconsolidated. Upon deconsolidation, Kodak derecognized all assets and liabilities of RED and recognized a loss of \$15 million, representing the difference between the carrying value of the net assets sold to RED and RED’s equity in those assets. The loss is reported in Other operating expense, net in the Consolidated Statement of Operations. RED’s results of operations are reflected in net income attributable to non-controlling interest in the accompanying Consolidated Statement of Operations through December 31, 2016 at which point the VIE was deconsolidated.

USE OF ESTIMATES

The preparation of financial statements in conformity with U.S. GAAP accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of commitments and contingencies at year end, and the reported amounts of revenues and expenses during the reporting periods presented. Actual results could differ from these estimates.

FOREIGN CURRENCY

For most subsidiaries and branches outside the U.S., the local currency is the functional currency. The financial statements of these subsidiaries and branches are translated into U.S. dollars as follows: assets and liabilities at year-end exchange rates; revenue, expenses and cash flows at average exchange rates; and shareholders’ equity at historical exchange rates. For those subsidiaries for which the local currency is the functional currency, the resulting translation adjustment is recorded as a component of Accumulated other comprehensive loss in the accompanying Consolidated Statement of Financial Position. Translation adjustments related to investments that are permanent in nature are not tax-effected.

For certain other subsidiaries and branches outside the U.S., operations are conducted primarily in U.S. dollars, which is therefore the functional currency. Monetary assets and liabilities of these foreign subsidiaries and branches, which are recorded in local currency, are remeasured at year-end exchange rates, while the related revenue, expense, and gain and loss accounts, which are recorded in local currency, are remeasured at average exchange rates. Non-monetary assets and liabilities, and the related revenue, expense, and gain and loss accounts, are remeasured at historical exchange rates. Adjustments that result from the remeasurement of the assets and liabilities of these subsidiaries are included in Other charges, net in the accompanying Consolidated Statement of Operations.

The effects of foreign currency transactions, including related hedging activities, are included in Other charges, net, in the accompanying Consolidated Statement of Operations.

#### Venezuela Currency

Kodak has accounted for the Venezuelan economy as highly inflationary since 2010. Accordingly, Kodak's Venezuelan subsidiary uses the U.S. dollar as its functional currency, and monetary assets and liabilities denominated in BsF generate income or expense for changes in value associated with foreign currency exchange rate fluctuations against the U.S. dollar. Kodak's Venezuelan subsidiary does not have ongoing trading activity.

The Venezuelan government ("Government") has foreign currency exchange controls, which provide different exchange mechanisms that impact the Company's ability to convert its BsF denominated monetary assets to U.S. dollars. During 2014, the Government launched a new currency exchange mechanism. The Company began translating its BsF denominated net monetary assets at the rates determined in this market resulting in a loss of \$16 million reported in Other charges, net in the Consolidated Statement of Operations in the year ended December 31, 2014.

In 2015 and 2016, the Government introduced additional exchange mechanisms. As a result of the changes, Kodak recorded charges of \$0 million and \$2 million in the years ending December 31, 2016 and 2015, respectively.

As of December 31, 2016 and 2015, Kodak's Venezuelan subsidiary had less than \$1 million and approximately \$1 million, respectively, of BsF denominated net monetary assets, composed primarily of cash and cash equivalents.

#### CONCENTRATION OF CREDIT RISK

Financial instruments that potentially subject Kodak to significant concentrations of credit risk consist principally of cash and cash equivalents, receivables, restricted cash and derivative instruments. Kodak places its cash, cash equivalents and restricted cash with high-quality financial institutions and limits the amount of credit exposure to any one institution. With respect to receivables, such receivables arise from sales to numerous customers in a variety of industries, markets, and geographies around the world. Receivables arising from these sales are generally not collateralized. Kodak performs ongoing credit evaluations of its customers' financial conditions, and maintains reserves for potential credit losses and such losses, in the aggregate, have not exceeded management's expectations. Counterparties to the derivative instrument contracts are major financial institutions. Kodak has not experienced non-performance by any of its derivative instruments counterparties.

#### CASH EQUIVALENTS

All highly liquid investments with a remaining maturity of three months or less at date of purchase are considered to be cash equivalents.

#### INVENTORIES

Inventories are stated at the lower of cost or market. The cost of all of Kodak's inventories is determined by the average cost method, which approximates current cost. Kodak provides inventory reserves for excess, obsolete or slow-moving inventory based on changes in customer demand, technology developments or other economic factors.

#### PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are recorded at cost, net of accumulated depreciation. Kodak capitalizes additions and improvements while maintenance and repairs are charged to expense as incurred. Upon sale or other disposition, the applicable amounts of asset cost and accumulated depreciation are removed from the accounts and the net amount, less proceeds from disposal, is charged or credited to net (loss) earnings.

Kodak calculates depreciation expense using the straight-line method over the assets' estimated useful lives, which are as follows:

	Estimated Useful Lives
Buildings and building improvements	5-40
Land improvements	4-20
Leasehold improvements	3-20
Equipment	3-20
Tooling	1-3
Furniture and fixtures	5-10

Kodak depreciates leasehold improvements over the shorter of the lease term or the asset's estimated useful life.

Equipment subject to operating leases is included in Property, plant and equipment, net in the Consolidated Statement of Financial Position. Equipment subject to operating leases consists of equipment rented to customers and is depreciated to estimated salvage value over its expected useful life. Equipment operating lease terms and depreciable lives generally vary from 3 to 7 years.

#### GOODWILL

Goodwill is not amortized, but is required to be assessed for impairment at least annually and whenever events or changes in circumstances occur that would more likely than not reduce the fair value of the reporting unit below its carrying amount.

When testing goodwill for impairment, Kodak may assess qualitative factors for some or all of its reporting units to determine whether it is more likely than not (that is, a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying amount, including goodwill. If Kodak determines based on this qualitative test of impairment that it is more likely than not that a reporting unit's fair value is less than its carrying amount, or elects to bypass the qualitative assessment for some or all of its reporting units, then a two-step goodwill impairment test is performed to test for a potential impairment of goodwill (step 1) and if potential losses are identified, to measure the impairment loss (step 2). Determining the fair value of a reporting unit involves the use of significant estimates and assumptions. Refer to Note 5, "Goodwill and Other Intangible Assets".

## WORKERS' COMPENSATION

Kodak self-insures and participates in high-deductible insurance programs with retention and per occurrence deductible levels for claims related to workers' compensation. The estimated liability for workers' compensation is based on actuarially estimated, discounted cost of claims, including claims incurred but not reported. Historical loss development factors are utilized to project the future development of incurred losses, and the amounts are adjusted based on actual claim experience, settlements, claim development trends, changes in state regulations and judicial interpretations. Refer to Note 6, "Other Current Liabilities" and Note 7, "Other Long-Term Liabilities" for the estimated liabilities. Amounts recoverable from insurance companies or third parties are estimated using historical experience and estimates of future recoveries. Estimated recoveries are not offset against the related accrual. The amount recorded for the estimated recoveries at both December 31, 2016 and 2015 was \$24 million and is reported in Other long-term assets in the Consolidated Statement of Financial Position.

## REVENUE

Kodak's revenue transactions include sales of products (such as components and consumables for use in Kodak and other manufacturers' equipment and film based products); equipment; software; services; integrated solutions; and intellectual property and brand licensing. Kodak recognizes revenue when realized or realizable and earned, which is when the following criteria are met: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred; (3) the sales price is fixed or determinable; and (4) collectability is reasonably assured. At the time revenue is recognized, Kodak provides for the estimated costs of customer incentive programs, warranties and estimated returns and reduces revenue accordingly. For those incentives that require the estimation of sales volumes or redemption rates, such as for volume rebates, Kodak uses historical experience and internal and customer data to estimate the sales incentive at the time revenue is recognized. Kodak accrues the estimated cost of post-sale obligations, including basic product warranties, based on historical experience at the time Kodak recognizes revenue.

For product sales, the revenue recognition criteria are generally met when title and risk of loss have transferred from Kodak to the buyer, which may be upon shipment or upon delivery to the customer site, based on contract terms or legal requirements in certain jurisdictions.

For equipment sales, the recognition criteria are generally met when the equipment is delivered and installed at the customer site. Revenue is recognized for equipment upon delivery as opposed to upon installation when the equipment has stand-alone value to the customer, and the amount of revenue allocable to the equipment is not legally contingent upon the completion of the installation. In instances in which the agreement with the customer contains a customer acceptance clause, revenue is deferred until customer acceptance is obtained, provided the customer acceptance clause is considered to be substantive. For certain agreements, Kodak does not consider these customer acceptance clauses to be substantive because Kodak can and does replicate the customer acceptance test environment and performs the agreed upon product testing prior to shipment. In these instances, revenue is recognized upon installation of the equipment.

Revenue from services includes extended warranty, customer support and maintenance agreements, consulting, business process services, training and education. Service revenue is recognized over the contractual period or as services are performed. In service arrangements where final acceptance of a system or solution by the customer is required, revenue is deferred until all acceptance criteria have been met.

The timing and the amount of revenue recognized from the licensing of intellectual property depend upon a variety of factors, including the specific terms of each agreement and the nature of the deliverables and obligations. Revenue is only recognized after all of the following criteria are met: (1) Kodak enters into a legally binding arrangement with a licensee of Kodak's intellectual property, (2) Kodak delivers the technology or intellectual property rights, (3) licensee

payment is deemed fixed or determinable and free of contingencies or significant uncertainties, and (4) collection from the licensee is reasonably assured.

