**Garmin Ltd. and Subsidiaries**

**Notes to Condensed Consolidated Financial Statements (Unaudited)**

**June 30, 2018**

**(In thousands, except per share information)**

**1. Accounting Policies**

**Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Additionally, the condensed consolidated financial statements should be read in conjunction with Item 2 of Management's Discussion and Analysis of Financial Condition and Results of Operations, included in this Form 10-Q. Operating results for the 13-week and 26-week periods ended June 30, 2018 are not necessarily indicative of the results that may be expected for the year ending December 29, 2018.

The condensed consolidated balance sheet at December 30, 2017 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 30, 2017.

The Company's fiscal year is based on a 52-53 week period ending on the last Saturday of the calendar year. Therefore, the financial results of certain 53-week fiscal years, and the associated 14-week quarters, will not be exactly comparable to the prior and subsequent 52-week fiscal years and the associated 13-week quarters. The quarters ended June 30, 2018 and July 1, 2017 both contain operating results for 13 weeks.

As previously announced and discussed below within the “Recently Adopted Accounting Standards” section of this footnote, effective beginning in the 2018 fiscal year, we adopted the requirements of Accounting Standards Update (“ASU”) No. 2014-09, Revenue from Contracts with Customers (Topic 606), using the full retrospective method. All amounts and disclosures set forth in this Form 10-Q reflect these changes. Further, as a result of the adoption of certain other accounting standards described below, effective beginning in the 2018 fiscal year, certain amounts in prior periods have been reclassified to conform to the current period presentation.

## **Recently Adopted Accounting Standards**

### *Revenue from Contracts with Customers*

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”), which supersedes previous revenue recognition guidance. The FASB issued several updates amending or relating to ASU 2014-09 (collectively, the “new revenue standard”). The Company has adopted the new revenue standard effective beginning in the 2018 fiscal year using the full retrospective method, which requires the Company to restate each prior reporting period presented in future financial statement issuances. The impacts of the new revenue standard relate to our accounting for certain arrangements within the auto segment.

A portion of the Company’s auto segment contracts have historically been accounted for under Accounting Standards Codification (ASC) Topic 985-605 Software-Revenue Recognition (Topic 985-605). Under Topic 985-605, the Company deferred revenue and associated costs of all elements of multiple-element software arrangements if vendor-specific objective evidence of fair value (VSOE) could not be established for an undelivered element (e.g. map updates). In applying the new revenue standard to certain contracts that include both software licenses and map updates, we will recognize the portion of revenue and costs related to the software license at the time of delivery rather than ratably over the map update period.

Additionally, for certain multiple-element arrangements within the Company's auto segment, the Company's policy has been to allocate consideration to traffic services and recognize the revenue and associated cost of royalties ratably over the estimated life of the underlying product. Under the new revenue standard, we will recognize revenue and associated costs of royalties related to certain traffic services at the time of hardware and/or software delivery. Specifically, the new revenue standard emphasizes the timing of the Company's performance, and upon delivery of the navigation device and/or software, the Company has fully performed its obligation with respect to the design and production of the product to receive and interpret the broadcast traffic signal for the benefit of the end user.

The changes in accounting policy described above collectively result in reductions to deferred costs (asset) and deferred revenue (liability) balances, and accelerate the recognition of revenues and deferred costs in the auto segment going forward.

Summarized financial information depicting the impact of the new revenue standard is presented below. The Company's historical net cash flows provided by or used in operating, investing, and financing activities are not impacted by adoption of the new revenue standard.

The Restated results presented above are restated under ASC Topic 606. Amounts related to the income tax effect of the new standard that were previously disclosed as the anticipated adoption impact in Note 2, Summary of (2) Significant Accounting Policies, in the notes to the consolidated financial statements of our fiscal 2017 Annual Report on Form 10-K filed with the SEC on February 21, 2018 have been revised in this Note by immaterial amounts in connection with our adoption of ASC Topic 606.

#### *Financial Instruments – Recognition, Measurement, Presentation, and Disclosure*

In January 2016, the FASB issued Accounting Standards Update No. 2016-01, Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities (“ASU 2016-01”). The standard addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The Company has adopted the new standard effective beginning in the 2018 fiscal year. The adoption did not have a material impact on the Company’s financial position or results of operations.

#### *Statement of Cash Flows*

In August 2016, the FASB issued Accounting Standards Update No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (“ASU 2016-15”), which adds or clarifies guidance on the classification of certain cash receipts and payments in the statement of cash flows. The standard addresses eight specific cash flow issues with the objective of reducing diversity in practice. In November 2016, the FASB issued Accounting Standards Update No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash (“ASU 2016-18”), which requires restricted cash and restricted cash equivalents to be included with cash and cash equivalents when reconciling changes in the total amounts within the statement of cash flows. The Company has adopted the new standards effective beginning in the 2018 fiscal year. The adoption of ASU 2016-15 did not have a material impact to the Company’s statements of cash flows. The amendments of ASU 2016-18 were applied using a retrospective transition method, resulting in immaterial changes to the presentation of the Company’s statements of cash flows.

The total of cash and cash equivalents and restricted cash balances presented on the condensed consolidated balance sheet reconciles to the total cash, cash equivalents, and restricted cash shown in the condensed consolidated statements of cash flows.

*Income Taxes*

In October 2016, the FASB issued Accounting Standards Update No. 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other than Inventory (“ASU 2016-16”), which requires recognition of the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The Company has adopted the new standard effective beginning in the 2018 fiscal year, which resulted in a reclassification of \$1,700 of certain prepaid tax balances in a cumulative effect to retained earnings as of the date of adoption.

