ILLINOIS TOOL WORKS INC. and SUBSIDIARIES NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

(1) FINANCIAL STATEMENTS

The unaudited financial statements included herein have been prepared by Illinois Tool Works Inc. and Subsidiaries (the "Company"). In the opinion of management, the interim financial statements reflect all adjustments of a normal recurring nature necessary for a fair statement of the results for interim periods. It is suggested that these financial statements be read in conjunction with the financial statements and notes to financial statements included in the Company's 2009 Annual Report on Form 10-K. Certain reclassifications of prior year data have been made to conform to current year reporting.

(2) COMPREHENSIVE INCOME

The components of comprehensive income in the periods presented were:

(3) DISCONTINUED OPERATIONS

The Company periodically reviews its operations for businesses which may no longer be aligned with its long-term objectives. In August 2008, the Company's Board of Directors authorized the divestiture of the Click Commerce industrial software business which was previously reported in the All Other segment. In the second quarter of 2009, the Company completed the sale of the Click Commerce business.

In 2007, the Company classified an automotive components business as held for sale which was sold in the third quarter of 2009.

Results of the discontinued operations for the third quarter and year-to-date periods of 2009 were as follows:

(In thousands)	Three Months Ended		Nine M End Septem	led
	September	30, 2009	20	09
Operating revenues	\$	2,794	\$	25,963

Loss from discontinued		1 27		1,023
operations	\$	(546	\$	(34,282)

In the first nine months of 2009, the Company recorded a pre-tax loss on the disposal of the Click Commerce business of \$29,626,000.

(4) INCOME TAXES

In March 2010, the Patient Protection and Affordable Care Act and Health Care and Education Reconciliation Act were signed into law. As a result, future tax deductions for retiree prescription drug coverage will be reduced by the amount of subsidies received starting in 2013. In the first quarter of 2010, the Company recorded a discrete charge of \$21,881,000 for the impact of the health care reform legislation.

In the third quarter of 2010, the Company recorded a discrete charge of \$7,308,000 related to the gain on a sale of a business that had non-deductible goodwill.

In the first nine months of 2009, the Company incurred charges related to the impairment of goodwill and intangible assets of \$101,997,000 that were mostly non-deductible and discrete tax items of \$46,849,000 to record reserves on net operating loss carryforwards no longer expected to be utilized and other tax adjustments.

The components of the effective tax rate for the nine month periods ended September 30, 2010 and 2009 were as follows:

	September	September
	30, 2010	30, 2009
Estimated annual effective tax rate	30.5%	29.6%
Discrete tax adjustments	1.7	6.0
Goodwill and intangible asset		
impairment charges	_	3.3
Effective tax rate	32.2%	38.9%

The Company and its subsidiaries file tax returns in the U.S. and various state, local and foreign jurisdictions. These tax returns are routinely audited by the tax authorities in these jurisdictions and a number of these audits are currently ongoing.

The Company is litigating its dispute with the Australian Tax Office over the treatment of an intercompany financing transaction between the U.S. and Australia. This case was heard before the Federal Court of Australia in September 2010. The proceedings result from the Company's appeal of a decision by the Australian Tax Commissioner to disallow income tax deductions for income tax years 2002 through 2005 and the assessment of withholding taxes for income tax year 2003. The Company also contested the Commissioner's similar determination for income tax years 2006 and 2007; however, the parties have agreed to defer the appeal of that determination until a decision is made on the earlier years. The Company expects a judgment by the end of 2010. The Company has recorded its best estimate of the exposure for this audit; however, it is reasonably possible that the Company will resolve the Australian financing issue within the next 12 months and that the amount of the Company's unrecognized tax benefits may decrease by approximately \$173,150,000.

(5) INVENTORIES

Inventories at September 30, 2010 and December 31, 2009 were as follows:

(In thousands)

	September 30, 2010	December 31, 2009
Raw material	\$ 523,827	\$ 417,314

-	\$ 1,544,728	\$ 1,356,233

(6) GOODWILL AND INTANGIBLE ASSETS

Goodwill represents the excess cost over fair value of the net assets of purchased businesses. The Company does not amortize goodwill and intangible assets that have indefinite lives. The Company performs an annual impairment assessment of goodwill and intangible assets with indefinite lives based on the estimated fair value of the related reporting unit or intangible asset.

When performing its annual impairment assessment, the Company compares the estimated fair value of each of its 60 reporting units to its carrying value. Fair values are determined primarily by discounting estimated future cash flows based either on current operating cash flows or on a detailed cash flow forecast prepared by the relevant reporting unit. The Company also considers additional valuation techniques, such as market multiples from similar transactions and quoted market prices of relevant public companies. If the fair value of a reporting unit is less than its carrying value,

an impairment loss, if any, is recorded for the difference between the implied fair value and the carrying value of the reporting unit's goodwill.