Most of Kodak's equipment has both software and non-software components that function together to deliver the equipment's essential functionality and therefore they are accounted for together as non-software deliverables. Non-essential software sold in connection with Kodak's equipment sales is accounted for as separate deliverables or elements. In most cases, these software products sold as part of a multiple element arrangement include software maintenance agreements as well as unspecified upgrades or enhancements on a when-and-if-available basis. In multiple element arrangements where non-essential software deliverables are included, revenue is allocated to non-software and to software deliverables each as a group based on relative selling prices of each of the deliverables in the arrangement. Revenue allocated to software licenses is recognized when all revenue recognition criteria have been met. Revenue generated from maintenance and unspecified upgrades or updates on a when-and-if-available basis is recognized over the contract period.

#### RESEARCH AND DEVELOPMENT COSTS

R&D costs, which include costs incurred in connection with new product development, fundamental and exploratory research, process improvement, product use technology and product accreditation, are expensed in the period in which they are incurred.

#### ADVERTISING

Advertising costs are expensed as incurred and are included in Selling, general and administrative expenses in the accompanying Consolidated Statement of Operations. Advertising expenses amounted to \$9 million, \$6 million and \$10 million for the years ended December 31, 2016, 2015 and 2014, respectively. Advertising expenses in 2016 included \$4 million related to drupa 2016, a print industry trade show which occurs every four years.

## SHIPPING AND HANDLING COSTS

Amounts charged to customers and costs incurred by Kodak related to shipping and handling are included in net sales and cost of sales, respectively.

## IMPAIRMENT OF LONG-LIVED ASSETS

The carrying values of long-lived assets, other than goodwill and intangible assets with indefinite useful lives, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying values may not be recoverable.

The recoverability of the carrying values of long-lived assets is assessed by first grouping long-lived assets with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities (the asset group) and, secondly, by estimating the undiscounted future cash flows that are directly associated with and that are expected to arise from the use of and eventual disposition of such asset group. Kodak estimates the undiscounted cash flows over the remaining useful life of the primary asset within the asset group. If the carrying value of the asset group exceeds the estimated undiscounted cash flows, Kodak records an impairment charge to the extent the carrying value of the long-lived asset exceeds its fair value. Kodak determines fair value through quoted market prices in active markets or, if quoted market prices are unavailable, through the performance of internal analyses of discounted cash flows.

The remaining useful lives of long-lived assets are reviewed in connection with the assessment of recoverability of long-lived assets and the ongoing strategic review of the business and operations. If the review indicates that the remaining useful life of the long-lived asset has changed significantly, the depreciation on that asset is adjusted to facilitate full cost recovery over its revised estimated remaining useful life.

The carrying values of indefinite-lived intangible assets are evaluated for potential impairment annually or whenever events or changes in circumstances indicate that it is more likely than not that the asset is impaired. Refer to Note 5, "Goodwill and Other Intangible Assets."

## INCOME TAXES

Kodak recognizes deferred tax liabilities and assets for the expected future tax consequences of operating losses, credit carry-forwards and temporary differences between the carrying amounts and tax basis of Kodak's assets and liabilities. Kodak records a valuation allowance to reduce its net deferred tax assets to the amount that is more likely than not to be realized. For discussion of the amounts and components of the valuation allowances as of December 31, 2016 and 2015, see Note 14, "Income Taxes."

The undistributed earnings of Kodak's foreign subsidiaries are not considered permanently reinvested. Kodak has recognized a deferred tax liability (net of related foreign tax credits) on the foreign subsidiaries' undistributed earnings.

## RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-09, Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. ASU 2016-09 simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The new standard is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2016 (January 1, 2017 for Kodak). Early adoption is permitted. Kodak early adopted ASU 2016-09 effective December 31, 2016. The adoption of this guidance did not have a material impact on

Kodak's Consolidated Financial Statements.

In November 2015, the FASB issued ASU 2015-17, Income Taxes (Topic 740) Balance Sheet Classification of Deferred Taxes. ASU 2015-17 amends the accounting for income taxes and requires all deferred tax assets and liabilities to be classified as non-current on the consolidated balance sheet. ASU 2015-17 is effective for fiscal years and interim reporting periods within those years beginning after December 15, 2016 (January 1, 2017 for Kodak), with early adoption permitted in any annual or interim period. ASU 2015-17 may be adopted either prospectively or retrospectively. Kodak early adopted ASU 2015-17 effective September 30, 2016, prospectively.

In April 2015, the FASB issued ASU 2015-03, Imputation of Interest (Sub-Topic 835.30): Simplifying the Presentation of Debt Issuance Costs. ASU 2015-03 requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. In August 2015, the FASB issued ASU 2015-15 clarifying the application of this guidance to line of credit arrangements. The amendments in the ASUs are effective retrospectively for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015 (January 1, 2016 for Kodak). The adoption of this guidance did not have a material impact on Kodak's Consolidated Financial Statements.

In August 2014, the FASB issued ASU No. 2014-15, Presentation of Financial Statements – Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. ASU No.2014-15 is intended to define management's responsibility to evaluate whether there is substantial doubt about an organizations' ability to continue as a going concern. ASU No. 2014-15 is effective for fiscal years ending after December 15, 2016 (December 31, 2016 for Kodak), and interim periods within fiscal years beginning after December 15, 2016 (January 1,2017 for Kodak). The adoption of this guidance did not have a material impact on the Company's financial disclosures.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In January 2017, the FASB issued ASU No: 2017-04, Intangibles – Goodwill and Other (Topic 350): Simplifying the Accounting for Goodwill Impairment. The ASU simplifies the accounting for goodwill impairment by removing Step 2 of the goodwill impairment test, which required a hypothetical purchase price allocation. The ASU will require entities to calculate a goodwill impairment as the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. The same one-step impairment test will be applied to goodwill at all reporting units, even those with zero or negative carrying amounts. Entities will be required to disclose the amount of goodwill at reporting units with zero or negative carrying amounts. The ASU is effective prospectively for annual periods beginning after December 15, 2019, (January 1, 2020 for Kodak) with early adoption permitted for goodwill impairment tests performed after January 1, 2017. Kodak anticipates adopting the standard in the first quarter of 2017.

In November 2016, the FASB issued ASU 2016-18, Restricted Cash. ASU 2016-18 requires entities to show the changes in the total of cash, cash equivalents, restricted cash and restricted cash equivalents in the statement of cash flows. As a result, entities will no longer present transfers between cash and cash equivalents and restricted cash and restricted cash equivalents in the statement of cash flows. The new standard is effective for annual reporting periods beginning after December 15, 2017, (January 1, 2018 for Kodak) including interim reporting periods within those annual reporting periods. Early adoption in an interim period is permitted, but any adjustments must be reflected as of the beginning of the fiscal year that includes that interim period. At December 31, 2016 and 2015, the Company held restricted cash of \$44 million and \$53 million, respectively. The restricted cash balances are presented in Other current assets and Restricted cash in the Consolidated Statement of Financial Position based on the maturity dates of the related requirement. Under the new guidance, changes in the Company's restricted cash will be classified as either operating activities, investing activities or financing activities in the Consolidated Statement of Cash Flows, depending on the nature of the activities that gave rise to the restriction.

In October 2016, the FASB issued ASU 2016-16, Income Taxes: Intra-Entity Transfers of Assets Other than Inventory. ASU 2016-16 requires the recognition of the income tax consequences of intra-entity transfers of assets other than inventory when the transfer occurs. The new standard is effective on a modified retrospective basis for annual reporting periods beginning after December 15, 2017, (January 1, 2018 for Kodak) including interim reporting periods within those annual reporting periods. Early adoption is permitted as of the beginning of an annual reporting period for which financial statements (interim or annual) have not been issued or made available for issuance (January 1, 2017 for Kodak). Kodak is currently evaluating the impact of this ASU.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. ASU 2016-15 provides clarification with respect to classification of several cash flow issues on the Statement of Cash Flows including debt prepayment or extinguishment costs, proceeds from the settlement of insurance claims, and distributions received from equity method investees. The new standard is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2017 (January 1, 2018 for Kodak). Early adoption is permitted. Kodak does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326); Measurement of Credit Losses on Financial Instruments. ASU 2016-13 requires a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. In addition, the ASU requires credit losses relating to available-for-sale debt securities to be recorded through an allowance for credit losses. The amendments in this ASU broaden the information that an entity must consider in developing its expected

credit loss estimate for assets measured either collectively or individually. The new standard is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2020 (January 1, 2021 for Kodak). Early adoption is permitted beginning December 15, 2018 (January 1, 2019 for Kodak). Kodak is currently evaluating the impact of this ASU.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). ASU 2016-02 requires lessees to recognize most leases on their balance sheets as lease liabilities with corresponding right-of-use assets and eliminates certain real estate-specific provisions. The new leasing standard is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2018 (January 1, 2019 for Kodak). Early adoption is permitted. Kodak is currently evaluating the impact of this ASU.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments—Overall: Recognition and Measurement of Financial Assets and Financial Liabilities. ASU 2016-01 primarily affects the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. Under the ASU all equity investments in unconsolidated entities (other than those accounted for using the equity method of accounting) will generally be measured at fair value through earnings. In addition, the FASB clarified guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The classification and measurement guidance will be effective for Kodak beginning January 1, 2018, including interim periods within those fiscal years. Kodak does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers (Topic 606).” ASU 2014-09 supersedes the revenue recognition requirements in Topic 605, “Revenue Recognition” and most industry-specific guidance. The core principle of ASU 2014-09 is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. In July 2015, the FASB deferred the effective date of ASU 2014-09. In 2016 the FASB issued ASU 2016-08, ASUs 2016-10 through 12 and ASU 2016-20 clarifying guidance regarding principle vs agent

considerations, identification of performance obligations, analysis of licensing transactions, impairment considerations and disclosures. The new revenue standards are collectively effective for fiscal years, and interim periods within those years, beginning after December 15, 2017 (January 1, 2018 for Kodak) and allow either a full retrospective adoption to all periods presented or a modified retrospective adoption approach with the cumulative effect of initial application recognized at the date of initial application.