### *Income Statement – Reporting Comprehensive Income*

In February 2018, the FASB issued Accounting Standards Update No. 2018-02, Income Statement – Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income (“ASU 2018-02”), which allows for stranded tax effects in accumulated other comprehensive income resulting from the U.S. Tax Cuts and Jobs Act to be reclassified to retained earnings. The Company has elected to early adopt the new standard effective beginning in the 2018 fiscal year, resulting in reclassification of approximately \$452 from accumulated other comprehensive income into retained earnings. The tax effects that were reclassified only relate to amounts resulting from the U.S. Tax Cuts and Jobs Act.

### **Significant Accounting Policies**

For a description of the significant accounting policies and methods used in the preparation of the Company’s condensed consolidated financial statements, refer to Note 2, “Summary of Significant Accounting Policies” in the Notes to the Consolidated Financial Statements in Part II, Item 8 of the Company’s Annual Report on Form 10-K for the fiscal year ended December 30, 2017. Other than the policies discussed below, there were no material changes to the Company’s significant accounting policies during the 26-week period ended June 30, 2018.

### *Revenue Recognition*

The Company recognizes revenue upon the transfer of control of promised products or services to the customer in an amount that depicts the consideration the Company expects to be entitled to for the related products or services. For the large majority of the Company’s sales, transfer of control occurs once product has shipped and title and risk of loss have transferred to the customer. The Company offers certain tangible products with ongoing services promised over a period of time, typically the useful life of the related tangible product. When we have identified such services as both capable of being distinct and separately identifiable from the related tangible product, the associated revenue allocated to such services is recognized over time. The Company generally does not offer specified or unspecified upgrade rights to its customers in connection with software sales.

For products that include tangible hardware that contains software essential to the tangible product’s functionality and ongoing services identified as separately identifiable performance obligations, the Company allocates revenue to all performance obligations based on their relative standalone selling prices (“SSP”), with the amounts allocated to ongoing services deferred and recognized over a period of time. These ongoing services primarily consist of the Company’s contractual promises to provide personal navigation device (PND) users with lifetime map updates (LMU) and server-based traffic services. In addition, we provide map update services (map care) over a contractual period in

certain hardware and software contracts with original equipment manufacturers (OEMs). The Company has determined that directly observable prices do not exist for LMU, map care, or server-based traffic, as stand-alone and unbundled unit sales do not occur on more than a limited basis. Therefore, the Company uses the expected cost plus a margin as the primary indicator to calculate relative SSP of the LMU, map care, and traffic performance obligations. The revenue and associated costs allocated to the LMU, map care, and/or the server-based traffic service are deferred and recognized ratably over the estimated life of the products of approximately 3 years for PNDs, or the contractual map care period in OEM contracts of 3-10 years as we believe our efforts as it relates to providing these services are spread evenly throughout the performance period. In addition to the products listed above, the Company has offered certain other products with ongoing performance obligations including mobile applications, incremental navigation and/or communication service subscriptions, aviation database subscriptions, and extended warranties that are individually immaterial.

The Company records revenue net of sales tax and variable consideration such as trade discounts and customer returns. Payment is due typically within 90 days or less of shipment of product, or upon the grant of a given software license (as applicable). The Company records estimated reductions to revenue in the form of variable consideration for customer sales programs, returns and incentive offerings including rebates, price protection (product discounts offered to retailers to assist in clearing older products from their inventories in advance of new product releases), promotions and other volume-based incentives. The reductions to revenue are based on estimates and judgments using historical experience and expectation of future conditions. Changes in these estimates could negatively affect the Company's operating results. These incentives are reviewed periodically and, with the exceptions of price protection and certain other promotions, typically accrued for on a percentage of sales basis.

*Deferred Revenues and Costs*

Deferred revenue consists primarily of the transaction price allocated to performance obligations that are recognized over a period of time basis as discussed in the *Revenue Recognition* portion of this footnote. Billings associated with such items are typically completed upon the transfer of control of promised products or services to the customer and recorded to accounts receivable until payment is received. Deferred costs primarily refer to the royalties incurred by the Company associated with the aforementioned unsatisfied performance obligations, which are amortized over the same period as the revenue is recognized. The Company typically pays the associated royalties either monthly or quarterly in arrears, on a per item shipped or installed basis.

The Company applies a practical expedient, as permitted within ASC 340, to expense as incurred the incremental costs to obtain a contract when the amortization period of the asset that would have otherwise been recognized is one year or less.

*Shipping and Handling Costs*

Shipping and handling activities are typically performed before the customer obtains control of the good, and the related costs are therefore expensed as incurred. Shipping and handling costs are included in cost of goods sold in the accompanying condensed consolidated financial statements.

## 2. **Inventories**

The components of inventories consist of the following:

## 5. Warranty Reserves

The Company's products sold are generally covered by a standard warranty for periods ranging from one to three years. The Company's estimate of costs to service its warranty obligations are based on historical experience and expectation of future conditions and are recorded as a liability on the balance sheet. The following reconciliation provides an illustration of changes in the aggregate warranty reserve.

|   | 13-Weeks Ended   |                 |

## 6. Commitments and Contingencies

### Commitments

The Company is party to certain commitments, which include purchases of raw materials, advertising expenditures, and other indirect purchases in connection with conducting our business. The aggregate amount of purchase orders and other commitments open as of June 30, 2018 was approximately \$343,000. We cannot determine the aggregate amount of such purchase orders that represent contractual obligations because purchase orders may represent authorizations to purchase rather than binding agreements. Our purchase orders are based on our current needs and are typically fulfilled within short periods of time.

