

JPMORGAN CHASE & CO

Form 424B2

February 13, 2019

February 11, 2019 Registration Statement Nos. 333-222672 and 333-222672-01; Rule 424(b)(2)

JPMorgan Chase Financial Company LLC

Structured Investments

\$2,000,000

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500[®] Index and the Russell 2000[®] Index due January 4, 2024

Fully and Unconditionally Guaranteed by JPMorgan Chase & Co.

The Notes are designed for investors who seek a positive return if the Final Value (determined over a three-month averaging period) of each of the S&P 500[®] Index and the Russell 2000[®] Index, which we refer to as the Indices, is greater than 80.00% of its Initial Value (determined over an approximately three-month averaging period), which we refer to as its Lower Strike Value. Investors should be willing to forgo interest and dividend payments and be willing to lose up to 80.00% of their principal amount at maturity.

If the Final Value of each Index is greater than its Lower Strike Value, investors will receive a return of 0.70% for every 1% of its Initial Value that the Final Value of the Lesser Performing Index is greater than its Lower Strike Value, up to 110.00% of the Initial Value of the Lesser Performing Index. If the Final Value of each Index is also greater than 110.00% of its Initial Value, which refer to as its Higher Strike Value, investors will also receive a return of 1.90% for every 1% of its Initial Value that the Final Value of the Lesser Performing Index is greater than its Higher Strike Value, up to a maximum return of 59.00%.

The Notes are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co. **Any payment on the Notes is subject to the credit risk of JPMorgan Financial, as issuer of the Notes, and the credit risk of JPMorgan Chase & Co., as guarantor of the Notes.**

Payments on the Notes are not linked to a basket composed of the Indices. Payments on the Notes are linked to the performance of each of the Indices individually, as described below.

Minimum denominations of \$1,000 and integral multiples thereof

The Notes priced on February 11, 2019 and are expected to settle on or about February 14, 2019.

CUSIP: 48130WZP9

Investing in the Notes involves a number of risks. See “Risk Factors” beginning on page PS-10 of the accompanying product supplement, “Risk Factors” beginning on page US-1 of the accompanying underlying supplement and “Selected Risk Considerations” beginning on page PS-3 of this pricing supplement.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the Notes or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public (1)	Fees and Commissions (2)	Proceeds to Issuer
Per Note \$1,000		\$7.50	\$992.50
Total \$2,000,000		\$15,000	\$1,985,000

(1) See “Supplemental Use of Proceeds” in this pricing supplement for information about the components of the price to public of the Notes.

(2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Financial, will pay all of the selling commissions of \$7.50 per \$1,000 principal amount Note it receives from us to other affiliated or unaffiliated dealers. See “Plan of Distribution (Conflicts of Interest)” in the accompanying product supplement.

The estimated value of the Notes, when the terms of the Notes were set, was \$1,005.00 per \$1,000 principal amount Note. See “The Estimated Value of the Notes” in this pricing supplement for additional information.

The Notes are not bank deposits, are not insured by the Federal Deposit Insurance Corporation or any other governmental agency and are not obligations of, or guaranteed by, a bank.

Pricing supplement to product supplement no. 4-I dated April 5, 2018, underlying supplement no. 1-I dated April 5, 2018
and the prospectus and prospectus supplement, each dated April 5, 2018

Key Terms

Issuer: JPMorgan Chase Financial Company LLC, an indirect, wholly owned finance subsidiary of JPMorgan Chase & Co. Payment at Maturity:

Guarantor: JPMorgan Chase & Co.

Indices: The S&P 500® Index (Bloomberg ticker: SPX) and the Russell 2000® Index (Bloomberg ticker: RTY)

Higher Leverage Factor: 1.90

Lower Leverage Factor: 0.70

Higher Strike Value: With respect to each Index, 110.00% of its Initial Value

Lower Strike Value: With respect to each Index, 80.00% of its Initial Value

Maximum Return: 59.00% (corresponding to a maximum payment at maturity of \$1,590.00 per \$1,000 principal amount Note)

Buffer Amount: 20.00%

Initial Valuation Date: February 11, 2019

Original Issue Date (Settlement Date): On or about February 14, 2019

Initial Averaging Dates*: Each day that is a scheduled trading day with respect to both Indices in the period from and including the Initial Valuation Date to and including May 10, 2019