Kodak currently anticipates the adoption of this standard will not have a significant impact on its consolidated financial statements. Kodak has not yet selected a transition method or determined the impact adoption of ASU 2014-09, including the new disclosure requirements will have on business processes, systems and controls. The impact of ASU 2014-09 (including how it may impact contracts entered into during 2017 as well as emerging interpretations of the standard) will continue to be evaluated through the date of adoption.

#### NOTE 2: RECEIVABLES, NET

(in millions)	As of December 31,	
	2016	2015
Trade receivables	\$266	\$300
Miscellaneous receivables	33	50
Total (net of allowances of \$8 and \$10 as of December 31, 2016 and 2015, respectively)	\$299	\$350

Approximately \$26 million and \$28 million of the total trade receivable amounts as of December 31, 2016 and 2015, respectively, will potentially be settled through customer deductions in lieu of cash payments. Such deductions represent rebates owed to customers and are included in Other current liabilities in the accompanying Consolidated Statement of Financial Position.

#### NOTE 3: INVENTORIES, NET

(in millions)	As of December 31,	
	2016	2015
Finished goods	\$124	\$141
Work in process	55	61
Raw materials	57	61
Total	\$236	\$263

## NOTE 4: PROPERTY, PLANT AND EQUIPMENT, NET AND EQUIPMENT SUBJECT TO OPERATING LEASES, NET

(in millions)	As of	
	December 31,	
	2016	2015
Land	\$84	\$74
Buildings and building improvements	155	169
Machinery and equipment	374	445
Construction in progress	11	20
	624	708
Accumulated depreciation	(326)	(314)
Property, plant and equipment, net	\$298	\$394

Depreciation expense was \$84 million, \$113 million and \$170 million for the years ended December 31, 2016, 2015 and 2014, respectively, of which approximately \$0 million, \$8 million and \$2 million, respectively, represented accelerated depreciation in connection with restructuring actions.

Equipment subject to operating leases and the related accumulated depreciation were as follows:

(in millions)	As of	
	December	
	31,	
	2016	2015
Equipment subject to operating leases	\$29	\$25
Accumulated depreciation	(16)	(12)
Equipment subject to operating leases, net	\$13	\$13

Minimum future rental revenues on operating leases with original terms of one year or longer are not significant to Kodak.

## NOTE 5: GOODWILL AND OTHER INTANGIBLE ASSETS

The following table presents the changes in the carrying value of goodwill by reportable segment. The Enterprise Inkjet Systems and Eastman Business Park segments do not have goodwill and are therefore not presented.

(in millions)	Micro 3D			Intellectual		Consolidated Total
	Print Systems	Printing and Packaging	Software and Solutions	Consumer and Film	Property Solutions	
Balance as of December 31, 2014	\$ 56	\$ 26	\$ 6	\$ 6	\$ 2	\$ 96
Impairment	—	(6 )	—	—	(2 )	(8 )
Balance as of December 31, 2015	\$ 56	\$ 20	\$ 6	\$ 6	\$ —	\$ 88
Impairment	—	—	—	—	—	—
Balance as of December 31, 2016	\$ 56	\$ 20	\$ 6	\$ 6	\$ —	\$ 88

As of December 31, 2016, the Print Systems segment has two goodwill reporting units: Prepress Solutions and Electrophotographic Printing Solutions. The Micro 3D Printing and Packaging segment has two goodwill reporting units: Packaging and Micro 3D Printing. The Software and Solutions segment has two goodwill reporting units: Kodak Technology Solutions and Unified Workflow Solutions. The Consumer and Film segment has three goodwill reporting units: Consumer Inkjet Solutions, Motion Picture, Industrial Chemicals and Films and Consumer Products. The Enterprise Inkjet Systems segment, the Intellectual Property Solutions segment and the Eastman Business Park segment each have one goodwill reporting unit.

Based upon the results of Kodak's December 31, 2016 annual impairment test, no impairment of goodwill is indicated.

Due to the change in Kodak's reporting units as of January 1, 2015 and the delay in commercializing new technologies in the Micro 3D Printing reporting unit, Kodak concluded that the carrying value of the Micro 3D Printing reporting unit exceeded its implied fair value. The fair value of the Micro 3D Printing reporting unit was estimated using the discounted cash flow method in which the future cash flows, including a terminal value at the end of the projection period, were discounted to present value. Kodak recorded a pre-tax impairment charge of \$6 million in the first quarter of 2015 that is included in Other operating expense, net in the Consolidated Statement of Operations representing the entire amount of goodwill for this reporting unit.

Based upon the results of Kodak's 2015 goodwill impairment analysis, Kodak concluded that the carrying value of the Intellectual Property Solutions reporting unit exceeded its implied fair value and recorded a pre-tax impairment charge of \$2 million in the fourth quarter of 2015 that is included in Other operating expense (income), net in the Consolidated Statement of Operations representing the entire amount of goodwill for this reporting unit. No impairment of goodwill was indicated for any other reporting units.

The gross carrying amount and accumulated amortization by major intangible asset category as of December 31, 2016 and 2015 were as follows:

Edgar Filing: EASTMAN KODAK CO - Form 10-K

(in millions)	As of December 31, 2016			Weighted-Average Amortization Period
	Gross Carrying Amount	Accumulated Amortization	Net	
Technology-based	\$75	\$ 47	\$28	2 years
Kodak trade name	40	—	40	Indefinite life
Customer-related	26	12	14	6 years
Other	2	—	2	22 years
<b>Total</b>	<b>\$143</b>	<b>\$ 59</b>	<b>\$84</b>	

(in millions)	As of December 31, 2015			Weighted-Average Amortization Period
	Gross Carrying Amount	Accumulated Amortization	Net	
Technology-based	\$83	\$ 38	\$45	3 years
Kodak trade name	46	—	46	Indefinite life
Customer-related	37	11	26	7 years
Other	2	—	2	21 years
<b>Total</b>	<b>\$168</b>	<b>\$ 49</b>	<b>\$119</b>	

Based upon the results of Kodak's December 31, 2016 impairment tests, no impairment of the Kodak trade name was indicated. In the first quarter of 2016, Kodak concluded the carrying value of the Kodak trade name exceeded its fair value. The pre-tax impairment charge of \$5 million is included in Other operating expense, net in the Consolidated Statement of Operations.

In the first quarter of 2016, due to the exit of its position in silver metal mesh touch screen development, Kodak wrote off intangible assets with a gross carrying amount of \$14 million and accumulated amortization of \$6 million. An impairment charge of \$8 million was recorded in Other operating expense, net in the Consolidated Statement of Operations. Refer to Note 12, "Other Operating Expense, Net".

Edgar Filing: EASTMAN KODAK CO - Form 10-K

In the second quarter of 2016, in two separate transactions, Kodak sold certain assets in the Design2Launch and brand protection businesses. The assets sold included intangible assets with a gross carrying amount of \$5 million and accumulated amortization of \$2 million.

Amortization expense related to intangible assets was \$18 million, \$21 million and \$21 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Estimated future amortization expense related to intangible assets that are currently being amortized as of December 31, 2016 was as follows:

(in millions)	
2017	\$16
2018	12
2019	5
2020	4
2021	3
2022 and thereafter	4
Total	\$44

NOTE 6: OTHER CURRENT LIABILITIES

(in millions)	As of	
	December 31,	
	2016	2015
Accrued employment-related liabilities	\$47	\$66
Deferred revenue	28	34
Accrued customer rebates	27	31
Accrued restructuring liabilities	8	11
Workers' compensation	8	12
Contingent consideration related to the sale of a business	7	4
Other	72	87
Total	\$197	\$245

The Other component above consists of other miscellaneous current liabilities that, individually, were less than 5% of the total current liabilities component within the Consolidated Statement of Financial Position, and therefore, have been aggregated in accordance with Regulation S-X.

NOTE 7: OTHER LONG-TERM LIABILITIES

(in millions)	As of	
	December	31,
	2016	2015
Workers compensation	\$105	\$113
Asset retirement obligations	43	47
Series A preferred stock conversion option	43	—
Contingent consideration related to the sale of a business	24	31
Deferred taxes	16	18
Environmental liabilities	12	13
Other	23	49
Total	\$266	\$271

The Other component above consists of other miscellaneous long-term liabilities that, individually, were less than 5% of the total liabilities component in the accompanying Consolidated Statement of Financial Position, and therefore, have been aggregated in accordance with Regulation S-X.

