

PROVIDENT FINANCIAL SERVICES INC
Form 10-Q
August 09, 2018

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM
10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended June 30, 2018
or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____
Commission File Number: 001-31566
PROVIDENT FINANCIAL SERVICES, INC.
(Exact Name of Registrant as Specified in Its Charter)
Delaware

42-1547151
(I.R.S. Employer Identification No.)

239 Washington Street, Jersey City, New Jersey
(Address of Principal Executive Offices)
(732) 590-9200
(Registrant's Telephone Number, Including Area Code)

07302
(Zip Code)

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding twelve months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding twelve months (or for such shorter period that the Registrant was required to submit and post such files). YES NO

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):
Large Accelerated Filer Accelerated Filer

Non-Accelerated Filer Smaller Reporting Company

Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

As of August 1, 2018 there were 83,209,293 shares issued and 67,090,176 shares outstanding of the Registrant's Common Stock, par value \$0.01 per share, including 267,261 shares held by the First Savings Bank Directors' Deferred Fee Plan not otherwise considered outstanding under U.S. generally accepted accounting principles.

PROVIDENT FINANCIAL SERVICES, INC. AND SUBSIDIARY
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

A. Basis of Financial Statement Presentation

The accompanying unaudited consolidated financial statements include the accounts of Provident Financial Services, Inc. and its wholly owned subsidiary, Provident Bank (the “Bank,” together with Provident Financial Services, Inc., the “Company”).

In preparing the interim unaudited consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statements of financial condition and the consolidated statements of income for the periods presented. Actual results could differ from these estimates. The allowance for loan losses, the valuation of securities available for sale and the valuation of deferred tax assets are material estimates that are particularly susceptible to near-term change.

The interim unaudited consolidated financial statements reflect all normal and recurring adjustments, which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and six months ended June 30, 2018 are not necessarily indicative of the results of operations that may be expected for all of 2018.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. Certain reclassifications have been made in the consolidated financial statements to conform with current year classifications.

These unaudited consolidated financial statements should be read in conjunction with the December 31, 2017 Annual Report to Stockholders on Form 10-K.

B. Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations for the three and six months ended June 30, 2018 and 2017 (dollars in thousands, except per share amounts):

	Three months ended June 30, 2018			2017		
	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount
Net income	\$ 19,243			\$ 24,383		
Basic earnings per share:						
Income available to common stockholders	\$ 19,243	64,911,919	\$ 0.30	\$ 24,383	64,357,684	\$ 0.38
Dilutive shares		187,684			183,387	
Diluted earnings per share:						
Income available to common stockholders	\$ 19,243	65,099,603	\$ 0.30	\$ 24,383	64,541,071	\$ 0.38

	Six months ended June 30, 2018			2017		
	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount
Net income	\$47,156			\$47,891		
Basic earnings per share:						
Income available to common stockholders	\$47,156	64,840,843	\$ 0.73	\$47,891	64,263,065	\$ 0.75
Dilutive shares		184,074			192,808	
Diluted earnings per share:						
Income available to common stockholders	\$47,156	65,024,917	\$ 0.73	\$47,891	64,455,873	\$ 0.74

Antidilutive stock options and awards at June 30, 2018 and 2017, totaling 420,544 shares and 437,904 shares, respectively, were excluded from the earnings per share calculations.

Note 2. Investment Securities

At June 30, 2018, the Company had \$1.05 billion and \$473.8 million in available for sale debt securities and held to maturity debt securities, respectively. Many factors, including lack of liquidity in the secondary market for certain securities, variations in pricing information, regulatory actions, changes in the business environment or any changes in the competitive marketplace could have an adverse effect on the Company's investment portfolio which could result in other-than-temporary impairment ("OTTI") in future periods. The total number of available for sale and held to maturity debt securities in an unrealized loss position as of June 30, 2018, totaled 595, compared with 306 at December 31, 2017. All securities with unrealized losses at June 30, 2018 were analyzed for OTTI. Based upon this analysis, the Company believes that as of June 30, 2018, such securities with unrealized losses do not represent impairments that are other-than-temporary.

Available for Sale Debt Securities

The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the fair value for available for sale debt securities at June 30, 2018 and December 31, 2017 (in thousands):

	June 30, 2018			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	5,003	—	(4)	4,999
Mortgage-backed securities	1,041,736	1,932	(24,542)	1,019,126
State and municipal obligations	3,237	81	—	3,318
Corporate obligations	25,043	200	(152)	25,091
	\$1,075,019	2,213	(24,698)	1,052,534
	December 31, 2017			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	19,014	—	(9)	19,005
Mortgage-backed securities	993,548	4,914	(10,095)	988,367
State and municipal obligations	3,259	129	—	3,388
Corporate obligations	26,047	359	(12)	26,394
	\$1,041,868	5,402	(10,116)	1,037,154

The amortized cost and fair value of available for sale debt securities at June 30, 2018, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	June 30, 2018	
	Amortized cost	Fair value
Due in one year or less	\$—	—
Due after one year through five years	8,400	8,338
Due after five years through ten years	24,883	25,070
Due after ten years	—	—
	\$33,283	33,408

Mortgage-backed securities totaling \$1.04 billion at amortized cost and \$1.02 billion at fair value are excluded from the table above as their expected lives are likely to be shorter than the contractual maturity date due to principal prepayments.

For the three and six months ended June 30, 2018, no securities were sold or called from the available for sale debt securities portfolio. For the three and six months ended June 30, 2017, no securities were sold or called from the available for sale debt securities portfolio.

The following tables present the fair value and gross unrealized losses for available for sale debt securities with temporary impairment at June 30, 2018 and December 31, 2017 (in thousands):

	June 30, 2018 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Agency obligations	4,999	(4)	—	—	4,999	(4)
Mortgage-backed securities	684,255	(14,301)	221,953	(10,241)	906,208	(24,542)
Corporate obligations	7,855	(152)	—	—	7,855	(152)
	\$697,109	(14,457)	221,953	(10,241)	919,062	(24,698)
	December 31, 2017 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Agency obligations	\$12,006	(8)	6,999	(1)	19,005	(9)
Mortgage-backed securities	420,746	(3,936)	235,056	(6,159)	655,802	(10,095)
Corporate obligations	—	—	989	(12)	989	(12)
	\$432,752	(3,944)	243,044	(6,172)	675,796	(10,116)

The number of available for sale debt securities in an unrealized loss position at June 30, 2018 totaled 192, compared with 122 at December 31, 2017. The increase in the number of securities in an unrealized loss position at June 30, 2018, was due to higher current market interest rates compared to rates at December 31, 2017. All temporarily impaired securities were investment grade at June 30, 2018. At June 30, 2018, there were two private label mortgage-backed securities in an unrealized loss position, with an amortized cost of \$39,000 and an unrealized loss of \$1,000. These private label mortgage-backed securities were investment grade at June 30, 2018.

The Company estimates the loss projections for each non-agency mortgage-backed security by stressing the individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether other-than-temporary impairment existed during the six months ended June 30, 2018. Based on its detailed review of the available for sale debt securities portfolio, the Company believes that as of June 30, 2018, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary. The Company does not have the intent to sell securities in a temporary loss position at June 30, 2018, nor is it more likely than not that the Company will be required to sell the securities before the anticipated recovery.

Held to Maturity Debt Securities

The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for held to maturity debt securities at June 30, 2018 and December 31, 2017 (in thousands):

	June 30, 2018			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$4,987	—	(143)	4,844
Mortgage-backed securities	248	8	—	256
State and municipal obligations	458,624	4,074	(5,373)	457,325
Corporate obligations	9,966	1	(207)	9,760
	\$473,825	4,083	(5,723)	472,185

	December 31, 2017			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$4,308	—	(87) 4,221
Mortgage-backed securities	382	14	—	396
State and municipal obligations	462,942	9,280	(1,738) 470,484
Corporate obligations	10,020	1	(83) 9,938
	\$477,652	9,295	(1,908) 485,039

The Company generally purchases securities for long-term investment purposes, and differences between amortized cost and fair values may fluctuate during the investment period. There were no sales of securities from the held to maturity debt securities portfolio for the three and six months ended June 30, 2018 and 2017. For the three and six months ended June 30, 2018, proceeds from calls on securities in the held to maturity debt securities portfolio totaled \$195,000 and \$20.5 million, respectively. There were no gross gains on calls for the three months ended June 30, 2018 and \$1,000 for the six months ended June 30, 2018, and no gross losses in both the three and six month periods. For the three and six months ended June 30, 2017, proceeds from calls of securities in the held to maturity debt securities portfolio totaled \$7.9 million and \$20.7 million, respectively, with gross gains of \$11,000 and no gross losses recognized in both the three and six month periods.

The amortized cost and fair value of investment securities in the held to maturity debt securities portfolio at June 30, 2018 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	June 30, 2018	
	Amortized cost	Fair value
Due in one year or less	\$5,143	5,165
Due after one year through five years	75,121	75,177
Due after five years through ten years	261,417	260,745
Due after ten years	131,896	130,842
	\$473,577	471,929

Mortgage-backed securities totaling \$248,000 at amortized cost and \$256,000 at fair value are excluded from the table above as their expected lives are likely to be shorter than the contractual maturity date due to principal prepayments.

The following tables present the fair value and gross unrealized losses for held to maturity debt securities with temporary impairment at June 30, 2018 and December 31, 2017 (in thousands):

	June 30, 2018 Unrealized Losses						
	Less than 12 months		12 months or longer		Total		
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	
Agency obligations	\$4,475	(143) —	—	4,475	(143)
State and municipal obligations	168,467	(2,667) 48,054	(2,706) 216,521	(5,373)
Corporate obligations	8,984	(207) —	—	8,984	(207)
	\$181,926	(3,017) 48,054	(2,706) 229,980	(5,723)
	December 31, 2017 Unrealized Losses

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

State and municipal obligations	37,317	(295)	49,488	(1,443)	86,805	(1,738)
Corporate obligations	9,662	(83)	—	—		9,662	(83)
	\$50,800	(465)	49,488	(1,443)	100,288	(1,908)

14

The Company estimates the loss projections for each non-agency mortgage-backed security by stressing the individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether other-than-temporary impairment existed during the three months ended June 30, 2018. Based on its detailed review of the held to maturity debt securities portfolio, the Company believes that as of June 30, 2018, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary. The Company does not have the intent to sell securities in a temporary loss position at June 30, 2018, nor is it more likely than not that the Company will be required to sell the securities before the anticipated recovery.