## Contingencies

In the normal course of business, the Company and its subsidiaries are parties to various legal claims, investigations and complaints, including matters alleging patent infringement and other intellectual property claims. The Company evaluates, on a quarterly and annual basis, developments in legal proceedings, investigations, claims, and other loss contingencies that could affect any required accrual or disclosure or estimate of reasonably possible loss or range of loss. An estimated loss from a loss contingency is accrued by a charge to income if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. If a range of loss is estimated, and some amount within that range appears to be a better estimate than any other amount within that range, then that amount is accrued. If no amount within the range can be identified as a better estimate than any other amount, the Company accrues the minimum amount in the range.

If an outcome unfavorable to the Company is determined to be probable, but the amount of loss cannot be reasonably estimated or is determined to be reasonably possible, but not probable, we disclose the nature of the contingency and an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. The Company's aggregate range of reasonably possible losses includes (1) matters where a liability has been accrued and there is a reasonably possible loss in excess of the amount accrued for that liability, and (2) matters where a loss is believed to be reasonably possible, but not probable, and a liability therefore has not been accrued. This aggregate range only represents the Company's estimate of reasonably possible losses and does not represent the Company's maximum loss exposure. The assessment regarding whether a loss is probable or reasonably possible, and whether the loss or a range of loss is estimable, often involves a series of complex judgments about future events. In assessing the probability of an outcome in a lawsuit, claim or assessment that could be unfavorable to the Company, we consider the following factors, among others: a) the nature of the litigation, claim, or assessment; b) the progress of the case; c) the opinions or views of legal counsel and other advisers; d) our experience in similar cases; e) the experience of other entities in similar cases; and f) how we intend to respond to the lawsuit, claim, or assessment. Costs incurred in defending lawsuits, claims or assessments are expensed as incurred.

Management of the Company currently does not believe it is reasonably possible that the Company may have incurred a material loss, or a material loss in excess of recorded accruals, with respect to loss contingencies in the aggregate, for the fiscal quarter ended June 30, 2018. The results of legal proceedings, investigations and claims, however, cannot be predicted with certainty. An adverse resolution of one or more of such matters in excess of management's expectations could have a material adverse effect in the particular quarter or fiscal year in which a loss is recorded, but based on information currently known, the Company does not believe it is likely that losses from such matters would have a material adverse effect on the Company's business or its consolidated financial position, results of operations or cash flows.

## 7. Income Taxes

The Company recorded income tax expense of \$45,726 in the 13-week period ended June 30, 2018, compared to income tax expense of \$57,348 in the 13-week period ended July 1, 2017, which included tax expense of \$7,275 associated with the expiration of share-based awards. The effective tax rate was 19.4% in the second quarter of 2018, compared to 24.5% in the second quarter of 2017. Excluding the effect of the \$7,275 tax expense associated with the expiration of share-based awards in second quarter of 2017, the second quarter of 2018 effective tax rate decreased 200 basis points compared to the effective tax rate in the prior year quarter primarily due to the reduction of the U.S. corporate tax rate.

The Company recorded income tax expense of \$70,333 in the first half of 2018, compared to an income tax benefit of \$92,680 in the first half of 2017, which included tax expense of \$7,275 associated with the expiration of share-based awards and an income tax benefit of \$168,755 primarily related to the revaluation of certain Switzerland deferred tax assets resulting from the Company's election in the first quarter of 2017 to align certain Switzerland corporate tax positions with international tax initiatives. The effective tax rate was 18.0% in the first half of 2018, compared to (28.7%) in the first half of 2017. Excluding the income tax benefit of \$168,755 primarily related to the revaluation of Switzerland deferred tax assets, and the \$7,275 tax expense due to the expiration of share-based awards, the effective tax rate for the first half of 2018 decreased 330 basis points compared to the effective tax rate in the first half of 2017 primarily due to the reduction of the U.S. corporate tax rate.

On December 22, 2017, the Tax Cuts and Jobs Act was enacted into law in the United States. Due to the complexities of the new tax legislations, the SEC issued Staff Accounting Bulletin No. 118 ("SAB 118") which allows for the recognition of provisional amounts during a measurement period. The Company recorded a provisional re-measurement of its deferred tax assets and liabilities in the fourth quarter of 2017. Income tax expense recorded in the second quarter of 2018 includes the impact of the new tax legislation as currently interpreted by the Company. The Company will continue to assess the impact of the new tax legislation, as well as any related future regulations and rules, and will record any additional impacts as identified during the measurement period, if necessary. The Company does not expect such potential adjustments in future periods will materially impact the Company's financial condition or result of operations.

## 8. Marketable Securities

The Financial Accounting Standards Board ("FASB") ASC topic entitled Fair Value Measurements and Disclosures defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The accounting guidance classifies the inputs used to measure fair value into the following hierarchy:

- Level 1      Unadjusted quoted prices in active markets for the identical asset or liability
  
- Level 2      Observable inputs for the asset or liability, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability
  
- Level 3      Unobservable inputs for the asset or liability

The Company endeavors to utilize the best available information in measuring fair value. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Valuation is based on prices obtained from an independent pricing vendor using both market and income approaches. The primary inputs to the valuation include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, and credit spreads.

The method described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Available-for-sale securities measured at fair value on a recurring basis are summarized below:

The Company's investment policy targets low risk investments with the objective of minimizing the potential risk of principal loss. The fair value of our securities varies from period to period due to changes in interest rates, in the performance of the underlying collateral and in the credit performance of the underlying issuer, among other factors. The Company does not intend to sell the securities that have an unrealized loss shown in the table above, and it is not more likely than not that the Company will be required to sell a security before recovery of its amortized costs basis, which may be maturity.

The Company recognizes the credit component of other-than-temporary impairments of debt securities in "Other Income" and the noncredit component in "Other comprehensive income (loss)" for those securities that we do not intend to sell and for which it is not more likely than not that we will be required to sell before recovery. During fiscal 2017 and the 26-week period ended June 30, 2018, the Company did not record any material impairment charges on its outstanding securities.

The amortized cost and fair value of the securities at an unrealized loss position as of June 30, 2018 were \$1,470,296 and \$1,422,727, respectively. Approximately 83% of securities in our portfolio were at an unrealized loss position as of June 30, 2018. We have the ability to hold these securities until maturity or their value is recovered. We do not consider these unrealized losses to be other than temporary credit losses because there has been no material deterioration in credit quality and no change in the cash flows of the underlying securities. We do not intend to sell the securities and it is not more likely than not that we will be required to sell the securities; therefore, no material impairment has been recorded in the accompanying condensed consolidated statement of income.

The cost of securities sold is based on the specific identification method.

The following tables display additional information regarding gross unrealized losses and fair value by major security type for available-for-sale securities in an unrealized loss position as of June 30, 2018 and December 30, 2017.

## 10. Revenue

In order to further depict how the nature, amount, timing and uncertainty of our revenue and cash flows are affected by economic factors, we disaggregate revenue (or “net sales”) by major product category, geographic region, and pattern of recognition.

The Company has identified six major product categories – aviation, marine, outdoor, fitness, auto PND, and auto OEM. Note 4 – Segment Information contains disaggregated revenue information of the aviation, marine, outdoor and fitness major product categories. The auto OEM and auto PND major product categories comprised 30% and 70%, respectively, of the auto segment revenue presented in Note 4 for the 13-weeks ended June 30, 2018 and July 1, 2017. Auto OEM comprised 33% and 31% of auto segment revenue for the 26-weeks ended June 30, 2018 and July 1, 2017, respectively, while auto PND comprised 67% and 69% of auto segment revenue during the same respective periods. Disaggregated revenue by geographic region (Americas, APAC, and EMEA) is also presented in Note 4.

Edgar Filing: GARMIN LTD - Form 10-Q

A large majority of the Company's sales are recognized on a point in time basis, usually once the product is shipped and title and risk of loss have transferred to the customer. Sales recognized over a period of time are primarily within the auto segment and relate to performance obligations that are satisfied over the life of the product or contractual service period. Revenue disaggregated by the timing of transfer of the goods or services is presented in the table below:

|               | 13-Weeks Ended   |                 | 26-Weeks Ended   |                 |
|---------------|------------------|-----------------|------------------|-----------------|
|               | June 30,<br>2018 | July 1,<br>2017 | June 30,<br>2018 | July 1,<br>2017 |
| Point in time | \$854,260        | \$789,867       | \$1,525,524      | \$1,389,612     |

Transaction price and costs associated with the Company's unsatisfied performance obligations are reflected as deferred revenue and deferred costs, respectively, on the Company's Condensed Consolidated Balance Sheets. Such amounts are recognized ratably over the applicable service period or estimated useful life. Changes in deferred revenue and costs during the 26-weeks ended June 30, 2018 are presented below:

|                                    | 26-Weeks Ended<br>June 30,<br>2018        |                                     |

| Balance, end of period             | \$ 182,682                                | \$ 62,587                           |

(1) Deferred revenue is comprised of both Deferred revenue and Noncurrent deferred revenue per the Condensed Consolidated Balance Sheets

(2) Deferred costs are comprised of both Deferred costs and Noncurrent deferred costs per the Condensed Consolidated Balance Sheets

Of the \$79,801 of deferred revenue recognized in the 26-weeks ended June 30, 2018, \$59,759 was deferred as of the beginning of the period.

Approximately two-thirds of the \$182,682 of deferred revenue at the end of the period, June 30, 2018, is recognized ratably over a period of three years or less.

## 11. Recently Issued Accounting Pronouncements Not Yet Adopted

### *Leases*

In February 2016, the FASB issued Accounting Standards Update No. 2016-02, Leases (Topic 842) ("ASU 2016-02"), which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. The FASB subsequently issued Accounting Standards Update No. 2018-10, which includes clarifications

and improvements to ASU 2016-02 (collectively, the “new lease standard”). The new lease standard requires lessees to present a right-of-use asset and a corresponding lease liability on the balance sheet. Lessor accounting is substantially unchanged compared to the current accounting guidance. Additional footnote disclosures related to leases will also be required. The new lease standard is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted.

The Company plans to adopt Topic 842 effective at the beginning of the 2019 fiscal year using the modified retrospective approach. The Company plans on electing the package of transitional practical expedients upon adoption which, among other provisions, allows the Company to carry forward historical lease classification. The Company is also in the process of implementing changes to accounting policies, processes, systems, and internal controls. The new standard will result in increases to the assets and liabilities on the Company’s consolidated balance sheets. The Company is currently evaluating the full impact of adopting the new standard.

*Receivables – Nonrefundable Fees and Other Costs*

In March 2017, the FASB issued Accounting Standards Update No. 2017-08, Receivables – Nonrefundable Fees and Other Costs (Topic 310-20): Premium Amortization on Purchased Callable Debt Securities (“ASU 2017-08”), which shortens the amortization period for certain callable debt securities held at a premium, requiring the premium to be amortized to the earliest call date. Callable debt securities held at a discount continue to be amortized to maturity. ASU 2017-08 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2019. Early adoption is permitted. The Company is currently evaluating the impact of adopting the new standard on its consolidated financial statements.

**Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations**

**Overview**

The discussion set forth below, as well as other portions of this Quarterly Report, contains statements concerning potential future events. Such forward-looking statements are based upon assumptions by management, as of the date of this Quarterly Report, including assumptions about risks and uncertainties faced by the Company. Readers can identify these forward-looking statements by their use of such verbs as expects, anticipates, believes or similar verbs or conjugations of such verbs. If any of the Company’s assumptions prove incorrect or should unanticipated circumstances arise, actual results could materially differ from those anticipated by such forward-looking statements. The differences could be caused by a number of factors or combination of factors including, but not limited to, those factors identified in the Company’s Annual Report on Form 10-K for the year ended December 30, 2017. This report has been filed with the Securities and Exchange Commission (the "SEC" or the "Commission") in Washington, D.C. and can be obtained by contacting the SEC's public reference operations or obtaining it through the SEC's website at <http://www.sec.gov>. Readers are strongly encouraged to consider those factors when evaluating any forward-looking statement concerning the Company. The Company will not update any forward-looking statements in this Quarterly Report to reflect future events or developments.

The information contained in this Management’s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto included in this Form 10-Q and the audited financial statements and notes thereto in the Company’s Annual Report on Form 10-K for the year ended December 30, 2017.

The Company is a leading worldwide provider of navigation, communications and information devices, most of which are enabled by Global Positioning System, or GPS, technology. We operate in five reportable segments, the outdoor,

fitness, marine, auto and aviation markets. The Company's segments offer products through its network of independent dealers and distributors. However, the nature of products and types of customers for the five segments may vary significantly. As such, the segments are managed separately.

The Company adopted the new accounting standard for revenue recognition, as discussed in Note 1 – Accounting Policies of the Notes to Condensed Consolidated Financial Statements, effective beginning with the Company's first quarter of 2018. Adoption of the new revenue recognition standard was applied using the full retrospective method, and information for prior periods within Results of Operations have been restated accordingly.

**Results of Operations**

The following table sets forth the Company's results of operations as a percent of net sales during the periods shown (the table may not foot due to rounding):

Allocation of certain research and development expenses, and selling, general, and administrative expenses are made to each segment on a percent of revenue basis. The segment table located in Note 4 to the Condensed Consolidated Financial Statements sets forth the Company's results of operations (in thousands) including net sales, gross profit, and operating income for each of the Company's five segments during the periods shown. For each line item in the table, the total of the outdoor, fitness, marine, auto, and aviation segments' amounts equals the amount in the condensed consolidated statements of income included in Item 1.

Net sales increased 8% for the 13-week period ended June 30, 2018 when compared to the year-ago quarter. The outdoor, aviation, marine, and fitness segments collectively increased by 17%, contributing 80% of total revenue. Fitness was the largest portion of our revenue mix at 25% in the second quarter of 2018 compared to 22% in the second quarter of 2017. Auto revenue represented the largest portion of our revenue mix in the second quarter of 2017 at 27% and declined to 20% in the second quarter of 2018.

Total unit sales in the second quarter of 2018 decreased to 3,783 when compared to total unit sales of 3,904 in the second quarter of 2017.

Auto segment revenue decreased 19% from the year-ago quarter, primarily due to the ongoing PND market contraction. Outdoor, fitness, marine, and aviation segment revenues increased 4%, 24%, 24%, and 23%, respectively, when compared to the year-ago quarter. The current quarter marine segment increase was primarily driven by sales of the newly acquired Navionics business, in addition to sales growth across most product lines. The fitness segment revenues increase was primarily driven by strong sales in advanced wearables and cycling products. Outdoor and aviation segment revenue increases were driven by increased sales across most product lines within each segment.

Cost of goods sold increased 7% in absolute dollars compared to the prior year quarter. The increase in revenues outpaced the increase in cost of goods sold, which resulted in a 30 basis point decrease in cost of goods sold as a percent of revenues compared to the year-ago quarter.

In the auto segment, cost of goods sold continued to decline with revenue declines and the slight increase of cost of goods sold as a percent of revenue was primarily due to the write-down of certain product inventories in the second quarter of 2018. In the marine segment, the decrease in cost of goods sold as a percent of revenue primarily resulted from the favorable impact of higher margin Navionics sales on product mix. The outdoor segment increase in cost of goods sold as a percent of revenue primarily resulted from increased promotional activity during the second quarter of 2018. The fitness and aviation segments increase in cost of goods was largely consistent with the increase in sales.

Gross profit dollars in the second quarter of 2018 increased 8% while gross margin increased 30 basis points compared to the year-ago quarter. Gross margin in the outdoor and auto segments decreased compared to the year-ago quarter, as discussed above. Gross margin in the marine segment increased compared to the year-ago quarter, as discussed above. Gross margin remained relatively flat across the aviation and fitness segments.

Advertising expense increased 4% in absolute dollars and was relatively flat as a percent of revenues compared to the year-ago quarter. The total absolute dollar increase was driven primarily by increased cooperative advertising associated with higher sales. Auto advertising expense, in absolute dollars and as a percent of revenue, increased compared to the year-ago quarter primarily due to a refresh of point-of-sale displays. Outdoor advertising expense decreased in absolute dollars and as a percent of revenues due to reduced media advertising spend. Advertising expense, as a percent of revenues, decreased in the fitness segment due to greater leverage on fitness advertising spend.