## NOTE 8: DEBT AND CAPITAL LEASES

Debt and capital leases and related maturities and interest rates were as follows at December 31, 2016 and 2015 (in millions):

(in millions)	Type	Maturity	Effective Interest Rate	As of December 31, 2016 2015	
				Carrying Value	Carrying Value
Current portion:					
	Term note	2017	7.59%	\$2	\$ 4
	Capital leases	Various	Various	\$3	\$ 2
				5	6
Non-current portion:					
	Term note	2019	7.59%	396	400
	Term note	2020	11.04%	—	270
	VIE term loan	2035	6.07%	—	3
	Capital leases	Various	Various	6	6
				402	679
				\$407	\$ 685

Annual maturities of debt and capital leases outstanding at December 31, 2016, were as follows (in millions):

(in millions)	Carrying Maturity	
	Value	Value
2017	\$ 5	\$ 5
2018	7	7
2019	393	397
2020	—	—
2021	—	—
2022 and thereafter	2	2
Total	\$ 407	\$ 411

On September 3, 2013, the Company entered into (i) a Senior Secured First Lien Term Credit Agreement (the “First Lien Term Credit Agreement”) with the lenders party thereto (the “First Lien Lenders”), JPMorgan Chase Bank, N.A. as administrative agent, and J.P. Morgan Securities LLC, Barclays Bank PLC, and Merrill Lynch, Pierce, Fenner & Smith Inc. as joint lead arrangers and joint bookrunners, and (ii) a Senior Secured Second Lien Term Credit Agreement (the “Second Lien Term Credit Agreement,” and together with the First Lien Term Credit Agreement, the “Term Credit Agreements”), with the lenders party thereto (the “Second Lien Lenders,” and together with the First Lien

Lenders, the “Term Credit Lenders”), Barclays Bank PLC as administrative agent, and J.P. Morgan Securities LLC, Barclays Bank PLC and Merrill Lynch, Pierce, Fenner & Smith Inc. as joint lead arrangers and joint bookrunners. Additionally, the Company and its U.S. subsidiaries (the “Subsidiary Guarantors”) entered into an Asset Based Revolving Credit Agreement (the “ABL Credit Agreement” and together with the Term Credit Agreements, the “Credit Agreements”) with the lenders party thereto (the “ABL Lenders” and together with the First Lien Lenders and the Second Lien Lenders, the “Lenders”) and Bank of America N.A. as administrative agent and collateral agent, Barclays Bank PLC as syndication agent and Merrill Lynch, Pierce, Fenner & Smith Inc., Barclays Bank PLC and J.P. Morgan Securities LLC as joint lead arrangers and joint bookrunners. Pursuant to the terms of the Credit Agreements, the Term Credit Lenders provided the Company with term loan facilities in an aggregate principal amount of \$695 million, consisting of \$420 million of first-lien term loans (the “First Lien Loans”) and \$275 million of second-lien term loans (the “Second Lien Loans”). Net proceeds from the Term Credit Agreements were \$664 million (\$695 million aggregate principal less \$15 million stated discount and \$16 million in debt transaction costs). The maturity date of the loan made under the First Lien Term Credit Agreement is the earlier to occur of (i) September 3, 2019 or (ii) the acceleration of such loan due to an event of default (as defined in the First Lien Term Credit Agreement). The Second Lien Term Credit Agreement was prepaid and terminated on November 15, 2016.

The Credit Agreements limit, among other things, the Company’s and the Subsidiary Guarantors’ ability to (i) incur indebtedness, (ii) incur or create liens, (iii) dispose of assets, (iv) make restricted payments (including dividend payments, et al.) and (v) make investments. In addition to other customary affirmative covenants, the Credit Agreements provide for a periodic delivery by the Company of its various financial statements as set forth in the Credit Agreements. Events of default under the Credit Agreements include, among others, failure to pay any loan, interest or other amount due under the applicable credit agreement, breach of specific covenants and a change of control of the Company. Upon an event of default, the applicable lenders may declare the outstanding obligations under the applicable credit agreement to be immediately due and payable and exercise other rights and remedies provided for in such credit agreement.

The First Lien Loans bear interest at the rate of LIBOR plus 6.25% per annum, with a LIBOR floor of 1% or Alternate Base Rate (as defined in the First Lien Term Credit Agreement) plus 5.25%. The Second Lien Loans interest was at the rate of LIBOR plus 9.5% per annum, with a LIBOR floor of 1.25% or Alternate Base Rate (as defined in the Second Lien Term Credit Agreement) plus 8.5%. Under the ABL Credit Agreement, the ABL Loans bore interest at the rate of LIBOR plus 2.75%-3.25% per annum or Base Rate (as defined in the ABL Credit Agreement) plus 1.75%-2.25% per annum, based on Excess Availability (as defined in the ABL Credit Agreement) until the ABL Credit Agreement was amended as discussed below. Each existing and future direct or indirect U.S. subsidiary of the Company (other than immaterial subsidiaries, unrestricted subsidiaries and certain other subsidiaries) have agreed to provide unconditional guarantees of the obligations of the Company under the Credit Agreements. Subject to certain exceptions, obligations under the First Lien Term Credit Agreement are secured by: (i) a first lien on all assets of the Company and the Subsidiary Guarantors, other than the ABL Collateral (as defined below), including a first lien on 100% of the stock of material domestic subsidiaries and 65% of the stock of material first-tier foreign subsidiaries (collectively the "Term Collateral") and (ii) a second lien on the ABL Collateral. Obligations under the Asset Based Revolving Credit Agreement are secured by: (i) a first lien on cash, accounts receivable, inventory, machinery and equipment (the "ABL Collateral") and (ii) a second lien on the Term Collateral. The aggregate carrying value of the Term Collateral and ABL Collateral as of December 31, 2016 and 2015 was \$1,613 million and \$1,873 million, respectively.

The Company may voluntarily prepay the First Lien Loan.

As defined in the First Lien Term Credit Agreement, the Company is required to prepay loans with net proceeds from asset sales, recovery events or issuance of indebtedness, subject to, in the case of net proceeds received from asset sales or recovery events, reinvestment rights by the Company in assets used or usable by the business within certain time limits. On July 7, 2016, Kodak prepaid \$5 million of principal under the First Lien Term Credit Agreement from proceeds received from the sale of a business. Under the terms of the First Lien Term Credit Agreement, the prepayment was applied first to the installment principal payments of \$4 million due over the next twelve months, then ratably to the remaining scheduled payments. The next scheduled installment principal payment is not due until September 30, 2017.

On an annual basis, the Company will prepay on June 30 of the following fiscal year loans in an amount equal to a percentage of Excess Cash Flow ("ECF") as defined in the First Lien Term Credit Agreement, provided no such prepayment is required if such prepayment would cause U.S. liquidity (as defined in the First Lien Term Credit Agreement) to be less than \$100 million or the Secured Leverage ratio is less than 2.25 to 1.00. For the years ended December 31, 2015 and 2014, ECF was a negative amount, therefore, no prepayment was required in either 2016 or 2015. For 2016, the Secured Leverage Ratio was below 2.25 to 1.00, therefore no prepayment of First Lien term debt is required in 2017. Any mandatory prepayments as described above shall be reduced by any mandatory prepayments of the First Lien Loan.

Under the First Lien Term Credit Agreement, the Company is required to maintain a Secured Leverage Ratio (as defined therein) not to exceed specified levels. The Secured Leverage Ratio under the First Lien Term Credit Agreement is tested at the end of each quarter based on the prior four quarters. The maximum Secured Leverage Ratio permitted under the First Lien Term Credit Agreement declined on June 30, 2015 from 3.75:1 to 3.25:1 and further declined on December 31, 2015 from 3.25:1 to 2.75:1, with no further adjustments for the remainder of the agreement. As of December 31, 2016, Kodak was in compliance with all covenants under the First Lien Term Credit Agreement.

#### Senior Secured Second Lien Term Credit Agreement Note Repurchase, Prepayment and Termination

In accordance with the modified Dutch auction procedures in the Second Lien Term Credit Agreement, Kodak offered to repurchase up to \$25 million of second lien term loans within a price range of 97% to 98.5% of par. As a result of this auction process, on September 14, 2016 Kodak repurchased an aggregate of \$13 million of second lien term loans at a price of 98% of par, representing all second lien term loans with respect to which bids were received at prices within the range. The repurchased second lien term loans were automatically cancelled upon the repurchase pursuant to the terms of the Second Lien Term Credit Agreement.

On November 15, 2016, the Company used the net proceeds from the sale of the Series A Preferred Stock, together with cash on hand, to pay an aggregate amount of \$263.2 million (the “Prepayment Amount”), comprised of the full principal amount of \$262 million plus accrued interest, fees and other expenses owed to the lenders under the Second Lien Term Credit Agreement. Upon the administrative agent’s receipt of the Prepayment Amount, the Second Lien Credit Agreement was terminated and the lenders’ security interest in any of the Company’s or its subsidiaries’ assets or property securing the Second Lien Credit Agreement was released. Kodak recognized \$4 million of expense in Loss on early extinguishment of debt in the Consolidated Statement of Operations, representing the balance of Second Lien Term Agreement stated discount remaining at the time of the prepayment.

#### Amended and Restated Credit Agreement

On May 26, 2016, the Company and certain of its domestic subsidiaries (the “Subsidiary Guarantors”) entered into an Amended and Restated Credit Agreement (the “Amended Credit Agreement” or “ABL Credit Agreement”) with the lenders party thereto (the “Lenders”), Bank of America, N.A., as administrative and collateral agent, and Bank of America, N.A. and JPMorgan Chase Bank, N.A., as joint lead arrangers and joint bookrunners, which amended and restated the existing Asset Based Revolving Credit Agreement, dated as of September 3, 2013 (the “Prior Credit Agreement”). Each of the capitalized but undefined terms used in the context of describing the Amended Credit Agreement has the meaning ascribed to such term in the Amended Credit Agreement.

The Amended Credit Agreement decreased the aggregate amount of commitments from \$200 million to \$150 million and extended the maturity date to the earlier of May 26, 2021 or the date that is 90 days prior to the earliest scheduled maturity date of any of the Company’s outstanding term loans

or refinancings thereof, of which the earliest maturity date is currently September 3, 2019. The Amended Credit Agreement, among other things, lowered reserve requirements by eliminating the Availability Block and removed the ability to use Qualified Cash to support Excess Availability.

Each existing direct or indirect U.S. subsidiary of the Company (other than Immaterial Subsidiaries, Unrestricted Subsidiaries and certain other subsidiaries) has reaffirmed its unconditional guarantee (and any such future subsidiaries must provide an unconditional guarantee) of the obligations of the Company under the Amended Credit Agreement.

The Lenders will make available asset-based revolving loans (the “ABL Loans”) and letters of credit in an aggregate amount of up to \$150 million, subject to the Borrowing Base. The Company has issued approximately \$116 million of letters of credit under the Amended Credit Agreement as of December 31, 2016. The Company had approximately \$20 million Excess Availability under the Amended Credit Agreement as of December 31, 2016 and approximately \$16 million Borrowing Base Availability (as defined in the Prior Credit Agreement) under the Prior Credit Agreement as of December 31, 2015. Availability is subject to the borrowing base calculation, reserves and other limitations.