The number of held to maturity debt securities in an unrealized loss position at June 30, 2018 totaled 403, compared with 184 at December 31, 2017. The increase in the number of securities in an unrealized loss position at June 30, 2018, was due to higher current market interest rates compared to rates at December 31, 2017. All temporarily impaired investment securities were investment grade at June 30, 2018.

Note 3. Loans Receivable and Allowance for Loan Losses

Loans receivable at June 30, 2018 and December 31, 2017 are summarized as follows (in thousands):

	June 30, 2018	December 31, 2017
Mortgage loans:		
Residential	\$1,118,140	1,142,347
Commercial	2,185,339	2,171,056
Multi-family	1,405,805	1,403,885
Construction	406,893	392,580
Total mortgage loans	5,116,177	5,109,868
Commercial loans	1,688,477	1,745,138
Consumer loans	451,920	473,957
Total gross loans	7,256,574	7,328,963
Purchased credit-impaired ("PCI") loans	928	969
Premiums on purchased loans	3,668	4,029
Unearned discounts	(35)	(36)
Net deferred fees	(7,893)	(8,207)
Total loans	\$7,253,242	7,325,718

The following tables summarize the aging of loans receivable by portfolio segment and class of loans, excluding PCI loans (in thousands):

	June 30, 2018				Recorded Investment > 90 days accruing	Total Past Due	Current	Total Loans Receivable
	30-59 Days	60-89 Days	Non-accrual					
Mortgage loans:								
Residential	\$4,696	2,924	8,984	—	16,604	1,101,536	1,118,140

Consumer loans	2,465	487	2,491	—	5,443	468,514	473,957	
Total gross loans	\$12,311	5,218	34,929	—	52,458	7,276,505	7,328,963	

Included in loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The principal amounts of these non-accrual loans were \$32.6 million and \$34.9 million at June 30, 2018 and December 31, 2017, respectively. Included in non-accrual loans were \$8.7 million and \$11.5 million of loans which were less than 90 days past due at June 30, 2018 and December 31, 2017, respectively. There were no loans 90 days or greater past due and still accruing interest at June 30, 2018 or December 31, 2017.

The Company defines an impaired loan as a non-homogeneous loan greater than \$1.0 million for which it is probable, based on current information, all amounts due under the contractual terms of the loan agreement will not be collected. Impaired loans also include all loans modified as troubled debt restructurings (“TDRs”). A loan is deemed to be a TDR when a loan modification resulting in a concession is made in an effort to mitigate potential loss arising from a borrower’s financial difficulty. Smaller balance homogeneous loans, including residential mortgages and other consumer loans, are evaluated collectively for impairment and are excluded from the definition of impaired loans, unless modified as TDRs. The Company separately calculates the reserve for loan losses on impaired loans. The Company may recognize impairment of a loan based upon: (1) the present value of expected cash flows discounted at the effective interest rate; (2) if a loan is collateral dependent, the fair value of collateral; or (3) the fair value of the loan. Additionally, if impaired loans have risk characteristics in common, those loans may be aggregated and historical statistics may be used as a means of measuring those impaired loans.

The Company uses third-party appraisals to determine the fair value of the underlying collateral in its analysis of collateral dependent impaired loans. A third-party appraisal is generally ordered as soon as a loan is designated as a collateral dependent impaired loan and is generally updated annually or more frequently, if required.

A specific allocation of the allowance for loan losses is established for each collateral dependent impaired loan with a carrying balance greater than the collateral’s fair value, less estimated costs to sell. Charge-offs are generally taken for the amount of the specific allocation when operations associated with the respective property cease and it is determined that collection of amounts due will be derived primarily from the disposition of the collateral. At each quarter end, if a loan is designated as a collateral dependent impaired loan and the third-party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management’s knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value. The Company believes there have been no significant time lapses in the recognition of changes in collateral values as a result of this process.

At June 30, 2018, there were 152 impaired loans totaling \$55.5 million. Included in this total were 128 TDRs related to 124 borrowers totaling \$38.0 million that were performing in accordance with their restructured terms and which continued to accrue interest at June 30, 2018. At December 31, 2017, there were 149 impaired loans totaling \$52.0 million. Included in this total were 125 TDRs to 121 borrowers totaling \$31.7 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2017.

The following table summarizes loans receivable by portfolio segment and impairment method, excluding PCI loans (in thousands):

	June 30, 2018			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments
Individually evaluated for impairment	\$24,737	28,509	2,263	55,509
Collectively evaluated for impairment	5,091,440	1,659,968	449,657	7,201,065
Total gross loans	\$5,116,177	1,688,477	451,920	7,256,574
	December 31, 2017			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments
Individually evaluated for impairment	\$28,459	21,223	2,359	52,041
Collectively evaluated for impairment	5,081,409	1,723,915	471,598	7,276,922

Total gross loans	\$5,109,868	1,745,138	473,957	7,328,963
-------------------	-------------	-----------	---------	-----------

17

The allowance for loan losses is summarized by portfolio segment and impairment classification as follows (in thousands):

	June 30, 2018			
	Mortgage loans	Commercial loans	Consumer loans	Total
Individually evaluated for impairment	\$1,200	874	66	2,140
Collectively evaluated for impairment	25,961	28,620	2,098	56,679
Total gross loans	\$27,161	29,494	2,164	58,819
	December 31, 2017			
	Mortgage loans	Commercial loans	Consumer loans	Total
Individually evaluated for impairment	\$1,486	1,134	70	2,690
Collectively evaluated for impairment	26,566	28,680	2,259	57,505
Total gross loans	\$28,052	29,814	2,329	60,195

Loan modifications to borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, the Company attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following tables present the number of loans modified as TDRs during the three and six months ended June 30, 2018 and 2017, along with their balances immediately prior to the modification date and post-modification as of June 30, 2018 and 2017.

	For the three months ended			
	June 30, 2018		June 30, 2017

Troubled Debt Restructurings	For the six months ended June 30, 2018		June 30, 2017	
	Pre-Modification Number of Outstanding Loans Recorded Investment (\$ in thousands)	Post-Modification Outstanding Recorded Investment	Pre-Modification Number of Outstanding Loans Recorded Investment	Post-Modification Outstanding Recorded Investment
Mortgage loans:				
Residential	1 \$ 118	103	6 \$ 2,838	\$ 2,774
Total mortgage loans	1 118	103	6 2,838	2,774
Commercial loans	5 8,126	9,179	1 1,300	1,240
Consumer loans	—	—	2 240	232
Total restructured loans	6 \$ 8,244	\$ 9,282	9 \$ 4,378	\$ 4,246

All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. During the three and six months ended June 30, 2018, \$428,000 and \$2.0 million of charge-offs were recorded on collateral dependent impaired loans. There were no charge-offs recorded on collateral dependent impaired loans during the three months ended June 30, 2017. For the six months ended June 30, 2017, \$1.2 million of charge-offs were recorded on collateral dependent impaired loans. For the three and six months ended June 30, 2018, the allowance for loan losses associated with the TDRs presented in the preceding tables totaled \$0 and \$706,650, respectively, and were included in the allowance for loan losses for loans individually evaluated for impairment.

For the three and six months ended June 30, 2018, the TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 6.13% and 5.62%, respectively, compared to a weighted average rate of 6.13% and 5.18% prior to modification, respectively.

The following table presents loans modified as TDRs within the previous 12 months from June 30, 2018 and 2017, and for which there was a payment default (90 days or more past due) at the quarter ended June 30, 2018 and 2017.

Troubled Debt Restructurings Subsequently Defaulted	June 30, 2018		June 30, 2017	
	Outstanding Number of Recorded Loans Investment (\$ in thousands)	Outstanding Number of Recorded Loans Investment	Outstanding Number of Recorded Loans Investment	Outstanding Number of Recorded Loans Investment
Mortgage loans:				
Total mortgage loans	—	—	—	—
Commercial loans	3 1,344	—	\$ —	—
Consumer loans	—	—	—	—
Total restructured loans	3 \$ 1,344	—	\$ —	—

There were three payment defaults on one borrower (90 days or more past due) for loans modified as TDRs within the 12 month period ending June 30, 2018. There were no payment defaults (90 days or more past due) for loans modified as TDRs within the 12 month period ending June 30, 2017. TDRs that subsequently default are considered collateral dependent impaired loans and are evaluated for impairment based on the estimated fair value of the underlying collateral less expected selling costs.

PCI loans are loans acquired at a discount primarily due to deteriorated credit quality. These loans are accounted for at fair value, based upon the present value of expected future cash flows, with no related allowance for loan losses. PCI loans totaled \$928,000 at June 30, 2018 and \$969,000 at December 31, 2017.

The following table summarizes the changes in the accretable yield for PCI loans during the three and six months ended June 30, 2018 and 2017 (in thousands):

	Three months ended June 30,		Six months ended June 30,	
	2018	2017	2018	2017
Beginning balance	\$112	172	101	200
Accretion	(9)	(96)	(29)	(145)
Reclassification from non-accretable discount	13	82	44	103
Ending balance	\$116	158	116	158

The activity in the allowance for loan losses by portfolio segment for the three and six months ended June 30, 2018 and 2017 was as follows (in thousands):

Three months ended June 30,	Mortgage loans	Commercial loans	Consumer loans	Total
2018				
Balance at beginning of period	\$28,001	32,326	2,194	62,521

Specific allocations of the allowance for loan losses attributable to impaired loans totaled \$2.1 million at June 30, 2018 and \$2.7 million at December 31, 2017. At June 30, 2018 and December 31, 2017, impaired loans for which there was no related allowance for loan losses totaled \$31.6 million and \$31.4 million, respectively. The average balance of impaired loans for the six months ended June 30, 2018 and December 31, 2017 was \$74.4 million and \$54.0 million.

The Company utilizes an internal nine-point risk rating system to summarize its loan portfolio into categories with similar risk characteristics. Loans deemed to be “acceptable quality” are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of “questionable quality” are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi-family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and by the Credit Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third-party. Reports by the independent third-party are presented directly to the Audit Committee of the Board of Directors.

Loans receivable by credit quality risk rating indicator, excluding PCI loans, are as follows (in thousands):

	At June 30, 2018							
	Residential	Commercial mortgage	Multi-family	Construction	Total mortgages	Commercial	Consumer	Total loans
Special mention	\$2,924	15,556	—	—	18,480	22,614	368	41,462

Note 4. Deposits

Deposits at June 30, 2018 and December 31, 2017 are summarized as follows (in thousands):

	June 30, 2018	December 31, 2017
Savings	\$1,070,397	1,083,012
Money market	1,471,683	1,532,024
NOW	1,983,194	2,011,334
Non-interest bearing	1,499,117	1,452,987
Certificates of deposit	649,558	634,809
Total deposits	\$6,673,949	6,714,166

Note 5. Components of Net Periodic Benefit Cost

The Bank has a noncontributory defined benefit pension plan covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003. The pension plan was frozen on April 1, 2003. All participants in the Plan are 100% vested. The pension plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.

In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen as to new entrants, and benefits were eliminated for employees with less than ten years of service as of December 31, 2002.

Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen as to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006. Net periodic (increase) benefit cost for pension benefits and other post-retirement benefits for the three and six months ended June 30, 2018 and 2017 includes the following components (in thousands):

	Three months ended June 30,				Six months ended June 30,			
	Pension benefits		Other post-retirement benefits		Pension benefits		Other post-retirement benefits	
	2018	2017	2018	2017	2018	2017	2018	2017
Service cost	\$—	—	29	26	\$—	—	58	52
Interest cost	274	307	197	218	548	614	394	436
Expected return on plan assets	(693)	(638)	—	—	(1,386)	(1,276)	—	—
Amortization of prior service cost	—	—	—	—	—	—	—	—
Amortization of the net loss (gain)	199	230	(99)	(169)	398	460	(198)	(338)
Net periodic (increase) benefit cost	\$(220)	(101)	127	75	\$(440)	(202)	254	150

In its consolidated financial statements for the year ended December 31, 2017, the Company previously disclosed that it does not expect to contribute to the pension plan in 2018. As of June 30, 2018, no contributions have been made to the pension plan.

The net periodic benefit (increase) cost for pension benefits and other post-retirement benefits for the three and six months ended June 30, 2018 were calculated using the actual January 1, 2018 pension and other post-retirement benefits valuations.

Note 6. Impact of Recent Accounting Pronouncements

Accounting Pronouncements Adopted in 2018

In March 2017, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2017-07, “Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Post-retirement Benefit Cost,” which requires that companies disaggregate the service cost component from other components of net benefit cost. This update calls for companies that offer post-retirement benefits to present the service cost, which is the amount an employer has to set aside each quarter or fiscal year to cover the benefits, in the same line item with other current employee compensation costs. Other components of net benefit cost will be presented in the income statement separately from the service cost component and outside the subtotal of income from operations, if one is presented. ASU 2017-07 is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company adopted this guidance effective January 1, 2018. The adoption of this ASU did not have a material impact on the Company’s consolidated financial statements.

In May 2017, the FASB issued ASU 2017-09, “Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting.” This update provides guidance about changes to terms or conditions of a share-based payment award which would require modification accounting. In particular, an entity is required to account for the effects of a modification if the fair value, vesting condition or the equity/liability classification of the modified award is not the same immediately before and after a change to the terms and conditions of the award. ASU 2017-09 is effective on a prospective basis for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company adopted this guidance effective January 1, 2018. The adoption of this ASU did not have a material impact on the Company’s consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments,” a new standard which addresses diversity in practice related to eight specific cash flow issues: debt prepayment or extinguishment costs, settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing, contingent consideration payments made after a business combination, proceeds from the settlement of insurance

claims, proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies), distributions received from equity method investees, beneficial interests in securitization transactions and separately identifiable cash flows and application of the predominance principle. ASU 2016-15 is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Entities will apply the standard's provisions using a retrospective transition method to each period presented. If it is impracticable to apply the amendments retrospectively for some of the issues, the amendments for those issues would be applied prospectively as of the earliest date practicable. The Company adopted this guidance for the interim reporting period ended March 31, 2018. The adoption

of this guidance did not have a material impact on the Company's consolidated financial statements, nor was additional disclosure deemed necessary.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Liabilities." This ASU addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This amendment supersedes the guidance to classify equity securities with readily determinable fair values into different categories, requires equity securities, except equity method investments, to be measured at fair value with changes in the fair value recognized through net income, and simplifies the impairment assessment of equity investments without readily determinable fair values. The amendment requires public business entities that are required to disclose the fair value of financial instruments measured at amortized cost on the balance sheet to measure that fair value using the exit price notion. The amendment requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option. The amendment requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or in the accompanying notes to the financial statements. The amendment reduces diversity in current practice by clarifying that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available for sale securities in combination with the entity's other deferred tax assets. This amendment is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Entities should apply the amendment by means of a cumulative-effect adjustment as of the beginning of the fiscal year of adoption, with the exception of the amendment related to equity securities without readily determinable fair values, which should be applied prospectively to equity investments that exist as of the date of adoption. The Company adopted this guidance effective January 1, 2018. As a result, \$658,000 of equity securities, as of December 31, 2017, were reclassified from securities available for sale and presented as a separate item on the Consolidated Statements of Financial Condition. The \$184,000 after-tax unrealized gain on these securities, at the time of adoption, was reclassified from accumulated other comprehensive income to retained earnings and is reflected in the Consolidated Statements of Changes in Stockholders' Equity. For financial instruments that are measured at amortized cost, the Company measures fair value utilizing an exit pricing methodology, and as such, no changes were required as a result of the adoption of this guidance.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)." The objective of this amendment is to clarify the principles for recognizing revenue and to develop a common revenue standard for U.S. GAAP and IFRS. This update affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of non-financial assets unless those contracts are in the scope of other standards. The ASU is effective for public business entities for financial statements issued for fiscal years beginning after December 15, 2017, and early adoption is permitted. Subsequently, the FASB issued the following standards related to ASU 2014-09: ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations;" ASU 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing;" ASU 2016-11, "Revenue Recognition (Topic 605) and Derivatives and Hedging (Topic 815): Rescission of SEC Guidance Because of Accounting Standards Updates 2014-09 and 2014-16 Pursuant to Staff Announcements at the March 3, 2016 EITF Meeting;" and ASU 2016-12, "Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients." These amendments are intended to improve and clarify the implementation guidance of ASU 2014-09 and have the same effective date as the original standard. The Company's revenue is comprised of net interest income on interest earning assets and liabilities and non-interest income. The scope of guidance explicitly excludes net interest income as well as other revenues associated with financial assets and liabilities, including loans, leases, securities and derivatives. Accordingly, the majority of the Company's revenues are not affected. The Company formed a working group to guide implementation efforts including the identification of revenue within the scope of the guidance, as well as the evaluation of revenue contracts and the respective performance obligations within those contracts. The Company completed its evaluation of this guidance and concluded there are no material changes related to the timing or amount of revenue recognition. The Company adopted this guidance effective January 1, 2018. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements, but resulted in additional footnote disclosures,

including the disaggregation of certain categories of revenue (see Note 10 - "Revenue Recognition").

Accounting Pronouncements Not Yet Adopted

In August 2017, the FASB issued ASU 2017-12, "Derivatives and Hedging: Targeted Improvements to Accounting for Hedging." The purpose of this updated guidance is to better align a company's financial reporting for hedging activities with the economic objectives of those activities. ASU 2017-12 is effective for public business entities for fiscal years beginning after December 15, 2018, with early adoption, including adoption in an interim period, permitted. ASU 2017-12 requires a modified retrospective transition method in which the Company will recognize the cumulative effect of the change on the opening balance of each affected component of equity in the statement of financial position as of the date of adoption. The Company is currently assessing the impact that the guidance will have on the Company's consolidated financial statements.

In March 2017, the FASB issued ASU 2017-08, "Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities." This ASU shortens the amortization period for premiums on callable debt securities by requiring that premiums be amortized to the first (or earliest) call date instead of as an adjustment to the yield over the contractual life. This change more closely aligns the accounting with the economics of a callable debt security and the amortization period with expectations that already are included in market pricing on callable debt securities. This ASU does not change the accounting for discounts on callable debt securities, which will continue to be amortized to the maturity date. This guidance only includes instruments that are held at a premium and have explicit call features. It does not include instruments that contain prepayment features, such as mortgage backed securities; nor does it include call options that are contingent upon future events or in which the timing or amount to be paid is not fixed. The effective date for this ASU is fiscal years beginning after December 15, 2018, including interim periods within the reporting period, with early adoption permitted. Transition is on a modified retrospective basis with an adjustment to retained earnings as of the beginning of the period of adoption. If early adopted in an interim period, adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The Company is currently assessing the impact this guidance will have on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, "Simplifying the Test for Goodwill Impairment." The main objective of this ASU is to simplify the accounting for goodwill impairment by requiring that impairment charges be based upon the first step in the current two-step impairment test under Accounting Standards Codification (ASC) 350. Currently, if the fair value of a reporting unit is lower than its carrying amount (Step 1), an entity calculates any impairment charge by comparing the implied fair value of goodwill with its carrying amount (Step 2). The implied fair value of goodwill is calculated by deducting the fair value of all assets and liabilities of the reporting unit from the reporting unit's fair value as determined in Step 1. To determine the implied fair value of goodwill, entities estimate the fair value of any unrecognized intangible assets and any corporate-level assets or liabilities that were included in the determination of the carrying amount and fair value of the reporting unit in Step 1. Under ASU 2017-04, if a reporting unit's carrying amount exceeds its fair value, an entity will record an impairment charge based on that difference. The impairment charge will be limited to the amount of goodwill allocated to that reporting unit. This standard eliminates the requirement to calculate a goodwill impairment charge using Step 2. ASU 2017-04 does not change the guidance on completing Step 1 of the goodwill impairment test. Under ASU 2017-04, an entity will still be able to perform the current optional qualitative goodwill impairment assessment before determining whether to proceed to Step 1. The standard will be applied prospectively and is effective for annual and interim impairment tests performed in periods beginning after December 15, 2019. Early adoption is permitted for annual and interim goodwill impairment testing dates after January 1, 2017. The Company does not expect ASU 2017-04 to have a significant impact on the Company's consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, "Measurement of Credit Losses on Financial Instruments." The main objective of this ASU is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments by a reporting entity at each reporting date. The amendments in this ASU require financial assets measured at amortized cost to be presented at the net amount expected to be collected. The allowance for credit losses would represent a valuation account that would be deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. The income statement would reflect the measurement of credit losses for newly recognized financial assets, as well as the expected increases or decreases of expected credit losses that have taken place during the period. The measurement of expected credit losses would be based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. An entity will be required to use judgment in determining the relevant information and estimation methods that are appropriate in its circumstances. The amendments in ASU 2016-13 are effective for fiscal years, including interim periods, beginning after December 15, 2019. Early adoption of this ASU is permitted for fiscal years beginning after December 15, 2018. The Company continues to evaluate the potential impact of ASU 2016-13 on the consolidated financial statements. In that regard, the Company formed, in the first quarter of 2017, a cross-functional working group, under the direction of the Chief Credit Officer, Chief Financial Officer and Chief Risk Officer. The working

group is comprised of individuals from various functional areas including credit, risk management, finance and information technology, among others. The Company developed a detailed implementation plan to include an assessment of processes, portfolio segmentation, model development, model validation, system requirements and the identification of data and resource needs, among other things. The Company has recently selected a system platform and has engaged with third-party vendors to assist with model development, data governance and operational controls to support the adoption of this ASU. The adoption of the ASU 2016-13 may result in an increase in the allowance for loan losses as a result of changing from an "incurred loss" model, which encompasses allowances for current known and inherent losses within the portfolio, to an "expected loss" model, which encompasses allowances for losses expected to be incurred over the life of the portfolio. Furthermore, ASU 2016-13 will necessitate establishing an allowance for expected credit losses on debt securities. The Company is currently unable to reasonably estimate the impact of adopting ASU 2016-13. It is expected that the impact of adoption will be significantly influenced by the composition, characteristics and quality of our loan and securities portfolios as well as the prevailing economic conditions and forecasts as of the adoption date.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)." This ASU requires all lessees to recognize a lease liability and a right-of-use asset, measured at the present value of the future minimum lease payments, at the lease commencement date. Lessor accounting remains largely unchanged under the new guidance. The guidance is effective for fiscal years beginning after December 15, 2018, including interim reporting periods within that reporting period, with early adoption permitted. A modified retrospective approach must be applied for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. In the first quarter of 2018, the Company formed a working group to guide the implementation efforts, including the identification and review of all lease agreements within the scope of the guidance. The working group is in the process of identifying a complete inventory of leases and accumulating the lease data necessary to apply the guidance, as well as evaluating software platforms to aid in the transition to the new lease guidance. The Company is currently assessing the impact that the ASU will have on the Company's consolidated financial statements.

Note 7. Fair Value Measurements

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value.

Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

- Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and
- Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of June 30, 2018 and December 31, 2017.

Available for Sale Debt Securities, at Fair Value

For available for sale debt securities, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third-party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or to comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As

the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology

documentation provided by independent pricing services has not historically resulted in an adjustment in the prices obtained from the pricing service.

Equity Securities, at Fair Value

The Company holds equity securities that are traded in active markets with readily accessible quoted market prices that are considered Level 1 inputs.

Derivatives

The Company records all derivatives on the statement of financial condition at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company has interest rate derivatives resulting from a service provided to certain qualified borrowers in a loan related transaction and, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. As such, all changes in fair value of the Company's interest rate derivatives not used to manage interest rate risk are recognized directly in earnings.

The Company also uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges, and which satisfy hedge accounting requirements, involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without the exchange of the underlying notional amount. These derivatives were used to hedge the variable cash outflows associated with FHLBNY borrowings. The effective portion of changes in the fair value of these derivatives are recorded in accumulated other comprehensive income, and are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The ineffective portion of the change in fair value of these derivatives are recognized directly in earnings.

The fair value of the Company's derivatives is determined using discounted cash flow analysis using observable market-based inputs, which are considered Level 2 inputs.

Assets Measured at Fair Value on a Non-Recurring Basis

The valuation techniques described below were used to estimate fair value of financial instruments measured on a non-recurring basis as of June 30, 2018 and December 31, 2017.

Collateral Dependent Impaired Loans

For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case-by-case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell between 5% and 10%. The Company classifies these loans as Level 3 within the fair value hierarchy.

Foreclosed Assets

Assets acquired through foreclosure or deed in lieu of foreclosure are carried at fair value, less estimated selling costs, which range between 5% and 10%. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value less estimated selling costs is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.

There were no changes to the valuation techniques for fair value measurements as of June 30, 2018 and December 31, 2017.

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of June 30, 2018 and December 31, 2017, by level within the fair value hierarchy:

(In thousands)	Fair Value Measurements at Reporting Date Using:			
	June 30, 2018	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Other Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:

Foreclosed assets	6,864	—	—	6,864
	\$13,835	—	—	13,835

There were no transfers between Level 1, Level 2 and Level 3 during the three and six months ended June 30, 2018.

28

Other Fair Value Disclosures

The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities.

Cash and Cash Equivalents

For cash and due from banks, federal funds sold and short-term investments, the carrying amount approximates fair value.

Held to Maturity Debt Securities

For held to maturity debt securities, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy.

Federal Home Loan Bank of New York ("FHLBNY") Stock

The carrying value of FHLBNY stock is its cost. The fair value of FHLBNY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non-performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date (i.e. exit pricing). The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3.

The fair value for significant non-performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. The Company classifies the estimated fair value of its non-performing loan portfolio as Level 3.

Deposits

The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2.

Borrowed Funds

The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy.

Commitments to Extend Credit and Letters of Credit

The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value estimates of commitments to extend credit and letters of credit are deemed immaterial.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

The following tables present the Company's financial instruments at their carrying and fair values as of June 30, 2018 and December 31, 2017. Fair values are presented by level within the fair value hierarchy.

(Dollars in thousands)	Carrying value	Fair value	Fair Value Measurements at June 30, 2018 Using:

Total reclassification	\$ 148	74	Net of tax

⁽¹⁾ This item is included in the computation of net periodic benefit cost. See Note 5. Components of Net Periodic Benefit Cost.

Note 9. Derivative and Hedging Activities

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk, primarily by managing the amount, sources, and duration of its assets and liabilities.

Non-designated Hedges. Derivatives not designated in qualifying hedging relationships are not speculative and result from a service the Company provides to certain qualified commercial borrowers in loan related transactions and, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. The Company executes interest rate swaps with qualified commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting interest rate swaps that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. The interest rate swap agreement which the Company executes with the commercial borrower is collateralized by the borrower's commercial real estate financed by the Company. The collateral exceeds the maximum potential amount of future payments under the credit derivative. As the interest rate swaps associated with this program do not meet the hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. At June 30, 2018 and December 31, 2017, the Company had 50 and 48 interest rate swaps, respectively, with aggregate notional amounts of \$777.4 million and \$718.5 million, respectively, related to this program. Additionally, at June 30, 2018 and December 31, 2017, the Company had three and two credit derivatives, respectively, with aggregate notional amounts of \$29.7 million and \$15.8 million, respectively, from participations in interest rate swaps provided to external lenders as part of loan participation arrangements; therefore, they are not used to manage interest rate risk in the Company's assets or liabilities. At June 30, 2018 and December 31, 2017, the fair value of these credit derivatives was immaterial.

Cash Flow Hedges of Interest Rate Risk. The Company's objective in using interest rate derivatives is to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges are recorded in accumulated other comprehensive income and are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. During the three and six months ended June 30, 2018 and 2017, such derivatives were used to hedge the variable cash outflows associated with Federal Home Loan Bank borrowings. The ineffective portion of the change in fair value of the derivatives is recognized directly in earnings. During the three and six months ended June 30, 2018 and 2017, the Company did not record any hedge ineffectiveness.

Amounts reported in accumulated other comprehensive income (loss) related to derivatives will be reclassified to interest expense as interest payments are made on the Company's debt. During the next twelve months, the Company estimates that \$561,000 will be reclassified as an increase to interest expense. As of June 30, 2018, the Company had two outstanding interest rate derivatives with an aggregate notional amount of \$60.0 million that was designated as a cash flow hedge of interest rate risk.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the Consolidated Statements of Financial Condition at June 30, 2018 and December 31, 2017 (in thousands):

		At June 30, 2018			
		Asset Derivatives		Liability Derivatives	
		Consolidated Statements of	Fair	Consolidated Statements of	Fair

Interest rate products	Interest expense	\$80	\$(108)
Total		\$80	\$(108)

The Company has agreements with certain of its dealer counterparties that contain a provision that if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations.

In addition, the Company has agreements with certain of its dealer counterparties that contain a provision that if the Company fails to maintain its status as a well/adequately capitalized institution, then the counterparty could terminate the derivative positions and the Company would be required to settle its obligations under the agreements.

At June 30, 2018, the Company had five dealer counterparties, of which, only one dealer counterparty was in a net liability position. The termination value for this net liability position, which includes accrued interest, was \$760,000.

The Company has minimum collateral posting thresholds with certain of its derivative counterparties, and has posted collateral of \$690,000 against its obligations under these agreements. If the Company had breached any of these provisions at June 30, 2018, it could have been required to settle its obligations under the agreements at the termination value.

Note 10. Revenue Recognition

On January 1, 2018, the Company adopted ASU 2014-09 "Revenue from Contracts with Customers" (Topic 606) and all subsequent ASUs that modified Topic 606. The Company performed a review and assessment of all revenue streams, the related contracts with customers and the underlying performance obligations in those contracts. This guidance does not apply to revenue associated with financial instruments, including interest income on loans and investments, which comprise the majority of the Company's revenue. For the three months ended June 30, 2018 and 2017, the out-of-scope revenue related to financial instruments was 86% and 84% of the Company's total revenue, respectively. For the six months ended June 30, 2018 and 2017, the out-of-scope revenue related to financial instruments was 87% and 85% of the Company's total revenue, respectively. Revenue-generating activities that are within the scope of Topic 606, are components of non-interest income. These revenue streams can generally be classified into wealth management revenue and banking service charges and other fees. The adoption of this standard did not change the current measurement or recognition of revenue. As such, a cumulative effect adjustment to opening retained earnings was not deemed necessary.

The following table presents non-interest income, segregated by revenue streams in-scope and out-of-scope of Topic 606, for the three and six months ended June 30, 2018 and 2017:

(in-thousands)	Three months		Six months	
	ended June 30, 2018	2017	ended June 30, 2018	2017
Non-interest income				
In-scope of Topic 606:				
Wealth management fees	\$4,602	4,509	\$9,002	8,722
Banking service charges and other fees:				
Service charges on deposit accounts	3,240	3,168	6,554	6,314
Debit card and ATM fees	1,556	1,494	2,958	2,846
Total banking service charges and other fees	4,796	4,662	9,512	9,160
Total in-scope non-interest income	9,398	9,171	18,514	17,882
Total out-of-scope non-interest income	4,439	5,648	8,630	9,402
Total non-interest income	\$13,837	14,819	\$27,144	27,284

Wealth management fee income represents fees earned from customers as consideration for asset management, investment advisory and trust services. The Company's performance obligation is generally satisfied monthly and the resulting fees are recognized monthly based upon the month-end market value of the assets under management and the applicable fee rate. The monthly accrual of wealth management fees are recorded in other assets on the Company's Consolidated Statements of Financial Condition. Fees are received from the customer either on a quarterly or monthly basis. The Company does not earn performance-based incentives. To a lesser extent, optional services such as tax return preparation and estate settlement are also available to existing customers. The Company's performance obligation for these transaction-based services are generally satisfied, and related revenue recognized, at either a point in time when the service is completed, or in the case of estate settlement, over a relatively short period of time, as each service component is completed.

Service charges on deposit accounts include overdraft service fees, account analysis fees and other deposit related fees. These fees are generally transaction-based, or time-based services. The Company's performance obligation for these services are generally satisfied, and revenue recognized, at the time the transaction is completed, or the service rendered. Fees for these services are generally received from the customer either at the time of transaction, or monthly. Debit card and ATM fees are generally transaction-based. Debit card revenue is primarily comprised of interchange fees earned when a customer's Company card is processed through a card payment network. ATM fees are largely generated when a Company cardholder uses a non-Company ATM, or a non-Company cardholder uses a Company ATM. The Company's performance obligation for these services is satisfied when the service is rendered. Payment is generally received at time of transaction or monthly.

Out-of-scope non-interest income primarily consists of Bank-owned life insurance and net fees on loan level interest rate swaps, along with gains and losses on the sale of loans and foreclosed real estate, loan prepayment fees and loan servicing fees. None of these revenue streams are subject to the requirements of Topic 606.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward-Looking Statements

Certain statements contained herein are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods, or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "estimate," "project," "intend," "anticipate," "continue," or similar terms or variations on those terms or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those set forth in Item 1A of the Company's Annual Report on Form 10-K or supplemented by its Quarterly Reports on Form 10-Q, and those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements,

changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity.

The Company cautions readers not to place undue reliance on any such forward-looking statements which speak only as of the date made. The Company also advises readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not have any obligation to update any forward-looking statements to reflect any subsequent events or circumstances after the date of this statement.

Recent Legislative Developments

On May 24, 2018, the Economic Growth, Regulatory Relief, and Consumer Protection Act ("Economic Growth Act") was enacted, which repealed or modified several important provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act") that have impacted the Company. Key aspects of the Economic Growth Act that have the potential to affect the Company's business and results of operations include:

- Raising the total asset threshold from \$10 billion to \$250 billion at which bank holding companies are required to conduct annual company-run stress tests mandated by the Dodd-Frank Act; and

- Raising the total asset threshold from \$10 billion to \$50 billion at which publicly traded bank holding companies are required to establish risk committees for the oversight of the enterprise-wide risk management practices of the institution.

To the extent our balance sheet grows organically or through strategic opportunities, the Company expects to benefit significantly from the amendments which raised the above asset thresholds for conducting annual company-run stress tests. However, notwithstanding this regulatory relief, the Company intends to continue employing a stress testing protocol commensurate with the risk of the institution as part of its enterprise risk management framework. The Company currently has, and will continue to maintain, a risk committee of its board of directors.

The Economic Growth Act also provided significant regulatory relief to institutions with less than \$10 billion in assets, including by:

- Raising the total asset threshold from \$2 billion to \$10 billion at which banks may deem certain loans originated and held in portfolio as "qualified mortgages" for purposes of the Bureau of Consumer Financial Protection's ("BCFP") ability-to-repay rule;

- Requiring the federal banking agencies to develop a Community Bank Leverage Ratio of not less than 8% and not more than 10%, under which any qualifying community bank under \$10 billion in total assets that exceeds such ratio would be considered to have met the existing risk-based capital rules and be deemed "well capitalized"; and

- Amending the Bank Holding Company Act to exempt from the Volcker Rule banks with total assets of \$10 billion or less and which have total trading assets and trading liabilities of 5% or less of their total consolidated assets.

Although the Company may benefit from these legislative changes in the short term, the extent of such benefits will be limited if the Company grows and eventually exceeds \$10 billion in total consolidated assets.

Despite the improvements for community banks and mid-size financial institutions that have resulted from the Economic Growth Act, many provisions of the Dodd-Frank Act and its implementing regulations remain in place and will continue to result in additional operating and compliance costs that could have a material adverse effect on the Company's business, financial condition, and results of operation. In addition, the Economic Growth Act requires the enactment of a number of implementing regulations, the details of which may have a material effect on the ultimate impact of the law.

Critical Accounting Policies

The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company's consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the following as critical accounting policies:

- Adequacy of the allowance for loan losses

- Valuation of available for sale debt securities and impairment analysis

Valuation of deferred tax assets

The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance

40

for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses. Management's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectability of principal may not be reasonably assured. For residential mortgage and consumer loans, this is determined primarily by delinquency status. For commercial mortgage, multi-family, construction and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis.

As part of its evaluation of the adequacy of the allowance for loan losses, each quarter management prepares an analysis that categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating.

When assigning a risk rating to a loan, management utilizes a nine point internal risk rating system. Loans deemed to be "acceptable quality" are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of "questionable quality" are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, multi-family, construction and commercial loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party, and periodically by the Credit Committee in the credit renewal or approval process. In addition, the Bank requires an annual review be performed for commercial and commercial real estate loans above certain dollar thresholds, depending on loan type, to help determine the appropriate risk rating.

Management estimates the amount of loan losses for groups of loans by applying quantitative loss factors to loan segments at the risk rating level, and applying qualitative adjustments to each loan segment at the portfolio level. Quantitative loss factors give consideration to historical loss experience by loan type based upon an appropriate look-back period and adjusted for a loss emergence period. Quantitative loss factors are evaluated at least annually. Management completed its annual evaluation of the quantitative loss factors for the quarter ended September 30, 2017. Qualitative adjustments give consideration to other qualitative or environmental factors such as trends and levels of delinquencies, impaired loans, charge-offs, recoveries and loan volumes, as well as national and local economic trends and conditions. Qualitative adjustments reflect risks in the loan portfolio not captured by the quantitative loss factors and, as such, are evaluated from a risk level perspective relative to the risk levels present over the look-back period. Qualitative adjustments are evaluated at least quarterly. The reserves resulting from the application of both of these sets of loss factors are combined to arrive at the allowance for loan losses.

Management believes the primary risks inherent in the portfolio are a general decline in the economy, a decline in real estate market values, rising unemployment or a protracted period of elevated unemployment, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio.

Although management believes that the Company has established and maintained the allowance for loan losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing and commercial real estate markets and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies

periodically review the adequacy of the Company's allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

The Company's available for sale debt securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 5 to the consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost.

Management conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other-than-temporary. In this evaluation, if such a decline were deemed other-than-temporary, management would measure the total credit-related component of the unrealized loss, and recognize that portion of the loss as a charge to current period earnings. The remaining portion of the unrealized loss would be recognized as an adjustment to accumulated other comprehensive income. The fair value of the securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the fair value of fixed-rate securities decreases and as interest rates fall, the fair value of fixed-rate securities increases. The Company determines if it has the intent to sell these securities or if it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. If either exists, the entire decline in value is considered other-than-temporary and would be recognized as an expense in the current period. In its evaluations, the Company did not recognize an other-than-temporary impairment charge on securities for the three and six months ended June 30, 2018 and 2017.

The determination of whether deferred tax assets will be realizable is predicated on the reversal of existing deferred tax liabilities and estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. The Company did not require a valuation allowance at June 30, 2018 and December 31, 2017.

COMPARISON OF FINANCIAL CONDITION AT JUNE 30, 2018 AND DECEMBER 31, 2017

Total assets at June 30, 2018 totaled \$9.73 billion, a \$112.4 million decrease from December 31, 2017. The decline in total assets was primarily due to a \$72.5 million decrease in total loans, a \$48.9 million decrease in cash and cash equivalents and a \$2.8 million decrease in premises and equipment, partially offset by a \$7.1 million increase in total investments.