Ending Averaging Dates*: Each day that is a scheduled trading day with respect to both Indices in the period from and including October 2, 2023 to and including December 29, 2023

Maturity Date*: January 4, 2024

* Subject to postponement in the event of a market disruption event and as described under “General Terms of Notes — Postponement of a Determination Date — Notes Linked to Multiple Underlyings” and “General Terms of Notes — Postponement of a Payment Date” in the accompanying product supplement

If the Final Value of each Index is greater than its Higher Strike Value, your payment at maturity per \$1,000 principal amount Note will be greater than \$1,210.00 and less than or equal to the maximum payment at maturity of \$1,590.00 and will be calculated as follows:

$\$1,210 + [\$1,000 \times (\text{Lesser Performing Index Return} - 10\%) \times \text{Higher Leverage Factor}]$, subject to the Maximum Return

If the Final Value of either Index is less than or equal to its Higher Strike Value but the Final Value of each Index is greater than or equal to its Lower Strike Value, your payment at maturity per \$1,000 principal amount Note will be greater than or equal to \$1,000.00 and less than or equal to \$1,210.00 and will be calculated as follows:

$\$1,000 + [\$1,000 \times (\text{Lesser Performing Index Return} + 20\%) \times \text{Lower Leverage Factor}]$

If the Final Value of either Index is less than its Lower Strike Value, your payment at maturity per \$1,000 principal amount Note will be greater than or equal to \$200.00 and less than \$1,000.00 and will be calculated as follows:

$\$1,000 + [\$1,000 \times (\text{Lesser Performing Index Return} + \text{Buffer Amount})]$

If the Final Value of either Index is less than its Lower Strike Value, you will lose some or most of your principal amount at maturity.

Lesser Performing Index: The Index with the Lesser Performing Index Return

Lesser Performing Index Return: The lower of the Index Returns of the Indices

Index Return:

With respect to each Index,

(Final Value – Initial Value)

Initial Value

Initial Value: With respect to each Index, the arithmetic average of the closing levels of that Index on the Initial Averaging Dates

Final Value: With respect to each Index, the arithmetic average of the closing levels of that Index on the Ending Averaging Dates

PS-1 | Structured Investments

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500® Index and the Russell 2000® Index

Hypothetical Payout Profile

The following table illustrates the hypothetical total return and payment at maturity on the Notes linked to two hypothetical Indices. The “total return” as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount Note to \$1,000. The hypothetical total returns and payments set forth below assume the following:

- an Initial Value for the Lesser Performing Index of 100.00;
- a Maximum Return of 59.00%;
- a Higher Leverage Factor of 1.90;
- a Lower Leverage Factor of 0.70;
- a Higher Strike Value of 110.00;
- a Lower Strike Value of 80.00; and
- a Buffer Amount of 20.00%.

The hypothetical Initial Value of the Lesser Performing Index of 100.00 has been chosen for illustrative purposes only and may not represent a likely actual Initial Value of either Index. **The actual Initial Value of each Index will be the arithmetic average of the closing levels of that Index on the Initial Averaging Dates.** For historical data regarding the actual closing levels of each Index, please see the historical information set forth under “The Indices” in this pricing supplement.

The Final Value of each Index will be the arithmetic average of the closing levels of that Index on the Ending Averaging Dates. Each hypothetical total return or hypothetical payment at maturity set forth below is for illustrative purposes only and may not be the actual total return or payment at maturity applicable to a purchaser of the Notes. The numbers appearing in the following table have been rounded for ease of analysis.

Final Value of the Lesser Performing Index	Lesser Performing Index Return	Total Return on the Notes	Payment at Maturity
165.00	65.00%	59.00%	\$1,590.00
150.00	50.00%	59.00%	\$1,590.00
140.00	40.00%	59.00%	\$1,590.00
130.00	30.00%	59.00%	\$1,590.00
120.00	20.00%	40.00%	\$1,400.00
115.00	15.00%	30.50%	\$1,305.00
110.00	10.00%	21.00%	\$1,210.00
105.00	5.00%	17.50%	\$1,175.00
101.00	1.00%	14.70%	\$1,147.00
100.00	0.00%	14.00%	\$1,140.00
95.00	-5.00%	10.50%	\$1,105.00
90.00	-10.00%	7.00%	\$1,070.00
85.00	-15.00%	3.50%	\$1,035.00
80.00	-20.00%	0.00%	\$1,000.00
79.99	-20.01%	-0.01%	\$999.90
70.00	-30.00%	-10.00%	\$900.00
60.00	-40.00%	-20.00%	\$800.00
50.00	-50.00%	-30.00%	\$700.00
40.00	-60.00%	-40.00%	\$600.00
30.00	-70.00%	-50.00%	\$500.00