The ABL Loans bear interest at the rate of LIBOR plus 2.25% - 2.75% per annum or Base Rate plus 1.25% - 1.75% per annum based on Excess Availability.

Excess Availability is equal to the sum of (i) 85% of the amount of the Eligible Receivables less a Dilution Reserve, (ii) the lesser of 85% of Net Orderly Liquidation Value or 75% of the Eligible Inventory (iii) the lesser of 75% of Orderly Liquidation Value of Eligible Equipment or \$19 million, as of December 31, 2016 (which \$19 million decreases by \$1 million per quarter) and (iv) Eligible Cash less (a) Rent and Charges Reserves, (b) Principal Outstanding and (c) Outstanding Letters of Credit. Under the Prior Credit Agreement, Excess Availability also included Qualified Cash (not to exceed \$15 million) and an Availability Block.

Under the Amended Credit Agreement, Kodak is required to maintain a minimum Fixed Charge Coverage Ratio of 1.00 to 1.00 when Excess Availability is less than 12.5% of lender commitments (15% of lender commitments under the Prior Credit Agreement). As of December 31, 2016 12.5% of lender commitments and Excess Availability were \$18.75 million and \$20 million, respectively. As of December 31, 2015, 15% of lender commitments and Excess Availability were \$30 million and \$31 million, respectively.

If Excess Availability falls below 12.5% of lender commitments, Kodak may, in addition to the requirement to be in compliance with the minimum Fixed Charge Coverage Ratio, become subject to cash dominion control. Since Excess Availability was greater than 12.5% of lender commitments at December 31, 2016, Kodak is not required to have a minimum Fixed Charges Coverage Ratio of 1.0 to 1.0. As of December 31, 2016 Kodak was in compliance with all the covenants under the Amended Credit Agreement.

As of December 31, 2016 and 2015, Kodak had funded \$25 million and \$30 million, respectively, to the Eligible Cash account, held with the ABL Credit Agreement Administrative Agent, which is classified as Restricted cash in the Consolidated Statement of Financial Position.

#### NOTE 9: COMMITMENTS AND CONTINGENCIES

##### Asset Retirement Obligations

Kodak's asset retirement obligations primarily relate to asbestos contained in buildings that Kodak owns. In many of the countries in which Kodak operates, environmental regulations exist that require Kodak to handle and dispose of asbestos in a special manner if a building undergoes major renovations or is demolished. Otherwise, Kodak is not required to remove the asbestos from its buildings. Kodak records a liability equal to the estimated fair value of its obligation to perform asset retirement activities related to the asbestos, computed using an expected present value technique, when sufficient information exists to calculate the fair value. Kodak does not have a liability recorded related to every building that contains asbestos because Kodak cannot estimate the fair value of its obligation for certain buildings due to a lack of sufficient information about the range of time over which the obligation may be settled through demolition, renovation or sale of the building.

The following table provides asset retirement obligation activity (in millions):

	For the Year Ended December 31, 2016 2015	
Asset Retirement Obligations at start of period	\$47	\$ 53
Liabilities incurred in the current period	2	1
Liabilities settled in the current period	(7 )	(3 )
Accretion expense	2	2
Revision in estimated cash flows	(1 )	(6 )
Foreign exchange impact	—	—
Asset Retirement Obligations at end of period	\$43	\$ 47

## Other Commitments and Contingencies

The Company and its subsidiaries have entered into operating leases for various real estate and equipment needs. Rental expense, net of minor sublease income, amounted to \$26 million, \$28 million and \$36 million in the years ended December 31, 2016, 2015 and 2014, respectively.

As of December 31, 2016, the Company had outstanding letters of credit of \$116 million issued under the ABL Credit Agreement as well as bank guarantees and letters of credit of \$5 million, surety bonds in the amount of \$17 million, and restricted cash and deposits of \$51 million, primarily to support compliance with the Excess Availability threshold under the ABL Credit Agreement, to ensure the payment of possible casualty and workers compensation claims, environmental liabilities, legal contingencies, rental payments, and to support various customs, hedging, tax and trade activities. The restricted cash and deposits are recorded in Restricted cash, Other current assets and Other long-term assets in the Consolidated Statement of Financial Position.

Kodak's Brazilian operations are involved in various litigation matters and have received or been the subject of numerous governmental assessments related to indirect and other taxes in various stages of litigation, as well as civil litigation and disputes associated with former employees and contract labor. The tax matters, which comprise the majority of the litigation matters, are primarily related to federal and state value-added taxes. Kodak is disputing these matters and intends to vigorously defend its position. Based on the opinion of legal counsel and current reserves already recorded for those matters deemed probable of loss, management does not believe that the ultimate resolution of these matters will materially impact Kodak's results of operations or financial position. Kodak routinely assesses all these matters as to the probability of ultimately incurring a liability in its Brazilian operations and records its best estimate of the ultimate loss in situations where it assesses the likelihood of loss as probable. As of December 31, 2016, the unreserved portion of these contingencies, inclusive of any related interest and penalties, for which there was at least a reasonable possibility that a loss may be incurred, amounted to approximately \$59 million.

In connection with assessments in Brazil, local regulations may require Kodak to post security for a portion of the amounts in dispute. As of December 31, 2015, Kodak has posted security composed of \$7 million of pledged cash reported within Restricted cash in the Consolidated Statement of Financial Position and liens on certain Brazilian assets with a net book value of approximately \$73 million. Generally, any encumbrances on the Brazilian assets would be removed to the extent the matter is resolved in Kodak's favor.

Kodak is involved in various lawsuits, claims, investigations, remediations and proceedings, including, from time to time, commercial, customs, employment, environmental, and health and safety matters, which are being handled and defended in the ordinary course of business. Kodak is also subject, from time to time, to various assertions, claims, proceedings and requests for indemnification concerning intellectual property, including patent infringement suits involving technologies that are incorporated in a broad spectrum of Kodak's products. These matters are in various stages of investigation and litigation, and are being vigorously defended. Based on information currently available, Kodak does not believe that it is probable that the outcomes in any of these matters, individually or collectively, will have a material adverse effect on its financial condition or results of operations. Litigation is inherently unpredictable, and judgments could be rendered or settlements entered that could adversely affect Kodak's operating results or cash flows in a particular period. Kodak routinely assesses all of its litigation and threatened litigation as to the probability of ultimately incurring a liability, and records its best estimate of the ultimate loss in situations where it assesses the likelihood of loss as probable.

## NOTE 10: GUARANTEES

EKC guarantees obligations to third parties for some of its consolidated subsidiaries. The maximum amount guaranteed is \$13 million and the outstanding amount for those guarantees is \$5 million.

In connection with the settlement of certain of the Company's historical environmental liabilities at EBP and in accordance with the terms of the Amended EBP Settlement Agreement, in the event the historical EBP liabilities exceed \$99 million, the Company will become liable for 50% of the portion above \$99 million with no limitation to the maximum potential future payments. There is no liability recorded related to this guarantee.

#### Indemnifications

Kodak may, in certain instances, indemnify third parties when it sells businesses and real estate, and in the ordinary course of business with its customers, suppliers, service providers and business partners. Additionally, Kodak indemnifies officers and directors who are, or were, serving at Kodak's request in such capacities. Historically, costs incurred to settle claims related to these indemnifications have not been material to Kodak's financial position, results of operations or cash flows. Further, the fair value of any right to indemnification granted during the year ended December 31, 2016 was not material to Kodak's financial position, results of operations or cash flows.

## Extended Warranty Arrangements

Kodak offers its customers extended warranty arrangements that are generally one year, but may range from three months to six years after the original warranty period. Kodak provides repair services and routine maintenance under these arrangements. Kodak has not separated the extended warranty revenues and costs from the routine maintenance service revenues and costs, as it is not practicable to do so. Therefore, these revenues and costs have been aggregated in the discussion that follows. The change in Kodak's deferred revenue balance in relation to these extended warranty and maintenance arrangements, which is reflected in Other current liabilities in the accompanying Consolidated Statement of Financial Position, was as follows:

(in millions)	
Deferred revenue on extended warranties as of December 31, 2014	\$27
New extended warranty and maintenance arrangements	176
Recognition of extended warranty and maintenance arrangement	
revenue	(177)
Deferred revenue on extended warranties as of December 31, 2015	26
New extended warranty and maintenance arrangements	165
Recognition of extended warranty and maintenance arrangement	
revenue	(168)
Deferred revenue on extended warranties as of December 31, 2016	\$23

Costs incurred under these extended warranty and maintenance arrangements for the years ended December 31, 2016 and December 31, 2015 amounted to \$112 million and \$125 million, respectively.

## NOTE 11: FINANCIAL INSTRUMENTS

Kodak, as a result of its global operating and financing activities, is exposed to changes in foreign currency exchange rates and interest rates, which may adversely affect its results of operations and financial position. Kodak manages such exposures, in part, with derivative financial instruments. Foreign currency forward contracts are used to mitigate currency risk related to foreign currency denominated assets and liabilities, as well as forecasted foreign currency denominated intercompany assets. Kodak's exposure to changes in interest rates results from its investing and borrowing activities used to meet its liquidity needs. Kodak does not utilize financial instruments for trading or other speculative purposes.

Kodak's foreign currency forward contracts are not designated as hedges, and are marked to market through net earnings (loss) at the same time that the exposed assets and liabilities are re-measured through net earnings (loss) (both in Other charges, net in the Consolidated Statement of Operations). The notional amount of such contracts open at December 31, 2016 and 2015 was approximately \$340 million and \$384 million, respectively. The majority of the contracts of this type held by Kodak are denominated in Euros, British pounds, and Chinese renminbi. The net effect of foreign currency forward contracts in the results of operations is shown in the following table:

(in millions)	Year Ended		
	December 31,		
	2016	2015	2014
Net (loss) gain from derivatives not designated as hedging instruments	\$(21)	\$ 14	\$ 10

Kodak had no derivatives designated as hedging instruments for the years ended December 31, 2016, 2015 or 2014.