Total loans decreased \$72.5 million to \$7.25 billion at June 30, 2018, from \$7.33 billion at December 31, 2017. For the six months ended June 30, 2018, loan originations, including advances on lines of credit, totaled \$1.60 billion, compared with \$1.62 billion for the same period in 2017. During the six months ended June 30, 2018, the loan portfolio had net decreases of \$56.7 million in commercial loans, \$24.2 million in residential mortgage loans and \$22.0 million in consumer loans, partially offset by net increases of \$14.3 million in construction loans, \$14.3 million in commercial mortgage loans and \$1.9 million in multi-family mortgage loans. Commercial real estate, commercial and construction loans represented 78.4% of the loan portfolio at June 30, 2018, compared to 77.9% at December 31, 2017.

The Company participates in loans originated by other banks, including participations designated as Shared National Credits ("SNCs"). The Company's gross commitments and outstanding balances as a participant in SNCs were \$217.5 million and \$103.0 million, respectively, at June 30, 2018. No SNCs were 90 days or more delinquent at June 30, 2018.

The Company had outstanding junior lien mortgages totaling \$190.8 million at June 30, 2018. Of this total, 19 loans totaling \$1.3 million were 90 days or more delinquent. These loans were allocated total loss reserves of \$236,000.

The following table sets forth information regarding the Company's non-performing assets as of June 30, 2018 and December 31, 2017 (in thousands):

	June 30, 2018	December 31, 2017
Mortgage loans:		
Residential	\$8,984	8,105
Commercial	4,149	7,090
Total mortgage loans	13,133	15,195
Commercial loans	17,517	17,243
Consumer loans	1,960	2,491
Total non-performing/non-accrual loans	32,610	34,929
Total non-performing/accruing loans - 90 days or more delinquent	—	—
Total non-performing loans	32,610	34,929

Foreclosed assets	6,537	6,864
Total non-performing assets	\$39,147	41,793

42

The following table sets forth information regarding the Company's 60-89 day delinquent loans as of June 30, 2018 and December 31, 2017 (in thousands):

	June 30, 2018	December 31, 2017
Mortgage loans:		
Residential	\$2,924	4,325
Commercial	59	—
Multi-family	400	—
Total mortgage loans	3,383	4,325
Commercial loans	28	406
Consumer loans	368	487
Total 60-89 day delinquent loans	\$3,779	5,218

At June 30, 2018, the allowance for loan losses totaled \$58.8 million, or 0.81% of total loans, compared with \$60.2 million, or 0.82% of total loans at December 31, 2017. Total non-performing loans were \$32.6 million, or 0.45% of total loans at June 30, 2018, compared to \$34.9 million, or 0.48% of total loans at December 31, 2017. The \$2.3 million decrease in non-performing loans consisted of a \$2.9 million decrease in non-performing commercial mortgage loans and a \$531,000 decrease in non-performing consumer loans, partially offset by an \$879,000 increase in non-performing residential mortgage loans and a \$274,000 increase in non-performing commercial loans. Non-performing loans do not include \$928,000 of purchased credit impaired ("PCI") loans acquired from Team Capital.

At June 30, 2018 and December 31, 2017, the Company held \$6.5 million and \$6.9 million of foreclosed assets, respectively. During the six months ended June 30, 2018, there were four additions to foreclosed assets with a carrying value of \$1.2 million and eight properties sold with a carrying value of \$1.4 million. Foreclosed assets at June 30, 2018 consisted of \$3.7 million of commercial real estate and \$2.8 million of residential real estate. Non-performing assets totaled \$39.1 million, or 0.40% of total assets at June 30, 2018, compared to \$41.8 million, or 0.42% of total assets at December 31, 2017.

Total investments were \$1.60 billion at June 30, 2018, which increased \$7.1 million, compared to the balance at December 31, 2017, largely due to purchases of mortgage-backed and municipal securities, partially offset by principal repayments on mortgage-backed securities, maturities and calls of certain municipal and agency bonds and an increase in unrealized losses on available for sale debt securities.

Total deposits decreased \$40.2 million during the six months ended June 30, 2018, to \$6.67 billion from \$6.71 billion at December 31, 2017. Total core deposits, which consist of savings and demand deposit accounts, decreased \$55.0 million to \$6.02 billion at June 30, 2018, from \$6.08 billion at December 31, 2017, while time deposits increased \$14.7 million to \$649.6 million at June 30, 2018, from \$634.8 million at December 31, 2017. The increase in time deposits was primarily the result of a 13-month certificate of deposit promotional campaign which provided the Company a lower-cost funding alternative to wholesale borrowings. The decrease in core deposits was largely attributable to a \$60.3 million decrease in money market deposits, a \$28.1 million decrease in interest bearing demand deposits and a \$12.6 million decrease in savings deposits, partially offset by a \$46.1 million increase in non-interest bearing demand deposits. Core deposits represented 90.3% of total deposits at June 30, 2018, compared to 90.5% at December 31, 2017.

Borrowed funds decreased \$101.0 million during the six months ended June 30, 2018, to \$1.64 billion. The decrease in borrowings for the period was primarily a function of lower asset funding requirements. Borrowed funds represented 16.9% of total assets at June 30, 2018, a decrease from 17.7% at December 31, 2017.

Stockholders' equity increased \$12.6 million during the six months ended June 30, 2018, to \$1.31 billion, due to net income earned for the period, partially offset by dividends paid to stockholders and an increase in unrealized losses on securities available for sale. Common stock repurchases made in connection with withholding to cover income taxes on the vesting of stock-based compensation for the six months ended June 30, 2018 totaled 70,588 shares at an average cost of \$26.16. At June 30, 2018, 3.1 million shares remained eligible for repurchase under the current stock

repurchase authorization.

Book value per share and tangible book value per share at June 30, 2018 were \$19.64 and \$13.36, respectively, compared with \$19.52 and \$13.20, respectively, at December 31, 2017. Tangible book value per share is a non-GAAP financial measure.

The following table reconciles book value per share to tangible book value per share and the associated calculations (in thousands, except per share data):

43

	June 30, 2018	December 31, 2017
Total stockholders' equity	\$1,311,262	\$1,298,661
Less: Total intangible assets	419,180	420,290
Total tangible stockholders' equity	\$892,082	\$878,371
Shares outstanding at June 30, 2018 and December 31, 2017	66,780,853	66,535,017

Book value per share (total stockholders' equity/shares outstanding)	\$19.64	\$19.52
Tangible book value per share (total tangible stockholders' equity/shares outstanding)	\$13.36	\$13.20

Liquidity and Capital Resources. Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases, deposit outflows and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of investments, cash flows from mortgage-backed securities and the ability to borrow funds from the FHLBNY and approved broker-dealers.

Cash flows from loan payments and maturing investment securities are fairly predictable sources of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage-backed securities and deposit flows.

The Federal Deposit Insurance Corporation and the other federal bank regulatory agencies issued a final rule that revised the leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act, that was effective January 1, 2015. Among other things, the rule established a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), adopted a uniform minimum leverage capital ratio at 4%, increased the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The rule also required unrealized gains and losses on certain "available-for-sale" securities holdings to be included for purposes of calculating regulatory capital unless a one-time opt-out was exercised. The Company exercised the option to exclude unrealized gains and losses from the calculation of regulatory capital. Additional constraints were also imposed on the inclusion in regulatory capital of mortgage-servicing assets, deferred tax assets and minority interests. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a "capital conservation buffer," which when fully phased-in will consist of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The capital conservation buffer was effective on January 1, 2016, with a 0.625% requirement in that year, and will continue to be phased in through January 1, 2019, when the full capital requirement will be effective. For 2018, the capital conservation buffer requirement is 1.875%.

As of June 30, 2018, the Bank and the Company exceeded all current minimum regulatory capital requirements as follows:

	June 30, 2018					
	Required		Required with Capital Conservation Buffer		Actual	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in thousands)						
Bank: ⁽¹⁾						
Tier 1 leverage capital	\$372,274	4.00%	\$372,274	4.00%	\$872,343	9.37%

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Common equity Tier 1 risk-based capital	344,188	4.50	487,599	6.38	872,343	11.41
Tier 1 risk-based capital	458,917	6.00	602,329	7.88	872,343	11.41
Total risk-based capital	611,889	8.00	755,301	9.88	931,309	12.18

Company:

Tier 1 leverage capital	\$372,295	4.00%	\$372,295	4.00%	\$912,152	9.80%
Common equity Tier 1 risk-based capital	344,210	4.50	487,631	6.38	912,152	11.92
Tier 1 risk-based capital	458,947	6.00	602,368	7.88	912,152	11.92
Total risk-based capital	611,929	8.00	755,350	9.88	970,971	12.69

(1) Under the FDIC's prompt corrective action provisions, the Bank is considered well capitalized if it has: a leverage (Tier 1) capital ratio of at least 5.00%; a common equity Tier 1 risk-based capital ratio of 6.50%; a Tier 1 risk-based capital ratio of at least 8.00%; and a total risk-based capital ratio of at least 10.00%.

COMPARISON OF OPERATING RESULTS FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2018 AND 2017

General. The Company reported net income of \$19.2 million, or \$0.30 per basic and diluted share for the three months ended June 30, 2018, compared to net income of \$24.4 million, or \$0.38 per basic and diluted share for the three months ended June 30, 2017. For the six months ended June 30, 2018, the Company reported net income of \$47.2 million, or \$0.73 per basic and diluted share, compared to net income of \$47.9 million, or \$0.75 per basic share and \$0.74 per diluted share, for the same period last year.

As previously reported in a Current Report on Form 8-K filed with the SEC on July 5, 2018, the Company's earnings for the three and six months ended June 30, 2018 were adversely impacted by an increase in the provision for loan losses arising from a credit loss associated with a \$15.4 million credit to a commercial borrower that filed a Chapter 7 petition in bankruptcy on March 27, 2018 for a liquidation of assets. That credit resulted in a net charge-off of \$14.9 million in the quarter. In addition, the Company had a net charge-off of \$4.0 million relating to two loans to another commercial borrower that became impaired during the quarter. As a result, net income for the quarter and year to date was reduced by \$11.8 million, after tax or \$0.18 per diluted share, and \$13.6 million, after tax or \$0.21 per diluted share, respectively. The credit losses incurred this quarter by these two commercial relationships are believed to involve borrower fraud in each instance.

For the three and six months ended June 30, 2018, the Company achieved record net interest income resulting from period over period growth in average loans outstanding and growth in both average non-interest and interest bearing deposits, along with an expansion of the net interest margin. The improvement in net interest margin was driven by an increase in the yield on earning assets and a lagging cost of funds.

Net Interest Income. Total net interest income increased \$5.2 million to \$74.3 million for the quarter ended June 30, 2018, from \$69.1 million for the quarter ended June 30, 2017. For the six months ended June 30, 2018, total net interest income increased \$11.5 million to \$147.6 million, from \$136.1 million for the same period in 2017. Interest income for the quarter ended June 30, 2018 increased \$7.9 million to \$88.3 million, from \$80.4 million for the same period in 2017. For the six months ended June 30, 2018, interest income increased \$16.3 million to \$174.6 million, from \$158.4 million for the six months ended June 30, 2017. Interest expense increased \$2.6 million to \$14.0 million for the quarter ended June 30, 2018, from \$11.4 million for the quarter ended June 30, 2017. For the six months ended June 30, 2018, interest expense increased \$4.8 million to \$27.1 million, from \$22.3 million for the six months ended June 30, 2017.

The net interest margin increased 16 basis points to 3.33% for the quarter ended June 30, 2018, compared to 3.17% for the quarter ended June 30, 2017. The weighted average yield on interest-earning assets increased 27 basis points to 3.97% for the quarter ended June 30, 2018, compared with 3.70% for the quarter ended June 30, 2017, while the weighted average cost of interest bearing liabilities increased 15 basis points to 0.82% for the quarter ended June 30, 2018, compared to the second quarter of 2017. The average cost of interest bearing deposits for the quarter ended June 30, 2018 was 0.53%, compared with 0.36% for the same period last year. Average non-interest bearing demand deposits totaled \$1.46 billion for the quarter ended June 30, 2018, compared to \$1.33 billion for the quarter ended June 30, 2017. The average cost of borrowed funds for the quarter ended June 30, 2018 was 1.82%, compared to 1.66% for the same period last year.

For the six months ended June 30, 2018, the net interest margin increased 16 basis points to 3.31%, compared to 3.15% for the six months ended June 30, 2017. The weighted average yield on interest earning assets increased 26 basis points to 3.93% for the six months ended June 30, 2018, compared with 3.67% for the six months ended June 30, 2017, while the weighted average cost of interest bearing liabilities increased 13 basis points for the six months ended June 30, 2018 to 0.79%, compared to the six months ended June 30, 2017. The average cost of interest bearing deposits for the six months ended June 30, 2018 was 0.50%, compared with 0.35% for the same period last year. Average non-interest bearing demand deposits totaled \$1.44 billion for the six months ended June 30, 2018, compared to \$1.33 billion for the six months ended June 30, 2017. The average cost of borrowings for the six months ended June

30, 2018 was 1.76%, compared with 1.64% for the same period last year.

Interest income on loans secured by real estate increased \$5.7 million to \$52.8 million for the three months ended June 30, 2018, from \$47.0 million for the three months ended June 30, 2017. Commercial loan interest income increased \$1.3 million to \$19.4 million for the three months ended June 30, 2018, from \$18.1 million for the three months ended June 30, 2017. Consumer loan interest income decreased \$251,000 to \$4.9 million for the three months ended June 30, 2018, compared to the three months ended June 30, 2017. For the three months ended June 30, 2018, the average balance of total loans increased \$239.3 million to \$7.19 billion, from \$6.95 billion for the same period in 2017. The average loan yield for the three months ended June 30, 2018 increased 24 basis points to 4.26%, from 4.02% for the same period in 2017.

Interest income on loans secured by real estate increased \$11.2 million to \$104.3 million for the six months ended June 30, 2018, from \$93.0 million for the six months ended June 30, 2017. Commercial loan interest income increased \$3.6 million to \$38.5 million for the six months ended June 30, 2018, from \$34.9 million for the six months ended June 30, 2017. Consumer loan interest income decreased \$360,000 to \$9.9 million for the six months ended June 30, 2018, from \$10.2 million for the six months ended June 30, 2017. For the six months ended June 30, 2018, the average balance of total loans increased \$281.2 million to \$7.22 billion, from \$6.94 billion for the same period in 2017. The average loan yield for the six months ended June 30, 2018 increased 24 basis points to 4.22%, from 3.98% for the same period in 2017.

Interest income on held to maturity debt securities decreased \$138,000 to \$3.2 million for the quarter ended June 30, 2018, compared to the same period last year. Average held to maturity debt securities decreased \$21.8 million to \$471.8 million for the quarter ended June 30, 2018, from \$493.6 million for the same period last year. Interest income on held to maturity debt securities decreased \$242,000 to \$6.3 million for the six months ended June 30, 2018, compared to the same period in 2017. Average held to maturity debt securities decreased \$19.2 million to \$470.8 million for the six months ended June 30, 2018, from \$490.0 million for the same period last year.

Interest income on available for sale debt securities, equity securities and FHLB NY stock increased \$1.1 million to \$7.7 million for the quarter ended June 30, 2018, from \$6.5 million for the quarter ended June 30, 2017. The average balance of available for sale debt securities and FHLB NY stock decreased \$4.7 million to \$1.12 billion for the three months ended June 30, 2018, compared to the same period in 2017. Interest income on available for sale debt securities and FHLB NY stock increased \$1.8 million to \$14.9 million for the six months ended June 30, 2018, from \$13.1 million for the same period last year. The average balance of available for sale debt securities and FHLB NY stock decreased \$6.5 million to \$1.12 billion for the six months ended June 30, 2018, from \$1.13 billion for the same period in 2017.

The average yield on total securities increased to 2.72% for the three months ended June 30, 2018, compared with 2.40% for the same period in 2017. For the six months ended June 30, 2018, the average yield on total securities was 2.67%, compared with 2.40% for the same period in 2017.

Interest expense on deposit accounts increased \$2.3 million to \$7.0 million for the quarter ended June 30, 2018, compared with \$4.7 million for the quarter ended June 30, 2017. For the six months ended June 30, 2018, interest expense on deposit accounts increased \$4.1 million to \$13.2 million, from \$9.1 million for the same period last year. The average cost of interest bearing deposits increased to 0.53% for the second quarter of 2018 and 0.50% for the six months ended June 30, 2018, from 0.36% and 0.35% for the three and six months ended June 30, 2017. The average balance of interest bearing core deposits for the quarter ended June 30, 2018 increased \$102.1 million to \$4.66 billion, from \$4.55 billion for the same period in 2017. For the six months ended June 30, 2018, average interest bearing core deposits increased \$119.7 million, to \$4.68 billion, from \$4.56 billion for the same period in 2017. Average time deposit account balances decreased \$20.5 million, to \$650.1 million for the quarter ended June 30, 2018, from \$670.6 million for the quarter ended June 30, 2017. For the six months ended June 30, 2018, average time deposit account balances decreased \$26.9 million, to \$640.6 million, from \$667.5 million for the same period in 2017.

Interest expense on borrowed funds increased \$304,000 to \$7.0 million for the quarter ended June 30, 2018, from \$6.7 million for the quarter ended June 30, 2017. For the six months ended June 30, 2018, interest expense on borrowed funds increased \$697,000 to \$13.9 million, from \$13.2 million for the six months ended June 30, 2017. The average cost of borrowings increased to 1.82% for the three months ended June 30, 2018, from 1.66% for the three months ended June 30, 2017. The average cost of borrowings increased to 1.76% for the six months ended June 30, 2018, from 1.64% for the same period last year. Average borrowings decreased \$74.1 million to \$1.55 billion for the quarter ended June 30, 2018, from \$1.63 billion for the quarter ended June 30, 2017. For the six months ended June 30, 2018, average borrowings decreased \$23.8 million to \$1.59 billion, compared to \$1.61 billion for the six months ended June 30, 2017.

Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable credit losses inherent in the loan portfolio. In determining the level of the allowance for loan losses, management considers past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that

may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance.

The Company recorded provisions for loan losses of \$15.5 million and \$20.9 million for the three and six months ended June 30, 2018, respectively. This compared with provisions for loan losses of \$1.7 million and \$3.2 million recorded for the three and six months ended June 30, 2017, respectively. For the three and six months ended June 30, 2018, the Company had net charge-offs of \$19.2 million and \$22.3 million, respectively, compared with net charge-offs of \$1.0 million and \$2.2 million, respectively, for

the same periods in 2017. At June 30, 2018, the Company's allowance for loan losses was \$58.8 million, or 0.81% of total loans, compared with \$60.2 million, or 0.82% of total loans at December 31, 2017. The increase in the provision for loan losses and loan charge-offs for the second quarter of 2018 was primarily due to deterioration in selected commercial credits, including a \$15.4 million credit to a commercial borrower, that on March 27, 2018, filed a Chapter 7 petition in bankruptcy for a liquidation of assets and two credits totaling \$4.0 million to another unrelated commercial borrower that became impaired during the quarter. For the three and six months ended June 30, 2018, the Company recorded charge-offs of \$18.9 million on these commercial credits. The credit losses incurred this quarter by these two commercial relationships are believed to involve borrower fraud.

Non-Interest Income. Non-interest income totaled \$13.8 million for the quarter ended June 30, 2018, a decrease of \$1.0 million compared to the same period in 2017. Income from Bank-owned life insurance ("BOLI") decreased \$1.3 million for the three months ended June 30, 2018, compared to the same period in 2017, primarily due to the recognition of death benefit claims in the second quarter of last year. Fee income decreased \$643,000 to \$6.6 million for the three months ended June 30, 2018, compared to the same period in 2017, largely due to a \$1.0 million decrease in commercial loan prepayment fee income, partially offset by a \$124,000 increase in income from the sale of non-deposit investment products and a \$121,000 increase in loan related fee income. Partially offsetting these decreases in non-interest income, other income increased \$835,000 to \$1.3 million for the three months ended June 30, 2018, compared to the quarter ended June 30, 2017, primarily due to a \$556,000 increase in net fees on loan-level interest rate swap transactions and a \$226,000 increase in net gains on the sale of foreclosed real estate, partially offset by a \$109,000 decrease in net gains on the sale of loans.