The Company's indefinite-lived intangibles consist of trademarks and brands. The estimated fair values of these intangibles are determined based on a relief-of-royalty income approach derived from internally forecasted revenues of the related products. If the fair value of the trademark or brand is less than its carrying value, an impairment loss is recorded for the difference between the estimated fair value and carrying value of the intangible asset.

In the third quarter of 2010, the Company performed its goodwill and indefinite-lived intangible asset impairment assessment which resulted in immaterial intangible asset impairment charges.

In the first quarter of 2009, the Company performed a goodwill impairment assessment which resulted in impairment charges of \$60,000,000 related to the pressure sensitive adhesives reporting unit in the Polymers & Fluids segment and \$18,000,000 related to the PC board fabrication reporting unit in the Power Systems & Electronics segment. During 2009, the Company changed the date of its annual goodwill impairment assessment from the first quarter to the third quarter. In the third quarter of 2009, the Company performed a goodwill impairment assessment which resulted in an impairment charge of \$12,000,000 related to the truck remanufacturing reporting unit in the Transportation segment.

Also in the first quarter of 2009, intangible asset impairments of \$11,997,000 were recorded to reduce to the estimated fair value the carrying value of certain trademarks and brands. Approximately \$5,800,000 of this total charge related to the PC board fabrication reporting unit and the remainder to various trademarks and brands of other reporting units.

The impairments during 2009 were primarily related to new reporting units which had been acquired before the recent economic downturn. These charges were driven primarily by lower current forecasts compared to the expected forecasts at the time the reporting units were acquired.

A summary of goodwill and indefinite-lived intangible assets that were adjusted to fair value and the related impairment charges included in earnings for 2009 is as follows:

(In thousands)			To	otal Impairment

The Company expects to contribute \$70,500,000 to its pension plans and \$37,900,000 to its other postretirement plans in 2010. As of September 30, 2010, contributions of \$64,800,000 to pension plans and \$26,900,000 to other

postretirement plans have been made.

(8) SHORT-TERM DEBT

In June 2009, the Company entered into a \$2,000,000,000 Line of Credit Agreement with a termination date of June 11, 2010. This line of credit was replaced on June 11, 2010 by a \$1,000,000,000 Line of Credit Agreement with a termination date of June 10, 2011. No amounts were outstanding under this facility at September 30, 2010.

The Company had outstanding commercial paper of \$552,463,000 at September 30, 2010 and \$135,498,000 at December 31, 2009.

(9) LONG-TERM DEBT

Item 2 - Management's Discussion and Analysis

CONSOLIDATED RESULTS OF OPERATIONS

The Company's consolidated results of operations for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

	Three Mon	Nine Months Ended					
(Dollars in thousands)	Septem	September 30					
	2010	2009	2010	2009			
Operating revenues	\$4,018,466	\$3,580,354	\$11,701,107	\$10,119,639

Margin %	15.9 %	13.5 %	5 15.2 %	9.0 %			

In the third quarter and year-to-date periods of 2010, the changes in revenues and operating margins over the prior year were primarily due to the following factors:

Operating Revenues

Revenues increased 12.2% and 15.6% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to higher base revenues and revenues from acquisitions. The effect of currency translation was unfavorable for the quarter but remained favorable for the year-to-date period. Base revenues increased 11.2% and 11.4% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 as the Company saw improvement in macroeconomic data across many worldwide end markets. North American base revenues increased 11.5% and 11.6% in the third quarter and year-to-date periods, respectively, while international base revenues increased 10.8% and 11.0% in the same periods. End markets associated with transportation, industrial packaging, welding and PC board/electronics showed strength in the quarter and year-to-date periods.

Operating Income

Operating income increased \$156.9 million and \$867.5 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to the increase in base revenues, lower restructuring expenses, income from

acquisitions and lower goodwill and intangible asset impairment charges. Base margins increased 160 basis points in the third quarter primarily due to the positive leverage effect of the increase in base revenues partially offset by unfavorable selling price versus material cost comparisons. For the year-to-date period, base margins increased 470 basis points primarily due to the positive leverage effect from the increase in base revenues and the cumulative benefits of restructuring projects, partially offset by unfavorable selling price versus material cost comparisons. In the prior year, the Company recorded a \$12 million goodwill impairment charge in the third quarter. In the first quarter of 2009, the Company recorded goodwill and intangible asset impairment charges of \$90 million.