Edgar Filing: JPMORGAN CHASE & CO - Form 424B2

20.00	-80.00%	-60.00%	\$400.00
10.00	-90.00%	-70.00%	\$300.00

PS-2 | Structured Investments

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500[®] Index and the Russell 2000[®] Index

0.00-100.00% -80.00% \$200.00

How the Notes Work

Upside Scenario:

If the Final Value of each Index is greater than its Higher Strike Value, investors will receive at maturity \$1,210.00 per \$1,000 principal amount Note *plus* (a) \$1,000 *times* (b) the Lesser Performing Index Return *minus* 10.00% *times* (c) the Higher Leverage Factor of 1.90, subject to the Maximum Return of 59.00%. An investor will realize the maximum payment at maturity at a Final Value of the Lesser Performing Index of 130.00% or more of its Initial Value.

If the Final Value of the Lesser Performing Index increases 20.00%, investors will receive at maturity a 40.00% return, or \$1,400.00 per \$1,000 principal amount Note, calculated as follows:

$$\$1,210 + [\$1,000 \times (20.00\% - 10.00\%) \times 1.90] = \$1,400.00$$

If the Final Value of the Lesser Performing Index increases 50.00%, investors will receive at maturity a return equal to the Maximum Return of 59.00%, or \$1,590.00 per \$1,000 principal amount Note, which is the maximum payment at maturity.

If the Final Value of either Index is less than or equal to its Higher Strike Value but the Final Value of each Index is greater than or equal to its Lower Strike Value, investors will receive at maturity \$1,000 per \$1,000 principal amount Note *plus* (a) \$1,000 *times* (b) the Lesser Performing Index Return *plus* 20.00% *times* (c) the Lower Leverage Factor of 0.70.

If the Final Value of the Lesser Performing Index increases 5.00%, investors will receive at maturity a 17.50% return, or \$1,175.00 per \$1,000 principal amount Note, calculated as follows:

$$\$1,000 + [\$1,000 \times (5.00\% + 20.00\%) \times 0.70] = \$1,175.00$$

If the Final Value of the Lesser Performing Index decreases 15.00%, investors will receive at maturity a 3.50% return, or \$1,035.00 per \$1,000 principal amount Note, calculated as follows:

$$\$1,000 + [\$1,000 \times (-15.00\% + 20.00\%) \times 0.70] = \$1,035.00$$

Par Scenario:

If the Final Value of either Index is equal to its Lower Strike Value and the Final Value of the other Index is greater than or equal to its Lower Strike Value, you will receive the principal amount of your Notes at maturity.

Downside Scenario:

If the Final Value of either Index is less than its Lower Strike Value, investors will lose 1% of the principal amount of their Notes for every 1% that the Final Value of the Lesser Performing Index is less than its Initial Value by more than the Buffer Amount.

For example, if the Final Value of the Lesser Performing Index declines 60.00% from its Initial Value, investors will lose 40.00% of their principal amount and receive only \$600.00 per \$1,000 principal amount Note at maturity, calculated as follows:

$$\$1,000 + [\$1,000 \times (-60.00\% + 20.00\%)] = \$600.00$$

The hypothetical returns and hypothetical payments on the Notes shown above apply only if you hold the Notes for their entire term. These hypotheticals do not reflect the fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns and hypothetical payments shown above would likely be lower.

Selected Risk Considerations

An investment in the Notes involves significant risks. These risks are explained in more detail in the “Risk Factors” sections of the accompanying product supplement and underlying supplement.

YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS —

The Notes do not guarantee any return of principal. If the Final Value of either Index is less than its Lower Strike Value, you will lose 1% of the principal amount of your Notes for every 1% that the Final Value of the Lesser Performing Index is less than its Initial Value by more than the Buffer Amount. Accordingly, under these circumstances, you will lose up to 80.00% of your principal amount at maturity.

YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED BY THE MAXIMUM RETURN, regardless of any appreciation of either Index, which may be significant.