For the six months ended June 30, 2018, non-interest income totaled \$27.1 million, a decrease of \$140,000, compared to the same period in 2017. BOLI income decreased \$1.4 million to \$2.6 million for the six months ended June 30, 2018, compared to the same period in 2017, primarily due to the recognition of death benefit claims in the prior year. Partially offsetting this decrease, other income increased \$980,000 to \$2.3 million for the six months ended June 30, 2018, compared to \$1.4 million for the same period in 2017, largely due to a \$662,000 increase in net fees on loan-level interest rate swap transactions, a \$214,000 increase in net gains on the sale of loans and a \$115,000 increase in net gains on the sale of foreclosed real estate. Wealth management income increased \$280,000 to \$9.0 million for the six months ended June 30, 2018, resulting from growth in assets under management, higher incremental fees on new asset management relationships and increased revenue from mutual fund offerings.

Non-Interest Expense. For the three months ended June 30, 2018, non-interest expense totaled \$48.8 million, an increase of \$1.5 million, or 3.1%, compared to the three months ended June 30, 2017. Compensation and benefits expense increased \$1.1 million to \$28.0 million for the three months ended June 30, 2018, compared to \$26.9 million for the same period in 2017. This increase was principally due to additional salary expense related to annual merit increases, an increase in the accrual for incentive compensation and an increase in stock-based compensation, partially offset by a decrease in employee medical benefit costs. Other operating expenses increased \$456,000 to \$8.5 million for the three months ended June 30, 2018, compared to the same period in 2017, largely due to an \$813,000 increase in consulting costs, partially offset by a \$368,000 valuation charge related to foreclosed real estate recognized in the prior year. Net occupancy costs increased \$188,000 to \$6.4 million for the three months ended June 30, 2018, compared to the same period in 2017, principally due to increases in facilities maintenance costs and rent expense, partially offset by a decrease in real estate taxes. A portion of these variances are associated with the Company's sale and leaseback of certain facilities in December 2017. Data processing expense increased \$95,000 to \$3.6 million for the three months ended June 30, 2018, principally due to increases in software maintenance expense and on-line banking expenses, partially offset by lower telecommunication expense. Partially offsetting these increases, amortization of intangibles decreased \$149,000 for the three months ended June 30, 2018, compared with the same period in 2017, as a result of scheduled reductions in amortization. Additionally, advertising and promotion expenses decreased \$98,000 to \$847,000 for the three months ended June 30, 2018, compared to the same period in 2017, largely due to the timing of the Company's advertising campaigns.

Non-interest expense totaled \$95.7 million for the six months ended June 30, 2018, an increase of \$2.3 million, or 2.4%, compared to \$93.5 million for the six months ended June 30, 2017. Compensation and benefits expense increased \$2.1 million to \$55.9 million for the six months ended June 30, 2018, compared to \$53.8 million for the six

months ended June 30, 2017, primarily due to additional salary expense related to annual merit increases, an increase in the accrual for incentive compensation and an increase in stock-based compensation. Other operating expenses increased \$400,000 to \$14.6 million for the six months ended June 30, 2018, compared to the same period in 2017, largely due to an increase in consulting expense, partially offset by a valuation charge related to foreclosed real estate recognized in the prior year, along with decreases in attorney fees and loan collection expense. In addition, data processing expense increased \$244,000 to \$7.2 million for the six months ended June 30, 2018, compared to \$7.0 million for the same period in 2017, principally due to increases in software maintenance expense, partially offset by lower telecommunication expense. Partially offsetting these increases in non-interest expense, amortization of intangibles decreased \$331,000 for the six months ended June 30, 2018, compared with the same period in 2017, as a result of scheduled reductions in amortization, and FDIC insurance expense decreased \$145,000 to \$2.0 million for the six months ended June 30, 2018, compared to \$2.1 million for the same period in 2017. This decrease was due to the FDIC's reduction of assessment rates for depository institutions with less than \$10.0 billion in total assets that became effective for the quarter ended September 30, 2017.

Income Tax Expense. For the three and six months ended June 30, 2018, the Company's income tax expense was \$4.6 million and \$10.9 million, respectively, compared with \$10.5 million and \$18.8 million, for the three and six months ended June 30, 2017, respectively. The Company's effective tax rates were 19.2% and 18.8% for the three and six months ended June 30, 2018, respectively, compared to 30.0% and 28.2% for the three and six months ended June 30, 2017, respectively. The decreases in tax expense and the effective tax rate were the result of the enactment of the Tax Cuts and Jobs Act on December 22, 2017, along with a decrease in pre-tax income derived from taxable sources.

On July 1, 2018, the State of New Jersey enacted new legislation that created a temporary surtax effective for tax years 2018 through 2021. Beginning in 2019, the legislation also requires companies to file combined tax returns. The Company is currently evaluating the effect of this new legislation on its net deferred tax asset and future tax expense. The Company anticipates that it will realize a tax benefit during the third quarter of 2018 due to the write up of our net deferred tax asset and, prospectively, experience an increase in state tax expense.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines

of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. Investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.

The Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income.

The Company's strategy for liabilities has been to maintain a stable core-funding base by focusing on core deposit account acquisition and increasing products and services per household. The Company's ability to retain maturing time deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLBNY during periods of pricing dislocation.

Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analysis captures changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.

Specific assumptions used in the simulation model include:

- Parallel yield curve shifts for market rates;
- Current asset and liability spreads to market interest rates are fixed;
- Traditional savings and interest-bearing demand accounts move at 10% of the rate ramp in either direction;
- Retail Money Market and Business Money Market accounts move at 25% and 75% of the rate ramp in either direction respectively; and

Higher-balance demand deposit tiers and promotional demand accounts move at 50% to 75% of the rate ramp in either direction

The following table sets forth the results of a twelve-month net interest income projection model as of June 30, 2018 (dollars in thousands):

Change in Interest Rates in Basis Points (Rate Ramp)	Net Interest Income		
	Dollar Amount	Dollar Change	Percent Change
-100	\$300,977	\$(351)	(0.1)%
Static	301,328	—	—
+100	298,500	(2,828)	(0.9)
+200	295,186	(6,142)	(2.0)
+300	291,686	(9,642)	(3.2)

The preceding table indicates that, as of June 30, 2018, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease 3.2%, or \$9.6 million. In the event of a 100 basis point decrease in interest rates, net interest income would decrease 0.1%, or \$0.4 million over the same period.

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of June 30, 2018 (dollars in thousands):

Change in Interest Rates (Basis Points)	Present Value of Equity			Present Value of Equity as Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change	Present Value Ratio	Percent Change
-100	\$1,533,883	\$11,232	0.7 %	15.6 %	(1.6)%
Flat	1,522,651	—	—	15.9	—
+100	1,449,452	(73,199)	(4.8)	15.5	(2.4)
+200	1,382,505	(140,146)	(9.2)	15.2	(4.6)
+300	1,319,736	(202,915)	(13.3)	14.8	(6.7)

The preceding table indicates that as of June 30, 2018, in the event of an immediate and sustained 300 basis point increase in interest rates, the present value of equity is projected to decrease 13.3%, or \$202.9 million. If rates were to decrease 100 basis points, the model forecasts a 0.7%, or \$11.2 million, increase in the present value of equity.

Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

Item 4. CONTROLS AND PROCEDURES.

Under the supervision and with the participation of management, including the Principal Executive Officer and the Principal Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and the Principal Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in various legal actions and claims arising in the normal course of business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company's financial condition.

Item 1A. Risk Factors

The risk factors that were previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2017, have been supplemented by the Company for the quarter ended June 30, 2018, as follows: Changes in New Jersey's Corporation Business Tax will result in a higher tax expense in 2019 and thereafter.

In connection with the adoption of a new state budget on July 1, 2018, sweeping changes were made to New Jersey's Corporation Business Tax ("CBT") law, generally effective January 1, 2019. Among other provisions, the revised CBT adopts mandatory unitary combined tax reporting. This change will have the effect of eliminating the state tax benefits of our New Jersey Real Estate Investment Trust. In addition, the revised CBT modifies the dividends-received deduction for tax years beginning after December 31, 2016 by reducing the amount of the exclusion from 100 percent to 95 percent for 80% or more owned subsidiaries. These changes in the law will likely increase the Company's New Jersey state income tax expense in 2019 and later years.

The recently enacted Economic Growth, Regulatory Relief, and Consumer Protection Act did not eliminate many of the aspects of the Dodd-Frank Act that have increased and may continue to increase our compliance costs, and remains subject to further rulemaking.

The Economic Growth Act represents modest reform to the regulation of the financial services industry primarily through certain amendments to the Dodd-Frank Act. However, many provisions of the Dodd-Frank Act that have increased, and will continue to increase our compliance costs as we prepare to grow above \$10 billion in assets, remain in place, such as the Durbin amendment reducing debit card interchange fees and the additional supervisory authority of the Bureau of Consumer Financial Protection. In addition, many provisions that may benefit the Company as a community bank may be of limited impact as the Company continues to grow, such as the exemptions for community banks from the Volcker Rule and the development of a Community Bank Leverage Ratio.

Certain of the provisions amended by the Economic Growth Act took effect immediately, while others require that the agencies jointly amend their rulemakings. It is not possible to predict when any final rules would ultimately be issued through any such rulemakings, and what the specific content of such rules will be. Although we expect to benefit from certain aspects of this legislative reform, the legislation and any implementing rules that are ultimately issued could limit expected benefits.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1)(2)
April 1, 2018 through April 30, 2018	—	—	—	3,077,866