The reconciliation of segment operating revenues to total operating revenues is as follows:

TRANSPORTATION

Businesses in this segment produce components, fasteners, fluids and polymers, as well as truck remanufacturing and related parts and service.

In the Transportation segment, products and services include:

- •metal and plastic components, fasteners and assemblies for automobiles and light trucks;
- •fluids and polymers for auto aftermarket maintenance and appearance;
- •fillers and putties for auto body repair;
- •polyester coatings and patch and repair products for the marine industry; and
- •truck remanufacturing and related parts and service.

This segment primarily serves the automotive original equipment manufacturers and tiers and automotive aftermarket markets.

The results of operations for the Transportation segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

	Three Months Ended September 30				Nine Months Ended				
(Dollars in thousands)					September 30

Operating Revenues

Revenues increased 16.3% and 28.0% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to the increase in base revenues and revenues from acquisitions, partially offset by a year-to-date decline in revenue for the truck remanufacturing business. In addition, the effect of currency translation was unfavorable for the quarter, but remained favorable for the year-to-date period. The increase in acquisition revenue is primarily due to the purchase of a North American automotive aftermarket business in the second quarter of 2010. North American automotive base revenues increased 28.5% and 49.3% in the third quarter and year-to-date periods of 2010, respectively, due to a year-to-date increase in car builds. International automotive base revenues increased 15.5% and 33.6%, respectively, due to a year-to-date increase in European car builds. The automotive aftermarket businesses, which were less impacted in 2009 by the economic downturn, decreased in the third quarter by 2.5% and were virtually flat for the year-to-date period.

Operating Income

Operating income increased \$38.5 million and \$225.6 million in the third quarter and year-to-date periods of 2010, respectively, primarily due to the increase in base revenues, lower operating costs and 2009 goodwill impairment charges. During the third quarter of 2009, a \$12.0 million goodwill impairment charge was recorded in the truck remanufacturing business. Base margins increased 230 basis points in the third quarter primarily as a result of positive leverage from the increase in base revenues partially offset by unfavorable selling price versus material cost comparisons and higher overhead costs. For the year-to-date period, base margins increased 900 basis points primarily due to the positive leverage effect of increased base revenues, restructuring benefits, and favorable inventory obsolescence expense comparisons, partially offset by unfavorable selling price versus material cost comparisons.

INDUSTRIAL PACKAGING

Businesses in this segment produce steel, plastic and paper products and equipment used for bundling, shipping and protecting goods in transit.

In the Industrial Packaging segment, products include:

- •steel and plastic strapping and related tools and equipment;
- •plastic stretch film and related equipment;
- •paper and plastic products that protect goods in transit; and
- •metal jacketing and other insulation products.

This segment primarily serves the general industrial, primary metals, food and beverage and construction markets.

The results of operations for the Industrial Packaging segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

	Three M	Three Months Ended September 30

Operating Revenues

Operating revenues increased 16.4% and 20.2% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to the increase in base revenues and revenues from acquisitions. Currency translation had an unfavorable impact in the third quarter but remained favorable in the year-to-date period. Base revenues increased 24.0% and 23.9% for the North American strapping businesses in the third quarter and year-to-date periods, respectively, largely due to an increase in plastic and steel strap volume driven by increased demand in key industries such as automotive and appliance. In addition, equipment revenues increased versus the third quarter and year-to-date periods of 2009. The international strapping businesses increased 13.4% and 12.0% in the third quarter and year-to-date periods, respectively, while worldwide protective packaging increased 17.3% and 18.7% in the same periods. Acquisition revenue increased primarily due to the purchase of a North American protective packaging business in the fourth quarter of 2009.

Operating Income

Operating income increased \$29.9 million in the third quarter of 2010 primarily due to the increase in base revenues and increased \$128.7 million in the year-to-date period primarily due to the increase in base revenues and lower operating expenses. Base operating margins increased 250 and 620 basis points in the third quarter and year-to-date periods, respectively, primarily driven by leverage from the increase in base revenues and restructuring benefits,

partially offset by unfavorable third quarter and year-to-date selling price versus material cost comparisons.

FOOD EQUIPMENT

Businesses in this segment produce commercial food equipment and related service.

In the Food Equipment segment, products and services include:

- •warewashing equipment;
- •cooking equipment, including ovens, ranges and broilers;
- •refrigeration equipment, including refrigerators, freezers and prep tables;
- •food processing equipment, including slicers, mixers and scales;
- •kitchen exhaust, ventilation and pollution control systems; and
- •food equipment service, maintenance and repair.