YOU WILL NOT KNOW THE INITIAL VALUE OF EITHER INDEX ON THE INITIAL VALUATION DATE BECAUSE THE RELEVANT INITIAL VALUE IS DETERMINED OVER AN APPROXIMATELY THREE-MONTH PERIOD COMMENCING ON THE INITIAL VALUATION DATE —

PS-3 | Structured Investments

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500[®] Index and the Russell 2000[®] Index

Because the Initial Value of each Index is calculated based on the arithmetic average of the closing levels of that Index during an approximately 3-month period from and including the Initial Valuation Date, the Initial Values will not be determined until the last Initial Averaging Date, and, accordingly, you will not know the Initial Value for either Index on the Initial Valuation Date. The Initial Value of either Index may be higher than if it were based on the closing level of that Index on the Initial Valuation Date or other Initial Averaging Dates. The value of either Index may increase on one or more Initial Averaging Dates, which will increase the Initial Value of that Index. Under these circumstances, the level above which the Final Value of the Lesser Performing Index must reach in order for you to receive a positive return on your initial investment in the Notes will be higher than if the Initial Value of each Index were the closing level of that Index on the Initial Valuation Date.

THE AVERAGING CONVENTION USED TO CALCULATE THE FINAL VALUE OF EACH INDEX COULD LIMIT RETURNS —

Your investment in the Notes may not perform as well as an investment the return of which is based solely on the performance of the Indices on a single day. Your ability to earn a positive return on the Notes at maturity may be limited by the averaging convention used to calculate the Final Value of each Index, especially if there is a significant decline in the closing level of the Lesser Performing Index on the Ending Averaging Dates or if there is significant volatility in the closing level of the Lesser Performing Index during the term of the Notes. Accordingly, you may not receive a positive return even if the closing level of the Lesser Performing Index is above its Lower Strike Value on the final Ending Averaging Date.

CREDIT RISKS OF JPMORGAN FINANCIAL AND JPMORGAN CHASE & CO. —

Investors are dependent on our and JPMorgan Chase & Co.'s ability to pay all amounts due on the Notes. Any actual or potential change in our or JPMorgan Chase & Co.'s creditworthiness or credit spreads, as determined by the market for taking that credit risk, is likely to adversely affect the value of the Notes. If we and JPMorgan Chase & Co. were to default on our payment obligations, you may not receive any amounts owed to you under the Notes and you could lose your entire investment.

AS A FINANCE SUBSIDIARY, JPMORGAN FINANCIAL HAS NO INDEPENDENT OPERATIONS AND HAS LIMITED ASSETS —

As a finance subsidiary of JPMorgan Chase & Co., we have no independent operations beyond the issuance and administration of our securities. Aside from the initial capital contribution from JPMorgan Chase & Co., substantially all of our assets relate to obligations of our affiliates to make payments under loans made by us or other intercompany agreements. As a result, we are dependent upon payments from our affiliates to meet our obligations under the Notes. If these affiliates do not make payments to us and we fail to make payments on the Notes, you may have to seek payment under the related guarantee by JPMorgan Chase & Co., and that guarantee will rank *pari passu* with all other unsecured and unsubordinated obligations of JPMorgan Chase & Co.

POTENTIAL CONFLICTS —

We and our affiliates play a variety of roles in connection with the Notes. In performing these duties, our and JPMorgan Chase & Co.'s economic interests are potentially adverse to your interests as an investor in the Notes. It is possible that hedging or trading activities of ours or our affiliates in connection with the Notes could result in substantial returns for us or our affiliates while the value of the Notes declines. Please refer to "Risk Factors — Risks Relating to Conflicts of Interest" in the accompanying product supplement.

JPMORGAN CHASE & CO. IS CURRENTLY ONE OF THE COMPANIES THAT MAKE UP THE S&P 500® INDEX,

but JPMorgan Chase & Co. will not have any obligation to consider your interests in taking any corporate action that might affect the level of the S&P 500® Index.

YOU ARE EXPOSED TO THE RISK OF DECLINE IN THE LEVEL OF EACH INDEX —

Payments on the Notes are not linked to a basket composed of the Indices and are contingent upon the performance of each individual Index. Poor performance by either of the Indices over the term of the Notes may negatively affect your payment at maturity and will not be offset or mitigated by positive performance by the other Index.

· YOUR PAYMENT AT MATURITY WILL BE DETERMINED BY THE LESSER PERFORMING INDEX.

THE NOTES DO NOT PAY INTEREST.