Selling, general and administrative expense increased 14% in absolute dollars and was relatively flat as a percent of revenues compared to the year-ago quarter. The absolute dollar increase in the second quarter of 2018 was primarily attributable to personnel costs and expenses from recent acquisitions. The auto segment increase as a percent of revenues in the second quarter of 2018 was primarily attributable to accelerated amortization of an intangible asset related to a previous acquisition. The increase in absolute dollars and as a percent of revenues in the marine segment was primarily attributable to expenses associated with recent acquisitions.

Research and development expense increased \$14.5 million in absolute dollars and was relatively flat as a percent of revenues compared to the year-ago quarter. This increase was primarily due to engineering personnel costs related to wearable and aviation product offerings and expenses resulting from recent acquisitions within the marine segment. Our research and development spending is focused on product development, improving existing software capabilities, and exploring new categories.

Operating income increased 4% in absolute dollars and decreased 90 basis points as a percent of revenue when compared to the year-ago quarter. The growth in operating income in absolute dollars is primarily attributable to revenue growth while the slight decrease in operating income as a percent of revenues is primarily attributable to the increased operating expenses, as discussed above.

The average return on cash and investments, including interest and capital gains/losses, during the second quarter of 2018 was 1.9% compared to 1.6% during the same quarter of 2017. Interest income increased primarily due to slightly higher yields on fixed-income securities.

Foreign currency gains and losses for the Company are typically driven by movements in the Taiwan Dollar, Euro, and British Pound Sterling in relation to the U.S. Dollar. The Taiwan Dollar is the functional currency of Garmin Corporation, the U.S. Dollar is the functional currency of Garmin (Europe) Ltd., and the Euro is the functional currency of most of our other European subsidiaries, although some transactions and balances are denominated in British Pounds. The majority of the Company's consolidated foreign currency gain or loss is typically driven by the significant cash and marketable securities, receivables and payables held in a currency other than the functional currency at a given legal entity. Due to the relative size of the entities using a functional currency other than the Taiwan Dollar, Euro, and British Pound Sterling, currency fluctuations related to these entities are not expected to have a material impact on the Company's financial statements.

The \$2.6 million currency gain recognized in the second quarter of 2018 was primarily due to the strengthening of the U.S. Dollar against the Taiwan Dollar, partially offset by the U.S. Dollar strengthening against the Euro and British Pound Sterling within the 13-weeks ended June 30, 2018. During this period, the U.S. Dollar strengthened 4.7% against the Taiwan Dollar, resulting in a gain of \$26.7 million, while the U.S. Dollar strengthened 5.2% against the Euro and 5.8% against the British Pound Sterling, resulting in losses of \$14.0 million and \$1.9 million, respectively. The remaining net currency loss of \$8.2 million was related to other currencies and timing of transactions.

The \$15.1 million currency gain recognized in the second quarter of 2017 was primarily due to the weakening of the U.S. Dollar against the Euro and the British Pound Sterling and slight strengthening against the Taiwan Dollar within the 13-weeks ended July 1, 2017. During this period, the U.S. Dollar weakened 7.3% against the Euro and 3.8% against the British Pound Sterling, resulting in gains of \$11.5 million and \$2.7 million, respectively, while the U.S. Dollar strengthened 0.3% against the Taiwan Dollar, resulting in a gain of \$1.3 million. The remaining net currency loss of \$0.4 million was related to other currencies and timing of transactions.

### ***Income Tax Provision***

The Company recorded income tax expense of \$45.7 million in the 13-week period ended June 30, 2018, compared to income tax expense of \$57.3 million in the 13-week period ended July 1, 2017, which included tax expense of \$7.3 million associated with the expiration of share-based awards. The effective tax rate was 19.4% in the second quarter of 2018, compared to 24.5% in the second quarter of 2017. Excluding the effect of the \$7.3 million tax expense associated with the expiration of share-based awards in second quarter of 2017, the second quarter of 2018 effective tax rate decreased 200 basis points compared to the effective tax rate in the prior year quarter primarily due to the reduction of the U.S. corporate tax rate.

### ***Net Income***

As a result of the above, net income for the 13-weeks ended June 30, 2018 was \$190.3 million compared to \$177.0 million for the 13-week period ended July 1, 2017, an increase of \$13.3 million.

Net sales increased 9% for the 26-week period ended June 30, 2018 when compared to the year-ago period. The outdoor, aviation, marine, and fitness segments collectively increased by 18%, contributing 80% of total revenue. Fitness was the largest portion of our revenue mix at 24% in the first half of 2018 compared to 22% in the first half of 2017. Auto revenue represented the largest portion of our revenue mix in the first half of 2017 at 26% and declined to 20% in the first half of 2018.

Total unit sales in the first half of 2018 decreased to 6,739 when compared to the total unit sales of 7,003 in the first half of 2017.

Auto segment revenue decreased 16% from the year-ago period, primarily due to the ongoing PND market contraction. Outdoor, fitness, marine, and aviation segment revenues increased 11%, 23%, 17%, and 21%, respectively, from the year-ago period. Marine segment revenue increases were primarily driven by sales from recent acquisitions. Fitness segment revenue increases were primarily driven by strong growth in advanced wearables and newly introduced products. Outdoor segment revenue increases were primarily driven by significant growth in the wearable category. Aviation revenue increases were driven by strong sales across most product lines.

Cost of goods sold increased 6% in absolute dollars for the 26-week period ended June 30, 2018 when compared to the year-ago period. The increase in revenues outpaced the increase in cost of goods sold, which resulted in a 100 basis point decrease in cost of goods sold as a percent of revenues compared to the year-ago period.