Kodak's financial instrument counterparties are high-quality investment or commercial banks with significant experience with such instruments. Kodak manages exposure to counterparty credit risk by requiring specific minimum credit standards and diversification of counterparties. Kodak has procedures to monitor the credit exposure amounts. The maximum credit exposure at December 31, 2016 was not significant to Kodak.

In the event of a default under the Company's Credit Agreements, or a default under any derivative contract or similar obligation of Kodak, subject to certain minimum thresholds, the derivative counterparties would have the right, although not the obligation, to require immediate settlement of some or all open derivative contracts at their then-current fair value, but with liability positions netted against asset positions with the same counterparty.

As discussed in Note 18, "Redeemable, Convertible, Series A Preferred Stock", the Company concluded that the Series A Preferred Stock is considered more akin to a debt-type instrument and that the economic characteristics and risks of the embedded conversion features, except where the conversion price was increased to the liquidation preference, were not considered clearly and closely related to the Series A Preferred Stock. The embedded conversion features not considered clearly and closely related are the conversion at the option of the holder; the ability of Kodak to automatically convert the stock after the second anniversary of issuance and the conversion in the event of a fundamental change or reorganization. Accordingly, these embedded conversion features were bifurcated from the Series A Preferred Stock and separately accounted for on a combined basis as a single derivative liability which is reported in Other long-term liabilities in the Consolidated Statement of Financial Position. The derivative liability is being accounted for at fair value with changes in fair value being reported in Other charges, net in the Consolidated Statement of Operations.

## Fair Value

Fair values of Kodak's foreign currency forward contracts are determined using observable inputs (Level 2 fair value measurements), and are based on the present value of expected future cash flows (an income approach valuation technique) considering the risks involved and using discount rates appropriate for the duration of the contracts. The gross fair value of foreign currency forward contracts in an asset position are reported in Receivables, net in the Consolidated Statement of Financial Position and the gross fair value of foreign currency contracts in a liability position are reported in Other current liabilities. Neither the gross fair value of the foreign currency forward contracts in an asset position nor the gross fair value of foreign currency contracts in a liability position were material as of December 31, 2016 or 2015.

The fair value of the embedded conversion features derivative liability is calculated using unobservable inputs (Level 3 fair measurements). The value is calculated using a binomial lattice model. The following table presents the key inputs in the determination of fair value at issuance and December 31, 2016:

	Valuation Date	
	November	December
	15,	(Issuance) 31, 2016
	2016	
Total value of embedded derivative liability (\$ millions)	\$43	\$ 43
Kodak's closing stock price	15.20	15.50
Expected stock price volatility	42.92 %	42.85 %
Risk free rate	1.68 %	1.93 %
Yield on the preferred stock	11.56 %	11.38 %

The fair values of long-term borrowings were \$406 million and \$592 million at December 31, 2016 and 2015, respectively. Fair values of long-term borrowings (Level 2 fair value measurements) are determined by reference to quoted market prices, if available, or by pricing models based on the value of related cash flows discounted at current market interest rates,

Transfers between levels of the fair value hierarchy are recognized based on the actual date of the event or change in circumstances that caused the transfer. There were no transfers between levels of the fair value hierarchy during the year ended December 31, 2016.

The carrying values of cash and cash equivalents, restricted cash, and short-term borrowings and current portion of long-term debt approximate their fair values.

## NOTE 12: OTHER OPERATING EXPENSE, NET

(in millions)	Year Ended		
	December 31,		
	2016	2015	2014
Expense (income):			
Asset impairments <sup>(1) (2) (3) (4) (5) (6)</sup>	\$25	\$ 8	\$ 9
Legal settlements <sup>(7) (8)</sup>	(16)	—	—
Gains related to the sales of assets <sup>(9)</sup>	(9 )	(6 )	(3 )
Deconsolidation of RED <sup>(10)</sup>	15	—	—
Gain recognized on assets acquired for no monetary consideration <sup>(11)</sup>	—	(3 )	—
Other	1	3	3
Total	\$16	\$ 2	\$ 9

<sup>(1)</sup>In the first quarter of 2016, due to the exit of its position in silver metal mesh touch screen development, Kodak concluded that the carrying value of property, plant and equipment associated with those operations exceeded their fair value and recorded pre-tax impairment charges of \$12 million.

<sup>(2)</sup>In the first quarter of 2016, Kodak recorded an impairment charge of \$8 million related to silver metal mesh touch screen intangible assets. Refer to Note 5, "Goodwill and Other Intangible Assets."

<sup>(3)</sup>In the first quarter of 2016, Kodak recorded an impairment charge of \$5 million related to the Kodak trade name. Refer to Note 5, "Goodwill and Other Intangible Assets."

<sup>(4)</sup>In the fourth quarter of 2015, Kodak recorded a goodwill impairment charge of \$2 million related to the Intellectual Property Solutions reporting unit. Refer to Note 5, "Goodwill and Other Intangible Assets."

- (5) In the first quarter of 2015, Kodak recorded a goodwill impairment charge of \$6 million related to the Micro 3D Printing reporting unit. Refer to Note 5, “Goodwill and Other Intangible Assets.”
- (6) In the fourth quarter of 2014, Kodak recorded an impairment charge of \$9 million related to an in-process research and development intangible asset established as part of fresh start accounting.
- (7) In the first quarter of 2016, Kodak received \$10 million representing net litigation proceeds from DuPont.
- (8) In the third quarter of 2016, Kodak settled a legal contingency and reduced the associated reserve by \$6 million.
- (9) On June 30, 2016, Kodak sold certain assets of its brand protection business to eApeiron Solutions Inc. in exchange for cash consideration of approximately \$6 million and an equity investment of 19.9%. Kodak will account for this investment under the equity method of accounting. Kodak recognized a gain of approximately \$7 million on this transaction.
- (10) Refer to Note 1, “Summary of Significant Accounting Policies – Basis of Consolidation.”
- (11) Refer to Note 24, “Segment Information”, footnote 8 to the table entitled “Segment Operational EBITDA from Consolidated Loss from Continuing Operations Before Income Taxes.”

Other	(2)	(5)	(5)
Total	\$(4)	\$(21)	\$(21)

- <sup>(1)</sup>In 2016, 2015 and 2014 Kodak recorded charges of \$0 million, \$2 million and \$16 million, respectively, from the remeasurement of its Venezuelan subsidiary’s monetary assets and liabilities. Refer to Note 1, “Basis of Presentations and Significant Accounting Matters”, “Foreign Currency” section.

NOTE 14: INCOME TAXES

The components of (loss) earnings from continuing operations before income taxes and the related provision (benefit) for U.S. and other income taxes were as follows (in millions):

	Year Ended December 31,		
	2016	2015	2014
Earnings (loss) from continuing operations before income taxes:			

Edgar Filing: EASTMAN KODAK CO - Form 10-K

U.S.	\$ (39 )	\$ (136)	\$ (151)
Outside the U.S.	117	138	102
Total	\$78	\$2	\$ (49 )
U.S. income taxes:			
Current provision (benefit)	\$1	\$1	\$ (2 )
Deferred provision	6	9	4
Income taxes outside the U.S.:			
Current provision (benefit)	14	20	(1 )
Deferred provision	11	—	7
State and other income taxes:			
Current provision	—	—	1
Deferred provision	—	—	1
Total provision	\$32	\$30	\$10

Edgar Filing: EASTMAN KODAK CO - Form 10-K

The differences between income taxes computed using the U.S. federal income tax rate and the provision for income taxes for continuing operations were as follows (in millions):

	Year Ended		
	December 31,		
	2016	2015	2014
Amount computed using the statutory rate	\$27	\$1	\$(17)
Increase (reduction) in taxes resulting from:			
State and other income taxes, net of federal	—	—	1
Unremitted foreign earnings	6	26	4
Operations outside the U.S.	19	25	95
Legislative rate changes	6	—	—
Valuation allowance	(67)	(83)	(127)
Tax settlements and adjustments, including interest	2	2	(5)
Discharge of debt and other reorganization related items	40	60	57
Other, net	(1)	(1)	2
Provision for income taxes	\$32	\$30	\$10

The significant components of deferred tax assets and liabilities were as follows (in millions):

	As of	
	December 31,	
	2016	2015
<b>Deferred tax assets</b>		
Pension and postretirement obligations	\$162	\$187
Restructuring programs	1	3
Foreign tax credit	335	314
Inventories	10	14
Investment tax credit	71	80
Employee deferred compensation	41	46
Depreciation	63	62
Research and development costs	144	188
Tax loss carryforwards	435	380
Other deferred revenue	11	13
Other	80	112
Total deferred tax assets	\$1,353	\$1,399
<b>Deferred tax liabilities</b>		
Leasing	\$1	\$1
Goodwill/Intangibles	48	49
Unremitted foreign earnings	76	121
Total deferred tax liabilities	125	171
Net deferred tax assets before valuation allowance	1,228	1,228
Valuation allowance	1,209	1,201
Net deferred tax assets	\$19	\$27

Deferred tax assets (liabilities) are reported in the following components within the Consolidated Statement of Financial Position (in millions):

	As of December 31,	
	2016	2015
Deferred income taxes (current)	\$—	\$22
Deferred income taxes (non-current)	35	23
Other long-term liabilities	(16)	(18)
Net deferred tax assets	\$19	\$27

As of December 31, 2016, Kodak had available domestic and foreign net operating loss carry-forwards for income tax purposes of approximately \$1,657 million, of which approximately \$499 million have an indefinite carry-forward period. The remaining \$1,158 million expire between the years 2017 and 2036. As of December 31, 2016, Kodak had unused foreign tax credits and investment tax credits of \$335 million and \$71 million, respectively, with various expiration dates through 2031.