· YOU WILL NOT RECEIVE DIVIDENDS ON THE SECURITIES INCLUDED IN EITHER INDEX OR HAVE ANY RIGHTS WITH RESPECT TO THOSE SECURITIES.

PS-4 | Structured Investments

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500[®] Index and the Russell 2000[®] Index

AN INVESTMENT IN THE NOTES IS SUBJECT TO RISKS ASSOCIATED WITH SMALL CAPITALIZATION STOCKS WITH RESPECT TO THE RUSSELL 2000® INDEX —

Small capitalization companies may be less able to withstand adverse economic, market, trade and competitive conditions relative to larger companies. Small capitalization companies are less likely to pay dividends on their stocks, and the presence of a dividend payment could be a factor that limits downward stock price pressure under adverse market conditions.

LACK OF LIQUIDITY —

The Notes will not be listed on any securities exchange. Accordingly, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which JPMS is willing to buy the Notes. You may not be able to sell your Notes. The Notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Notes to maturity.

THE ESTIMATED VALUE OF THE NOTES DOES NOT REPRESENT FUTURE VALUES OF THE NOTES AND MAY DIFFER FROM OTHERS' ESTIMATES —

See “The Estimated Value of the Notes” in this pricing supplement.

THE ESTIMATED VALUE OF THE NOTES IS DERIVED BY REFERENCE TO AN INTERNAL FUNDING RATE —

The internal funding rate used in the determination of the estimated value of the Notes is based on, among other things, our and our affiliates' view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for the conventional fixed-rate debt of JPMorgan Chase & Co. The use of an internal funding rate and any potential changes to that rate may have an adverse effect on the terms of the Notes and any secondary market prices of the Notes. See “The Estimated Value of the Notes” in this pricing supplement.

THE VALUE OF THE NOTES AS PUBLISHED BY JPMS (AND WHICH MAY BE REFLECTED ON CUSTOMER ACCOUNT STATEMENTS) MAY BE HIGHER THAN THE THEN-CURRENT ESTIMATED VALUE OF THE NOTES FOR A LIMITED TIME PERIOD —

We generally expect that some of the costs included in the original issue price of the Notes will be partially paid back to you in connection with any repurchases of your Notes by JPMS in an amount that will decline to zero over an initial predetermined period. See “Secondary Market Prices of the Notes” in this pricing supplement for additional information relating to this initial period. Accordingly, the estimated value of your Notes during this initial period may be lower than the value of the Notes as published by JPMS (and which may be shown on your customer account statements).

SECONDARY MARKET PRICES OF THE NOTES WILL LIKELY BE LOWER THAN THE ORIGINAL ISSUE PRICE OF THE NOTES —

Any secondary market prices of the Notes will likely be lower than the original issue price of the Notes because, among other things, secondary market prices take into account our internal secondary market funding rates for structured debt issuances and, also, because secondary market prices (a) exclude selling commissions and (b) may exclude estimated hedging costs that are included in the original issue price of the Notes. As a result, the price, if any, at which JPMS will be willing to buy the Notes from you in secondary market transactions, if at all, is likely to be lower than the original issue price. Any sale by you prior to the Maturity Date could result in a substantial loss to you.

SECONDARY MARKET PRICES OF THE NOTES WILL BE IMPACTED BY MANY ECONOMIC AND MARKET FACTORS —

The secondary market price of the Notes during their term will be impacted by a number of economic and market factors, which may either offset or magnify each other, aside from the selling commissions, estimated hedging costs and the levels of the Indices. Additionally, independent pricing vendors and/or third party broker-dealers may publish

a price for the Notes, which may also be reflected on customer account statements. This price may be different (higher or lower) than the price of the Notes, if any, at which JPMS may be willing to purchase your Notes in the secondary market. See “Risk Factors — Risks Relating to the Estimated Value and Secondary Market Prices of the Notes — Secondary market prices of the Notes will be impacted by many economic and market factors” in the accompanying product supplement.

PS-5 | Structured Investments

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500[®] Index and the Russell 2000[®] Index

The Indices

The S&P 500[®] Index consists of stocks of 500 companies selected to provide a performance benchmark for the U.S. equity markets. For additional information about the S&P 500[®] Index, see “Equity Index Descriptions — The S&P U.S. Indices” in the accompanying underlying supplement.