This segment primarily serves the food institutional/restaurant, service and food retail markets.

The results of operations for the Food Equipment segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

	Three M	Nine Months Ended

Operating Revenues

Revenues decreased 2.3% in the third quarter of 2010 versus 2009, primarily due to the unfavorable effect of currency translation partially offset by a 1.4% increase in base revenues. Revenues decreased 0.7% in the year-to-date period of 2010, primarily due to a 1.2% decrease in base revenues partially offset by the favorable effect of currency translation.

North American base revenues were virtually flat in the third quarter and declined 2.1% for the year-to date period, primarily due to declines in the lodging and casino markets. Base revenues in the service portion of the business increased 3.6% and 2.5% in the third quarter and year-to-date periods, respectively. International base revenues increased 2.7% in the third quarter while declining 0.2% for the year-to date period largely due to strong Asian revenue offset in the year-to-date period by lower European equipment sales in 2010 versus 2009.

Operating Income

Operating income increased \$0.3 million and \$8.9 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009. In the third quarter, the positive leverage effect of increased revenues was partially offset by higher restructuring costs. For the year-to-date period, lower restructuring and operating expenses were partially offset by the negative leverage effect of lower revenues. Base margins remained relatively flat in the third quarter and year-to-date periods as operating margin improvements in the International businesses were offset by higher North American overhead spend.

POWER SYSTEMS & ELECTRONICS

Businesses in this segment produce equipment and consumables associated with specialty power conversion, metallurgy and electronics.

In the Power Systems & Electronics segment, products include:

- •arc welding equipment;
- •metal arc welding consumables and related accessories;
- •metal solder materials for PC board fabrication;
- •equipment and services for microelectronics assembly;
- •electronic components and component packaging; and
- •airport ground support equipment.

This segment primarily serves the general industrial, electronics and construction markets.

The results of operations for the Power Systems & Electronics segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

Operating Revenues

Revenues increased 23.7% and 20.7% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to growth in base business. North American welding base revenues increased 19.4% and 13.5%, respectively, as a number of industrial-based end markets experienced improved recovery. Base revenues for the international welding businesses increased 5.3% in the third quarter and declined 1.0% for the year-to-date period, primarily due to strong oil and gas end market activity in the third quarter offset by year-to-date declines in Asian shipyard activity. Base revenues for the PC board fabrication businesses increased 68.6% and 81.1% in the third quarter and year-to-periods, respectively, as demand for consumer electronics and capital equipment increased significantly.

Operating Income

Operating income increased \$39.3 million and \$153.1 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009 mainly due to the favorable leverage effect of the growth in base revenues, lower restructuring expenses and 2009 year-to-date goodwill impairment charges. During the first quarter of 2009, a \$23.8 million goodwill and intangible asset impairment charge was recorded in the PC Board fabrication business. Base income and margins increased in the third quarter and year-to-date periods primarily due to the cumulative benefits of restructuring projects, favorable year-to-date inventory obsolescence expense comparisons and favorable sales mix. However, in the third quarter these increases were offset by the negative impact of unfavorable selling price versus material cost comparisons.

CONSTRUCTION PRODUCTS

Businesses in this segment produce tools, fasteners and other products for construction applications.

In the Construction Products segment, products include:

- •fasteners and related fastening tools for wood and metal applications;
- •anchors, fasteners and related tools for concrete applications;
- •metal plate truss components and related equipment and software; and
- •packaged hardware, fasteners, anchors and other products for retail.

This segment primarily serves the residential construction, commercial construction and renovation construction markets.

The results of operations for the Construction Products segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

Operating Revenues

Revenues increased 10.9% and 16.3% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to an increase in base revenues, revenues from acquisitions, and the year-to-date favorable effect of currency translation. The effect of currency translation was unfavorable in the third quarter of 2010. Base revenues for the Asia-Pacific region increased 5.1% and 5.2% in the third quarter and year-to-date periods, respectively, as market conditions in the residential market improved. North American base revenues decreased 6.7% in the third quarter due to declines for both residential and commercial construction. For the year-to-date period, North American revenues increased 2.8% on slightly better year-over-year housing starts, modest inventory restocking and a one-time licensing agreement settlement in the second quarter of 2010 in the commercial construction business. European base revenues increased 13.3% and 8.4% in the third quarter and year-to-date periods, respectively, primarily due to improved market conditions.

Operating Income

Operating income increased \$8.8 million and \$90.4 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to positive leverage from the increase in base revenues described above, lower year-to-date operating expenses and the favorable effect of currency translation, partially offset by higher year-to-date restructuring expenses. Base margins increased 50 basis points in the third quarter primarily due to the favorable leverage effect of the increase in base revenues described above, partially offset by higher overhead expenses. Base margins increased 690 basis points in the year-to-date period primarily due to favorable selling price versus material cost comparisons, favorable inventory obsolescence expense comparisons, benefits from restructuring projects and a favorable one-time licensing agreement settlement in the second quarter of 2010 in the commercial construction business.

POLYMERS & FLUIDS

Businesses in this segment produce adhesives, sealants, lubrication and cutting fluids, and hygiene products.

In the Polymers & Fluids segment, products include:

- •adhesives for industrial, construction and consumer purposes;
- •chemical fluids which clean or add lubrication to machines;
- •epoxy and resin-based coating products for industrial applications;
- •hand wipes and cleaners for industrial applications; and
- •pressure-sensitive adhesives and components for telecommunications, electronics, medical and transportation applications.

This segment primarily serves the general industrial, construction, maintenance, repair and operations and automotive aftermarket markets.

The results of operations for the Polymers & Fluids segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

	Three M	onths Ended	Nine M	onths Ended

Operating Revenues

Revenues increased 5.3% and 15.0% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to an increase in base revenues and revenues from acquisitions. The effect of currency translation was unfavorable in the third quarter but remained favorable for the year-to-date period. Acquisition revenue was primarily the result of the purchase of four Latin American adhesive businesses in 2009. Total base revenues increased in the third quarter and year-to-date periods due to recovery in many end markets served by the worldwide polymers and fluids businesses. Worldwide base revenues for the fluids businesses increased 3.7% and 9.6% in the third quarter and year-to-date periods, respectively, while base revenues for the worldwide polymers businesses increased 4.4% and 8.4%, respectively, in the same periods.

Operating Income

Operating income increased \$4.1 million and \$117.0 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to the increase in base revenues described above, lower restructuring costs and 2009 year-to-date goodwill and intangible asset impairment charges. During the first quarter of 2009, a \$60.0 million goodwill impairment charge was taken against the goodwill of the pressure sensitive adhesive reporting unit. Base margins increased 10 and 400 basis points in the third quarter and year-to-date periods, respectively, primarily due to

the positive leverage effect of the increase in base revenues and benefits of restructuring projects, offset in the third quarter by unfavorable selling price versus material cost comparisons.

DECORATIVE SURFACES

Businesses in this segment produce decorative surfacing materials for furniture, office and retail space, countertops, flooring, and other applications.

In the Decorative Surfaces segment, products include:

- •decorative high-pressure laminate for furniture, office and retail space and countertops;
- •high-pressure laminate flooring; and
- •high-pressure laminate worktops.

This segment serves the commercial construction, renovation construction and residential construction markets.

The results of operations for the Decorative Surfaces segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

	Three M	onths Ended	Nine N	Months Ended

Operating Revenues

Revenues were flat in the third quarter of 2010 versus 2009, as the unfavorable effect of currency translation offset the 3.1% increase in base revenues. Revenues increased 1.3% in the year-to-date period primarily due to a modest increase in base revenues and a year-to-date favorable effect of currency translation. Base revenues increased 5.0% and 2.2% for the North American laminate businesses in the third quarter and year-to-date periods, respectively,

primarily due to improvement in the office equipment end market. Base revenues for the flooring business declined 57.4% and 25.4% in the third quarter and year-to-date periods, respectively, as the Company is in the process of closing its flooring business. International base revenues increased 4.9% and 0.7% in the third quarter and year-to-date periods, respectively, primarily due to improvements in Asian markets.

Operating Income

Operating income decreased \$0.7 million and \$8.5 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to higher operating costs and increased restructuring costs. Base margins were flat in the third quarter as the positive leverage effect of the increase in base revenues was offset by higher operating expenses. For the year-to-date period, base margins decreased as a second quarter fixed asset impairment, unfavorable depreciation comparisons, and unfavorable selling price versus material cost comparisons offset the benefits of restructuring projects and the positive leverage of the increase in base revenues.

ALL OTHER

This segment contains all other operating segments.

In the All Other segment, products include:

- •equipment and related software for testing and measuring of materials and structures;
- •plastic reclosable packaging for consumer food storage;
- •plastic reclosable bags for storage of clothes and home goods;
- •plastic consumables that multi-pack cans and bottles and related equipment;
- •plastic fasteners and components for appliances, furniture and industrial uses;
- •metal fasteners and components for appliances and industrial applications;
- •swabs, wipes and mats for clean room usage;
- •foil, film and related equipment used to decorate consumer products;
- •product coding and marking equipment and related consumables;
- •paint spray and adhesive dispensing equipment;
- •static and contamination control equipment; and
- •line integration, conveyor systems and line automation for the food and beverage industries.

This segment primarily serves the general industrial, food and beverage, consumer durables, electronics and food institutional/restaurants markets.

The results of operations for the All Other segment for the third quarter and year-to-date periods of 2010 and 2009 were as follows:

Operating Revenues

Revenues increased 18.6% and 17.4% in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to an increase in base revenues and revenues from acquisitions, partially offset in the third quarter by the unfavorable effect of currency translation. The acquisition revenue is primarily due to the purchase of two consumer packaging businesses and a marking business. Base revenues increased 9.9% and 7.3% in the third quarter and year-to-date periods, respectively, for the consumer packaging business largely as a result of increased revenues in the graphics and decorating end markets. Base revenues for the industrial plastics and metals businesses improved 18.6% and 17.8% in the third quarter and year-to-date periods, respectively, due to increased demand for domestic appliances. Base revenues increased 8.9% and 3.8% in the third quarter and year-to-date periods, respectively, for the test and measurement businesses due to increased demand for capital equipment. Base revenues increased 31.0% and 16.1%, respectively, for the finishing businesses due to improved international end market demand.

Operating Income

Operating income increased \$36.7 million and \$152.2 million in the third quarter and year-to-date periods of 2010, respectively, versus 2009 primarily due to growth in base revenues. Base margins increased 110 basis points in the third quarter as the positive leverage effect of the increase in base revenues was partially offset by unfavorable selling price versus material cost comparisons and higher operating expenses. For the year-to-date period, base margins increased by 370 basis points as benefits from past restructuring projects offset the unfavorable selling price versus material cost comparisons. In addition, lower restructuring costs increased total operating margins 140 and 130 basis points in the third quarter and year-to-date periods, respectively. Acquisitions diluted total operating margins 60 and 70 basis points in the third quarter and year-to-date periods, respectively.

AMORTIZATION OF INTANGIBLE ASSETS

Amortization expense increased to \$159.1 million in the first nine months of 2010 versus \$152.1 million in the first nine months of 2009, due to intangible amortization related to newly acquired businesses.

IMPAIRMENT OF GOODWILL AND OTHER INTANGIBLE ASSETS

During 2009, the Company changed the date of its annual goodwill impairment assessment from the first quarter to the third quarter. The Company performed an impairment assessment of goodwill and indefinite-lived intangible assets in the third quarter of 2010 which resulted in immaterial intangible asset impairment charges. Total goodwill and intangible asset impairment charges by segment for the nine months ended September 30, 2009 were as follows:

(In thousands)	Nine Months Ended					
	September 30, 200					
Transportation	\$	14,414				
Industrial Packaging		386				
Food Equipment		46				
Power Systems & Electronics		24,766				
Polymers & Fluids		60,416				
All Other		1,969				
	\$	101,997				

Impairment of goodwill and other intangible assets was \$102.0 million in the first nine months of 2009, primarily due to goodwill impairment charges in the first quarter of 2009 related to the pressure sensitive adhesives reporting unit of \$60.0 million and the PC board fabrication reporting unit of \$18.0 million. A goodwill impairment charge of \$12.0 million was recorded in the third quarter of 2009 related to the truck remanufacturing reporting unit.

See the Goodwill and Intangible Assets note for further details of the impairment charges.

INTEREST EXPENSE

Interest expense increased to \$131.4 million in the first nine months of 2010 from \$121.0 million in the first nine months of 2009 primarily due to interest on the 6.25% and 5.15% notes issued in March 2009, partially offset by lower interest related to the 5.75% notes repaid at maturity in March 2009 and lower commercial paper borrowings and rates.

OTHER INCOME (EXPENSE)

Other income (expense) was income of \$27.6 million for the first nine months of 2010 versus expense of \$13.0 million in 2009, primarily due to gains on disposal of operating affiliates and gains on investments in 2010 versus losses in 2009.

INCOME TAXES

The effective tax rate for the first nine months of 2010 was 32.2% which included the discrete tax charges of \$21.9 million in the first quarter of 2010 related to the Patient Protection and Affordable Care Act and Health Care and Education Reconciliation Act. The effective tax rate for the first nine months of 2010 decreased compared to 38.9% for the first nine months of 2009. The decrease in the effective tax rate resulted primarily from the impairment of non-deductible goodwill and discrete tax adjustments recorded in the first nine months of 2009.

The Company is litigating its dispute with the Australian Tax Office over the treatment of an intercompany financing transaction between the U.S. and Australia. The Company's dispute was heard before the Federal Court of Australia in September 2010. The Company expects a judgment by the end of 2010. The Company has recorded its best estimate of the exposure for this audit; however, depending upon the outcome, the Company could have a favorable or unfavorable impact on its tax provision of approximately \$173.2 million. See the Income Tax note for further details regarding this matter.

INCOME FROM CONTINUING OPERATIONS

Income from continuing operations was \$1.1 billion (\$2.25 per diluted share) in the first nine months of 2010 compared to the 2009 income from continuing operations of \$473.9 million (\$0.95 per diluted share).

FOREIGN CURRENCY

The weakening of the U.S. dollar against foreign currencies in 2010 increased operating revenues for the first nine months of 2010 by approximately \$202 million and increased net income by approximately 6 cents per diluted share.

DISCONTINUED OPERATIONS

Loss from discontinued operations was \$34.3 million in the first nine months of 2009 primarily due to the loss on sale of the Click Commerce industrial software business of \$29.6 million.

LIQUIDITY AND CAPITAL RESOURCES

The Company's primary sources of liquidity are free operating cash flows and short-term credit facilities. Management continues to believe that internally generated cash flows will be adequate to service debt, continue to pay dividends, to finance internal growth and to fund small to medium-sized acquisitions.

The primary uses of liquidity are:

- dividend payments the Company's dividend payout guidelines were revised in the third quarter of 2010 from 25% to 35% of the last two years' average income from continuing operations to 30% to 45% of the last two years' average free operating cash flow;
 - acquisitions; and
- any excess liquidity may be used for share repurchases. The Company's open-ended share repurchase program allows it flexibility in achieving the targeted debt-to-capital ratio.

Cash Flow

The Company uses free operating cash flow to measure normal cash flow generated by operations that is available for dividends, acquisitions, share repurchases and debt repayment. The Company believes this measure is useful to investors in evaluating our financial performance and measures our ability to generate cash internally to fund Company initiatives. Free operating cash flow is a measurement that is not the same as net cash flow from operating

activities per the statement of cash flows and may not be consistent with similarly titled measures used by other companies.

Summarized cash flow information for the third quarter of 2010 and 2009 was as follows:

On August 20, 2007 the Company's Board of Directors authorized a stock repurchase program, which provides for the buyback of up to \$3.0 billion of the Company's common stock over an open-ended period of time. In the first nine months of 2010, the Company repurchased approximately 8.1 million shares of its common stock at an average price of \$43.29 per share. As of September 30, 2010 there are approximately \$871.0 million of authorized repurchases remaining under this program.

Return on Average Invested Capital

The Company uses return on average invested capital ("ROIC") to measure the effectiveness of its operations' use of invested capital to generate profits. The Company believes that ROIC is a meaningful metric to investors in evaluating the Company's financial performance and may be different than the method used by other companies to calculate ROIC. Invested capital represents the net assets of the Company, excluding cash and cash equivalents and outstanding debt, which are excluded as they do not represent capital investment in the Company's operations. Average invested capital is calculated using balances at the start of the year and at the end of each quarter. For the third quarter and year-to-date periods of 2010 and 2009, ROIC was as follows:

	Three Mor	nths Ended	Nine Months Ended		
(Dollars in thousands)	Septem	iber 30	September 30

Annualized return on average invested capital	16.6 %	12.7 %	15.5 %	8.7 %

The 390 basis point increase in ROIC in the third quarter of 2010 was the result of after-tax operating income increasing 34.3%, primarily due to an increase in base business, while average invested capital increased slightly.

The 680 basis point increase in ROIC for year-to-date 2010 was the result of after-tax operating income increasing 81.2%, primarily due to an increase in base business, while average invested capital increased slightly.

In the first quarter of 2010, the Company recorded a discrete tax charge of \$21.9 million. The ROIC calculation has been adjusted to exclude this item to improve comparability and better reflect the return on invested capital for the periods presented. A reconciliation of the tax rate as reported to the tax rate used above is as follows:

(Dollars in thousands)			Iı	ncome from

As adjusted	\$	1,777,190	\$	1,673,399	\$	517,119	30.9%

In the first quarter of 2009, the Company incurred significant charges for the impairment of goodwill and intangible assets of \$90.0 million that was mostly non-deductible and discrete tax items of \$27.8 million. The ROIC calculation has been adjusted to exclude these items to improve comparability and better reflect the return on invested capital for the 2009 year-to-date period presented above. A reconciliation of 2009 year-to-date operating income and the tax rate as reported to operating income after taxes and tax rate used above is as follows:

Working Capital

Management uses working capital as a measurement of the short-term liquidity of the Company. Net working capital at September 30, 2010 and December 31, 2009 is summarized as follows:

(Dollars in thousands) Current assets:	S	eptember 30, 2010	Г	December 31, 2009	Inc	crease/(Decrease)
Cash and equivalents	\$	1,649,101	\$	1,318,772	\$	330,329

Net working capital	\$	3,113,499	\$ 2,838,957	\$ 274,542	
Current ratio		1.97	2.00		

Short-term debt increased primarily due to issuances of commercial paper to fund stock repurchases, dividend payments, and general corporate purposes partially offset by excess cash flows generated from operations used to pay down commercial paper. Inventories and trade receivables increased primarily as a result of increased sales and acquisitions, partially offset by foreign currency translation. Other current liabilities decreased primarily due to lower income taxes payable and foreign currency translation.

Debt

Total debt at September 30, 2010 and December 31, 2009 was as follows:

(Dollars in thousands)	Sept	ember 30, 2010	Dece	ember 31, 2009
Short-term debt	\$	644,883	\$	213,681
Long-term debt		2,737,374		2,914,874
Total debt	\$	3,382,257	\$	3,128,555
Total debt to capitalization		27.6%)	26.2%

The Company had outstanding commercial paper of \$552.5 million at September 30, 2010 and \$135.5 million at December 31, 2009.

In June 2009, the Company entered into a \$2.0 billion Line of Credit Agreement with a termination date of June 11, 2010. This line of credit was replaced on June 11, 2010 by a \$1.0 billion Line of Credit Agreement with a termination date of June 10, 2011 and a \$1.0 billion Line of Credit Agreement with a termination date of June 11, 2013. No amounts were outstanding under these facilities at September 30, 2010.

The Company believes that based on its current free operating cash flow, debt-to-capitalization ratios and credit ratings, it could readily obtain additional financing if necessary. The Company's targeted debt-to-capital ratio is 20% to 30%, excluding the impact of any larger acquisitions.

FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that may be identified by the use of words such as "believe," "expect," "plans," "strategy," "prospects," "estimate "project," "target," "anticipate," "guidance," and other similar words, including, without limitation, the adequacy of internally generated funds and credit facilities, the meeting of dividend payout objectives, the ability to fund debt service obligations, the availability of additional financing, expected contributions to the Company's pension and postretirement plans and the estimated timing and amount related to the resolution of tax matters. These statements are

subject to certain risks, uncertainties, and other factors, which could cause actual results to differ materially from those anticipated. Important risks that may influence future results include (1) a further downturn in the markets served by the Company, (2) changes or deterioration in international and domestic business and economic conditions, particularly in North America, Europe, Asia or Australia, (3) acquisition of businesses could negatively impact profitability and return on invested capital, (4) defined benefit pension plans are subject to financial market risks, (5) the unfavorable impact of foreign currency fluctuations and costs of raw materials, (6) decreases in credit availability, (7) an interruption in, or reduction in, introducing new products into the Company's product lines, (8) an unfavorable environment for making acquisitions, domestic and international, including adverse accounting or regulatory requirements and market values of candidates, and (9) unfavorable tax law changes and tax authority rulings. The risks covered here are not all inclusive and given these and other possible risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results. A more detailed description of these risks is set forth in the Company's Form 10-K for 2009.

The Company practices fair disclosure for all interested parties. Investors should be aware that while the Company regularly communicates with securities analysts and other investment professionals, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Shareholders should not assume that the Company agrees with any statement or report issued by any analyst irrespective of the content of the statement or report.

Item 4 – Controls and Procedures

The Company's management, with the participation of the Company's Chairman & Chief Executive Officer and Senior Vice President & Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a–15(e)) as of September 30, 2010. Based on such evaluation, the Company's Chairman & Chief Executive Officer and Senior Vice President & Chief Financial Officer have concluded that, as of September 30, 2010, the Company's disclosure controls and procedures were effective.

In connection with the evaluation by management, including the Company's Chairman & Chief Executive Officer and Senior Vice President & Chief Financial Officer, no changes in the Company's internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the quarter ended September 30, 2010 were identified that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

Part II – Other Information

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

On August 20, 2007, the Company's Board of Directors authorized a stock repurchase program, which provides for the buyback of up to \$3.0 billion of the Company's common stock over an open-ended period of time.

Share repurchase activity under this program for the third quarter was as follows:

			Total Number of Shares	Maximum Value of Shares