In the auto segment, cost of goods sold continued to decline with revenue declines and the slight increase of cost of goods sold as a percent of revenue was primarily due to the write-down of certain product inventories in the first half of 2018. In the marine segment, the decrease in cost of goods sold as a percent of revenue primarily resulted from the favorable impact of higher margin Navionics sales on product mix. In the fitness segment, the decrease in cost of goods sold as a percent of revenue resulted from a shift in product mix toward higher margin products. In the outdoor and aviation segments, cost of goods sold as a percent of revenue were relatively flat compared to the year-ago period.

Gross profit dollars in the 26-week period ended June 30, 2018 increased 11% while gross margin increased 100 basis points when compared to the year-ago period. Gross margin declined in the auto segment, as discussed above. Gross margin increased in the fitness and marine segments primarily due to product mix, as discussed above. Gross margin

remained relatively flat within the outdoor and aviation segments.

Selling, general and administrative expense increased 15% in absolute dollars and increased 70 basis points as a percent of revenues when compared to the year-ago period. The absolute dollar increase was primarily attributable to personnel costs and expenses from recent acquisitions within the marine segment. All segments, except for marine, were relatively flat as a percent of revenues.

In absolute dollars, research and development costs increased \$34.2 million when compared with the year-ago period and increased 70 basis points as a percent of revenue. The absolute dollar increase in research and development expenses when compared with the year-ago period was primarily due to engineering personnel costs related to our wearable and aviation product offerings and expenses resulting from prior year acquisitions within the marine segment. Our research and development spending is focused on product development, improving existing software capabilities, and exploring new categories.

Operating income increased 10% in absolute dollars and was relatively flat as a percent of revenue when compared to the year-ago period. The growth in operating income on an absolute dollar basis was the result of strong revenue growth. Operating income was relatively flat as a percent of revenue primarily due to an increase in gross margin, offset by increased operating expenses as discussed above.

The average return on cash and investments, including interest and capital gains/losses, during the 26-week period ended June 30, 2018 was 1.8% compared to 1.5% during the same 26-week period ended July 1, 2017. Interest income increased primarily due to slightly higher yields on fixed-income securities.

The \$3.5 million currency gain recognized in the first half of 2018 was primarily due to the strengthening of the U.S. Dollar against the Taiwan Dollar, partially offset by the U.S. Dollar strengthening against the Euro and British Pound Sterling within the 26-weeks ended June 30, 2018. During this period, the U.S. Dollar strengthened 2.7% against the Taiwan Dollar, resulting in a gain of \$13.9 million, while the U.S. Dollar strengthened 2.6% against the Euro and 2.3% against the British Pound Sterling, resulting in losses of \$5.1 million and \$0.1 million, respectively. The remaining net currency loss of \$5.2 million was related to other currencies and timing of transactions.

The \$22.4 million currency loss recognized in the first half of 2017 was primarily due to the weakening of the U.S. Dollar against the Taiwan Dollar within the 26-weeks ended July 1, 2017. During this period, the U.S. Dollar weakened 6.8% against the Taiwan Dollar, resulting in a loss of \$41.6 million, while the U.S. Dollar weakened 8.7% against the Euro and 5.6% against the British Pound Sterling, resulting in gains of \$14.2 million and \$3.5 million, respectively. The remaining net currency gain of \$1.5 million was related to other currencies and timing of transactions.

***Income Tax Provision***

The Company recorded income tax expense of \$70.3 million in the first half of 2018, compared to an income tax benefit of \$92.7 million in the first half of 2017, which included tax expense of \$7,275 associated with the expiration of share-based awards and an income tax benefit of \$168.8 million benefit primarily related to the revaluation of certain Switzerland deferred tax assets resulting from the Company's election in the first quarter of 2017 to align certain Switzerland corporate tax positions with international tax initiatives. The effective tax rate was 18.0% in the first half of 2018, compared to (28.7%) in the first half of 2017. Excluding the income tax benefit of \$168.8 million primarily related to the revaluation of Switzerland deferred tax assets, and the \$7.3 million tax expense due to the

expiration of share-based awards, the effective tax rate for the first half of 2018 decreased 330 basis points compared to the effective tax rate in the first half of 2017 primarily due to the reduction of the U.S. corporate tax rate.

### *Net Income*

As a result of the above, net income for the 26-week period ended June 30, 2018 was \$319.7 million compared to \$415.4 million for the 26-week period ended July 1, 2017, a decrease of \$95.7 million.

### **Liquidity and Capital Resources**

As of June 30, 2018, we had \$2,422.4 million of cash and cash equivalents and marketable securities. We primarily use cash flow from operations, and expect that future cash requirements may be used, to fund our capital expenditures, support our working capital requirements, pay dividends, fund strategic acquisitions, and fund share repurchases. We believe that our existing cash balances and cash flow from operations will be sufficient to meet our long-term projected capital expenditures, working capital and other cash requirements.

It is management's goal to invest the on-hand cash in accordance with the investment policy, which has been approved by the Board of Directors of each applicable Garmin entity holding the cash. The investment policy's primary purpose is to preserve capital, maintain an acceptable degree of liquidity, and maximize yield within the constraint of low credit risk. Garmin's average interest rate returns on cash and investments during the first half of 2018 and 2017 were approximately 1.8% and 1.5%, respectively. The fair value of our securities varies from period to period due to changes in interest rates, in the performance of the underlying collateral and in the credit performance of the underlying issuer, among other factors. See Note 8 for additional information regarding marketable securities.

### *Operating Activities*

| Net cash provided by operating activities | \$438,063        | \$263,827       |

The \$174.2 million increase in cash provided by operating activities in the first half of 2018 compared to the first half of 2017 was primarily due to the increase in cash provided by working capital of \$84.4 million (which included an increase of \$24.6 million in net receipts of accounts receivable and a decrease of \$30.6 million in cash paid for inventory) and income taxes payable of \$27.6 million. Additionally, the year over year decrease in net income of \$95.7 million was offset by other non-cash adjustments to net income of \$157.9 million, including an income tax benefit of \$168.8 million recognized in the first quarter of 2017 related to the revaluation of certain Switzerland deferred tax assets.

The \$167.2 million increase in cash used in investing activities in the first half of 2018 compared to the first half of 2017 was primarily due to increased net purchases of marketable securities of \$117.1 million and higher cash expenditures for purchases of property and equipment of \$53.3 million.

The \$60.1 million decrease in cash used in financing activities during the first half of 2018 compared to the first half of 2017 was primarily due to decreased purchases of treasury stock under our share repurchase authorization of \$64.0 million.

***Off-Balance Sheet Arrangements***

We do not have any off-balance sheet arrangements.

## **Critical Accounting Policies and Estimates**

### ***General***

Garmin's discussion and analysis of its financial condition and results of operations are based upon Garmin's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The presentation of these financial statements requires Garmin to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, Garmin evaluates its estimates, including those related to customer sales programs and incentives, product returns, bad debts, inventories, investments, intangible assets, income taxes, warranty obligations, and contingencies and litigation. Garmin bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

For a description of the significant accounting policies and methods used in the preparation of the Company's condensed consolidated financial statements, refer to Note 2, "Summary of Significant Accounting Policies" in the Notes to the Consolidated Financial Statements in Part II, Item 8 and "Critical Accounting Policies and Estimates" in Part II, Item 7 of the Company's Annual Report on Form 10-K for the fiscal year ended December 30, 2017. There were no material changes to the Company's critical accounting policies and estimates in the 13-week and 26-week periods ended June 30, 2018, other than those discussed in Note 1, "Accounting Policies".

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

There are numerous market risks that can affect our future business, financial condition and results of operations. In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part II, "Item 7A. Quantitative and Qualitative Disclosures About Market Risk" in our Annual Report on Form 10-K for the fiscal year ended December 30, 2017. There have been no material changes during the 13-week and 26-week periods ended June 30, 2018 in the risks described in our Annual Report on Form 10-K related to market sensitivity, inflation, foreign currency exchange rate risk and interest rate risk.

### **Item 4. Controls and Procedures**

(a) *Evaluation of disclosure controls and procedures.* The Company maintains a system of disclosure controls and procedures that are designed to provide reasonable assurance that information, which is required to be timely disclosed, is accumulated and communicated to management in a timely fashion. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. As of June 30, 2018, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded as of June 30, 2018 that our disclosure controls and procedures were effective such that the information relating to the Company, required to be disclosed in our Securities and Exchange Commission ("SEC") reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) *Changes in internal control over financial reporting.* There has been no change in the Company's internal controls over financial reporting that occurred during the Company's fiscal quarter ended June 30, 2018 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

## **Part II - Other Information**

### **Item 1. Legal Proceedings**

The following information supplements and amends the discussion set forth under Part I, Item 3 "Legal Proceedings" in the Company's Annual Report on Form 10-K for the fiscal year ended December 30, 2017 and the Company's Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2018.

#### *PulseOn Oy v. Garmin (Europe) Ltd.*

On February 21, 2018, PulseOn Oy filed an application with the Court of Appeal in England seeking leave to appeal the judgment of the Patent Court issued on January 18, 2018, holding that no accused Garmin products infringed either of the Registered Community Designs asserted by PulseOn Oy. The hearing before the Court of Appeal is scheduled to take place on January 30, 2019. Although there can be no assurance that an unfavorable outcome of this litigation would not have a material adverse effect on our operating results, liquidity or financial position, Garmin believes that the claims in this lawsuit are without merit and intends to vigorously defend this action.

In the normal course of business, the Company and its subsidiaries are parties to various legal claims, actions, and complaints, including matters involving patent infringement, other intellectual property, product liability, customer claims and various other risks. It is not possible to predict with certainty whether or not the Company and its subsidiaries will ultimately be successful in any of these legal matters, or if not, what the impact might be. However, the Company's management does not expect that the results in any of these legal proceedings will have a material adverse effect on the Company's results of operations, financial position or cash flows.

### **Item 1A. Risk Factors**

There are many risks and uncertainties that can affect our future business, financial performance or share price. In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 30, 2017, as amended and supplemented by the risk factors set forth below. These risks, however, are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

The following is an amended and restated version of a Risk Factor included in Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 30, 2017:

**Changes to trade regulations, including trade restrictions, sanctions, or tariffs, could significantly harm our results of operations.**

A significant portion of our global and U.S. sales are comprised of goods assembled and manufactured in our facilities in Taiwan and the People’s Republic of China, and components for a number of our goods are sourced from suppliers in the People’s Republic of China. The imposition of additional U.S. or foreign governmental controls, regulations that create new or enhanced restrictions on free trade, trade sanctions, or tariffs, particularly those applicable to goods imported from Taiwan or the People’s Republic of China, could have substantial adverse effects on our business, results of operations, and financial condition.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

Items (a) and (b) are not applicable.

(c) Issuer Purchases of Equity Securities

The Board of Directors approved a share repurchase program on February 13, 2015, authorizing the Company to purchase up to \$300 million of its common shares as market and business conditions warrant. In December 2016, the Board of Directors authorized an extension through December 31, 2017 to purchase remaining common shares. The share repurchase authorization expired on December 31, 2017 with no additional shares having been repurchased during the 26-weeks ended June 30, 2018.