The Russell 2000[®] Index consists of the middle 2,000 companies included in the Russell 3000E[™] Index and, as a result of the index calculation methodology, consists of the smallest 2,000 companies included in the Russell 3000[®] Index. The Russell 2000[®] Index is designed to track the performance of the small capitalization segment of the U.S. equity market. For additional information about the Russell 2000[®] Index, see “Equity Index Descriptions — The Russell Indices” in the accompanying underlying supplement.

Historical Information

The following graphs set forth the historical performance of each Index based on the weekly historical closing levels from January 3, 2014 through February 8, 2019. The closing level of the S&P 500[®] Index on February 11, 2019 was 2,709.80. The closing level of the Russell 2000[®] Index on February 11, 2019 was 1,518.982. We obtained the closing levels above and below from the Bloomberg Professional[®] service (“Bloomberg”), without independent verification.

The historical closing levels of each Index should not be taken as an indication of future performance, and no assurance can be given as to the closing level of either Index on any Initial Averaging Date or any Ending Averaging Date. There can be no assurance that the performance of the Indices will result in the return of any of your principal amount in excess of \$200.00 per \$1,000 principal amount Note, subject to the credit risks of JPMorgan Financial and JPMorgan Chase & Co.

PS-6 | Structured Investments

Capped Buffered Return Enhanced Notes Linked to the Lesser Performing of the S&P 500[®] Index and the Russell 2000[®] Index

Tax Treatment

You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 4-I. The following discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel, Davis Polk & Wardwell LLP, regarding the material U.S. federal income tax consequences of owning and disposing of Notes.

Based on current market conditions, in the opinion of our special tax counsel it is reasonable to treat the Notes as “open transactions” that are not debt instruments for U.S. federal income tax purposes, as more fully described in “Material U.S. Federal Income Tax Consequences — Tax Consequences to U.S. Holders — Notes Treated as Open Transactions That Are Not Debt Instruments” in the accompanying product supplement. Assuming this treatment is respected, the gain or loss on your Notes should be treated as long-term capital gain or loss if you hold your Notes for more than a year, whether or not you are an initial purchaser of Notes at the issue price. However, the IRS or a court may not respect this treatment, in which case the timing and character of any income or loss on the Notes could be materially and adversely affected. In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose a notional interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Notes, possibly with retroactive effect. You should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the Notes, including possible alternative treatments and the issues presented by this notice.

Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% withholding tax (unless an income tax treaty applies) on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. Section 871(m) provides certain exceptions to this withholding regime, including for instruments linked to certain broad-based indices that meet requirements set forth in the applicable Treasury regulations (such as an index, a “Qualified Index”). Additionally, a recent IRS notice excludes from the scope of Section 871(m) instruments issued prior to January 1, 2021 that do not have a delta of one with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an “Underlying Security”). Based on certain determinations made by us, our special tax counsel is of the opinion that Section 871(m) should not apply to the Notes with regard to Non-U.S. Holders. Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. You should consult your tax adviser regarding the potential application of Section 871(m) to the Notes.

Withholding under legislation commonly referred to as “FATCA” may (if the Notes are recharacterized as debt instruments) apply to amounts treated as interest paid with respect to the Notes, as well as to payments of gross proceeds of a taxable disposition, including redemption at maturity, of a Note, although under recently proposed regulations (the preamble to which specifies that taxpayers are permitted to rely on them pending finalization), no withholding will apply to payments of gross proceeds (other than any amount treated as interest). You should consult your tax adviser regarding the potential application of FATCA to the Notes.

The Estimated Value of the Notes

The estimated value of the Notes set forth on the cover of this pricing supplement is equal to the sum of the values of the following hypothetical components: (1) a fixed-income debt component with the same maturity as the Notes, valued using the internal funding rate described below, and (2) the derivative or derivatives underlying the economic terms of the Notes. The estimated value of the Notes does not represent a minimum price at which JPMS would be willing to buy your Notes in any secondary market (if any exists) at any time. The internal funding rate used in the determination of the estimated value of the Notes is based on, among other things, our and our affiliates' view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for the conventional fixed-rate debt of JPMorgan Chase & Co. For additional information, see "Selected Risk Considerations — The Estimated Value of the Notes Is Derived by Reference to an Internal Funding Rate" in this pricing supplement.