Utilization of post-emergence net operating losses and tax credits may be subject to limitations in the event of significant changes in stock ownership of the Company in the future. Section 382 of the Internal Revenue Code of 1986, as amended, imposes annual limitations on the utilization of net operating loss (“NOL”) carryforwards, other tax carryforwards, and certain built-in losses as defined under that Section, upon an ownership change. In general terms, an ownership change may result from transactions that increase the aggregate ownership of certain stockholders in Kodak’s stock by more than 50 percentage points over a testing period (generally three years).

The undistributed earnings of Kodak’s foreign subsidiaries are not considered permanently reinvested. Kodak has a deferred tax liability (net of related foreign tax credits) of \$56 million and \$102 million on the foreign subsidiaries’ undistributed earnings as of December 31, 2016 and 2015, respectively. Kodak has recorded a deferred tax liability of \$20 million and \$19 million for the potential foreign withholding taxes on the undistributed earnings as of December 31, 2016 and 2015, respectively.

Kodak’s valuation allowance as of December 31, 2016 was \$1,209 million. Of this amount, \$237 million was attributable to Kodak’s net deferred tax assets outside the U.S. of \$312 million, and \$972 million related to Kodak’s net deferred tax assets in the U.S. of \$916 million, for which Kodak believes it is not more likely than not that the assets will be realized.

Kodak’s valuation allowance as of December 31, 2015 was \$1,201 million. Of this amount, \$266 million was attributable to Kodak’s net deferred tax assets outside the U.S. of \$344 million, and \$935 million related to Kodak’s net deferred tax assets in the U.S. of \$884 million, for which Kodak believes it is not more likely than not that the assets will be realized.

The net deferred tax assets in excess of the valuation allowance of approximately \$19 million and \$27 million as of December 31, 2016 and 2015, respectively, relate primarily to net operating loss carry-forwards, certain tax credits, and pension related tax benefits for which Kodak believes it is more likely than not that the assets will be realized.

#### Accounting for Uncertainty in Income Taxes

A reconciliation of the beginning and ending amount of Kodak’s liability for income taxes associated with unrecognized tax benefits is as follows (in millions):

	Year Ended December 31,		
	2016	2015	2014
Balance as of January 1	\$85	\$92	\$106
Tax positions related to the current year:			
Additions	—	1	2
Tax positions related to prior years:			
Additions	1	—	1
Reductions	(2)	(7)	(14)
Settlements with taxing jurisdictions	—	—	(1)
Lapses in statute of limitations	—	(1)	(2)
Balance as of December 31	\$84	\$85	\$92

Kodak’s policy regarding interest and/or penalties related to income tax matters is to recognize such items as a component of income tax (benefit) expense. Kodak had approximately \$23 million and \$21 million of interest and penalties associated with uncertain tax benefits accrued as of December 31, 2016 and 2015, respectively.

Kodak had uncertain tax benefits of approximately \$36 million as of December 31, 2016 and 2015 that, if recognized, would affect the effective income tax rate. Kodak has classified certain income tax liabilities as current or noncurrent based on management's estimate of when these liabilities will be settled. The current liabilities are recorded in Other current liabilities in the Consolidated Statement of Financial Position. Noncurrent income tax liabilities are recorded in Other long-term liabilities in the Consolidated Statement of Financial Position.

It is reasonably possible that the liability associated with Kodak's unrecognized tax benefits will increase or decrease within the next twelve months. These changes may be the result of settling ongoing audits or the expiration of statutes of limitations. Such changes to the unrecognized tax benefits could range from \$0 to \$15 million based on current estimates. Audit outcomes and the timing of audit settlements are subject to significant uncertainty. Although management believes that adequate provision has been made for such issues, there is the possibility that the ultimate resolution of such issues could have an adverse effect on the earnings of Kodak. Conversely, if these issues are resolved favorably in the future, the related provision would be reduced, thus having a positive impact on earnings.

During 2014, Kodak reached a settlement outside of the U.S. and settled an audit for calendar year 2003. Kodak originally recorded liabilities for uncertain tax positions ("UTPs") totaling \$8 million (plus interest of approximately \$2 million). The settlement resulted in a reduction in Other current liabilities and the recognition of a \$10 million tax benefit.

Kodak is subject to taxation and files income tax returns in the U.S. federal jurisdiction and in many state and foreign jurisdictions. Kodak has substantially concluded all U.S. federal and state income tax matters for years through 2012 with respective tax authorities. With respect to

countries outside the U.S., Kodak has substantially concluded all material foreign income tax matters through 2009 with respective foreign tax jurisdiction authorities.

NOTE 15: RESTRUCTURING COSTS AND OTHER

Kodak recognizes the need to continually rationalize its workforce and streamline its operations in the face of ongoing business and economic changes. Charges for restructuring initiatives are recorded in the period in which Kodak commits to a formalized restructuring plan, or executes the specific actions contemplated by the plan and all criteria for liability recognition under the applicable accounting guidance have been met.

The activity in the accrued balances and the non-cash charges and credits incurred in relation to restructuring programs during the three years ended December 31, 2016 were as follows (in millions):

	Severance	Exit Costs	Long-lived Asset and Inventory Impairments	Accelerated	Total
	Reserve (1)	Reserve (1)	Write-downs (1)	Depreciation (1)	
Balance as of December 31, 2013	26	8	—	—	34
Charges - continuing operations	51	2	3	2	58
Charges - discontinued operations	3	—	—	—	3
Utilization/cash payments	(47 )	(5 )	(3 )	(2 )	(57 )
Other adjustments & reclasses <sup>(2)</sup>	(11 )	—	—	—	(11 )
Balance as of December 31, 2014	22	5	—	—	27
Charges - continuing operations	32	4	1	8	45
Charges - discontinued operations	1	—	—	—	1
Utilization/cash payments	(36 )	(5 )	(1 )	(8 )	(50 )
Other adjustments & reclasses <sup>(3)</sup>	(12 )	—	—	—	(12 )
Balance as of December 31, 2015	7	4	—	—	11
Charges - continuing operations	14	1	1	—	16
Utilization/cash payments	(14 )	(2 )	(1 )	—	(17 )
Other adjustments & reclasses <sup>(4)</sup>	(2 )	—	—	—	(2 )
Balance as of December 31, 2016	\$ 5	\$ 3	\$ —	\$ —	\$ 8

<sup>(1)</sup>The severance and exit costs reserves require the outlay of cash, while long-lived asset impairments, accelerated depreciation and inventory write-downs represent non-cash items.

<sup>(2)</sup>The \$(11) million includes \$(8) million of severance related charges for pension plan special termination benefits, which were reclassified to Pension and other postretirement liabilities and \$(3) million of foreign currency

translation adjustments.

(3) The \$(12) million includes \$(9) million of severance related charges for pension plan special termination benefits, which were reclassified to Pension and other postretirement liabilities and \$(3) million of foreign currency translation adjustments.

(4) The \$(2) million represents severance related charges for pension plan curtailments and special termination benefits, which were reclassified to Pension and other postretirement liabilities.

#### 2014 Activity

The \$61 million of charges for the year ended December 31, 2014 includes \$2 million for accelerated depreciation which was reported in Cost of revenues, \$56 million which was reported as Restructuring costs and other and \$3 million which was reported in Loss from discontinued operations in the accompanying Consolidated Statement of Operations.

The 2014 severance costs related to the elimination of approximately 775 positions, including approximately 325 manufacturing/service, 350 administrative and 100 research and development positions. The geographic composition of these positions included approximately 425 in the U.S. and Canada, and 350 throughout the rest of the world.

Severance relating to these initiatives was paid in periods through 2016 since, in many instances, the employees whose positions were eliminated can elect or are required to receive their payments over an extended period of time. In addition, certain exit costs, such as long-term lease payments, will continue beyond 2016.

#### 2015 Activity

The \$46 million of charges for the year ended December 31, 2015 included \$8 million for accelerated depreciation which was reported in Cost of revenues, \$37 million which was reported as Restructuring costs and other and \$1 million which was reported in Loss from discontinued operations in the accompanying Consolidated Statement of Operations.

The 2015 severance costs related to the elimination of approximately 600 positions, including approximately 250 manufacturing/service, 250 administrative and 100 research and development positions. The geographic composition of these positions included approximately 275 in the U.S. and Canada, and 325 throughout the rest of the world.

Severance relating to these initiatives was paid in periods through 2016 since, in many instances, the employees whose positions were eliminated can elect or are required to receive their payments over an extended period of time. In addition, certain exit costs, such as long-term lease payments, will continue beyond 2016.

#### 2016 Activity

Restructuring actions taken in 2016 were initiated to reduce Kodak's cost structure as part of its commitment to drive sustainable profitability and included actions associated with the exit of Kodak's silver metal mesh touch screen development, completion of the Leeds plate manufacturing facility exit, as well as various targeted reductions in manufacturing, service, sales, research and development and other administrative functions.

As a result of these actions, for the year ended December 31, 2016 Kodak recorded \$16 million of charges, including \$1 million for inventory write-downs which was reported in Cost of revenues and \$15 million which was reported as Restructuring costs and other in the accompanying Consolidated Statement of Operations.

The 2016 severance costs related to the elimination of approximately 200 positions, including approximately 100 administrative, 75 manufacturing/service, and 25 research and development positions. The geographic composition of these positions included approximately 75 in the U.S. and Canada, and 125 throughout the rest of the world.

As a result of these initiatives, severance payments will continue through 2017 since, in many instances, the employees whose positions were eliminated can elect or are required to receive their payments over an extended period of time. In addition, certain exit costs, such as long-term lease payments, will be paid throughout 2017 and beyond.

#### Leeds Plate Manufacturing Facility Exit

On March 3, 2014, Kodak announced a plan to exit its prepress plate manufacturing facility located in Leeds, England. This decision was pursuant to Kodak's initiative to consolidate manufacturing operations globally, and is expected to result in a more efficient delivery of its products and solutions. Kodak began the exit of the facility in the second quarter of 2014, phased out production at the site in the third quarter of 2015 and has substantially completed the exit of the facility.

Under this program, on a life-to-date basis as of December 31, 2016, Kodak has recorded severance charges of \$10 million, long-lived asset impairment charges of \$3 million, accelerated depreciation charges of \$10 million, and other exit costs of \$2 million.

#### NOTE 16: RETIREMENT PLANS

Substantially all U.S. employees are covered by a noncontributory defined benefit plan, the Kodak Retirement Income Plan ("KRIP"), which is funded by Company contributions to an irrevocable trust fund. The funding policy for KRIP is to contribute amounts sufficient to meet minimum funding requirements as determined by employee benefit and tax laws plus any additional amounts the Company determines to be appropriate. Assets in the trust fund are held for the sole benefit of participating employees and retirees. They are composed of corporate equity and debt securities, U.S.

government securities, partnership investments, interests in pooled funds, commodities, real estate, and various types of interest rate, foreign currency, debt, and equity market financial instruments.

For U.S. employees hired prior to March 1999 KRIP's benefits were generally based on a formula recognizing length of service and final average earnings. KRIP included a separate cash balance formula for all U.S. employees hired after February 1999, as well as employees hired prior to that date who opted in to the cash balance formula during a special election period. Effective January 1, 2015 the KRIP was amended to provide that all participants accrue benefits under a single, revised cash balance formula (the "Cash Balance Plan"). The Cash Balance Plan credits employees' hypothetical accounts with an amount equal to either 7% or 8% of their pay, plus interest based on the 30-year Treasury bond rate.

Many subsidiaries and branches operating outside the U.S. have defined benefit retirement plans covering substantially all employees. Contributions by Kodak for these plans are typically deposited under government or other fiduciary-type arrangements. Retirement benefits are generally based on contractual agreements that provide for benefit formulas using years of service and/or compensation prior to retirement. The actuarial assumptions used for these plans reflect the diverse economic environments within the various countries in which Kodak operates.

Information on the major funded and unfunded U.S. and Non-U.S. defined benefit pension plans is presented below. The composition of the major plans may vary from year to year. If the major plan composition changes, prior year data is conformed to ensure comparability.

Edgar Filing: EASTMAN KODAK CO - Form 10-K

The measurement date used to determine the pension obligation for all funded and unfunded U.S. and Non-U.S. defined benefit plans is December 31.

(in millions)	Year Ended		Year Ended	
	December 31,		December 31,	
	2016	2015	2016	2015
	U.S.	Non-U.S.	U.S.	Non-U.S.

Net pension income	\$(134)	\$ (13 )	\$(106)	\$ (4 )	\$(86 )	\$ 4

Beginning in 2016, Kodak changed the method used to estimate the service and interest cost components of the net periodic pension costs. The new method uses the spot yield curve approach to estimate the service and interest costs by applying the specific spot rates along the yield curve used to determine the benefit obligations to relevant projected cash outflows. Prior to 2016, the service and interest costs were determined using a single weighted-average discount rate based on the AA yield curves used to measure the benefit obligation at the measurement date. Kodak changed to the new method to provide a more precise measure of interest and service costs by improving the correlation between the projected benefit cash flows and the discrete spot yield curve rates. Kodak accounted for this change prospectively as a change in estimate beginning in the first quarter of 2016.

As a result of the methodology change, the 2016 interest cost for the major U.S. and non-U.S. defined benefit pension plans decreased by approximately \$31 million and \$4 million, respectively. The methodology change did not have a material impact on service cost for Kodak's major defined benefit plans.

The pension income before special termination benefits and settlements reported above for the years ended December 31, 2015 and 2014 each include \$1 million which is reported as Loss from discontinued operations.

The special termination benefits of \$3 million, \$9 million and \$8 million for the years ended December 31, 2016, 2015 and 2014, respectively, were incurred as a result of Kodak's restructuring actions and, therefore, have been included in Restructuring costs and other in the Consolidated Statement of Operations for those periods.

Edgar Filing: EASTMAN KODAK CO - Form 10-K

The weighted-average assumptions used to determine the benefit obligation amounts for all major funded and unfunded U.S. and Non-U.S. defined benefit plans were as follows:

	Year Ended December 31,					
	2016		2015		2014	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	3.74%	2.04 %	3.89%	2.50 %	3.50%	2.09 %
Salary increase rate	3.43%	1.99 %	3.37%	1.91 %	3.34%	1.95 %

The weighted-average assumptions used to determine net pension (income) expense for all the major funded and unfunded U.S. and Non-U.S. defined benefit plans were as follows:

	Year Ended December 31,					
	2016		2015		2014	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Effective rate for service cost	3.49%	2.81 %	3.50%	2.09 %	4.19%	3.34 %
Effective rate for interest cost	2.82%	1.90 %	3.50%	2.09 %	4.19%	3.34 %
Salary increase rate	3.37%	1.91 %	3.34%	1.95 %	3.37%	2.62 %
Expected long-term rate of return on plan assets	7.40%	4.65 %	7.40%	4.69 %	7.63%	4.93 %

### Plan Asset Investment Strategy

The investment strategy underlying the asset allocation for the pension assets is to achieve an optimal return on assets with an acceptable level of risk while providing for the long-term liabilities, and maintaining sufficient liquidity to pay current benefits and other cash obligations of the plans. This is primarily achieved by investing in a broad portfolio constructed of various asset classes including equity and equity-like investments, debt and debt-like investments, real estate, private equity and other assets and instruments. Long duration bonds and Treasury bond futures are used to partially match the long-term nature of plan liabilities. Other investment objectives include maintaining broad diversification between and within asset classes and fund managers, and managing asset volatility relative to plan liabilities.

Every three years, or when market conditions have changed materially, each of Kodak's major pension plans will undertake an asset allocation or asset and liability modeling study. The asset allocation and expected return on the plans' assets are individually set to provide for benefits and other cash obligations within each country's legal investment constraints.

Actual allocations may vary from the target asset allocations due to market value fluctuations, the length of time it takes to implement changes in strategy, and the timing of cash contributions and cash requirements of the plans. The asset allocations are monitored, and are rebalanced in accordance with the policy set forth for each plan.

The total plan assets attributable to the major U.S. defined benefit plans at December 31, 2016 relate to KRIP. The expected long-term rate of return on plan assets assumption ("EROA") is based on a combination of formal asset and liability studies that include forward-looking return expectations given the current asset allocation. A review of the

EROA as of December 31, 2016, based upon the current asset allocation and forward-looking expected returns for the various asset classes in which KRIP invests, resulted in an EROA of 7.0%.

As with KRIP, the EROA assumptions for certain of Kodak's other pension plans were reassessed as of December 31, 2016. The annual expected return on plan assets for the major non-U.S. pension plans range from 2.6% to 5.6% based on the plans' respective asset allocations as of December 31, 2016.

#### Plan Asset Risk Management

Kodak evaluates its defined benefit plans' asset portfolios for the existence of significant concentrations of risk. Types of concentrations that are evaluated include, but are not limited to, investment concentrations in a single entity, type of industry, foreign country, and individual fund. Foreign currency contracts and swaps are used to partially hedge foreign currency risk. Additionally, Kodak's major defined benefit pension plans invest in government bond futures and long duration investment grade bonds to partially hedge the liability risk of the plans. As of December 31, 2016 and 2015, there were no significant concentrations (defined as greater than 10% of plan assets) of risk in Kodak's defined benefit plan assets.

Edgar Filing: EASTMAN KODAK CO - Form 10-K

The Company's weighted-average asset allocations for its major U.S. defined benefit pension plans by asset category, are as follows:

Asset Category	As of December 31,		
	2016	2015	2016 Target
Equity securities	16 %	15 %	12-18%
Debt securities	33 %	35 %	32-38%
Real estate	3 %	3 %	0-6%
Cash and cash equivalents	3 %	1 %	0-6%
Global balanced asset allocation funds	14 %	13 %	10-20%
Other	31 %	33 %	25-35%
Total	100%	100 %	

The Company's weighted-average asset allocations for its major Non-U.S. defined benefit pension plans by asset category, are as follows:

Asset Category	As of December 31,		
	2016	2015	2016 Target
Equity securities	3 %	3 %	1-10%
Debt securities	33 %	35 %	25-35%
Real estate	0 %	0 %	0-6%
Cash and cash equivalents	2 %	3 %	0-6%
Global balanced asset allocation funds	4 %	6 %	0-10%
Other	58 %	53 %	55-65%
Total	100%	100 %	

#### Fair Value Measurements

Kodak's asset allocations by level within the fair value hierarchy at December 31, 2016 and 2015 are presented in the tables below for Kodak's major defined benefit plans. Kodak's plan assets are accounted for at fair value and are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement, with the exception of investments for which fair value is measured using the net asset value per share expedient. Kodak's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value of assets and their placement within the fair value hierarchy levels.

Assets not utilizing the net asset value per share expedient are valued as follows: Equity and debt securities traded on an active market are valued using a market approach based on the closing price on the last business day of the year. Real estate investments are valued primarily based on independent appraisals and discounted cash flow models, taking

into consideration discount rates and local market conditions. Cash and cash equivalents are valued utilizing cost approach valuation techniques. Other investments are valued using a combination of market, income, and cost approaches, based on the nature of the investment. Private equity investments are valued primarily based on independent appraisals, discounted cash flow models, cost, and comparable market transactions, which include inputs such as discount rates and pricing data from the most recent equity financing. Insurance contracts are primarily valued based on contract values, which approximate fair value. For investments with lagged pricing, Kodak uses the available net asset values, and also considers expected return, subsequent cash flows and relevant material events.
