REGAL-BELOIT CORPORATION REPORTS

THIRD QUARTER EPS OF \$.26

October 22, 2003 (Beloit, WI): James L. Packard, Chairman and CEO of REGAL-BELOIT CORPORATION (AMEX: RBC), today reported third quarter 2003 net income of \$6.5 million and earnings per share of \$.26, both virtually unchanged from the second quarter of this year.

The Company's third quarter net income was 8.5% below the \$7.1 million, or \$.28 per share, earned in the third quarter of 2002. Net sales of the Company were \$159.0 million in the third quarter, increasing 3.2% from \$154.0 in comparable 2002 and 2.8% sequentially from the second quarter this year. Electrical Group sales of \$114.5 million were 6.3% higher than third quarter 2002 and also represented a 5.1% sequential increase over the second quarter of 2003. Mechanical Group sales in the third quarter were \$44.5 million, reflecting a 3.9% decrease from 2002's third quarter and a 2.8% decline from the second quarter this year. (See accompanying financial schedules for additional segment data.)

Net income for the first nine months of 2003 was \$19.1 million, or \$.76 per share, 4.4% lower than \$19.9 million, or \$.83 per share, earned in 2002's first nine months. Net sales for the first nine months of 2003 and 2002 were \$467.0 million and \$459.3 million, respectively, a 1.7% increase in 2003.

Income from operations for the Company was \$11.6 million in the third quarter of 2003, 3.6% lower than the second quarter of this year. Income from operations as a percentage of net sales ("operating margin") decreased to 7.3% in the third quarter from 7.8% in the second quarter. The reduction was due to a decrease in operating margin in our Electrical Group to 7.0% in the third quarter from 7.6% the previous quarter. The Electrical Group margin reduction was due primarily to unfavorable start-up manufacturing variances as we closed two plants and consolidated production into four of our other facilities.

The Company's cash flow from operations improved to \$19.7 million in the third quarter from \$15.0 million in comparable 2002. A combination of earnings, depreciation and a \$6.6 million reduction in inventories during the third quarter accounted for 94% of the cash flow from operations. After capital spending of \$4.5 million in the quarter (\$14.4 million year-to-date) and regular dividends, we were able to reduce debt by \$12.5 million to \$206.8 million at September 30, 2003. Our capitalization ratio (Debt divided by Total Capital) at quarter's end was 34.3%.

"While there were many positives in the third quarter, we were not without our challenges," said Mr. Packard. "Among the quarter's positives were a sequential increase in our power generation and electric motor sales, increased operating cash flow permitting \$12.5 million of debt reduction, and our ability to sustain our level of net income and EPS. Among the challenges we faced were continued lack of any sustained improvement trend in orders in our electric motors operations and in several of our mechanical operating units, and start-up inefficiencies associated with our plant consolidation programs."

"Based on favorable economic news we have all been hearing for several months now and the positive expectations of increasing numbers of our OEM and distributor customers, we continue to anticipate improved demand for our products in 2004. While the full benefits of our plant consolidation programs are taking somewhat longer to realize than we had expected, we still expect to fully achieve these benefits during 2004."

"The outlook for the fourth quarter of this year continues uncertain," added Mr. Packard. "We still have not seen sufficiently positive order trends to support our saying that our markets have turned up. But based on input from a number of OEM customers that they are not increasing their new orders in the fourth quarter, but are continuing to reduce their inventories and strengthen their year-end balance sheets, we now expect to see a typical fourth quarter reduction in sales. We view this as another temporary delay before improved market demand. Given the softer expectations for fourth quarter sales and increases in commodity prices, we are estimating fourth quarter earnings to be in the range of \$.22 - .26 per share."