The value of the derivative or derivatives underlying the economic terms of the Notes is derived from internal pricing models of our affiliates. These models are dependent on inputs such as the traded market prices of comparable derivative instruments and on various other inputs, some of which are market-observable, and which can include volatility, dividend rates, interest rates and other factors, as well as assumptions about future market events and/or environments. Accordingly, the estimated value of the Notes is

determined when the terms of the Notes are set based on market conditions and other relevant factors and assumptions existing at that time.

The estimated value of the Notes does not represent future values of the Notes and may differ from others' estimates. Different pricing models and assumptions could provide valuations for the Notes that are greater than or less than the estimated value of the Notes. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the Notes could change significantly based on, among other things, changes in market conditions, our or JPMorgan Chase & Co.'s creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which JPMS would be willing to buy Notes from you in secondary market transactions.

Costs associated with selling, structuring and hedging the Notes are included in the original issue price of the Notes. These costs include the selling commissions paid to JPMS and other affiliated or unaffiliated dealers and the estimated cost of hedging our obligations under the Notes. Because hedging our obligations entails risk and may be influenced by market forces beyond our control, this hedging may result in a loss that is more or less than expected, or it may result in a profit.

Secondary Market Prices of the Notes

For information about factors that will impact any secondary market prices of the Notes, see "Risk Factors — Risks Relating to the Estimated Value and Secondary Market Prices of the Notes — Secondary market prices of the Notes will be impacted by many economic and market factors" in the accompanying product supplement. In addition, we generally expect that some of the costs included in the original issue price of the Notes will be partially paid back to you in connection with any repurchases of your Notes by JPMS in an amount that will decline to zero over an initial predetermined period. These costs can include projected hedging profits, if any, and, in some circumstances, estimated hedging costs and our internal secondary market funding rates for structured debt issuances. This initial predetermined time period is intended to be the shorter of six months and one-half of the stated term of the Notes. The length of any such initial period reflects the structure of the Notes, whether our affiliates expect to earn a profit in connection with our hedging activities, the estimated costs of hedging the Notes and when these costs are incurred, as determined by our affiliates. See "Selected Risk Considerations — The Value of the Notes as Published by JPMS (and Which May Be Reflected on Customer Account Statements) May Be Higher Than the Then-Current Estimated Value of the Notes for a Limited Time Period" in this pricing supplement.

Supplemental Use of Proceeds

The Notes are offered to meet investor demand for products that reflect the risk-return profile and market exposure provided by the Notes. See "Hypothetical Payout Profile" and "How the Notes Work" in this pricing supplement for an illustration of the risk-return profile of the Notes and "The Indices" in this pricing supplement for a description of the market exposure provided by the Notes.

The original issue price of the Notes is equal to the estimated value of the Notes plus the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, minus (plus) the projected losses (profits) that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the Notes, plus the estimated cost of hedging our obligations under the Notes.

Supplemental Plan of Distribution

We expect that delivery of the Notes will be made against payment for the Notes on or about the Original Issue Date set forth on the front cover of this pricing supplement, which will be the third business day following the Pricing Date

of the Notes (this settlement cycle being referred to as “T+3”). Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in two business days, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade Notes on any date prior to two business days before delivery will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement and should consult their own advisors.

Validity of the Notes and the Guarantee

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to JPMorgan Financial and JPMorgan Chase & Co., when the Notes offered by this pricing supplement have been executed and issued by JPMorgan Financial and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such Notes will be valid and binding obligations of JPMorgan Financial and the related guarantee will constitute a valid and binding obligation of JPMorgan Chase & Co., enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors’ rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to (i) the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above or (ii) any provision of the indenture that purports to avoid the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law by limiting the amount of JPMorgan Chase &

Co.'s obligation under the related guarantee. This opinion is given as of the date hereof and is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and its authentication of the Notes and the validity, binding nature and enforceability of the indenture with respect to the trustee, all as stated in the letter of such counsel dated March 8, 2018, which was filed as an exhibit to the Registration Statement on Form S-3 by JPMorgan Financial and JPMorgan Chase & Co. on March 8, 2018.

Additional Terms Specific to the Notes

You should read this pricing supplement together with the accompanying prospectus, as supplemented by the accompanying prospectus supplement relating to our Series A medium-term notes of which these Notes are a part, and the more detailed information contained in the accompanying product supplement and the accompanying underlying supplement. This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in the "Risk Factors" sections of the accompanying product supplement and the accompanying underlying supplement, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Product supplement no. 4-I dated April 5, 2018:
